DEPARTMENT OF THE AIR FORCE

BY ORDER OF THE
SECRETARY OF THE AIR FORCE

AIR FORCE CATALOG 36-2223
1 OCTOBER 1996

Personnel

USAF FORMAL SCHOOLS

This catalog contains information on formal education and training available to military personnel and civilian employees of the Air Force and Air Reserve Components (ARC) and other government agencies. It identifies procedures for submitting, coordinating, and publishing changes, and it outlines actions of Headquarters US Air Force (HQ USAF) and major commands (MAJCOMs). It explains training terms, security clearance requirements, quality control standards, travel information, fund citations, orders preparation, administrative procedures, school information, and reporting instructions. It contains course announcements for active formal courses conducted to support HQ USAF and ARC requirements. Each course announcement gives the number and title, where course is conducted, a course description, prerequisites, and quota control. It includes equipment tables for flying and survival training. This catalog is used by schools and activities responsible for courses, headquarters staffs at all echelons, military personnel flights (MPF), civilian personnel flights, education services centers, Air Education and Training Command (AETC) enlisted specialty training (EST) advisory service, and finance and transportation activities at base level. This catalog also establishes the US Air Force Professional Continuing Education (PCE) Program (short courses 20 weeks or less in length). HQ USAF and Air University (AU) actions and procedures are outlined to establish courses and set admission requirements. This catalog also describes how MAJCOMs, under certain conditions, can program, budget, and conduct short courses to meet command mission requirements in specific functional areas. Continuing education courses for civilian employees other than those provided in this catalog are outlined in AFI 36-401, *Civilian Training and Development*. Policy directives and instructions affecting this catalog must be coordinated through HQ USAF/DPPE, Washington DC 20330-1040.

This catalog is affected by the Privacy Act of 1974. DD Form 2005, **Privacy Act Statement - Health Care Records**, will be used when completing AF Form 702, **Individual Physiological Training Record**, AF Form 1042, **Medical Recommendation for Flying or Special Operational Duty**, SF Form 88, **Report of Medical Examination**, and SF Form 600, **Health Record - Chronological Record of Medical Care**. Other forms that are subject to the provisions of AFI 37-132, *Air Force Privacy Act Program*, and are required by this publication contain a Privacy Act Statement. The requester will show and, upon request, give the affected individual a Privacy Act Statement for each form, format, or form letter used to collect personal data before asking for the information. Authority to obtain this information is 44 U.S.C. 3101, 10 U.S.C. 8012, and EO 9397. Revised material is indicated by a ★.

PART ONE—GENERAL INFORMATION	**Paragraph**	**Page**
Chapter 1—Headquarters US Air Force Procedures and Instructions		
Section A—Overview		
Purpose and Content	1.1	1-1
Overall Instructions	1.2	1-1
Processing Requests for Training	1.3	1-2
Security Assistance Training Program (SATP)	1.4	1-2
Responsibilities	1.5	1-2
MAJCOM Responsibilities for Related Education and Training Programs	1.6	1-2
AETC Responsibilities	1.7	1-3
Unit-Level Responsibilities	1.8	1-3
Section B—General Procedures		
Training Course Data Required	1.9	1-3
Submission of Change Request	1.10	1-3
Using the Course Index	1.11	1-4
Medical Training	1.12	1-4
Reserve Forces Training	1.13	1-4
Personnel Security Prerequisites	1.14	1-4
Control of Quotas	1.15	1-5
Attendance Status	1.16	1-5
Reporting Instructions	1.17	1-5

Supersedes AFCAT 36-2223, 1 April 1996

	Paragraph	Page
Documentation of Course Completion	1.18	1-6
Classification Upon Graduation	1.19	1-6
Section C—US Air Force Professional Continuing Education (PCE) Program		
Overview	1.20	1-6
HQ USAF Deputy Chief of Staff, Personnel, Director of Personnel Programs (HQ USAF/DPP), Responsibilities	1.21	1-7
HQ Air University (AU/RP) Responsibilities	1.22	1-7
Responsibilities of Other MAJCOMs	1.23	1-7
Procedures for Establishing New Professional Continuing Education Courses	1.24	1-7
Procedures for Discontinuing a Professional Continuing Education Course	1.25	1-7
Procedures for Establishing Annual Course Quotas	1.26	1-8
Procedures for Nominating Students to Professional Continuing Education Courses	1.27	1-8
Professional Continuing Education Program Evaluation and Review	1.28	1-8
Program Procedures	1.29	1-8
MAJCOM Continuing Education Short Course Programs	1.30	1-8
Direct Communication	1.31	1-8
Acquisition Enhancement (ACE) Mandatory Students	1.32	1-8
Section D—Officers		
General Prerequisites and Administrative Procedures	1.33	1-8
Quality Control Standards	1.34	1-9
Clothing and Equipment Requirements	1.35	1-10
Application or Selection for Training	1.36	1-10
Withdrawal and Reentry of Officers	1.37	1-11
Section E—Airmen		
Quality Control Standards	1.38	1-11
Specialty Qualifications, Prerequisites, and Administrative Procedures	1.39	1-12
Clothing and Equipment Requirements	1.40	1-13
Application or Selection for Training	1.41	1-13
Line Numbers	1.42	1-13
Withdrawal of Airmen	1.43	1-13
Section F—Civilians		
General Prerequisites	1.44	1-14
Requests for Training (Air Force Civilians)	1.45	1-14
Training of Civilian Employees of US Armed Services Other Than the US Air Force	1.46	1-14
Non-DOD Federal Employees	1.47	1-15
Non-Federal Government Civilians	1.48	1-15
Requirement for Employee's Agreement To Continue in Service	1.49	1-15
Overtime Pay for Travel	1.50	1-15
Withdrawal of Civilians	1.51	1-15
Air Force Training for Contractor Personnel	1.52	1-15
Section G—Orders and Funding		
General Travel Instructions	1.53	1-16
Travel Status	1.54	1-17
Instructions for Citing Travel Funds	1.55	1-17
Acquiring Fund Citations for Travel Orders	1.56	1-18
Transportation of Airman Dependents and Household Goods	1.57	1-19
Section H—Responsibilities for Air Force Schools and Faculty Boards		
Purpose and Operation of Air Force Schools	1.58	1-19
Specific Responsibilities for Air Force Schools	1.59	1-19
Faculty Board (Other Than Flying Training)—Requirement, Function, Membership, and Proceedings	1.60	1-20
Training Review Board (Undergraduate Flying, Space, and Survival Training) —Requirement, Function, Membership, and Proceedings (Applies to AETC only, 325TRS excluded)	1.61	1-21
Distribution of Board Proceedings	1.62	1-21

Headquarters USAF Procedures and Instructions

(OPRS: HQ USAF/DPPE and HQ AETC/TTP)

Section A—Overview

1.1. Purpose and Content:

1.1.1. Air Force training and education programs provide individuals with skills and knowledge that qualify them to perform effectively in their duty assignments. Skill development of individuals is accomplished through a set of career patterns that involve various combinations of formal training, education, and practical experience. This catalog defines procedures for the conduct of formal training and education programs, including the establishment and operation of Air Force schools. It also provides procedures for selection of personnel for formal courses and relevant data for preparing orders, reporting instructions, and equipment.

1.1.1.1. Chapter 1 describes overall training and education program procedures, including the responsibilities of HQ USAF and MAJCOMs, for conducting formal schools and courses. Subsequent chapters contain specific MAJCOM procedures, fund citations, reporting instructions, and listings for those formal courses conducted or managed by the MAJCOMs or field operating agencies (FOA). Procedures in these chapters are based on basic policy established in AF Policy Directive 36-22.

1.1.1.2. This catalog contains course announcements conducted or administered by the Air Force and AFRES and is a reference document for the Air Force, DoD, other military services and government agencies, and the security assistance programs. Certain types of training, especially those that are unique or conducted one time, are not listed in this catalog (see AFI 36-2201, *Developing, Conducting, and Managing Training*, and AFI 36-401, *Employee Training and Development*).

1.1.2. Air Force formal courses fall into two broad categories that differ significantly in funding, management, and relationship to overall Air Force requirements:

1.1.2.1. *Category 1* activities have general application throughout the Air Force. They serve the needs of many different types of units and organizations. These are described in chapters 2, 3, and 4 of this catalog. These activities involve the training or education of individuals in formal courses conducted by *organizations whose primary mission is training or education* (these are Air Education and Training Command (AETC), which includes Air University (AU) and the Human Systems Center (HSC) of Air Force Materiel Command (AFMC)). Funding for category 1 programs is carried in Major Force Program (MFP) Eight (MFP 8).

1.1.2.2. *Category 2* training and education activities are those conducted by MAJCOMs and their operational units. These activities are incidental to the unit or MAJCOM—primarily combat or combat support missions. These include combat crew training squadrons (CCTS), aircrew transition training, weapons controller training, and certain types of specialized technical qualification training. These are listed in the individual MAJCOM and FOA chapters of this catalog. They are funded with internal resources of each MAJCOM and its corresponding MFP.

1.2. Overall Instructions:

1.2.1. Except for the unique unit training and education requirements described in paragraph 1.1.2.2, Air Force training and education activities must be funded and operated within the framework of MFP 8. *Operational MAJCOMs and FOAs will not duplicate existing category 1 formal courses*. Similarly, all new training and education requirements must be closely examined for potential as category 1 programs before committing non-MFP 8 resources to training activities.

1.2.2. AETC is the responsible Air Force agency to arrange for training required from DoD, other services, and governmental agencies.

1.2.3. The announcement of courses in this catalog does not constitute the basic authority for the approval, activation, or changes in the duration of such courses. Not all courses conducted or used by the Air Force are required to be announced in this catalog.

1.2.4. This catalog is updated quarterly (January, April, July, and October). Air Force Staff or FOAs who need to change a course announcement or general procedure send a request for change by letter to the command responsible for conducting or administering the course concerned. That command submits the final change request according to procedures in paragraph 1.10. Change requests must be received in HQ AETC/SCMY by 1 October for the January edition, 1 January for the April edition, 1 April for the July edition, and 1 July for the October edition.

1.2.5. Personnel selected to attend any formal training or education course (associated with PCS, TDY, TDY-en route-PCS, or at current duty station), whether listed in AFCAT 36-2223 or not, will incur an active duty service commitment (ADSC). ADSC or retainability requirements are not cited in any portion of a course announcement in this catalog. AFI 36-2107, *Active Duty Service Commitments*, are the final authorities on ADSC. Paragraphs 1.32.1 and 1.32.2 and 1.38.8 of this catalog contain applicable retainability requirements for education or training courses. Before beginning training, consult the supporting military personnel flight (MPF), MAJCOM, or AFPC monitor to resolve any question relating to ADSCs.

1.2.6. Use AFMAN 36-2105, *Officer Classification*, and AFMAN 36-2108, *Airman Classification*, to select personnel to attend courses listed in chapters 2 and 3.

1.2.6.1. For AFSC-awarding courses (basic and lateral), base selection of personnel on the related specialty descriptions cited in the classification manuals. Lateral courses may cite additional prerequisite criteria pertaining to related specialties. (AFSC-awarding courses are identified in the course title when the AFSC to be awarded is shown following the course duration.)

1.2.6.2. For non-AFSC-awarding courses, prerequisites in course announcements are in addition to the specialty description requirements for the specific AFSC designated in the course number. ***NOTE***: All prerequisites are mandatory unless specified as desirable.

1.2.7. For AFSC-awarding courses, the career field specifications cited in the classification directives (AFMANs 36-2105 and 36-2108) will not be duplicated, supplemented, or changed in the prerequisites to course announcements cited in this catalog. ***NOTE***: If the specialty description does not contain the prescribed information (AFMANs 36-2105 and 36-2108), take classification action to change the specialty description accordingly. Do not use course prerequisites in lieu of the job descriptions to cite specialty requirements.

1.2.8. If the prerequisites listed in the AFMAN 36-2108 specialty description for an AFSC conflicts with the related AFCAT 36-2223 course announcement, the following guidance applies:

1.2.8.1. AFMAN 36-2108 is the sole authority governing prerequisites for entry into a career ladder.

1.2.8.2. Course announcements give course prerequisites the training agency has determined essential for completing course objectives within the established timeframe.

1.2.8.3. Normally, the AFSC-awarding course prerequisites will not exceed standards in AFMAN 36-2108. However, when training efficiencies result, training agencies may establish alternative qualification patterns or "tracks" for groups of students with differing characteristics.

1.2.8.4. This catalog announces only those courses with a large and continuing flow. Therefore, some announcements may include additional prerequisites in the courses designed for uniquely different target populations. This catalog does not contain all of the alternative training opportunities from which appropriate career qualification patterns can be developed.

1.2.8.5. Training agencies are responsible for providing formal training support to personnel who qualify for entry into the specialty under AFMAN 36-2108, but are ineligible for courses announced in this catalog. This may be done by waiver of course prerequisites, special individual assistance, combining existing formal training courses, or special training under AFI 36-2201.

1.2.8.6. Activities that need AFSC-awarding training for AFMAN 36-2105 or AFMAN 36-2108 qualified personnel who do not meet course announcement prerequisites should request qualification pattern instructions from the training agency. Send an information copy to HQ AETC/TTP.

1.3. Processing Requests for Training:

1.3.1. **HQ USAF and AFRES**. Process requests for attendance in formal courses through the individual's supporting MPF. Process training requests for civilian personnel through the CPF. For Air Force Reserve, AFRES unit members submit requests for formal schools through the unit training office. Individual mobilization augmentees (IMA) submit training requests to the MAJCOM, FOA, or single manager of assignment, for processing to ARPC/DRMP.

1.3.2. **Other Military Services**. Requests for training in courses administered by AETC are processed in accordance with interservice training regulation, AFI 36-2230, *Interservice Training (Joint)*, AR 35-9, OPNAVINST 1500.27B, MCO 1580.7B, and through an annual screening process administered by AETC.

★1.3.3. **Other DOD and Government Agencies**. Requests for training in courses conducted by AETC are accomplished through an annual screening process administered by AETC. Communications are directed to 2 AF/DOP, 721 Hangar Road, Ste 102, Keesler AFB MS 39534-2804. ***NOTE***: Reference 1.3.2 and 1.3.3 above, send requests for quotas in the Air Force PME programs and the AFIT resident program to HQ USAF/DPPE, Washington DC 20330-5060. Process quotas in other courses through the quota control agency listed in the course announcement.

1.4. Security Assistance Training Program (SATP). The SATP provides professional and technical training for international military trainees. International trainees are administered under AFI 16-105, *Joint Security Assistance Training (JSAT) (Joint)*. SATP courses are identified by a military assistance articles and services list (MASL) number in the course announcement heading. In the course announcements, the term MAP following the course title indicates the course is for international military trainees only. A MAP duration is listed only if course duration for international students differs from that for US students. In addition to the English comprehension level (ECL), some courses will have the letters SA or SR after the ECL score. This means that specialized English training is advised or required. (See terms explained in attachment 2.) International trainees must meet all mandatory course prerequisites including equivalent US military grade, except international officers may be permitted to attend Air Force enlisted courses (AFJI 16-105). Disclosure of security information to international trainees must be in accordance with AFJI 16-105 and AFI 16-201, *Foreign Disclosure of Classified and Unclassified Military Information to Foreign Governments and International Organizations*. International trainees are required to have in their possession, or to have made arrangements for acquiring, all seasonal and special items of clothing and equipment listed in their specific course announcement.

1.5. Responsibilities:

1.5.1. HQ USAF/DPPE. HQ USAF/DPPE provides policy oversight.

1.5.2. HQ AETC/TTP:

1.5.2.1. Provide guidance on the purpose and content of this catalog.

1.5.2.2. Approve all new course announcements (see paragraph 1.10).

1.5.2.3. Review and approve requests for changes involving policy or procedures. If such policy or procedures involve other Air Force directives cited in this catalog, coordinate the change through the OPR for the directive concerned.

1.6. MAJCOM Responsibilities for Related Education and Training Programs. Each MAJCOM designates a command OPR in the staff function responsible for the education or training program being conducted or administered by the command. The command OPR:

1.6.1. Maintains current information and course announcements for the command concerned.

1.6.2. Sends AF Forms 69, **Request for Change to USAF Formal School Catalog/Issuance of PDS Codes**, for all course announcements (new, changed, or deleted) according to paragraph 1.10.

1.6.3. Sends changes to policy, procedures, or requirements cited according to paragraph 1.10. ***NOTE***: The designated command OPR identified in the command or FOA title of each chapter must either initiate or endorse changes before they will be made to this catalog.

★1.7. AETC Responsibilities. HQ AETC/TT has delegated publications production management responsibility to HQ AETC/SCMY for this catalog, to include development, after-issuance review, and record set maintenance. To accomplish this, HQ AETC/SCMY:

1.7.1. Provides standards governing writing, illustration, typography, and design. These standards generally are as prescribed in AFI 37-160 Vol 1.

1.7.2. Obtains approval from HQ AETC/TTP to publish the final manuscript.

1.7.3. Publishes the catalog from approved manuscripts. Obtains illustrations and performs editorial refinements according to approved style and format.

1.7.4. Submits approved reproducible copy to SAF/AAI for obtaining printing services and for distribution through publications distribution channels.

1.7.5. Establishes, maintains, and disposes of record sets as prescribed in AFI 37-160 Vol 1, *The Air Force Publications and Forms Management Programs—Developing and Processing Publications*, and AFMAN 37-139, *Records Disposition - Standards*.

1.8. Unit-Level Responsibilities:

1.8.1. The MPF notifies or selects military personnel and prepares DD Form 1610, **Request for Authorization for TDY Travel of DOD Personnel**, for those attending courses listed in this catalog.

1.8.2. The CPF processes, coordinates, or monitors civilian personnel instructions and TDY orders. Civilian employee travel must be in accordance with this catalog and the JTR, volume II.

★1.8.3. Unit commanders ensure military personnel selected for mission readiness training comply with AFI 40-502, *Air Force Weight Management Program*.

Section B—General Procedures

1.9. Training Course Data Required:

1.9.1. **Course Data Requirements**. Data is needed to assign, publish, and maintain a list of unique course titles, course numbers, and ADPE CO-820 codes for courses of instruction included in the automated officer and airman Personnel Data System (PDS) described in AFMAN 36-2125, *Military Personnel Strength Accounting Methods*, and to publish these and other related data in AFR 700-20, Vol I, *Air Force Data Dictionary*. The ADPE CO-820 (PDS) codes are required to maintain training data in the individual's master personnel file. Training data is required in the master personnel file for managing assignments, tracking active duty service commitments (ADSC), and preventing duplication of training for individuals.

1.9.2. **Courses Requiring ADPE CO-820 (PDS) Codes.** Any technical training course that is to be entered into the master personnel files must have a PDS code. This includes MAJCOM courses and AETC formal training courses taught at resident centers, provided by Distance Learning, field training detachments (FTD), contractor facilities, or by mobile training teams (MTT) at the home station. Certain courses do not impact personnel management concerns and are not appropriate to list in the master personnel file. Therefore, the following types of courses or training will not be assigned a PDS code:

1.9.2.1. Ancillary training.

1.9.2.2. Local orientation and familiarization.

★1.9.2.3. On-the-job training (including formal classroom, exportable courses (other than initial skill and type 6 job site training), and Extension Course Institute).

1.9.2.4. Local seminars or conferences providing training or education but not designed as formal courses.

1.9.2.5. Professional and military schools. (Although these courses are used in personnel management, they are covered by ADPE PR-560.)

1.9.3. **Requirements for Obtaining PDS Codes**. The MAJCOM course owner or training manager completes all sections of AF Form 69 and forwards the form according to paragraph 1.10. The following data must be provided on all courses before a PDS code is issued:

1.9.3.1. Location (where course is taught) (Section IV).

1.9.3.2. Prerequisites. (Briefly describe prerequisites for attending the course in the course announcement portion of Section IV.)

1.9.3.3. Brief description of the course. Do not exceed 1000 characters. Use standard abbreviations that would be understood by nontechnical personnel (Section IV).

1.9.3.4. Who controls quotas? (This is included as last line in course announcement.)

1.9.4. **Course Revisions**. Revisions that do not change the course length or significantly alter the course objectives may continue to use the same course number and PDS code. Changes that affect course length and content so that significantly different skills are learned or the ADSC is changed will be given a new PDS code even if the title is not changed.

1.9.5. **Publishing Course Information in AFCAT 36-2223**. Establishing a course in the Air Force Training Management System (AFTMS) Training Course Data File (TCDF) does not automatically result in the course being added to this catalog. See paragraph 1.10 for instructions for completing AF Form 69.

1.10. Submission of Change Request:

1.10.1. **General Instructions**:

1.10.1.1. Only change requests (AF Forms 69) received from MAJCOM OPRs will be accepted for publishing in this catalog. Change requests received direct from units will be returned without action.

★1.10.1.1.1. Send change requests for chapter 3 to 2 AF/DOPS, 721 Hangar Road, Ste 102, Keesler AFB MS 39534-2804, for technical and space operations training; HQ AETC/XOT for flight and survival training; and HQ AETC/SGAT for medical training conducted by AETC.

1.10.1.1.2. Send changes to HSC courses through HQ USAFSAM/DA.

1.10.1.1.3. Send changes to courses conducted by AU through HQ AU/RP.

1.10.1.1.4. For commands other than AETC, HSC, and AU, send changes through the command OPR (usually DPAT).

1.10.1.1.5. Change requests to chapters 11, 12, and 13 must be submitted by the OPRs designated within those chapters.

1.10.1.2. MAJCOM OPRs send change requests concerning policy requirements, security clearance guidance, and procedures cited in this chapter to HQ AETC/TTPP in manuscript form (AFI 37-160 Vol 1, chapter 3). The letter of transmittal should include a summary of changes. If a change relates to other directives cited in the catalog, process the letter through the OPR for the directive concerned.

★1.10.1.3. MAJCOM OPRs send changes pertaining to administrative or reporting instructions in their respective chapters direct to HQ AETC/SCMY.

1.10.1.3.1. Submit changes and corrections so the appropriate chapter, paragraph, etc., can easily be identified.

1.10.1.3.2. If the changed part is lengthy, submit it typed and double spaced.

1.10.1.3.3. If the change is minor, do NOT include unchanged text along with the material to be changed. If you have the material stored electronically, it is tempting to simply print out and send the new version; but others must then compare each word against the current copy to find the changed portion. Be specific about what is to be changed.

1.10.1.3.4. When changing a table, mark out the material to be deleted and write in the material to be added. Use arrows, cut-and-paste, or whatever is necessary to make it clear. Retype the entire table only when it is changed completely. Refer to 1.10.1.3.3.

1.10.1.4. Cutoff dates for submitting changes are in paragraph 1.2.4. Late submissions are held for the next issue.

1.10.2. **Course Announcements**. Although this catalog is intended to contain most of the formal training and education activities conducted in the Air Force, the space for course announcements is limited. Generally, the following types of activities are not listed in this catalog: seminars, work-study programs (except those conducted by AFIT), meetings, correspondence or career development courses (CDC), and type 1 special training courses (see chapter 3, paragraph 3.1.1).

1.10.2.1. The training activity or command responsible for conducting or administering a particular course initiates an AF Form 69 to establish a new course or change an existing one.

1.10.2.2. The command OPR:

1.10.2.2.1. Ensures all required coordination within the command has been obtained.

1.10.2.2.2. Reviews each AF Form 69 (or other change request) and works with the originator to resolve discrepancies. Ensures applicable sections of AF Form 69 are completed correctly.

★1.10.2.2.3. Sends the completed AF Form 69 to 2 AF/DOPR, if applicable, and finally to HQ AETC/SCMY (see paragraph 1.10.2.3 below). 2 AF/DOPR adds the PDS code to the AF Form 69 and forwards the form to HQ AETC/SCMY.

★1.10.2.3. HQ AETC/SCMY:

1.10.2.3.1. Reviews every AF Form 69 for required elements and edits for correct grammar and format.

1.10.2.3.2. Enters the course announcement, or change to an existing announcement, in the appropriate chapter. The date in the course announcement heading signifies entry of a new course or the latest change to an existing course.

1.10.2.3.3. Before publishing, provides HQ AETC/TTP a copy of the proposed catalog for approval.

1.10.3. **Security Clearance and Investigative Requirements**. Requests for new course announcements or revisions must clearly state security clearance and investigative requirements for each course. List type of investigative requirements for each course. List type of investigation (national agency check, background investigation, etc.), clearance (Secret, Top Secret, etc.), and special access requirements (SIOP, CNDWI, etc.). If requirements differ by time period, such as for class start date, course completion, or end assignment, specify investigative, clearance, and special access requirements for each phase.

1.10.4. **Prompt Coordination**. Requests for changes or revisions must be expeditiously handled at all levels, including the Air Staff. Maximum staffing time at each coordinating organization (unit, MAJCOM, AETC, or Air Staff) is 5 workdays.

1.11. Using the Course Index. Attachment 1 lists all course announcements published in this catalog. It is divided into categorical sections (see page A1-1). Flying courses are listed alphabetically by command. Specialty and technical courses are listed numerically by AFSC sequence, followed by alphanumeric courses. Use AFMANs 36-2105 and 36-2108 to find the utilization or career field number of a course for which you have no number.

1.12. Medical Training. Medical training information, guidance, and announcements are located as follows: chapter 2 contains information on HSC, chapter 3 includes 882d Training Group (School of Health Care Sciences), chapter 4 includes AFIT medical training, and chapter 5 discusses medical education programs.

1.13. Reserve Forces Training:

1.13.1. Procedures for Reserve Forces training are in chapter 10.

1.13.2. Members of the ARC are eligible for most of the technical and professional training listed in the various chapters. For specialized courses unique to Reserve Forces, see chapter 10.

1.14. Personnel Security Prerequisites. The following requirements apply to assignment of students for training in basic, advanced, lateral, supplemental, and contract courses conducted by AETC, civilian institutions, and other departmental agencies for which the prerequisite is a security clearance, access to sensitive compartmented information (SCI), access to single integrated operational plan—extremely sensitive information (SIOP-ESI), certification for critical or controlled nuclear weapon positions under the personnel reliability program (PRP), and the personnel security investigation (PSI). AFI 31-501, *Personnel Security Program Management*, contains detailed requirements and procedures for requesting personnel security investigations, granting clearances, and authorizing access. The following is specific information pertinent to establishing and complying with personnel security prerequisites.

1.14.1. Personnel security investigations to satisfy training requirements are:

1.14.1.1. Special background investigation (SBI) when training requires:

1.14.1.1.1. SCI access.

1.14.1.1.2. SIOP-ESI access.

1.14.1.2. Background investigation (BI) when training requires:

1.14.1.2.1. Access to Top Secret information.

1.14.1.2.2. Certification for a critical nuclear weapon position (PRP).

1.14.1.2.3. Limited access to Secret or Confidential information for non-US nationals.

1.14.1.3. National agency check (NAC) or entrance national agency check (ENTNAC) when training requires:

1.14.1.3.1. Access to Secret or Confidential information.

1.14.1.3.2. Certification for a controlled nuclear weapon position (PRP).

1.14.1.3.3. Unescorted entry to Air Force restricted areas.

1.14.2. US citizenship is required when training requires access to:

1.14.2.1. Cryptographic information classified Top Secret or Secret.

1.14.2.2. Critical nuclear weapon design information (CNWDI).

1.14.2.3. SCI.

1.14.2.4. SIOP-ESI.

1.14.3. For students who are accepted for school with an interim clearance or before completion of the required investigation, the Air Force security clearance office (AFSCO) will immediately notify the commander of the base at which the school is located if the report of investigation reveals derogatory information that would adversely affect a security determination or result in withdrawal of interim clearance.

1.14.4. Orders sending students to courses having a personnel security prerequisite should clearly state that the specific prerequisite has been fulfilled; for example, Clearance-Top Secret. If a PSI has been initiated but not completed, orders should state the PSI type and date submitted. Confirmation that personnel security prerequisites have been met will be made by electrical transmission when use of mail channels does not ensure that orders will arrive in time. All students' security prerequisite information must be verified by an electrically transmitted message or letter to the training location NLT 7 duty days before class start date.

1.14.5. Clearances granted by appropriate authorities within other DoD agencies will be accepted as specified in AFI 31-501.

1.14.6. If personnel security prerequisites are not satisfied before start of classes, do not enter the student into training involving access to classified information. Keep the student at the school, and send a discrepancy report to the commander who published the orders, requesting action necessary to satisfy security requirements or requesting disposition instructions. Send an information copy of the discrepancy report to the MAJCOM from which the student was received.

★1.14.7. Screen persons being considered for courses that require eligibility for access to SCI, are prerequisites to courses requiring eligibility for access to SCI, or lead to end assignments requiring eligibility for access to SCI according to AFI 31-501 before final selection for training. Request SBIs before departure for training. SBI packages for retrainees and mission readiness training students should be sent to DIS by the losing organizations at least 45 days before class start date.

1.14.8. Paragraph 1.14 in its entirety does not apply to international students training under security assistance training program (SATP). AFIs 16-105 and 16-201 give specific instructions regarding disclosure authority for classified information.

1.14.9. Criteria for specifying security clearance or investigative requirements for course prerequisites will be as follows:

1.14.9.1. Requirements for security clearance will be stated in terms specifically needed for the courses involved; for example, Secret clearance required to enter course, Top Secret clearance required by the 14th week of instruction, Secret clearance plus eligibility for CNWDI access required before training, etc.

1.14.9.2. Mandatory clearance or investigative prerequisites for award of an AFSC will not be published in AFCAT 36-2223. Mandatory specifications for award of AFSC are published in the classification directives (AFMANs 36-2105 and 36-2108); they will not be duplicated in AFCAT 36-2223.

1.14.9.3. All security clearance or investigative requirements for new courses and changes to existing courses will be coordinated with the MAJCOM security police staff before being sent to HQ USAF. Enter this coordination in item 1 of AF Form 69. See paragraph 1.10.4 for additional guidance on security requirement listings in course announcements.

1.15. Control of Quotas. The activity responsible for control of quotas is shown in each course announcement. Address questions about quotas or fund citations for quotas to the activity indicated. MAJCOM and unit training monitors process all by-name personnel actions on quota requests through the classification and training unit of their servicing MPF for validation.

1.16. Attendance Status:

1.16.1. Except for pipeline airmen, personnel attend courses of less than 20 calendar weeks duration in TDY or TDY-en route status. For courses of 20 weeks duration or more, personnel attend in PCS status. Course duration is shown in the title of each course listed in this directive or is contained with other information describing course contents. The period of training is the actual period during which students receive instructions. Accordingly, the active duty status of students during holiday periods or during certain calendar periods when classes are suspended is merely incident to the course of instruction and does not serve to extend course duration.

1.16.2. When students attend two or more courses at one location of 20 weeks or more total duration, the status of attendance is PCS or PCS-without-PCA.

1.16.3. For students training in a PCS-without-PCA status, training activities normally notify the command of assignment 45 days before graduation date of the authority for training, leave desired and leave address, and other pertinent data. The command of assignment directs the student's unit of assignment to publish reassignment orders and send copies to the training center at least 3 weeks before the scheduled graduation date. When a student requires an assignment *before* scheduled graduation date (usually because of proficiency advancement), the training activity requests an end assignment by electronic communication. The MAJCOM provides the assignment by electronic communication so the training activity can publish the orders.

1.17. Reporting Instructions. To achieve minimum essential TDY before class start dates, MAJCOMs continuously monitor reporting instructions for Air Force formal schools and courses under their jurisdiction. They ensure minimum essential TDY by restricting early reporting to newly activated Air Force formal schools and their command courses. Late reporting or administrative deficiencies may result in students being returned to their home station without benefit of training.

1.17.1. To ensure orders reflect the exact reporting date, activities preparing the orders review the appropriate command chapter's quota allocation information and individual course announcement.

1.17.2. Records maintenance activities comply with administrative instructions in course announcements, the appropriate command chapter, and AFI 36-2102, *Base-Level Relocation Procedures*, table 7-2, to ensure TDY personnel are not missing any documents.

1.17.3. When briefing personnel destined for Air Force formal schools or MAJCOM courses, MPF personnel emphasize the importance of meeting the not-earlier-than (NET) date as specified in the orders and explain the provisions of AFI 36-3003, *Military Leave Program*, concerning early reporting for a TDY or PCS course with a fixed starting date.

1.18. Documentation of Course Completion:

1.18.1. A diploma, certificate of completion, or AF Form 1256, **Certificate of Training**, is provided to each student upon successful completion of an Air Force resident course of instruction. (This includes AWC associate programs, ACSC nonresident seminar programs, and all MAJCOM-unique programs or computer-directed training system (CDTS) courses.)

1.18.2. A document confirming course completion is sent to the servicing MPF for each student who successfully completes an Air Force resident nondegree course of instruction (except officer PME) or CDTS course. The document is used to update the PDS and then is destroyed. The document must include the student's name, military or civilian grade, SSN, course number and title, PDS code, duration in academic weeks and days, and course completion date. The requirement may be met through the use of: a duplicate diploma; duplicate course completion certificate; duplicate AF Form 1256; DD Form 1556, **Request, Authorization, Agreement, Certification of Training and Reimbursement**; Enrollment and Requisition Request for DOD Management Education and Training Program Courses; graduation orders; or AF Form 475, **Education/Training Report**. An official transcript serves as the source document for personnel who have completed degree programs. Transcripts are filed in the officer education transcript repository. Individuals should contact the records manager at the base where the training was conducted if they are trying to obtain records that have been retired (that is, AETC Form 156, **Student Record of Training**).

1.18.2.1. Graduates who are TDY or PCS-with-TDY-en route are given a duplicate copy of the course completion document and instructed to hand-carry the copy to the servicing or gaining MPF.

1.18.2.2. DPMPC computer updates the course completion and then destroys the document.

1.18.3. For CDTS courses, the training system manager (TSM) ensures compliance with paragraph 1.18.2 above.

1.19. Classification Upon Graduation. If an AFSC is awarded upon course completion, that AFSC is included in the heading of the course announcement.

Section C—US Air Force Professional Continuing Education (PCE) Program

1.20. Overview. The PCE program provides education courses to meet educational requirements in specific functional areas. These areas are identified by Air Staff functional managers, MAJCOMs, and FOAs. PCE courses are conducted by AU at Maxwell AFB, Maxwell AFB-Gunter Annex, AFIT at Wright-Patterson AFB, and selected civilian institutions. The courses are provided by the following:

1.20.1. **The Ira C. Eaker College for Professional Development (CPD)**. The CPD is located at Maxwell AFB and operates nine schools: the USAF First Sergeant Academy, the Commanders' Professional Development School, Air Force Judge Advocate General School, Professional Military Comptroller School, Air Force Human Resource Management School, Technology Management School, USAF Chaplain Service Institute, International Officer School, and the Academic Instructor School.

1.20.2. **The College of Aerospace Doctrine, Research, and Education (CADRE)**. CADRE is located at Maxwell AFB and Maxwell AFB-Gunter Annex. CADRE conducts four courses at Maxwell: the Joint Force Air Component Commander (JFACC) Course, the Joint Flag Officer Warfighting Course (JFOWC), the Contingency Wartime Planning Course (CWPC), and the Joint Doctrine Air Campaign Course (JDACC). In addition, CADRE conducts the Extension Course Institute (ECI) Course for Authors which is held at Gunter.

1.20.3. **The Air Force Institute of Technology (AFIT)**. The institute's resident schools are located at Wright-Patterson AFB. AFIT also contracts with civilian institutions for instruction that is not provided in-house. References to AU schools and courses in this catalog include AFIT.

1.20.3.1. The Civil Engineer and Services School (AFIT/CE). This school offers courses in engineering and management applications associated with the civil engineering career field. It also offers other courses for which the Director of Engineering and Services, HQ USAF, is the office of primary responsibility (OPR).

1.20.3.2. The School of Engineering (AFIT/EN) offers courses in two PCE programs. The first program consists of a funded set of courses in such topics as communications engineering, digital technology, and laser optics for military and civilian engineers. The second is a joint program conducted with AFSC and designed for scientists and engineers stationed at Wright-Patterson. AFIT takes part in developing this joint program by:

1.20.3.2.1. Providing membership on AFSC boards and committees that govern the program.

1.20.3.2.2. Consulting with AFSC personnel to determine courses to be presented and to develop course curricula.

1.20.3.2.3. Providing educational facilities to meet the needs of the program, but not at the expense of AFIT degree and other programs.

1.20.3.2.4. Conducting courses or providing direction within available faculty expertise and resources.

1.20.3.2.5. Issuing certificates of completion to personnel who satisfactorily complete courses.

1.20.3.3. The School of Systems and Logistics (AFIT/LS) conducts Air Force and DOD PCE courses in systems, logistics, and management topics. The DOD 5010.16C, *Defense Management Education and Training (DMET) Catalog*, is the official source of information for DOD courses offered through AFIT/LS.

1.20.3.4. The School of Civilian Institution Programs (AFIT/CI). This organization provides for attendance of Air Force personnel in courses at various civilian education institutions. The educational programs generally coincide with regular university curricula. Special courses may be developed when Air Force-unique requirements exist.

1.21. HQ USAF Deputy Chief of Staff, Personnel, Director of Personnel Programs (HQ USAF/DPP), Responsibilities. Serves as the Air Staff point of contact for all matters pertaining to Air Force education and training.

1.22. HQ Air University (AU/RP) Responsibilities:

1.22.1. Develops admission standards for AU courses.

1.22.2. Evaluates curricula.

1.22.3. Manages resources to ensure maximum flexibility in meeting essential Air Force educational needs.

1.22.4. Reviews the PCE program to ensure that material, manpower, and fiscal support are adequate.

1.22.5. Approves the annual PCE program.

1.22.6. Approves requests for new PCE courses (paragraph 1.24).

1.22.7. Coordinates with HQ USAF/DPP and all AU PCE schools to develop, conduct, and administer new or modified programs authorized to meet Air Force and DoD educational requirements.

★1.22.8. Sends recommended AFCAT 36-2223 changes to HQ AETC/SCMY, the OPR for production management.

1.22.9. Manages the Air Force Training Management System (AFTMS) for schools located on the Maxwell-Gunter complex (MAGUC), and provides AFTMS guidance and technical support for the AFIT registrar and AFIT schools.

1.23. Responsibilities of Other MAJCOMs:

1.23.1. Conduct command-unique courses (see paragraph 1.30).

1.23.2. Ensure all requests for new courses to be conducted by AU are channeled through the MAJCOM headquarters OPR for the management of PCE quotas.

1.24. Procedures for Establishing New Professional Continuing Education Courses. Requests to start new PCE courses will be submitted using an AF Form 19, **Request to Establish a New Professional Continuing Education Short Course**, by HQ USAF functional managers, MAJCOMs, FOAs, USAFR, and ANG. Except for requests from Air Staff functional managers, AF Forms 19 will be processed through the MAJCOM or FOA DP, quota manager, and training/education office before being sent to HQ AETC/EDR, Maxwell AFB, for action. HQ USAF functional managers will send requests directly to HQ AETC/EDR with an information copy to HQ USAF/DPPE and HQ AETC/TTP. AF Forms 19 may be sent any time a need is identified. For new courses, the following procedures apply:

1.24.1. Requester submits AF Form 19 to HQ AETC/EDR. HQ AETC/EDR ensures MAJCOM DP (or HQ USAF functional manager for Air Staff-oriented requests) has validated the requirement for the proposed course and provides an information copy to HQ USAF/DPPE and HQ AETC/TTP.

1.24.2. HQ AETC/EDR reviews request to ensure the proposed course meets PCE curriculum requirements and forwards request to appropriate Air University (AU) school for evaluation.

1.24.3. AU school reviews request for capability to conduct course and:

1.24.3.1. Determines whether an existing course could meet the needs of the request.

1.24.3.2. Determines whether course can be conducted with current resources.

1.24.3.3. Determines whether course can be contracted to a civilian institution with specified additional resources.

1.24.3.4. If unable to conduct proposed course with current resources, specifies required additional resources (lists resource requirements; i.e., manpower, funding, facilities, equipment, etc.).

1.24.3.5. Forwards final response to HQ AETC/EDR.

1.24.4. Upon receipt of evaluated AF Form 19 and AU school assessment, HQ AETC/EDR forwards AF Form 19 and AU school assessment to the Air Force career field manager for the course (if applicable) to determine:

1.24.4.1. Total requirements per year.

1.24.4.2. If resources are available to fund the requested number of quotas per year and, if so, list the fund source.

1.24.4.3. If course is to be user funded and, if so, the approximate number of quotas per year user will fund.

1.24.4.4. If offsets will be provided within functional manager's existing program and the number of quotas funded per year.

1.24.4.5. If resources will have to be acquired through AFERB. (See AFI 36-2302, *Professional Development*, for description of the AFERB.)

1.24.4.6. If the course will be funded through the POM process and if so identify who the sponsor/authority agency will be. (If POM avenue is to be pursued, identify and coordinate submission with HQ AETC/EDR.)

1.24.5. Upon completion of the above information, the Air Force career field manager returns the AF Form 19 and AU school assessment to HQ AETC/EDR.

1.24.6. Upon receipt of the AF Form 19 from the Air Force career field manager, HQ AETC/EDR, in coordination with other AU staff agencies (that is, RPB, RPX, and XOO) determines whether to approve or disapprove the new course.

1.24.6.1. If course is approved and resources are to be provided through offsets or POM, HQ AETC/EDR suspenses further actions and tracks until completion.

1.24.6.2. If no additional resources are required to conduct the course, HQ AETC/EDR advises requester of course approval and anticipated start date and sends an information copy to HQ USAF/DPPE.

1.24.6.3. For approved courses, HQ AETC/EDR requests the originator submit an AF Form 69 to obtain a PDS code and announce course availability in this catalog.

1.24.7. If course is disapproved, HQ AETC/EDR forwards a letter with rationale for disapproval and a copy of the signed AF Form 19 to the requester, school, and HQ USAF/DPPE.

1.25. Procedures for Discontinuing a Professional Continuing Education Course. Any MAJCOM commander or Air Staff functional manager who desires to discontinue a PCE course should submit an AF Form 69 to HQ AETC/EDR. Additionally, AU schools and course directors may identify courses for suspension or elimination due to limited requirements or low utilization rates by submitting an AF Form 69 to HQ AETC/EDR.

1.26. Procedures for Establishing Annual Course Quotas:

1.26.1. **Air Force Agencies**. Annual quota requirements should reflect required education for which individuals can be identified and released during a specific year to attend AU PCE courses. Requirements are sent to AU through the AFTMS. These requirements are sent according to the annual screening schedule and instructions published in the AFTMS program outline. To determine requirements, use this catalog and the classification and career development directives.

1.26.2. **Non-Air Force Agencies**. AU schools send a screening letter or message to non-Air Force agencies (users without on-line AFTMS capability) to obtain PCE requirements for the next fiscal year.

1.26.3. **AU Schools**. AU schools conducting PCE courses determine quotas for all users. The Maxwell-Gunter schools submit AU Forms 58 to HQ AU/RP by 1 May; AFIT schools submit their quotas to AFIT/XP. This allows AU/RP and AFIT/XP sufficient time to enter course quotas, class schedules, and reporting instructions into the AFTMS by 1 June preceding the fiscal year for which the quotas are assigned.

1.27. Procedures for Nominating Students to Professional Continuing Education Courses. Nominating procedures are outlined in chapter 4 of this catalog, the AFTMS user's documentation, and DMET Catalog (DOD 501O.16C). Individual schools may also publish additional guidance.

1.28. Professional Continuing Education Program Evaluation and Review. Evaluating and reviewing courses and programs conducted by AU schools will be consistent with sound, acceptable education practices. Policies and procedures concerning evaluations can be found in AFI 36-2601, *Air Force Personnel Survey Program*, AFI 36-2201, *Developing, Managing, and Conducting, Training*, AFMAN 36-2234, *Instructional System Development* (formerly AFM 50-2), and AFH 36-2235 series.

1.29. Program Procedures:

1.29.1. **Student Responsibilities**. Students attending PCE courses in residence or on site must have no assigned duties that could interfere with their studies.

1.29.2. **Active Duty Service Commitment (ADSC)**. An individual who attends an AU course incurs an ADSC according to AFI 36-2107.

1.29.3. **Costs and Reimbursements**. Specific cost and reimbursement information and temporary duty fund citations are contained in chapter 4. Fund citations are also provided through the AFTMS.

1.30. MAJCOM Continuing Education Short Course Programs. These programs include courses that are less than 20 weeks duration and conducted by MAJCOMs. Each MAJCOM programs, budgets, funds, and administers the short course education required to meet its command-unique mission requirements. Education requirements for civilian employees in such courses are provided according to AFI 36-401, *Civilian Training and Development*. These educational programs must be approved at MAJCOM level. The request to the MAJCOM for such an education program must be signed by the commander having assignment authority over the personnel to be educated, and must include:

1.30.1. A brief description of the education required.

1.30.2. A statement that education is not available from another service or through AU PCE courses.

1.30.3. Justification showing that education is essential to accomplish the required duties.

1.30.4. Place, date, duration, total number to be educated, and recommended annual quota.

1.31. Direct Communication. Send communications through command channels on all matters concerning plans, policy, program changes, and new programs that affect AU. Direct communications are authorized between AU, DOD, HQ USAF, MAJCOMs, FOAs, and representatives of other military services (with an information copy to HQ USAF/DPPE and HQ AETC/TTP) to exchange information and administer the approved programs. This authorization includes communication on such matters as:

1.31.1. Course development.

1.31.2. Education requirements.

1.31.3. Allocation of quotas.

1.31.4. Student selection.

1.31.5. Evaluation of AU PCE graduates.

1.31.6. Onsite seminar education programs.

1.32. Acquisition Enhancement (ACE) Mandatory Students. To enhance the professionalism of the acquisition work force, the services have jointly developed a management approach to attain the desired level of professionalism. Very broadly defined, the acquisition work force consists of those military and civilian persons involved in the process by which all equipment, facilities, and services are planned, designed, developed, acquired, maintained, and disposed of within or for the DOD.

1.32.1. This work force is divided into three levels:

1.32.1.1. LEVEL I - GS-05 through GS-08, Officer O-1 through O-3, Enlisted E-1 through E-7.

1.32.1.2. LEVEL II - GS-09 through GS-12, Officer O-3 and O-4, Enlisted E -7 through E-9.

1.32.1.3. LEVEL III - GS/GM-13 and above, Officer O-4 and above.

1.32.2. The mandatory courses for career development in the acquisition work force are based on DOD Directives 5000.52 and 5000.52-M.

Section D—Officers

1.33. General Prerequisites and Administrative Procedures:

1.33.1. Officers may apply for attendance at any technical or flying training course if they meet the prerequisites. Prerequisites shown in course announcements are mandatory unless specified as desirable. Waiver of prerequisites may be requested if appropriate. As a minimum, officer applicants for technical or advanced flying training must have sufficient retainability to complete the ADSC incurred by reason of training (AFR 36-51).

1.33.2. Officers directed to attend technical or flying training courses should have sufficient retainability after graduation to complete the ADSC incurred by reason of such training in accordance with AFI 36-2107. Waivers of this requirement are granted only by HQ AFPC/DPAPP, and only when it is clearly shown the training serves the best interests of the Air Force. If officers are then directed into flying or technical training, their established date of separation is not changed even though it precedes the termination date of the incurred ADSC.

1.33.3. Officers serving on a stabilized tour of duty or period of directed duty are not eligible to enter into technical training unless such training is required in the performance of their assignments.

1.33.4. The following specialty qualifications, prerequisites, and administrative requirements must be met before entry into a training course:

1.33.4.1. Officer students for technical or advanced flying training courses must meet the specialty qualifications in AFMAN 36-2105

for the Air Force specialty concerned and prerequisites listed in the related course announcements.

1.33.4.2. Officers reporting for advanced flying training courses in TDY or PCS status must have completed all appropriate flying requirements listed in AFI 11-401, *Flight Management*, before reporting for training.

1.33.4.3. Officer students attending professional specialty courses conducted by the HSC's USAFSAM and Wilford Hall USAF Medical Center must meet the specific prerequisites stated in course descriptions.

1.33.4.4. A student's complete and current field personnel record must be sent to the training school as prescribed in AFI 36-2608, *Military Personnel Records Systems*, when the student is assigned in PCS status. (If the training base does not receive the pertinent records, it is authorized direct communication with the parent or former organization.) Noncompliance with paragraph 1.33.4.2 above is the basis for refusing enrollment according to section H, paragraph 1.57.3.3.

1.33.5. Officers detailed to advanced flying training must have five copies of their orders with them upon arrival at training bases. MPFs must send three copies of orders to arrive at training bases at least 7 days before reporting dates.

1.33.6. Officers qualified in a specialty or serving a directed duty may apply for retraining to coincide with completion of directed duty or active duty service commitment resulting from training previously received. HQ AFPC/DPA career management teams or assignment officers and force control personnel review each application in this category to determine whether retraining should be authorized in the best interests of the Air Force and individual officers.

1.33.7. Rated officers arriving for a course who have not completed the flying requirements of AFI 11-401 must be reported by electrical message to the parent or former organization. The parent organization must pick up these officers within 24 hours after notification. Parent organizations will be asked to qualify officers and return them to schools within 72 hours after pickup. Exceptions to the 72-hour limitation may be made with approval of HQ USAF if undue hardship would result for officers concerned because of the amount of flying time necessary to qualify them. Qualification training may be performed at any base under the jurisdiction of the commands concerned and normally must be performed as close to the training schools as possible. Training bases must report such cases, to include pertinent data, direct to parent or former organizations with information copies to MAJCOMs concerned and HQ AFPC/DPAO, Randolph AFB TX 78150-6001.

1.33.8. Officers normally are not returned from overseas to attend training courses. Authority to return officer personnel to the CONUS for mission essential training is delegated to the MAJCOM. Further delegation is not authorized. Officers selected for training should have at least 1 year's foreign service remaining after completion of training. Return of personnel to CONUS for training must be minimized by requesting training en route for projected gains to satisfy the requirement. Send one copy of orders returning officer personnel to CONUS for training to HQ AFPC/DPAO.

1.33.9. MAJCOMs may authorize officers to return from oversea stations to attend aircraft conversion training of less than 9 weeks if selected officers will have at least 1 year's oversea service remaining upon completion of training. Approval authority may not be redelegated, but prior approval must be obtained from HQ AFPC/DPAO to return pilots to the CONUS for training to satisfy unit conversions. Furnish grades, names, SSN and DEROS of pilots; type of aircraft in which they will be trained; and length of training involved.

1.33.10. Graduates of technical courses are not permitted to later attend the same or similar courses. Refresher training may be requested as special or supplemental training through the MAJCOM according to directed MAJCOM procedures. Graduates of HSC supplemental courses may request attendance at these courses as often as necessary to keep current and proficient in the job to which they are assigned subject to limitations on reattendance shown in the specific course announcement.

1.33.11. The MPF informs officers who apply for more than one of the courses listed in AFCAT 36-2223 that one application does not take precedence over the other. Officers who have applications in process, have been nominated by command for training, or have been accepted for a training course must not be reassigned without HQ AFPC/DPAS/DPAO approval.

1.33.12. An officer is ineligible to apply for technical training after the assignment selection date (ASD) established for a PCS in accordance with AFI 36-2110, *Assignments*.

1.33.13. For officers who require specific training en route, requisitioning activities include training requirements in the special officer personnel requirement or AF Form 934, **Requisition for USAF Officer**, when submitted to HQ AFPC. Deferred requests for en route training will, in most cases, cause delayed arrival of the trainee.

1.33.14. Eliminees from basic flying and technical training courses are an allocated accession resource of AFPC and are not eligible to apply for courses or special duty assignments while in this status. Specific procedures are established for reporting eliminees to HQ AFPC/DPAPF1 for reassignment.

1.34. Quality Control Standards. Commanders must take prompt action to identify officers selected or nominated for education or training whose current performance or conduct will affect their ability to perform adequately or complete the education or training course. Training is limited to officers whose continuation on active duty is relatively certain and who have potential for advancement in grade and responsibility. Commanders review all factors that are questionable in nature and would challenge the propriety for education or training and recommend approval or disapproval. The limited number of training spaces available dictates spaces be allocated to officers with the greatest potential. Quality control procedures are intended to prevent individuals who are unable or unwilling to meet Air Force standards from attending training.

1.34.1. Automatic education and training ineligibility factors are:

1.34.1.1. A rating of "does not meet standards" on the most recent OPR, or the most recent OPR contains comments that reflect less than satisfactory performance or conduct.

1.34.1.2. Member is subject of an AFOSI or law enforcement investigation (excluding normal security investigation).

1.34.1.3. Member is in military or civil confinement.

1.34.1.4. Member is AWOL or a deserter.

1.34.1.5. Member is serving a sentence as a result of court-martial.

1.34.1.6. Member was recently convicted by court-martial, is pending trial by court-martial, or was recently convicted or pending trial in civil court for other than minor traffic offenses.

1.34.1.7. Member is on the control roster. A selectee for education or training (such as flying or technical training, AFIT programs, PME, education with industry, or special training) who is placed on the control roster is immediately canceled from training or education. Report all facts pertinent to the case to HQ AFPC/DPAPP, Randolph AFB TX 78150-6001, by the most expeditious means.

1.34.1.8. Member is pending involuntary discharge.

1.34.1.9. Member is identified under the drug or alcohol rehabilitation program. Member remains ineligible until the rehabilitation program is successfully completed.

1.34.1.10. Unsatisfactory progress in the Weight Management Program (WMP) or failure to maintain body fat within the standards listed in AFI 40-502. For PME: member is ineligible if not within Air Force weight standards.

1.34.1.11. Normally, officers who have failed selection for promotion or have been deferred are not eligible for training courses of more than 30 days. Specific guidance is contained in AFI 36-2110.

1.34.1.12. Officers in promotion propriety status (for example, delay, not qualified for promotion to 1st Lt, removal).

1.34.2. Factors that do not automatically render a member ineligible, but for which the commander may elect to declare the member ineligible are:

1.34.2.1. Recently punished under Article 15; pending action under Article 15; or punishment, including any period of suspension, under Article 15 that has not been completed.

1.34.2.2. An unfavorable information file (UIF).

1.35. Clothing and Equipment Requirements:

1.35.1. Officers must have sufficient quantities of required uniform items to be appropriately dressed for all occasions. TDY students are not required to have mess dress uniforms unless the requirement is included in the course announcement.

1.35.2. Additional requirements for special clothing may be in each command's instructions or its course announcements.

1.36. Application or Selection for Training. The following procedures apply to advanced flying and advanced, basic, and specified lateral technical training courses. Undergraduate flying training application procedures are prescribed in AFI 36-2205, *Applying for Flying, Space, and Missile and Astronaut Training Programs*, and require submission of AF Form 215, **Officer Application for Training**, outside the APDS with specified attachments. Undergraduate space training application procedures are prescribed in AFI 36-2205.

1.36.1. Officers who meet specific and general prerequisites may apply for training by submitting a completed AF Form 2096, **Classification/On-the-Job Training Action**, through channels to the servicing MPF. AF Form 2096 will be prepared and processed according to AFMAN 36-2125. To establish identity as a training request and to preserve APDS flows and advantages, the servicing MPF updates DIN AQB with appropriate remarks (DIN AMU) to generate PTI 457 through APDS. Answers to the PTI requests for training will be returned through APDS by use of PTI 45G containing appropriate comments to reflect approval or disapproval. Submissions must make full use of "remarks card" capability to justify, clarify, or provide peculiarities of the situation pertinent to the request to assist in the evaluation and final decision. Recommendation for approval or disapproval is mandatory. Also submit AF Form 2096 to request training not involving DAFSC change (for example, 30AR staff courses, basic training not previously scheduled). Include explanation in "remarks."

1.36.2. For technical training schools requiring specific education or AFI 36-2104, *Nuclear Weapons Personnel Reliability Program*, qualifications, include certification that the applicant meets these prerequisites with the PTI submission. For technical training applications requiring SF 88, **Report of Medical Examination** (with the exception of normal color vision prerequisites), submit the PTI without requiring prior medical examination. If the application is approved, acceptance will be contingent upon completion of the examination and certification by the command surgeon using this authority (AFMAN 48-123, *Medical Examination and Medical Standards*. This procedure speeds up the flow of applications and reduces the workload on medical activities. Other factors often require disapproval of applications.

1.36.3. The conversion to APDS and AF Form 2096 in-system procedures eliminates dual channels for achieving the same purpose and provides a more efficient means of processing retraining actions. AF Form 215 will continue to be used for application for undergraduate flying training as required in AFI 36-2205. SF 88 is an integral part of all such applications and must be included with the application for training.

1.36.4. Applications (APDS) for technical training courses for which spaces are controlled by HQ AFPC are forwarded with appropriate recommendation for final decision notwithstanding recommendations of disapproval or requirements for waivers of prerequisites. Do not use AF Form 2096 to request advanced flying training courses, except for F-V5A-G and FB-111 courses. HQ AFPC or appropriate MAJCOM for advanced flying training considers or selects officers during the normal assignment cycle based on training quotas available. Quotas for advanced flying training will be determined through the rated distribution and training management (RDTM) process.

1.36.5. Use Air Force codes and course titles when sending requests for training if applicable. Select codes and titles from this catalog to ensure currency. ***NOTE***: Selection of code and title listings from AFR 700-20 Vol I often results in requests for training in courses that have been discontinued.

1.36.6. MAJCOMs must get HQ AFPC approval before assigning any rated officer to technical training schools if completion incurs further commitment or extension of tour in support duties. Send requests to HQ AFPC/DPAO. (***Exception:*** Technical training directed by HQ AFPC upon designation of rated officers for supplement duty.)

1.36.7. Send HQ AFPC/DPAME applications (APDS) for training courses in research from officers of the USAF Medical Service. Indicate in remarks whether or not officer desires full time in research activities.

1.36.8. Continue to send applications (AF Form 215) for training by ANG officers direct to the National Guard Bureau (NGB/TE). Procedures for ANG and AFRES are in chapter 10.

1.36.9. Officers may send individual training applications for basic, advanced, and lateral courses. These courses are identified by prefix letters of the course number as OB, OA, and OL. Officers may also send individual training applications for courses that do not have letter prefixes to the course number. Requests for training sponsored by AFIT must be submitted according to chapter 4.

1.36.10. Do NOT send individual training applications for supplemental technical (OZ and AZ) courses unless requested in course announcements. Quotas for most supplemental technical courses are determined by annual screening action conducted by AETC and HSC. Quotas for 3OZ and 3AZ courses are controlled by AETC and allocated to the command rather than the individual. HSC/DPI controls quotas for 5OZ and 5AZ courses conducted by HSC (unless indicated otherwise in course announcements) and allocates quotas to the command rather than the individual.

1.36.11. Do not send mission support requests direct to HQ AFPC. Requests of this nature involving mission support requirements must be processed to the MAJCOM according to MAJCOM-directed procedures. MAJCOMs may send requests for quotas in courses controlled by HQ AFPC any time the requirement exists. Names of students designated for training must be furnished.

1.36.12. Applications requiring MPF certifications are:

1.36.12.1. Applications for courses that require reliability screening under AFI 36-2104. These must include AF Form 286, **Personnel Reliability Certificate**, which is filed with the application at the MPF.

1.36.12.2. Prerequisites and special requirements listed in course announcements, such as test scores, physical examination standards (when already validated), vision requirements, quality control standards, and security clearance. These are evaluated by the MPF, and certification that applicant meets or has complied with all prerequisites is included in the PTI submission. Before certifying normal color vision for applicant not having a current AFSC in which normal color vision is required, MPFs must get a statement of normal color vision from the medical servicing facility maintaining the applicant's health records. Do not request medical statement or examination for applicants who currently hold an AFSC in which normal color vision was mandatory for award of the AFSC. This requirement remains in effect.

1.36.13. Applications for training following return to the CONUS from officers assigned overseas must be submitted 10 to 12 months before completion of oversea tours. MAJCOMs must not send any applications after the ASD prescribed by AFI 36-2110.

1.36.14. The following restrictions pertain to applications by students:

1.36.14.1. Officers are not eligible to apply for special assignment while attending advanced flying or technical training unless the directed duty assignments (DDA) acquired thereby can be discharged in the duty to which assignment is requested.

1.36.14.2. Officers are not eligible to apply for changes of courses while attending flying, space operations, or technical training.

1.37. Withdrawal and Reentry of Officers. The following instructions pertain to withdrawal of officers attending school in a TDY status, except those whose unit of assignment has been alerted for oversea duty:

1.37.1. The AETC Commander or HSC Commander is authorized direct communications with DOD agencies on matters pertaining to the withdrawal or reentry of an officer attending an AETC or HSC school in a TDY status. This authority may be delegated to commanders of training centers specified by the AETC Commander.

1.37.2. Determination of withdrawal, elimination, or reentry actions on officer students of technical and flying training courses is vested in the AETC Commander. This authority will not be delegated. For HSC medical training, this authority is granted to the HSC Commander and may be delegated to the commander of the school concerned.

1.37.3. Send information copies of withdrawal instructions to HQ USAF.

1.37.4. The commandant of the school from which the officer is being withdrawn determines whether officer's grades and time in school warrant the issuance of a certificate of satisfactory completion.

1.37.5. The following instructions pertain to officers assigned to units alerted for oversea assignment who are currently attending schools in a TDY status:

1.37.5.1. Officers in TDY status at schools conducted by Air Force, Army, Navy, or civilian companies may be withdrawn if their unit of assignment has been alerted for oversea movement.

1.37.5.2. If withdrawal is necessary, the student's base commander may telephone the commandant of the school and request the student be informed to be ready within 24 hours for transportation to his or her home station either by special airlift or the fastest means available. Confirm telephone conversation by electrical message within 48 hours. Send information copies to HQ USAF, HQ AETC, HQ HSC (if the course is conducted by HSC), MAJCOM headquarters, and numbered Air Force (or similar command) concerned.

1.37.5.3. The base commander making the request furnishes any special airlift required. When special airlift is not required, the school commandant returns the officer to the home station by the fastest means available.

1.37.5.4. If an officer's grade and time in school warrant such action, the commandant of a service school from which the officer is being withdrawn furnishes the officer or the base commander a certificate of satisfactory completion. If the officer is not qualified for such a certificate, the school commandant furnishes a written statement saying the officer was withdrawn without prejudice before course completion due to military necessity. If an officer is withdrawn from factory training, the base commander requests a certificate of satisfactory completion from the civilian company.

Section E—Airmen

1.38. Quality Control Standards. To accomplish the mission of the Air Force, all airmen must meet minimum quality standards. It is important to take prompt action to identify those airmen whose current performance or conduct do not meet Air Force standards. The commander must review all factors which are questionable in nature and should challenge the propriety for education or training and recommend approval or disapproval. Quality control procedures are intended to prevent individuals who are unable or unwilling to meet Air Force standards from attending training. The member will be removed from further consideration for education or training if one or more of the following factors occur between initial approval or selection for training and subsequent entry into training.

1.38.1. Automatic education and training ineligibility factors are:

1.38.1.1. An EPR that reflects less than satisfactory performance or conduct.

1.38.1.2. Member is the subject of an AFOSI or law enforcement investigation (excluding normal security investigation).

1.38.1.3. Member is in military or civil confinement.

1.38.1.4. Member is AWOL or a deserter.

1.38.1.5. Member is serving a sentence as a result of court-martial.

1.38.1.6. Member was recently convicted by court-martial, is pending trial by court-martial, or was recently convicted or pending trial in civil court for other than minor traffic offenses.

1.38.1.7. Member is on the control roster.

1.38.1.8. Member is pending involuntary discharge.

1.38.1.9. Member is identified under the drug or alcohol rehabilitation program. Member remains ineligible until the rehabilitation program is successfully completed.

1.38.1.10. Unsatisfactory progress in the WMP or failure to maintain body fat within the standards listed in AFI 40-502. For PME: Member is ineligible if not within Air Force weight standards.

1.38.1.11. Denial or revocation of NCO status.

1.38.1.12. An approved administrative discharge suspended for a period of rehabilitation or probation.

1.38.2. Factors that do not automatically render a member ineligible, but for which the commander may elect to declare the member ineligible are:

1.38.2.1. Recently punished under Article 15; pending action under Article 15; or punishment, including any period of suspension, under Article 15 that has not been completed.

1.38.2.2. An unfavorable information file (UIF).

1.38.2.3. Administrative demotion.

1.38.2.4. Withdrawal from OJT for cause.

1.39. Specialty Qualifications, Prerequisites, and Administrative Procedures. Air Force airmen entering Air Force technical or flying training schools and schools conducted by other services must meet the specialty qualifications in AFMAN 36-2108, and prerequisites for the particular course. Specialty qualifications in AFMAN 36-2108 for the Air Force specialty concerned and related prerequisites listed in the course announcements are mandatory unless specified desirable. Airmen selected for special training must comply with AFI 36-2201. Before certifying normal color vision for an applicant who does not have a current AFSC in which normal color vision is required, MPF must get a statement of normal color vision from the medical servicing facility maintaining the person's health records. Do not request a medical statement or examination for an applicant who currently holds an AFSC in which normal color vision is mandatory for award for AFSC. Airmen selected for retraining, regardless of rank, will attend mandatory initial skills and advanced skills courses unless waived by the Air Force Career Field Manager and/or restricted by the retraining instructions.

1.39.1. Airmen attending advanced technical courses (7-skill level) must hold the rank of staff sergeant (E-5) or higher at the 5-skill level. Senior noncommissioned officers holding 5-skill levels are given precedence for school attendance.

1.39.2. Air Force airmen must have been administered the Armed Services Vocational Aptitude Battery (ASVAB) or Armed Forces Classification Test (AFCT) before being selected for technical schools. Airmen who have been administered the ASVAB will not be administered the AFCT except under the provisions of AFI 36-2605, *Air Force Military Personnel Testing System*. The mandatory qualifying score for entry in the career field is cited in the specialty qualification for the AFSC in AFMAN 36-2108.

1.39.3. Personnel entering basic, lateral, or advanced technical courses must not already have the fully qualified AFSC toward which the course trains, nor any higher level in the career ladder, unless indicated in the specific prerequisite qualifications.

1.39.4. Graduates of technical courses are not permitted to attend the same course at a later date. Refresher training may be requested as special or supplemental training. Graduates of HSC supplemental courses may request attendance at these courses as often as necessary to maintain currency and proficiency in the job to which they are assigned, subject to limitations on reattendance indicated in the specific course announcement. This restriction does not apply to egress training required by AFI 21-112, *Aircraft Egress and Escape Systems*.

1.39.5. Senior master sergeants or chief master sergeants are not eligible to attend a technical training course unless in retraining status. This restriction may be waived for those not in retraining status by the Air Force career field manager (HQ AFRES/DPT, Robins AFB GA, for the Reserve, and ANG/TE, Andrews AFB MD, for the Air National Guard) on a case-by-case basis.

1.39.6. Airmen are not normally returned from overseas to attend a training course. Authority to return personnel to the CONUS for training is delegated to the MAJCOM. Further delegation is not authorized. Airmen to be returned from oversea units must meet specific course prerequisites except as shown in paragraph 1.39.5. For waivers other than course prerequisites, initiate separate correspondence to HQ AFPC/DPAA. Personnel returned for training should have at least 4 months' oversea retainability and must have or acquire retainability according to paragraph 1.39.8. Before approving the return of personnel, MAJCOMs must ensure no projected gains in cited skills are shown in current assignment directives and the training is essential to mission accomplishment. Airmen in overseas areas may apply for advanced airman courses conducted at the 882d Training Group (TRG), Sheppard AFB TX, or the USAF School of Aerospace Medicine, Brooks AFB TX, if the course is 20 weeks or more and the starting date coincides with the completion of the oversea tour. Applications must be processed through channels to HQ AETC/SGAT (for 882 TRG courses) or USAFSAM/ED (for USAFSAM courses) 9 months before the rotation. If a command has an unusual requirement to train personnel stationed overseas, request at least 90 days before the desired starting date of training to ensure complete processing and sufficient time for moving personnel. Include the following information:

1.39.6.1. Course number and title.

1.39.6.2. Number of airmen to be trained.

1.39.6.3. Date airmen eligible for return from overseas.

1.39.6.4. Desired starting date of training (month).

1.39.6.5. Requests for waivers of course prerequisites not processed due to recent establishment of training course desired. (Do not request waivers of color vision of physical standards.)

1.39.6.6. For Enlisted PME: Personnel serving on an oversea tour of 15 months or less will be deferred from Senior NCO Academy (SNCOA) attendance until tour completion. Members serving an oversea tour of 16 months or longer can attend the SNCOA from the oversea assignment if they have at least 1 year remaining in the oversea area upon graduation and meet all other eligibility criteria. HQ AFPC/DPPAT may waive this requirement to 120 days remaining in the oversea area on graduation, if the unit commander and MAJCOM approve.

1.39.7. An airman is ineligible to apply for technical or aircrew training after the ASD established for a PCS in accordance with AFI 36-2110, *Assignments*. (Exception: If training is required to qualify the airman for his or her new duty assignment and should be performed TDY en route to his or her new duty station.)

1.39.8. Before they are entered into the training or retraining course, enlisted personnel must possess the service retainability after graduation as specified below:

1.39.8.1. With the exception of those courses listed in paragraphs 1.39.8.2 through 1.39.8.6, enlisted members attending training courses must have sufficient retainability after graduation to complete their controlled duty assignment (CDA) or active duty service commitment (ADSC) incurred by such training (see AFI 36-2110 and AFI 36-2107). Show the CDA and ADSC retainability requirement in Part II of the Training Quota Allocation Notice (TNGALC) Report Individual Personnel (RIP), which is used to inform a member of projected training.

1.39.8.2. For retraining by basic or lateral courses, see AFI 36-2626, *Airman Retraining Program*.

1.39.8.3. Attendees of FTDs courses must obtain retainability as prescribed in AFI 36-2201.

1.39.8.4. Attendees of AETC inservice training courses must possess the service retainability specified by AETC.

1.39.8.5. Attendees of aircrew recurring proficiency training courses must possess the retainability specified by the MAJCOM.

1.39.8.6. Personnel attending any other course that is not managed under the CDA concept or as specified in paragraphs 1.39.8.2 through 1.39.8.5 must have retainability as indicated below:

1.39.8.6.1. If course length is 6 weeks or less, retainability is 6 months.

1.39.8.6.2. If course length is 7 to 24 weeks, retainability is 1 month for each week of training.

1.39.8.6.3. If course length is 25 weeks or more, retainability is 24 months. ***NOTE***: Do NOT duplicate or supplement service commitments in AFCAT 36-2223 course announcements.

1.40. Clothing and Equipment Requirements:

1.40.1. Upon arrival at training, airmen must have the proper equipment as listed in the current allowances of the monetary clothing allowance system. Authorized uniform clothing, as listed in AFI 36-3014, *Clothing Allowances for Air Force Personnel*, or as required to comply with seasonal requirements at the training base, must be with each airman as hand baggage.

1.40.2. Additional requirements for special clothing may be in each command's instructions or course announcements.

1.41. Application or Selection for Training. See table 1.1.

Table 1.1. How Airmen Apply or Are Selected.

LINE	A Type of student or training	B selection is made
1	nonprior service airmen	by Air Force Military Training Center, Lackland AFB.
2	reenlistees or prior service personnel	IAW procurement directives, and by direction of AF Recruiting Service.
3	volunteer retrainees	by individual applications under AFI 36-2204.
4	advanced, lateral, or supplemental courses	by annual screening of MAJCOM.
5	special training	IAW AFR 50-9.

1.42. Line Numbers. Airmen assigned in a pipeline status (PCS/PCA or TDPFO) to attend training courses are reassigned on assignment action line numbers of the gaining MAJCOM. (See AFI 36-2110 for line number coding structure.)

1.43. Withdrawal of Airmen. The following instructions pertain to withdrawal of airmen attending schools in TDY status, except those whose unit of assignment has been alerted for oversea duty.

1.43.1. The school commandant determines the withdrawal of TDY students and informs the affected MAJCOM of the reasons for the withdrawal. The school commandant normally honors requests from a MAJCOM to withdraw TDY students. When withdrawal does not appear warranted, the school commandant refers the case to HQ AETC (or HQ HSC, if the course is conducted by HSC) for final decision.

1.43.2. The school commandant determines whether an airman's grades and time in school warrant the issuance of a certificate of satisfactory completion.

1.43.3. The following instructions apply to airmen assigned to units alerted for overseas assignment, who are currently attending schools in a TDY status:

1.43.3.1. Airmen in TDY status at a school conducted by the Air Force, Army, Navy, or a civilian company may be withdrawn from the school if their unit of assignment has been alerted for overseas movement.

1.43.3.2. If withdrawal is necessary, the student's base commander may telephone the commandant of the school and request the student be informed to be prepared within 24 hours for transportation to his or her home station either by special airlift or by the fastest means available. This telephone conversation must be confirmed by electrical message within 48 hours. Send information copies to HQ USAF, HQ AETC, HQ HSC (if the course is conducted by HSC), MAJCOM headquarters, and numbered Air Force (or similar command) concerned.

1.43.3.3. The base commander making the request furnishes any special airlift required. When special airlift is not required, the school commandant returns the airman to his or her home station by the fastest means available.

1.43.3.4. If the student's grades and time in school warrant such action, the commandant of a service school from which an airman is being withdrawn furnishes the airman or the airman's base commander a certificate of satisfactory completion. If the airman is not qualified for a certificate, the school commandant furnishes a written statement saying the airman was withdrawn without prejudice before course completion due to military necessity. For airmen

withdrawn from factory training, the base commander requests the appropriate certificate from the civilian company.

1.43.4. Personnel being trained to support overseas requirements in a nonretraining status are identified by an Air Force line number in the orders (AFI 36-2110). In case of elimination from en route training, request disposition instructions from the gaining MAJCOM. If member cannot be used at the gaining base, request disposition instructions from the appropriate AFSC resource manager at HQ AFPC/DPAAD.

Section F—Civilians

1.44. General Prerequisites. Generally, prerequisites and assured service criteria apply equally to military personnel and civilians. Send requests for waiver of prerequisites with justification through normal command channels to the activity that controls the quotas. For policies that concern training civilian employees of other armed services, non-DOD federal employees, and civilians who are not federal employees, see paragraphs 1.45, 1.46, and 1.47. For Air Force training of contractor personnel, see paragraph 1.52.

1.45. Requests for Training (Air Force Civilians):

1.45.1. Air Force organizations requiring training for civilian employees send requests according to AFI 36-2201, or AFI 36-2301, *Professional Military Education*. Training for Air Force civilians is requested by the organization, unit, or installation, not by the individual. Nominations must be sent through the servicing CPF. Valid training requirements will be accommodated in regular resident courses (or portions thereof) if appropriate, by resident special training if capability exists, or may be purchased from a contractor if necessary. AETC and HSC conduct an annual screening for civilian requirements in most officer and airman advanced and supplemental courses. Send requests for quotas to the MAJCOM (DCS/P) of the host station. Include enough information and justification to properly evaluate the request. MPF certifications in paragraph 1.36.12 apply. Requests for quotas that reach HQ AETC through any other channel will be returned without action.

1.45.2. Air Force initial skill training courses are conducted to fulfill the trained personnel requirement (TPR) established by HQ USAF. Military training requirements established in the TPR have first priority. Only when one or more of the following conditions are present may Air Force civilian employees attend initial skill courses conducted by AETC and HSC. (Exceptions: Courses G3OBR6531-008, Base Level Contracting; G3ALR64532-002, Supply Systems Specialist; E3OBR7421-001, Manpower Management Officer; and J3OBR6721-001, Accounting and Finance Officer, and PALACE ACQUIRE Interns.)

1.45.2.1. Waiver of minimum job qualification requirements under reduction-in-force (RIF) placement procedures.

1.45.2.2. Acquisition of new equipment, tools, processes, or procedures whereby operations or maintenance skills must be gained through formal training.

1.45.2.3. When a new, modified, or expanded mission has significantly changed the duties of an existing position and training is needed to develop skills.

1.45.2.4. Employees participating in formal training programs (that is, trainees serving in positions at less than target grade, veteran readjustment appointees, and development opportunity program positions) when the requested course is part of the original written training plan.

1.45.2.5. Training prescribed in an Air Force publication by functional management for individuals entering the occupational field.

1.45.2.6. When the basic or lateral course is the sole source of training.

1.45.3. When the existence of one or more of the above conditions has been verified by the supervisor, justification requests for student attendance will be prepared by the organization and forwarded to the parent MAJCOM/DP. Only fully warranted situations will be forwarded to MAJCOM with an approval recommendation.

1.45.3.1. A statement by the supervisor that the training is a requirement for the performance of official duties.

1.45.3.2. A complete explanation of the conditions that support attendance and a reference to the specific paragraph (paragraphs 1.45.2.1 through 1.45.2.6) that permits the employee's nomination. When applicable, use the regulatory reference that prescribes training.

1.45.3.3. A complete explanation of what attempts have been made to conduct training locally and why other training sources (such as vendor, technical representative, OJT, or understudy) cannot be used.

1.45.3.4. A copy of the original written training plan (when appropriate). ***NOTE***: MAJCOMs review and return copies of approvals and request quotas for approved requests from 2 AF/DOP, HQ AETC/XOTF, HQ AETC/SGAT, or USAFSAM/ED, depending on the courses requested. Prior to suballocation of those quotas, submit a copy of approved requests to 2 AF/DOP, HQ AETC/XOTF, HQ AETC/SGAT, or USAFSAM/ED, depending on the courses requested.

1.45.4. Graduates of technical courses are not permitted to attend the same course at a later date. Refresher training may be requested as special or supplemental training.

1.45.5. Civilian personnel training funds allocated in MFP 8 may be used to fund civilian student travel and per diem when unfunded quotas are allocated by the course owner, 2 AF/DOP, AU/RP, or USAFSAM/ED. ***NOTE***: Unfunded quotas allocated for Air Force civilians are not to be converted for use by military personnel.

1.46. Training of Civilian Employees of US Armed Services Other Than the US Air Force. Eligibility and security prerequisites listed in individual course announcements apply. Personnel in this category receive first priority for quotas after Air Force military and civilian training requirements have been fulfilled. As a general rule, this training will be provided without charge unless tuition and fees are customary or the number of people to be trained would require additional Air Force resources. Request quotas from 2 AF/DOP, 721 Hangar Road, Ste 103, Keesler AFB MS 39534-2804. Request quotas from HQ AETC/XOTF for undergraduate space training.

1.47. Non-DOD Federal Employees. Quotas in Air Force technical training courses are made available for other federal agencies on a space-available basis. Course prerequisites and security requirements listed in individual course announcements apply. For quotas, contact 2 AF/DOP, Keesler AFB MS.

1.48. Non-Federal Government Civilians. Generally, the Air Force cannot provide training for civilians who are not employed by the federal government or who are not contractor personnel (paragraph 1.52), particularly when the training is available from commercial or institutional sources. Civilians are eligible to enroll in classes and be admitted to AFIT Graduate School of Engineering programs through the Dayton Area Graduate Studies Institute (DAGSI). Tuition is

charged by DAGSI for attendance. All other requests for exceptions to this policy must be referred to HQ AETC/TTP for review and evaluation. AETC may disapprove actions that do not meet the spirit and intent of this publication; however, approvals will be endorsed by HQ AETC/TTP with a recommended approval to HQ USAF/DPPE, 1040 Air Force Pentagon, Washington DC 20330-1040, for final approval.

1.49. Requirement for Employee's Agreement To Continue in Service. Civilian employees who are scheduled for training in excess of 80 hours by, in, or through a nongovernment facility in which expenses (tuition, related fees, travel, or per diem) are involved, must agree in advance to continue in service for a specified period upon completion of such training. Please see AFI 36-401, attachment 14, for a sample agreement. Type 1 training conducted on nongovernment property is normally considered nongovernment training (AFI 36-2201). However, if it is conducted on government property, it is usually considered government training (AFI 36-401). The servicing CPF also may be consulted for advice and assistance in this regard.

1.50. Overtime Pay for Travel. Any funds required for payment of overtime entitlements incident to travel under the Fair Labor Standards Act must be made available from local operating funds and should be approved in advance.

1.51. Withdrawal of Civilians. The procedures in paragraph 1.43 also apply to the withdrawal of civilians.

1.52. Air Force Training for Contractor Personnel:

1.52.1. Employees of companies or corporations under contract to the Air Force, other armed services or other government agencies, may attend Air Force resident, field, or on-site training; AU; and AFIT courses if either of the following conditions applies:

1.52.1.1. The contract requires the government to provide training.

1.52.1.2. The training required is not available from other sources and there is a material and direct benefit to DOD.

1.52.2. The Air Force or agency administrative contracting officer (ACO) must certify the above condition exists. Exceptions must be referred to HQ AETC/TTP for review and evaluation. AETC may disapprove actions that do not meet the spirit and intent of this publication; however, approvals will be endorsed by HQ AETC/TTP with a recommended approval to HQ USAF/DPPE, 1040 Air Force Pentagon, Washington DC 20330-1040, for final approval. The ACO must determine whether the government is paying the contractor for the training; and, if so, that fair adjustment has been made in the contract.

★1.52.3. AETC and AU or AFIT contract training or mission readiness training school funds (MFP 8A, Appropriation 3400) will not be used to support training of contractor personnel. Contractor personnel may attend courses conducted by another contractor if class space is available and no additional cost is incurred.

1.52.4. If the training will require access to classified information, the ACO must certify at least 45 days before class start date that the employee has the appropriate level of security clearance and a need to know.

1.52.5. The ACO decides if an agreement with the contractor, under which the contractor agrees to indemnify the government for any and all loss of liability due to injury or death of a contractor employee, is needed to protect the government's interest. Then the ACO sends, with the contractor's request for training, either:

1.52.5.1. An indemnification agreement, signed by the authorized contract representative, that says:

"I. The below-named Contractor, in consideration of the United States Air Force training of the herein named Contractor employee on the Air Force installation, whether by contract or otherwise, hereby agrees:

(1) To indemnify and hold the United States harmless, whether in tort or in contract, for any and all loss or liability for injury to or death of (Complete Name of Employee) in transit to or from or during the period of attendance at any training or school provided by the United States.

(2) To defend, pay or settle every claim or suit against the United States, its agencies, and United States personnel, by any agents or any employees of the Contractor or persons claiming through them, or by third parties, for any and all loss or liability for injury or death of (Complete Name of Employee) in transit to or from or during the attendance at any training or school provided by the United States.

(3) To pay or settle every claim or death or injury to any person, or for loss or damage to any property whether or not under the control of the United States, arising out of the use of any Air Force installation, supplies, or services by the Contractor or its employee, (Complete Name of Employee), unless the death, injury, loss or damage results solely from the negligence or willful misconduct of United States personnel.

II. For the purpose of this agreement, the term "United States Personnel" shall include:

(1) Military and civilian personnel of the United States acting within the scope of their employment, and

(2) Heirs, successors, executors, administrators, and assignment of such personnel."

1.52.5.2. A statement that such an indemnification agreement is not needed.

1.52.6. Request for training and required ACO certification will be forwarded to 2 AF/DOP, Keesler AFB MS 39534-2804, for technical training; AFIT/LSA (for School of Systems and Logistics), or AFIT/CEA (for School of Civil Engineering, MWR and Services), 2950 P Street, Wright-Patterson AFB OH 45433-7765, as appropriate, at least 45 days before class start date. Contractor personnel may attend AFIT's School of Systems and Logistics nonresident seminars on a no-cost basis if the conditions in 1.52.1, 1.52.2, 1.52.4, and 1.52.5 are met. Application procedures are listed in chapter 4, section H, of this catalog, and in the DMET Catalog, chapter 2, section A. AFIT/LSA may be contacted at DSN 785-7777, ext 3107, or commercial (513) 255-7777, ext 3107. AFIT/CEA may be contacted at DSN 785-2158 or commercial (513) 255-2158.

1.52.7. Request for training must include identification of personnel to include name of applicant, home address, SSN, date of birth, home telephone, company and address of employing company, position or title of applicant, office telephone of applicant, name and mailing address of recommended training source, course title and catalog number, course dates, and whether applicant meets the prerequisites.

1.52.8. If requested training can be accommodated, the training activity (course owner) will notify registrant.

1.52.9. A tuition charge for all industry students attending AFIT PCE or graduate courses will be assessed according to current DOD, Air

Force, AU, and AFIT directives. Exact charge for a specific course can be ascertained by telephoning AFIT/RPB at DSN 785-3405 or commercial (513) 255-3045. Industry students must prepay tuition before attendance.

1.52.10. Contractor personnel interested in taking graduate courses in a nondegree seeking status through AFIT should refer to paragraphs 4.16.2 and 4.17 for academic eligibility information and 4.19.6 for application procedures.

Section G—Orders and Funding

1.53. General Travel Instructions (see paragraph 1.8):

1.53.1. Expenses of travel and per diem for attendance at Air Force formal schools are generally covered by fund citations controlled by AETC and the Human Systems Center (AFMC). MAJCOMs are authorized to use Civilian Personnel Training Funds (MFP 8) when allocated unfunded quotas by the course owner. Details are in their respective chapters.

1.53.2. Expenses of travel and per diem for students or instructors at command courses are the funding responsibility of the Air Force activity to which the individual student or instructor is assigned. In the case of TDY-en route-PCS to attend a command-operated school, the funding must be according to AFI 65-601, volume I, *Budget Guidance and Procedures*. The fund citations or instructions for getting them are in table 1.2.

Table 1.2. Gaining Command Fund Citation for Training TDY-En Route-PCS (para 1.56.3).

RULE	A If gaining command is	B then fund citation is (*use applicable FY)
1	Defense Finance and Accounting Service (DFAS)	obtained by contacting DFAS-DE/CFB by message.
2	Air Force Communications Command (AFCC)	furnished by the losing AFCC unit for intra-command PCS obtained by contacting the gaining AFCC unit for inter-command PCS.
3	Air Force Personnel Center (AFPC)	furnished with assignment instructions.
4	Air Force Reserve (AFRES)	obtained from AFRES/ACF, DSN 468-2445. (note)
5	Air Force Materiel Command (AFMC)	authority to cite AFMC funds will be requested from the AFO, Bolling AFB DC 20332.
6	Air Reserve Personnel Center (ARPC) or Air University (AU)	furnished with assignment instructions. (note)
7	Air Education and Training Command (AETC)	obtained by contacting servicing AFO at member's gaining unit.
8	Alaskan Air Command (AAC)	obtained by contacting the gaining AAC base AFO by message or in case of emergency, call DSN for Elmendorf, 317-552-5355, and Eielson, 317-377-1858. Provide person's name, SSN, losing unit, gaining unit, training course, training location, and length of training.
9	Pacific Air Forces (CINCPACAF)	obtained by category 2 training by contacting gaining AFO by message. The message must include the person's name, losing unit, gaining unit, training course, training location, and length of training.
10	United States Air Forces in Europe (CINCUSAFE)	obtained by the losing AFO upon contacting gaining AFO by message. When gaining base is Florennes AB BE, forward fund cite requests to 485 TMW, Florennes AF BE/FMFPT.
11	Headquarters United States Air Force (Air Staff)	obtained by contacting HQ USAF/AAILB, DSN 227-2991.
12	Air Mobility Command (AMC)	see para 7.5.2.
13	Air Combat Command (ACC)	obtained by contacting servicing AFO at member's new unit of assignment when TDY travel for training is performed asa directed by ACC, incident to PCS, and training is not governed by instructions in AFI 65-601, or table 8.3. (note)
14	United States Air Force Academy (USAFA)	for accounting classification, contact HQ USAFA/FMFPT, DSN 259-4578.

NOTE: Copies of orders must be mailed to the accountable AFO responsible for the TDY funds being charged.

1.53.3. Procedures for getting fund citations for student travel orders to Air Force formal schools and command courses are in the respective command chapters. Activities responsible for publishing or citing funds for TDY or PCS orders must determine and ensure use of the proper fund citation.

1.53.4. A student is entitled to prompt payment of all travel allowances and remunerations due. However, travel orders that do not clearly state the intent of the issuing authority, or that authorize payments or allowances contradictory to the Joint Travel Regulations (JTR) may not only delay payment, but may require a student to reimburse the government for overpayment. To protect the interests of the government and the student, clearly state exact travel status and use correct fund citations.

1.53.5. When a student performs temporary duty before or after attending a course of instruction conducted or provided by AETC or AFMC/HSC, travel and per diem expenses resulting from such duty will be the responsibility of the parent command. (For example: A student travels to attend a course conducted or provided by AETC and to do additional duty at the same or another location after training.) Funding for travel from home base to training site and per diem during training is the responsibility of AETC. Any and all expenses incurred after completion of training, that is, travel and per diem, are the responsibility of the parent command. The same applies to a command-directed TDY before course attendance, wherein the cost of travel to the TDY location and per diem for the period of TDY are the responsibility of the parent command. ***NOTE***: Travel for training or examination required to complete retraining applications (physiological training, pole climbing, etc.) is funded by the MAJCOM to which the applicant is currently assigned.

1.53.6. Per diem for civilians in training programs of more than 30 calendar days will be reduced according to JTR, volume II, unless an exception is approved in advance.

1.53.7. For quotas controlled in the Air Force Training Management System (AFTMS), the travel orders must include the training line number (TLN) for Air Force students or the training requester quota identifier (TRQI) for non-Air Force students. Orders for non-Air Force students should include TLN if it is available.

1.53.8. For administrative purposes (such as orders preparation and determination of PCS or TDY status), compute the total calendar days as follows:

1.53.8.1. For courses listing academic weeks and days, multiply the academic week by 7 and add any remaining days. For example, a course listed as "10 wk 3 days" would require 73 calendar days at the training location.

1.53.8.2. For courses listing full academic weeks only (no remaining days), multiply the academic weeks by 7 and subtract 2 days. For example, a course listed as "10 wk" would require 68 calendar days at the training location. ***NOTE***: Do not use the computation in 1.53.8.1 and 1.53.8.2 for course announcement listings.

1.54. Travel Status. Basically, a student travels to and from, and attends school in either a PCS or TDY status. There are variations of travel status affecting pay and allowances that must be clearly stated on student travel orders to show the intent of travel and clarify the student's entitlement; that is, PCS, PCS without PCA, TDY-en route-PCS, or TDY. AFTMS orders will include the statement, "Member is authorized to eat in Air Force dining facilities using these orders in lieu of a meal card or payment." The types of travel are explained in attachment 2.

1.55. Instructions for Citing Travel Funds:

1.55.1. Several factors determine the proper fund citation for student travel orders. First and foremost, the travel status as explained in attachment 2. Basically, there are three types of fund citations for use on Air Force student travel orders for attendance at formal schools (table 1.3).

Table 1.3. Types of Fund Citations for Use at Formal Schools.

LINE	A Type of Travel	B Fund Citation
1	TDY or TDPFO	TDY appropriation 57*3400 (see note 1)
2	PCS w/TDY enroute	TDY appropriation 57*3400 and PCS appropriation 57*3500
3	PCS or PCS w/o PCA	PCS appropriation 57*3500
4	by Reservists (see note 2)	Reserve appropriation 57*3700

1.55.2. Under AFI 10-402, *Mobilization Planning*, the gaining command of an ARC unit ordered to EAD must publish new orders for members of that unit who are already on AD and attending formal courses at the time the unit was ordered to EAD. Instructions for issuing new TDY fund citations and changes in student status (TDY, PCS, and PCA, etc.) are in AFI 10-402.

1.55.3. Special restrictions are:

1.55.3.1. Personnel may not be directed to attend a course or courses that exceed 139 calendar days (or 19 academic weeks and 4 academic days) at any one location in TDY or PCS-with-TDY-en route. Any absences from training that may fall within the scheduled training period, such as holidays or calendar periods when classes may be suspended, are excluded in determining the length of instruction.

1.55.3.2. ANG students are funded by the state publishing the travel orders.

1.55.3.3. Army, Navy, and other students who are not members of the Air Force are funded by the branch of service they are assigned to.

1.55.3.4. Students called or recalled to active duty from inactive status or civilian status do not use the TDY fund citations in command chapters unless the travel orders direct formal school training and cite the school course number. Such students are further restricted unless they are called or recalled to active duty for more than 6 calendar months.

1.55.3.5. The following types of expense will not be charged to these TDY funds:

★1.55.3.5.1. Storage, either temporary or nontemporary, of household goods or personal effects. When a student attends a course in a PCS with TDY-en route status, such storage as he or she may be entitled to will be charged to the PCS fund citation required on travel orders that specify either of these types of travel status (table 1.3). ***NOTE***: In cases where temporary storage for TDY is considered necessary and is authorized by the member's commanding officer (see JFTR M8200), such expenses will be charged to the losing unit's TDY fund citation, not AETC mission readiness training funds. Include the commanding officer's authorization for temporary storage (not to exceed 30 days) on all member's orders having TDY shipments originating outside the CONUS.

1.55.3.5.2. Packing, crating, or shipping of household goods or personal effects in excess of the weight authorized for temporary change of station by JFTR, paragraph 8003. When orders indicate

PCS with TDY en route and authorize shipment of household goods, such shipment will be charged to the PCS fund citation required in travel orders which specify either of these types of travel status (table 1.3).

1.55.3.5.3. Dislocation or trailer allowances.

1.55.3.5.4. Dependent travel.

1.55.3.6. When orders state students should report between specific hours on a given date, but they report before that date, they are entitled to payment of per diem only for the period of their constructive travel time and for the period from the specified reporting date until completion of the TDY. Exception: When students arrive before the specified reporting date because they traveled by military aircraft and departed earlier than required by common carrier due to government aircraft schedules. In such cases, per diem allowances, if otherwise proper, are considered payable for such a period on the basis of savings to the government since cost of per diem would be less than cost of transportation by commercial means. A voucher claiming per diem for such a period should be substantiated by factual certificate from the member if the member is an officer, or by a certifying officer if the member is an airman, that early arrival at temporary duty point was caused by use of government aircraft to save the government the cost of commercial transportation.

★1.55.4. AETC mission readiness training funds are administered centrally from Randolph AFB TX. When all conditions of paragraph 3.6.5 are met, student travel orders may cite funds for travel and per diem costs. In addition, funding of registration fees for AETC-administered medical symposiums may be authorized in the notification of training quota. Cite these funds on bills of lading only for shipment of personal effects not in excess of the authorized TDY weight allowance plus approved professional equipment for use in connection with training.

1.55.5. If TDY orders are published in the fiscal year before the fiscal year in which the travel is to be performed or into which the travel is to continue, the applicable major accounting classification, as adjusted to show the subsequent fiscal year designation, may be stated on the TDY orders for administrative convenience consistent with AFI 65-601, volume 1, relative to military personnel appropriation.

1.56. Acquiring Fund Citations for Travel Orders:

1.56.1. **PCS Fund Citation**. These citations for members of the Air Force are in the budget code appended to AFR 700-19. Certification of availability of specific allotment funds and assurance of propriety of coding of both open and specific allotment fund citations for PCS travel will be obtained from accounting and finance officers.

1.56.2. TDY Fund Citations:

1.56.2.1. For attendance at formal schools, fund citations are provided with school allocation instructions. See the individual command chapter for specific instructions on the use of fund citations for that command.

1.56.2.2. TDY to schools or courses conducted outside the Air Force training program (courses administered by MAJCOM other than AETC and HSC (AFMC) is the responsibility of the Air Force activity to which the person is assigned. When PCS-with-TDY en route is authorized, TDY funding must be according to AFI 65-601, volume I.1.56.2.3. Oversea commands are responsible for funding of transportation and per diem of personnel attending training courses outside the CONUS.

1.56.3. **TDY Incident To or En Route PCS**:

1.56.3.1. Reference AFI 65-601, volume I. The funding for TDY-en route-PCS is the responsibility of AETC or AFMC (HSC) as appropriate, only when AFPC imposes the training requirement in the PCS assignment instructions or if the gaining command receives a training quota from AETC or AFSC and so notifies the losing command's MPF. MAJCOMs must fund for TDY when they impose a TDY-en route-PCS category 1 training requirement without an appropriate quota or a category 2 training requirement. ***NOTE***: Category 1 training requirement: Courses conducted by AETC to carry out the Air Force training program and by AFMC for the medical education program. Category 2 training requirement: Courses conducted outside the scope of the Air Force training program such as command-operated schools and OSI training schools.

1.56.3.2. Transoceanic travel costs associated with directed TDY to CONUS incident to PCS are considered a PCS expense. In PCS to CONUS and from OS to OS east or west, or vice versa, funding to port of entry in the CONUS for the directed TDY is a proper charge to the funds applicable to the PCS movement.

1.56.3.3. When TDY is incident to PCS, but the travel is performed under separate orders and the person returns to his or her current duty station before the PCS order is carried out, the order directing such TDY must: state that the TDY is incident to PCS, identify the gaining MAJCOM, and reference the personnel PCS assignment instruction which established the requirement.

1.56.3.4. Fund citations for use on travel orders are in table 1.3 when the gaining command imposes the training requirement. When the Category 1 training requirement is imposed by AFPC reassignment instruction, refer to the appropriate chapter of the command conducting the training (AETC—chapter 3, AU—chapter 4, AFMC (HSC)—chapter 2).

1.56.4. **TDY Funding of Unqualified Students:**

1.56.4.1. When students are returned to their parent command as a result of being unqualified to enter an Air Force training program course (paragraph 1.56.3.1 above), all TDY expenses to and from the school concerned will be borne by the parent command. The organization selecting and publishing orders on the student concerned will ensure the orders are amended to show the parent unit fund citation. A copy of this amendment must be sent to HQ AETC/FMF within 30 days. For AETC courses, send copies of amendments to DAO-DE AETC/FA. For HSC courses, send copies of amendments to 6570 ABG/FMFPT. For AETC courses conducted by Air University at Maxwell AFB, send copies of amendments to respective school; AU/RPBO, 55 LeMay Plaza South, Maxwell AFB AL 36112-6334; and DFAS-LI/D, 3 Arkansas Rd, Limestone ME 04751-1500. Effective 1 Dec 95, DFAS mailing address changes to DFAS LI/D, 3 Arkansas Rd, Loring AFB ME 04751-1500.

1.56.4.2. School administrators will ensure all possible actions are taken to rectify any discrepancies that may disqualify a student from entering training. The MAJCOM concerned and the student's parent organization will be informed before directing an unqualified student to return to his or her permanent duty station.

Table 1.4. Airmen, Transportation of Dependents and Houshold Units. (see JTR)

RULE	A	B	C	D	E	F	G
	If pay grade is		**and course length is**		**and the move involves**		
	E-4 (over 2 yr svc) or higher grade	**E-4 (2 yr svc or less) or lower grade**	**20 wk or more**	**less than 20 wk**	**CONUS**	**oversea (note 1)**	**then**
1	X		X		X		authorized PCS travel and transportation allowances at Government expense.
2	X	X	X			X	
3		X	X		X		not authorized. (note 2)
4	X	X		X	X	X	authorized. (note 2)

NOTES:

1. Oversea is defined as a PCS move TO, FROM, or BETWEEN oversea areas.
2. Although travel is not authorized for family members, personnel are authorized the maximum weight allowance for shipment of baggage and household goods in JTR, paragraph M8003-1. Shipments under temporary duty or PCS orders will be according to JTR, chapter 8, parts D and E respectively.

1.57. Transportation of Airman Dependents and Household Goods. See table 1.4.

Section H—Responsibilities for Air Force Schools and Faculty Boards

1.58. Purpose and Operation of Air Force Schools. Air Force schools conduct formal individual training and education. These schools are operated by HSC, AETC, or AU, and, when authorized by HQ USAF, by other MAJCOMs.

1.59. Specific Responsibilities for Air Force Schools:

1.59.1. **HQ USAF**:

1.59.1.1. Directs, assists, and monitors Air Force formal schools.

1.59.1.2. Authorizes the establishment of schools and prescribes or approves school missions and curricula.

1.59.1.3. Approves prerequisites and procedures for selection of students to Air Force schools.

1.59.1.4. Approves procedures for processing individuals whose student status has been terminated.

1.59.2. **MAJCOMs**:

1.59.2.1. Develop training and education programs and operate schools under their jurisdiction.

1.59.2.2. Appoint a commandant for each school within the command. (Authority to appoint a commandant may be delegated to a subordinate commander having jurisdiction over the school.)

1.59.2.3. Appoint a faculty board for each school in the command and determine board procedures within the scope of applicable Air Force regulations. Authority to appoint a board and determine its procedures may be delegated to a commissioned officer at any level of command.

1.59.2.3.1. In AETC undergraduate flying wings with a dual or multiple deputy structure, the deputy commander for operations/navigator training or the training group commander may be designated as the appointive authority for faculty boards.

1.59.2.3.2. In AFIT graduate schools, the graduate school dean is designated as the appointive authority for faculty boards involving academic performance.

1.59.2.4. Ensure each faculty board proceeding that recommends disenrollment of a student is reviewed for completeness, standardization, clarity and, unless otherwise provided in this catalog, for legal sufficiency; and ensure findings and recommendations are substantiated. Authority to ensure these criteria are met may be delegated except the review must be accomplished at least one command level above the school commandant.

1.59.2.4.1. If authority to appoint the faculty board is retained by the major commander, the major commander will review the board proceedings.

1.59.2.4.2. If authority to appoint the faculty board is delegated, reviewing action must be accomplished by a commissioned officer at least one command level above the school commandant.

1.59.2.4.3. In AETC undergraduate flying training wings with a dual or multiple deputy structure, the wing or vice wing commander may be designated as the reviewing authority of board proceedings.

1.59.2.4.4. In AFIT graduate schools, the graduate school dean is designated the reviewing authority of board proceedings involving academic performance. In cases recommending disenrollment, the commandant is designated as the reviewing authority.

1.59.2.5. Approve or disapprove each faculty board's findings and recommendations (see exceptions in 1.59.2.5.3). This authority may be delegated except it must be at least one command level above the school commandant.

1.59.2.5.1. When the faculty board appointive authority is below the command level that approves board proceedings, the appointive authority recommends approval or disapproval and forwards the proceedings to the approving authority.

1.59.2.5.2. In AETC undergraduate flying training wings with a dual or multiple deputy structure, the wing or vice wing commander may be designated as the approving authority of board proceedings.

1.59.2.5.3. In no case will a member of a faculty board approve or disapprove faculty board proceedings.

1.59.2.5.4. In AFIT graduate schools, the graduate school dean is designated as the approving authority of board proceedings involving academic performance. In cases recommending disenrollment, the commandant is designated as the approving authority.

1.59.2.6. Determine whether or not to use faculty board proceedings if student status is terminated for disciplinary reasons.

1.59.2.7. Contact school commandants and arrange for withdrawal of TDY students when the parent units of the students have been alerted for overseas movement or in other circumstances as specified in this catalog.

1.59.3. **School Commandant**:

1.59.3.1. Supervises the school and is responsible for all matters of instruction and school administration. If the commander of the unit responsible for administration and instruction at the school is also the commandant, designation as commandant or use of that title is not required to comply with this catalog.

1.59.3.2. Directs the faculty board to meet.

1.59.3.3. Refuses enrollment and returns to former base, without faculty board action, Air Force military personnel who, upon reporting as students at an Air Force school, are found to lack the course prerequisites, except those individually selected and approved by HQ USAF.

1.59.3.4. Ensures each student is periodically advised of his or her progress and counselled privately when progress is less than satisfactory.

1.59.3.5. Terminates the student status of an individual when faculty board proceedings recommending disenrollment are approved.

1.59.3.6. Maintains records of enrollment and scholastic achievements of all students.

1.59.3.7. Prepares and submits progress reports and other data required by HQ USAF.

1.59.3.8. Issues a certificate of recognition, diploma, or other memento to each graduate, including each international student.

1.59.4. **Commander, AETC; Commander, AU; training center commanders (AETC); Commandant, AFIT (AU); and Commander, HSC**:

1.59.4.1. Communicate directly with the major commander who requests withdrawal or reentry of TDY students, or withdrawal of TDY students when the parent units of the students have been alerted for oversea movement.

1.59.4.2. Determine whether reentry of students in the same class from which he or she is withdrawn is warranted. Allocation of student quotas for reentry in subsequent classes of a course must be approved by HQ USAF/DPPE.

1.60. Faculty Board (Other Than Flying Training)—Requirement, Function, Membership, and Proceedings:

1.60.1. **Requirement for a Faculty Board**. The requirement for a faculty board for nonflying training is optional at the discretion of the local commander or commandant or other appointing authority. Faculty boards are not convened when the review process for administrative eliminations is considered adequate to develop facts concerning the individual case for decision by the approving authority. The requirement for faculty review boards does not apply to enlisted PME. The faculty review process is published by the educational programs CADRE at the college for enlisted PME.

1.60.2. **Function of the Faculty Board**. The faculty board will consider matters referred to it by the appointing authority concerning the possible elimination of a student from a course. The board is convened at the discretion of the appointing authority to advise the approving authority on those matters referred to it.

1.60.3. **Waiver**. A student may request waiver of faculty board action by submitting a request, in writing, to the appointing authority. If the waiver is granted, the subject is administratively disenrolled from training.

1.60.4. **Membership of the Faculty Board**. Faculty board membership may be any combination of commissioned officers, warrant officers, chief master sergeants, senior master sergeants, and civilian officials, provided that each military member outranks the student whose case is before the board.

1.60.4.1. When a faculty board is convened at an FTD location for the purpose of reviewing cases in which 4ABF courses are involved and sufficient numbers of eligible personnel in the grades defined above are not available, master sergeants and technical sergeants may be included as faculty board members.

1.60.4.2. When a student is being considered for disenrollment from a precommissioning course, board membership will consist of commissioned officers.

1.60.4.3. When a military student is considered for disenrollment, board members must be military personnel. AFIT may, however, appoint civilians filling the positions of director for academic affairs, director of admissions, and dean or director of an AFIT school to its boards and may further appoint civilian faculty members to boards within its schools. Other exceptions to the all-military requirement must have advance approval of HQ USAF/DPPE.

1.60.4.4. When a civilian student is considered for disenrollment, at least one member of the board must be a civilian.

1.60.5. **Faculty Board Proceedings**. The decision to convene a faculty board usually raises the question of whether further retention of the student in the Air Force or on active duty is in the best interest of the Air Force. Therefore, the appointing authority should consider all of the evidence in the case file and determine whether separation may be indicated. Occasionally, the circumstances of a case will require the faculty board to be convened under AFI 51-602, *Boards of Officers*. Use the following guide to determine whether AFI 51-602 procedures should be used:

1.60.5.1. Faculty boards will be conducted in accordance with AFI 51-602 when:

1.60.5.1.1. The board was convened as a result of student misconduct and the inquiry is into the nature of the misconduct (including whether misconduct occurred) rather than the affect of the misconduct on academic proficiency.

1.60.5.1.2. The student is an officer and the inquiry will determine whether the deficiency resulted from factors within the student's control.

1.60.5.1.3. The appointing authority deems the procedures warranted and imposes the requirement.

1.60.5.2. Other than boards listed above, all faculty boards convened under this catalog are specifically exempt from the requirements of AFI 51-602.

1.60.5.2.1. AFI 51-602 board proceedings are not required when the inquiry is limited to reviewing academic deficiencies or substandard performance affecting academic achievement.

1.60.5.2.2. AFI 51-602 board proceedings are not required when the student is an officer within the category described in AFI 36-3207, *Separating Commissioned Officers*, and who, as a result of course elimination, may be released from active duty.

1.60.5.2.3. AFI 51-602 board proceedings are not required when the inquiry is into deficiencies due to factors beyond the student's control.

1.60.5.3. Nothing in this catalog shall be construed so as to require that faculty board proceedings be completed before a commander initiates disciplinary or other administrative actions (including involuntary discharge action) when the same incident or incidents giving rise to a faculty board also form an independent basis for other action. Commanders are encouraged to swiftly pursue other appropriate actions, when warranted, concurrently with faculty board review.

1.60.5.4. Faculty board findings and recommendations are made by secret written ballot and determined by a majority of voting board members.

1.60.6. **Legal Reviews**. Records of boards convened under AFI 51-602 will be submitted to the staff judge advocate for legal review. Other records of proceedings may be reviewed for legal sufficiency if required by the approving authority.

1.61. Training Review Board (Undergraduate Flying, Space, and Survival Training)—Requirement, Function, Membership, and Proceedings (Applies to AETC only, 325TRS excluded):

1.61.1. **Requirement for Training Review Board (TRB)**. The requirements for TRBs apply to all undergraduate pilot, navigator, and space training courses. When a rated officer enrolled in a formal Air Force flying training course fails to meet training standards, the matter will be processed according to AFI 11-402, *Aviation and Parachutist Service, Aeronautical Ratings, and Badges*.

1.61.2. **Function of the Board**. The TRB will consider all matters referred to it by the convening authority concerning the possible elimination of a student from a course, except as indicated below. The board is convened at the discretion of the convening authority to advise the approving authority on those matters referred to it.

1.61.2.1. TRB action is not mandatory to disenroll a student from formal training. Disenrollment from training by administrative action in lieu of TRB proceedings is authorized.

1.61.2.2. A student may request waiver of TRB action by so indicating on the AETC Form 126, **Record of Flying Training Review Action**. If the waiver is granted, the student is administratively disenrolled from training. All other cases will be evaluated by a training review board.

1.61.3. **Membership of the Board**. A TRB must be composed of at least three rated officers on active operational flying status who are instructor pilots and each member must be higher in grade than the student whose case is before the board. A TRB for undergraduate space training or survival training must be composed of members specified in AETCR 51-9, *Training Review Process*.

1.61.4. **Board Proceedings**. The decision to convene a TRB usually raises the question of whether further retention of the student in the Air Force or on active duty is in the best interests of the Air Force. Therefore, the convening authority should consider all of the evidence in the case file and determine whether separation may be indicated. Occasionally, the circumstances of a case will require the TRB to be convened under AFI 51-602. Use the following guide to determine whether AFI 51-602 procedures should be used:

1.61.4.1. TRBs will be conducted according to AFI 51-602 when:

1.61.4.1.1. The board was convened as a result of student misconduct and the inquiry is into the nature of the misconduct (including whether there is misconduct) rather than the effect of the misconduct on academic proficiency.

1.61.4.1.2. The student is an officer and the inquiry will determine whether the deficiency resulted from factors within the student's control.

1.61.4.1.3. The convening authority deems the procedures warranted and imposes the requirement.

1.61.4.2. Other than boards listed above, all training review boards convened under this catalog are specifically exempt from the AFI 51-602 requirements. AFI 51-602 board proceedings are not required when:

1.61.4.2.1. Inquiry is limited to reviewing academic deficiencies or substandard performance affecting academic achievement.

1.61.4.2.2. The student is an officer within the category described in AFI 36-3207, and who, as a result of course elimination, may be released from active duty.

1.61.4.2.3. When the inquiry is into deficiencies due to factors beyond the student's control.

1.61.4.3. Nothing in this catalog shall be construed to require TRB proceedings to be completed before a commander initiates disciplinary or other administrative actions (including involuntary discharge action) when the same incident or incidents giving rise to a TRB also form an independent basis for other action. Commanders are encouraged to swiftly pursue other appropriate actions, when warranted, concurrently with training review board action.

1.61.4.4. TRB findings and recommendations are determined by a majority of voting board members.

1.61.5. **Legal Reviews**. Records of boards convened under AFI 51-602 will be submitted to the staff judge advocate for legal review. Other records of proceedings may be reviewed for legal sufficiency if required by the approving authority.

1.62. Distribution of Board Proceedings. One copy of each approved training review board proceeding or approved waiver will be forwarded by the approving authority as follows:

1.62.1. For Air Force students in all military grades disenrolled from a course.

1.62.1.1. To the student's training unit commander.

1.62.1.2. To HQ ARPC/DSFM, Denver CO 80280, when elimination results in release from EAD. Forward with the UPRG documents according to AFI 11-401. When elimination from training occurs and retention on EAD is advised, forward to HQ AFPC/DPADOM1, Randolph AFB TX 78150-6001, for inclusion in the member's master personnel record.

1.62.2. For Air Force civilian employees disenrolled from a course, to the servicing consolidated civilian personnel flight (CCPF).

1.62.3. For US Government students other than Air Force, to the agency that authorized their attendance. (Usually this will be the authority given in the individual's course orders.)

1.62.4. For international students, to the appropriate Air Force office responsible for administering and monitoring the individual's training. (In the case of Security Assistance Training Program (SATP) students, procedures specified in AFI 16-105 apply.) In turn, the Air Force office will forward board proceedings as appropriate to the Military Assistance Advisory Group (MAAG), Air Force mission, US Air Attache, or official foreign representative.

PART TWO
CATEGORY 1 TRAINING
Chapter 2
Human Systems Center
Procedures and Instructions
(OPR: USAFSAM/DA)

Human Systems Center (AFMC) OPR. The Human Systems Center's USAF School of Aerospace Medicine, Department of Academics (USAFSAM/DA), is OPR for this chapter. Requests for new course announcements, changes, or revisions must be prepared in accordance with paragraph 1.10 and sent to USAFSAM/DA, 2513 Kennedy Circle, Brooks AFB TX 78235-5123, for required processing. The Department of Academics may be reached telephonically at DSN 240-2401 or (210) 536-2401.

Section A—General Information

2.1. Submission of Actions and Inquiries. Transactions or inquiries from AF, ANG, and USAFR units regarding training in USAFSAM courses must come from MAJCOM level or separate activities through the authorized training requester (TRQI) to the quota control agency. Other DOD agencies send inquiries according to procedures established by the individual agency.

2.2. User Quota Management:

2.2.1. Users with direct access to the Air Force Training Management System (AFTMS):

2.2.1.1. Suballocate quota NLT 30 days before class start date.

2.2.1.2. Notify USAFSAM/TA NLT 30 workdays before class start date of any unused or canceled quotas for possible reallocation to other commands.

★2.2.2. Users not having access to AFTMS (Army, Navy, NASA, etc.) notify USAFSAM/TA at DSN 240-4680/4681 NLT 30 workdays before class start date of any unused or canceled quotas. If DSN is not available, call (210) 536-4680/4681 or send an electronic message to USAFSAM BROOKS AFB TX//TA//. Send mail to USAFSAM/TA, 2602 West Gate Road, Brooks AFB TX 78235-5252, or fax to DSN 240-1446, or (210) 536-1446.

2.2.3. See paragraph 2.7.3 for billeting cancellations.

2.3. Use of USAFSAM Mission Readiness Training Funds. Student travel orders may cite USAFSAM funds only if the following conditions are met:

2.3.1. Training is sponsored by:

2.3.1.1. USAFSAM.

2.3.1.2. Army, Navy, or other government agency only when USAFSAM obtains spaces and makes funded allocations to other Air Force users.

2.3.2. Student is an active duty Air Force officer or airman, a Department of the Air Force (DAF) civilian (except nonappropriated fund or contract civilian employees), or a foreign military exchange officer filling an Air Force position. MAJCOMs may use local civilian personnel training funds (MFP 8) when an unfunded quota is allocated by USAFSAM/TA.

2.3.3. A funded quota (quota type AT, OT, or CT) has been issued by USAFSAM (or by HQ AFPC when indicated in the course announcement as the quota controlling agency for USAFSAM courses).

2.3.4. Authorized travel status of student is TDY, TDPFO, or PCS with TDY en route as defined in attachment 2.

2.4. USAFSAM Training Fund Citation:

2.4.1. When USAFSAM funds are authorized for use (paragraph 2.3), refer to table 2.1 or the AFTMS for fund citation of USAFSAM courses.

2.4.1.1. Use of the USAFSAM fund citation is authorized *only* when individuals have been allocated a *funded* USAFSAM quota (quota type AT, OT, or CT). When a funded quota has been provided by USAFSAM, *do not* use the AETC mission readiness training or base-level fund citation. Use of the AETC mission readiness training fund citation for USAFSAM courses is not authorized.

2.4.1.2. Use of the USAFSAM fund citation is not authorized for individuals using *unfunded* quotas when travel and per diem costs are paid with local base funds (quota types AN, ON, CN and AP, OP, CP).

2.4.1.3. Unauthorized use of fund citations may result in the order issuing agency being designated as responsible for a violation under AFR 177-16, *Administrative Control of Appropriations*. Issuing agencies with any of the above violations will be requested to amend the travel orders, and the MAJCOM SG will be notified of the violation.

2.4.1.4. AFR 177-103, *Travel Transactions at Base Level*, requires travel vouchers to be filed within 5 days after return from TDY. For students using a funded USAFSAM quota, it is *mandatory* that a copy of the settled travel voucher be forwarded to HSC/FMFT, Brooks AFB TX 78235, within 15 days after return from TDY. Violations will be reported to the servicing MPF and MAJCOM SG.

2.4.2. Transportation and per diem costs for TDY to USAFSAM courses will be funded when an USAFSAM funded quota is provided. According to the JTR (Part H, Chapter 15, U4H1), a member may be authorized a TDY weight allowance when performing a TDY for an extended amount of time *in addition to* the weight of professional books, paper, and equipment incident to the TDY (training). The USAFSAM fund cite includes EEIC 463 (Transportation of Things) for this purpose. However, TMO requires the authorization for TDY allowance be indicated on the travel orders.

2.4.3. See chapter 1, section G, of this catalog for further information.

2.5. Transportation to Training:

2.5.1. AFH 24-502, *Excess Cost Procedures*, provides guidance on handling transportation problems.

* Insert appropriate fiscal year. (For example, FY 97 = 97401301883 2X7. . . .)
** Insert appropriate Cost Center for course: (For example, Aerospace Med Primary (FY94): 97*01301883 2X* 4740 1559AO A8 409 463 528500 (PE8676IF)
Flight Nurse (FY94): 97*01301833 2X* 4740 1559NF A8 409 463 528500 (PE8676IF.)

NOTE: 1. See paragraphs 2.3 and 2.4. Use of the USAFSAM fund cite is authorized *only* when individuals have been allocated a *funded* USAFSAM quota (quota type AT, OT, or CT). Use of the USAFSAM fund cite is *not* authorized for individuals using an *unfunded* quota when travel and per diem costs are paid with base, unit, or local funds (quota types AN, ON, CN and AP, OP, CP). Refer questions to USAFSAM/TA, DSN 240-4680/4681.
2. Consult the Air Force Training Management System (AFTMS) if available or contact USAFSAM/TA, DSN 240-4680/4681, for fund cite.

2.5.2. USAFSAM encourages using the most economical air transportation available. At the time of travel, comparison between military air transportation and commercial air transportation will be made to determine which is more economical. Commercial air excursion rates should be used when comparing commercial vs military transportation. Conservation of limited TDY funds is very important.

★2.5.3. Government transportation is usually available at DoD training installations, if required, for movement of students between their quarters, messing facilities, and the school. When government or free transportation is available, use of GSA or rental car is not authorized.

2.6. Class Start Dates. Refer to the AFTMS or training allocation notice for class starting dates for USAFSAM courses.

2.7. Student Housing and Messing:

2.7.1. Effective 1 Oct 90, the traveler rather than the host base pays for contract quarters. Payment will be made by the traveler using an American Express charge card, other credit card, or cash.

2.7.2. For students using a USAFSAM-*funded* quota (quota types AT, OT, CT), the cost of contract quarters will be charged to the USAFSAM fund cite using EEIC 409, Per Diem (table 2.1). Average cost of contract quarters is $26 per day for single occupancy. Cost of on base quarters ranges from $8 to $12 per day for single occupancy. Government transportation will be provided.

2.7.3. Students projected to attend USAFSAM courses, other than those living in the San Antonio area, are *automatically* reserved a room either on base or in off-base contract quarters. Students may call the Brooks AFB billeting office 3 workdays before their arrival for confirmation. Any individual scheduled for training *must* notify the Brooks AFB billeting office NLT 3 workdays before the class start date of any room cancellations or nonuse of a room (DSN 240-1844).

2.7.4. *Bringing dependents is not encouraged*. Quarters for dependents *are not* normally available on base. Space availability will be on a day-to-day basis at a double occupancy rate. Students who choose to make their own arrangements off-base *will not* be issued nonavailability or be reimbursed for the expense because on base or off-base contract quarters are available. Dependent travel is not authorized on TDY travel orders.

2.7.5. Government messing facilities are:

2.7.5.1. Available to enlisted TDY students 7 days a week.

2.7.5.2. Available to officer TDY students on Saturdays, Sundays, and holidays only.

2.8. Preparation of Student Orders. Agencies preparing orders must use the following guidelines in preparing orders for students to attend USAFSAM courses for which quotas have been allocated by USAFSAM/TA (or HQ AFPC/DPM):

2.8.1. Use AFI 37-128, *Administrative Orders*, as basis for preparation of orders.

2.8.2. Determine travel status of students in accordance with chapter 1 and chapter 2, paragraphs 2.2 and 2.3.

2.8.3. When USAFSAM funds are authorized for use, obtain USAFSAM fund citation from AFTMS, training allocation notice, or table 2.1.

2.8.4. Obtain reporting instructions for the specific training location from AFTMS or paragraph 2.11, when applicable.

2.8.5. Check AFTMS or training allocation notice for additional instructions.

2.8.6. Home station units are responsible for ensuring personnel meet quality force standards, including weight management, as outlined in chapter 1 of this catalog, sections D and E.

2.8.7. Ensure the following items are included in orders:

2.8.7.1. For each student, in the remarks section, the personnel accounting symbol (PAS code) of the individual's servicing MPF, the training line number generated by AFTMS, and training requester quota identifier (TRQI).

2.8.7.2. Primary, control, duty, and additional AFSCs held by trainee. If the CAFSC for an airman attending a course that involves

reclassification action upon graduation has not been previously changed according to AFI 36-2101, *Military Personnel Classification*, add in the remarks section "CAFSC changes to (AFSC for which airman is training) effective (class entry date)."

2.8.7.3. Name and location of school.

2.8.7.4. Unit of assignment or attachment.

2.8.7.5. Course number, title, and PDS code.

2.8.7.6. Duration of course.

2.8.7.7. Class starting date.

2.8.7.8. Specific reporting time (see section B-Reporting Instructions, AFTMS, and quota allocation correspondence for specific school information).

2.8.7.9. Activity or individual to whom student reports.

2.8.7.10. Security clearance (paragraph 1.14).

2.8.7.11. Authority for waiver of prerequisites if applicable.

2.8.7.12. Exact cost of travel (transportation request (TR)) and estimated per diem, if applicable. For courses B3AZY4N0X1 000, Aeromedical Evacuation Technician; B3OBY48G1 000, Aerospace Medicine, Primary; and B30LY46F1 000, Flight Nurse; add in the remarks section a statement that 3 days of training are conducted under field conditions.

2.8.7.13. Any authority for delay en route.

2.8.7.14. Instructions on availability and use of government housing and messing.

2.8.7.15. Instructions on any peculiarities of transportation to or during training.

2.8.7.16. Unit of assignment or attachment. For TDPFO orders, cite the unit that assumes strength accountability, because this is the unit of assignment. Compute TED for trainees in TDPFO status in accordance with AFI 36-2125, *Military Personnel Strength Accounting Methods*.

2.8.7.17. For courses of less than 140 days duration, a statement that transportation of family members and shipment of household goods and trailers, in excess of TDY weight allowances, are not authorized at government expense. For TDPFO orders do not include "Dislocation allowance-school" in orders. When appropriate, use "Dislocation allowance-other" or "Dislocation allowance-secretarial waiver." See paragraph 2.4.2. Authorization for TDY weight allowance in addition to the weight of professional books/papers/equipment incident to the TDY must be indicated on orders.

2.8.7.18. For all USAFSAM courses, include the following statement: "AFR 177-103 requires travel vouchers to be filed within 5 days after completion of TDY. Students using a USAFSAM funded quota must send one copy of the settled travel voucher to HSC/FMFT, Brooks AFB TX 78235, within 15 duty days after the completion of TDY." (paragraph 2.4.1.4.)

2.8.7.19. Date of separation.

2.8.8. Each student is required to hand-carry four copies of the orders to registration, which is conducted in the morning of the first day of class. Student must also bring one copy of travel itinerary for the Brooks AFB travel office.

2.9. Clothing Requirements:

2.9.1. See chapter 1, sections D and E, and chapter 2, section D, course announcements for officer and airman clothing requirements.

2.9.2. Authorized service uniforms as described in AFI 36-2903, *Dress and Personal Appearance of Personnel*, may be worn between 1 January and 31 December to comply with seasonal requirements. Refer to course announcement for any specific uniform requirements.

2.10. Requests for Waiver of Course Prerequisites. Requests for waivers of prerequisites for students must be sent, with complete justification, to the headquarters indicated as the quota controlling authority in the course announcement. Waiver requests may also be made through AFTMS or faxed to DSN 240-3419, or (210) 536-3419. Prerequisites listed for courses must be followed unless a waiver is granted. Personnel who do not meet prerequisites and have not been granted a waiver may be returned to their base at the MAJCOM expense.

2.11. Academic Disenrollments. Students disenrolled for academic deficiency must wait at least 1 year from the date of the disenrollment before reentering into the course.

Section B—Reporting Instructions

2.12. USAF School of Aerospace Medicine (USAFSAM), Brooks AFB TX 78235-5000:

2.12.1. Students are assigned to Student Squadron Section, USAF School of Aerospace Medicine. TDY students traveling from CONUS locations report to Bldg 214 (BOQ) not earlier than 0800 or not later than 2000, 1 day prior to class start date. TDY students traveling from USAFE, PACAF, and Alaska report not earlier than 0800 or not later than 2000, 2 days prior to class start date.

2.12.2. For students attending courses B3ABY4F031 000, B3ABY4B031 001, B3ABY4E031 001, and B3ABY4M031 001, nonprior service regular AF, ANG and USAFR airmen report to the Student Squadron Section, Bldg 717, NET 0800, 5 days before, and NLT 1600, 2 duty days before class start date. All other students attending these courses report NET 0800 and NLT 1600, 1 day before class start date.

Section C—Establishing Requirements in Officer and Airman Formal Courses

2.13. Determination of Training Requirements. Each year user training requirements are screened through AFTMS. Each MAJCOM is responsible for obtaining training requirements from its subordinate activities, reviewing them for validity, consolidating them, and entering them into the command requirement record in AFTMS. Agencies not having access to AFTMS who have had training requirements in USAFSAM courses in past years are screened by message, telephone, or correspondence to determine their training needs for the next fiscal year.

2.14. Annual Submission of Requirements. General guidance for response to USAFSAM screening is as follows:

2.14.1. Results of the screening are used by USAFSAM as the basis for developing budget data for TDY-to-school funding; therefore, MAJCOMs must provide training requirements that are as realistic as possible.

2.14.2. See AFI 36-401, *Civilian Training and Development*, for civilian personnel training policies.

2.14.3. Requests for the retraining of airmen in basic course (AB prefix) must be made according to AFI 36-2204, *Airman Retraining Program*, rath-er than in response to the USAFSAM screening.

Airmen who have been assigned as directed duty assignees are not authorized to attend basic training courses.

2.14.4. Agencies not having access to AFTMS make requests for training listed in section D, this chapter, directly to the agency listed as being the quota controlling agency for the individual course.

2.15. Supplemental Requirements. When additional requirements arise after the initial allocation of quotas or if changes are needed to quotas allocated, the following procedures are used:

2.15.1. For agencies having access to AFTMS, changes may ordinarily be made through the use of the quota swapping module. If quota swapping is not allowed, requests for changes may be made by message through AFTMS, telephone, or other means to the quota control agency.

2.15.2. For agencies not having access to AFTMS, requests should be made directly to the quota control agency.

Section D—Course Announcements

Technical Courses

B3ABY4B031 001—Bioenvironmental Engineering Apprentice—PDS Code WSG—DOD 322—Brooks/17 wk 2 days/AFSC 4B031—Apr 95

Provides knowledge and basic skills to perform entry level duties as a bioenvironmental engineering specialist. Training includes: written and oral communications; basic math; basic chemistry; basic physics; basic ecology and toxicology; drinking water surveillance and analysis; solid waste management; familiarization with Air Force, state, and federal environmental protection programs; environmental pollution and compliance sampling; ionizing and nonionizing radiation hazards and controls; radioactive waste disposal; film dosimetry program; industrial hygiene surveillance (illumination, ventilation, thermal stress, atmospheric sampling, toxic materials, equipment calibration and use, respiratory protection, indoor air quality, ergonomics, confined spaces, noise, and industrial facility survey procedures and techniques); and medical readiness: (chemical/natural/radiological and biological evaluation and control procedures for peacetime accidents; chemical/radiological/biological warfare defense; agent detection, neutralization and control techniques; and use of nuclear/biological/chemical detection and monitoring equipment). All medical readiness training requirements of the Basic Medical Readiness Course (BMRC) are met in this technical training course.

Prerequisites: International students working for the United States government must have approval from USAFSAM/TA and an ECL 80 SA or higher prior to entry into the class.

Special Requirements: Students should bring electronic calculators for class use. Classroom uniform is light blue shirt or blouse with long or short sleeves and dark blue pants or skirt. Battle dress uniforms (BDU) will be worn on designated days for field trips or laboratories. The service dress uniform will be worn for course graduation. Civilian students should bring clothing equivalent to the uniforms specified for military attendees.

Quota Control: USAFSAM/TA. 2 AF/DOPR controls entry of Air Force NPS.

B3ACY4B071 000—Bioenvironmental Engineering Craftsman—PDS Code 218—Brooks/2 wk/AFSC 4B071—Oct 96

Provides knowledge and skills for personnel to successfully manage a bioenvironmental engineering office. Includes management of all major base programs, including environmental protection, occupational medicine, radiation protection, and contingency support.

Prerequisites: Must have successfully completed the Bioenvironmental Engineering Readiness Course, B3AZY4B0X1 010, or B3AZY4B0X1 016, and the associated advanced medical courses related to area of responsibility. The associated advanced medical course requirement is fulfilled by one of three options: (1) attending Environmental Protection, B3AZY4B0X1 001, or Environmental Quality Sampling, B3AZY4B0X1 002; (2) attending Industrial Hygiene Measurements, B3AZY4B0X1 009, or B3AZY4B0X1 014; or (3) attending Industrial Radiological Hazards, B3AZY4B0X1 004, or both Non-ionizing Radiation Measurements, B3AZY4B0X1 005, and Ionizing Radiation Measurements, B3AZY4B0X1 006.

Special Requirements: Classroom uniform is light blue shirt or blouse or blouse with short or long sleeves and dark blue pants or skirt. Students must bring a scientific calculator.

Quota Control: USAFSAM/TA.

B3AZY4B091 000—Bioenvironmental Engineering Management—PDS Code 6ZP—Brooks/1 wk—Apr 95

Provides bioenvironmental engineering NCOICs and senior NCOs with timely updates, significant trends, future requirements, EPA and OSHA guidelines for major programs, and selected topics. An open forum for exchange of management programs, successful management techniques, management concepts, and cross talk is designed into this course.

Prerequisites: Successful completion of 4B0X1 course, the award of 7- or 9-skill level serving in the duty position of NCOIC or superintendent of bioenvironmental engineering, all senior NCOs and selects (AFSC 4B071 or 4B091) are eligible to attend. Those individuals not meeting the prerequisites must submit a waiver application.

Special Requirements: Classroom uniform is light blue shirt/blouse with long or short sleeves and dark blue pants or skirt.

Quota Control: USAFSAM/TA.

B3AZY4B0X1 002—Environmental Quality Sampling—PDS Code 1DP—Brooks/2 wk—Apr 95

Replaces the environmental protection course (B3AZY4B0X1 001). Provides knowledge and skills for all aspects of quality environmental sampling. Includes multimedia environmental sampling to include hazardous waste, water, and air; environmental data bases; ECAMP; and pollution prevention.

Prerequisites: SrA through TSgt possessing AFSC 4B051 or higher. Also eligible are civilians actively involved in the Air Force Environmental Quality Program and previous graduates who have not attended within the past 3 years. A minimum of 24 months must have elapsed since graduating from the BEE Apprentice Course, B3ABY4B031 001. Those not meeting these requirements must apply for a waiver from USAFSAM/TA. International students working for the United States government must have approval from USAFSAM/TA and an ECL 80 SA or higher before entry into the class.

Special Requirements: Classroom uniform is the light blue shirt or blouse with long or short sleeves and dark blue pants or skirt. Battle

dress uniforms (BDU) will be worn on designated days for field trips or laboratories. Civilian students should bring equivalent clothing. Students must bring a scientific calculator.

Quota Control: USAFSAM/TA.

B3AZY4B0X1 005—Non-Ionizing Radiation Measurement—PDS Code XRW—Brooks/1 wk—Oct 95

Provides knowledge and skills for health hazard evaluation of nonionizing radiation. Includes characteristics of nonionizing radiation, mathematical calculations inherent to radio frequency radiation, selection and use of monitoring instruments, and fundamentals of lasers and laser safety programs.

Prerequisites: NCOs in grades Sgt through CMSgt with AFSC 4B051, 4B071, or 4B091. 2d Lt through Maj with AFSC 43EX. Also eligible are civilians actively involved in the base radiological health program and previous graduates who have not attended within the past 3 years. A minimum of 18 months must have elapsed since graduating from either the BEE Apprentice Course, B3ABY4B031 000, or BEE Course, B3OBY43E1 000. In addition, attendees must have successfully completed the Industrial Hygiene Measurements Course, B3AZY4B0X1 009, since January 1986. Those not meeting these requirements must apply for a waiver from USAFSAM/TA. International students working for the United States government must have approval from USAFSAM/TA and an ECL 80 SA or higher before entry into the class.

Special Requirements: This course, along with Ionizing Radiation Measurements (B3AZY4B0X1 006), and Ionizing Radiation Management (B3AZY4B0X1 007) courses (all of which replace the industrial radiological hazards course) will be given in consecutive weeks to allow students to attend one, two, or all three courses. Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. BDUs will be worn on designated days for field trips or laboratories. Civilian students should bring equivalent clothing. Students must bring and be familiar with a scientific calculator.

Quota Control: USAFSAM/TA.

B3AZY4B0X1 006—Ionizing Radiation Measurements—PDS Code XRX—Brooks/1 wk—Oct 95

Provides knowledge and skills for the health hazard evaluation of ionizing radiation. Includes basic health physics, selection and use of monitoring instruments, calculating activity and exposure rates, performing transportation surveys, performing industrial and medical x-ray surveys, and documenting survey results.

Prerequisites: NCOs in grades Sgt through CMSgt with AFSC 4B051, 4B071, or 4B091. 2d Lt through Maj with AFSC 43EX. Also eligible are civilians actively involved in the base radiological health program and previous graduates who have not attended within the past 3 years. A minimum of 18 months must have elapsed since graduating from either the BEE Apprentice Course, B3ABY4B031 000, or BEE Course, B3OBY43E1 000. In addition, attendees must have successfully completed the Industrial Hygiene Measurements Course, B3AZY4B0X1 009, since January 1986. Those not meeting these requirements must apply for a waiver from USAFSAM/TA. International students working for the United States government must have approval from USAFSAM/TA and an ECL 80 SA or higher before entry into the class.

Special Requirements: This course, along with Non-Ionizing Radiation Measurements (B3AZY4B0X1 005), and Ionizing Radiation Management (B3AZY4B0X1 007) courses (all of which replace the industrial radiological hazards course) will be given in consecutive weeks to allow students to attend one, two, or all three courses. Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. BDUs will be worn on designated days for field trips or laboratories. Civilian students should bring equivalent clothing. Students must bring and be familiar with a scientific calculator.

Quota Control: USAFSAM/TA.

B3AZY4B0X1 007—Radiation Safety Officer (RSO) Course—PDS Code XRY—Brooks/1 wk—Oct 96

Provides knowledge and skills for personnel designated as a radiation protection/safety officer or alternate. Includes basic health physics, developing and maintaining a radiation protection program, dosimetry, radiation instrumentation, transportation, and disposal.

Prerequisites: NCOs in grades Sgt through CMSgt with AFSC 4B071 or 4B091. 2d Lt through Maj with AFSC 43EX. Also eligible are civilians actively involved in the base radiological health program and previous graduates who have not attended within the past 3 years. A minimum of 18 months must have elapsed since graduating from either the BEE Apprentice Course, B3ABY4B031 000, or BEE Course, B3OBY43E1 000. In addition, attendees must have successfully completed the Industrial Hygiene Measurements Course, B3AZY4B0X1 009, since January 1986. Those not meeting these requirements must apply for a waiver from USAFSAM/TA. International students working for the United States government must have approval from USAFSAM/TA and an ECL 80 SA or higher before entry into the class.

Special Requirements: This course, along with Non-Ionizing Radiation Measurements (B3AZY4B0X1 005), and Ionizing Radiation Measurements (B3AZY4B0X1 006) courses (all of which replace the industrial radiological hazards course) will be given in consecutive weeks to allow students to attend one, two, or all three courses. Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. BDUs will be worn on designated days for field trips or laboratories. Civilian students should bring equivalent clothing. Students must bring and be familiar with a scientific calculator.

Quota Control: USAFSAM/TA.

B3AZY4B0X1 012—Introduction to Ergonomics—PDS Code 334—Brooks/1 wk—Apr 95

Provides knowledge and skills for the anticipation, recognition, evaluation, and control of ergonomic hazards in the workplace. Includes a discussion of health effects, recognition of risk factors, methods of evaluation, discussion of available standards and criteria, control principles and methods, use of administrative controls and personal protective equipment, field ergonomics survey, and current issues.

Prerequisites: Noncommissioned officers in the grades SrA through TSgt with a 4B051 or 4B071 AFSC. A minimum of 18 months must have elapsed since graduating from B3ABY4B031 001, Bioenvironmental Engineering Apprentice course. Civilians who are actively involved in the recognition, evaluation, and control of ergonomic health hazards are also eligible to attend. Those not meeting prerequisites must apply for a waiver from USAFSAM/TA.

Special Requirements: Uniform for the class is the light blue shirt or blouse with long or short sleeves and dark blue pants or skirt. All students should bring one battle dress uniform (BDU) for the field

survey. Scientific calculators are required. Return airline reservations must not be scheduled before 1700 on the last day of training.

Quota Control: USAFSAM/TA.

B3AZY4B0X1 014—Industrial Hygiene Measurements—PDS Code 4Y6—DOD 332—Brooks/2 wk—Oct 96

This course is intended as a bridge between the 5-skill level and 7-skill level. It provides training used for anticipation, recognition, evaluation, and control of chemical, physical, and biological hazards to include: industrial toxicology; hazard communication; standard occupational health programs; discussion of high interest workplace hazards; personal protective equipment; aspects of permissible exposure limits; physical acoustics and noise control principles; thermal stress evaluations; air sampling principles, calculations and interpretations; and air flow principles and evaluation of ventilation systems.

Prerequisites: Eligibility is limited to those individuals who have not attended Industrial Hygiene Measurements and are SrA through MSgt with 4B051 or 4B071 primary AFSC. A minimum of 24 months of experience in industrial hygiene must have elapsed since graduating from B3ABY4B031 001, Bioenvironmental Engineering Specialist. 2d Lt through Capt with a 43E1 AFSC who have not attended B3OBY43E1 000, Bioenvironmental Engineer Course, may attend. GS-9 through GS-11 in the medical series (600) desiring enrollment must have been actively involved in the Industrial Hygiene Program for 6 months. International students must have approval from USAFSAM/TA and an ECL of 80 SA or higher before entry into class. All students must prove proficiency in math by passing a math pretest (administered by the base education office) before attending the course. Students not meeting these requirements must apply for a waiver from USAFSAM/TA.

Special Requirements: Students should accomplish the math CBI before taking the pretest. Recommend attendees review basic chemistry and algebra similar to that covered in course B3ABY4B031 001. Attendees will perform calculations in the course and must bring an electronic calculator which has functions of natural logs, common logs, scientific notation, and exponential functions.

Uniform Requirements: Classroom uniform is light blue shirt or blouse or long sleeve shirt or blouse. BDU will be worn on designated days for field trips or laboratories.

Quota Control: USAFSAM/TA.

B3AZY4B0X1 015—Advanced Respiratory and Personal Protective Equipment—PDS Code 2SC—Brooks/4 days—Oct 95

Provides training in respiratory protection program and personal protective equipment (PPE) to include: regulatory requirements, types of respirators and PPE, training requirements, procurement, fit-testing, selection inspection, and current issues.

Prerequisites: International students working for the United States Government must have approval from USAFSAM/TA and an ECL 80 SA or higher before entry into the class. Enlisted personnel with a primary AFSC of 4B051 or 4B071. Enlisted attendees must also have graduated the Industrial Hygiene Measurements Course, B3AZY4B0X1 009. Officers possessing AFSC 43E3 in the grade of 2d Lt through Maj who graduated Bioenvironmental Engineering Course, B3OBY4E31 000, before December 1992. Civilians must have attended the industrial hygiene measurements course or be a certified industrial hygienist or industrial hygienist in training. Unless there are major revisions to the Air Force Respiratory Protection Program or 29 CFR 1910.132, Personal Protective Equipment, personnel will only be allowed to attend the course one time.

NOTE: Attendees must be familiar with AFOSH Std 48-1 and 29 CFR 1910.132. Training will include developing and managing a respiratory protection program in compliance with present OSHA, ANSI, NIOSH, and Air Force standards. This course will focus on selecting and inspecting the proper personal protective equipment and in the proper training required to be given to users of PPE. This course will stress hands-on selection scenarios using computer software programs, the proper training techniques, and fit-testing procedures.

Special Requirements: Recommend attendees review 29 CFR 1910.134 and OEL-TWA calculations. Attendees will perform calculations in the course and must bring an electronic calculator.

Uniform Requirements: Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. BDU will be worn on designated days for laboratories. Civilian students should bring clothing equipment to the uniforms specified for military attendees.

Quota Control: USAFSAM/TA.

B3AZY4B0X1 016--Bioenvironmental Engineering Readiness Course--PDS Code 2E0--Brooks/2 wk--Jan 96

Expands and upgrades the technical skills of bioenvironmental engineering personnel in the planning, training, and performance of BEE team wartime skills. Includes identification of planning and training requirements and practical methods of meeting those requirements; development of BEE training programs and contingency plans; medical aspects of nuclear, biological, and chemical warfare to include detection, protection, and decontamination; BEE responsibilities for field industrial hygiene, potable water selection and surveillance, and field environment issues; and BEE support of medical deployments. Training will contain more hands-on training for the application of BEE support functions for contingency operations.

Prerequisites: International students working for the US Government must have approval from USAFSAM/TA and an ECL 80 SA or higher before entry into the class. SrA through CMSgt with a primary AFSC of 4B051, 4B071, or 4B091 and over 3 years of service. Must have completed the B3ABY4B031 000 course with a minimum of 3 years between the graduation date and the start date of this course. Bioenvironmental officers, 2d Lt through Maj, with at least 3 years of experience after graduating from course B3OBY43E1 000, Bioenvironmental Engineering Officer. Those not meeting these requirements must apply for a waiver from USAFSAM/TA.

Special Requirements: Classroom uniform is the battle dress uniform (BDU). Students should be very familiar with their medical unit's disaster/contingency (including mobility) plans. Students are encouraged to bring BEE portions of unclassified contingency/disaster response plans, operating instructions, checklists, etc. Students who require glasses must bring gas mask inserts. Students should bring an electronic scientific calculator.

Quota Control: USAFSAM/TA.

B3ABY4E031 001—Public Health Apprentice—PDS Code 9LL—DOD 321—Brooks/12 wk 1 day/AFSC 4E031/MASL D175107—Apr 96

Provides knowledge and basic skills to perform entry level duties as a public health apprentice. Training includes administrative procedures, principles of instruction, effective communication,

chemistry, microbiology, human anatomy and physiology, food technology, food safety and inspection procedures, food and public facility sanitation, epidemiology and communicable disease control, occupational health programs, toxicology, radiation, hearing conservation, fetal protection, occupational health education, industrial operations and principles, computer applications, preventive medicine, medical entomology, and medical readiness training.

Prerequisites: See AFMAN 36-2108 (formerly AFR 39-1). ECL 80 SA.

Admin Instructions: TDY students report to Brooks AFB NET 0800 and NLT 2000, 1 duty day before class start date. Classroom uniform is light blue shirt/blouse or long-sleeve shirt/blouse and BDU uniform with cap for medical readiness training days, medical entomology, and field trips. Service dress uniforms are required for graduation. Individuals wearing eyeglasses or contact lenses must bring eyeglass inserts for the MCU-2P protective mask.

Quota Control: USAFSAM/TA. 2 AF/DOP controls entry of Air Force NPS.

B3AZY4E051 000—Public Health Journeyman—PDS Code 1AN—Brooks/2 wk—Oct 96

Expands the technical skills of AFSC 4E031, public health apprentice, personnel in performing base level duties. Education and training includes epidemiological concepts, introduction, and familiarization with the Air Force-adapted Food and Drug Administration food code, occupational health principles and programs, management principles, trend analysis, and Aerospace Information Management System (ASIMS) applications.

Prerequisites: SrA and below with AFSC 4E031 or 4E051 who have successfully completed the AFSC 4E051 career development course (CDC) or have been in upgrade training for 18 months. Personnel who have held an AFSC of 4E051 longer than 6 months are not eligible to attend. The above also applies to retrained personnel with the exception of the grade requirement. Civilians are also eligible to attend if they meet the above requirements; that is, have attended 4E031 or successfully completed the 4E051 CDCs.

Special Requirements: Students should arrange for return transportation *no earlier than* 1630 on the last day of class.

Quota Control: USAFSAM/TA.

Waiver Authority: Waivers may be granted by the career field manager and course director.

B3ACY4E071 000—Public Health Craftsman—PDS Code 1AM—Brooks/2 wk—Apr 96

Mandatory course to expand the technical skills of AFSC 4E051, public health journeyman, personnel in performing base-level duties in preparation for award of 7-skill level AFSC. Education and training includes personnel and office management, manpower concepts and budget issues, base-level metrics, use of computer systems to include ASIMS and Epi Info, and other current issues and concerns of importance to public health personnel.

Prerequisites: SSgt or above possessing an AFSC of 4E051 and in 7-skill level upgrade training for at least 18 months. Waivers may be granted by the career field manager and course director.

Special Requirements: Member must bring a copy of his or her training records for graduation.

Quota Control: USAFSAM/TA.

B3AZY4E0X1 000—Operational Public Health Course (NCO)—PDS Code 0D0—Brooks/1 wk—Oct 96

Training includes contemporary issues applicable to public health craftsmen, superintendents, and managers, DOD food procurement and inspection, food establishment and public facility sanitation, public health support to and from other government agencies, communicable diseases, epidemiology, occupational health, medical readiness, and an in-depth review of public health training programs.

Prerequisites: MSgt (select) through CMSgt with PAFSC 4E071, 4E091, and 4E000; or the senior public health craftsman (SSgt or TSgt) if there is no senior NCO assigned. Current year command nominees for Col Cleveland L. Parker Award may also attend.

Special Note: Attendance at annual awards banquet is voluntary. Semi-formal dress or mess dress required.

Special Requirements: Return airline reservations must not be scheduled prior to 1730 on the 5th day of training.

Quota Control: USAFSAM/TA.

B3ABY4F031 001—Aeromedical Apprentice—PDS Code XRU—DOD 300—Brooks/12 wk/AFSC 4F031/MASL D175023—Oct 95

Prepares necessary knowledge and skills to perform entry level duty as an aeromedical apprentice. Training includes: anatomy, physiology and disorders of the human body systems; emergency procedures and legal responsibilities; assisting with medical care provided to flying and missile crews; techniques of physical examinations; techniques of applying medical standards; principles of aerospace physiology; administration of the Aerospace Medicine Program, techniques of aircraft accident investigation; medical principles and objectives of chemical warfare defense; and concepts of bare-base medical operations and techniques of hearing conservation. Graduates of the course are awarded certification by the American Heart Association for Cardiopulmonary Resuscitation (CPR), the US Department of Transportation as emergency medical technicians (EMT) and may challenge the National Registry EMT (NREMT) certification test. Training in hearing conservation will enable the graduate to apply to the Council for Accreditation in Occupational Hearing Conservation for registration.

Prerequisites: Civil service employees performing duties in physical examinations and standards and flight medicine must send one copy of their current AF Form 1378, **Civilian Personnel Position Description**, to HQ USAFSAM/TA for approval to attend the course. ECL 80 SA.

Special Requirements: Applicants with medical conditions requiring temporary physical profiles (AF Form 422, **Physical Profile Serial Report**) require approval prior to projected class date. Send a copy of AF Form 422 with supporting documents to USAFSAM/AF NET 60 days and NLT 30 days before class start date. Classroom uniform is any combination of service uniform. Battle dress uniforms will be worn on designated days. The service dress uniform will be worn for course graduation.

Quota Control: USAFSAM/TA. 2 AF/DOP controls entry of Air Force NPS.

B3ACY4F071 000—Aeromedical Craftsman—-PDS Code 2IF—Brooks/2 wk/AFSC 4F071—Jan 96

Attendance at this course is mandatory to be awarded the 4F071 AFSC, aeromedical craftsman. Education and training includes, but is not limited to, computer use skills, management of

resources, personnel issues, nonclinical documentation, use of metrics in the workplace, and other current issues of aeromedical personnel.

Prerequisites: Graduate of the aeromedical apprentice course (B3AZY4F031 000), SSgt or above possessing an AFSC of 4F051, and in 7 skill-level upgrade training for at least 18 months.

Special Requirements: Applicants with medical conditions requiring temporary physical profiles (AF Form 422, **Physical Profile Serial Report**) require approval prior to projected class date. Send a copy of AF Form 422 with supporting documents to USAFSAM/AF NLT 30 days prior to class start date. Classroom uniform is any combination of service uniform. Battle dress uniforms (BDU) will be worn on designated days. The service dress uniform will be worn for course graduation.

Quota Control: USAFSAM/TA.

B3AZY4F071 000—Aerospace Medicine Supervisor—PDS Code 4JM—Brooks/1 wk—Oct 95

For aeromedical craftsmen, superintendents, and managers actively working in the Aerospace Medicine Program. Familiarizes student with innovations and recent developments in aerospace medicine; reviews management policies, procedures, and problems; and provides a forum for discussion between supervisors and top level managers.

Prerequisites: DAFSC 4F071, 4F091, 4F001, SSgt through CMSgt (must be presently assigned in the aeromedical specialty or directly responsible for the management of an Aerospace Medicine Program function). Previous Aerospace Medicine Supervisor Course graduates must not have attended within the past 24 months. Civil service employees who are presently assigned in the aeromedical specialty or directly responsible for the management of an aerospace medicine program must send one copy of their current AF Form 1378 to USAFSAM/TA for approval to attend.

Quota Control: USAFSAM/TA.

B3AZY4F0X1 001—USAF Hearing Conservation Certification—PDS Code 92E— Brooks/4 days—Apr 95

Initial training and certification for personnel in areas of physical acoustics, potentially hazardous noise assessment, audiometry, use of hearing conservation forms, conducting the USAF Hearing Conservation Program, and the disposition of personnel exposed to noise. A practical examination is given to ensure proficiency in audiometric techniques. Graduates will be certified as "USAF Hearing Conservationists" as identified in the Council for Accreditation in Occupational Hearing Conservation (CAOHC) guidelines.

Special Note: This Air Force hearing conservationist training meets minimum CAOHC requirements and specifically addresses the administration of AFOSH Standards 48-19 and 161-20. Other military and civilian CAOHC approved courses do not include information relative to Air Force specific needs; therefore, they are not equivalent to this USAF Hearing Conservation Course conducted at the USAF School of Aerospace Medicine. Other courses, although approved by CAOHC, are therefore not acceptable as a substitute for this course to obtain certification as an Air Force hearing conservationist.

Prerequisites: Military or civilian personnel who perform audiometric testing in direct support of the USAF Hearing Conservation Program. Other personnel may attend with prior approval of USAFSAM/TA.

Special Requirements: Air Force personnel must wear any authorized combination of the blue service uniform. Return airline reservations must not be scheduled prior to 1700 on the 4th day of training. Applicants with medical conditions requiring temporary physical profiles (AF Form 422) require approval prior to the projected class date. Send a copy of AF Form 422 (with supporting documents) to USAFSAM/AF NET 60 days and NLT 30 days before the class start date.

Quota Control: USAFSAM/TA.

B3AZY4F0X1 002—USAF Hearing Conservation Recertification—PDS Code XQN—Brooks/2 days—Apr 95

A recertification course that trains personnel in areas of the role of occupational hearing conservation, publications relating to noise and hearing loss, the audiometer and test environment, audiometric techniques, audiogram review, referral and employee follow up, personnel hearing protection, employee education and motivation, record keeping, and conducting the USAF Hearing Conservation Program. A practical examination is given to ensure proficiency in audiometric techniques. Graduates will be recertified as USAF hearing conservationists for 5 years as identified in the Council for Accreditation in Occupational Hearing Conservation (CAOHC) guidelines.

Special Note: The Air Force hearing conversationist training meets minimum CAOHC requirements and specifically addresses the administration of AFOSH Standard 161-20, Hearing Conservation Program. Other military and civilian courses do not include information relative to the Air Force specific needs; therefore, they are not equivalent to the USAF Hearing Conservationist Course conducted at the USAF School of Aerospace Medicine. Other courses, although approved by CAOHC, are therefore not acceptable as substitutes for this course to obtain certification as an Air Force hearing conservationist.

Prerequisites: Must have attended the USAF Hearing Conservationist Course (B3AZY4F0X1 001 or B3AZY901X1 001) or the Aeromedical Apprentice Course (B3ABY4F031 000 or B3ABY90130 000) or this course within 5 years and 6 months of the course start date of this course. Must also be military or civilian personnel who perform audiometric testing in direct support of the USAF Hearing Conservation Program. Other personnel may attend with prior approval of USAFSAM/TA and USAFSAM/AF.

Special Requirements: Air Force personnel must wear any authorized combination of the blue service uniform. Return airline reservations must not be scheduled before 1630 on the last day of training.

Quota Control: USAFSAM/TA.

B3AZY4F0X1 003—Aeromedical Skills Development Course—PDS Code XZ8—Brooks/1 wk—Oct 96

Provides continuing education in the administration of aeromedical programs. Presents leadership and management techniques for journeymen who function as middle level supervisors in aerospace medicine.

Prerequisites: Military personnel, PAFSC 4F051, SrA through SSgt who have not attended the Aeromedical Craftsman course and have not attained their 7-skill level in the aeromedical career field. Priority should be given to personnel in supervisory positions in flight medicine and physical examinations. Attendees must have completed B3ABY4F031 000, Aeromedical Apprentice Course, with a minimum experience of 18 months since graduation. Major commands may request waivers to the above prerequisites by contacting USAFSAM/TA for coordination with USAFSAM/AF.

Special Requirements: Personnel must wear any authorized combination of the blue service uniform and one set of BDUs for the 4th day of training. Return airline reservations must not be scheduled to depart before 1800 on the last (5th) day of training.

Recommended Items: Computer software used in managing aeromedical programs, blank computer disks, and DESIRES listings and scheduling products.

Quota Control: USAFSAM/TA.

B3ABY4M031 001—Aerospace Physiology Apprentice—PDS Code NCP—DOD 322—Brooks/8 wk 1 day/AFSC 4M031/MASL D175003—Jan 96

Provides knowledge and basic skills to perform entry-level duties as an enlisted aerospace physiology apprentice. Training includes basic facts and terms about aerospace physiology, physiology fundamentals, operation of hypobaric chambers and supporting equipment, other physiological training devices, personal life support equipment, administrative procedures of physiological training, aircraft emergency escape, cabin pressurization, and briefings on specialized aspects of MAJCOM aerospace physiology programs.

Prerequisites: Air Force students must meet requirements for 3AIR75100 000 according to AFI 11-403, *Air Force Physiological Training Program*. ECL 80 SA.

Special Requirements: a. Students must wear an authorized combination of the blue service uniform (blue shirt or blouse, blue slacks or skirt) to the first day of the course and for most of the academic portions of the course. Students from other services will wear an equivalent uniform combination (shirt or blouse, slacks or skirt, with or without tie) for the first day of the course and for most of the academic portions of the course. Two sets of BDUs with cap, and leather boots (no zippers) are required for chamber operations, labs, and parachute familiarization. Tie or tab, ribbons, and badges are required for graduation.

b. Students will be required to participate in hypobaric chamber flights as well as parachute familiarization training. These requirements must be satisfactorily completed for graduation.

Admin Instructions: Students must hand-carry their health record and a current flying Class III physical (SFs 88 and 93) certified according to AFI 48-123, *Medical Examination and Standards*, (have the Command Surgeon stamp). Students must also have four copies of their orders. Return airline reservations must not be scheduled to depart before 1800 on the last day of training.

Special Note: The 8 wk 1 day aerospace physiology apprentice course ends with a 4-day Basic Medical Readiness training (BMRT) block and a 2 wk 1 day Principles of Aerospace Physiology Instruction (PAPI) course, L4AIT75000-001, PDS Code N9S. Attendance of the BMRT and PAPI blocks are not mandatory for U.S. Army or international students unless contracted for. Those students who complete the Aerospace Physiology Apprentice course and are projected for an assignment to an Air Force hyperbaric facility will also attend an additional 8-day follow-on Hyperbaric Chamber Enlisted Team Training course, B3AZY4M051 002.

Quota Control: USAFSAM/TA; 2 AF/DOPR makes active duty Air Force student selections.

B3AZY4M051 002—Hyperbaric Chamber Enlisted Team Training—PDS Code 44P—Brooks/1 wk 3 days/MASL D175106—Apr 96

Prepares enlisted personnel to perform duties as hyperbaric chamber team members. Graduate can operate and perform inside observer duties in the hyperbaric environment, use prescribed decompression treatment tables and repetitive dive tables, and understand the practical application of hyperbaric therapy, to include hazards and safety precautions involved in chamber operations.

Prerequisites: Must be a graduate of the B3ABY4M031 000 or B3ABY4M031 001 course. All students must be medically qualified for hyperbaric chamber duties according to AFI 48-123. ECL 80 SA.

Special Requirements: Classroom uniform is any authorized combination of the blue service uniform or service equivalent. BDUs will only be worn during chamber operations or labs. Tie or tab, ribbons, and badges are required for graduation.

Admin Instructions: Students must hand-carry their health care records to class indicating they meet the medical prerequisites for this course and four copies of their orders. Return airline reservations must not be scheduled to depart before 1800 on the last day of training.

Quota Control: USAFSAM/TA.

B3ACY4M071 000—Aerospace Physiology Craftsman—PDS Code 2IG—Brooks/2 wk—Jan 96

Provides knowledge and skills to perform duties as an enlisted aerospace physiology craftsman. Includes 7-level career ladder progression, advanced physiology instruction, aerospace physiology unit management, aerospace physiology information management system, Quality Air Force principles, and decompression sickness management. Training also includes practical demonstrations in the advanced spatial disorientation trainer and centrifuge.

Prerequisites: Air Force students with an AFSC of 4M051, staff sergeant (E-5) selectee or above, in 7-skill level upgrade training for at least 18 months and completion of all 7-skill level training requirements listed in the CFETP. Students projected for this course must complete all required prerequisites and achieve the minimum passing score on the pretest. The completed exportable training package will be required for course attendance. The pretest will be administered NLT 6 weeks prior to course start by the unit training manager at the individual's home station.

Special Requirements: a. Students must wear an authorized combination of the blue service uniform to the first day of the course and for most of the academic portions of the course. Students from other services will wear an equivalent uniform combination for the first day of the course and for most of the academic portions of the course. One set of BDUs with cap is required for labs (flightsuit is acceptable). Tie or tab, ribbons, and badges are required for graduation.

b. Students will be required to participate in centrifuge operations as well as spatial disorientation training. Students must be medically cleared (not DNIF) to participate in these phases of training. Female students will be required to undergo a medical check before centrifuge operations. These requirements must be satisfactorily completed for graduation.

Admin Instructions: Students must hand-carry the following to the first day of class: their health records, a current flying Class III physical (SFs 88 and 93) certified according to AFI 48-123, *Medical Examination and Standards* (have the command stamp), four copies of their orders, and the completed 4M071 craftsman exportable package. Students arriving without the above

requirements will be returned to home station at unit expense. Return airline reservations must not be scheduled to depart before 1800 on the last day of training.

Quota Control: USAFSAM/TA.

B3AZY4M0X1 000—Aerospace Physiology Supervisor—PDS Code SWE—DOD 322—Brooks/1 wk/MASL D175100—Dec 93

For physiological training of NCOs actively working in Physiological Training Program. Familiarizes student with innovations and recent developments in aviation physiology; reviews management policies, procedures, and problems; proposes more effective physiological training programs through improved management of resources; facilitates coordination between top-level physiological training managers.

Prerequisites: Minimum PAFSC of 4M071, SSgt or above. ECL 80 SA. NOTE: SSgt must have had PAFSC 4M071 for at least 2 years.

Special Requirements: Secret clearance required for US military personnel by class start date. Any authorized combination of the blue service uniform will be worn. Wear tie or tab, ribbons, and badges on first day. International students are not required to have a security clearance, but they will not be allowed to attend classified briefings.

Quota Control: USAFSAM/TA.

B3AZY4N0X1 000—Aeromedical Evacuation Technician—PDS Code WSL—DOD 300—Brooks/5 wk 2 days/MASL D175056—Oct 96

Prepares airmen for medical flight crew duties in aeromedical evacuation units. Enables graduates to perform the following duties: care for patients evacuated by air and prepare aircraft to receive patients; assist in patient enplaning and deplaning; use of oxygen equipment, ventilators, and other equipment used in the aeromedical environment; assist with patient inflight management in a wartime environment, accomplish aeromedical evacuation administrative and operational procedures; and employ survival and life support principles, procedures, equipment, and techniques.

Prerequisites: Air Force active duty applicants must possess AFSC 4N051 or higher, have at least 1 year of experience in direct care and treatment of patients, and be recommended by the chief nurse or superintendent of their assigned facility. Applicant must be currently certified in the National Registry of Emergency Medical Technicians (NREMT). A strong medical, surgical, or emergency care background and attendance of an emergency medical technician course is highly recommended. For USAFR and ANG applicants, possession of AFSC 4N051 or higher is highly desirable, but as a minimum, successful completion of courses J3AQR4N031 (Medical Service Specialist) and J3ABP4N031 (Apprentice Medical Service Specialist Clinical) or civilian/military equivalent. Applicants must be physically qualified for a flying Class III physical according to AFI 48-123. Individuals must comply with the Strength Aptitude Test (X Factor) according to AFMAN 36-2108 (formerly AFR 39-1). Must comply with weight standards according to AFI 40-502, *Air Force Weight Management Program* (formerly AFR 35-11). A negative SICKLEDEX exam is required for students of identified high risk groups due to altitude chamber flights under conditions of less than 1 atmosphere conducted during the course. ECL 80 SR.

Admin Instructions: Students must hand-carry to course registration their health records and a current flying Class III physical (SF 88, Report of Medical Examination, and SF 93, Report of Medical History) certified according to AFI 48-123. Students must bring 15 copies of travel orders. Return airline reservations should not be scheduled to depart prior to 1800 on the final day of training. Class start time at Brooks AFB is 0700 at building 775. Military transportation is only available weekdays during normal duty hours, excluding holidays. Students should be prepared to pay for commercial taxi service from the airport. Students should receive the Fundamentals of Nursing booklet from their home unit's Staff Development Office before attending the AET course. The material from this booklet will be tested on the second day of the course. The Fundamentals of Nursing test must be successfully completed for the student to continue in the course.

Special Requirements: a. Mandatory items all year: Service dress uniform. Minimum - one light blue shirt, dark blue trousers, and low quarter shoes (male) or dark blue skirt/slacks and low heel black toe oxfords or pumps (female). Three sets of woodlands BDUs with BDU cap, combat boots, undergarments and subdued undershirts, three pairs of cushion sole socks, leather gloves, tennis shoes, conservative swim wear, towels, duffel bag/helmet bag, pocket knife, ID card, and ID tags with chain necklace. (Oct-April): Thermal underwear, field jacket with liner, and glove liners. Flight suits may be worn for aircraft exercises.

b. Recommended items: Sunglasses, blousing bands, personal survival kit, flashlight with batteries, raincoat, poncho/rainwear for survival, umbrella according to AFI 36-2903, matches or lighter, sunscreen, size 10-12 fishing hooks, 6-10 lb test fishing line, a nonglass field eating container, duffel, A-3 or backpack to carry equipment, sunglasses, blousing bands, and personal survival kit. No individual equipment (538) supply exists. Nonissued items are subject to approval by the survival training staff.

c. Students will be required to participate in a survival situation conducted in the field as well as ditching exercises. Ditching exercises will involve jumping from a height of 4 1/2 feet into water 8 feet deep. These requirements must be satisfactorily completed for graduation.

Quota Control: USAFSAM/TA.

B3AZY4N0X1 001—Medical Survival Training—PDS Code U69—Brooks/1 wk/MASL D175104—Oct 96

Designed for Air Force, USAFR, and ANG medical personnel preparing for flying duty, or currently on flight status, in order to meet survival training requirements according to AFI 36-2209, *Survival and Code of Conduct Training* (formerly AFR 50-3). Training includes the application of the Code of Conduct noncombatant procedures, equipment, and techniques which would permit medical personnel to survive, and care for their patients and passengers in any environment.

Prerequisites: AFSC A4N0X1/4N0X1 or A4F0X1/4F0X1. A definite need for such training should be clearly indicated by the trainee's present or projected duty assignment. Individuals undergoing medical treatment and those with chronic disability, or other physical limitation will not be selected. Those who have satisfied the requirements of AFI 36-2209 (formerly AFR 50-3) are not required to attend. Personnel who have completed B3OLY9761 000 or B3OLY46F1, Flight Nurse, or B3AZY902X0 000 or B3AZY4N0X1 000, Aeromedical Evacuation Technician, since 1 Jan 74 are ineligible to attend. ECL 80 SA.

Special Requirements: a. **Mandatory items year-round:** four copies of orders, ID card, 3- to 6-inch pocket knife (locking blade preferred), combat boots, two sets of long sleeve fatigues with fatigue cap (flight suits optional), three pairs of wool cushion sole socks, raincoat/poncho, tennis shoes or dive boots for ditching exercise, swimsuit, gloves, and flashlight with batteries. **Mandatory items Oct-Apr:** thermal underwear and field/flight jacket. **Recommended**

items: matches or lighter, sunscreen, sizes 6 to 8 fishing hooks, 6- to 10-lb test fishing line, a nonglass field eating container; duffel, A-3 or backpack to carry equipment, sunglasses, blousing bands, and personal survival kit. No individual equipment (538) supply exists. Nonissue items are subject to approval by the survival training staff.

b. Students will be required to participate in a survival situation conducted in the field as well as ditching exercises. Ditching exercises will involve jumping from a height of 4 1/2 feet into water 8 feet in depth. These requirements must be satisfactorily completed for graduation.

Quota Control: USAFSAM/TA.

B3AZY4X051 004—Advanced Clinical Hyperbaric Medicine Training—PDS Code XL2—Brooks/8 wk 1 day—Apr 96

Provides enlisted personnel with the knowledge and skills necessary to function as clinical hyperbaric team members at Air Force clinical hyperbaric medicine facilities. The course focuses on the critically and chronically ill patients selected for hyperbaric oxygen therapy. Personnel will develop skills needed to prepare them to function in the specialized field of hyperbaric oxygen therapy in support of the Air Force hyperbaric medicine program. Clinical experience is gained by interacting with patients diagnosed with chronic nonhealing wounds, osteomyelitis, osteoradionecrosis, and diabetic ulcers. Other clinical experiences will be directed toward patient management in emergency situations as decompression sickness, arterial gas embolism, carbon monoxide positioning, and gas gangrene. A special section on research is included allowing the clinical hyperbaric team member to develop skills necessary to conduct or assist in the many research opportunities in this specialty field. Selectees will attend B3AZY4M051 002, Hyperbaric Chamber Enlisted Team Training (HCETT), as part of their training. If training in the hyperbaric chamber enlisted team training course has been completed in the past 2 years, attendees will be directed to arrive for training 8 duty days after the scheduled start date.

Prerequisites: Must possess AFSC 4M051, 4M071, 4M091, 4N051, 4N071, or 4N091 with a minimum of 2 years of active duty and have a current physical including documentation of all standards met according to AFI 48-123. Must be in compliance with weight standards in AFI 40-502.

Special Requirements: Any authorized combination of the blue service uniform will be worn during HCETT course. Students may wear utility uniforms for clinical hyperbaric training; however, they must also have the blue service uniform and full service dress uniform.

Application Procedures: Applicants should contact their Education or Staff Development Office for course application date. Applicants should contact servicing Formal Training office or Assignment Section for assistance with application procedures. Application must include the following items in a six-part folder: (1) current physical examination for hyperbaric duty per AFI 48-123, (2) letter of recommendation from supervisor and OIC, (3) one page narrative outlining personal qualifications and overall career goals, (4) copy of last five EPRs, and (5) copies of college transcripts for board consideration. **Send** application to: AL/AOH, 2510 Kennedy Circle, Ste 117, Brooks AFB TX 78235-5119. **Send** one copy of application to David Grant, 60 Aerospace Med Sq/SGPH, 101 Bodin Circle, Travis AFB CA 94535-1800, **and 74th Med Group/SGT**, Dept of Hyperbaric Medicine, 4881 Sugar Maple Drive, bldg 830, Wright-Patterson AFB OH 45433-5529.

Admin Instructions: Students must hand-carry the following to class registration: their health records, with documentation of current physical including documentation of all standards met according to AFI 48-123, AF Form 1042, copies of hazardous duty orders, and AF Form 712, **Instructors Flight/Dive Record**. Selection for training does not automatically lead to an assignment to a clinical hyperbaric facility. An active duty service commitment is incurred.

Quota Control: USAFSAM/TA.

B3AZY4X0X1 000—Hyperbaric Training for Health Care Technicians—PDS Code XLT—Brooks/1 wk—Apr 96

Provides training to health care technicians to function as medical technicians in a hyperbaric medicine facility. Graduate can perform inside observer duties in the hyperbaric environment, use prescribed decompression treatment tables, and understand the practical application of hyperbaric therapy, to include hazards and safety precautions involved in chamber operations. This course will run concurrently with the Hyperbaric Chamber Enlisted Team Training course.

Prerequisites: Personnel may attend if selected for the USAFSAM Clinical Hyperbaric Technician Program or are chosen for team member duty as a medical specialist in hyperbaric medical operations. All students must be medically qualified for hyperbaric chamber duties according to AFI 48-123. ECL 80 SA.

Special Requirements: Classroom uniform is any authorized combination of the blue service uniform or service equivalent. BDUs will only be worn during chamber operations or labs. Tie or tab, ribbons, and badges are required for graduation.

Admin Instructions: Students must hand-carry their health care records to class indicating they meet the medical prerequisites for this course and four copies of their orders. Return airline reservations must not be scheduled to depart before 1800 on the last day.

Professional Specialty Courses

B3OZYCONOP 000—Contingency Public Health Operations—PDS Code XRT—Brooks/2 wk—Oct 96

Provides training for personnel who may be required to provide field public health/preventive medicine services during wartime contingencies, military operations other than war (MOOTW), or natural disaster situations. Emphasis is on field-situation scenarios in both peacetime and wartime contingencies, including natural disasters. Training will include contingency planning; field sanitation and hygiene; nuclear, chemical, biological warfare defense monitoring and decontamination procedures; methods of ensuring safe food and water in field conditions; approval of local-source foods; use of field equipment included in typical deployment ATHs, ATCs and SMEs; field disease surveillance and investigation techniques, use of personal protective equipment; sources and proper use of medical intelligence information; site selection and setup; public health problems in natural disasters and complex humanitarian emergencies; the role of federal, state, and local governments and military organizations in responding to natural disasters; and the role of Air Force medical/public health personnel in OCONUS peacekeeping/humanitarian relief efforts.

Prerequisites: Active duty (AD), ANG, and AFRES personnel with AFSCs of 4E0X1, 4B0X1, 4F0X1, 4N0X1, 4S0X1 (SEI 496),

41A3, 43E3, 43H3, 43M3, 48G3, 48A3, 48E3, 48P3; or their DoD equivalents. Enlisted personnel must be E-4 or higher. Officers must have 1 year of service.

Special Requirements: Training will be partially accomplished in a field environment. All personnel must be medically worldwide qualified and not be on a physical profile. Individuals allergic to bee stings or other venomous arthropods should bring an anaphylaxis emergency kit. Uniform requirement for the entire course is the BDU. All personnel must bring three sets of BDUs and other personal hygiene items required for field billeting. Individuals wearing eyeglasses or contact lenses must bring eyeglass inserts for the MCU-2-P protective mask. Sleeping bags, cots, and individual field equipment is provided. Students may bring their own MCU-2-P. Students should have a working knowledge of Microsoft Word and Powerpoint computer programs. A computer laboratory is provided, but students may bring a laptop or notebook computer loaded with Microsoft Office to work independently.

Quota Control: USAFSAM/TA.

B3OZYERGO2 000—Public Health Ergonomics—PDS Code 4D6—Brooks/1 wk—Oct 96

Provides knowledge and skills needed by public health personnel involved in ergonomic programs and issues. Includes training on the risk factors of work-related musculoskeletal disorders (WMDs); principles of WMD abatement; developing, implementing, and improving ergonomic programs at base level; administrative and medical management of WMDs; risk factor discomfort survey application; applying epidemiology to passive and active surveillance metrics; delivering targeted ergonomic training and education to workers, supervisors, and other audiences; and current issues.

Prerequisites: Provides training for the following Air Force specialities: public health officer (AFSC 43H3), public health apprentice (4EO31, A1C and above with completion of 5-skill level CDC and recommendation of supervisor), journeyman (4EO51), craftsman (4EO71), and superintendent (4EO91), and other military and civilian public health personnel with the consent of the course director. All personnel who attend should be in a job position that allows them to apply skills taught to ergonomic programs immediately upon return to their duty station.

Admin Instructions: Air Force personnel must wear any authorized combination of the blue service uniform. Return airline reservations must not be scheduled before 1700 on the last day of training.

Quota Control: USAFSAM/TA.

B3OZYOPEPI 000—Operational Epidemiology—PDS Code XRV—Brooks/2 wk—Jan 96

Teaches epidemiological methods and skills to enable students to perform public health surveillance and investigate disease outbreaks or perceived disease clusters at base level or during contingency operations. Training will include data collection, analysis of surveillance data, risk measurement and assessment, and epidemiologic problem-solving techniques. Students will work in teams to solve case studies based on real-life situations, using epidemiological and analytical skills taught in the course.

Prerequisites: Active duty, ANG, or AFRES commissioned officers with 2 years of experience performing duty in AFSCs 43E3, 43H3, 48X3, or nurse who has attended the battlefield nursing or infection control course. Open to DoD equivalent officers and civilians. An MPH/MS with epidemiology emphasis may be substituted for 1 year of the time-in-service requirement. Students should have knowledge of epidemiologic measurements of central tendency (mean, mode, median), dispersion (percentile, quartile, standard deviation), and disease frequency and prevalence (incidence rates of various types, such as age-specific attack rates, case fatality rate). Students without a MPH/MS with epidemiology emphasis are strongly encouraged to complete the Centers for Disease Control and Prevention home-study course in epidemiology or a university-level short course.

Admin Instructions: Working knowledge of Epi Info software is required. Students are encouraged to bring a laptop or notebook computer with Epi Info and must bring a scientific calculator.

Quota Control: USAFSAM/TA.

B3OZY42N3A 000—Military Audiology Short Course—PDS Code 8UN—Brooks/4 days—Apr 95

Provides audiologists and communication disorder specialists with state-of-the-art knowledge pertaining to the theories and techniques of clinical audiology and the USAF Hearing Conservation Program. Course material contains current information concerning the progress and changes in the audiology career field, the Office of Workmen's Compensation, and the Biomedical Science Corps. Course content includes topics addressing workers compensation, quality assurance, site of lesion testing, hearing aid evaluations, hearing conservation data registry, audiology clinic and hearing conservation program management, and Council for Accreditation for Occupational Hearing Conservation (CAOHC) certifications with special emphasis on mobility readiness roles.

Prerequisites: Limited to 2d Lt through Col and GS-9 or higher. Personnel should be assigned as a provider of hearing or speech services, hearing or speech scientists (including research duty), or possess a similar specialty or duty assignment within DoD or other governmental agency.

Quota Control: USAFSAM/TA.

B3OZY42P3 002—Aircraft Mishap Investigation and Prevention Clinical Psychologist—PDS Code W99—Brooks/2 wk—Mar 94

Prepares clinical psychologists to perform aircraft accident investigations. Reviews human, environmental, and materiel factors which directly or indirectly contribute to the aircraft mishaps. Uses extensive lab work of simulated or actual aircraft mishaps to learn the keys of accident investigation. Clinical psychologists will work in teams with flight surgeons and aerospace physiologists in this course.

Prerequisites: Must be active clinical psychologists (42P3).

Special Requirements: Students should bring flight suits or BDUs with boots for use in mishap labs.

Quota Control: USAFSAM/TA.

B3OBY43A1 001—Aerospace Physiologist—PDS Code 20C—Brooks/10 wk 3 days*/AFSC 43A1—Oct 96

Provides the knowledge to perform basic duties as an aerospace physiologist. Course material includes principles and application of aviation physiology, science of the earth's atmosphere, introduction to human factors, and aircraft accident investigation techniques. Instructs in the use of the ejection seat trainer, night vision trainer, barany chair, and applicable aircrew life support equipment necessary to expose physiologists to the flying stresses experienced by aircrews. Familiarizes students with forms, publications, data processing software, operations and maintenance of low pressure

chambers and associated equipment used in career field. Helps students understand management requirements. Students undergo low pressure chamber, ejection seat, centrifuge, and advanced spatial disorientation demonstrator training. Students will also perform duties at each crew position on the low pressure chamber. Students receive instruction in communication skills and instructor methodology. Graduates will be prepared to instruct original and operational support students per AFI 11-403, *Aerospace Physiological Training Program*. Students will complete the US Air Force aircrew life support officer, basic systems acquisition management (medical), and methods of instruction courses as part of this course. Non-rated US Air Force students will receive flight familiarization training during the last 2 weeks of the course. This course is not open to international students. International students should request to attend B3FBY43A1 010, Aerospace Physiology for International Physiologists Course.

Special Requirements: Students must have at time of class entry two sets of utility uniforms (BDU or flight suit) and non-zipper combat boots with all-leather uppers. Daily wear for academic course is either the standard Air Force blue uniform (short sleeve blue shirt and trousers for men and short sleeve blue blouse and trousers or skirt for women) or either utility uniform.

Application Procedures: Send original and two copies of AF Form 215, **Officer Application for Training**, through channels to HQ AFPC/DPMME. Attach the following: SF 88, **Report of Medical Exam**, for flying Class III, in triplicate; one copy of current SF 93, **Report of Medical History**; and a statement of willingness to participate in chamber and flight operations.

Students of ethnic groups with high incidence of abnormal hemoglobin must undergo a SICKLEDEX screening.

Admin Instructions: Students must hand-carry their health record, a current flying Class III physical (SFs 88 and 93) certified per AFI 48-123. US Air Force students who are graduates of recognized formal courses in methods of instruction may not be required to attend the last 2 weeks of the course and should hand-carry documentation to verify graduation. Students from other US Government or civilian organizations are not required to attend the methods of instruction phase.

Quota Control: USAFSAM/TA; HQ AFPC/DPMMEA makes student selections.

*Course length for rated students is 8 wk, 3 days, because they will not participate in the flight familiarization portion of the course. Rated US Air Force students will attend B3OZY43A3 001, Human Performance Enhancement course (2 wk) immediately after graduation from the Aerospace Physiologist course. Rated US Air Force students' orders must indicate attendance in the follow-on course. Rated US Air Force student period of training is 10 wk, 3 days. All other rated DoD students graduate after 8 wk, 3 days.

B3OZY43A1 001—Hyperbaric Training for Aerospace Physiology Officers—PDS Code 8H4—Brooks/1 wk 2 days/MASL D175115—Jan 96

Prepares aerospace physiology officers to perform duties as hyperbaric chamber team members. Course includes hyperbaric physiology and hyperbaric chamber operations. Training includes: duties in each of the hyperbaric chamber positions and systems, use of decompression schedules, treatment tables, practical application of chambers, theory of hyperbaric oxygenation, and hazards and safety precautions involved with hyperbaric chamber operations.

Prerequisites: Officers with either AFSC M11XXX, M12XXX, or 43AX. International officers must have completed the aerospace physiology course B3OBY43A1 000. All students must be medically qualified for hyperbaric chamber duty IAW AFI 48-123. ECL 80 SA.

Admin Instructions: Students must hand-carry their health care records to class indicating they meet medical prerequisites for this course and four copies of their orders.

Quota Control: USAFSAM/TA.

B3FBY43A1 010—Aerospace Physiology for International Physiologists—PDS Code 20B—Brooks/5 wk/ MASL D175066—Oct 96

Runs in conjunction with B3OBY43A1 001, Aerospace Physiologist, and provides the knowledge to perform basic duties as an aerospace physiologist. Includes principles and application of aviation physiology, science of the earth's atmosphere, introduction to human factors, and aircraft accident investigation techniques. Instruction in the use of the ejection seat trainer, night vision trainer, barany chair and applicable aircrew life support equipment necessary to expose physiologists to the flying stresses experienced by aircrews. Familiarizes students with forms, publications, data processing software, operations and maintenance of low pressure chambers and associated equipment used in career field. Helps students understand management requirements. Students undergo low pressure chamber, ejection seat, centrifuge, and advanced spatial disorientation demonstrator training. Students will also perform duties at each crew position on the low pressure chamber.

Special Requirements: Students must have at time of entry two sets of utility uniforms (battle dress uniform or flight suits) and combat boots. Daily wear for academic course is either the service or utility uniform. Students of ethnic groups with high incidence of abnormal hemoglobin must undergo a SICKLEDEX screening.

Admin Instructions: Students must hand-carry their health record. A current flying Class III physical is required.

Quota Control: USAFSAM/TA

B3OZY43A3 000—Operational Problems in Aerospace Physiology—PDS Code WSZ—Brooks/1 wk/MASL D175064—Jan 96

An operationally focused course that familiarizes students with innovations and developments in aerospace physiology as related to the line flyer. Reviews operational missions of every MAJCOM with emphasis on increasing training effectiveness of physiology programs. Seeks to facilitate coordination between physiological training personnel and flying customers through education in the aviator's diverse roles. Explores the latest in safety issues, fatigue countermeasures, sustained operations, NVG advances, stress management for the aviator, situational awareness, active noise reduction, and laser threats and high G issues.

Prerequisites: Rated or Biomedical Sciences Corps officer assigned as physiological training officer. ECL 80 SA.

Special Requirements: Secret clearance required for US military personnel by class start date. International students are not required to have a security clearance, but they will not be allowed to attend classified briefings.

Application Procedures: MAJCOM selects candidate for training from applications initiated locally according to procedures established by the command.

Quota Control: USAFSAM/TA.

B3OZY43A3 001—Human Performance Enhancement—PDS Code 1Z9—Brooks/2 wk/MASL D175131—Oct 96

Designed to be a follow-on course to the aerospace physiologist course. It will be open to Air Force physiology training officers, both rated and BSC with the following AFSCs: M11XXX, M12XXX, and 43A2. Provides advanced knowledge in areas of human performance to allow physiological training officers to be fully qualified to perform all aspects of classroom instruction. Course materials include introduction to human factors and human performance, cognitive processing, spatial disorientation, situational awareness, cockpit/crew resource management program, and human performance enhancement in fighter, multiplace, and trainer categories of aircraft. Students will be required to analyze aircraft mishaps for human performance errors and develop lessons learned into instructional material to be used during practice teaching sessions.

Prerequisites: Must be a graduate of B3OBY43A1 000, Aerospace Physiologist Course. Rated graduates (AFSCs M11XXX and M12XXX) will be scheduled for this course immediately following the aerospace physiologist course. Biomedical Science Corps (AFSC 43AX) officers will be scheduled for the course after successful completion of 1 year at an aerospace physiology training unit. Aerospace physiologists who have completed the aerospace physiologist course, but have not had an assignment to an aerospace physiology training unit as a classroom instructor during the previous 36 months or more, will be scheduled for this course after successful completion of 1 year in an aerospace physiology training unit. Candidates will be fully checked out in all officer hours identified in AFI 11-403. Candidates must have achieved satisfactory ratings on 180-day instructor evaluations before attendance. Participate in aircrew mission briefing, aircraft preflight, and post-flight debriefing. Perform at least one presentation at a wing or squadron safety meeting. Participate in annual instrument refresher course. Demonstrate satisfactory flight line involvement through actual orientation flights or simulator time. Candidate needs to have understanding of unclassified portion of MCM 3-1/3-3. Orientation and familiarization of the following support organizations: maintenance, weather, ATC, tactics, and other operational support areas. Unit chiefs will certify to their MAJCOM coordinators for aerospace physiology that prospective attendees have successfully completed the above requirements. The chairman of the Department of Aerospace physiology has prerequisite waiver authority. ECL 80 SA.

NOTE: Daily wear for academic course is either the standard Air Force blue uniform (short sleeve blue shirt and trousers for men and short sleeve blue blouse and skirt/trousers for women) or flight suits.

Quota Control: USAFSAM/TA.

B3OZY43A3 002—Aircraft Mishap Investigation and Prevention Aerospace Physiologist—PDS Code W98—Brooks/2 wk—Jun 94

Prepares aerospace physiologists to assist in aircraft accident investigations. Reviews human, environmental, and materiel factors which directly or indirectly contribute to the aircraft mishaps. Uses extensive lab work of simulated or actual aircraft mishaps to learn the keys of accident investigation. Aerospace physiologists will work in teams with psychologists and flight surgeons in this course.

Prerequisites: Students must be active aerospace physiologists (043A3, M11XXX, or M12XXX). Three years of experience in APU instructing aircrew in areas of aerospace physiology, human factors, and spatial disorientation.

Special Requirements: Students should bring flight suits or BDUs with boots for use in the mishap lab. A pair of old boots is recommended for use in inclement weather.

Quota Control: USAFSAM/TA.

B3OBY43E1 000—Bioenvironmental Engineering—PDS Code WSR—Brooks/19 wk/AFSC 43E1/MASL D175073—Oct 96

Prepares newly commissioned bioenvironmental engineers to manage base-level bioenvironmental engineering (BEE) programs in support of the USAF Aerospace Medicine Program. Major emphasis of course deals with the protection of Air Force personnel and the environment from chemical, radiological, and physical hazards in both peacetime and wartime situations. Students develop skills in anticipating and recognizing hazards and environmental problems, evaluating the effects, and designing control measures. Training is in mission support and interface, core sciences (such as physiology, chemistry, statistics, ecology, and ground water principles), recognizing and evaluating occupational exposures, Air Force environmental protection programs, communications, nonionizing radiation, water pollution, potable water, solid and hazardous waste, air pollution, industrial ventilation, respiratory protection, pollution prevention, noise surveillance and hearing conservation, ionizing radiation, industrial hygiene surveys, environmental planning, environmental restoration, environmental and health concerns of lead and radon, hazardous materials emergency and incident response operations, contingency operations, and management principles.

Prerequisites: Academic prerequisites vary depending upon specialty shred-out (AFR 36-1, *Officer Classification*). A baccalaureate degree in an engineering discipline is mandatory, and an officer must be presently performing duties as an active duty or Air Reserve Forces bioenvironmental engineer with a 43E1 AFSC. Civilian students serving as industrial hygienists (civilian series 0690, minimum GS-9) at active duty installations, Guard, and Reserve bases are also eligible to attend with prior approval of USAFSAM/BE and USAFSAM/TA. All students must be in active duty status to attend this course. International students must have approval from USAFSAM/TA, an engineering degree, and an ECL 80 SA before entry into the class.

Special Note: Air Reserve Forces personnel may attend this course in increments, but increments must be attended in sequence starting with increment I. All increments must be completed within a 6-year period. A graduation certificate will be awarded upon completion of increment IV. Quotas in each increment are governed by the number of ARC personnel enrolled in the 19 wk basic course.

Quota Control: USAFSAM/TA; HQ AFPC/DPMM.

B3OBY43E1 001—Bioenvironmental Engineering (Increment I)—PDS Code 4ZJ—Brooks/4 wk 2 days/AFSC 43E1/MASL D175073—Oct 96

Prepares newly commissioned bioenvironmental engineers to manage base-level bioenvironmental engineering (BEE) programs in support of the USAF Aerospace Medicine Program. Major emphasis of the course deals with the protection of Air Force personnel and the environment from chemical, radiological, and physical hazards in both peacetime and wartime situations. Students develop skills in anticipating and recognizing hazards and environmental problems, evaluating the effects and designing control measures. Training is in mission support and interface, core sciences (such as physiology, chemistry, statistics, ecology, and ground water principles), recognizing and evaluating occupational exposures, Air Force environmental protection programs, and communications.

Prerequisites: Air Reserve Force officer with AFSC 43E1 who has not attended the 19 wk basic course (B3OBY43E1 000). All students must be in active duty status to attend this course. ECL 80 SA.

Quota Control: USAFSAM/TA.

B3OBY43E1 002—Bioenvironmental Engineering (Increment II)—PDS Code 4ZK—Brooks/5 wk 1 day/AFSC 43E1—Oct 96

Prepares newly commissioned bioenvironmental engineers to manage base-level bioenvironmental engineering (BEE) programs in support of the USAF Aerospace Medicine Program. Major emphasis of the course deals with the protection of Air Force personnel and the environment from chemical, radiological, and physical hazards in both peacetime and wartime situations. Students develop skills in anticipating and recognizing hazards and environmental problems, evaluating the effects and designing control measures. Training is in nonionizing radiation, water pollution, potable water, solid and hazardous waste, air pollution, industrial ventilation, and respiratory protection.

Prerequisites: Air Reserve Force officer with AFSC 43E1 who has not attended the 19 wk basic course (B3OBY43E1 000), but has completed course B3OBY43E1 001 (Increment I). All students must be in active duty status to attend this course.

Quota Control: USAFSAM/TA.

B3OBY43E1 003—Bioenvironmental Engineering (Increment III)—PDS Code 4ZL—Brooks/4 wk 3 days—Oct 96

Prepares newly commissioned bioenvironmental engineers to manage base-level bioenvironmental engineering (BEE) programs in support of the USAF Aerospace Medicine Program. Major emphasis of the course deals with the protection of Air Force personnel and the environment from chemical, radiological, and physical hazards in both peacetime and wartime situations. Students develop skills in anticipating and recognizing hazards and environmental problems, evaluating the effects and designing control measures. Training is in pollution prevention, noise surveillance and hearing conservation, ionizing radiation, industrial hygiene surveys, environmental planning, environmental restoration, and environmental and health concerns of lead and radon.

Prerequisites: Air Reserve Force officer with AFSC 43E1 who has not attended the 19 wk basic course (B3OBY43E1 000), but has completed Increments I and II. All students must be in active duty status to attend this course.

Quota Control: USAFSAM/TA.

B3OBY43E1 004—Bioenvironmental Engineering (Increment IV)—PDS Code WSR—Brooks/4 wk 4 days/AFSC 43E1—Oct 96

Prepares newly commissioned bioenvironmental engineers to manage base-level bioenvironmental engineering (BEE) programs in support of the USAF Aerospace Medicine Program. Major emphasis of the course deals with the protection of Air Force personnel and the environment from chemical, radiological, and physical hazards in both peacetime and wartime situations. Students develop skills in anticipating and recognizing hazards and environmental problems, evaluating the effects and designing control measures. Training is in hazardous materials emergency and incident response operations, contingency operations, and management principles.

Prerequisites: Air Reserve Force officer with AFSC 43E1 who has not attended the 19 wk basic course (B3OBY43E1 000), but has completed Increments I, II, and III. All students must be in active duty status to attend this course.

Quota Control: USAFSAM/TA.

B3OZY43E3 000—Advanced Environmental/Readiness Operations—PDS Code WSY—Brooks/3 days/MASL D175109—Jun 94

Provides forum for exchange of information on current issues and technical aspects of industrial hygiene, environmental protection, restoration, pollution prevention, community environment, potable water, radiological health, occupational health, accident response, and medical readiness. Continuing educational program to aid bioenvironmental engineers in remaining current in their specialty. Offers ABIH certification maintenance points.

Prerequisites: Limited to biomedical sciences corps officers and civilian equivalents with AFSCs 43E1 and 43E3. Personnel with similar specialties within the Air Force or other government or DoD agencies may attend on a space-available basis when approved by USAFSAM/TA.

Special Requirements: International students must have approval from USAFSAM/TA prior to entry into class. ECL 80 SA.

Quota Control: USAFSAM/TA.

B3OZY43E3 003—Ergonomics—PDS Code 333—Brooks/1 wk—Jan 96

Provides knowledge and skills for the anticipation, recognition, evaluation, and control of ergonomic hazards in the workplace. Includes a discussion of health effects, recognition of risk factors, methods of evaluation, discussion of available standards and criteria, control principles and methods, use of administrative controls and personal protective equipment, field ergonomics survey, and current issues.

Prerequisites: Noncommissioned officers in the grades MSgt through CMSgt with a 4B071 or 4B091 AFSC and 2d Lt through Maj with a 43EX AFSC. A minimum of 8 years must have elapsed since graduating from the Bioenvironmental Engineering Apprentice Course, B3ABY4B031 001, or 18 months from the Bioenvironmental Engineering Course, B3OBY43E1 000. Civilians who are actively involved in the recognition, evaluation, and control of ergonomic health hazards are also eligible to attend. Those not meeting prerequisites must apply for a waiver from USAFSAM/TA.

Admin Instructions: Uniform for the class is the light blue shirt or blouse with long or short sleeves and dark blue pants or skirt. All students should bring one battle dress uniform (BDU) for the field survey. Scientific calculators are required. Return airline reservations must not be scheduled before 1700 on the last day of training.

Quota Control: USAFSAM/TA.

B3OBY43H1 000—Public Health Officer—PDS Code XZH—DOD 6H—Brooks/12 wk 1 day/AFSC 43H1/MASL D175121—Apr 96

Prepares public health officers to manage public health programs in support of the USAF Aerospace Medicine Program. Includes basic skills in written and oral communication, epidemiology, biostatistics, computer operation; toxicology, industrial operations, radiation principles, ergonomics; occupational health maintenance, personal protective equipment; hearing conservation; occupational illness identification, investigation, and management; trend analysis; worker compensation; occupational health education; federal environmental policy; health risk assessment and communication; identification,

procurement, sampling, storage procedures, and quality control of subsistence; military quarantine and inspection procedures; food-serving facility and public facility inspections and evaluations; modes of transmission, surveillance, and methods of prevention, treatment, and etiology of communicable disease; disease vector surveillance, identification and control; attending service visits; administrative skills; principles and procedures in office management and administration; medical intelligence; field sanitation and hygiene; medical readiness training; and officer and enlisted career management.

Prerequisites: Officers with AFSC 43H1 who are entering the public health career field. ECL 80 SA.

Special Note: Air Reserve Force (ARF) and Air National Guard (ANG) personnel may attend this course in five successive increments beginning with course B3OBY43H1 001 and ending with course B3OBY43H1 005 (other increments may be taken out of sequence on request, if necessary). (Refer to course announcements for details.) All increments must be completed within 6 years. A graduation certificate will be awarded upon completion of Increment V. Quotas for each increment are governed by the number of ARF personnel enrolled in the 12-week basic course.

Special Requirements: Students are required to have a complete battle dress uniform with cap and boots. Service dress uniform required. Individuals wearing eyeglasses or contact lenses must bring eyeglass inserts for the MCU-2P protective mask.

Quota Control: USAFSAM/TA and HQ AFPC/DPMMEA.

B3OBY43H1 001—Public Health Officer (Increment I)—PDS Code 823—DOD 6H—Brooks/1 wk 3 days—Apr 95

Prepares public health officers to manage public health programs in support of the Aerospace Medicine Program. Includes basic skills in written and oral communication, principles of epidemiology, biostatistics, and computer operation.

Prerequisites: Air Reserve Force and Air National Guard (ANG) officer with AFSC 43H1 who has not attended the 12-week basic course, B3OBY43H1 000.

Special Requirements: Students are required to have one complete battle dress uniform with fatigue cap and boots.

Quota Control: USAFSAM/TA.

B3OBY43H1 002—Public Health Officer (Increment II)—PDS Code 825—DOD 6H—Brooks/3 wk 2 days—Jan 96

Prepares public health officers to manage public health programs in support of the Aerospace Medicine Program. Includes toxicology, industrial operations, radiation principles, ergonomics; occupational health maintenance, personal protective equipment; hearing conservation; occupational illness identification, investigation, and management; trend analysis; worker compensation; occupational health education; federal environmental policy; health risk assessment and communication. Includes 1 week operational TDY at local AFB.

Prerequisites: Air Reserve Force and Air National Guard (ANG) officer with AFSC 43H1 who has not attended the 12-week basic course, B3OBY43H1 000, but has completed course B3OBY43H1 001 (Increment I).

Special Requirements: Students are required to have one complete battle dress uniform with fatigue cap and boots at start of class.

*Special Notation: Those increment students who attended the course prior to 1 Apr 95 must check with course supervisor before enrollment to ensure proper placement in the curriculum.

Quota Control: USAFSAM/TA.

B3OBY43H1 003—Public Health Officer (Increment III)—PDS Code 826—DOD 6H—Brooks/2 wk—Jan 96

Prepares public health officers to manage public health programs in support of the Aerospace Medicine Program. Includes principles of preventive medicine; identification, procurement, sampling, storage procedures and quality control of subsistence; military quarantine and inspection procedures; facility inspections and evaluations; and principles of foodborne illness control.

Prerequisites: Air Reserve Force and Air National Guard (ANG) officer with AFSC 43H1 who has not attended the 12-week basic course, B3OBY43H1 000, but has completed Increment I.

Special Requirements: Students are required to have a complete battle dress uniform with cap and boots.

*Special Notation: Those increment students who attended the course prior to 1 Apr 95 must check with course supervisor before enrollment to ensure proper placement in the curriculum.

Quota Control: USAFSAM/TA.

B3OBY43H1 004—Public Health Officer (Increment IV)—PDS Code 5TG—DOD 6H—Brooks/2 wk/AFSC 43H1—Jan 96

Prepares public health officers to manage public health programs in support of the Aerospace Medicine Program. Includes application of epidemiology, modes of transmission, surveillance, methods of prevention, treatment and etiology of communicable disease.

Prerequisites: Air Reserve Force and Air National Guard (ANG) officer with AFSC 43H1 who has not attended the 12-week basic course, B3OBY43H1 000, but has completed Increment I.

Special Requirements: Students are required to have a complete battle dress uniform with cap and boots.

*Special Notation: Those increment students who attended the course prior to 1 Apr 95 must check with course supervisor before enrollment to ensure proper placement in the curriculum.

Quota Control: USAFSAM/TA.

B3OBY43H1 005—Public Health Officer (Increment V)—PDS Code X3V—DOD 6H—Brooks/3 wk 1 day/AFSC 43H1—Apr 96

Prepares public health officers to manage public health programs in support of the Aerospace Medicine Program. Includes disease vector identification, surveillance, and control; medical readiness and disaster preparedness; medical intelligence; field sanitation and hygiene, decontamination and response planning; administrative skills, principles and procedures in management and administration, and enlisted and officer career management and planning.

Prerequisites: Air Reserve Force and Air National Guard (ANG) officer with AFSC who has not attended the 12-week basic course, B3OBY43H1 000, but has completed increments I, II, III, and IV.

Special Requirements: Students are required to have one complete battle dress uniform with fatigue cap and boots and service dress uniform at start of class. Individuals wearing eyeglasses or contact lenses must bring eyeglass inserts for the MCU-2P protective mask.

*Special Notation: Those increment students who attended the course prior to 1 Apr 95 must check with course supervisor before enrollment to ensure proper placement in the curriculum.

Quota Control: USAFSAM/TA.

B3OZY43H3 002—Public Health Officer Intermediate Training—PDS Code 829—Brooks/1 wk—Oct 96

Furthers public health officers' knowledge of current issues and management concepts in various public health programs. Topics may include food safety, communicable diseases, preventive medicine, clinical occupational health, occupational health education, epidemiology, medical readiness, medical entomology, computer applications, MAJCOM/HSI visits, and career planning and office management.

Special Requirements: Secret clearance required by class start date.

Prerequisites: 1st Lt through major with AFSC 43H3/43H1 who has completed course B3OBY43H1 000, Public Health Officer, and worked in the Air Force public health field for more than 24 months and less than 48 months or if deemed eligible by the course supervisor.

Quota Control: USAFSAM/TA.

B3OZY43H3 003—Operational Public Health Course (Officer)—PDS Code 83A—Brooks/1 wk—Oct 96

Furthers officers' knowledge of current issues and concepts in public health. Training may include topics in food safety, sanitation epidemiology, medical readiness, medical entomology, preventive medicine, health promotion communicable diseases, clinical occupational health, occupational health education, risk assessment and risk communication, personnel management, time and group management, office communications, and career advancement.

Prerequisites: Air Force public health officers (AFSC 43H3), Navy environmental health officers, and Army preventive medicine officers with a minimum of 48 months in their respective career fields or previous attendance to the Public Health Officer Intermediate Training Symposium, B3OZY43H3 002.

Special Requirements: Return airline reservations must not be scheduled before 1730 on the fifth training day.

Note: Attendance at annual awards banquet is voluntary. Mess dress required.

Quota Control: USAFSAM/TA.

B3OZY43M3 000—Operational Entomology—PDS Code 824—Brooks/2 wk—Oct 96

Introduces vectorborne diseases with significant impact on military missions. Enhances individual capabilities to perform vector and vectorborne disease surveillance and control during war or natural disasters. Includes vectorborne disease profiles with emphasis on the effect of morbidity, mortality, and prevention on the success of military operations. Also includes vector surveillance, control strategies and methodologies, and operational perspectives on vectorborne disease control. Composed of academic instruction, practical exercises, and field experience simulating vectorborne disease surveillance situations.

Prerequisites: Provides training for the following Air Force specialties: public health officers (AFSC 43H1 or 43H3); public health apprentices (AFSC 4E031, E-2 and above with completion of 5-skill level CDC and recommendation of supervisor), journeymen (AFSC 4E051), craftsmen (AFSC 4E071), and superintendents (AFSC 4E091); medical entomologists (AFSC 43M1 or 43M3); flight surgeons (AFSC 48A1, 48A3, 48P1, or 48P3); pest management apprentices (AFSC 3E433, E-2 and above with completion of 5-skill level CDC and recommendation of supervisor), journeymen (AFSC 3E453), craftsmen (AFSC 3E473), and superintendents (AFSC 3E490 with a prior AFSC 3E433, 3E453, or 3E473), or equivalent civilian pest management personnel; independent duty medical technicians (SEI 496); and other military and civilian public health and pest management personnel with the consent of the faculty. ECL 80 SA.

Special Requirements: The uniform for military students is BDUs. Civilians must bring at least two sets of coveralls, or similar field work clothing, and lace-up field work boots with at least 6-inch tops for a 4-day field exercise. Training office or student must provide Medical Entomology Branch, USAFSAM/PH, DSN 240-3734/3739/2058 ((210) 536-3734/3739/2058) with a telephone contact for student.

Application Procedures: Priority will be given to active duty personnel assigned to mobility positions or to personnel from installations with a relatively high risk of vectorborne diseases.

Quota Control: USAFSAM/TA.

B3OZY43Y3 000—Operational and Medical Health Physics Course—PDS Code 5NX—Brooks/3 days—Apr 95

Continuing education program to aid health physicists in remaining current in their specialty. Provides for exchange of information on current Nuclear Regulatory Commission and USAF Radioisotope Committee issues and technical aspects of ionizing and nonionizing radiation including radioactive materials, x-ray, laser and radio-frequency radiation, and other areas of interest of Air Force health physicists and medical physicists. Offers AAHP continuing education credits.

Prerequisites: Health physicists (43Y3) and bioenvironmental engineer with health physics shred (43E3G). Personnel with similar specialties within the Air Force or other government or DOD agencies may attend on a space-available basis when approved by USAFSAM/TA. ECL 80 SA or higher.

Quota Control: USAFSAM/TA.

B3OLY46F1 000—Flight Nurse—PDS Code WSV—Brooks/5 wk 2 days/AFSC 46F1/MASL D175017—Oct 96

Trains nurses for duty as member of medical crew in aeromedical evacuation units. Includes the principles of aerospace medicine; altitude physiology; specialized techniques necessary for the safe and efficient transportation of patients by air in a peacetime and wartime environment; life support principles, procedures, equipment, and techniques; and survival skills. Provides the knowledge and skills required for the management and nursing care of patients in flight.

Prerequisites: Applicants must be active duty Air Force, Army, Navy, Air Force Reserve, or Air National Guard Nurse Corps officers. Active duty officers must be Regular or Conditional Reserve Nurse Corps officers at the time of application. Nonretirement eligible nurses will be allowed to go to flight school with a follow-on flying assignment. MOTS003, Military Indoctrination for Medical Service Officers, is mandatory for USAFR or ANG nurses; waivers are granted by USAFSAM/TA. Applicants must be physically qualified for flying Class III or equivalent physical qualifications according to AFI 48-123. SICKLEDEX exam is required for prospective students of identified high risk ethnic groups due to altitude chamber flights

conducted during course under conditions of less than 1 atmosphere. A general review of medical/surgical nursing basics prior to course is highly recommended. ECL 80 SR.

Admin Instructions: Students must hand-carry to course registration their health records and a current flying Class III physical (SF 88, **Report of Medical Examination,** and SF 93, **Report of Medical History**) certified according to AFI 48-123. (SF 93 must be current and have all medications recorded according to AFI 48-123.) Students must bring 15 copies of travel orders. Return airline reservations must not be scheduled to depart prior to 1800 on the last day of training. Class start time at Brooks AFB is 0700, building 775. Military transportation is only available weekdays during normal duty hours, excluding holidays. Students should be prepared to pay for commercial taxi service from the airport. The students should receive the Fundamentals of Nursing booklet from their home unit's Staff Development Office before attending the Flight Nurse course. The material from this booklet will be tested on the second day of the course. The Fundamentals of Nursing test must be successfully completed for the student to continue in the course.

Special Requirements: a. Mandatory items all year: service dress uniform. Minimum - one light blue shirt (long or short sleeves), dark blue trousers and low quarter uniform shoes (male), or dark blue skirt/slacks and low heel black toe oxfords or pumps (female); three sets of woodland BDUs with BDU cap, combat boots, undergarments and undershirts, three pair of cushion sole socks, leather gloves, tennis shoes, conservative swim wear, towels, duffel bag, pocket knife, ID card, and ID tags with chain necklace. (Oct - Apr): Field jacket with liner, glove liners, and thermal underwear. Flight suits may be worn for aircraft exercises.

b. Recommended items: sunglasses, blousing bands, personal survival kit, small sewing kit, flashlight with batteries, raincoat, poncho/rain gear for survival, sweater, umbrella according to AFI 36-2903, matches or lighter, sunscreen, size 10-12 fishing hooks, 6-10 lb fishing line, a nonglass field eating container, and a duffel, A-3, or backpack to carry equipment. No individual equipment (538) supply system exists for students at this base. Nonissue items are subject to approval by the survival training staff.

c. Survival Block: Students will be required to participate in ditching exercises and a survival situation conducted in the field as well as ditching exercises. Ditching exercises will involve jumping from a height of 4 1/2 feet into water 8 feet in depth wearing a flotation device. These requirements must be satisfactorily completed for graduation.

Quota Control: USAFSAM/TA.

B3OZY46X0 000—Battlefield Nursing—PDS Code 2FC—Brooks/1 wk/MASL D175108—Oct 96

Provides selected nurses and independent duty medical technicians (IDMT) advanced battlefield nursing skills and knowledge primarily oriented toward the second echelon of care. Course emphasis is placed on battlefield injuries to include nursing care considerations and management implications. Course addresses initial assessment, triage, resuscitation with stabilization, and trauma life support as well as psychosocial needs of the soldier and the caregiver. A half-day clinical skills laboratory in which students perform invasive procedures is a requirement of the course.

Prerequisites: Priority is given to active duty Air Force, Air Force Reserve, and Air National Guard Nurse Corps officers or IDMTs. Open to all nursing AFSCs with no minimum grade requirement and personnel with an AFSC of 4N071 in the grade E-5 through E-7. Must be qualified for worldwide duty according to AFI 48-123. Must comply with the weight standards in AFI 40-502 (formerly AFR 35-11). ECL 80 SA.

Special Requirements: Must bring two sets of BDUs with hat and combat boots. Optional items, Nov-Mar: field jacket and leather gloves. Blue uniforms not required.

Admin Instructions: Students must bring 10 copies of travel orders. Return airline reservations must not be rescheduled to depart prior to 1800 on the last day of training. Military transportation is only available week days during normal duty hours, excluding holidays. Students should be prepared to pay for commercial taxi service.

Quota Control: USAFSAM/TA; active duty student selections made by AFPC/DPAMN.

B3OZY46X0 001—Clinical Hyperbaric Nursing—PDS Code ALY—Brooks/16 wk—Jan 96

Provides training necessary to function as a baromedical nurse in an Air Force clinical hyperbaric medicine facility. Selectees will attend B3OZY48X0-009, Hyperbaric Training for Health Care Officers Course. Emphasis is on total patient care of critically or chronically ill patients selected for hyperbaric oxygen therapy. Academic portion includes seminars on hyperbaric physiology and medicine and structured rotations through the various departments of the Air Force Hyperbaric Center. Clinical portion emphasizes total patient care in a hyperoxygenated pressurized environment. This includes the use of mechanical respirators; monitoring and evaluation of neurological systems; cardiopulmonary monitoring; use and management of sophisticated medical equipment under changing pressure conditions; physical assessment skills to encompass physical and psychological status of multiple patients; and administrative maintenance of data for research and consultation purposes. Attendees participate in the practice of clinical hyperbaric medicine, including patient care. Students get experience in emergency practice to include treatment of decompression sickness, air embolism, carbon monoxide poisoning, and gas gangrene.

Prerequisites: Air Force Nurse Corps Officer (Regular or Career Reserve) in grade of first lieutenant through major with minimum of 2 years of active duty, and minimum of 1 year experience in critical care nursing to include intensive care units (adult or pediatric), coronary care units, recovery rooms, and emergency rooms. BSN or BS with MSN required degree and completion of B3OLY46F1-000, Flight Nurse Course, is preferable. Must meet medical standards for hyperbaric chamber duty according to AFI 48-123.

Application Procedures: Application procedures and deadlines and selection board dates are published by HQ AFPC/DPAMN.

Admin Instructions: Student must hand-carry the following to class registration: health care record with documentation of current physical including documentation of all standards met according to AFI 48-123; and at least three copies of orders and AF Form 1042.

Quota Control: USAFSAM/TA.

B3OZY47X0 000—Preventive Dentistry Course—PDS Code WTD—Lackland/1 wk/MASL D175069—Oct 96

Reviews methods for controlling oral disease, including modern advances in topical anticariogenic agents. Preventive aspects of periodontics, dental materials, and restorative dentistry. Analysis of research and literature publications. Management of base preventive dentistry programs.

Prerequisites: Command-sponsored attendance is limited to active duty dental officers of the United States Air Force with at least 1 year

of service remaining after completion. They must not have attended the course in the last 3 years. Noncommand sponsored Air Force dentists are eligible to attend, using local funds. Federal services dental officers may also attend the course using local funds or on permissive TDY.

Application Procedures: MAJCOM selects candidates for funded quotas from applications initiated locally IAW procedures established by the command. Air Force dental officers and registered dental hygienists who wish to attend the course, using local funds or on permissive TDY, must submit a letter requesting an unfunded quota to HQ AFPC/DPAMD, Randolph AFB TX 78150-4729, NLT 45 days before the start date of the course. Priority will be given to individuals who are managing dental health programs at their facilities. Dental officers and registered dental hygienists from the other federal services (Army, Navy, PHS, VA, etc.) who wish to attend the course using local funds must submit a letter requesting an unfunded quota to: USAFSAM/TA, 2602 West Gate Road, Brooks AFB TX 78235-5252 (DSN 240-4680/4681 or (210) 536-4680/4681).

Special Requirements: 1. All attendees should be prepared to discuss the dental health programs currently in effect at their treatment facility. Copies of operating instructions, program guides, training aids, or other supporting documentation will be needed for group discussion sessions.

2. Beginning in 1995, this course will share quotas with the USAF Dental Infection Control and Occupational Health Course (B3OZY47X0 001). Training requirements will determine the quotas allocated to each course. Beginning FY 95, this course will be offered annually based on training requirements.

Quota Control: USAFSAM/TA.

B3OZY47X0 001—USAF Dental Infection Control and Occupational Health Course—PDS Code XF8—Brooks/1 wk—Oct 96

Provides the latest information on the implementation and management of effective infection control and occupational health programs in federal services dental clinics. Provides updated information on infectious diseases and occupational risks associated with dentistry. A combination of lectures, discussion groups, and hands-on training will be used to accomplish course objectives. Students will be asked to share information on the programs in effect at their individual installations. In addition, new avenues of infection control as related to dentistry and medicine are explored with an emphasis on the development of active and comprehensive dental infection control and occupational health programs at the base level.

Prerequisites: Command-sponsored attendance is limited to active duty dental officers of the US Air Force with at least 1 year of service remaining after completion. Must not have attended the course in the last 3 years. Dentists and registered dental hygienists employed by all the federal services are eligible to attend, using local funds. Federal Services dental officers may also attend the course on permissive TDY. Attendance by enlisted personnel serving as infection control or occupational health NCOICs will be approved on a case-by-case basis.

Application Procedures: MAJCOM selects candidates for funded quotas from applications initiated locally according to procedures established by the command. Air Force dental officers and registered dental hygienists who wish to attend the course using local funds or on permissive TDY must submit a letter requesting an unfunded quota to HQ AFPC/DPAMD, Randolph AFB TX 78150-4729, NLT 45 days prior to the starting date of the course. Dental officers and registered dental hygienists from the other federal services (Army, Navy, PHS, VA, etc.) who wish to attend the course using local funds must submit a letter requesting an unfunded quota to: USAFSAM/TA, 2602 West Gate Road, Brooks AFB TX 78235-5252 (DSN 240-4680/4681). Priority will be given to individuals who are managing dental infection control and occupational health programs at their facilities.

NOTES: 1. All attendees should be prepared to discuss the dental infection control and occupational health programs currently in effect at their medical treatment facility. Copies of operating instructions, exposure control plans, program guides, training aides, or other supporting documentation will be helpful during group discussion sessions.

2. Beginning in 1995, this course will share quotas with the Preventive Dentistry Course (B3OZY47X0 000). Training requirements will determine the quotas allocated to each course. Beginning FY 95, this course will be offered annually based on training requirements.

Quota Control: USAFSAM/TA.

B3OBY48G1 000—Aerospace Medicine, Primary—PDS Code WSU—Brooks/7 wk/AFSC 48G1*/MASL D175002—Dec 93

Trains medical officers to perform duties as flight surgeons and to accomplish the objectives of the USAF Aerospace Medicine Program. Provides the student with the knowledge and skills required for the treatment and proper administrative disposition of aircrew members and for assuming the responsibilities of a general preventive medical member of the bioenvironmental engineering, occupational medicine, and military public health teams. Includes review of the clinical medical topics important in aerospace medicine; i.e., otolaryngology, audiology, ophthalmology, internal medicine, neurology, psychiatry, etc., with emphasis on particular applications of these specialty areas in aerospace medicine; instruction and experience in the physiology of altitude and acceleration; employment of survival/life support principles and equipment; instruction in aircraft accident investigation; the administrative requirements of aeromedical services and in the application of physical standards to the patient population for which the flight surgeon is responsible. Orientation to flying in a current inventory trainer aircraft and training in the human centrifuge are also provided when equipment is available.

Prerequisites: Applicants must meet flying class II physical standards and be willing to engage in frequent and regular aerial flights. Air Force-sponsored medical students must have completed SAM II training or an approved Air Force survival course. ECL 80 SA or higher.

Special Requirements: Mandatory items all year include: combat boots (leather uppers without zippers), two sets of battle dress uniforms (BDUs), cotton undershirts and drawers (men) and undergarments (women), leather gloves, rain coat or poncho, tennis shoes, swim wear, ID card, flashlight with batteries, pocket knife, and sunglasses. Additional mandatory item for spring and fall classes is a field jacket. NOTE: No individual equipment (538) supply system exists for students at this station. Any non-issued items are subject to approval by the survival training staff. Normal duty uniform is dark blue trousers or skirt and short sleeve light blue shirt or blouse with epaulets. (A dark blue tie will be needed for wear with this uniform for the graduation ceremony.)

Application Procedures for Active Duty Personnel (Non-Training):

1. Active Duty Staff Physicians.

a. Applications must include three copies of the following:

(1) AF Form 215, **Officer Application for Training**, signed by the DBMS.

(2) A current, complete initial flying class II physical examination performed in a military flight surgeon's office. To be current, the physical examination must not be dated earlier than 24 months before the last day of the course. (See AFI 48-123 for the term of validity and required contents.)

NOTE: Applicants who will be 40 years or older before completing training must submit a symptom-limited exercise tolerance test with pulse rate to exceed 100 beats per minute, if their cardiac risk index is 10,000 or greater (AFI 48-123).

(3) AF Form 1042, **Medical Recommendations for Flying or Special Operational Duty**.

(4) A statement of willingness to participate in frequent and regular aerial flights.

(5) AF Form 233, **Specified Period of Time Contract**, if established DOS will be less than 1 year remaining after completion of the course (AFI 36-2107, *Active Duty Service Commitments*).

(6) Specific justification, if applicant is nominated by the DBMS and MAJCOM SG and is not projected to serve in duty AFSC 935X position.

b. Individuals will forward application packages to the MAJCOM SGP prior to the established suspense date for receiving applications. Applications are only accepted from the MAJCOM.

c. The MAJCOM SGP will establish the suspense date for applications to be forwarded to their office. The MAJCOM SGP will review and prioritize applicants for attendance and receipt of funded quotas and forward the completed application packages along with the prioritized list directly to HQ AFPC/DPMMUE, Randolph AFB TX 78150-6001, NLT 90 days before course start date. The MAJCOM SGP is responsible for obtaining any required waivers from HQ USAF/SGPA and ensuring that all applications include items listed in paragraphs (1) thru (6) above.

d. HQ AFPC/DPMMUE will review applications and forward physicals to HQ AETC/SGPA for certification. HQ AFPC/DPMMUE will select applicants to receive any available funded quotas on a fair share basis using the MAJCOM priority lists. Any remaining selectees will be allocated "unfunded" quotas. HQ AFPC/DPMMUE will notify the MAJCOM SGP of the selectees and type of quota (funded or unfunded) at least 45 days prior to the class start date.

e. HQ AFPC/DPMMUE will provide the list of selectees and quota type to USAFSAM/TA, Brooks AFB TX. USAFSAM/TA will suballocate both funded and unfunded quotas by name and generate a training line number for the selectee in the Air Force Training Management System (TMS) at least 45 days before class start date.

f. MAJCOMs will either confirm or reject the suballocation and training line number at least 30 days before the class start date.

2. Active Duty Residents in Military Training Facilities:

a. Applications must include three copies of the items listed in paragraphs 1a(1) (signed by the medical center's director of medical education (DME)) through 1a(4).

b. Individuals will submit application packages to the DME prior to the established suspense date for receiving applications. Applications will be accepted from the DME only.

c. The DME establishes suspense date for applications to be submitted. The DME will submit applications to HQ AFPC/DPMMUE, Randolph AFB TX 78150-6001, NLT 150 days prior to the class start date. The DME is responsible for obtaining any required waivers from HQ USAF/SGPA and ensuring that all applications include items listed in paragraph 2a.

d. HQ AFPC/DPMMUM will review these applications for use in a flying billet as a flight surgeon. After initial review, records will be given to DPMMUE to obtain the flying class II certification from HQ AETC/SGPA. Certified physicals will be returned to DPMMUE.

e. Those individuals who are selected to fill flying billets by DPMMUM will have their records reviewed by the DPMM board not later than 120 days prior to the class start date. This is to ensure that the individuals are fully qualified to meet the requirements of the position they have been chosen for. These individuals will receive funded USAFSAM quotas.

f. For those individuals who are not selected, HQ AFPC/DPMMUE will return their applications to the medical center's DME.

3. Other Personnel in Training. (This includes active duty physicians at AFIT-sponsored civilian medical facilities and USUHS and HPSP medical students.)

a. Applications must include three copies of items listed in paragraphs 1a(1) (endorsed by the current program director and signed by the AFIT manager; USUHS students will have a letter with package from commandant in lieu of AF Form 215), 1a(2), and 1a(4).

b. Individuals will submit application packages to the AFIT manager before established suspense date for receiving applications. Applications will be accepted from the AFIT manager only.

c. The AFIT manager will establish a suspense date for applications to be submitted. The AFIT manager will submit applications to HQ AFPC/DPMMUE NLT 150 days prior to the class start date. The AFIT manager is responsible for obtaining any required waivers from HQ USAF/SGPA and ensuring that all applications include items listed in paragraph 3a.

d. HQ AFPC/DPMMUM will review these applications for use in a flying billet as a flight surgeon. After initial review, records will be given to DPMMUE to obtain the flying class II certification from HQ AETC/SPGA. Certified physicals will be returned to DPMMUE.

e. Those individuals who are selected to fill flying billets by DPMMUM will have their records reviewed by the DPMM board not later than 120 days prior to the class start date. This is to ensure that the individuals are fully qualified to meet the requirements of the position they have been chosen for. These individuals will receive funded USAFSAM quotas.

f. For those individuals not selected, HQ AFPC/DPMMUE will return their applications to the AFIT manager.

NOTE: Applications not meeting the above suspense dates will be returned to the MAJCOM, DME, or AFIT manager for forwarding to the individual. Permissive TDYs are not allowed.

Application Procedures for Prospective Flight Surgeons. Personnel brought into the Air Force for the specific purpose of serving in a flight surgeon's position will be contacted by HQ AFPC/DPMMMC. Headquarters Recruiting Service will obtain physical certification and any waivers that may be necessary for these individuals. Packages for accessions will be provided whenever available. Names of personnel will be provided as soon as available through the Training Management System (TMS).

Application Procedures for USAFR Personnel. USAFS personnel in mobilization augmentee status must send AF Form 1289, **Application for Active Duty Training (RPA tours)**, through MAJCOM to ARPC/SGS, Denver CO 80280-5000. ANG units must send NGB Form 65, **Applications for Training**, in triplicate, through channels to NGB/SPGS, Andrews AFB DC 20334. Applications for USAFR Category A medical units will include the same items previously listed above for active duty physicians with exceptions to items in paragraphs 1a, b, and c above. Items in paragraphs 1b and c are maintained in file.

Admin Instructions: Students must hand-carry their health records to course registration. Lack of a current flying class II physical examination or medical clearance by the appropriate certifying authority (HQ AFPC/DPMMMC, NGB/SPGS, AFRES/SPGS, ARPC/SGS, or HQ USAF/SGPA), may result in automatic return to home station at the referring unit's expense. At least 20 copies of travel orders should be provided to each student. Upon arrival at the San Antonio Airport, all students should report to the military reception desk for transportation. All students report to the Brooks AFB billeting office to make billeting arrangements (reference paragraph 2.7). Travel to home station should not be scheduled prior to 1800 on the last day of the course.

Special Note: Air Force Reserve personnel may attend this course during the spring and fall in three successive increments, taken in sequence, beginning with course B3OBY48G1 001 and ending with B3OBY948G 003 (refer to course announcements for details). All three increments must be completed within 5 years. The summer course is nonincremental.

Quota Control: USAFSAM/TA.

*Primary or secondary as determined by MAJCOM.

B3OBY48G1 001—Aerospace Medicine, Primary (Increment I*)—PDS Code 4ZG—Brooks/2 wk 2 days—Dec 93

Trains medical officers to perform duties as flight surgeons and to accomplish the objectives of the USAF Aerospace Medicine Program. This increment concentrates on the delineation of the role of the flight surgeon in the Air Force and provides instruction in aerospace physiology, hyperbaric medicine, and aircraft accident investigation.

Prerequisites: Open only to medical officers in the Air Force Reserve or Air National Guard. Applicants must meet flying class II physical standards and be willing to engage in frequent and regular aerial flights.

Special Requirements: Mandatory clothing items all year include combat boots (leather uppers without zippers), two sets of battle dress uniforms, and a field jacket. (NOTE: No individual equipment (538) supply system exists for students.)

Application Procedures: USAFR personnel in mobilization augmentee status must send AF Form 1289 through MAJCOM to HQ ARPC/RTT, 6700 E Irvington Pl, Denver CO 80280; ANG must send NGB Form 65, **Application for Training**, in triplicate, through channels to ANGSC/TET, Andrews AFB DC 20334. All applications must be sent through channels to reach approving authority at least 90 days in advance of course start date. Include the following attachments with the application (Exception: USAFR Category A medical units who will maintain the items listed in paragraphs 1 and 2 below on file):

a. In triplicate, a completed initial flying class II physical examination performed at a military flight surgeon's office. (Physical examination must be current throughout the period of training. See AFI 48-123 for term of validity and required contents.)

NOTE: Applicants who will be 40 years of age or older before completing training must submit a symptom-limited exercise tolerance test with pulse rate to exceed 110 beats per minute if their cardiac risk index is 10,000 or greater (AFI 48-123).

b. In triplicate, a statement of willingness to participate in frequent and regular aerial flights.

Admin Instructions: Students must hand-carry their health records to course registration. Lack of a current flying class II physical examination and medical clearance by the appropriate certifying authority (HQ AFPC/DPMM, NGB/SG, AFRES/SG, HQ ARPC/SG, HQ USAF/SG) can result in automatic return to home station at the referring unit's expense. At least 20 copies of travel orders should be provided to each student. Travel to home station should not be scheduled prior to 1800 on the last day of the course. Upon arrival at the San Antonio Airport all students should report to the military reception desk for transportation. All students report to the Brooks AFB billeting office.

*Special Note: After 1 Dec 91, course material originally given in Increment I will be included in Increment II and course material originally in Increment II will be included in Increment I. Students who have completed Increment I prior to 1 Dec 91 (but have not taken Increment II) should enroll in the revised Increment I. The revised Increment II will not be required for those who completed Increment I prior to 1 Dec 91. Increment III remains unchanged.

Quota Control: USAFSAM/TA.

B3OBY48G1 002—Aerospace Medicine, Primary (Increment II*)—PDS Code 4ZH—Brooks/2 wk—Dec 93

Trains medical officers to perform duties as flight surgeons and to accomplish the objectives of the USAF Aerospace Medicine Program. This increment provides instruction in preventive and occupational medicine, epidemiology, aerospace otolaryngology, audiology, and aeronautics.

Prerequisites: Open only to medical officers in the Air Force Reserves and Air National Guard who have completed course B3OBY9351 001. The time period between the start of Increment I and the completion of Increment II must not exceed 3 years.

Special Requirements: Mandatory clothing items all year include combat boots (leather uppers without zippers), two sets of battle dress uniforms (BDUs), and a field jacket. NOTE: No individual equipment (538) supply system exists for students.

Application Procedures: USAFR personnel in mobilization augmentee status must send AF Form 1289 through MAJCOM to HQ ARPC/RTT, 6700 E Irvington Pl, Denver CO 80280; ANG must send NGB Form 65, **Application for Training**, in triplicate, through channels to ANGSC/TET, Andrews AFB DC 20334. All applications must be sent through channels to reach approving authority at least 90 days in advance of course start date. Except for USAFR Category A members, attach a flying class II physical

examination that will be current throughout the period of training (see AFI 48-123 for term of validity and required courses). USAFR Category A medical units will maintain a current certified physical examination on file.

NOTE: Applicants who will be 40 years of age or older before completing training must submit a symptom-limited exercise tolerance test with pulse rate to exceed 110 beats per minute, if their cardiac risk index is 10,000 or greater (see AFI 48-123).

Admin Instructions: Students must hand-carry their health records to course registration. Lack of a flying class II physical examination current for the entire period of training can result in automatic return to home station at the referring unit's expense. At least 20 copies of travel orders should be provided to each student. Travel to home station should not be scheduled prior to 1800 on the last day of the course. Upon arrival at the San Antonio Airport all students should report to the military reception desk for transportation. All students report to the Brooks AFB billeting office.

*Special Note: After 1 Dec 91, course material originally given in Increment I is now included in Increment II and course material originally in Increment II is now included in Increment I. Those students who completed Increment I prior to 1 Dec 91 (but have not taken Increment II) should enroll in the revised Increment I. The revised Increment II will not be required for those who completed Increment I prior to 1 Dec 91. Increment III remains unchanged.

Quota Control: USAFSAM/TA.

B3OBY48G1 003—Aerospace Medicine, Primary (Increment III)—PDS Code WSU—Brooks/2 wk 2 days/AFSC 48G1*—Dec 93

Trains medical officers to perform duties as flight surgeons and to accomplish the objectives of the USAF Aerospace Medicine Program. This increment includes disaster response, psychiatric, administrative, and internal medicine topics, culminating in 1 week of survival training.

Prerequisites: Open only to medical officers in the Air Force Reserves and Air National Guard who have completed courses B3OBY48G1 001 and 002. The time period from the start of Increment I to the completion of Increment III must not exceed 5 years.

Special Requirements: Mandatory items all year include combat boots (leather uppers without zippers), two sets of battle dress uniforms, cotton undershirts and underpants (men) and undergarments (women), leather gloves, rain coat or poncho, tennis shoes, swim wear, ID card, flashlight with batteries, pocket knife, sunglasses, and field jacket.

NOTE: No individual equipment (538) supply system exists for students. Any non-issued items are subject to approval by the survival training staff. Normal duty uniform is dark blue trousers or skirt and short sleeve light blue shirt or blouse with epaulets (a dark blue tie will be needed for wear with this uniform for the graduation ceremony).

Application Procedures: USAFR personnel in mobilization augmentee status must send AF Form 1289 through MAJCOM to HQ ARPC/RTT, 6700 E Irvington Pl, Denver CO 80280; ANG must send NGB Form 65, **Application for Training**, in triplicate, through channels to ANGSC/TET, Andrews AFB DC 20334. All applications must be sent through channels to reach approving authority at least 90 days in advance of course start date. Except for USAFR Category A members, attach a flying class II physical examination that will be current throughout the period of training (see AFI 48-123 for term of validity of required contents). USAFR Category A medical units will maintain a current certified physical examination on file. NOTE: Applicants who will be 40 years of age or older before completing training must submit a symptom-limited exercise tolerance test with pulse rate to exceed 110 beats per minute if their cardiac risk index is 10,000 or greater (see AFI 48-123).

Admin Instructions: Students must hand-carry their health records and AF Form 702, **Individual Physiological Training Record**, to course registration. Lack of a flying class II physical examination current for the entire period of training can result in automatic return to home station at the referring unit's expense. Failure to have the AF Form 702 will result in delay of publication of flight surgeon aeronautical orders. At least 20 copies of travel orders should be provided to each student. Return travel to home station should not be scheduled prior to 1800 on the last day of the course. Upon arrival at the San Antonio Airport, all students should report to the military reception desk for transportation. All students report to the Brooks AFB billeting office.

Quota Control: USAFSAM/TA.

*Primary or secondary as determined by MAJCOM.

B3OZY48G3 000—Operational Aeromedical Problems—PDS Code WS6—Brooks/1 wk/MASL D175047—Mar 94

Orients flight surgeons to current operational aeromedical problems and describes recent advances in the clinical, management, environmental, and research areas of aerospace medicine.

Prerequisites: Flight surgeons must not have attended aerospace medicine primary course in the last 2 years or this course in the last 3 years. ECL 80 SA.

Application Procedures: MAJCOM selects candidate for training from applications initiated locally according to procedures established by the command. Federal physicians performing similar duties, eligible US Navy, US Army, and other physicians apply for attendance through their respective services.

Quota Control: USAFSAM/TA.

B3OZY48G3 001—Aeromedical Readiness and Management—PDS Code H78—Brooks/2 wk—Mar 94

Intended for medical officers who are assigned or projected to be assigned as Chief, Aeromedical Services, at a medical treatment facility. Prepares flight surgeons in the unique requirements involved in operational and wartime missions as well as skills necessary to manage Aeromedical Services. Topics include readiness responsibilities unique to aerospace medicine, aircraft accident investigation, worldwide endemic diseases survey, war threats related to medical management, tactical air evacuation, flight medicine administration, and interaction as the Chief, Aeromedical Services, with the medical treatment facility, base, and MAJCOM.

Prerequisites: Must have a 48G1 or 48G3 AFSC. Officers who have completed course B5OAY48A4 000, Residency in Aerospace Medicine, are not eligible to attend this course without specific approval from USAFSAM/TA. At least 1 year of experience as a base-level flight surgeon is highly recommended.

Special Requirements: Must have a Secret clearance prior to class start date.

Quota Control: USAFSAM/TA.

B3OZY48G3 002—Aircraft Mishap Investigation and Prevention - Flight Surgeon—PDS Code W9A—Brooks/2 wk/MASL D175128—Oct 96

Prepares flight surgeons to perform aircraft accident investigations. Reviews human, environmental, and materiel factors which directly or indirectly contribute to the aircraft mishaps. Uses extensive lab work of simulated or actual aircraft mishaps to learn the keys of accident investigation. Flight surgeons will work in teams with psychologists and aerospace physiologists in this course.

Prerequisites: Must be active flight surgeons (48G1/48G3). ECL 80 SA.

Special Requirements: Student should bring flight suits or BDUs with boots for use in mishap labs.

Quota Control: USAFSAM/TA.

B3FAY48G4 000—Advanced Aerospace Medicine for International Medical Officers—PDS Code WSQ—Brooks/23 wk/MASL D175062—Dec 93

Designed for international flight medical officers who completed basic training in aerospace medicine and served at least 1 year as operational flight surgeons at base or squadron level. Not intended for those who have already completed advanced training or the equivalent or residency training in aerospace medicine and are working as specialists in the field. Selection of curriculum material is based on the assumption that students will have already completed the Aerospace Medicine Primary Course or an equivalent course in their own country. Successful completion of this course will enable students to delineate the basic sciences applicable to aerospace medicine; address clinical problems in aerospace medicine, including global preventive medicine problems; evaluate and control or resolve operational aerospace medical problems; and assume higher levels of responsibility in their aerospace medicine careers. The Department of Aerospace Medicine at Brooks AFB will select and approve admission of all international flight medical officers based on their academic and physical qualifications and following recommendation of their respective Air Forces.

Prerequisites: Satisfactory completion of course B3OBY48G1 000 or an equivalent course in officer's own country, followed by a minimum of 1 year of professional work experience in operational aerospace medicine after completion of the training; a reading, writing, and speaking knowledge of the English language, including medical terminology; and physically qualified for flying class II or equivalent physical qualification. It is important that students be neither over-qualified nor under-qualified for the course to benefit from this training. Any questions about an applicant's background should be discussed beforehand with AFSAT/TO and USAFSAM/AF. ECL 80 SA.

Special Requirements: Students must bring fatigue uniform or flight suit and leather flight boots.

NOTE: Course includes altitude chamber flights which are conducted under conditions of less than 1 atmosphere; therefore, prospective students of ethnic groups known to have a high incidence of abnormal hemoglobin must undergo a SICKLEDEX screening examination before leaving their homeland. One class per fiscal year.

Quota Control: USAFSAM/TA.

B3OZY48X0 000—Global Medicine—PDS Code WS4—Brooks/2 wk/MASL D175076—Oct 96

A post-graduate (medical degree graduate) continuing medical education program to train operations medical personnel to identify and plan for the infectious diseases and environmental conditions of medical and military significance worldwide. The course emphasis is for the physician to be able to successfully design and implement a plan that minimizes the health risk of the endemic natural biologic hazards to a deploying or deployed force. To achieve this objective, lectures on epidemiology, deployment preparation, medical intelligence sources, and infectious diseases are presented. Interactive laboratories on computer access to medical intel sources, malaria diagnosis and screening, and field epidemiology will be conducted. Examination and a practical project are required for course completion.

Prerequisites: Designed primarily for operational medicine physicians early in their careers, captains to majors in an operational billet (for example, AFSC 48X0). Officers are selected by their MAJCOMs or respective Service. Open to physicians and veterinarians from each Service. Priority in selection will be given to those for whom the course is an integral part of their required duties, but exceptions can be made on a case-by-base basis through the course director.

Funding for non-Air Force applicants must come from your Service; central funding is currently available for some active-duty Air Force applicants. At this time no spaces are reserved for US Army personnel. Unused course slots will be made available to the US Army. Applications for the US Navy are made through NSHS and are funded by BUMED. USN personnel should contact LCDR Bryan for US Navy allocations:

LCDR Joe Bryan, USN
(301) 295-3725/3730 Fax (301) 295-3579
email 102650.3434@compuserve.com
NSHS, Operational Medicine Department
Uniformed Services University of the Health Sciences (USUHS) PMB-TPH A2-067
4301 Jones Bridge Road, Bethesda, MD 20814-4799

Special Requirements: Two 1.44 MB IBM formatted 3.5" disks. All authorized duty uniforms are authorized. This is an operational course; therefore, flight suits and battle dress uniforms are encouraged.

B3OZY48X0 001—Occupational Medicine—PDS Code 7EB—Brooks/2 wk—Apr 95

Intended for graduates of the aerospace medicine primary course who are assigned or projected to be assigned as Chief, Physical Examinations, at a medical treatment facility. Prepares flight surgeons with additional training in industrial hygiene, toxicology, and clinical occupational medicine. Specific emphasis is placed on evaluation of clinical occupational illnesses using case presentations in small groups.

Prerequisites: Must have a primary AFSC of 48GX, 48PX, or 48FX. At least 6 months of experience as a base-level flight surgeon is highly recommended.

Special Requirements: Student should bring flight suits or BDU with boots for use in Kelly AFB tour.

Quota Control: USAFSAM/TA.

B3OZY48X0 009—Hyperbaric Training for Health Care Officers—PDS Code 8H3—Brooks/1 wk/MASL D175085—Jan 96

Prepares personnel to perform duties as a medical officer or medical specialist in an Air Force hyperbaric chamber. Course includes hyperbaric physiology, hyperbaric medicine, and hyperbaric chamber operations. Includes duties in each of the hyperbaric chamber positions and systems, use of decompression schedules, treatment tables, emergency procedures, theory of hyperbaric oxygenation; and hazards and safety precautions involved with hyperbaric chamber operations.

Prerequisites: Officers with AFSC 42XX, 44XX, 45XX, 46XX, 47XX, or 48XX assigned as or scheduled to replace a hyperbaric chamber team member. All students must be medically qualified for hyperbaric chamber duty IAW AFI 48-123. Officers with any of the prerequisite AFSCs not assigned or scheduled to replace a hyperbaric chamber team member may attend on a space-available basis only. Air Force installations without a hyperbaric unit should have at least one health care officer attend for consultant services. Medical personnel with other appropriate specialties may attend when approved by USAFSAM/TA. ECL 80 SA.

Admin Instructions: Students must hand-carry their health care records to class indicating that they meet the medical prerequisites for this course and four copies of their orders.

Quota Control: USAFSAM/TA.

AFMCSAS012—Basic Systems Acquisition Management (Medical)—PDS Code XF7—Brooks/1 wk—Apr 95

Provides an orientation into the current principles and procedures used to acquire weapon and support systems for the United States Air Force. Gives the student a basic understanding of the activities required to deploy a system to the operating command, from generating the mission requirement to supporting the system when it arrives in the field. The course gives introductory training to individuals who support acquisition programs as well as personnel who interface with acquisition programs from the operating command perspective. Topics covered include the Air Force requirements generation process; the planning, programming, and budgeting processes with respect to funding acquisition programs and technology development; and the various Air Force Materiel Command acquisition management processes used to design, develop, test, produce, and support military systems. Additional topics include: the Air Force Science and Technology Program, operating command roles and responsibilities in the acquisition process, environmental protection techniques used in acquisition planning, contracting processes, risk management, systems engineering processes, cost estimating, testing, manufacturing, and systems support. Although the topics in the course cover the fundamental aspects of systems acquisition management for all types of systems, it specifically focuses on the US Air Force Medical Service and training needs of the Air Force Surgeon General and MAJCOM Surgeons requirement and programs oversights/liaison personnel.

Prerequisites: Air Force Medical Service officers serving at HQ USAF/SG, MAJCOM/SG, or other operating command medical offices where medical systems requirements are generated, funded, justified, or supported with medical expertise (pilot physicians are included). Air Force Medical Service officers assigned to Air Force Materiel Command supporting systems acquisition and technology developments activities are also eligible to attend. Eligibility is currently limited to BSC, MSC, MC, and NC officers, 1st Lt to Colonel and above. Although there are no experience requirements for this course, it is recommended that the student have at least 3 months on the job before attending.

Selection Procedures: The 70th Training Squadron will provide student quotas to Air Force Medical Service personnel.

Funding: USAFSAM/TA will centrally fund quotas for students TDY to training. SAS will issue the fund cite along with training information.

Additional Information: SAS will allocate student quotas through the Air Force Training Management System. Upon arrival, TDY students will report to the Brooks AFB Billeting Office, Bldg 214, for assignment to quarters. Reservations are held until 1700 the day before class start date unless the student makes arrangements directly with billeting for later arrival. All TDY students must notify Brooks AFB Billeting at DSN 240-1844 or (210) 536-1844 of any room cancellation or nonuse of a room. Government transportation will be provided. Rental cars are not authorized. On the first day of class, students will report to bldg 558, System Acquisition School, at 0745. Students will be dismissed not earlier than 1200 on the last day of class. Military students are required to wear the light blue short or long sleeve shirts for the classroom.

Quota Control: USAFSAM/TA.

Environmental Courses

B3OZY0000E 001—Hazardous Waste Operations and Emergency Response (HAZWOPER) Course—PDS Code W1S—Brooks/1 wk—Mar 94

Provides 40 hours of initial training required by the Occupational Safety and Health Administration (OSHA) 29 CFR 1910.120 to individuals involved in hazardous waste operations, site restoration, or environmental management duties. This training is usually required for access to DoD installation restoration sites and is mandatory for workers involved in tasks at sites on the EPA National Priorities List (NPL). This course *does not* qualify individuals as level III hazardous materials technicians or level IV hazardous materials specialists as defined by AFI 32-4001, *Disaster Preparedness Planning and Operations*-, Atch 6. The course is open to all DoD enlisted, officer, and civilian personnel working in hazardous waste operations, site restoration, and site investigations including sampling or environmental management duties. This course has received EPA approval to be taught by USAFSAM as EPA Course 165.5, Hazardous Material Incident Response Operations. Course attendees will receive an EPA graduation certificate upon completing the course.

Prerequisites: Enlisted, officers, and civilian personnel working in hazardous waste operations, site restoration, site investigations including sampling, or environmental management duties.

a. Enlisted. Bioenvironmental engineering personnel who graduated before 23 Mar 93 from B3ABY90730 000, Bioenvironmental Engineering Specialist, or civil engineering personnel with an AFSC that requires HAZWOPER training according to 29 CFR 1910.120.

b. Officers. 2d Lt through colonel with 43EX AFSC who graduated from the bioenvironmental engineering course, B3OBY43E1 000, prior to 1 Jun 92. Civil engineering officers 2d Lt through colonel with any AFSC assigned duties in environmental engineering, environmental management, or site restoration activities. Other officers (such as, chemists, toxicologists, staff judge advocates) performing duties requiring 29 CFR 1910.120 training are also eligible to attend.

c. Civilians. Personnel performing duties in environmental management, installation restoration, environmental engineering, and site assessment (such as, series 8XX, 1301, 0028) requiring 29 CFR

1910.120 training are eligible to attend. DoD contractor personnel may also attend this course providing an agreement of indemnification is provided to the USAFSAM Registrar at the time of course registration. See chapter 1, paragraph 1.52.5.1, for a sample letter of indemnification. Contractor personnel obtain quotas through the MAJCOM SG.

Special Information: Uniform for the class is the BDU for military personnel; civilians should wear equivalent clothing for field exercises. Eye inserts are not a requirement for personnel with glasses. If a student has been fit-tested previously with a full-face respirator and has one available, bring the respirator to class. Personnel who have attended equivalent 40-hour HAZWOPER courses, such as, EPA Hazardous Materials Response Operations, course number 165.5, should not attend this course since the USAFSAM course is equivalent to the EPA course. Students will be expected to wear respiratory protection including self-contained breathing apparatus and air-purifying respirators. If a student has a medical condition which prevents him or her from wearing a respirator, the student must bring documentation (such as, profile) from the proper medical authority stating he or she cannot wear a respirator. If the medical condition is temporary, the student shall not attend the course until the medical condition is resolved. Course quotas for all personnel for this class are obtained through the MAJCOM SG bioenvironmental engineer.

Quota Control: USAFSAM/TA.

B3OZY0000E 002—8-Hour Hazardous Waste Operations and Emergency Response (HAZWOPER) Course—PDS Code W1T—Brooks/1 day—Jun 94

Provides refresher training required by the Occupational Safety and Health Administration (OSHA) 29 CFR 1910.120 to individuals involved in hazardous waste operations, site restoration, or environmental management duties. The course must be repeated annually for the individual to maintain HAZWOPER certification. Uniform for this class is BDUs for military, equivalent utility clothes for civilians. Funded quotas (per diem) for this course may be available if this class is taken in conjunction with an additional USAFSAM course. Coordination of a funded quota must be made in advance through the MAJCOM and USAFSAM/TA.

Prerequisites: Enlisted, officers, and civilian personnel working in hazardous waste operations, site restoration, site investigations including sampling, or environmental management duties, who have attended a 40-hour HAZWOPER basic course are eligible to attend.

Quota Control: USAFSAM/TA.

B3OZY0000E 005—Pollution Prevention Tools, Techniques, and Technologies—PDS Code W1W—Brooks/1 wk—/MASL D175132/Oct 96

Furthers the continuing education of DoD personnel who are significantly involved in the DoD Pollution Prevention Program (PPP). These personnel must manage the DoD's efforts to reduce hazardous waste and recycle solvents and solid wastes in order to greatly reduce the need for end-of-the-pipeline treatment and disposal. This course will assist these personnel in reducing the amount of hazardous wastes created by Air Force operations as well as complying with the most current standards in the handling and disposal of these wastes. These efforts will ensure that future cleanup problems are minimized and ultimately reduce weapon system life-cycle costs. Course is centered around case studies, lessons learned, and provides examples of pollution prevention which members may take back and implement at their bases. The multidisciplinary approach across many career fields and base functions is stressed in this course. This course is directed toward personnel working in environmental management, environmental planning, bioenvironmental engineering, maintenance, and logistics career fields. Air Force personnel obtain quotas from their unit or MAJCOM training managers. Other DoD personnel obtain quotas through USAFSAM/TA.

Prerequisites: This course is an *introductory* pollution prevention course open to DoD personnel actively engaged in technical oversight of pollution prevention activities on their installations. Limited to personnel working in the following technical occupational series: bioenvironmental engineering (4BXX), civil engineer (any series), logistics/maintenance (any series), and environmental management (GS-028, GS-029). When registering for this class, the following information must be submitted: AFSC/MOS/GS series, career field name, and occupational title. For example, GS-819, civil engineer, environmental engineer. Occupational series not listed above may submit a waiver request to attend through the major command training coordinator. Questions regarding waivers should be coordinated through the major command. ECL 80 SA.

Quota Control: USAFSAM/TA.

B3OZY0000E 006—Site Restoration Tools, Techniques, and Technologies—PDS Code W1X—Brooks/1 wk/MASL D175129—Oct 96

Provides detailed information needed to make logical decisions in selecting the best remediation treatment technology for a given situation. Designed for Government personnel who must ensure their installation complies with the US Environmental Protection Agency (EPA) and their state's equivalent agencies in remediation efforts. Several software tools for regulatory information, technique selection, and cost estimation will be examined in detail. Employing case studies and computer based instruction (CBI), the students will learn the techniques necessary to incorporate liability, risk assessment, site investigation, sampling results, and public acceptance into the remediation technique selection process. An in-depth review of new and innovative technologies is performed throughout the course. Each of these technologies is compared to their relative costs, time needed for full implementation, removal cleanup efficiencies, and public acceptability. The course culminates in a review of successful site restoration case studies. Air Force personnel obtain quotas for this course from their unit or MAJCOM training managers. All other personnel obtain quotas through USAFSAM/TA.

Prerequisites: This course is an *introductory* remediation technologies course open to DoD personnel who are actively engaged in technical oversight of site restoration activities on their installations. Attendance is limited to personnel working in the following technical occupational series: bioenvironmental engineering [restoration duties only] (4EXX); civil engineer (32EXX, GS-028, -029, 8XX, 1301, and 1311); environmental management (GS-028, -029, 40XX, 8XX, and 13XX), scientific research (GS-193, 61XX, and 13XX); and contracting officers [restoration contract management only] (6CXX, 64P, and GS-11XX). When registering for this class, the following information must be submitted: AFSC/MOS/GS series, career field name, and occupational title. For example, GS-819, civil engineer, environmental engineer. Occupational series not listed above may submit a waiver request for attendance through the major command training coordinator. Questions regarding waivers should be coordinated through the major command. ECL 80 SA.

Quota Control: USAFSAM/TA.

B3OZY0000E 007—Lead Inspector/Risk Assessor Course—PDS Code X06—Brooks/1 wk—Oct 95

Provides training required to meet model EPA lead inspector training curriculum. Includes lead hazard recognition, sampling protocols including qualitative and quantitative techniques, inspector responsibilities, risk assessment, and a review of lead specific regulations, and hands-on workshops. The course also qualifies attendees to be named radiation safety officers on Air Force required radioisotope committee permits. Radiation safety training will be provided on the use and safe handling of the X-ray fluorescence (XRF) meters.

Prerequisites: Enlisted, officers, and civilians who will conduct lead hazard assessments and risk assessments of lead based paint. If not a 43EX officer or 4B0XX enlisted, must provide documentation to USAFSAM/BE that individual has received training in radiation safety, such as a radiation safety course or graduate course in health physics. Officers who have graduated B3OBY43E1 000, Bioenvironmental Engineering Course, after 1 January 1994 are not eligible to attend.

Special Information: Classroom uniform is the light blue shirt/blouse with long or short sleeves and dark pants/skirt. BDUs must also be brought to the course for laboratory and field work. Civilian students should bring clothes equivalent to the military specified uses. Students should bring an electronic scientific calculator.

Quota Control: USAFSAM/TA.

B3OZY0000E 010—Funding Workshop for Bioenvironmental Engineering Services—PDS Code 1ZY—Brooks/3 days—Apr 95

Provides training to bioenvironmental engineering personnel (officer and senior NCOs) in funding environmental programs. Provides students with an understanding of the budget process, information on how to establish accounts at base level, and information on how to spend and track funds.

Prerequisites: MSgt through CMSgt with a primary AFSC of 4B091. 2d Lt through Col with a 43EX AFSC.

Special Requirements: Classroom uniform is the light blue shirt or blouse with long or short sleeves and dark blue pants or skirt.

Quota Control: USAFSAM/TA.

B3OZY0000E 013—Team Aerospace Approach to ATSDR—PDS Code 2XX—Brooks/3 days—Apr 95

Trains Team Aerospace to become competent in the public health assessment (PHA) process. Provides hands-on exercises geared to help the student evaluate the health assessment report at all stages of development; i.e., the red, brown, and blue cover documents. Course requires students to prepare briefings for installation commanders from a red cover initial release health assessment report and a brown cover release for public review of the public health assessment report. Instruction will concentrate on communicating the recommendations suggested by ATSDR regarding public health issues at an Air Force base, the consequences pertaining to the affected community, and environmental remediation activities that result from the PHA. Course will stress case-based presentations by medical team experts who have worked with ATSDR at bases under investigation. In addition, participants will learn how to integrate their role in Team Aerospace into the health assessment review process. An update of the ATSDR activities that impact the Air Force, such as ongoing health studies, health advisories and consultations, community/physician health education, and *ATSDR Toxicological Profiles* will also be provided.

Prerequisites: The following members of Team Aerospace actively engaged in an ATSDR public health assessment process are eligible to attend: public health officers (AFSC 43HX), aeromedical physicians (AFSC 48XX), and bioenvironmental engineers (AFSC 43EX). Candidates must have attended the ATSDR health/risk assessment and health/risk communications course, an EPA-sponsored risk assessment course, or the risk assessment guidance strategy (RAGS) course.

Quota Control: USAFSAM/TA.

B3OZY0000E 014—Environmental Management Information System—PDS Code 116—Brooks/4 days—Apr 96

A Windows-based management tool used to track and control the purchasing, issue, storage, use and environmental aspects of chemicals and hazardous materials. This software program is designed to manage the basic operation of the installation HAZMAT pharmacies. The primary objective of the EMIS course is for each student to achieve proficiency in the use of EMIS to control and track their installation's hazardous materials. Course includes 1 day of classroom instruction, followed by 3 days of hands-on instruction and use of EMIS.

Prerequisites: Bioenvironmental engineering, civil engineering, and logistics personnel who work daily in the hazardous material pharmacy whose duties will include AF-EMIS hands-on operation, and who have basic PC Windows experience. Also eligible are civilians working in the HAZMAT pharmacy. Personnel to be trained in this course will be approved by their MAJCOM training managers. Those not meeting these requirements must apply for a waiver from USAFSAM/TA.

Special Requirements: Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. Civilian students should bring equivalent clothing.

B3OZY0000E 015—Data Quality Objectives—PDS Code 100—Brooks/4 days—Oct 96

Data quality objectives (DQO) refers to a seven-step planning process developed by EPA to ensure that the type, quantity, and quality of environmental data used in decision making are appropriate for the intended application. Although the DQO process was developed as part of the Superfund remediation effort, the process can be applied to emergency response and industrial hygiene scenarios. Introduces the student to the DQO process, reviews statistical concepts such as hypothesis testing, describes sampling strategies and, through the use of case studies, allows the student to apply the process to site remediation, emergency response, and industrial hygiene situations.

Prerequisites: 2d Lt and above and GS-9 and above bioenvironmental engineers (43E3X) and civil engineers (32E4X) working in installation restoration program site cleanup. Highly recommended that personnel attending this course have taken a college-level statistics course. Personnel wanting to attend this course should notify their unit training manager to be entered into the Air Force Training Management System. Those not meeting the prerequisites must apply for a waiver from USAFSAM/TA.

Special Requirements: Duty uniform is the Air Force short-sleeve blue shirt/blouse with appropriate slacks/skirt. Summer uniform is approved for wear year-round. Civilians should dress accordingly.

B5OZYMTM 001—Military Tropical Medicine 1—PDS Code 226—Off-site/4 wk—Oct 96

The new Military Tropical Medical Course has resulted from a consolidation of the Walter Reed Army Institute of Research's (WRAIR) Tropical Medicine and the Navy's Medicine in the Tropics courses. The course maintains the long history of the WRAIR course's top-notch lecturers and combines them with the Navy course's laboratory and field trips for practical experience. The course will accommodate 70 medical officers (30 Army, 30 Navy, and 10 Air Force) and will be run by NSHS Bethesda at USUHS in Bethesda MD. The didactic and laboratory course is 4 weeks long and is scheduled each summer. The didactic portion of the class covers a broad range of topics in infectious diseases and tropical medicine; lectures are often given by world-renowned experts in the field. The labs are equally comprehensive, including everything from intestinal protozoa and helminths to malaria and rickettsia. Whenever possible, live specimens are used, and hands-on training is emphasized. Periodic testing will be done throughout the course for all participants. There is also a comprehensive lab practical and written exam at the end of the course.

About 30 (3 Air Force) participants can apply to go on an additional 2-week field mission. See B5OZYMTM 002**,** Military Tropical Medicine 2.

The Military Tropical Medicine course is open to physicians and veterinarians from each Service. Priority in selection will be given to those for whom the course is an integral part of training, such as Infectious Disease Fellows, preventive medicine and dermatology residents, as well as GMOs and DMOs, flight surgeons, and primary care practitioners (family practice, internal medicine, and pediatrics), and graduating residents who are or will be assigned to overseas duty.

Admin Instructions: Send the following information to

Chief, Preventive Medicine
USAFSAM/AF
2602 West Gate Road
Brooks AFB TX 78235-5252

Be aware that a tourist or official passport is required for this course if you are requesting the field mission:

Name, rank, SSN/Duty AFSC
Status in current position (e.g., staff, operational, resident, fellow, etc.)
Medical specialty or type of internship if not completed training
Class preference (contact USAFSAM point of contact for class dates)
Complete Command mailing address
Phone numbers (DSN, commercial, and FAX--MUST HAVE)
Email address for messages
Complete home mailing address and phone number
Next of kin: name, relationship, phone number, and address
Planned rotation date and information on next assignment if known
Expiration of active obligated service date if less than 1 year from completion of course, detailed justification of future plans is mandatory
Summary of interest, both AF and professional, in applying for the course, and projected benefit to yourself and the Air Force gained by your attendance
Foreign language capabilities, if any
List of previous operational/overseas experience, both civilian and military
Endorsement from commanding officer (or commanding officer of your command at the time of the course)

Incomplete applications will not be considered. Questions about the course can be made to the course director by phone, Email, or Fax.

LCDR Gregory J. Martin MC, USN

B5OZYMTM 002—Military Tropical Medicine 2—PDS Code 228—Off-site/2 wk—Oct 96

Approximately three Air Force participants from MTM 1 can apply to go on an additional 2-week field mission. The Naval School of Health Sciences (NSHS) course director will divide groups to go to Dominican Republic, Guyana, and Belize. Each mission includes about 1 week of seeing patients on various services in hospitals to gain exposure to health care systems in the developing world, followed by 1 week of field medicine during which the team will set up a series of 1-day clinics in remote, medically underserved regions.

For Infectious Disease Fellows, an option exists to attend one of the Navy or Army overseas labs for 2 to 4 weeks after the didactic course. Currently, a rotation at the Navy Medical Research Unit Three (NAMRU-3) in Cairo, Egypt, has been developed. The rotation would include unique opportunities to evaluate patients at the affiliated hospitals. The spectrum of infectious disease ranges from echinococcal infection and schistosomiasis to extra-pulmonary TB and bacterial meningitides. Collaboration in research projects is also possible and other overseas labs may be used if an area of special interest is identified. Interested Infectious Disease Fellows should call LCDR Martin to discuss options. Air Force Infectious Disease Fellows should contact Lt Col Melcher, (210) 670-7444, Fax (210) 670-3740.

The MTM courses are open to physicians and veterinarians from each Service. Priority in selection will be given to those for whom the course is an integral part of training, such as Infectious Disease Fellows, preventive medicine and dermatology residents, as wells as GMOs, DMOs, flight surgeons, and primary care practitioners (family practice, internal medicine, and pediatrics), and graduating residents who are or will be assigned to overseas duty.

Prerequisites: B50ZYMTM, Military Tropical Medicine 1 (MTM1).

Chapter 3

AIR EDUCATION AND TRAINING COMMAND (AETC)

PROCEDURES AND INSTRUCTIONS

(OPRs: 2 AF/DOP, HQ AETC/XOTI, and HQ AETC/SGAT)

AETC OPRs. **Due to production lead time, some data in this chapter may be changed. Check with your training coordinator to confirm.** 2 AF/DOP is the AETC OPR for AFCAT 36-2223 for all training except flying and survival training (whose OPR is HQ AETC/XOTI) and medical and dental training (whose OPR is HQ AETC/SGAT). HQ AETC/FMAT is the OPR for all funding-related information and tables. Requests for new course announcements, changes, or revisions must be prepared in accordance with paragraph 1.10, and sent to 2 AF/DOP, HQ AETC/XOTI, or HQ AETC/SGAT, as applicable, for required processing. Closeout dates for changes to be received in HQ AETC/SCMY are as follows: 1 January for the April edition, 1 April for the July edition, 1 July for the October edition, and 1 October for the January edition. ***NOTE***: Requests for changes must be in to the OPR (2 AF/DOP, HQ AETC/XOTI, or HQ AETC/SGAT, as applicable) 10 duty days before the closeout date to allow for coordination and submission to HQ AETC/SCM.

Section A-Technical, Military, and Medical Training (includes general instructions for flying training)

★3.1. General Information:

3.1.1. Types of Training. AETC is responsible for conducting or arranging with other training activities for the conduct of the following types of training:

- Type M, Basic Military Training.

- Type 1, Special Contract Training (not included in AFCAT 36-2223 course announcements). Formal training contracted with civilian industrial or educational institutions under AFI 36-2201, Developing, Conducting, and Managing Training (formerly AFR 50-9). It may be conducted at either the contractor's location or on an Air Force base.

- Type 2, AETC Resident Special Training (not included in AFCAT 36-2223 course announcements). Training conducted by AETC instructors, normally at an AETC base, which is often conducted as a continuation of, and sometimes concurrently with, type 1 training.

- Type 3, AETC Resident Regular Training. Formal training of a continuing nature, normally conducted at an AETC installation. It includes basic, lateral, advanced, and supplemental courses.

- Type 4, Field Technical Training. Special or regular onsite training conducted by a field training detachment (FTD) or mobile training team (MTT).

- Type 5, Other US Government Agency Technical Training. Special or regular formal training conducted for the Air Force by the Army, Navy, DoD, or other government agencies.

- Type 6, Job Site Training (JST). Formal training developed by a training wing (TRW) or TRW contractor to be exported to a field location and designed to be learned without AETC course-qualified instructor expertise at the site. Can use any media and must be scheduled, tracked, evaluated, and completion verified—credit is given to graduates.

NOTE: See Section G for specific AETC flying training requirements.

★3.1.2. AETC Course Numbering System. For technical and military training, AETC uses a unique identification system. Each course number consists of a five-position alphanumeric prefix, the AFSC most applicable to the subject of training, a suffix if required, and an identifying series number. The course numbering system is as follows:

- First Position—Training Management Location
  E—Keesler
  J—Sheppard
  L—Lackland
  M—Maxwell
  V—Vandenberg
  W—AFIT, Wright-Patterson
  X—Goodfellow

- Second Position—Training Type Designation
  Type M—Basic Military Training
  Type 1—Special Contract Training
  Type 2—AETC Resident Special Training
  Type 3—AETC Resident Regular Training
  Type 4—Field Technical Training
  Type 5—Other US Government Agency Technical Training
  Type 6—Job Site Training (JST)

- Third Position—Students for Which Designed
  A—Airmen/Enlisted Duties
  C—Civilians Only
  O—Officer Duties
  R—Nonactive Duty Resident Airmen (Military Training only)

- Fourth Position—Planned Area of Training or Media
  A—Advanced
  B—Basic (AFSC-awarding course)
  C—Year of Training (7-Skill Level) and Officer Advanced
  D—Video Teletraining (JST)
  E—Intermediate (DLlFLC courses only)
  F—Aircrew Familiarization (Regular Field Training)
  G—Mixed Media (JST)
  H—Aircrew Familiarization (Spec Flying Type 1, 2, 4, 5)
  I—Instructor
  J—OJT Supervisor
  K—Video Tape (JST)
  L—Lateral
  M—Field and Organizational Maintenance or Field Training Team (FTT) at Conversion Sites
  N—CD-ROM (JST)
  O—Operator
  P—Precommissioning
  Q—Fundamental or Preparatory
  R—Refresher
  S—Special Technical
  T—Manpower Use Only

U—Manpower Use Only
V—Basic Training for Nonspecialist (DLIFLC courses only)
W—Written Media Nonfundamental or Preparatory (JST)
Z—Supplemental

- Fifth Position—Activity Conducting Training
  A—Department of Army Course (Resident or Contract)
  B—Department of Army Mobile Training Team
  C—Civilian Industrial or Business Course (by AETC Contract)
  D—DoD Courses administered by other than DA, DN, USMC, or DAF
  E—Training supported by R&D funds (qualifies Air Force personnel to perform IOT & E/DT & E testing)
  F—AETC Field Training Detachment (FTD) and FTD training transferred to AETC resident training wings and other MAJCOMs
  G—US Government Activity other than a DoD Activity
  H—Embedded Contract Training Funded by Users (Includes cost of student travel and per diem)
  I—Exportable Training Activity (paper-based instruction)
  K—DoD Mobile Training Team
  L—Exportable Training Activity (non-paper/computer-based or computer-assisted instruction)
  M—AETC Military Training Activity
  N—Department of Navy Course (resident or contract)
  O—USAF Activity other than ESC, AU, AFSC, or AETC Military Training Activity
  P—AETC Separate Operating Location
  Q—Department of Navy Mobile Training Team
  R—AETC Training Center in Residence
  S—Exportable Training Activity (specialized training Package)
  T—AETC Mobile Training Team
  U—Exportable Training Activity (100 percent computer-assisted or computer-based instruction)
  W—US Marine Corps Mobile Training Team
  X—US Marine Corps Resident Training
  Y—Human Systems Division (AFMC)
  Z—Defense Language Institute Activity

3.1.3. **Job Site Training**. Type 6 courses extend the training capabilities of Air Force schools to meet specific Air Force Specialty (AFS) job and equipment training needs in place of resident training. Like resident course training, a Type 6 course is based on a course training standard and has specific behavioral objectives that must be achieved. These courses are constructed so that the student can accomplish the training at his or her home station. Training is accomplished through the use of station assets.

★3.1.3.1. Specialized Training Packages (STP). STPs use a qualified technician as the instructor and use local resources to complete the curriculum. STPs are intended to be flexible enough to satisfy widely varying training requirements. They are a method approved by the National Security Agency (NSA) to meet the certification training requirements for cryptographic equipment maintenance.

★3.1.3.2. Interactive Courseware (ICW). Local computer access is required to utilize ICW training packages. Training is accomplished through individual and self-paced trainee interaction. Courses are available in many functional areas. Distribution methods vary; contact the OPR listed for each course for information on obtaining the desired training package.

3.1.4. **Defense Foreign Language Training**. The following information provides guidance to commanders, staff officers, and personnel officers who select individuals to attend courses offered under the Defense Foreign Language Training Program established by Department of Defense Directive 5160-41. This paragraph also provides information to military and civilian personnel selected to attend a foreign language course.

3.1.4.1. Training Requirements. Training is provided by one of the facilities operated by, or under contract to, the Defense Language Institute Foreign Language Center (DLIFLC) to meet requirements of the Army, Navy, Air Force, Marine Corps, and other DoD-sponsored agencies. Air Force foreign language training requirements will be processed through the MAJCOMs through AFTMS according to procedures established by HQ AFPC. HQ AETC allocates quotas based on schedules published by DLIFLC. Air Force organizations may request training only for those positions that must be manned with personnel having a foreign language skill. HQ AETC submits to DLIFLC the foreign training requirements and objectives and the DLI quota confirmation reports according to AFR 50-40, Management of the Defense Foreign Language Program, and DLI PAM 350-9.

3.1.4.2. Location and Duration. The program consists of intensive language training to prepare military and civilian personnel for assignments requiring foreign language proficiency. Courses are conducted at DLIFLC training facilities or, under auspices of DLI, at other government facilities or under commercial contract. Normal course duration is 6 to 12 months, depending upon the language and the objectives of training. Students receive 30 contact hours of training a week and are expected to spend 2 to 4 hours a day in outside study. Intensive language courses may be varied by the addition of foreign language films, books, magazines, newspapers, field trips, and other activities conducted in the language.

3.1.4.3. Eligibility Requirements:

3.1.4.3.1. Language training is provided to meet specific using-agency requirements. These are determined before a person enters into language training and when the performance of the primary or technical specialty in the person's subsequent duty assignment requires a foreign language skill. Positions that require a foreign language proficiency must be coded on unit manpower documents (UMD). AFM 26-749, *Command Manpower Data System (CMDS) Users Manual*, contains the necessary instructions for designating foreign language positions on the UMDs. Both officers and airmen may volunteer for positions requiring foreign language proficiency. Eligible airmen make application for overseas special duty with a using agency; for example, Air Attache, Air Force missions, Office of Special Investigation, Air Force intelligence activities, or military assistance advisory groups (MAAG) in accordance with AFMAN 36-2110, *Assignments* (formerly AFR 39-11). Eligible officers make application according to AFMAN 36-2110 (formerly AFR 36-20).

3.1.4.3.2. Civilian personnel employed by the military services or other DoD-sponsored agencies whose primary duty or subsequent duty assignment requires a foreign language skill are eligible for training.

3.1.4.3.3. Language training for dependents going on overseas tours may be provided by DLI on a space-available basis at no additional cost to the government. Enrollment priority will be given to the dependents of Air Attache, MAAG, or missions designees.

3.1.4.3.4. Prerequisites for intermediate and advanced airmen courses are successful completion of the basic language course and duty in the field in an assignment requiring use of the language. Selections are made by the using agency from applications received through its own channels or those submitted in accordance with AFMAN 36-2110 (formerly AFR 39-11).

3.1.4.3.5. Officers and airmen receiving foreign language training are assigned to duty using the foreign language skill for at least the duration of a normal tour within the activity to which they are assigned.

3.1.4.3.6. Military personnel not eligible for refresher training as a result of tested language capability and prior language use or training will be entered into regularly scheduled R2/S2 capability PCS courses. Officers required to attend these courses will not be curtailed or initially scheduled for a course length of less than 20 weeks. Proficiency attained in a shorter time and excessive TDY-to-school costs associated therewith are not cost effective or in the best interest of the Air Force.

3.1.4.4. Selection Procedures:

3.1.4.4.1. The Defense Language Aptitude Battery (DLAB) authorized under AFI 36-2605, *Military Personnel Records Systems* (formerly AFR 35-8) is designed to evaluate those areas of knowledge and ability essential for personnel to successfully complete formal courses of foreign language training. The test is used in the screening and preselection of potential foreign language trainees.

3.1.4.4.2. Criteria for selection of applicants are the responsibility of the using agency. A minimum score of 69 on the general AQE, ACB, or an equivalent for measuring aptitude and at least an average high school academic record are required by most agencies. In addition, the following minimum scores on the DLAB are mandatory for all officers and airmen to attend any full-time mission-required foreign language courses conducted under the auspices of the DLIFLC: 85 for romance languages, 90 for Germanic, 95 for Slavic, and 100 for Eastern. In special cases a waiver to the minimum score may be granted by AF/INFP in conjunction with DLIFLC. The DLAB test is administered according to AFI 36-2605 (formerly AFR 35-8).

3.1.4.4.3. Officers are selected by most agencies on the basis of their present job qualifications or specialties.

3.1.4.5. Security Clearances:

3.1.4.5.1. Officers should be cleared for access to classified material up to and including Secret. Include in the orders a statement to that effect.

3.1.4.5.2. The gaining agency prescribes the degree of security clearance required for airmen. The orders issuing agency must ensure DD Form 398, Personnel Security Questionnaire (PSQ), is completed before detailing airman to language training. Include in the orders a statement that this has been done.

3.1.4.5.3. Students to receive language training at Ft Meade MD, must possess a Top Secret, Cryptologic clearance, and be clearable for access to Special Intelligence before arriving at that facility.

3.1.4.5.4. Personnel projected for end assignment to Air Intelligence Agency (AIA) must be screened for eligibility for access to Sensitive Compartmented Information according to AFI 31-501, *Personnel Security Program Management* (formerly AFR 205-32), before final selection for training. Initiate a request for special background investigation (SBI) before departure for training if a person does not have a current SBI.

3.1.4.6. Flying Status:

3.1.4.6.1. All rated and nonrated personnel must comply with TDY and PCS requirements according to AFI 11-401, *Flight Management* (formerly AFR 60-1). (NOTE: Persons on conditional entitlement status should “bank” sufficient flying time to carry them through the duration of their TDY (see AFM 177-373 series).) Rated personnel attending a course of 90 days duration or longer will be placed in flying status code L.

3.1.4.6.2. Airmen entering the foreign language training program are not authorized to participate in aerial flights while in training. At the time of nomination for language training, the losing command informs airmen who are on flying status of this restriction and publishes orders removing the airmen from flying status before departure for training.

3.1.4.7. Withdrawals:

3.1.4.7.1. A using agency desiring to withdraw a student from language training for any reason must submit a formal request for withdrawal, stating the specific reason to DLIFLC, with an information copy to the training facility concerned. Training for the requirement is considered fulfilled.

3.1.4.7.2. Do not eliminate airmen attending language training who are on an Air Force line number to an overseas assignment, whether in a PCS or TDY status, without referral to HQ AFPC/DPMRAD2. When considering elimination of an airman in this category, send the following information to AFPC and HQ AETC/TTPR; grade, name, SSN, line number, course number, inclusive dates of training, short resume of conditions for recommending elimination, action taken to correct these conditions, status of airman's dependents, statement regarding possibility of retaining airman as an audit student, and recommendations for disposition of student, if eliminated.

3.1.4.8. In addition to any tests and measurements administered during the language training course, officers and airmen are given the Defense Language Proficiency Test (DLPT) upon completion of foreign language training. The DLPT is administered and scored by DLIFLC (for students graduating from the DLIFLC) and by the DLIFLC Liaison Office (for students graduating from FSI). Test results are recorded in personnel records and linguistic reports as specified in AFI 36-2605 (formerly AFR 35-8).

3.1.4.9. Academic college credits may be granted upon successful completion of Air Force foreign language programs. These vary with institutions, course length, and intensity of the program. Responsibility for requesting such credit rests with the individual concerned.

3.1.4.10. DLI field survey reports will be completed and submitted to DLIFLC.

3.2. Establishment and Submission of Training Requirements:

3.2.1. **Annual Screening**. All MAJCOMs and FOAs are tasked annually to screen for and submit their training requirements for courses which AETC programs and allocates training quotas. Each user of training has been assigned a training requester quota identifier (TRQI) for submission and allocation of training quotas through the Air Force Training Management System (AFTMS) of the advanced personnel data system (APDS). Each TRQI is responsible for obtaining requirements from their subordinate activities, both military and civilian; for reviewing those

requirements with their command functional managers for priority and validity; and for consolidating approved requirements into a command package of training requirements. Procedures for validating and submitting consolidated requirements are contained in the online documentation of the AFTMS. Each activity submitting requirements must be prepared to defend its requirements if questions arise from higher level activities. In addition to the annual submission of projected training requirements, TRQIs may initiate supplemental requests when unforeseen requirements arise subsequent to the annual screening submission. See table 3.1 for Type 6 screening and training process. Training requirements identified for Type 6 courses during the annual screening are used to plan, coordinate, and announce annual job site training broadcast schedules.

3.2.2. **Submitting Requirements**. General guidance for submission of requirements in response to annual screening is as follows:

3.2.2.1. Each year HQ AFPC/DPPA, after coordination with 2 AF/DOP, provides the annual screening schedule through the AFTMS news function to online AFTMS users. 2 AF/DOP is responsible for soliciting training requirements from its nonsystem users. The annual screening schedule will include appropriate requirements submission suspense dates for all base-level activities, MAJCOMs, and FOAs. The following applies:

3.2.2.1.1. All requirements must be submitted through AFTMS for online users to be considered or supported by 2 AF/DOP. Quotas will not be programmed if the requirements have not been processed through AFTMS.

3.2.2.1.2. 2 AF/DOP will not consider requirements submitted after the established cutoff date in the original mission readiness training program. These requirements will be considered as supplemental requirements and programmed only if funds become available.

3.2.2.2. Requests for special training must comply with AFI 36-2201 (formerly AFR 50-9) and AFTMS procedures.

3.2.2.3. 2 AF/DOP uses results of the screening as the basis for developing budget data for contract training, to establish instructor manpower requirements, and for mission readiness training funding. Budget requests must be documented and validated by HQ AETC. It is imperative, therefore, that MAJCOMs and FOAs provide requirements that are as realistic as possible.

3.2.2.4. Requests for special flying and aircrew training are furnished according to appropriate sections of AFI 36-2201 (formerly AFR 50-9).

3.2.2.5. Military personnel are not normally returned from overseas to attend a training course. In this regard, airmen and officer residents of Alaska and Hawaii who are serving in their home state are classified as CONUS-assigned personnel. A command that requires training for military or civilian personnel stationed overseas requests quotas from 2 AF/DOP (HQ AETC/SGAT for medical and dental courses). Submit the request at least 90 days before the desired starting date to ensure complete processing and sufficient time for movement of personnel.

3.2.2.6. See paragraph 1.44 of this catalog for civilian training policies.

3.2.2.7. MAJCOMs and FOAs will not establish requirements in airman basic courses (AB/AQ prefixes) for airman retraining; these requirements are established under AFI 36-2204, *Airman Retraining Program* (formerly AFR 39-4).

3.2.2.8. For airmen approved for retraining into lateral skills, requests for quotas in airman lateral courses are controlled by HQ AFPC/DPPAET and will be established under AFI 36-2204 (formerly AFR 39-4).

3.2.2.9. Commands will not establish requirements for training of Air Force officers in officer basic and advanced courses (prefixes 30B__/30A__/, 50B__/50A__/). Requirements for these courses are established by HQ AFPC/DPMAPO after coordination with the applicable resource managers. Requests for training in these courses should be sent to HQ AFPC/DPMAPO, Randolph AFB TX 78150-5001.

3.2.2.10. Requirements identified for Air Force medical service officer courses will be sent upon request to HQ USAF/SGHXP where they will be reviewed, formalized, and incorporated into the Air Force Medical Education (Med-Ed) program document. HQ AETC/SG will be furnished copies of the Med-Ed for implementation.

3.2.2.11. Air Reserve Forces must comply with the instructions for submission of training requirements herein as well as the annual screening instructions. Requests for training waivers should be sent according to AFI 36-8001, *Air Force Reserve Education and Training* (formerly AFR 35-41, volume II), chapter 6. (Exception: Requirements for nonprior service Air Reserve Forces airmen are not included; separate procedures have been established in this area.)

3.2.2.12. Projected fiscal year requirements for all the regular technical training courses listed in this chapter must be provided 2 AF/DOP in response to the annual screening.

3.2.3. **Supplemental Requirements and Changes**. Additional requirements may arise after the annual submission. AETC's ability to program additional requirements depends on availability of funds or cancellations of other programmed requirements. The following procedures must be followed when sending additional requirements or changes to previously submitted requirements:

3.2.3.1. Requests for special training must be sent to 2 AF/DOP (HQ AETC/SGAT for medical and dental courses), according to AFI 36-2201 (formerly AFR 50-9). The request may be a change to the annual screening requirement or it may be a new requirement. Each change to a previously submitted special training requirement must carry the same command-unique line number and AFTMS-generated line number. Each new special training requirement must be assigned its own unique line number.

3.2.3.2. Changes to requests for training in courses announced in this chapter must be furnished to 2 AF/DOP (HQ AETC/SGAT for medical and dental courses) through AFTMS with the same AFTMS line number as the original request to indicate it is a change to a previous requirement.

3.2.3.3. Added requests for training in courses announced in section I, this chapter, must be furnished to 2 AF/DOP (HQ AETC/SGAT for medical and dental courses) by AFTMS message. Added training requirements will automatically be assigned an AFTMS-generated line number in system.

3.2.3.4. All requirements must be approved by and submitted from MAJCOM level or FOAs reporting directly to HQ USAF except for subordinate activities specifically authorized to approve training requirements. Authorization for subordinate activities to

send requirements direct to AETC must be established by coordination between the MAJCOM DPAT headquarters and 2 AF/DOP. Such separate submissions should be requested only when circumstances completely justify the action. A request cannot be accepted from a user who does not have a TRQI code established unless the request is accompanied by a justification of the need to establish a new code.

Table 3.1. JST Annual Screening and Training Process.

LINE	A Task	B Time Frame	C OPR	D Using	E Comments
1	Annual screening	Sep - Dec	individual units	AF Fm 403, Request for Special Technical Training	Units forecast training needs for following FY by identifying number of officer, airmen, and civilians to be trained. Requests must include base-by-base requirements to include number of students to be trained each quarter and the maximum number of students that may be trained per session.
2			JST POC		JST POC may assist with the annual screening.
3			MAJCOM functional mgrs	AF Fm 403	Functional manager will evaluate training request, determine valid courses and number, then forward valid requests to personnel.
4		Sep - Jan	military civilian personnel offices		Classification and training or civilian personnel offices input training requests from AF Fms 403 into AFTMS. Entry must include base-by-base requirements to include number of students to be trained each quarter and the maximum number of students that may be trained per session at each site.
5		Feb - Apr	training managers	AFTMS	Training requirements are validated.
6			training managers and course personnel		Training requirements are identified by training requester quota identifier (TRQI) and site. Class schedules are planned based on training needs and availability of resources (instructors, facilities, money).
7			training managers	AFTMS	Classes are built in AFTMS (VTT only).
8	Course schedules	Jun			Training managers will work with local VTT scheduler and finalize course training schedules. They will deliver the schedules through the distribution function to 2 AF/DO.
9	Annual JST schedule	1 Aug	training manager, distribution function, and 2 AF	JST Guide	A schedule of all validated training requirements for the next FY is sent to each JST POC and MAJCOM. Guide will include courseware release and revision dates. Guide updated quarterly or as necessary.
10	Mailing of JST training materials	At least 30 days before need date	distribution function		Training materials required to support the schedule are sent to the JST POC.
11	On-site scheduling of students	45 days before class	JST POC		In the 45 days before class start, JST POC will schedule students for VTT classes. JST POC will schedule computers as necessary.
12	Class cancellation	As required. Made at least 35 days before scheduled broadcast.			JST PPOC will notify the distribution function of cancelled VTT classes.

(Table continued on next page)

Table 3.1. Continued.

LINE	A Task	B Time Frame	C OPR	D Using	E Comments
13	Class entry	Class start date	JST POC	AETC Fm 325, Student Accounting Record (via fax)	Class entry roster (initial AF Fm 325) faxed to sending site. This will be used to enter the students into AFTMS for VTT. NOTE: This is the first time student names are associated with the class, unless the MAJCOM suballocated in advance. For self-paced courses, data in AF Fm 325 will be used to track student progress toward established not-later-than course completion dates.
14	Student attendance	Daily			Spot check VTT sessions, reporting excessive absences to the sending training group for appropriate action.
15	Ensure students are meeting course requirements	As needed			Report insufficient student performance to the sending training group for appropriate action (e.g., spot check VTT attendance).
16	Student withdrawal	Day of withdrawal	JST POC and the distribution function	AETC Fm 325	Documentation may be necessary. JST POC recommends; training group makes final determination. Recommendations are sent to distribution function.
17	Student elimination	Day of elimination			Student status change; additional documentation may be necessary. JST POC recommends; training group makes final determination. Recommendations are sent to distribution function.
18	Attrition survey	Upon elimination of student			Ensure completion and provide to training group distribution function.
19	Missed completion dates	End of course			Distribution notifies JST POC of students failing to complete courses by required date (self-paced course). JST POC ensures attrition survey completed.
20	Course extensions	As required	JST POC		Students request course extension through JST POC. Requests forwarded to distribution function.
21	Course critique	End of course			Completed critique is returned to distribution function.
22	Safeguarding testing materials	During course and during testing			JST POC safeguards test materials per course instructions.
23	Student testing	As required			When students are ready to test, the JST POC will monitor testing.
24	Test grading	Upon test completion			For objective tests, JST POC will use the answer key provided to grade tests (unless exam is to be graded by an onsite computer) and will provide student feedback. Subjective tests and performance tests will be packaged and mailed to the distribution function for grading. JST POC returns completed tests to distribution function for final evaluation.
25	Student graduation	Upon determination of course completion	Training manager, distribution function, and registrar	AETC Fm 325 and AF Fm 1256 (certificate of training)	The training group will analyze test data to make a graduation determination. Final grade information with completion status is provided to TM for forwarding to registrar to allow class graduation in AFTMS. The distribution function will prepare diploma and send to JST POC for distribution.

3.2.4. **Defense Management Education and Training (DMET) Courses, RCS:DD-M(AR 9D5) (DOD Catalog 5010.16-C)**:

3.2.4.1. HQ AETC is responsible for obtaining Air Force requirements in DMET courses. Requirements will be processed through the MAJCOMs through AFTMS according to procedures established by HQ AFPC/DPMR and the following special instructions:

3.2.4.1.1. The annual submission will include firm requirements for the following fiscal year and projected onsite requirements for an additional fiscal year. DD Forms 1631-1, **Defense Management Education and Training Program Requirements for Courses Presented On-Site,** reflecting onsite requirements for each of the two upcoming fiscal years, must also be submitted to 2 AF/DOP not later than 31 October of each year.

3.2.4.1.2. Include requirements for any course in DoD Catalog 5010.16-C except DISAM and AU-conducted courses. For a course previously programmed and assigned an AETC course number, identify the requirement with the AETC course number shown in section I. For a course not previously programmed and assigned a course number by AETC, submit as special training. In the remarks section, identify it as a DMET course. Include number, title, and school.

3.2.4.2. Onsite Classes:

3.2.4.2.1. Onsite training may be requested for one or more activities in an area having sufficient personnel requiring training to warrant the presentation of classes. Activities may be required to host students from other MAJCOMs, services, and DoD agencies.

3.2.4.2.2. DD Form 1631-1 must be prepared in triplicate for all onsite DMET training requirements for the fiscal year. Submit these reports as follows:

3.2.4.2.2.1. Enter the official address of each reporting activity in the "From" block. Requirements of satellite activities not in commuting distance of a parent activity should be reported on separate forms. A separate DD Form 1631-1 must be prepared for the total training requirements at a specific geographical location. Onsite class locations are determined by the total forms furnished by all services and agencies.

3.2.4.2.2.2. A reporting activity that wants to host one or more classes indicates this under the column "Will Host Class(es)." Check the "yes" column after each course the activity is willing to host and "no" for all others.

3.2.4.2.2.3. To help scheduling of individual classes, reporting activities are asked to complete the blocks under "maximum number who can attend a class at one time" under the following circumstances: when some other activity within the immediate (commuting) area is selected as host, where a more remote activity in the general geographical area is selected as host (typically involving travel and per diem), and where the requiring activity offers to act, and is selected, as host.

3.2.4.2.3. When out-of-cycle DMET onsite requirements are identified, send a request to HQ AETC/TTP through command channels. Air Force activities are not authorized to send requirements directly to the school or agency conducting the training. Funding for the instructor's travel and per diem expenses is the responsibility of the base, activity, or MAJCOM sending the requirements.

3.2.4.2.4. DD Form 1556, Request, Authorization Agreement, Certification of Training and Reimbursement, for AETC-allocated quotas will be sent to the training agency according to instructions of the respective school. Do not send nominations for attendance on a space-available basis. When a waiver to prerequisites is required, forward DD Form 1556, with the waiver request, to 2 AF/DOPN. Requests must be received NLT 60 days before class start date.

3.3. The Training Program and Quota Control:

3.3.1. **The Program**. Upon completion of the annual screening, HQ AETC develops a training program within the constraints of budget, training capability, etc., and notifies MAJCOMs and other users of the approved program. This initial program is subject to adjustment or modifications because of changing budgetary limitations and Air Force directives.

3.3.2. **Quota Controls**. Authorized entry into courses of instruction is through allocated quotas.

3.3.2.1. HQ AETC allocates quotas for its courses through AFTMS by addressee codes. Entry into AETC-monitored courses or citation of AETC funds is not authorized unless quotas have been allocated by AETC specifically authorizing such actions. Send questions concerning quotas, fund citation, availability of spaces, or requests for training through the MAJCOM, FOA, or DRU DP or MP training management function to the quota control agency indicated in the course announcement. Commands, organizations, or individuals are not authorized to contact Air Force schools or other government agency schools directly regarding class schedules or to obtain training spaces.

3.3.2.2. Once a quota has been allocated to a user, the name of the student scheduled to attend training must be input into AFTMS. Confirmation by name for types 1, 2, 3, and 4 AST courses must occur NLT 30 days before class start date. For type 5 courses, confirmation must occur NLT 60 days before class start date. Failure by the user to confirm by name within these time frames could result in the quota being cancelled by 2 AF/DOP.

3.3.2.3. For type 4 ASF courses, confirmation by name is required NLT 45 days before class start date. If the quota is not confirmed or returned by that date, 2 AF/DOPN will cancel the quota after notifying the MAJCOM user.

3.3.2.4. Commands and other users receiving quotas from HQ AETC must ensure orders-preparing activities are provided the correct TRQI code, course number and title, class ID, training line number (TLN), and start and graduation dates to be included in each student's orders.

3.3.2.5. The Acquisition Career Enhancement (ACE) Program, HQ AFCPMC/AFATO, DSN 487-6580, manages and funds the training required for the 12 acquisition career fields. ACE applies to the (1)program management, (2) communications-computer systems, (3) contracting, (4) purchasing (includes procurement assistant), (5) industrial property management, (6) systems planning, research, development, and engineering, (7) test and evaluation, (8) manufacturing and production, (9) quality assurance, (10) acquisition logistics, (11) business, cost estimating, and financial management, and (12) auditing career fields. ACE career fields need to meet specific training requirements to receive certification in one of the three levels prescribed by the Defense Acquisition University (DAU). Specific courses for each level in each career field are listed in the DAU catalog which should be available from the base training office.

3.3.3. **Class Changes and Quota Allocations**:

3.3.3.1. A change for a trainee in an airman basic course must be furnished by 2 AF/DOPR.

3.3.3.2. A change to a retraining quota in an airman basic or lateral course must be coordinated with HQ AFPC/DPMRAS4.

★3.3.3.3. Except for airman basic and lateral courses, requests to change or return a quota must be provided through AFTMS. Training users are encouraged to return allocated quotas that will not be used. Quotas must be returned NLT 30 days before class start date for types 1, 2, 3, and 4AST courses; NLT 45 days before class start date for type 4ASF courses; and NLT 60 days before class start date for type 5 courses. Return of unfilled quotas after the confirmation-by-name suspense date is encouraged, but the user will be charged for a no-show unless the quota is reallocated. HQ 2 AF/DOP will not change a quota or allocate a new quota without coordination with the training requester.

3.3.3.4. All quotas not returned by the confirmation-by-name suspense date or not filled by the requester on the class start date will be reported in AFTMS as no-shows. However, no-shows do not count against the mission readiness training bogey allocated to each Air Force user of training.

3.4. Prerequisites:

3.4.1. **Meeting Prerequisites**. Personnel selected for training must meet general prerequisites of chapter 1, requirements for the specific career field shown in AFMAN 36-2105, *Officer Classification (*formerly AFR 36-1), and AFMAN 36-2108, *Airman Classification* (formerly AFR 39-1), and those special

requirements shown in the course announcements. To justify the cost of training, requesters must ensure selectees will use skills gained in training upon return to the parent unit for a sufficient period of time.

3.4.2. **Waivers of Prerequisites**. Every attempt should be made to ensure selectees meet the course prerequisites as stated in course announcements, correspondence, or reporting instructions. Requests for waivers must be directed first to the MAJCOM, FOA, or DRU DP or MP training management function for approval and then to the appropriate AETC technical training activity listed below for final approval or disapproval.

3.4.2.1. For types 1 (includes FTD), 2, 3, or 4 (non-FTD) courses, forward requests to:

3.4.2.1.1. 37 TRSS/TTOR, Lackland AFB TX 78236-5000.

3.4.2.1.2. 82 TRSS/TTOR, Sheppard AFB TX 76311-5000.

3.4.2.1.3. 17 TRSS/TTOR, Goodfellow AFB TX 76908-5000.

★3.4.2.1.4. 81 TRSS/TTOX, Keesler AFB MS 39534-5000.

3.4.2.1.5. The appropriate FLDTS for the weapons systems (371, 372, or 373 FLDTS), 419 G Avenue, Ste 1, Sheppard AFB TX 76311-2941.

3.4.2.2. For Type 4 FTD courses, forward requests to the appropriate FLDTS for the weapons system.

3.4.2.3. For Type 5 courses, forward requests to 2 AF/DOPN, 721 Hangar Road, Ste 103, Keesler AFB MS 39534-2804.

3.4.2.4. For medical courses, forward requests to HQ AETC/SGAT, 63 Main Circle, Ste 3, Randolph AFB TX 78150-4549.

3.4.2.5. Prospective students should be currently assigned (or scheduled to be assigned) to duties that would directly benefit from the knowledge and experience gained from the training.

3.4.2.6. For other than Type 5 DMET courses, requests must be submitted at least 30 days before class start date.

3.4.2.7. In addition to the course number, waiver requests must contain the name, grade, and SSN of the selectee fully justifying the person's need for the desired training.

3.4.2.8. The statement of waiver approval and granting authority must be included in the person's order. (Refer to the message or letter granting the waiver.)

3.4.3. **Type 1 Training Predeparture Briefing**. Personnel selected to attend type 1 (factory) training must be briefed on the following subjects before departure for training by the appropriate military or civilian DP training branch:

3.4.3.1. Conduct of Air Force representatives.

3.4.3.2. Manufacturer proprietary rights. Air Force personnel who witness new equipment and related accessories in operation or on display must not discuss the details with other manufacturers of similar equipment.

3.4.3.3. Compliance with DOD 5200.1R, *Information Security Program*, and AFI 31-401, *Information Security Program Management* (formerly AFR 205-1) when instruction requires the use of classified data and equipment.

3.4.3.4. Duties and responsibilities of senior class member. The senior class member keeps the responsible training center (operations division) informed of the effectiveness of the training program and student status information and provides student assistance as required.

3.5. Clothing and Equipment Requirements:

3.5.1. **Airmen**:

3.5.1.1. Airmen ordered to training at an AETC training wing must report in the seasonal uniform prescribed for that wing in paragraph 3.9.

3.5.1.2. To ensure airmen ordered to AETC training wings(except those processing through Basic Military Training) are properly equipped, use the current allowances under the monetary clothing allowance system.

3.5.1.3. Authorized uniform clothing to comply with seasonal requirements must accompany airmen, both TDY and PCS, as hand baggage.

3.5.1.4. Special items of clothing required for individual courses are prescribed either in the course announcement, reporting instructions for the center, or quota allocation.

3.5.1.5. Airmen must have the items of flying clothing and personal equipment required to perform the part of the mission to which they are assigned.

3.5.1.6. All personnel ordered to attend special training (type 1) at the contractor's facility must wear the uniform appropriate to the duty and season. Send requests for exceptions to 2 AF/DOP. No special allowance is authorized for purchase of civilian clothing to be worn while attending type 1 training courses.

3.5.1.7. Organizational items such as ball caps are not authorized to be worn at AETC training locations.

3.5.2. **Officers**:

3.5.2.1. Students must have sufficient quantities of required uniform items to meet military dress standards at all times.

3.5.2.2. Flying personnel must have the items of flying clothing and personal equipment required to perform the part of the mission to which they are assigned.

3.5.2.3. TDY students are not required to have mess dress uniforms unless the requirement is included in the course announcement.

3.5.2.4. Provisions of paragraph 3.5.1.6 above apply to officers attending type 1 contract training courses.

3.5.2.5. Organizational items such as ball caps are not authorized to be worn at AETC training locations.

3.5.3. **Safety Information and Rules**. Students who are attending courses of instruction at any location requiring hearing protection (noted in the course's special requirements) must have one pair of fitted ear plugs for use during equipment instruction. In addition, the wearing of rings, watches, ID bracelets, or other metallic jewelry or accouterments during equipment instruction is prohibited. In addition, underwear and undergarments must be pure cotton and nonconductive.

3.5.4. **Seasonal Uniform Changes**. Uniform changes are in the special instructions for AETC training locations in paragraph 3.9. For Army locations see table 3.12.

3.6. Preparation of Student Orders. Orders for Air Force personnel to attend AETC training courses must be prepared

according to table 3.2 and paragraphs 3.6.1.1 through 3.6.1.29 below. Due to the requirements that must be met to permit accurate reporting of student status, command, travel status, and training accomplished, special care must be taken to ensure complete and accurate data is incorporated into these orders. One copy of the travel orders for Air Force civilian employees will be sent to the servicing central civilian personnel office (CCPO). The employee development specialist (EDS) in the CCPO will monitor the orders to ensure their accuracy and adequacy. The EDS will also review the corresponding DD Form 1556 and related regulations to ensure compliance with all regulatory requirements, including course prerequisites and other criteria. According to AFR 177-103, *Travel Transactions at Base Level*, the base personnel office will review all military travel orders that cite mission readiness training funds and certify the correctness of the information in the order. In all cases, advance distribution of orders must be made according to table 3.2.

3.6.1. **Data Required**. Ensure the following items are included in orders:

3.6.1.1. Primary, control, and additional AFSCs possessed by trainee when a prerequisite for course entrance. Refer to AFI 36-2101, *Military Personnel Classification* (formerly AFR 35-1) for the policy on CAFSC effective date for retrainees.

3.6.1.2. Name and location of school.

3.6.1.3. Unit of assignment or attachment.

3.6.1.4. Course number, title, class ID, and PDS code.

3.6.1.5. Class start date.

3.6.1.6. Class graduation date.

Table 3.2. Advance Distribution of Orders.

LINE	A Type of Training	B Distribution (notes 1, 2, and 3)
1	Type 1 courses	For nonresident medical training, mail 2 copies of orders to reach 882 TRG (TSOX), 939 Missile Rd, Ste 2, Sheppard AFB TX 76311-2260, at least 7 days before class start date. Mail one copy of orders to 2 AF/DOPS and HQ AETC/SGAT for medical and dental courses.
2	Types 2 and 3 resident courses	Mail one copy of orders for military members to the AETC TC MPF/Manning Control (MSPUM) for verification of security prerequisite and projected attendance. Orders must arrive at least 7 duty days before class start date. If the orders cannot arrive as directed above by mail, ensure confirmation of security prerequisite by electrical transmission. In addition, mail 3 copies of orders to reach 882 TRG (TSOR), 939 Missile Rd, Ste 2, Sheppard AFB TX 76311-2260, at least 7 days before class start date for resident medical training courses. Mail one copy of orders to DAO-DE AETC/FA for technical courses, HQ AETC/SGAT for medical and dental courses, and HQ AETC/XOPB for flying and survival courses.
3	Type 4 field training courses	Mail five copies of orders to reach FTD commander at least 7 days before class start date. Mail one copy of orders to . DAO-DE AETC/FA
4	Type 5, Army, Navy, and other govt agency courses	Unless otherwise stated in individual allocation or special reporting instructions for the training site, mail five copies of orders to reach school at least 30 days before class report date. Mail one copy of orders to training wings, which is the responsible center as shown on the quota allocation document. For nonresident medical training, mail two copies of orders to reach 882 TRG (TSOX), 939 Missile Rd, Ste 2, Sheppard AFB,TX 76311-2260, at least 7 days before class start date. Mail one copy of orders to DAO-DE AETC/FA and HQ AETC/SGAT for medical and dental courses.

NOTES: 1. Exceptions may be indicated in quota allocation correspondence
(AETC wings, schools, or courses).
2. Confirm degree of clearance by electrical transmission when use of regular mail channels does not ensure orders will arrive in time to be used for
access authority. In such messages, identify student by name, grade, and SSN, and include the applicable course number and title, class start date, and
a statement of security clearance required and held by the student.
3. AETC training wings which manage training are indicated by a prefix to the course number as follows: E, Keesler; J, Sheppard; L, Lackland; V, Vandenberg; and X, Goodfellow on the allocation document.

3.6.1.7. Specific reporting time and provision for early reporting, if authorized.

3.6.1.8. Activity or individual to whom student reports.

3.6.1.9. Period of TDY, if applicable. (Computed from paragraphs 3.6.1.5 and 3.6.1.6 above plus travel and processing time.)

3.6.1.10. Security Clearance. For courses having either a security clearance or investigative requirement as a prerequisite for course entrance, state, as applicable, the clearance data shown in the individual's automated personnel record. If a personnel security investigation (PSI) has been initiated but not completed, state the PSI type and date submitted. If access to Secret or Top Secret crypto material is required, individual must be a US citizen with a statement to this effect contained in student's orders.

3.6.1.11. Citizenship status. Must be included in orders for courses requiring US citizenship or as required in paragraph 3.6.1.10 above.

3.6.1.12. Authority for waiver of prerequisites, if applicable.

3.6.1.13. Per diem allowance, if applicable. If TDY duration at one location is 45 days or more, refer to JFTR, volume I, appendix D, or volume II, appendix E, to ascertain if a reduced per diem rate applies to the specific training location. If so, reflect the per diem on orders.

3.6.1.14. Any authority for delay en route.

3.6.1.15. Instructions on availability and use of government housing and messing.

3.6.1.16. Instructions on any peculiarities of transportation to or during training.

3.6.1.17. Unit of assignment or attachment.

3.6.1.18. For courses that require aircrew duty as a job function, a statement as follows: “Student is physically qualified for aircrew duty in accordance with Class III medical standard and has successfully completed AFI 11-403 physiological training.”

★3.6.1.19. All students attending AETC-funded technical training courses of less than 140 days duration who want to ship a TDY weight allowance must send a request for special authorization to 2 AF/DOPS for final approval or disapproval. Send a letter for AETC-funded for flying training courses and survival training courses to HQ 19 AF/DO for special authorization. (Exception: For flying training courses F-V5A-A, F-V5A-B, F-V5A-E, F-V5A-M, or F-V5A-T, the orders issuing/approving official may approve the letter.) The request must be fully justified and must clearly itemize the household goods that will be shipped. The household goods must be for the member's (not dependents') personal use, comfort, and well being. Only fully justified requests will be considered for approval. If the request is approved, the classification and training office will add the following statement to the student's TDY orders: “Shipment of (number of pounds approved not to exceed limit per JFTR, volume I, table U4710) pounds TDY weight allowance authorized.”

3.6.1.20. If a qualifying score on a preentrance screening examination is a prerequisite for course entrance, state on orders: “Qualifying score received on screening examination.”

3.6.1.21. If training is HQ AFPC/DPMRA-directed, include the Air Force line number regardless of student status; that is, TDY, TDY en route, or PCS. This training is directed to support overseas requirements. If student is placed on TDY (DD Form 1610), the order must contain the statement, “This training is incident to or in conjunction with PCS to (command) AAN _____.” In all cases, such training allocatons will be reflected in student orders by TRQI code received through AFTMS.

3.6.1.22. Date of separation.

3.6.1.23. For Air Force TDY officers and airmen students attending a course in TDY status, include the eight-character personnel accounting symbol (PAS code) in the remarks section.

3.6.1.24. For all Air Reserve Forces (TDY officers and airmen students) attending a course in TDY status, include the entire eight-character personnel accounting symbol (PAS code) in the remarks section.

3.6.1.25. Airman retrainee's orders must contain the AQE scores showing qualifications for entering the course involved.

3.6.1.26. Each student's orders must contain the TRQI code of the command, activity, or user to whom AETC allocated the quota and training line number (TLN) provided through AFTMS.

3.6.1.27. For civilians, a statement in remarks section, “Civilians will use onbase quarters, or government contract quarters if onbase quarters are not available, to reduce cost of this TDY. Contact the billeting office at your TDY location for reservations.”

3.6.1.28. If traveler is authorized a GSA vehicle, the billed office address code (BOAC) number of the servicing accounting and finance office.

3.6.1.29. PRP reliability screening according to AFI 36-2104, *Nuclear Weapons Personnel Reliability Program* (formerly AFR 35-99).

3.6.2. **Policy on Overtime Pay for Civilian Travel**. Overtime pay for civilians for weekend or holiday travel to or from a course of instruction is controlled by civilian personnel directives.

3.6.3. **Determination of Student Travel Status**. Before publishing orders for personnel to attend AETC technical training courses, determine the status in which the person will travel. Variations within PCS or TDY status must be clearly defined to prevent delays or errors in payments to allowances or claims. To protect the interests of the government and the student, clearly indicate the exact travel status as determined from table 3.3.

3.6.4. **Determination of Fund Citations for Student Travel and Per Diem**. Several factors must be used to determine the proper fund citation for student travel orders. These are discussed in some detail in paragraphs 1.55.1 through 1.55.5. As a result, the following discussion is limited to determining fund citations for AETC-monitored formal training:

3.6.4.1. The Air Force training program conducted by AETC is divided into four categories: technical, flying, survival, and medical. Because of the requirement to cost and budget each of these categories separately, fund citations on student orders must be accurate in the element identification code (subproject code or RC/CC). To ensure accuracy, first determine whether AETC funds are authorized for the expenses to be incurred and then correctly select the element identification code to be used.

3.6.4.2. AETC funds are authorized for use as shown in paragraph 3.6.5 below. In all other cases, recipients of quotas must determine the proper fund citations through information reflected in chapter 1 and the appropriate funding manuals. AETC F-15/F-16 flying training course funding will be according to paragraph 1.55.3 if travel status is TDY-en route-PCS or TDPFO. Losing MPFs contact their local accounting and finance office (AFO), which will obtain the fund cite from the gaining AFO. ***NOTE***: Funding for students is the responsibility of the using commander or unit if travel status is TDY not incident to PCS.

★3.6.4.3. In all cases where AETC technical training funds are cited, a copy of the orders must be sent to DAO-DE AETC/FA, 550 C Street West Suite 49, Randolph AFB TX 78150-4751. For medical and dental courses, submit a copy of orders to HQ AETC/SGAT. For flying and survival training, submit a copy of orders to HQ 19 AF/DO. In addition, send a copy of all orders to 12 CPTS/FML, 29 Main Circle, Suite 01, Randolph AFB TX 78150-4442.

3.6.4.4. MAJCOMs may use local civilian personnel training funds (MFP 8) when an unfunded quota is allocated by 2 AF/DOP.

★3.6.5. **Authorized Use of AETC Mission Readiness Training Funds**. Student travel orders may cite AETC funds only if all eight of the following conditions are met:

3.6.5.1. Training is conducted by one of the following:

3.6.5.1.1. AETC in a formal resident course.

3.6.5.1.2. Civilian agencies under AETC contract (see note).

3.6.5.1.3. AETC FTDs attached to MAJCOM activities (see note).

3.6.5.1.4. AETC MTTs (see note).

3.6.5.1.5. Army, Navy, or other government agencies. (AETC obtains spaces and makes allocations to Air Force users.)

NOTE: Students trained by FTDs attached to their parent commands by MTTs (Air Force, Army, Navy, or other government agencies) or contractor personnel sent to their commands are not authorized to cite AETC funds for travel and per diem. However, students being trained in FTDs or MTTs assigned to commands other than the parent command are authorized to cite AETC funds if quotas have been allocated by AETC.

★3.6.5.1.6. AETC will fund centrifuge training for (1) all SUPT fighter/bomber students after track selection, and (2) all first assignment instructor pilots, bank requal pilots, and UPT/SUPT fighter assigned pilots who will be attending course B/F-V5A-K, Introduction to Fighter Fundamentals. For proper fund citation, refer to table 3.3 and instructions outlined in 3.6.6.

★3.6.5.1.7. AETC does not fund KC-135 aircraft training (except KC-135B) at Altus AFB and H-1, H-53, H-60, H/MC-130, and IPC at Kirtland AFB. AETC does fund CCT at Pope AFB, basic flight engineer and KC-135R boom operator (KC-135B) at Altus AFB, pararescue and basic helicopter flight engineer training at Kirtland AFB.

★3.6.5.1.8. AETC does not fund C-12 or C-21 training conducted at Keesler AFB. These courses are unit funded.

★3.6.5.1.9. Orders prepared after 1 October 1996 must incorporate changes to the Joint Federal Travel Regulation concerning the use of proportional per diem rates. If military personnel are citing mission readiness training funds, they must use military dining facilities when available. This requirement does not apply to civilians in TDY status. Using the information in AFPAM 34-602, or its replacement, include one of the following statements in the remarks section of the travel order for all military members:

3.6.5.1.9.1. "All government meals are available and directed."

3.6.5.1.9.2. "Partial government meals are available and directed."

3.6.5.1.9.3. "Government meals are not available."

3.6.5.2. The student is an active duty officer or airman, a DAF civilian, a foreign direct or indirect hire, a nonappropriated fund (NAF) employee in a validated (but unfunded) MWR manpower position, or a foreign military exchange officer filling an Air Force position. (Exceptions: (1) Funding for Air Force personnel assigned or on permanent duty within DoD activities, unified commands, or Joint Service activities is the responsibility of the activity to which they are assigned, and AETC funds will not be used. (2) Only NAF employees identified above are authorized to use AETC funds for travel and per diem.)

3.6.5.3. A training quota has been issued by 2 AF (or by HQ USAF when specifically authorized by course announcement to issue quotas and commit AETC funds). Use of an AETC fund citation when a school quota has not been allocated or when it has been cancelled may result in the order publishing agency being designated as responsible for violation under AFR 177-16, *Administrative Control of Appropriations*.

3.6.5.4. Authorized travel status of student is TDY or PCS with TDY en route as determined from table 3.2. Military personnel are not authorized TDY status under any circumstances to courses with lengths of 140 calendar days or longer.

Table 3.3. Determination of Student Travel Status (USAF AD Officers, Airmen, and DAF Civilians)

RULE	A	B	C	D
		and length of course is (note 1)		
	If student status is	**less than 20 wk**	**20 wk or more**	**then travel status is**
1	NPS airmen from Lackland	X	X	PCS w/PCA (note 2)
2	prior service enlistee	X		TDYER
3			X	PCS
4	airmen retrainee	X		TDY
5			X	PCS
6	NPS graduate or eliminee of basic course, 20 wks or more	X		TDY
7			X	PCS
8	NPS graduate or eliminee of basic course, less than 20 wk	X	X	PCS
9	MAJCOM selectee	X		TDY/TDYER
10			X	PCS w or w/o PCA
11	pers directed by AFPC	X		TDY
12			X	PCS
13	applicant	X		TDY
14			X	PCS

NOTES: 1. If an individual is scheduled to attend a series of short courses at the same location, total training duration of 20 weeks or more, travel status is PCS.
2. Exceptions are: (a) When airman is assigned to Army/Navy courses which are of such short duration to make PCS move impractical, determination rests with 2 AF/DOP.
(b) When airman is to attend a short course (no more than 4 weeks duration) TDY en route to a longer course in PCS status.

★3.6.5.5. The training involved is conducted within CONUS. AETC funds are not authorized for payment of any expenses incurred for training purposes outside the contiguous 48 states. Exceptions: AETC mission readiness training flying training funds (paragraph 3.19) are authorized for:

3.6.5.5.1. The arctic survival course conducted at Eielson AFB Alaska for travel from CONUS to the training site and return and for per diem while in training status. For PCS with TDY en route, PCS funds will be charged for travel expenses to destination.

3.6.5.5.2. Per diem only while in training status for all personnel in TDY-en route-PCS status attending survival courses conducted outside CONUS. All travel expenses are charged to the PCS appropriation.

3.6.5.6. The special restrictions listed in paragraph 1.55.3 do not prohibit use of TDY funds.

★3.6.6. **Selection of AETC Fund Citation and Subproject Code**. Effective 1 October 1996, the centrally managed allotment (CMA) accounting process for mission-readiness-training-funded training quotas will be discontinued. Tables 3.4, 3.5, 3.6, and 3.7 published in previous versions of this catalog are no longer valid for FY 1997. This change will not affect prior-year funded training quotas. If use of AETC funds is authorized per guidelines in paragraph 3.6.4, use the following new procedures to obtain an AETC fund cite.

★3.6.6.1. Under the new procedure for FY 1997, personnel with a funded AETC mission readiness training quota must contact the 12 CPTS/FML at Randolph AFB TX for a valid fund cite and travel order number.

★3.6.6.2. To receive fund cite authority, users must contact 12 CPTS/FML through one of the following avenues: DSN 487-2971 ((210) 652-2971), FAX DSN 487-2592 ((210) 652-2592), or email tdyts@12fmpo.rnd.aetc.af.mil.

★3.6.6.3. User must provide the following information to 12 CPTS/FML.

- Training line number.
- Course number.
- Class number.
- Member's social security number (voice and FAX only).
- Member's name (last, first, middle initial).
- Member's grade.
- Security clearance.
- TDY proceed date.
- Itinerary (from-to, return to)
- Number of days TDY
- Per diem estimate
- Travel estimate
- Other estimates (for example, registration fees, rental cars)
- Travel order number (for TDY in conjunction with a PCS only)
- FAX number
- Point of contact (name, phone, office symbol).

★3.6.6.4. If the information provided is complete and correct, 12 CPTS/FML will provide a travel order number and fund cite for TDY orders and, if applicable, a fund cite and authorization number for PCS orders. Return a copy of published orders to 12 CPTS/FML, 29 Main Circle, Suite 01, Randolph AFB TX 78150-4442, per instructions in 3.6.4.3.

3.6.6.5. Use table 3.4 to determine customer identification code (CIC) for DBOF-T transportation.

3.6.6.6. Current year mission readiness training appropriation should not be used to fund canceled or closed obligations without approval from DAO-DE AETC/FA, DSN 487-5233/5328, commercial number (210) 652-5233. Request, including reason for adjustment, should be submitted by message or FAX (DSN 487-4179) to DAO-DE AETC/FA, Randolph AFB TX.

3.6.7. **Reporting Instructions**:

3.6.7.1. The policies outlined in paragraph 1.17 apply to all AETC monitored training.

3.6.7.2. As a general rule, personnel should report to AETC training wings or Air Force locations between 0800 and 1600 on the day preceding the class start date. Exceptions to this, however, may be in paragraphs 3.9.1 through 3.9.11 or in the instructions furnished through AFTMS for individual course allocations. In paragraph 3.9, training wings are listed alphabetically, followed by other Air Force locations (also listed alphabetically). Instructions for students reporting to FTDs are in chapter 6. ***NOTE***: Students returning to AETC courses from overseas in a TDY status may be authorized to report not earlier than 2 days before class start date if the orders issuing office determines that travel arrangements allowing 1 day before class start reporting will not be in the best interest of the Air Force and mission accomplishment. 3.6.7.3. For reporting instructions for training conducted at other than Air Force locations, see the following paragraphs: Army, 3.10; Marine, 3.11; and Navy, 3.12. Specific locations are listed alphabetically under the service or agency administering the school. The specific schools are listed alphabetically under the location. Other locations where training is regularly scheduled are listed alphabetically in paragraph 3.13. Defense Language Institute instructions are in paragraph 3.14.

3.6.8. **Transportation To and During Training**. Modes of transportation authorized in travel orders must be consistent with the requirements of the school location to ensure economical use of AETC mission readiness training funds. AFH 24-502, *Excess Cost Procedures* (formerly AFR 75-25) provides guidance on handling transportation problems. Transportation instructions for students involve two separate considerations:

3.6.8.1. Travel Between the Home Station and Training Site. AETC encourages the use of military air transportation when available. This ensures the most economical use of the limited AETC mission readiness training funds. When military air transportation is not available, make maximum use of commercial air excursion rates.

3.6.8.2. Travel in the area of the training site between quarters and the school and, in some cases, to and from messing facilities.

3.6.8.3. For travel in the training site area:

3.6.8.3.1. Government transportation is usually available at DoD training installations, if required, for movement of students between their quarters, messing facilities, and the school. Exceptions for a particular installation may be found in subsequent special reporting instructions for the various training locations or in quota allocations. Where government or free public transportation is available, use of GSA or rental car is not authorized. When transportation is not available, users may request special authorization or vicinity mileage. Approval will be based on adequate justification provided by the requester. Such justification must indicate why use of requested transportation is more advantageous to the government (AFR 75-series).

3.6.8.3.2. For type 1 contract training, students are expected to arrange for their own transportation unless quota allocations indicate particular government, contractor, common carrier, or special conveyance facilities are available. Then the students must use these facilities. The number of GSA or rented vehicles must be held to a minimum.

3.6.8.2.3. If approved, rental cars are authorized on a first-come-first-served basis and are limited to one per class or one per five students. Individuals who have been authorized a rental car must provide transportation to other TDY Air Force personnel in the class and they must announce the availability of this transportation on the first class day.

★3.6.9. **Special Authorizations**. When AETC authorizes other organizations to cite AETC funds in orders, this authorization is only for normal travel and per diem allowances that will accrue on the order. Therefore, the issuing or approving official must request and receive approval from the appropriate office of responsibility for the additional expenditure before including special authorizations in orders. Special authorizations include but are not limited to vicinity travel, rental cars, and privately owned conveyance when requested as more advantageous to the government. When rental cars are authorized, travelers must pay for vehicle and claim reimbursement on travel voucher. Special authorization requests for technical training should be sent to 2 AF/DOPS, 721 Hangar Road, Ste 102, Keesler AFB MS 39534-8465, fax DSN 597-1210, voice DSN 597-1338, medical training to HQ AETC/SGAT (refer to paragraph 3.9.3.2.3.4), survival and flight training to HQ AETC/XOTI. Message for approval must be sent prior to travel of the student.

3.7. Administration of Students While in Training:

3.7.1. **Disposition of Unqualified Arrivals (Including Reference to TDY Funding)**:

3.7.1.1. AETC action on unqualified Air Force students reporting to airman basic technical courses. When a center determines a student is unqualified for entry into the airman basic course into which he or she is ordered, the following actions are prescribed:

★Table 3.4. AETC Customer Identification Code (CIC) for ASIF Transportation.

R U L E	A If the EIC (RC/CC) is (note)	B then the CIC is	C insert	D follow with
1	1608A1	4 4 *64	8A17	525000
2	1608A2		8A27	
3	1608A3		8A37	
4	1608A4		8A47	
5	1608A5		8A57	
6	1608A6		8A67	
7	1608A7		8A77	
8	1608A8		8A87	
9	1608A9		8A97	
10	1608D1		8D17	
11	1508C1		8C17	
12	1508C2		8C27	
13	1508C3		8C37	
14	1508C4		8C47	
15	1508C5		8C57	
16	115900		8B27	

*use applicable FY

3.7.1.1.1. Correct the problem locally if possible and then enter the student. Usually, training wings cannot correct problems in the areas of security, personnel reliability, or retainability.

3.7.1.1.2. If the student is in TDY status and qualification cannot be established, the center notifies the parent organization (with an information copy to the parent MAJCOM and 2 AF/DOPS) of the reason for disqualification and returns the student to his or her unit.

3.7.1.1.3. If the student is in PCS/PCA or PCS without PCA and qualification cannot be established, centers will report the student to HQ AETC/TTPR for action and hold the individual in effective status until disposition instructions are received from AETC.

3.7.1.2. AETC action on unqualified Air Force students in courses other than airman basic courses. When a training wing determines a student in a course is unqualified and qualification cannot be effected locally, the following actions are prescribed:

3.7.1.2.1. In the training wing's judgment, if the action to establish the qualification can be taken by the parent organization within 4 workdays and delayed training can be made available after correction of the deficiency, the training wing may request immediate corrective action from the parent organization (with an information copy to parent MAJCOM and 2 AF/DOPS).

3.7.1.2.2. For those students who cannot be qualified or for whom the parent organization takes no corrective action within the prescribed number of days, the center notifies the parent organization (with an information copy to the parent MAJCOM and 2 AF/DOPS) of the reason for disqualification and returns the student to his or her unit.

3.7.1.2.3. For all TDY students returned to their parent unit because of lack of qualification, the organization responsible for preparation of their orders will take necessary action to amend the orders and charge all expenses to the organization responsible for the improper selection. Send copies of the amended travel order attached to an AF Form 330, Records/Transmittal Request, to DAO-DE AETC/FA and 2 AF/DOPS.

3.7.1.2.4. Personnel reporting for a nonexistent class resulting from class date changes provided through AFTMS or students reporting to an incorrect location, will be handled individually between HQ AETC and the parent command or activity concerned. Disposition action will be determined on a cost-effective basis, and all expenses incurred as a result of the error (travel and per diem) will be charged to the responsible organization with appropriate amendment of orders by servicing MPF/CCPO. Send copies of the amended travel order attached to an AF Form 330 to DAO-DE AETC/FA and 2 AF/DOPS.

3.7.1.2.5. Air Reserve Forces students who arrive for training without meeting the prerequisites established by this manual are not permitted to enter training. Centers will return the student to his or her parent unit and advise the appropriate adjutant general or Reserve agency and 2 AF/DOP of the reason for disqualification.

3.7.1.3. AETC Action on TDY Overweight Students:

★3.7.1.3.1. Guidelines set forth by AFI 40-502, *Air Force Weight Management Program* (formerly AFR 35-11) and HQ AETC/DP will be followed. Students not meeting these guidelines or those in the WMP who are making unsatisfactory progress will be denied training and returned to their home station at the parent unit's expense. Copies of the amended travel order attached to an AF Form 330, **Records/Transmittal Request**, will be sent to DAO-DE AETC/FA.

3.7.1.3.2. Overweight students making satisfactory progress in the WMP and those in compliance with approved body fat measurements or weight waivers must have a copy of AF Form 393 and any other appropriate documentation with them during administrative inprocessing.

3.7.1.3.3. If, due to administrative oversight, required documentation is not hand-carried by student, do the following:

3.7.1.3.3.1. Contact the parent unit commander to determine that

documentation exists.

3.7.1.3.3.2. If the parent unit commander has the documentation, advise him or her to forward a copy immediately.

3.7.1.3.3.3. Advise the parent MAJCOM/DP and base commander by message that documentation was missing at inprocessing.

3.7.2. **Management of Eliminees**. Air Force students (other than pipeline NPS students from Lackland) fall into two categories, retrainees in airman basic courses and students in other than airman basic courses. Eliminees in each of these categories are managed as follows:

3.7.2.1. Retrainee eliminees from airman basic courses. If the eliminee is in:

3.7.2.1.1. TDY status, the training wing will return the student to the parent unit with a letter explaining the reasons for elimination (with an information copy to the parent MAJCOM).

3.7.2.1.2. PCS status, has been eliminated without prejudice, and is recommended by his or her commander or a faculty board, he or she may be immediately entered into any other airman basic course he or she is qualified for if a:

3.7.2.1.2.1. PCS move is not involved.

3.7.2.1.2.2. Career airman training requirement exists.

3.7.2.1.2.3. Retraining objective control number (ROCN) is available from HQ AFPC/DPPAET.

3.7.2.1.3. PCS status and is not reentered into another basic course, the training wing will report the individual through AETC channels to AFPC to obtain assignment instructions.

3.7.2.2. Eliminees from courses other than airman basic. If the eliminee is in:

3.7.2.2.1. TDY status, the AETC training wing will return the individual to his or her parent unit and advise the unit of reasons for elimination (with an information copy to the parent MAJCOM).

3.7.2.2.2. PCS without PCA status, the AETC training wing will contact parent MAJCOM and request assignment instructions for the individual.

3.7.2.2.3. TDPFO or PCS with PCA status, the training wing will report the individual through the AETC channels to AFPC to obtain assignment instructions.

3.7.2.3. Reentry of eliminees at a later date. The policy is:

3.7.2.3.1. Career airman and civilians eliminated without prejudice from an advanced, lateral, or supplemental course may be entered into the same course after 1 year of additional field experience. Exception to this limitation may be made for other than flying training eliminees only if the wing commander of the airman concerned certifies the individual has gained sufficient experience after elimination to enable him or her to satisfactorily absorb the training.

3.7.2.3.2. Career airmen eliminated with prejudice may not be considered for entry into any type of course until at least 1 year after elimination.

3.7.3. **Training Leave Policy**. The following leave policy has been established for officers and airmen attending AETC courses:

3.7.3.1. Except as indicated in paragraphs 3.7.3.2 and 3.7.3.3 below, leave breaks are not scheduled in officer courses, advanced airmen courses, and basic airmen technical courses unless specifically approved by HQ AETC.

3.7.3.2. Technical training is normally suspended as of 2400 on or about 23 December and resumed at 0600 on or about 2 January. To allow for local transportation problems, training wings are permitted to establish their own leave schedules if no more than 4 days of training acceleration or makeup is involved. MAJCOM-prepared TDY orders for students scheduled for training in resident courses during the holiday period should contain authorization for up to 14 days of leave during the holiday period.

3.7.3.3. Type 4 courses are scheduled to conform to the holiday leave policy of the agency being served.

3.7.3.4. Basic Military Training School will not be suspended except for national holidays.

3.7.3.5. Officer Training School will suspend training on the last duty day before Christmas and resume training on the first duty day after 1 January.

3.7.3.6. Basic Military Training School graduates scheduled to arrive at a training wing during the Christmas holiday period will be offered a 7-day delay en route. Those graduates not desiring a delay en route will be transferred to the appropriate training wing and be held for course entry in January.

3.7.3.7. December graduates of Officer Training School who are selected for technical training will be individually scheduled for delay en route consistent with their entry date into training.

3.7.3.8. Airmen may be authorized delay en route, according to AFM 177-373, volume III, *Air Reserve Forces Pay and Allowance System*, upon reassignment to a permanent duty station.

3.7.4. **Student Housing and Messing**:

3.7.4.1. For DoD training installations, availability of student housing and messing for each particular location is explained in paragraphs 3.9 through 3.14. Special instructions are also included, when required, in quota allocations.

3.7.4.2. In the case of type 1 contract training, government housing and messing facilities will be used when it is determined by 2 AF/DOP that such facilities are available within reasonable commuting time and distance from the contract training facility. In the absence of government facilities, AETC may contract for commercial housing, which will then be considered as government furnished and the users so advised. In the absence of any special guidance from AETC in the quota allocations, students will be required to find their own facilities.

3.7.4.3. Civilian employees must occupy available adequate government housing. Civilians attending courses that exceed 30 calendar days, when government housing and messing facilities are not used, are limited to 55 percent of that authorized for the training location. (See JFTR, volume II, for additional information and guidance.) Requests for waiver to the 55-percent rule for all technical training must be forwarded to HQ USAF/DPCS, Wash DC.

3.7.4.4. AB through A1C students who have completed initial skills training and are returned to a training wing in a TDY status for supplemental, advanced, or refresher training should be housed in transient quarters.

3.7.4.5. AB through A1C students who have been eliminated from an initial skills course of less than 20 weeks and are reclassified into another initial skills course will continue to be treated as pipeline students.

★3.7.4.6. Students who have graduated or been eliminated from an initial skills course of 20 weeks or more and are sent to another training wing for an initial skills course of less than 20 weeks are entitled to per diem (Vol I, JFTR, U4101).

3.7.5. **Orders for Award of AFSC**. Student classification upon graduation from AFSC-awarding courses (AB, AL, OB, OL) must be done by the responsible training wing or MPF through AFTMS. This action must be completed before the graduate's departure from the training location and will be done according to AFI 36-2101 (formerly AFR 35-1).

3.7.6. **Extension of TDY**. Students attending courses within AETC are frequently held over because of course changes, backlog, washbacks, or other reasons that result in an extension of the training period. Training wings are authorized to extend TDY when necessary for successful completion of the course. If the TDY period is extended for more than 2 weeks, the student's current unit and command will be promptly notified. For Air Reserve Forces and members of other services in AETC courses, the training activity must ask the parent organization to amend the student's orders to extend the TDY, giving details upon which the request is based.

3.8. Specific Instructions by Type of Training:

3.8.1. **Type 1, Contract Special Training**. The following rules govern attendance at contract training courses at civilian locations:

3.8.1.1. The training agency must be notified at least 7 workdays before class start date of name, grade, SSN, and security clearance (if applicable) of trainees.

3.8.1.2. Records do not accompany airmen to special training courses conducted at a contractor's facility. Compliance with AFM 177-373, volume II, *Joint Uniform Military Pay System (JUMPS) Unit Procedures Excluding AFO*, is mandatory as to advance payments and other items relating to pay and allowances.

3.8.1.3. Military personnel must report in prescribed uniforms unless specifically authorized by AETC to wear civilian clothing. The policy prescribed in AFI 36-2903, *Dress and Personal Appearance of Personnel* (formerly AFR 35-10), applies with the qualification that the AETC Commander will approve the use of civilian clothing for all Air Force personnel, regardless of parent command, who attend type 1 training. Special allowance for purchase of civilian clothing to be worn while attending type 1 training courses is not authorized.

3.8.1.4. Unless otherwise specified in reporting instructions from AETC, individual students are responsible for arranging for their own housing and messing accommodations.

3.8.2. **Type 2, Special Resident Training**:

3.8.2.1. Reporting instructions are found in paragraphs 3.9.1 through 3.9.10.

3.8.2.2. Military personnel must report in prescribed seasonal uniforms.

3.8.2.3. Special instructions for individual courses are furnished with quota allocations.

3.8.2.4. Unless otherwise stated, government housing and messing are available for all types of students at Air Force locations.

3.8.3. **Type 3, Regular Resident Training**:

3.8.3.1. Special reporting instructions are found in paragraphs 3.9.1 through 3.9.10.

3.8.3.2. Military personnel must report in prescribed seasonal uniforms.

3.8.3.3. Special instructions pertaining to an individual course are found in the course announcement or are furnished with quota allocations.

3.8.3.4. Unless otherwise stated, government housing and messing are available for all types of students at Air Force locations.

3.8.4. **Type 4, Special Field Training (FTDs and MTTs)**. The following instructions apply to training by FTDs where TDY-to-school is concerned:

3.8.4.1. AETC mission readiness training funds are not authorized for students attending training courses at FTDs attached to their parent commands or MTTs sent to bases or operating locations in their commands.

3.8.4.2. Students from bases outside the host command are authorized use of AETC funds for travel expenses and per diem incurred in connection with training at an FDT or MTT only if quotas have been allocated by AETC.

3.8.4.3. Government housing and messing for students are furnished by the host Air Force activity unless special reporting instructions state otherwise.

3.8.4.4. Military personnel must report in prescribed seasonal uniforms.

3.8.4.5. Proposed dates for MTTs should be precoordinated with the organization providing the training and the format request submitted to 2 AF/DOPN, 721 Hangar Road, Ste 102, Keesler AFB MS 39534-2804, DSN 597-1333.

3.8.5. **Type 5, Other Government Agency Training (Army, Navy, Marine, DoD, and Others)**:

3.8.5.1. Consult individual course announcements to determine course objectives and prerequisites. School information and additional special reporting instructions are contained in paragraphs 3.10 through 3.13.

3.8.5.2. Military personnel must report in prescribed seasonal uniform unless otherwise authorized. Civilian clothing must be worn according to Air Force standards of appearance and good taste. Air Force personnel attending Army courses must adhere to uniform changeover dates established by that service as reflected in table 3.12. Optional periods are not permitted in any locality.

3.8.5.3. Specialized instructions for an individual course, if required, are furnished with quota allocations.

3.8.5.4. Unused quotas in type 5 courses must be returned to 2 AF/DOP (HQ AETC/SGAT for medical and dental courses) at least 60 days in advance of the scheduled class reporting date. Exceptions should be made only under the following conditions:

3.8.5.4.1. The quota allocations were received so late the 60-day lead time is not possible.

3.8.5.4.2. Emergency conditions arise that could not be foreseen in advance of the 60-day period.

3.8.6. **Type 6, Job Site Training:**

3.8.6.1. MAJCOM points of contact (POC) or education offices may be contacted for video teletraining broadcast schedules.

3.8.6.2. Military personnel must report for video teletraining courses in prescribed seasonal uniforms.

Section B—Air Force School Information and Reporting Instructions

3.9. AETC Training Wings and Other Air Force Locations. School information and special reporting instructions for AETC training wings and other Air Force locations. Reporting instructions for all on-base courses are as shown in the following subparagraphs unless amended by individual course announcements or by quota allocation correspondence.

3.9.1. **Keesler Training Wing (81 TRW, 720 Chappie James, Ste 201, Keesler AFB MS 39534-2604) Special Instructions**:

★3.9.1.1. Student Quarters. Government quarters are available for civilian students. If government quarters are not used, adequate commercial facilities are located within 2 miles of the base. TDY student enlisted members will be housed in Transient Quarters (VAQ) in accordance with AFI 32-6005, *Unaccompanied Housing*, and AFI 34-601, *Air Force Lodging Program* (formerly AFR 90-9). Billeting reservations accepted. Call DSN 597-3663 or (601) 377-3663. NOTE: Use of tobacco products is prohibited by students in training programs during normal duty hours while in uniform. Civilian personnel enrolled in technical training programs are highly encouraged to abstain also.

★3.9.1.2. Seasonal Uniform Changes. The optional period is 1 January through 31 December. TDY male and female personnel must have the service dress uniform with service cap/beret, light blue shirt/blouse with short/long sleeves and battle dress uniform.

3.9.1.3. Per Diem Restrictions. Payable per JFTR.

3.9.1.4. Special Orders. Upon reporting to building 701, Sablich Center, personnel must have five or more copies of orders directing them to attend training.

3.9.1.5. Air Reserve Forces. If active duty period is 20 weeks or more, individual will be billeted as PCS status. If active duty period is less than 20 weeks, individual will be billeted as TDY status.

3.9.1.6. Physical Conditioning. Non-prior service (NPS) airmen will participate in a structured physical conditioning (PC) program. Students are required to bring appropriate PC clothing and shoes.

3.9.1.7. Reporting Instructions. See table 3.5. Reporting instructions for E3OBP13B1 001, E3OZP13B3C 005, and other courses at Tyndall AFB are in paragraph 3.9.9 below.

3.9.2. **Lackland Training Wing (37 TRW, 2000 Bong Avenue, Ste 1, Lackland AFB TX 78236-5109) Special Instructions**:

3.9.2.1. Student Quarters. Government quarters are available for civilian students. If government quarters are not used, adequate commercial facilities are located immediately outside the base and are served by city bus transportation. Vicinity travel reimbursements are not authorized. Billeting reservations are accepted. Call DSN 473-3781/2556 (airmen), 473-3622 (officers), or commercial (512) 671-3622.

3.9.2.2. Seasonal Uniform Changes. Long underwear and field jacket liners are required for students attending courses taught at Camp Bullis and Lackland Training Annex (LTA) during the period of October through April.

3.9.2.3. Cryptographic Course Requirements:

3.9.2.3.1. Individual must have a Secret security clearance and be a US citizen, and a statement to that effect must be included in the orders. Compliance with paragraph 3.6.1.10 is essential if individual is to enter class as scheduled.

3.9.2.3.2. Retrainees attending the basic crypto course must be screened according to AFI 36-2104 (formerly AFR 35-99) and must initiate a Top Secret clearance or be in possession of a current Top Secret clearance before departing PCS for school (AFMAN 36-2108 [formerly AFR 39-1]).

3.9.2.4. Security Clearance Prerequisites. Advance notification is required for all personnel attending training with a security clearance requirement (see individual course announcements for courses requiring security clearances). Information including name, grade, SSN, security clearance, citizenship, course number, and course dates must be sent to the 342 TTS/Security Section NLT 10 days in advance of the course start date.

3.9.2.5. Student Assistance. Personnel arriving at San Antonio International Airport should contact the Military Reception Desk in the airport terminal building for information about transportation to Lackland AFB.

3.9.2.6. Physical Conditioning. All students (officers, NCOs, and airmen) in types 2 and 3 technical training will participate in PC. Students are required to bring appropriate PC clothing and shoes.

3.9.2.7. Reporting Instructions. See table 3.7.

3.9.2.8. Courses L3OAR24T4 000 and L3OBR24T1 001. Three weeks in advance of the class entry date, send the name, grade, and mailing address of each student selected to attend these courses to the following appropriate address: course L3OXR24TX 000 - 345 TTS/TTTO, Lackland AFB TX 78236-5109.

3.9.2.9. Wilford Hall Medical Center (WHMC), Lackland AFB TX 78236-5300. Officers and civilians are assigned to WHMC; airmen are assigned to the Medical Services Squadron Section, WHMC. All personnel will report NET 1200 and NLT 1800 to the WHMC information desk and then to their course supervisor 1 day before class start date.

3.9.2.10. Services Course Requirements for Guard and Reserve Personnel:

3.9.2.10.1. Uniform Requirements. Minimum three sets of blue uniforms including shirts, pants, ribbons, name tags, ties, tabs, and appropriate rank. Minimum three sets of BDUs with BDU cap, field jacket, and steel-toed boots. Six sets of cook's whites.

★Table 3.5. Keesler AFB Reporting Instructions.

L	A	B	C	D	E
I N E	**Type of Personnel**	**Type of Training**	**Unit of Assignment**	**Report to**	**Reporting Times**

1	E-1 thru E-3 (NPS Pipeline and eliminees)	all courses	see table 3.6	81 Mission Support Squadron Student Reception Center, bldg 7001, 0700-1600	**All NPS Students** (note 1) **PCS Student Airmen** between 0800 and 1600, NET 5 days and NLT 2 duty days before class start date. **PCS Student Officers** between 0800 and 1600, NET 5 days and NLT 3 duty days before class start date. **Oversea Returnees in PCS Status**: authorized to sign in upon completion of leave or travel. **All TDY Students** NET 0800 and NLT 1600, 1 day before class start date. (notes 2 and 4)
2	E-2 and above in PCS status (notes 2 and 3)			Officers, enlisted, and civilians, all grades: Muse Manor, bldg 2101	
3	enlisted in TDY status (notes 2 and 3)				
4	officers and civilians				
5	international students			bldg 2004, rm 179	

NOTES: 1. All NPS students should report to their unit of assignment after 1600 daily, weekends, and holidays for quarters assignment and additional information.
2. ANG and AFRES personnel will report to the ANG/AFRES Liaison Officer, bldg 6901, room 140, within 1 duty day of reporting to Keesler AFB.
3. ANG technicians reporting to Keesler in civilian status will wear appropriate military uniform while attending class. ANG and AFRES technicians will be billeted according to their military grade.
4. Every effort should be made to arrive at Keesler Training Wing during duty hours. Additional travel time to ensure arrival by 1600 is not warranted. If arrival will be after 1600, report to the billeting office for quarters assignment and additional information.

6	338 TTS	Bldg 7102 CQ	2E066 003, 2E000 001, 2E1X1, 2E1X2, 2E1X3, 2E151 002/003, 2E231 M/R

3.9.2.10.2. Class Report Instructions. Request class information sheet upon reporting to the billeting office. Report to bldg 10416, bay B1, at 0600 on the first day of class. Bring two copies of orders to class.

3.9.2.10.3. Medical. Need current shot record, current TB-tine test, and food handler's card.

3.9.2.11. Pararescue and Combat Control Physical Ability and Stamina Test (PAST) criteria:

★3.9.2.11.1. Administration procedures for the PAST standards: The PAST events are to be completed in the order they are listed within a 3-hour timeframe. Stopping during the swim, underwater swim, or run before the time limit constitutes failure and testing stops at that time. For the calisthenic exercises, candidates will exercise to time limit or muscle failure, whichever comes first. The events will be completed within the time limits specified. If the candidate finishes events before the allotted maximum time, then the time remaining will be considered additional rest time in addition to the rest period following the event. The following calisthenic criteria will be strictly adhered to when administering the calisthenic and underwater swim evaluations. NOTE: All CCT officer candidates, PJ/CCT retrainees, and Air Force prior service and other sister service candidates will be administered the same test upon arrival at their first pipeline school. All GTEP candidates who take this test and pass should continue to train using the requirements specified to stay in shape while awaiting entry into the Air Force.

★3.9.2.11.1.1. 20-Meter/Four 25-Meter Underwater Swims. There is no time limit for the 20-meter underwater swim. The four 25-meter underwater swims are conducted with a 2-minute time limit and are conducted back-to-back. Candidates swim 25 meters underwater from start point without any portion of their body surfacing. At the 25-meter mark or end of pool, candidates surface and free style sprint back to starting point. Whatever time remains of the 2 minutes is used as rest before the next repetition. Suggest a 5-second countdown at 1:55 of each interval for candidates to prepare for the swim. If the candidates return to the start point at the end of the 2-minute interval, evaluator must start the next 2-minute interval and instruct candidates to start the next 25-meter underwater swim (no rest). If candidates surface during any underwater swim or don't complete the swim within the 2-minute interval, the test will be stopped and considered a failure for the entire PAST. Strongly recommend evaluators instruct candidates to return swim as fast as possible to the start point to take advantage of remaining time to rest. Swim suits and swim goggles are the only required equipment items. Do not use dive mask for this event. After completion, allow a 5-minute rest before next event. Candidates should carefully stretch for the swim during this

break time. The PAST requirements for CCT officer candidates, PJ/CCT retrainees, and Air Force prior service and other sister service candidates: swim 25 meters underwater (without surfacing) followed by 25 meters on the surface in less than 2 minutes. Complete 4 laps within 8 minutes (5-minute rest). The PAST requirements for PJ/CCT GTEP and NPS: swim 20 meters underwater (without surfacing). No time limit (5-minute rest).

★3.9.2.11.1.2. 500-/1500-Meter Surface Swim. This swim is conducted using free style or side stroke. The maximum time limit for the 500-meter swim is 15 minutes (15:00), and 37 minutes 30 seconds (37:30) for the 1500-meter swim. The swims are continuous (nonstop) and conducted with no fins. Swim suit and goggles are the only required equipment items. There is a 15 to 30 minute break before the next event. Candidates should carefully stretch for the run during this break time. The PAST requirements for CCT officer candidates, PJ/CCT retrainees, and Air Force prior service and other sister service candidates: swim 1500 meters in 37 minutes, 30 seconds (37:30) or less (30-minute rest). The PAST requirements for PJ/CCT GTEP and NPS: swim 500 meters in 15 minutes (15:00) or less (30-minute rest).

★3.9.2.11.1.3. 1.5-/3-Mile Distance Runs. The maximum time for the 1.5 mile run is 11 minutes and 15 seconds (11:15), and 22 minutes and 30 seconds (22:30) for the 3-mile run. PT clothes and good running shoes are the only required items. The runs are continuous (nonstop). If a candidate stops any time during the run, the exercise is terminated and the test is over. Candidates will be given a 15- to-30-minute break before the next event.

★3.9.2.11.1.4. Calisthenics. Four calisthenics exercises are evaluated, each with specific time parameters and specific exercises for mechanics. All the exercise candidates will exercise to either muscle failure or time completion. The intent is to have candidates do as many "good form" repetitions in the time allotted or when muscle failure is reached. ***NOTE:*** In performing all calisthenics, the proper form for the exercises must be followed. Deviation from the form to allow an extra repetition will be to the candidate's disadvantage. Exercise form is strictly enforced at the indoctrination course at Lackland. A 3-minute break will be given between each calisthenics exercise.

★3.9.2.11.1.5. Chin-ups. Chin-ups are a two-count exercise. Starting position is hanging from a bar, palms facing the candidate, with no bend in elbows. Hand spread is approximately shoulder width. Count one, pull the body up until the adam's apple clears the top of the bar. Count two, return to the starting position. Legs are allowed to bend, but must not be kicked or manipulated to aid upward movement. If candidate falls off, stops, or releases the bar, the exercise is terminated. Candidate will exercise to muscle failure or time completion. The PAST requirements for CCT officer candidates, PJ/CCT retrainees, and Air Force prior service and other sister service candidates: complete a minimum of 10 chin-ups within 1 minute (3-minute rest). The PAST requirements for PJ/CCT GTEP and NPS: complete a minimum of 5 chin-ups within 1 minute (3-minute rest).

★3.9.2.11.1.6. Sit-ups. Sit-ups are a two-count exercise. Starting position is back flat on the ground, fingers interlocked behind the head, head off the mat, and knees bent at approximately a 90 degree angle. The feet only are held by another individual during the exercise. Count one, sit up so that the shoulders are directly over the pelvis. Count two, return to the starting position. There is no authorized rest position during this exercise. If the candidate rests, the exercise is terminated. If the candidate's buttocks rise from the ground or his or her fingers are not interlocked behind the head during a repetition, that repetition is not counted. The PAST requirements for CCT officer candidates, PJ/CCT retrainees, and Air Force prior service and other sister service candidates: complete a minimum of 65 sit-ups within 2 minutes (3-minute rest). The PAST requirements for PJ/CCT GTEP and NPS: complete a minimum of 30 sit-ups within 2 minutes (3-minute rest).

★3.9.2.11.1.7. Push-ups. Push-ups are a two-count exercise. Starting position is hands shoulder width apart with arms straight and directly below the chest on the ground; the legs are extended, and the back and legs remain straight. Count one, lower the chest until the elbows are bent at a 90 degree or lower angle. Count two, return to the starting position. The only authorized rest position is the starting position. If the knees touch the ground, the exercise is terminated. The candidate will not raise his or her buttocks in the air, sag his or her middle to the ground, or raise any hand or foot from the starting position. If a hand or foot is raised, the exercise is terminated. The PAST requirements for CCT officer candidates, PJ/CCT retrainees, and Air Force prior service and other sister service candidates: complete a minimum of 50 push-ups within 2 minutes (3-minute rest). The PAST requirements for PJ/CCT GTEP and NPS: complete a minimum of 30 push-ups within 2 minutes (3-minute rest).

★3.9.2.11.1.8. Flutter Kicks. Flutter kicks are a four-count exercise. Starting position is laying flat on the back with feet and head approximately 6 inches off the ground. Hands are under the buttocks with fists clenched to support the lower back. Count one, raise the left leg off the ground to approximately a 45-degree angle, keeping the right leg stationary. Count two, raise the right leg off the ground to approximately a 45-degree angle, moving the left leg to the starting position. Counts three and four are repeats of the same movements. Legs must be locked, with the toes pointing away from the body. If the candidate rests his or her legs on the ground or stops the exercise movement to rest, the exercise is terminated. The PAST requirements for CCT officer candidates, PJ/CCT retrainees, and Air Force prior service and other sister service candidates: complete a minimum of 60 flutter kicks within 2 minutes (3-minute rest). The PAST requirements for PJ/CCT GTEP and NPS: complete a minimum of 40 flutter kicks within 2 minutes (3-minute rest).

3.9.3. **Sheppard Training Wing (82 TRW, 419 G Avenue, Ste 1, Sheppard AFB TX 76311-2941) Special Instructions**:

★3.9.3.1. The following instructions are for all Sheppard AFB courses. Additional instructions for medical courses are in paragraph 3.9.3.2. NOTE: Use of tobacco is prohibited by students in training programs during normal duty hours. Students include military (airmen and officers) and civilian personnel enrolled in technical training and in TDY to training programs.

3.9.3.1.1. Student Quarters. Government quarters are available for civilian students. If government quarters are not used, adequate commercial facilities are located within 5 miles of the center. TDY students in grades AB through A1C who have previously completed training or had a DDA and are returned to a training wing in a TDY status for supplemental, advanced, or refresher training should be housed in TDY quarters. TDY pipeline students in grades AB through A1C who have been eliminated from a course and are sent to another training wing in a TDY status (table 3.3, rule 6B) should continue to be treated and housed as pipeline students. Pipeline students who have completed a basic course and are sent for follow-on training should continue to be treated and housed as pipeline students. Billeting reservations are accepted.

Call DSN 736-1844/2970 or commercial 817-676-1844/2970. Personnel reporting after 1700 should notify billeting to prevent cancellation of reservations.

3.9.3.1.2. Transportation. Government transportation is not available for personnel not occupying government or government contract quarters. Students should be prepared to defray quarters and transportation expenses.

Table 3.7. Lackland AFB Reporting Instructions.

LINE	A Type of Personnel (note 1)	B Type of Training	C Unit of Assignment	D Report to	E Reporting Times
1	TDY students and local area	security police and combat arms courses	343 Tech Tng Sq	Base Billeting, VAQ Gateway Inn, bldg 10203 (enlisted and GS-6 or below). VOQ, bldg 2604 (officers and GS-7 or above).	Billeting open 24 hours, 7 days a week. Report 1 day before class start date. Billeting will provide training location and times. Guard and Reserve students attending security police courses should draw per diem prior to arrival or arrive (24 hrs) prior to class start to draw per diem locally
2		Crypto/TEMPEST, Teletype, social actions recruiter, MWR, and small computer courses	342 Tech Tng Sq

9	Air National Guard and Reserve	Basic military training	HQ BMTS	Bldg 5616, rm 165, Monday through Friday; 3731 PPS.	

NOTES: 1. For vehicle maintenance, report to Det 1, 345 TRS, Port Hueneme CA.
2. For students attending AMD medical courses, see chapter 2, paragraph 2.10, for instructions. These courses are identified by the course prefix ending in "Y" (example, H3AZY, D3OZY).
3. POV not authorized for use at, to, or from OL-H. Members must report in uniform with full uniform complement.
4. TSEs report to unit of assignment, that is, 3270th Military Training Flight (MTF), 3280th MTF #1, or 3280th MTF #2. Then they will be instructed to report to the Registrar's Branch with one set of their travel orders before class start date. TSEs have class entry priority.

3.9.3.1.3. Seasonal Uniform Changes. The optional period is 1 January through 31 December. All enlisted students (including USAFR and ANG) attending courses requiring battle dress uniforms (BDU) must have a field jacket with liner, thermal underwear, and gloves with liners during the period 1 October through 31 March.

3.9.3.1.4. Per Diem Restriction. Payable per JFTR.

3.9.3.1.5. Safety Requirement. Students who are attending a course requiring hearing protection (ear plugs) see paragraph 3.5.3.

3.9.3.1.6. Pole Climbing Courses. Students, Air Force (except immediate graduates of BMT), other DoD, including Air Reserve Forces and International, reporting for training in 2E6X1, 2E6X2, and 542X1 courses that include instructions on pole climbing, must have boots, pole climbing: FSN 8430-01-093-XXXX (Xs indicate shoe size)—as authorized in table of allowance (TA) 016, or the equivalent in other branches of DoD. Prospective students must be pretested before arrival at Sheppard AFB to determine physical capability to climb and work on poles.

3.9.3.1.7. Physical Conditioning (PC). All pipeline (initial skills training) students (officers and airmen) in types 2 and 3 technical training will participate in PC. Students are required to bring appropriate PC clothing and shoes.

3.9.3.1.8. Reporting Instructions. See table 3.4. (Medical course instructions are in table 3.5.)

3.9.3.2. 882d Training Group (882 TRG), Special Instructions. (Also see paragraph 3.9.3.1 above.)

3.9.3.2.1. Clothing and Equipment. All TDY personnel attending initial skills courses must bring service dress, light blue shirt/blouse with short sleeves, and service cap/hat. Personnel in

TDY status are not required to bring BDUs unless specifically required by a course of instruction. Air Reserve Forces Personnel reporting for the following medical courses: J3AQR4N031 003, J3ABR4J032 000, J3AQR4T031 000, J3ABR4P031 000, or J3ABR4Y031 002 must bring the following items: Male—4 each shirts, man, white; 4 each trousers, white; BDUs; field jacket; combat boots. Female—4 each dress, woman, white; BDUs; field jacket; combat boots. White shoes with medical whites are optional. If worn, they will conform with guidelines in AFI 36-2903 (formerly AFR 35-10) (applies to both men and women).

3.9.3.2.2. Reporting Instructions. See table 3.9. For courses not held at Sheppard AFB, reporting instructions are in the course announcement.

3.9.3.2.3. Special Authorizations:

3.9.3.2.3.1. When AETC authorizes other organizations to cite AETC funds in orders, this authorization is only for normal travel and per diem allowances that will accrue on the order. A special authorization is something that adds to the cost of normal travel. When using the AETC fund citation, all special authorizations including shipment of baggage and household goods, travel by private auto (if more advantageous to the government) or special conveyance (rental car—GSA, GSA contractor, or private rental), variations in itinerary, etc., must be approved by HQ AETC/SGAT before issuance of orders. Only exceptions are identified in paragraphs 3.9.3.2.3.2 and 3.9.3.2.3.3 below.

3.9.3.2.3.2. Approval may be obtained by submitting a written request to HQ AETC/SGAT. The request must include proper justification for special authorization based on advantage to the government. Factors identified in AFI 37-128, *Administrative Orders*, must be considered and provided. When approval is received from HQ AETC/SGAT, include the approval reference in section 16, Remarks, of the applicable TDY order (DD Form 1610). Any approved shipments of baggage must also reflect the weight authorized in words or figures. Failure to obtain proper approval for any special authorization may result in charging the funds of the orders publishing organization for additional costs incurred. Do not confuse allowances (for example, 600 lbs for TDY unaccompanied HHG) with authorizations necessary to publish TDY orders using AETC funds.

3.9.3.2.3.3. Three pieces of baggage may be shipped as excess when traveling military or commercial air and TDY duration is in excess of 45 days. Incoming temporary storage at the TDY station is authorized. As stated above, prior AETC approval is not needed in these instances.

★3.9.3.2.3.4. Variation in itinerary will be authorized for retrainees in the medical service apprentice course, J3AQR4N031 003, and the surgical service apprentice course, J3AQR4N131 001. After completion of either of these courses, students receive further training at a designated Air Force hospital. As stated above, prior AETC approval is not needed in these instances.

3.9.3.2.4. Occupational Health Eye Examination. Students attending the biomedical equipment apprentice course (J3ABR4A231 001) are required to have the eye examination by an optometrist or ophthalmologist. Retrainees will have an eye examination before they depart their previous duty location. Nonprior service students will receive their eye examination on or about the 90th day of training. The examination is required for all individuals who are occupationally exposed to class IV laser systems and will include the following as a minimum: ocular history, best corrected visual activity including cyclopedia refraction if indicated, Amsler grid exam, funduscopic exam under mydriasis, drawing or describing any abnormalities, and slit lamp examination.

3.9.4. **Goodfellow Training Wing (17 TRW, 184 Ft Lancaster Avenue, Ste A, Goodfellow AFB TX 76908-4410) Special Instructions**:

3.9.4.1. Student Quarters. Government quarters are normally available for TDY civilians, and on-base housing and messing are normally available for unaccompanied officers and enlisted personnel. For accompanied personnel, off-base housing is limited. All on-base quarters are within walking distance of all base facilities. Closest off-base motel is approximately 2 miles. Billeting reservations are accepted. Call DSN 477-3686/commercial 915-654-3686.

★3.9.4.2. Transportation. Commercial taxi service is available. Commercial bus service, although not available to or from the airport, is available between the base and downtown areas hourly from 0645 to 1745 weekdays and Saturday 0945 to 1745. On base military bus service is unavailable. On base military taxi service is very, very limited, and only available between 0730 and 1630 hours, Monday through Friday.

3.9.4.3. Seasonal Uniform Changes. The optional period is 1 January through 31 December.

3.9.4.4. Clothing and Equipment. The following items are mandatory for Air Force enlisted and officer personnel attending TDY courses: Male—utility uniform and cap, service dress uniform, short/long sleeve blue shirt with/without epaulets, low quarter shoes, boots (combat), flight cap, and service cap. Female—service dress uniform (skirt or pants), short or long sleeve blouse with pants or skirt, utility uniform and cap, oxfords, pumps, and beret/flight cap/service hat. X3OBR8051 and X3OBR8071 officer students must bring blue ceremonial uniform for graduation. Also, all TDY officer students attending training for 20 or more days must bring mess dress uniform in order to attend mandatory student oriented Dining-In.

3.9.4.5. Physical Conditioning (PC). All NPS airmen and officers in their first initial skill technical training will participate in PC. Students will be briefed to bring appropriate PC clothing and shoes.

3.9.4.6. Reporting Instructions. See table 3.10.

3.9.4.7. Security Requirements. Comply with instructions in paragraph 1.14, Personnel Security Prerequisites.

★3.9.4.8. AFI 40-502, **The Weight Management Program**, paragraph 11.4.2, states that all TDY personnel for professional military education, retraining, or a training course (formal, specialization, or qualification training) will be weighed and measured not earlier than 30 calendar days or not later than 10 calendar days before the projected departure date. This AFI applies to all active-duty Air Force and Air National Guard members who are under provisions of title 10, United States Code, and the Air Force Reserve. All students will be weighed in and checked for body fat the first day of class before 1000. IAW AETC Supplement 1, AFI 40-502, training unit commanders will allow individuals reporting for training who exceed their maximum body fat standard by 2 percent or less to enter training. They will be reported by message to the losing or parent unit commander, losing or parent major command director of personnel (MAJCOM/DP), the chief of personnel programs (HQ AETC/DPP), and the chief of operations (2AF/DO). Because of

time constraints in the training environment, overfat personnel attending courses of 30 days or less are exempt from formal placement in the weight management program. The parent unit commander will accomplish actions formally entering the person into the weight management program. The training unit commander will enter individuals attending courses of more than 30 days into the weight management program and take administrative action as appropriate. Upon completion of training, send the weight management program case file to the parent file commander. Individuals exceeding their maximum allowable body fat by more than 2 percent will be denied training and returned to their home station at the parent unit's expense. Report these personnel by message to the losing or parent MAJCOM/DP, the losing or parent commander, HQ AETC/DPP, and 2AF/DO.

3.9.5. **Hurlburt Field FL 32544**. (Hurlburt is not an AETC training wing, but AETC uses the facilities for training.)

3.9.5.1. Unit of Assignment. 4442d Tactical Control Group (TAC), Hurlburt Fld FL 32544.

3.9.5.2. Orders. Send two copies to 4442d Tactical Control Group/CCQS, Hurlburt Fld FL 32544.

3.9.5.3. Reporting Location and Time. During duty hours (0700-1600 CST) report to building 90350, 4442 TCG Student Dormitory; after duty hours report to the base billeting office, building 90509, in uniform. Students arriving after duty hours report to 4442 TCG Student Dormitory at 0800 on the next duty day. TDY students report NET 0730 2 duty days before class start date and NLT 0800 1 duty day before class start date.***NOTE***: Upon graduation from this course, students will proceed on, as a class, to AETC Combat Survival Training Course (S-V80-A). See Section H for reporting instructions. Orders and all travel arrangements will be made by 4442d TCG/CCQS personnel for pipeline students. For TDY students, the losing unit should include TDY en route to AETC Combat Survival Training Course (S-V80-A) following successful graduation from E3ABP1C431 000 course.

3.9.5.4. Quarters. All students attending E3ABP1C431 000, Tactical Air Command and Control Specialist Course, are required to reside in the student dormitory.

3.9.5.5. Transportation. Government quarters and adequate dining facilities are within walking distance of the training facility. Government transportation is available. All students attending the E3ABP1C431 000, Tactical Air Command and Control Specialist Course, are required to march to and from school.

3.9.5.6. Clothing. The duty uniform for all 1C431 students is the utility uniform (BDUs); however, students are required to have the complete issue of clothing. Also, due to regularly scheduled PC requirements, tennis shoes and running clothes are required.

11	International students	All courses	International Military Student Office (IMSO)		3 duty days before CSD; report to IMSO, bldg 843.

NOTES: 1. During peak training periods local reassignments to other student squadrons will be made. For NPS pipeline airmen, see paragraph 3.9.3.1.1 and table 3.2, rule 1, 2, or 3.
2. All ANG/AFRES students will report to the ANG/AFRES Liaison Office, bldg 699, after inprocessing their school squadron. ANG tecnicians in civilian status will wear appropriate military uniform while attending class. ANG and AFRES technicians will be billeted according to their military grade. Students reporting after 1600 on weekdays report directly to billeting, bldg 1600, for temporary quaraters and instructions.

3. Every effort should be made to arrive at Sheppard AFB during duty hours. Additional travel time to ensure arrival by 1600 is not warranted. If arrival will be after 1600, report to billeting office for quarters assignment and additional information.
4. Report to bldg1020, 2d floor, corridor B, for inprocessing at 0700 on class start day in BDUs.
5. Bldg 1020 is an aircraft hangar type building located at the corner of 10th Avenue and G Avenue.
6. Uniforms: See general information (para 1.35.1). Specific Instructions: The service dress uniform will be worn occasionally.
7. Report, in unform, to 364 TRS Orderly Room, bldg 920, for inprocessing the day before class starts.
8. All prior students report in uniform to 365 TRS orderly room, bldg 776, for inprocessing the day before class starts.

3.9.5.7. Physical Conditioning. A mandatory PC program for all students assigned to the E3ABP1C431 000 course has been established. At course start, PC will consists of stretching exercises, calisthenics, and a two-mile run. Graduating students must obtain a minimum score of 60 points on the Army Physical Readiness Test (APRT) according to Army Field Manual 21-20. For entry into the school, it is recommended that students condition themselves to be able to accomplish the following:

3.9.5.7.1. 32 push-ups in a 2-minute time period. Remain in the push-up position for the entire 2 minutes with short rest periods only in the up position.

3.9.5.7.2. 42 sit-ups in a 2-minute time period. Feet may be held.

3.9.5.7.3. Two-mile run in less than 17 minutes, 30 seconds.

3.9.6. **Kirtland AFB, Albuquerque NM 87115-5000**. (Kirtland is not an AETC training wing. These reporting instructions apply only to students attending the following courses of the Interservice Nuclear Weapons School (INWS)):

J5OZD13B4 001, Senior Officer Nuclear Accident Course (SONAC)

J5OZD13B4 000, Flag Officer Nuclear Accident Course (FONAC)

J5OZD13E3D 000, Nuclear Emergency Team Operations (NETOPS)

J5OZD21A1A 000, Nuclear Weapons Orientation Advanced (NWOA)

J5OZD43E4D 000, Nuclear Hazards Training Course (NHTC)

NOTES: 1. TDY students: Every effort should be made to arrive at Goodfellow Training Wing before 1200; however, additional travel time to ensure arrival by 1200 is not warranted.
2. Students' orders must reflect "Variations Authorized."
3. Report NET 2 duty days and NLT 1 duty day before class start date.
4. For maintenance courses (3XXXX) see paragraph f(6).

To obtain reporting instructions for FTD 1531, see chapter 6. For type 5 (other agency training) conducted at Sandia National Laboratory, Albuquerque, NM, see chapter 3, section E.

3.9.6.1. Unit of Assignment. DNWS, Interservice Nuclear Weapons School (INWS).

3.9.6.2. Orders. Send two copies to Field Command Defense Nuclear Agency (FCDNA), Kirtland AFB NM 87117-5000, to arrive NLT 15 workdays before class start date. See course announcements.

3.9.6.3. Reporting Location and Time.

3.9.6.3.1. Arrival. Transportation is not available via base taxi. Students must provide individual transportation by commercial or privately owned vehicle. Students must report to building 22010,

billeting office, between 0001 and 2400 on the day before class start date unless otherwise indicated in quota allocation.

3.9.6.3.2. Training. Training location is building 20602AB. (See INWS information brochure for details.)

3.9.6.4. Quarters. Government quarters are normally available for all personnel. Adequate commercial motels are within 5 miles of INWS.

3.9.6.5. Transportation. Government quarters are not within walking distance of the school or enlisted dining facilities. Public transportation is not available. Rental car authorization or vicinity mileage must be approved before start of travel according to AFI 37-128 and the JFTR.

3.9.6.6. Clothing and Equipment. Optional period for uniform wear is year round. All Air Force personnel must wear the necktie when the lightweight blue jacket is worn. Personnel attending FONAC, SONAC, NETOPS, or NHTC must bring fatigues or flight suit and appropriate civilian clothes for wear during field exercises. A field jacket is required from October to April. Lens inserts for the M17/M17A1 gas mask are strongly recommended for students with prescription glasses.

3.9.6.7. Security Clearance. All INWS courses require a Secret clearance and access to Restricted Data. Note requirement for advance copies of TDY order (stating clearance) under paragraph 3.9.6.2 above. An optional tour of the weapons display area is available for FONAC and NWOA students with CNWDI or SIGMA access if such access is reflected on their travel orders. See course announcements for additional information.

3.9.6.8. Other:

3.9.6.8.1. For course J5OZD13B4 000 (FONAC) only: Executive officers to flag and general officers scheduled to attend FONAC should send biography and contact DNWS (DSN 246-5666) as soon as practical with information on itinerary and other special requirements. See course announcement for further information.

3.9.6.8.2. For course J5OZD21A1A 000 (NWOA) only: Send brief job description to DNWS, Kirtland AFB NM 87117-5000, to arrive NLT 2 weeks prior to class start date. Only through this process can INWS validate each student's “need to know” and permit entry into class. See course announcements.

3.9.6.8.3. Grade Waivers. Waivers are granted on a case-by-case basis. Forward waiver request to DNWS, Kirtland AFB NM 87117-5000, at least 30 days before class start date.

3.9.7. **Patrick AFB FL 32925-3399, Defense Equal Opportunity Management Institute (DEOMI)**. (Patrick is not an AETC training wing, but it conducts training for AETC.)

3.9.7.1. Orders. Bring eight copies of orders. Orders must include:

3.9.7.1.1. Clarification of student's status; that is, temporary duty (TDY), active duty training (ADT), or annual training (AT).

3.9.7.1.2. Unit mailing address and telephone number (DSN and commercial) if student is AT, ADT, or TDY and return.

3.9.7.1.3. Gaining unit address and telephone number (DSN and commercial) if student is TDY enroute or permanent change of station (PCS).

★3.9.7.1.4. Members are authorized to ship 70 pounds of professional books and papers upon successful completion of the course; however, approval for excess baggage must be obtained from HQ 2AF/DOPS.

3.9.7.2. Reporting Location and Times. Report to DEOMI, building 559, Monday thru Friday, between 0730 and 1630, 1 day before class start date. If arrival is after 1630, report to the base billeting office. Instructions will be available at the front desk. On holidays and weekends, report directly to the base billeting office.

3.9.7.3. Quarters and Messing. On-base government billeting will be provided, if available, for all students. Members are required to pay associated billeting fees for occupation. Billeting is not available for families. Students are discouraged from bringing their families with them to DEOMI. Government mess is available for all enlisted, but only the breakfast meal is available for officers and civilian personnel unless they are in an AT status. Personnel not in an AT status must pay associated surcharge for government mess. Government transportation is not available for off-site messing. This does not constitute an automatic authorization for a rental car. Only the individual's orders dictate the type of transportation authorized. For officer and civilian personnel not in an AT status, statements of nonavailability for the lunch and dinner meals will reflect that suitable eating establishments are available within an 8-mile radius (one way).

3.9.7.4. Transportation. Base facilities are within walking distance of government billeting and DEOMI except for the Enlisted Beach Club, hospital, dental clinic, base exchange, and commissary. Transportation arrangements to the hospital will be provided if needed. If on-base billeting is not available, students should be made aware that hotels and motels do not provide transportation to DEOMI. An on-base shuttle bus is available Monday through Friday, except on holidays, and public or commercial transportation is inadequate to nonexistent. Two major airports service the Patrick AFB area; Melbourne Regional Airport in Melbourne (approximately 20 miles from the base) and Orlando International Airport (approximately 60 miles from the base). Airport limousine service is available from Melbourne Regional Airport at an approximate cost of $10.00. Call (407) 724-1600 or 1-800-826-4544 for reservations or check with the airport counter clerk upon your arrival. Shuttle and limousine service from Orlando International Airport to Patrick AFB is available at a cost of approximately $22.00. Call 1-800-551-2525, 24 hours before your arrival to make transportation reservations. Prices are subject to change without notice. The cost is reimbursable on travel vouchers. Request for special authorization or vicinity mileage must be approved at 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.9.7.5. Clothing. Military students must bring one complete service dress uniform, light blue shirts, and at least one set of BDUs. Service accouterments are also required. Civilian students are expected to comply with reasonable dress and grooming standards as shown in AFI 36-703, *Civilian Conduct and Responsibility* (formerly AFR 40-735). Clothing that contributes to unsafe, nonproductive, or disruptive environment is prohibited. All students will bring shorts or jogging pants and t-shirts with appropriate running shoes. Also, footwear with nonmarking soles is required if you desire to use the gym. Military uniforms with name tags will be worn to all classes, including in- and out-processing. The light blue shirt uniform is worn all year at Patrick AFB; however, from November through March there are occasions when rain gear and lightweight winter clothing is more appropriate. Duty uniform for classes is any authorized service uniform.

3.9.7.6. Other. When DEOMI is notified of attendance, the student

will be mailed a welcome letter and a student handbook with complete information. Students may also call (407) 494-5381/4256 or DSN 854-5381/4526 for information. Families, guests, or pets are not authorized in visiting officers quarters (VOQ) or visiting enlisted quarters (VEQ) facilities, and there are no government family quarters available during the TDY period. Commercial motels and apartments are expensive. Statements of nonavailability for lodging will only be issued to students if there is not suitable on-base billeting available. Weight standards in AFI 40-502 (formerly AFR 35-11) are enforced for active duty, Reserve, and National Guard personnel.

3.9.8. **Peterson AFB CO 80194-5000**: (Peterson is not an AETC training wing.) These instructions do not apply to AFSPC courses listed in chapter 9 of this catalog.

3.9.8.1. Orders and Clearances. Send two copies of orders to arrive at least 20 days before class start date to 533d Training Squadron, 4040 East Bijou St, Colorado Springs CO 80909-6822. For courses requiring a security clearance, include name, grade, SSN, date of birth, place of birth, citizenship, clearance, and date of clearance.

3.9.8.2. Reporting Location and Time:

3.9.8.2.1. 533d TRS: All students report to 4040 East Bijou St, Colorado Springs CO 80909-6822, or 1150 Academy Park Loop, Suite 219, Colorado Springs CO 80909-3714. Training starts at 0730. Government transportation is available, but limited.

3.9.8.2.2. 534th TRS: All students report to bldg 608 at Falcon AFB. Training start time is 0730. Government transportation (bus) is available. Students must also contact the 534th TRS student administration office at DSN 560-7502, commercial (719) 550-7502, upon arrival for detailed reporting instructions.

3.9.8.3. Quarters.

3.9.8.3.1. 553d TRS:

3.9.8.3.1.1. All TDY students (SSgt and below) contact the 533d TRS First Sergeant as soon as possible at DSN 692-1338 or commercial (719) 554-1338 for dormitory space, class reporting, and badge issue instructions. Report no earlier than 1 duty day before class start date.

3.9.8.3.1.2. All TDY students (TSgt and above and all officers) scheduled to attend training at either the 4040 E. Bijou Street location or the 1150 Academy Park Loop, Ste 219 location should contact Peterson AFB billeting, bldg 1042, DSN 834-7851, for a room reservation and welcome package. Students should arrive no later than 1 duty day before class start date.

3.9.8.3.2. 534th TRS:

3.9.8.3.2.1. All TDY students report to Peterson AFB billeting, bldg 1042 (DSN 834-7851) no later than 2 duty days before class start date.

3.9.8.3.2.2. Inprocessing for PCS students assigned to Falcon AFB units is handled by the MPF at Falcon AFB.

3.9.8.4. Transportation. Government transportation is available. AETC-funded rental cars are not authorized for course attendance. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and travel regulations.

3.9.8.5. Clothing. Any blue service uniform can be worn year round. Computer maintenance students must wear the BDU during labs. Students should be prepared for cold weather from September through May.

3.9.8.6. Other. Please call 533d Training Squadron for additional information at DSN 692-1240 or 719-554-1240. Fax extension is 1513.

3.9.9. **Tyndall AFB FL 32403-5000**:

3.9.9.1. Unit of Assignment. 325th Training Squadron.

★3.9.9.2. Orders. Send three copies to 325 TRS/DOA, 213 Dixie Road, Tyndall AFB FL 32403-5016, 14 days before class start date.

★3.9.9.3. Reporting Location and Time. During duty hours, Monday through Friday (0730-1600), contact student accounting at 283-2824. After duty hours and on weekends and holidays, report to billeting office, bldg 1332. Students reporting to courses Q-JSS-2E231 and R-JSS-2E251 will report no earlier than 2 duty days before class start date and no later than 0745, 1 duty day before class start date to bldg 656, room 3, 325th Training Squadron. Students reporting to course Q-JSS-1C531 will report no earlier than 2 duty days before class start date and no later than 0730, 1 duty day before class start date to bldg 816, room 9. Students reporting to course W-MCE-13B1D will report no later than 14 calendar days before class start date and must contact the Air Battle Manager course supervisor at DSN 523-2891 or (904) 283-2891.

3.9.9.4. Quarters. Government quarters are available for all personnel. Adequate commercial motels are within 4 miles of the training site.

3.9.9.5. Transportation. Government quarters and adequate dining facilities are within walking distance of all training locations. Government transportation is available for students on or off base. Hotels and motels in the area are not within walking distance of the training location, and public transportation is not available. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.9.9.6. Clothing. Male students must have the men's service dress with service cap and flight cap, men's light blue shirt with long or short sleeves (with or without epaulets), and men's BDU uniform. Female students must have the women's service dress with beret or flight cap, women's light blue blouse with long or short sleeves, and women's BDU uniform.

3.9.9.7. Seasonal Uniform Changes. Optional period is 1 January through 31 December.

3.9.10. **Vandenberg AFB CA 93437 Special Instructions**:

3.9.10.1. Student Quarters. Government quarters should be available for pipeline (initial skills training) students (both officer and enlisted). Officers being accompanied by family members will be required to acquire off-base housing through the Housing Office at DSN 276-1840, and should be prepared to pay the costs associated with establishing a residence. Enlisted members are highly encouraged to refrain from attending training accompanied due to the expense of housing in this area. Students attending advanced and instructor courses will be provided government quarters if available; call billeting at DSN 276-1844. The nearest off-base facilities are 10 miles from base and those students should be prepared for the additional transportation costs.

3.9.10.2. Clothing and Equipment Requirements. All uniform combinations are optional year round.

3.9.10.2.1. Students attending courses are required to bring a complete service dress uniform. In addition, students attending initial skills qualification courses must bring the following items:

3.9.10.2.1.1. Men: flight cap - 1; service trousers - 3 pairs; service dress - 1 suit; short-sleeved shirt - 5; long-sleeved shirt - 2; tie - 2; battle dress uniform - 2 sets (and insignia); jump/combat boots - 1 pair; safety-toed boots - 1 pair; low quarter shoes - 1 pair.

3.9.10.2.1.2. Women: service cap - 1; service slacks - 3 pairs; service dress (pants) - 1 suit, service skirt (optional) - 1; short-sleeved blouse - 5; long-sleeved blouse - 2; tab - 2; battle dress uniform - 2 sets (and insignia); jump/combat boots - 1 pair; safety-toed boots - 1 pair; low quarter shoes - 1 pair.

3.9.10.2.2. Students in courses V3OBR13S1H 000, V3OBR13S1K 001, and V3OBR13S1L 001 will be issued one missile crew uniform (MCU) during training. Units receiving students will be required to send wing and squadron patches as well as wing or squadron scarves for wear with the MCU.

★3.9.10.2.3. Students must bring at least one set of battle dress uniforms (BDU). The camouflage pattern garrison or baseball caps are the only authorized headgear. Officers must wear nonsubdued rank on the headgear and subdued rank on the collars.

3.9.10.3. Receiving Mail. Temporary address is: 381 TRSS/DOA, Class #, Student's Name, 1472 Nevada Ave, Vandenberg AFB CA 93437-5314. A PSC box can be obtained by sending the Military Postal Center (MPC) a copy of your orders. The postal clerk will reserve a PSC box number and address for you.

3.9.10.4. Transportation. Limited resources dictates that all nonprior service (NPS) students use Santa Maria Airport as a point of arrival until further notice. In addition, these students must arrive between 0730 and 1600 Monday through Friday. Government transportation will be provided from point of arrival to base.

3.9.10.5. Physical Conditioning (PC). All NPS airmen and officers in their initial skill training will participate in PC. Students must bring appropriate clothing and shoes.

3.9.10.6. Weight Management. Students attending initial skills training, space, or missile initial qualification training (IQT) will be weighed during inprocessing.

3.9.10.7. Dining Facilities. Government mess is available for airmen, but not for officers.

3.9.10.8. Reporting Instructions. See table 3.11.

3.9.10.9. Security Requirements. Security requirements for space, missile operations, and missile maintenance training are as follows:

3.9.10.9.1. Space Training. Students attending course V3OBR13S1 000 and V3OBR13S1 001 will require at least an interim Top Secret clearance before class start date. Students attending course V3OZR13S4 000 will require a Secret clearance before class start date and may require a Top Secret clearance before performing duties. Requirements are determined by duty assignment. Call HQ AFPC/DPAOOS, DSN 487-6947, for a determination.

3.9.10.9.2. Missile Operations Training. Students attending courses V3OBR13S1H 001, V3OBR13S1K 001, and V3OBR13S1L 001 will require an interim Top Secret clearance before the 21st training day and a final Top Secret clearance before performing duties at the unit of assignment. Students attending V3OZR13S4H 004, V3OZR13S4K 000, V3OZR13S4L 000, V3OZR13S4H 003, V3OZR13S4K 003, V3OZR13S4L 003, V3OZR13S3H 001, V3OZR13S3K 001, and V3OZR13S3L 001 will require at least an interim Top Secret clearance before class start date.

3.9.10.9.3. Missile Maintenance Training. Students attending V3ABR2M031A 002 and V3ABR2M031B 000 will require a Top Secret clearance before performing duties. DD Form 398, **Personnel Security Questionnaire**, will be accomplished during inprocessing. Students need to be prepared with the necessary information. Students attending V3AZP2M051 003 must have a Secret clearance before class start date.

3.9.10.10. Per Diem. Payable per JFTR.

Section C—Army School Information and Reporting Instructions

3.10. Army Training Locations:

3.10.1. **General Procedures**:

3.10.1.1. Unless otherwise stated in special instructions, orders directing attendance at US Army service school courses must be forwarded to reach the school concerned NLT 30 days before the class reporting date. In addition to the information required by paragraph 3.6, the orders must include:

3.10.1.1.1. Air Force course number (with Army course number in parentheses).

3.10.1.1.2. Title of course (include Army course title if different from Air Force title) and PDS code.

3.10.1.1.3. Class reporting date.

3.10.1.1.4. Quota source code.

3.10.1.1.5. Student's DOR and mailing address. ***NOTE***: Quota source code of student(s) is indicated in parentheses following the Army course number. This is a three-part alphanumerical code which identifies the agency providing the quota for student(s) attendance at an Army course of instruction. Code (QS49L) is used to identify Air Force military personnel; (QS491) identifies Department of the Air Force civilian employees.

3.10.1.2. Unless otherwise stated in individual allocation or special reporting instructions for the training site, students report between 0800 and 1700, 1 day before class convening date.

3.10.1.3. For seasonal uniform changes, see table 3.12.

3.10.1.4. Specific information, by training activity, is contained in the following paragraphs:

3.10.2. **Aberdeen Proving Ground MD 21005-5001**:

3.10.2.1. School of Military Packaging Technology (SMPT)/AFSC 602XX:

3.10.2.1.1. Orders. Attached to Detachment 1, 361 Training Squadron (AETC), Aberdeen Proving Ground MD 21005-0687, for messing, housing, and UCMJ administration. Send one copy of orders to Det 1, 361 TRS, PO Box 687, APG MD 21005-0687, or FAX to DSN 298-8571, 15 days before class start date.

3.10.2.1.2. Reporting Location and Time. Report NET 0700 and NLT 1600 1 day before class start to Air Force Detachment,

building 4403. After duty hours or on weekends, use rear entrance and report to CQ.

3.10.2.1.3. Quarters. TSgt and below will be housed in no-fee government quarters (dormitory) when available. Contact Det 1, DSN 298-8563/8572, 5 days before arrival for dormitory availability. Normal amenities associated with billeting (such as, maid service, alarm clock, towels, etc.) are not provided. MSgt and above, to include civilians, make reservations NLT 14 days before arrival by contacting billeting office at DSN 298-5148/5149. Cost of billeting is $36.00 per day. No family quarters are available.

3.10.2.1.4. Transportation. On-post to and from class government transportation provided by SMPT. Commercial taxi available. Request for special authorization or vicinity mileage must be approved by 2 AF/DOPS before start of travel according to AFI 37-128 and the JFTR.

3.10.2.1.5. Clothing. Military clothing (including complete service dress uniform) appropriate to the type of instruction (civilian equivalent) will be worn. Work clothing (coverall or fatigues) will be worn only as designated on the schedule. Clothing for mandatory physical training program required.

3.10.2.1.6. Other. Send DD Form 1556 in five copies to SMPT at least 30 days before class start date. Include the command of assignment. Cancellation of individual students will be sent to 2 AF/DOP, by name, if made after the 30-day suspense. Alternates or changes in selectees will be sent by DD Form 1556 directly to SMPT, providing name of the individual for whom the substitution is made. Detailed instructions are provided by SMPT to each person for whom a nomination is received.

3.10.2.1.7. Waivers. Send requests for waivers to 2 AF/DOP before submission of enrollment form to SMPT.

★3.10.2.2. Aberdeen Proving Ground MD 21005-5001, US Army Ordnance Center and School (USAOC&S)/AFSC 2T4X2 and 2A7X1:

3.10.2.2.1. Orders. Attached to Detachment 1, 361 Training Squadron, Aberdeen Proving Ground MD 21005, for messing, housing, and UCMJ administration. Send one copy of orders to Det 1, 366 TRS, PO Box 687, APG MD 21005-0687, or FAX to DSN 298-8571, 15 days before class start date.

★Table 3.11. 381st Training Group Reporting Instructions.

LINE	A Type of Personnel	B Type of Training	C Report to	D Reporting Times
1	All officers	13SXX, basic courses (note 1)	bldg 8231, room 155, duty hours; bldg 13002, nonduty hours	Must be at bldg 8231 at 0800, 3 workdays before class start date for inprocessing.
2	(notes 2, 3, and 4)	13SXX, lateral, advanced and instructor courses (note 5)	*see note in column D	Must be at bldg 8231 at 0800, 1 workday before class start date for inprocessing.
3	Enlisted prior service (note 4)	1C6X1, 2M0XX, basic courses (note 1)		*2MOXX, 22S1A, and 62E3E advanced courses (see note 5) see course listing for instructions
4		1C6X1, 2M0XX, advanced courses (note 5)		
5	Enlisted nonprior service (note 4)	1C6X1, 2M0XX, basic courses (notes 1 and 6)	Students are picked up at point of arrival during duty hours	

NOTES: 1. Personnel programmed for AFSPC crew duty will proceed directly to either the 533 TRS or the 534 TRS upon completion of Space Systems Operations Specialist 3 Level, Undergraduate Space and Missile Training (USMT) or the Missile to Space Bridge Course. However, ordinary leave en route may be approved with the concurrence of the gaining squadron commander. This leave will not normally exceed a maximum of 15 days or the RNLTD established by AFPC.
2. Rated personnel selected for missile crew duty must be advised on initial notification of assignment selection that flying time is not available while in training.
3. Early reporting is authorized, but member will report NLT 5 days before class start date. If you plan to report earlier than 5 days before class start date, call the unit of assignment and inform them of your reporting date.
4. All orders should have students reporting to the 381 TRSS.
5. The following is a list of the advanced and instructor courses (see column D above for 2MOXX, 22S1A, and 62E3E courses):

V3AZR2M051A 004	Maintenance of Electronic Equipment Test Station
V3AZR2M071 003	Space Lift Maintenance
V3AZR2M071A 001	Technical Engineering WS-133A-M
V3AZR2M071A 002	Technical Engineering WS-133B
V3AZR2M051 000	Verification and Checkout Equipment
V3OZR62E3E 006	Technical Engineering WS 133AM/CDB
V3OZR62E3E 002	Technical Engineering WS 133B
V3OLR22S1A 000	Missile Maintenance Officer
V3OZR13S4H, K, or L 004	ICBM Staff Officer Course
V3OZR13S4H, K, or L 003	ICBM Staff Officer Requalification Course
V3OZR13S3H 001	Missile Officer Transition Training Course
V3OZR13S3K or L 000	Missile Officer Transition Training Course
V3OIR13S3 002	Space and Missile Academic Instructor Course
V3OZR13S4 000	Undergraduate Space and Missile Training - Staff Course

6. Students must arrive at the point of arrival between 0700 and 1600 local time.

Table 3.12. Seasonal Uniform Changes, Department of the Army

Courses.		
Location	Summer	Winter

Fort Ritchie MD	1st Mon in May	2d Mon in Oct
Rock Island Arsenal IL	1st Mon in May	3d Mon in Oct
Savanna Army Depot Savanna IL	1st Mon in May	3d Mon in Oct

3.10.2.2.2. Reporting Location and Time. Report to Air Force Detachment, bldg 4403, NET 0700 and NLT 1600 1 day before class start. After duty hours or on weekends, use rear entrance and report to CQ.

★3.10.2.2.3. Quarters. E-6 and below will be housed in no-fee government quarters (dormitory) when available. Contact Detachment 1, 361 TRS, DSN 298-8568/8572, approximately 10 days before arrival for dormitory availability. Normal amenities associated with billeting (that is, maid service, alarm clock, etc.), are not provided. E-7 and above, to include civilians, make reservations NLT 14 days prior to arrival by contacting Aberdeen Proving Ground base billeting office at DSN 298-5148/5149. Cost of billeting is $31.00 per day. There are no family quarters available.

★3.10.2.2.4. Transportation. Government quarters are within 1 miles of training; motels are within 5 miles of training. On-post dining is within 1 mile of training or quarters. Government transportation between quarters and training is not normally available. Transportation is not provided to and from the airport for TDY personnel. Request for special authorization or vicinity mileage must be approved by 2 AF/DOPS before start of travel according to AFI 37-128 and the JFTR.

★3.10.2.2.5. Clothing. All military students must bring battle dress uniforms (BDU). Those attending the basic course(s) must also bring service uniform. Earplugs, safety glasses, and steel-toed boots are mandatory for all courses. Personnel wearing glasses must have appropriate safety glasses.

3.10.2.2.6. Waivers. Send requests for waivers to HQ AETC/TTP.

3.10.2.2.7. Other. National Guard and Reserve must meet all military requirements including current DD Form 2AF (green), Armed Forces Identification Card, before arrival.

3.10.3. **Charlottesville VA 22903-1781 (University of Virginia), Judge Advocate General's (JAG) School, US Army**:

3.10.3.1. Orders. Send one copy to Commandant, Judge Advocate General's School, ATTN: JAGS-ADN. Charlottesville VA 22903-1781, NLT 30 days before class start date.

3.10.3.2. Reporting Location and Time. Report to the receptionist or duty officer in the lobby of the JAG School the day before the class start date. The school is located at the north end of Arlington Blvd in Charlottesville. Students are mailed an administrative packet containing information about the course approximately 3 weeks before the course begins. The packet contains details of reporting, quarters, transportation, etc.

3.10.3.3. Quarters. Limited government quarters are available to TDY personnel at the training location. Fee is $8 per day. Adequate commercial motels are within 2 miles of the training site.

3.10.3.4. Transportation. Government quarters and an eating facility are in the same building as the training location. Other eating facilities are within walking distance of the training facility. Hotels and motels are not within walking distance of the training facility, but several motels provide daily shuttle transportation to and from the training location. There is adequate taxi and limousine service to and from the Charlottesville Airport.

★3.10.3.5. Rental cars for Charlottesville VA are authorized when it is more advantageous to the government. All requests for rental car authorizations at Charlottesville will be reviewed and approved by the installation SJA or equivalent. Individuals going to Charlottesville VA on AETC-funded quotas need not contact 2 AF/DOPS for rental car authorizations. Local SATO offices are to calculate travel costs for flying direct versus flying to Washington DC, renting a car, and driving to Charlottesville. The SJA will determine which is more advantageous to the government and get orders to reflect that method of travel. The cost-benefit analysis must be maintained on file for periodic auditing. The preferred airport in the Washington DC area is Washington National, as fares are generally less expensive to Washington National than to Dulles International. Use the same fund cite for rental cars that is used for transportaiton and per diem costs. Add the following statement to orders for students attending courses at Charlottesville VA using rental cars.

> [Member name] is authorized a GSA or low-cost rental car in lieu of air travel from [airport name] to Charlottesville VA for course [course number] from [class start date] to [class graduation date]. Member must provide transportation for other AETC-funded Air Force personnel in the class. Availability of transportation must be announced to the class on the first day of training. Use is limited to official business per the JFTR.

Any special authorizations other than rental cars for this area will be processed through HQ 2AF/DOPS as directed in paragraph 3.6.9.

3.10.3.6. Clothing. Military students wear the uniform of choice. All instruction is conducted indoors.

3.10.4. **Ft Benning GA 31905, Army Infantry Center and School**:

3.10.4.1. All Training:

3.10.4.1.1. Quarters. Government quarters are available for all students within walking distance of training locations. Personnel are discouraged from bringing dependents. Government quarters for dependents of TDY personnel are not authorized. Off-post quarters are limited and are at least 4 miles from post.

3.10.4.1.2. Transportation. Commercial taxi and bus service is available on and off post. Government shuttle bus is available on post. Military taxi service is very limited and only for official on-post trips. Requests for special authorization or vicinity

mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.4.1.3. Dining Facilities. Government dining facilities are available within walking distance of quarters and training locations.

3.10.4.1.4. Per Diem Restrictions. Payable per JFTR at home base.

3.10.4.2. Airborne Parachutist Course:

3.10.4.2.1. Orders. When reporting, students must have 10 copies of their orders and a current airborne physical exam SF 88 (within 12 months of graduation date) specifically stating qualification for airborne training.

3.10.4.2.2. Reporting Location and Time. Report to the Air Force Representative's office (DSN 835-1393), Infantry Hall (bldg 4), room 546, for inprocessing between 0800 and 1000 on Friday before class start date. Early reporting of 1 day is authorized.

3.10.4.2.3. Clothing. Students must have sufficient fatigue clothing and combat boots as specified in the course announcement.

3.10.4.3. Ranger Courses:

3.10.4.3.1. Orders. Send two copies to Air Force Representative, USAIS, Ft Benning GA 31905, at least 4 weeks before class entry date so a ranger training brochure can be forwarded to each student. Students must bring a minimum of 10 copies of their orders, pay records, health and dental records, and commander's certificate of physical testing. (See your servicing MPF classification and training section for the course announcement with the prerequisites, instructions, and clothing requirements.)

3.10.4.3.2. Reporting Location and Time. Report NLT 1200 1 day before class start date to 3d Ranger Co, bldg 4807 (in the Harmony Church area), Ft Benning GA. If arriving by air, specify this area to the taxi driver since it is 12 miles from the Main Post area.

3.10.4.3.3. Clothing. Students must have clothing and equipment as specified in the course announcement.

3.10.5. **Ft Bliss TX 79916, US Army Defense Artillery School, USAF Stinger Weapons Training**: (***NOTE***: Will be deleted from next issue of AFCAT. Call your training coordinator for information.)

3.10.5.1. Orders. Students must have 10 copies when reporting, and security clearance data must be reflected on all copies.

3.10.5.2. Reporting Location and Time. Report to bldg 251 (Billeting) NLT 2400 Saturday prior to class start on Monday. Report at 1200 to bldg 2950 (Moving Target Simulator No 1) on Sunday before class start on Monday.

3.10.5.3. Quarters. Students are currently billeted in the TLQ facilities. It is recommended that advance reservations be made by contacting Ft Bliss Billeting at DSN 978-4888. Ask to be housed in bldg 358, if available, because this dorm is the closest to the training area.

3.10.5.4. Transportation. Commercial taxi is available on and off post. Government shuttle and military taxi service is very limited and only for official on-post trips. When feasible, students who are TDY and return should be authorized to travel by POV. POVs used for official duties will be annotated on an individual basis to justify reimbursement by the government.

3.10.5.5. Clothing. BDUs are required for all classes. One service dress uniform for social functions is suggested, but not mandatory.

3.10.5.6. POC. POC at Ft Bliss is 3280 TCHTG/OL-B, DSN 978-6714.

3.10.5.7. Attention MPFs. Due to the unusually high cost for billeting ($18 per day), students should be encouraged to take advances when necessary to defray this cost and avoid monetary problems during the course.

3.10.6. **Ft Bliss TX 79916, USAF TACS/ADA Orientation Course (3 days)**:

3.10.6.1. Reporting Location and Time. Report to the senior Air Force representative's office, bldg 2, between 0730 and 1630 1 day prior to class start date. Documentation of Secret access is required.

3.10.6.2. Orders. Students must hand-carry orders and AF Form 2583, Request for Personnel Security Action, reflecting clearance for access to NATO Secret. No orders required prior to student's arrival.

3.10.6.3. Quarters. Government quarters are reserved for this course. Billeting office is located in bldg 504A with assigned billets about 1/2 mile away. If government quarters are assigned, mess is available for TDY officers in bldg 505.

3.10.6.4. Transportation. Commercial taxi must be used between El Paso International Airport and Ft Bliss. On-post bus transportation will be provided beginning at 0715 on the class start date. Officers desiring to use the military dining hall should advise the bus driver for drop-off and pickup.

3.10.6.5. Clothing. Utility uniforms (fatigue, BDU, or flightsuit) are appropriate for all classes and are strongly recommended for day 2's systems orientation.

3.10.6.6. Other. Class is scheduled until 1630 hours on class graduation date. Travel plans should be made accordingly. OPR for this course will mail out instructions providing greater detail NLT 14 days prior to class start date.

3.10.7. **Ft Bragg NC 28307**:

3.10.7.1. John F. Kennedy Special Warfare Center:

3.10.7.1.1. Orders. Send two copies to Registrar, ATTN: AOJK-GP-D-AR, NLT 3 weeks before class start date. Student orders should show variations authorized in itinerary to permit TDY for certain types of training.

3.10.7.1.2. Reporting Location and Time. All students reporting to courses conducted by 2d Bn, 1st SWTG(A), USAJFKSWCS (such as, Military Free Fall Parachutist and Jumpmaster courses), should report to the Charge of Quarters (CQ) desk, located on the 2d floor, east end of the New Academic Facility (NAF). The NAF building number is D-3915. All students must report prior to 2400 on the report date stated on the ATRRS class schedule.

3.10.7.1.3. Quarters. Government quarters are available for male officers and airmen. On-post facilities are available for female students. Off-post facilities are limited. No family quarters are available for TDY personnel. Government messing is available.

3.10.7.1.4. Transportation. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.7.1.5. Clothing. Normal seasonal requirement plus uniform items suitable for the course to be attended.

3.10.7.1.6. Weight Standards. All personnel attending schools must meet Air Force weight standards or they may not be admitted to any SWC schools.

3.10.7.2. Scuba Diving:

3.10.7.2.1. Orders. Send two copies to registrar, ATTN: AOJK-DT-TMB-S, 2 weeks before class start date. Students should have at least 24 copies of orders when reporting to school.

3.10.7.2.2. Reporting Location and Time. All Air Force personnel will report to US Army Combat Diver facility, Trumbo Annex, Key West NAS, FL, NLT 1700 1 day prior to class start date.

3.10.7.2.3. Quarters. Government quarters are available for officers and airmen. Off-post facilities are limited. No family quarters are available for TDY personnel. Government messing is available.

3.10.7.2.4. Transportation. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.7.2.5. Clothing. Due to aircraft space and weight limitations, students are allowed to bring only one small handbag and one duffelbag. Students should have the following when reporting:

3.10.7.2.5.1. Unmarked OD baseball or patrolling cap. Patches, insignia, and patrolling tapes are not permitted.

3.10.7.2.5.2. Fatigue shirts (two) must be long sleeve and serviceable, with only military service insignia and name tape.

3.10.7.2.5.3. PT shorts (two) will have standard OD name tapes sewn on right front leg, 1 inch above bottom edge, and centered.

3.10.7.2.5.4. One seasonal fatigue uniform, one pair combat black boots, and steel helmet with liner.

3.10.7.2.5.5. Olive drab T-shirts (four).

3.10.7.2.6. Other. Students must submit their completed medical exams conforming to requirements of AR 40-501 (Ch 2, F, and Appendix 9) to CDR, USAJFKSWCS, ATTN: AOJK-SU, Ft Bragg NC 28307-5000, NLT 30 days prior to class report date. After review, medical exams will be forwarded to the SWCS training facility at Key West. Physical exams that are not according to regulations and course prerequisites or require further substantiation will be returned to the student's unit. Students reporting to Key West without having their physicals approved by the SWCS surgeon will not be trained. Current health records must be in student's possession when he or she reports to school. Records must contain report of physical examination to include an EKG not more than 1 year old. Students must also have a white blood cell (WBL) lab test. Students must have a physical for diving training and duty according to AR 611-75 within 1 year of course completion date and meet criteria in AR 40-501. Due to hazards inherent in the training and the medical considerations required for training in a hostile environment, exceptions cannot be favorably considered.

3.10.7.2.7. Per Diem Restrictions. Payable per JFTR.

3.10.7.3. Military Free-Fall Parachutist (MFF):

3.10.7.3.1. Orders. Send two copies of orders to AOJK-DT-TMB-S, NLT 3 weeks prior to arrival. Orders must show variations in itinerary to permit TDY to additional training locations. To ensure that no student is turned away, all student orders must authorize TDY to Wright-Patterson AFB OH and return to Ft Bragg NC. This statement must be on orders. Students in the Military Free Fall Parachutist Course can expect 6 days TDY to Wright-Patterson AFB OH to participate in vertical wind tunnel training. All students are billeted off-base at their expense during this phase of training. Commanders must ensure that student orders account for this added expense.

3.10.7.3.2. Medical Prerequisites:

3.10.7.3.2.1. All students will bring medical records with them to the school.

3.10.7.3.2.2. Students must have a full Class II physical accomplished. The physical must not be over 1 year old. SF Form 88 must be completely filled out and in the medical records. Special Warfare Center surgeons require an SF Form 93, Report of Medical History, to be accomplished that reflects current information. In addition, students must bring a recent chest X-ray and EKG when in-processing, and they must ensure the following laboratory exams are accomplished: HCT (Hematocit), RPR, and Urinalysis.

3.10.7.3.2.3. Commanders and MPFs must ensure medical prerequisites are met before allowing Air Force members to depart for training. If medical prerequisites are not met, students will be returned without training at the home unit's expense.

3.10.7.3.3. Reporting Procedures. Military Free Fall Parachuting Course students must report to B Company classroom, building HT-3205, and Military Free Fall Jumpmaster Course students to the B company classroom, building HT-3213, NLT 0645 on the class start date for in-processing. Report dates are the day prior to course start dates. TDY officers or enlisted personnel in the grade of E-9 or above arriving prior to class start date will report to Moon Hall Billeting Officer for room assignment or to obtain a statement of nonavailability. Reservations can be made by calling BOQ/BEQ Reservations at commercial (919) 396-7700 or DSN 236-7700 during duty hours or commercial (919) 396-5575 or DSN 236-5575 after duty hours. TDY enlisted personnel will sign in at the 2d Battalion barracks, building D-2617 and be assigned to a room. Personnel arriving during duty hours (0800-1700) will report to the B Company operations office, building H-3009, Buker St, for instructions. Personnel arriving after duty hours or on weekends will report to the CQ located in the barracks, building D-2617. A student information board containing in-processing information is also located in Moon Hall across from the front desk. Students should call B Company (commercial (919) 396-7601 or DSN 236-7601) prior to their arrival to confirm their in-processing instructions and receive any special instructions.

3.10.7.4. Air Force Point of Contact for the Special Warfare Center: AOJK-L. Office is located in bldg D-3004, Room 129; phone number is 432-3713 (prefix is 239). Call or visit anytime or if you encounter any difficulties during your stay.

3.10.8. **US Army Training Center, Ft Dix NJ 08640-5235, Air Force Ground Combat Skills Courses (see table 3.7 and call your training coordinator for reporting details)**:

3.10.8.1. Orders. All students must have at least five copies when reporting.

3.10.8.2. Reporting Location and Time. Students will report NET 0730 and NLT 1630 the day before class start date. Students attending course L5OBA8121 000 report to bldg 5994 during

normal duty hours and bldg 5513 during other than normal duty hours. All other students report to bldg 5513.

3.10.8.3. Quarters. Government quarters are available for all students. Government quarters for TDY personnel are authorized. Students attending all other courses will be housed on-post. Students are not authorized to bring their dependents. Students attending course L5OBA8121 000 will be billeted at $30 a day. Students attending all other courses are billeted free of charge.

3.10.8.4. Transportation. Commercial limousine service is available to and from Newark and Philadelphia International Airports. Commercial local and long distance bus service is available at the Ft Dix bus terminal. Government transportation is available for official business only.

3.10.8.5. Dining Facilities. Government dining facilities are available for all students. Dining facilities are open every day to include holidays.

3.10.8.6. Clothing. Students must have at least three sets battle dress uniforms (BDU) to include the BDU cap, two pairs of combat or tropical combat boots (tropical combat boots are NOT authorized from September through May), beret, PT clothing, and three T-shirts. For TDY-to-School students: A field jacket with liner, military black gloves, and cold weather underwear are required from September to May. Students must provide their own toilet articles, such as toothpaste, soap, towels, etc. TDY students must bring ear plugs and corrective lens for the M17 gas mask or personal gas mask.

3.10.8.7. Per Diem Restrictions. Payable per JFTR.

3.10.8.8. Physical Standards. Students must be prepared to perform rigorous physical conditioning to achieve field training objectives. Physical training program is based on Army FM 21-20.

3.10.8.9. Other. Students attending Courses L5AZA3P071 006 and L5OBA31P1 000 will be required to purchase meals ready-to-eat (MRE) at an approximate total cost of $60. Students must hand-carry medical records.

3.10.9. **Ft Eustis VA 23604, US Army Transportation and Aviation Logistics Schools**:

3.10.9.1. Orders. Send two copies of orders to: Senior Air Force Advisor (USATCFE/ATZF-LN), Ft Eustis VA 23604-5386, and two copies to School Support Office, ATTN: Student Affairs, US Army Transportation Center, Ft Eustis VA 23604-5447, 2 weeks before class start date.

3.10.9.2. Reporting Location and Time. Report to Air Force Advisor's office, bldg 705, room 57, telephone DSN 927-6820, at earliest opportunity on class start date.

3.10.9.3. Quarters. Contact Billeting Office (Transportation Inn), DSN 927-5807, comm (804)878-5807, to determine billeting availability on base. E-1 through E-4 quarters on base are Army troop barracks. E-5 and E-6 are quartered two per room. BEQ rooms may be available for E-7 and above. Check billeting charges when making reservations. Students initially billeted off post may be required to move on post during training.

3.10.9.4. Transportation. Government transportation is not available except as indicated below. Commercial taxi service is available on post. Motels are not within walking distance of the training location. Adequate dining facilities are within walking distance of the training location for students staying in the BEQ and BOQ areas. Ft Eustis is served by Greyhound from a bus station located near the main gate. Also, Patrick Henry Airport is located 6 miles south of the post. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.9.5. Clothing. All service uniform combinations are authorized for year-round wear, but personnel must use good judgment based on weather conditions and duties. Coat and tie or uniform combination 1 is required on occasion at the Officers Open Mess and some social functions.

3.10.10. **Ft Gordon GA 30905-5668, US Army Signal School**:

3.10.10.1. Orders. Send five copies (with appropriate security clearance) to Commander, Detachment 1, 338 Technical Training Squadron, Ft Gordon, GA 30905-5668, NLT 30 days before class date.

3.10.10.2. Reporting Location and Time. All students report to Detachment 1, 338 Technical Training Squadron, bldg 25429. Students will report during duty hours (0730-1630) Monday through Friday, 2 duty days before class start date unless otherwise indicated in class quota. CQ is on duty weekends and holidays from 0800 to 1700. Students arriving at other than the above times should report to Griffith Hall, bldg 250, for temporary billeting arrangements; then report in uniform to bldg 25429 at 0800 the next duty day. Exception: Students who bring their families should arrive at least 3 days before class start date to allow enough time to obtain adequate housing. See course announcements for individualized instructions.

3.10.10.3. Quarters. The detachment dormitory is not a transient enlisted quarters (TEQ) facility. The dormitory adequately houses AB through TSgt; but MSgt through CMSgt, officers, and civilians must make reservations with post billeting prior to arrival (DSN 780-2277) or check with billeting upon arrival (bldg 250) for quarters assignment or issue of nonavailability. Off-post family housing is available year round at reasonable rates except in April during the Masters Golf Tournament. The closest motel is about 4 miles from the post.

3.10.10.4. Transportation. On-post quarters for MSgt through CMSgt, officer, and civilian students are not within a reasonable walking distance of the training areas. Rental car is recommended prior to arrival. On-post commercial taxis are available at reasonable rates, but they are not always timely or reliable. Students housed in the Air Force dormitory are within walking distance (1.5 miles) to courses. Taxi service is available from the commercial airport in Augusta to Ft Gordon. Cost is approximately $15. Recommend those who can bring a POV do so. The post is located approximately 8 miles from town facilities.

3.10.10.5. Clothing. The following items are mandatory: Male—must bring at least two sets of long-sleeved camouflaged (BDU), one service dress uniform with flight cap, and one short-sleeved blue shirt and trousers and low quarters. Female—must bring at least two sets of long-sleeved camouflaged (BDU), one service dress uniform with flight cap and oxford-type shoes; and one short-sleeved blue overblouse and slacks with flight cap. Classroom—On Mondays, Tuesdays, Thursdays, and Fridays, the BDU is mandatory class dress for all students. The short-sleeved blue shirt/overblouse and trousers/slacks must be worn on the first Wednesday of each month. On all other Wednesdays, students are encouraged to wear a blue combination uniform. Students are not authorized to wear colored ball caps.

3.10.10.6. Attention MPFs. This is a GSU. Finance problems should be solved before personnel leave their base. Personnel must obtain advanced per diem, pay, etc., at their home base before arriving at Ft Gordon. Historically, individuals with "DIRECT DEPOSIT" have experienced few pay-related problems.

3.10.10.7. Other. Students are attached to Detachment 1, 338 Technical Training Squadron, while in TDY or PCS status. Contact Detachment 1, 338 Technical Training Squadron commander or military training manager at DSN 780-2936/3473 on any question concerning reporting instructions.

3.10.11. **Ft Huachuca AZ 85613:**

3.10.11.1. DoD Strategic Debriefing Course:

3.10.11.1.1. Orders. Send two copies to HQ AFSAC OL-FH, Ft Huachuca AZ 85613-6000.

3.10.11.1.2. Reporting Location and Time. All students report no later than 1 day before class start date. During duty hours, report to bldg 62715. During nonduty hours, report to billeting office, bldg 43083, and on the next duty day report to bldg 62715 at 0700. All Air Force students will be inprocessed by and administratively assigned to HQ AFSAC OL-FH.

3.10.11.1.3. Quarters. All students must report to the billeting office, bldg 43083, and advise clerk they are attending the strategic debriefing course. Reservations at billeting are made for students by HQ AFSAC OL-FH so on-post quarters are usually available. However, if no quarters are available at billeting when students arrive, a statement of nonavailabilitiy will be issued and HQ AFSAC OL-FH will help students find off-post accommodations.

★3.10.11.1.4. Transportation. Upon arrival at Tucson International Airport, Air Force students should report to the Servicemen's Lounge on the third level for shuttle bus transportation to Sierra Vista. Request for special authorizations such as rental cars or vicinity mileage must be approved by HQ 2AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.11.1.5. Clothing. For military personnel, the Combination 1 uniform is required for inprocessing and graduation. Other than those 2 days, the normal seasonal uniform or civilian clothing is optional. Civilian attire must, however, consist of sport coat and tie or comparable. For civilian students, a business suit is required for inprocessing and graduation. Other than those 2 days, sport coat and tie or comparable is required.

3.10.11.1.6. Per Diem Restriction. Payable according to JFTR. Messing facilities are available on-post for officer and enlisted personnel.

3.10.11.1.7. Assistance. The chief of HQ AFSAC OL-FH, DSN 879-0839, and the operations and training officer, DSN 879-0840, are available to assist Air Force students.

3.10.11.2. United States Army Intelligence Center (USAIC):

3.10.11.2. Orders. Students TDY or PCS with TDY en route:

★3.10.11.2.1. Send three copies to 314 TRS/CCQ, Ft Huachuca AZ 85613, 30 days before class start date.

★3.10.11.2.2. Orders should read: "Students TDY or PCS with TDY enroute are attached to the 314th Training Squadron for command, messing, billeting, and UCMJ administration." Include statement for students accompanied by family member, "Must have sufficient funds to defray all personal expenses." In remarks section, include reporting instructions and clothing requirements.

3.10.11.3. For MPFs. This is a GSU. Finance problems should be solved before personnel leave your base. Personnel should obtain advance per diem and pay before departing their home base.

3.10.11.4. Reporting Instructions. PCS students for 1N2X1 training report to 314 TRS, bldg 81405, NET 5 duty days and NLT 3 duty days before class start date. See table 3.13.

3.10.11.5. Quarters. On-post student quarters are available, but extremely limited. Pipeline students reside in the Air Force dormitory. TDY students: Enlisted personnel have quarters assigned by Post Billeting; officers and civilians stay in the VOQ. No government family housing is available to students. On-post guest housing is available but limited and expensive. Off-post housing is scarce and expensive. Nearest adequate motel is approximately 5 miles from the post. Bringing of family members while attending school is strongly discouraged. Due to a lack of billeting at Ft Huachuca, individuals may be quartered off post. Rental cars may be authorized only when billeting issues a nonavailability statement.

★Table 3.13. Fort Huachuca Reporting Instructions.

LINE	A Type of Personnel	B Type of Training	C Assignment	D Report to	E Reporting Times
1	All pipeline airmen (see note)	1N2X1	314 TRS	Bldg 81405	Open 24 hours for student reception.
2	Airmen in TDY status (TDY and return or TDY enroute), officers, and civilians	All follow-on, refresher, and supplemental training			PCS students NLT 3 days before class start date. TDY students between 0800-1600, 3 days before class start date, ext 6381. During nonduty hours and weekends, report to bldg 81405, CQ, ext 6679. (520) 533-6679 or DSN 821-6679.

NOTE: Airmen through senior airmen trainees who have eliminated from another technical training course (including other MAJCOMs) will continue to be treated as pipeline trainees and will be assigned IAW line 1.

3.10.11.6. Transportation.

3.10.11.6.1. Off post:

3.10.11.6.1.1. Flight Information. Commercial air to Tucson's International Airport is available. Commercial air service to Sierra Vista (nearest town to Ft Huachuca) is available if flying into Phoenix's Sky Harbor International Airport.

3.10.11.6.1.2. Government transportation to Ft Huachuca is not available.

3.10.11.6.1.3. Limousine service is available from Tucson International Airport to Ft Huachuca at a cost to the student. Students should have approximately $100 available for commercial transportation. Students should go to the Military Lounge on the third floor of the airport to contact the limousine service for its schedule.

3.10.11.6.1.4. Taxi: A commercial taxi is extremely expensive.

3.10.11.6.1.5. Privately Owned Vehicle. Ft Huachuca is located approximately 70 miles southeast of Tucson on Highway 90 (exit 302 off I-10). Exit off Highway 90 at Van Deman Gate (East Gate) of Ft Huachuca. Proceed to bldg 80305, Air Force dormitory, which is located at the corner of Hatfield and Irwin.

3.10.11.6.1.6. Request for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and JFTR.

3.10.11.6.2. On post:

3.10.11.6.2.1. The Air Force dormitory is within walking distance of all support facilities. Students are required to march to and from school. Schools are located approximately 1/4 mile from the dormitory.

3.10.11.6.2.2. No government transportation is available to and from local off-post facilities; however, commercial taxi is available on post.

3.10.11.7. Clothing and Equipment. The following items are mandatory for Air Force personnel attending courses: male - three sets of BDUs and cap, service dress uniform, short or long sleeve blue shirt, low quarters, boots (combat), flight and service caps; female - three sets of BDUs and cap, service dress uniform (skirt and pants), short or long sleeve blouse with pants or skirt, oxfords, pumps, boots (combat), and flight cap. Civilian students are expected to comply with reasonable dress and grooming standards according to AFI 36-703 (formerly AFR 40-735).

3.10.11.8. Security Clearance. Students attending courses requiring a security clearance must be issued access badges at this facility. Serving SSO must send a message stating student has the required security clearance for SCI access to SSO Huachuca, NLT 10 days before class start date.

3.10.11.9. Unit Telephone Contact. During duty hours - DSN 821-6802 or commercial 602-533-6801. CQ 24 hours - DSN 821-6846 or commercial 602-533-6846.

3.10.12. **Ft Lee VA 23801**:

3.10.12.1. Army Logistics Management Center:

3.10.12.1.1. Orders. Students must hand-carry at least three legible copies of their orders. No orders are required before the student's arrival. Billeting may require additional orders.

3.10.12.1.2. Reporting Location and Time. Report to US Army Logistics Management Center (ALMC) Headquarters, bldg P-12500, before 0800 on the first day of class. Students should not report to ALMC on weekends or holidays. Military will report in uniform.

3.10.12.1.3. Quarters. All DoD military and civilian student personnel must report to the billeting office, bldg P-8025, Ft Lee. If quarters are available, they will be assigned at that time. If quarters are not available, a statement of nonavailability of quarters and mess will be issued. Students who receive nonavailability statements are responsible for finding their own nongovernment quarters. Major motels are located within 3 miles of ALMC, and most of them provide free transportation to ALMC. Advance reservations may be made by calling the billeting office, DSN 687-4023/1877 or commercial (804) 734-4023/1877. The billeting office will accept reservations no earlier than 30 days before the class opening.

3.10.12.1.4. Transportation. Most government quarters are within one mile of the school. Government transportation is available between quarters and the school. No government transportation is available on weekends or holidays. The Ft Lee NCO Club is within walking distance of the BOQ. Many motels provide free daily transportation for ALMC students, and most have dining facilities at or near their location. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.12.1.5. Clothing. Military will wear class B uniform (equivalent for other services). The BDU is not authorized for class activities.

3.10.12.1.6. Other. Send DD Form 1556, copies one through five, to Commandant, US Army Logistics Management Center, ATTN: AMXMCA-R, Ft Lee VA 23801-6041, NLT 45 days before class start date. Late receipt of these forms may prevent personnel from being accepted for courses.

3.10.12.2. US Army Quartermaster School:

3.10.12.2.1. Orders. Send three copies at least 30 days before the student is scheduled to arrive. Send officers' orders to Commander, Co E, 1 Bn, QM Bde, ATTN: ATSM-TPA-E, Ft Lee, VA 23801-5323. Send enlisted personnel orders to Commander, USAQMCEN&FL, ATTN: ATZMAGP-V, Ft Lee, VA 23801-5152. Send civilian's orders to Commander, USA QMS, ATTN: ATSM-OSR, Ft Lee, VA 23801-5035.

3.10.12.2.2. Reporting Location and Time. Officers sign in at Company E, room 133, Mifflin Hall, bldg P-5000, located on 22d Street between A and B Avenues, during duty hours. During nonduty hours, weekends, and holidays, officers sign in on the student officer register located at the desk in the entrance foyer on the second floor of Mifflin Hall. Enlisted personnel report to Central Processing Center, bldg P-1109, corner of A Avenue and 1st Street, which is operational 24 hours a day, 7 days a week. Civilian students will be processed in by the Academic Records Division, Office of the School Secretary, room 106, Mifflin Hall, bldg P-5000, during the first hour of the first day of class.

3.10.12.2.3. Quarters. TDY officers, enlisted personnel in grades equivalent to MSgt through CMSgt, and civilian government employees will be housed in available visiting officers quarters under the control of the billeting office or be issued certificates of nonavailability. The Ft Lee billeting office is located in Horkan Hall, bldg P-8025, Mahone and Corps Road, and is operational 24 hours a day, 7 days a week. TDY and PCS personnel are encouraged to use the reservation system by calling the billeting office, DSN 687-4023/1877 or commercial (804) 734-4023/1877,

between 0800 and 1700, Monday through Friday. Because confirmation of reservations is given no earlier than 7 days before the expected arrival date at Ft Lee, personnel should call again within the 7-day time frame. If quarters are not available, certificates of nonavailability will be issued. Enlisted personnel in grades Airman through TSgt will be housed by the Quartermaster Brigade. Personnel in this category who cannot be housed by the Brigade will be referred to the billeting office, bldg P-8025, with a completed QMFL Form 191, Advanced Reservation/Personnel Data.

3.10.12.2.4. Transportation. Shuttle bus service is provided by the motor pool every 45 minutes from 0615 until 1700, Monday through Friday. The bus route covers major office areas on post. On-post taxi service is 80 cents (subject to change) each person, one way. No government transportation is available on weekends or holidays. Mess is not available to TDY officers and civilians, but it is usually available to TDY enlisted personnel billeting on post. Cafeterias and the Officers Club are within walking distance of the BOQ. The NCO Club is within walking distance of most BEQs. Many of the motels provide free daily transportation to Ft Lee for students. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.12.2.5. Clothing. Fatigue uniform is the normal prescribed duty uniform for all enlisted courses. Seasonal Class A/B uniform is normally required for officer and officer/enlisted courses although fatigue uniform is required for selected blocks of instruction. Food service personnel will also need “cooks' whites.”

3.10.12.2.6. Per Diem Restriction. Payable according to JFTR.

3.10.13. **Ft Leonard Wood MO 65473, US Army Training Center Engineer**:

3.10.13.1. Orders. Send five copies to Detachment 1, 3770 TCHTG (AETC) Air Force Liaison Office, Ft Leonard Wood MO 65473, to arrive NLT 14 days before class start date.

3.10.13.2. Reporting Location and Time. Report to bldg 1734, Air Force Liaison Office, for inprocessing between 0730 and 1630. All students attending course J5ABA55131 report NET 0800 and NLT 2000 the Sunday before the Monday class date. After duty hours, report to staff duty NCO, bldg 1734. Military personnel will report in proper uniform. All active duty, USAFR, or ANG personnel entering this course must have already attended Course 1 of Driver's Education before arriving at this installation.

3.10.13.3. Quarters. Government quarters are available for personnel in TDY and PCS status in the grades of AB through TSgt. Senior NCO quarters are available for grades MSgt through CMSgt. Billeting cost for all TDY personnel is $17.50 per day. Government quarters are not available for civilian students. Off-post facilities are limited and expensive. It is recommended that all married students attend in an unaccompanied status. Closest adequate commercial quarters are 8 miles from the training site. Government messing is available for all military personnel.

3.10.13.4. Transportation. Commercial air and bus service are available to Ft Leonard Wood's Fornery Army Airfield. Government quarters are not within walking distance of the training area. Government transportation is available for personnel in grades AB through CMSgt. Adequate dining facilities are within walking distance of the training area and quarters for grades AB through CMSgt. Hotels and motels do not provide transportation to the training location. Public or commercial transportation is not available from hotel or motel areas to training location. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.13.5. Clothing. Normal class dress is battle dress uniform with safety toe boots and field jacket. Other uniforms required are: one service dress uniform and at least two each light blue shirts with epaulets, long and short sleeve. Civilian clothing is needed for off-duty. TDY ANG and USAFR students must have BDU hat.

3.10.14. **Ft McClellan AL 36205, Army Military Police School**:

3.10.14.1. Orders. Send two copies to 3280 TCHTG/OL-A, Ft McClellan AL 36205-5030, to arrive 7 days before class start date.

3.10.14.2. Reporting Location and Time. Students attending course L5AZA3P072 000 report to Company D, 701st MP Battalion, Ft McClellan, bldg 141B, NET 0800 and NLT 1800 the day before class start date. Students attending other courses at Ft McClellan will report to the Welcome Center, bldg 3295. For course L5OZA31P3 011, contact Company C, School Battalion, DSN 865-3420/3311, at least 30 days in advance for welcome packet which will include reporting instructions for the class.

3.10.14.3. Quarters. Students will be billeted in commercial facilities in the nearby community as well as in limited on-post facilities, as available. Cost for on-post billeting is a minimum of $10 a day.

3.10.14.4. Clothing. Students for course L5OZA31P3 011 must have short sleeve shirt or long sleeve blue shirt with or without epaulets and civilian clothing for off duty. For course L5AZA3P072 000, students must have short sleeve shirt or long sleeve blue shirt with or without epaulets, BDUs, athletic clothing, and civilian clothing for off duty. Graduation uniform for all courses is short sleeve shirt or long sleeve blue shirt with or without epaulets. Civilians bring clothing appropriate to type of instruction being attended.

3.10.14.5. Transportation. Due to limited government contract transportation, do not schedule airline reservations into Birmingham, AL. Commercial taxi fare is approximately $110 between airport and Ft McClellan. Government quarters are within walking distance of dining and training facilities. There is a shuttle bus and commercial taxi available on post. Government transportation is normally not provided for personnel in motels off post unless a group of people must be placed off post at one time. The closest adequate motel is approximately 6 miles from the training and dining facilities. A government bus is used to meet all incoming and departing flights at the Anniston Airport, and the bus stops by the two bus stations each trip. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.15. **Ft Meade MD 20755, National Cryptologic School**:

3.10.15.1. Orders. Send five copies to Det 2, 1100 RMG/DPMPC, Ft Meade MD 20755-5260, NLT 10 days before class start date. TDY students reporting to Ft Meade for less than 180 days will be attached to the Headquarters Squadron, 6940th Electronic Security Wing, for administrative support. Personnel reporting in a pipeline (excess of 180 days) status will be assigned to 6943rd ESS for administrative support.

3.10.15.2. Reporting Location and Time. TDY students report to Air Force 24-hour arrival point, bldg 9801, immediately upon arrival in local area. Personnel must report 3 duty days prior to

class start date for inprocessing. Military personnel must have proper uniforms for inprocessing.

3.10.15.3. Quarters. TDY students should report with sufficient funds to defray motel accommodations for at least 1 to 3 nights (if reporting on weekends), and students should have in their possession at least one bath towel, cloth, and soap in the event they are placed in the permanent party Air Force dormitory.

3.10.15.4. Transportation:

3.10.15.4.1. Not later than 10 days before class start date, the student's servicing MPF must advise 6940th ESW/SURT, Ft Meade, MD 20755-5260, by letter or message of the following: student's name, grade, and SSN; date of birth and place of birth (city and state); course to be attended; class start date; and scheduled time and location of arrival including name of airline and flight number, if applicable. Advise 6940th ESW/SURT of changes or cancellations of itinerary.

3.10.15.4.2. Personnel traveling by air must make plane reservations to fly into and out of Baltimore-Washington International Airport, Baltimore, MD. Government transportation is provided to and from the airport if 6940th ESW/SURT has been advised of arrival according to paragraph 3.10.15.4.1 above. An Air Force driver in uniform will be waiting for incoming passengers in the baggage pickup area of the air terminal.

3.10.15.4.3. Government TDY quarters are not within walking distance of the training location, but government transportation is available. If transportation cannot be provided, students will be so advised and directed to request approval for special authorization or vicinity mileage from 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.15.5. Clothing. The wear of winter issue organizational clothing (parka, air-boots, etc.) is not authorized at Ft Meade by Air Force personnel. If civilian clothing is authorized while attending class, military uniforms are still required for in and out processing. Year-round uniforms may be worn at the discretion of the individual.

3.10.15.6. Security Clearance. Comply with requirements of paragraph 1.13, this catalog. All students' clearance messages must arrive at "NSACSS FT GEORGE G. MEADE, MARYLAND//M5114/ M56/ E121//" and "6940ESW FT GEORGE G. MEADE, MARYLAND//SP//" NLT 30 days before class start date. You must use the Defense Special Security Communications System (DSSCS). If student clearances are not received in this time frame, course attendance will not be permitted. Contact the 6940 ESW Security Police Office, DSN 923-4923/6225, for questions on clearance requirements.

3.10.16. Ft Meade MD 20755, Defense Visual Information School (DVISCH) and Defense Information School (DINFOS):

3.10.16.1. Quarters. Generally, government quarters are available for AIT students. TDY students will be housed in transient quarters, but transient quarters are very limited. When students cannot be housed on post or in contract motel, off-post facilities are available. For TDY students, overnight stay is required.

3.10.16.2. Messing. Government mess is available to all enlisted personnel not receiving per diem.

3.10.16.3. Transportation. Baltimore/Washington/International Airport (BWI), Baltimore, Maryland, is located 10 miles from Ft Meade. Commercial limousine and taxi service is available to and from Ft Meade.

3.10.16.3.1. Commercial taxis are available on and off post.

3.10.16.3.2. Government transportation is available on a limited basis only for official business. Shuttle bus service is available but may not be conducive to class schedules.

3.10.16.4. Clothing. The BDU or comparable uniform is the prescribed duty uniform for all courses. Seasonal dress (Class A or B) uniform is required for special functions for officer and enlisted courses. Dress uniform will be needed for graduation ceremony. Students reporting for course E5ABD3V033 001, Basic Video Production, from October through April should bring appropriate clothing for a 3- to 5-day field training exercise (FTX). TDY personnel will be required to purchase MRE meals during FTX operation.

3.10.16.5. Reporting Instructions:

3.10.16.5.1. Air Force. Pipeline students reporting from Lackland AFB TX and all Air Force TDY personnel will report to Detachment 4, 335th Training Squadron, bldg 8606, phone DSN 923-5055 or commercial (301) 677-5055. Air Force students in a TDY status will make arrangements through billeting, bldg 4707, or call DSN 923-5884 or commercial (301) 677-5884. Billeting arrangements should be made at least 90 days before course.

3.10.16.5.2. Civilians. Civilian students in a TDY status will make arrangements through the billeting office, bldg 4707, or call DSN 923-5884 or commercial (301) 677-5884.

3.10.16.5.3. International Students. International student arrival should be coordinated through the DVISCH International Military Student Office (IMSO) at DSN 923-3300/6428 or commercial (301) 677-3300/6428. Class quotas are obtained through the TRADOC security assistance training field activity (SATFA).

3.10.16.6. Orders. Students should check orders before reporting with dependents, privately owned vehicles, or household goods. Failure to do so may result in inconvenience and hardship.

3.10.16.7. Other. Additional school information can be obtained from Commander, Defense Visual Information School, bldg 8361, Dutt Rd, ATTN: Training Management, Ft George Meade MD 20755-5600, or Commander, Defense Information School, bldg 8362, Dutt Rd, ATTN: Training Manager, Ft George Meade MD 20755-5620, DSN 923-6590/3266 or commercial (301) 677-6590/3266.

3.10.17. **Redstone Arsenal, AL 35897, Army Ordnance Missile and Munitions Center and School**:

3.10.17.1. Orders. Send five copies to Det 1, 3429 TTS/ATSK-BTF, Redstone Arsenal AL 35897-6400, to arrive NLT 7 days before class start date. Orders must show BI completed or initiated; student must attend a course in handling explosive materials and demolition duty. Student must be screened to meet AFI 36-2104 (formerly AFR 35-99) requirements. Upon completion of Phase I, orders must direct students to proceed directly to Indian Head, MD, to attend Phase II of EOD School.

3.10.17.2. Reporting Location and Time. Report to bldg 3433 during duty hours. If arriving by commercial transportation, call 876-5955 or 876-7972 for transportation. Military personnel will report in proper uniform NLT 1500 2 days before class start date.

3.10.17.3. Quarters. Government quarters and messing are available for grades AB through TSgt. Limited quarters are available for grades MSgt through CMSgt and officer personnel in TDY status. Government messing is not available for officers.

Family quarters are limited. There is a critical shortage of off-post family housing, and landlords require a lease. No government quarters or messing is available for civilian personnel. Adequate commercial motels are within 5 miles of the training site.

3.10.17.4. Transportation. Government quarters are within walking distance of the training location for enlisted personnel. Officer personnel must provide their own transportation. Motels are not within walking distance, and no transportation is provided to the training site. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.17.5. Clothing. Students must have the utility uniform and field boots and service dress and light blue shirt with short sleeves (male) and service dress and light blue blouse with short sleeves (female).

3.10.17.6. Other. Personnel needing corrective lens should have their optical fitted M9 and M17A1 protective mask inserts when reporting.

3.10.18. **Rock Island, IL 61299-7040, Army Management Engineering College (AMEC)**:

3.10.18.1. Orders. Student hand-carries one copy to registrar at the time of reporting.

3.10.18.2. Reporting Location and Time. Report to L. W. Wallace Hall (bldg 90) NLT 0800 on the class start date.

3.10.18.3. Quarters. Government quarters are not available. Adequate commercial hotels and motels are within 5 miles of the training site. Students are responsible for making their own billeting arrangements before the class start date.

3.10.18.4. Transportation. Government transportation is not available for students. Hotels and motels are not within walking distance of the training location. Public and commercial transportation is available from hotel and motel areas to the training location. Several hotels and motels provide trip bus service to AMEC. For personal convenience and economy, personnel should arrange for accommodations in such facilities. Adequate dining facilities are within walking distance of the training location. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.10.18.5. Clothing. Unless otherwise notified, military personnel will wear their uniform to class. Civilian students may wear normal business attire or slacks and sport shirts to class.

3.10.18.6. Other. Refer to DMET Catalog, (DOD 5010.16-C), the US Army Formal Schools Catalog (DA Pamphlet 351-4), the course descriptions in the Army Training Requirements and Resource Systems (ATRRS), and the Army Management Engineering College catalog. Enrollment in AMEC classes will be via the Quota Management System (QMS) in ATRRS. Cancellation of spaces will result if nominations are not entered into the QMS by the 45-day suspense date. 2 AF/DOPS must be advised by name and organization of any cancellation after the 30-day date. If substitutions are necessary, they too must be entered into the QMS.

3.10.19. **Ft Sam Houston TX 78234-6100, US Army Academy of Health Sciences and Brooke Army Medical Center**. (These instructions DO NOT apply to pipeline management students.)

3.10.19.1. Orders. Send five copies to 421 Medical Service Squadron, Wilford Hall Medical Center, Lackland AFB, to arrive NLT 30 days before class start date. While in PCS or TDY status, enlisted students are attached to 421 Medical Service Squadron for command and administrative purposes.

3.10.19.2. Reporting Location and Time. Students report to 421 Medical Service Squadron, Wilford Hall Medical Center, bldg 3350. Military personnel report in proper military uniform. Students should make every effort to report during duty hours (0700-1600). After normal duty hours, report to the information desk in the main lobby. Students attending course J5ABA92530 report 3 duty days prior to class start date to allow for PCS inprocessing at Randolph AFB TX.

3.10.19.3. Quarters. Government quarters are available for all students within walking distance of training locations. Students in TDY status are billeted in post BEQ (rate is $22.50 per day). Students in a TDY status are discouraged from bringing their families. Due to the onset of curriculum, students cannot be released from classes to make quarters accommodations for dependents. Nonavailability statements are issued only if on-post quarters or contract quarters are not available. Government mess is available.

3.10.19.4. Transportation. There is no shuttle service from the airport to Wilford Hall Medical Center, Lackland AFB TX. Airport limousine or taxi must be used if private transportation is not available. Requests for special authorization on vicinity mileage must be approved by HQ AETC/SGAT before the start of travel according to AFI 37-128 and the JFTR.

3.10.19.5. Clothing. Service dress is mandatory for course graduation ceremonies. Students should bring field jackets with liners during the winter months. No home unit caps are authorized. The battle dress uniform (BDU) is the mandatory class dress for students. Students attending course J5ABA92530 wear the hospital white uniform. These students are required to participate in the US Army physical training which consists of push-ups, sit-ups, running and other calisthenics so they must bring proper athletic clothing (grey shorts, grey T-shirts, and athletic shoes).

3.10.19.6. Other. Attention MPFs: Request all finance problems be solved before individuals leave your base. We encourage individuals to enroll in the direct deposit program. If NCOs are eligible for WAPs testing, please comply with AFI 36-2605, *Air Force Military Personnel Testing System* (formerly AFR 35-8). The Air Force support base is Lackland AFB, which is 22 miles from Ft Sam Houston. There is no government shuttle bus between the post and Lackland AFB. For students attending course J5ABA91330 000, ensure retrained personnel are afforded the opportunity to comply with provisions of AFI 36-2101 (formerly AFR 35-1) and AFI 36-2204 (formerly AFR 39-4) prior to departing your base.

Section D—Marine and Navy School Information and Reporting Instructions

3.11. Marine Training Locations. Computer Sciences School (CSS), Quantico, VA 22134-5050:

3.11.1. **Orders**. Send three copies to NCOIC, OL-A, 3390 TCHTG (AETC), Headquarters and Services Battalion, CSS, Quantico, VA 22134-5050, to arrive NLT 30 days before class start date.

3.11.2. **Reporting Location and Time**. Students reporting for more than 30 days report to the reception center located in Little

Hall, bldg 2034, for the purpose of having orders date stamped. Students reporting for less than 30 days report directly to CSS. Students reporting during duty hours will proceed to Newlin Hall, bldg 3255, for in-processing with CSS (duty hours are from 0730 to 1630). Students reporting during nonduty hours can obtain temporary quarters from: Duty NCO, BEQ 2003 (for E-5 and below); Duty NCO, Liversedge Hall, bldg 15 (for officers and civilians); Hostess House, bldg 3072 (E-6 through E-9).If arrival is during nonduty hours, students must report to CSS at 0730 the next day for in-processing. Students should be in appropriate military uniform when in-processing during duty hours.

3.11.3. **Quarters**. Personnel in grades SSgt and below will be housed in BEQ facilities commensurate with their grade. Limited quarters are available for personnel in grades TSgt and above, officers and civilians; therefore, individuals should be prepared to reside in off-base nongovernment quarters if government quarters are not available. Onbase family quarters are limited, and surrounding motel or apartment accommodations are expensive. The distance from the training site to the nearest motel is approximately 4 miles.

3.11.4. **Transportation**. Commercial bus transportation is available from either National or Dulles (Washington DC) airports. Take bus to terminal at 12th and New York Ave., Wash DC. Take commercial bus to Triangle, VA; then commercial taxi to the Marine Corps Combat Development Command, Quantico, VA. No government transportation is available. Commercial taxi service is available on the base. The distance from the training site to the nearest motel is approximately 4 miles.

3.11.5. **Clothing**. Students must wear appropriate uniform during duty hours. From the first Monday in November until the first Monday in April, only the following uniform combinations are authorized: Male—service dress, light blue shirt with long sleeves (with epaulets and tie); Female—service dress, light blue blouse with long sleeves, maternity smock.

3.11.6. **Other**. Messing facilities are available for all grades. While in training status, students are attached to OL-A, 3390 TCHTG, DSN number is 278-3128; commercial number is (703) 640-3128.

3.12. Navy Training Locations:

3.12.1. **Indian Head, MD 20640-5040, Naval School Explosive Ordnance Disposal (EOD)**:

3.12.1.1. Orders. For courses J5OLN21A1 001 and J5ABN3E831 001 Phase II, send five copies to the 366th TTS (AETC), Indian Head, MD 20640-5040, to arrive NLT 7 days prior to class start date. Final Secret clearance required by class start date. Orders must indicate date of Secret clearance, date BI completed, or date BI initiated before departure from Lackland AFB TX or parent base. Orders must indicate student was screened to meet AFI 36-2104 (formerly AFR 35-99) requirements. For course J5AZN3E871 001 and J5AZN3E871 002, no advanced orders are necessary, but TDY orders must indicate CNWDI access authorized.

3.12.1.2. Reporting Location and Time. For courses J5OLN21A1 001 and J5ABN3E831 001 Phase II, students report to Naval School, EOD, Indian Head Naval Ordnance Station, MD, bldg 901, as directed by Commander, Det 3, 366th TTS, Eglin AFB FL. For courses J5AZN3E871 001 and J5AZN3E871 002, report to bldg 901 at 0700 on class start date.

3.12.1.3. Quarters. For courses J5AZN3E871 001 and J5AZN3E871 002, on-base quarters and government messing are normally available for enlisted personnel. Confirm availability by telecon to the billeting office, DSN 364-4845.

3.12.1.4. Transportation. For courses J5OLN21A1 001 and J5ABN3E831 001, arrangements will be made by Det 3, 366th TTS, Eglin AFB FL. For courses J5AZN3E871 001 and J5AZN3E871 002, contact local TMO. Request for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.12.1.5. Clothing. For courses J5OLN21A1 001 and J5ABN3E831 001, students must have combat boots. For courses J5AZN3E871 001 and J5AZN3E871 002, the BDU (camouflage fatigues) is required for the entire course and foul weather gear is highly recommended when under adverse weather conditions. Any duty uniform is authorized for classroom sessions.

3.12.1.6. Other. For information or assistance concerning EOD courses, contact 366th TRS, Indian Head, MD 20640-5040, or telephone commercial (301) 743-4472/4271 or DSN 354-4472/4271.

3.12.2. **Combat Systems Technical Schools Command, Mare Island, Vallejo, CA 94592, Cryptographic Technical Maintenance School**:

3.12.2.1. Orders. Send five copies to Commanding Officer, CSTSC, Mare Island, Vallejo, CA 94592, NLT 30 days before class start date. Include security clearance statement that reads: Granted (Interim or Final) clearance for (level) on (date) based on (BI, NAC, ONI/BuPers Record Check, etc.) completed on (date) by (agency which conducted investigation).

3.12.2.2. Reporting Location and Time. Report to bldg H-1 COMBATSYSTECHSCOLCOM, Mare Island, Vallejo, CA, between 0700 and 1200 the day before class start date. Military personnel will report in uniform.

3.12.2.3. Quarters. Government quarters are available for all male students in grades AB through CMSgt and female students AB through TSgt. No quarters are available for civilian students but adequate commercial motels are within 5 miles of the training site.

3.12.2.4. Transportation. Government quarters and military dining facilities are within walking distance of the training location. Commercial transportation between motels and the training site is inadequate. There is no commercial transportation on base, and the command supplies limited off-duty transportation. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according AFI 37-128 and the JFTR. The nearest transportation facilities are:

3.12.2.4.1. Richmond railroad station (20 miles).

3.12.2.4.2. Oakland airport (35 miles).

3.12.2.4.3. San Francisco airport (45 miles).

3.12.2.4.4. Vallejo bus depot (4 miles).

3.12.2.4.5. Greyhound bus from San Francisco Airport to Vallejo (4 times daily).

3.12.2.5. Clothing. Authorized uniforms are service uniform combination 1 or 2 from 1 October to 30 April and service uniform combination 4B or 6 from 1 May to 30 September.

3.12.2.6. Other. For information or assistance concerning the Cryptographic Technical Maintenance School, day or night, call DSN 253-7350.

3.12.3. **Monterey, CA 93943 (Naval Postgraduate School), Defense Resources Management Education Center**:

3.12.3.1. Orders. Send five copies of orders to DRMEC Code 6401, Naval Postgraduate School, Monterey, CA 93943.

3.12.3.2. Reporting Location and Time. Report to BOQ, Naval Postgraduate School, between 0800 and 1700 the day before class start date.

3.12.3.3. Quarters. Unaccompanied government quarters are reserved for all DMREC participants. Open messing facilities are available.

3.12.3.4. Transportation. Quarters and messing facilities are within walking distance of the Center. Local commercial transportation is of limited service throughout the Monterey Peninsula. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before start of travel according to AFI 37-128 and the JFTR.

3.12.3.5. Clothing. Normal attire for participants, both military and civilian, is civilian clothes (coat and tie or equivalent).

3.12.3.6. Per Diem Restriction. Payable per JFTR (government quarters available, government messing not available).

3.12.3.7. Other. Information and prerequisites are in the DMET Catalog, DOD 5010.16-C. Air Force quota control point is 2 AF/DOP, 721 Hangar Road, Keesler AFB MS 39534-2804. Upon quota assignment, send four copies of DD Form 1556 to arrive at DRMEC Code 6401, NPS, Monterey, CA 93943, NLT 45 days before class convening date.

3.12.4. **Naval Amphibious School, Coronado, San Diego, CA 92155, Diver Second Class Training**:

3.12.4.1. Orders. Send two copies to Director, Diver Second Class Training Department, Naval Amphibious School, Coronado, San Diego, CA 92155, NLT 14 days before class start date.

3.12.4.2. Reporting Location and Time. Report to Diver Second Class Training Department, bldg 107, Pier #5, Naval Amphibious Base, Coronado, NLT 0700 on the class start date, unless otherwise indicated in the quota allocation. Military personnel will report in uniform.

3.12.4.3. Quarters. Government quarters are available, but those for officers and civilians are limited. Adequate commercial motels are within 10 miles of the training site.

3.12.4.4. Transportation. Government quarters and adequate dining facilities are within walking distance of the training site. Hotels and motels do not provide transportation to the training site. Public (bus) transportation is not available from the hotel and motel area to training site. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.12.4.5. Other. Students must report with current health records including a diving physical examination not more than 6 months' old, and they must have met physical screening requirements in accordance with NAVMILPERS Manual Section 1410380.

★3.12.5. **Naval Construction Training Center, Port Hueneme CA 93043-4303**:

3.12.5.1. Orders. Attached to Det 1, 345 TRS, Port Hueneme CA 93043-4350, for messing, housing, and UCMJ administration. Send five copies of orders to Det 1, 345 TRS, 480 West Road, Port Hueneme CA 93043-4350, NLT 15 days before class start date.

3.12.5.2. Reporting Location and Time. Report to Air Force detachment, bldg 1423, room 130, NET 0730 and NLT 1600 on the first duty day after arrival. On non-duty days, report to Bachelor Enlisted Quarters (BEQ/Seaport Inn) bldg 1480. For information or assistance, phone (805) 982-2191/5334 or DSN 551-2191, during duty hours or DSN 551-4115 after duty hours.

3.12.5.3. Quarters. Government quarters will be provided when available. Government quarters are within 2 miles of training; motels are within 7 miles of training. On-station dining is within walking distance of quarters. Family quarters are not available to students. Contact Det 1 Port Hueneme NLT 14 days before arrival to arrange for quarters at DSN 551-2191.

3.12.5.4. Transportation. Limited resources dictate that all non-prior service (NPS) students use Oxnard Airport as a point of arrival until further notice. In addition, these students must arrive between 0730 and 1600 Monday through Friday. Government transportation will be provided from point of arrival to base for all NPS students.

3.12.5.5. Clothing. All military students must bring complete service dress and battle dress uniforms. Ear plugs, steel-toed boots, and clothing for mandatory physical training programs are required. Those personnel wearing glasses must have appropriate safety glasses.

3.12.5.6.Waivers. Send requests for waivers to HQ AETC/TTR. Coordinate waivers through parent unit MAJCOM.

3.12.5.7. Weight Management. Each student will be weighed in during in- and out-processing. (Military personnel must be in uniform to process in or out.) Personnel enrolled in the weight management program (WMP) who are making satisfactory progress must hand-carry a copy of their WMP case file and present it to the TDY orderly room responsible for WMP enforcement during in-processing. Air Force and ARC personnel who are not in compliance with AFI 40-502 will be reported to their home unit by message.

3.12.5.8. Other. Member will handcarry medical records to Det 1 Port Hueneme CA. Dental records must be mailed to Det 1, 345 TRS, Port Hueneme CA 93043-4350. ARC personnel must meet all military requirements, including obtaining current DD Form 2AF (green) Armed Forces identification card before arrival.

3.12.6. **Naval Transportation Management School, Bldg 790, Oakland Army Base, Oakland, CA 94626-5000**:

3.12.6.1. Orders. Send one copy to commanding officer.

3.12.6.2. Reporting Location and Time. Report to Commanding Officer, Naval Transportation Management School, bldg 790, OAB Oakland, CA, at 0725 on class start date.

3.12.6.3. Quarters. Quarters, especially for officers and civilians, are impossible to obtain on 24-hour notice; and they should be requested by the parent Air Force activity 30 to 60 days in advance of the class start date. Students with less than 30 days advance notice should report with sufficient funds to defray motel accommodations.

3.12.6.4. Transportation. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR. The school provides bus transportation from the BOQ/BEQ to the school and return on class days.

3.12.6.5. Other. Send three copies DD Form 1556 to arrive NLT 6 weeks before class start date. Prerequisites are in the DMET catalog DOD 5010.16-C. The school will cancel spaces if the DD Form 1556 does not arrive on or before suspense date.

3.12.6. **Washington Navy Yard, Wash, DC 20374-6001, Department of Defense Computer Institute (DODCI)**:

3.12.6.1. Orders. Send three copies to DODCI NLT 6 weeks before class start date. ***NOTE***: Orders do not constitute enrollment of an individual in a DODCI course.

3.12.6.2. Reporting Location and Time. Report at 0745 first day of course. Regular hours are 0800 to approximately 1600 with the last day adjournment varying with particular course. DODCI is located at the Washington Navy Yard, Wash, DC.

3.12.6.3. Quarters. No government quarters are available at the Washington Navy Yard. Students can obtain quarters at Bolling AFB DC.

3.12.6.4. Transportation. Government quarters are not within walking distance of the training location. Government transportation (Navy shuttle bus) is available on Bolling AFB, but the bus stop is approximately one-half mile from the VOQ. Government transportation (DOD bus) schedules from other military installations in the Wash DC area are not compatible with the DODCI course hours. Hotels and motels in the area are not within walking distance of the training location. (One exception to this does exist, but the area is not considered advisable for walking and the rates for this motel are very high.) Hotels and motels do not provide transportation to the training location. Public and commercial transportation is generally available from hotel and motel areas to the training location. The Metrobus operates between the Maryland and Virginia suburbs, where most of the hotels and motels are located. However, the school's academic schedule and DC area traffic patterns make the use of commercial bus transportation impractical and in some cases impossible. A limited number of the hotels and motels are located in the vicinity of the partially completed Metrorail System (information provided in DODCI student packages), which has a stop approximately 1 mile from the Washington Navy Yard. A transfer from the subway to bus can be obtained. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and the JFTR.

3.12.6.5. Clothing. Military uniforms are required for wear by all military departments in the National Capital Region as prescribed by your particular service. Civilian personnel should wear apparel suitable for a business environment.

3.12.6.6. Other. Prerequisites are in DMET catalog (DOD 5010.16-C). Send an original DD Form 1556 to Registrar, DODCI, Bldg 175, Washington Navy Yard, Wash DC 20374-6001, to arrive NLT 6 weeks before class start date. DODCI will reallocate spaces if a DD Form 1556 does not arrive on or before the 6-week deadline. Nominees are furnished reporting instructions and administrative information by separate correspondence from DODCI.

3.12.7. **Naval Technical Training Center (NTTC), Corry Station, Pensacola, FL 32511-5000**.(Corry Station is not an AETC TC.)

3.12.7.1. Unit of Assignment. 313th Training Squadron.

3.12.7.2. Orders. Send two copies of orders to 313 TRS/CCQ, Naval Technical Training Center, Corry Station Code OOAF, 640 Roberts Ave, Room 205, Pensacola, FL 32511-5148, to arrive NLT 5 duty days before class start date.

3.12.7.3. Reporting Location and Time. Report between 0700 and 1600 NET 5 duty days and NLT 3 duty days before class start date. Unaccompanied personnel report to bldg 3710, room 11, upon arrival for further instructions. Accompanied personnel report to bldg 502, room 205, upon arrival for further instructions. After duty hours all personnel report to bldg 3710, room 11.

3.12.7.4. Student Quarters. Adequate government quarters are available for all enlisted students. If government quarters are not used, adequate commercial facilities are within one mile of the center.

3.12.7.5. Season Uniform Changes. All uniform combinations are optional the year round.

3.12.7.6. Security Clearance. All school facilities are within secure areas and access badges must be issued. Personnel currently holding an SCI clearance must be sent in-status. The servicing SSO will send an in-status message NLT 10 days before course start date to NTTC PNCLA//SSO//. The unit of assignment is responsible for ensuring personnel who do not currently hold an SCI clearance are eligible and hold the proper clearance before their arrival at NTTC, Corry Station.

3.12.7.7. Transportation. Government quarters are within walking distance of all support facilities. Commercial taxi and bus service is available on and off base. Transportation is available by commercial taxi form the local airport and bus terminals to Corry Station. Requests for special authorizations or vicinity mileage must be approved by 2 AF/DOPS before including the special authorization in the order.

3.12.7.8. Eyeglass Requirements. Students who need eyeglasses, see paragraph 3.5.3.

3.12.7.9. Per Diem Restriction. Payable according to JFTR.

3.12.7.10. Clothing and Equipment. Students attending advance courses are required to bring their service dress uniform. Service dress uniform will be worn at course graduation.

3.12.8. **Eglin AFB FL 32542-6009, Naval School Explosive Ordnance Disposal Detachment**:

3.12.8.1. Orders. For courses J5OQN21A1 000 and J5AQN3E831 000, send five copies to Detachment 3, 366th TTS (AETC), Eglin AFB FL 32542-6009, to arrive NLT 7 days prior to class start date. Orders must indicate date of Secret clearance and date BI completed. If BI is not completed, orders must show date initiated and which district will have or has final results. Orders must also reflect one of the following statements as applicable (see AFI 36-2104 [formerly AFR 35-99], chap 6): "Individual has been initially screened and meets qualifying criteria for PRP nuclear weapons associated duties according to AFI 36-2104 (formerly AFR 35-99), Chap 6" or "Individual has been administratively certified for PRP nuclear weapons associated duties according to AFI 36-2104 (formerly AFR 35-99), chap 6." Orders must reflect: "Individual will be attending a course in demolition duty and is entitled to demolition incentive pay." Orders must direct students to report to Eglin AFB FL to attend course J5OQN21A1 000 (for officers) or course J5AQN3E831 000 (for enlisted) Phase I training and then proceed to US Naval School EOD, Indian Head, MD 20640, for Phase II training. UPGR location must also be reflected on the order.

3.12.8.2. Reporting Location and Time. All students report to bldg 845 (main school bldg) in proper military uniform 2 duty days prior to class start date. If reporting during nonduty hours, report to bldg 852 (Naval EOD Bachelor Quarters) and then report in uniform to bldg 845 at 0730 the next duty day.

3.12.8.3. Quarters. All personnel will be initially housed in the EOD Bachelor Quarters as this is a TDY location. On-base family housing is not available for students. Government messing facilities are available and are within walking distance of the EOD Bachelor Quarters Dormitory.

3.12.8.4. Transportation. If arriving by commercial air transportation, contact Det 3, 366 TTS, commercial (904) 882-9083 or DSN 872-9083, for information. Requests for special conveyance or vicinity mileage must be approved by 2 AF/DOPS before the start of travel according to AFI 37-128 and JFTR. On-base transportation is available during duty hours. Most base facilities are within walking distance of quarters and training site.

3.12.8.5. Clothing. Students must have field uniform (fatigues) to include combat boots. Students needing corrective lens must have optically fitted M9A1 and M17A1 protective mask eye lens inserts. Short-sleeve blue shirt uniform is authorized for year-round wear. Service dress uniform is required for class graduation. Field jacket required during winter months (Nov-Feb). Foul-weather gear is required year round.

3.12.8.6. Others. Member will hand-carry medical records to Eglin AFB FL. Dental records must be mailed to Det 3, 366 TTS, Eglin AFB FL 32542-6009. For information or assistance contact Det 3, 366 TTS, Eglin AFB FL 32542-6009; (Comm) 904-882-9083 or DSN 872-9083.

3.12.9. **Naval Air Station Memphis, Millington TN 38054-5058**:

★3.12.9.1. Orders. Attached to Detachment 2, 361 TRS, Millington TN 38054-5058, for messing, housing, and UCMJ administration. Send five copies of orders to Det 2, 361 TRS/CC, NAVSUPPACT Memphis, Millington TN 38054-5058, NLT 15 days before class start date.

3.12.9.2. Reporting Locating and Time. Report to Air Force Detachment, bldg 787, room 110, NET 0730 and NLT 1600 1 day before class start date. On nonduty days, report to bldg 443. For information or assistance, phone (901) 873-7562 or DSN 966-7562. During nonduty hours, phone (901) 476-9319.

3.12.9.3. Quarters. Government quarters will be provided when available. Government quarters are within one mile of training, motels are within five miles of training. Onstation dining is within one mile of training or quarters. Family quarters are not available to students. Contact Det 2, NAVSUPPACT Memphis, NLT 14 days before arrival to arrange for quarters.

3.12.9.4. Transportation. Government transportation between quarters and training is not normally available. Request for special authorization or vicinity mileage must be approved by 2 AF/DOPS before start of travel according to AFI 37-128 and the JFTR.

★3.12.9.5. Clothing. All military students must bring complete service dress and fatigue uniforms. Seasonal uniforms are required: summer, 1 Apr - 30 Sep; winter, 1 Oct - 31 Mar. Earplugs, steel-toed boots, and clothing for mandatory physical training programs are required. Those personnel wearing glasses must have appropriate safety glasses. Advise students attending 2A7X2 courses that light-sensitive lenses (glasses) and contact lenses cannot be worn when performing fluorescent, magnetic particle, and penetrant inspections.

3.12.9.6. Waivers. Send requests for waivers for AFSC 2A7X3 training to 2 AF/DO and requests for AFSC 2A7X2 to AF NDI Program Office Manager, SA-ALC/MMEI, Kelly AFB TX. For additional information, see specific course announcement in this chapter.

3.12.9.7. Weight Management. Each student will be weighed during in- and out-processing. (Military personnel must be in uniform to process in or out.) Personnel enrolled in the weight management program (WMP) who are making satisfactory progress must hand-carry a copy of their WMP case file and present it to the TDY orderly room responsible for WMP enforcement during inprocessing. Air Force and ARC personnel who are not in compliance with AFI 40-502 (formerly AFR 35-11) will be reported to their home unit by message.

3.12.9.8. Other. ARC personnel must meet all military requirements including obtaining current DD Form 2AF, (green) Armed Forces Identification Card, before arrival.

Section E—DOD and Other Government Agency Schools Funded by AETC

3.13. Information and Reporting Instructions:

3.13.1. **Charlottesville VA**. (See Army Locations, University of Virginia, Charlottesville VA, for Judge Advocate General's School.)

3.13.2. **Mike Monroney Aeronautical Center, FAA Academy, Oklahoma City OK 73125**:

3.13.2.1. FAA Air Traffic Control Courses:

3.13.2.1.1. Orders. Send one copy to Department of Defense Liaison Office, AAC-908, NLT 65 days before class start date.

3.13.2.1.2. Reporting Location and Time. Report to FAA Air Navigation Facilities, building No. 1 ANF-1, room 108, at 0745 on class start date.

3.13.2.1.3. Quarters. Government quarters are usually available for all personnel at Tinker AFB (18 miles from this location). Reservations should be made with the base billeting office 3 weeks before arrival date. The commercial number for the Billeting Office is 405/737-1475. The closest commercial housing is approximately 5 miles from the academy. Recommend that anyone planning to use commercial housing adhere to a similar 3-week leadtime in securing reservations.

3.13.2.1.4. Transportation. Government transportation is not available from Tinker AFB. Motels and hotels are not within walking distance of training locations (5 miles minimum), but FAA contract busing is provided to and from many housing areas for anyone wishing to take advantage of it.

3.13.2.1.5. Clothing. Casual civilian clothing is preferred while attending classes at the FAA Academy.

3.13.2.2. FAA Airports Training Courses:

3.13.2.2.1. Reporting Location and Time. Report to ANF-1, room 201, FAA Academy, at 0800 on class start date.

3.13.2.2.2. Other. All other instructions are the same as FAA Traffic Control courses.

3.13.2.3. FAA Airways Facilities Courses:

3.13.2.3.1. Reporting Location and Time. Report to lobby of building ANF-2 at 0645 on class start date. Room numbers for each course will be posted on the bulletin board.

3.13.2.3.2. Other. All other instructions are the same as FAA Traffic Control courses.

3.13.2.4. FAA Flight Standards Courses:

3.13.2.4.1. Reporting Location and Time. Airworthiness classes report to ANF-1, Room 225, FAA Academy, at 0800 on class start date. Flight Inspection and Procedures classes report to ANF-1, Room 212, FAA Academy, at 0800 on class start date.

3.13.2.4.2. Other. All other instructions are the same as FAA Air Traffic Control courses.

3.13.3. **Fort Belvoir VA 22060**:

3.13.3.1. Defense Mapping School:

3.13.3.1.1. Orders. Send one copy of orders to the Defense Mapping School, ATTN: OP, building 214, Fort Belvoir VA 22060-5828, 4 weeks before class start date. In addition, send two copies of orders (enlisted only) to Det 2, 3429 Technical Training Squadron, building 211, Fort Belvoir VA 22060-5377. Officer and enlisted orders should read: Student is assigned to Air Force Det 2, 3429 Squadron, Fort Belvoir VA 22060-5377, for command and administrative purposes. Orders for officer and civilian students (DD Form 1610) should indicate course number, length, and title in item 9. Orders should route all students (officer, enlisted, and civilian) to Washington National Airport. Information should include name, grade, SSN, branch or designator, security clearance, organization, and station mailing address. Security clearance requirements are listed in course announcements. Level of clearance should be shown on the orders. Questions about schedules, quotas, or additional course information should be directed to 2 AF/DOPN, 721 Hangar Road, Keesler AFB MS 39534-2804.

3.13.3.1.2. Reporting Location and Time:

3.13.3.1.2.1. Officers and Enlisted Students: Report 48 hours in advance of scheduled start date to Det 2, 3429 TCHTS Orderly Room, building 211, telephone 664-2725.

3.13.3.1.2.2. Civilian Students: Report at 0715 on start date to Bagley Hall, building 214, room 106, Operation Sergeant, telephone 664-2383.

3.13.3.1.2.3. After duty hours and on weekends, students should call 664-2725 (DSN 354-2725) for assistance.

3.13.3.1.3. Quarters. Enlisted students attending entry level training at DMS are provided messing and housing facilities. Enlisted students attending advanced level training and officer students may make arrangements for BEQ/BOQ accommodations through the Bachelor Housing Office, building 470, Ft Belvoir VA 22060-5113, DSN 354-2456/2565 or commercial (703)664-2456/2565. If quarters are not available on post, a statement of nonavailability will be issued. Commercial facilities are available within 3 miles of DMS.

Table 3.14. Special Distribution of Orders.

LINE	A Type of Student	B No. of copies per student	C Send orders to
1		1	2 AF/DOP
2	students scheduled to attend tng in the Wash DC area	3	1100 ABW/DPMUM Bolling AFB Wash DC 20332
3	students scheduled to attend foreign language tng only in the Wash DC area	1	DLI Washington Off, 1111 Jefferson Davis, Hwy #507,Arlington VA 22202-4306
4	all students attending tng by DLIFLC at Presidio of Monterey CA	2	DLIAT FL-DS
5		7	311 MTS/MSPS, Presidio of Monterey CA 93944-5004

3.13.3.1.4. Transportation. Government facilities (quarters, dining, PX, etc.), except NCO Club are located within walking distance of DMS. Adequate commercial transportation is available between Washington DC, Alexandria and Springfield VA, and Ft Belvoir. Commercial taxi service is available on and off post. Shuttle bus is available on post at no cost. POV must be registered with the Ft Belvoir Provost Marshal, building 1902, within 72 hours of arrival on post. Vicinity travel reimbursements are not authorized. Requests for special authorization must be approved by 2 AF/DOPS, Keesler AFB MS 39534-2804, before the start of travel in accordance with AFI 37-128 and the JFTR.

3.13.3.1.5. Clothing and Equipment. All military personnel (male and female) must have sufficient fatigue clothing. Exception: Courses X5OZD14N4 010, X5OZD8065 000, and X5OZD14N4 011 do not require fatigues.

3.13.3.2. Defense Systems Management College (DSMC):

3.13.3.2.1. Reporting Location and Time. Report to building 202, Ft Belvoir, at 0800 on class start date.

3.13.3.2.2. Quarters. BOQ facilities are normally available for students.

3.13.3.2.3. Transportation. Government quarters, when available, are 1/2 mile from the college. Government messing is not available. The post shuttle bus is available. Commercial transportation between motels and the college is inadequate. Students should consider bringing their personal automobile for local transportation. Requests for any other special authorizations must be approved by 2 AF/DOPS before the start of travel IAW AFI 37-128 and the JFTR.

3.13.3.2.4. Per Diem Restriction. Payable per JFTR.

3.13.3.2.5. Other. Send one copy of DD Form 1556 to DSMC to arrive NLT 60 days before class start date. Students selected to attend

courses are given additional information by DSMC on course content and other details. The following statement must be included in item #16 of DD Form 1610 of travel order: "Field trip and dual lodging in conjunction with course is authorized." A copy of the DSMC field trip travel order must be filed with the final travel voucher submitted at the member's PDS.

3.13.4. **Bolling AFB, Defense Intelligence Analysis Center (DIAC), Washington, DC 20340-5100, Joint Military Intelligence College**:

3.13.4.1. Orders. PCS students are assigned to Det ISCL, AFELM/DIA, Washington DC 20340-3199. For courses less than 100 academic days, students attend the Joint Military Intelligence College in a TDY status.

3.13.4.2. Reporting Location and Time. All students report to the Registrar, Joint Military Intelligence College, DIAC, Bolling AFB, at 0720 on the class start date. Military personnel in a PCS status must have completed inprocessing at both 11 MSS/DPM and DIA/MCA-2 before the class start date. Inprocessing at 11 MSS/DPM may be done by appointment at building 20 (Bolling AFB), Suite 240, Customer Service (DPMPS, (202) 767-4440, DSN 297). Inprocessing through DIA/MCA-2, Department of Academic Support and Student Services, requires an appointment which can be made by calling (202) 231-3282 (DSN 428). DIA/MCA-2 is located in the DIAC, room C3-222B.

3.13.4.3. Quarters. The supply of government quarters, especially for officers, is limited at Bolling AFB and throughout the Washington DC area. Many, if not most, TDY students stay in commercial lodging. Nevertheless, all TDY students should contact the billeting office upon arrival in the Washington DC area to inquire if government quarters are available. If available, government quarters at Bolling AFB will be used by military and DOD civilian personnel attending training in a TDY status. Reservations may be requested by calling (202) 767-5771 or 5316 (DSN 297). Due to extremely limited availability, reservations need to be made as early as possible. Quarters are also available at Andrews AFB, (301) 981-4624 (DSN 858), or Fort Myer, (202) 699-9603 (DSN 222). Adequate commercial lodging is available in the District of Columbia, Maryland, and Northern Virginia within 5 to 10 miles from the college. The billeting office will issue a Certificate of Nonavailability if the TDY orders read Bolling AFB and a Letter of Nonavailability if the orders are for Washington DC.

3.13.4.4. Transportation. Regular commercial bus service is available to Bolling; however, connections can be difficult. There is a special commercial bus which makes multiple runs between the DIAC building on Bolling AFB and the Anacostia Metro (subway) station during the morning and evening commuting periods. It provides the best access to the Joint Military Intelligence College for students without access to automobiles. Additionally, there is a free government shuttle bus connecting the DIAC and the Pentagon running every half-hour between 0830 and 1530. Students with automobiles are encouraged to carpool because visitor parking at the DIAC is usually saturated. Adequate parking is available on Bolling AFB lots located 5-10 minutes walking time from the DIAC. (These are located generally south of the DIAC building, across MacDill Blvd past the Air Force Finance and Judge Advocate buildings.)

3.13.4.5. Clothing. Military uniforms are required for wear by all military departments in the National Capital Region as prescribed by particular service. Civilian personnel should wear apparel suitable for a business environment.

3.13.4.6. Other. Send the name, grade, SSN, organization, telephone numbers including DSN, and mailing address for each student nominee to the Admissions Office (MCA-2), Joint Military Intelligence College, Washington DC 20340-5100, NLT 30 days before class start date (90 days for the Postgraduate Intelligence Program and Undergraduate Intelligence Program). The Admissions Office phone number is (202) 231-3319, (DSN 428). Student security clearances must arrive at least 30 days prior to class start date. SCI clearances must be sent via SSO channels to SSO DIA//DAC-3C//MCA-1//. All collateral clearances, Top Secret and below, may be sent by letter to the Defense Intelligence Agency, 3100 Clarendon Blvd, Arlington VA 22201-5300 (ATTN: Visitor Control - Mary Wilson) or by message to DIA Washington DC//DAC-3C// or by fax to (703) 907-1573 (DSN 283). Students may verify their clearances have been received at the college by calling DSN 428-3296.

3.13.5. **Richmond VA 23297-5091, Department of Defense Security Institute**:

3.13.5.1. Location. The institute is at the Defense General Supply Center which is 8 miles south of downtown Richmond, Virginia, on US Highways 1 and 301. It is accessible from the Richmond-Petersburg Turnpike (Interstate 95) using exits 6, 6A, or 7.

3.13.5.2. Orders. Furnish the institute one copy of TDY orders during registration on the first day of class.

3.13.5.3. Reporting Location and Time. Report to the Myers Building (building 33), Bay "E" or building 32, Bay "B" at 0800 on class start date as noted in student packet.

3.13.5.4. Quarters. Neither government quarters nor messing facilities are available for students. Certificates of nonavailability will be issued upon conclusion of students' stay at the institute. Adequate commercial motels are located near the training site.

3.13.5.5. Transportation. Government transportation is no longer provided to and from local motels. Students will be provided advance information in their confirmation letter concerning motels which provide transportation. Adequate dining facilities are within walking distance of the training location and commercial motel complexes. Commercial transportation (taxi/limo) is available from Richmond International Airport (Byrd Field) and from local train and bus stations to motel complexes. Requests for special authorization or vicinity mileage must be approved by 2 AF/DOPS before the start of travel IAW AFI 37-128 and the JFTR.

3.13.5.6. Clothing. Civilian dress is recommended. Name tags issued to military students will identify their rank and military organization.

3.13.5.7. Other. Prepare nominations on three copies of DD Form 1556 as prescribed in DOD Manual 5010.16C, DMET Catalog. The completed DD Forms 1556 should be sent to the institute 45 days before class start date. This allows the institute sufficient time to send the students a detailed "Student Information Brochure." This brochure gives the students complete information pertaining to their stay in the Richmond area, including area maps, motels, post facilities, etc.

3.13.5.8. Correspondence Course Prerequisites. Some DODSI courses require prerequisite correspondence courses. These courses may be obtained through the Army. The DODSI Government Catalog contains all information on correspondence courses, including enrollment instructions, and these correspondence courses should be requested from the Army well in advance (at least 6

months) of any course which has correspondence course prerequisites. The DODSI Catalog is available on request.

3.13.6. **Sandia National Laboratories (SNLA), Kirtland AFB, Albuquerque NM 87115. J5AZO46470-000, EOD Advanced Nuclear Training**:

3.13.6.1. Reporting Location and Time:

3.13.6.1.1. Arrival. Report to building 22010, billeting office, between 0001 and 2400 on the day before the class start date, unless otherwise indicated in the quota allocation. Ask at the desk for EOD information.

3.13.6.1.2. Training. Training location is in the SNLA complex, building 892. An access badge must be obtained at building 800 for entry.

*Numbers refer to notes below.

NOTES: 1. Student attending F-V5 series course should arrive with equipment indicated.
2. Students are issued all items upon arrival at Randolph AFB.
3. SUNT graduates retain items previously issued during course S-V8N-C.
4. Students from other than course N-V6A-F must arrive Randolph AFB with items indicated.
5. Required only by navigators attending the course for the purpose of attaining AFR 60-1/AETCR 51-43 qualification in the T-43 aircraft.
6. USAF students are issued briefcases from a base pool which are not retained when departing PCS.
7. Three required for duration of training course. Students entering training from S-V8A-A (T-41) and S-V8A-B receive third pair at UPT base
8. USAF students going through training at certain bases are not issued winter weight underwear or winter weight flight jackets.
9. J-AB-AP: USAF pilots only.

Reference AFM 67-1, vol IV, part one, chapter 21, paragraph 3f(4). I understand that I am required to hand-carry the flying clothing and equipment in my possession as required for the flying training course listed in my orders. I further understand that I must report to the Equipment Management Office (EMO) as soon as possible to assure that clothing and equipment to be in my possession prior to departure is obtained and issued to me if available.

DATE SIGNATURE

3.13.6.2. Transportation. Government quarters are not within walking distance to the school. Government transportation is available for students. Public transportation is not available. Requests for special authorizations or vicinity mileage must be approved by 2 AF/DOPS prior to start of travel IAW AFI 37-128 and the JFTR.

3.13.6.3. Clothing Requirements. Optional period for uniform wear is year round. Either the light blue shirt with long sleeves and tie or the light blue shirt with short sleeves will be worn for all course functions. Fatigues are not acceptable.

3.13.6.4. Security Requirements. Admission to class requires as a minimum a Secret clearance with CNWDI access. Additionally, a DOE Form F5631.20 to arrive 30 days in advance to: Sandia National Laboratories, P.O. Box 5800, Attn: Division 7213, Albuquerque, NM 87185. Send messages in proper format to arrive 15 days in advance to: RHEGSNM Sandia National Laboratories, Albuquerque NM//5513/3437-1// with info copies to OL SA ALC NSO Kirtland AFB NM//SWN//, and INWS Kirtland NM//TTR//. Requests not in exact format or wording will be disapproved. Please ensure that the person signing the Form F5631.20 or releasing the access message can be clearly identified as having the right to sign for the major commander (such as wing or base commander, NCS, etc).

Section F—Defense Language Institute Foreign Language Center (DLIFLC)

3.14. DLIFLC School Information and Special Reporting Instructions. The following paragraphs contain special instructions and specific information, by training location, for Air Force students attending Defense Foreign Language Program courses:

3.14.1. **Preparation of Student Orders**. Use guidelines furnished in paragraph 3.6 and paragraph 3.14.4 below (orders), and include in orders the following:

3.14.1.1. Language aptitude score as determined by the DLAB score, and the date (mo/yr) completed (for students selected to attend basic training, for example, X5AQZ or X5OVZ courses).

3.14.1.2. Language to be studied (including dialect, when applicable).

3.14.1.3. Command or activity for which student is being trained (and assignment action number if applicable).

3.14.1.4. Location of training.

3.14.1.5. Air Force course number, PDS code and DLIFLC class number.

3.14.1.6. Class reporting, convening, and graduation dates. (See 3.14.4 below for reporting times).

3.14.1.7. Security clearance or statement that DD Form 398 has been completed (paragraph 3.1.4.5).

3.14.1.8. For rated officers refer to paragraph 3.1.4.6. Include in the orders the name and location of the Air Force base to which the officer is attached for flying. For AFOSI personnel, student orders will show grade or special agent (SA).

3.14.2. **Personnel and Military Pay Records**:

3.14.2.1. Personnel and Finance Records. Personnel records should be hand-carried by the individual or mailed to 311 MTS/MSPS, Presidio of Monterey CA 93944-5004, or 1100 ABW, Bolling AFB, Wash DC 20332, as appropriate, if hand-carrying is not possible. Finance records should be hand-carried or mailed as indicated below:

Location of Tng	*Mail Finance Records to*
Wash DC Area	Acct and Finance Office Bolling AFB DC 20332
Presidio of Monterey CA	OL A 60 CPTS/FMF Presidio of Monterey CA 93944-5004

3.14.3. **Language Training in the Washington DC Area**:

3.14.3.1. Orders. Students in PCS or TDPFO status are assigned to 11 SUW, Bolling AFB, Wash DC. Students in TDY or PCS with TDY en route are attached to 11 SUW for admin support. Include statement that accompanied airmen should have sufficient funds to defray all personal expenses for first month of class, and include the number of the course the student will attend. One copy of orders must be mailed to arrive DLI Washington Off, 1111 Jefferson Davis Hwy #507, Arlington VA 22202-4306, a minimum of 14 days before individual's departure from home station.

3.14.3.2. Reporting Location and Time. Report to building P-20, Bolling AFB, during duty hours. Students will report to the DLI Washington Off, 1111 Jefferson Davis Hwy #507, Arlington VA 22202-4306, no later than the Thursday preceding the Monday class start date. Students should call ahead to schedule their registration and briefing appointment at DSN 286-6294.

3.14.3.3. Quarters and Messing. Government quarters for airmen are available at Ft Myer or Bolling AFB. Messing is available at each of these installations, but students will have to take their mid-day meal on the local economy.

3.14.3.4. Clothing. Wear of the uniform is not mandatory for either enlisted or officer personnel, nor is coat and tie. (Military personnel are authorized to wear sport shirts or knit shirts and slacks, or the equivalent.)

3.14.4. **Defense Language Institute Foreign Language Center, Presidio of Monterey CA 93944-5004**. The instructions below apply to students attending DLIFLC training at the Presidio of Monterey:

3.14.4.1. Orders. Students in PCS status are assigned to 311 MTS. IMPORTANT: All students not TDY or PCS with a TDY en route will be assigned to the PAS code GFOJF13K only. No other PAS code will be used for student personnel. PCS orders should include all information listed in paragraph 3.14.1. OSI personnel: PCS orders should read Special Agent and require member to bring military uniforms.

3.14.4.2. Reporting Location and Times. All students will report to the 311 MTS orderly room, bldg 627, at the following indicated times:

3.14.4.2.1. PCS Students: NET 0730 and NLT 1600 the Monday prior to class start date. (Unaccompanied PCS students may report during nonduty hours to CQ, bldg 627, to be issued a temporary billet in the dormitory. Accompanied personnel may be authorized to report early to ease transition of dependents; for example, school enrollment, household goods shipments, etc..)

3.14.4.2.2. TDY Students: NET 0730 and NLT 1200, 1 day prior to class start date (no early reporting).

3.14.4.3. Quarters. Local Army directives govern quarters assignments. Unaccompanied personnel, TSgt and below, will stay in student dormitories. MSgt and above may be authorized to reside off post with full allowances, or reside in the student dormitories, space

permitting. Unaccompanied officers will not be able to reserve billeting until they sign in. Until further notice, it is mandatory that all accompanied personnel in PCS status be housed at Ft Ord

58	J-WA-SF	VT86, NAS Pensacola	
59	J-WA-SK		
60	N-NA-AT	558 FTS, Randolph	
61	N-EG-EW	NAVTECHTRACEN, Corry Station	
62	N-NB-PN		

(Presidio of Monterey annex). DD Forms 1764, **Application of Assignment to Housing**, are not honored. Family housing normally is assigned within 4 days of inprocessing. Government messing is available for enlisted personnel. Recommend TDY personnel receive maximum pay advances since billeting is $35 a day.

3.14.4.4. Transportation. Airport taxi service is available after each arriving flight. There is no base taxi service. There is a duty driver available at 311 MTS CQ during nonduty hours for emergencies only. The host command (US Army) provides a regular shuttle bus service between the Presidio of Monterey and Ft Ord (Presidio of Monterey annex) Monday through Friday, 0700 - 1700 only. Local bus transportation is adequate for regular commuting in most areas at a cost of approximately $40 a month.

3.14.4.5. Clothing. Although no seasonal requirements exist, the climate is variable. We recommend that all students bring both summer and winter uniform combinations. Uniforms are required for officer and enlisted students in all courses during school hours. Officers are encouraged to support this policy; flight suits are not authorized. BDUs are worn 3 times a week; any blue combination is worn 2 times a week. If attending training during September, all students will be invited to the annual Air Force Anniversary Ball (mess dress/semi formal).

3.14.4.6. Other. Phone numbers for 311 MTS Orderly Room (answered by CQ nuring nonduty hours) are DSN 878-5370/5115/5223, or commercial (408) 647-5370/5115/5223; 24-hour 311 MTS fax number is DSN 878-5052, or commercial (408) 647-5052. Rated Personnel: For flight managers and rated officers assigned

PCS, send transition cards reflecting DESR as gaining flight manager per AFI 36-3001, *Issuing and Controlling ID Cards* (formerly AFR 30-20). AFOSI personnel: DD Form 1173, **Uniformed Services Identification and Privilege Card**, must not expire while attending training at DLIFLC.

Section G—AETC Flying Training

3.15. Identities and Titles for Flying Training Courses:

3.15.1. The title indicates subject of training and aircraft design when appropriate.

3.15.2. The course identity is composed of a one-position prefix, a two-position course attendee code, a two-position course variation/identifier, and a two-position optional facility identifier. The course numbering system is as follows:

- First Position—General Area of Training

  B—Graduate Electronic Warfare Training
  F—Graduate Pilot Training
  J—Joint Training
  N—Navigator Training
  Q—Initial Skills Maintenance Training
  R—Advanced Skills Maintenance Training
  S—Specialized Training
  W—Undergraduate C^2 Training
  Z—Graduate C^2 Training

- Second Position—Type Student

  A—Aviator (pilot or navigator)
  P—Pilot
  N—Navigator/Naval Flight Officer
  E—Electronic Warfare Officer
  O—Other
  W—Weapon Systems Operator/Radar Intercept Officer
  V4A—Undergraduate Pilot Training in Jet Aircraft

- Third Position—Stage of Training

  B—Basic (entry level)
  I—Intermediate (midlevel)
  A—Advanced (proficient)
  G—Graduate
  K—Instructor

- Fourth Position—Course Variation/Identifier

  AP—Aerospace Physiology Indoctrination (API)
  PF—Preflight
  PR/J/4/7—Primary Nav/Primary JPATS/Primary T-34/Primary T-37
  IN—Intermediate (INT)
  AT—Airlift, Tanker, Transport
  BF—Bomber, Fighter
  HE—Helicopter (HELO)
  MT—Multiengine Prop
  SK—USAF Strike (SK)
  SF—USAF Strike Fighter (SF)
  EW—Joint Electronic Warfare Officer Training (EWO)

- Fifth Position—Optional Facility Identifier (Used when the same course is taught at more than one facility.)

  RA—Randolph AFB
  PN—NAS Pensacola
  CS—Corry Station
  WT—NAS Whiting
  RE—Reese AFB
  VN—Vance AFB

3.15.3. Example of a course identity: J-PB-P4-PN

J—Joint Training
PB—Pilot, Basic
P4—Primary, T-34
PN—NAS Pensacola

3.16. Class Start Dates. Refer to the current program flying training (PFT) document.

3.17. AETC Flying Training Quota Control. HQ AETC develops the flying training program in support of HQ USAF/XOOT guidance on production requirements and initial training distribution. The program is subject to adjustment or modification because of changes to guidance or directives.

3.17.1. Quota Control:

3.17.1.1. HQ AETC allocates quotas for its courses through AFTMS by addressee code. Entry into AETC-monitored courses is not authorized unless quotas have been allocated by AETC. Send questions concerning quotas, availability of spaces, or requests for training through the MAJCOM, FOA, or DRU DP or MP training management function to the quota control agency indicated in the course announcement. Commands, organizations, or individuals are not authorized to contact training units directly regarding class schedules or to obtain training slots.

3.17.1.2. Once a quota has been allocated to a user, the name of the student scheduled to attend training must be input into AFTMS. Confirmation by name for undergraduate flying training (UFT) courses must occur no later than 60 days before class start date. For graduate level or follow-on training programs, confirmation must occur no later than 30 days before class start date. Failure by the user to confirm by name within these timeframes could result in the quota being cancelled by HQ AETC/XOT. These failures will be reported to AETC/CC as no-shows.

3.17.2. Class Changes/Quota Return:

3.17.2.1. Any change to a quota allocation (slipping, swapping, or converting) must be coordinated with the appropriate HQ AETC quota manager as outlined in paragraph 3.17.1.2. Return of unfilled quotas after the confirmation-by-name suspense date is encouraged, but the user will be charged for a no-show unless the quota is reallocated or filled by the quota manager. HQ AETC will not change a quota or allocate a new quota without coordination with the training requester.

3.17.2.2. Quotas not returned by the confirmation-by-name suspense date or not filled by the requester on the class start date will be reported in AFTMS as no-shows.

3.17.2.3. If the user determines an allocated quota is not needed, the user will notify the quota manager immediately, but no later than outlined in paragraph 3.17.1.2. Once the quota is returned, the user is relieved of responsibility for the quota.

3.18. Clothing and Equipment Requirements:

3.18.1. Students must have sufficient quantities of required uniforms to meet military dress standards at all times.

3.18.2. Students reporting to their flying training assignment will be issued all necessary flying clothing and equipment on arrival for training.

3.18.3. Rated personnel report for flying training with the items of flying clothing and personal equipment required for their part of the missions to which assigned; items are listed in table 3.15. AFM 67-1, volume IV, part one, *Air Force Equipment System Policy and Procedures*, chapter 21, contains instructions on retention of clothing and equipment items for personnel departing for flight training. ANG and Reserve rated personnel reporting to AETC organizations for graduate flying training courses must have items listed in table 3.15. MPFs having quotas in courses listed in section I must contact the students as soon as possible after notification of selection and inform them to report to the equipment management office. Personnel who need flight clothing and equipment, whether on flying status or returning to flying status, must sign the statement in table 3.15, in two copies. The original is filed in the TDY or PCS relocation folder and the duplicate is given to the individual. Other rated personnel will be directed to report to the EMO for necessary processing.

3.18.4. TDY students are not required to have mess dress uniforms unless the requirement is listed in the course announcement.

3.18.5. Seasonal uniform changes are as follows:

3.18.5.1. With the exception of PIT, all pilot training courses are attended in a PCS status and full uniform allowance is required. The summer uniform is authorized throughout the year at the PIT site but availability of a winter uniform during the winter months is recommended.

3.18.5.2. The summer uniform is authorized throughout the year at Randolph AFB TX and NAS Pensacola, for all students attending navigator training courses; however, availability of a winter uniform November through March is recommended. ***NOTE:*** Air Force uniform parts availability at NAS Pensacola is extremely limited. Students are advised to arrive ready for training with all required non-issue uniforms.

3.18.6. Flight suits and fatigues are not acceptable for courses S-V8F-C, S-V8E-S, B-V7C-E, B-V7C-G, and B-V7C-O.

3.18.7. Personnel attending flying training at Altus AFB OK refer to table 3.16.

★3.19. Authorized Use of AETC Mission Readiness Training Funds for Flying Training. Student travel orders cite AETC flying training funds only if all five of the following conditions are met:

3.19.1. Training is conducted by:

3.19.1.1. AETC in a formal resident course.

3.19.1.2. AETC at a survival course location.

3.19.1.3. Army, Navy, or other government agency. (AETC obtains spaces and makes allocations to Air Force users.)

3.19.2. Student is an active duty Air Force officer or airman, DAF civilian employee, or exchange officer filling an Air Force position.

3.19.3. Quota has been issued by HQ AETC (or by HQ USAF when specifically authorized by course announcement to issue quotas and commit AETC funds). Use of AETC fund citations when a school quota has not been allocated or when it has been cancelled may result in the order publishing agency being designated as responsible for violation under AFR 177-16, *Administrative Control of Appropriations.*

3.19.4. Authorized travel of student is TDY or PCS with TDY en route as defined in chapter 1.

★3.19.5. The training involved is conducted within CONUS. AETC funds are not authorized for the payment of any travel expenses incurred for training purposes outside the contiguous 48 states. Exception: AETC mission readiness training flying training funds (paragraph 3.19) are authorized:

3.19.5.1. For travel and per diem of CONUS assigned personnel attending survival course at Eielson AFB in two-way TDY status:

3.19.5.2. For per diem only while in training status for all personnel in TDY-en route-PCS status attending survival courses conducted outside CONUS. All travel expenses are charged to the PCS appropriation.

3.20. AETC Flying Training Fund Citation:

★3.20.1. Open allotment procedures are used for transportation, travel per diem, and school per diem for mission readiness training courses funded by AETC. These funds can be cited on bills of lading for shipment of personal effects only for that portion within the authorized TDY weight allowance plus approved professional equipment for use in connection with AETC training.

3.20.2. See table 3.4 for correct fund citation.

3.21. Transportation To and From Training:

3.21.1. General Information:

★3.21.1.1. Modes of transportation, although in travel orders, must be consistent with the requirements of the school location to ensure economical use of AETC mission readiness training funds.

3.21.1.2. AFH 24-502 (formerly AFR 75-25) provides guidance on handling transportation problems.

3.21.2. Student Travel. Transportation instructions for students involve two separate considerations: travel in the area of the training site between quarters and the school; and in some cases to and from messing facilities. Vicinity mileage or special authorizations are not authorized without prior approval from HQ AETC and must be stated accordingly in the orders (see JFTR, paragraph M4413).

★3.21.3. **Special Authorizations**. When AETC authorizes other organizations to cite AETC funds in orders, this authorization is only for normal travel and per diem allowances that will accrue on the order. Therefore, the issuing or approval official must obtain concurrence from AETC for the additional expenditure prior to including special authorizations in orders (AFI 37-128).

★3.21.4. **Travel Between the Home Station and the Training Site**. It is AETC operation policy in allocating training quotas to Air Force activities to stipulate that military air transportation, when available, will be used for military personnel. Adherence to this policy by Air Force users ensures the most economical use of limited AETC mission readiness training funds. When military air transportation is not available, the use of commercial air is encouraged to permit the maximum use of commercial air excursion rates.

3.21.5. **Travel in the Area of the Training Site**:

3.21.5.1. Government transportation is usually available at DOD training installations, if required, for movement of students between their quarters, messing facilities, and the school. Exceptions for a particular installation may be found in special reporting instructions for the various training locations or in quota allocation correspondence.

3.21.5.2. When training is conducted under contract, students are expected to arrange for their own transportation unless quota

allocation correspondence indicates that government, contractor, common carrier, or special conveyance facilities are available. Then the student must use these facilities. When use of GSA or rental vehicle is authorized and approval for additional expenditure was obtained under paragraph 3.21.3 above, the number of vehicles must be held to a minimum through consolidation of students.

3.22. Preparation of Student Orders. For courses having either a security clearance or investigative requirement as a prerequisite for course entrance, state as applicable the type of investigation (NAC, BI, etc.) and degree of clearance possessed (for example, Secret, Top Secret). If access to Secret or Top Secret Crypto material is required, orders must also state that student is a US citizen (AFR 205-32). If a personnel security investigation (PSI) has been initiated but not completed, state the PSI type (NAC, BI, etc.), date submitted, investigating agency, and where the results are being sent. Include in the orders the course number, title, beginning date of designated class, and, if applicable, phase(s) to be pursued. Confirm degree of clearance by electrical transmission when use of mail channels does not ensure that orders will arrive in time to be used for access authority. See table 3.14 for mailing addresses and copies of orders to be forwarded to training units. Students hand-carry five copies of orders or they must be included in their field personnel records. Ensure compliance with paragraph 3.6.4.3.

3.23. Student Records Requirements. Complete and current field personnel records must be forwarded to the school per AFI 36-2608, *Military Personnel Records Systems* (formerly AFR 35-44) when assigned in PCS status. (If the pertinent records are not received by the training base, it is authorized direct communication with the parent or former organization.) Officers reporting for graduate flying training course in either TDY or PCS status must have completed all appropriate flying requirements listed in AFI 11-401 (formerly AFR 60-1) before reporting for training. Noncompliance will be basis for refusing enrollment according to section G, paragraph 1.45.3.3. For flying training training students (airlift/tankers) at Altus AFB and Keesler AFB, the following records are required: medical records, individual flight records, and flight evaluation folders. For all other flying training courses, see table 3.18 for records that students must have for each course.

3.23.1. For all flying courses at Altus AFB and Keesler AFB, medical flight physical and physiological training (altitude chamber) must be current for 30 days after the scheduled class completion.

3.23.2. All officers on active duty must demonstrate retainability consistent with the active duty service commitment (ADSC) incurred with the AETC tanker/airlift course.

3.23.3. Rated officers must validate their last completion date of instrument refresher course (IRC). IRC must be current through the planned course graduation date.

3.24. Special Reporting Instructions. See table 3.19, Reporting Instructions, AETC Flying Training, for each course.

3.25. AETC Tanker/Airlift Schools:

3.25.1. **Procedures:**

3.25.1.1. The 45 AS, Keesler AFB MS, conducts initial and instructor C-12 C/D/F and C-21A flying training; instructor lead-in training. For information on training class schedules and quotas, call 2 AF/DO, DSN 597-1339.

3.25.1.2. AETC airlift courses conducted by the 97 AMW, Altus AFB OK, include C-5 and C-141 aircrew initial qualification aircraft commander qualification, instructor pilot qualification, air refueling qualification, C-141 airdrop qualification, aircrew instructor (nonflying), line instructor course, classroom instructor course, instruction development course, and basic flight engineer qualification. See specific course announcement for quota control for those courses.

3.25.1.3. AETC 81 TRW, Keesler AFB MS, conducts C-12A pilot initial qualification course. For information on class schedules and quotas, contact 2 AF/DO, DSN 597-1339.

3.25.1.4. The 97 AMW, Altus AFB OK, conducts KC-135 pilot initial, instructor, and requalification training, navigator initial, instructor, and requalification training. Quota control for initial qualifications is HQ AFPC/DPMROT3, refresher and upgrade training is HQ AMC/XOTF.

3.25.2. **Security Clearance and Access**. Clearance and access requirements are shown in the course announcements, if required. See AFI 16-105, *Joint Security Assistance Training (JSAT)(Joint)* (formerly AFR 50-29), and AFI 16-201, *Foreign Disclosure of Classified and Unclassified Military Information to Foreign Governments and International Organizations* (formerly AFR 200-9), for specific instructions regarding disclosure authority for classified information to international students and exchange officers.

3.25.3. **Records Requirements**:

3.25.3.1. It is AMC policy for all aircrew members to have a valid official passport.

3.25.3.1.1. Personnel who have either a valid or an outdated passport, and who are in a pipeline school status and have not reported to their unit of assignment, will hand-carry their passports to the school.

3.25.3.1.2. Personnel who have reported to their unit of assignment and are TDY to the school for training do not need to have passports with them while at the school.

3.25.3.1.3. Applications for the official passports will be initiated at Altus AFB or Little Rock AFB only for those who have never had a passport or have an outdated one.

3.25.3.1.4. Airmen must have an original or a certified copy of their birth certificate to apply for a passport. An old passport meets this requirement when applying for a renewal.

3.25.3.1.5. Officers do not need a birth certificate if their personnel records are available. Officers holding a Reserve commission must meet the requirements of 3.25.3.1.4.

3.25.3.1.6. All applicants must be able to supply the information required by Department of State Form 11, Passport Application.

3.25.3.2. Students TDY en route PCS will carry their AFORMS transfer deck. Other TDY students will carry their flight records or AFORMS deployment tapes. Obtain these from the flight management office (AFM 171-190, vol II, chap 3).

3.25.3.3. For nonflying courses conducted at Altus AFB, no records are required. Exceptions: course 11330C requires **AF Form 1042, Medical Recommendations for Flying or Special Operations Duty**.

3.25.3.4. For CCT trainees, a current AF Form 1042, whose currency extends for 9 weeks beyond class start date, is required.

★3.26. AETC Fighter Training.

3.26.1. Reporting Instructions.

3.26.1.1. F-16C Training, Luke AFB AZ. All F-16 students arriving for training at Luke AFB will go to billeting to pick up a welcome package and establish lodging. If arrival is during duty hours, complete lodging arrangements and then contact the school registrar's office, Falcon Academics South, 14325 W. Squad Street, to verify course status. If arrival is after normal duty hours, pick up a welcome package and contact the school registrar on the next duty day. Squadron assignment and training instructions will be included in the welcome package. The school registrar's phone numbers are DSN 896-5742/7201, Fax DSN 896-6545 ((602) 856-5742.) Students with PCS orders to Luke AFB should arrive NLT 5 workdays before class start date to complete formal base in-processing. Students may be required to live in contract lodging off base; therefore, it is recommended that a POV or rental car be available while training at Luke AFB.

3.26.1.2. F-15 Training, Tyndall AFB FL. All F-15 students arriving for training at Tyndall AFB must pick up a welcome package at billeting. This package will contain initial in-processing instructions. The school registrar (325 OSS/OSTR) requests losing MPFs to fax a copy of inbound student's orders to Fax DSN 523-3359. Contact school registrar at DSN 523-4987 with further questions.

3.26.2 Security Clearance. Clearance and access requirements are shown in the course announcements, if required. See AFR 50-29, **Joint Security Assistance Training (JSAT) Regulation** (projected to be AFJI 16-105), and AFI 16-201, **Disclosure of Military Information to Foreign Governments and International Organizations**, for specific instructions regarding disclosure authority for classified information to international students and exchange officers.

3.26.3. Records Requirements. Refer to table 3.18.

Section H—Survival Training

3.27. Identities and Titles for Survival Training Courses. The course identity is composed of a one-position prefix, "S," a three-position course number code (letter V and 2 numerals), and an "A" indicator.

3.28. General Administrative Procedures:

3.28.1. Students report to TDY in accordance with table 3.20 and AFMAN 36-2110 (formerly AFRs 36-20 and 39-11).

3.28.2. Specify in orders: title and duration of course, class number, reporting date, fund citation, and security clearance. See table 3.21 for disposition.

3.28.3. Medical records must be hand-carried and include SF 600, Health Record - Chronological Record of Medical Care, documented by flight surgeon, medical officer, or senior aeromedical technician (90170) certifying physical qualifications for training. Personnel must be within weight requirements of AFI 40-502 (formerly AFR 35-11). Students arriving at any survival course in excess of weight standards will be denied training and returned to their home unit.

3.29. Class Start Dates. Refer to the current program flying training document (PFT).

3.30. Clothing and Equipment Requirements:

3.30.1. Students must have sufficient quantities of required uniforms to meet military dress standards at all times.

3.30.2. Personnel report for survival training with the items of flying clothing and personal equipment required to accomplish their assigned missions; items are listed in table 3.22. AFM 67-1, volume IV, part one, chapter 18, contains instructions on clothing and equipment items for personnel departing for survival training. ANG and Reserve personnel reporting to AETC survival training schools must have items listed in table 3.26. MPFs with quotas in courses listed in chapter 3, section J, must contact the students as soon as possible and tell them to report to the equipment management office. Personnel needing flight clothing and equipment, whether on flying status or returning to flying status, must sign the statement contained in table 3.22, in two copies. The original is filed in the TDY or PCS relocation folder and the duplicate is given to the person.

★3.31. Authorized Use of AETC Mission Readiness Training Funds for Survival Training. Student travel orders cite AETC survival training funds only if all five of the following conditions are met:

3.31.1. Training is conducted by:

3.31.1.1. AETC in a formal resident course.

3.31.1.2. AETC at a survival course location.

3.31.1.3. Army, Navy, or other Government agency (AETC obtains spaces and makes all allocations to Air Force users).

3.31.2. Student is an active duty Air Force officer or airman, Air Force civilian employee, or exchange officer filling an Air Force position.

3.31.3. Quota has been issued by HQ AETC (or by HQ USAF when specifically authorized by course announcement to issue quotas and commit AETC funds). Use of AETC fund citations when a school quota has been allocated or when it has been cancelled may result in the order publishing agency being designated as responsible for a violation under AFR 177-16.

★3.31.4. The training involved is conducted within CONUS. AETC funds are not authorized for the payment of any travel expenses incurred for training purposes outside the contiguous 48 states. Exception: AETC mission readiness training survival training funds are authorized for:

NOTES 1. Forward individual flight records for students with previous flying training.
2. ECL of 80SR or better; must be noted on orders.
3. ECL of 70 must be noted on orders.
4. US students only; forward information to unit of assignment.
5. ECL of 85 or better.
6. Records will be prepared and forwarded to US Navy and USCG servicing personnel offices.
7. Students will deliver these records to the servicing MPF 1 week prior to class report date.
8. US students with TS/SCI clearance, forward information to unit of assignment.
9. Security clearance must be indicated on orders.

NOTES 1. Oversea students should report at least 2 days before class start date.
2. Early reporting is authorized.
3. Early reporting required for extensive inprocessing before class start.
4. Report times are reflected in Invitational Travel Orders (ITO).
5. Due to extensive medical screening and testing prior to flying training, exact reporting dates will be provided in the travel orders. Early reporting is authorized. Report NLT 0750 on the reporting date to the 3d Flying Training Squadron orderly room, Lackland AFB, bldg 7450, room 5.
6. Students report at 0800 the following day to bldg 87. (C-5 and C-141 initial qualification pilots will report at 0730.)
SPECIAL TRAVEL INSTRUCTIONS: All incoming personnel traveling by commercial air should plan to arrive at Lawton. (Oklahoma Airport or WIll Rogers World Airport, and arrange ground transportation to Altus AFB. Personnel arriving at Lawton Airport should arrive NLT 1800 local time. Personnel arriving Oklahoma Airport or Will Rogers World Airport, Oklahoma City, should arrive NLT 1500 local time. Bus departs Will Rogers Airport for Altus at 1545 local time. Students arriving at times other than those above will have to use more costly linousine service, which requires advance reservations. Reservations may be made by calling Lawton AC (406)353-5503. Upon arrival at the Altus Bus Terminal, students may call Altus AFB at 481-7273 or 481-6346 for transportation. Government transportation will not be provided from Oklahoma City or Lawton. For assistance in routing, origin TMOs are invited to call the Altus AFB TMO travel section at DSN 866-7272. Personnel reporting TDY to Altus AFB should make advanced billeting reservations with the Altus Billeting Office, DSN 866-7144, Monday through Friday, 0700-1600.
7. All C-21A, C-12F, and C-9 initial qualification students will report to the designated commercially contracted academic/simulator training facility for approximately 2 weeks for the C-12F and C-21A and 4 weeks for the C-9. Students will then report to Keesler AFB for flying.
8. Due to limited space in quarters and nongovernment storage facilities, transient students should restrict HHG shipments to essential items only. If property is stored in a commercial fac ility, it will be at the student's expense.
9. All C21A, C-12F, C-12C/D initial qualification students will report to the designated commercially contracted academic/simulator training facility for approximately 2 weeks.
10. All F-16 formal aircrew training course students should pick up welcome packages at the Luke AFB billeting office. The 56 TRS School Registrar's office is located in the Falcon Academics South building on the south side of the base (DSN 896-5742, commercial 602-856-5742).

3.31.4.1. Travel and per diem of CONUS assigned personnel attending survival course at Eielson AFB in two-way TDY status.

3.31.4.2. Per diem only while in training status for all personnel in TDY-en route-PCS status attending survival courses conducted outside CONUS. All travel expenses are charged to the PCS appropriation.

★**3.32. AETC Survival Training Fund Citation.** Open allotment procedures are used for transportation, travel per diem, and school per diem for mission readiness training courses funded by AETC. These funds can be cited on bills of lading of shipment of personal effects only for that portion within the authorized TDY weight allowance plus approved professional equipment for use in connection with AETC training.

3.33. Specific Instructions by Course Number:

3.33.1. **S-V80-A, Combat Survival Training Course**:

★3.33.1.1. Select personnel for training in accordance with AFI 36-2209, *Survival and Code of Conduct Training* (formerly AFR 50-3). Training is a one-time requirement. Personnel who have successfully completed this course or AETC courses S-V81-A, S-V85-A, 140000, 140001, or USAFA (SERE) classes effective with class of 1970 and concluding with class of 1996 are not required to attend again.

★3.33.1.2. Students are attached to 336 TRG, Fairchild AFB WA 99011.

★3.33.1.3. Students report according to table 3.20. Students pick up school information folder from survival billeting office. Shuttle bus service departs Spokane International Airport to Survival School on Sundays at 1415 and 1715. Other military transportation will only be provided on a resource available basis. Vehicle dispatch local number is 247-2244. Travelers should be prepared to defray cost of commercial taxi to and from airport. Cost is approximately $16 each way. Travelers should read updated information in airport travel plaza area.

★3.33.1.4. Mess and billets are available. Billeting reservations are made by student administration for students. Automated teller machines and checking facilities are available. It is highly suggested to bring enough funds to cover per diem, billeting, taxi, etc., as well as other personal and unexpected costs.

★3.33.1.5. Class graduates Wednesday at 1700; airline departure reservations should not be made earlier than 1830. Shuttle bus service departs Survival School to Spokane International Airport on Wednesday at 1730 and Thursday at 0500.

3.33.1.6. Students will report with the mandatory clothing and equipment allowance according to table 3.22, or a certificate of nonavailability of issue for items not available.

★Table 3.20. Reporting Instructions for Survival Training.

6	S-V87-A		
7	S-V90-A	2	

3.33.2. **S-V81-A, Survival Training Instructor Course**:

3.33.2.1. Trainees enter by individual application under AFMAN 36-2110 procedures, or are selected from Basic Military Training Center under special AETC instructions or from those who apply under provisions of AFI 36-2204. Class enters according to the PFT and TPR. Application must be received 120 days before class start date. Trainees are assigned to survival school Code L, PCS Pipeline.

★3.33.2.2. Report to 66 TRS, Fairchild AFB WA 99011, by 0730, 30 working days before class start date to complete AETC courses S-V80-A and S-V90-A prior to instructor training.

3.33.3. **S-V81-B, Survival Instructor Indoctrination Course**:

3.33.3.1. Trainees enter after application is approved for special duty assignment under provisions listed in AFI 36-2204 and AFMAN 36-2110.

3.33.3.2. Students report to Lackland AFB TX billeting office no later than 1200 the day before class start date. Students are responsible for making their own reservations by contacting billeting at DSN 473-2556. Transportation from San Antonio International Airport can be arranged by contacting the Military Reception Station located in the airport. Commercial transportation is available for approximately $20. Commercial transportation cost is reimbursable when travel voucher is filed with receipt of expenditure. Students must contact the 342 TTS/STOC at building 10253 no later than 1400 on the Monday prior to class start date with mandatory clothing and equipment prescribed in table 3.22.

3.33.3.3. Airline reservations should not be made earlier than 1830 on the graduation date.

3.33.4. **S-V82-A**:

3.33.4.1. Students are selected by HQ AFPC/DPMRO.
3.33.4.2. Students report according to table 3.24 and are attached to OL-TY JSSA. Direct entry students report at the same time.

3.33.5. **S-V83-A, Special Survival Training**

★3.33.5.1. Major commands and type commands having missions that require special survival training as directed by HQ Air Force, Department of the Army, and Department of the Navy.

★3.33.5.2. Students are attached to OL-FA, JSSA, 800 W. Survival Loop, Fairchild AFB WA 99011-8600.

3.33.5.3. Direct entry students should bring medical records and report according to tables 3.24 and 3.25. Students pick up school information folder from survival billeting office. Shuttle bus service departs Spokane International Airport to Survival School on Sundays at 1415 and 1715. Other military transportation will only be provided on a resource available basis. Vehicle dispatch local number is 247-2244. Travelers should be prepared to defray cost of commercial taxi to and from airport. Cost is approximately $16 each way. Travelers should read updated information in airport travel plaza area.

★3.33.5.4. Class starts Monday at 0730 and graduates Friday. Airline departure reservations should not be made for earlier than 1330 Fridays.

3.33.6. **S-V84-A, USN Underwater Egress Training**:

3.33.6.1. Select personnel for training according to AFI 36-2209 (formerly AFR 50-3). Training is a mandatory one-time requirement for all primary Air Force helicopter aircrew members (includes pilots, flight engineers, pararescue/recovery specialists/technicians, and general gunners) and as required for frequent flyers (individuals other than primary helicopter aircrew members who perform frequent duties on overwater helicopter missions).

★3.33.6.2. Training is conducted at three USN locations. Training site will be chosen closest to the student's permanent duty station. Reporting instructions will be provided by course quota message by 336 TRSS/MTF upon receipt of message or notification from student's MAJCOM or pipeline manager.

3.33.6.3. Students will report in flight suit/fatigues, with a swim suit, towel, and one pair of heavy socks.

3.33.7. **S-V86-A, Water Survival Training Course**:

3.33.7.1. Select personnel for training according to AFI 36-2209 (formerly AFR 50-3). Training is a one-time requirement. Personnel who have successfully completed the following courses are not required to attend again: TAC course 150000; ADC course 180000; PACAF course 160000 (course conducted at Namazu, Japan, creditable if parasail and drag training were documented on individual training certificate); combat diver course J5AZA11530 (only for those individuals assigned duty as pararescue, recovery superintendent, technician, or specialist).

★3.33.7.2. Students report according to table 3.24 and are attached to 17 TRS, NAS Pensacola FL. When traveling by commercial air, plan to arrive at Pensacola Municipal Airport no later than 2100 on the day before class start date. No military transportation available from the airport to NAS Pensacola. Commercial taxi service is available at a cost of approximately $25 which is reimbursable (with a receipt) when you file your travel voucher.

★3.33.7.3. Students must pick up an information brochure from billeting personnel. Dependents will not be quartered on base. Students should have sufficient funds to pay billeting and messing costs. Billeting reservations are made by 17 TRS. Administration. Students are responsible for contacting billeting (BEQ: DSN 922-4609; VOQ: DSN 922-2756) to verify if billets will be on base or contract quarters.

NOTES

1. Tennis shoes acceptable substitute during water phase of training.
2. Authorized 1 May through 30 September.
3. BDU only. Flight coverall not authorized.
4. For course S-V87-A, two sets of coveralls, flying (winter), if available.
5. Required 1 October through 30 April.
6. One pair mandatory, second pair recommended.
7. Medical records must include SF 600, documented by flight surgeon, medical officer, or senior aeromedical technical (4F071) certifying physical qualifications for training.
8. Recommended to provide windchill protection during water training, October through March.
9. Not required for training, students desiring to use base facilities should have appropriate civilian or military attire.
10. Student is required to bring tennis shoes without black soles. Students attending course S-V90-A may substitute aqua socks for tennis shoes.
11. Contents must be approved by school staff.
12. Folding blades are acceptable; fixed blade must not exceed 5 inches in length.

Civilians must have suitable substitute of equal quality. Additional equipment issued at those schools having field training phase. No individual equipment unit (538) facilities exist at any schools. Non-issue items subject to approval of school staff. No facilities for laundry, purchasing, resupply, or exchange of clothing items during field phases. ***FIREARMS PROHIBITED AT ALL SCHOOLS***.

Reference AFM 67-1, vol IV, part 1, chapter 18, paragraph 3f(4). I understand that I am required to hand-carry the clothing and equipment in my possession as required for the survival training course listed in my orders. I further understand that I must report to the Equipment Management Office (EMO) as soon as possible to assure that clothing and equipment required to be in my possession prior to departure is obtained and issued to me, if available.

_____ X_____

DATE SIGNATURE

3.33.7.4. Classes enter on Tuesday and will normally graduate on Friday. Airline departures should not be scheduled for earlier than 1530 on the day of graduation.

3.33.7.5. Students will report with the mandatory clothing allowance prescribed in table 3.22, or a certificate of nonavailability of issue.

3.33.7.6. Students must be within AFI 36-2903 (formerly AFR 35-10) standards prior to arrival for water survival training. Compressed course training schedule and long duty day do not permit free time for haircuts, etc., during course attendance.

3.33.8. **S-V87-A, Arctic Survival Training Course**:

3.33.8.1. Select personnel for training according to AFI 36-2209 (formerly AFR 50-3). The course is mandatory for all Eleventh Air Force aircrew members. The training is a one-time requirement.

★3.33.8.2. The students will report according to table 3.24 and are attached to Detachment 1, 336 TRG. The course operates approximately 1 November through 1 April. The class graduates on Fridays at 1330; airline departure reservations should not be made for earlier than 1630.

★3.33.8.3. There is limited military transportation from Fairbanks IAP to Eielson AFB. When traveling by commercial air, students should try to arrive at Fairbanks IAP no earlier than 1630 and no later than 2030. A military bus will leave from the airport for Eielson AFB at 1700 and 2100. Students arriving at other times should contact 354 TRNS/LGTO, DSN 317-377-1843, 24 hours in advance to arrange for transportation. Last minute transportation requests will result in long delays due to the distance between the base and the airport and hazardous road and weather conditions. Any claim for taxi fare reimbursement must be supported by proof of extenuating circumstances. Table 3.22 contains a list of required clothing and equipment for the course. Students should call ahead for lodging reservations at DSN 317-377-1844. Upon arrival, proceed directly to lodging and report to the detachment according to table 3.24.

3.33.9. **S-V90-A, Water Survival, Non-Parachuting**:

3.33.9.1. Select personnel for training according to AFI 36-2209 (formerly AFR 50-3). Training is a one-time requirement. Personnel who have successfully completed the following courses are not required to attend again: TAC course 150000; ADC course 180000; PACAF course 160000 (course conducted at Namazu, Japan); scuba course 5AZN82230 and 5AZN92230 001 (only for those persons assigned duty as pararescue, recovery, superintendent, technician, or specialist). USAFA graduates effective with the class of 1981 will receive credit for S-V90-A.

★3.33.9.2. Students are attached to 336 TRG, Fairchild AFB WA 99011.

★3.33.9.3. Students report according to table 3.24. Students pick up school information folder from survival billeting office. Shuttle bus service departs Spokane International Airport to Survival School on Sundays at 1415 and 1715 and on Wednesdays at 1800. Other military transportation will only be provided on a resource available basis. Vehicle dispatch local number is 247-2244. Travelers should be prepared to defray cost of commercial taxi to and from airport. Cost is approximately $16 each way. Travelers should read updated information in airport travel plaza area.

★3.33.9.4. Class starts Monday and Thursday and graduates Tuesday and Friday; airline departure reservations should not be made for earlier than 1830 on graduation day. Shuttle bus service departs Survival School on Saturdays at 0500.

3.33.9.5. Mess and billets are available.

3.33.9.6. Students will report with the mandatory clothing and equipment allowance prescribed in table 3.22, or a certificate of nonavailability of issue.

3.33.10. **J-AB-AP, Joint Aviation Preflight Indoctrination (API).** Physical conditioning requirements for all students attending flight training at NAS Pensacola are very rigorous. Upon reporting for training, students must pass swim, cross-country run, and obstacle course tests before continuing training.

Section I–58 SOW Formal School Flying, Flying-Related, and Simulator Refresher Training

3.34. General. The 58 SOW conducts courses as shown in the 58 SOW Program Flying Training (PFT) document and HC-130, MH-53J, and M/HH-60 simulator refresher courses. Courses are conducted at Kirtland AFB NM except for combat control team courses conducted at Pope AFB and some advanced pararescue courses conducted at Nellis AFB NV. For a copy of, and to be placed on the distribution list for the 58 SOW PFT, contact 58 OG/OGUC at DSN 246-7350. The 58 SOW PFT is normally published in May for the following fiscal year. Changes are published via message as required.

3.35. Course Identities and Titles:

3.35.1. **Formal School Flying Courses.** The course identity is composed of M/D/S (weapons system mission/design/series [series, if applicable]), crew position, and type qualification.

3.35.1.1. Example of a formal school flying course identity, MC-130HEWOMQ:

MC130H - Mission, Design, and Series Aircraft

EWO - Electronic Warfare Officer

MQ - Mission Qualification

3.35.1.2. Example of a formal school flying course title: MC-130H Electronic Warfare Officer Mission Qualification.

3.35.2. **Nonflying Formal School and Simulator Refresher Courses**. The course identity is comprised of an acronym (containing weapons system mission/design/series, if applicable, for simulator refresher courses) or an AFSC with a 2-digit suffix identifying a specific phase of instruction.

3.35.2.1. Examples of a formal school nonflying or simulator refresher course identity and title:

3.35.2.1.1. BHFE - Basic Helicopter Flight Engineer.

3.35.2.1.2. 1T231-01 - Pararescue Paramedic Certification.

3.35.2.1.3. HC130FESR - HC-130 Flight Engineer Simulator Refresher.

3.36. Quota Procedures for Formal School Courses:

3.36.1. For proper prioritization, quota requests must be received by the quota control authority a minimum of 90 days before class start date. Quota requests received after 90 days before class start date will be allocated on a space-available basis.

3.36.2. The quota control authority will allocate quotas through the pipeline management system a minimum of 30 days before class start date. Confirmed allocated quotas cannot be returned

within 30 days of class start date unless a valid emergency arises. Units may substitute an individual with another individual provided the substituted individual meets all prerequisites and the unit notifies:

3.36.2.1. The unit's respective quota control OCR listed in applicable course announcements.

3.36.2.2. The quota control authority as listed in the applicable course announcements.

3.36.2.3. The 58 OG/CC and 58 OSS/RR.

3.37. Procedures for Simulator Refresher Courses. Simulator refresher class start dates are not published as part of the 58 SOW PFT; however, simulator refresher courses are conducted weekly, as determined by simulator availability. MAJCOMs (ANGRC/DOT and AFRES/DOT) must notify HQ AETC/XOTS of their requirements for simulator refresher training for the following fiscal year by 1 July. HQ AETC/XOTS will allocate complete crew simulator refresher quotas to specific MAJCOM (ANGRC/DOT and AFRES/DOT for ARC forces) quota control OCRs based on their requirements for simulator refresher training. Each MAJCOM's quota control OCRs will allocate specific complete crew (as applicable) quotas to their units. Units must notify the agencies in paragraphs 3.35.2.1, 3.35.2.2, 3.35.2.3, and 512 SOS for H-60, 551 SOS for H-53, or 550 SOS for HC-130 students as appropriate. Units are responsible for filling applicable complete crew simulator refresher quotas and should coordinate with other units to fill quotas. No partial crews will receive simulator refresher training.

3.38. Course Prerequisite Requirements. Before departing, students who do not meet required prerequisites must obtain a waiver from 19 AF/DO, who will coordinate prerequisite waiver requests with the appropriate MAJCOM. In-unit courses must meet the same prerequisites and requirements as formal training courses.

3.39. Clothing, Equipment, and Special Requirements:

3.39.1. Students must have sufficient quantities of required uniforms to meet military dress standards at all times. Summer uniform combinations are optional for year-round wear at Kirtland AFB.

3.39.2. Flying clothing, equipment, and special requirements for individuals attending training in 58 SOW courses conducted at Kirtland are shown in table 3.23. AFM 67-1, volume IV, part one, chapter 21, gives instructions on clothing and equipment items to be kept or issued for those who are to leave their unit. Individuals should report to their EMO before departing home station either TDY and return, TDY en route, or PCS whether they are on flight status, returning to flight status, or initially going on flight status, who require flight clothing, equipment, or have special requirements to obtain required items before departing (TDY or PCS) their unit of assignment for training. These individuals must read and sign the statement shown in table 3.23 in two copies. One copy is filed in the individual's TDY/PCS relocation folder and the second copy is given to the individual to hand-carry. Flying clothing, equipment, and special requirement items for ANG and AFRES students (whether or not they are pipeline students) must be issued by the appropriate AFRES or ANG unit before the individual's arrival for training at Kirtland AFB. Required flying clothing, equipment, and special requirement items for all other pipeline students will be issued by the 58 SOW. For nonpipeline students who report for training without required flying clothing, equipment, or special requirement items, the appropriate unit will be contacted for a fund cite (AF Form 616) to issue required items. Clothing, equipment, and special requirements for 58 SOW courses conducted at locations other than Kirtland are specified in the applicable course announcements.

3.40. Funding Procedures for 58 SOW-Conducted TDY Student Training:

3.40.1. **TDY Not Incident to PCS**. The following funding procedures apply to 58 SOW-conducted courses:

3.40.1.1. Funding. Funding is the responsibility of the 58 SOW if the:

3.40.1.1.1. Student is an active duty Air Force officer or airman or an exchange (US Army, Navy, Marine, or Coast Guard) officer filling an authorized Air Force exchange position. Funding for other non-Air Force students is the responsibility of the respective branch of service.

3.40.1.1.2. Quota has been issued by HQ AETC.

3.40.1.2. Travel and Per Diem Funds. Travel and per diem funds to the closest CONUS port is the responsibility of the overseas unit for students returning TDY from overseas (non-CONUS) for simulator refresher training.

3.40.1.3. Exceptions. 58 SOW funds are not authorized to hire taxis, limousines, rental cars, etc., for use at the TDY location and in the vicinity while the student is TDY to attend any 58 SOW course. TDY orders must contain a separate unit fund cite for these authorizations.

3.40.1.4. Obtaining Fund Cites. The order issuing authority must contact the 58 SOW/FM to obtain a fund cite for each separate TDY order. Contact the 58 SOW/FM at DSN 246-5800 ext 537 or FAX 246-6093.

3.40.1.5. Travel Vouchers. Units must provide the 58 SOW/FM with the amount of each paid travel voucher by fund cite and special order number within 30 days of completion of travel or new fund cites for other training will not be issued to that unit until all outstanding unpaid TDY orders are cleared. This includes notifying the 58 SOW/FM of TDY orders that are published and not used.

3.40.2. **TDY Incident to PCS**. If the TDY-to-school is incident to PCS, regardless of a cost-effective determination either TDY and return or TDY en route, the funding procedures in paragraph 3.40.1.1 apply. (The MAJCOM functional area has determined TDY-to-school to be mission essential for the PCS move, especially to the overseas area. AFO must provide the fund citation upon request. Commanders cannot deny the use of the fund citation for a TDY-to-school without prior approval of their functional area.)

3.40.3. **TDY Orders Special Requirements**. Student TDY orders for flying courses listed in the 58 SOW PFT must contain, "Variation Authorized."

3.40.4. **Advanced Distribution of Orders**. For all 58 SOW-conducted and -funded training, the orders issuing authority must mail two copies of orders to 58 SOW/FM, 4249 Hercules Way SE, Kirtland AFB NM 87117-5861. Orders should be mailed to arrive no later than 8 days before class start date. Additionally, for courses conducted at Pope AFB, one copy of the orders should be mailed to OL-C 58 OSS, 359 Saberjet St, Pope AFB NC 28308-2298, to arrive 8 days before class start date, and for

courses conducted at Nellis, two copies of orders should be mailed to OL-AOL-A 58 OSS, 8021 Davis Monthan Ave, Nellis AFB NV 89191-6120, to arrive 10 days before class start date.

3.41. Student Records Requirements. Students attending flying courses at Kirtland must hand-carry their medical records, individual flight records, and flight evaluation folder. Students TDY - PCS en route must hand-carry both a current AFORMS individual data sheet (IDS) and flight records. Students TDY - returning to home station: (1) For courses of 90 days or less in duration - students must bring AFORMS IDS in lieu of flight record, and (2) For courses of 91 days or more in duration, students must have their AFORM record electronically transferred and hand-carry their flight record. Simulator refresher students require no records. For CCT training conducted at Pope AFB, finance records must accompany the student unless the individual is under the Sure Pay program and the student must have a current Class III (or higher) flight physical. Additionally, CCT students must hand-carry their AF Forms 702 and 1042.

Section J–Course Announcements

Flying and Survival Training

B-V5A-K—WSO Introduction to Fighter Fundamentals (AT-38B)—PDS Code WKY—Randolph/approx 6 wk/MASL D114031—Oct 96

Familiarizes WSOs with the basic tactical environment and physiological adaptation while performing crew tasks in a maneuvering fighter aircraft. Designed as a fighter transition course between SUNT and follow-on Air Force fighter training. It is not a stand-alone fighter qualification course. Graduates will be qualified to attend operational fighter training courses. Approximately 6 flying hours.

Prerequisites: WSOs entering this course will be SUNT systems officer (SO) course graduates selected to attend operational fighter training courses. ECL 80 S0.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOT.

OPR: 19 AF/DOU.

B-V5A-M—AT-38B Instructor WSO Training (IFF)—PDS Code WKZ—Randolph/approx 12 wk/AFSC K1555P—Oct 96

Qualifies weapon system officers (WSO) as introduction to fighter fundamentals (IFF) instructor WSOs in the AT-38B. Approximately 17 flying hours.

Prerequisites: 500 FW/MW/IW hours in fighter aircraft (AFSC 1555) or 1000 total hours with 300 FW/MW/IW hours in fighter aircraft.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOT.

OPR: 19 AF/DOU.

B-V7C-E—Introduction to Electronic Combat Course—PDS Code V7H—Corry Station/1 wk—Oct 96

This course provides information on electronic combat (EC) policy, EC fundamentals, EC history, Soviet radio-electronic combat (REC), hostile air defense systems, Blue/Gray air defense systems, electronic warfare (EW) support measures (ESM)/signals intelligence (SIGINT), radar warning receivers (RWR), electronic counter-countermeasures (ECCM), electronic countermeasures (ECM), EW integrated reprogramming (EWIR), electro-optics (EO), command, control, and communications countermeasures (C3CM), suppression of enemy air defenses (SEAD), and EC training.

Prerequisites: Officers (2d Lt-Maj), enlisted (SSgt-CMSgt), and selected DOD civilian employees who have a need to know about Air Force EC programs, particularly (though not limited to) the following: engineers, EC/EW training officers, intelligence officers, pilots, navigators, operational planners, mission analysts, program managers, and selected intelligence NCOs who possess a primary 7-level 20XXX AFSC and are assigned to intelligence support duties that need specialized knowledge of Air Force EC programs.

Special Requirements: US citizen with Secret clearance by class start date.

Admin Instructions: Duty status is TDY. Send attendee's full name, SSN, duty title, military address, phone number, and clearance to the JAVEW Department, NTTC Corry Station, Pensacola, FL 32511-5000 ATTN: SPECTRA, NLT 3 weeks before class start date. Three copies of attendee's orders should arrive at the JAVEW Department NLT 10 days before class start date. Students will report NLT 0730 on class start date to the security gate of building 516, NTTC Corry Station, Pensacola. Bring a copy of orders and documentation of security clearance. Standard uniform is blues (short-sleeved service uniform). Point of contact is the SPECTRA course manager, DSN 922-6329. Attendee should be prepared to present a 5- to 15-minute briefing on his or her current position or agency's operation as it pertains to electronic combat. Attendee is responsible for his or her own billeting reservations.

Quota Control: Determined by HQ USAF/XOOT; allocated by HQ AETC/XOTI.

OPR: 19 AF/DOU.

B-V7C-G—Senior Officer Electronic Combat Course—PDS Code ZKE—Corry Station/3 days—Oct 96

Provides information concerning use of the electromagnetic spectrum to help the decision-making process by familiarizing senior commanders and managers with the fundamentals of electronic combat (EC), command and control warfare (C2W), and suppression of enemy air defenses (SEAD).

Prerequisites: Lt Col selectee and above, and equivalent grade DoD civilians who do not have an electronic warfare background and have a need to know the status of Air Force electronic combat programs.

Special Requirements: US citizen with Secret clearance by class start date.

Admin Instructions: Duty status is TDY. Send attendee's full name, SSN, duty title, military address, phone number, and clearance to the JAVEW Department, NTTC Corry Station, Pensacola, FL 32511-5000, ATTN: SPECTRA, NLT 3 weeks before class start date. Three copies of attendee's orders should arrive at the JAVEW Department NLT 10 days before class start date. Students will report NLT 0730 on class convening date to the security gate of building 516, NTTC Corry Station, Pensacola. Bring a copy of orders and documentation of security clearance. Standard uniform is blues (short-sleeved service uniform). Point of contact is the SPECTRA course manager, DSN 922-6329. Attendee should be prepared to present a 5- to 15-minute briefing on his or her current position or agency's operations as it pertains to electronic combat. Attendee is responsible for his or her own billeting reservations.

Quota Control: HQ USAF/XOOT; allocated by HQ AETC/XOTI.

OPR: 19 AF/DOU.

B-V7C-M—Electronic Combat Operations/Staff Officer Course (SATP)—PDS Code VA1—Corry Station/7 wk/MASL D136027—Oct 96

Training includes fundamentals of electronic warfare, air defense systems operations, tactical electronic warfare operations, and electronic warfare management.

Prerequisites: Officers of NATO and selected HQ USAF approved countries. ECL 80 SR.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Duty status is TDY. Send attendee's full name, SSN, duty title, military address, phone number, and clearance to the JAVEW Department, NTTC Corry Station, 640 Roberts Ave., Pensacola, FL 32511-5000, ATTN: Code 40/SPECTRA, NLT 3 weeks before class start date. Three copies of attendee's orders should arrive at the JAVEW Department NLT 30 days before class start date. Students will report NLT 0800, 3 days before class start date and NLT 1200, 1 work day before class start date to Internal Military Student Office (IMSO), building 501, Room 101, NTTC Corry Station, Pensacola. Bring a copy of orders and documentation of security clearance. Unit of assignment is Naval Technical Training Center, Pensacola Code SP22. IMSO phone number is (904) 452-6580 or DSN 922-6580. Standard uniform is blues (short-sleeved service uniform). Point of contact is the SPECTRA course manager, DSN 922-6329.

Quota Control: HQ USAF/DPPT.

OPR: 19 AF/DOU.

B-V7C-N—Electronic Combat Operations/Staff Officer Course (SATP)—PDS Code 4PJ—Corry Station/7 wk 3 days/MASL D136028—Oct 96

Training includes fundamentals of electronic warfare, air defense systems operations, tactical electronic warfare operations, and electronic warfare management.

Prerequisites: Officers of NATO countries. ECL 80 SR.

Special Requirements: US Secret and NATO Secret clearances by class start date.

Admin Instructions: Duty status is TDY. Send attendee's full name, SSN, duty title, military address, phone number, and clearance to the JAVEW Department, NTTC Corry Station, 640 Roberts Ave., Pensacola, FL 32511-5000, ATTN: Code 40/SPECTRA, NLT 3 weeks before class start date. Three copies of attendee's orders should arrive at the JAVEW Department NLT 30 days before class start date. Students will report NLT 0800, 3 days before class start date and NLT 1200, 1 work day before class start date to Internal Military Student Office (IMSO), building 501, Room 101, NTTC Corry Station, Pensacola. Bring a copy of orders and documentation of security clearance. Unit of assignment is Naval Technical Training Center, Pensacola Code SP22. IMSO phone number is (904) 452-6580 or DSN 922-6580. Standard uniform is blues (short-sleeved service uniform). Point of contact is the SPECTRA course manager, DSN 922-6329.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

B-V7C-O—Electronic Combat Staff/Refresher Course—PDS Code 6DF—Corry Station/1 wk—Oct 96

Provides a review of recent developments in electronic combat policy. the acquisition cycle, the threat, and selected equipment capabilities. Prepares officers and equivalent grade DOD civilians, who have a prior familiarity in basic electronic warfare equipment and principles, to serve in electronic warfare staff positions or return to operational duty from staff assignments.

Prerequisites: Course attendees are limited to officers with electronic warfare background and AFSC 1575/2295W and selected DOD civilian employees with a minimum of 5 years of experience in electronic warfare. Attendees not meeting these requirements should attend AETC course B-V7C-E, Introduction to Electronic Combat, or AETC course B-V7C-G, Senior Officer Electronic Combat (limited to Lt Col selectees and above).

Special Requirements: US citizen with Secret clearance by class start date.

Admin Instructions: Duty status is TDY. Send attendee's full name, SSN, duty title, military address, phone number, and clearance to the JAVEW Department, NTTC Corry Station, Pensacola, FL 32511-5000, ATTN: SPECTRA, NLT 3 weeks before class start date. Three copies of attendee's orders should arrive at the JAVEW Department NLT 10 days before class start date. Students will report NLT 0730 on class convening date to the security gate of building 516, NTTC Corry Station, Pensacola. Bring a copy of orders and documentation of security clearance. Standard uniform is blues (short-sleeved service uniform). Point of contact is the SPECTRA course manager, DSN 922-6329. Attendee should be prepared to present a 5- to 15-minute briefing on his or her current position or agency's operation as it pertains to electronic combat. Attendee is responsible for his or her own billeting reservations.

Quota Control: HQ USAF/XOOT and HQ AETC/XOTI.

OPR: 19 AF/DOU.

B-V7D-E—Instructor Navigator Training (T-43)—PDS Code Y3J—Randolph/10 wk/MASL D115043—Oct 96

Qualifies navigators to perform duties as instructor navigators in specialized undergraduate navigator training. Instruction includes aircraft (T-43) and instructor qualifications.

Prerequisites: Must have been selected for instructor duty. For international students: ECL 80 SO and individual flying background data submitted to AFSAT/TO as soon as possible, but not later than 60 days before English language training start date. Criteria for all candidates:

a. All candidates nominated for AETC instructor navigator duty must: (1) have their operations group (OG) commander's recommendation for AETC flying training instructor duty; (2) not have a Q-3, or unqualified rating, on any flight check in the last 2 years of active flying; and (3) not have more than one Q-2, or have additional training required, on any flight check in the last 2 years of active flying.

b. Candidates must be medically qualified to fly.

Application Procedures: Send one copy of AF Form 942, the last 3 year's AF Forms 8, and the OG/CC's letter to HQ AETC/DPRO. Those who do not meet the prerequisites in paragraph a above must be considered on a waiver basis. If a waiver is required, include one copy of all AF Forms 8, plus a statement from the officer's squadron commander concerning the officer's flying skills and professional qualities in addition to the requirements listed above. HQ AETC/DPRO will forward a copy of the package to 19 AF/DOT. Waivers will be considered on an individual basis by 19 AF/DOT in coordination with the 12 FTW/OG and must be approved before member departs PCS. If a candidate receives a subsequent AF Form 8 graded less than Q-1 after the package has been submitted, forward one copy of the AF Form 8 to HQ AETC/DPRO as soon as possible. HQ AETC/DPRO will forward to 19 AF/DOU.

Quota Control: HQ AETC/DPRO and HQ AETC/XOTI.

OPR: HQ AETC/XOTI.

F-V5A-A(001)—Pilot Instructor Training (T-37)—PDS Code ELS—Randolph/14 wk/AFSC 1355B/MASL D115008—Oct 96

Qualifies pilots to perform duties as T-37 instructor pilots in UPT/SUPT. Training consists of diversified flying in the T-37 aircraft and simulator. Academic training includes applied aeronautics. flight planning, methods of instruction and ancillary topics.

Prerequisites: Must have an aeronautical rating of pilot and an instrument rating. The flight physical (qualified for ejection seat aircrew duty IAW Class III medical standards) and physiological training (altitude chamber) must be current and remain valid for the duration of the course. Candidates are nominated by other commands or may be recent graduates of UPT/SUPT, ENJJPT, or fixed wing qualification. Candidates from other commands must meet the following criteria:

a. Candidates from single pilot aircraft must have achieved mission-qualified status. Those from other aircraft must have achieved aircraft commander status.

b. Must have no more than two Q-2s or one Q-3 on any evaluation (flight or ground) in the last 3 years of active flying.

c. Must have their wing commander's recommendation for AETC IP duty.

Candidates who do not meet the above criteria may be recommended to AETC for a waiver. In these cases, forward to HQ AFPC/DPMROT one copy of the AF Form 942, one copy of all AF Forms 8 and a written statement from the candidates' wing or squadron commander concerning the individuals' flying skills and professional qualities. Once a candidate is accepted for AETC IP duty and any of the above criteria changes, the wing or squadron commander will immediately notify HQ AFPC/DPMROT. International candidates must meet the following additional criteria:

a. Current jet qualification.

b. ECL 80 SO.

c. Familiarity with ICAO/USAF instrument procedures (ILS, VOR, etc.).

Admin Instructions: Student orders indicate variations in itinerary authorized to conduct required navigation training. Return to home station on navigation flights does not terminate these orders. Personnel who previously attended an AETC jet pilot instructor training course are assigned using course number F-V5A-A(002) and PDS code ZFN. All trainees should have controlled area badges (AF Form 1201) before reporting to training.

Quota Control: HQ AFPC/DPMRO.

OPR: 19 AF/DOU.

F-V5A-A(002)—Pilot Instructor Training (T-37)—PDS Code ZFN—Randolph/14 wk/AFSC 1355B—Oct 96

Course is identical to F-V5A-A(001). However, for administrative reasons, personnel who have previously attended an AETC jet pilot instructor training course are assigned using this course number and PDS code.

OPR: 19 AF/DOU.

F-V5A-B(001)—Pilot Instructor Training (T-38)—PDS Code ELU—Randolph/14 wk/AFSC 1355C/MASL D115012—Oct 96

Screens instructor potential and qualifies pilots to perform duties as T-38 instructor pilots in UPT/SUPT. Training consists of diversified flying in the T-38 aircraft and simulator. Academic training includes applied aerodynamics, flight planning, methods of instruction, and ancillary topics.

Prerequisites: Must have an aeronautical rating of pilot and an instrument rating. The flight physical (qualified for ejection seat aircrew duty IAW Class III medical standards) and physiological training (altitude chamber) must be current and remain valid for the duration of the course. Candidates are nominated by other commands or may be recent graduates of UPT/SUPT, ENJJPT, or fixed wing qualification. Candidates from other commands must meet the following criteria:

a. Candidates from single pilot aircraft must have achieved mission qualified status. Those from other aircraft must have achieved aircraft commander status.

b. Must have no more than two Q-2s or one Q-3 on any evaluation (flight or ground) in the last 3 years of active flying.

c. Must have their wing commander's recommendation for AETC IP duty.

Candidates who do not meet the above criteria may be recommended to AETC for a waiver. In these cases, forward to HQ AFPC/DPMROT one copy of the AF Form 942, one copy of all AF Forms 8, and a written statement from the candidates' wing or squadron commander concerning the individuals' flying skills and professional qualities. Once a candidate is accepted for AETC

IP duty and any of the above criteria chanages, the wing or squadron commander will immediately notify HQ AFPC/DPMROT. International candidates must meet the following additional criteria:

a. Current jet qualification (high performance jet experience required).

b. ECL 80 S0.

c. Familiarity with ICAO/USAF instrument procedures (ILS, TACAN, etc.).

Admin Instructions: Student orders indicate variations in itinerary authorized to conduct required navigation training. Return to home station on navigation flight does not terminate these orders. Personnel who previously attended an AETC jet pilot instructor training course are assigned using course number F-V5A-B(002) and PDS code ZFP. All trainees should have controlled area badges (AF Form 1201) before reporting to training.

Quota Control: HQ AFPC/DPMRO.

OPR: 19 AF/DOU.

F-V5A-B(002)—Pilot Instructor Training (T-38)—PDS Code ZFP—Randolph/14 wk/AFSC 1355C—Sep 93

Course is identical to F-V5A-B(001). However, for administrative reasons, personnel who have previously attended an AETC jet pilot instructor training course are assigned using this course number and PDS code.

F-V5A-E—T-1A Pilot Instructor Training (PIT)—PDS Code Y7R—Randolph/approx 13 wk—Oct 96

Qualifies rated pilots for instructor pilot duty in the T-1A Jayhawk. Trains rated pilots in T-1A ground and flight operations. Students learn to fly and instruct all phases of T-1A SUPT—transition, instruments, navigation, formation, low level, air drop, and air refueling. Approximately 68 flying hours.

Prerequisites: Rated pilot, airlift, or tanker MWS experience highly desired.

Quota Control: HQ AETC/XO.

OPR: 19 AF/DOU.

F-V5A-F—Enhanced Flight Screening Pilot Instructor Training—PDS Code 1NI—Hondo/4 wk/AFSC 011T3B/MASL D115101—Oct 96

Screens instructor potential and qualifies pilots to perform duties as T-3 instructor pilots at Hondo Municipal Airport, TX, or USAF Academy, Colorado Springs CO, in enhanced flight screening (EFS). Consists of diversified flying in the T-3 aircraft. Academic training consists of aerodynamics, aircraft systems, and instructor development.

Prerequisites: **Military**: an aeronautical rating of pilot and an instrument rating. **Civilian** IAW contract. **Both Military and Civilian**: The flight physical and physiological training must be current and remain valid for the duration of the course. All candidates will have accomplished trainer, attack, recce, fighter (TARF) physiological training academics before arriving for PIT. Active-duty candidates nominated from other commands must meet the following criteria:

a. Candidates from single seat pilot aircraft must have achieved mission qualified status. Those from other aircraft must have achieved aircraft commander status.

b. Must not have more than two Q-2s or one Q-3 on any evaluation (flight or ground) in the last 3 years of active flying.

c. Must have wing commander's recommendation for AETC IP duty.

Candidates who do not meet the above criteria may be recommended to AETC for a waiver. In these cases, forward to HQ AFPC/DPAOM6 one copy of the AF Form 942, one copy of all AF Forms 8, and a written statement from the candidate's wing or squadron commander concerning the individual's flying skills and professional qualities. Once a candidate is accepted for AETC IP duty and any of the above criteria changes, the wing or squadron commander will immediately notify HQ AFPC/DPAOM6. International students must meet the following additional criteria:

a. Current jet qualification.

b. Familiarity with ICAO/USAF instrument procedures.

c. ECL 80 SO.

Quota Control: HQ AETC/XOTI.

F-V5A-H—T-43 Pilot Initial Qualification—PDS Code 2XC—Mather/8 wk/AFSC 1041R/MASL D112016—Oct 96

Qualifies pilots in T-43 as copilot or first pilot. lncludes training in ground school, cockpit procedural trainer, flight simulator, and aircraft transition.

Prerequisites: Trainees selected to attend must be rated pilots currently on flying status. Medical flight physical, physiological training (altitude chamber), and instrument refresher course must be current or at least 120 days from class start date.

Special Requirements: Must have mandatory personal equipment items when reporting. ECL 80 SO.

Quota Control: HQ AFPC/DPMRO.

OPR: 19 AF/DOU.

F-V5A-J—Banked Pilot Requalification Training (T-38)—PDS Code Y37—location */9 wk—Oct 96

Trains graduates of UPT/SUPT for entry into follow-on flying training courses. Consists of approximately 37 flying hours, 14 simulator hours, and 50 academic hours. To maximum extent possible, students should be current in physiological training (altitude chamber).

Prerequisites: Completion of P-V4A-A or P-V4A-B.

Quota Control: HQ AETC/XO.

OPR: 19 AF/DOU.

* See table 3.23.

B/F-V5A-K—Introduction to Fighter Fundamentals (IFF) (AT-38B)—PDS Code WY1—various locations/approx 6 wk/MASL D116150—Oct 96

Introduces pilots to fundamental fighter techniques and procedures. Designed as a fighter transition course between (S)UPT/ENJJPT and follow-on fighter training. It is not a stand-alone fighter qualification course. Graduates will be

qualified to attend Air Force operational fighter training courses. Approximately 17 flying hours.

Prerequisites: a. Pilots entering this course will be (S)UPT/ENJJPT graduates selected to attend operational fighter training courses and who do not have previous pilot experience in fighter aircraft. ECL 80 SO.

b. Centrifuge training according to AFI 11-404 is required for United States pilots.

c. Altitude chamber training and currency IAW AFI 11-403.

Special Requirements: Secret clearance by class start date for United States pilots.

Quota Control: HQ AETC/XOT.

OPR: 19 AF/DOK.

B/F-V5A-M—AT-38B Pilot Instructor Training (IFF)—PDS Code 0PA—Randolph/approx 12 wk/AFSC K1115P—Oct 96

Qualifies pilots as introduction to fighter fundamentals (IFF) instructors in the AT-38B.

Prerequisites: a. Four-ship flight lead qualified in a fighter aircraft (AFSC 1115). 500 hours in fighter aircraft or 1000 FP/MP/IP hours total with 300 hours in fighter aircraft.

b. Centrifuge training according to AFI 11-404 is required for United States pilots.

Special Requirements: Secret clearance by class start date for US pilots.

Quota Control: HQ AETC/XOT.

OPR: 19 AF/DOK.

F-V5A-Q—Fixed-Wing Qualification Training (T-37/T-38)—PDS Code T6J—Laughlin/approx 40 wk—Oct 96

Trains rotary-wing pilots to fly jet fixed-wing aircraft. Candidates for course are identified according to AFR 51-5, *Fixed-Wing Qualification Training for Rotary-Wing Pilots*. Training consists of approximately 134 flying hours, 37 simulator hours, and 128 academic hours.

Prerequisites: Completion of UPT-H, volunteer for fixed-wing training. Send request for waiver of prerequisites to HQ AFPC/DPMRO.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

F-V5A-R—Jet Currency Course (T-38)—PDS Code WWK—Randolph/3 days/MASL D111026—Oct 96

Provides jet currency training in the T-38 where required for subsequent Air Force formal course flying training. Approximately 2.2 flying hours.

Prerequisites: Rated pilot on flying status who was previously qualified in fighter aircraft and has been assigned to a single-seat Air Force fighter aircraft. Flight physical and physiological training must be current and remain valid for duration of the course. ECL 80 SO.

Quota Control: HQ AETC/XOT.

OPR: 19 AF/DOU.

F-V5A-T—T-1A Instructor Transition Course—PDS Code Y3K—Randolph/approx 9 wk—Oct 96

Qualifies rated pilots for instructor pilot duty in the T-1A Jayhawk. Designed to train former and current T-37 and T-38 AETC instructor pilots in T-1A ground and flight operations. Students learn to fly and instruct all phases of T-1A SUPT—transition, instruments, navigation, formation, low level, airdrop, and air refueling. Approximately 51 flying hours.

Prerequisites: Current or former AETC UPT/SUPT instructor pilot. Airlift or tanker MWS experience is highly desired.

Quota Control: HQ AETC/XO.

OPR: 19 AF/DOU.

F-V5A-U—Introduction to Bomber Fundamentals—PDS Code XPH—Reese/Laughlin/1 wk 4 days—Oct 96

Familiarizes pilots with crew coordination and copilot responsibilities of bomber aircraft. This course is a bridge between Air Force (S)UPT/ENJJPT and follow-on initial bomber training. It is not a stand-alone bomber qualification course. Graduates will be qualified to attend the Air Force Operational Bomber Training course.

Prerequisites: Pilots entering this course will be (S)UPT or ENJJPT graduates selected to attend operational bomber training courses and who do not have previous pilot experience in bomber aircraft. Banked pilots attending this course will attend Banked Pilot Requalification Training course, F-V5A-J, before this course.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOTF. OPR: HQ 19 AF/DOK.

*See tables 3.17, 3.18, and 3.19.

F-V5A-W—US Navy T-37 Prequalification Training—PDS Code XQH—Reese/6 wk—Oct 96

Provides Navy aircrews indoctrination and familiarization with the Air Force flying environment. Prepares PIT candidates to the required standards for entry to PIT.

Quota Control: HQ AETC/XOT. OPR: 19 AF/DOU.

F-V5B-B—Rotary Wing Qualification Course—PDS Code PG1—Ft Rucker/12 wk/AFSC 11H3X—Oct 96

Army conducted course to qualify rated pilot in rotary wing aircraft. Course consists of 43.0 hours in the UH-1H helicopter and 24.0 in simulator. Training includes transition and operational flying training with associated academics. Graduates will proceed to 58 SOW, Kirtland AFB NM, for mission qualification training.

Prerequisites: Rated pilot on flying status. Student must have completed a 75-yard swim test dressed in a flight suit or fatigues.

Special Requirements: Before departing duty station, trainee must have a flying Class II physical that will not be over 6 months old on course start date. Secret clearance by course start date.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOS.

F-V5N-A(001)—Pilot Instructor Training (ENJJPT) (T-37)—PDS Code 2RA—Sheppard/19 wk/AFSC 1355B/MASL D115055—Oct 96

Qualifies pilots to perform duties as T-37 instructor pilots in the ENJJPT. Training consists of initial qualification followed by diversified flying in the T-37 aircraft and simulator. Academic training includes applied aeronautics, flight planning, aircraft systems, methods of instruction and ancillary topics.

Prerequisites: Must have an aeronautical rating of pilot and an instrument rating. The flight physical (qualified for ejection seat aircrew duty IAW Class III medical standards) and physiological training (altitude chamber) must be current and remain valid for the duration of the course. Candidates are nominated by other commands or may be recent graduates of UPT/SUPT, ENJJPT, or fixed-wing qualification. Candidates from other commands must meet the following criteria:

a. Candidates from single pilot aircraft must have achieved mission qualified status. Those from other aircraft must have achieved aircraft commander status.

b. Must have no more than two Q-2s or one Q-3 on any evaluation (flight or ground) in the last 3 years of active flying.

c. Must have their wing commander's recommendation for AETC IP duty.

Candidates who do not meet the above criteria may be recommended to AETC for a waiver. In these cases, forward to HQ AFPC/DPMROT one copy of the AF Form 942, one copy of all AF Forms 8, and a written statement from the candidates' wing or squadron commander concerning the individuals' flying skills and professional qualities. Once a candidate is accepted for AETC IP duty and any of the above criteria changes, the wing or squadron commander will immediately notify HQ AFPC/DPMROT. International candidates must meet the following additional criteria:

a. Current jet qualification.

b. ECL 80 SO.

c. Familiarity with ICAO/USAF instrument procedures (ILS, VOR, etc.).

Admin Instructions: Personnel who have previously attended an AETC jet pilot instructor training course are assigned using course number F-V5N-A 002 and PDS Code 4E9.

Quota Control: ENJJPT Steering Committee and HQ USAF.

OPR: 19 AF/DOU.

F-V5N-A(002)—Pilot Instructor Training (ENJJPT) (T-37)—PDS Code 4E9—Sheppard/19 wk/AFSC 1351B—Dec 91

Course is identical to F-V5N-A(001). However, for administrative reasons personnel who have attended an AETC jet pilot instructor training course are assigned using this course number and PDS code.

F-V5N-B(001)—Pilot Instructor Training (ENJJPT) (T-38)—PDS Code 2RB—Sheppard/19 wk/AFSC 1355C/MASL D115056—Oct 96

Qualifies pilots to perform duties as T-38 instructor pilots in ENJJPT. Training consists of initial qualification followed by diversified flying in the T-38 aircraft and simulator. Academic training includes applied aeronautics, flight planning, aircraft systems, methods of instruction and ancillary topics.

Prerequisites: Must have an aeronautical rating of pilot and an instrument rating. The flight physical (qualified for ejection seat aircrew duty IAW Class III medical standards) and physiological training (altitude chamber) must be current and remain valid for the duration of the course. Candidates are nominated by other commands or may be recent graduates of UPT/SUPT, ENJJPT, or fixed-wing qualification. Candidates from other commands must meet the following criteria:

a. Candidates from single pilot aircraft must have achieved mission qualified status. Those from other aircraft must have achieved aircraft commander status.

b. Must have no more than two Q-2s or one Q-3 on any evaluation (flight or ground) in the last 3 years of active flying.

c. Must have their wing commander's recommendation for AETC IP duty.

Candidates who do not meet the above criteria may be recommended to AETC for a waiver. In these cases, forward to HQ AFPC/DPMROT one copy of the AF Form 942, one copy of all AF Forms 8, and a written statement from the candidates' wing or squadron commander concerning the individuals' flying skills and professional qualities. Once a candidate is accepted for AETC IP duty and any of the above criteria changes, the wing or squadron commander will immediately notify HQ AFPC/DPMROT. International candidates must meet the following additional criteria:

a. Current jet qualification (high performance jet experience required).

b. ECL 80 SO.

c. Familiarity with ICAO/USAF instrument procedures (ILS, TACAN, etc.).

Admin Instructions: Personnel who have previously attended an AETC jet pilot instructor training course are assigned using course number F-V5N-B(002) and PDS Code 4FA.

Quota Control: ENJJPT Steering Committee and HQ USAF.

OPR: 19 AF/DOU.

F-V5N-B(002)—Pilot Instructor Training (ENJJPT) (T-38)—PDS Code 4FA—Sheppard/19 wk/AFSC 1351C—Dec 91

Course is identical to F-V5N-B (001). However for administrative reasons personnel who have attended an AETC jet pilot instructor training course are assigned using this course number and PDS code.

J-AB-AP—Joint Aviation Preflight Indoctrination (API)—PDS Code 778—NAS Pensacola/6 wk/MASL P119301—Oct 96

Provides initial training designed to prepare Air Force and Navy nonrated officers for entry into joint undergraduate flying training. Training syllabus consists of academics and practical examination in aviation physiology, water/land survival, and physical fitness.

Prerequisites: Commissioned officer of the Regular Air Force, Air Force Reserves, Air National Guard as provided in AFI 36-2205, or Regular Navy, or Naval Reserve. ECL 80 SO or equivalent. International students receiving Defense Language Institute English language training will complete the code 37 navigation modules. UPT eliminees must meet a 19 AF/DOT selection board and be nominated for attendance.

Special Requirements: Losing unit must screen and identify personnel selected for training as PRP resource according to AFI 36-2104.

Admin Instructions: Students report 10 workdays prior to class start date.

Quota Control: HQ AETC/XOTI and CNATRA/N3.

OPR: 19 AF/DOU and NAVAVSCOLSCOM.

J-EG-EW—Joint Electronic Warfare Officer Training—PDS Code 77S—Corry Station/10wk—Oct 96

Qualifies graduates of courses J-NI-IN, J-WA-SK, and J-WA-SF, and rated and allied aircrew to perform the duties and responsibilities of electronic warfare officer. Training includes principles of basic electronics, radar operations, electronic countermeasures reprogrammable systems, strategic electronic combat systems, air defense systems, and signal analysis.

Prerequisites: Graduate of course J-NI-IN, J-WA-SK, or J-WA-SF. Rated navigator/NFO, all EWO 12XX, and on current flying status orders. ANG, USAFR, USAF, USN, USNR, and USMC authorized under HQ USAF/DPPEF allocations.

Special Requirements: All students must possess at least an interim Secret clearance by class start date. Student must be qualified under Personal Reliability Program.

Admin Instructions: Duty status for training: PCA for direct entry from courses J-NI-IN, J-WA-SF; TDY for personnel from other sources. User commands are responsible for all TDY costs. Students will report NLT 0700 on class start date to the security gate of building 516, NTTC Corry Station, Pensacola. Bring service records, a copy of orders, and documentation of security clearance. Standard uniform is blues (short-sleeved service uniform); also bring flight suits. Point of contact is the JAVEWS course manager, DSN 922-6329.

Quota Control: HQ USAF/XOOT and HQ AETC/XOTI.

OPR: 19 AF/DOU and CNATRA/N3.

J-NA-AT—Joint Undergraduate Navigator Training (AT)—PDS Code 7S7—Randolph/24 wk/MASL D114023—Oct 96

Joint flying training course which prepares Air Force, Navy, and international graduates of course J-NB-PR for navigator or naval flight officer duties in airlift, tanker, transport, and patrol MWSs. Training consists of academics, simulator, and flight training in navigation systems and procedures, and celestial, global, and maritime navigation.

Prerequisites: Graduate of course J-NB-PR. ECL 80 SO.

Special Requirements: US Secret and NATO Secret clearance.

Admin Instructions: Duty status for training is PCS.

Quota Control: HQ USAF/XOOT and HQ AETC/XOTI.

OPR: 19 AF/DOU and CNATRA/N3.

J-NB-PR—Primary SN/NFO (PRI)—PDS Code 775—NAS Pensacola/14 wk/MASL P114001—Oct 96

Joint flying training basic course which prepares Air Force , Navy, and international graduates of course J-AB-AP for advanced navigator or naval flight officer and intermediate WSO, EWO, and REO training. Training consists of academics, simulator, and flight training in navigation systems and procedures, situation awareness, and general navigation.

Prerequisites: Graduate of course J-AB-AP. ECL 80 SO.

Special Requirements: US Secret and NATO Secret clearance.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ AETC/XOTI and CNATRA/N3.

OPR: 19 AF/DOU and TRAWING 6.

J-NI-IN—Intermediate SN/NFO (INT)—PDS Code 779—NAS Pensacola/14 wk—Oct 96

Joint flying training intermediate course which prepares Air Force, Navy, and international graduates of course J-NB-PR for advanced WSO, EWO, and REO training. Training consists of academics, simulator, and flight training in navigation systems, radar, and airways navigation.

Prerequisites: Graduate of course J-NB-PR. ECL 80 SO.

Special Requirements: US Secret and NATO Secret clearance.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ AETC/XOTI and CNATRA/N3.

OPR: 19 AF/DOU and TRAWING 6.

J-WA-SF—USAF Strike Fighter SN/NFO (SF)—PDS Code 759—NAS Pensacola/26 wk—Oct 96

Joint flying training advanced course which prepares Air Force and Navy graduates of course J-NI-IN for follow-on WSO and EWO training. Training consists of academics, simulator, and flight training in fighter air-to-air attack and low-level procedures.

Prerequisites: Graduate of course J-NI-IN. ECL 80 SO.

Special Requirements: US Secret and NATO Secret clearance.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ AETC/XOTI and CNATRA/N3.

OPR: 19 AF/DOU and TRAWING 6.

J-WA-SK—USAF Strike SN/NFO (SK)—PDS Code 774—NAS Pensacola/20 wk—Oct 96

Joint flying training advanced course that prepares Air Force and Navy graduates of course J-NI-IN for follow-on WSO and EWO training. Training consists of academics, simulator, and flight training in air-to-ground attack and low-level procedures.

Prerequisites: Graduate of course J-NI-IN. ECL 80 SO.

Special Requirements: US Secret and NATO Secret clearance.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ AETC/XOTI and CNATRA/N3.

OPR: 19 AF/DOU and TRAWING 6.

N-EG-EW—USAF Advanced Electronic Warfare Training—PDS Code 77T—Corry Station/3 wk 3 days—Oct 96

An electronic warfare training course which prepares Air Force graduates of course J-EG-EW for follow-on EWO training. Consists of academics and simulators in advanced signal analysis and tactics.

Prerequisites: Graduate of course J-EG-EW. ECL 80 SO.

Special Requirements: US Secret clearance.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ USAF/XOOT and HQ AETC/XOTI.

OPR: 19 AF/DOU.

N-NA-AT—Advanced USAF Navigator Training—PDS Code 758—Randolph/8 wk/MASL D114036—Oct 96

An advanced navigation flying training course which prepares Air Force graduates of course J-NA-AT for follow-on navigator training. Training consists of academics, simulator, and flight training in visual and integrated low-level procedures.

Prerequisites: Graduate of course J-NA-AT. ECL 80 SO.

Special Requirements: US Secret and NATO Secret clearance.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ AF/XOOT, HQ AETC/XOTI, and CNATRA/N3.

OPR: 19 AF/DOU and TRAWING 6.

N-NB-PN—USAF Electronic Warfare Principles Training—PDS Code 776—Corry Station/2 wk/MASL D114035—Oct 96

An electronic warfare basic course that provides Air Force non-electronic warfare officer graduates of courses J-NB-PR, J-WA-SK, and J-WA-SF with electronic warfare principles training. Training consists of academics on the electronic warfare spectrum, threat awareness, and tactics training.

Prerequisites: Graduate of courses J-NB-PR, J-WA-SK, and J-WA-SF. ECL 80 SO.

Special Requirements: All students must possess at least an interim Secret clearance by class start date.

Admin Instructions: Duty status for training: Pipeline training from J-NB-PR, J-WA-SK, or J-WA-SF. Students will report NLT 0700 on class start date to the security gate of building 516, NTTC Corry Station, Pensacola. Bring documentation of security clearance. Standard uniform is blues (short-sleeved service uniform). Point of contact is JAVEWS course manager, DSN 922-6329.

Quota Control: HQ AF/XOOT, HQ AETC/XOTI, and CNATRA/N3.

OPR: 19 AF/DOU and NAVTECHTRACEN Corry Station Pensacola.

N-V6A-A—Specialized Undergraduate Navigator Training (SO)—PDS Code 2XY—Randolph/23 wk/MASL D114022—Oct 96

Prepares graduates of S-V8N-C for upgrade training in bomber, fighter, and C-141 weapon systems. Training consists of academics, simulator, and flight training in instrument procedures, visual and radar low level navigation, weapons delivery procedures, tactical concepts, hostile defense operations, and fundamentals of electronic warfare.

Prerequisites: Graduate of S-V8N-C. ECL 80 SR.

Special Requirements: US Secret and NATO Secret clearance required for electronic warfare portion of course.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ USAF/XOOT. Management: HQ AFPC/DPMROP.

OPR: 19 AF/DOU.

N-V6A-B—Specialized Undergraduate Navigator Training (NAV)—PDS Code 21J—Randolph/23 wk/MASL D114023—Oct 96

Prepares graduates of S-V8N-C for upgrade training in AFSCs 1525, 1535, 1545 (less C-141), 1565, and 1585. Training includes academic, simulator, and flight training in navigation systems and procedures, celestial, global and low-level navigation.

Prerequisites: Graduate of S-V8N-C. ECL 80 SO.

Special Requirements: US Secret and NATO Secret clearance required.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ USAF/DPPT. Management: HQ AFPC/DPMROP.

OPR: 19 AF/DOU.

N-V6A-D—Specialized Undergraduate Navigator Training (Intermediate)—PDS Code 262—NAS Pensacola/6 wk/MASL P114034—Oct 96

Prepares graduates of N-V6A-T for Naval undergraduate bomber and fighter system's officer training. Training consists of academics, simulator, and flight training in instrument and visual navigation.

Prerequisites: Graduate of N-V6A-T. ECL 80 SO.

Special Requirements: US Secret clearance.

Admin Instructions: Report at least 13 workdays before class start date.

Quota Control: HQ USAF/XOOT. OPR: CNATRA/N3.

N-V6A-F—Specialized Undergraduate Navigator Training (SO Strike Fighter)—PDS Code 246—NAS Pensacola/26 wk/AFSC 12F1A/F/H/MASL P114029—Oct 96

Qualifies graduates of N-V6A-D as rated fighter system's officers. Training consists of academics, simulator, and flight training in visual, radar, and tactical navigation, formation, radar intercepts, and advanced tactical maneuvering.

Prerequisites: Graduate of N-V6A-D. ECL 80 SO.

Special Requirements: US Secret clearance.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ USAF/XOOT. OPR: CNATRA/N3.

N-V6A-G—Specialized Undergraduate Navigator Training (SO Strike)—PDS Code 123—NAS Pensacola/20 wk/AFSC 12B1C/MASL P114032—Oct 96

Qualifies graduates of N-V6A-D as rated bomber system's officers. Training consists of academics, simulator, and flight training in visual, radar, and tactical navigation, formation, and advanced tactical maneuvering.

Prerequisites: Graduate of N-V6A-D. ECL 80 SO.

Special Requirements: US Secret clearance.

Quota Control: HQ USAF/XOOT. OPR: CNATRA/N3.

N-V6A-N—Interservice Undergraduate Navigator Training—PDS Code VA2—Randolph/approx 23 wk/MASL D114003—Oct 96

Qualifies USN and USCG officers, in accordance with the ITRO Navigator Training Proposal, as navigators capable of managing USN and USCG aircraft weapons systems. Course includes academic, simulator and flying training navigational systems, and procedures, celestial, and global. Upon graduation, US Navy officers are awarded the USN aeronautical rating of Naval Flight Officer with the designator 132X.

Prerequisites: Completion of USN basic NFO course or Coast Guard aviator and lead-in phase of training prior to navigation procedures. ECL 80 SO.

Special Requirements: Secret clearance by class start date.

Quota Control: USN/USCG and HQ AETC.

OPR: 19 AF/DOU.

N-V6A-T—T-37 Top Off—PDS Code 295—Randolph/8 wk—Oct 96

Prepares graduates of N-V8N-C for Naval intermediate T-39 training (N-V6A-D). Training consists of academics, simulator, and flight training in instrument navigation.

Prerequisites: Graduate of N-V8N-C.

Admin Instructions: Duty status for training is PCA.

Quota Control: HQ USAF/XOOT. OPR: 19 AF/DOU.

N-V8N-C—Navigator CORE Training—PDS Code 356—Randolph/approx 22 wk/MASL D114021—Oct 96

Provides initial training designed to prepare nonrated officers for entry into N-V6A-A, N-V6A-B, or N-V6A-C. Graduates of these course combinations are qualified to perform the duties of a rated navigator and enter specific weapon system upgrade training. Training consists of academic, simulator, and T-43/T-37 flight training in airmanship, and basic navigation.

Prerequisites: Commissioned officer of the Regular Air Force, Air Force Reserve and ANG, as provided in AFI 36-2205 (formerly AFR 51-4). ECL 80 SO or equivalent. International students receiving Defense Language Institute English language training will complete the code 37 navigation modules. UPT eliminees must meet a 19 AF/DOT selection board and be nominated for attendance.

Special Requirements: Losing unit must screen and identify personnel selected for training as PRP resource according to AFI 36-2104 (formerly AFR 35-99).

Admin Instructions: Students report 10 workdays before class start date.

Quota Control: HQ USAF/XOOT and HQ AETC/XOT.

OPR: 19 AF/DOU.

P-V4A-A—Specialized Undergraduate Pilot Training—PDS Code Y3V—location */52 wk/AFSC 1112—Oct 96

Qualifies officers to perform duties and responsibilities of rated pilot. Approximately 208 flying hours, 60 simulator hours, 254 academic hours (330 academic hours for T-1A students), and 185 officer development hours. Graduates qualified to fly Air Force jet and helicopter aircraft with minimal transition and normally proceed to advanced flying training. Helicopter assigned pilots will fly the UH-1H in the advanced phase, airlift-tanker assigned pilots will fly the T-1 in the advanced phase, and bomber-fighter assigned pilots will fly the T-38 in the advanced phase. Graduates will also receive training on professional officer skills and knowledge required of junior Air Force officers.

Prerequisites: Students must have satisfactorily completed one of the following prior to acceptance into UPT: USAFA PIP, Flight Screening Course S-V8A-A, or an equivalent course for international military trainees. The following officers are exempt from flight screening requirements:

1. Navigators/Weapon System Operators with 300 hours in F-4, RF-4, F-15E, F-111, EF-111, FB-111 aircraft and are current in type.

2. Former US military helicopter pilots with a minimum of 300 hours pilot-in-command time.

Commissioned officers of the Regular and Reserve AF, as provided in AFI 36-2205, *Application Procedures for Flying Training, Space Training, and Astronaut Training Programs* (formerly AFR 51-4.) International students must have satisfactorily completed English Language Course, or obtain an ECL of 80 SR before entry.

Quota Control: HQ USAF/XOOT. OPR: 19 AF/DOU.

* See table 3.23.

P-V4A-B—Undergraduate Pilot Training (T-37/T-38)—PDS Code EU3—location*/52 wk/AFSC 1111Z/MASL D112008—Oct 96

Qualifies officers to perform duties and responsibilities of rated pilots. Approximately 190 flying hours, 62 simulator hours, 342 academic hours, and 105 officer training hours. Graduates qualified to fly Air Force jet aircraft with minimal transition and normally proceed to advance flying training course. Graduates also have desirable professional skills and knowledge required of junior Air Force officers and receive the rating of pilot.

Prerequisites: Students must have satisfactorily completed one of the following prior to acceptance into UPT: USAFA PIP, Flight Screening Course S-V8A-A, or an equivalent course for international military trainees. The following officers are exempt from flight screening requirements:

1. Navigators/Weapon System Operators with 300 hours in F-4, RF-4, F-15E, F-111, EF-111, FB-111 aircraft and are current in type.

2. Former US military helicopter pilots with a minimum of 300 hours pilot-in-command time.

Commissioned officers of the Regular and Reserve AF, as provided in AFI 36-2205 (formerly AFR 51-4). International students must have satisfactorily completed English Language Course, or obtain an ECL of 80 SO before entry.

Special Requirements: Losing unit must screen and identify personnel selected for training as PRP resource according to AFI 36-2104 (formerly AFR 35-99).

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

*See table 3.23.

P-V4A-C—Specialized Undergraduate Pilot Training, Primary Training, T-37—PDS Code 756/location: */26 wk—Oct 96

Qualifies officers to perform duties and responsibilities of rated pilot. Primary training graduates qualify for advanced training in the T-1A, T-38, T-44, or UH-1. Approximately 89 flying hours, 30 simulator hours, 202 academic hours, and 53 hours of officer development. Graduates also receive training on professional officer skills and knowledge required of a junior Air Force officer.

Prerequisites: Must have satisfactorily completed one of the following before acceptance into SUPT primary training: USAFA PIP, Flight Screening Course, S-V8A-A, Enhanced Flight Screening Course, S-V8A-E, or equivalent course for international military trainees. Commissioned officers of the Regular and Reserve Air Force, as provided in AFI 36-2205. International students must have satisfactorily completed English language course or obtain an ECL of 80 SR before entry. The following officers are exempt from flight screening requirements:

1. Navigators/weapon system operators with 300 hours in F-4, RF-4, F-15E, F-111, and EF-111 aircraft and are current in type.

2. Former US military helicopter pilots with a minimum of 300 hours pilot-in-command time.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

*Columbus, Laughlin, Reese, and Vance AFB.

P-V4A-D—Specialized Undergraduate Pilot Training, Advanced Training, T-38 Bomber-Fighter Track—PDS Code 755—location: */26wk—Oct 96

Qualifies officers to perform duties and responsibilities of rated pilot. Advanced training (T-38) bomber-fighter track graduates qualify to fly Air Force bomber and fighter jet aircraft with minimal transition and normally proceed to graduate flying training. Approximately 119 flying hours, 32 simulator hours, 152 academic hours, and 96 hours of officer development. Graduates also receive training on professional officer skills and knowledge required of a junior Air Force officer.

Prerequisites: Must have satisfactorily completed one of the following before beginning SUPT advanced training (T-1A): P-V4A-C, SUPT Primary Training, or P-V4P-A, Navy Primary Training.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

*Columbus, Laughlin, Reese, and Vance AFB.

P-V4A-E—Aviation Leadership Program (T-37) (SATP)—PDS Code 96S—Location */39 wk/MASL D111014—Oct 96

Qualifies selected international students to perform duties and responsibilities of rated pilots. Trains student pilots toward award of aircrew rating of pilot, capable of advancing to specialized flying training courses. Approximately 170 flying hours, 29 simulator hours, 220 academic hours, and 87 officer training hours.

Prerequisites: Available only to international personnel. Students must have satisfactorily completed Security Assistance Training Program (course S-V8A-B) and English Language course, or obtain an ECL of 80 SO before entry.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

*See table 3.23.

P-V4A-G—Specialized Undergraduate Pilot Training, Advanced Training, T-1A Airlift-Tanker Track—PDS Code 754—location */26 wk/MASL D111025—Oct 96

Qualifies officers to perform duties and responsibilities of rated pilot. Advanced training (T-1A) airlift-tanker track graduates qualify to fly Air Force airlift/tanker jet aircraft with minimal transition and normally proceed to graduate flying training. Approximately 104 flying hours, 42 simulator hours, 172 academic hours, and 95 hours of officer development. Graduates also receive training on professional officer skills and knowledge required of a junior Air Force officer.

Prerequisites: Must have satisfactorily completed one of the following before beginning SUPT advanced training (T-1A)—P-V4A-A (Phase I and II), SUPT Primary Training, or P-V4P-A, Navy Primary Training. ECL 80 SO.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

*Columbus, Laughlin, Reese, and Vance AFB.

P-V4A-N—Euro-NAT0 Joint Jet Pilot Training (T-37/T-38) (ENJJPT)—PDS Code 2Q9—Sheppard/approx 55 wk/AFSC 1111Z/MASL D111011—Oct 96

Qualifies nonrated NATO officers and NCOs to perform duties and responsibilities of rated pilots. Trains student pilots toward award of aircrew rating of pilot, capable of advancing to specialized flying training courses. Air Force graduates qualified to fly Air Force jet aircraft with minimal transition and normally proceed to advanced flying training course. Graduates also have desirable professional skills and knowledge required of junior Air Force officers. Approximately 260 flying hours, 300 academic hours, and 190 officer training hours.

Prerequisites: Air Force officers must have satisfactorily completed one of the following prior to selection into ENJJPT: USAFA PIP or Flight Screening Program, course S-V8A-A. Air Force officers who present proof of having at least a Private Pilot's Certificate to the proper authority are exempt from Flight Screening Requirements. Active duty Air Force officers apply as provided in AFI 36-2205 (formerly AFR 51-4). International officers and NCOs, from NATO Nations which are signatories to the ENJJPT Memorandum of Understanding, apply in accordance with their national procedures.

Quota Control: ENJJPT Steering Committee and HQ USAF.

OPR: 19 AF/DOU.

P-V4A-P—Advanced Training Program (T-38)—PDS Code Y33—location */approx 29 wk/MASL D112023—Oct 96

Provides advanced jet training in the T-38 to non-Air Force students. Trains students to fly high performance aircraft. Consists of approximately 109 flying hours, 35 simulator hours, and 150 academic hours.

Prerequisites: Available only to international students. Students must have satisfactorily completed security assistance training program and appropriate English language course or obtain an ECL of 80 SO before entry.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

*See table 3.23.

P-V4C-C—SUPT (HELO) Training, Phase 3, Helicopter Track—PDS Code V4D—Ft Rucker/23 wk/AFSC 11H3X—Oct 96

Army-conducted helicopter training for Air Force officers. Training consists of the rotary wing qualification course followed by the basic combat skills and night/night vision goggles phases of the IERW aviator (UH-1) course. Qualifies nonrated and rated officers to perform duties and responsibilities of rated helicopter pilots. Nonrated student officers are trained toward award of aircrew rating of pilot, capable of specializing in current Air Force rotary wing aircraft. Approximately 112 flying hours are used to qualify students in basic and advanced flying skills and receive rotary wing instrument rating. Nonrated graduates receive Air Force pilot ratings.

Prerequisites: Officer trainees or commissioned officers of the Regular and Reserve AF, as provided in AFI 36-2205 (formerly AFR 51-4). Nonrated students must have satisfactorily completed P-V4A-A, SUPT (JET) Training, Phase 2: primary before acceptance into this course. Students must have satisfactorily completed a dressed swim test before entering helicopter training.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOS.

P-V4P-A—Aviation Pre-Flight (API)/Primary Flight Training—PDS Code XQL—NAS Pensacola FL/36 wk—Oct 96

API provides commissioned officers with the basic skills and knowledge needed for Navy primary flight training. Students will receive approximately 208 hours of instruction in acrodynamics, systems, aerospace physiology, navigation, and water survival. Upon completion of API, students will attend primary flight training at NAS Whiting. Primary flight training provides students with the skills and knowledge required to perform basic flight maneuvers and control a single-engine aircraft in contact and instrument conditions. Successful completion is a prerequisite for advanced phases of training.

Prerequisites: Must have satisfactorily completed one of the following before acceptance into API: USAFA PIP, Flight Screening Course, S-V8A-A, or S-V8A-E.

Quota Control: HQ USAF/XOOT. OPR: 19 AF/DOU.

P-V4P-C—Advanced Multi-Engine Turboprop Training—PDS Code XQK—NAS Corpus Christi TX/26 wk—Oct 96

Qualifies officers to perform duties and responsibilities of rated pilot. Approximately 119 flying hours. Graduates qualified to fly Air Force aircraft with minimal transition. Graduates will receive further training in turboprop aircraft.

Prerequisites: Must have satisfactorily completed Phase II of P-V4A-A or P-V4P-A.

Quota Control: HQ USAF/XOOT. OPR: 19 AF/DOU.

S-V8A-D—T-3A Security Assistance Program (SATP)—PDS Code V4B—Lackland/8 wk/MASL D112025—Oct 96

The first of four phases of training required to qualify nonrated international students to perform the duties and assume the responsibilities of a rated pilot. Training consists of 31.4 hours of contact T-3 flying and approximately 18 hours of academics and officer training subjects. Students who have successfully completed an equivalent course may request a waiver for this course.

Prerequisites: Available only to international personnel. ECL 80 SO.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

S-V8A-E—Enhanced Flight Screening (EFS) (T-3)—PDS Code SS3—Lackland/5 wk—Oct 96

Provides a selection process for identifying trainees with potential to complete undergraduate pilot training. Screening consists of 21.5 contact flying hours in the T-3 aircraft and approximately 17 hours of academics and ground training subjects.

Prerequisites: Officer trainees or commissioned officers of the Regular and Reserve AF, as provided in AFI 36-2205 (formerly AFR 51-4). AFOQT pilot composite score of 25 and combined pilot/navigator composite score of 50. Failure to complete this course disqualifies officers for entry into UPT/SUPT. Must have medical records with a current Class 1 flying physical that will remain valid for the duration of the course. Noncompliance will be basis for refusing enrollment. Do not wear soft/hard contact leneses within 30 days before start of training.

Admin Instructions: Each student must hand-carry:

a. Medical and dental records.

b. Endorsed travel orders (if appropriate).

c. Appropriate seasonal athletic clothing.

Unit of assignment: Air Force officers are administered by 12 FTW, Randolph AFB during TDY period.

Quota Control: HQ USAF/XOOT.

OPR: 19 AF/DOU.

S-V8E-A—Medical Officer Flight Familiarization Training (T-37)—PDS Code 4FB—Randolph/approx 6 wk—Oct 96

Provides aerospace medicine residents with an understanding of the stresses of jet flight and the problems with which flying personnel are confronted. Training includes ground and flight training in the T-37 to gain familiarization with the principles and proficiency required to fly jet aircraft.

Admin Instructions: Orders indicate variation in itinerary authorized to conduct required cross-country navigation training. Fund citation number for crosscountry training is 57_3400 30_ 6341 263710 A8 40889 40989 525000. Enter the last digit of the fiscal year in the two spaces that are underlined.

Quota Control: HQ USAF/DPPT.

OPR: 19 AF/DOU.

S-V8E-S—Electronic Warfare Coordinator Course—PDS Code JWK—Corry Station/3 wk—Oct 96

Qualifies electronic warfare officers to perform the duties and responsibilities of an electronic warfare coordinator (e.g. advise combat commander and battle staff on electronic warfare (EW) situations; make recommendations on use of EW assets). Training includes capabilities, limitations, and employment doctrine of hostile and friendly air defense assets; hostile and friendly EW asset employment; radio-electronic combat; and command and control warfare.

Prerequisites: Officers (captain to colonel) must be graduates of electronic warfare officer (EWO) training, possess intelligence background with electronic-warfare-related duties, or attend the Introduction to Electronic Combat Course (B-V7C-E) and require Experience Set EX. Other officers (captain to lieutenant colonel) with electronic-warfare-related-duties will be considered for waiver. Joint service (O-3 to O-5) participation is encouraged. Ideally, graduates of the course will be assigned to staff duties as an electronic warfare coordinator.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for SI/TK before entering class. The student's sponsoring command is responsible for ensuring that appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO AETC (pass to NTTC Corry Station) NLT 10 days prior to class start date. The message will include student name, rank, SSN, class name, class dates, accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival will be returned to their units.

Admin Instructions: Duty status is TDY. Send attendee's full name, SSN, duty title, military address, phone number, and clearance to the NTTC Corry Station, JAVEWS, 640 Roberts Ave., Pensacola, FL 32511, ATTN: Code 40/SPECTRA, NLT 3 weeks before class start date. Three copies of attendee's orders should arrive at JAVEWS NLT 10 days before class start date. Attendee should be prepared to present a 5- to 15-minute briefing on his or her current position or agency's operations as it pertains to electronic combat. Send clearance through command Special Security Office (SSO) channels (HQ AETC/TTOII) NLT 10 days before class start date. Attendee is responsible for his or her own billeting reservations.

Quota Control: HQ USAF/XOOT and HQ AETC/XOTI.

OPR: 19 AF/DOU.

S-V8F-C—Introduction to Command and Control (C2W)—PDS Code 9VV—Corry Station/1 wk—Oct 96

Introduces Air Force personnel to basic Air Force tactical and strategic C2W concepts and issues; develops an understanding of C2 attack and protect concepts; identifies current and projected threats, capabilities, criticality, and vulnerability for both tactical and strategic C2 systems; interrelates responsibilities of communications, operations, and intelligence in support of C2W. This course orients and familiarizes staff-level NCOs and officers from diverse backgrounds who may be expected to use C2W concepts in their daily duties.

Prerequisites: SSgt through Lt Col staff-level personnel, or equivalent civilian personnel, who are fully qualified in their AFSCs.

Special Requirements: US citizen with Secret clearance before class start date.

Admin Instructions: Duty status is TDY. Send attendee's full name, SSN, duty title, military address, phone number, and clearance to the JAVEW Department, NTTC Corry Station, Pensacola, FL 32511-5000, ATTN: SPECTRA, NLT 3 weeks before class start date. Three copies of attendee's orders should arrive at the JAVEW Department NLT 10 days before class start date. Students will report NLT 0730 on class start date to the security gate of building 516, NTTC Corry Station, Pensacola. Bring a copy of orders and documentation of security clearance. Standard uniform is blues (short-sleeved service uniform). Point of contact is the SPECTRA course manager, DSN 922-6329. Attendee should be prepared to present a 5- to 15-minute briefing on his or her current position or agency's operation as it pertains to electronic combat. Attendee is responsible for his or her own billeting reservations.

Quota Control: HQ USAF/XOOT, allocated by HQ AETC/XOTI.

OPR: 19 AF/DOU.

S-V8G-A—USAF Aircrew Life Support Officer—PDS Code EQU—Randolph/2 wk/AFSC "Z" Prefix—MASL D122003—Jun 93

Provides the knowledge required to manage aircrew life support equipment operations. Familiarizes students with the Air Force 412A life support system, shop management and operations, aircrew life support continuation training programs, aircraft safety investigation board responsibilities and mishap investigative techniques, material deficiency and hazard reporting, enlisted "quality force" issues, and other life support management requirements. Upon completion of this course, graduates will be assigned a "Z" prefix to their primary AFSC.

Prerequisites: Must be a rated officer selected for or currently assigned to duty as aircrew life support officer. ECL 70.

Special Requirements: Flight suit authorized for class. Call school 10 days prior to class start date. Squadron level life support officers assigned to PACAF and USAFE should attend the 419 OPTS/IDL Life Support Officer Mobile Training Team Course (S-V8G-B). This course is conducted annually. Recommend individuals bring personal camera to be used during accident phase of the course. Government transportation limited to onbase use. Attendees will be met by course staff 0730 at the billeting office on the first day of class.

Quota Control: 419 OPTS/IDL, DSN 487-2003/6431.

OPR: 419 OPTS/IDL.

S-V80-A—Combat Survival Training Course—PDS Code ERR—Fairchild/2 wk 3 days/MASL D121001—Oct 96

Presents training in principles, procedures, equipment and techniques which enable individuals to survive, regardless of climatic conditions or unfriendly environments, and return to their organization.

Prerequisites: A definite need for such training should be clearly indicated by the trainees' present or projected duty assignment. Personnel must be carefully screened for temperament and physical fitness before selection. Must be in top physical condition for rigorous field maneuvers in rough terrain. Individuals undergoing medical treatment and those with chronic disability or other physical limitation will not be selected. Air Force pararescue trainees must have successfully completed course 115X0. ECL 80 SR.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Students must hand-carry certified medical records. Quota Control: HQ AFPC/DPMROT3.

OPR: 19 AF/DOTS.

*17 continuous days.

S-V81-A—Survival Training Instructor Course—PDS Code ERP—Fairchild/22 wk 1 day/AFSC 1T0X1/MASL D121052—Jun 94

Qualifies students to instruct members in principles, procedures, equipment, and techniques which enable aircrew members to survive, regardless of climatic conditions or unfriendly environments and return to their organization. Training is conducted in classroom, lab and field or water environments and is rigorous. Duty assignment is with Air Force Survival Training Schools or duty in AFSC 1T0X1 with MAJCOM of assignment.

Prerequisites: Same as survival specialist (AFMAN 36-2108 [formerly AFR 39-1] and AFMAN 36-2110 [formerly AFR 39-11]). Must be in top physical condition with no history of injury or disabling defects involving head, spinal column, extremities, hip, or shoulder and knee joints. Normal color and night vision. See retraining advisory for grade restraints. HS graduate or GED equivalent. Must be able to speak distinctly and have a strong desire to instruct. Must have completed S-V80-A and course S-V90-A before class start date. ECL 80 SR.

Special Requirements: Secret clearance by class start date.

Quota Control and Selection Approval: 342 TSS/STOC, 1350 Scott Drive, Suite 1, Lackland AFB TX 78236-5424.

OPR: 19 AF/DOTS.

S-V81-B—Survival Instructor Indoctrination Course—PDS Code WHU—Lackland/4 days—Jun 93

Prepares airmen for course S-V81-A, Survival Training Instructor Course. Includes physical conditioning, land navigation, backpacking techniques, and indoctrination to living in remote field conditions.

Prerequisites: Complete selection procedures outlined in AETCR 51-104, *Selection of Survival Training Instructors*, for basic trainees and AFMAN 36-2110 (formerly AFR 39-11) for retrainee applicants. Meet physical and psychological requirements specified in AFI 48-123, *Medical Examination and Medical Standards* (formerly AFR 160-43).

Quota Control: 342 TTS/STOC, Lackland AFB TX.

OPR: 19 AF/DOTS.

S-V81-C—Resistance Training Orientation—PDS Code 4MX—Fairchild/4 days—Oct 96

Trains Air Force survival, evasion, resistance, and escape (SERE) training instructors and other designated personnel in the principles and theories for conducting Level C code of conduct resistance training laboratory (RTL) instruction. Consists of analyzing documents used as guidance for planning and conducting this instruction. It will examine appropriate use of simulated pressures to obtain consistent learning outcomes from students attempting to resist enemy exploitation and will provide guidance on the use of tools available to SERE instructors for evaluating student learning during an RTL. The psychological impact of resistance training on instructors and students will be analyzed.

Prerequisites: AFSC 1T031 in 5 skill-level upgrade training or a US Army, Navy, or Marine Corps Level C code of conduct SERE instructor.

Special Requirements: Secret clearance.

Admin Instructions: AFSC 1T031 personnel will attend in permanent party status. Other personnel will attend by unit-funded TDY.

Quota Control: 336 TRS/OSF, Fairchild AFB WA.

OPR: 19 AF/DOT.

S-V82-A—Special Survival Training Course—PDS Code AHP—DOD 011—Tyndall/4 days—Oct 95

Course content is classified. No field training involved.

Special Requirements: Graduate of S-V80-A. Minimum grade: A1C; maximum grade: Col. If enlisted, must be serving in second/subsequent enlistment (excluding A113X0B retrainees). No history of criminal activity or drug or alcohol abuse. Spouse and immediate family must be US citizens.

Special Requirements: Final Secret clearance.

Admin Instructions: Students report according to table 3.24 and are attached to Operating Location - Tyndall, Joint Services SERE Agency (OL-TY, JSSA), 319 Alabama Ave, Tyndall AFB FL 32403-5129. Classes begin on Monday and graduate on Thursday. When traveling by commercial air, plan to arrive at Panama City Airport no later than 2100 on the day before class start date. Commercial taxi service to the base is available for approximately $25 and is reimbursed when receipt is included on travel voucher claims.

Reporting Instructions: Students report to Tyndall AFB billeting office to receive BAQ or VOQ room assignments. Reservations for Sunday night through Thursday night will have been made by the course staff. Students should have sufficient funds to pay billeting and messing costs. Students may confirm reservations by contacting billeting (DSN 523-4310) up to 72 hours before class start date. Students may pick up a course information brochure in the billeting lobby. Questions regarding the course should be directed to the school staff at DSN 523-2416, Monday through Thursday, 0630 to 1700 central standard time.

Quota Control: Students are selected by HQ AFPC/DPMRO and quotas are allocated to HQ ACC, HQ AMS, and AFSOC.

OPR: HQ JSSA.

S-V83-A—Special Survival Training—PDS Code EQQ—Fairchild/1 wk—Oct 96

Course content is classified.

Prerequisites: Complete course S-V80-A equivalent. Approval for attendance from HQ USAF/XOFI; Department of the Navy/N312C, or HQ DA, ODCSINT.

Special Requirements: Secret clearance by class start date.

Quota Control: AFPC/DPMROT3.

OPR: HQ JSSA.

S-V84-A—USN Underwater Egress Training (UET)—PDS Code 69V—various locations/1 day—Oct 96

Course (Navy Course R-3 P-00-1226, 9D5A Underwater Egress Training) is designed to train Air Force helicopter aircrew members and other designated personnel in the principles, procedures, and techniques necessary to successfully egress from a sinking aircraft. Training requires personnel to actually experience water entry in the 9D5A device and perform underwater egress.

Prerequisites: A definite need for such training should be clearly indicated by the trainee's present or projected duty assignment.

Special Requirements: Participants will be required to pass the following tests in the appropriate flight gear: remain afloat for 5 minutes by treading water for 2 minutes and then "drown proofing" for 3 minutes; complete a 25-yard surface swim using any stroke except floundering/sculling on the back; and without the helmet, enter the pool feet first and swim 15 yards while remaining submerged. USN provides flight suits and boots. Students must bring swimsuit, towel, heavy athletic socks, and padlock.

Admin Instructions: Medical records must be hand-carried and include both AF Fm 1042 and SF 600 documented by flight surgeon or medical officer certifying physical qualifications for training. USN will not provide training to students who do not have these records in their possession.

Quota Control: 336 TRSS/MTF, DSN 657-5323.

OPR: 19 AF/DOTS.

S-V86-A—Water Survival School - Parachuting—PDS Code V8D—Pensacola/3.5 days/MASL D121002—Oct 96

Designed to train aircrew and other designated personnel in the employment of survival and life support principles, procedures, equipment, and techniques which permit them to survive overwater bailout, ejection or ditching and to assist in their safe recovery and return to duty. Training requires personnel to actually experience parachute letdown, water entry and survivor pickup from open sea environment. Weather permitting, each student receives actual helicopter pickup from water plus parasail descent with deployment techniques of specific equipment. Course consists of approximately 1 day academic and 2 days water training lab. Under certain circumstances, 1 additional day may be required to make up training lost due to adverse weather conditions.

Prerequisites: A definite need for such training should be clearly indicated by the trainee's present or projected duty assignment. ECL 80. Personnel who have successfully completed one of the following courses are not required to attend again: TAC course 150000; PACAF course 160000 (course conducted at Namazu, Japan, creditable if parasail and drag training were documented on individual training certificate); scuba course 5AZN92230 and 5AZN92230-1 (only for those individuals assigned duty as pararescue or recovery superintendent technician, or specialist).

Admin Instructions: Students must hand-carry certified medical records.

Quota Control: AFPC/DPMROT3.

OPR: 19 AF/DOTS.

S-V87-A—Arctic Survival Training—PDS Code V8E—Eielson/1 wk/MASL D121051—Oct 96

Course is designed to train aircrew and other designated personnel in the employment of principles, procedures, equipment, and techniques which enable them to survive and be rescued under arctic conditions. Course is mandatory for Eleventh Air Force aircrew members. Course consists of approximately 2 1/2 days academic and 2 1/2 days field training. Units with arctic training requirement can request specialized "real world" training tailored to their units unique operational environment. This training will be accomplished by mobile training teams (MTT). MTT will be user-funded, and requesting units will provide unit-specific survival equipment for training. The use of MTT is not intended for active-duty Air Force units.

Prerequisites: A definite need for such training should be clearly indicated by the trainee's present or projected duty assignment. ECL 80.

Admin Instructions: Students must hand-carry medical records.

Quota Control: HQ AETC/XOTI.

OPR: 19 AF/DOTS.

S-V88-A—USN Aviation Water Survival Training (N-5)—PDS Code XQJ—NAS Pensacola FL/2 days—Apr 95

Minimum required training for exchange aircrew members prior to serving on USN/USMC aircraft. Trains aircrew in Naval water survival techniques through lectures, demonstrations, and practical experience.

Quota Control: HQ AETC/XOT. OPR: 19 AF/DOT.

S-V90-A—Water Survival, Nonparachuting—PDS Code TB3—Fairchild/2 days/MASL D121054—Sep 84

Trains nonparachute carrying aircrew personnel in principles, procedures, techniques, and use of equipment which enable them to survive in a water environment, to assist in their recovery, and to return to friendly control.

Prerequisites: A definite need for such training should be clearly indicated by: the trainee's present or projected duty assignment. ECL 80.

Admin Instructions: Students must hand-carry certified medical records.

Quota Control: AFPC/DPMROT3.

OPR: 19 AF/DOTS.

C5AC—C-5 Aircraft Commander Qualification—PDS Code S5T—Altus/3 wk 2 days—Apr 96

Provides training to upgrade qualified C-5 pilots to C-5 aircraft commanders. This course is not required for upgrade to aircraft commander for those pilots who graduated from the C5IQAC or C5PRQ course at the first pilot or aircraft commander level. Course consists of contractor administered academic and simulator training followed by Air Force administered flight training. Majority of academic training is computer-based instruction. Training is conducted IAW AMCR 51-5 and the current contract.

Prerequisites: Trainee must meet the minimum flight time requirements in AMCR 51-5. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

C5ACAR—C-5 Pilot Aerial Refueling Qualification—PDS Code 9KZ—Altus/3 wk 3 days—Oct 96

Provides training to qualify C-5 aircraft commanders in air refueling operations. Course consists of contractor administered academic training followed by Air Force administered flight training. Majority of academic training is computer-based instruction. Training conducted IAW AMCR 51-5 and the current contract.

Prerequisites: Trainee must be a qualified and current C-5 aircraft commander IAW AMCR 51-5. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C5ACIQ—C-5 Initial Qualification Aircraft Commander/Requal—PDS Code P3Y—Altus/10 wk 2 days/AFSC 1045N—Oct 96

Provides training to initially qualify prior rated aircraft commanders or to requalify C-5 pilots who have been noncurrent for 5 years or longer. Prior qualified fixed wing aircraft commanders with a minimum of 1300 hours total time may complete the course at the copilot, pilot, or aircraft commander level depending on their proficiency. Course consists of contract administered academics and simulator training followed by Air Force-conducted flight training. The majority of academic training is computer based instruction (CBI). Training is conducted according to AMCR 51-5 and current contract.

Prerequisites: Trainee must be a rated fixed wing aircraft commander with a minimum of 1300 hours total flying time or a prior C-5 pilot noncurrent for 5 years or longer. Records requirements in paragraph 3.23 apply.

Quota Control: HQ AMC/DOTF.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C5ACRQ—C-5 Pilot Requalification—PDS Code 9T8—Altus/Dover/Travis/4 wk 4 days—Oct 96

Provides training to requalify C-5 pilots in the aircraft. Course consists of contractor administered academic and simulator training followed by Air Force administered flight training. Majority of academic training is computer based instruction. Depending on the highest basic C-5 crew qualification previously held, requalification will be to copilot, first pilot or aircraft commander. Training is conducted IAW AMCR 51-5 and the current contract.

Prerequisites: Trainee must be a previously qualified C-5 pilot with less than 5 years of absence from C-5 crew duty. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AFPC/DPMROT3.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C5CIQ—C-5 Pilot Initial Qualification—PDS Code XA9—Altus/9 wk 2 days/AFSC 1045N—Oct 96

Provides training to initially qualify pilots in the C-5 aircraft. Course consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training. Majority of academic training is computer based instruction (CBI). Training is conducted IAW AMCR 51-5 and the current contract.

Prerequisites: Trainee must be a rated pilot. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AFPC/DPMROT3.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C5FIQ—C-5 Flight Engineer Initial Qualification—PDS Code XBB—Altus/13 wk 3 days—Oct 96

Flying course designed to train flight engineer technicians IAW Combat Crew Training School (CCTS) qualification standards as established by the major command. Includes training in ground school, flight simulator, and aircraft.

Prerequisites: Individual must be currently qualified for flying duty and have CAFSC 1A1X0C. Must have completed AMC course BFE or 1A130C, Fixed Wing Aircraft Performance, and be in grade E-4 through E-9. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after scheduled class completion date.

Special Requirements: Must be US citizen with Secret clearance or Secret clearance applied for by class start date.

Quota Control: HQ AFPC/DPAAD4.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C5IAC—C-5 Instructor Aircraft Commander Qualification—PDS Code S5U—Altus/3 wk 2 days—Oct 96

Provides training to upgrade qualified C-5 aircraft commanders to instructor aircraft commander. Course consists of contractor administered academic and simulator training followed by Air Force administered flight training. Majority of academic training is computer based instruction. Training is conducted IAW AMCR 51-5 and the current contract.

Prerequisites: Trainee must meet the minimum flight time requirements in AMCR 51-5. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AFPC/DPMROT3.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C5IFE—C-5 Flight Engineer Line Instructor—PDS Code 2AR—Altus/5 wk—Oct 96

Trains C-5 flight engineer instructor candidates to perform instructional duties required on AMC airlift and training missions. Includes indepth knowledge in aircraft systems, normal and emergency procedures, performance data computations, and duties and responsibilities of the instructor flight engineer, including practice teaching sessions, training manuals, and forms.

Prerequisites: Trainees must be currently qualified for flying duty and recommended for instructor upgrade. The student will hand-carry the AMC Form 497 with Part I, sections A & B, completed.

Quota Control: HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C5LIQ—C-5 Loadmaster Initial Qualification—PDS Code QJB—DOD 860—Altus/6 wk 2 days—Oct 96

Initially trains aircraft loadmasters in the C-5 aircraft IAW Combat Crew Training School (CCTS) qualification standards as established by the MAJCOM. Course consists of contractor administered academic and simulator training.

Prerequisites: Individual must be currently qualified for flying duty and have CAFSC 114X0. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after scheduled class completion date. Must meet requirements to obtain passport by class start date.

Special Requirements: Secret clearance or Secret clearance applied for by class start date.

Quota Control: HQ AFPC/DPMROT3.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C5SOC—C-5 Pilot Senior Officer—PDS Code 0XB—Altus/1 wk 1 day—Oct 96

Provides training to qualify selected senior officers of C-5 units in the C-5 aircraft. Course consists of contractor administered academic and simulator training. Majority of academic training is computer-based instruction. Training conducted IAW AMCR 51-5 and the current contract.

Prerequisites: Trainee must be a rated pilot assigned as commander or vice commander of a group or wing flying the C-5 aircraft. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/XOTTT-5.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C12A/C/D AC-IU—C-12A/C/D Aircraft Commander Qualification-In Unit—PDS Code P4F—in unit/4 wk—Apr 95

Unit-conducted aircrew training. Qualifies aircraft commander candidates on the knowledge and skills necessary to perform aircraft commander duties on the C-12A, C-12C, and C-12D aircraft.

C12C/D DIFFA—C-12C/D Differences Training—PDS Code 0SK—Keesler/2 wk 3 days/AFSC 11A3C—Oct 96

Qualifies current and qualified pilots of other model or DoD agency C-12s in the C-12 C/D. Includes commercially contracted ground school and simulator and training followed by Air Force flight training.

Prerequisites: Must be rated pilots currently on flying status. Medical physical and Air Force physiological training (altitude training) must be completed before reporting and must be current for at least 30 days after scheduled class completion date. The instrument refresher course, as required by AFI 11-401, is available. Pilots must be current and qualified in any model C-12 and have a minimum of 500 hours of total time 200 hours C-12 or 800 hours of total time 100 C-12 to qualify for differences training.

Special Requirements: DIA and DSAA pilots may graduate as instructor pilots if they meet the following requirements: recommendation from the DIA air operations office or the Defense Security Assistance Agency for instructor upgrade concurrent with the differences training course; 100 hours in command as a C-12 aircraft commander, or previously obtained an instructor qualification in any model C-12. Instructor differences training is 3 weeks long.

Quota Control: 45 AS/DOT.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C12C/D IAC—C-12C/D Instructor Qualification—PDS Code YD8—Keesler/3 wk/AFSC K11A3C—Apr 96

Qualifies aircraft commanders as instructor pilots (IP) in C-12A/C/D aircraft. Includes commercially contracted ground school and simulator refresher training followed by Air Force flight training. Academic phase familiarizes students with standards and responsibilities of an instructor pilot. Provides training in principles of instruction, flying maneuvers, and safety. Students will develop training flight profiles, perform and instruct maneuvers from the right seat, and conduct critique. Graduation upon IP evaluation flight.

Prerequisites: Meet the minimum requirements listed in DIA Reguation 102-3. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days from class start date.

Quota Control: 45 AS/DOT.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

C17ADAC—C-17 Aircraft Commander Airdrop—PDS Code W81—Altus/2 wk—Apr 96

Provides designated C-17 pilots with the knowledge and skills required to upgrade to airdrop aircraft commander. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A qualified C-17 aircraft commander and airdrop copilot. Compliance with paragraph 3.23 is required.

Quota Control: HQ AETC/XOTI.

C17ADCP—C-17 Copilot Airdrop Qualification—PDS Code W95—Altus/2 wk—Apr 96

Qualifies C-17 pilots in the aerial delivery employment of airborne personnel, heavy equipment, and the container delivery system. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A qualified C-17 airland pilot. Compliance with paragraph 3.23 is required.

Special Requirements: Must meet visual standards according to AFI 48-123, *Medical Examination and Medical Standards* (formerly AFR 160-43) and have two pair of night vision goggles (NVG)-compatible eyeglasses in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTI.

C17ADLM—C-17 Loadmaster Airdrop—PDS Code W86—Altus/5 wk—Apr 96

Qualifies C-17 loadmasters in the aerial delivery employment of airborne personnel, heavy equipment, low altitude parachute extraction, and the container delivery system. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A qualified C-17 airland loadmaster. Compliance with paragraph 3.23 is required.

Quota Control: HQ AETC/XOTI.

C17ALAC—C-17 Aircraft Commander Airland—PDS Code W80—Altus/5 wk—Apr 96

Provides designated C-17 pilots with the knowledge and skills required to upgrade to aircraft commander. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training. Emphasizes leadership, air refueling, and airland operations in a combat environment.

Prerequisites: A qualified C-17 pilot who meets the requirements outlined in the current contract. Compliance with paragraph 3.23 is required.

Quota Control: HQ AETC/XOTI.

C17ALCP—C-17 Copilot Airland Qualification—PDS Code W67—Altus/10 wk—Apr 96

Qualifies pilots in the C-17 aircraft and mission. Includes instruction on basic aircraft flight procedures, low-level flight, aircraft systems, air refueling operations, and SKE/VFR formation flying procedures. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A UPT graduate. Compliance with paragraph 3.23 is required.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOTI.

C17ALLM—C-17 Loadmaster Airland—PDS Code W85—Altus/12 wk—Apr 96

Qualifies aircraft loadmasters in the C-17 aircraft. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: Qualified for flying duty and have CAFSC 114X0. Compliance with paragraph 3.23 is required.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOTI.

C17IAC—C-17 Instructor Aircraft Commander—PDS Code W83—Altus/3 wk—Apr 96

Provides designated C-17 pilots with the knowledge and skills required to upgrade to instructor aircraft commander. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training. Emphasizes flying and instructing from either seat, and how to teach systems, crew coordination, and all aspects of the C-17 mission.

Prerequisites: A qualified C-17 aircraft commander who meets the requirements outlined in the current contract. Compliance with paragraph 3.23 is required.

Quota Control: HQ AETC/XOTI.

C17ILM—C-17 Instructor Loadmaster—PDS Code W87—Altus/2 wk—Apr 96

Provides designated C-17 loadmasters with the knowledge and skills required to upgrade to instructor loadmaster. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A qualified C-17 airland loadmaster. Compliance with paragraph 3.23 is required.

Quota Control: HQ AETC/XOTI.

C17PSO—C-17 Pilot Senior Officer—PDS Code W84—Altus/3 wk—Apr 96

Qualifies selected senior officers of C-17 units in the C-17 aircraft. Consists of contractor-administered academics and simulator training followed by Air Force-conducted flight training.

Prerequisites: A rated pilot assigned as commander or vice commander of a wing or group (or higher) flying C-17 aircraft. Compliance with paragraph 3.23 is required.

Quota Control: HQ AETC/XOTI.

C21A AC-IU—C-21A Aircraft Commander-In Unit—PDS Code P4E—in unit/4 wk—Apr 95

Unit-conducted aircrew training. Qualifies aircraft commander candidates on the knowledge and skills necessary to perform aircraft commander duties on the C-21.

C21A-P-A/B-IU—C-21A Pilot Qualification/Requalification-In Unit—PDS Code P4T—in unit/10 wk—Apr 95

Unit-conducted aircrew training. Qualifies pilot candidates on the knowledge and skills necessary to perform pilot duties on the C-21.

C21A-PIQ—C-21A Pilot Initial Qualification—PDS Code 5ZS—Keesler/5 wk 1 day/AFSC 11A3F—Apr 96

Qualifies pilots in the C-21A aircraft. Includes commercially contracted ground school and simulator training followed by Air Force flight training. This course is required for trainees who have been unqualified in the C-21A for more than 4 years.

Prerequisites: Must be rated pilots currently on flying status. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after class completion date.

Quota Control: HQ AFPC/DPMROM1.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C21IP-IU—C-21 Instructor Pilot-In Unit—PDS Code P4U—in unit/4 wk—Apr 95

Unit-conducted aircrew training. Qualifies instructor pilot candidates on the knowledge and skills necessary to perform instructor pilot duties on the C-21.

C21/A IAC—C-21A Instructor Pilot Course—PDS Code 8VN—Keesler/3 wk 2 days/AFSC K11A3F—Apr 96

Qualifies aircraft commanders as instructor pilots (IP) in C-21A aircraft. Provides 2 days of academics, 3 simulators, 2 days IP lead-in, 1 day academics, 5 training flights, and an IP evaluation. Students will develop training flight profiles, conduct pre-mission briefings, perform and instruct maneuvers from the right seat, and conduct critiques.

Prerequisites: Trainees must meet MCI 10-202 upgrade criteria. Flight physical and physiological training (altitude chamber) must be current for at least 30 days after class start date.

Quota Control: 45 AS/DOT.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C130CSOIQ—C-130 Communications System Operator Instructor Qualification—PDS Code ZHW—Kirtland/2 wk—Apr 95

Qualifies current and qualified MC-130E or HC-130 communications system operators as instructor communications system operators in HC-130 or MC-130 aircraft. Academic phase familiarizes students with standards and responsibilities of an instructor communications system operator, safety, operational procedures, and training management. Student will develop training flight profiles, perform and instruct procedures, and conduct flight briefings, student critiques, and debriefings.

Prerequisites: Qualified and current in either the HC-130 or MC-130E aircraft as a communications system operator and meet minimum time/experience requirements of the appropriate 36-series (formerly 51-series) publications as supplemented and must have completed the Flight Instructor Preparatory (FIP) course or MAJCOM equivalent. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ AFRES/DOT, or ANGRC/DOT as applicable.

C130CSOIQIU—C-130 Communications Systems Operator Instructor Qualification In-Unit—PDS Code ZHR—location: in unit/2 wk—Apr 95

Unit-conducted aircrew training. Qualifies C-130 communication system operators (CSO) as instructor CSOs in HC-130 or MC-130E aircraft.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ AFRES/DOT, or ANGRC/DOT as applicable.

C141AC—Aircraft Commander Qualification—PDS Code S5R—Altus/5 wk—Apr 96

Formal phase of upgrade to aircraft commander IAW transition training unit qualification standards as established by MAJCOM. Provides training in AMC procedures, forms, policy, aircrew management, tactical VFR training, simulator, and aircraft flights. Completion of this course and the line skills development phase is required for all nonprevious AMC fixed wing aircraft ACs prior to upgrade to aircraft commander.

Prerequisites: Trainees must be qualified and current C-141 pilots. Minimum requirements as listed in MCR 51-1, volume 4. Compliance with paragraph 3.23 is required.

Quota Control: HQ AMC/DOTF.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141ACAD—Airdrop Qualification—PDS Code R1M—Altus/6 wk 4 days—Oct 96

Qualifies aircraft commanders in wing formation and single ship airdrop. Provides academic training in normal and emergency airdrop procedures, flight simulator, and aircraft transition, using standard airdrop training bundles and heavy equipment.

Prerequisites: Trainees must be qualified and current aircraft commanders or higher and pilot aerial refueling qualified. Must have completed the copilot airdrop qualification course (CAD) and have a minimum of 6 months of airdrop experience, and meet other requirements outined in MCR 51-1, volume 4. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/DOTF.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141ACAR—Pilot Aerial Refueling Qualification—PDS Code 04Z—Altus/3 wk 3 days—Oct 96

Qualifies C-141 aircraft commanders in air refueling procedures IAW standards as established by MAJCOM. Training emphasizes normal and emergency air refueling procedures, AMC air refueling publications, forms and policies, and pilot mission planning activities associated with air refueling. Includes training in ground school, flight simulator, and the aircraft in an integrated crew environment.

Prerequisites: Trainees must be qualified and current aircraft commanders or higher and comply with the records requirements in paragraph 3.23.

Quota Control: HQ AMC/DOTF.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

C141ACIQ—Initial Qualification Aircraft Commander—PDS Code FD6—Altus/12 wk 2 days—Oct 96

Qualifies nonprior C-141 pilots in C-141 aircraft. Provides academic training in aircraft systems and procedures with emphasis on checklists and normal and emergency procedures. Includes flight simulator and aircraft transition. Trainees will complete the course at the aircraft commander level unless the Altus instructors recommend otherwise. If not recommended for aircraft commander qualification, the trainee will be trained at the first pilot or copilot level.

Prerequisites: Trainees must be prior aircraft commanders with a minimum of 1000 total flying hours and meet the requirements outlined in MCR 51-1, volume 4. Students must meet records requirements listed in paragraph 3.23.

Special Requirements: Students without passports need to bring their birth certificate.

Quota Control: HQ AFPC/DPMROM.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141ACRQ—Pilot Requalification—PDS Code X95—Altus/8 wk 3 days—Oct 96

Trains previously qualified C-141 pilots who have been out of the aircraft from 2 to 5 years to assume copilot, first pilot, or aircraft commander duties. Includes training aircraft systems, checklist familiarization, normal and emergency procedures, flight simulator, and aircraft transition in an integrated crew environment.

Prerequisites: Trainees must be previously qualified C-141 pilots currently on flying status. Students must meet records requirements listed in paragraph 3.23.

Special Requirements: Secret clearance.

Quota Control: HQ AFPC/DPMROM.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141CIQ—Pilot Initial Qualification—PDS Code XA4—Altus/10 wk 1 day—Oct 96

Qualifies pilots in C-141 aircraft. Provides training in aircraft systems and procedures with emphasis on checklists, and normal and emergency procedures. Includes cockpit procedures trainer (CPT), flight simulator, and aircraft transition. The "A" shredout identifies initial conversion trainees from UPT. The "D" course shredout identifies C-141 requalification and trainees.

Prerequisites: Trainees must be rated pilots currently on flying status. Candidates must meet requirements outlined in MCR 51-1, volume 4. Students must comply with records requirements listed in paragraph 3.23.

Quota Control: HQ AFPC/DPMROM.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141FIQ—Flight Engineer Initial Qualification—PDS Code AW3—Altus/14 wk 4 days—Oct 96

Flying course designed to train flight engineers IAW standards as approved by the MAJCOM. Provides academic training in normal and emergency procedures, flight simulator, and aircraft transition.

Prerequisites: Currently qualified for flying duty and possess CAFSC 1A1X0C. Must have completed the BFE course or fixed wing aircraft performance course, and be in grade E-4 through E-9. Compliance with paragraph 3.23 is required.

Special Requirements: US citizen with Secret clearance or Secret clearance applied for by class start date. Students need to bring a certified copy of their birth certificate for passport application.

Quota Control: HQ AFPC/DPMRAD3.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

C141IAC—Instructor Aircraft Commander Qualification—PDS Code S5S—Altus/3 wk 4 days—Oct 96

Qualifies aircraft commanders as instructor pilots (IAC) in C-141 aircraft. Academic phase familiarizes students with standards and responsibilities of an AMC IAC; provides training in principles of instruction, instructional methods and techniques, training publications, flying maneuvers, and safety. During simulator phase, student will develop training flight profiles, perform and instruct maneuvers from the right seat and conduct critique. Includes 6 hours of systems review. Flight training is given in the right seat. Graduation upon initial IAC evaluation flight.

Prerequisites: Trainee must be a current and qualified C-141 pilot. Meet the minimum requirements listed in MCR 51-1, volume 4. (Course not required for previously qualified IAC.) Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/DOTF.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

C141IFE—Flight Engineer Instructor—PDS Code 2VZ—Altus/4 wk—Oct 96

Prepares flight engineers for instructor flight engineer duties in C-141 aircraft. Familiarizes students with standards and responsibilities of an instructor. Provides training in principles of instruction, instructional methods and techniques, training publications, and practice teaching sessions.

Prerequisites: Trainees must be currently qualified for flying duty and recommended for instructor upgrade IAW MCR 51-1.

Special Requirements: Instructor will hand-carry C-141 FE Training Guide with Part I completed.

Quota Control: HQ AMC/DOTF.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141LAD—Loadmaster Initial Airdrop Qualification—PDS Code S5V—Altus/4 wk—Oct 96

Qualifies loadmasters in combat airlift operational procedures IAW standards approved by MAJCOM. Includes ground school and flying training utilizing actual personnel and heavy equipment airdrops. Training includes commercially contracted ground school and simulator training followed by Air Force flying training.

Prerequisites: Be qualified and current in C-141 basic crew position and meet other requirements outlined in MCR 51-1, volume 4, and records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/DOTF.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141LIQ—Loadmaster Initial Qualification—PDS Code QJA—DOD 860—Altus/7 wk 2 days—Oct 96

Initially trains aircraft loadmasters in the C-141 aircraft IAW qualification standards approved by the MAJCOM. Includes ground school, loading simulators, initial chemical warfare training, and Air Force-conducted evaluation. Training is contractor conducted.

Prerequisites: Individual must be currently qualified for flying duty and have CAFSC 1A2X1. Students must meet records requirements listed in paragraph 3.23.

Special Requirements: Secret clearance or Secret clearance applied for by class start date. Students must bring a certified copy of their birth certificate for passport application.

Quota Control: HQ AFPC/DPAAD4.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141NIQ—Navigator Initial Qualification—PDS Code XBF—Altus/13 wk—Oct 96

Qualifies navigators in C-141 aircraft. Course is designed to qualify navigators in strategic airlift and tactical airdrop mission procedures. The course trains rated navigators in AMC navigation requirements and procedures and C-141 navigation system operations and emergency procedures before initiation of training in tactical procedures. Includes ground school, flight simulator, and aircraft transition. Students must satisfactorily complete strategic airlift ground and flying training before attending the airdrop phase of training.

Prerequisites: Trainees must be rated navigators (AFSC 12XXX) currently on flying status. Medical flight physical and physiological training (altitude chamber) must be current for 30 days after class completion date.

Special Requirements: Secret clearance. Students need to bring a certified copy of their birth certificates for passport application. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AFPC/DPMROM.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

C141SOC—Pilot Senior Officer—PDS Code 0XC—Altus/1 wk 3 days—Oct 96

Qualifies senior officers of C-141 units, or those directed by HQ AMC to attend course, in C-141 aircraft. Includes training in ground school and flight simulator. Includes basic aircraft systems, familiarization with checklists, normal and emergency procedures, and mission pacing. Graduates of this course are restricted IAW MCR 51-1, volume 4.

Prerequisites: Trainees must be rated pilots currently on flying status and meet other requirements outlined in MCR 51-1, volume 4.

Special Requirements: Students must meet records requirements listed in paragarph 3.23.

Quota Control: 19 AF/DOM.

4021 C141 001—Aircraft Maintenance Officer Systems Training—PDS Code 31B—Altus/2 wk 2 days—Apr 95

Trains and familiarizes aircraft maintenance officers with information and concepts received by pilots in their training on C-141 aircraft systems.

Prerequisites: Trainee must be a qualified aircraft maintenance officer (21AX).

Special Requirements: Secret clearance.

Quota Control: HQ AMC/LGQRT.

F15ACBOOAT—USAF Operational Training Course, F-15—PDS Code URN—Tyndall/23 wk/AFSC 11F3F—Oct 96

Initial qualification training for pilots to operate the F-15 (A/B/C/D models) as a weapons system.

Prerequisites:

a. Graduate of course B/F-V5A-K (or equivalent) within 45 days of class start date.

b. Successfully completed centrifuge training according to AFI 11-404.

c. Meet one of the following experience criteria:

(1) Receive a fighter assignment from UPT/SUPT.

(2) T-37/T-38 pilot selected for a fighter assignment by the Major Weapons System Selection Board.

d. Survival training:

(1) Basic survival training (S-V80-A or equivalent) desired.

(2) Basic water survival training (S-V86-A or equivalent) mandatory.

e. Altitude chamber training and currency IAW AFI 11-403.

Special Requirements: Incoming students must have a Top Secret clearance initiated with background investigation no later than 60 days before class start date. Students already possessing a Top Secret clearance must have had a background investigation within 4 1/2 years of class start date. Clearance level and date must be included on orders and students must bring a copy of their completed DD Form 398, *Personnel Security Questionnaire*, or Electronic Personnel Security Questionnaire (EPSQ) to Tyndall for inprocessing. Losing units processing orders must ensure this occurs to prevent a stoppage in training. Students *will not* start formal training without these conditions met.

Personnel Control: HQ AFPC/DPAOY.

Quota Control: HQ AETC/XOT.

OPR: HQ 19 AF/DOK.

F15ACFSOAT—USAF Flight Surgeon High Performance Aircraft Training Course—PDS Code 1WN—Tyndall/2 wk—Apr 95

Teaches flight surgeons flight medicine in the fighter environment. Addresses physical and aeromedical issues unique to fighter aircrews.

Prerequisites: a. Must be active duty Air Force, Air National Guard, or an Air Force Reserve member currently assigned as an active (ASC 8A) flight surgeon in a high performance aircraft, a T-37/38 aircraft, or enrolled in residence in the Aerospace Medicine Primary Course.

b. Must have completed or be presently enrolled in the Aerospace Medicine Primary Course with a present or expected designation of flight surgeon in the Air Force.

c. Applicant must complete the course application and provide:

(1) Last 12 months' flying hours.

(2) AF Form 702.

(3) AF Form 1042.

(4) SF 88 and SF 93.

(5) Centrifuge training certificate.

(6) Medical commander and air commander endorsement.

d. Centrifuge training at Brooks AFB during Aerospace Medicine Primary Course is acceptable.

e. Must have at least 1 year of retainability.

Quota Control: HQ AETC/XOTF. OPR: 19 AF/DOK.

F15ACIOOAT—USAF Instructor Pilot Training Course, F-15—PDS Code U7B—Tyndall/11 wk/AFSC T11F3F—Oct 96

Qualifies an experienced fighter pilot as a formal training unit instructor pilot in the F-15 (A/B/C/D models).

Prerequisites: a. USAF Pilots: Current and experienced in the F-15; fully qualified F-15 four-ship flight lead previously or at time of selection; meets MCI 11-F15, volume 1, instructor pilot criteria. Pilots not currently MR/MS in the F-15 may attend this course after successful completion of F15ACTXOAT.

Special Requirements: a. Incoming students must have a Top Secret clearance initiated with background investigation no later than 60 days before class start date. Students already possessing a Top Secret clearance must have had a background investigation within 4 1/2 years of class start date. Clearance level and date must be included on orders and students must bring a copy of their completed DD Form 398, *Personnel Security Questionnaire*, or Electronic Personnel Security Questionnaire (EPSQ) to Tyndall for inprocessing. Losing units processing orders must ensure this occurs to prevent a stoppage in training. Students *will not* start formal training without these conditions met.

b. Altitude training and currency IAW AFI 11-403.

c. Centrifuge training IAW AFI 11-404.

Personnel Control: HQ AFPC/DPMROC.

Quota Control: HQ AETC/XOT.OPR: 19 AF/DOK.

F15ACTXOAT—USAF Conversion Training Course, F-15—PDS Code T5C—Tyndall/duration */AFSC 11F3F—Oct 96

Initial qualification training (IQT) for previously qualified fighter pilots to operate the F-15 (A/B/C/D models) as a weapons system.

Prerequisites: a. Track 1A:

(1) 300 FP/IP front/left seat hours in tactical (air-to-air radar equipped) fighter/attack aircraft and current within 42 months prior to course entry, or

(2) 500 IP/FP front/left seat hours in tactical (air-to-air radar equipped) fighter/attack aircraft and current within 48 months (4 years) before course entry, or

(3) 1000 IP/FP front/left seat hours in tactical (air-to-air radar equipped) fighter/attack aircraft and current within 96 months (8 years) before course entry, or

(4) be an experienced F-15 pilot, noncurrent in the F-15 between 5 and 8 years.

b. Track 1B:

(1) 300 IP/FP front/left seat hours in tactical (non air-to-air radar equipped) fighter/attack aircraft and current within 42 months before course entry, or

(2) 500 IP/FP front/left seat hours in tactical (non air-to-air radar equipped) fighter/attack aircraft and current within 48 months (4 years) before course entry, or

(3) 1000 IP/FP front/left seat hours in tactical (non air-to-air radar equipped) fighter/attack aircraft and current within 96 months (8 years) before course entry.

c. Track 2A. 200 hours or 1 year of operational experience in the F-15, noncurrent over 6 months and not more than 2 years. 19 AF/DO may waive entry requirement up to 3 years noncurrent for highly qualified prior F-15 experience (such as USAF Weapons Instructor Course) or if returning from compatible exchange (example: F-18).

d. Track 2B. 200 hours or 1 year of operational experience in the F-15, noncurrent over 2 years.

e. Track 3: Senior officers (O-6 and above) and test pilots with 500 hours or 2 years of operational experience in tactical fighter/attack aircraft.

f. Survival Training (all tracks):

(1) Basic Survival training (S-V80-A or equivalent) desired.

(2) Basic Water Survival training (S-V86-A or equivalent) mandatory.

Special Requirements: a. Incoming students must have a Top Secret clearance initiated with background investigation no later than 60 days before class start date. Students already possessing a Top Secret clearance must have had a background investigation within 4 1/2 years of class start date. Clearance level and date must be included on orders and students must bring a copy of their completed DD Form 398, *Personnel Security Questionnaire*, or Electronic Personnel Security Questionnaire (EPSQ) to Tyndall for inprocessing. Losing units processing orders must ensure this occurs to prevent a stoppage in training. Students *will not* start formal training without these conditions met.

g. (All tracks) Centrifuge training according to AFI 11-404.

h. Altitude chamber training and currency according to AFI 11-403.

Personnel Control: HQ AFPC/DPAOY.

Quota Control: HQ AETC/XOT.

OPR: 19 AF/DOK.

NOTE: Personnel and quota control for Track 3 is 19 AF/DOT.

*Track 1A - 16 wk 2 days; Track 1B - 17 wk 2 days; Track 2A - 7 wk 4 days; Track 2B - 9 wk; Track 3 - 3 wk.

F15C-3ZITO—USAF F-15C Intelligence Top-Off Course—PDS Code 3OE—Tyndall/5 wk—Apr 96

Provides training in F-15C fundamentals and the intelligence knowledge needed to support F-15C operations. Training includes: basic aerodynamics, F-15C capabilities, radar principles, electronic attack and electronic protect capabilities, tactical electronic warfare suite capabilities, capabilities of F-15C air-to-air missiles and M61A1 gun, F-15C training methods and their tactical applications, tactical considerations of adversary aircraft/air-to-air missiles/surface-to-air missiles/anti-aircraft artillery/integrated air defense systems, scenario development skills, construction of air-to-air situation displays, familiarization with air tasking orders and significant information within the document, intelligence's role in the SERENE BYTE/PACER WARE and other F-15C related programs, F-15C mission planning process, pre-mission briefings, debriefing, and reporting procedures.

Prerequisites: Intelligence officers, NCOs, or airmen who are currently assigned, enroute to assignment, or in a position that directly supports an F-15C unit.

Special Requirements: Hand-carry medical and dental records. Medical flight physical (AF Form 1042 completed) must be current for at least 30 days after scheduled class completion date. Top Secret clearance before class start date.

Reporting Procedures: Report to Tyndall AFB billeting, bldg 1332, 1 day before class start date. During duty hours, report to 325 OSS/IN, bldg 219, room 14, on class start date. After duty hours, report to billeting no earlier than 0800, 1 day before class start date and no later than 0745 on class start date.

Quota Control: AETC AOS/IN.

Waiver Authority: AETC AOS/CC.

F16CGCXOPL—USAF Conversion Training Course F16C/D (Blk 40/42)—PDS Code XHE—Luke/duration *—Oct 96

Provides training to convert pilots from the F-16A/B or F-16C/D (Block 25/30/50/52) to the F-16C G (Block 40/42).

Prerequisites: ECL 85 SO.

a. Track 1.

(1) Must be current and qualified in the F-16C, blocks 30/50.

(2) Must have a qualification/instrument check that does not expire during the length of the course.

(3) Must be scheduled for a formal LANTIRN training according to syllabus F16CGLOOPL, tracks 1 or 3.

b. Track 2.

(1) Must have an F-16 qualifications/instrument check that does not expire during the length of the course.

(2) Be previously or currently qualified in the F-16C.

(3) Be assigned to a unit converting to the F-16C, blocks 40/42.

c. Track 3.

(1) Must have an F-16 qualification/instrument check that does not expire during the length of the course.

(2) Not be previously or currently qualified in the F-16C.

(3) Have at least one F-16 landing within the last 60 days.

Track Assignment:

a. Track 1. F-16C to F-16C, blocks 40/42, with followon LANTIRN training.

b. Track 2. F-16C to F-16C, blocks 40/42.

c. Track 3. F-16A to F-16C, blocks 40/42.

Special Requirements: Secret clearance.

Quota Control: HQ AETC/XOTF.OPR: 19 AF/DOK.

* Track 1: 2 wk 4 days; Track 2: 4 days; Track 3: 1 wk.

F16CGLOOPL—USAF LANTIRN Training Course F-16C/D (Blk 40/42)—PDS Code HXD—Luke/duration *—Oct 96

Track 1 provides academic and flying training required for LANTIRN Category 1 qualification. This includes day and night medium altitude employment. Track 2 provides academic and flying training to LANTIRN Category 1 pilots who have been identified to upgrade to Category 2. Pilots completing this course will be proficient in day and night low and medium altitude LANTIRN operations. Track 3 provides academic and flying training required for LANTIRN requalification. Track 4 provides flying required to become a F-16 LANTIRN FTU instructor pilot.

Prerequisites: a. Track 1 (Cat 1 training):

(1) Must be current and qualified in the F-16C, Block 40/42.

(2) Have a current qualification/instrument check which does not expire during the course.

b. Track 2 (Cat 1 upgrade to Cat 2):

(1) Must be current and qualified in the F-16C, Block 40/42.

(2) Have a current qualification/instrument check which does not expire during the course.

(3) Must be a graduate of AETC course F16CGLOOPL, Track 1.

(4) Must meet the requirements for Category 2 LANTIRN status according to MCI 11-F16, volume 1. Pilots en route to PACAF must have more than 50 F-16 hours. If entering directly from track 2, MCI 11-F16, volume 1, prerequisites are waived.

(5) Have unit commander approval for training entry.

c. Track 3 (Requalification training):

(1) Must be current and qualified in the F-16C, blocks 40/42.

(2) Have a current qualification/instrument check that does not expire during the course.

(3) Graduate of a low-altitude LANTIRN course.

(4) Have not flown with the LANTIRN system for 226 or more days.

d. Track 4 (Instructor upgrade training):

(1) Must be current and qualified in the F-16C, Block 40/42.

(2) Graduate of 19 AF syllabus course F16COIOOPL and F16CGLOOPL.

(3) LANTIRN current within the previous 6 months.

(4) Must be Category 2 certified.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOTF. OPR: 19 AF/DOK.

*Track 1: 1 wk 3 days; Track 2: 4 wk; Track 3: 2 wk, 4 days; Track 4: 2 wk 3 days.

F16COBOOPL—USAF Basic Operational Training Course F16C/D (Blk 30/32/40/42)—PDS Code XHJ—Luke/25 wk/AFSC 11F3H—Oct 96

Initial qualification and mission capable training for pilots to operate the F-16C/D as a weapons system.

Prerequisites: ECL 85 SO.

a. Graduate of Introduction to Fighter Fundamentals (IFF) within 60 days of class start date.

b. Completed centrifuge training according to AFI 11-404.

c. Meet one of the following experience criteria:

(1) Receive a fighter assignment from UPT.

(2) T-37/T-38 pilot selected for a fighter assignment by the Major Weapons System Selection Board.

(3) First assignment FAC selected for fighters by the FA-FAC to Fighter Selection Board.

d. Survival Training (desirable before course entry):

(1) Basic Survival Training, S-V80-A, or equivalent.

(2) Water Survival Training, S-V86-A, or equivalent.

Special Requirements: Secret clearance before class start date.

Quota Control: HQ AETC/XOTF. OPR: 19 AF/DOK.

F16COCXOPL—USAF Conversion Pilot Training Course F16C/D (Blk 30/32)—PDS Code XHF—Luke/duration *—Oct 96

Provides training to convert pilots from the F-16A/B and F-16C/D (blocks 40/42/50/52) to the F-16C/D (blocks 30/32). Pilots will be capable of performing similar mission tasks to approximately the same level as they possessed in the F-16A/B or F-16C/D (blocks 40/42/50/52).

Prerequisites: a. Track 1 (F-16A to F-16C, blocks 40/42). Academics and flying training.

(1) Must have an F-16 qualification/instrument check that does not expire during the length of the course.

(2) Must have been MR, MS, or an F-16A IP IAW MCI 11-F16, volume 1.

(3) Must have had at least one F-16 landing within the last 60 days.

b. Track 2 (F-16C, blocks 40/42/50/52, to F-16C, blocks 30/32). Academics and training devices only.

(1) Must have an F-16 qualification/instrument check that does not expire during the length of the course.

(2) Must be previously or currently qualified in the F-16C.

c. Track 2a. (F-16C, blocks 40/42/50/52 to F-16C, blocks 30/32). Academics and training devices only.

(1) Must meet all requirements of Track 2 above.

(2) Must have met IP requirements IAW MCI 11-F16, volume 1, paragraph 6.7.1.

d. Track 3. (F16A to the F-16C, blocks 30/32.

(1) Must have an F-16 qualification/instrument check that does not expire during the length of the course.

(2) Must have been MR, MS, or an IP in the F-16A IAW MCI 11-F16, Volume 1.

(3) Must be scheduled for formal LANTIRN training IAW 19 AF syllabus F16CGL00PL.

e. Air-to-air only pilots.

(1) Air-to-air only pilots will not fly or receive ground training in SA.

(2) Must meet appropriate track prerequisites listed above.

f. International pilots.

(1) Must meet appropriate track prerequisites listed above.

(2) Must have English comprehensive level (ECL) of 85; specialized English training required.

Special Requirements: Secret clearance.

Quota Control: HQ AETC/XOTF.OPR: 19 AF/DOK.

*Track 1: 2 wk, 4 days; Track 2: 4 days; Track 3: 1 wk 2 days.

F16COFSOFL—USAF Flight Surgeon High Performance Aircraft Training Course—PDS Code 1YL—Luke/2 wk//MASL D119039—Oct 96

Teaches flight surgeons flight medicine in the fighter environment. Addresses physical and aeromedical issues unique to fighter aircrews.

Prerequisites: ECL 85 SR.

a. Must be active duty Air Force, Air National Guard, or an Air Force Reserve member currently assigned as an active (ASC 8A) flight surgeon in a high performance aircraft, a T-37/38 aircraft, or enrolled in residence in the Aerospace Medicine Primary Course.

b. Must have completed or be presently enrolled in the Aerospace Medicine Primary Course with a present or expected designation of flight surgeon in the Air Force.

c. Applicant must complete the course application and provide:

(1) Last 12 months' flying hours.

(2) AF Form 702.

(3) AF Form 1042.

(4) SF 88 and SF 93.

(5) Centrifuge training certificate.

(6) Medical commander and air commander endorsement.

d. Centrifuge training at Brooks AFB during Aerospace Medicine Primary Course is acceptable.

e. Must have at least 1 year of retainability.

Quota Control: HQ AETC/XOTF. OPR: 19 AF/DOK.

F16COIOOPL—USAF Instructor Pilot Upgrade Training Course F-16C/D (Blk 30/32/40/42)—PDS Code 2WY—Luke/duration */AFSC T11F3H—Oct 96

Track 1 provides academic and flying training required to train an F-16C/D pilot to become an F-16C/D instructor pilot. Graduates are capable of performing instructor duties in all F-16C/D formal training courses. Track 2 is designed for previous F-16 formal instructor course graduates who are instructor noncurrent.

Prerequisites: ECL 85 SO.

a. Track 1:

(1) Qualified and current in the F-16C/D.

(2) Qualified for selection according to MCI 11-F-16, volume 1.

(3)Three months operational experience as an F-16 four-ship flight lead.

b. Track 2:

(1) Qualified and current in the F-16C/D.

(2) Previous graduate of an F-16 formal instructor course.

(3) Instructor noncurrent between 6 months and 8 years.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOTF.OPR: 19 AF/DOK.

F16COTXOPL—USAF Transition/Requalification Training Course F16C/D (30/32/40/42)—PDS Code XHH—Luke/duration */AFSC 11F3H—Oct 96

This is a four-track course which trains prior qualified fighter pilots in the F-16C/D.

Prerequisites: a. Track 1.

(1) Must have 300 FP/IP front/left seat hours in tactical fighter/attack aircraft and current within 42 months before course entry, or

(2) Must have 500 FP/IP front/left seat hours in tactical fighter/attack aircraft and current within 5 years before course entry, or

(3) Must have 1000 FP/IP front/left seat hours in tactical fighter/attack aircraft and current within 8 years before course entry.

b. Track 2a. Previously qualified in the F-16, noncurrent between 2 years and 5 years.

c. Track 2b. Previously qualified in the F-16, noncurrent between 6 months and 2 years.

d. Track 3.

(1) 500 hours or 2 years operational experience in fighter aircraft, and

(2) Senior officer, test pilot, or current F-15C pilot en route to aggressor training, and

(3) Concurrence of 19 AF/DO.

(4) Air-to-air only students will not fly or receive ground training in SA or SAN. These students will fly the NTR IAW the NTR-1 (Track 1) mission outline.

(5) Former aggressor pilots who received air-to-air only TX training will receive air-to-ground training before reassignment to an F-16 operational or formal training unit with an air-to-ground role. For formal training, these pilots must have an F-16 instrument/qualification check that will not expire during the course. These pilots will fly and receive ground training for SA, SAN, and SAT modules IAW the TX Track 1D syllabus. Additionally, the upgrading pilot will fly NTR-1 before SAN-1. The course length for training is 23 training days.

e. Track 4.

(1) Senior officer, and

(2) Concurrence of 19 AF/DO.

(3) Previously qualified in tactical fighter aircraft.

f. One year remaining in physiological training certificate.

g. Survival training mandatory:

(1) Basic Survival, S-V80-A, or equivalent.

(2) Water Survival, S-V86-A, or equivalent.

g. Completed centrifuge training for tracks 1, 2, and 3 according to AFI 11-404.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOTF.OPR: 19 AF/DOK.

* Track 1: 16 wk; Track 2A: 6 wk, 4 days; Track 2B. 5 wk, 3 days; Track 3: 4 wk 1 day; Track 4: 1 wk.

H1FEIQ—H-1 Flight Engineer Instructor Qualification—PDS Code 1AQ—Kirtland/4 wk 2 days—Apr 95

Qualifies current H-1 flight engineers as instructor flight engineers in H-1 aircraft. Academic phase familiarizes students with standards and responsibilities of an instructor flight engineer, safety, operational procedures, and training management. Student will develop training flight profiles, perform and instruct maneuvers, and conduct flight briefings, student critiques, and debriefings.

Prerequisites: Qualified and current in H-1 aircraft as a flight engineer and meet minimum flight experience requirements of AFI 36-2208 (formerly AFR 51-2) as supplemented, have completed the Flight Instructor Preparatory (FIP) course or MAJCOM equivalent, and meet the minimum requirements for upgrade to IFE as listed in AFMAN 36-2108. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Student should hand-carry all unit-issued instructor publications.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

H1FEIQIU—H-1 Flight Engineer Instructor Qualification In-Unit—PDS Code 1AP—location: in unit/4 wk 2 days—Apr 95

Unit-conducted aircrew training. Qualifies H-1 flight engineers as H-1 instructor flight engineers.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS.

H1FEMQ—H-1 Flight Engineer Mission Qualification—PDS Code 1BV—Kirtland/11 wk—Apr 95

Qualifies flight engineers as mission qualified H-1 flight engineers. Includes academic and flying training.

Prerequisites: On flying status, qualified for flying duty, and possess a CAFSC of 1A1X1B. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of S-V84-A, USN Underwater Egress Training (UET); S-V80-A, Basic Survival Training; and S-V86-A or S-V90-A, Water Survival Training.

Special Requirements: Secret clearance by class start date. Students scheduled for follow-on NVG training must meet vision standards according to AFMAN 48-123 (formerly AFR 160-43), and have two pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, HQ PACAF/DOTT, or HQ AFPC/DPMRAD3 as applicable.

H1FEMQIU—H-1 Flight Engineer Mission Qualification In-Unit—PDS Code 1BA—location: in unit/11 wk—Apr 95

Unit-conducted aircrew training. Qualifies helicopter flight engineers in H-1 aircraft.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, HQ PACAF/DOTT, or HQ AFPC/DPMRAD3 as applicable.

H1FENVGQ—H-1 Flight Engineer Night Vision Goggle Qualification—PDS Code 1AY—Kirtland/2 wk—Apr 95

Qualifies current H-1 flight engineers in remote area operations using night vision goggles.

Prerequisites: Current and qualified as flight engineer in an H-1 aircraft. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Students must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

H1FENVGQIU—H-1 Flight Engineer Night Vision Goggle Qualification In-Unit—PDS Code 1AR—location: in unit/2 wk—Apr 95

Unit-conducted aircrew training. Qualifies current and qualified H-1 flight engineers in remote area operations using night vision goggles.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

H1NACU—H-1N Aircraft Commander Upgrade—PDS Code 1FJ—Kirtland/8 wk—Apr 95

Qualifies H-1 pilots or H-1N copilots as H-1N aircraft commanders.

Prerequisites: On flying status, qualified for flying duty, and previously qualified as an H-1 aircraft commander or currently qualified as an H-1N copilot. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of USN Underwater Egress Training (UET), S-V84-A. Pilots attending requalification must have been current and qualified as a H-1 aircraft commander within 60 months of class start date. Candidates must meet minimum requirements of AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Secret clearance by class start date. Students scheduled for follow-on NVG training must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, HQ PACAF/DOTT, or HQ AFPC/DPMRAD3 as applicable.

H1NACUIU—H-1N Aircraft Commander Upgrade In-Unit—PDS Code 1DP—location: in unit/8 wk—Apr 95

Unit-conducted aircrew training. Qualifies H-1N copilots as aircraft commanders.

Prerequisites: As specified in AFI 36-2208, *US Air Force Helicopter Aircrew Training* (formerly AFR 51-2).

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, HQ PACAF/DOTT, or HQ AFPC/DPMRAD3 as applicable.

H1NPIQ—H-1N Pilot Instructor Qualification—PDS Code 1CA—Kirtland/4 wk 2 days—Apr 95

Qualifies current and qualified H-1N aircraft commanders as instructor pilots. Academic phase familiarizes students with standards and responsibilities of an instructor pilot, safety, operational procedures, and training management. Student will develop training flight profiles, perform and instruct maneuvers from the left seat, and conduct flight briefings, student critiques, and debriefings.

Prerequisites: Qualified and current in the H-1N aircraft as an aircraft commander and meet minimum time/experience requirements of AFI 36-2208 (formerly AFR 51-2) as

supplemented, completed the Flight Instructor Preparatory (FIP) Course or MAJCOM equivalent course, and have at least 10 hours of left seat time within the last 60 days. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

H1NPIQIU—H-1N Pilot Instructor Qualification In-Unit—PDS Code 1C5/location: in unit/4 wk 2 days—Apr 95

Unit-conducted aircrew training. Qualifies H-1N aircraft commanders as instructor pilots.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

H1NPMQ—H-1N Pilot Mission Qualification—PDS Code 1LF—Kirtland/11 wk—Apr 95

Qualifies helicopter pilots in H-1N aircraft.

Prerequisites: On flying status, qualified for flying duty, and a graduate of Rotary Wing Qualification Course(s) F-V5B-B0 or P-V4C-A or equivalent helicopter flying school. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of S-V84-A, USN Underwater Egress Training (UET); S-V80-A, Basic Survival Training; and S-V86-A or S-V90-A, Water Survival Training. ECL 80SR.

Special Requirements: SECRET clearance by class start date. Students scheduled for follow-on NVG training must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRS: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

H1NPMQIU—H-1N Pilot Mission Qualification In-Unit—PDS Code 1GL—location: in unit/11 wk—Apr 95

Unit-conducted aircrew training. Qualifies helicopter pilots in the H-1N as copilots or aircraft commanders as prerequisites and supervisors determine.

Prerequisites: As specified in AFR 36-2208 (formerly AFR 51-2) as supplemented. ECL 80 SR.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRS: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

H1NPNVGQ—H-1N Pilot Night Vision Goggle Qualification—PDS Code 1DF—Kirtland/2 wk—Apr 95

Qualifies current aircraft commanders and copilots in remote area night operations using night vision goggles.

Prerequisites: Current and qualified in the H-1N as a copilot or aircraft commander. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Students must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

H1NPNVGQIU—H-1N Pilot Night Vision Goggle Qualification In-Unit—PDS Code 1CJ—location: in unit/2 wk—Apr 95

Unit-conducted aircrew training. Qualifies current H-1N aircraft commanders and copilots in remote area operations using night vision goggles.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, or HQ PACAF/DOTT as applicable.

HC130ACU—HC-130 Aircraft Commander Upgrade—PDS Code ZSV—Kirtland/3 wk 1 day—Apr 95

Qualifies HC-130 mission-qualified copilots as mission-qualified aircraft commanders. Includes mission qualification academic, simulator, and flying training.

Prerequisites: Current and qualified HC-130 mission-qualified copilot. Meet the requirements of the applicable 36-series (formerly 51-series) publications and have completed C130ACQ or C130PRK and C130PMK/S/V, as applicable or equivalent in-unit upgrade. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOHT, HQ AFRES/DOT, and ANGRC/DOT as applicable.

HC130ACUIU—HC-130 Aircraft Commander Upgrade In-Unit—PDS Code ZR3—location: in unit/3 wk 1 day—Apr 95

Unit-conducted aircrew training. Qualifies HC-130 mission-qualified copilots as mission-qualified aircraft commanders.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOHT, HQ AFRES/DOT, and ANGRC/DOT as applicable.

HC130CSOMQ(R)—HC-130 Communications System Operator Mission Qualification (Rescue)—PDS Code 1ZU—Kirtland/11 wk 2 days—Apr 95

Qualifies communications systems operators in the HC-130 aircraft communications/radio navigation equipment, flight operations, night vision goggle (NVG) single-ship low level operations, secure voice operations, tanker air refueling, and self-contained navigation system operations as a rescue mission qualified communications system operator. Includes initial and mission qualification academic, simulator, and flight training. Students also receive training (academic and simulator) in rescue and recovery procedures.

Prerequisites: On flying status and qualified for flying duty. Must have completed E3ABR1A331 or have 18 months of experience in AFSC 1A331 or higher. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFPC/DPMRAD3, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130CSOMQ(R)IU—HC-130 Communications Systems Operator Mission Qualification (Rescue) In-Unit—PDS Code ZHX—location: in unit/11 wk 2 days—Apr 95

Unit-conducted aircrew training. Qualifies communications systems operators in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFPC/DPMRAD3, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130CSOMQ(SO)—HC-130 Communications System Operator Mission Qualification (Special Ops)—PDS Code ZLK—Kirtland/10 wk 1 day—Apr 95

Qualifies communications systems operators in the HC-130 aircraft communications and radio navigation equipment, flight operations, night vision goggle (NVG) single-ship low level operations, secure voice operations, tanker air refueling, and self-contained navigation system operations as a special operations mission-qualified communications system operator. Includes initial and mission qualification academic, simulator, and flight training in formation, 500 ft modified contour NVG operations, and training in SOFI procedures and equipment.

Prerequisites: On flying status and qualified for flying duty. Must have completed E3ABR1A331 or have 18 months of experience in AFSC 1A331 or higher. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3 as applicable.

HC130CSOMQ(SO)IU—HC-130 Communications Systems Operator Mission Qualification (Special Ops) In-Unit—PDS Code ZJ4—location: in unit/10 wk 1 day—Apr 95

Unit-conducted aircrew training. Qualifies communications systems operators in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3 as applicable.

HC130CSOSR—HC-130 Communications System Operator Simulator Refresher—PDS Code ZFZ—Kirtland/1 wk—Apr 95

Includes aircrew coordination training, a review of normal procedures, emergency procedures, and aircraft systems. Training consists of 8 hours of academics and 15 simulator hours.

Prerequisites: Current and qualified HC-130 communications system operator and in the eligibility period for simulator refresher training.

Special Requirements: Students must bring their headset, flight suit, all checklists, Dash 1, and appropriate 10-series (formerly 55-series) publications.Report 1 day before class start date. Training schedule will be posted at billeting office. Notify billeting clerk you are at Kirtland for HC-130 simulator refresher training. Secret clearance by class start date.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130FEMQ(R)—HC-130 Flight Engineer Mission Qualification (Rescue)—PDS Code ZNY—Kirtland/11 wk 2 days—Apr 95

Qualifies C-130 flight engineers in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations as rescue mission-qualified flight engineers. Includes mission qualification academic, simulator, and flight training for conversion from other mission/design/series C-130s to HC-130s,

formation, and 500 ft modified contour NVG operations. Students also receive training in rescue and recovery procedures.

Prerequisites: On flying status and qualified for flying duty. Minimum control AFSC 1A151C. Minimum grade of Sgt. Minimum 500 hours of flight engineer time (not applicable to AFRES/ANG). Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH or HQ AFPC/DPMRAD3, as applicable.

HC130FEMQ(R)IU—HC-130 Flight Engineer Mission Qualification (Rescue) In-Unit—PDS Code ZNG—location: in unit/11 wk 2 days—Apr 95

Unit-conducted aircrew training. Qualifies C-130 flight engineers in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH or HQ AFPC/DPMRAD3, as applicable.

HC130FEMQ(SO)—HC-130 Flight Engineer Mission Qualification (Special Ops)—PDS Code ZP3—Kirtland/11 wk 4 days—Apr 95

Qualifies C-130 flight engineers in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations as special operations mission-qualified flight engineers. Includes mission qualification academic, simulator, and flight training for conversion from other mission/design/series C-130s to HC-130s, formation, and 500 ft modified contour NVG operations. Students also receive training in SOFI procedures and equipment.

Prerequisites: On flying status and qualified for flying duty. Minimum control AFSC 1A151C. Minimum grade of Sgt. Minimum 500 hours of flight engineer time (not applicable to AFRES and ANG). Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3 as applicable.

HC130FEMQ(SO)IU—HC-130 Flight Engineer Mission Qualification (Special Ops) In-Unit—PDS Code ZNT—location: in unit/11 wk 4 days—Apr 95

Unit-conducted aircrew training. Qualifies C-130 flight engineers in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3 as applicable.

HC130FESR—HC-130 Flight Engineer Simulator Refresher—PDS Code ZFY—Kirtland/1 wk—Apr 95

Includes aircrew coordination training, a review of normal procedures, emergency procedures, and aircraft systems. Training consists of 12 hours of academics and 16 simulator hours.

Prerequisites: Current and qualified HC-130 flight engineer and in the eligibility period for simulator refresher training.

Special Requirements: Students must bring their headset, helmet, flight suit, all checklists, Dash 1, and performance manual. Report 1 day before class start date. Training schedule will be posted at billeting office. Notify billeting clerk you are at Kirtland for HC-130 simulator refresher training. Secret clearance by class start date.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130LMMQ(R)—HC-130 Loadmaster Mission Qualification (Rescue)—PDS Code ZM8—Kirtland/10 wk 2 days—Apr 95

Qualifies C-130 loadmasters in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations as rescue mission qualified loadmasters. Includes mission qualification academic, part task trainer, and flight training for conversion from other mission/design/series C-130s to HC-130. Students also receive training in rescue and recovery procedures.

Prerequisites: On flying status and qualified for flying duty. Graduate of C130LIQ and C130LMQ. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFPC/DPMRAD3, HQ AFRES/DOT, ANGRC/DOT as applicable.

HC130LMMQ(R)IU—HC-130 Loadmaster Mission Qualification (Rescue) In-Unit—PDS Code ZLH—location: in unit/10 wk 2 days—Apr 95

Unit-conducted aircrew training. Qualifies C-130 loadmasters in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Unit must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFPC/DPMRAD3, HQ AFRES/DOT, ANGRC/DOT as applicable.

HC130LMMQ(SO)—HC-130 Loadmaster Mission Qualification (Special Ops)—PDS Code ZND—Kirtland/9 wk 1 day—Apr 95

Qualifies C-130 loadmasters in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations as special operations mission qualified loadmasters. Includes mission qualification academic, loadmaster part task trainer, and flight training for conversion from other mission/design/series C-130s to HC-130s, formation, and 500 ft modified contour NVG operations. Students also receive training in SOFI procedures and equipment.

Prerequisites: On flying status and qualified for flying duty. Graduate of C130LIQ and C130LMQ. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3 as applicable.

HC130LMMQ(SO)IU—HC-130 Loadmaster Mission Qualification (Special Ops) In-Unit—PDS Code ZN9—location: in unit/9 wk 1 day—Apr 95

Unit-conducted aircrew training. Qualifies C-130 loadmasters in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3 as applicable.

HC130LMR—HC-130 Loadmaster Refresher—PDS Code ZG0—Kirtland/3 days—Apr 95

Includes aircrew coordination training, a review of normal procedures, emergency procedures, aircraft systems, limitations, loading procedures, aerial delivery and airdrop, pyrotechnics, and static loading. Training consists of 17 hours of academics and 3 hours in the part task trainer.

Prerequisites: Current and qualified HC-130 loadmaster and in the eligibility period for refresher training.

Special Requirements: Students must bring their headset, flight suit, gloves, checklist, Dash 1 and 9, and appropriate 10-series (formerly 55-series) publications. Report 1 day before class start. Class starts at 0800, bldg 952.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130NMQ(R)—HC-130 Navigator Mission Qualification (Rescue)—PDS Code ZQ0—Kirtland/12 wk 2 days—Apr 95

Qualifies C-130 navigators in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations as rescue mission qualified navigators. Includes mission qualification academic, simulator, and flight training for conversion from other mission/design/series C-130s to HC-130s. Students also receive training in rescue and recovery procedures.

Prerequisites: On flying status and qualified for flying duty. Must be a graduate of C-130NIQ and C-130NMQ (SKE not required). Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFPC/DPMROM2, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130NMQ(R)IU—HC-130 Navigator Mission Qualification (Rescue) In-Unit—PDS Code ZP7—Kirtland/12 wk 2 days—Apr 95

Unit-conducted aircrew training. Qualifies C-130 navigators in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFPC/DPMROM2, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130NMQ(SO)—HC-130 Navigator Mission Qualification (Special Ops)—PDS Code ZQR—Kirtland/12 wk 4 days—Apr 95

Qualifies C-130 navigators in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations as special operations mission-qualified navigators. Includes mission qualification academic, simulator, and flight training for conversion from other mission/design/series C-130s to HC-130s, formation, and 500 ft modified contour NVG operations. Students also receive training in SOFI procedures and equipment.

Prerequisites: On flying status and qualified for flying duty. Must be a graduate of C-130NIQ and C-130NMQ (SKE not required). Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMROM2, as applicable.

HC130NMQ(SO)IU—HC-130 Navigator Mission Qualification (Special Ops) In-Unit—PDS Code ZPY—location: in unit/12 wk 4 days—Apr 95

Unit-conducted aircrew training. Qualifies C-130 navigators in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ

AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMROM2, as applicable.

HC130NSR—HC-130 Navigator Simulator Refresher—PDS Code ZHG—Kirtland/1 wk—Apr 95

Includes aircrew coordination training, a review of normal procedures, emergency procedures, and aircraft systems. Training consists of 12 hours of academics and 16 simulator hours.

Prerequisites: Current and qualified HC-130 navigator and in the eligibility period for simulator refresher training.

Special Requirements: Secret clearance by class start date. Students must bring their headset, helmet, flight suit, all checklists, Dash 1, and performance manual. Report 1 day before class start date. Training schedule will be posted at billeting office. Notify billeting clerk you are at Kirtland for HC-130 simulator refresher training.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130PMQ(R)—HC-130 Pilot Mission Qualification (Rescue)—PDS Code ZUQ—Kirtland/11 wk 1 day—Apr 95

Qualifies C-130 pilots in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations as rescue mission-qualified copilots or aircraft commanders. Includes mission qualification academic, simulator, and flight training for conversion from other mission/design/series C-130s to HC-130. Students also receive training in rescue and recovery procedures.

Prerequisites: On flying status and qualified for flying duty. Copilot candidates must have completed C130CIQ and C130PMK/S/V, as applicable. Aircraft commander candidates must have completed C130ACQ or C130PRK, as applicable. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Aircraft commander candidates must meet the requirements of ACCR 51-130.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFPC/DPMROM2, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130PMQ(R)IU—HC-130 Pilot Mission Qualification (Rescue) In-Unit—PDS Code ZTK—location: in unit/11 wk 1 day—Apr 95

Unit-conducted aircrew training. Qualifies C-130 pilots in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFPC/DPMROM2, HQ AFRES/DOT, or ANGRC/DOT as applicable.

HC130PMQ(SO)—HC-130 Pilot Mission Qualification (Special Ops)—PDS Code ZV4—Kirtland/12 wk 2 days—Apr 95

Qualifies C-130 pilots in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations as special operations mission-qualified copilots or aircraft commanders. Includes mission qualification academic, simulator, and flight training for conversion from other mission/design/series C-130s to HC-130s, formation, and 500 feet modified contour NVG operations. Students also receive training in SOFI procedures and equipment.

Prerequisites: On flying status and qualified for flying duty. Copilot candidates must have completed C130CIQ and C130PMK/S/V as applicable. Aircraft commander candidates must have completed C130ACQ or C130PRK as applicable. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Aircraft commander candidates must meet the requirements of AFSOCR 51-130.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMROM2, as applicable.

HC130PMQ(SO)IU—HC-130 Pilot Mission Qualification (Special Ops) In-Unit—PDS Code ZUA—location: in unit—12 wk 2 days—Apr 95

Unit-conducted aircrew training. Qualifies C-130 pilots in HC-130 aircraft in tanker air refueling procedures and night vision goggle (NVG) operations.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMROM2, as applicable.

HC130PSR—HC-130 Pilot Simulator Refresher—PDS Code ZGK—Kirtland/1 wk—Apr 95

Includes aircrew coordination training, a review of normal procedures, emergency procedures, and aircraft systems. Training consists of 12 hours of academics and 16 simulator hours.

Prerequisites: Current and qualified HC-130 pilot/copilot and in the eligibility period for simulator refresher training.

Special Requirements: Secret clearance by class start date. Students must bring their headset, helmet, flight suit, all checklists, Dash 1, and performance manual. Report 1 day before class start date. Training schedule will be posted at billeting office. Notify billeting clerk you are at Kirtland for HC-130 simulator refresher training.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable.

H53AGIQ—H-53 Aerial Gunner Instructor Qualification—PDS Code XHC—Kirtland/2 wk/AFSC K462X0—Mar 94

Upgrades current, qualified H-53 aerial gunner to aerial gunner instructor in the H-53 helicopter. Teaches procedures and techniques for performing instructor duties in the H-53. Includes academic and flying training.

Prerequisites: Current and qualified in night vision goggles in the H-53 with an experience level as mandated in AFI 36-2208, *US Air Force Helicopter Aircrew Training* (formerly AFR 51-2). Flight physical, dunker, and physiology training must remain current for 60 days following published graduation date.

Quota Control: HQ AETC/XOTS.

H53AGIQ—H-53 Aerial Gunner Instructor Qualification—PDS Code ZZY—Kirtland/2 wk—Apr 95

Qualifies current and qualified H-53 aerial gunners as instructor aerial gunners in H-53 aircraft. Academic phase familiarizes students with standards and responsibilities of an instructor aerial gunner in safety, operational procedures, and training management. Student will develop training flight profiles, perform and instruct maneuvers, and conduct flight briefings, student critiques, and debriefings.

Prerequisites: Qualified and current in H-53 aircraft as an aerial gunner and meet minimum time/experience requirements of AFI 36-2208 (formerly AFR 51-2) as supplemented and must have completed the Flight Instructor Preparatory (FIP) course or MAJCOM equivalent. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Secret clearance by class start date. Students must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT or HQ AFPC/DPMRAD3 as applicable.

H53AGIQIU—H-53 Aerial Gunner Instructor Qualification In-Unit—PDS Code ZZS—location: in unit/2 wk—Apr 95

Unit-conducted aircrew training. Qualifies H-53 aerial gunners as instructor aerial gunners.

Prerequisites: As specified in AFI 36-2208 as supplemented.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. HQ AFSOC/DOOT must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT or HQ AFPC/DPMRAD3 as applicable.

H53AGMQ—H-53 Aerial Gunner Mission Qualification—PDS Code 11C—Kirtland/9 wk—Apr 95

Qualifies aerial gunners as mission-qualified aerial gunners in H-53 aircraft. Includes academic, weapons, and flying training.

Prerequisites: On flying status and qualified for flying duty. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of USN Underwater Egress Training (UET), S-V80-A; Basic Survival Training, S-V84-A; Water Survival Training, S-V86-A or S-V90-A; and helicopter weapons maintenance (J4AMF462X0 005 or equivalent) training.

Special Requirements: Must have attended AFSOC Commando Look orientation and have Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53AGMQIU—H-53 Aerial Gunner Mission Qualification In-Unit—PDS Code ZZX—location: in-unit/9 wk—Apr 95

Unit-conducted aircrew training. Qualifies helicopter aerial gunners in H-53 aircraft.

Prerequisites: As specified in AFI 36-2208 as supplemented.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. HQ AFSOC/DOOT must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53FEIQ—H-53 Flight Engineer Instructor Qualification—PDS Code 16N—Kirtland/4 wk—Apr 95

Qualifies current H-53 flight engineers as instructor flight engineers. Academic phase familiarizes students with standards and responsibilities of an instructor flight engineer, safety, operational procedures, and training management. Student will develop training flight profiles, perform and instruct maneuvers, and conduct flight briefings, student critiques, and debriefings.

Prerequisites: Qualified and current in H-53 aircraft as a flight engineer and meet minimum time/experience requirements of AFI 36-2208 (formerly AFR 51-2) as supplemented and must have completed the Flight Instructor Preparatory (FIP) course or MAJCOM equivalent. Medical flight physical and physiological training must be current for at least 30 days after scheduled class completion.

Special Requirements: Secret clearance by class start date. Students must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCR: HQ AFSOC/DOOT.

H53FEIQIU—H-53 Flight Engineer Instructor Qualification In-Unit—PDS Code 15V—location: in unit/4 wk—Apr 95

Unit-conducted aircrew training. Qualifies H-53 flight engineers as instructor flight engineers.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. HQ AFSOC/DOOT must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCR: HQ AFSOC/DOOT.

H53FEMQ—H-53 Flight Engineer Mission Qualification—PDS Code 18T—Kirtland/30 wk—Apr 95

Mission qualifies helicopter flight engineers in H-53 aircraft. Includes academic, simulator, procedural, and flying training.

Prerequisites: On flying status, qualifed for flying duty, and possess a CAFSC of 1A1X1B. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of S-V84-A, USN Underwater Egress Training (UET); S-V80-A, Basic Survival Training; and S-V86-A or S-V90-A, Water Survival Training.

Special Requirements: Must have attended AFSOC Commando Look orientation and have Secret clearance by class start date. Students must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53FEMQIU—H-53 Flight Engineer Mission Qualification In-Unit—PDS Code 17T—location: in unit/30 wk—Apr 95

Unit-conducted aircrew training. Mission qualifies helicopter flight engineers in H-53 aircraft to include night vision goggles when applicable.

Prerequisites: As specified in AFI 36-2208 as supplemented.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. HQ AFSOC/DOOT must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53FERQ—H-53 Flight Engineer Requalification—PDS Code 17J—Kirtland/19 wk 4 days—Apr 95

Qualifies previously qualified H-53 PAVE LOW flight engineers as mission-qualified flight engineers in the MH-53.

Prerequisites: On flying status, qualified for flying duty, and previously qualified as a PAVE LOW flight engineer within 60 months of class start date. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of USN Underwater Egress Training (UET), S-V84-A.

Special Requirements: Secret clearance by class start date. Students must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCR: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53FERQIU—H-53 Flight Engineer Requalification In-Unit—PDS Code 17C—location: in unit/19 wk 4 days—Apr 95

Unit-conducted aircrew training. Requalifies previously qualified H-53 PAVE LOW flight engineers in the H-53.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. HQ AFSOC/DOOT must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current course to the unit.

H53FESR—H-53 Flight Engineer Simulator Refresher—PDS Code 13X—Kirtland/1 wk—Apr 95

Includes aircrew coordination training, a review of normal procedures, emergency procedures, and aircraft systems. Training consists of 18 hours of academics and 8.5 simulator hours.

Prerequisites: Current and qualified H-53 flight engineer and in the eligibility period for simulator refresher training according to AFI 36-2208.

Quota Control: HQ AETC/XOTS. OCR: HQ AFSOC/DOOT.

H53PIQ—H-53 Pilot Instructor Qualification—PDS Code 1AJ—Kirtland/5 wk—Apr 95

Qualifies current and qualified H-53 aircraft commanders as instructor pilots or qualifies copilots as aircraft commanders. Academic phase familiarizes students with standards and responsibilities of an instructor pilot or aircraft commander, safety, operational procedures, and training/flight management. Student will develop training flight profiles, perform and instruct (if applicable) maneuvers from the left or right seat, and conduct flight and simulator briefings, student critiques (for instructor candidates), and debriefings.

Prerequisites: Qualified and current in H-53 aiarcraft as an aircraft commander for instructor upgrade, copilot for aircraft commander upgrade, and meet minimum time/experience requirements of AFI 36-2208 (formerly AFR 51-2) as supplemented. Instructor candidates must have completed the Flight Instructor Preparatory (FIP) course or MAJCOM equivalent and have a minimum of 10 hours of left seat time in the last 60 days. Medical flight physical and physiological training must be current for at least 30 days after scheduled class completion.

Special Requirements: Secret clearance by class start date. Students must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCR: HQ AFSOC/DOOT.

H53PIQIU—H-53 Pilot Instructor Qualification In-Unit—PDS Code 19U—location: in unit/5 wk—Apr 95

Unit-conducted aircrew training. Qualifies H-53 aircraft commanders as instructor pilots.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

H53PMQ—H-53 Pilot Mission Qualification—PDS Code 1AN—Kirtland/30 wk—Apr 95

Mission qualifies helicopter pilots in MH-53 aircraft as copilots or aircraft commanders as applicable. Includes academic, simulator, and flying training.

Prerequisites: On flying status, qualified for flying duty, and a graduate of Rotary Wing Qualification courses, F-V5B-B0 or P-4C-A, or equivalent helicopter flying school. Medical flight physical and physiological training must be current for at least 30 days after course completion. Must be a graduate of S-V84-A, USN Underwater Egress Training (UET); S-V80-A, Basic Survival Training; and S-V86-A or S-V90-A, Water Survival Training.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCR: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53PMQIU—H-53 Pilot Mission Qualification In-Unit—PDS Code 1AV—location: in unit/30 wk—Apr 95

Unit-conducted aircrew training. Qualifies helicopter pilots in the H-53 aircraft as copilots or aircraft commanders as prerequisites and supervisors determine.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. HQ AFSOC/DOOT must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCR: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53PRQ—H-53 Pilot Requalification—PDS Codd 1AM—Kirtland/19 wk 4 days—Apr 95

Qualifies previously qualified H-53 PAVE LOW pilots as mission-qualified aircraft commanders in the MH-53.

Prerequisites: On flying status, qualified for flying duty, and previously qualified as a PAVE LOW pilot within 60 months of class start date. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of S-V84-A, USN Underwater Egress Training (UET); S-V80-A, Basic Survival Training; and S-V86-A or S-V90-A, Water Survival Training.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53PRQIU—H-53 Pilot Requalification In-Unit—PDS Codd 1AL—location: in unit/19 wk 4 days—Apr 95

Unit-conducted aircrew training. Requalifies previously qualified H-53 PAVE LOW pilots in the H-53.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. HQ AFSOC/DOOT must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCR: HQ AFPC/DPMRAD3 or HQ AFSOC/DOOT as applicable.

H53PSR—H-53 Pilot Simulator Refresher—PDS Code 18Y—Kirtland/1 wk—Apr 95

Includes aircrew coordination training, a review of normal procedures, emergency procedures, and aircraft systems. Training consists of 18 hours of academics and 17 (8.5 hours in each seat) simulator hours.

Prerequisites: Current and qualified H-53 pilot and in the eligibility period for simulator refresher training according to AFI 36-2208 (formerly AFR 51-2).

MH53JAGMQ—MH-53J Aerial Gunner Initial/Mission Qualification—PDS Code JRB—Kirtland/11 wk 4 days—Apr 95

Flying course designed to train helicopter aerial gunners in the procedures and techniques for performing flying duties in MH-53J aircraft. Includes academic, weapon, and flying training.

Prerequisites: Personnel with a mandatory 1 year experience in AFSC 462X0. Medical flight physical and physiological training must remain current for 30 days following published graduation date. Must have successfully completed combat survival (S-V80-A), water survival (S-V90-A), underwater egress (S-V84-A-O), and helicopter weapons maintenance (J4AMF462X0-005) training.

Special Requirements: Secret clearance by class start date. Must meet visual standards IAW AFI 48-123 (formerly AFR 160-43) and have two pair of NVG compatible eye glasses in possession, if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS.

H60ACU—H-60 Aircraft Commander Upgrade—PDS Code ZZ0—Kirtland/7 wk 2 days—Apr 95

Qualifies current and qualified H-60 copilots as mission capable aircraft commanders. Includes academic, simulator, and flying training.

Prerequisites: On flying status and qualified as an H-60 copilot and meet the experience requirements of AFI 36-2208 (formerly AFR 51-2). Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of USN Underwater Egress Training (UET), S-V84-A.

Special Requirements: Secret clearance by class start date. Students must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, ANGRC/DOT, or HQ AFRES/DOT as applicable.

H60ACUIU—H-60 Aircraft Commander Upgrade In-Unit—PDS Code ZZP—location: in unit/7 wk 2 days—Apr 95

Unit-conducted aircrew training. Upgrades H-60 copilots to mission capable aircraft commanders.

Special Requirements: Units must have HQ AFSOC/DOOT approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, ANGRC/DOT, or HQ AFRES/DOT as applicable.

H60FEIQ—H-60 Flight Engineer Instructor Qualification—PDS Code ZWT—Kirtland/4 wk 1 day—Apr 95

Qualifies current and qualified H-60 flight engineers as instructor flight engineers in H-60 aircraft. Academic phase familiarizes students with standards and responsibilities of an instructor flight engineer, safety, operational procedures, and training management. Student will develop training flight profiles, perform and instruct maneuvers, and conduct flight briefings, student critiques, and debriefings.

Prerequisites: Qualified and current in H-60 aircraft as a flight engineer, meet minimum flight experience requirements of AFI 36-2208 (formerly AFR 51-2) as supplemented, have completed the Flight Instructor Preparatory (FIP) course or MAJCOM equivalent, and meet the minimum requirements for upgrade to IFE as listed in AFI 36-2108. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCR: HQ ACC/DOH, HQ AFSOC/DOOT, HQ AFRES/DOT, or ANGRC/DOT as applicable.

H60FEIQIU—H-60 Flight Engineer Instructor Qualification In-Unit—PDS Code ZVU—location: in unit/4 wk 1 day—Apr 95

Unit-conducted aircrew training. Qualifies H-60 flight engineers as instructor flight engineers.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ AFRES/DOT, or ANGRC/DOT as applicable.

H60FEMQ—H-60 Flight Engineer Mission Qualification/ Requalification—PDS Code ZYV—Kirtland/19 wk 3 days—Apr 95

Qualifies or requalifies helicopter flight engineers as mission capable H-60 flight engineers. Includes academic, simulator, and flying training.

Prerequisites: On flying status and possess a CAFSC of 1A1X1B. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of S-V84-A, USN Underwater Egress Training (UET); S-V84-A, Basic Survival Training; and S-V86-A or S-V90-A, Water Survival Training.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCR: HQ AFPC/DPMRAD3, HQ AFSOC/DOOT, HQ ACC/DOH, HQ PACAF/DOTT, HQ AFRES/DOT, or ANGRC/DOT as applicable.

H60FEMQIU—H-60 Flight Engineer Mission Qualification/ Requalification In-Unit—PDS Code ZY0—location: in unit/19 wk 3 days—Apr 95

Unit-conducted aircrew training. Qualifies or requalifies helicopter flight engineers as mission capable H-60 flight engineers.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCR: HQ AFPC/DPMRAD3, HQ AFSOC/DOOT, HQ ACC/DOH, HQ PACAF/DOTT, HQ AFRES/DOT, or ANGRC/DOT as applicable.

H60FESR—H-60 Flight Engineer Simulator Refresher—PDS Code ZWB—Kirtland/4 days—Apr 95

Includes aircrew coordination training, a review of normal procedures, tactical procedures, emergency procedures, and aircraft systems. Training consists of 12 hours of academics and 12 simulator hours.

Prerequisites: Current and qualified H-60 flight engineer and in the eligibility period for simulator refresher training according to AFI 36-2208 (formerly AFR 51-2).

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ PACAF/DOTT, HQ AFRES/DOT, ANGRC/DOT, or HQ AFSOC/DOOT, as applicable.

H60GUNMQ—H-60 Gunner Mission Qualification—PDS Code ZWD—Kirtland/8 wk—Apr 95

Qualifies pararescue personnel as aerial gunners in H-60 aircraft. Includes academics, ground training, and day and night flying training.

Prerequisites: On flying status and qualified for flying duty and possess a CAFSC of 1T2X1. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Must be a graduate of S-V84-A, USN Underwater Egress Training (UET); and S-V80-A, Basic Survival Training.

Special Requirements: Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, AFRES/DOT, or ANGRC/DOT as applicable.

H60GUNMQIU—H-60 Gunner Mission Qualification In-Unit—PDS Code ZWP—location: in unit/8 wk—Apr 95

Unit-conducted aircrew training. Qualifies pararescue personnel as aerial gunners in H-60 aircraft.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, AFRES/DOT, or ANGRC/DOT as applicable.

H60GUNIQ—H-60G Gunner Instructor Qualification—PDS Code XHB—Kirtland/2 wk—Mar 94

Qualifies night vision goggles (NVG)/special mission pararescue specialists as NVG aerial gunnery aircrew instructors. Includes academics, flying training, testing, and appropriate check rides.

Prerequisites: Must have completed H60GUNMQ or a similar course, completed IPC (instructor preparatory course), or have previously been a pararescue aircrew instructor with documents in a flight evaluation folder stating the same. Must be a current and qualified NVG special mission aircrew member. Flight physical and physiological training must remain current for 60 days following projected graduation date.

Special Requirements: Secret clearance by class start date. Must meet visual standards according to AFI 48-123 (formerly AFR 160-43) and have two pair of NVG compatible eyeglasses in possession, if required to have corrective lenses. Students must hand-carry their medical records, flight evaluation folder, flight/jump records with a current AF Form 1042 and AF Form 702, flight helmet, flight suits, flight gloves, flight boots, wet suits with appropriate water work equipment, and appropriate flying cold and foul weather equipment to meet training requirements.

Quota Control: HQ AETC/XOTS.

H60PIQ—H-60 Pilot Instructor Qualification—PDS Code ZYY—Kirtland/5 wk 2 days—Apr 95

Qualifies current and qualified H-60 aircraft commanders as instructor pilots in H-60 aircraft. Academic phase familiarizes students with standards and responsibilities of an instructor pilot, safety, operational procedures, and training management. Student will develop training flight profiles, perform and instruct maneuvers from the left or right seat, and conduct flight and simulator briefings, student critiques, and debriefings.

Prerequisites: Qualified and current as H-60 night tactical aircraft as an aircraft commander, meet minimum flight experience requirements of AFI 36-2208 (formerly AFR 51-2) as supplemented, must have completed the Flight Instructor Preparatory (FIP) course or MAJCOM equivalent, and have a minimum of 10 hours of left seat time in the last 60 days. Medical flight physical and physiological training must be current for at least 30 days after scheduled class completion.

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, ANGRC/DOT, or HQ AFRES/DOT as applicable.

H60PIQIU—H-60 Pilot Instructor Qualification In-Unit—PDS Code ZYZ—location: in unit/5 wk 2 days—Apr 95

Unit-conducted aircrew training. Qualifies H-60 aircraft commanders as instructor pilots in H-60 aircraft.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approvel to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, ANGRC/DOT, or HQ AFRES/DOT as applicable.

H60PMQ—H-60 Pilot Mission Qualification/Requalification—PDS Code ZZR—Kirtland/19 wk 3 days—Apr 95

Qualifies or requalifies helicopter pilots as mission capable H-60 copilots or aircraft commanders as applicable. Includes academic, simulator, and flying training.

Prerequisites: On flying status and a graduate of F-V5B-B0 or P-V4C-A, Rotary Wing Qualification Course, or equivalent helicopter flying school. Medical flight physical and physiological training must be current for at least 30 days after course completion. Must be a graduate of S-V84-A, USAF Underwater Egress Training (UET); S-V80-A, Basic Survival Training; and S-V86-A or S-V90-A, Water Survival Training. Aircraft commander candidates must meet the minimum flight experience requirements of AFI 36-2208 (formerly AFR 51-2).

Special Requirements: Secret clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, ANGRC/DOT, HQ AFRES/DOT, or HQ AFPC/DPMRAD3 as applicable.

H60PMQIU—H-60 Pilot Mission Qualification/Requalification In-Unit—PDS Code ZZQ—location: in unit/19 wk 3 days—Apr 95

Unit-conducted aircrew training. Qualifies or requalifies helicopter pilots in the H-60 aircraft as copilots or aircraft commanders as prerequisites and supervisors determine.

Prerequisites: As specified in AFI 36-2208 (formerly AFR 51-2) as supplemented.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, ANGRC/DOT, HQ AFRES/DOT, or HQ AFPC/DPMRAD3 as applicable.

H60PSR—H-60 Pilot Simulator Refresher—PDS Code ZYX—Kirtland/4 days—Apr 95

Includes aircrew coordination training, a review of normal procedures, tactical procedures, emergency procedures, and aircraft systems. Training consists of 12 hours of academics and 12 simulator hours.

Prerequisites: Current and qualified H-60 pilot and in the eligibility period for simulator refresher training according to AFI 36-2208 (formerly AFR 51-2).

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ PACAF/DOTT, ANGRC/DOT, or HQ AFRES/DOT as applicable.

KC135AC—KC-135 Aircraft Commander Upgrade—PDS Code ZK7—Altus/10 wk 4 days/AFSC 1065C—Oct 96

Flying training course for -135 copilots upgrading to aircraft commander. Training includes procedures, techniques, and aircraft commander responsibilities to safely and effectively operate the KC-135A/R. Training emphasizes air refueling, traffic pattern operation, and crew coordination.

Prerequisites: Current -135 copilot or first pilot with flying time IAW applicable MAJCOM directives.

Special Requirements: (NOTE: CCTS returns candidates who do not meet these requirements.)

1. Students must meet records requirements listed in paragraph 3.23.

2. KC-135 upgrade candidates must arrive with a complete set of flight manuals. All other copilots will receive flight manuals on a temporary basis.

3. Candidates must handcarry TARs to Altus.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

KC135ACA—KC-135 Aircraft Commander Upgrade Academics—PDS Code 7RW—Altus/2 wk 2 days—Oct 96

Academics-only course adapted from KC135AC for all KC-135 copilots upgrading in-unit to aircraft commander. Individuals will receive additional simulator and flight training at home unit to qualify as aircraft commanders IAW AMCR 60-1.

Prerequisites: Flying time IAW applicable MAJCOM directives.

Special Requirements: KC-135 upgrade candidates must arrive with a complete set of flight manuals. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/DOT through AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135ACIQ—KC135 Aircraft Commander Initial Qualification—PDS Code VC1—Altus/13 wk/AFSC 1065C/MASL D111031—Oct 96

Provides proficiency training to initially qualify rated pilots as crew commanders of KC135R aircraft. Student is trained in aircraft procedures, techniques and crew commander responsibilities to effectively and safely operate the KC135R in all phases of flight. Particular emphasis is placed on air refueling, traffic pattern transition and crew coordination.

Training consists of: academics - 7 wk 1 day; flying - 5 wk 4 days.

Prerequisites: ECL 85 S0.

1. Rated pilot on flying status.

2. Students must meet records requirements listed in paragraph 3.23.

3. Flying time required: 1500 hrs total or 1200 hrs total with 300 hrs jet or -135 copilot with 1000 hrs total and 500 hrs in -135 or First Assignment IP with 1000 hrs total and 1 year as an IP IAW MAJCOM directives.

Special Requirements: (NOTE: CCTS returns students who do not meet these requirements.) Secret clearance. TS/BI completed or initiated before departure for training. RC-135 pilots must have TS/SBI completed or initiated before departure to Altus for training.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET and HQ AFPC/DPMROT.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

KC135ACRQ—KC-135 Aircraft Commander Requalification—PDS Code ZK6—Altus/11 wk 3 days—Oct 96

Requalifies former -135 aircraft commanders who had non-flying duties for up to 5 years. Training consists of academics - 5 wk 4 days; flying - 5 wk 4 days. Personnel attending the time-limited course would benefit by obtaining academic course books and a complete set of flight manuals in advance.

Prerequisites: 1. Students must meet records requirements listed in paragraph 3.23.

2. Previously qualified as an aircraft commander in the 135 and currently on flying status.

Special Requirements: (CCTS returns students who do not meet these requirements.) Secret clearance. TS/BI completed or initiated before departure to Altus for training.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135ACRQA—KC-135 Aircraft Commander Requalification Academics—PDS Code ZK5—Altus/4 wk 2 days—Oct 96

Nonflying course of instruction on aircraft systems, procedures, performance characteristics, and command operating policies. Prepares former 135 aircraft commanders who require weapon system requalification, for in-unit flying training.

Prerequisites: 1. Students must meet records requirements listed in paragraph 3.23.

2. Previously qualified as an aircraft commander in the 135 and currently on flying status.

Special Requirements: 1. Secret clearance. TS/BI completed or initiated before departure to Altus for training. RC-135 pilots must have TS/SBI completed or initiated before departure to Altus for training.

2. Individuals are selected for this training by HQ AFPC/DPMROT3 or HQ AMC/DPROR.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET and HQ AFPC/DPMROT.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

KC135BFTC—KC135 Boom Operator Faculty Training Course—PDS Code 1QR—Altus/4 wk—Oct 96

Course of academic, aircrew training device, and flight instruction in the KC135R adapted from KC135IB. This course prepares qualified instructor refueling operators for duties as a CCTS instructor. Course includes orientation in general academics, ATD, and flight activities. Mission ready training is conducted with FTC.

Prerequisites: Qualified as a KC135 instructor boom operator and assigned PCS to CCTS.

Quota Control: HQ AMC/XOTK through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135BIQ—KC135 Boom Operator Initial Qualification Training—PDS Code VC2—Altus/14 wk 4 days/AFSC 1A031/MASL D119004—Oct 96

Academic, aircrew training device, and flight training in KC135R systems, normal and abnormal operating procedures, celestial observations, weight and balance data computations, cargo loading operations, associated duties, and in-flight refueling duties. This course initially qualifies personnel IAW AETCR 60-2 to perform duties as an in-flight refueling operator. Training consists academics - 7 wk 4 days; flying 7 wk.

Prerequisites: (NOTE: CCTS will return students who do not meet these requirements.) ECL 85 SO.

1. A volunteer for assignment to AFSC 1A0X1.

2. Medical - Flying Class III physical. Students must meet records requirements listed in paragraph 3.23.

3. Successful completion of survival and physiological training.

4. Successful completion of EAUC (N/A ARF).

5. High school graduate with a minimum general aptitude score of 56.

6. Have 23 months of retainability upon start of CCTS training.

7. Able to read, write, and speak English fluently.

8. Airmen in grades E-4 thru E-6 must possess AFSC at 5- or 7-skill level, have favorable overall evaluation on last 3 performance reports, and have pending reassignment or application for special assignment or training.

Special Requirements: Secret clearance. TS/BII completed or initiated prior to departure to Altus for training.

Quota Control: 1. HQ AMC/DOT through HQ AMC/DPAET and HQ AFPC/DPMROT3.

2. All requests for course attendance must be coordinated with AFPC and AMC quota control managers prior to student arrival.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135BRQ—KC135 Boom Operator Requalification—PDS Code ZK2—Altus/8 wk 2 days—Oct 96

Accelerated academic and flight instruction course individually tailored to student's needs in KC135R systems, normal and abnormal operating procedures, celestial observations, weight and balance computations, cargo loading operations, and in-flight air refueling duties. This course qualifies students IAW MAJCOM directives for duties as a KC135R in-flight refueling operator.

Prerequisites: 1. Volunteer for assignment to AFSC 1A0X1.

2. Previously qualified as an inflight refueling operator in KC/EC-135.

3. Medical Flying Class III physical and current physiological training.

Special Requirements: (NOTE: CCTS returns students who do not meet these requirements.)

1. Secret clearance. TS/BI initiated or completed prior to departure for training.

2. Student must meet records requirements listed in paragraph 3.23.

3. Individuals are selected for this training by HQ AFPC/DPMRAD3 or HQ AMC/DPROR.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET and HQ AFPC/DPMROT.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135CIQ—KC135 Copilot Initial Qualification—PDS Code VDG—Altus/13 wk/AFSC 1063C/MASL D111030—Oct 96

Provides proficiency training to initially qualify rated pilots in the copilot position of the KC-135R aircraft. Training emphasizes procedures and techniques to effectively and safely operate the KC135 in all phases of flight. Teaches student copilots the duties, responsibilities, and crew coordination requirements for multiengine tanker aircraft. Training consists of: academics - 7 wk 1 day; flying - 5 wk 4 days.

Prerequisites: 85 SO.

1. Rated pilot on flying status.

2. Survival training completed.

Special Requirements: (NOTE: CCTS returns students who do not meet these prerequisites.)

1. Secret clearance. TS/BI completed or initiated before departure for training.

2. Students must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/DOT through HQ AMC/DPAE and HQ AFPC/DPMROT.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135DIFFA—KC-135 Pilot R-Model Difference Academics—PDS Code 9PZ—Altus/2 wk/MASL D111032—Oct 96

Provides training for -135 pilots and copilots who are not qualified in the KC135R who are being assigned to KC-135R units.

Training consists of academics and simulator media and emphasizes the equipment and procedural differences of the KC135R aircraft.

Prerequisites: Attendance in accordance with MCR 51-1. ECL 85 SR.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135IAC—KC-135 Instructor Aircraft Commander—PDS Code VDK—Altus/4 wk 4 days—Oct 96

Trains pilots in fundamentals and concepts outlined in MCR 51-1 to qualify them as ground training instructors, aircrew training device instructor, flight instructors in KC135 aircraft. Consists of pre-attendance study, academics, trainer, and flight training. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Qualified and current in 135 as aircraft commander.

2. Be nominated as instructor candidate by unit commander.

3. For required flying time see MCR 51-1.

Quotas allocated to ANG/AFRES/MAJCOMs/WINGs by AMC/DPAET; quotas controlled and allocated to units by ANG/AFRES/MAJCOMs/WINGs. Nominees to fill quotas must be announced to Flight Safety a minimum of 60 days prior to class.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135IACS—KC-135 Instructor Aircraft Commander Short Course—PDS Code VDK—Altus/2 wk 2 days—Oct 96

Trains highly experienced ANG and AFRES pilots in fundamentals and concepts outlined in MCR 51-1 to qualify them as ground training and flight instructors in the 135 aircraft. Instruction is adapted from the KC135PIAC course and requires extensive study outside regularly scheduled class periods. Consists of pre-attendance study, academics, and flight training. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Reserve officer and member of ANG or AFRES unit.

2. Qualified and current in the KC135 as an aircraft commander.

3. Nominated as an instructor by unit commander.

4. For required flying time, see MCR 51-1.

Quotas allocated to ANG and AFRES by HQ AMC/DPAET; quotas controlled and suballocated to units by ANG and AFRES. Nominees to fill quotas must be announced to Flight Safety a minimum of 60 days prior to class start date.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135IB—KC-135 Instructor Boom Operator—PDS Code VDH—Altus/4 wk 4 days*/MASL D115072—Oct 96

Academic, aircrew training device, and flight instruction in KC135A/R systems, normal and abnormal operating procedures, cargo loading operations, ground instructor role, aircrew training device instructor role, and flight instructor role. This course prepares personnel for duties as an instructor in-flight refueling operator.

Prerequisites: 1. Qualified and current in 135 aircraft as boom operator. ECL 85 SO.

2. Be nominated as instructor candidate by unit commander.

3. For required flying time see MCR 51-1.

Quotas allocated to MAJCOMs/UNITs/ANG/AFRES by AMC/DPAET; quotas controlled and allocated to units by MAJCOMs/NAFs/ANG/AFRES. Nominees to fill quotas must be announced to Flight Safety Services a minimum of 60 days prior to class.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOT and HQ AMC/DOTK.

*Final qualification as an in-flight refueling instructor contingent on successful completion of in-unit evaluation IAW MAJCOM directives.

KC135IBS—KC-135 Instructor Boom Operator Short Course—PDS Code VDH—Altus/2 wk 2 days—Oct 96

Trains highly experienced ANG and AFRES boom operators in fundamentals and concepts outlined in AMCR 51-1, chapter 5, to qualify them as ground training and flight instructors in the KC135 aircraft. Instruction is adapted from the KC135IB course, and requires extensive study outside regularly scheduled class periods. Consists of pre-attendance study, academics, and flight training. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Member of ANG or AFRES unit.

2. Qualified and current in KC135 as a boom operator.

3. Nominated as instructor by unit commander.

4. For required flying time, see MCR 51-1.

Quotas allocated to ANG and AFRES by HQ AMC/DPAET; quotas controlled and suballocated to units by ANG and AFRES. Nominees to fill quotas must be announced to Flight Safety Services, Inc. a minimum of 60 days prior to class start date.

Quota Control: HQ AMC/XOTK through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTA.

KC135IN—Instructor Navigator*—PDS Code VDJ—Altus/4 wk 4 days*/MASL D114034—Oct 96

Trains navigators in fundamentals and concepts outlined in MCR 51-1 to qualify them as ground training instructors, synthetic trainer instructor, flight instruction in KC135 aircraft. Consists of pre-attendance study, academic, trainer, and flight training. Course is mandatory prior to upgrade to instructor status.

Prerequisites: ECL 85 SO.

1. Qualified and current in 135* as navigator.

2. Be nominated as instructor candidate by unit commander.

3. For required flying time see MCR 51-1.

Quotas allocated to ANG/AFRES/MAJCOMs/units by HQ AMC/DPAET; quotas controlled and allocated to units by ANG/AFRES/MAJCOMs. Nominees to fill quotas must be announced to CFIC a minimum of 60 days prior to class.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

*For E-4 navigator course is academic only (2 wk).

KC135INS—Instructor Navigator Short Course—PDS Code VDJ—Altus/2 wk—Oct 96

Trains highly experienced ANG and AFRES navigators in fundamentals and concepts outlined in MCR 51-1 to qualify them as ground training and flight instructors in the KC135 aircraft. Instruction is adapted from KC135IN course, and requires extensive study outside regularly scheduled class periods. Consists of pre-attendance study, academics, and flight training. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Reserve officer and member of ANG or AFRES unit.

2. Qualified and current in the KC-135E/R as a navigator.

3. Nominated as instructor by unit commander.

4. For required flying time, see MCR 51-1.

Quotas allocated to ANG and AFRES by HQ AMC/DPAET; quotas controlled and suballocated to units by ANG and AFRES. Nominees to fill quota must be announced to CFIC a minimum of 60 days prior to class start date.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135NIQ—KC135 Navigator Initial Qualification—PDS Code VC0—Altus/12 wk 1 day/AFSC 1535G/MASL D114033—Oct 96

Qualifies rated navigator to operate the navigation systems of the KC135 aircraft. Develops proficiency in celestial, doppler, radar, inertial navigation system and doppler navigation system as navigation aids. Teaches procedures and techniques necessary to accomplish refueling rendezvous with all air refuelable aircraft. Training consists of: academics - 5 wk 3 days; flying - 6 wk 3 days.

Prerequisites: ECL 85 SO.

1. Rated navigator, AFSC 15XX, on flying status.

2. Survival training complete.

Special Requirements: (NOTE: CCTS returns students who do not meet these requirements.)

1. Secret clearance. TS/BI completed or initiated before departure to Altus for training. TS/SBI completed or initiated before departure to Altus for training for all RC-135 navigators.

2. Medical - Flying Class II physical and current physiological training.

3. Student must meet records requirements listed in paragraph 3.23.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET and HQ AFPC/DPMROT.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135NFTC—KC135 Instructor Navigator Faculty Training Course—PDS Code 1QQ—Altus/4 wk—Oct 96

Course of academic, aircrew training device, and flight instruction in the KC135 adapted from KC135IN course. This course prepares qualified instructor navigators for duties as a CCTS instructor. Course includes orientation in general academics, ATD, and flight activities. Mission ready training is conducted with FTC.

Prerequisites: Qualified as a KC135 instructor navigator and assigned PCS to CCTS.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135NRQ—KC135 Navigator Requalification—PDS Code ZK4—Altus/6 wk 3 days—Oct 96

Requalifies former KC/EC/RC135 navigators who have been out of the aircraft for an extended period of time IAW applicable MAJCOM directives. Graduates are qualified as navigators in the KC135A IAW AETCR 60-2. Training consists of: academics - 2 wk 1 day; flying - 4 wk 2 days.

Prerequisites: (NOTE: CCTS will return students who do not meet these prerequisites.)

1. Students must meet records requirements listed in paragraph 3.23.

2. Previously qualified as a navigator in the KC/EC/RC135 and currently on flying status.

Special Requirements: Secret clearance. TS/BI completed or initiated before departure to Altus for training. RC-135 navigators must have TS/SBI completed or initiated before departure to Altus for training.

Personnel are selected for this training by HQ AFPC/DPMRRS1 or HQ AMC/DPROR.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135NRQA—KC135 Navigator Requalification Academics—PDS Code ZK3—Altus/2 wk 1 day—Oct 96

Nonflying course of instruction in procedures and techniques of navigation in the KC-135R. Includes basic instruction in rendezvous and air refueling with all air refuelable aircraft. Prepares former 135 navigators, who require weapon system requalification for in-unit flying training.

Prerequisites: 1. Students must meet records requirements listed in paragraph 3.23.

2. Previously qualified as a navigator in the 135 and currently on flying status.

Special Requirements: 1. Secret clearance. TS/BI completed or initiated before departure to Altus for training. RC-135 navigators

must have TS/SBI completed or initiated before departure to Altus for training.

2. Individuals are selected for this training by HQ AFPC/DPMRRS1 or HQ AMC/DPROR.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET and HQ AFPC/DPMROT. Quotas allocated to ANG/AFRES/MAJCOMs/ WINGs by HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

KC135PFTC—KC135 Instructor Pilot Faculty Training Course—PDS Code 1QP—Altus/4 wk—Oct 96

Course of academic, aircrew training device, and flight instruction in the KC-135R adapted from KC135IAC course. Prepares qualified pilots for duties as CCTS instructors. Includes orientation in general academics, ATD, and flight activities. Mission ready training is conducted with FTC.

Prerequisites: Qualified as a 135 instructor pilot and assigned PCS to CCTS.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

KC135SOC—KC135 Senior Officer Course—PDS Code QBN—Altus/4 days—Oct 96

Provides orientation in the KC-135 for senior officers in the rank of colonel (selectee) or above. Training consists of academics and aircrew training devices in accordance with CCTSP 11-235, volume 1. Prepares senior officers for in-unit flying training and basic qualification according to CCTSP 11-235, volume 1.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AMC/DOT through HQ AMC/DPAET.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOM and HQ AMC/DOTK.

MH60GUNMQ—H-60 Gunnery Mission Qualification—PDS Code XHA—Kirtland/7 wk 2 days—Apr 95

Qualifies pararescue specialists to perform aerial gunnery and aircrew duties while using night vision goggles (NVG). Includes academics, flying training, testing, and appropriate check rides.

Prerequisites: Must havve successfully completed and graduated the pararescue initial qualification course 11530-00 (1T2X1-00), be on aeronautical orders, and current and qualified for flight duty. Flight physical and physiological training must remain current for 60 days following projected graduation date.

Special Requirements: Secret clearance by class start. Must meet visual standards according to AFI 48-123 (formerly AFR 160-43) and have two pair of NVG compatible eyeglasses in possession, if required to have corrective lenses. Student must hand-carry their medical records, flight evaluation folder, flight/jump records with a current AF Form 1042 and AF Form 702, flight helmet, flight suits, flight gloves, flight boots, wet suits with appropriate water work equipment, and appropriate flying cold and foul weather equipment to meet training requirements.

Quota Control: HQ AETC/XOTS. OCR: HQ AFSOC/DOOT.

MC130HACU—MC-130H Aircraft Commander Upgrade—PDS Code ZDN—Kirtland/6 wk 1 day—Apr 95

Qualifies MC-130H mission-qualified copilots as mission-qualified aircraft commanders. Includes academic and flying training.

Prerequisites: Current and qualified MC-130H mission-qualified copilot. Meet the requirements of the applicable 36-series (formerly 51-series) publications and have completed MC130PMQ or equivalent in-unit training. Medical flight physical and physiological training must be current for at least 30 days after scheduled graduation.

Special Requirements: Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS.

MC130HACUIU—MC-130H Aircraft Commander Upgrade In-Unit—PDS Code ZDC—location: in unit/6 wk 1 day—Apr 95

Unit-conducted aircrew training. Qualifies MC-130H mission-qualified copilots as mission-qualified aircraft commanders.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS.

MC130HEWOMQ—MC-130H Electronic Warfare Officer Mission Qualification—PDS Code ZCG—Kirtland/15 wk—Apr 95

Qualifies electronic warfare officers in MC-130H aircraft as mission-qualified electronic warfare officers. Includes specialized aircrew ground training in mission-specific equipment and MC-130H initial/mission qualification flight training.

Prerequisites: On flying status, qualified for flying duty, and possess AFSC 12S1K. Must be a graduate of B-V7C-E. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Top Secret clearance, or have applied for Top Secret clearance, by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lensese (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: AFSOC/DOOT or HQ AFPC/DPMROM2, as appropriate.

MC130HEWOMQIU—MC-130H Electronic Warfare Officer Mission Qualification In-Unit—PDS Code ZB9—location: in unit/15 wk—Apr 95

Unit-conducted aircrew training. Qualifies electronic warfare officers in MC-130H aircraft.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: AFSOC/DOOT or HQ AFPC/DPMROM2, as appropriate.

MC130HFEMQ—MC-130H Flight Engineer Mission Qualification—PDS Code ZA6—Kirtland/14 wk 1 day—Apr 95

Qualifies C-130B/E/H flight engineers in MC-130H aircraft as mission-qualified flight engineers. Includes specialized aircrew ground training in mission-specific equipment and initial/mission flight training.

Prerequisites: On flying status, qualified for flying duty, and possess AFSC 1A151C or higher. Must be currently or previously C-130 tactical airlift airdrop qualified according to appropriate 10-series (formerly 51-series) publications. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Top Secret (or have applied for Top Secret) clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3.

MC130HFEMQIU—MC-130H Flight Engineer Mission Qualification In-Unit—PDS Code ZLP—location: in unit/15 wk—Apr 95

Unit-conducted aircrew training. Qualifies C-130B/E/H flight engineers in MC-130H aircraft as a mission-qualified flight engineer.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3.

MC130HLMMQ—MC-130H Loadmaster Mission Qualification—PDS Code ZG2—Kirtland/10 wk—Apr 95

Qualifies C-130 loadmasters in MC-130H aircraft as a mission-qualified loadmaster. Includes specialized aircrew ground training in mission-peculiar equipment and initial/mission flight training.

Prerequisites: On flying status, current and mission qualified in C-130E/H, possess 500 hours of tactical airlift airdrop experience, possess a control AFSC 1A251 or higher, and be at least an SrA/Sgt. Must be currently or previously C-130 tactical airlift airdrop qualified according to appropriate 10-series (formerly 51-series) publications. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Top Secret (or have applied for Top Secret) clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3.

MC130HLMMQIU—MC-130H Loadmaster Mission Qualification In-Unit—PDS Code Z52—location: in unit/10 wk—Apr 95

Unit-conducted aircrew training. Qualifies C-130 loadmasters in MC-130H aircraft as a mission-qualified loadmaster.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ AFPC/DPMRAD3.

MC130HNMQ—MC-130H Navigator Mission Qualification—PDS Code ZCZ—Kirtland/15 wk—Apr 95

Qualifies C-130 navigators in MC-130H aircraft as a mission-qualified navigator. Includes specialized aircrew ground training in mission-specific equipment and MC-130H initial/mission qualification flight training.

Prerequisites: On flying status and qualified for flying duty. Must be a graduate of C130NIQ and C130NMQ (SKE not required). Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Top Secret (or have applied for Top Secret) clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Quota Control: HQ AETC/XOTS. OCRs: AFSOC/DOOT or HQ AFPC/DPMROM2 as applicable.

MC130HNMQIU—MC-130H Navigator Mission Qualification In-Unit—PDS Code ZCS—location: in unit/15 wk—Apr 95

Unit-conducted aircrew training. Qualifies C-130 navigators in MC-130H aircraft.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: AFSOC/DOOT or HQ AFPC/DPMROM2 as applicable.

MC130HPMQ—MC-130H Pilot Mission Qualification—PDS Code ZFX—Kirtland/17 wk—Apr 95

Qualifies C-130 pilot in MC-130H as a mission-qualified copilot or aircraft commander according to AFSOCR 51-130. Includes specialized ground training in mission-specific equipment and MC-130H initial/mission qualification flight training.

Prerequisites: On flying status, qualified for flying duty and C-130 qualified. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion.

Special Requirements: Top Secret (or have applied for Top Secret) clearance by class start date. Must meet vision standards according to AFMAN 48-123 and have two pair of corrective lenses (contacts or NVG compatible eyeglasses) in possession if required to wear corrective lenses. In addition, students must meet one of the following criteria:

a. Currently or previously C-130 tactical airlift airdrop qualified according to AFSOCR 51-130.

b. A minimum of 1,000 hours of total time and complete C130PMS.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT or HQ AFPC/DPMROM2 as applicable.

MC130HPMQIU—MC-130H Pilot Mission Qualification In-Unit—PDS Code ZDZ—location: in unit/17 wk—Apr 95

Unit-conducted aircrew training. Qualifies C-130 pilots in MC-130H aircraft as copilots or aircraft commanders.

Special Requirements: Units must have MAJCOM approval to conduct in-unit qualification. MAJCOMs must notify HQ AETC/XOTS (info copy to 58 OG/OGUC) of in-unit training approval to ensure the 58 OG/OGUC forwards current courseware to the unit.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT or HQ AFPC/DPMROM2 as applicable.

1T231 01—Pararescue Paramedic Certification—PDS Code YZ3—Kirtland/21 wk 3 days/AFSC *—Apr 95

Certifies students as National Registry emergency medical technician-paramedic (EMT-P). Includes academics, practical medical procedures and evaluations, hospital clinical training, and field internship. This course consolidates three courses—1T2X1B (EMT - Basic), 1T2X1I (EMT - Intermediate), and 1T2X1P (EMT - Paramedic).

Special Requirements: Pararescue students must complete a physical conditioning test upon arrival. The tests consist of a run, swim, and calisthenics.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable.

* Pararescue personnel completing course numbers 1T231 01, 1T231 02, 1T231 03, and 1T231 04 are qualified as pararescue recovery specialists and will be awarded the 1T231 AFSC.

1T2X1B—Pararescue EMT - Basic Certification—PDS Code 1RH—Kirtland/3 wk—Apr 95

Qualifies students as National Registry emergency medical technician - basic (EMT-B). Training includes academics, practical training, evaluations, and testing.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable. Nonpararescue students can attend this course on a space-available basis; contact HQ AETC/XOTS for availability.

1T2X1I—Pararescue EMT - Intermediate Certification—PDS Code 1QX—Kirtland/2 wk—Apr 95

Qualifies students as National Registry emergency medical technician - intermediate (EMT-I). Training includes academics, practical training, evaluations, and testing.

Prerequisites: Must be EMT-B certified (state or national level) and possess a current CPR card.

Special Requirements: Students must hand-carry EMT-B and CPR cards.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable. Nonpararescue students can attend this course on a space-available basis; contact HQ AETC/XOTS for availability.

1T2X1P—Pararescue Paramedic Upgrade—PDS Code 1SB—Kirtland/8 wk—Apr 95

Qualifies students as National Registry emergency medical technician - paramedic (EMT-P). Training includes academics, practical training, evaluations, and testing.

Prerequisites: Students must be EMT-I certified (state or national level) and possess a current CPR card, completed hospital clinical training, field internship, and the correspondence course obtained from 58 OSS/DOJ, DSN 246-4649. NOTE: The requirements for the hospital clinical training and field internship can also be obtained from 58 OSS/DOJ. With prior approval, the field internship may be accomplished after course completion.

Special Requirements: Students must hand-carry EMT-I and CPR cards and documents signed by appropriate authorities stating that all hospital clinical training and field internship requirements have been accomplished.

Quota Control: HQ AETC/XOTS. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable. Nonpararescue students can attend this course on a space-available basis; contact HQ AETC/XOTS for availability.

L3AZP1T251 000—Pararescue Advanced Weapons Course—PDS Code 2O7—Nellis/1 wk 1 day—Oct 96

Qualifies students in reactive shooting techniques, weapons handling, tactical reactive movement, and foreign weapons as required by the 1T271 specialty training standard. Includes academics, practical training, and evaluations in field environments.

Special Requirements: Battle dress uniform and field boots will be worn throughout all training. Students are required to bring web gear to include a web belt and harness, two canteens, two 5.56 ammo pouches, three 9 mm ammo pouches, a M-9 pistol with holster and four M-9 magazines, a GAU 5 or M-16 with sling and seven 30 round M-16 magazines, day and night eye protection, flashlight, sunscreen, chapstick, and knee and elbow pads. Additionally, students should bring NVGs and PAQ-4 night sighting device if available. Students must hand-carry their AF

Form 522 or DoD equivalent weapons currency and qualification documents. NOTE: This course is conducted on 6 consecutive days (Monday through Saturday).

Quota Control: 2 AF/DOP. OCR: HQ ACC/DOH. Nonpararescue students can attend this course on a space-available basis; contact 2 AF/DOP for availability.

AIS—Advanced Instrument School—PDS Code 4F1—Randolph/2 wk 3 days—Jan 96

Nonflying course of instruction in instrument procedures and techniques. Qualifies pilots as instrument ground school instructors and provides unit experts to commanders on matters affecting instrument training and procedures. Consists of precourse study, extensive academics, and various simulator profiles.

Prerequisites:

1. Qualified as one of the following:

a. Aircraft commander for a minimum of 6 months/experienced pilot and used as an instrument refresher course instructor.

b. Instructor pilot.

2. Must be nominated to attend by unit commander.

3. Other nominees may attend with approval by HQ AETC/XOTA.

Quota Control: HQ AETC/XOTA. Nominees to fill quotas must be announced to the AIS 30 days before class start date.

BFE—Basic Flight Engineer—PDS Code E8B—DOD 050—Altus/5 wk 4 days/AFSC 1A130C/MASL D121040—Apr 95

Ground instruction on mathematics, atmosphere and physics, aerodynamics, aircraft performance and performance log, engine theory, weight and balance, basic chart reading, winds, critical field length relationships, the TOLD card, obstacle clearance, inflight and nonstandard landing data, constant MACH range control, endurance, descent, and mission and AR planning worksheets.

Prerequisites: Special qualification listed in AFMAN 36-2108. Ability to perform aircrew duty without airsickness or fear to fly. ECL 80 SR Aviation. Possession of a complete health record including a current flying Class III physical and AF Form 1042.

Special Requirements: Secret clearance or Secret clearance applied for by class start date.

Quota Control: HQ AFPC/DPMRAD3.

BHFE—Basic Helicopter Flight Engineer—PDS Code 1MX—Kirtland/4 wk 3 days/AFSC 1A131B—Apr 95

Nonflying course designed to train basic helicopter flight engineers in rotary wing aerodynamic factors, aircraft performance and performance chart use; calculator operations (MB-4/CPU-26) and computer computations; takeoff and landing data computations; fuel consumption computations; performance limitations; computation of weight and balance during flight and ground operations and general helicopter systems knowledge. Graduates of this course will be scheduled for follow-on training in one of the following flying training courses—H1FEMQ, H53FEMQ, or H60FEMQ.

Prerequisites: Special qualification listed in AFMAN 36-2108 (formerly AFR 39-1). Ability to perform aircrew duty without airsickness or fear of flying. ECL 8OSR aviation. Possession of a complete health record including a current flying class III physical and AF Form 1042, must meet vision standards according to AFMAN 48-123, and have two pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses. Must be a graduate of USN Underwater Egress Training (UET), S-V84-A; and Water Survival, S-V86-A or S-V90-A. Air Force physiological training must be current for at least 2 years after scheduled course completion.

Special Requirements: Students selected for H53FEMQ follow-on training must have attended AFSOC Commando Look orientation.

Quota Control: HQ AFPC/DPMRAD3 (and HQ AFSOC/DOOT for students scheduled for follow-on H53FEMQ training).

CKS—Commander and Key Staff—PDS Code 1TR—Kirtland/1 wk—Apr 95

Provides basic orientation to senior officers who supervise/oversee flying operations for aircraft they are not qualified in. Squadron operations officers and above in multiple M/D/S aircraft units are authorized to attend this course for those aircraft they have supervisory oversight of. Training is provided in H-1N, H-53, H-60, HC-130, or MC-130H aircraft in academics, simulators (if available) and the aircraft. Graduates of this course are restricted to flying the applicable aircraft under the supervision of an instructor.

Prerequisites: Must be rated pilots currently on flying status and assigned in a RPI 1 or 6 position. Medical flight physical and physiological training must be current for at least 30 days after scheduled course completion. Candidates attending a course that incorporates NVG training must meet vision standards according to AFI 48-123 and have a pair of corrective lenses (contact lenses or NVG compatible eyeglasses) in possession if required to wear corrective lenses.

Special Requirements: Course is unit funded.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ AMC/XOT, HQ AFMC/DOV, HQ AFSPC/DOGH, HQ PACAF/DOTT, HQ AFRES/DOT, or ANGRC/DOT as applicable.

FIP—Flight Instructor Preparatory—PDS Code 1P1—Kirtland/1 wk—Apr 95

Nonflying course designed to teach rated and nonrated instructor candidates the basic skills required to perform as safe, effective, and professional flight instructors. Includes theories of learning and retention, communication skills, management of training resources, lesson planning, evaluation and critique, mission safety, and preparation for instruction. Student will teach academic classes and fly an observation flight on an actual training mission.

Prerequisites: Must be on flying status, fully qualified in respective crew position, and meet the appropriate MAJCOM experience standard. Flight physical and physiological training must be current for 6 days following graduation.

Special Requirements: Bring flight gear for observation flight. Students attending follow-on training must meet the prerequisites for the applicable course.

Quota Control: HQ AETC/XOTS. OCRs: HQ ACC/DOH, HQ AFSOC/DOOT, HQ AMC/XOT, HQ AFMC/DOV, HQ

AFSPC/DOGH, HQ PACAF/DOTT, HQ AFRES/DOT, or ANGRC/DOT as applicable.

E3OBR11A1C 001—C-12A/C/D Pilot Initial Qualification—PDS Code YD9—Keesler/4 wk 3 days/AFSC 11A1C—Oct 95

Qualifies pilots in C-12A/C/D aircraft. Includes commercially contracted ground school and simulator training followed by Air Force flight training.

Prerequisites: Must be rated pilots currently on flying status. Medical flight physical and Air Force physiological training (altitude chamber) must be completed prior to reporting and must be current for at least 30 days after scheduled class completion date.

Quota Control: 45 AS/DOR.

OPR: HQ AETC/XOTA. OCR: 19 AF/DOT and HQ AMC/DOTK.

Officer Military Schools

MOTS001—Officer Basic Military Training, Precommissioning—PDS Code EHC—Maxwell/13.5 wk/MASL D171008—Oct 96

Precommissioning training for selected applicants to meet Air Force requirement by career area. Basic military subjects essential in developing selected college graduates to take their places as 2d Lt in Air Force. Includes communication skills, leadership studies, professional knowledge, defense studies, and military application and training (practical field leadership, physical fitness and drill and ceremonies). Upon satisfactory completion, trainees are tendered appointment as 2d Lt, Air Force Reserve, for an indefinite term. Each graduate so appointed is ordered into active military service with a 4-year date of separation from date of graduation from Officer Training School unless sooner relieved by order of competent authority.

Prerequisites: Male or female citizens of highest moral character who hold a baccalaureate degree from an accredited college or university and are between 18 and 27 1/2 years of age for rated (pilot or navigator) positions or 18 and 29 1/2 years of age for nonrated positions. All applicants for rated positions must be commissioned and entered into flying training before becoming 27 years' old. Stipulated age limits for applicants seeking rated positions cannot be waived. Applicants for nonrated positions who are over 29 years of age but who merit special consideration may be eligible for waiver; determination will be made by HQ AFPC/DPMA. However, applicants for nonrated positions who cannot be entered into OTS and commissioned before their 35th birthday are ineligible for waiver. See AFI 36-2013, *Airman Commissioning Programs and Officer Training School* for application procedures and other eligibility prerequisites. Selections are made by USAFRS (or USAFR for Reserve applicants) through a formal OTS Selection Board process. ECL 80.

Special Requirements: National agency check (NAC) must be initiated before member proceeds to OTS. If member has been selected to serve in AFSC 13S1, 14N1, or 71S1, then the member must be submitted for a TS/SSBI before departure for OTS. A copy of the security clearance request paperwork must be sent to 22 TSS/DPMN, 50 Chennault Circle, Maxwell AFB AL 36112-6417. Students must be within AFI 40-502 weight standards when reporting to OTS. Overweight personnel should be considered for attendance at a later date only after continued satisfactory progress suggests they will maintain their weight within the allowable standards.

Unit of Assignment: Officer Training School.

Admin Instructions: Officer trainees will report no earlier than 0800 and no later than 1800 the day before published class start date. Individuals will report to the officer trainee in charge of quarters (CQ), bldg 1413, Maxwell AFB AL. Trainees arriving any earlier may be required to obtain commercial quarters and meals at their own expense. Additionally, the following documents should be hand-carried when reporting to OTS: sealed personnel records, official college transcripts with officer trainee's name, SSN, school's name, raised seal, type of degree, major, and the date the degree was awarded, original marriage certificate (if married), and original birth certificates for all dependents. Members with prior military service, reservists, and National Guardsmen are required to have a copy of their DD Form 214, DD Form 368, or NGB Form 22. Active duty members must obtain a report on individual (RIP) and hand-carry their shot records separately. If trainee does not already have one, it is highly recommended that each member establish a checking account before departing for OTS. This will allow the most efficient direct deposit program and avoid possible pay problems while in training.

Quota Control: HQ AFPC/DPMAPO. Management by USAFRS (RSOO). OPR: HQ AETC/RS.

MOTS002—Commissioned Officer Training—PDS Code 0PR—Maxwell/4 wk—Oct 96

Provides training in basic military subjects essential in developing nonline officers to take their places as commissioned officers in the US Air Force. Provides post commissioning training for officers in the US Air Force medical services (Medical Corps, Dental Corps, Nurse Corps, Medical Service Corps, and Biomedical Science Corps); Judge Advocate Corps (legal); and Chaplain Corps. Also trains Air Force Reserve officers selected to participate in the Air Force Health Professions Scholarship Program and those enrolled in the Uniformed Services University of Health Sciences. Also included for training are those officers selected to serve in the Air Force Reserves and Air National Guard. Training covers but is not limited to instruction in four major areas: professional military knowledge, including dress and grooming, personal appearance, customs and courtesies, pay, leave and allowances, base services, and individual responsibilities surrounding these areas. Defense studies include the DoD and US Air Force mission, function, history, heritage, and organization. Leadership studies comprise the majority of the curriculum, with concentration on leadership and officership theory and reinforces training with practical field leadership exercises. Communication skills, including basic military writing. Drill and ceremonies and physical fitness training are also included. For questions, call DSN 596-1598 or 1 (800) 854-0188.

Prerequisites: Commission in the US Air Force to serve as a staff judge advocate, chaplain, medical services, or selection for the US Air Force Health Professions Scholarship Program or attendance at Uniformed Services University of Health Sciences.

Admin Procedures: Students must have at least 15 copies of orders when reporting to OTS. All orders must state "essential unit messing is in effect" to prevent student overpayment. Reserve and Air National Guard students are not entitled to advance pay according to DoD Pay Manual, paragraph 80251. However,

Reserve and National Guard students are entitled to casual payments according to DoD Pay Manual, paragraph 40111. Administrative procedures are provided AFM 171-373, volumes I and III. All students must know their blood type and Rh factor before attending this course. Further, all students must report to this course the day before the course start date between 0730 and 1400 to inprocess. Any deviation to these times must be coordinated with the OTS program managers by calling 1 (800) 854-0188 or DSN 596-1598.

Air National Guard Medical Service Requirements: All newly appointed officers of the ANG Medical Services are required to complete Commissioned Officer Training within 12 months of initial appointment regardless of prior commissioned military service training.

Air Force Reserve Medical Service Requirements: All newly appointed officers of the Air Force Reserve Medical Services are required to complete Commissioned Officer Training within 12 months of initial appointment regardless of prior commissioned military service training.

Quota Control: USAF, AFPC/DPMMES.

Officer Technical Training

(Cross-reference for Defense Management Education and Training (DMET) courses to DoD 5010.16C, *DMET Catalog*, is provided at the end of this chapter.)

AETCSQ CC—AETC Squadron Commanders Course—PDS Code 1CA—Randolph/1 wk 3 days—Jan 96

Provides newly selected squadron commanders with a better understanding of how to deal with the environment, responsibilities, and resources as commanders and to enhance their effectiveness in meeting the wing's mission. This is accomplished through a forum designed to prepare squadron commanders for the challenges of command, provide tools they need to meet these challenges, and enhance their abilities as squadron commanders before assuming command. Course curriculum consists of four parts: leadership and command, readiness and command, staff and support activities, and squadron issues.

Prerequisites: Selected as a squadron commander or squadron commander equivalent.

Quota Control: HQ AETC/DPPEC (A0J0).

E3OZR11A4X 000—Military Airspace Management—PDS Code 2AA—Keesler/2 wk/MASL D129014—Oct 96

Provides selected DOD personnel with the ability to identify, define, develop, negotiate, and process airspace and air traffic control service requirements essential to national defense flight operations in the peacetime US airspace system. Includes understanding effects on DOD flight operations of the National Airspace System and Federal Aviation Administration structure and responsibilities; categories of special military use airspace; airspace and air traffic services for mission requirements; National Environmental Policy Act applications to flight operations; planning for future mission requirements; and basics of exercise airspace development and processing. Fundamental international airspace procedures, primarily relating to US offshore airspace, are covered. Two class exercises, Design of Military Operations Area and Military Training Route, are included. This is an advanced flight operations course designed primarily for the rated air operations officer.

Prerequisites: Military grades at or above O-3, W-3, and E-7 and civilian grades GS-11 and above whose duties or positions require knowledge of airspace management at the wing level and above. Supervisor and management personnel of air traffic control facilities who provide support services for DOD flight operations involving, plans exercises, and military use airspace are also candidates for this course. A thorough knowledge of DOD flight operations and US flight procedures is required. The course approximates a graduate level course in its pace, content, and instructional methodology. International students may attend if their duties involve frequent interface with DOD flight operations within the US. Potential international and lower grade candidates for this course will be approved on a case-by-case basis by the training manager at 334 TRS/TTKO, 700 Hangar Rd, Keesler AFB MS 39534-2335. Provide student background qualifications and rationale for attendance based on need. ECL 80.

E3OBR13M1 000—Air Traffic Control Officer—PDS Code AB8—DOD 2G—Keesler/8 wk 2 days/AFSC 13M1/MASL D122011—Oct 96

Procedures and skills involved in the operation of air traffic control facilities, aircraft recognition and performance, air navigation aids, weather, air traffic rules, communications procedures, terminal VFR procedures and operations, and terminal approach control procedures and operations.

Prerequisites: ECL 80 SR.

NOTE: On completion of this instruction, Air Force students are required to pass a 75-question written test provided by the Federal Aviation Administration. International students are not required to pass this test.

Admin Instructions: The base Aerospace Medical Service ensures the original and one copy of SF Form 88 are filed in the student's AF Form 2100, medical health record. The local flight surgeon ensures that students are physically qualified before they complete training. U.S. Air Force physical standards do not apply to international students. International students will not perform ATC duties unmonitored during U.S. Air Force training.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2AF/DOP.

E3OBR13B1E 001—Command Post Officer—PDS Code X2B—Keesler/3 wk 3 days/AFSC 13B1E—Oct 96

Provides training for personnel in AFSC 13B1E in the knowledge and skills needed to perform the duties of command post officer. Training includes policy planning and program formulation of command post activities to include base operations, airfield operation, air traffic control, flight planning, flight operations, weather, operational messages, SARAH Lite, Joint Reporting Structure, and operations reports.

Prerequisites: Normal color vision and hearing.

Special Requirements: Secret clearance by class start date.

Quota Control: USAF, HQ AFPC/DPMAPO.

E3OBR13B1F 003—Adjutant—PDS Code X2A—Keesler/2 wk/AFSC 13B1F—Oct 96

Provides training for personnel in AFSC 13B1F with the knowledge and skills needed to perform the duties of adjutant. Includes policy planning and program formulation of adjutant activities to include information management, orderly room management, computer basics, SARAH Lite, quality force

management, personnel management programs, security, mobility, and resource management.

Prerequisites: Normal color vision and hearing.

Quota Control: USAF, HQ AFPC/DPMAPO.

W-MCE-13B1D—Air Battle Manager Course—PDS Code 1DF—Tyndall/32 wk/AFSC 13B1D—Oct 96

Trains Air Force and ANG officers to perform duties as battle managers. Includes directing aircraft, conducting air defense and tactical missions, coordinating aircraft control and warning activities, interaction with other controlling agencies, and principles of electronic protection. Familiarization with air defense organization and theater control systems, aircraft tactics and force management, operating procedures and relationships among air, ground, and naval forces. Training in the utilization of combined resources, air analysis, air picture management and maintenance, interoperability, and integration of command, control, communications, computers, and intelligence (C4I).

Prerequisites: Students with follow-on assignments to airborne units must complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival Training, before arriving at Tyndall AFB for training.

Special Requirements: Be selected for duty with AFSC 13BXX. Secret clearance by class start date. A current certified flying Class III weapons director physical must be completed before arriving at Tyndall AFB and must remain current throughout training.

Quota Control: HQ AETC/XOTI.

V3OZP13B3C 003—NORAD Air Defense Operations Center (ADOC)—PDS Code 7A4—Falcon/3 wk 4 days—Oct 96

Teaches ADOC commander, crew chief, and technician candidates various aspects of the NORAD Air Defense role during four phases of training. Phases I and II cover such topics as: NORAD structure, NORAD sensors, NORAD threat, Aerospace Reporting System, continuity of operations, rules of engagement, ID of air traffic, fighter alert force generation, OPlan XX, DEFCON procedures, flush procedures, OPORDS 3113/3115, SCATANA/ESCAT, OPSEC/COMSEC, Granite Sentry System, counter drug procedures (OPORD 3199), and E-3 operations. These topics are presented by formal classroom instruction using lectures, video shows, and discussions, stressing management and operation of NORAD Air Defense assets. Phase III training consists of demonstration performance on Granite Sentry System using exercise scenarios that stress real world activities, hands-on operations with various communication devices, and basic instruction on the operations of computer systems such as: NORADS/USSPACECOM Operations Information System, and Anti-Drug Network. During Phase IV, students are assigned to operational crews to continue training exercise scenarios, obtain indepth knowledge of the use of all communication devices and computer systems, and become familiar with crew-unique procedures.

Prerequisites: Be selected for duty with an AFSC 13BXX or equivalent for commander and 1C5X1 or equivalent for supervisor and console operator.

Special Requirements: Must have initiated paperwork for TS/SBI for SCI clearance and possess a Secret clearance prior to training start date.

Quota and Waiver Control: 2 AF/DOP.

V3OZP13B3C 004—NORAD and USSPACECOM Command Center DCD/MD/SO/AO—PDS Code NQE—Falcon/4 wk—Oct 96

Phase I (IQT) provides NORAD Command Center (NCC) officers, destined for the deputy command director, assistant command director, and assistant for operations positions, with an academic foundation in space-based and ground-based sensor capabilities, sensor management, event analysis and threat processing, tactical warning, emergency action conferences, decision-making architecture, and the integrated threat. The officers train with various simulator scenarios to practice display interpretation and application of their technical and conceptual knowledge. They graduate with the ability to perform NCC console operations in support of the Integrated Tactical Warning and Attack Assessment mission and to apply conceptual knowledge to various warning conditions. Phase II provides OJT performance in the assigned position in the NCC. Students are assigned to crew for completion of positional qualification and are normally scheduled for a preevaluation after 15 workdays or three shift cycles (days, swings, mids).

Prerequisites: Individual must be selected for NORAD Command Center ops crew or staff position with a need for crew qualification.

Special Requirements: TS/SCI clearance prior to positional qualification. A Secret clearance is acceptable during initial academics.

Quota Control: 2 AF/DOP.

V3OZP13B3C 005—NORAD and USSPACECOM Command Directed/Assessor—PDS Code MTK—Falcon/3 days—Oct 96

Provides NORAD general and flag officers, tasked with assessment responsibility, with an academic foundation in space and ground-based sensor capabilities, sensor management, event analysis and threat processing, tactical warning and assessment concepts, emergency action conferences decision-making architecture, and the integrated threat. The officers train with various positional scenarios to practice application of their technical and conceptual knowledge. Officers graduate with the ability to rationally assess threat and non-threat events using CINCNORAD's assessment philosophy. The course concludes with an over-the-shoulder assessment evaluation by CINCNORAD.

Prerequisites: Individual must be selected for NORAD assessor or command director position.

Special Requirements: TS/SCI clearance prior to class start date.

Quota Control: 2 AF/DOP.

L3OQR13B3H 000—Combat Control (Officer) Indoctrination Course—PDS Code 3H7—Lackland/10 wk—Oct 96

Screens and selects qualified officers for continuation in training for the combat control career speciality. Students are put through a rigorous physical and mentally stressful training program that prepares them for all pipeline courses and their final AFS-awarding course. Course includes run, swim, underwater confidence, calisthenic, and weight training, anatomy and physiology, anatomy of human motion, medical terminology, lifetime fitness, metric system, nutrition and nutritional performance, and aerospace physiological training. Upon graduation, students attend the following prerequisite pipeline courses before AFS-awarding school: US Army Combat Divers

Qualification, US Army Airborne Parachutist, US Army Military Freefall Parachutist, US Air Force Combat Survival, US Navy Underwater Egress Training, and Air Traffic Control Officer.

Prerequisites: Successfully complete the Physical Ability and Stamina Test (PAST). Refer to this catalog, chapter 3, section B, paragraph 3.9.2, Lackland Training Wing Special Instructions, subparagraph 3.9.2.11, Pararescue and Combat Control Physical Ability and Stamina Test, for test criteria. Member must have completed both phases I and II of the CCT officer screening board, must be a US citizen, must be able to obtain a Top Secret clearance, must volunteer for hazardous duty (e.g., military combat diver (SCUBA), military parachuting, and explosives demolition), must pass flying Class III physical with eye restriction as prescribed for parachutists, marine (SCUBA) diving duty, and air traffic control duty. All physicals MUST be reviewed and stamped by HQ AETC/SGPS (US Army will only recognize the AETC/SG stamp.)

Special Requirements: Submitted for Top Secret clearance by class start date. POVs not authorized for use at, to, or from indoctrination course. Report in uniform with full military uniform complement. Pipeline prerequisite training for CCT officer candidates will be scheduled by 342 TRS/CTF with instructions for orders publication sent to the appropriate MPFs.

Quota Control: 2 AF/DOP.

E3OZR13B4A 000—Automated Terminal Instrument Procedures—PDS Code D9K—DOD 2G—Keesler/6 wk/MASL D121020—Apr 95

Trains personnel to plan, coordinate, develop, and process terminal instrument procedures. Emphasis is on the procedural criteria and how it is used to develop instrument approach and departure procedures. Training includes both manual and automated methods of development.

Prerequisites: Military grades of 2d Lt and above, SSgt and above possessing a primary AFSC 1C171 or 1C271, and civilian grades GS-9 and above whose duties or position require knowledge of terminal instrument procedures. A fundamental understanding of algebraic and trigonometric functions is necessary and a knowledge of computer terminal operation is desirable. ECL 80 SR.

Special Requirements: Students should bring a small calculator capable of processing basic arithmetic, algebraic, and trigonometric functions.

Quota Control: 2 AF/DOP.

W-INT-13B—International Air Weapons Controller Course (SATP)—PDS Code EVR—DOD 2G—Tyndall/8 wk/AFSC 13B1D/MASL D122009—Jan 96

Background training for SATP international trainees who will perform duties as entry level weapons controllers, AFSC 13B1. Includes subjects designed to qualify graduates to solve the air mass problem, direct aircraft conducting air defensive and tactical missions, plan and coordinate aircraft control and warning activities, direct AC&W personnel, interact with other aircraft control agencies, understand the principles of radar and ECM/ECCM, and be familiar with organization of typical weapons control systems. The medium used to provide aircraft control practice is by computerized simulation in the semiautomated environment. Graduates are qualified to perform as entry level air weapons controllers, AFSC 13B1D. Indoctrination in the specific system of their assignment is provided through additional formal training and OJT.

Prerequisites: ECL 80 SR.

Quota Control: 325 OSS/OSTT.

Z-ASO-13B—Air Surveillance Officer—PDS Code VCG—Tyndall/7 wk—Jan 96

Training for qualified air weapons directors and air surveillance technicians for duty as air surveillance officers (ASO), data quality monitors (DQM), electronic counter-countermeasures officers/technicians (ECCMO/ECCMT), and other related positions. Training includes: theoretical application of radar principles, fundamentals of radar transmitters, antennas, receivers, and related components; basic electronic combat (EC) theory, policy, and application; radar systems data flow and processing, data management actions, EC-related communications capabilities, and familiarization with current major air defense systems, equipment, and interfaces. This course meets requirements for 13B3 SEI OCE, 1C5X1 SEI 270, and 1A4X1 SEI 270 training.

Prerequisites: Officer 13B1X, or enlisted SrA/Sgt or above, possessing a 5-skill level in 1C5X1 or 1A4X1, whose duties require this type training.

Special Requirements: Secret clearance by class start date.

Quota Control: 325 OSS/OSTT.

Z-CAT-13B—Counterair Tactics Awareness Training Course (CATATC)—PDS Code V8R—Tyndall/4 wk—Oct 96

Provides advanced training to air weapons directors in the comprehensive awareness of, and practical exposure to, the tactics employed by aircrews participating in the air combat tactics (ACT) training. The graduate will be fully aware of the dynamics of the air combat environment and capable of providing appropriate assistance to two fighter aircrews who are involved in ACT engagements with at least two adversary fighters.

Prerequisites: a. Possess a current 13B3 or enlisted weapons director AFSC 1C5X1D or 1A4X1D.

b. Hold mission ready/support status.

c. Have a minimum of 3 years of active controlling experience and 50 live tactical mission events, 25 of which must be within the 6 months prior to class start date, and of those, 5 must be ACT/DACT missions.

d. Possess a current AF Form 1042 verifying medically cleared for flying duty or ground based controller duty.

NOTE: This course is geared toward experienced and proficient weapons directors seeking career expansion in tactics, training, or stan/eval roles. Successful completion of an end-of-course evaluation is a requisite for graduation.

Special Requirements: Secret clearance.

Quota Control: 325 OSS/OSTT.

Selection Control: HQ ACC/DOYG.

Z-INT-13B—Theater Air Operations Course (TAOC)—PDS Code F4Y—Tyndall/3 wk/MASL D122055—Oct 96

Instructs international air weapons controllers (AWC) who will operate in both counter air and strategic air defense environments. This course is designed for the air weapons controller who

requires training at a highly advanced proficiency level in a wide variety of wartime and short-of-war scenarios. Graduates of the Theater Air Operations Course (TAOC) will have an enhanced ability to operate within their particular command and control system in counter air and strategic air defense environments. Graduates will be able to manage air assets successfully against a complete spectrum of short-of-war and wartime threats.

Prerequisites: a. Be an air weapons controller assigned to a unit with a counter air capability.

b. Be a graduate of a formal air weapons controller course.

c. ECL 80 SR.

Quota Control: 325 OSS/OSTT.

AETC J13BXH—Combat Control Officer Selection Course—PDS Code XR4—Hurlburt Fld/1 wk—Oct 96

Prepares officers for, and is prerequisite to, Combat Control (CCT) Indoctrination Course (currently identified as L3OQR13B3H 000). Includes a two-phase screening process. Phase one consists of a screening board that convenes to review formal application packages. The board reviews all applications received since the last selection course and identifies a small number of applicants for advancement to phase two. Phase two consists of a temporary duty assignment to Hurlburt Fld FL for invited applicants. It is a series of practical evaluations including physical training and leadership laboratories. Candidates compete for a limited number of CCT officer vacancies. Candidates selected for CCT duty are scheduled to attend the indoctrination course and enter the training pipeline. Phase two temporary travel, per diem, etc., for active duty officers will be unit funded; the USAF Academy will fund USAFA cadets; AETC will fund AFROTC cadets. Interested applicants should contact 720 STG/XP, 152 Bartley Street, Hurlburt Field FL 32544, DSN 579-3346/2281, (904) 884-3346/2281, Fax DSN 579-5119, (904) 884-5119, to request a CCT officer application or further details.

Prerequisites: Be able to obtain a Top Secret clearance, have 3 years of retainability, volunteer for hazardous duty (e.g., military combat diver (scuba), military parachuting, and explosives demolition), have an outstanding military or civilian record or resume, be able to pass a Class III flight physical (for marine diving, parachuting, and air traffic control), and satisfactorily perform the Physical Ability and Stamina Test (PAST), which are all part of the formal application process.

Quota Control: 720 STG/XP.

V3OBR13S1 001—Undergraduate Space and Missile Training—PDS Code XJ6—Vandenberg/10 wk/AFSC 13S1X—Oct 96

Provides prerequisite career field training for officers in the basic knowledge needed to perform the duties associated with the space and missile operations career field (13S1X). Includes an initial background in technical information in orbital mechanics, space environment, communications, sensor fundamentals, organizations, and history. The students then receive instruction in the five mission areas: satellite command and control operations, spacelift operations, missile crew operations, space control operations, and space warning operations. Graduates of this course are awarded an entry-level space and missile operations AFSC.

Prerequisites: Air Force personnel must have current space and missile operations crew physical according to AFI 48-123 before class start date.

Special Requirements: A Top Secret or Interim Top Secret clearance is required before class start date and must be specified on students' orders.

Admin Instructions: Students report to bldg 8290, classroom #7 at 0800, 3 **duty** days before class start date with two copies of orders and current identification card (DD Form 2AF). For additional information see reporting instructions table.

Quota and Waiver Control: 392 TRS/DOCT.

V3OLR13S1 001—Missile to Space Bridge Course—PDS Code XC1—Vandenberg/4 wk 1 day—Oct 96

Provides prerequisite career field training needed to transition 13S3C into universally assignable space and missile officers. This training must be accomplished before the first operational space assignment. Provides the basic knowledge needed to perform the duties associated with space operations positions. Includes an initial background in technical information in orbital mechanics, space environment, communications, sensor fundamentals, organizations, and history. The students then receive instruction in the four mission areas: satellite command and control operations; spacelift operations; space control operations; and space warning operations.

Prerequisites: Air Force personnel must have current space and missile operations crew physical according to AFMAN 48-123 before class start date.

Admin Instructions: Report to bldg 8290, lobby, at 0800, 1 duty day before class start date with two copies of orders and current identification card (DD Form 2 AF). See reporting instructions table for additional information.

Quota Control: 2 AF/DOP.

Waiver Control: 392 TRS/DOCT.

V3OBR13S1H 000—Undergraduate Missile Training—PDS Code 8VA—Vandenberg/15 wk 4 days/AFSC 13S1H—Oct 95

Training in the responsibilities and weapon system technical procedures necessary to perform duties as combat crew members in the 118A (Peacekeeper) weapon system. Training consists of academic and missile procedures trainer (simulator) blocks.

Tentative Base of Assignment: Francis E. Warren AFB WY.

Prerequisites: Be selected for assignment to missile combat crew duties in weapon system 118A.

Special Requirements: 1. Final or interim Top Secret clearance before EWO class start date. Final Top Secret clearance with SIOP-ESI prior to performing alert duty. Initiate and confirm the following:

a. An SBI with advance notification of NAC completion on all members with a BI or lower investigation, or on members with a break in service of more than 1 year.

b. An SBI bringup with advance notification of NAC completion on all members with completed SBI who have not been certified under PRP within the last 5 years, computed from expected arrival date at gaining PCS organization.

2. Personnel reliability - CRITICAL. Administrative certification permissible if critical or controlled cannot be obtained.

3. Physical - Missile (IAW AFI 48-123 [formerly AFR 160-43] to include adaptability rating for missile duty reflected in SF 88, item 72).

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

V3OBR13S1L 000—Undergraduate Missile Training—PDS Code TZA—Vandenberg/15 wk 4 days—Apr 95

Training in the responsibilities and weapon system technical procedures necessary to perform duties as combat crew members in weapon system 133B/CDB. Training consists of academic missile procedures trainer (simulator) blocks. Students graduate at mission ready level.

Tentative Bases of Assignment: Grand Forks AFB ND; or Malmstrom AFB MT.

Prerequisites: Be selected for assignment to missile combat crew duties in weapon system 133B/CDB.

Special Requirements: 1. Final or interim Top Secret clearance before EWO class start date. Final TS clearance with SIOP-ESI prior to performing alert duty. Initiate and confirm receipt of request for the following:

a. An SBI with advance notification of NAC completion on all members with a BI or lower investigation, or on members with a break in service of more than 1 year.

b. An SBI bringup with advance notification of NAC completion on all members with completed SBI who have not been certified under PRP within the last 5 years, computed for expected arrival date at gaining PCS organization.

2. Personnel Reliability - critical. Administrative certification permissible if critical or controlled certification cannot be obtained.

3. Physical - Missile (IAW AFI 48-123 [formerly AFR 160-43] to include adaptability rating for missile duty reflected in SF 88, item 72).

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

V4OST13S2 000—Missile Instructor Course—PDS Code RW5—Vandenberg/1 wk—Apr 95

Trains missile combat crew instructors in theories of learning, instructional methods, lesson plan development and presentation, and critiquing techniques for both classroom and missile procedures trainer.

Prerequisites: Assigned or selected for assignment as a missile combat instructor crewmember (ICBM).

Quota Control: 2 AF/DOP.

V3OIR13S3 001—Missile Academic Instructor Course—PDS Code 3ME—Vandenberg/2 wk—Apr 95

Prepares ICBM operations personnel for instructor duties. A comprehensive and fast paced course which requires extensive reading and preparation along with moderate research. Major curricular areas are learning theory, instructional methodology, presentation skills, curriculum development, instructional aids, and critiquing techniques. Course organized to provide for maximum participation in learning. Class time evenly divided between classroom and small seminar group activity. Students write level-of-learning and criterion objectives, plan and present teaching lessons, and develop criterion-referenced test items. Teaching lessons are videotaped for playback and review. Students must demonstrate (1) effectiveness in planning and presenting teaching lessons, and (2) understanding of the following content areas: learning domains, laws of learning, questioning techniques, defense mechanisms, classroom management, testing, and motivational theories. The following methods are taught: demonstration-performance, teaching interview, and informal lecture. “T” prefix awarded.

Prerequisites: Must have been selected for instructor duty. Normally instructors are designated for duty as instructor missile combat crewmembers. Provisions have been made to provide instruction to personnel assigned to other ICBM instructor duties. Individuals who have attended Academic Instructor School or who deal solely with training records and files should not attend MAIC.

Quota Control: 2 AF/DOP.

V3OZP13S3 001/V4OST13S3 001—Joint Space Fundamentals Course (JFSC)—PDS Code XHW—Peterson/2 wk—Oct 96

This interservice course is designed to provide space fundamentals familiarization training for Air Force, Army, Navy, Marine Corps, and DoD civilian personnel entering nonoperator positions within the space operations arena. Includes space terminology, space environment, orbital mechanics, policy/doctrine/law, space organizations, space systems, space systems theory and design, command operations, tactical applications of space assets, space operations site activities, and a joint space fundamentals exercise.

NOTE: Course V4OST2002 001 is a mobile version of resident course V3OZP13S3 001. Users requiring training at their facility should request training quotas in course V4OST13S3 001.

Prerequisites: Attendees must be nonoperator staff officers or enlisted and civilian personnel associated with space systems activities who require some type of familiarity and knowledge of space operations activities and environment. ECL 80.

Special Requirements: A Secret clearance is required before class start date and must be specified on student’s orders.

Quota Control: 2 AF/DOP.

V2OSR13S3A 000—REACT Transition Course—PDS Code WP5—Vandenberg/5 wk—Apr 95

Prepares unit instructors, evaluators, and staff personnel to train and evaluate the Rapid Execution and Combat Targeting (REACT) modification of WS 133A-M/CDB. Course covers general operating theory and performance of the REACT console and procedures for start-up, crew log operations, T.O. data base operations, operator task management, LCC tests, LF status monitoring, tests, and command, communications systems, EWO message processing, retargeting, and preparatory launch. Training consists of academic and missile procedures trainer blocks. Unit instructors and evaluators graduate following a formal evaluation.

Prerequisites: Assigned or selected for assignment to a missile operations instructor, evaluator, or staff officer position.

Special Requirements: Final Top Secret clearance with SIOP-ESI before class start date.

Quota Control: 2 AF/DOP.

V3OZP13S3A 000—DSP Vehicle Payloads, Subsystems, and Commander/SSO Positional Training—PDS Code XTQ—Vandenberg/13 wk—Oct 96

Provides students with academic and simulator training in the tasks, duties, and responsibilities of a 1st SOPS DSP satellite operations crew commander/satellite systems officer. Includes satellite vehicle subsystem information; telemetry, tracking, and command systems; planning activities, Command and Control System (CCS) operations; and Air Force Satellite Control Network (AFSCN) operations. Training consists of informal classroom lectures and satellite contact simulations. Each student plans vehicle supports and learns how to run both nominal and anomalous satellite contacts. Students graduate with the technical knowledge and proficiency to enter unit qualification training (UQT) and to ensure the integrity of the satellite operations mission.

Prerequisites: Currently hold a 1C6XX or 13SX AFSC.

Special Requirements: Secret clearance before class start date. Uniform of the day is required.

Admin Instructions: Report to Billeting, bldg 13005, DSN 276-1844, Vandenberg AFB CA, no later than 2 duty days before class start date. Upon arrival, individuals should contact the 534 Training Squadron Student Administration Section (during normal duty hours) to schedule their inprocessing, DSN 550-7502/7503.

Quota Control: 2 AF/DOP.

V3OZP13S3A 001—GPS Vehicle Payloads, Subsystems, and Commander/SSO Positional Training—PDS Code XTR—Vandenberg/13 wk—Oct 96

Global Positioning System (GPS) satellite operations crew commander/satellite systems operator (SSO) course provides students with academic and simulator training in the tasks, duties, and responsibilities of a 1st SOPS GPS satellite operations crew commander/SSO. Includes satellite vehicle subsystem information; telemetry, tracking, and command systems; planning activities, Command and Control System (CCS) operations; and Air Force Satellite Control Network (AFSCN) operations. Training consists of informal classroom lectures and satellite contact simulations. Each student plans vehicle supports and learns how to run both nominal and anomalous satellite contacts. Students graduate with the technical knowledge and proficiency to enter unit qualification training (UQT) and to ensure the integrity of the satellite operations mission.

Prerequisites: Currently hold a 1C6XX or 13SX AFSC.

Special Requirements: Secret clearance before class start date. Uniform of the day is required.

Admin Instructions: Report to Billeting, bldg 13005, DSN 276-1844, Vandenberg AFB CA, no later than 2 duty days before class start date. Upon arrival, individuals should contact the 534 Training Squadron Student Administration Section (during normal duty hours) to schedule their inprocessing, DSN 550-7502/7503.

Quota Control: 2 AF/DOP.

V3OZP13S3A 002—DSCS III Vehicle Payloads, Subsystems, and Commander Positional Training—PDS Code XTS—Vandenberg/26 wk—Oct 96

The Defense Satellite Communications System Phase III (DSCS III) training course consists of three blocks of training: (1) The introduction to SOC 33 operations training block provides students with background knowledge of Space Operations Center (SOC) operations, 50 Space Wing satellite control missions, the Air Force Satellite Control Network (AFSCN), and 50 Space Wing crew operations; (2) The DSCS III Vehicle Payloads and Subsystems training block provides students with academic training on subsystems knowledge needed to perform satellite operations. Includes telemetry, tracking, and command systems; organizational interfaces; and DSCS III vehicle subsystems. Each student receives an introduction to DSCS III operations and an indepth look at satellite subsystems. Training consists of informal classroom lectures; and (3) The DSCS III Crew Commander (CMDR) Positional training block provides students with academic and simulator training in the tasks, duties, and responsibilities of a 3 SOPS DSCS III CMDR. Includes telemetry, tracking, and command systems; planning activities; and Command and Control System (CCS) operations. Training consists of informal classroom lectures and satellite contact simulations. Each student plans vehicle supports and learns how to run both nominal and anomalous satellite contacts. Students graduate with the technical knowledge and proficiency to enter unit qualification training (UQT) and to ensure the integrity of the satellite operations mission.

Prerequisites: Currently hold a 13SX AFSC.

Special Requirements: Secret clearance before class start date. Uniform of the day is required.

Admin Instructions: Report to Billeting, bldg 13005, DSN 276-1844, Vandenberg AFB CA, no later than 2 days before class start date. Upon arrival, individuals should contact the 534th Training Squadron Student Administration Section (during normal duty hours) to schedule their inprocessing, DSN 550-7502/7503.

Quota Control: 2 AF/DOP.

V3OZP13S3A 003—UHF F/O Vehicle Payloads, Subsystems, and Commander Positional Training—PDS Code XTU—Vandenberg/14 wk 4 days—Oct 96

The Ultra High Frequency Follow-On (UHF F/O) course consists of three blocks of training: (1) the Introduction to SOC 33 Operations training block provides students with background knowledge of Space Operations Center (SOC) operations, 50 Space Wing satellite control missions, the Air Force Satellite Control Network (AFSCN), and 50 Space Wing crew operations; (2) The UHF F/O Vehicle Payloads and Subsystems training block provides students with academic training on subsystems knowledge needed to perform satellite operations. Includes an indepth look at satellite subsystems. Training will consist of informal classroom lecture; and (3) The UHF F/O Crew Commander (CMDR) Positional training block provides students with academic and full-up training in the tasks, duties, and responsibilities of a 3 SOPS UHF F/O CMDR. Includes telemetry, tracking, and command systems; planning activities and Command and Control System (CCS) operations. Training consists of informal classroom lectures and satellite contact simulations. Each student plans vehicle supports and learns how to run both nominal and anomalous satellite contacts. Students graduate with the technical knowledge and proficiency to enter unit qualification training (UQT) and to ensure the integrity of the satellite operations mission.

Prerequisites: Currently hold a 13SX AFSC.

Special Requirements: Students must possess a Secret clearance before class start date. Uniform of the day is required.

Admin Instructions: Report to Billeting, bldg 13005, DSN 276-1844, Vandenberg AFB CA, no later than 2 days before class start date. Upon arrival, contact the 534th Training Squadron Student Administration Section (during normal duty hours) to schedule inprocessing, DSN 550-7502/7503.

Quota Control: 2 AF/DOP.

V3OZP13S3A 004—MILSTAR Vehicle Payloads, Subsystems, and Commander Positional Training—PDS Code XTV—Vandenberg/20 wk—Oct 96

Course consists of three blocks of training: (1) The Introduction to SOC 33 Operations training block provides students with background knowledge of Space Operations Center (SOC) operations, 50 Space Wing satellite control missions, the Air Force Satellite Control Network (AFSCN), and 50 Space Wing crew operations; (2) The MILSTAR Vehicle Payloads and Subsystems training block provides students with academic training on the subsystems knowledge needed to perform satellite operations. Includes an indepth look at satellite subsystems, on-orbit support and contingency requirements, and strip chart recorder telemetry analysis. Training consists of informal lectures; and (3) The MILSTAR Crew Commander (CMDR) Positional training block provides students with academic and simulator training in the duties, tasks, and responsibilities of a 3 SOPS MILSTAR CMDR. Includes telemetry, tracking, and command systems; planning activities; and command and control system operations. Training consists of informal lectures and satellite contact simulations. Each student plans vehicle supports and runs both nominal and contingency satellite contacts. Students graduate with the technical knowledge and proficiency to enter unit qualification training (UQT) and to ensure the integrity of the satellite system mission.

Prerequisites: Currently hold a 13SX AFSC.

Special Requirements: Students must possess a Secret clearance before class start date. Uniform of the day is required.

Admin Instructions: Report to Billeting, bldg 13005, DSN 276-1844, Vandenberg AFB CA, no later than 2 days before class start date. Upon arrival, contact the 534th Training Squadron Student Administration Section (during normal duty hours) to schedule inprocessing, DSN 550-7502/7503.

Quota Control: 2 AF/DOP.

V3OZP13S3A 005—SOP MILSTAR Satellite—PDS Code 665—Vandenberg/3 wk—Oct 96

Provides comprehensive academic training of the MILSTAR satellite vehicle. Training includes both payload and spacecraft operations. Also covers the functions and signal flow of eaach subsystem contained in the payload and spacecraft. Although this course is designed specifically to meet the needs of the 4 SOPS Cmdrs/CCHs, it also meets the initial vehicle knowledge requirements of the satellite vehicle officers communications watch Cmdrs/CCHs, and ground system operators. The requisite topics are covered via informal lecture and discussion and written and oral exercises. A minimum pasing score of 80 percent is required on each of the two written block tests. For Cmdrs/CCHs, this course is a prerequisite for the SMCS familiarization course.

Quota Control: HQ 2AF/DOP.

V3OZP13S3A 006—Satellite Mission Control Subsystem Familiarization—PDS Code 664—Vandenberg/1 wk 2 days—Oct 96

Introduction to the MILSTAR ground system. Presents an overview of the entire MILSTAR system, and then focuses on the operations of the 4 SOPS command and control equipment. Covers the interaction between the constellation control stations (CCSs), the CSSs and other MILSTAR entities, and crew members. Also covers SMCS functions and operations, although it does not detail actual checklist maneuvers. 4 SOPS operational concepts are introduced to facilitate the students' understanding of why certain functions are performed. The requisite topics are covered via informal lecture and discussion and written and oral exercises. A minimum passing score of 80percent is required on the written block test. This course is a prerequisite for the CMDR/CCH positional training course. However, it also provides valuable knowledge for the SVO Communications Watch CMDRs/CCHs, and GSOs.

Quota Control: 2 AF/DOPS.

V3OZP13S3A 007—2 SOPS Satellite Vehicle Officer IQT—PDS Code 663—Vandenberg/9 wk—Oct 96

Consists of four blocks of training: (1) The Introduction to the Global Positioning System (GPS) training block provides students with the background knowledge of the elements and operation of GPS, including the satellites, the ground systems, and the Master Control Station (MCS); (2) The Introduction to Satellite Operations training block provides students with basic training in SOC 32 operations, operations crew procedures, and mission console operations; (3) The Subsystems and Payloads training block provides students in-depth academic training on the various subsystems and payloads, as well as hands-on training in routine and anomalous operations procedures; (4) The MCS Operations training block provides students with academic training on crew-related procedures, including emergency procedures, MCS security procedures and satellite contact scheduling requirements. Training consists of informal classroom lectures and training on the Crew Training Emulator (CTE). Students graduate with the technical knowledge and proficiency to enter Unit Qualification Training (UQT) and ensure the integrity of the satellite operations mission.

Prerequisites: Currently hold a 13SX AFSC.

Special Requirements: Students must possess a Secret clearance before class start date. Uniform of the day is required.

Quota Control: 2 AF/DOP.

V3OZP13S3A 008—Satellite Mission Analysis Officer Initial Qualification Training—PDS Code 662—Vandenberg/10 wk—Oct 96

Consists of five blocks of training: (1) The introduction to the Global Positioning System (GPS) block provides students with course introduction and registration as well as an overview of the GPS history, segments, and the GPS mission; Training consists of informal lecture and includes written evaluations. (2) The elements of the GPS Stations control segment block provides students with theory and operation of Ground Antennas (GAs), Monitor Stations (MSs), as well as an overview of the Master Control Station (MCS) and the Back-Up MCS (BUMCS). Training consists of informal lecture and includes written evaluations. (3) The overview of MCS operations block provides students with an introduction to basic MCS operations, security operations, emergency procedures. Training consists of informal lecture and includes written and performance evaluations. (4) The routine console operations

block provides students with logging experience, execution of routine procedures, HANU message procedures, and satellite health operations. Training consists of informal lecture and includes written as well as performance evaluations. (5) The anomalous console block provides students with known anomaly resolution skills, theory, operation, and implementation of Selective Availability Management (SAM). Training consists of informal lecture and includes written as well as performance evaluations.

Prerequisites: Currently hold a 13SX AFSC.

Special Requirements: Must hold at least a secret clearance before class start date. Uniform of the day is required.

Admin Instructions: Report to Billeting, bldg 13005, DSN 276-1844, Vandenberg AFB, no later than 2 days before class start date. Upon arrival, students should contact the 534th Training Squadron, Student Administration Section (during normal duty hours), to schedule their inprocessing.

Quota Control: 2 AF/DOPS.

V3OZP13S3B 010—Spacelift Initial Qualification Training—PDS Code 31X—Vandenberg/7 wk—Oct 96

Provides the students with academic training spacelift operations, procedures and equipment. Includes an overview of Spacelift fundamentals, emergency procedures and contingency operations, launch operations activities, range operations, safety operations, weather operations and integrated operations.

Prerequisites: Currently hold a 1C6XX or 13SXX AFSC.

Special Requirements: Students must possess a SECRET security clearance before class start date. Uniform of the day is required.

Admin Instructions: individuals scheduled for this training must report to Billeting (13005), DSN 276-1844, Vandenberg AFB CA, no later than 2 days before class start date. Upon arrival, individuals should contact 534th Training Squadron.

Quota Control: 2 AF/DOP.

V2OSR13S3B 000—REACT Transition Course—PDS Code WP6—Vandenberg/5 wk—Apr 95

Prepares unit instructors, evaluators, and staff personnel to train and evaluate the Rapid Execution and Combat Targeting (REACT) modification of WS 133B/CDB. Course covers general operating theory and performance of the REACT console and procedures for start-up, crew log operations, T.O. data base operations, operator task management, LCC tests, LF status monitoring, tests, and command, communications systems, EWO message processing, retargeting, and preparatory launch. Training consists of academic and missile procedures trainer blocks. Unit instructors and evaluators graduate following a formal evaluation.

Prerequisites: Assigned or selected for assignment to a missile operations instructor, evaluator, or staff officer position.

Special Requirements: Final Top Secret clearance with SIOP-ESI before class start date.

Quota Control: 2 AF/DOP.

V3OZP13S3D 014—USSPACECOM Space Control Center (SSC) Orbital Analyst Course—PDS Code REX—Falcon/4 wk—Oct 96

Presents basic training in space operations, foreign and domestic space systems, and orbital mechanics processing for all space events. Consists of academic and simulator instruction with emphasis on the 427M and SPADOC 4 computer systems.

Prerequisites: Be selected for duty in the SSC as an orbital analyst with a 13SXX AFSC or other services equivalent.

Special Requirements: A background in astronautics, mathematics, or an engineering discipline. Secret clearance before class start date.

Admin Instructions: Students are assigned to crew after completion of academic instructions.

Class Size: Minimum, 2; maximum, 6.

Quota Control: 2 AF/DOP.

V3OZP13S3D 015—USSPACECOM Space Control Center (SCC) Course—PDS Code SV0—Falcon/4 wk—Oct 96

Provides an introduction to space systems and satellite threats basic threat processing. Provides academic instruction for the space control director (SCD), deputy crew commander, space control officer (SCO), space control technician (SCT), and space control analyst (SCA) on SCC systems familiarization. Course presents command and control and communications procedures necessary to direct all space events processing in the SCC. Course also gives an overview of space operations with emphasis on the space sensor network and command center functions at Cheyenne Mountain AFS.

Prerequisites: Be selected for duty at the SCC with an AFSC of 13SXX or 1C6X1 or other service equivalent.

Special Requirements: Secret clearance prior to training start date.

Admin Instructions: Students are assigned to SCC crew after completion of academic instructions.

Class Size: Minimum, 2; maximum, 8.

Quota Control: 2 AF/DOP.

V3OZP13S3D 016—AFSPC 1st Command and Control Squadron, Space Control Center (SSC) Operations—PDS Code NRP—Falcon/6 wk—Oct 96

Provides the student an introduction to orbital mechanics, 427M computer system, SPADOC 4 system, and software programs used to process deep space satellite positional data. Additional instruction will include space surveillance network and operational center management. Students graduate with technical knowledge to enter unit qualification training (UQT).

Prerequisites: Officers and noncommissioned officers selected for assignment, 1st Command and Control Squadron combat crew duties at CMAS.

Special Requirements: Secret clearance.

Admin Instructions: Students are assigned to 1 ACS crew after completion of academic instruction.

Quota Control: 2 AF/DOP.

V3OZP13S3D 018—Mission Ready Command - 1st CACS—PDS Code 20A—Falcon/2 wk—Oct 96

See parent course Vl3OZP13S3D 016 for course description.

Prerequisites: Secret clearance, AFSC 13S3D.

Quota Control: HQ 2AF/DOP.

V3OZP13S3E 002—USSPACECOM Missile Warning Center (MWC)—PDS Code NQD—Falcon/7 wk—Oct 96

Provides indepth instruction in equipment operation, missile warning sensor management, and missile and space launch event processing. Provides academic and positional instruction to include warning operations for crew commander, deputy commander for warning operations, crew chief, missile warning technician, and warning systems operator.

Prerequisites: Be selected for duty in the Missile Warning Center, with an AFSC of 13SXX, 1C6S1, or other services equivalent.

Special Requirements: Secret clearance at time of class start date.

Admin Requirements: Students should receive at least two shifts of operational orientation in the Missile Warning Center prior to attending. Students are assigned to crew after completion of positional instruction and are normally scheduled for preevaluation after 15 workdays (three shifts).

Quota Control: 2 AF/DOP.

V3OZP13S3E 006—Satellite Operations Crew Commander (CMDR)—PDS Code JH4—Peterson/15 wk 3 days—Apr 95

Provides comprehensive academic and demonstration-performance training in the duties of space operations center CMDR. Training consists of informal classroom and hands-on instruction. Formal evaluation consists of written tests. Summative evaluation consists of simulated, real-world, performance scenarios. Final qualification training, upgrade evaluation, and recurring training is administered by gaining unit.

Prerequisites: Be selected for assignment to 21st Operations Group crew duties at a space communications squadron.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Graduates enter UQT program.

Quota Control: 2 AF/DOP.

V3OZP13S3E 009—Ballistic Missile Early Warning System IQT (CMDR/CCH)—PDS Code 6JG—Peterson/4 wk 2 days—Apr 95

Provides comprehensive academic and limited positional training in the tasks, duties, and responsibilities of BMEWS Missile Warning Operations Center (MWOC) Crew Commanders (CMDRs) and Crew Chiefs (CCHs). Training consists of formal classroom instruction using lecture, discussion, and role playing supported by various audiovisual devices. Students use self-study guides (SSGs) and computer-aided instruction (CAI) as an adjunct to classroom instruction. Hands-on simulation is provided via a computer-aided instruction simulator (CAIS). Formative evaluations consist of written tests and CAIS scenarios. Summative evaluation is a comprehensive, simulated real-world, problem solving scenario administered via CAIS. Final mission ready training, upgrade evaluation, and recurring training are administered by the gaining unit.

Tentative Base of Assignment: Clear AFS AK.

Prerequisites: Be selected for assignment to Space Command combat crew duty as a CMDR (Officer) or a CCH (TSgt and MSgt) at 13 SWS, Clear AFS AK.

Special Requirements: Secret clearance by class start date.

Quota Control: 2 AF/DOP.

V3OZP13S3E 010—BMEWS Site I MWOC IQT—PDS Code XTL—Peterson/6 wk—Oct 96

Provides comprehensive academic and performance training for BMEWS/SSPAR Missile Warning Operations Center (MWOC) crew commanders (CMDR), crew chiefs (CCH), and space console operators (SCO). Academic training consists of formal classroom lectures, group discussions, and individual self-study. Classroom instruction is supported by various audiovisual programs. Practical application of the academic training is accomplished by part-task trainer lessons and approximately 6 weeks of performance training using an MWOC simulator capable of providing site-specific coverage displays and problems exactly as they would appear at the site. The comprehensive end-of-course evaluation and written test produce a mission-capable crewmember. Students may be given a mission-ready evaluation prior to graduation.

Tentative Bases of Assignment: Thule AB GL.

Prerequisites: Be selected for assignment to Space Command crew duties as a CMDR (officer), CCH (SSgt - MSgt), or SCO (Amn - SSgt) at a BMEWS/SSPAR site.

Special Requirements: Secret clearance before class start date. Must have current Space Operations crew physical according to AFMAN 48-123 before class start date.

Quota Control: 2 AF/DOP.

V3OZP13S3E 013—PAVE PAWS IQT—PDS Code XT9—Peterson/7 wk—Apr 95

Provides comprehensive academic and performance training for SLBM-WS Missile Warning Operations Center (MWOC) crew commanders (CMDR), crew chiefs (CCH), and space console operator (SCO). Academic training consists of formal classroom lectures, group discussions, and individual self-study. Classroom instruction is supported by various audiovisual programs. Practical application of the academic training is accomplished through part-task trainer lessons and approximately 6 weeks of performance training using an MWOC simulator capable of providing site-specific coverage displays and problems exactly as they would occur at the site. The comprehensive end-of-course evaluation and written test produce a mission-capable crewmember. Students may be given a mission-ready evaluation prior to graduation.

Tentative Bases of Assignment: Beale AFB CA; Cape Cod AFS MA; Eldorado AFS TX; and Robins AFB GA.

Prerequisites: Be selected for assignment to Space Command crew duties as a CMDR (officer), CCH (SSgt - MSgt), or SCO (Amn - SSgt) at an SLBM-WS site.

Special Requirements: Secret clearance prior to class start date. Must have current space operations crew physical according to AFI 48-123 (formerly AFR 160-43) prior to CSD.

Quota Control: 2 AF/DOP.

V3OZR13S3H 001—Missile Staff Officer Transition Training (WS 118A)—PDS Code S50—Vandenberg/3 wk 1 day—Apr 95

Provides students with transition training to familiarize them with the latest configuration of the Peacekeeper in Minuteman Silo

weapon system (WS118A). Course consists of academic training only.

Prerequisites: Officers assigned or selected for assignment to the 3901st Missile Evaluation Squadron, 576 Test Squadron, or 30 Logistics Group for staff duty.

Quota Control: 2 AF/DOP.

V3OZR13S3K 000—Missile Staff Officer Transition Training Course (WS133A-M/CDB)—PDS Code S5Y—Vandenberg/3 wk 1 day—Apr 95

Provides update training to ensure familiarity with latest configuration of the 133A-M/CDB weapon system. Course consists of academic training only.

Prerequisites: Officers assigned or selected for assignment to 3901 Missile Evaluation Squadron, 576 Test Squadron, or 30 Logistics Group for staff duty.

Quota Control: 2 AF/DOP.

V3OZR13S3L 000—Missile Staff Officer Transition Training (WS 133B/CDB)—PDS Code TZB—Vandenberg/4 wk—Apr 95

Provides update training to ensure familiarity with configuration of WS133B/CDB weapon system. Course consists of academic training only.

Prerequisites: Officers assigned to or selected for assignment to 3901 Missile Evaluation Squadron, 576 Test Squadron, or 30 Logistics Group for staff duty.

Quota Control: 2 AF/DOP.

V2OSR13S3M 000—REACT Missile Procedures Trainer Operations—PDS Code WP3—Vandenberg/3 wk—Apr 95

Prepares unit missile procedures trainer (MPT) operators to operate the MPT after the Rapid Execution and Combat Targeting (REACT) modification of either WS 133A-M/CDB or WS-133B/CDB. Course covers general operating theory and performance for trainer start-up, initialization, and shutdown, lesson plan or lesson data set generation and management, instructor workstation operation, trainer operation and control, MPT diagnostics, and student records creation and management. Training consists of academics and missile procedures trainer blocks.

Prerequisites: Assigned or selected for assignment as an MPT operator in WS-133A-M/CDB, WS 133B/CDB, or WS 118A weapon system.

Special Requirements: Final Top Secret clearance before class start date.

Other: 4 students per class.

Quota Control: 2 AF/DOP.

V3OZR13S4 000—Undergraduate Space and Missile Training Staff Course—PDS Code EJ6—Vandenberg/4 wk 2 days/AFSC 13S4—Apr 95

Provides prerequisite career field training for 13S4 in the basic knowledge needed to perform the duties associated with space and missile operations staff positions. Students are taught background technical information in orbital mechanics, space environment, communications, sensor fundamentals, organizations, and history. They are then given a detailed view of all mission areas: satellite command and control operations, spacelift operations, missile crew operations, space control operations, and space warning operations. Graduates of this course are awarded a space and missile operations AFSC.

Prerequisites: Air Force personnel must have current space and missile operations crew physical according to AFMAN 48-123 (formerly AFR 160-43) before class start date.

Admin Instructions: Report to bldg 8231, classroom #7, at 0800, 1 duty day before class start date with two copies of orders and current identification card (DD Form 2 AF). For additional information, see reporting instructions table.

Quota Control: 2 AF/DOP. Waiver Control: 381 TRSS/DOBT.

V2OZR13S4H 007—Mission Ready Staff Officer Long Course—PDS Code 200—Vandenberg/8 wk—Oct 96

Designed for staff officers selected for operational command and leadership positions who have little or no previous missile operations experience. Includes hands-on missile procedures trainer instruction.

Prerequisites: Be selected for assignment to aplicable weapon system and have little or no previous missile experience, or as determined by HQ 20AF/DO and missile unit.

Special Requirements: Final or interim Top Secret clearance before class start date. Access to SIOP-ESI is required before performing alert duties. If the student is already assigned to the gaining unit, the OSS/DOV will issue the personal operations manual for both the correspondence and residency training.

Admin Instructions: If training is required in conjunction with PCS assignment, HQ AFSPC/DOTT will notify HQ 2AF/DOP of course required for each individual. If training is required and no assignment is involved, HQ AFSPC/DOTT will notify HQ 2AF/DOP of course required for each individual.

Quota Control: HQ 2AF/DOP.

V3OZR13S4H 003—ICBM Staff Officer Requalification Course (WS 118A)—PDS Code L19—Vandenberg/6 wk—Apr 95

Designed for staff officers selected for operational command and leadership positions. If student is assigned to a missile wing at the time of selection, the OSS/DOV will assist the student as appropriate. Training includes “hands-on” Missile Procedures Trainer (MPT) instruction. Course length may vary depending on 392 SMTS determination of student background and performance, as well as MPT availability, but will not exceed 6 weeks.

Prerequisites: Be selected for assignment to applicable weapon system and have prior crew experience in a similar weapon system, as determined by 20 AF/DO and missile unit.

Special Requirements: Final or interim Top Secret clearance before class start date. Final Top Secret clearance with access to SIOP-ESI is required before performing alert duties. If student is already assigned to the “gaining” MW, the OSS/DOV will issue a personal operations manual for both the correspondence block and the residency training.

Other: If training is required in conjunction with PCS assignment, 20 AF/DP will notify 2 AF/DOP of course required for each individual. If training is required and no assignment is involved, 20 AF/DP will notify 2 AF/DOP of course required for each individual.

Quota Control: 2 AF/DOP.

V2OST13S4K 007—Mission Ready Staff Officer Long Course (133A-R)—PDS Code 2FO—Vandenberg/8 wk—Oct 96

Designed for staff officers selected for operational command and leadership positions who have little or no previous missile operations experience. Includes hands-on missile procedures trainer instruction.

Prerequisites: Be selected for assignment to aplicable weapon system and have little or no previous missile experience, or as determined by HQ 20AF/DO and missile unit.

Special Requirements: Final or interim Top Secret clearance before class start date. Access to SIOP-ESI is required before performing alert duties. If the student is already assigned to the gaining unit, the OSS/DOV will issue the personal operations manual for both the correspondence and residency training.

Admin Instructions: If training is required in conjunction with PCS assignment, HQ AFSPC/DOTT will notify HQ 2AF/DOP of course required for each individual. If training is required and no assignment is involved, HQ AFSPC/DOTT will notify HQ 2AF/DOP of course required for each individual.

Quota Control: HQ 2AF/DOP.

V3OZR13S4K 000—Missile Staff Officer Course (WS133A-M/CDB)—PDS Code QKR—Vandenberg/2 wk—Oct 95

Familiarization course to meet initial training requirements for missile operations staff officers assigned to duties in weapon system 133A-M/CDB, as required by ACCR 50-25, vol I.

Prerequisites: Be selected for assignment to ACC missile staff duties (WS133A-M/CDB) in AFSC 13S4/13S3. Must have prior missile operations experience.

Special Requirements: Final or interim Top Secret clearance before class start date. When requesting personnel security investigation, ensure that an “X” is placed in the “YES” box of block 20 in DD Form 1879 in order to ensure interim clearance is granted on time.

Quota Control: 2 AF/DOP.

V3OZR13S4K 003—ICBM Staff Officer Requalification Course (WS 133A-M/CDB)—PDS Code 8U7—Vandenberg/6 wk (aprx)—Apr 95

Designed for staff officers selected for operational command and leadership positions. If student is assigned to a missile wing at the time of selection, the OSS/DOV will assist the student as appropriate. Training includes “hands-on” Missile Procedures Trainer (MPT) instruction. Course length may vary depending on 392 SMTS determination of student background and performance, as well as MPT availability, but will not exceed 6 weeks.

Prerequisites: Be selected for assignment to applicable weapon system and have prior crew experience in a similar weapon system, as determined by 20 AF/DO and missile unit.

Special Requirements: Final or interim Top Secret clearance before class start date. Final Top Secret clearance with access to SIOP-ESI is required before performing alert duties. If student is already assigned to the “gaining” MW, the OSS/DOV will issue a personal operations manual for both the correspondence block and the residency training.

Other: If training is required in conjunction with PCS assignment, 20 AF/DP will notify 2 AF/DOP of course and class required for each individual. If training is required and no assignment is involved, 20 AF/DP will notify 2 AF/DOP of course required for each individual.

Quota Control: 2 AF/DOP.

V2OSR13S4L 007—Mission Ready Staff Officer Long Course (133B/R)—PDS Code 3EO—Vandenberg/8 wk—Oct 96

Designed for staff officers selected for operational command and leadership positions who have little or no previous missile operations experience. Includes hands-on missile procedures trainer instruction.

Prerequisites: Be selected for assignment to aplicable weapon system and have little or no previous missile experience, or as determined by HQ 20AF/DO and missile unit.

Special Requirements: Final or interim Top Secret clearance before class start date. Access to SIOP-ESI is required before performing alert duties. If the student is already assigned to the gaining unit, the OSS/DOV will issue the personal operations manual for both the correspondence and residency training.

Admin Instructions: If training is required in conjunction with PCS assignment, HQ AFSPC/DOTT will notify HQ 2AF/DOP of course required for each individual. If training is required and no assignment is involved, HQ AFSPC/DOTT will notify HQ 2AF/DOP of course required for each individual.

Quota Control: HQ 2AF/DOP.

V3OZR13S4L 000—Missile Staff Officer Course (WS133B/CDB)—PDS Code TZC—Vandenberg/2 wk 2 days—Oct 95

Familiarization course to meet initial training requirements for missile operations staff officers assigned to duties in weapon system 133B/CDB, as required by ACCR 50-25, volume I.

Prerequisites: Be selected for assignment to ACC missile staff duties (WS133B/CDB) in AFSC 13S4/13S3. Must have prior missile operations experience.

Special Requirements: Final or interim Top Secret clearance before class start date. When requesting personnel security investigation, ensure that an “X” is placed in the “YES” box of block 20 in DD Form 1879 in order to ensure interim clearance is granted on time.

Quota Control: 2 AF/DOP.

V3OZR13S4L 003—ICBM Staff Officer Requalification Course (WS 133B/CDB)—PDS Code 8U8—Vandenberg/6 wk (aprx)—Apr 95

Designed for staff officers selected for operational command and leadership positions. If student is assigned to a missile wing at the time of selection, the OSS/DOV will assist the student as appropriate. Training includes “hands-on” Missile Procedures Trainer (MPT) instruction. Course length may vary depending on 392 SMTS determination of student background and performance, as well as MPT availability, but will not exceed 6 weeks.

Prerequisites: Be selected for assignment to applicable weapon system and have prior crew experience in a similar weapon system, as determined by 20 AF/DO and missile unit.

Special Requirements: Final or interim Top Secret clearance before class start date. Final Top Secret clearance with access to SIOP-ESI is required before performing alert duties. If student is already assigned to the "gaining" MW, the OSS/DOV will issue a personal operations manual for both the correspondence block and the residency training.

Other: If training is required in conjunction with PCS assignment, 20 AF/DP will notify 2 AF/DOP of course required for each individual. If training is required and no assignment is involved, 20 AF/DP will notify 2 AF/DOP of course required for each individual.

Quota Control: 2 AF/DOP.

X3OZR14N0 000—Combat Intelligence System Interim Course—PDS Code 2SP—Goodfellow/1 wk—Apr 95

Trains selected Air Force intelligence officers, enlisted members, and appropriate civilians in the knowledge and skills necessary to perform duties associated with the operation of the Combat Intelligence System (CIS). Includes system overview, mission/structure, administration/data base functions, threat analysis functions, imagery functions, communications functions, and office automation functions.

Special Requirements: Must possess an intelligence AFSC in the 14NXX, 1NXXX, or equivalent civilian intelligence job codes. Secret clearance required by class start date. Students must report to base billeting the day before class start date.

Quota Control: 2 AF/DOP.

X3OZR14N0 001—International Intelligence Officer—PDS Code 777—Goodfellow/8 wk/MASL D172020—Oct 96

Trains junior grade international officers in the fundamentals of intelligence applications. Training includes intelligence security; basic intelligence tools; briefing and debriefing techniques; indications and warnings; military doctrine; organization and warfare capabilities; operations intelligence; analysis of offensive forces; air defense analysis; internal defense; and introduction to targeting.

Prerequisites: ECL 80.

Special Requirements: CONFIDENTIAL clearance required according to AFI 16-201, *Foreign Disclosure of Classified and Unclassified Military Information to Foreign Governments and International Organizations* (formerly AFR 200-9), verified in advance and sent by message to training institution.

Unit of Assignment: 315th Technical Training Squadron, Goodfellow AFB TX 76908-4002.

Quota Control: 2 AF/DOP.

X3OZR14N0 003—Fundamentals of Intelligence—PDS Code V8K—Goodfellow/19 wk—Oct 96

Introduction to intelligence, research, and communication skills, basic computer and communication systems, intelligence planning, support and operations, intelligence sources and methods, mapping charting & geodesy, electromagnetic fundamentals, world political and military systems, air forces, ground forces, naval forces, C3/air defense, strategic offensive missile forces, intelligence operational exercise, sensitive compartmented information orientation and indoctrination, space systems, collection management overview and orientation to Air Force intelligence specialties.

Special Requirements: Top Secret clearance and SCI access based on SBI required. Losing command must ensure SBI is initiated and opened at DIS before student reports to Goodfellow.

Quota Control: 2 AF/DOP.

X3OZR14N1 001—Combat Intelligence Systems Automatic Associator Course (CIS-AA)—PDS Code V65—Goodfellow/3 wk—Oct 96

Provides an introduction to the CIS-AA module and related data bases. Provides training on tactical command systems receiver set-up and operations, CIS-AA module set up, funcitonal overview, communications and display configuration. Explains and explores CIS-AA data bases, data base management, and analysis and reporting tools.

Prerequisites: Officers and enlisted personnel currently in or programmed to fill constant source operator positions.

Selection Procedures: Selected by MAJCOM.

Special Requirements: Secret clearance required.

Quota Control: 2 AF/DOP.

X3OBR14N1A 007—Intelligence Operations Officer—PDS Code 4PW—Goodfellow/12 wk 2 days/AFSC 14N1A—Oct 96

Provides training in human intelligence (HUMINT), signals intelligence (SIGINT), and imagery intelligence (IMINT). Training includes an introduction to intelligence collection/production cycle; HUMINT tasking management and reporting; IMINT tasking/exploitation management and reporting; SIGINT tasking/exploitation management, analysis, and reporting; intelligence collection management; peacetime support of reconnaissance programs; intelligence support to warfighting; and communication skills. Course closes with an operational exercise.

Prerequisites: Successful completion of course X3OQR14N0 XXX (which is not waiverable).

Special Requirements: Top Secret clearance and SCI access based on SSBI required. Losing command must ensure SSBI is initiated and opened at DIS before student reports to Goodfellow. SSBI processed according to AFI 31-501, *Personnel Security Program Management* (formerly AFR 205-32) must fulfill requirements of USAFINTEL 201-1. Security police activity which submits request for SSBI must list AFISA/INSB, Wash DC 20330.

Admin Instructions: Include statement in orders that SSBI was initiated and opened at DIS or give date completed and Top Secret granted. Student must handcarry a copy of DD Form 398 which was submitted with SSBI request.

NOTE: Restrictions in AFMAN 36-2110 (formerly AFR 36-20) for officers who are former members of the Peace Corps must be met before assignment to the intelligence career field.

Quota Control: USAF Officers, HQ AFPC/DPMAPO; all others, 2 AF/DOP.

X3OBR14N1B 003—Intelligence Applications Officer—PDS Code V56—DOD 3A—Goodfellow/14 wk 3 days/AFSC 14N1B—Oct 96

Trains graduates of the X3OQR14N0 003, Fundamentals of Intelligence Course, in the roles and functions of the 14N1 AFSC: contingency development, weaponeering, electronic combat, force applications, unit level operations, combat mission planning,

combat operations, and combat assessment. Course closes with an operational exercise.

Prerequisites: Successful completion of course X3OQR14N0 003, Fundamentals of Intelligence, which is NOT waiverable.

Special Requirements: Top Secret clearance and SCI access based on SSBI required. Losing command must ensure SSBI is initiated and opened at DIS before student reports to Goodfellow. SSBI processed according to AFI 31-501 (formerly AFR 205-32) must fulfill requirements of USAF INTEL 201-1. Security Policy activity which submits request for SSBI must list AFISA/INSB, Wash DC 20330. Include statement in orders that SSBI was initiated and opened at DIS or date completed and TS granted. Student must hand-carry a copy of DD Form 398 which was submitted with SSBI request.

NOTE: Restrictions in AFMAN 36-2110 (formerly AFR 36-20) for officers who are former members of the Peace Corps must be met before assignment to the intelligence career field.

Quota Control: Air Force officers, HQ AFPC/DPMAPO; others, 2 AF/DOP.

NOTE: Restrictions in AFMAN 36-2110 (formerly AFR 36-20) for officers who are former members of the Peace Corps must be met before assignment to the intelligence career field.

X4OST14N1B 001—Conventional Weaponeering Fundamentals—PDS Code PXE—various locations/1 wk 2 days—Oct 95

Provides refresher training for targeting officers, AFSC 14N1, and familiarization training for non-14N1 (officer, enlisted, DOD) personnel performing weaponeering tasks at wing or unit levels. Includes training using joint munitions effectiveness manuals (JMEM) which entails an understanding of target vulnerability, delivery accuracy, and weapons characteristics. Manual and automated methodologies will be discussed and exercised in varying degrees. Major course topics are as follows: target intelligence process, components of weaponeering problems, and weaponeering applictions. Units desiring this course must have the necessary materials, facilities, and computer equipment to support this training before scheduling classes. A minimum of six students is required. Requirements for this mobile training team course will be validated and scheduled by the 315 TTS/DOX, Goodfellow AFB TX.

Special Requirements: A Secret clearance is mandatory to attend this course.

Prerequisites: This is a refresher and (or) fundamentals course designed for personnel requiring knowledge and skills in weaponeering tasks. Completion of at least a high school level algebra course is mandatory.

Quota Control: 2 AF/DOP.

V3OZP14N3 000/V4OST14N3 000—Interservice Space Intelligence/Operations Course—PDS Code 7K0—533 TRS Peterson/2 wk—Oct 96

For intelligence and space operations officer specialties and civilian equivalents with newly assigned duties involving space operations that require a basic knowledge of space. Designed for majors and below, and civilian equivalents; however, lieutenant colonels and civilian equivalents may attend. (V3OZP14N4-000, Interservice Space Intelligence Operations Senior Course, is better suited for lieutenant colonels and above and civilian equivalents.) Focuses on the joint application of space-related intelligence. Examines the basic theory and fundamentals of operating in the space environment; space law and policy; military space organizations and missions; US and other countries' space systems and operations; space-related intelligence collection management; intelligence structure and the tactical exploration of national capabilities.

Prerequisites: This "familiarization" course is designed for students with little or no experience in the space operations and intelligence fields. Individuals with 1 or more years of space operations and intelligence experience will find that this course will not satisfy their training needs.

Special Requirements: A Top Secret/SI/TK clearance is mandatory to attend this course. Clearances must be passed via SSO channels to "SSO AFSPC (Pass to 533 TRS/DOD)" 30 days before class start date. Military personnel will wear seasonal service uniform combination according to AFI 36-2903 or other service equivalent regulation. Military fatigues are not appropriate for classroom wear. Civilians will wear normal office attire.

Admin Instructions: Report to 1150 Academy Park Loop, Atrium II, Suite 130, Colorado Springs CO, NLT 0745 on class start date. Class is held Monday through Friday, 0800-1700. Government transportation is limited.

Quota Control: 2 AF/DOP.

X3OZR14N3A 009—Electronic Warfare Support—PDS Code 474—Goodfellow/4 wk 2 days—Jan 96

Trains Air Force personnel (AFSCs 14NXX and 1NXXX) in the knowledge and skills needed to perform duties in support of electronic combat (EC). Includes introduction to EC, electromagnetic fundamentals, threat, counter threat, EC exercise, and EC application.

Prerequisites: Designed for intelligence officers (1st Lt - Lt Col) in AFSC 14NXX and enlisted personnel (Sgt - CMSgt) in AFSC 1NXXX. Officers must have 3 years of field experience and enlisted personnel must have 3 years of field experience and hold a 5-skill level. All personnel must be assigned to EC related duties.

Special Requirements: Top Secret clearance according to AFI 31-501 (formerly AFR 205-32) and USAFINTEL 201-1 with access to SI/TK by class start date. The following publications are highly recommended reading before attending course: AFM 2-8, *Electronic Combat Operations*; MCM 3-1, vol II, *Threat Reference*; AFP 51-45, *Electronic Combat Principles*; ELINT Parameters Limits (EPL) List; and AFP 50-47, *Electronic Intelligence*.

Admin Instructions: The statement "Variations Authorized" must be included in the TDY orders to permit necessary instruction at locations other than Goodfellow AFB.

Quota Control: 2 AF/DOP.

X3ORR14N3A 011—Military Geography as Related to US Intelligence Problems—PDS Code MRQ—Goodfellow/4 days—Oct 95

Block I of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides a brief overview of geography, geopolitical environment, society, economics, lines of communications and military forces

structure of the USSR, and other strategic areas as they relate to intelligence problems.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year of experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB, TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start day. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g. blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10) or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dungarees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 012—Introduction to US Imagery Reconnaissance—PDS Code MRR—Goodfellow/3 days—Oct 95

Block II of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides cursory examination of the history of reconnaisance, intelligence structure, collection management, and exploitation management.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year of experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g. blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10), or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dungarees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 013—Sensory Theory, Fundamentals, and Mensuration—PDS Code MRT—Goodfellow/1 wk 3 days—Oct 95

Block III of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides an in-depth introduction of EM spectrum, electro-optical theory and principles, analysis of multisensor systems and parameters, film types, infrared-theory, systems, fundamentals (film), radar-theory, systems, fundamentals (film); multispectral-theory, and systems fundamentals.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year of experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the

315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g. blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10) or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dungarees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 015—Naval Weapon System—PDS Code MRY—Goodfellow/2 wk—Oct 95

Block V of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides advanced imagery analysis techniques for surface and subsurface threats and auxiliaries, shipyards, repair yards, naval missile storage, and Naval missile support facilities.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year of experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g. blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formery AFR 35-10) or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dungarees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 016—Strategic Industries—PDS Code MSQ—Goodfellow/1 wk 2 days—Oct 95

Block VI of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides advanced imagery analysis techniques for strategic missile materials production, nuclear weapons, missile development and production, biological/chemical production and warfare program, and directed energy research and development program and testing.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year of experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g. blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10), or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dungarees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 017—Offensive Missile Systems—PDS Code MS2—Goodfellow/1 wk 3 days—Oct 95

Block VII of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides advanced imagery analysis techniques for intercontinental ballistic missiles, current and future trends, space and missile test ranges, and intermediate and medium-range ballistic missiles.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year of experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded

by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start day. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g. blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10) or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dungarees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 018—Electronics/C3—PDS Code MS6—Goodfellow/1 wk 3 days—Oct 95

Block VIII of the Defense Sensor Interpretation and Applications Training Program (DSIATP) course X3OZR14N3A 008. Provides advanced imagery analysis techniques for Strategic Telecommunications Systems, Defensive Radar Facilities, Strategic Space Systems Electronic Warfare Systems, Strategic Telecon, Tactical Communications Systems, and Strategic C3.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year of experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top SECRET/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start day for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g., blue jeans are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10), or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dungarees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 019—Air Force Weapons Systems—PDS Code MSE—Goodfellow/1 wk 4 days—Oct 95

Block IX of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides advanced imagery analysis techniques for air forces weapons, weapon systems, aircraft, and airfields.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top SECRET clearance and be indoctrinated for Top SECRET/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g., blue jeans, are not appropriate for classroom wear. Military personnel will wear sseasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10) or other service equivalent. Civilians will wear normal office attire. Military trianing may require the wear of fatigues/BDUs/dungarees.

X3ORR14N3A 020—Air Defense Weapons Systems—PDS Code MS8—Goodfellow/1 wk 1 day—Oct 95

Block X of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008.

Provides advanced imagery analysis techniques for launch sites, support facilities and related facilities, and equipment.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g., blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10) or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs, dungarees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 021—Ground Forces Weapons Systems—PDS Code MRS—Goodfellow/1 wk 3 days—Oct 95

Block XI of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides advanced imagery analysis for organization structures, weapons systems, equipment, and installations.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's supporting SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student name, rank, SSN, class name, class dates, accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security reuirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g., blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10) or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dunagrees.

Quota Control: 2 AF/DOP.

X3ORR14N3A 022—Special Studies—PDS Code MS7—Goodfellow/1 wk 2 days—Oct 95

Block XII of the Defense Sensor Interpretation and Applications Training Program (DSIATP), course X3OZR14N3A 008. Provides advanced multisensor imagery analysis techniques to solve specific intelligence problems. Examines doctrine, techniques, and countermeasures unique to denial and deception, low-intensity conflict, counter narcotics, and special operations.

Prerequisites: Air Force officers must have AFSC 14N3; Air Force enlisted must have AFSC 1N151/71/91. Other service and civilian students must have equivalent qualifications, to include completion of a basic imagery interpretation course and a minimum of 1 year experience. Request for waiver of training experience may be directed to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000.

Special Requirements: Students must have a Top Secret clearance and be indoctrinated for Top Secret/SI/TK before entering class. The student's sponsoring command is responsible for ensuring appropriate accesses (or authority to indoctrinate) are forwarded by the student's support SSO to the school. A clearance message will be sent through SSO channels to SSO GDFLW (pass to 315 TCHTS/TTSA) NLT 10 days prior to class start date. The message will include: student's name, grade, SSN, class name, class dates, and accesses. Waivers of security clearance requirements will not be granted. Students not meeting all security requirements upon arrival may be returned to their units.

Admin Instructions: Students will report to Goodfellow AFB NLT 2 duty days before class start date for administrative processing. Civilian and officer students will report to the 3486th Student Squadron; enlisted students will report to the 3481st Student Squadron. Non-Air Force military personnel will report to the appropriate service support unit. Government billeting and transportation is very limited; commercial transportation is almost nonexistent. Student information packets are available from the 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000. Report to bldg 523, Goodfellow AFB, NLT 0715 on class start date. Classes are held Monday through Friday.

Uniform Policy: Military fatigues and civilian casual clothing, e.g., blue jeans, are not appropriate for classroom wear. Military personnel will wear seasonal service uniform combinations according to AFI 36-2903 (formerly AFR 35-10) or other service equivalent. Civilians will wear normal office attire. Military training may require the wear of fatigues/BDUs/dungarees.

Quota Control: 2 AF/DOP.

X3OZR14N3A 008—Defense Sensor Interpretation and Application Training Program—PDS Code J7U—Goodfellow/15 wk/MASL D172010—Oct 96

Provides training for Air Force and other DOD and US intelligence community personnel in the knowledge and skills necessary to perform as accomplished imagery interpreters. Includes an introduction to military geography; introduction to US imagery reconnaissance; electromagnetic spectrum sensors titling data, exploitation support data and mensuration; signature blocks of instruction on electronics, offensive missiles, naval weapon systems, air forces, ground forces, air defense systems, strategic industries, and multisensor application and analysis.

Prerequisites: Air Force officers must have AFSC 14N3. Army and Navy officers and any civilians must have equivalent qualifications. Air Force airmen or NCOs with AFSC 1N151/71/91. Army, Navy, and Marine enlisted personnel with equivalent qualifications. Possession of a SLAR/SAR SEI (T3 or 429) does not preclude attendance at this course. All students must have a minimum of 1 year of imagery interpretation experience. Written requests for waivers of experience of any prerequisites must be submitted, with statements of circumstances no later than 60 days before class start dates, to 391 TCHTG/TTGXX, Goodfellow AFB TX 76908-5000. ECL 70.

Special Requirements: Course is conducted at the SI/SAO level. Top Secret clearance (SCI) according to AFI 31-501 (formerly AFR 205-32) and DOD 5200.2R and access to SI/SAO required. Army Reg 380-15 or NAVCIR and access to SI/SAO. AFMAN 36-2110 (formerly AFR 36-20) provisions apply to Air Force officers. All students must have clearance and be approved for SI/SAO access (according to USAFINTEL 201-1/201-4) before reporting for training. Send security clearances via SSO channels to SSO GDFLW/INS. Include student's name, grade, SSN, clearance status, course number, and dates of attendance at least 10 days before class start date. Students will be turned away if clearance message is not on hand. Waivers of security clearance requirements cannot be granted and students cannot be enrolled unless requirements are met.

Admin Instructions: State in orders that variations in itinerary are authorized. Government housing and messing are not under the control of the school. Students who plan to bring families and live off base must make arrangements before arrival. Incoming students must check into respective military organization (squadron, detachment, etc.) and Base Billeting Office. Government and commercial transportation is limited. There is adequate parking on Goodfellow. Student information packages are available and will be sent on request to 315 TCHTS/TTSA, Goodfellow AFB TX 76908-5000.

Quota Control: 2 AF/DOP.

V3OZP14N4 000—Interservice Space Intelligence Operations Senior Course—PDS Code 1KX—533 TRS Peterson/4 days—Oct 96

This senior-level management course is designed for lieutenant colonels and above and civilian equivalents with newly assigned duties involving space operations or space intelligence in operational and/or staff management/planning positions. Focuses on military space resources and support to those resources by using lecture and open discussion among students and faculty. The faculty is also assisted by guest speakers from the United States Space Command (USSPACECOM), United States Army Space Command, Naval Space Command, and Air Force Space Command. Training includes a review of the fundamentals of operating in the space environment; USSPACECOM and its component commands, organizations, and missions. It also includes discussions on US and other countries' space law and policy, space systems capabilities, and intelligence collection management.

Prerequisites: This familiarization course is designed for senior-level students with little or no experience in the space operations and intelligence fields. Individuals with 1 or more years of space operations and intelligence experience will find that this course will not satisfy their training needs.

Special Requirements: A Top Secret/SI/TK clearance is mandatory to attend this course. Clearances must be passed via SSO channels to "SSO AFSPA-COM (Pass to 533 TRS/DOD)" 30 days before class start date. Military personnel will wear seasonal service uniform combination according to AFI 36-2903 or other service-equivalent regulation. Military fatigues are not appropriate for classroom wear. Civilians will wear normal office attire.

Admin Instructions: Report to 1150 Academy Park Loop, Atrium II, Suite 130, Colorado Springs CO, NLT 0745 on class start date. Class is held Tuesday through Friday, 0800-1700. Government transportation is limited.

Quota Control: 2 AF/DOP.

E3OBR15W1 000—Weather Officer—PDS Code YTR—Keesler/12 wk—Oct 96

Provides training for Air Force officers in the knowledge and skills necessary to perform the duties of Weather Officer. The scope of training includes: career development, forecasting techniques, weather support system, wartime weather support, weather station operations, automated weather distribution system (AWDS), weather radar (WSR-88D, Doppler Radar), and meteorological satellite (METSAT)

Quota Control: 2 AF/DOP.

E3OZR15W3 002—Tropical Weather Analysis and Forecasting—PDS Code FDD—DOD 5B—Keesler/3 wk 1 day/MASL D121014—Oct 96

Training in specialized techniques required for analysis and forecasting in the tropics. Intended primarily for Air Force personnel with assignment, or potential assignment, to duties which require forecasting for tropical areas. The course contains instruction in tropical climatology, kinematics and dynamics of the tropical atmosphere, analysis techniques, application of satellite data to analysis, and forecasting methods for tropical systems. Emphasis is placed upon lab application of analysis and forecasting techniques.

Prerequisites: AFSC 15XX or 1W0X1A. Course E3OZR15W3 012, Weather Satellite Sys & Photo Interpretation, or an equivalent is recommended. ECL 70 SA.

Quota Control: 2 AF/DOP.

E3OZP15W3 018—Combat Lightning—PDS Code XWB—Hurlburt Fld/1 wk 1 day—Oct 96

Provides training on the capabilities of a variety of tactical weather support equipment and includes instruction on communications connectivity, updated operational techniques, and hands-on training while under field conditions.

Prerequisites: Students attending this course must be qualified as an Air Force weather observer or forecaster. Course is open to officers, enlisted, and civilian personnel.

Special Requirements: Secret clearance required by start date.

Quota Control: 2 AF/DOP.

E3OZR15W3 010—Environmental Support for Electro-Optical Systems—PDS Code YT4—DOD 5B—Keesler/1 wk—Mar 94

Training in the knowledge necessary to provide environmental support to users of electro-optical precision guided munitions (PGM) and target acquisition systems (TAS). Training includes: basic physics of radiative transfer; target acquisition and tactics; principles of operation; and environmental sensitivities of, and weather support to, POMs and TASs.

Prerequisites: AFSC 15WX or 1W0X1A.

Quota Control: 2 AF/DOP.

E3OZR15W3 011—Current Weather Techniques—PDS Code Z5B—Keesler/4 wk/MASL D121013—Mar 94

Training in the knowledge of the latest meteorological and environmental developments, and of special forecasting techniques. Training includes numerical weather prediction, air-sea interaction, atmospheric physics, severe weather forecasting, atmospheric diffusion, electro-optics, and analytical and forecasting techniques.

Prerequisites: AFSC 15WX who have not been in operational forecasting positions for at least the past 2 years. AFSC 1W071/1W091 with at least 2 years after graduating from the Weather Technician Course. ECL 70 SA.

Quota Control: 2 AF/DOP.

E3OZR15W3 012—Satellite Meteorology—PDS Code 83F—DOD 420—Keesler/2 wk/MASL D121024—Oct 96

Training in knowledge and skills required to understand operation of weather satellite systems, interpret images acquired by these systems, and integrate satellite data with conventional analysis. Includes orbital geometry, infrared and visual imagery, identifying cloud forms and noncloud features, interpreting animated imagery, deriving meteorological implications from cloud patterns, and integrating satellite data with other weather information.

Prerequisites: AFSC 15WX or 1W0X1A. ECL 70 SA.

Quota Control: 2 AF/DOP.

E3OZR15W3 013—Joint Forces Oceanographic Support—PDS Code JU2—DOD 420—Keesler/3 wk 4 days—Mar 94

Provides training in meteorological and oceanographic knowledge to support worldwide, joint-service air, land and sea operations in maritime coastal, and near coastal environments. Training includes: maritime and coastal geology and topography; sea water variables; large and small scale subsurface ocean currents; sound propagation, modifiers, profiles, and patterns; wind-induced surface currents; oceanic fronts, eddies, and ice formation; ocean surface conditions to include wave, surf, and tides; effects of the maritime environmennst on the performance of communications, platforms, sensors, and weapons systems; strengths and weaknesses of environmental products and their types, uses, and acquisition methods as applied to operational decision making.

Prerequisites: AFSC 15WX or 1W0X1A. Not recommended for international students.

Quota Control: 2 AF/DOP.

E3OZR15W3 014—WSR-88D PUP Operator Manager—PDS Code W9Z—Keesler/4 wk 4 days—Oct 96

Provides training in the knowledge and skills needed to operate and interpret data originating for the WSR-88D Weather Radar System using the Principle User Processor (PUP). Includes operational theory of the WSR-88D, operation of the PUP, interpreting WSR-88D products, and operational and equipment management of the PUP.

Prerequisites: AFSC 15WX or 1W0XX.

Quota Control: 2 AF/DOPS.

E3OZR15W3 015—WSR-88D UCP Operator/Manager—PDS Code WA0—Keesler/1 wk—Oct 96

Provides training in the knowledge and skills needed to operate the WSR-88D Unit Control Position (UCP) terminal. Includes optimizing system performance, configuring the UCP, and operational and equipment management.

Prerequisites: AFSC 15WX or 1W0XX. Successful completion of course E3OZR15W3 014, WSR-88D PUP Operator/Manager.

Quota Control: 2 AF/DOP.

E3OZR15W3 023—AWDS System Manager—PDS Code 3FU—Keesler/2 wk—Oct 95

Provides training in the advanced operation and system management of the Automated Weather Distribution System (AWDS). Hands-on computer operation exercises will broaden the student's knowledge of loops, command sequences, and updating procedures. In addition to daily operations, the student will be required to configure system tables for optimum proficiency to meet varying operational needs. Course materials are oriented toward management and analysis of the AWDS. Course is designated for a level well above the basic operator knowledge.

Prerequisites: Weather forecasting experience and an extensive operational knowledge of the AWDS.

Quota Control: 2 AF/DOP.

E3OZP15W3 016—Rapid Deployment Imagery Terminal (RDIT)—PDS Code XW9—Hurlburt Fld/3 days—Oct 96

Provides training for Air Force, Navy, and Marine Corps weather personnel (or equivalent) in the knowledge and skills necessary to operate and troubleshoot the Rapid Deployment Imagery Terminal. The scope of training includes: tracking software, imagery manipulation, disassembly, assembly, and troubleshooting.

Prerequisites: Students attending this course must be qualified as an Air Force, Navy, or Marine Corps weather apprentice or

forecaster (or equivalent). Course is open to officers, enlisted and civilian personnel.

Special Requirements: Secret clearance required by start date.

Quota Control: 2 AF/DOP

E3OZP15W3 017—Transportable Automated Weather Distribution—PDS Code XWA—Hurlburt Fld/1 wk—Oct 96

Provides training for Air Force, Navy, and Marine Corps weather personnel (or equivalent) in the knowledge and skills necessary to perform the duties of a TAWDS operator. The scope of training includes: TAWDS operations.

Prerequisites: Students attending this course must be qualified as an Air Force, Navy, or Marine Corps weather apprentice or forecaster (or equivalent). Course is open to officers, enlisted, and civilian personnel.

Quota Control: 2 AF/DOP

E3OZP15W3 019—Quick Reaction Communication Terminal/Goldwing—PDS Code XWC—Hurlburt Fld/3 days—Oct 96

This course provides training for Air Force, Navy, and Marine Corps weather personnel (or equivalent) in the knowledge and skills necessary to perform the duties of a Quick Reaction Communication Terminal (QRCT)/Goldwing operator. The scope of training includes: weather support system and wartime weather support.

Prerequisites: Students attending this course must be qualified as an Air Force, Navy, or Marine Corps weather apprentice or forecaster (or equivalent). Course is open to officers, enlisted and civilian personnel'

Special Requirements: Secret clearance required by start date.

Quota Control: 2 AF/DOP

E3OZP15W3 020—Marine Mini-Rawinsonde (MARWIN) System—PDS Code XWD—Hurlburt Fld/3 days—Oct 96

Provides training for Air Force, Navy, and Marine Corps weather personnel (or equivalent) in the knowledge and skills necessary to perform the duties of a MARWIN operator. The scope of training includes: AN/UMQ-12, Marine Mini-Rawinsonde (MARWIN) System.

Prerequisites: Students attending this course must be qualified as an Air Force, Navy, or Marine Corps weather apprentice or forecaster (or equivalent). Course is open to officers, enlisted, and civilian personnel.

Quota Control: 2 AF/DOP

E3OZP15W3 021—High Frequency (HF) Network Control Workshop—PDS Code XWE—Hurlburt Fld/4 days—Oct 96

Provides training for Air Force, Navy, and Marine Corps weather personnel (or equivalent) in the knowledge and skills necessary to perform the duties of High Frequency Network planners and controllers. The scope of training includes: Developing a high frequency (HF) network.

Prerequisites: Students attending this course must be qualified as an Air Force, Navy, or Marine Corps weather apprentice or forecaster (or equivalent). Course is open to officers, enlisted, and civilian personnel.

Quota Control: 2 AF/DOP

J3OBR21A1 006—Aircraft Maintenance Officer—PDS Code Z3Z—Sheppard/12 wk/AFSC 21A1/MASL D141019—Oct 96

Provides training for Air Force officers and Air Reserve Force officers entering the aircraft maintenance officer career field without regard to background, prior skills, or training other than specified in this catalog. Course covers technical familiarization related to aircraft including support equipment, airframe principles, aircraft accessories, avionics systems, and propulsion systems; munitions; armament; Air Force publication systems; maintenance forms; maintenance organizations and functions; personnel; financial management; Air Force maintenance programs; Air Force occupational safety and mishap prevention; environmental protection; nuclear weapons familiarization; planning; status and measurement; logistics; operations; unit level maintenance; contingency operations; and applied leadership and quality management.

Prerequisites: Ability to converse fluently in the English language is essential for international students. ECL 70.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

*Fulfills a requirement for AFSC 21A1 upgrade.

J3OBR21A1 008—Aircraft Maintenance Officer (Accelerated/Air Reserve Forces)—PDS Code Z43—DOD 558—Sheppard/3 wk 4 days/AFSC 21A1*MASL D141203—Oct 96

Provides training for company grade Air Force officers (military related) and Air Reserve Force officers (ANG/AFRES) scheduled to enter the aircraft maintenance officer career field. Includes: munitions; armament; corrosion control and nondestructive inspection; Air Force publication systems; maintenance forms; maintenance organizations and functions; personnel; budgeting; Air Force maintenance programs; Air Force occupational safety and mishap prevention; environmental protection; nuclear weapons familiarization; planning; status and measurement; logistics; operations; unit level maintenance; contingency operations; and applied leadership and quality management.

Prerequisites: Military-rated Capt or ANG/AFRES 1st Lt, 2d Lt, or Capt with previous aircraft maintenance experience (5-skill level or above). This course is NOT for field grade officers. Field grade officers should attend course J3OBR21A1 009. ECL 70.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

*Fulfills a requirement for AFSC 21A1 upgrade.

J3OBR21A1 009—Aircraft Maintenance Officer (Accelerated/Air Reserve Forces-Field Grade)—PDS Code Z43—Sheppard/3 wk 4 days/AFSC 21A1*—Jan 96

Provides training for field grade Air Force officers (military rated) and Air Reserve Force officers (ANG/AFRES) scheduled to enter the aircraft maintenance officer career field. Includes munitions, armament, corrosion control/nondestructive inspection, Air Force publication systems, maintenance forms, maintenance organizations and functions, personnel, budgeting, Air Force maintenance programs, Air Force occupational safety and mishap prevention, environmental protection, nuclear

weapons familiarization, planning, status and measurement, logistics, operations, unit level maintenance, contingency operations, and applied leadership and quality management.

Prerequisites: Must be at least a Major and be military rated or qualified in a related logistics AFSC.

Quota Control: Air Force officers: AFPC/DPMAPO; all others, 2 AF/DOP.

* Fulfills a requirement for AFSC 21A1 upgrade.

J3OLR21A1 008—Aircraft Maintenance Officer (Bridge)—PDS Code Z43—Sheppard/3 wk 4 days/AFSC 21A1*—Jan 96

Provides training for company and field grade Air Force Officers and Air Reserve Force officers cross-flowing from supply, transportation, logistics plans, or missile maintenance career fields into the aircraft maintenance officer career field. Includes munitions, armament, corrosion control/nondestructive inspection, Air Force publication systems, maintenance forms, maintenance organizations and functions, personnel, budgeting, Air Force maintenance programs, Air Force occupational safety and mishap prevention, environmental protection, nuclear weapons familiarization, planning, status and measurement, logistics, operations, unit level maintenance, contingency operations, and applied leadership and quality management.

Prerequisites: Must be at least a Capt and have 4 years of experience (fully qualified) in a logistics AFSC.

Quota Control: 2 AF/DOP.

* Fulfills a requirement for AFSC 21A1 upgrade.

J3OLR21A1A 000—Nuclear Maintenance Officer—PDS Code JLS—DOD 4E—Sheppard/2 wk 3 days—Oct 95

Nuclear theory, components and effects; 11N Series Technical Orders; Air Force nuclear weapons; Permissive Action Link/Active Protection System; maintenance and inspection of a typical nuclear weapon; nuclear weapons maintenance documentation, records and reports; nuclear weapons support equipment; nuclear weapons mating procedures; DOD/DOE and Air Force nuclear weapons management; organization of a nuclear weapons maintenance complex; nuclear surety program; physical security; qualification training/certification; storage area safety management; transportation of nuclear weapons; emergency destruction procedures; Nuclear Ordnance Commodity Management (NOCM); life cycle management - nuclear specific; higher headquarters inspection criteria. Successful completion of this course will lead to the award of the “N” shred.

Prerequisites: Students selected for this training must possess AFSC 21A1 or higher.

Special Requirements: Secret clearance by class start date.

Reporting Instructions: Report to bldg 1020, room E162, no later than 0700 on class start date.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

L3OZR21A3X 001—Weapons Safety—PDS Code 35X—DOD 4E—Lackland/5 wk 4 days—Apr 96

Provides training to personnel who are assigned primary duty in weapons safety management. Includes the history, philosophy, and organization of the Air Force safety program; governing standards; hazard identification and control; support agreements; safety council meetings; weapon safety training and education; safety inspections; mishap experience data; mishap investigation and reporting; flight line munitions operations; security; missile safety requirements and hazards; weapons safety office management; weapons safety program management inspection; explosives categories; explosives safety standards; fire protection; electrical hazards protection; storage of munitions; storage compatibility of munitions; transportation of munitions; licensing of munitions locations; inspection of munitions storage and use; quantity distance concept; quantity distance applications; contingency planning; nuclear surety program management; nuclear certification program, tamper detection program; personnel reliability program; weapons system safety rules and aerospace safety automation program (ASAP).

Prerequisites: Must be assigned weapons safety management duties. Munitions experience is desirable. Prerequisite will not be waived without MAJCOM functional manager and AETC training manager approval. Approval must be indicated on student orders.

Special Requirements: All uniform combinations are authorized. Work utility uniform is required.

Quota Control: 2 AF/DOP.

L3OLR21G1 000—Logistics Plans Officer—PDS Code 78J—Lackland/4 wk/AFSC 21G1—Oct 96

Trains crossflow personnel in the duties and responsibilities of the retail logistics plans officer or civilian in an operational wing. Includes introduction to logistics, US Air Force publications, related specialities, joint logistics, OPSEC, logistics doctrine and strategic planning. Strategic planning includes introduction to joint planning, joint planning systems, Air Force planning, MEFPAK system, OPlan format. Base-level planning includes time-phased force and deployment data, base support planning, logistics planning and operations. Deployment ADPE includes ADPE systems, LOGFOR, and LOGPLAN. Programs include US Air Force war reserve materiel, support agreements. Deployment includes introduction to deployments, DCC operations, deployment training, installation guidance, schedule of events, disseminating information, and deployment exercises.

Prerequisites: Must be assigned or scheduled for immediate assignment to an Air Force operational or retail AFSC 21G1 position. Civilians must be assigned to or in training for positions at GS-9 or higher. ECL 80SR.

Quota Control: Air Force officers AFPC/DPMAPO. All others HQ 2AF/DOP.

L3OLR21L1 000—Advanced Logistics Officer Course—PDS Code 5M8—Lackland/2 wk/AFSC 21L3—Oct 96

Provides training in the knowledge and skills required to apply integrated approaches to logistics disciplines in support of warfighting, operational and training requirements. Includes integrating logistics processes at unit and command levels, acquistion and weapons system support in the wholesale and retail life cycle process, integrated logistics approaches to support operational and joint warfighting, use of the Air Reserve component in the Total Force concept.

Admin Instructions: Held in building 10900, room C-122/124 (DSN 473-8260, Fax DSN 473-5355). Begins at 0730 Mondays. Uniform required is short-sleeved blue shirt or blouse. Low-

quarter shoes are advised for female officers during field trips. A laptop computer is provided for each student's use. This course is paperless.

Prerequisites: ALOC is mandatory for field grade officers to attain full qualification in the logistician AFSC 21L3/4. Officers must be a pinned-on major or above serving in or possessing a core logistics AFSC 21XX or 64PX. Field grade offficers who require the course for award of the fully qualified logistician AFSC 21LX and majors serving in any logistics AFSC 21XX or 64PX will have priority for training. Majors with line numbers for lieutenant colonel on 31 Oct 95 and were serving in a 21XX billet were grandfathered. However, they may attend at their option.

Quota Control: HQ 2AF/DOP.

L3OLR21S1 000—Supply Operations Officer—PDS Code 442—Lackland/4 wk/AFSC 21S1—Oct 96

Provides training for officers in logistics career fields in the knowledge and skills needed to perform the duties of supply officers in the management of the SBSS process. Includes introduction to the Air Force supply system, basic fundamentals of supply, issue, and requisitioning processes, repair cycle management process/due-in from maintenance (DIFM), stockage policy, equipment management, Air Force stock fund, principles of storage and distribution, supply mission support concepts and operations, basic fundamentals of fuels, fuels flight organization, fuels operations, fuels quality control and inspection (QC&I), fuels accounting and administration, fuels support, vehicle management, support agreements, fuels environmental concerns, contingency/wartime mission support, analysis of supply support, and supply officer professional development. Heavy emphasis is placed on management responsibilities, decision-making processes, and environmental and safety concerns.

Prerequisites: Commissioned officer in the US Air Force, Air National Guard, or Air Force Reserves in the grade of Capt and above, possessing a fully qualified logistics AFSC. The officer must spend 60 days at a field level supply (orientation period) rotating through each flight of base supply before attending formal training. Officers will not attend the Supply Operations Officer (Bridge) Course, L3OBR21S1 000, without successfully completing the L6OLU21S1 000, Program Requirement Read Ahead Material, course.

Quota Control: 2 AF/DOP.

L3OQR21S1 005—Supply Operations Officer, ARF - Phase I—PDS Code XW0—Lackland/6 wk 1 day—Oct 96

This course is blocks I through VII of the L30QR23Sl 004 course. Provides training in the knowledge and skills needed to perform the duties of supply officers in the management of the Air Force Standard Base Supply System (SBSS). Includes introduction to the Air Force supply system, basic fundamentals of supply, issue, and requisitioning processes, repair cycle management process and due-in from maintenance (DIFM), stockage policy, equipment management, Air Force stock fund, principles of storage and distribution, and supply mission support concepts and operations. Heavy emphasis is placed on management responsibilities, decision-making processes, and environmental and safety concerns.

Prerequisites: Traditional Air National Guard and Air Force Reserve commissioned officers in the grade of 2d Lt and above. Must have a minimum of 6 training weekends and 15 field training duty days of SBSS experience gained by rotation through each flight of base supply.

Quota Control: 2 AF/DOP.

L3OBR21S1 006—Supply Operations Officer, ARF - Phase 2—PDS Code XW1—Lackland/6 wk 1 day/AFSC 21S1—Oct 96

This course is Blocks VIII through XIII of the L3OQR23Sl 004 course. Provides training in the knowledge and skills needed to perform the duties of supply officers in the management of the Air Force Standard Base Supply System (SBSS). Includes introduction to the basic fundamentals of fuels, fuels flight organization, fuels operations, fuels quality control and inspection (QC&I), fuels accounting and administration, fuels support, vehicle management, support agreements, fuels environmental concerns, contingency and wartime mission support, analysis of supply support, and supply officer professional development. Heavy emphasis is placed on management responsibilities, decision-making processes, and environmental and safety concerns.

Prerequisites: Successful completion of Phase I - Supply Operations Officer Course, L30QR21Sl 005. ***NOTE:*** Both courses must be completed within 24 months.

Quota Control: 2 AF/DOP.

L3OLR21S1A 000—Missile Maintenance Officer Course—PDS Code 3ZV—Vandenberg/4 wk 4 days—Oct 96

Provides students training in the skills and knowledge needed to perform the duties of a missile maintenance officer. Includes maintenance of ICBM weapon systems, ICBM organization, maintenance processes, safety, environmental, maintenance inspection and training programs, inspection and maintenance records, and other maintenance publications. Limited hands-on training is provided on representative trainers in the AFSCs 2M0X1, 2M0X2, and 2M0X3 areas.

Special Requirements: Secret clearance. Proof of security clearance required.

Reporting Instructions: Report to building 9307, room 26, 0730 PST, on the first day of training with two copies of orders.

L3OAR21S3 000—Advanced Supply Management—PDS Code X1Y—Lackland/3 wk/MASL D152023—Oct 96

Provides training for Air Force supply officers and senior enlisted personnel in the knowledge and skills needed to perform duties of a supply manager in the Air Force supply system. Includes development of supply policy and enhancements, systems management, stockage and retention policy, resource management, mission support and weapon system management, wartime/contingency planning, manpower and personnel, facilities management, fuels management, supply studies and analysis, and future directions of the Air Force supply system.

Prerequisites: MSgt through CMSgt and Captains and above with a minimum of 4 years of supply experience. Civilians, GS-7 and above or equivalent WL and WS, with a minimum of 4 years of supply experience whose duties require either management or evaluation of the Air Force supply system, and who have successfully completed CDC 2S07X. Personnel who have attended the L3OBR21S1 courses within the last 24 months are not eligible to attend. International students with ECL 80 SR are eligible to attend after meeting all of the above prerequisites.

Quota Control: 2 AF/DOP.

L3OZR21S4 001—Supply Management Business Area for Chiefs of Supply—PDS Code LAC—Lackland/1 wk—Oct 96

Provides Air Force personnel who perform Chief of Supply duties a forum to gain information and insight on the functioning of the Supply Management Business Area and share common problems and solutions with their counterparts. Subjects covered are: Air Force Supply Management Business Area concepts, relationships and responsibilities, Air Force Supply Management Business Area transactions, and management reports and listings.

Prerequisites: Any person (military or civilian) filling or projected to fill the following positions: Chief of Supply, Deputy Chief of Supply, Resource Manager, or Deputy Resource Manager.

Quota Control: 2 AF/DOP.

L3OBR23S1 007—Supply Operations Officer—PDS Code X1Z—Lackland/12 wk 2 days/AFSC 21S1/MASL D152007—Oct 96

Provides training in the knowledge and skills needed to perform the duties of supply officers in the management of the Standard Base Supply System (SBSS). Includes introduction to the Air Force supply system, basic fundamentals of supply, issue, and requisitioning processes, repair cycle management process/due-in from maintenance (DIFM), stockage policy, equipment management, Air Force stock fund, principles of storage and distribution, supply mission support concepts and operations, basic fundamentals of fuels, fuels flight organization, fuels operations, fuels quality control and inspection (QC&I), fuels accounting and administration, fuels support, vehicle management, support agreements, fuels environmental concerns, contingency/wartime mission support, analysis of supply support, and supply officer professional development. Heavy emphasis is placed on management responsibilities, decision-making processes, and environmental and safety concerns.

Prerequisites: Commissioned officer in the Air Force or full-time commissioned officer in the Air National Guard or Air Force Reserves in the grade of 2d Lt and above. Must have a minimum of 60 days/2 months at a field level supply (orientation period) rotating through each flight of base supply before attending formal training. International students must meet the prerequisites stated above and have an ECL 70 SR. ***NOTE:*** Air National Guard (ANG) and Air Force Reserve (AFR) technicians will attend this course, not the L3OQR21S1 005 and L3OBR21S1 006 courses.

Special Requirements: Appropriate utility uniform or clothing.

Quota Control: Air Force officers, HQ AFPC/DPMAPO; all others, 2 AF/DOP.

L3OBR24T1 001—Basic Transportation Officer—PDS Code 1XY—Lackland/7 wk/AFSC 24T1/MASL D153011—Oct 96

Student will be trained on major historic events of transportation; national, DoD, and Air Force transportation policies; public law; organizational structures; relationship between base functions; correlation of the responsibilities of the customer to the management of terminals, vehicle operations, and vehicle maintenance; and acquisitions and budgeting processes. In addition, the student will work with manpower documents and transportation career progressions, will be able to use publications, participate in classroom mobility exercises, review latest transportation current events, define hazardous communications, and will be able to define environmental compliance and apply OPSEC to how it relates to the transportation officer.

Prerequisites: Must have 60 to 90 days of field experience in one of the following four areas: aerial port, operations, traffic management, or maintenance. Course is limited to 2d Lt and above and other military personnel of comparable grades and qualifications. Civilians must be assigned to, or in training for, positions at the grade of GS-9 or above. GS-5s with 12 months of field experience in the transportation community may qualify for entry in the course. ECL 70.

Admin Instructions: Students will be enrolled in the course during this time and will complete read-ahead material subsequent to attending the course. Read-ahead material is geared to the four areas recommended for experience and students will benefit by working in these areas. Students are encouraged to contact the training manager for the course at DSN 473-3603 as soon as notification of assignment to the course is received.

Quota Control: USAF, HQ AFPC/DPMAPO; all others, 2 AF/DOP.

L3OLR24T1 000—Transportation Officer Bridge Course—PDS Code 294—Lackland/2 wk—Oct 96

Student will be trained to correlate the responsibilities, customers and process of the following flights:traffic management, vehicle operations, vehicle maintenance, air transportation operations, and responsibilities of the combat readiness and resources flight.

Prerequisites: Students must have been selected for bridging to the transportation career field by the LG community from a discipline listed as a 2XXX, logistics career area. This bridging course will fill the requirement for holding two career disciplines in the logistics commuity.

Special Instructions: Student will be assigned to the 345 Training Squadron, Lackland AFB TX for administrative purposes. Reporting instructions are located in billeting checkin.

Quota Control: USAir Force, HQ AFMPC/DPMAPO.

L3OLR25L1 003—Logistics Plans and Programs Officer—PDS Code SZU—DOD 8A—Lackland/6 wk/AFSC 25L1/MASL D151009—Apr 95

Trains personnel in the duties and responsibilities of the retail logistics plans and programs officer/civilian in an operational wing. Includes an introductory block that describes Air Force combat support doctrine, the relationship of logistics planning to other logistics disciplines, and the logistics planner's role in the acquisition/wholesale environment. A programming block addresses support agreements and war reserve materiel (WRM) management. The planning block describes joint operation and base support planning with emphasis on developing logistics inputs. The deployment block addresses aspects of deployments, to include workcenters, training, plans development, schedule of events, employment, and sustainment and redeployment. A block on the Contingency Operation/Mobility Planning and Execution System provides hands-on computer training for managing LOGMOD-B at base level.

Prerequisites: Must be assigned or scheduled for immediate assignment to an Air Force operational or retail AFSC 25LX position. Officers with AFSC 25L2 or higher are not eligible without approval or waiver. Civilians must be assigned to, or in training for, positions at grade GS-9 or higher. ECL 80SR.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

L3OQR31P1 002—Security Police Officer Ground Combat Skills—PDS Code 265—Lackland/7 wk 3 days—Oct 96

Trains security police officers and senior noncommissioned officers crosstraining into the security police career field to perform ground combat skills from a leadership perspective. Course content includes air base defense concepts and principles; air base defense mission; military operations other than war (MOOTW); air base defense communications; land navigation; indirect fire operations; individual tactical training; unit tactical training; command, control, and communications; and US weapons.

Prerequisites: Company grade officers in AFSC 31P1 and senior enlisted in AFSC 3POX1/2. Students must meet Air Force weight standards. They must also be prepared to perform vigorous physical conditioning to achieve field training objectives. Physcial training program is based on Army FM 21-20. These courses are prerequisites to attending courses L3OBR31P1 004 and L3ALR3P031 002.

Special Requirements: Must have as a minimum three sets of woodland pattern battle dress uniforms including the BDU cap, two pair of combat or tropical boots, running shoes, hygiene articles, and black leather gloves. In addition, from September through May students must have as a minimum field jacket with liner, wool inserts for leather gloves, black wool cap, and cold weather underwear. Students must be prepared to purchase approximately 40 meals-ready-to-eat (MREs) depending on dining facility availability. Students must hand-carry medical records. Non-Air Force students must have comparable uniform items. ROTC officer beginning active duty should report 1 day before class start date for processing. Losing unit must screen and identify personnel selected for training as a PRP resource according to AFI 36-2104.

Quota Control: Air Force officers AFPC/DPMAPO; all others HQ 2AF/DOP.

L3OBR31P1 003—Security Police Officer (ANG/USAFR)—PDS Code XX4—Lackland/2 wk 2 days/AFSC 31P1—Oct 96

Provides training for Air National Guard and Air Force Reserve officers in the knowledge and skills necessary to perform duties of security police officers. Scheduled to run 6 days a week, Monday through Saturday, to accommodate reserve officers during their 2 weeks of annual active duty training. Includes security police programs, secruity police related areas, flight leader duties and responsibilities, apply force, legal considerations, security operations, tactics.

Prerequisites: Student must be qualified on the M-16 rifle and handgun courses of fire as provided by AFI 36-3336, Combat Arms Training and Maintenance Program. All students must furnish proof of qualification by either AF Form 522, certification by orders, or equivalent documents.

Special Requirements: In addition to seasonal uniform requirements, students must have two pair of combat boots, at least three sets of battle dress uniforms, field jacket, and from October through April, a field jacket liner, gloves, and cold weather underwear. Physical conditioning attire is also required.

Quota Control: HQ 2 AF/DOP.

L3OBR31P1 004—Security Police Officer—PDS Code 397—DoD 830—Lackland/4 wk 2.5 days/MASL D173006/AFSC 3191—Oct 96

Provides training in the knowledge and skills needed to perform duties as a security police officer including security police career field, programs, related areas, element leader duties and responsibilities, legal considerations, application of force, law enforcement operations, security operations, and cardiopulmonary resuscitation.

Prerequisities: Students must complete L3OQR31P1 002 to be admitted to this course. Allied international students must be involved in their country's police operations. This course is NOT recommended for officers from non-English-speaking countries as extensive reading, writing, and verbal skills are required for course completion. Members of other DoD services are not excluded; however, emphasis of this course is on law enforcement and security responsibilities specific to Air Force installations.

Special Requirements: In addition to seasonal uniform requirements, students must have two pair of combat boots, at least three sets of battle dress uniforms, two sets of light blue short- or long-sleeved shirts with epaulets with appropriate uniform pants or skirt, and service dress uniform. Students must have physical conditioning gear appropriate for current weather, including a good pair of running shoes. Non US Air Force students must have comparable uniform items. ROTC officers beginning active duty should report 1 duty day before class start date for processing. Losing unit must screen and identify personnel selected for training as a PRP resource according to AF 36-2104.

Quota Control: Air Force officers AFPC/DPMAPO, all others HQ 2AF/DOP.

L3OAR31P4 002—Advanced Security Police Officer Symposium—PDS Code 7L1—DOD 7H—Lackland/1 wk—Jun 94

Provides training in security police programs and systems; security police activities; security police career field; and security police resource issues.

Prerequisites: Capt, maj, or civilian GS equivalent personnel working within the security police career field. Exception: Lt colonels or colonels who are newly entering the career field. This course is not recommended for members of other branches of service or officers who have not completed course L3OBR31P1 001 or L3OQR31P1 000, Security Police Officer.

Special Requirements: Seasonal uniform.

Quota Control: USAF, AFPC/DPMRS; all others, 2 AF/DOP.

L3OZR31P4 001/L4OST31P4 001—Ground Defense Command—PDS Code 54L—Lackland/2 wk 4 days/MASL D173041—Oct 96

Trains selected security police personnel who are or will be assigned to a headquarters or BDOC staff position (QFEBA or QFEBB) to command and control ground defense operations. Course content includes air base ground defense principles, tactical displays, communications, duties of BDOC staff members, positioning of forces, command and control of ABGD forces, military operations in urban terrain (MOUT), air base ground defense assets, and NBC considerations.

Prerequisites: AFSC 31P3 and 31P4 (Capt through Col) or AFSC 3P071, 3P072, and 3P090(MSgt through CMSgt) who are or will be assigned to a commander's position or headquarters/BDOC staff position to command and control ground defense group or squadron operations are eligible to attend. First sergeants, section commanders, and CATM personnel with a mobility tasking may attend the course. Any deviations from grade and AFSC must be assigned to a QFEBA or QFEBB and will need a waiver approved before class start date. Mobility Training Team (MTT): Units requesting this course as an MTT must be currently tasked with (or scheduled to be tasked with) a unit type code (UTC) of QFEBA or QFEBB (security police headquarters element). Maximum number of personnel per class is 18. Members of allied services or other DoD branches are not excluded from this course, but the emphasis of training is on defense of Air Force resources. ECL 70.

Special Requirements: BDUs or utilities are the only authorized uniform to be worn during training. Students must bring wet weather gear and note-taking materials. During the period from October through April, cold weather gear is required. Units requesting MTTs must bring the appropriate authorized uniforms to comply with seasonal requirements based on geographical location of the training site.

Admin Instructions: As a minimum, units hosting the mobile training team will need to provide operational support equipment. A list of equipment will be provided by fax or message upon receipt of an MTT request.

Quota Control: 2 AF/DOP.

J3OLP32E1D 000—Readiness Officer Phase II (AFRES)—PDS Code L88—Ft McClellan/2 wk/MASL D173062—Apr 96

Provides training for civil engineer readiness officer qualification for AFRES personnel in the areas of HAZMAT management, nuclear accident response operations, and principles of land navigation. Also provides training in peacetime and wartime response actions, effects of nuclear, biological, and chemical (NBC) warfare agents, and in the chemical defense training facility. NORAD plotting and both peacetime and wartime exercises are conducted. This course follows the J6OQP32E1D 000, Readiness Officer, Phase I - Exportable (AFRES), which is a prerequisite for attending this course.

Prerequisites: Ability to speak clearly and distinctly. Must be physically and mentally fit to perform duties in actual chemically contaminated environments, using protective garments and mask. ECL 70.

Special Requirements: Secret clearance before class start date. Military students report to class in BDUs with BDU cap. Civilian employees should have clothing suitable for field wear. Students who wear glasses are required to have spectacle inserts for the MCU-2/P mask.

Special Instructions: Females who are pregnant are not to attend this course because of the nature of the numerous hazardous chemicals and radiological materials they will be exposed to. Females who discover they are pregnant while attending the course will be returned to home unit. A subsequent medical evaluation should be accomplished upon return.

Admin Instructions: Report to the welcome center, bldg 3295, Ft McClellan AL, 1 day before class start date for assignment to quarters. Request an Air Force welcome package from the Welcome Center staff. Report to building 2281, Munsun Hall, by 0700 on class start date. Students must make reservations for quarters in advance by calling DSN 865-4338 or commercial (205) 848-4338. Transportation services on Ft McClellan are limited to commercial taxi. The cost for taxi service is $1.00 from billeting to anywhere on post, a reimbursable claim on the travel voucher. School phone number is (205) 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

J3OZP32E1D 008—Readiness Flight Officer—PDS Code 5MH—Ft McClellan/1 wk 1 day—Apr 96

Provides civil engineer officers who possess AFSC 32EXX or civilians with the knowledge necessary to perform the duties of a readiness flight officer. Training includes assessing effects of nuclear, biological, chemical and conventional (NBCC) hazards on mission operations, determining appropriate camouflage, concealment, and deception (CCD) requirements, nuclear, biological, and chemical (NBC) plotting and reporting requirements, integrating and directing NBC reconnaissance and contamination control activities, coordinating CCA/TFA activities, assessing current threat and base vulnerabilities, recommend alarm conditions, mission oriented protective postures (MOPP), installation C4 relationships, assessing effects of natural disasters and major accidents on the mission, assessing information from emergency management systems, emergency management agency and organization familiarization, policies and procedures for military support to civil authorities, major accident and natural disaster response procedures, NBC monitoring and surveys, contamination control activities, shelter management operations, SAFE HAVEN/PARKING procedures, evaluation of local alerting system, and exercise requirements and development.

Prerequisites: Secret clearance. Officers with anticipated assignment to a civil engineer readiness position. Ability to speak clearly and distinctly. Must be physically and mentally fit to perform duties in actual chemically contaminated environment, using protective garments and mask. Students must bring prescription glasses inserts for the MCU/2P protective mask (if vision requires). Must have attended a chemical warfare initial course before arrival.

Special Instructions: Females who are pregnant are not to attend this course because of the nature of the numerous hazardous chemicals and radiological materials they will be exposed to. Females who discover they are pregnant while attending the course will be returned to their home unit. A subsequent medical evaluation should be accomplished upon return.

Admin Instructions: Report to the Ft McClellan welcome center, bldg 3295, to receive assigned quarters and a welcome package 1 day before class start date. Make reservations in advance by calling (205) 848-4338 or DSN 865-4338. Report to Munson Hall, bldg 2281, at 0700 on class start date. Transportation services on Ft McClellan are limited to commercial taxi. The cost for taxi service is $1 from billeting to anywhere on post, a reimbursable claim on the travel voucher. Bring BDUs and issue cap (organizational caps authorized), and wet weather gear (if available). Civilians bring clothing suitable for field wear. School phone number is (205) 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

J4OZT32E1X 100—Bare Base Staff Orientation—PDS Code 7QN—various locations/3 days—Jun 94

Course supports Bare Base training requirements for those MAJCOMs with OPlan taskings for Southwest Asia. Provides

training for selected commanders and key staff personnel in management requirements of a Bare Base setup. Includes system concepts, system assets, responsibilities, priorities, sequence of activities, and problems for a typical Bare Base employment. Course is conducted by Mobile Training Team (MTT).

Prerequisites: Officers, superintendents, and key staff personnel with civil engineering AFSCs selected to support Bare Base taskings.

Quota Control: 2 AF/DOP.

J3OZP32E3D 007—Air Base Operability—PDS Code M4Q—Ft McClellan/2 wk/MASL D122084—Apr 96

Provides training on the ABO guidance documents, pillars, and capabilities; nuclear, biological, chemical, and conventional (NBCC) threats to air bases and personnel to include spcial operations and terrorism. Outlines roles and responsibilities of the readiness flight to integrate wing activities to ensure force survivability and mission continuation. Students participate in a detailed tabletop exercise stressing all functions and capabilities.

Prerequisites: Officers with or without prior disaster preparedness/readiness experience, fulfilling ABO duites, TSgt and above or civilian counterpart assigned with ABO responsibilities (civil engineers, EOD chiefs, exercise evaluation team chiefs, senior fire protection, etc.). ECL 80.

Special Requirements: Secret clearance before class start date.

Admin Instructions: Students report to the Welcome Center at Ft McClellan, bldg 3295, 1 day before class start date for assignment to quarters. Request an Air Force welcome package from the Welcome Center staff. Report to Munson Hall, bldg 2281, by 0700 on class start date. Students must make reservations for quarters in advance by calling DSN 865-4338 or commercial (205) 848-4338. Transportation services on Ft McClellan are limited to commercial taxi. The cost for taxi service is $1 from billeting to anywhere on post, a reimbursable claim on the travel voucher. All authorized uniform combinations are acceptable. If BDUs are worn, the BDU cap is required. School phone number is (205) 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

J4OST32E3D 000—Air Base Operability (MTT)—PDS Code XKE—various locations/1 wk—Apr 96

This mobile training team (MTT) provides training on air base operability (ABO) guidance documents, pillars, and capabilities; nuclear, biological, chemical, and conventional (NBCC) threats to air bases and personnel, to include special operations and terrorism. Outlines roles and responsibilities of the readiness flight to integrate wing activities to ensure force survivability and mission continuation. Students participate in a detailed tabletop exercise stressing all functions and capabilities.

Prerequisites: Officers with or without prior disaster preparedness/readiness experience, fulfilling ABO duties, TSgt and above, or civilian counterpart assigned with ABO responsibilities (civil engineers, EOD chiefs, exercise evaluation team chiefs, senior fire protection, etc.). ECL 80.

Special Requirements: Secret clearance before class start date.

Admin Instructions: Requests for MTTs will be made by the organization requesting training through the 366 TRS readiness training manager at DSN 736-5227, commercial (817) 676-5227. Units requesting the MTT will provide a fund cite. Readiness School phone (205) 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

E3OAR33S06 000—SCOPE EAGLE—PDS Code 4HZ—Keesler/1 wk—Oct 96

Provides senior executives in the communications and information systems and related career areas a forum to refresh themselves technically, discuss policy issues of corporate concern, and prepare to lead in a future marked by rapid technological change. Provides updates on current Air Staff policies and issues. Participants have the opportunity to broaden individual perspectives by discussing in a seminar environment problems, issues, and solutions with key leaders, managers, and peers in the career areas as well as selected industry representatives. Because the curriculum changes to reflect current issues, all colonels and GM/GS-15s should plan to attend every 2 to 3 years to maintain currency in this rapidly changing technological environment.

Prerequisites: Attendance is restricted to colonels and GM/GS-15s in the 33XX career areas or related specialties. Additionally, lieutenant colonels and GM-GS-14s in selected positions may attend.

Special Requirements: Secret clearance required by class start date. Travel arrangements should ensure individuals arrive the day before class start date.

Administrative Instructions: 333 TRS/TTCO will make all arrangements at Keesler AFB for billeting and local transportation. 333TRS/TTCO will contact participants as soon as possible after HQ USAF/SCXB provides selection list.

Selection Procedures: Open to US Air Force with selection made by USAF/SCXB on the basis of management and leadership responsibilities and availability, with an objective or representing a broad mix of command perspectives and a wide range of technical backgrounds in each class. Other services (Army, Navy, Marine Corps, etc.) colonels and civilian equivalents attend on a space available basis and are funded through their respective services. Waiver of prerequisites rests with USAF/SCXB. Air Force Reserve and Air National Guard request slots through the Air Reserve Personnel Center and Air National Readiness Center and are responsible for own funding.

Quota Control: USAF/SCXB.

E3OBR33S1 003—Communications-Computer Systems Officer—PDS Code WEZ—Keesler/19 wk 1 day/AFSC 33S1—Apr 95

Provides training for basic skills and knowledge necessary to perform as a communications-computer systems officer (AFSC 33S1). Includes an 11-week, 33SX, common phase core course, E3OBR33S0 001, communications-computer user requirements, acquisition management, plans and program flight management, resource management systems, life cycle management, communications-computer systems support flight management and data/voice systems management, and readiness and deployment actions.

Special Requirements: Secret clearance by class start date.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OBR33S1 004—Communications-Computer Systems Officer—PDS Code WF0—Keesler/1 wk 1 day/AFSC 33S1/MASL D155047—Jan 96

Provides training for basic skills and knowledge necessary to perform as a communications-computer systems officer (AFSC 33S1). Includes a 10-week, 33SX, common phase core course, E3OBR33S0 001, communications-computer user requirements, acquisition management, plans and program flight management, resource management systems, life cycle management, communications-computer systems support flight management and data/voice systems management, and readiness and deployment actions. This course omits 1 week of classified training in the common phase core course.

Prerequisites: ECL 80 SR.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OBR33S1 005—Communications-Computer Systems Officer Systems and Support Management (NAD)—PDS Code WF1—Keesler/2 wk/AFSC 4941—Jan 96

Introduces the new nonactive duty communications-computer systems officer to specific duties and responsibilities. The focus of this course is supporting our wartime mission. Through lecture and performance-oriented evaluations, topics ranging from requirements processing to developing exercise plans are covered in detail. Management of work centers, operations, and coordination with outside agencies is discussed. Finally, current issues affecting the reserve components are analyzed and debated.

Prerequisites: Course E3OQR33S1 002 and ECI special courses SC 3302 and SC 3303 or equivalent. SC 3028 may be taken until the new ECI courses become available.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OLR33S1 000—Communications-Computer Systems Officer—PDS Code WF5—Keesler/8 wk 3 days/AFSC 33S1—Jan 96

Provides lateral training for basic skills and knowledge necessary to perform as a communications-computer systems officer (AFSC 33S1). Includes communications-computer user requirements, acquisition management, plans and program flight management, resource management systems, life cycle management, communications-computer systems support flight management and data/voice systems management, and readiness and deployment actions.

Prerequisites: Should have completed the common phase core course associated with courses E3OBR33S1C 005, E3OBR33S1A 000, or E3OBR33S1B 000.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OBR33S1A 000—Communications-Computer Systems Electrical Engineer Officer—PDS Code WES—Keesler/17 wk 3 days/AFSC 33S1A—Apr 95

Provides training for basic skills and knowledge necessary to perform as a communications-computer systems engineer officer (AFSC 33S1A). Training includes an 11-week, 33SX, common phase core course, E3OQR33S0 001, engineering organization and publications, prediction and analysis, link engineering and site survey, network design and implementation, and project engineering and acceptance.

Special Requirements: Secret clearance required by class start date.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OBR33S1A 001—Communications-Computer Systems Electrical Engineer Officer (SATP)—PDS Code WEV—Keesler/16 wk 3 days/AFSC 33S1A/MASL D155049—Jan 96

Provides training for basic skills and knowledge necessary to perform as a communications-computer systems electrical engineer officer (AFSC 33S1A). Training includes a 10-week, 33SX, common phase core course, E3OQR33S0 001, engineering organization and publications, prediction and analysis, link engineering and acceptaince. This course omits 1 week of classified training in the common-phase core course.

Prerequisites: Students must possess a degree. A degree or specialization in electrical engineering or computer engineering is highly recommended. ECL 80 SR.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OLR33S1A 000—Communications-Computer Systems Electrical Engineer Officer—PDS Code WF3—Keesler/7 wk/AFSC 33S1A—Jan 96

Provides lateral training for basic skills and knowledge to perform as a communications-computer systems electrical engineer officer (AFSC 33S1A). Includes engineering organizations and publications, prediction and analysis, link engineering and site survey, network design and implementation, and project engineering and acceptance.

Prerequisites: Students attending this course should have completed the common phase core course associated with courses E3OBR33S1C 005, E3OBR33S1B 000, or E3OBR33S1 003.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OBR33S1B 000—Communications-Computer Systems Software Engineer Officer—PDS Code WEX—Keesler/18 wk 3 days/AFSC 33S1B—Apr 95

Provides training for basic skills and knowledge necessary to perform as a communications-computer systems software engineer officer (AFSC 33S1B). Includes an 11-week, 33SX, common phase core course, E3OQR33S0 001, engineering, life cycle, configuration and program management, software analysis and design, software engineering organizations' responsibilities and functions, software engineering publications, prediction, analysis, and feasibility problems, software evaluation, acquisition strategy, installation, acceptance, and commissioning.

Special Requirements: Secret clearance required by class start date.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OLR33S1B 000—Communications-Computer Systems Software Engineer Officer—PDS Code WF4—Keesler/8 wk/AFSC 33S1B—Jan 96

Provides lateral training for basic skills and knowledge necessary to perform as a communications-computer systems software engineer officer (AFSC 33S1B). Includes engineering, life cycle, configuration, and program management, software analysis and design, software engineering organizations' responsibilities and functions, software engineering publications, prediction, analysis, and feasibility problems, software evaluation, acquisitions strategy, installation, acceptance, and commissioning.

Prerequisites: Students attending this course should have completed the common phase core course associated with course E3OBR33S1C 005, E3OBR33S1A 000, or E3OBR33S1 003.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OBR33S1C 005—Communications-Computer Systems Programming and Analysis Officer—PDS Code WEN—Keesler/18 wk 3 days/AFSC 33S1C—Jan 96

Provides training for basic skills and knowledge necessary to perform as a communications-computer systems programming and analysis officer (AFSC 33S1C). Includes an 11-week, 33SX common phase core course, E3OQR33S0 001, life cycle and configuration management, requirements analysis, software design, coding using the Ada programming language, software documentation, software testing and performance measurement, reviews, and the software maintenance and change control process.

Special Requirements: Secret clearance required by class start date.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OBR33S1C 006—Communications-Computer Systems Programming and Analysis Officer (SATP)—PDS Code WER—Keesler/17 wk 3 days/AFSC 33S1C/MASL D155046—Jan 96

Provides training for basic skills and knowledge necessary to perform as a communications-computer systems Programming and analysis officer (AFSC 33S1C). Includes a 10-week, 33SX, common phase core course, E3OQR33S0 001, life cycle and configuration management, requirements analysis, software design, coding using the Ada programming language, software documentation, software testing and performance measurement, reviews, and the software maintenance and change control process. This course omits 1 week of classified training in the common-phase core course.

Prerequisites: Degree is required. Degree or specialization in computer science, data processing, or information science is mandatory. ECL 80 SR.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OLR33S1C 003—Communications-Computer Systems Programming and Analysis Officer—PDS Code WF2—Keesler/8 wk/AFSC 33S1C—Jan 96

Provides lateral training for basic skills and knowledge necessary to perform as a Communications-Computer Systems Programming and Analysis Officer (AFSC 33S1C). Includes life cycle and configuration management, requirements analysis, software design, coding using the Ada programming language, software documentation, software testing, and performance measurement, reviews, and the software management and change control process.

Prerequisites: Students attending this course should have completed the common phase core course associated with courses E3OBR33S1A 000, E3OBR33S1B 000, or E3OBR33S1 003.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

L3OZR33S3A 000/L4OST33S3A 000—TEMPEST Fundamentals—PDS Code 7SE—Lackland/1 wk/MASL D139005—Dec 93

DOD interagency course for personnel whose duties require a general knowledge of TEMPEST-related functions and the ability to locate specific guidance in TEMPEST documents. Provides training in the tasks and knowledge required for entry-level positions in the TEMPEST community. Training areas include TEMPEST phenomenon, National TEMPEST Program, TEMPEST testing, facility zoning, TEMPEST design terminology, TEMPEST countermeasure assessments, information classification, and national TEMPEST publications.

Prerequisites: Student must be assigned or scheduled to be assigned to duties requiring knowledge of TEMPEST-related activities and information. ECL 80.

Special Requirements: Must be a US citizen and have a Secret clearance.

Admin Instructions: The entry "US Citizen" is required on student orders. Forward clearance information to 342 TTS/TTOTS, 1220 Truemper St, Suite 1, Lackland AFB TX 78236-5546.

Quota Control: 2 AF/DOP.

L3OZR33S3A 001/L4OST33S3A 001—TEMPEST Criteria for System and Facility Design—PDS Code 7SH—Lackland/2 wk/MASL D174001—Oct 95

Provides training for system and facility designers on the use of TEMPEST documents directly related to their job. Material includes physical security measures as applied to TEMPEST, assessment of shielded enclosures and facilities, and how TEMPEST factors influence designing a system or facility. The TEMPEST environment, criteria for material and equipment selection, and distribution systems will be taught. Requirements for grounding, protective distributive systems (PDS), utility systems, tactical environments, and sensitive compartmented information (SCI) facilities are included as a major part of this training.

Prerequisites: Completion of the L3OZR33S3A 000, TEMPEST Fundamentals Course, or equivalent knowledge is required. Must have working knowledge of basic algebra, scientific and engineering notation, and logarithms. Experience in designing or engineering electronic communications and secure systems and an engineering AFSC or civilian equivalent is desirable. ECL 70.

Special Requirements: Must be a US citizen with a Secret clearance.

Admin Instructions: The entry "US Citizen" is required on student orders. Forward clearance information to 342 TTS/TTOTS, 1220 Truemper St, Suite 1, Lackland AFB TX 78236-5546.

Quota Control: 2 AF/DOP.

L3OZR33S3A 005/L4OST33S3A 005—Air Force TEMPEST Officer Course—PDS Code 8KY—Lackland/2 wk—Dec 93

Designed for personnel whose duties require specific knowledge of TEMPEST and related functions, knowledge of specific reference documents. Provides training in specific tasks and knowledge required for Air Force TEMPEST officers. Includes common TEMPEST problems, classification guidelines, physical security guidelines, inspections, grounding, special requirements, countermeasures assessment, responsibilities within the TEMPEST program, and TEMPEST documents/publications.

Prerequisites: Students must be assigned or scheduled to be assigned Air Force TEMPEST officer duties, or assigned equivalent duties where specific knowledge of TEMPEST related activity or information is needed.

Special Requirements: Students must be US citizens and possess a Secret clearance.

Admin Instructions: The entry "US Citizen" is required on student orders. Forward clearance information to 342 TTS/TTOTS, 1220 Truemper St., Ste 1, Lackland AFB TX 78236-5546.

Quota Control: 2 AF/DOP.

L3OZR33S3A 009—Advanced TEMPEST Testing—PDS Code 80Z—Lackland/3 wk—Dec 93

DOD interagency course for engineers, technicians, and analysts where advanced skills are needed to perform TEMPEST testing. Training includes communication theory, intermediate TEMPEST analysis, developing TEMPEST test plans, TEMPEST test documentation, TEMPEST test execution, and rationale for limits and requirements. Students will also receive training in unique field phenomena.

Prerequisites: Completion of the L3OZR33S3A 003/010 course is required. Further, at least 1 year of TEMPEST testing or analysis experience is mandatory. Possession of engineering AFSCs 62E3E or 33S3A, electronic technician AFSCs 2EXXX, equivalent MOSs or DOD/civilian specialty identifier is mandatory. Further, student must have a working knowledge of algebra, logarithms, and scientific and engineering notations. Failure to meet these prerequisites will be used as a basis to refuse admission and return students to their home station.

Special Requirements: Must be a US citizen and have a Secret clearance.

Admin Instructions: The entry "US citizen" is required on student orders. Forward clearance information to 342 TTS/TTOTS, 1220 Truemper St, Suite 1, Lackland AFB TX 78236-5546.

Quota Control: 2 AF/DOP.

L3OZR33S3A 010—TEMPEST Testing Basics—PDS Code LVH—Lackland/4 wk/MASL D139010—Dec 93

DOD interagency course for engineers or technicians in the basic skills needed to perform TEMPEST testing. Training includes analysis fundamentals, TEMPEST testing documentation, detection system components, NSTISSAM TEMPEST/1-91 testing requirements and test procedures, and NSTISSAM TEMPEST/2-91 crosstalk procedures. Also included are equipment and facility zone testing procedures and shielded enclosure testing procedures.

Prerequisites: Completion of course L3OZR33S3A 000 (TEMPEST Fundamentals) or equivalent knowledge. Student must be assigned or scheduled to be assigned duties involving TEMPEST testing. A working knowledge of electronic test equipment (oscilloscopes, signal and RF generators, etc.). Possession of engineering AFSCs 62E3E or 33S3A, electronic technician AFSCs 2EXXX, equivalent MOSs, or equivalent DOD/civilian specialty identifier. Further, student must have a working knowledge of algebra, logarithms, and scientific and engineering notations. Failure to meet these prerequisites will be used as a basis to refuse admission and return students to their home stations. ECL 80.

Special Requirements: Student must be a US citizen and possess a Secret clearance.

Admin Instructions: The entry "US Citizen" is required on student orders. Forward clearance information to 342 TTS/TTOTS, 1220 Truemper St, Suite 1, Lackland AFB TX 78236-5546.

Quota Control: 2 AF/DOP.

L3OZR33S3A 011—NACSEM 5112 Test Procedures—PDS Code LVJ—Lackland/3 wk/MASL D139009—Oct 96

DOD interagency course for TEMPEST testing personnel who are or will be performing NONSTOP/HIJACK testing. The course will train students in the operation of the Honeywell and HLDS test detection systems and in the fundamental requirements of NONSTOP/HIJACK testing.

Prerequisites: Completion of the L3OZR33S3A 010 course is required. Further, at least 1 year of TEMPEST testing or analysis experience. Possession of engineering AFSCs 62E3E or 33S3A, electronic technician AFSCs 2EXXX, equivalent MOSs or DOD/civilian specialty identifier. Further, student must have a working knowledge of algebra, logarithms, and scientific and engineering notations. Failure to meet these prerequisites will be used as a basis to refuse admission and return students to their home station. ECL 80.

Special Requirements: Must be a US citizen and have a Secret clearance.

Admin Instructions: The entry "US Citizen" is required on student orders. Forward clearance information to 342 TTS/TTOTS, 1220 Truemper St, Suite 1, Lackland AFB TX 78236-5546.

Quota Control: 2 AF/DOP.

L4OST33S3A 003—TEMPEST Fundamentals (Broadcast)—PDS Code N3K—Lackland (see note)/1 wk—Dec 93

DOD interagency course for personnel whose duties require a general knowledge of TEMPEST-related functions and the ability to locate specific guidance in TEMPEST documents. Provides training in the tasks and knowledge required for entry-level positions in the TEMPEST community. Training areas include TEMPEST phenomenon, National TEMPEST Program, TEMPEST testing, facility zoning, TEMPEST design terminology, TEMPEST countermeasure assessments, information classification, and national TEMPEST publications.

NOTE: Course is conducted via satellite transmission of audio and video signal at various, but limited, locations. Specific arrangements for presentation must be made with 394 TCHTG, Lackland AFB.

Prerequisites: Student must be assigned or scheduled to be assigned to duties requiring knowledge of TEMPEST-related activities and information.

Special Requirements: Student must be a US citizen and possess a Secret clearance.

Admin Instructions: Forward clearance information, including statement indicating US citizenship, to TTGCS, 3270 Technical Training Group, Lackland AFB TX.

Quota Control: 2 AF/DOP.

E3OAP33S3C 004—Oracle—PDS Code P1N—Det 1, 333 TRS, Sterling VA/1 wk—Apr 95

Provides DoD personnel with a working knowledge of Oracle data base management software. Includes data base development, data retrieval, and report generation using Oracle. The course is generic. Upon completion of the course, the student should be able to use Oracle on any computer containing the Oracle software. Course was designed and developed for the GCCS/WWMCCS community.

Quota Control: 2 AF/DOP.

E3OAR33S3C 001—Introductory Ada for Programmers—PDS Code XDU—Keesler/1 wk/MASL D155067—Apr 96

Intended for experienced programmers with no Ada background. It focuses on the features of Ada which are comparable to those of other high-order programming languages: types and objects, arrays and records, and subprograms. Fundamental programming concepts are NOT covered; it is assumed students have recent programming experience in a high-order programming language. Recent graduates of course E3ABR3C032 001, Apprentice Communications Computer Systems Programming Specialist, should NOT take this course; they should proceed to E3OAR33S3C 002 or E4OST33S3C 002, Advanced Ada for Programmers. Approximately 50% of this course is hands-on programming. A mobile version of this course is taught in course E4OST33S3C 001.

Prerequisites: Should be experienced programmer with recent (within 6 months) work in a high-order programming language. Each student must have a computer workstation with a validated Ada compiler and printing capabilities. ECL 70 SA.

Quota Control: 2 AF/DOP.

E3OAR33S3C 002—Advanced Ada for Programmers—PDS Code XDT—Keesler/2 wk 4 days/MASL D155045—Apr 96

Intended for experienced programmers with some Ada background. Topics include packages, exceptions, private types, derived types, access types, generics, input and output, tasks, and low-level features. This course is programming intensive and culminates in a comprehensive team programming project. Course E4OST33S3C 002 is a mobile version of this course.

Prerequisites: Must be a graduate of course E3OAR33S3C 001 or E4OST33S3C 001, Introductory Ada for Programmers, or a recent graduate of course E3ABR3C032 001, Apprentice Communications Computer Systems Programming Specialist. ECL 70 SA.

Quota Control: 2 AF/DOP.

E3OAR33S3C 015—Oracle—PDS Code P1N—Keesler/1 wk—Apr 95

Provides DoD personnel with a working knowledge of Oracle data base management software. Includes data base development, data retrieval, and report generation using Oracle. The course is generic. Upon completion of the course, the student should be able to use Oracle on any computer containing the Oracle software. Course was designed and developed for the GCCS/WWMCCS community.

Quota Control: 2 AF/DOP.

E4OST33S3C 000—Fundamentals of Ada—PDS Code XDW—location: user sites/1 wk—Apr 96

Provides training in the knowledge and skills needed to perform basic Ada programming. The course is taught at an introductory level appropriate for nonprogrammers. Training includes a high-level overview of the Ada language with hands-on programming assignments on each major topic. The intent is to familiarize students with Ada features and terminology. An "in-residence" version of this course is taught in course E3OAR33S3C 000.

Prerequisites: A knowledge of programming concepts and a high-order language is beneficial. ECL 70 SA.

Quota Control: 2 AF/DOP.

E4OST33S3C 001—Introductory Ada for Programmers—PDS Code XDX—location: user sites/1 wk—Apr 96

Intended for experienced programmers with no Ada background. It focuses on the features of Ada which are comparable to those of other high-order programming languages: types and objects, arrays and records, and subprograms. Fundamental programming concepts are NOT covered; it is assumed students have recent programming experience in a high-order programming language. Recent graduates of course E3ABR3C0S2 001 should NOT take this course; they should proceed to E3OAR33S3C 002 or E4OST33S3C 002, Advanced Ada for Programmers. Approximately 50% of this course is hands-on programming. A resident version of this course is taught in course E3OAR33S3C 001.

Prerequisites: Students should be experienced programmers with recent work (within 6 months) in a high-order programming language. Each student must have a computer workstation with a validated Ada compiler and printing capabilities. ECL 70 SA.

Quota Control: 2 AF/DOP.

E4OST33S3C 002—Advanced Ada for Programmers—PDS Code XDT—location: user sites/2 wk 4 days—Apr 96

Intended for experienced programmers with some Ada background. Topics covered include packages, exceptions, private types, derived types, access types, generics, input and output, tasks, and low-level features. This course is programming intensive and culminates in a comprehensive team programming project. A resident version of this course is taught in course E3OAR33S3C 002.

Prerequisites: Must be a graduate of course E3OAR33S3C 001 or E4OST33S3C 001, Introductory Ada for Programmers, or a graduate of course E3ABR3C032 001, Apprentice Communications-Computer Systems Programming Specialist. Each student must have a computer workstation with a validated Ada compiler and printing capabilities. ECL 70 SA.

Quota Control: 2 AF/DOP.

E4OST33S3C 014—Structured Software Development (SSD)—PDS Code U40—location: host sites/1 wk 3 days—Apr 96

Trains experienced personnel (programmers, software analysts, functional analysts, software engineers, and software quality specialists) in structured software development concepts. Training includes the project life cycle, implementing analysis and design procedures, and structured methods for effective documentation and maintenance. Emphasis is on software engineering, software quality, structured walk-throughs, and software development teams. Program Design Language (PDL) is used rather than a specific language. Approximately 50% of the course includes hands-on group exercises. ECL 70 SA.

Quota Control: 2 AF/DOP.

E4OST33S3C 043—Software Quality Assurance (SQA)—PDS Code 1AP—location: host sites/1 wk/MASL D149306—Apr 96

Familiarizes students with the concepts and practices of building quality into software, evaluating the process involved, and testing the resulting software for conformance to needs, requirements, design, and standards. Software quality concepts, issues, ideas, and practices are presented generically so they will be useful to anyone involved in development, maintenance, writing requirements, or initiating software quality functions. Principles are compatible with MIL-STD-498 and DOD-STD-2168. Course is especially suited, but not limited, to students who have responsibilities and influence in setting or enforcing software quality standards or policies. ECL 70 SA.

Quota Control: 2 AF/DOP.

E4OST33S3C 069—AMC C2 IPS Operator—PDS Code N4Y—host sites/1 wk—Dec 93

Provides training in the knowledge and skills needed for Air Mobility Command (AMC) and Control Information Processing System (C2 IPS) functional users to operate the AMC C2 IPS software and system. Includes system description, system initialization, mobilization of deployable nodes, and operation of IPS positions.

Quota Control: 2 AF/DOP.

E4OST33S3C 083—Object-Oriented Analysis and Design (OOAD)—PDS Code XB4—location: host sites/1 wk 3 days—Apr 96

Trains experienced personnel (programmers, software analysts, functional analysts, software engineers, and software quality specialists) in object-oriented software development concepts and methodologies. Includes object-oriented benefits, basic concepts, analysis, design, goals of software engineering, and management issues. Approximately 50% of the course includes hands-on analysis and design work.

Quota Control: 2 AF/DOP.

E4OZT33S3C 020—Computer Networking—PDS Code N4P—location: host sites/1 wk—Apr 95

Provides students with information about computer network terms and theories in the UNIX environment. Discussion on local area networks (LAN), wide area networks (WAN), and metropolitan area networks (MAN). Instruction is focused on LAN topologies, protocol architectures, and network hardware functions. Students will be given practical hands-on experience building cables, installing client software, and configuring the network server. Students will build the LAN from ground up and learn troubleshooting techniques.

Prerequisites: DOS/UNIX user.

Quota Control: 2 AF/DOP.

E4OZT33S3C 021—Oracle Database Concepts and SQL—PDS Code 4NS—location: host sites/1 wk—Apr 95

Provides skills and knowledge needed to use Oracle data base and standard query language (SQL). Includes the general concepts important to a relational data base management system environment. The UNIX operation system will be the operational platform in a client/server environment. Students will be introduced to the theory of data base operation, basic features, and SQL in the interactive environment. Students also perform various functions of accessing, maintaining, and creating various data base objects such as tables, schemas, and indexes.

Quota Control: 2 AF/DOP.

E4OZT33S3C 022—UNIX System Administration—PDS Code NCD—location: host sites/2 wk—Apr 95

An introductory course to system administration. Students will learn duties and responsibilities of a system administrator. Ninety percent of the course is hands-on training to include starting and shutting down the system, setting up print services, network services, and client systems. Includes basic UNIX commands, administering file systems, establishing user accounts and groups, system backups, system crashes, and recovery procedures.

Prerequisites: DOS or UNIX user.

Quota Control: 2 AF/DOP.

E3OZR33S3Z 001—Joint Spectrum Management—PDS Code L98—Keesler/11 wk 4 days—Apr 95

Provides spectrum management education for DoD technicians, engineers, managers, and other individuals who require entry level training on national, international, and DoD spectrum management regulations and procedures. The curriculum provides maximum exposure to techniques common to all DoD spectrum personnel. Emphasis is placed on those national and international regulations and standards that have particular impact on the global mission of U.S. military forces. Also covers various communications systems concepts with emphasis on operational employment.

Prerequisites: 2d Lt through Maj with AFSC 33SX. College algebra is desirable.

Special Requirements: Secret/NAC clearance by class start date.

Quota Control: 2 AF/DOP.

E3OAR33S4 002—Advanced Communications Officer Training (ACOT)—PDS Code W0T—Keesler/10 wk—Oct 96

Provides mid-career training for the communications officer (AFSC 33S4). Presents current and emerging Command, Control, Communications, Computers and Intelligence (C4I) programs, initiatives, and technologies impacting the DoD total force concept C4I warrior in both a fixed and deployed environment. Prepares officers to be more customer-oriented managers by arming them with the latest information and trends in the C4I arena. Includes, but is not limited to, technology leveling, hands-on experience, organizational management, systems and technology awareness, C4I life cycle management, and joint C4I operation. Students will prepare and present oral and written technical research projects throughout the course. Seminars with senior DoD and industry C4I representatives will be used to enhance all areas of instruction.

Prerequisites: Officers in grades Capt through Lt Col or civilian equivalent with at least 4 years of field experience in C4I specialties. Officer attendees must have at least 8 and no more than 13 years of commissioned service. International officers who meet the prerequisites outlined above may attend this course. All personnel attending this course should have an indepth working knowledge of computers and computer technology.

Quota Control: 2 AF/DOP.

L3OZR34M3 001—Services Activity Manager Course—PDS Code XQ2—Lackland/3 wk—Oct 95

Provides training for services managers at the activity level. Managers are trained in all services management core knowledge and skills needed to perform their jobs to include**:** safety, readiness, management information systems, program development, strategic capital improvement program, corporate standards, customer service, internal control, financial management, contracts, administrative awareness, personnel administration, and staff development.

Prerequisites: Individuals must be currently assigned as a services activity manager or assigned upon completion of the course. Priority is given to activity managers with no formal training and those who are conditionally trained.

Special Requirements: Students should report to the base lodging office for quarters assignment. At this time they will receive a base map of Lackland AFB as well as reporting instructions for the location of the course. This course is taught on main base Lackland from 0730 to 1630, Monday through Friday. Students attending the course should bring a small hand-held calculator and a recent copy of their marketing plan, nonappropriated and appropriated requirements budgets, and most current operating statement. The uniform of the day is short or long sleeve blue shirt or blouse, blue pants or skirt, tie or tab, and ribbons. Civilians attending should wear business attire which projects a professional image. Students are also required to bring two copies of their orders on the first day of class.

Quota Control: 2 AF/DOP.

J3OZR36P0 000/J4OZT36P0 000—Managing the Instructional System Development Process—PDS Code X3N—DOD 570—Sheppard/3 days/MASL D166040—Oct 95

Trains active duty Air Force, USAFR, ANG, and other DoD personnel in all AFSCs in the knowledge and skills needed to manage the ISD process applied to a development effort. The target population for this course is all persons, regardless of grade or title (senior manager to the implementation level manager), who are involved at some level of managing a development effort using the ISD process. The course uses interactive video software and is presented in a seminar format with crossfeed discussions between different management levels about their roles in managing a training development project.

Prerequisites: Participants should have a discussion level knowledge of the ISD process. A refresher informal lecture is provided to reacquaint people with the process under the new ISD model. ECL 70.

Quota Control: 2 AF/DOP.

E3OBR36P1 003—Basic Personnel Officer Course—PDS Code XDP—Keesler/5 wk/AFSC 36P1/MASL D161002—Mar 94

Trains Air Force personnel officers who possess AFSC 36PX in the skills and knowledge necessary to perform as personnel officers, with emphasis upon performance at base level. Includes organizational structure and function, administration of personnel programs and policies, education and training, social actions, civilian employee management, quality air force, coping skills, managing personnel resources, retirements, separations, assignments, manning actions, Air Force military classification policy, Air Force military training programs, personnel reliability program, personnel contingency support, evaluation of performance, awards and decorations, promotions and demotions, career life cycle, reenlistments, special actions, records, personal affairs programs computer management and analysis, self assessment program, in-service training, microcomputer, and personnel concept III.

Prerequisites: ECL 70.

Quota Control: Air Force officers, AFPC/DPMAPO; all others, 2 AF/DOP.

E3OBR37A1 003—Basic Information Management Officer—PDS Code Z44—DOD 7A—Keesler/3 wk 4 days/MASL D161010—Jan 96

Trains officers entering the information management utilization field in the utilization of information managers; information resource management; functional information management to include administrative communications, publishing, records, printing, plans and programs, integration and functional analysis, and postal; staff support to include command, executive support, and protocol; computer systems; and computer applications to include data base, graphics, word processing, spreadsheets, electronic mail, electronic forms, electronic messages, and disk operating systems. The last 58.5 hours of the course are self-paced.

Prerequisites: ECL 70.

Quota Control: HQ AFPC/DPMAPO for Air Force officers; 2 AF/DOP for all others.

E3OCR37A1 000—Advanced Information Management Officer—PDS Code WZ9—DOD 7A—Keesler/2 wk 2 days/MASL D163003—Jan 96

Provides advanced training for Air Force military and selected civilian personnel in the Air Force specialty 37XX or equivalent series. Intended to broaden and enhance an individual's managerial and analytical skills, focusing on relevant theories, concepts, and higher level information management skills. Course topics include utilization of information managers; information resource management including legal frameworks, defense information infrastructure, and acquisition management; functional information management; and integration and functional analysis including functional architectures, applying business process reengineering methodology, information architectures, data administration, electronic data interchange, information systems, and postal; computer systems; and electronic mail.

Prerequisites: Officers (0-3 and 0-4) or civilians (GS-11 through GS-12) with between 9 and 12 years of experience in the information management career field or officers and civilians (GS-7 through GS-11) selected to base information manager positions. ECL 70.

Quota Control: 2 AF/DOP.

E3OBR38M1 002—Basic Manpower Management Officer—PDS Code 337—Keesler/7 wk/AFSC 38M1—Oct 96

Teaches basic Air Force management engineering tools and techniques for continuous process improvement and process engineering. Also, teaches Air Force policies and procedures on the use of manpower resources, productivity programs, and Air Force organizations. Instruction includes computer-based and statistical analysis. Entry-level officer course focuses on wing manpower office operations.

Prerequisites: Grade series for civilians (GS-11 and above, Palace Acquire). ECL 80.

Quota Control: Air Force officers, HQ AFPC/DPMAPO; all others; 2 AF/DOP.

L3OQR63A1 000—Acquisition Fundamentals—PDS Code NJC—Lackland/5 wk/MASL D152052—Oct 96

Covers the fundamentals of system acquisition from mission need statement to when the systems leave the inventory. Course includes introduction; acquisition ethics; acquisition program management; contracting; acquisition program control; acquisition engineering; acquisition logistics; manufacturing quality assurance; test and evaluation; modification acquisition; total quality management; science and technology; and acquisition policies, initiatives, and trends.

Prerequisites: Officers being assigned to AFSCs 61XX, 62XX, or 63XX. Any officer, enlisted, or DoD civilian assigned to, entering, or cross-training into a position in the acquisition field. Enlisted personnel selected to attend this course should be senior noncommissioned officers who perform acquisition duties at a level comparable to a test controller or program manager. Waivers will be considered on a case-by-case basis by 345 TRS/TTC, Lackland AFB TX 78236-5418.

Admin Instructions: Report to billeting for class reporting instructions.

Quota Control: Air Force officer accessions, HQ AFPC/DPMAPO; others, 2 AF/DOP.

L3OZR64P3 008/L4OST64P3 009—Introduction to Utilities Contracting—PDS 53J—Lackland/1 wk/MASL D151016—Dec 93

Provides an understanding of utility contract preparation, negotiation, and administration; utility sales agreements; and utility rate litigation preparation and procedures.

Prerequisites: TSgt and above; 1st Lt and above; civilians GS-7 and above whose current duties directly relate to utilities contracting and administration. Personnel assigned to civil engineering, legal, and contracting at the same installation should attend the course together, if possible. Individuals who attended course G3OZR6534 002, Utility Contract Negotiation and Administration, PDS Code LTD (7 days' length) before 16 April 1984 are ineligible to attend this course. (Course content is the same; only the course title and length were changed.) ECL 70 SA.

Special Requirements: Students should bring a copy of a current utility rate schedule and current invoice to the course. Students must bring a hand-held calculator that performs basic mathematical functions.

Quota Control: 2 AF/DOP.

L3OZR64P3 011—Quality Assurance Representative for Training Systems—PDS Code V6W—Lackland/1 wk 3 days—Oct 96

Service contract oriented training for Air Force personnel in job series GS-1910 or AFSC 64P3. Provides the knowledge and skills needed to perform the specific quality assurance responsibilities relevant to contract management of training systems. Includes understanding of contract quality requirements, identification and interpretation of various inspection systems and preparation of surveillance plans to oversee contractors' quality assurance programs. Includes contract quality assurance, quality evaluation, quality assurance planning, corrective action, and configuration management. Participants should bring a copy of their specific contract to class for contract review exercises.

Prerequisites: Assigned to a QAR position or have a need for the training because of a future assignment to such a position. (This is NOT designed for training quality assurance evaluators or program coordinators.)

Quota Control: 2 AF/DOP.

L3OZR64P3 016—Contract Pricing—PDS Code 3JW—Lackland/3 days—Oct 96

Allows students to develop price objectives for custodial services contract, option year price adjustment, architect-engineering services contract, and a construction contract. Students will also write price negotiation memorandum.

Prerequisites: Successful completion of L3OZR64P3 018, Operational Level Contract Pricing Course, or CON 104 through the Defense Acquisition University. GS-5 or above, 1LT or above, SrA or above. Two years contracting experience desired. Knowledge of contracting fundamentals equivalent to CON 101 is assumed. Handheld calculator required. Laptop computer (with spreadsheet) optional.

Quota Control: HQ 2 AF/DOP.

L4OST64P3 017—Base Level Contract Pricing—PDS Code 5IM—various locations/3 days—Oct 96

Allows students to develop price objectives for custodial services contract, option year price adjustment, architect-engineering services contract, and a construction contract. Students will also write price negotiation memorandum.

Prerequisites: Successful completion of L4OST64P3 015, Operational Level Contract Pricing Course, or CON 104 through the Defense Acquisition University. GS-5 or above, 1LT or above, SrA or above. Two years contracting experience desired. Knowledge of contracting fundamentals equivalent to CON 101 is assumed. Handheld calculator required. Laptop computer (with spreadsheet) optional.

Quota Control: HQ 2 AF/DOP.

J3OBR65F1 002—Financial Management (Financial Services)—PDS Code V9D—Sheppard/6 wk/AFSC 65F1/MASL D156007—Oct 96

Trains selected Air Force personnel in the knowledge and skills necessary to perform as financial management officers. Includes organizing, managing, and coordinating activities for disbursing, collecting, and accounting for funds.

Prerequisites: Officers, 2d Lt and above; civilians, GS-7 or higher; SMSgt or CMSgt, with necessity justified by requesting MAJCOM. College degree in business-related discipline is desirable. ECL 70.

Quota Control: Air Force officers, AFPC/DPMAPO; others, 2 AF/DOP.

J3OBR65F1 003—Financial Management (Financial Analysis)—PDS Code V9C—Sheppard/10 wk/AFSC 65F1/MASL D156051—Oct 96

Provides selected personnel with the knowledge and skills needed to perform base level financial analysis duties. Includes the concepts of financial, cost, and economic analysis; the use of statistical techniques and communicative skills in support of analytical efforts; familiarization with the small computer as an analytical tool; cost and resource analysis to assist decision makers in the efficient allocation of resources; fundamentals of Air Force budgeting, Air Force financial planning system, developing of requirements, preparation of operating budgets and financial plans, Air Force financial management, and nonappropriated funds oversight. Personnel who have completed either the J3OBR6731 000 or J3OBR6741 001 course are not eligible to attend this course.

Prerequisites: Officers and civilians assigned to officer AFSC positions; SMSgt or CMSgt, with necessity justified by requesting MAJCOM. College degree is desirable. ECL 80 SR.

Quota Control: HQ AFPC/DPMAPO for Air Force officers, 2 AF/DOP for others.

J3OZR65F4 000—Financial Management Staff Officer, Air Reserve Forces—PDS Code VB0—Sheppard/2 wk—Apr 95

Trains Air Force Reserve and Air National Guard personnel in the knowledge and skills for managers in the financial management and comptroller career field. Also provides training for Palace Acquire interns in their last year of training. Instruction includes planning, programming, and budgeting systems; quantitative analysis techniques; automated accounting and interface systems; and financial management and comptroller plans and systems. Functional interrelationships are stressed. Personnel who have previously attended the professional military comptroller course are not eligible to attend this course.

Prerequisites: Officers and civilians (AFSC 65FX). Designed primarily for ANG and AFRES personnel.

Quota Control: 2 AF/DOP.

J3OAR65F4 001—Financial Management (Staff Officer)—PDS Code VA2—Sheppard/4 wk 4 days/MASL D156029—Oct 96

Trains career officers, senior NCOs, and key civilian employees for positions of greater responsibility in financial management. Input specialties include financial analysis, accounting and finance, acquisition cost analysis, and audit. Instruction includes planning, programming, and budgeting systems; quantitative analysis techniques; automated accounting and interface systems; and financial management and comptroller plans and systems. Functional interrelationships are stressed. Personnel who have previously attended the professional military comptroller course are not eligible to attend this course.

Prerequisites: Officers, captain and above, with at least 4 years of experience in financial management functions; civilians, GS-11 and above, with comparable experience; MSgt and above, AFSC 6F090 or 6F191. College degree is desirable. ECL 70.

Quota Control: Air Force officers and airmen, HQ AFPC/DPMRS; others, 2 AF/DOP.

L3OLR83R0 001—Recruiting Officer Orientation—PDS Code XQ3—Lackland/1 wk—Apr 95

Provides a general overview of the primary responsibilities of the Air Force Recruiting Service functional areas for newly assigned officers. Includes general information about the Air Force recruiting mission and organization; squadron structure, including duties of the enlisted production team; familiarization with recruiting programs; responsibilities of operations, resources management, advertising and promotion branches; and general information pertraining to reporting and investigation irregularities.

Special Requirements: Seasonal uniform with tie or tab, ribbons, appropriate devices, and clusters is required. Physical conditioning clothing and athletic shoes are highly recommended. BDUs and service dress uniforms are not required.

Quota Control: HQ AETC/DPRAR.

J5OSG12B4 000—Bomber Aircraft Nuclear Weapons—PDS Code NFG—Kirtland/4 days—Apr 95

Provides general nuclear weapon information and new weapon developments, plus intended use, weapon description, safety aspects, inflight monitor and control, and fuzing and firing of the specific weapons listed on the attached agenda. Designed for instructors and personnel directly engaged in nuclear weapons delivery training.

Special Requirements: Comply with AFCAT 36-2223 instructions. Students report to bldg 800, Kirtland AFB East, Sandia Visitor Control Center, between 0800 and 0830 on class start date for badging; proceed through gate 7. After badging, proceed to bldg 892, room 199, Kirtland AFB East, NLT 0830 on class start date. DoD clearance must be submitted to Sandia National Laboratory with info copy to HQ ACC/LGWN, NLT 30 days before class start date. Students must have at least 18 months left on current assignment (unless waived by HQ ACC/LGWN).

Quota Control: 2 AF/DOP.

E5OAX13B3 000—Command and Control Systems Course—PDS Code WZJ—DOD 4C—Quantico VA/41 wk—Apr 95

Provides professional military education at the career-level with an emphasis on command and control systems. Subjects are addressed that enable graduates to fulfill the requirements of billets on Marine Air-Ground Task Forces (MAGTF), joint, or combined staffs. Subcourses focusing on JTF organization and communications, Department of Defense structure and missions, intelligence, electronic warfare and signal intelligence, data processing and communications, strategic geography, staff planning, satellites and national communications systems, combat service support, maritime operations, naval justice, the law of the land warfare, and joint operations provide the knowledge basis on which the students proceed. Leadership issues are discussed in seminar groups throughout the academic year. Programs range from symposium research project to an English writing communications course. Guest lectures address current topics in areas of the military profession as well as in communications. An elective program for AFSC skill enhancement is offered for students in three areas: comm/data systems, intelligence, and air command and control.

Prerequisites: Officer, captain.

Special Requirements: Top Secret clearance with eligibility for sensitive compartmented information (SCI) indoctrination required before arrival.

Admin Instructions: Air Force students report to the Senior Air Force Representative, Breckinridge Hall, Bldg 2076, Marine Corps University (MCU), Marine Corps Combat Development Command (MCCDC), Quantico VA 22134-5050.

Quota Control: 2 AF/DOP.

J5OZD13B4 000—Flag Officer's Nuclear Accident Course (FONAC)—PDS Code ZRU—DOD 4J—Kirtland/2 days—Oct 95

Provides training in the problems and responsibilities involved in a nuclear weapon accident response. Includes lessons learned from past accidents; Federal, state, and local agency's responsibilities; and key issues specific to a nuclear weapons accident. Course consolidates the procedural guidance and technical information needed in preparing DoD forces to respond to a nuclear accident.

Prerequisites: Flag officer and above; GS-12 and above.

Special Requirements: Secret/RD clearance and CNWDI access. Verification of security clearance must arrive FCDNA/FCINTR, 1900 Wyoming Blvd SE, Kirtland AFB NM 87117, FAX DSN 246-9168, not later than 15 working days before class start date. Appropriate dress is BDU or utility uniform for military and casual wear for civilians.

Admin Instructions: Report to the Interservice Nuclear Weapons School, bldg 20602A, 1900 Wyoming Blvd SE, by 0800 on the first day of class.

Quota Control: 2 AF/DOP.

J5OZD13B4 001—Senior Officers Nuclear Accident Course (SONAC)—PDS Code NPR—DOD 4J—Kirtland/3 days/MASL D122082—Oct 95

Provides training in the problems and responsibilities involved in a nuclear weapon accident response. Includes lessons learned from past accidents; Federal, state, and local agency's responsibilities; and key issues specific to a nuclear weapons accident. Course consolidates the procedural guidance and technical information needed in preparing DoD forces to respond to a nuclear accident.

Prerequisites: MSgt through Col; GS-7 and above.

Special Requirements: Secret/RD clearance and CNWDI access. Verification of security clearance must arrive FCDNA/FCINTR, 1900 Wyoming Blvd SE, Kirtland AFB NM 87117, FAX DSN 246-9168, not later than 15 working days before class start date. Appropriate dress is BDU or utility uniform for military and casual wear for civilians.

Admin Instructions: Report to the Interservice Nuclear Weapons School, bldg 20602A, 1900 Wyoming Blvd SE, by 0800 on the first day of class.

Quota Control: 2 AF/DOP.

J5OZD13E3D 000—Nuclear Emergency Team Operations (NETOPS)—PDS Code CKN—DOD 494—Kirtland/1 wk 3 days/MASL D122078—Oct 95

Covers the scope of actions required to respond to a nuclear accident as a member of a nuclear emergency team member. Includes basic physics, accident and incident history, effeccts of radiation, potential hazards, accident patterns and plotting, respiratory protection, radiation detection equipment, and contamination control station set up and operation.

Prerequisites: Military and civilian personnel filling an explosive ordnance disposal, disaster preparedness, SRF, IRF, or other response force position.

Special Requirements: Secret clearance. Verification of security clearance must arrive FCDNA/FCINTR, 1900 Wyoming Blvd SE, Kirtland AFB NM 87117, FAX DSN 246-9168, no later than 15 work days before class start date. Appropriate dress is BDU or utility uniform for military and casual wear for civilians. PT gear is recommended for use during field exercises. Personnel who wear glasses are encouraged to bring inserts for the MCU2P series protective mask.

Admin Instructions: Report to the Interservice Nuclear Weapons School, bldg 20602A, 1900 Wyoming Blvd SE, by 0715 on the first day of class.

Quota Control: 2 AF/DOP.

X5OBD14N1 001—Intelligence (MCGOC) (4M-704)—PDS Code PJV—DOD 4M-704—Ft Belvoir*/8 wk 2 days/AFSC 14N1—Jan 96

Provides Air Force officers and selected DOD civilian students with a background in mapping, charting and geodesy (MC&G). Includes the basic job functions of an MC&G officer, standard Defense Mapping Agency (DMA) products, map making process, applications of computer technology to mapping and charting, producers of MC&G material, systems used to acquire information, systems which required MC&G support, MC&G working community, production cycle, requirements process from a manager's viewpoint, system management, and program management. Student receives familiarization training experience with horizontal, vertical, astro-azimuth, inertial, gravity, and doppler surveying techniques.

Prerequisites: Commissioned officers through grade Lt Col or civilians GS-7 and above. A strong background in algebra and trigonometry is required. Some knowledge of geometry, calculus, and statistics is desirable. Officers must complete the Fundamentals of Intelligence course before attending this course.

Special Requirements: Confirmation of Secret clearance must arrive at Defense Mapping School (DMS) before class start date. Twenty-four hours of the course are limited to US students.

Quota Control: USAF, AFPC/DPMAPO; others, 2 AF/DOP.

*Defense Mapping School.

X5OSD14N3 000/X5OSK14N3 000—MC&G for the Warrior (3A-101)—PDS Code RG0—DOD 3A-101—Ft Belvoir/2 days—Oct 95

Provides officers and noncommissioned officers (E-7 and above) of all services, DOD civilians (GS-7 and above), and others who occupy or are prospective candidates for billets in the intelligence, planning, operations, and targeting communities with familiarization of those aspects of MC&G which impact successful mission accomplishment. Topics include: geodesy, datums and datum transformation, photogrammetry, digital data collection and management, product accuracy, error theory, grids and projections; hands-on crisis support considerations; and the specific applications and limitations of digital data to combat operations. An open forum for specific topics requested by the students concludes the course. This is a resident course that can be

exported to field sites by mobile training teams (MTT). Units desiring MTTs must have the necessary materials, facilities, and computer equipment to support this training before scheduling classes. This course is not available to international students.

Special Requirements: Secret clearance and access is required before reporting for training. Confirmation of Secret clearances must arrive at Defense Mapping School (DMS) 30 days before class start date transmitted by letter or message addressed to DMS, ATTN: PPO, Ft Belvoir VA 22060-5828. Clearance must also be included on the student's orders.

Quota Control: US Air Force, HQ AFPC/DPMRS; others, 2 AF/DOP.

X5OZD14N3 008—SCI Control Officers Course—PDS Code K1V—Bolling (DIAC)/2 wk—Mar 94

Overview of the Special Security Office (SSO) system, DOD intelligence and security, structure and relationships within the Defense Special Security System, hostile threats to security, SSO operations and responsibilities, facilities security, communications and computer data security, personnel security standards and SCI eligibility, billet management, and issues affecting SCI security. This course is tailored to persons new to SSO responsibilities and to SCI Control Officers and their alternates, and enables them to perform all the SSO functions.

Prerequisites: Nominees for the course may not have more than 6 months' experience within the SSO. Selection is limited to US Government personnel nominated by their agency or service.

Special Requirements: Course requires TS/SI/TK clearance. Security clearance must be passed through SSO channels to SSO DIA//OS-4A//DIC-1D. Collateral security clearances certified by the nominating activity's security officer must be sent with student nomination. Clearances must be received 20 workdays prior to class start date.

Quota Control: 2 AF/DOP.

X5OZD14N3 025—Introduction to RSI/GIS (4M/41-712)—PDS Code 006—DoD 4M/41-712—Ft Belvoir*/2 wk—Oct 96

Introduces geographic information systems concepts and techology and practical training in GIS functions and applications. Supports the input, storage, retrieval, analysis, and output of spatial digital data with emphasis on digital spatial data analysis to support the command in the decisionmaking process. Topics include data models and structures, GIS functions, database creation and management, multispectral imagery classification, accuracy and geodetic control input/output principles, existing technology and trends, considerations for procuring a GIS, managing a GIS, and DoD digital data initiatives and standards.

Prerequisites: Commissioned officers first lieutenant and above, warrant officer 01 and above, noncommissioned officers staff sergeant and above.

Quota Control: HQ 2AF/DOP.

*Defense Mapping School.

X5OZD14N3 026—Introduction to Information Warfare (IIW)—PDS Code 30Y—DOD 3A—Bolling/5 days/MASL C2B2—Jan 96

Students will read background material assigned by the course director, attend lectures and panels to include presentations by invited experts from the Defense Department and the private sector, and accompanied by discussion and question periods. The objective of this course is to enhance students' background and understanding of the nature, evolving concepts, and implications of Information Warfare, including salient aspects of the Information Age, the Revolution in Military Affairs, offensive and defensive aspects of information-based warfare, and implications of information-based warfare for the field of Intelligence.

Prerequisites: Security clearance TS/SI/TK; no foreign students. Personnel in the grades of GS, GM, or GG 12015 and military officers in the grades of Major to Colonel within the Intelligence community, the military services, unified commands, and Defense agencies in positions of mid-level management, senior staffs, and senior experts in any military or military-related discipline.

Quota Control: 2 AF/DOP.

X5OZK14N3 004—Indications and Warning (M/I&W)—PDS Code P7G—Bolling/1 wk—Oct 96

This Secret course is for entry-level analysts and personnel dealing with the narcotics problem within the intelligence and law enforcement communities. Primary focus is the tools and methodologies used in counternarcotics analysis. This is an MTT. Requester must fund travel and per diem expenses.

Quota Control: 2 AF/DOP.

X5OZK14N3 023—Scientific/Technical Intelligence Analyst Intro (M/STIAIC)—PDS Code W7S—Bolling/1 wk—Oct 96

This Secret course is for entry-level analysts and personnel dealing with the narcotics problem within the intelligence and law enforcement communities. Primary focus is the tools and methodologies used in counternarcotics analysis. This is an MTT. Requester must fund travel and per diem expenses.

Quota Control: 2 AF/DOP.

X5OZN14N3A 000—CLASSIC WIZARD Officer Indoctrination (S-3B-0017)—PDS Code XT2—DOD 231—Winter Harbor ME/1 wk—Oct 95

Provides selected officers with an overview and general instruction in the CLASSIC WIZZARD ocean surveillance system.

Prerequisites: Student must be a cryptologic officer, AFSC 14N3A, under orders to a CLASSIC WIZZARD designated billet.

Special Requirements: Cleared for Top Secret and indoctrinated for Special Intelligence and special activities office material as determined by appropriate clearance authority.

Quota Control: 2 AF/DOP.

X5OZD14N4 008—National Senior Intelligence Course (NSIC)—PDS Code 1S3—DOD 34A—Bolling/2 wk—Mar 94

Enhances preparation of individuals for important command, staff, or policy-making positions in international and national security structure. Emphasizes study of intelligence functions, intelligence in national security, management of national intelligence staffs, and application of intelligence in decision making.

Prerequisites: Senior military officer in grades Lt Col and above and civilians in grade GS-13 and above. Waivers for highly qualified personnel will be considered on an individual basis. Nominees should have broad training and experience in the intelligence field.

Special Requirements: Top Secret security clearance with access to SI/SAO certified by class start date.

Admin Instructions: Certification of security clearances must arrive at the Defense Intelligence School no later than 1 week prior to the starting date of the course, according to DIA Reg 24-3.

Quota Control: 2 AF/DOP.

X5OZG14N4 009—Introduction to Infrared Technology (TD-1E1)—PDS Code NUD—Ft Meade/2 days—Apr 95

Gives an introduction to infrared technology. Major advances have occurred in infrared technology for tactical and strategic applications. The universal requirements for longer acquisition ranges, more robust tracking, and more accurate pointing dictate an understanding of critical issues.

Prerequisites: There are no specific prerequisites for this course, but it is intended primarily for intelligence research analysts, managers, and others in technical disciplines who require knowledge about infrared technology. This seminar is elementary in content and not intended for the computer scientist or engineer.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

Quota Control: 2 AF/DOP.

X5OZD14N4 012/X5OSK14N4 012—Mapping, Charting, and Geodesy Staff Officer Course—PDS Code PSL—DOD 4M-702—Ft Belvoir*/1 wk—Mar 94

Provides officers of all services and DOD civilians with an update on the state of the MC&G world. This course is the common core portion of instruction within the two-week MC&G Staff Officer Course, X5OZD14N4 010, designed for students who will be assigned to MC&G billets below the major-command level. Subjects include: current key organizations, persons, products, and operational procedures with emphasis on DMA/U&S Command/Service interfaces and MC&G requirements process. Technical instruction is provided in the basic disciplines of: theory, photgrammetry, geodesy, remote sensing, digital data, and geographic information systems. Students who are being assigned to major command-level MC&G positions normally attend the two-week MC&G Staff Officer Course, X5OZD14N4 010, PDS Code N4T. This is a resident course that can be exported to field sites by mobile training teams (MTT). Units desiring MTTs must have necessary materials, facilities, and equipment to support this training before scheduling classes. Requirements for MTTs will be validated and scheduled by 2 AF/DOP, Randolph AFB TX.

Prerequisites: Warrant or commissioned officers and DOD civilians GS-11 and above assigned to an MC&G billet below the major-command level. NCOs occupying an MC&G requirements billet will be considered on a case-by-case basis.

Special Requirements: Confirmation of Secret clearance must arrive at Defense Mapping School (DMS) 30 days prior to class start date transmitted by letter or message addressed to DMS, Attn: PPO, Ft Belvoir VA 22060-5828. Clearance must also be included on the student's orders.

Quota Control: 2 AF/DOP.

*Defense Mapping School.

X5OZG14N4 002—National Senior Cryptologic Course (CY-600)—PDS Code X63—DOD 3A—Ft Meade/1 wk—Mar 94

Designed to promote the effectiveness of senior civilian and military managers by broadening their knowledge of the management and operations of cryptologic and cryptologic-related activities; providing an understanding of the relationships between NSA/CSS and other governmental organizations; giving them insights into the challenges faced by senior policy and decision-making officials-primarily those in the Intelligence and Defense communities-and the ways these individuals have, are, and plan to meet their goals and objectives; enriching their education through participation in and sharing of their expertise and experience with their fellow students; encouraging them to develop and expand personal professional networks; and, thereby, assisting them in becoming better prepared to assume senior command, staff, and policy-making positions in the national or international security structure. Each participant is required to prepare and present a briefing on course-related topic of his or her choice. Participants must successfully complete all segments of the course to receive credit for it.

Prerequisites: Civilian: GM-14 and above, military: Lt Col and above. Selected personnel should be in command, staff, or policy-making positions.

Special Requirements: Top Secret clearance, indoctrinated for Special Intelligence and TK, and other compartment access.

Quota Control: 2 AF/DOP.

X5OZG14N4 003—Senior Cryptologic Reserve Officer Course (CY-611)—PDS Code ZX0—DOD 3A—Ft Meade/2 wk—Mar 94

Designed to give senior cryptologic reserve officers a broad understanding of the past, present, and future cryptologic affairs to strengthen qualifications for cryptologic mobilization assignments. Enables the reservist to recognize NSA/CSS organization, missions, techniques, policy/doctrine, and operational processes. The reservist will be exposed to the applied knowledge of SIGINT and INFOSEC management used to carry on intelligence-related responsibilities.

Prerequisites: Assignment to a reserve component in a cryptologic billet. Military grade Major through Colonel.

Special Requirements: Top Secret clearance, indoctrinated for Special Intelligence and TK access.

Quota Control: 2 AF/DOP.

X5OZG14N4 018—Advanced Cryptologic Course (CY-500)—PDS Code 10S—DOD 3A—Ft Meade/4 wk—Oct 96

Designed to further develop and prepare cryptologic managers by providing a comprehensive review of current cryptologic operations, emphasizing latest techniques and methods and examining the responsiveness of the cryptologic community to the National Command Authority in times of peace, crisis, and war. Meets the particular needs of cryptologic middle managers by providing intelligence perspective and understanding essential to cryptologic management. Includes a module on NSA/CSS support to military operations; the SIGINT process; a survey of information security (INFOSEC) to include communications security (COMSEC) applications, introduction to computer security (COMPUSEC), and NSA interface with the intelligence community. Each student is required to present a 20-minute intelligence briefing on an approved cryptologic topic of his or her choice. All segments of the course must be successfully completed for CY 500 course credit.

Prerequisites: 1st Lt to major, WO3 to WO4, and: GS/GM-12-13. Nominees must have completed a minimum of 3 years of cryptologic staff or field experience.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence, TK access, and other compartmental access.

Quota Control: 2 AF/DOP.

X5OZG14N4 010—Principles of Collection Management (TM-201)—PDS Code NXY—Ft Meade/2 wk—Apr 95

Provides students with an overview of the collection management processes used throughout the SIGINT community. Includes a review of the intelligence requirement process, a general model of collection management decision-making processes, a look at the various collection environments and the resources tasked for collection, an examination of the evaluation systems available, and a discussion of the future of the collection manager. All facets of SIGINT (COMINT, ELINT, FIS) are covered.

Prerequisites: The grade range is GS-07 thru GM-13 or equivalent, SSgt through SMSgt, or 2d Lt through Major. Two years of SIGINT experience, preferable in collection, collection management, traffic analysis, signals analysis, language analysis, or intelligence research and reporting. This class is NOFORN.

Special Requirements: Students must be cleared for Top Secret and indoctrinated for Special Intelligence with TK access.

Quota Control: 2 AF/DOP.

*Defense Mapping School.

E5OSA15W3 001—Staff Weather Officer Army Indoctrination (USAF)—PDS Code RS0—Ft Huachuca AZ/2 wk—Apr 95

Provides training to Air Weather Service personnel so they can function effectively in an Army battlefield environment and provide effective weather support to commanders and staffs. Training includes Army organization and force structure, concepts and doctrine, staff procedures, administration, supply and maintenance, communications, security, weather resources, and Army requirements. Emphasis is placed on hands-on training and oral briefings based on various Army assignments.

Special Requirements: Secret security clearance.

Prerequisites: Active duty, USAFR, and ANG officers and enlisted personnel with AFSC 115W4, 15W3, and 1W0X1A.

Quota Control: 2 AF/DOP.

J5OZD21A1A 000—Nuclear Weapons Orientation Course (NWOC)—PDS Code EHX—DOD 4E—Kirtland/4 days—Oct 95

Course provides an overview of the US nuclear weapons program including the history and development of nuclear weapons, management of our nuclear stockpile, and issues and challenges now facing this program. Course curriculum includes 20 classes organized into the functional areas of nuclear weapons fundamentals, effects, stockpile, and issues. The main focus of the course is the weapons display area in which students are instructed on every nuclear weapons system ever stockpiled by the United States. The themes of safety, security, operational effectiveness, and counterproliferation concerns are developed throughout the course.

Prerequisites: SSgt or above and civilian equivalent.

Special Requirements: Secret/RD clearance and CNWDI access. Verification of security clearance must arrive FCDNA/FCINTR, 1900 Wyoming Blvd SE, Kirtland AFB NM 87117, FAX DSN 246-9168, not later than 15 working days before class start date. Appropriate dress is BDU or utility uniform for military and casual wear for civilians.

Admin Instructions: Report to the Interservice Nuclear Weapons School, 1900 Wyoming Blvd SE, at 0800 on class start date.

Quota Control: 2 AF/DOP.

J5OZD21A1A 001—Nuclear Weapons Technical Inspector (NWTIC) Course—PDS Code 079—Kirtland/1 day—Oct 95

Provides an overview of the nuclear weapons technical inspection process as defined in technical publication 25-1. Areas covered include the entire inspection process from inspection preparation through the conduct of inspections to required follow-up actions. Lessons learned and common problem areas will be covered in technical operations, safety, security, and the Personnel Reliability Program. Course is conducted in conjunction with the nuclear weapons orientation course (NWOC).

Prerequisites: MSgt and above and civilian equivalents.

Special Requirements: Secret clearance. Verification of security clearance must arrive FCDNA/FCINTR, 1900 Wyoming Blvd SE, Kirtland AFB NM 87177, FAX DSN 246-9168, not later than 15 working days before class start date. Appropriate dress is BDU or utility uniform for military and casual wear for civilians.

Admin Instructions: Report to the Interservice Nuclear Weapons School, bldg 20602A, 1900 Wyoming Blvd SE, by 0800 on the first day of class.

Quota Control: 2 AF/DOP.

J5OLN21A1B 000—Explosive Ordnance Disposal Officer-Phase II—PDS Code 7YC—Indian Head MD/15 wk/MASL P123711—Oct 96

Trains personnel in the best methods and procedures for safe identification, recovery, evaluation, and disposal of all conventional and nuclear explosive ordnance. Instruction encompasses placed, projected, and dropped munitions and associated fuses, aircraft explosive hazards, guided missiles and detailed instruction on the recovery, evaluation and disposal of nuclear weapons. Course material includes Critical Nuclear Design Information (CNWDI). There are two phases of training (Phase I and II). Personnel will not be entered for only one phase of training.

Prerequisites: AFI 36-2104 (formerly AFR 35-99) qualification standards. Officers who do not maintain satisfactory academic standing or who do not complete Phase I will not be entered into Phase II, and will be withdrawn from further disposal training. ECL 80 SR.

Special Requirements: Secret clearance and favorable SSBI by class start date. All initiating organizations include in orders a statement that SSBI has been completed, or initiated, date action was taken, and which district has or will have final results. Individuals who require glasses should bring protective mask glasses.

Admin Instructions: Orders must direct student to report to Eglin AFB FL to attend Phase I course J5OQN21A1-000, 11 weeks duration, and then proceed to US Naval School, EOD, Naval

Ordnance Station, Indian Head, MD 20640. Normal color vision as defined in AFI 48-123 (formerly AFR 160-43) is mandatory.

Quota Control: USAF, HQ AFPC/DPMRS; all others, 2 AF/DOP.

J5OQN21A1B 000—Explosive Ordnance Disposal Officer-Phase I—PDS Code 7YD—Eglin/11 wk—Oct 96

Trains officers in best methods for performing explosive ordnance reconnaissance, ordnance identification procedures, access and recovery of dud ordnance, and disposal operations involving non-nuclear and chemical/biological ordnance both foreign and domestic. Instruction encompasses use of EOD publications, applied physical principles, explosive effects, safety precautions, munitions storage, handling and transportation, use and fuse functioning, EOD tool operations, and maintenance. Heavy emphasis is placed on safety precautions, ordnance reconnaissance, and identification and use of EOD publications. The course provides comprehensive instruction in general demolition procedures. Additionally, the course deals with aspects of EOD operations in a chemical environment to include chemical agent identification and classification, calculations of chemical vapor hazard areas, personnel protection and protective clothing, operation of decontamination stations, sealing of leaking munitions, and munition identification. There are two phases of training (Phase I and Phase II). Personnel will not be entered for only one phase of training.

Prerequisites: Meet requirements of civil engineering Air Force specialty only according to AFMAN 36-2105 (formerly AFR 36-1). Officers who do not maintain satisfactory academic standing will be withdrawn from further EOD training. Normal color vision and depth perception as outlined in AFI 48-123 (formerly AFR 160-43) are mandatory. ECL 80 SR.

Special Requirements: Officers must be screened or administratively certified for PRP nuclear weapons related duties according to AFI 36-2104 (formerly AFR 35-99), chapter 6. A Secret clearance is required and an SSBI completed or initiated by class start date. All initiating organizations include in orders a statement that SSBI has been initiated or completed, date action was taken, and which DIS district has or will have final results. Orders must reflect one of the following statements as applicable according to AFI 36-2104 (formerly AFR 35-99): “Individual has been initially screened and meets qualifying criteria for PRP nuclear weapons associated duties according to AFI 36-2104 (formerly AFR 35-99), Chap 6" or ”Individual has been administratively certified for PRP nuclear weapons related duties according to AFI 36-2104 (formerly AFR 35-99), Chap 6." Individual who requires corrective lens must bring corrective lens inserts for the M9A1 and M17A1 protective masks. Personnel reliability program screening IAW 36-2104 does not apply to Air Reserve Component personnel. Air Reserve Component personnel are those personnel in the Air National Guard and Air Force Reserves.

Quota Control: USAF, AFPC/DPMRS; all others, 2 AF/DOP.

L5OZN24T3 000—Introduction to Transportation Management (NV)—PDS Code D4G—DOD 8C—Athens/*2 wk—Oct 96

Deals with the broad aspects of the transportation systems of America, development of transportation regulations, carrier facilities and services, fundamentals of traffic management, and new developments in transportation industry.

Prerequisites: Officer, senior enlisted (MSgt-CMSgt), both Regular and Reserve of all military services, and civilian personnel in supervisory positions.

Quota Control: 2 AF/DOP.

*US Naval Sch, Trnsp Mgt, Naval Supply Center.

L5OZA24T4 000—Defense Advanced Traffic Management (JT)—PDS Code W70—DOD 8C—Ft Eustis/2 wk—Jan 96

Advanced training for officers and civil service personnel with a basic understanding of general transportation problems and traffic management. Provides training in structure and organization, characteristics, current service, problem areas, and the mission and functions of the Association of American Railroads, American Trucking Association, Air Transport Association of America, American Waterways Operation, and the Railways Express Agency; teaches transportation regulations, organizations of MTMTS, procedures implementing movement of household goods and passengers, rate negotiation and class adjustment, and traffic data analysis.

Prerequisites: Government civilian employees in a grade equivalent to GS-11 and above and officers in grade of major and above in traffic management positions.

Quota Control: 2 AF/DOP.

L5OZA31P3 011—Combatting Terrorism on Military Installations—PDS Code 0J0—Ft McClellan/1 wk/MASL B17950S—Dec 93

Trains personnel who direct and organize resources and implement combatting terrorism plans and procedures on a military installation. Training defines terrorism and discusses terrorist organizations, strategies, tactics, capabilities of the general terrorist threat, current terrorist threats to military installations (CONUS or OCONUS), legal considerations impacting upon combatting terrorism planning and operations, installation operations, emergency operations center operations, physical security, personal protection, and crisis management. Where significant differences exist among services policy, organization, functional job titles or nomenclatures, explanations will be given in class.

Prerequisites: Be an installation commander, a key installation staff officer, or directly involved in a planning or operational capacity in countering terrorism on a military installation. Grade requirements are: MSgt and above, Capt and above, GS-7 and above.

Special Requirements: Must possess a Secret clearance or higher. Attendance should be limited to personnel in command and staff positions who plan for, organize, train, and implement plans designed to combat terrorist activities. Exceptions to grade structure prerequisites will be made for personnel serving in, or on assignment to, staff positions supporting combatting terrorist efforts.

Application Procedures: Applicants are required to contact the course manager at the Department of Security Operations, HQ USAMPS, Ft McClellan AL 36205, DSN 865-3024, to get on the welcome package mailing list 30 days before class start date. Attendees are required to provide a message or letter sent by the installation security manager to Military Police School Battalion, HQ USAMPS, Ft McClellan AL 36205, verifying security clearance.

Quota Control: 2 AF/DOP.

L5OZD31P3 002 (5220.1)—Information Security Management—PDS Code SNV—DOD 7H/DOD 830—Richmond*/2 wk—Dec 93

Provides general knowledge of the history, legal basis, policies, implementation and management of the DOD ISP; fundamental working knowledge security classifications, downgrading or declassification, marking, safeguarding (access, dissemination, accountability, control, storage, disposal, transmission), violations and compromise, education and training, and inspection and review.

Prerequisites: Military and civilian personnel who are assigned to or selected for duties involving responsibility for administering the DOD ISP within the command or organization to which assigned.

Special Requirements: Secret clearance by class start date.

Quota Control: 2 AF/DOP.

*Defense Industrial Security Institute.

L5OZD31P3 009 (5220.2)—Industrial Security Specialist—PDS Code MVE—DOD 7H—Richmond*/6 wk—Apr 95

Qualifies students to implement the Industrial Security Program at any individual security office level (same as course 3C-F7, DA PAM 350-10).

Prerequisites: Officers or civilians assigned or to be assigned duties of industrial security inspector.

Special Requirements: Secret clearance required by class start date.

Quota Control: 2 AF/DOP.

*Defense Industrial Security Institute.

L5OZD31P3 010—Classification Management Course (5220.17)—PDS Code WQ2—Richmond*/1 wk—Mar 94

Provides military and civilian personnel a comprehensive understanding of classification management (CM) within the purview of Executive Order 12356 and how it impacts the information security program.

Prerequisites: Military and civilian personnel assigned CM responsibilities within their organizations. Must have successfully completed the information security management course (5220.7), the DOD security specialist course (5220.9), or the basic information security correspondence course (when available). Those personnel who have attended the information security orientation course (5220.7A) may be considered with justification from their supervisor that the student has gained prerequisite program knowledge through experience and there is a compelling and urgent need to attend. Each request will be approved on a case-by-case basis by the Chief, Information Security Division, DOD Security Institute.

Special Requirements: Secret clearance by class start date.

Quota Control: 2 AF/DOP.

*Defense Security Institute.

L5OZD31P3 011—Personnel Security Management (5220.18)—PDS Code WQ3—Richmond/1 wk—Apr 95

Prepares DoD personnel security specialists and other personnel performing substantial personnel security duties to implement and maintain the DoD Personnel Security Program (PSP) at the base or installation level under DOD 5220.2-R.

Prerequisites: A basic working knowledge of the personnel security program. Strongly recommend the student complete the DS 1103 Basic Personnel Security independent study course.

Admin Instructions: To register: when this course is held at DoDSI, your enrollment options are to either use the Student Information and Registration Network (SIRN) or complete DA Form 145. To discuss hosting this course at your location, call DSN 695-4440 and talk with the Personnel Security Team.

Quota Control: 2 AF/DOP.

L5OZD31P3 012—Security for Special Programs Course (5220.14)—PDS Code W3W—Richmond*/2 wk—Mar 94

Provides personnel assigned to support special access programs (SAP), mid-level security management training focusing on enhanced security throughout the program's lifecycle. Formal orientations to the DOD budget process, the systems acquisition management, and contracting support to special programs will enhance the student's ability to forecast and adjust security countermeasures with the SAP's lifecycle and changing threat.

Prerequisites: A knowledge of basic security principles and practices as demonstrated by formal attendance at a security specialist course or comparable experience. Be familiar with terms of reference for the DOD budget process, material systems management, and contracting as demonstrated by formal training or through structured reading accomplished before attending the course. Civilian and military personnel currently assigned duties for an approved SAP or programmed for a like assignment are first priority with emphasis on security management positions. Other attendees include those individuals assigned to support SAPs through an oversight office or agency, or at a major command or activity. Selection of attendees will be through the component member of the DOD SAP working group. Industry Personnel: Contractor security personnel supporting a bonafide SAP contract may attend if nominated by their supporting program via the SAP working group.

Special Requirements: Final Secret personnel clearance.

Quota Control: 2 AF/DOP.

*Defense Security Institute.

L5OZD31P3 014—Prenomination Interview Course (5220.15)—PDS Code W90—Richmond*/1 wk—Oct 95

Trains and educates DOD personnel who conduct interviews of personnel nominated for assignment to programs requiring prenomination interviews.

Prerequisites: US government civilian, military, or contractor personnel who conduct interviews on individuals identified to work in programs requiring a prenomination interview. Additionally, personnel who conduct interviews to determine eligibility for interim security clearances or access continuation will find this course to be useful. Personnel from other federal agencies are eligible to attend a space available basis.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

*Defense Security Institute.

L5OZD31P3 015—DoD Advanced Personnel Security Adjudication (5220.12)—PDS Code WK1—Richmond*/2 wk—Apr 95

Provides indepth study in adjudication policy guidelines and the basis for and application of due process in unfavorable personnel security determinations. Emphasis on evaluating and resolving complex multiple and sensitive issue cases, and the actions, agencies, and related requirements involved.

Prerequisites: Government civilian or military personnel who adjudicate final personnel security clearances or access eligibility determination for DoD component, SAP, or SCI programs. GS-11 level and above. Also open to adjudicators at the senior GS-9 level subject to approval of their CAF and DoDSI. Other DoD and non-DoD personnel on a space-available basis. Completion of DoD personnel security adjudication course or basic equivalency testing in last 4 years.

Special Requirements: Secret clearance.

Admin Instructions: For government civilian or military to register: nomination must be approved by the head of student's component CAF or designee. Enrollment options are through the student information and registration network (SIRN) or by the registration DA Form 145. Indicate you have completed DoD personnel security adjudications course or basic equivalency testing (on registration form or through the SIRN). Call DSN 695-5439 for further information, if needed.

Quota Control: 2 AF/DOP.

*Defense Security Institute.

L5OZD31P3 016—Security Briefers (5220.13)—PDS Code XB5—Richmond/3 days—Apr 95

Prepares security specialists to plan and deliver security briefings to cleared personnel. Includes preparing a briefing plan, presenting a briefing in a clear and interesting manner, designing and using briefing aids, and evaluating the effectiveness of an oral briefing. DoD 5220.1-R, DoD 5200.2-R, and the Industrial Security Manual security briefing requirements are reviewed. DoD military and civilian and civilian DoD-cleared contractor personnel who present security briefings can attend this course.

Prerequisites: Should possess good oral communication skills and a working knowledge of those publications governing your organization's security briefings.

Admin Instructions: For more information on course content, to register, or to host this course at your location, call Linda Braxton at (804) 279-6076 or DSN 695-6076.

Quota Control: 2 AF/DOP.

L5OZD31P3 018—Train the Trainer (5220.13A)—PDS Code 21J—Richmond/1 wk—Apr 95

Prepares security specialists to teach the 5220.13 security briefers course (SBC). It begins as a 2-day instructor preparation workshop before the first day of the SBC. The next 3 days are spent teaching the SBC under the supervision of DoDSI staff. Graduates return to their units with an SBC instructor guide, course book, and student handout packet. Topics include using SBC materials, teaching the lessons in the SBC, assisting others to prepare briefing plans, and conducting practice briefing sessions. For more information on course content, to enroll, or to host this course at your location, call Linda Braxton, DSN 695-6076.

Prerequisites: A working knowledge of the publications governing the content of your security briefings and possess excellent oral communication skills. DoD and DoD-cleared contractor personnel responsible for their organization's security briefings who have a clear-cut need to train others to brief. Course also open to personnel with similar responsibilities from other federal agencies.

Quota Control: 2 AF/DOP.

J5OBO32E1 000—Civil Engineers Initial Officer Training—PDS Code 041—Wright-Patterson/7 wk 3 days/AFSC 32E1—Oct 95

Designed for newly accessed Air Force officers entering the civil engineering career field. See chapter 4, courses WENG485 and WMGT101, for further information.

Quota Control: HQ AFPC/DPMAPO.

J5OZD32E1D 000—Executive Level Safety and Security (S2) Course—PDS Code 071—Kirtland/1 day—Oct 95

Provides a select group of government policymakers an overview of safety and security features incorporated into our stockpiled nuclear weapons systems. Provides students a review of nuclear weapon design principles and identifies the composition of the current nuclear stockpile. The evolution of modern safety features as well as use control systems is illustrated in both the classroom and a tour of the weapons display area. Security features of both our nuclear weapons storage systems and the systems used to transport nuclear weapons between locations in the United States and around the world are described. Course concludes with a discussion of current issues which affect the safety and security of our nuclear stockpile which must be addressed at the executive level.

Prerequisites: Newly assigned Government personnel who have a responsibility for policy or operational aspects of the US Nuclear Weapons Program.

Special Requirements: Secret/RD clearance and CNWDI access. Verification of security clearance must arrive FCDNA/FCINTR, 1900 Wyoming Blvd SE, Kirtland AFB NM 87117, FAX DSN 246-9168, not later than 15 working days before class start date.

Admin Instructions: Report to the Interservice Nuclear Weapons School, bldg 20602A, 1900 Wyoming Blvd SE, by 0800 the first day of class.

Quota Control: 2 AF/DOP.

J5OZD32E1D 001—Counterproliferation Awareness Course (CPAC)—PDS Code 078—Kirtland/4 days—Oct 95

Provides students with an understanding of the threat posed by nations currently possessing or actively seeking a chemical, biological, or nuclear weapons capability. The course begins with a historical overview of the proliferation of weapons of mass destruction (WMD), and a discussion of current trends. Students will receive instruction on the technologies associated with WMD programs as well as the ballistic and cruise missile programs which many proliferate nations have initiated. The course continues with a discussion of current efforts to dissuade other nations from acquiring or seeking a WMD capability including the policy framework which shapes our response. Counterproliferation efforts including planning as well as technology and acquisition issues are discussed and followed by a group exercise in which students are challenged to apply their knowledge of WMD proliferation to a case study.

Prerequisites: MSgt and above and civilians GS-7 and above with responsibilities related to the proliferation threat and US responses.

Special Requirements: Secret/RD clearance and CNWDI access. Verification of security clearance must arrive FCDNA/FCINTR, 1900 Wyoming Blvd SE, Kirtland AFB NM 87117, FAX DSN 246-9168, not later than 15 working days before class start date.

Admin Instructions: Report to the Interservice Nuclear Weapons School, bldg 20602A, 1900 Wyoming Blvd SE, by 0800 the first day of class.

Quota Control: 2 AF/DOP.

J5OZD32E1D 002—Environmental Management of Radioactive and Chemical Contamination—PDS Code 3I7—Kirtland/1 wk—Oct 96

Provides training to government and civilian lead and support personnel who may have a role in the environmental restoration and waste management of a radioactive and/or chemically contaminated site. Includes lessons on the physical properties of nuclear and chemcial materials, the characterization and the behavior of these components in the environment, site assessment and evaluation, emerging technologies, waste water management and transportation, and applicable regulations. Students will discuss current applications of NEPA, CERCLA, RCRA, TSCA, and NESHAPS, use the computer learning lab to become familiar with dispersion modeling, geographic information systems, and decision support tools, and complete a 1-day multimedia driven exercise in site restoration.

Prerequisites: Military and civilian personnel filling an emergency response, disaster preparedness, ER/WM project management, or response force support position.

Special Requirements: Verification of attendance must arrive to FCDNA/FCINTR, 1900 Wyoming Blvd SE, Kirtland AFB, NM 87117-5669, FAX DSN 246-9168, not later than 15 work days before class start date. Appropriatedress (BDU) or utility uniform for military and casual wear for civilians.

Admin Instructions: Report to the Defense Nuclear Weapons School, building 20602A, 1900 Wyoming Blvd SE by 0730 on class start date.

Quota Control: HQ 2 AF/DOP.

E5OZA33S4 002—Joint Tactical Automated Switching Network Supervisor—PDS Code JWE—Ft Gordon/9 wk—Oct 96

Provide selected personnel with the skills and knowledge necessary to plan, engineer, supervise, and manage the operation of joint tactical communications switching networks based on the automatic message switching control (ANTYC-39), and the automatic telephone central office (AN/TTC-39A).

Prerequisites: AFSC 2E251/71 and 3C051/71 or equivalent. Students must be SrA or higher.

Quota Control: 2 AF/DOP.

E5OZD33S4 022—Senior Information Warfare (IRMC SIW)—PDS Code 1IE—Ft McNair/2 days—Jan 96

Presents current status of the evolving concept of information warfare and considers the integration of information technology, operations, doctrine, and training/exercises/education as a force multiplier in traditional conflict and as a unique form of competition, conflict, and warfare. The course involves a spectrum of ideas on the role of information warfare and information in warfare. It considers current initiatives to implement these concepts at strategic and operational levels of warfare to support Joint Task Forces and other national and international security organizations.

Recommended Attendance: This introductory course is held at the Secret level and is for commanders and decisionmakers involved with operating forces. Civilians in grades GS/GM-15 - SES 5 and military in grades O-6 - O-9 are appropriate. No waivers will be accepted for this course. Training is conducted at the IRMC, Marshall Hall, bldg 62, Ft McNair DC.

Quota Control: 2 AF/DOP.

E5OZD33S4 023—Leveraging Technology for Organizational Change (IMRC LTO)—PDS Code 1ID—Ft NcNair/1 wk—Jan 96

Examines strategies, processes, and resources for significantly improving organizational performance through the application of new and emerging technologies. The course distinguishes between the need for incremental performance improvement versus fundamental discontinuous organized change. It introduces the functional capabilities of technologies expected in the next few years to change the way federal agencies achieve their missions (e.g., electronic commerce, document flow and imaging, work flow management, collaborative groupware). Focuses on techniques and available resources for redesigning work processes to take full advantage of these new technologies and for gaining commitment from both sponsors and users to make the change work. The course is supported by guest speakers and case studies drawn from Federal Government and industry, and provides examples of successes and failures in technology-enabled organizational change initiatives.

Recommended Attendance: The course is particularly valuable for functional managers who are contemplating or have experienced difficulty in initiating a process improvement effort. Executives who oversee improvement efforts and IRM personnel who support functional process improvements will also find the course useful. Attendance by higher level managers in civilian grades GS/GM 13-15 and military grades Lt Col and Col is particularly encouraged. Personnel at the GS/GM 12 and Maj level who have significant responsibilities for major organizational change efforts will also benefit. Training is conducted at the IMRC, Marshall Hall, bldg 62, Ft McNair DC.

Quota Control: 2 AF/DOP.

E5OZD33S4 024—Information Economics Course (IRMC IEC)—PDS Code 172—Ft McNair/3 days—Oct 96

Focuses on advanced concepts, principles, and techniques for identifying the value to an organization of investments in information technology. Explores methodologies and criteria for assessing the strategic value of individual competing investment alternatives, including those that involve information technology and those that do not. Expands beyond the traditional concepts of benefit, cost, and risk in developing assessment criteria. Analyzes senior management's role in achieving consensus on values and related criteria and examines how these criteria are used by functional managers and information systems managers in developing proposals, assessing the relative worth of alternative proposals, and improving the decision making

quality and speed. Exercises, demonstrations, and case analyses are used to develop practical knowledge and skills.

Recommended Attendance: Appropriate for functional managers in both operational and support areas and for information resources management professionals. Particularly valuable for military and civilian leaders responsible for strategic planning involving the use of new technologies. Recommended for civilian grades GS/GM 12 - 15 and majors through colonels.

Quota Control: 2 AF/DOP.

E5OZD33S4 025—The Information Highway (IRMC IHW)—PDS Code 173—Ft McNair/3 days—Oct 96

Analyzes trends, issues, and uses of telecommunications as a component of functional business strategies and information resource management (IRM). Specific telecommunications issues include: costs, security, privacy, access, and regulation. Considers selected technologies on the "Information Highway" and their applicability to DOD. Examples include satellite systems, cellular technology, videoconferencing, facsimile, and applications such as electronic data interchange and bulletin board systems. Guest speakers and demonstrations are used to illustrate applications. Although this course is non-technical, students are provided limited hands-on familiarization with commercial telecommunications services, government, private bulletin boards, and the internet.

Recommended Attendance: Recommended for managers who need a basic understanding about the burgeoning use of telecommunications within government and industry. Intended for civilian grades GS/GM 12 - 15 and for majors through colonels.

Quota Control: 2 AF/DOP.

J5OBO34M1 000—Services Management—PDS Code 088—Wright-Patterson/6 wk—Jan 96

Designed for newly accessed Air Force officers entering the services career field. See Chapter 4, course WSVS101, for course content and special instructions.

Quota Control: HQ AFPC/DPMAPO.

E5OBD35P1 003—Public Affairs Officer (AFIS-PAOC)—PDS Code OKC—DOD 7G—Ft George Meade*/9 wk 3 days/AFSC 35P1/MASL B164590—Oct 96

Management, operation, and functions of the public affairs office (PA). Internal and external public affairs matters; coordinating the activities of the PA; use of an Armed Forces Radio and Television (AFRT) outlet; advising the commander on public affairs matters; producing unit newspaper and commanders call materials; and coordinating community relations activities. Quota Control: Air Force officers, AFPC/DPMAPO; others, 2 AF/DOP.

*Defense Information School (DINFOS).

E5OZD35P1 001—Public Affairs Officer Course (Reserve Component) (AFIS-PAOC-RC)—PDS Code TZE—DOD 7G—Ft George Meade*/2 wk—Oct 96

Provides training for selected officers of the reserve component of the US Armed Forces not on active duty in the duties and functions of military public affair officers in context of DOD military service public affairs policies, plans, and programs.

Prerequisites: Reserve officer assigned to public affairs communication media field, but not on active duty. Undergraduate degree with major in public relations, journalism, mass communication, English, or social sciences; or a minimum of 1 year of military or civilian experience in information or public relations. Must be able to type a minimum of 20 words per minute. NOTE: Request for waiver of prerequisites must be approved by the Commandant, Defense Information School (DINFOS), before arriving for training.

Quota Control: 2 AF/DOP.

*Defense Information School (DINFOS).

L5OZO36P3 001—Equal Opportunity Management I (USAFR/ANG)—PDS Code 2C3—Patrick*/2 wk 1 day/AFSC 36P3—Jan 96

Provides students with the basic equal opportunity management tools to begin working with new methods. Increases awareness and skills in areas of interpersonal involvement, such as communication, advising and helping situations, conflict management, and problem solving. Increases awareness of sexist, racist, and other discrimination behavior and the institutional forms of discrimination.

Prerequisites: Attendance limited to USAFR and ANG officers with an approved duty AFS change to 36P1.

Quota Control: Air Force officers, AFPC/D

Prerequisites: Attendance limited to USAFR and ANG officers with an approved duty AFS change to 36P1. Successful completion of course L5OZO36P3 001, nonresident correspondence requirements, and the nonresident weekend program are also required.

Quota Control: 2 AF/DOP.

*Defense Equal Opportunity Management Institute.

L5OZO36P3 003—EO Program Orientation for Managers—PDS Code 9F2—Patrick/2 wk—Apr 96

Provides an overview of the Defense erqual opportunity (EO) program. It is not designed to train EO advisors. The seminar addresses topics such as personal and organizational values, prejudice and discrimination, racism and sexism, sexual harassment, affirmative action concepts, unit climate assessments, and service-specific program management. A variety of educational strategies, with emphasis on participative techniques is designed to maximize the learning process. Graduates will have a greater understanding of EO issues and the action strategies necessary for effective management of an EO program and EO advisors. Graduates are not qualified to serve as EO advisors.

Prerequisites: Attendance is limited to officers and senior NCOs responsible for EOT management functions at base level and higher. Squadron commanders, first sergeants, and senior enlisted

advisors may attend EOSC. Not eligible for attendance if member has attended the DEOMI 16-week resident course. Social Actions technicians are not eligible to attend EOSC.

Quota Control: 2 AF/DOP.

J5OZD43E4D 000—Nuclear Hazards Training Course (NHTC)—PDS Code KSX—DOD 4A—Kirtland/4 days—Oct 95

Provides medical personnel training as members of a nuclear emergency response team. Includes medical aspects of radiation, previous nuclear accidents and incidents, radiation, and toxicological and explosive hazard familiarization. Students will also receive familiarization with procedures used for contamination control station and become familiar with the use of various types of RADIAC equipment.

Prerequisites: Medical/allied health personnel.

Special Requirements: Appropriate dress is BDU or utility uniform for military and casual wear for civilians. Personnel who wear glasses are encouraged to bring inserts for the MCU2P series protective mask.

Reporting Instructions: Report to the Interservice Nuclear Weapons School, bldg 20602A, 1900 Wyoming Blvd SE, by 0715 on the first day of class.

Quota Control: 2 AF/DOP.

E5OZA51J3 000—Law of War Workshop—PDS Code 4MF—Charlottesville*/1 wk—Oct 96

Focuses on the international customary and treaty rules affecting the conduct of forces in military operations in all levels of hostilities. Topics include the Hague and Geneva Conventions and their application in military operations. Includes problems on reporting and investigating war crimes, treatment and control of civilians, treatment and classification of detainees, the substantial change pending to the law of war as a result of the 1977 protocols to the 1949 Geneva Conventions, including extensive new obligations of commanders and military attorneys. Practical emphasis is given to all levels of mission planning and accomplishment in accordance with the law of war, the law of war responsibilities of attorneys, non-attorney staff officers and commanders, and to law of war instruction, including techniques and instructional aids.

Prerequisite: Military attorneys or civilian attorneys employed by the US government, as well as non-attorney military officers, who work or are pending assignment in any aspect or level of the law of war process (e.g., command, operational, staff, advisory, or instructional). Individuals who have graduated from the Judge Advocate Officer Basic Course within 12 months or the Judge Advocate Officer Advanced Course within two years preceding the course start date are not eligible to attend without prior approval of the Chief, International Law Dvision.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army

E5OZA51J3 002—Legal Aspects of Terrorism—PDS Code 4MH—Charlottesville*/1 wk—Oct 96

The terrorism problem and measures being contemplated to counter it both within and outside the United States, relevant international law and agreements, and national legislation in regard to terrorism, the use of force and limitations on the use of force in foreign countries; rules applicable to terrorism duing armed conflict; counterterrorism authority of U.S. commanders overseas; the use of force to counterterrorism within the U.S. both on and off federal installations; the Posse Commitatus Act, and relationships with Non-DoD, state and local agencies.

Prerequisites: Secret clearance. Attendees will ensure that orders reflect clearance status. Active duty military or appropriate civilian attorney employed by the U.S. government whose present or immediately impending major duties include advice to staff or command on the legal aspects of counterterrorism.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army

E5OZA51J3 005—Fiscal Law Course—PDS Code 9CW—Charlottesville*/1 wk—Oct 96

Presents instruction on the legal, practical, and adminstrative problems involved in the funding of government contracts. Basic aspects of the appropriations process, administrative and statutory control of appropriated funds, and minor construction are covered.

Prerequisites: Military officers or civilian personnel employed by the U.S. government, GS-9 or above, who work in contract law, contracting, or administering funds available for obligation on government contracts. Attendees must be attorneys, contracting officers, comptrollers, finance and accounting officers, responsible budget officials, or the equivalent. Attendees should have completed the Contract Attorneys Course, E50ZA5154 003, a financial manager's course, comptrollership course, or equivalent training.

Quota Control: Air Force quotas are controlled by USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army

E5OZA51J3 006—Program Manager Attorney Course (5F-F19)—PDS Code 99Z—Charlottesville*/1 wk—Oct 96

Course addresses major systems acquisition through various milestones, acquisition planning, research and development, test and evaluation, competition enhancement, technical data, risk allocation, funding and budgeting, and other topics of interest to program managers and program executive officers and the attorneys who advise them.

Prerequisites: Active-duty military attorneys or appropriate civilian attorneys employed by the US government. Attendees must have completed the Advanced Acquisition Course and have at least 2 years' experience as a contract law attorney.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army.

E5OZA51J3 007—Installation Contracting Course (5F-F18)—PDS Code 82D—Charlottesville*/1 wk—Oct 96

Addresses the funding, formation, and administration of government contracts at military installations and comparable government agencies.

Prerequisites: Military attorneys or civilian attorneys employed by the U.S. government. Attendees must have successfully completed E5OZA51J4 003, Contract Attorneys course, or equivalent training, and have at least 1 year's experience as a contract law attorney.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army.

E5OZA51J3 008—Procurement Fraud Course—PDS Code JF3—Charlottesville*/1 wk—Oct 96

Course provides basic instruction on the legal and practical aspects of developing a procurement fraud program at an installation. Focuses on advising installation and agency contracting and investigatory personnel regarding procurement fraud matters, and proper and timely referral of procurement fraud matters to appropriate agencies. Instruction covers identification of procurement fraud indicators, fraud statutes, fraud investigation procedures, DoD criminal jurisdiction, debarment, suspension, and other remedies, and coordination of remedies.

Prerequisites: Military attorneys or civilian attorneys employed by the U.S. government who have been detailed as a procurement fraud advisor or procurement fraud and irregularities coordinator, or who are expected to serve in such a capacity. Persons who have completed this course within three years of preceding the course starting date are not eligible to attend.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished by 2 AF/DOP.

*JAG School, US Army.

E5OZA51J3 009—Federal Labor Relations Course—PDS Code MR2—Charlottesville*/1 wk—Oct 96

Focuses on the law of federal employment. Topics include the hiring, classification, promotion, and discharge of employees under the current civil service laws and regulations; roles of the Office of Personnel Management and the merit system protection board; grievance and adverse action procedures; substantive standards for adverse actions; reduction-in-force procedures; and equal employment opportunity law. Topics covered under federal labor-management relations include the rights and duties of management and labor under Title VII of the Civil Service Reform Act of 1978; representation activities; negotiation of labor contracts; unfair labor practices complaints; administration of labor contracts; procedures for arbitration of grievances; and labor law implications of contracting out.

Prerequisites: Military attorneys or civilian attorneys employed by the U.S. government who work or are pending assignment in civilian personnel law or labor law. Personnel who have completed this course or the Judge Advocate Officer Advanced Course within 3 years preceding the course starting date are not eligible to attend. Attendees must bring a copy of the collective bargaining agreement from their installation or activity.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army

E5OZA51J3 012—Ethics Counselors' CLE Workshop—PDS Code YPN—Charlottesville*/3 days—Oct 96

Course focuses on ethics counselor responsibilities. Topics include ethics counselor fundamentals, procurement integrity, post-government employment restrictions, completion and review of financial disclosure reports, private organizational relationships, travel and transportation rules, gifts and gratuities rules, restrictions on political activities, the Joint Ethics Regulation (JER), and investigations and reporting of suspected violations of ethics standards.

Prerequisites: DoD attorneys who are appointed, work as, or are pending assignment as ethics counselors. Previous course attendees are ineligible to attend. Attendees must bring a copy of the JER and an ethics problem for discussion.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army

E5OZA51J3 013—Military Justice Managers—PDS Code 2PI—Charlottesville*/4 days—Oct 96

Course is designed to provide chiefs of military justice and others involved in military justice management with information and practical tips regarding pretrial, trial, and post trial procedures. Topics include case management, selection of members, victim/witness liaison, pretrial and post trial procedures.

Prerequisites: Course is limited to active duty judge advocates from all services who currently serve or are scheduled to serve as military justice managers. Reserve and National Guard judge advocates may attend if approved by the Chief, Criminal Law Division, the Judge Advocate General's School, Army. Point of contact is Major Masterton, (804) 972-6347.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army

E5OZA51J4 003—Contract Attorneys Course—PDS Code NJE—Charlottesville*/2 wk—Oct 96

Presents instruction regarding the basic legal concepts pertaining to the authority of the government and its personnel to enter into contracts; statutorily mandated competition requirements; contract formation (sealed bidding and competitive negotiation), including appropriations, basic contract types, labor standards, and socioeconomic policies, contract performance, including modifications, terminations, inspection, and acceptance, disputes, including remedies of unsuccesful offers and appeals; introduction to acquisition of automatic data processing equipment; and introduction to procurement fraud.

Prerequisites: Military attorneys or civilian attorneys employed by the U.S. government with 1 year or less of recent contract experience. Individuals who have completed this course within 3 years preceding the course starting date are not eligible.

Quota Control: Air Force quotas are controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army.

E5OZA51J4 005—Military Judge—PDS Code R0H—Charlottesville*/30 wk—Oct 96

Provides military attorneys with advanced schooling required to qualify as full-time military judges at courts-martial. Topics include substantive military criminal law, trial procedures, defenses, instructions, evidence, current military judicial problems, and professional responsibility.

Prerequisites: Military attorneys. Army officers are selected for attendance by the Chief Trial Judge, US Army Judiciary.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army.

E5OZA51J4 006—Contract Litigation Course—PDS Code 4LY—Charlottesville*/1 wk—Oct 96

Course develops civil litigation skills used in practice before the general accounting office, boards of contract appeals, and the federal

courts. The curriculum emphasizes managing litigation and case preparation, including preparation of litigation files and reports, marshalling evidence, conducting and defending discovery, and use of the alternative disputes resolution (ADR) process. Students will also learn rules of procedure and trial techniques in the various form. This course is offered in alternating even years, e.g., 1998, 2000.

Prerequisites: Military attorneys or civilian attorneys employed by the U.S. government with at least 6 months of litigation experience but not more than 24 months of litigation experience. Attendees must also have successfully completed the Contract Attorneys Course, E50Z151J4 003 or equivalent training.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army.

E5OZA51J4 007—Criminal Law Advocacy—PDS Code 4SG—Charlottesville*/1 wk—Oct 96

Course presents basic, yet intensive instruction and practical exercises covering problems confronting military counsel at courts-martial, from pre-trial investigation through appellate review. Issues in trial procedure, trial advocacy, professional responsibility, and topical aspects of current military law, with particular emphasis on the military rules of evidence, are addressed. A substantial portion of the course involves participation in practical exercises.

Prerequisites: Military attorneys certified as counsel under Article 27(B) of the Uniform Code of Military Justice, with no more than 6 months of experience as a trial attorney. Attendees must be currently serving as trial counsel or defense counsel, or be designated to fill either position upon course completion.

Quotal Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army.

E5OZA51J4 009—Criminal Law New Developments—PDS Code 4SJ—Charlottesville*/1 wk—Oct 96

Focuses on developments during the past year in military criminal procedure, substantive criminal law, professional responsibility, evidence, and advocacy.

Prerequisites: Military attorneys or civilian attorneys employed the U.S. government who serve as counsel at courts-martial or who administer military criminal law in a Judge Advocate office.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2AF/DOP.

*JAG School, US Army.

E5OZA51J4 010—Legal Assistance Course—PDS Code 5AE—Charlottesville*/1 wk—Oct 96

Presents both basic law and current developments in areas of interest to military legal assistance attorneys, including consumer protection, family law, state and federal taxation, survivor benefits, Soldiers' and Sailors' Civil Relief Act, ethics, immigration and naturalization, estate planning, wills, bankruptcy, and interviewing and counselling clients.

Prerequisite: Military attorneys and civilian attorneys employed by the U.S. government who work or are pending assignment in legal assistance. Reserve component attorneys must render legal assistance to military members on a regular basis. Persons who have completed this course or the Judge Advocate Officer Advanced Course within 3 years preceding the course starting date are not eligible to attend.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army

E5OZA51J4 012—Advanced Federal Litigation (5F-F29)—PDS Code 3YW—Charlottesville*/1 wk—Oct 96

A demanding, practice-oriented course that presents intensive instruction and exercises encompassing problems confronting government attorneys in federal litigation. An important portion of the course includes participation in a practical exercise involving trial advocacy skills. Provides instruction in federal litigation subjects, including the federal rules of civil procedures, case management, discovery, judicial review, official immunity, and federal motion practice.

Prerequisites: Military attorneys or civilian attorneys employed by the US government who work or are pending assignment in federal litigation.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished by 2 AF/DOP.

*JAG School, US Army.

E5OZA51J4 013—Operational Law Seminar (5F-F47)—PDS Code 4AV—Charlottesville*/1 wk—Oct 96

Focuses on the role of law in military operations both as a force multiplier in enhancing modern maneuver warfare and as a limiting factor. The course analyzes operational law parallel to Army doctrine, beginning with strategic operational law, and going through operational, tactical, and peacetime engagement operational law. Focus is at the tactical (division) level and discusses review of operations plans, rules of engagement, the use of force, individual legal problems of deploying soldiers, security assistance, and fiscal considerations. The course is in seminar format, emphasizing practical solutions to the issues raised and requiring the free interchange of ideas by attendees.

Prerequisites: Secret clearance properly reflected on TDY orders. Military attorneys or other military officers who work or are pending assignment in operational law. Prior attendance at E5OZA51J3, Law of War workshop, or the Judge Advocate Officer Advanced course is strongly recommended.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished by 2 AF/DOP.

*JAG School, US Army.

E5OZA51J4 014—Admin Law for Military Installations (5F-F24)—PDS Code 4VD—Charlottesville*/1 wk—Oct 96

Presents an overview of the basic law and current developments in areas of interest to military attorneys in administrative law assignments. Covers the legal basis of command, the command of installations, nonappropriated fund instrumentalities, military assistance to law enforcement personnel, government information practices, military personnel law, standards of conduct, environment law, and reports of survey.

Prerequisites: Military attorneys or civilian attorneys employed by the US government who work or are pending assignment in administrative law. Personnel who have completed this course or the Judge Advocate Officer Advanced Course within 3 years preceding the course starting date are not eligible to attend.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished by 2 AF/DOP.

*JAG School, US Army.

E5OZA51J4 016—Government Contract Law Symposium—PDS Code 88K—Charlottesville*/1 wk—Oct 96

Focus of the symposium is to update government attorneys on significant changes in government contract law and policy by providing attendees the opportunity to obtain the view of prominent individuals from the government and private sector. The course is a symposium, featuring guest speakers and seminars, with emphasis on new developments, reiteration of selected contract topics, and policy insights. Additionally, the symposium serves as the focal point for the continuing education needs of program manager attorneys. The symposium will include seminars specifically designed for program manager attorneys.

Prerequisite: Military attorneys or civilian attorneys employed by the U.S. government who work or are pending assignment as a government contract law attorney, have successfully completed the Contract Attorneys Course, E50ZA51J4 003 or equivalent training, and have at least two years experience as a contract law attorney. This course is designed for experienced contract attorneys and supervisors.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2AF/DOP.

*JAG School, US Army.

E5OZA51J4 017—Government Material Acquisition—PDS Code 89C—Charlottesville*/1 wk—Oct 96

Focuses on acquisition law beyond basic installation level topics. It is intended for attorneys with 1 to 4 years of contract law experience involved in the acquisition of supplies, components, weapons or major end items, but not major weapons systems. Topics include an annual survey of recent developments in legislation, case law, administrative decisions, and DoD policy; competition and source selection; truth in negotiations; bankruptcy; responsibility determinations; technical data rights policies; costs and cost accounting; standards; payment and collection procedures; review of claims; settling termination for convenience proposals; automatic data processing equipment contracting; and secure environment contracting.

Prerequisite: Military attorneys or civilian attorneys employed by the U.S. government. Attendees must have successfully completed the Contract Attorneys Course, E50ZA51J4 003 or equivalent training, and have at least 1 year's experience as a contract law attorney.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished by 2 AF/DOP.

*JAQ School, US Army.

E5OZA51J4 018—Intelligence Law Workshop—PDS Code 258—Charlottesville*/1 wk—Oct 96

Focuses on the fundamental legal aspects of intelligence operations and support to those operations. Topics include a review of the statutes that govern the intelligence community structure; collection of intelligence on U.S. persons; low level source operations; counterintelligence; foreign intelligence surveillance; intelligence funding and property; secured environmental contracting; and intelligence/classified litigation. Course stresses the practical application of the law in this area through seminar and practical exercises.

Prerequisite: Secret clearance. Military or civilian attorneys employed by the U.S. government who are assigned or are pending assignment to an intelligence unit or special operations/mission unit or who are assigned or pending assignment to a position within the department of defnese which require specific knowledge of intelligence law. Persons who do not meet these requirements are not eligible to attend without prior approval of the Director, Academic Department, The Judge Advocate General's School.

Quota Control: Air Force quotas controlled by HQ USAF/JA based on program furnished to 2 AF/DOP.

*JAG School, US Army.

V30ZR62E3E 002—Technical Engineering WS-133B—PDS FLY—Vandenberg AFB CA*/10 dys—Oct 96

This a follow-on course that trains selected Air Force personnel to perform ICBM missile technical engineering duties. The scope of training includes detailed theory and operation of the WS-133B weapon system's electronics, checkout procedures, adjustment, fault isolation, removal, replacement, and repair of missile system components, logic level signal flow, integrated system data flow, and detailed system analysis. Its sister course for officer training is V3AZR2M071-002, PDS Code UQ8, Technical Engineering (WS-133B).

Prerequisites: Must complete course V30ZR62E3E 006 and hold AFSC 62E3E or equivalent degree.

Reporting instructions: Report to building 9307, room 27, 0730 PST on the first day of training.

V3OZR62E3E 006—Technical Engineering WS-133 A-M/CDB—PDS Code PYW—Vandenberg/8 wk 1 day—Oct 96

This course trains selected Air Force personnel to perform ICBM missile technical engineering duties. The scope of training includes detailed theory and operations of the WS-133 A-M/CDB weapon system's electronics, checkout procedures, adjustment, fault isolation, removal, replacement, and repair of missile system components, logic level signal flow, integrated system data flow, and detailed system analysis. Its sister course for enlisted training is V3AZR2M071-001, PDS Code PYT, Technical Engineering (WS-133 A-M/CDB).

Prerequisites: AFSC 62E3E or equivalent degree.

Reporting Instructions: Report to building 9307, room 27, 0730 PST on the first day of training.

Quota Control: 2 AF/DOP.

L30BR64P1 000—Contracting Fundamentals—PDS Code Z39—Lackland/5 wk—Oct 96

This course is designed for entry level contracting personnel with special emphasis on the operational (base/post/camp/station) level contracting environment. The course is divided into two phases of training. The first 20 days students are instructed in the basic contracting functions to include: fundamentals, initiation of the acquisition process, specifications, statements of work, services, purchase request reviews, competition, contract types, solicitation planning, solicitation preparation, ethics, contractor responsibility, sealed bidding, cost and pricing data, proposals, contract management, terminations, payments and accounting, protests and claims, and contract closeout. The last 5 days cover Air Force

specific operational contracting issues include foreign and domestic purchases, non-appropriated fund instrumentalities, contracting automated systems, contracting for utilities, quality assurance evaluation, contract administration of services, construction, and commodities, security, contracting publications, career progression and development, and environmental topics.

Prerequisites: Civilian GS-5 and above, officer O-1 and above, and enlisted E-4 and above.

Students must bring a hand-held calculator.

Quota Control: 2 AF/DOP

L30ZR64P1 000—Operational Level Purchasing Fundamentals (PUR 102)—PDS Code XAH—Lackland AFB/2 wk—Oct 96

This course is for Defense Acquisition University (DAU) students only and introduces students to the techniques and procedures used in accomplishing small purchase actions. Participants complete a detailed study of small purchase procedures and regulations as outlined in the Federal Acquisition Regulation (FAR), and the DoD FAR Supplement (DFARS). Emphasis is placed on developing competencies and applying ethical principles in performing basic small purchase tasks. The presentation is geared to those individuals assigned to a base, post, camp, or station level with examples and exercises representative of these experiences. This course is also called PUR 102 by the DAU and serves as a mandatory Level I class for certification in Purchasing. This course or its equivalent is a prerequisite to Base Level Purchasing Fundamentals (L30ZR64P1 001) and together constitute AFSC 6C031 formal training.

Prerequisites: Civilian GS-5 and above, officer 0-1 and above, and enlisted E-1 and above who perform small purchasing contracting duties.

Quota Control: 2 AF/DOP

L30ZR64P1 001—Base Level Purchasing Fundamentals—PDS Code 374—Lackland AFB/2 wk—Oct 96

This course is designed to assist Air Force personnel at the operational contracting level. This course focuses on Air Force specific requirements ensuring a mission-ready graduate. Topics include Air Force contracting mission, the contracting enviornment, and actual “hands-on” experience with real-time awards through the use of small and simplified purchasing procedures. Special emphasis is placed on providing individuals the ability to interact with automation through the use of the Base Contracting Automated System and Electronic Commerce/Electronic Data Interface.

Prerequisites: Operational Level Purchasing Fundamentals (PUR 102) Course/L30ZR64P1 000 or PUR 101 course through Defense Acquisition University.

Quota Control: 2 AF/DOP.

L30ZR64P1 005—Operational Level Contract Fundamentals (CON 102)—PDS Code YFX—Lackland AFB/4 wk—Oct 96

This course is designed for entry level contracting personnel with special emphasis on the operational level contracting environment. Students are instructed in the basic contracting functions of fundamentals, initiation of the acquisition process, specifications, statements of work, services, purchase request reviews, competition, contract types, solicitation planning, solicitation preparation, ethics, contractor responsibility, sealed bidding, cost and pricing data, proposals, contract management, terminations, payments and accounting, protests and claims, and contract closeout. This course is also called CON 102 by the DAU and serves as a mandatory Level I class for certification in Contracting. This course or its equivalent is a prerequisite to Base Level Contracting Fundamentals (L30ZR64P1 006).

Prerequisites: Civilian GS-5 and above, officer 0-1 and above, and enlisted E-4 and above. Students must bring a hand-held calculator.

Quota Control: 2 AF/DOP.

L30ZR64P1 006—Base Level Contract Fundamentals—PDS Code 3LB—Lackland AFB/1 wk—Oct 96

This course emphasizes Air Force specific operational contracting issues including foreign and domestic purchases, non-appropriated fund instrumentalities, contracting automated systems, contracting for utilities, quality assurance evaluation, contract administration of services, construction, and commodities, security, contracting publications, career progression and development, and environmental topics.

Prerequisites: Operational Level Contract Fundamentals Course (CON 102)/L30ZR64P1 005 or CON 101 through Defense Acquistion University. Civlian GS-5 and above, officer 0-1 and above, and enlisted E-4 and above.

Quota Control: 2 AF/DOP.

L40ST64P1 000—Operational Level Purchasing Fundamentals (PUR 101)—PDS Code XAH—Varies/2 wk—Oct 96

This course is for Defense Acquisition University (DAU) students only and introduces students to the techniques and procedures used in accomplishing small purchase actions. Participants complete a detailed study of small purchase procedures and regulations as outlined in the Federal Acquisition Regulation (FAR), and the DoD FAR Supplement (DFARS). Emphasis is placed on developing competencies and applying ethical principles in performing basic small purchase tasks. The presentation is geared to those individuals assigned to a base, post, camp, or station level with examples and exercises representative of these experiences. This course is also called PUR 101 by the DAU and serves as a mandatory Level I class for certification in Purchasing. This course or its equivalent is a prerequisite to Base Level Purchasing Fundamentals (L30ZR64P1 001) and together constitute AFSC 6C031 formal training.

Prerequisites: Civilian GS-5 and above, officer 0-1 and above, and enlisted E-1 and above who perform small purchasing contracting duties.

Quota Control: 2 AF/DOP.

L40ST64P1 005—Operational Level Contract Fundamentals (CON 102)—PDS Code YFX—Lackland AFB/4 wk—Oct 96

This course is designed for entry level contracting personnel with special emphasis on the operational level contracting environment. Students are instructed in the basic contracting functions of fundamentals, initiation of the acquisition process, specifications, statements of work, services, purchase request reviews, competition, contract types, solicitation planning, solicitation preparation, ethics, contractor responsibility, sealed bidding, cost and pricing data, proposals, contract management, terminations, payments and accounting, protests and claims, and contract closeout. This course is also called CON 102 by the DAU and serves as a mandatory Level I class for certification in Contracting. This course or its equivalent is a prerequisite to Base Level Contracting Fundamentals (L40ST64P1 006).

Prerequisites: Civilian GS-5 and above, officer 0-1 and above, and enlisted E-4 and above. Students must bring a hand-held calculator.

Quota Control: 2 AF/DOP.

L40ST64P1 006—Base Level Contract Fundamentals—PDS Code 3LB—Lackland AFB/1 wk—Oct 96

This course emphasizes Air Force specific operational contracting issues including foreign and domestic purchases, non-appropriated fund instrumentalities, contracting automated systems, contracting for utilities, quality assurance evaluation, contract administration of services, construction, and commodities, security, contracting publications, career progression and development, and environmental topics.

Prerequisites: Operational Level Contract Fundamentals Course (CON 102)/L40ST64P1 005 or CON 101 through Defense Acquistion University. Civlian GS-5 and above, officer 0-1 and above, and enlisted E-4 and above.

Quota Control: 2 AF/DOP.

L4OST64P1 007—Quality Assurance Evaluation for Service Contracts—PDS Code 4L1—Varies/1 wk 3 days—Oct 96

Trains Air Force personnel with the responsibility of overseeing service contractor performance at the operational level. Quality Assurance Evaluators (QAEs) are exposed to the policy and procedures of Air Force service contracts as outlined in AFMAN 64-108, Service Contracts and AFI 63-504, Quality Assurance Evaluation Program (QAEP). Emphasizes the development of Performance Work Statements and Quality Assurance Surveillance Plans. In addition, QAEs are trained on proper surveillance techniques and documentation. The student is also exposed to proper business relationships with contractors, including ethics, and standards of conduct. “Hands-On” training is given in the preparation of sampling guides, QAE schedules and Contract Discrepancy Reports. QAEs are also given an opportunity to identify the proper way to select random numbers for random sampling of a service output.

Prerequisites: Students must be identified (selected) for QAE duties.

Quota Control: 2 AF/DOP.

L3OZR64P3 003/L4OST64P3 003—Operational Level Contract Administration (CON 222)—PDS Code 2WV—Lackland/2 wk—Oct 96

Improves skills and techniques of intermediate-level contracting personnel in base, post, camp, or station level contract administration. Emphasizes practical decision making and problem solving techniques. Topics include cost accounting principles, financial management, contract administration organizations, terminations, disputes, labor relations, subcontractor controls and environmental contract management. Students are required to develop a case study of a contract administration problem from their personal contract administration experience. These problems provide a basis for classroom presentations and situational analysis corresponding to relevant contract management topics.

Prerequisites: GS-9 and above, captain and above, and enlisted E-5 and above. One year experience in contract administration after receiving Level I certification in Contracting.

Quota Control: 2 AF/DOP.

L3OZR64P3 004/L4OST64P3 004—Base Level Contract Administration—PDS Code 3B8—Lackland/3 days—Oct 96

Assists Air Force personnel at the operational contracting level. Focuses on two major areas: service contracts with special emphasis on AFMAN 64-108 and construction contracting concentrating on inspection and acceptance, architect and engineering (A&E) contracts, special requirements for contracts.

Prerequisites: Operational Level Contract Administration (CON 222)/L3OZR64P3 003 or CON 221 through the Defense Acquisition University (DAU). Civilian GS-9 and above, officer O-3 and above, and enlisted E-5 and above. One year experience in contract administration after receiving Level I certification in Contracting.

Quota Control: 2 AF/DOP.

L3OZR64P3 005/L4OST64P3 005—Contract Law—PDS Code 33W—Lackland/2 wk 3 days—Oct 96

Divided into two phases. The first 10 days are designed to provide experienced contracting personnel with an understanding of the impact of Government Contract Law on daily decision-making in contract management, and develop a comprehension of the legal significance of the contents of a contractual instrument as it affects both the contractor and the Government. Students review basic legal principles, source of contract law, modifications, terminations, remedies, interpretation of contract language, award law, government property, defective pricing data, patent and data law, ethics, labor law, and law involving the flow of contract monies. Court, Board and Comptroller General rulings are studied, stressing the contractor and government interface and current interpretation of the regulations and statutes. Special attention will be given to Federal statutes and contract clauses, their applicability and their interpretation. Selected Comptroller General decisions, Board of Contract Appeals cases, and court cases emphasizing specific problem areas will be analyzed and discussed. The last 3 days equip the contracting personnel with the skills necessary to process basic legal information and problems, effectively communicate with the legal staff, make decisions and prepare documents with a view towards legal or judicial review, prepare documents for use in the legal arena, react to situations involving legal questions and/or ramifications, and accomplish other appropriate tasks involving legal matters. Topics covered include: legal research and analysis, ratifications of contract actions, protests of award or proposed awards, contract disputes, and contract termination. Each unit of instruction includes practical information and exercises to ready the contracting professional for work in the field.

Prerequisites: Civilian GS-7 and above, officer O-2 and above, enlisted E-5 and above. Level I certification in Contracting.

Quota Control: 2 AF/DOP.

L3OZR64P3 006/L4OST64P3 006—Government Contract Law (CON 201)—PDS Code YJ8—Lackland/2 wk—Oct 96

Provide experienced contracting personnel with an understanding of the impact of Government Contract Law on daily decision-making in contract management, and develop a comprehension of the legal significance of the contents of a contractual instrument as it affects both the contractor and the Government. Students review basic legal principles, source of contract law, modifications, terminations, remedies, interpretation of contract language, award law, government property, defective pricing data, patent and data law, ethics, labor law, and law involving the flow of contract

monies. Court, Board and Comptroller General rulings are studied, stressing the contractor and government interface and current interpretation of the regulations and statutes. Special attention will be given to Federal statutes and contract clauses, their applicability and their interpretation. Selected Comptroller General decisions, Board of Contract Appeals cases, and court cases emphasizing specific problem areas will be analyzed and discussed.

Prerequisites: GS-7 and above, first lieutenant and above, E-5 and above. Level I certification in Contracting.

Quota Control: 2 AF/DOP.

L4OST64P3 012—Competitive Natural Gas Distribution—PDS Code P9V—Varies/3 days—Oct 96

Covers the roles and responsibilities of the military services and the Defense Fuels Supply Center (DFSC), overview of direct supply natural gas, contract technical provisions, local distribution companies and interstate pipeline sales and transportation policies. Natural gas requirements, estimates, nominations, cost comparisons and quality to include measurements will also be discussed.

Prerequisites: DoD and Federal installation personnel (Contracting and Civil Engineers) responsible for administering the DFSC contracts.

Quota Control: 2 AF/DOP

L4OST64P3 015—Operational Level Contract Pricing (CON 105)—PDS Code Z32—Varies/3 wk—Oct 96

This course combines lecture, case study and role-playing exercises designed to provide intermediate level contracting personnel with the tools to ensure contracts are awarded at fair and reasonable prices. Week one, “Price Analysis”, discusses in depth, the general pricing environment, ways to maximize price competition, price related data from offerers, price related factors, price comparison methodology, ways to account for differences, price related decisions in sealed bidding, price related decisions in negotiations, and documentation. Week two, “Cost Analysis”, delves into the world of cost or pricing data, allowability, data collection, work design and analysis, direct material cost, direct labor cost, other direct cost, indirect cost, FCCM, profit or fee, and preparation for negotiation. Week three, “Negotiation”, introduces negotiation, fact-finding, negotiation preparation, conducting the negotiation, bargaining techniques, negotiation tactics, nonverbal communication, competitive discussions, and post-award negotiations.

Prerequisites: GS-5 or above, first lieutenant and above, E-4 and above. Two years contracting experience desired. Knowledge of contracting fundamentals equivalent to CON 101 is assumed.

Hand-held calculator required; laptop computer (with spreadsheet) optional.

Quota Control: 2 AF/DOP.

L3OZR64P3 016/L4OST64P3 016—Contract Pricing—PDS Code 3JW—Lackland/3 wk 2 days—Oct 96

This 17 day course is divided into two phases of training. This course combines lecture, case study and role-playing exercises. The first 14 days are designed to provide intermediate level contracting personnel with the tools to ensure contracts are awarded at fair and reasonable prices. Week one, “Price Analysis”, discusses in depth, the general pricing environment, ways to maximize price competition, price related data from offerers, price related factors, price comparison methodology, ways to account for differences, price related decisions in sealed bidding, price related decisions in negotiations, and documentation. Week two, “Cost Analysis”, delves into the world of cost or pricing data, allowability, data collection, work design and analysis, direct material cost, direct labor cost, other direct cost, indirect cost, FCCM, profit or fee, and preparation for negotiation. Week three, “Negotiation”, introduces negotiation, fact-finding, negotiation preparation, conducting the negotiation, bargaining techniques, negotiation tactics, nonverbal communication, competitive discussions, and post-award negotiations. The last 3 days ensure personnel get a chance to apply what they have learned in the first three weeks to pricing scenarios likely to be encountered in an operational level contracting squadron. Students will develop price objectives for the following: a custodial services contract, an option year price adjustment, an architect-engineering services contract and a construction contract. Students will also write a price negotiation memorandum.

Prerequisites: Civilian GS-5 or above, officer O-1 and above, enlisted E-4 and above. Two years contracting experience desired. Knowledge of contracting fundamentals equivalent to CON 101 is assumed.

Hand-held calculator required; laptop computer (with spreadsheet) optional.

Quota Control: 2 AF/DOP.

L3OZR64P3 017/L4OST64P3 017—Base Level Contract Pricing—PDS Code 5IM—Lackland/3 days—Oct 96

This course allows students to develop price objectives for the following: custodial services contract, option year price adjustment, architect-engineering services contract and a construction contract. Students will also write a price negotiation memorandum.

Prerequisites: Successful completion of Operational Level Contract Pricing Course (CON 105)/L3OZR64P3 018 or CON 104 through the Defense Acquisition University (DAU). Civilian GS-5 or above, officer O-1 and above, enlisted E-4 and above. Two years contracting experience desired. Knowledge of contracting fundamentals equivalent to CON 101 is assumed.

Hand-held calculator required; laptop computer (with spreadsheet) optional.

Quota Control: 2 AF/DOP.

L3OZR64P3 018—Operational Level Contract Pricing (CON 105)—PDS Code 6YK—Lackland/2 wk 4 days—Oct 96

This course combines lecture, case study and role-playing exercises designed to provide intermediate level contracting personnel with the tools to ensure contracts are awarded at fair and reasonable prices. Week one, “Price Analysis”, discusses in depth, the general pricing environment, ways to maximize price competition, price related data from offerers, price related factors, price comparison methodology, ways to account for differences, price related decisions in sealed bidding, price related decisions in negotiations, and documentation. Week two, “Cost Analysis”, delves into the world of cost or pricing data, allowability, data collection, work design and analysis, direct material cost, direct labor cost, other direct cost, indirect cost, FCCM, profit or fee, and preparation for negotiation. Week three, “Negotiation”, introduces negotiation, fact-finding, negotiation preparation, conducting the negotiation, bargaining techniques, negotiation tactics, nonverbal

communication, competitive discussions, and post-award negotiations.

Prerequisites: Civilian GS-5 or above, officer O-1 and above, enlisted E-4 and above. Two years contracting experience desired. Knowledge of contracting fundamentals equivalent to CON 101 is assumed.

Hand-held calculator required; laptop computer (with spreadsheet) optional.

Quota Control: 2 AF/DOP

L3OZR64P3 019/L4OST64P3 019—Intermediate Contract Administration—PDS Code 00Z—Lackland/2 wk 3 days—Oct 96

This 13 day course is divided into 2 phases of training. The first 10 days are designed to assist intermediate level contracting personnel in improving their skills and techniques applied toward base, post, camp, or station level contract administration. Emphasis is placed on practical decision making and problem solving techniques. Topics include cost accounting principles, financial management, contract administration organizations, terminations, disputes, labor relations, subcontractor controls and environmental contract management. The last 3 days are designed to assist Air Force personnel at the operational contracting level. This phase focuses on two major areas: 1) service contracts with special emphasis on AFMAN 64-108 and 2) construction contracting concentrating on inspection and acceptance, architect and engineering (A&E) contracts, special requirements for contracts.

Prerequisites: Civilian GS-9 and above, officer O-3 and above, and enlisted E-5 and above. One year experience in contract administration after receiving Level I certification in Contracting.

Prior to arrival: Students are required to develop a case study of a contract administration problem from their personal contract administration experience. These problems provide a basis for classroom presentations and situational analysis corresponding to relevant contract management topics.

Quota Control: 2 AF/DOP.

L3OZR64P3 020/L4OST64P3 020—Base Level Contract Law—PDS Code Z24—Lackland/3 days—Oct 96

This 3 day course will equip contracting personnel with the skills necessary to process basic legal information and problems, effectively communicate with the legal staff, make decisions and prepare documents with a view towards legal or judicial review, prepare documents for use in the legal arena, react to situations involving legal questions and/or ramifications, and accomplish other appropriate tasks involving legal matters. Topics covered include: legal research and analysis, ratifications of contract actions, protests of awards or proposed awards, contract disputes, and contract termination. Each unit of instruction includes practical information and exercises to ready the contracting professional for work in the field.

Prerequisites: Government Contract Law (CON 201)/L3OZR64P3 005 or CON 201 through the Defense Acquisition University (DAU). Civilian GS-7 and above, officer O-2 and above, enlisted E-5 and above. Level I certification in Contracting.

Quota Control: 2 AF/DOP.

L4OST64P3 021—C12/C21 Contract Maintenance Quality Assurance Representative—PDS Code 4ZI—Varies/1 wk—Oct 96

This course provides service training for DoD personnel in job series GS-1910 or aircraft maintenance AFSCs. Provides knowledge and skills necessary to perform the specific quality assurance responsibilities relevant to contract management of Contractor Logistics Support (CLS) for C12/C21 aircraft maintenance. Includes understanding of contract quality requirements for CLS, identification and interpretation of various inspection systems, requirements for Mandatory Government Inspections, familiarity with governing directives, and preparation of required documentation/CLS Surveillance Plans to oversee contractors' quality assurance programs. Includes contract quality assurance, quality evaluation, quality assurance planning, corrective action, and configuration management. Students will be required to participate in a situational case study wherein appropriate identification and response to example discrepancies must be properly documented.

Prerequisites: Assigned to a QAR position or future assignment to the position.

Quota Control: 2 AF/DOP.

J3OZR65F3 000—Financial Management Systems—PDS Code 368—Sheppard/12 days—Jul 96

Provides training for Air Force and Defense Accounting Office personnel in AFSC 65FX and AFSC 65OX in the knowledge and skills needed to perform Air Force standard base-level inquires, retrievals, Comptroller Information Transfer Systems (CITS) and Query Language Processing (QRP). The scope of training includes computer fundamentals and data base inquire techniques.

Prerequisites: SrA-MSgt and civilian equivalents, other rank and grade justified by requesting MAJCOMs.

Quota Control: 2 AF/DOP

E5OZD82A0 000—Joint C4I Staff and Operations Course—PDS Code ZLM—Norfolk VA*/5 wk—Oct 96

Acquaints military warrant officer to Col and equivalent US DoD civilians with C2 concepts in the joint environment, describes the DoD's organization and how it supports the C2 process, and explains the management and operation of current C4I systems and attendant joint operational procedures associated with strategic and theater/tactical systems.

Special Requirements: Military member or civilian equivalent assigned or en route to designated position. Current (within 5 years) SBI/SSBI, Top Secret clearance with eligibility for SCI indoctrination before arrival.

Admin Instructions: Students are TDY to Armed Forces Staff College (AFSC), C4I Division (DSN 564-5142). Reservations for BOQ will be made at AFSC for all students. Rental car is recommended. TDY to Washington DC area during course is required. A student information packet will be sent to each student before the course. Send certification of SCI via DSSCS to SSO AFSCOL (DSN 564-5169) not later than 2 weeks before class start date.

Quota Control: Joint Staff/J6E, DSN 223-3492. Quotas, on a class-by-class basis, are allocated to the unified and specified commands, services, and DoD agencies by the Joint Staff. Air Force point of contact is 2 AF/DOP.

*Armed Forces Staff College

L5OZG3016 000—National Communications Security Course—PDS Code KSU—DOD 4C—Ft Meade/2 wk—Mar 77

A survey of the nature of and threat to the exploitation of US communications; vulnerability of US communications; means available to counter the threat; and basic problems of communications security management. Intended primarily for personnel who work in communications system planning, engineering or operations, or who are in general operations, planning or project management.

Prerequisites: Civilian, GS-13 and above. Military, major and above.

Special Requirements: Top Secret clearance with special intelligence indoctrination required by class start date.

Quota Control: 2 AF/DOP.

Airman Technical Training

(Cross reference for Defense Management Education and Training (DMET) courses to DoD 5010.16C, *DMET Catalog*, is provided at the end of this chapter.)

J3AQR1A011 000—EAUC - Inflight Refueling Helper—PDS Code 5K5—Sheppard/2 wk 3 days—Oct 96

This course represents "Day One" of a crewmember's flying career. The mission of the course is to prepare enlisted personnel for their transition to a career in aviation. The course is not designed to teach skills associated with specific duty tasks. Knowledge presented in the course includes physiological survival, aircrew mission, anti-hijacking and anti-terrorism, aircrew coordination, aircrew training, basic aerodynamics, aircraft publications, safety, and flight medicine. The school faculty, aircrew members themselves, are also given an opportunity to identify, before expensive follow-on flight training, those individuals who lack the motivation, aptitude, or attitude needed to successfully function as aircraft crewmembers. The program provides candidates a brief indoctrination into their future lifestyle, obligations, and responsibilities.

Prerequisites: Selected for assignment to enlisted aircrew duties. Applicable security clearance applied for prior to attendance. Hand-carry complete health records including a current class III flight physical and AF Form 1042, **Medical Recommendation for Flying Duty**. For NPS personnel, AF Form 1042 will be issued at Sheppard AFB as required. Specialty qualifications listed in AFMAN 36-2108 specialty description.

Special Requirements: SF 88 must be accomplished per AFI 48-123 and certified by MAJCOM SGPA for active duty applicants and by AFRES/SG or ANG/SG for USAFR and ANG applicants, respectively. Students reporting directly from BMT are certified by HQ AETC/SCPS. The applicant is approved for training only if the SF 88 is certified medically qualified for flying duty Class III. A current AF Form 1042 prepared by the local flight surgeon and the certified SF 88 are included in the applicant's outpatient health records which are hand-carried by the applicant to the training base. The SF 88 and AF Form 1042 must be valid through the course training period.

Quota Control: 2 AF/DOP.

J3AQR1A211 000—EAUC - Aircraft Loadmaster Helper—PDS Code 5K5—Sheppard/2 wk 3 days—Oct 96

This course represents "Day One" of a crewmember's flying career. The mission of the course is to prepare enlisted personnel for their transition to a career in aviation. The course is not designed to teach skills associated with specific duty tasks. Knowledge presented in the course includes physiological survival, aircrew mission, anti-hijacking and anti-terrorism, aircrew coordination, aircrew training, basic aerodynamics, aircraft publications, safety, and flight medicine. The school faculty, aircrew members themselves are also given an opportunity to identify, before expensive follow-on flight training, those individuals who lack the motivation, aptitude, or attitude needed to successfully function as aircraft crewmembers. The program provides candidates a brief indoctrination into their future lifestyle, obligations, and responsibilities as enlisted aircrew members.

Prerequisites: Selected for assignment to enlisted aircrew duties. Applicable security clearance applied for before attendance. Hand-carry complete health records including a current class III flight physical and AF Form 1042, **Medical Recommendation for Flying Duty**. For NPS personnel, AF Form 1042 will be issued at Sheppard AFB as required. Specialty qualifications listed in AFMAN 36-2108 specialty description.

Special Requirements: SF 88 must be accomplished per AFI 48-123 and certified by MAJCOM SGPA for active duty applicants and by AFRES/SG or ANG/SG for USAFR and ANG applicants, respectively. Students reporting directly from BMT are certified by HQ AETC/SCPS. The applicant is approved for training only if the SF 88 is certified medically qualified for flying duty Class III. A current AF Form 1042 prepared by the local flight surgeon and the certified SF 88 are included in the applicant's outpatient health records which are hand-carried by the applicant to the training base. The SF 88 and AF Form 1042 must be valid through the course training period.

Quota Control: 2 AF/DOP.

J3ABR1A231 002—Aircraft Loadmaster Apprentice—PDS Code 9TT—DOD 860—Sheppard/3 wk 1 day/AFSC 1A231/MASL D153003—Apr 96

Includes COMSEC/OPSEC applicable to flying operations; using and updating publications; aircraft loadmaster career ladder; transportation of hazardous materials; customer relations; basic weight, arm moment (WAM) formula, center of gravity formulas; WAM formula for aircraft; center of gravity formulas; adding and removing cargo; loadshift formula; PSI and shoring requirements; chart E familiarization; weight and balance clearance form F; safety procedures; vehicle center of gravity; palletized load planning; and restraint.

Prerequisites: Air Force active duty pipeline and retrainees must complete enlisted aircrew undergraduate course before attending the aircraft loadmaster course. ECL 70.

Quota Control: 2 AF/DOP.

J3AQR1A311 000—EAUC - Airborne Communication Systems Helper—PDS Code 5K5—Sheppard/2 wk 3 days—Oct 96

This course represents "Day One" of a crewmember's flying career. The mission of the course is to prepare enlisted personnel for their transition to a career in aviation. The course is not designed to teach skills associated with specific duty tasks. Knowledge presented in the course includes physiological survival, aircrew mission, anti-hijacking and anti-terrorism, aircrew coordination, aircrew training, basic aerodynamics, aircraft publications, safety, and flight medicine. The school faculty, aircrew members themselves, are also given an opportunity to identify, before expensive follow-on flight training, those individuals who lack the motivation, aptitude, or attitude needed to successfully function as aircraft crewmembers. The program provides candidates a brief indoctrination into their future lifestyle, obligations, and responsibilities.

Prerequisites: Selected for assignment to enlisted aircrew duties. Applicable security clearance applied for before attendance. Hand-carry complete health records including a current class III flight physical and AF Form 1042, **Medical Recommendation for Flying Duty**. For NPS personnel, AF Form 1042 will be issued at Sheppard AFB as required. Specialty qualifications listed in AFMAN 36-2108 specialty description.

Special Requirements: SF 88 must be accomplished per AFI 48-123 and certified by MAJCOM SGPA for active duty applicants and by AFRES/SG or ANG/SG for USAFR and ANG applicants, respectively. Students reporting directly from BMT are certified by HQ AERTC/SCPS. The applicant is approved for training only if the SF 88 is certified medically qualified for flying duty Class III. A current AF Form 1042 prepared by the local flight surgeon and the certified SF 88 are included in the applicant's outpatient health records which are hand-carried by the applicant to the training base. The SF 88 and AF Form 1042 must be valid through the course training period.

Quota Control: 2 AF/DOP.

E3ABR1A331 002—Airborne Communications Specialty Apprentice—PDS Code 32M—Keesler/25 wks 2 days—Oct 96

Principles-centered training in the operation and organizational maintenance of avionic communication equipment, including tuning, performance testing, and adjustment of command, VHF, UHF, and HF systems, Audio Distribution System, Baseband Switching System, Automatic Direction Finding, and the use of related test equipment. Electronic fundamentals and application to circuit analysis and circuit testing, flight line practices, use of maintenance and inspection forms, AF Technical Orders, and safety and security directives. Principles of transmitters, receivers, antennas, tuners and electronic and electromechanical tuning systems. Operation of airborne and teletype systems and the transmission and reception of radio messages. Maintenance of records and radio and teletype logs. Soldering and cable fabrication, system and component troubleshooting logic and application through the use of selected representative avionics communication systems and components with associated TOs and test equipment.

Special Requirements: Class III flight physicals must be completed before selection for training. Nonconductive eyeglass frames. A secret clearance is required for school and a Top Secret is required for retention of the AFSC. Course security classification is SECRET NO FORN.

Quota Control: 2 AF/DOP

J3AQR1A411 000—EAUC - Airborne Warning Command & Control Systems Helper—PDS Code 5K5—Sheppard/2 wk 3 days—Oct 96

This course represents "Day One" of a crewmember's flying career. The mission of the course is to prepare enlisted personnel for their transition to a career in aviation. The course is not designed to teach skills associated with specific duty tasks. Knowledge presented in the course includes physiological survival, aircrew mission, anti-hijacking and anti-terrorism, aircrew coordination, aircrew training, basic aerodynamics, aircraft publications, safety, and flight medicine. The school faculty, aircrew members themselves, are also given an opportunity to identify, before expensive follow-on flight training, those individuals who lack the motivation, aptitude, or attitude needed to successfully function as aircraft crewmembers. The program provides candidates a brief indoctrination into their future lifestyle, obligations, and responsibilities.

Prerequisites: Selected for assignment to enlisted aircrew duties. Applicable security clearance applied for before attendance. Hand-carry complete health records including a current class III flight physical and AF Form 1042, **Medical Recommendation for Flying Duty**. For NPS personnel, AF Form 1042 will be issued at Sheppard AFB as required. Specialty qualifications listed in AFMAN 36-2108 specialty description.

Special Requirements: SF 88 must be accomplished per AFI 48-123 and certified by MAJCOM SGPA for active duty applicants and by AFRES/SG for USAFR and ANG applicants, respectively. Students reporting directly from BMT are certified by HQ AERTC/SCPS. The applicant is approved for training only if the SF 88 is certified medically qualified for flying duty Class III. A current AF Form 1042 prepared by the local flight surgeon and the certified SF 88 are included in the applicant's outpatient health records which are hand-carried by the applicant to the training base. The SF 88 and AF Form 1042 must be valid through the course training period.

Quota Control: 2 AF/DOP.

E3ABR1A431 000—Airborne Warning Command and Control Systems Operator Course—PDS Code X29—Keesler/3 wk/AFSC 1A431—Oct 95

A 3-skill level awarding course designed to train selected Air Force enlisted personnel in the knowledge necessary for entry into the 1A4X1 career field. Apprentice level training in operations enables graduates to perform at apprentice level. Training enables graduates to rapidly adjust to and assimilate on-the-job training when assigned to either an ABCCC, AWACS, or JSTARS crew position. Instruction includes communication system operations, basic concepts of sensors and computers, ECM, introduction to operational systems, aircrew publications, reference systems, and related subjects.

Quota Control: 2 AF/DOP.

W-E3A-1A451D—Airborne Warning Command and Control Weapons Director Course—PDS Code X4E—Tyndall/12 wk—Oct 96

Training for enlisted personnel who will perform duties as entry level weapons controllers. Includes subjects designed to qualify the graduate to solve the air mass problem. Direct aircraft conducting air defense and tactical missions, coordinate aircraft control and warning activities, interact with other controlling agencies, understand the principles of radar and electronic countermeasures (ECM) and electronic counter countermeasures (ECCM), and be familiar with the air defense organization of North America Aerospace Defense (NORAD) and the Tactical Air Control System. Training is accomplished using modular control equipment (MCE). Includes both simulated and live events. AFSC 1A451 will be awarded the D shred upon course completion.

Prerequisites: Survival training mandatory: (1) Basic Survival, S-V80-A, or equivalent; and (2) Water Survival, S-V90-A, or equivalent.

Special Requirements: Secret clearance by class start date. A current certified Class III weapons director physical must be completed according to AFMAN 48-123 and AFMAN 36-2110 before arrival at Tyndall AFB, and must remain current throughout training. Code AAB will be completed 60 days before arrival at Tyndall AFB and must remain current throughout training.

Admin Instructions: Student must hand-carry medical records

including the certified Class III weapons controller physical.

Quota Control: 325 OSS/OSTT.

Selection Control: HQ AFPC/DPAAD4.

J3AQR1A511 000—EAUC - Airborne Mission Systems Helper—PDS Code 5K5—Sheppard/2 wk 3 days—Oct 96

This course represents "Day One" of a crewmember's flying career. The mission of the course is to prepare enlisted personnel for their transition to a career in aviation. The course is not designed to teach skills associated with specific duty tasks. Knowledge presented in the course includes physiological survival, aircrew mission, anti-hijacking and anti-terrorism, aircrew coordination, aircrew training, basic aerodynamics, aircraft publications, safety, and flight medicine. The school faculty, aircrew members themselves, are also given an opportunity to identify, before expensive follow-on flight training, those individuals who lack the motivation, aptitude, or attitude needed to successfully function as aircraft crewmembers. The program provides candidates a brief indoctrination into their future lifestyle, obligations, and responsibilities.

Prerequisites: Selected for assignment to enlisted aircrew duties. Applicable security clearance applied for before attendance. Hand-carry complete health records including a current class III flight physical and AF Form 1042, **Medical Recommendation for Flying Duty**. For NPS personnel, AF Form 1042 will be issued at Sheppard AFB as required. Specialty qualifications listed in AFMAN 36-2108 specialty description.

Special Requirements: SF 88 must be accomplished per AFI 48-123 and certified by MAJCOM SGPA for active duty applicants and by AFRES/SG for USAFR and ANG applicants, respectively. Students reporting directly from BMT are certified by HQ AERTC/SCPS. The applicant is approved for training only if the SF 88 is certified medically qualified for flying duty Class III. A current AF Form 1042 prepared by the local flight surgeon and the certified SF 88 are included in the applicant's outpatient health records which are hand-carried by the applicant to the training base. The SF 88 and AF Form 1042 must be valid through the course training period.

Quota Control: 2 AF/DOP.

E3ABR1A531 000—Airborne Mission Systems Apprentice—PDS Code Y0S—Keesler/29 wk 3 days/AFSC 1A531/MASL D132108—Oct 96

An airborne inflight maintenance and operator basic course. Includes initial skills in airborne maintenance procedures for airborne warning and control systems (AWACS) and joint STARS data processing, display systems, radar systems, and aircrew procedures. Initial skills training also includes system fault isolation procedures.

Prerequisites: Completion of J3AQR11010 000, Enlisted Aircrew Graduate Course (EAUC), at Sheppard AFB. Must also complete courses E3AQR2E020 010, Common Electronic Principles, and E3ABR1A531 000, Airborne Mission Systems Apprentice. ECL 80 SR.

Quota Control: 2 AF/DOP.

E3ABR1C031 000—Airfield Management Apprentice—PDS Code WKM—DOD 556—Keesler/5 wk 4 days/AFSC 1C031—Oct 96

Provides initial training for personnel entering the airfield management career field. Personnel are provided basic skills and knowledge in flight information publications, air operations support, designations of airspace, navigational aids, general flight rules, airfield safety, lighting, markings, inspections, maintenance, hazards, emergency actions, flight planning, passenger processing, communications systems, notice to airmen, weather report interpretation and dissemination, civil aircraft use of Air Force installations, and flight line driving.

Prerequisites: ECL 70 SA.

Quota Control: 2 AF/DOP.

E3ABR1C032 000—Operations Resource Management Systems Apprentice—PDS Code 79U—Keesler/5 wk 1 day/AFSC 1C032/MASL D121059—Oct 96

Provides personnel with the knowledge and skills necessary to operate the Air Force Operations Resource Management computer data base. Subjects covered are data base management, aircrew resource management, monitoring aircrew flying hours, aircrew training and evaluations, aircrew scheduling, and squadron operations.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

E3ACR1C071 000—Airfield Management Craftsman—PDS Code WYZ—Keesler/2 wk/MASL D121078—Oct 96

Provides advanced training for personnel upgrading to the 7-skill level. Personnel are taught advanced functions pertaining to flight information publications, base support agencies, rules of flight, airfield safety, airfield lighting and marking, airfield management, emergency actions, bird strike hazards reduction program, flight planning section, civil aircraft, and flight line driving program, waivers, and airfield pavements.

Prerequisites: ECL 70 SA.

Quota Control: HQ AFPC/DPMYME

E3ACR1C072 000—Operations Resource Management Systems Craftsman—PDS Code X00—Keesler/2 wk—Apr 95

Provides advanced training for personnel upgrading to the 7-skill level. Personnel are taught advanced functions pertaining to data processing, data base management, aviation service, aeronautical orders, incentive pay, military pay orders, flight records, resource management products, HORIS interface, flying hour utilization, aircraft accident investigation procedures, training tables, prorate requirements, training reports, and training products.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR1C131 000—Air Traffic Control Operations Apprentice—PDS Code ACB—DOD 222—Keesler/14 wk 2 days/AFSC 1C131/MASL D122029—Oct 96

Aviation weather, air navigational aids, flight information publications, communications procedures, flight assistance service, flight regulations, aircraft characteristics, airport control tower operations, and radar approach control operations.

Prerequisites: ECL 80 SR.

Special Requirements: Before a student is approved for training, a completed SF 88 must be certified and returned by the appropriate MAJCOM SGPA to confirm the individual is medically qualified for air traffic control (ATC) duties. Before students in retraining status depart their home base TDY, the losing MPF must ensure the student has a current, certified ATC physical. Any physical that has expired or will expire within 5 months of the scheduled class date must be

updated by the home base flight medicine office.

Admin Instructions: TDY students must hand-carry a completed SF 88 and their medical records to the Keesler Flight Medicine Office. The Keesler Flight Medicine Office will determine the status of the student's ATC physical. US Air Force physical standards do not apply to international students. International students will not perform ATC duties unmonitored during US Air Force training.

Quota Control: 2 AF/DOP.

E3ACR1C171 000—Air Traffic Control Operations Craftsman—PDS Code WY9—Keesler/2 wk—Apr 95

Provides advanced training for personnel upgrading to the 7-skill level. Personnel are taught advanced functions pertaining to crew supervision, special flight operations, facility management, air traffic control reports, terminal instrument procedures, airspace and airfield management, and air traffic control training.

Quota Control: HQ AFPC/DPPAPEO.

L3AQR1C211 000—Combat Control (Enlisted) Indoctrination Course—PDS Code 225—Lackland/10 wk—Oct 96

Screens and selects qualified airmen for continuation in training for the combat control career specialty. Students are put through a rigorous physical and mentally stressful training program that prepares them for all pipeline courses and their final AFS-awarding course. Includes run, swim, underwater confidence, calisthenic, and weight training, anatomy and physiology, anatomy of human motion, medical terminology, lifetime fitness, metric system, nutrition and nutritional performance, and aerospace physiological training. Upon graduation, students attend the following prerequisite pipeline courses before AFSC-awarding school: US Army combat divers qualification, US Army airborne parachutist, US Army military freefall parachutist, US Air Force combat survival, US Navy underwater egress training, and combat control apprentice (air traffic control).

Prerequisites: All candidates (NPS/GTEPS, retrainees, ARC, AF prior service, and sister service prior service) must successfully complete the appropriate physical ability and stamina test (PAST). Refer to this catalog, chapter 3, section b, paragraph 3.9.2. Lackland Training Wing Special Instructions, subparagraph 3.9.2.11, Pararescue/combat control physical ability and stamina test for test criteria. Member must be a US citizen, be able to obtain a Secret clearance, volunteer for hazardous duty (e.g., military combat diver (SCUBA), military parachuting), score a minimum of 43 on the general category of the ASVAB test (sister service equivalent), must pass flying Class III physical with eye restriction as prescribed for parachutist/marine diving duty. All physicals MUST be reviewed and stamped by HQ AETC/SGPS (US Army will only recognize the AETC/SG stamp).

Special Requirements: Submitted for Secret clearance by class start date. POVs not authorized for use at, to, or from the indoctrination course. Report in uniform with full military complement. ARC personnel must in- and out-process through the Lackland AFB ARC liaison office before training. Pipeline prerequisite training for ARC and retrainee students will be scheduled by 342 TRS/CTF with instructions for orders publication sent to the appropriate units/MPFs.

Quota Control: 2 AF/DOP.

E3AQR1C231 001—Combat Control Apprentice—PDS Code X2Z—Keesler/15 wk 2 days—Apr 95

Aviation weather, air navigational aids, flight information publications, communications procedures, flight assistance service, flight regulations, aircraft characteristics, airport control tower operations, radar, and nonradar approach control operations. Each day and on the weekends, when students are not under the supervison of a classroom instructor, they are under the supervision of a combat control military instructor undergoing physical and amphibious training. Students must maintain a high state of physical condition to meet the demands of follow-on training and operational requirements.

Special Requirements: Before a student is approved for training, a completed SF 88 must be certified and returned by the appropriate MAJCOM SGPA to confirm the individual is medically qualified for Flying Class III duties.

Admin Instructions: The Base Aeromedical Service ensures the original and one copy of the SF 88 are filed in the student's field personnel records. TDY students must hand-carry a completed SF 88 and their medical records to the Keesler Flight Medicine Office. The Keesler flight medicine office will determine the status of the student's Flying Class III physical. Students are assigned to the 334 TS for administrative purposes. All students participate in a daily physical conditioning program and must meet combat control physical fitness standards while attending this course. Students who plan to arrive after normal duty hours must advise the 334 TS at DSN 597-2519.

Quota Control: 2 AF/DOP.

L3AZP1C251 000—Combat Control Static Line Jumpmaster Course—PDS Code 204—Pope/3 wk—Oct 96

Qualifies officers and airmen as static line parachute jumpmasters in directed and computed airdrop release procedures. Includes training in jumpmaster duties and responsibilities, personnel inspections, plotting techniques, aircraft inspections, and actual jumpmaster directed personnel airdrops.

Prerequisites: Completion of Airborne Parachutist Course (L5AZA1T231 001). Performed duties as a military parachutist on status for at least 1 year, made a minimum of 30 military static line jumps with at least 10 equipment jumps from C-130/C-141 aircraft, 5 of which must have been night jumps. Equipment must include 40 lb rucksack, weapon, and loadbearing equipment (LBE). Personnel must be able to pass the physical fitness entrance examination on the first day of class. Examination consists of the following exercises: pull-ups or chin-ups (8), sit-ups (60), push-ups (45), 3 mile run in maximum time of 24 minutes, 1500 meter swim in maximum time of 34 minutes. Descriptions of correct performance of exercises are contained in the US Army Field Manual (FM) 21-20. Failure of the physical fitness test will result in elimination from training.

Special Requirements: Students must bring BDUs, PT uniform, UDT shorts, LBE, helmet, goggles, dog tags, ID card, AF Form 922, Individual Jump Record (showing required jumps), medical records (with current AF Form 1042 showing flying class III physical) and a calculator.

Quota Control: 2 AF/DOP.

E3ABR1C331 005—AMC Command and Control Apprentice—PDS Code WR9—DOD 250—Keesler/5 wk 4 days/AFSC 1C331—Oct 96

Trains airmen to perform the duties of command and control apprentice. Includes command and control introduction and

standards, security, operation of command post and communications equipment; manual and automatic reporting systems; scheduling and coordination of flight operations, weather, and command post status displays.

Prerequisites: Ability to type 14 words per minute. Certification done by AFPT 70 test.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Background investigation (BI) must be initiated by Lackland AFB and a completed DD Form 1879 put in personnel records. For retrainees, the losing MPF must ensure a completed DD Form 1879 is in personnel records or evidence of Top Secret clearance being granted.

Quota Control: 2 AF/DOP.

E4AST1C351 000—SORTS Data Handler (USAF)—PDS Code RNZ—Host Sites/3 days—Oct 96

Trains selected personnel to gather, consolidate, and report unit Status of Resources and Training system (SORTS) information. Training includes the purpose, composition and role of the Global Command and Control System/Worldwide Military Command and Control System and United States Message Text Formatting as they apply in support of SORTS reporting. Training is also provided on the Joint Reporting Structure, use of JCS Pub 1-03.3., AFI 10-201, and error resolution and logic of JCS and Air Force continuation data.

Quota Control: 2 AF/DOP.

E4AST1C351 001—SORTS Data Handler (CMC)—PDS Code UYR—Host Sites/1 wk 2 days—Oct 96

Trains selected Marine Corps personnel to gather, consolidate, and report Status of Resources and Training system (SORTS) information. Training includes the purpose, composition and role of the Global Command and Control System/Worldwide Military Command and Control System as they apply in support of SORTS reporting. Training is also provided on the Joint Reporting Structure, use of JCS Pub 1-03.3., error resolution and logic of JCS and service continuation data.

Quota Control: 2 AF/DOP.

E4AST1C351 002—SORTS Data Handler (Army)—PDS Code TG6—Host Sites/1 wk—Oct 96

Trains selected Army personnel to gather, consolidate, and report Status of Resources and Training system (SORTS) information. Training includes the purpose, composition and role of the Global Command and Control System/Worldwide Military Command and Control System as they apply in support of SORTS reporting. Training is also provided on the Joint Reporting Structure, use of JCS Pub 1-03.3., error resolution and logic of JCS and service continuation data.

Quota Control: 2 AF/DOP.

E4AST1C351 006—SORTS Data Handler (ANG)—PDS Code 5B3—Host Sites/3 days—Oct 96

Trains selected Air National Guard personnel to gather, consolidate, and report Status of Resources and Training system (SORTS) information. Training includes the purpose, composition and role of the Global Command and Control System/Worldwide Military Command and Control System as they apply in support of SORTS reporting. Training is also provided on the Joint Reporting Structure, use of JCS Pub 1-03.3, AFI 10-201, error resolution and logic of JCS and Air Force continuation data.

Quota Control: 2 AF/DOP.

E3ACR1C371 000—Command and Control Craftsman—PDS Code XBH—Keesler/2 wk/AFSC 1C371—Jan 96

Trains airmen to perform the duties of command and control craftsman, AFSC 1C371. Training provided on supervision, training responsibilities, command post operational procedures, flying operations, communications security, operations security, maintaining classified materials, and physical security.

Prerequisites: In the grade of SSgt or higher and have completed a minimum of 18 months of on-the-job training.

Quota Control: HQ AFPC/DPPAPEO.

E3ABP1C431 000—Tactical Air Command and Control Apprentice—PDS Code 0NU—DOD 101—Hurlburt Fld/14 wk/AFSC 1C431—Oct 96

Trains personnel who are normally stationed on an Army installation in operation of vehicle mounted and portable radio communications equipment; radio telephone procedures; electronic counter-counter measures; tactical vehicle operations; field skills necessary for sustained combat operations with Army ground units to encompass map reading, compass operations, cover concealment camouflage, and land navigation techniques; comprehensive knowledge of the Tactical Air Control System and Army Air Ground System (TACS/AAGS); how to utilize multiple command asets in joint combat operations to plan and execute tactical air and ground weapons resources in direct support of Army ground maneuver units. Upon graduation, personnel are normally assigned to Army installations worldwide.

Prerequisites: Must have a valid civilian driver's license; normal color vision and depth perception according to AFI 48-123 (formerly AFR 160-43); no speech impediment or any physical limitations preventing students from participating in a rigorous physical conditioning program and meeting and maintaining worldwide mobility criteria.

Admin Instructions: Hand-carry personnel, dental, medical, and driving records. There is a mandatory physical conditioning program for all students assigned to the E3ABP1C431 000 course. Upon start of the course, students are administered a physical conditioning evaluation. If students are found deficient in any of the test areas, they will be put on remedial physical training conducted every duty day. Those students who satisfactorily maintain standards will perform physical training every other duty day. Graduating students must obtain a minimum score of 60 points on each of the following exercises: pushups, situps, and a two-mile run. The Army Physical Fitness Test (APFT), stated in FM 21-20, is used to conduct and evaluate physical training. Graduates of the Tactical Air Command and Control Apprentice course will attend S-V80-A, Combat Survival Training, at Fairchild AFB upon completion of technical training. Graduates of the Tactical Air Command and Control course selected for Basic Parachutist training will attend S-V80-A, Combat Survival Training, following completion of basic parachutist course. Address scheduling conflicts to 2 AF/DOPC, DSN 597-1345.

Quota Control: 2 AF/DOP.

E3ACP1C471 000—Tactical Air Command and Control Craftsman—PDS Code XBG—Hurlburt Fld/2 wk/AFSC 1C471—Jan 96

Trains airmen to perform the duties of tactical air command and control craftsman, AFSC 1C471. Training provided on readiness management to include support agreements, unit type codes, designed operational capability statements, status of resources and training system, support equipment, and operations plans. Includes antennas, physical training programs, and the training and education measurement system.

Prerequisites: Normal color vision, hearing, and depth perception. SSgt - AFSC 1C451.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR1C531 003—Modular Control Equipment (MCE) Surveillance Operator—PDS Code MJE—Keesler/4 wk/AFSC 1C531/MASL D137056—Oct 96

Provides apprentice-level training in fundamental subject area common to aerospace control and warning operations. Upon graduation, the apprentice (AFSC 1C531) should be able to interpret fundamental radar surveillance symbology and digital displays. Fundamental training in the operation of modular control equipment (MCE) console should enable graduates to perform at an apprentice level in air surveillance operator positions. Also includes familiarization and background relating to other positions which, when combined with unit on-the-job training, should enable graduates to rapidly adjust when assigned to other specific semi-automatic systems. Instructions in radar operation, IFF/SIF, ECM, digital displays, operation of the search scope console, and related subjects.

Prerequisites: ECL 80SR.

Quota Control: 2 AF/DOP.

Q-JSS-1C531—Apprentice Aerospace Control and Warning (AC&W) Operator, Joint Surveillance System (JSS)—PDS Code P2R—DOD 221—Tyndall/3 wk/AFSC 1C531B—Jan 96

Provides apprentice-level training in fundamental subject areas common to AC&W operations. Upon graduation from this course, the apprentice 1C531 should be able to interpret fundamental radar surveillance symbology and digital displays. Fundamental training in the operation of the HMD22 console should enable graduates to perform at an apprentice level in air surveillance operator positions in a JSS Region Operation Control Center (ROCC) or Sector Operation Control Center (SOCC). Training also includes familiarization and background relating to other positions which, when combined with unit OJT training, should enable graduates to rapidly adjust when assigned to other specific sem-automatic systems.

Prerequisites: ECL 80 SR.

Special Requirements: Secret clearance required before entry into course.

Quota Control: 325 OSS/OSTT.

V3AZP1C351 001—NORAD and USSPACECOM Command Center Emergency Actions Controller (EAC)—PDS Code RDD—Falcon/3 wk/AFSC 1C351—Oct 96

Provides preparatory training in equipment operations, communications procedures, formatted message preparations and disseminations, and associated command and control functions and procedures required to perform duties as an emergency actions controller in the NORAD and USSPACECOM Command Center. Courseware includes: mission overview, NORAD and USSPACECOM Command Center access, security, and on-duty procedures, emergency and aircraft operations, OPORD 3113/3115 and OPlan 3000/3200 operations, voice and emergency communications operations to include CCP-40, ICC-1, STU-III, NAS, MACA, DSN, NTAS, JCSAN, cellular and radio operations, CINC asseessment procedures, WWABNRES operations, succession to command and other conferences, JCS, NORAD, and USSPACECOM alerting systems, commander availability procedures, LERTCONS, amber warning and flush procedures, COMSEC operations, emergency actions message preparation and dissemination, KL-43 operations, joint and aerospace reporting systems training, red/white rocket and white pinnacle reporting, OPREP-3 reporting, and fast reaction message procedures.

Prerequisites: Individual must be selected to perform duties as an emergency actions controller in the NORAD and USSPACECOM command center or be selected to a staff position with a need to attain crew qualification.

Special Requirements: Secret clearance prior to initial qualification training (IQT) and a TS/SCI prior to unit qualification training (UQT AFSC 1C351).

Admin Instructions: Students are assigned to crew for positional training and are normally scheduled for a preevaluation after 15 workdays or three shift cycles (days, swings, mids).

Class size: minimum, 2; maximum, 4.

Quota Control: 2 AF/DOP.

W-JSS-1C551D—Aerospace Control and Warning Weapons Director Sector Operations Control Center (SOCC)—PDS Code X4D—Tyndall/19 wk 4 days/AFSC 1C551D—Oct 96

Training for enlisted personnel who will perform duties as entry level weapons controllers. Includes subjects designed to qualify the graduate to solve the air mass problem, direct aircraft conducting air defense and tactical missions, coordinate aircraft control and warning activities, interact with other controlling agencies, understand the principles of radar and electronic countermeasures (ECM) and electronic counter countermeasures (ECCM), and be familiar with the air defense organization of North American Aerospace Defense (NORAD) and the Tactical Air Control System; console familiarization and computer logic. Training is accomplished using modular control equipment (MCE) and Sector Operations Control Center (SOCC) consoles. AFSC 1C551 will be awarded the D shred upon course completion.

Special Requirements: Secret clearance by class start date. A current certified ground based controller physical must be completed according to AFMAN 48-123, paragraph 7.3, before arrival at Tyndall AFB and must remain current throughout training. Code AAB will be completed 60 days before arrival at Tyndall and must remain current throughout training.

Admin Instructions: Student must hand-carry medical records, including the certified ground based controller physical.

Quota Control: 325 OSS/OSTT.

W-MCE-1C551D—Aerospace Control and Warning Weapons Director Modular Control Equipment (MCE) Course—PDS Code X4C—Tyndall/19 wk 4 days/AFSC 1C551D—Oct 96

Training for enlisted personnel who will perform duties as entry level weapons controllers. Includes subjects designed to qualify the graduate to solve the air mass problem, direct aircraft conducting air defense and tactical missions, coordinate aircraft control and warning activities, interact with other controlling agencies, understand the principles of radar and electronic countermeasures (ECM) and

electronic counter countermeasures (ECCM), and be familiar with the air defense organization of North American Aerospace Defense (NORAD) and the Tactical Air Control System; employment of MCE operator interface equipment; OCU familiarization and preparation; data base preparation; VCAU preparation; and weapons control procedures. The medium used to provide live weapons controlling practice is the fully automated MCE, utilizing various aircraft. Training is accomplished using MCE. Includes both simulated and live events. AFSC 1C551 will be awarded the D shred upon course completion.

Special Requirements: Secret clearance by class start date. A current certified ground based controller physical must be completed according to AFMAN 48-123, paragraph 7.3, before arrival at Tyndall AFB and must remain current throughout training. Code AAB will be completed 60 days before arrival at Tyndall AFB and must remain current throughout training.

Admin Instructions: Student must hand-carry medical records, including the certified ground based controller physical.

Quota Control: 325 OSS/OSTT.

E3ACR1C571 000—Aerospace Control and Warning System Craftsman Course—PDS Code XBL—Keesler/2 wk/AFSC 1C571—Jan 96

Trains 1C551 personnel to be aerospace control and warning system craftsmen. Instructs in functional relationships within and among aerospace control and warning system operations EW system capabilities, ground environmental systems, and ECM/ECCM capabilities. Familiarization training in mission planning, coordinating, reporting, and Theater Air Control Systems. Graduates should be able to perform at a craftsman level and supervise functions such as aerospace surveillance, manning, briefing, and debriefing.

Prerequisites: SSgt, AFSC 1C551.

Quota Control: HQ AFPC/DPPAPEO.

V3AZP1C651 000—Satellite Data Systems Supervisor (DSS)—PDS Code J5W—Peterson/7 wk—Apr 95

Provides comprehensive academic and demonstration-performance training in the duties of space oeprations center DSS. Training consists of informal classroom and hands-on instruction. Formal evaluation consists of written tests. Summative evaluation consists of simulated, real-world, performance scenarios. Final qualification training, upgrade evaluation, and recurring training are administered by gaining unit.

Prerequisites: Be selected for assignment to 21st Operations Group crew duties at a space communications squadron.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Graduates enter UQT program.

Quota Control: 2 AF/DOP.

V3AZP1C651 001—BMWES Site 2 Detection Radar Operator (DRO)—PDS Code K3D—Peterson/2 wk 2 days—Apr 95

Provides academic and limited positional training in the tasks, duties, and responsibilities of BMEWS Missile Warning Operations Center (MWOC) Detection Radar Environmental Display Operators (DRO). Training consists of formal classroom instruction using lectures, discussion, and role playing supported by various audiovisual devices. Students use self-study guides (SSG) and computer-aided instruction (CAI) as an adjunct to classroom instruction. Hands-on simulation is provided via a computer-aided instruction simulator (CAIS) in conjunction with the students from AMS 020-000 class. Formative evaluations consists of written tests and CAIS scenarios. Summative evaluation is a comprehensive, simulated real-world, problem-solving scenario administered via CAIS. Final mission ready training, upgrade evaluation and recurring training are administered by the gaining unit.

Tentative Base of Assignment: 13 SWS, Clear AFS AK.

Prerequisites: Be selected for assignment to crew duty as a DRO (SSgt and below) at 13 SWS, Clear AFS AK.

Special Requirements: Secret clearance by class start date.

Quota Control: 2 AF/DOP.

V3AZP1C651 005—1 SOPS GSO Initial Qualification Training—PDS Code XTW—Vandenberg/12 wk 4 days—Oct 96

1st Space Operations Squadron (1 SOPS) Ground Systems Operator (GSO) Initial Qualification Training (IQT) provides the student academic and simulator training in the tasks, duties, and responsibilities of a 1 SOPS GSO. Training consists of satellite and ground operations training. The student learns ground telemetry, tracking, and command systems; Air Force Satellite Control Network hardware; Command and Control Systems operations; communications systems; documentation; as well as proper troubleshooting procedures for ground anomaly resolution. Training consists of informal classroom lecture, computer-based training, and simulation. Each student conducts simulated vehicle supports and learns the complexities of the ground system. Students graduate with the technical knowledge and proficiency to enter unit qualification training and ensure the integrity of the satellite operations mission.

Prerequisites: Currently hold a 1C6XX AFSC.

Special Requirements: Secret clearance before class start date. Uniform of the day is required.

Quota Control: 2 AF/DOP.

V3AZP1C651 006—3 SOPS SSO Initial Qualification Training—PDS Code XTX—Vandenberg/13 wk 3 days—Oct 96

3d Space Operations Squadron (SOPS) Satellite Systems Operator (SSO) initial qualification training (IQT) provides students with academic and simulator training in the tasks, duties, and responsibilities of a 3 SOPS SSO. Training consists of satellite and ground operations training. The student learns ground telemetry, tracking, and command systems; Air Force Satellite Control Network hardware; Command and Control System operations; communications systems; documentation; as well as proper troubleshooting procedures for ground anomaly resolution. Includes formal classroom lecture, computer-based training, and simulation. Each student conducts simulated vehicle supports and learns the complexities of the ground system and satellite commanding. Students graduate with the technical knowledge and proficiency to enter unit qualification training and ensure the integrity of the satellite operations mission.

Prerequisites: Currently hold a 1C6XX AFSC.

Admin Instructions: Individuals scheduled for this training must report to Billeting, bldg 13005, DSN 276-1844, Vandenberg AFB, no later than 2 duty days before class start date. Upon arrival, individuals should contact the 534th Training Squadron Student Administration Section during normal duty hours to schedule their inprocessing. DSN 550-7502/7503.

Special Requirements: Secret clearance before class start date. Uniform of the day is required.

Quota Control: 2 AF/DOP.

V3AZP1C651 007—2 SOPS/GPS Ground Systems Operator IQT—PDS Code 64F—Vandenberg/6 wk—Oct 96

The NAVSTAR Global Positioning System (GPS) Ground Systems Operator (GSO) training course consists of five blocks of training: (1) The Introduction to SOC 32 Operations Training block provides students with background knowledge of GPS operations, 2d Space Operations Squadron (2 SOPS) missions, and background satellite navigational training methods; (2) The Master Control Station (MCS) training block provides students with academic training on MCS operations and routine/anomalous activities performed in Module 15 (MOD 15) as well as tasks, duties and responsibilities of a ground systems operator (GSO); (3) The ground antenna (GA) training block provides students with academic and emulator training in the routine/anomalous operations and configurations of a remote site GA for contact operations and Readiness Testing; (4) The Monitor Station (MS) training block provides students with academic and emulator training in the routine/anomalous operations and configurations of an MS, including telemetry monitoring and tracking of satellite vehicles at specific sites and times; (5) The Communications (Comm) training block provides students with academic training in the routine/anomalous operations and configurations of communications circuits as they apply to the GSO. Training consists of informal classroom lectures and satellite training emulations. Each student learns to recognize given situations and respond to routine and anomalous situations as they apply to the GSO. Students graduate with the technical knowledge and proficiency to enter unit qualification training (UQT) and to ensure the integrity of the satellite operations mission.

Prerequisites: Currently holds a 1C631 AFSC.

Special Requirements: Secret clearance before class start date. Uniform of the day is required.

Admin Instructions: Report to billeting, Bldg 13005, Vandenberg AFB CA, no later than 2 days before class start date. Upon arrival, contact the 534th Training Squadron Student Admission Section (during normal duty hours) to schedule inprocessing, current DSN still located at Falcon AFB 560-7502/7503.

Quota Control: 2 AF/DOP.

V3AZP1C651 008—Satellite Systems Operator IQT—PDS Code 64D—Vandenberg/8 wk—Oct 96

Satellite Systems Operator Initial Qualification Training course consists of six blocks of training: (1) The Introduction to Navstar Global Positioning System (GPS) Operations training block provides students with background knowledge of the elements and operation of GPS, including System Introduction; registration, introduction and system basics, facilities, mission, duty positions, knowledge level training on space operations squadron-based security practices; (2) Master Control Station (MCS) Operations: Introduction to squadron computer equipment, timing sources, crew changeover responsibilities; (3) Master Control Station console operations: Introduction to console operations, positional displays, system software; (4) Communication procedures: Introduction to external agencies, configuration changes, anomalous and routine operations; (5) Ground antenna procedures: satellite tracking, Ground Antenna operations for nominal and anomalous operations and procedures, communication equipment and component interaction, and communication circuit configuration; (6) Space segment: Introduction to the GPS space segment, bus subsystems, and payload subsystems. Training consists of informal classroom lectures and training knowledge on the Crew Training Emulator (CTE). Students graduate with the technical knowledge and proficiency to enter Unit Qualification Training (UQT) and ensure the integrity of the satellite operations mission.

Prerequisites: Currently hold a 1C6X1 AFSC.

Special Requirements: Must hold at least a SECRET clearance before class start date. Uniform of the day is required.

Admin Instructions: Report to billeting, Bldg. 13005, Vandenberg AFB CA, no later than 2 days before class start date. Upon arrival, contact the 534th Training Squadron Student Admission Section (during normal duty hours) to schedule inprocessing, current DSN still located at Falcon AFB CO at 560-7502/7503.

Quota Control: 2 AF/DOP

X3ABR1N031 003—Intelligence Applications Apprentice—PDS Code 533—Goodfellow/22 wk/AFSC 1N031—Apr 96

Provides training in the applications of intelligence functions to include collecting, analyzing, and evaluating intelligence information, and producing and providing various all-source intelligence products. Emphasizes presenting aircrew intelligence training, preparing intelligence displays, presenting intelligence briefings and correspondence, maintaining map and chart products and reference files, producing mission planning and execution support materials for combat and noncombat aerospace operations, operating combat intelligence system, and researching, analyzing, and evaluating all-source intelligence information.

Special Requirements: Secret clearance by class start date. Each student must have a single scope background investigation (SSBI) completed, or at least initiated, before reporting to Goodfellow. The SSBI must be processed according to AFI 31-501 to fulfill requirements of USAFINTEL 201-1. Lackland AFB or unit initiating SSBI must ensure completed Standard Form 86 is in personnel records of BMT graduates or personnel assigned to this course. Unit initiating SSBI should have SSBI report of investigation sent to Chief of Security Police, Goodfellow AFB TX 76908-4002. Include in the orders a statement that the SSBI has been completed or Defense National Agency Request is in the personnel records of BMT graduates of this course. ***NOTE:*** Former members of the Peace Corps are not eligible for an assignment in the intelligence capacity (reference AFI 36-2110).

Quota Control: 2 AF/DOP.

X3ABR1N131 005—Imagery Analysis Apprentice—PDS Code 652—DOD 252—Goodfellow/24 wk/AFSC 1N131—Jan 96

Provides training as an imagery analysis apprentice. Instruction is provided in intelligence fundamentals, military theory, intelligence reference materials, maps, charts, and geodesy, reconnaissance platforms and sensor systems, imagery fundamentals, surface transportation, industries, missile, ground, electronic, air, and Naval orders of battle, air defense systems, computer fundamentals, intelligence data handling systems, and softcopy imagery exploitation. Emphasis on terrain analysis and damage assessment separate this course from its former version.

Special Requirements: Secret clearance by class start date and possess a TS/SCI clearance before week 19 of the course.

Quota Control: 2 AF/DOP.

X3ACR1N171 001—Imagery Analysis Craftsman—PDS Code XZ1—DOD 242—Goodfellow/2 wk—Oct 96

This course is designed to upgrade Air Force imagery analysts to the 7-level. Trains analytical techniques using all-source intelligence to establish and validate imagery collection requirements. Analysts learn to apply exploitation and production management techniques to assess, compose, and validate imagery related reports and products to include damage assessment, exploitation management, and terrain analysis. Trains the creation and application procedures for assembly, review, validation and dissemination of imagery reports and products. Course is primarily performance based.

Prerequisites: The minimum acceptable qualification is E-5 with at least 18 months time-in-grade in the 1N151 or 1N171 AFSC. Students must complete a prerequisite training module before attending the course. Nominated individuals must contact 315 TRS/DOE, DSN 477-5630, for requisite study materials no later than 45 days before class start date.

Specialty Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: HQ AFPC/DPPAPEO.

X3ABR1N330 001—Apprentice Crypto Linguist Specialist (Non-Target)—PDS Code 9EA—DOD 232—Goodfellow/2 wk/AFSC*—Oct 96

Provides training for graduates of the various low-flow Defense Language apprentice cryptologic linguist specialists (non-target) (all services).

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFR 50-40, Management of the Defense Foreign Language Program.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date. Reliability screening according to AFI 36-2104 (formerly AFR 35-99).

Quota Control: 2 AF/DOP.

*Specialty Code: Air Force AFSC 1N33XX, Navy NEC 92XX, Army MOS 98G11XX, Marine MOS 2670. The XX designators will be replaced with the appropriate language identifier.

X3ABR1N332A 012—Cryptologic Technician Interpretive (Spanish)—PDS Code PH0—Goodfellow/18 wk 2 days/AFSC: NEC 9203/MOS 2643—Dec 93

Provides training for Spanish language graduates of the Defense Language Institute and those personnel who successfully complete the appropriate Spanish by-pass test in the knowledge and skills necessary to perform as apprentice cryptologic technician interpretive, NEC 9203 (Navy) and MOS 2643 (Marines).

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading).

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

X3ABR1N332A 013—Electronic Warfare (EW)/Signal Intelligence Voice Interceptor (Spanish)—PDS Code W4G—Goodfellow/16 wk/MOS 98G1LQB—Oct 96

Provides training for Spanish language graduates of the Defense Language Institute and those personnel who successfully complete the appropriate Spanish by-pass test in the knowledge and skills necessary to perform as electronic warfare/signals intelligence voice interceptors.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in reading and level 2 in listening comprehension).

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

X3ABR1N332A 014—Apprentice Romance Cryptologic Linguist Specialist, Spanish—PDS Code W4H—DOD 232—Goodfellow/12 wk/AFSC 1N332A—Oct 96

Provides training for Spanish language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice AFSC 1N332A personnel.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFJI 14-107.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: HQ AETC/TTPP.

X3ABR1N332C 002—Cryptologic Technician Interpretive (French)—PDS Code 3A1—Goodfellow/9 wk 2 days/AFSC*—Oct 96

Provides training for French language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as basic cryptologic technician interpretive, 9204.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined by AFJI 14-107.

Special Requirements: Top Secret clearance with eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

*Speciality Code: Navy NEC 9402.

X3ABR1N333A 000—Electronic Warfare (EW)/Signals Intelligence Voice Interceptor (Russian)—PDS Code XMO—Goodfellow/12 wk 3 days/AFSC 1N333A*—Oct 96

Provides training for Russian language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice Army (98G1LRU) personnel.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined by AFJI 14-107.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

*Specialty Codes: Army MOS 98G1LRU

X3ABR1N333A 003—Slavic Crypto Linguist Apprentice, Russian—PDS Code N25—Goodfellow/16 wk 3 days/AFSC 1N333A—Mar 94

Provides training for Russian language graduates of the Defense Language Institute in the knowledge and skills necessary to perform

as apprentice AFSC 1N333A personnel.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined by AFR 50-40.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

X3ABR1N333A 011—Cryptologic Technician Interpretive (Russian)—PDS Code 89D—DOD 232—Goodfellow/16 wk 2 days/NEC 9201/MOS 2675—Dec 93

Provides training for Russian language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as basic NEC 9201 Cryptologic Technician Interpretive (Russian) (Navy) or EW/SIGINT Voice Interceptor Operator MOS 2675 (Russian) (Marine).

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFR 50-40.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

X3ABR1N334A 009—Apprentice Far-East Crypto Linguist Specialist (Chinese)—PDS Code 5ZG—Goodfellow/19 wk 4 days/AFSC *—Apr 96

Provides training for Chinese language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice Air Force (1N334A), Navy (NEC 9211), Marine Corps (2672), and Army (98G1LCM) personnel.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFR 50-40.

Special Requirements: Top Secret clearance with eligibility for SCI required by class start date.

Quota Control: 2 AF/DOP.

*Specialty Codes: Air Force AFSC 1N334A, Navy NEC 9211, Marine Corps MOS 2672, Army MOS 98G1LCM.

X3ABR1N334B 004—Apprentice Far East Crypto Linguist Specialist (Vietnamese)—PDS Code 8T4—DOD 232—Goodfellow/19 wk 4 days/AFSC*—Apr 96

Provides training for Vietnamese language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as Apprentice Far East Crypto Linguist Specialist, AFSC 1N334B; EW/SIGINT Voice Interceptor, MOS 98G1LVN (Army); or Cryptologic Technician Interpretive, NEC 9213 (Navy).

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFR 50-40.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

*Specialty Codes: Air Force AFSC 1N334B, Navy NEC 9213, Army MOS 98G1LVN.

X3ABR1N334G 013—Apprentice Far-East Crypto Linguist Specialist (Korean)—PDS Code 5YW—Goodfellow/19 wk 4 days/AFSC *—Apr 96

Provides training for Korean language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice Air Force (1N334G), Navy (NEC 9212), and Marine Corps (MOS 2673) personnel.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 on listening comprehension and level 2 in reading) as defined in AFR 50-40.

Special Requirements: Top Secret clearance with eligibility for SCI required by class start date.

Quota Control: 2 AF/DOP.

*Specialty Codes: Air Force AFSC 1N334G, Navy NEC 9212, Marine Corps MOS 2673.

X3ABR1N334G 014—EW/SIGINT Voice Interceptor (Korean)—PDS Code 5SZ—Goodfellow/18 wk/AFSC *—Apr 96

Provides training for Korean language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice Army (98G1LKP) personnel.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFR 50-40.

Special Requirements: Top Secret clearance with eligibility for SCI required by class start date.

Quota Control: 2 AF/DOP.

*Specialty Codes: Army MOS 98G1LKP.

X3ABR1N335A 014—EW/SIGINT Voice Interceptor (Arabic)—PDS Code 8TT—Goodfellow/14 wk 1 day/AFSC 98G1LAD—Oct 96

Provides training for Arabic language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice EW/SIGINT Voice Interceptor MOS 98G1LAD (Army).

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFR 50-40.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

X3ABR1N335A 019—Apprentice Mid-East Crypto Linguist Spec (Arabic)—PDS Code 335—Goodfellow/19 wk 4 days—Oct 96

Provides training for Arabic language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice Air Force (1N335A), Navy (NEC 9216), and Marine Corps (MOS 2671) personnel.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFR 50-40.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

*Specialty Codes: Air Force AFSC 1N335A, Navy NEC 9216, Marines MOS 2671.

X3ABR1N335C 004— Apprentice Mid East Crypto Linguist Spec (Hebrew)—PDS Code 7Y0—Goodfellow/19 wk 4 days/AFSC*—Oct 96

Provides training for Hebrew language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice Air Force (AFSC 1N335C), Navy (NEC 9215), and Marines (MOS 2674) personnel.

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) as defined in AFR 50-40.

Special Requirements: Top Secret clearance with eligibility for SCI required by class start date.

Quota Control: 2 AF/DOP.

*Specialty Codes: Air Force AFSC 1N335C, Navy NEC 9215, Marines 2674.

X3ABR1N335D 000— Apprentice Mid East Crypto Linguist (Farsi)—PDS Code 9L2—Goodfellow/12 wk 4 days/AFSC *—Oct 96

Provides training for Farsi language graduates of the Defense Language Institute in the knowledge and skills necessary to perform as apprentice Cryptologic Linguist Specialist AFSC 1N335D, Electronic Warfare/Signals InteIlince Interceptors MOS 98G1LPF (Army), Cryptologic Technician Interpretive (Farsi) NEC 9209, or Electronic Warfare/Signals Intelligence Interceptor Operator (Farsi) MOS 2671 (Marine).

Prerequisites: Minimum language proficiency level of 2/2 (level 2 in listening comprehension and level 2 in reading) skill) as defined in AFR 50-40.

Special Requirements: Top Secret clearance and eligibility for SCI access required by class start date.

Quota Control: 2 AF/DOP.

*Specialty Codes: Air Force AFSC 1N335D, Army MOS 98G1LPF, Navy NEC 9209, Marines MOS 2671.

X3AZR1N354G 001—Transcriber/Gister (Korean)—PDS Code 96L—Goodfellow/9 wk—Dec 93

Develops skills for Army personnel to perform duties as transcriber/gister (ASI C8).

Prerequisites: MOS 98G1LKP.

Special Requirements: Top Secret clearance and be eligible for access to SI before class start date.

Quota Control: 2 AF/DOP.

X3ALR1N431 000—Navy Apprentice Lateral Analysis and Reporting—PDS Code XWR—Goodfellow/13 wk 3 days—Jan 96

Provides basic level training in knowledge and skills needed to perform duties of an apprentice level analyst. The course trains E-4 through E-7 Navy personnel in collection management, target location techniques, cryptanalysis, traffic analysis, electronic intelligence (ELINT), microcomputer operations, cryptologic shore support activities, and technical reporting procedures and vehicles. In addition to the academic training, military training is provided on safety, military watches, and a variety of military subjects. This course is taught concurrently with course X3ALR1N431 001 (USMC Apprentice Lateral Analysis and Reporting).

Prerequisites: E-4 to E-7 with a minimum of one operational tour of not less than 1 year in the cryptologic community prior to assignment to this course.

Special Requirements: Top Secret clearance with access to Sensitive Compartmented Information. Security clearances should be forwarded via DSSCS to SSO GDFLW.

Quota Control: 2 AF/DOP.

*NEC 9137 awarded upon completion of training.

X3ALR1N431 001—USMC Apprentice Lateral Analysis and Reporting—PDS Code 254—Goodfellow/16 wk 2 days/ MOS 2629—Oct 96

Provides basic level training in knowledge and skills needed to perform duties of an apprentice level analyst. The course trains E-4 through E-7 Marine Corps personnel in collection management, target location techniques, cryptanalysis, traffic analysis, electronic intelligence (ELINT), microcomputer operations, cryptologic shore support activities, and technical reporting procedures and vehicles utilizing technical control and analysis center (TCAC) equipment. This course is taught concurrently with course X3ALR1N431 000 (Navy Apprentice Lateral Analysis and Reporting) for the first 68 academic days.

Prerequisites: E-4 to E-7 with a minimum of one operational tour of not less than 1 year in the cryptologic community before assignment to this course.

Special Requirements: Top Secret clearance with access to Sensitive Compartmented Information. Security clearances should be forwarded via DSSCS to SSO GDFLW.

Quota Control: 2 AF/DOP.

X3ALR1N431 002—USMC Apprentice Lateral Analysis and Reporting—PDS Code 281—Goodfellow/17 wk 2 days/AFSC 2629—Oct 96

Provides basic level training in knowledge and skills needed to perform duties of an apprentice level analyst. The course trains E-4 through E-7 Marine Corps personnel in collection management, target location techniques, cryptanalysis, traffic analysis, electronic intelligence (ELINT), microcomputer operations, cryptologic shore support activities, and technical reporting procedures and vehicles. In addition to the academic training, military training is provided on safety, military watches, and a variety of military subjects. This course is taught concurrently with course X3ALR1N431 000 (Navy Apprentice Lateral Analysis and Reporting) for the first 68 academic days. Will replace X3ALR1N431 001 (USMC Apprentice Lateral Analysis and Reporting) when activated during fiscal year 1997.

Prerequisites: E-4 to E-7 with a minimum of one operational tour of not less than 1 year in the cryptologic community prior to assignment to this course.

Special Requirements: Top Secret clearance with access to Sensitive Compartmented Information. Security clearances should be forwarded via DSSCS to SSO GDFLW.

Quota Control: 2 AF/DOP.

X3ABR1N431 006—Signals Intelligence Analysis Apprentice—PDS Code 5SY—Goodfellow/17 wk 1 day—Oct 96

Fundamental subjects common to the 1N4X1 career field. Students will receive basic information in knowledge and practical appliations of security programs, the intelligence environment, communications theory, methods and modes, intelligence collection management, map reading skills, communications analysis, the advisory support programs associated with reconnaissance operations, signals intelligence reporting and intelligence computer systems applications. Training culminates in practical simulated operations block of instruction where students apply all knowledge and practical experiences. The 3-level AFSC is award after graduation.

Prerequisites: Physical profile (PULHES) 333221 or higher.

Special Requirements: Top Secret clearance plus eligibility for access to Sensitive Compartmented Information (SCI) material is required by class start date..

Quota Control: 2 AF/DOP.

X3ABR1N431 007—Electronic Warfare/Signals Intelligence Analysis—PDS Code 1IC—DOD 232—Goodfellow/14 wk 1 day/AFSC *—Oct 96

Fundamental subjects common to the 98C career field. Students receive basic information in knowledge and practical applications of the intelligence disciplines, the US SIGINT system, SIGINT sites and functions, collection management and tasking, communications methods and modes, organizational relationships and transmission modes, traffic analysis, Electronic Intelligence (ELINT) analysis, computer applications, SIGINT reports, and safeguarding classified and sensitive information.

Prerequisites: See AR 611-201.

Special Requirements: Students require a TOP SECRET security clearance with access to Sensitive Compartmented Information (SCI) prior to class entry.

Quota Control: 2 AF/DOP

* MOS 98C10 is awarded upon completion of training.

X3ABR1N451 006—Fundamental Military Cryptanalyst—PDS Code 4YS—Goodfellow/16 wk—Oct 96

Applies logic, reasoning, mathematical techniques, statistics, and basic language characteristics to identify and recover message text and encryption keys for various types of hand-generated systems without prior knowledge of the system or the keys being employed. Employs the use of computer systems as an aid to cryptologic procedures.

NOTE: Awards Army ASI T9 or Marine MOS 2649. The Air Force SEI 1ZD is awarded upon completion of the course, plus 6 months of operational experience and recommendation of the unit operations officer.

Prerequisites: Completion of course X3ABR1N431 002, X3ABR1N431 004, X3ABR1N431 006, X3ABR1N431 007, X3ACR1N431 001, X3AZR1N451 008, or equivalent and one utilization tour.

Special Requirements: Top Secret clearance with final access to SI required before the first day of class.

Quota Control: 2 AF/DOP.

X3AZR1N451 009—Fundamental Military Cryptanalyst—PDS Code 220—Goodfellow/16 wk—Oct 96

Applies logic, reasoning, mathematical techniques, statistics, and basic language characteristics to identify and recover message text and encryption keys for various types of hand-generated systems without prior knowledge of the system or the keys being employed. Employs the use of computer systems as an aid to cryptologic procedures.

NOTE: Awards Army ASI T9 or Marine MOS 2649. The Air Force SEI 1ZD is awarded upon completion of the course, plus 6 months of operational experience and recommendation of the unit operations officer.

Prerequisites: Completion of course X3ABR1N431 002, X3ABR1N431 004, X3ABR1N431 006, X3ABR1N431 007, X3ACR1N431 001, X3AZR1N451 008, or equivalent and one utilization tour.

Special Requirements: Top Secret clearance with final access to SI required before the first day of class.

Quota Control: 2 AF/DOP.

X3ACR1N471 000—Signals Intelligence Analysis Craftsman—PDS Code 3A8—Goodfellow/2 wk/AFSC 1N471—Jan 96

A mandatory 7-skill level awarding course for all SSgts with AFSC 1N451 which must be completed before awarding of AFSC 1N471. Students receive training in intermediate level management techniques and applications, global awareness, report sanitization, collection management, and intelligence oversight.

Prerequisites: Before attending this in-residence course, students must complete 1N451 CDC to obtain the knowledge level required to successfully complete the in-residence course. Students must also complete prerequisites contained in the 1N4X1 Career Field Education and Training Plan.

Special Requirements: A Top Secret clearance with access to Sensitive Compartmented Information is mandatory to attend this course and for award of AFSC 1N471.

Quota Control: AFPC/DPPAPEO.

X3AZR1N471 004—Consolidated Intermediate Analysis and Reporting—PDS Code X01—Goodfellow/15 wk 4 days—Apr 95

Provides training in the knowledge and skills needed to perform the duties of an intermediate level analyst. Course trains Air Force, Army, Navy, and Marine Corps personnel in AFSC 1N471, Army MOS 98C, Navy NEC 9137, and Marine Corps MOS 2629, in the skills required for analysis and reporting of signals intelligence (SIGINT). Includes collection management, target location techniques, traffic analysis, electronic preparation of the battlefield, information briefing, SIGINT computer applications, advisory support, and report preparation and forwarding procedures. Course objectives dictate a highly performance-oriented course with extensive use of SIGINT computer resources currently used at operational sites.

Prerequisites: Army—SSgt (some TSgts) with MOS 98C and 5 to 8 years of time in service (TIS). Air Force—SSgt with 5 to 10 years of TIS and one operational tour in AFSC 1N451. Navy—SSgt and TSgt (some MSgt Linguists) with NEC 9137, 6 to 10 years of TIS and one

operational tour as a 9137. Marine Corps—some SSgts, TSgts, and MSgts with secondary MOS 2629; graduate of the Apprentice A&R course or the NCS CK-155 course; and have field experience in either a radio battalion or CCP-funded billet.

Special Requirements: Top Secret clearance with access for Special Intelligence and TK material. Security clearances must be forwarded to DSSCS through SSO channels 10 days before class start.

Quota Control: 2 AF/DOP.

X3ABR1N531 003—Electronic Signals Intelligence Exploitation Apprentice—PDS Code V83—DOD 233—Goodfellow/14 wk 2 days/AFSC 1N531—Oct 96

Principles of electronic signal production; elements of signal theory; radar concepts and operation; computer operations; basic signal display and recording techniques; electronic monitoring equipment and systems including signal display devices, magnetic and photographic recorders, signal analysis devices, and monitoring systems; principles and techniques of signal analysis and identification; reference documents; signal research; airborne platforms; plotting; electronic monitor logs; logging procedures and reporting format electronic combat; space operations; and practice in electronic monitoring operation.

Special Requirements: Top Secret clearance with SI access required by 6th week of course. Reliability screening according to AFI 36-2104 (formerly AFR 35-99).

Quota Control: 2 AF/DOP.

X3ACR1N571 000—Electronic Signals Intelligence Exploitation Craftsman—PDS Code 2VI—DOD 233—Goodfellow/2 wk—Jan 96

Provides advanced knowledge and skills necessary to perform the duties of a craftsman-level ELINT operator or analyst. Includes instruction in ELINT/SIGINT collection management process to include formulating detailed collection requirements, tasking collectors to obtain required information, disseminating collection results, and assessing collection satisfaction. Also includes probability and statistics to include probability of events, statistical samples, statistical measures, and density functions.

Prerequisites: Completion of ELINT 3-skill level AFSC-awarding course. SSgt and SSgt promotees in AFSC 1N551. Career airmen with 4-10 years of time in service are targeted for the course. Must have completed the 1N571 career development course (CDC) before attending.

Special Requirements: Course classification is Top Secret Sensitive Compartmented Information. Attendees must possess a Top Secret clearance and be indoctrinated for Special Intelligence and TK material before attending course. Forward security clearances DSSCS to SSO GDFLW/INS 10 days before class start.

Quota Control: HQ AFPC/DPPAPEO.

X3ABR1N631 004—Electronic Systems Security Assessment—PDS Code 4YQ—Goodfellow/10 wk 2 days/AFSC 1N631—Oct 96

Students receive basic information in knowledge and practical applications of DoD and Air Force information security program requirements. Knowledge includes electromagnetic radiation; fundamentals of communications; administrative and operational command, control, communications, and computer functions in the Air Force; intelligence threat to and vulnerabilities associated with US communications; communications security (COMSEC) policy and programs; techniques of mission planning and briefing; techniques used to develop essential elements of information; threat assessment techniques; radio electronic combat (REC) threat; RED FORCE operating and reporting procedures; and electronic systems security assessment mission management. Practical application encompasses computer operating systems; word processing applications; computer systems management; virus detection; and COMSEC monitoring, transcribing, analyzing, and reporting.

Special Requirements: A Secret clearance is mandatory for entrance into the course and eligibility for a Top Secret-SCI clearance is mandatory for award of the 1N6X1 AFSC.

Quota Control: 2 AF/DOP.

X3ACR1N671 000—Electronic Systems Security Assessment Craftsman—PDS Code 036—Goodfellow/2 wk/AFSC 1N671—Jan 96

A mandatory 7-skill level awarding course for SSgts with AFSC 1N651. Course must be completed before award of AFSC 1N671. Students receive intermediate-level practical applications on initial threat data, survey and electronic systems security assessment interviews, telecommunications monitoring and assessment operations, communications and survey analysis, and reports preparation and forwarding procedures. Knowledge level materials are contained in the 1N671 career development course (CDC).

Prerequisites: Before attending this course, students must complete the 1N671 CDC to obtain the knowledge level required to successfully complete the in-residence course.

Special Requirements: A Top Secret clearance with eligibility for Sensitive Compartmented Information (SCI) is mandatory to attend this course. Students must also have a Top Secret-SCI clearance for award of AFSC 1N671.

Quota Control: HQ AFPC/DPPAPEO.

L3ALR1S031 002—Safety Apprentice—PDS Code U7W—DOD 493—Lackland/8 wk 1 day/AFSC 1S031/MASL D122023—Apr 95

Provides training for Air Force, ANG, Reserve, and international personnel to perform duties as safety apprentice. Includes safety career field; publications; safety functions; safety programs; safety presentations; safety training; traffic safety programs; AFOSH program; inclusion of safety criteria; contract safety; hazard abatement; safety councils and committees; inspections, assessments, and staff assistance visits; general safety criteria; industrial areas and facilities; nonindustrial areas and facilities; aircraft operations and maintenance; facility inspections; inspection reports; post report activities; mishap reports and logs; and ASAP.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

L3AZR1S071 003—Ground and Weapons Safety Program Management—PDS Code MZ6—Lackland/6 wk 4 days/MASL D122042—Apr 95

Instructs experienced safety technicians to perform supervisory/managerial duties as ground/weapons safety office managers, responsible for wing/base mishap prevention programs. Includes instruction in: program analysis; planning; philosophy; blueprint interpretation; orientation in federal hazard communications and hazardous materials programs; characteristics of conventional munitions systems; storage, transportation and inspection of munitions areas; explosives facility site planning,

licensing, review and coordination of site plan documents.

Prerequisites: Graduate of L3AZR1S071 003, Apprentice Safety Specialist course. Completion of the 1S051 Career Development Course (CDC) are mandatory of Air Force personnel. Minimum grade and training requirements: E-5 and above, DOD civilians, and safety interns must possess CAFSC 1S071 or higher. All attendees must have 36 months' experience since 3-level course graduation. For other military service personnel, completion of L3AZR1S071 003 is desirable. ECL 70.

Quota Control: 2 AF/DOP.

L3AZR1S071 004—Flight Safety NCO—PDS Code 8RH—Lackland/2 wk/MASL D122077—Apr 95

Designed for personnel who perform duties as the wing or base safety NCO. Includes history of flight safety; principles of mishap prevention; flight safety program responsibilities; flight safety reference materials; relationships with other agencies; airfield operations requirements; inspections of hazardous operations and areas; requirements of the Hazardous Air Traffic Report (HATR); preparation of the HATR message; requirements of the Bird Aircraft Strike Program; requirements of the Hazard Report Program; processing a hazard report; objectives of inspections and evaluations; objectives of mishap investigation and reporting; mishap categories and classes; investigation responsibilities; and preparing mishap reports.

Prerequisites: Enlisted members in the grade of E-5 or above who are or will be performing duties as the wing or base flight safety NCO assigned to the wing or base flight safety office. Students who have a background in aircraft maintenance or have attended a familiarization course on their base aircraft are preferred.

Quota Control: 2 AF/DOP.

J3ACP1T071000—AFSC 1T071, SERE Training Instructor Seven-Level Upgrade Course—PDS Code 146—Fairchild/3 wk 4 days—Oct 96

Exposes 5-skill level Air Force survival, evasion, resistance, and escape (SERE) training instructors to extreme environments (barren land arctic, desert, jungle, and open ocean). Attendees are afforded hands-on opportunities to adapt and evaluate the effectiveness of survival skills in these environments. Those SERE training instructors attending will individually accomplish tasks necessary for survival in each environment and extensively debrief and discuss effectiveness of adaptations made. Course content is the experiential base for 7-skill level and higher management of SERE training programs. Baggage should be limited to no more than 3 check-in pieces. One carry-on is allowed per standard airline guidance. Each attendee will complete a student handout, supplied by the course manager upon notification of class roster. The logistics of this course require close coordination among all attendees and the course manager. An information packet, including complete course information and equipment lists, will be supplied by the course manager. Contact the course manager as soon as possible after notification of selection for attendance. Course manager can be reached at 66 TRS/7-level course, DSN 657-3501/5471 or (509) 247-3501, email 7levelcm@336server.fairchild.af.mil, fax DSN 657-2713. Travel orders must include variations authorized and excess baggage authorized. Training will take place at Eielson AFB, AK; Yuma Proving Grounds, Army Range, AZ; Pensacola NAS, FL; Hickam AFB, HI. Members will be responsible for providing their own food for training. Time will be permitted before each trainng phase to purchase necessary items. Send a copy of orders to course manager as soon as possible. The course manager will need a copy of your orders to make travel arrangements between training sites. Attendees will arrange for travel to Fairchild AFB, WA. Arrive NLT 1 day before class start date. Arrange for travel from Hickam AFB, HI, back to home station. Attendees must make billeting arrangements at Fairchild AFB, DSN 657-5519 (509) 247-5519. Ensure the billeting staff understands the reservation is for survival training. All other billeting arrangements will be made by course manager.

Prerequisites: AFSC 1T051 in 7-skill level upgrade training.

Special Requirements: Complete J3ACP1T071 000 Student Handout 1 by class start date.

Quota Control: HQ AETC/XOTI.

J3ABR1T131 001—Aircrew Life Support Apprentice—PDS Code AQ4—DOD 860—Sheppard/6 wk 1 day/AFSC 1T131/MASL D122018—Jun 94

Inspection and maintenance of aircrew life support equipment such as personnel parachutes, torso harness assembly, life rafts, life preservers, survival kits, helmets, oxygen masks, nuclear flash blindness goggles, night vision goggles, and the ground crew/aircrew chemical defense ensemble. Trains use of life support test equipment in inspection and operational check of emergency electronic communication and signaling equipment. Issues, fits, and adjusts aircrew life support equipment. Conducts ground crew/aircrew decontamination procedures training.

Prerequisites: ECL 70 SA.

Quota Control: 2 AF/DOP.

J4AST1T151 002—Maintenance of Aircrew Night Vision Goggles—PDS Code XN6—Sheppard/1 wk—Jun 94

Provides training in the maintenance and inspection of aircrew night vision goggles to include the physiological effects, maintenance, testing, and purging of night vision goggles.

Prerequisites: AFSC 1T151. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3ACR1T171 000—Aircrew Life Support Craftsman—PDS Code XR6—Sheppard/2 wk/AFSC 1T171—Jan 96

Mandatory 7-skill level AFSC awarding for Air Force active duty and ANG/AFRES personnel in AFSC 1T171. Provides training in accident reporting procedures, aircrew instruction, Explosive Safety Program, supply and material responsibilities and accountability, and evaluation of the technical order system. Also includes advanced system knowledge in the use of automated data systems, optical accessories, and advanced technologies. MAJCOM/units must project for school allocation during the annual Training Personnel Requirements Conference.

Prerequisites: AFSC 1T151, SSgt. Personnel selected to attend this course must be on upgrade training to the 7-skill level and have completed all mandatory Air Force core tasks, 18 months of on-the-job training as a SSgt, and the 7-skill level career development course (CDC).

Quota Control: HQ AFPC/DPPAPEO.

L3AQR1T211 000—Pararescue Indoctrination Course—PDS Code 5KL—Lackland/10 wk—Oct 96

Screens and selects qualified airmen for continuation in training for

the pararescue career specialty. Students are put through a rigorous physical and mentally stressful training program that prepares them for all pipeline courses and their final AFSC-awarding course. Includes run, swim, underwater confidence, calisthenic, and weight training, anatomy and physiology, anatomy of human motion, medical terminology, lifetime fitness, metric system, nutrition and nutritional performance, and aerospace physiological training. Upon graduation, students attend the following prerequisite pipeline courses before AFSC-awarding school: US Army combat divers qualification, US Army airborne parachutist, US Army military freefall parachutist, US Air Force combat survival, and US Navy underwater egress training.

Prerequisites: All candidates (NPS/GTEPS, retrainees, ARC, AF prior service, and sister service prior service) must successfully complete the appropriate physical ability and stamina test (PAST). Refer to this catalog, chapter 3, section b, paragraph 3.9.2. Lackland Training Wing Special Instructions, subparagraph 3.9.2.11, Pararescue/combat control physical ability and stamina test for test criteria. Member must be a US citizen, be able to obtain a Secret clearance, volunteer for hazardous duty (e.g., military combat diver (SCUBA), military parachuting), score a minimum of 43 on the general category of the ASVAB test (sister service equivalent), must pass flying Class III physical with eye restriction as prescribed for parachutist/marine diving duty. All physicals MUST be reviewed and stampedby HQ AETC/SGPS (US Army will only recognize the AETC/SG stamp).

Special Requirements: Submitted for Secret clearance by class start date. POVs not authorized for use at, to, or from the indoctrination course. Report in uniform with full military complement. ARC personnel must in- and out-process through the Lackland AFB ARC liaison office before training. Pipeline prerequisite training for ARC and retrainee students will be scheduled by 342 TRS/CTF with instructions for orders publication sent to the appropriate units/MPFs.

Quota Control: 2 AF/DOP.

L3ABP1T231 000—Combat Control Apprentice Course—PDS Code 319—Pope/12 wk/AFSC 1C231/13B3H—Oct 96

Qualifies officers and airmen as combat control members. Includes training in communications, land navigation, assault zone operations, demolitions, small unit tactics, and field training exercises.

Prerequisites: Completed the Combat Control Indoctrination Course (L3AQR1C211-000), Combat Diver Qualification Course (L5AZA1T231-004), Air Traffic Control Officer Course (E3OBR13B1A-000), or Combat Control Operator Course (E3AQR1C231-000/E3ABR1C131-000), Military Free Fall Course (L5AZA1T231-003), Airborne Parachutist Course (L5AZA1T231-001), or their equivalent.

Special Requirements: Must be able to pass physical fitness entrance examination on the first day of class. Examination consists of the following exercises: pull-ups or chin-ups (8), sit-ups (60), push-ups (45), 3-mile run in maximum time of 24 minutes, 1500 meter swim in maximum time of 34 minutes. Descriptions of correct performance of exercises are contained in the US Army Field Manual (FM) 21-20. Failure of the physical fitness test will result in elimination from training. Personnel must possess their authorized clothing issue from basic training and PT gear from ATC school. It is highly recommended that personnel bring two additional sets BDUs and well broken in jungle boots. Field equipment will be issued by the school. Students must have a current flying class III physical exam record, aeronautical orders, jump orders, PCS/TDY orders, DA Form 1307, individual Jump Record, and jump certificate with them upon reporting.

Quota Control: 2 AF/DOP. OCRs 720 STG/DOT, HQ ACC/DOLP as applicable.

L3ABP1T231 000—Pararescue/Recovery Apprentice Course—PDS Code 318—Kirtland/24 wk 1 day/AFSC 1T231—Oct 96

Qualifies students in mountaineering, advanced land navigation, weapons handling, pyrotechnics, escape and evasion, small team tactical combat operations, survival procedures and techniques, tactical and rescue parachute insertions, both day and night, in high altitude regions, forests, open oceans, with and without equipment loads, and in Rigging Alternate Method-Zodiac (RAMZ). Qualifies students in alternate insertion and extraction (AIE) from rotary wing aircraft. Qualifies students as aircrew members on H-60 and HC-130 aircraft. Includes academics, practical training, testing and evaluation in academics and field environments, flying training and flight aircraft.

Prerequisites: Must have a Secret security clearance by class start date. Must have completed USAF Pararescue/Paramedic Qualification Course (L3AQP1T231-000); US Army Airborne Parachute School (L5AZA1T231-001); US Army Special Forces Military Free Fall (L5AZA1T231-003); US Navy Underwater Egress Training (UET) (SV-84A); USAF Combat Survival Training (SV-80A); and either US Army Special Forces Combat Divers Course (L5AZQ1T231-004), US Navy SEAL Training, or an approved US Navy Diving Course. Must be on aeronautical, parachute and dive orders. Medical flight physical and physiological training must be current upon reporting for training and remain current for at least 30 days after scheduled completion.

Special Requirements: Must complete a physical conditioning test upon arrival. The test consists of a run, swim (for pararescue students only), and calisthenics. Students must be physically fit and in condition for rigorous and intense field operations in rough high altitude terrain, with packs, weapons, munitions, etc. A mandatory physical fitness maintenance program will be administered daily.

Quota Control: 2 AF/DOP. OCRs: HQ AFSOC/DOOT, HQ ACC/DOH, HQ AFRES/DOT, or ANGRC/DOT as applicable. Nonpararescue students can attend this course on a space-available basis. Contact 2 AF/DOP for availability.

L3AQP1T231 000—Pararescue/Paramedic Qualification—PDS Code 316—Kirtland/21 wk 3 days—Oct 96

Certifies students as National Registry emergency medical technician-paramedic (EMT-P). Includes academics, practical medical procedures and evaluations, hospital clinical training, and field internship. This course is a prerequisite for the AFSC-awarding pararescue basic course.

Special Requirements: Pararescue students must complete a physical conditioning test upon arrival. The test consists of a run, swim, and calisthenics.

Quota Control: 2 AF/DOP.

E3ABR1W031 002—Weather Apprentice—PDS Code 534—Keesler/2 wk/AFSC 1W031—Oct 96

Provides training to Air Force students on taking surface weather observations, and how to work in a weather station environment.

This is the final course for Weather Apprentice training and results in award of the weather AFSC 1W031 upon graduation.

Prerequisites: Successful completion of courses E3AQR1W031 005, Basic Weather, and E3AQP1W031 000, Basic Weather Combat/Field Skills. Courses must be completed in the order indicated.

Quota Control: 2 AF/DOP.

E3AQR1W031 002—Consolidated Weather—PDS Code 611—Keesler/2 wk 1 day—Oct 96

Provides training in basic analysis, satellite analysis, and Doppler Weather Radar. This course is consolidated with Air Force and Navy.

Prerequisites: Successful completion of course E3AQR1W031-004, Basic Weather.

Quota Control: 2 AF/DOP.

E3AQR1W031 003—Intermediate Weather—PDS Code 612—Keesler/7 wk—Oct 96

Trains in operation of the automated weather distribution system, analysis, and meteorology, and field operations.

Prerequisites: Successful completion of course E3AQR1W031 004, Basic Weather, and E3AQR1W031 002, Consolidated Weather.

Quota Control: 2 AF/DOP.

E3AQR1W031 004—Basic Weather—PDS Code 614—Keesler/5 wk 4 days—Oct 96

Provides training in observing weather elements such as precipitation, sky condition, visibility and obstructions to vision, temperature, winds, and plotting of weather codes. This course is consolidated with Air Force, Navy, and Marine Corps.

Quota Control: 2 AF/DOP.

E3AQR1W031 005—Basic Weather—PDS Code OTN—Keesler/14 wk 4 days—Oct 96

Provides training in observing weather elements such as precipitation, sky condition, visibility and obstructions to vision, temperature, winds, and plotting weather codes. Students go on to learn basic chart analysis, satellite analysis, intermediate meteorology, and operation of the Automated Weather Distribution System (AWDS), and Doppler Weather Radar. Lastly, students are introduced to field operations, and learn set up and tear down of meteorological equipment, first aid under field conditions, and basic concepts of weather support to Air Force and Army operations. This is a prerequisite course. Students must complete courses E3AQP1W031 000, Basic Weather Combat/Field Skills, and E3ABR1W031 002, Weather Apprentice, for award of AFSC.

Quota Control: 2 AF/DOP.

E3ABR1W031 007—Aerographer's Mate Class A1—PDS Code XY0—Keesler/11 wk 4 days/MASL D121036—Oct 96

Provides training in Naval orientation and organization, oceanography, atmospheric refraction antisubmarine warfare terms and definitions, data preparation, Navy weather equipment, operation on geophysical fleet mission program library software and equipment, communications and Navy base weather station and shipboard operations.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

E3ABR1W031 008—Marine Corps Weather Observer—PDS Code XY1—Keesler/10 wk 3 days—Oct 96

Provides training in Marine security, oceanography, weather data preparation, weather equipment, communications, meteorological mobile facility program, and Marine Corps base and field weather station operation.

Quota Control: 2 AF/DOP.

E3AQP1W031 000—Basic Weather Combat/Field Skills—PDS Code 613—Hurlburt Fld/1 wk—Oct 96

Provides training training to Air Force students in field operations. Subjects include camouflage, assemble/maintain personal field gear, perform perimeter defense and night movement. Students are also taught how to take tactical weather observations.

Prerequisites: Successful completion of courses E3AQR1W031 004, Basic Weather, E3AQR1W031 002, Consolidated Weather, and E3AQR1W031 003, Intermediate Weather.

Quota Control: 2 AF/DOP.

E3AAR1W071A 008—Able Forecaster Course—PDS Code 535—Keesler/6 wk—Oct 96

Prepares Air Force students in the knowledge and skills necessary to perform duties in a Base Weather Station. Topics include operation of the Automated Weather Distribution System (AWDS), Staff and Warfare support, Weather Station Operations, Flight Weather Briefings, and issuing Weather Warnings and Advisories.

Prerequisites: Successful completion of course E3AAR1W071-011, Advanced Weather, within the past 6 months, is required before entry into this course. Upon graduation, students must have 36 months retainability.

Quota Control: 2 AF/DOP.

E3AAR1W071 009—Meteorological and Oceanographer Analyst/Forecaster—PDS Code XWY—Keesler/9 wk 4 days—Oct 96

Trains Marine personnel in MOS 6842 in the knowledge and skills needed to perform forecasting and briefing duties with minimal supervision for Marine Corps Marine Air Ground Task Force (MAGTF) operations under all readiness conditions. Includes advanced principles of atmospheric physics; structure and properties of the atmosphere; climatology; tropical meteorology; radar and satellite imagery interpretation; introductory, intermediate, and advanced analysis; vertical sounding analysis and forecasting; severe weather analysis and forecasting; surface and upper-air prognostic and forecasting techniques; meteorological oceanography; aviation support; warfare support; and weather briefing techniques.

Prerequisites: Corporal or above, MOS 6821 on second or subsequent enlistment. Satisfactory completion of enlisted correspondence courses: Mathematics, Part 1, NAVPERS 10448, Aerographer's Mate 1 and C, NAVEDTRA 10362-B, and Introduction to Forecasting (METOC 50-1P-0002). Student's command administers materials under direction provided by NAVMETOCCOMINST 1500.2H. One year of experience as assistant forecaster is desirable. Successful completion of

E3AAR1W071 011, Advanced Weather, is required before entry into the course.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

E3AAR1W071 010—Aerographer's Mate Class C1—PDS Code XWZ—Keesler/11 wk—Oct 96

Provides training for Navy personnel in NEC 7412 in the knowledge and skills needed to perform forecasting and briefing duties with minimal supervision aboard ships and Naval oceanography command activities under all readiness conditions. Includes advanced principles of atmosphere physics; structure and properties of the atmosphere; climatology; tropical meteorology; radar and satellite imagery interpretation; introductory, intermediate, and advanced analysis; vertical sounding analysis; severe weather analysis; surface and upper-air prognostic and forecasting techniques; oceanography; hydroacoustics; warfare operations and support; and analyzing, forecasting, and briefing special geophysical parameters.

Prerequisites: Aerographer's mate, SSgt and above, and satisfactory completion of enlisted correspondence courses: Mathematics, Part 1, NAVPERS 10448, Aerographer's Mate 1 and C, NAVEDTRA 10362-B, and Introduction to Forecasting, NAVEDTRA 7509. Prospective students are required to take a diagnostics examination before reporting for training. Student's command administers the examination under direction provided by DIRNAVOCEANMETINST 1550.1. Recommend SSgts have at least 24 months of experience at that pay grade in a weather office before attending this course. Successful completion of E3AAR1W071 011, Advanced Weather, is required before entry into this course.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

E3AAR1W071 011—Advanced Weather—PDS Code 2II—Keesler/20 wk 4 days—Oct 96

Provides training on the tasks and knowledge necessary for Airmen, Sailors, and Marines to perform duties as Weather Analysts, Aerographers, and Oceanographers in the weather career field. Those tasks are to prepare and issue short range weather forecasts and weather warnings, present weather briefings based on centrally prepared forecasts and charts, and prepare climatological and historical weather data. Physics, synoptic meteorology, climatology, analysis of weather maps and charts, preparation of short range weather forecasts, use of radar and satellites, preparation and presentation of weather briefings required for operating weather stations are major topics. Air Force students should report no later than 3 duty days prior to class start.

Prerequisites: Qualified in AFSC 1W051 (prior weather experience as a weather observer). ECL 70SA.

Quota Control: 2 AF/DOP.

J3AQR2A020 001—Aircraft Maintenance Fundamentals—PDS Code HQJ—Sheppard/4 wk 3 days—Apr 96

A prerequisite course for all aircraft maintenance apprentices (fixed wing) before entry into AFSC awarding training in follow-on courses at Sheppard or in training detachments. Provides an overview of career progression, security, technical orders, maintenance management, maintenance documentation, aircraft and flight line safety. Students are taught to use handtools and hardware, aerospace ground equipment, and to perform ground handling, corrosion identification and inspection procedures. Fundamental concepts of airframe, egress, electrical, engines, environmental, pneudraulics, landing gear, flight controls, and related systems are presented. The course provides familiarization to personnel assigned to heavy aircraft (bombers, tankers, and airlift) and light aircraft (fighters, trainers, and attack). The course hours are included in the course charts of AFSC-awarding aerospace maintenance apprentice courses. No STR is directly programmed against this course number.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

J3ABR2A031A 000—F-15/F-111 Avionic Test Station and Aircraft Component Apprentice—PDS Code XCM—Sheppard/15 wk/AFSC 2A031A—Oct 95

Provides airmen with the basic skills and knowledge to perform intermediate (I-level) maintenance in the F-15/F-111 avionics intermediate shop (AIS). Provides training in fundamentals and applications of electronic principles; circuit and logic diagrams required for theory, operation, inspection, on-station verification, maintenance and calibration of F-15/F-111 category II support equipment; aircraft systems theory; operation and confidence testing of selected line replaceable units; theory and operation of the F-15 TISS, antenna and displays test stations and the F-111 electronic warfare and video test stations; computer operation and programming language; safety, security, AF technical orders, management and maintenance directives, and handtools.

Prerequisites: Electronic Principles (EP) Course, L3AQR2AO31A 100, taught at Lackland AFB TX.

Special Requirements: Secret clearance by the 5th week of course.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave Ste 2, Sheppard AFB TX 76311-2856, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only.

b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

L3AQR2A031A 100—Electronic Principles—PDS Code W4J—Lackland/14 wk 4 days/MASL D139011—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel in AFSC 2A031A. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A031A 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: See AFMAN 36-2108 (formerly AFR 39-1). ECL 70

SR.

Admin Instructions: a. Retrainees who have received prior Air Force electronic prinicples training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training is received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3ABR2A031B 000—F-16/B-1/A-10/F-117 Avionic Test Station and Aircraft Component Apprentice—PDS Code XCR—Sheppard/12 wk 1 day/AFSC 2A031B/MASL D131136—Oct 96

Provides airmen with the basic skills and knowledge to perform intermediate (I-level) maintenance in the F-16/B-1/A-10/F-117 Avionics Intermediate Shop (AIS). It is an AFSC-awarding course. Provides Air Force personnel with the knowledge and skills required to perform maintenance on the F-16/B-1/A-10/F-117 AIS equipment. Provides training in Abbreviated Test Language All Systems (ATLAS) software language, aircraft systems theory, common test station components, F-16 displays and indicators (DI) test station, F-16 radio frequency (RF) test station, B-1 digital (DIG) test station, associated line replaceable units (LRU), B-1 DIG to include digital defensive automatic test equipment (ATE) augmentation equipment (DAAE). Additionally, training is given in support equipment, F-16 AIS troubleshooting procedures, safety, security, Air Force technical orders, management and maintenance directives, and hand tools.

Prerequisites: Electronic Principles (EP) Course, L3AQR2AO31B 100, taught at Lackland AFB TX. ECL 70 SA.

Special Requirements: Secret clearance by 6th week of course.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for this equipment course only.

b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

L3AQR2A031B 100—Electronic Principles—PDS Code W4J—Lackland/14 wk 4 days/MASL D131138—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel in AFSC 2A031B. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A031B 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1). ECL 70 SR.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Trumper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3AZR2A051A 003—F-15 Electronic Systems Test Set Journeyman—PDS Code 552—Sheppard/3 wk—Oct 96

Advanced resident course desgined to provide training for Air Force, Air National Guard, and Air Force Reserve personnel in AFSC 2A0X1A to operate and maintain the F-15 electronic systems test set, which replaces the F-15 microwave test station, the F-15 computer test station, and the F-15 display test station. Includes electronic systems test set subsystems; station operation; procedures for use, storage, and mobilization; station calibration; and fault isolation.

Quota Control: HQ AETC/TTPP.

J3ACR2A070 000—Aircraft Maintenance Craftsman—PDS Code XTY—Sheppard/2 wk—Oct 96

Discusses management and supervisory areas that are unique to the aircraft maintenance career field for Air Force specialty codes 2A3X3A, B, J, 2A5X1, and 2A5X2. Covers Air Force core values and familiarizes the attendees with regulations and procedures pertaining to manpower, training management, maintenance management, supply discipline, budget, and resources management. Crosstalk is an integral part of the curriculum. The course is group-paced. Award of the 7-skill level is contingent on attendance in this course, completion of the prerequisites, and approval of the attendee's commander.

Prerequisites: Completion of all Air Force core elements, 18 months time in grade as a Ssgt, and completion of the 7-level career development course applicable to the specific AFSC.

Note: This course replaces J3ACR2A373B 000 and encompasses all aircraft maintenance specialty 7-level.

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A071 000—Avionic Test Station and Aircraft Component Craftsman—PDS Code 5K4—Sheppard/2 wk—Oct 96

Provides Air Force personnel, AFSC 2A051A and 2A051B, in the knowledge and skills necessary to perform the duties of a mid-level supervisory technician involving resource management, maintenance management, mid-level supervision, advanced ATLAS statements/programs, RF component characteristics, RF fault isolation, and RF signal flow analysis using ancillary test equipment.

Prerequisites: Course J6AQU2A071 000.

Quota Control: HQ 2AF/DOP.

J4AST2A071A 004—F-15 TEWS Intermediate Support System (TISS)—PDS Code X2W—various locations/5 wk 2 days—Apr 95

Group-paced instruction designed to provide technicians with prior

electronic countermeasures test station experience (TISS or TITE) with the skills and knowledge necessary to operate and maintain the TISS test station. Includes theory training on the power distribution, loads, and control subsystems; performance training on test station operation, theory training for the general purpose interface test module; theory training for the radio frequency interface test module; and performance training on TISS test station utilities.

Prerequisites: Must be able to run confidence performance test and perform BIT checks. Boot-up procedure capability and MATE experience would be helpful.

Quota Control: 2 AF/DOP.

J6AQU2A071 000—Avionic Test Equipment Craftsman (ATLAS)—PDS CodeXCV—on-site/2 wk 1 day—Oct 96

Provides Air Force personnel, AFSC 2A0X1A and 2A0X1B, in the knowledge and skills necessary to perform troubleshooting duties using ATLAS statements, system software procedures, ATLAS programs, and utility programs. An exportable computer-based training type instruction to be administered in the field to personnel on upgrade training to the 7-skill level. A prerequisite for attending course J3ACR2A071 000, Avionics Test Station and Aircraft Component Craftsman, resident course at Sheppard AFB TX. At a minimum, a DESK TOP IV with CD-ROM computer system or equivalent will be required to run this computer-based training program.

J3ABR2A131 000—Apprentice Avionic Sensors Maintenance Training—PDS Code X0G—Sheppard/13 wk 2 days/MASL D133057—Oct 96

Group-paced training that includes career foundation information (career ladder structure, security, supply, basic computer programming language, and Quality Air Force); general maintenance practices (the maintenance complex, safety, foreign object damage prevention, hand tools, and cleaning optical surfaces); direct support equipment fundamentals (care and handling of equipment, use/maintain system test sets and support equipment); knowledge and tasks related to the Core Automated Maintenance System (CAMS), closed circuit television systems, video tape recording systems, infrared systems, laser systems, environmental control systems, radar systems, and servo circuits, sensor systems descriptions, and DoD EPA Universal CFC/HCFC (chlorofluorocarbon/hydrochlorofluorocarbon) Certification Program.

Prerequisites: ASVAB requirement is E-72. Laser eye examination prior to arrival at Sheppard AFB. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AQR2A131 000—LANTIRN FMS Prerequisite Course—PDS Code RA3—Sheppard/1 wk 3 days—Oct 96

Provides foreign military students the knowledge necessary for successful completion of LANTIRN FMS Type 1 training. The training includes an introduction to Infrared principles, Laser principles, and Terrain Following Radar principles.

Prerequisites: Completion of Electronic Principles Course L3AQR2A131 600. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AQR2A131 001—Pathfinder/Sharpshooter Prerequisite Training—PDS Code RA4—Sheppard/1 wk 1 day—Oct 96

Provides foreign military students the knowledge necessary for successful completion of Pathfinder and Sharpshooter Type 1 training. Includes an introduction to infrared principles and laser principles.

Prerequisites: Completion of L3AQR2A131 620. ECL 70SA.

Quota Control: HQ 2AF/DOP.

L3AQR2A131 100—Electronic Principles—PDS Code W4J—Lackland/14 wk 4 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A131. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A131 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1). ASVAB requirement is E-72. ECL 70.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through the MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR2A131 600—Electronic Principles—PDS Code W4V—Lackland/2 wk/MASL D133068—Oct 96

Provides training in knowledge and skills for international students. Includes electromagnetic devices and digital circuits. Training day is a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3AQR2A131 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: ECL 70 SA.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through the MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the wawiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR2A131 620—Electronic Principles—PDS Code W4V—Lackland/2 wk—Oct 96

Provides training in knowledge and skills for international students. Includes electromagnetic devices and digital circuits. Training day is a 6-hour day plus 2 hours of supervised study. This is a prerequisite to J3AQR2A131 001, and electronics training is tailored to meet

AFSC requirements.

Prerequisites: ECL 70SA.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through the MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the wawiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

E3ABR2A132 000—Avionics Guidance and Control Systems Specialist (ON/OFF)—PDS Code V61—Keesler/24 wk 1 day/AFSC 2A132/MASL D133067—Oct 96

The instructional design for this course is Group Lock Step. Airmen are trained to perform duties prescribed in AFMAN 36-2108 for avionics guidance and control systems specialist, AFSC 2A1X2. This course is principles-centered and designed for training personnel to maintain, troubleshoot, and repair avionics guidance and control equipment in an OFF/ON equipment environment. Hands-on maintenance instruction is provided on attitude heading reference systems, flight director systems, stability augmentation systems, automatic flight control systems, engine indicating systems, liquid quantity indicating systems, flight instrument systems, air data systems, inertial navigations, and use of common and peculiar test equipment, and technical orders. OFF equipment maintenance procedures (bench checks) are accomplished on an attitude heading reference system, flight director system, automatic flight control system, and an inertial navigation system. Lecture instruction is provided on career ladder progression, security, safety, technical orders, supply discipline, maintenance management and inspection, fundamentals of aircraft systems maintenance, and avionics familiarization. Instructional theory is provided on stability augmentation systems, position indicating systems operation, angle of attack/stall warning, fuel savings advisory systems, periscope sextant systems, ground proximity warning systems, A-10 TV monitor, and variable air inlet systems. Prior to attending the equipment phase of training described, students are required to attend electronics principles training as identified in attachment 2 to STS 2A1X2.

Prerequisites: ECL 70 SA.

Quota Control: 2 AF/DOP.

E3ABR2A133 000—Communication/Navigation Systems Apprentice—PDS Code V62—Keesler/32 wk 3 days/AFSC 2A133/MASL D133066—Apr 95

Principles-centered training in the operation, organizational maintenance and repair of avionic communication, radar, and radio navigation equipment. Includes application of electronic principles, circuit analysis, and testing; shop and flight line practices including tuning, adjusting, performance testing, and troubleshooting using selected command representative avionic systems and components with associated TOs and equipment; use of maintenance and inspection forms and tags, AF TOs, and safety and security directives. Subjects taught in training are VHF (AM and FM), UHF, and HF radios, interphone equipment, VOR/ILS, TACAN, radar altimeters, IFF transponder (including Mark XII), search and weather radar, doppler navigation system, and global positioning systems (GPS). Performance-oriented Core Automated Maintenance System (CAMS) training is taught under maintenance data collection (MDC).

Prerequisites: ECL 70 SA.

Quota Control: 2 AF/DOP.

E3ABR2A134 000—Airborne Warning and Control Radar Apprentice—PDS Code 4CF—DOD 104—Keesler/27 wk 1 day/AFSC 2A134/MASL D137040—Oct 96

Principles-centered training in the knowledge and technical order maintenance procedures used to perform organizational and intermediate level maintenance on the AN/APY-1 and AN/APY-2 radar systems and AN/APX-103 identification system. Training includes electronic principles, digital principles, radar principles, digital computer principles, functional analysis of the radar systems and identification system, system fault isolation procedures, line-replaceable-unit remove and replace procedures, use of common and peculiar support equipment, maintenance management, Air Force technical order systems, COMSEC, OPSEC, safety, and security.

Prerequisites: ECL 80.

Quota Control: 2 AF/DOP.

J3AQR2A135A 000—Avionics Support Equipment Apprentice, F-4—PDS Code EQ4—Sheppard/15 wk 4 days—Apr 95

AC and DC principles; solid-state principles and devices; amplifier, power supply, oscillator, and waveshaper circuit principles and troubleshooting; transmission and reception principles and troubleshooting; digital and microcomputer principles and troubleshooting; and soldering.

Special Requirements: This course or comparable Air Force electronics training is a prerequisite for awarding AFSC 2A135A by the Reserve forces.

Quota Control: 2 AF/DOP.

L3AQR2A135A 100—Electronic Principles—PDS Code W4J—Lackland/14 wk 4 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A135A. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A135A 000 and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Special Requirements: This course or comparable Air Force electronic principles training is a prerequisite for awarding AFSC 2A135A by the Air Force Reserve.

Admin Instruction: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be

scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

E3ABR2A137 004—Electronic Warfare Systems Apprentice—PDS Code XH1—Keesler/24 wk 4 days/AFSC 2A137—Oct 96

Principles-centered training in the operation, maintenance, and repair of electronic warfare systems to include performance testing, adjustments, and use of common and specialized test equipment. Includes theory and application of electronic principles, digital principles, logic analysis, shop procedures, system testing, maintenance management, and Air Force technical order system. Also includes an introduction to computer logic, computer circuits, microcomputer familiarization, and transmitter and receiver principles. The last 22 days of the course consist of Pod system analysis and is AN/ALQ-184 specific.

Prerequisites: E3AQR2E020 010, Common Electronic Training Program, and E3AQR2A137 000, the common portion of E3ABR2A137 004.

Special Requirements: Secret clearance by the 12th week of the course.

Quota Control: 2 AF/DOP.

E3ABR2A137 005—Electronic Warfare Systems Apprentice—PDS Code 4VZ—Keesler/23 wk—Oct 96

Principles-centered training in the operation, maintenance, and repair of electronic warfare systems to include performance testing, adjustments, and use of common and specialized test equipment. Includes theory and application of electronic principles, digital principles, logic analysis, shop procedures, system testing, maintenance management, and Air Force technical order system. Also includes an introduction to computer logic, computer circuits, microcomputer familiarization, and transmitter and receiver principles. The last 13 days of the course consist of the AN/USM-464 and AN/ALQ-172.

Prerequisites: E3AQR2E020 010, Common Electronic Training Program, and E3AQR2A137 000, the common portion of E3ABR2A137 005.

Quota Control: 2 AF/DOP.

E3AZR2A154 000—Airborne Warning and Control Radar Maintenance Specialist (NATO-E3)—PDS Code 73B—Keesler/13 wk 2 days/MASL D133055—Oct 96

Principles-centered training designed to provide the skills and knowledge necessary to perform organizational intermediate level maintenance on the AN/APY-1, AN/APY-2 Radar Systems, and AN/APX-103 Identification System. Training includes functional analysis of the radar and identification friend or foe systems, fault isolation procedures, use of common and peculiar equipment, line replaceable unit remove and replace procedures, maintenance management, Air Force technical order system, COMSEC, OPSEC, safety, and security.

Prerequisites: ECL 80 qualified in fundamentals of electronics, digital, and radar principles.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

E3AZR2A157 015/E4AST2A157 001—AN/GYQ-59 Digital Computer System (DCS) O/I Maintenance—PDS Code PJC—Keesler/1 wk 3 days—Mar 94

Provides the skills and knowledge necessary to perform organizational and imtermediate maintenance on the AN/GYQ-59 Digital Computer System. Includes system description, functional operation, software use, performance of diagnostic test, and removal and installation of shop replaceable units (SRU).

Prerequisites: AFSCs 2EXXX, 2E7XX, 2A0XX, 2A3XX, 2A1X7, or 3C2X0.

Special Requirements: Secret clearance. (This is an unclassified course, but it is conducted in a classified area.)

Quota Control: 2 AF/DOP.

E3AZR2A157 016—AN/ALQ-184 Intermediate Maintenance—PDS Code PX9—Keesler/5 wk—Oct 96

Provides Air Force personnel with the knowledge and skills needed to perform the duties of maintenance personnel on the AN/ALQ-184 electronic countermeasure POD and its associated support equipment. Includes system description, capability, use of publications, theory of operation, perform checks, adjustments, troubleshooting and repair procedures to include self and built-in test capabilities.

Prerequisites: AFSC 2A1X7.

Special Requirements: Secret clearance.

Quota Control: HQ 2 AF/DOP.

E3AZR2A157 017—AN/GYQ-59A System O/I Maintenance—PDS Code 78E—Keesler/2 wk 2 days—Oct 96

Provides the skills and knowledge needed to perform organizational and intermediate maintenance on the AN/GYQ-59A system. Includes system description, functional operation, software use, performance of diagnosis test, and removal and installation of shop replaceable units (SRU).

Prerequisites: AFSCs 2EXXX, 2E7XX, 2A0XX, 2A3XX, 2A1X7, or 3C2X0.

Quota Control: HQ 2AF/DOP.

E4AST2A157 010—AN/ALQ-131 Block II and AN/ALM-256 Maintenance Familiarization—PDS Code 92M—Keesler/1 wk 3 days—Oct 96

Provides training for personnel in AFSC 2A1X7 in the knowledge and skills needed to perform the duties of maintenance personnel on the AN/ALQ-131 Block II system. The scope of training includes system description, functional operation, and maintenance requirements. Practical exercises in operating, performing operational checks, removal, and installation of LRUs.

Prerequisites: AFSC 2A1X7.

Special Requirements: Secret clearance.

Quota Control: HQ 2 AF/DOP.

E4AST2A157 033—AN/ALQ-184 (V) Intermediate-Level Maintenance—PDS Code 21C—Keesler/3 wk 3 days—Oct 96

Provides Air Force personnel with the knowledge and skills needed to perform the duties of maintenance personnel on the AN/ALQ-184

electronic countermeasure POD and its associated support equipment. Includes system description, capability, use of publications, theory of operation, perform checks, adjustments, troubleshooting and repair procedures to include self and built-in test capabilities.

Prerequisites: AFSC 2A1X7.

Special Requirements: Secret clearance.

Quota Control: HQ 2 AF/DOP.

E4AST2A157 034—AN/GYQ-59A System O/I Maintenance—PDS Code OD3—Keesler/2 wk 2 days—Oct 96

Provides the knowledge and skills needed on the AN/GYQ-59A system. Includes system description, functional operation, software use, performance of diagnostic test, and removal and installation of shop replaceable units.

Prerequisites: AFSC 2EXXX, 2E7XX, 2A0XX, 2A1X7, or 3C2X0.

Quota Control: HQ 2 AF/DOP.

X6AZU2A157 000—Modular Interoperable Surface Terminal (MIST) Maintenance—PDS Code 1IN—various locations/3 wk—Oct 96

Provides exportable training for Air Force personnel in AFSC 2E2X1 or 2A2X2 in the knowledge and skills needed to perform the duties of a MIST maintenance technician. Geared for isolation at the lowest replaceable unit and includes theory of analysis, system diagnostics, systems operations, electrical and mechanical adjustments, and fault detection and isolation. Instruction design for this course is self-paced.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: Entry and completion are controlled by the user's job site training point of contact and OPR. An AF Form 1256, Certificate of Training, is issued upon completion of this course.

Special Requirements: This course is taken at the user's site via multimedia delivery system. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 316 TRS/DOBX, 256 Fort Griffen Avenue, Goodfellow AFB TX 76908-3402.

E3ACR2A17X 000—Avionics Workcenter Advanced Management (On/Off Equipment)—PDS Code 729—Keesler/2 wk—Oct 96

Includes a technical update plus supervision and management skills for the career airman. The technical update will introduce students to the latest technology advances both in and outside the career field. The course will focus on environmental hazards, Air Force supply discipline, supervision of maintenance, training, maintenance management, maintenance and inspection. When the 7-skill level CDC becomes available, it will be a mandatory completion requirement before attending resident training.

Note: This course replaces E3ACR2A173 000.

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A171 000—Avionics Sensors Craftsman Training Course—PDS Code X0H—Sheppard/2 wk—Oct 96

A 7-skill level upgrade course providing in-depth training in maintenance practices, training, supervision, Air Force supply discipline, maintenance management, maintenance and inspection, and crossfeed within the 2A1X1 career field.

Prerequisites: Must have completed all the required core tasks, CDCs, and 18 months of on-the-job training as a SSgt.

Quota Control: HQ AFPC/DPPAPEO.

J3AZR2A171 002—LANTIRN Targeting Set Advanced Maintenance Training—PDS Code 8ZR—Sheppard/5 wk 1 day—Apr 95

The instructional design for this course is group paced. Trains sensor systems technicians in maintenance of the Low Altitude Navigation Targeting Infrared for Night (LANTIRN) System targeting set. The training for course J3AZR2A171 002 includes: electrostatic discharge sensitivity procedures; LANTIRN Electro-Optical Test Set (EOTS) maintenance, intermediate maintenance of the IR and Laser systems in the LANTIRN AN/AAQ-14 Targeting Set; targeting set alignment procedures, LANTIRN targeting set system related safety, security, and use of associated technical orders.

Prerequisites: Personnel selected should be a graduate of course G1ASC32272B 026 (phase I), G1ASC32272B 027, G1ASC32272B 028, or G3AZR45570A 001. If not a graduate of one of these courses, they must be a graduate of the J/G3ABR2A131 000, G3ABR2A131, G3ABR45530A 000/001/002, or the G3ABR32232A/B 001 course, and have a minimum of 6 months of experience through on-the-job training in the operation of the LANTIRN support equipment. Attendees must possess a 5-or 7-skill level in AFSC 2A1X1.

Special Requirements: Students must have a laser eye exam before attending.

Quota Control: 2 AF/DOP.

J3AZR2A171 003—LANTIRN Support Equipment Advanced Training—PDS Code XDD—Sheppard/4 wk 3 days—Oct 96

The instructional design for this course is group paced. Trains sensor systems technicians in maintenance of the Low Altitude Navigation Targeting Infrared for Night (LANTIRN) system support equipment. Includes description, operation, maintenance, and safety on the power supply test station, environmental control unit test station, LANTIRN intermediate automatic test equipment, radio frequency augmentation unit test station, cooling and servicing unit, and fluid conditioning unit. Equipment hazards, personnel safety, and security is integrated into above subjects.

Prerequisites: Personnel selected should be a graduate of course G1ASC32272B 026 (phase I), G1ASC32272B 027, G1ASC32272B 028, or G3AZR45570A 001. If not a graduate of one of these courses, they must be a graduate of the J/G3ABR2A131 000, G3ABR45530A 000/001/002, or the G3ABR32232A/B 001 course, and have a minimum of 6 months of experience through on-the-job training in the operation of the LANTIRN support equipment. Attendees must possess a 5- or 7-skill level in AFSC 2A1X1.

Quota Control: 2 AF/DOP.

J3ABR2A331A 000—F-15 Avionic Attack Control Systems Apprentice—PDS Code XET—Sheppard/10 wk 3 days/AFSC 2A331A—Oct 96

Provides airmen with the basic skills and knowledge needed to perform organizational level attack control systems maintenance on F-15 aircraft. Aircraft systems training provided includes the weapons control radar, overload warning, head up display, lead

computing gyro, inertial navigation, central computer, video tape recording, memory loader verifier, and RF tester. Training is also provided in general maintenance procedures, aircraft and avionics familiarization, aerospace ground equipment, aircraft wiring maintenance, and common tool usage. Increased hands-on training for the above subjects will be integrated throughout the course and each graduate will be awarded a three-skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) Course, L3AQR2A331A 500, taught at Lackland AFB TX.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only.

b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

J3ABR2A331A 001—F-111 Avionic Attack Control Systems Apprentice—PDS Code XEB—Sheppard/18 wk 3 days/AFSC 2A331A—Oct 95

Provides airmen with the basic skills and knowledge needed to perform organizational level attack control systems maintenance on F-111 aircraft. Aircraft systems training provided includes the integrated communication navigation and identification digital computer complex, mission computer complex, control display, multiplex data bussing, data transfer, dual bombing timer, multifunction display, inertial navigation, global positioning, optical display sight, attack radar and navigational radar, compact video airborne recorder, terrain following radar, and radar altimeter. Training is also provided in general maintenance procedures, aircraft and avionics familiarization, aerospace ground equipment, aircraft wiring maintenance, and common tool usage. Increased hands-on training for the above subjects is integrated throughout the course and each graduate will be awarded a three-skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) Course, L3AQR2A331A 520, taught at Lackland AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only.

b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

L3AQR2A331A 500—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A331A. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A331A 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR2A331A 520—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A331A. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A331A 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3AZR2A331A 001—F-15E Avionic Attack Control Systems Apprentice—PDS Code XNC—Sheppard/4 wk 3 days—Oct 95

Provides additional training for advanced avionic attack control systems installed in the F-15E aircraft. Advanced aircraft systems training provided includes the multipurpose display, central computer, videotape recording, inertial navigation remote map reader, head up display, weapons control-radar set APG-70, combined altitude radar altimeter, and low altitude navigation and targeting infrared for night.

Prerequisites: Course J3ABR2A331A 000, F-15 Avionic Attack Control Systems Apprentice, taught at Sheppard AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: Orders for airmen retraining into this AFSC (who require this additional F-15E training) must provide for attendance in this course as well as the prerequisite course taught at Sheppard AFB TX.

Quota Control: 2 AF/DOP.

J3ABR2A331B 000—F-15 Avionic Instrument and Flight Control Systems Apprentice—PDS Code XEU—Sheppard/10 wk 2 days/AFSC 2A331B/MASL D133064—Oct 96

Provides airmen with the basic skills and knowledge needed to perform organizational level instrument and flight control systems maintenance on F-15 aircraft. Aircraft systems training provided includes the fuel quantity indicating, attitude heading reference, horizontal situation indicating, acceleration indicating/G exceedance, nozzle positioning indicating, oil pressure indicating, tachometer, turbine inlet temperature indicating, fuel flow indicating, pitot static, heater, and pneumatic instrument air data computer, flight control, engine air inlet control, signal data recording, and built-in test. Additionally, provides training in general maintenance procedures, aircraft and avionics familiarization, aerospace ground equipment, aircraft wiring maintenance, and common tool usage. Increased hands-on training for the above subjects is integrated throughout the course and each graduate will be awarded a three-skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) course, L3AQR2A331B 500, taught at Lackland AFB TX. ECL 70 SR.

Special Requirements: Safety-toed shoes.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only.

b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

J3ABR2A331B 001—F-111 Avionic Instrument and Flight Control Systems Apprentice—PDS Code XEC—Sheppard/16 wk 2 days/AFSC 2A331B—Oct 95

Provides airmen with the basic skills and knowledge needed to perform organizational level instrument and flight control systems maintenance on F-111 aircraft. Aircraft systems training provided includes the hydraulic pressure indicating, nozzle position indicating, tachometer, turbine inlet temperature engine pressure ratio indication, fuel flowing indicating, translating cowls, spike, engine low compressor bleed, fuel quantity indicating, fuel distribution, pitot static/standby instruments, air data computer and primary instruments, auxiliary flight reference and instruments, flight director, G-exceedance indicating, airborne signal data recording, flight auto pilot, stall warning, and landing configuration caution. Training is also provided in general maintenance procedures, aircraft and avionics familiarization, aerospace ground equipment, aircraft wiring maintenance, and common tool usage. Increased hands-on training for the above subjects is integrated throughout the course and each graduate is awarded a three-skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) course, L3AQR2A331B 520, taught at Lackland AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content taught by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only.

b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

L3AQR2A331B 500—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A331B. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A331B 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR2A331B 520—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A331B. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A331B 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX

78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3AZR2A331B 001—F-15E Avionic Instrument and Flight Control Systems Apprentice—PDS Code XND—Sheppard/2 wk—Oct 95

Provides additional training for advanced avionic instrument and flight control systems installed in the F-15E aircraft. Advanced aircraft systems training provided includes the instrument and navigation systems, air data computer, engine instruments, and automatic flight controls.

Prerequisites: Course J3ABR2A331B 000, F-15 Avionic Instrument and Flight Control Systems Apprentice, taught at Sheppard AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: Orders for all airmen retraining into this AFSC (who require this additional F-15E training) must provide for attendance in this course as well as the prerequisite course taught at Sheppard AFB TX.

Quota Control: 2 AF/DOP.

J3ABR2A331C 000—F-15 Avionic Communication, Navigation, and Penetration Aids Systems Apprentice—PDS Code XEV—Sheppard/10 wk/AFSC 2A331C—Oct 96

Avionic course which provides airmen with the basic skills and knowledge needed to perform organizational level communication, navigation, and penetration aids systems maintenance on F-15 aircraft. Aircraft systems training provided includes the UHF communication, audio signals and secure speech, automatic direction finder, instrument landing, tactical air navigation, identification friend or foe, air-to-air IFF interrogator, radar warning receiver, electronic warfare, internal countermeasures, external countermeasures, interference blanking, and countermeasures dispenser. Training is also provided in general maintenance procedures, aircraft and avionics familiarization, aerospace ground equipment, aircraft wiring maintenance, and common tool usage. Increased hands-on training for the above subjects is integrated throughout the course and each graduate is awarded a three-skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) course, L3AQR2A331C 500, taught at Lackland AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only.

b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

J3ABR2A331C 001—F-111 Avionic Communication, Navigation, and Penetration Aids Systems Apprentice—PDS Code XED—Sheppard/17 wk 1 day/AFSC 2A331C—Oct 95

Provides airmen with the basic skills and knowledge needed to perform organizational level communication, navigation, and penetration aids systems maintenance on F-111 aircraft. Aircraft systems training provided includes the integrated communication navigation and identification, intercommunication, high-frequency communications, ultra-high-frequency communications, automatic direction finder, instrument landing, interference blanker, tactical air navigation, identification friend or foe, countermeasures receiver set, countermeasures dispenser set, countermeasures set, and external countermeasures. Training is also provided in general maintenance procedures, aircraft and avionics familiarization, aerospace ground equipment, aircraft wiring maintenance, and common tool usage. Increased hands-on training for the above subjects is integrated throughout the course and each graduate is awarded a three-skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) course, L3AQR2A331C 520, taught at Lackland AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing by course number, when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only.

b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

L3AQR2A331C 500—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A331C. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A331C 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services

may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR2A331C 520—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A331C. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A331C 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3AZR2A331C 001—F-15E Avionic Communication, Navigation, and Penetration Aids Systems Apprentice—PDS Code XNE—Sheppard/2 wk 4 days—Oct 95

Provides additional training for advanced avionic instrument and flight control systems installed in the F-15E aircraft. Advanced aircraft systems training includes the avionics interface unit (AIU), up front control (UFC), communication systems (UHF and ADF), navigation systems I (ILS and TACAN), navigation systems II (IFF and AAI), and technical electronic warfare systems (TEWS).

Prerequisites: Course J3ABR2A331C 000, F-15 Avionic Communication, Navigation, and Penetration Aids Systems Apprentice, taught at Sheppard AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: Orders for all airmen retraining into this AFSC (who require this additional F-15E training) must provide for attendance in this course as well as the prerequisite course taught at Sheppard AFB TX.

Quota Control: 2 AF/DOP.

J3ABR2A332A 002—F-16 C/D Avionic Attack Control Systems Apprentice—PDS Code XQ6—Sheppard/14 wk 4 days/AFSC 2A332A—Oct 96

Mission Ready Technician course which provides airmen with the basic skills and knowledge needed to perform organizational level Attack Control Systems maintenance on F-16 aircraft. Students will be provided training in basic electronics taught in the Electronics Training Program Course L3AQR2A332A-520 at Lackland AFB Texas. Aircraft systems training provided at Sheppard AFB Texas includes the Fire Control Radar, Heads Up Display, Inertial Navigation, General Avionics Computer, Video Tape Recording, Memory Loader Verifier, Up Front Controls, Multi Function Display Set, Global Positioning, LANTIRN, and Targeting Pods. Additionally, training is provided in General Maintenance Procedures, Aircraft and Avionics Familiarization, Aerospace Ground Equipment, Aircraft Wiring Maintenance, and Common Tool Usage. Increased hands on training for the above subjects will be integrated throughout the course. Each graduate will be task certified on aircraft system tasks identified in the 2A3X2 Career Field Education and Training Plan and awarded a three skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) course, L3AQR2A332A 520, taught at Lackland AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only. b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

L3AQR2A332A 520—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A332A. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A332A 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3ABR2A332B 002—F-16 C/D Avionic Instrument and Flight Controls Systems Apprentice—PDS Code XQ8—Sheppard/15 wk 4 days/AFSC 2A332B—Oct 96

Mission Ready Technician course that provides airmen with the basic skills and knowledge needed to perform organizational level Instrument and Flight Control Systems maintenance on F-16 aircraft. Students will be provided training in basic electronics taught in the Electronics Training Course L3AQR2A332B-500 at Lackland AFB

Texas. Aircraft systems training provided at Sheppard AFB Texas includes Fuel Quantity Indicating, Attitude Heading Reference, Horizontal Situation Indicating, Engine Nozzle Positioning Indicating, Oil Pressure Indicating, Tachometer, Turbine Inlet Temperature Indicating, Fuel Flow Indicating, Pitot Static/Heater/Pneumatic Instruments, Central Air Data Computer, Digital Flight Controls, Signal Data Recording, and Built-In Test. Additionally, training is provided in General Maintenance Procedures, Aircraft and Avionics Familiarization, Aerospace Ground Equipment, Aircraft Wing Maintenance, and Common Tool Usage. Increased hands on training for the above subjects will be integrated throughout the course. Each graduate will be task certified on aircraft system tasks identified in the 2A3X2 Career Field Education and Training Plan and awarded a three skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) course, L3AQR2A332B-500, taught at Lackland AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only. b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

J3ABR2A332C 002—F-16 C/D Avionic Communications, Navigation, and Penetration Aids Systems Apprentice—PDS Code XQ9—Sheppard/14 wk 2 days/AFSC 2A332C—Oct 96

Mission Ready Technician course that provides airmen with the basic skills and knowledge needed to perform organizational level Communications, Navigation, and Penetration Aids Systems maintenance on F-16 aircraft. Students will be provided training in basic electronics taught in the Electronics Training Program Course L3AQR2A332C-500 at Lackland AFB Texas. Aircraft systems training provided at Sheppard AFB Texas includes the UHF Communication, Secure Voice, VHF Communications, Interphone, Instrument Landing, Tactical Air Navigation, Identification Friend or Foe, Secure Identification Friend or Foe, Radar Threat Warning, External Countermeasures, Interference Blanking, Countermeasures Dispenser, and Test Equipment. Additionally, training is provided in General Maintenance Procedures, Aircraft and Avionics Familiarization, Aerospace Ground Equipment, Aircraft Wiring Maintenance, and Common Tool Usage. Increased hands on training for the above subjects will be integrated throughout the course. Each graduate will be task certified on aircraft system tasks identified in the 2A3X2 Career Field Education and Training Plan and awarded a three skill level upon successful completion of this course.

Prerequisites: Electronic Principles (EP) course, L3AQR2A332C-500, taught at Lackland AFB TX.

Special Requirements: Safety-toed shoes.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 365 TRS/DOP, 710 H Ave, Ste 2, Sheppard AFB TX 76311, citing (by course number) when and where the training was received. Upon approval of the waiver, the retrainees will be scheduled for this equipment course only. b. Orders for all other airmen retraining into this AFSC must provide for attendance in this course as well as the prerequisite EP course taught at Lackland AFB TX.

Quota Control: 2 AF/DOP.

L3AQR2A332B 500—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A332B. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A332B 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR2A332C 500—Electronic Principles—PDS Code W4N—Lackland/8 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A332C. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A332C 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of the waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3ABP2A333A 002—Fighter Aircraft Maintenance Apprentice (F-15)—PDS Code 78B—Sheppard/3 wk 3 days/AFSC 2A333A—Oct 95

Course includes 18 days of task certifying training at Tyndall AFB FL on preflight, thruflight, basic postflight, launch aircraft, recover aircraft, ordering parts, lubricating aircraft, refueling aircraft, service hydraulics, service engine oil system, determining serviceability of aircraft tires, service central gearbox, aircraft mounted accessory drives and IDG, and inspecting and using liquid nitrogen servicing equipment.

Prerequisites: Must complete J3AQR2A333A 002, Fighter Aircraft Maintenance Apprentice (F-15), at Sheppard AFB TX.

Quota Control: 2 AF/DOP.

J3AQR2A333A 002—Fighter Aircraft Maintenance Apprentice (F-15)—PDS Code 78A—Sheppard/19 wk 1 day—Oct 96

The AFSC 2A333A will be awarded after completion of this course and completion of course J3ABP2A333A 002, Fighter Aircraft Maintenance Apprentice (F-15), at Tyndall AFB FL. Training includes 23 days of aircraft maintenance fundamentals and 73 days of weapon system familiarization and hands-on training with aircraft systems such as egress, airframe, electrical, utility, hydraulics, landing gear, flight controls, fuel, and engine. Training also includes such items as career progression, security, maintenance management, maintenance documentation, aircraft and flight line safety (AFOSH), handtools and hardware, technical orders, aircraft support equipment, aircraft ground handling, corrosion identification, and inspections.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABP2A333B 002—Fighter Aircraft Maintenance Apprentice (F-16)—PDS Code XN7—Sheppard/3 wk 3 days/AFSC 2A333B—Oct 96

Includes 18 days of task certifying training at Luke AFB AZ on aircraft safe for maintenance, canopy operation, preflight, thruflight, basic postflight, walk-around inspection, launch aircraft, recover aircraft, refuel, service engine oil, constant speed drive servicing, and perform hot brake check.

Prerequisites: Must complete J3AQR2A333B 002, Fighter Aircraft Maintenance Apprentice (F-16), at Sheppard AFB.

Quota Control: 2 AF/DOP.

J3AQR2A333B 002—Fighter Aircraft Maintenance Apprentice (F-16)—PDS Code XN3—Sheppard/19 wk 1 day/MASL D141231—Oct 96

The AFSC 2A333B will be awarded after completion of this course and completion of course J3ABP2A333B 002, Fighter Aircraft Maintenance Apprentice (F-16), at Luke AFB AZ. Training includes 23 days of aircraft maintenance fundamentals and 73 days of weapon system familiarization and hands-on training with aircraft systems such as egress, airframe, electrical, utility, pneudraulic, landing gear, flight controls, fuel, and engine. Training also includes such items as career progression, security, maintenance management, maintenance documentation, aircraft and flight line safety (AFOSH), handtools and hardware, technical orders, aircraft support equipment, aircraft ground handling, corrosion identification, and inspections.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A333C 000—Fighter Aircraft Maintenance Apprentice (F/FB-111)—PDS Code 5Z3—Sheppard/10 wk 3 days/AFSC 2A333C—Oct 96

Provides training in skills and knowledge necessary for the award of AFSC 2A333C. Training includes aircraft maintenance fundamentals and F/FB-111 weapon systems familiarization and hands-on training with aircraft systems such as airframe, egress, electrical, utilities, pneudraulics, landing gear, flight controls, fuels, and engine systems. Training also includes career progression, security, maintenance management, maintenance documentation, aircraft and flight line safety, hand tools and hardware, technical orders, aircraft support equipment, aircraft ground handling, and corrosion identification and inspections.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A333D 000—Fighter Aircraft Maintenance Apprentice (F-4)—PDS Code 3MU—Sheppard/9 wk 3 days/AFSC 2A333D—Oct 96

Provides training in aircraft maintenance fundamentals and F-4 weapon system familiarization and hands-on training with aircraft systems such as egress, airframe, electrical, utility, pneudraulic, landing gear, flight control, air induction, fuel, in-flight refueling, engine, and drag chute. Also includes such items as career progression, security, maintenance management, maintenance documentation, aircraft and flight line safety, handtools and hardware, technical orders, aircraft support equipment, aircraft gound handling, and corrosion identification and inspections.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A333E 000—Fighter Aircraft Maintenance Apprentice (A-10)—PDS Code WJP—Sheppard/10 wk 4 days/AFSC 2A333E—Oct 96

Training includes 26 days of aircraft maintenance fundamentals and 31 days of weapon system familiarization and hands-on training with aircraft systems such as airframe, electrical, egress, oxygen, fuel, hydraulics, landing gear, flight controls, and engine and related systems. Training also includes career progression, security, maintenance management, maintenance documentation, aircraft and flight line (AFOSH) safety, handtools and hardware, technical orders, aircraft support equipment, aircraft ground handling, corrosion identification, and corrosion control and inspections.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AQR2A333F 000—Trainer Aircraft Maintenance Apprentice (T-38)—PDS Code HQJ—Sheppard/4 wk 3 days/AFSC 2A333F/MASL D141234—Oct 96

This course is the fundamentals phase of a training program leading to the award of AFSC 2A333F. The fundamentals course and the follow-on course must be completed before the AFSC is awarded. Training provided by the course is generic and is not designed for a specific type aircraft. It includes familiarization with aircraft systems such as electrical, utility, fuel, pneudraulics, landing gear, flight

controls, engines, and related systems. Training also includes career progression, security, maintenance management and documentation, aircraft and flight line safety, handtools, hardware, technical orders, aerospace ground equipment, aircraft ground handling, corrosion, and inspections.

Prerequisites: ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AQR2A333G 000—Trainer Aircraft Maintenance Apprentice (T-37/OA-37)—PDS Code HQJ—Sheppard/4 wk 3 days/AFSC 2A333G/MASL D141233—Oct 96

This course is the fundamentals phase of a training program leading to the award of AFSC 2A333G. The fundamentals course and the follow-on course must be completed before the AFSC is awarded. Training provided by the course is generic and is not designed for a specific type aircraft. It includes familiarization with aircraft systems such as electrical, utility, fuel, pneudraulics, landing gear, flight controls, engines, and related systems. Training also includes career progression, security, maintenance management and documentation, aircraft and flight line safety, handtools, hardware, technical orders, aerospace ground equipment, aircraft ground handling, corrosion, and inspections.

Prerequisites: ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AQR2A333H 000—Fighter Aircraft Maintenance Apprentice (U-2)—PDS Code HQJ—Sheppard/4 wk 3 days—Oct 96

This course is the fundamentals phase of a training program leading to the award of AFSC 2A333H. The fundamentals course and the follow-on course must be completed before the AFSC is awarded. Training provided by this course is generic and is not designed for a specific type aircraft. It includes familiarization with aircraft systems such as electrical, utility, fuel, pneudraulics, landing gear, flight controls, engines, and related systems. Training also includes career progression, security, maintenance management and documentation, aircraft and flight line safety, handtools, hardware, technical orders, aerospace ground equipment, aircraft ground handling, corrosion, and inspections.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ACR2A371 002—Advanced F-15/F-111 Avionic Troubleshooting Techniques—PDS Code XQW—Sheppard/2 wk—Oct 96

A 7-skill level upgrade course providing indepth, advanced training in preventative maintenance, quality supervision, management, analytical troubleshooting, and new technologies peculiar to the 2A3Xl career field.

Prerequisites: Must have completed all Air Force core tasks, all 5-skill level CDCs, and 18 months of OJT as a Ssgt or Ssgt- selectee.

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A372 002—F-16 Advanced Troubleshooting Techniques—PDS Code XQV—Sheppard/2 wk—Oct 96

A 7-skill level upgrade course providing indepth, advanced training in analytical troubleshooting, quality supervision, management, and new technologies peculiar to the 2A3X2 career field. Completion of this course will give the technician a higher degree of understanding concerning current problems in the field.

Prerequisites: Must have completed all Air Force core tasks, all 5-skill level CDCs, and 18 months of on-the-job training as a Ssgt or Ssgt- selectee.

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A373B 000—F-16 Aircraft Maintenance Craftsman—PDS Code Y48—Sheppard/2 wk/AFSC 2A373B—Oct 96

Detailed instruction in the use of technical orders, system schematics, troubleshooting, charts/log trees, and system components for Air Force personnel who possess AFSC 2A3X3B. Course addresses management and supervisory areas unique to the aircraft maintenance career field.

Prerequisites: Must complete all CDCs, AF core tasks, and 18 months as a SSgt.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR2A431 000—Apprentice Aircraft Guidance and Control Systems Specialist—PDS Code UYN—Keesler/22 wk/AFSC 2A431—Oct 96

The instructional design for this course is Group Lock Step. Airmen are trained to perform duties prescribed in AFMAN 36-2108 (formerly AFR 39-1) for aircraft guidance and control systems specialist, AFSC 2A431. This course is principles-centered and designed for training personnel to maintain, troubleshoot, and repair aircraft guidance and control equipment in an on-equipment environment. Hands-on maintenance instruction is provided on attitude heading reference systems, flight director systems, stability augmentation systems, automatic flight control systems, position indicating systems, engine indicating systems, liquid quantity indicating systems, flight instrument systems, air data systems, inertial navigation systems, and use of common and peculiar test equipment, and technical orders. Lecture instruction is provided on career ladder progression, security, safety, technical orders, supply discipline, maintenance management, maintenance inspection, fundamentals of aircraft systems maintenance, and avionics familiarization. Instructional theory is provided on compass system calibration, position indicating systems operation, angle of attack/stall warning, flight data recorder, fuel savings advisory systems, periscopic sextant systems and ground proximity warning systems. Prior to attending the equipment phase of training described, students are required to receive common electronics principles training as identified in STS 2A4X1.

Quota Control: 2 AF/DOP.

E3ABR2A432 000—Aircraft Communication/Navigation Systems Apprentice—PDS Code V60—Keesler/20 wk 4 days/AFSC 2A432—Mar 94

Principles-centered training in the performance of organizational maintenance of aircraft communication and navigation systems. Includes the application of electronic principles, circuit analysis, and circuit testing; flight line practices including tuning, adjusting, performance testing and troubleshooting using selected command representative avionic systems with associated TOs and equipment; and use of maintenance and inspection forms and tags, AF TOs, safety and security directives. Subjects taught in training are VHF (AM and FM), UHF, and HF radios, interphone equipment,

VOR/ILS, TACAN, radar altimeters, IFF transponder (including Mark XII), search and weather radar, doppler navigation systems and global positioning systems (GPS). Performance-oriented Core Automated Maintenance System (CAMS) training is taught under maintenance data collection (MDC).

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

E3ABR2A433A 000—Aircraft Command Control and Communication and Navigation Systems Apprentice (OC/RC-135 and EC-130H)—PDS Code 722—Keesler/23 wk/AFSC 2A433A—Oct 96

Principles-centered training for first-term airmen or retrainees in the knowledge and skills required to perform mission on-equipment maintenance of airborne intelligence aircraft. The airborne reconnaissance and intelligence-gathering aircraft used are the OC/RC-135 and EC-130H. System instruction includes hands-on training for secure voice, high power UHF, theory of aircraft familiarization, SATCOM systems, and JTIDS Class II equipment. Scope of training includes descriptions of hardware and software, system theory and data flow, system setup, system operation, software procedures, diagnostic testing, malfunction isolation using technical data, test and support equipment, and removing and replacing line replaceable units and shop replaceable units.

Prerequisites: Secret clearance before entry into course. Must be a US citizen.

Quota Control: HQ 2AF/DOP.

E3ABR2A433B 000—Aircraft Command Control and Communication and Navigation Systems Apprentice (E-3B/C)—PDS Code 723—Keesler/25 wk/AFSC 2A433B—Oct 96

Principles-centered training for first-term airmen or retrainees in the knowledge and skills required to perform mission on-equipment maintenance of airborne warning and control system (AWACS) aircraft. The airborne tactical surveillance aircraft used is the E-3B/C. System instruction includes hands-on training for JTIDS Class I equipment and theory training of AWACS communications equipment. Scope of training includes descriptions of hardware and software, system theory and data flow, system setup, system operation, software procedures, diagnostic testing, malfunction isolation using technical data, test and support equipment, and removing and replacing line replaceable units and shop replaceable units.

Prerequisites: Secret clearance before entry into course. Must be a US citizen.

Quota Control: HQ 2AF/DOP.

E3ABR2A433C 000—Aircraft Command Control and Communication and Navigation Systems Apprentice (EC-135C/E and E-4B)—PDS Code 724—Keesler/29 wk/AFSC 2A433C—Oct 96

Principles-centered training for first-term airmen or retrainees in the knowledge and skills required to perform mission on-equipment maintenance of airborne command post aircraft. The airborne presidential and strategic command support aircraft used are the EC-135C and E-4B. System instruction includes hands-on training of electronic switching and multiplexing, APM/CSTS, AFSATCOM, and VLF/LF equipment and theory training of E-4 communications equipment. Scope of training includes descriptions of hardware and software, system theory and data flow, system setup, system operation, software procedures, diagnostic testing, malfunction isolation using technical data, test and support equipment, and removing and replacing line replaceable units and shop replaceable units.

Prerequisites: Secret clearance before entry into course. Must be a US citizen.

Quota Control: HQ 2AF/DOP.

E3ABR2A433D 000—Aircraft Command Control and Communication and Navigation Systems Apprentice (E-8C)—PDS Code 725—Keesler/25 wk/AFSC 2A433D—Oct 96

Principles-centered training for first-term airmen or retrainees in the knowledge and skills required to perform mission on-equipment maintenance of joint surveillance targeting attach radar system (J-STARS) aircraft. The airborne ground taret surveillance aircraft aircraft used is the E-8C. System instruction includes hands-on training for J-STARS equipment. Scope of training includes descriptions of hardware and software, system theory and data flow, system setup, system operation, software procedures, diagnostic testing, malfunction isolation using technical data, test and support equipment, and removing and replacing line replaceable units and shop replaceable units.

Prerequisites: Secret clearance before entry into course. Must be a US citizen.

Quota Control: HQ 2AF/DOP.

E3ABR2A433E 000—Aircraft Command Control and Communication and Navigation Systems Apprentice (EC-130E)—PDS Code 726—Keesler/24 wk/AFSC 2A433E—Oct 96

Principles-centered training for first-term airmen or retrainees in the knowledge and skills required to perform mission on-equipment maintenance of airborne battlefield command control center III aircraft. The airborne command aircraft used is the EC-130E. System instruction includes hands-on training of ABCCC equipment. Scope of training includes descriptions of hardware and software, system theory and data flow, system setup, system operation, software procedures, diagnostic testing, malfunction isolation using technical data, test and support equipment, and removing and replacing line replaceable units and shop replaceable units.

Prerequisites: Secret clearance before entry into course. Must be a US citizen.

Quota Control: HQ 2AF/DOP.

E3AQR2A433 001—Aircraft Command Control and Communication and Navigation Systems Apprentice—PDS Code 2IE—Keesler/23 wk—Oct 96

This prerequisite course for all shreds of AFSC 2A4X3 must be completed before entry into AFSC-awarding courses, also located at Keesler AFB MS. Provides principles-centered training in the operation, maintenance, and repair of command control communication and navigation equipment. Includes performance testing and troubleshooting of receivers, transmitters, digital and voice satellite communications, multiplexing, electronic switching, cryptographic, airborne launch control, integrated computer, navigation, and radar systems. The following AFSC shreds are rleated to their special mission aircraft.

E3ABR2A433A 000 Airborne Reconnaissance and Intelligence Gathering

E3ABR2A433B 000 Airborne Tactical Surveillance (AWACS)

E3ABR2A433C 000 Airborne Presidential and Strategic

Command Support (ABNCP)

E3ABR2A433D 000 Airborne Ground Target Surveillance (J-STARS)

E3ABR2A433E 000 Airborne Battlefield Command (ABCCC)

Prerequisites: Secret clearance before entry into course. Must be a US citizen.

Quota Control: HQ 2AF/DOP.

E3AZR2A452 000—Automatic Communication Systems Maintenance (ACS)—PDS Code XW7—Keesler/1 wk—Oct 96

Provides training for Air Force personnel in the knowledge and skills needed to perform operation, inspection, and organizational level maintenance on the AN/ARC-190 ACS. Training includes system overview, operation, block diagram analysis, maintenance tests, system operational check out, remote operation, and data fill procedures.

Prerequisites: AFSC 2A153 or 2A452.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

E3ACR2A47X 000—Avionics Workcenter Advanced Management (On-Equipment)—PDS Code 7GV—Keesler/2 wk—Oct 96

Includes a technical update plus supervision and management skills for the career airman. The technical update will introduce students to the latest technology advances both in and outside the career field. Focuses on environmental hazards, Air Force supply discipline, supervision of maintenance, training, maintenance management, maintenance and inspection. When the 7-skill level CDC becomes available, completing the CDC will be mandatory before attending resident training. The resident course will start with class 951024.

Note: This course replaces E3ACR2A472 000.

Quota Control: HQ AFPC/DPPAPEO.

J3ABP2A531A 000—Aerospace Maintenance Apprentice (C-141)—PDS Code XJN—McChord/2 wk/AFSC 2A531A—Oct 95

Training includes task certifying training on launching and recovering aircraft, operating wheel braking systems, wing and tail walker for towing aircraft, oxygen system servicing, and aircraft fueling and defueling.

Special Requirements: Must complete course J3AQR2A531A 000, Aerospace Maintenance Apprentice (C-141), at Sheppard AFB TX.

Quota Control: 2 AF/DOP.

J3AQR2A531A 000—Aerospace Maintenance Apprentice (C-141)—PDS Code XCN—Sheppard/16 wk 3 day—Oct 96

The AFSC 2A531A will be awarded after completion of this course and completion of course J3ABP2A531A 000, Aerospace Maintenance Apprentice (C-141), at McChord AFB WA. Training includes aircraft introduction, aircraft maintenance fundamentals, technical orders, general safety, airframe systems, electrical systems, hydraulic systems, landing gear systems, fuel systems, flight control systems, engine and auxiliary power unit systems, preflight, basic post flight, and thruflight inspections, and ground handling procedures.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes. Losing units must screen and identify personnel selected for training as PRP resources according to AFI 36-2104.

Quota Control: 2 AF/DOP.

J3ABP2A531B 000—Aerospace Maintenance Apprentice (C-130)—PDS Code Y58—Little Rock/4 wk/AFSC 2A531B—Oct 96

Task-certified training on the core automated maintenance system, preflight, thruflight, and basic post-flight inspections, UHF and VHF radio operation, launch aircraft, recover aircraft, prepare aircraft for tow, tow team member wing and tail walker and brake operator and hand pump operator, and aircraft mooring, service engine oil system, service engine starter, service propeller, and aircraft fueling and defueling operation.

Special Requirements: Must complete J3AQR2A53lB 000, Aerospace Maintenance Apprentice (C-130), at Sheppard AFB TX.

Quota Control: 2 AF/DOP.

J3AQR2A531B 000—Aerospace Maintenance Apprentice (C-130)—PDS Code YS3—Sheppard/17 wk 3 days—Oct 96

The AFSC 2A531B will be awarded after completion of this course and course J3ABP2A531B 000, Aerospace Maintenance Apprentice (C-130), at Little Rock AFB AR. Training includes aircraft introduction, aircraft maintenance fundamentals, technical orders, general safety, airframe systems, electrical systems, hydraulic systems, landing gear systems, fuel systems, engine systems, propeller systems, auxiliary power unit and gas turbine compressor systems, utility systems, flight control systems, auxiliary power unit and gas turbine compressor systems, utility systems, flight control systems, preflight, basic post-flight, and thruflight inspections, and ground handling procedures.

Prerequisites: ECL 70.

Special Requirements: Losing unit must screen and identify personnel selected for training as PRP resources, according to AFI 36-2104. Safety-toed boots.

Quota Control: 2 AF/DOP.

J3ABP2A531C 000—Aerospace Maintenance Apprentice (C-5)—PDS Code X78—Dover/6 wk/AFSC 2A531C—Oct 96

After completion of the fundamentals course taught at Sheppard AFB, students are transferred to Dover AFB for training on technical orders, general AFOSH, airframe systems, electrical systems, hydraulic systems, landing gear systems, fuel systems, flight control systems, engines and auxiliary power unit systems, utility systems, and ground handling principles relating to the C-5 aircraft.

Prerequisites: ECL 70.

Special Requirements: Losing unit must screen and identify personnel selected for training as PRP resources according to AFI 36-2104.

Quota Control: 2 AF/DOP.

J3AQR2A531C 000—Aerospace Maintenance Apprentice (C-5)—PDS Code X78—Sheppard/4 wk 3 days—Oct 96

A two-phase course. Phase I is non-aircraft specific and supports fundamental training for all aircraft. In Phase II, students will receive training in general heavy aircraft using training material,

equipment, and aircraft of the tanker/airlift variety. Includes training on career progression, maintenance management, safety, technical orders, handtools, hardware, security, aircraft records, maintenance documentation, Quality Air Force, hazardous communications, aircraft general, aerospace ground equipment, utilities, air frames, engines, electrical, fuels, pneudraulics, landing gear, wheels, brakes, flight controls, and inspections. The AFSC 2A531C will be awarded after completion of this course and course J3ABP2A531C 000, Aerospace Maintenance Apprentice (C-5) at Dover AFB DE.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A531D 000—Aerospace Maintenance Apprentice (C-17)—PDS Code XW5—Sheppard/4 wk 3 days/AFSC 2A531D—Oct 96

Training of aircraft maintenance fundamentals to include career progression, maintenance management, safety, technical orders, handtools, hardware, security, aircraft records, maintenance documentation, Quality Air Force, hazardous communication, aircraft general, aerospace ground equipment (powered/nonpowered), utilities, airframe, engines, electrical fuels, pneudraulics, landing gear, wheels, brakes, flight controls, and inspections.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

J3AQR2A531E 000—Aerospace Maintenance Apprentice (B-1B/B-2)—PDS Code KRK—Sheppard/9 wk—Apr 96

First two phases of a training program leading to the award of AFSC 2A531E. The AFSC-awarding training will be conducted by training detachments. All phases must be complete before the AFSC can be awarded. Training includes 23 days of aircraft maintenance fundamentals at Sheppard AFB TX and 22 days of B-1B weapon system familiarization. Other training consists of career progression, security, technical orders, maintenance management and documentation, and aircraft and flight line (AFOSH) safety. Students are taught to use handtools and hardware, aerospace ground equipment, and to perform aircraft ground handling, corrosion identification, and inspection procedures. Airframe, electrical, egress, environmental, fuel, hydraulics, landing gear, flight control, engines and related systems are also taught.

Prerequisites: ECL 70.

Special Requirements: Personnel selected for training must be screened for PRP requirements according to AFI 36-2104. B-2 maintenance personnel must complete DD Form 398-2 within 14 days of arrival at Sheppard AFB TX. Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A531F 000—Aerospace Maintenance Apprentice (B-52)—PDS Code K2U—Sheppard/11 wk 3 days/AFSC 2A531F—Apr 96

This is an AFSC-awarding course. Provides 23 days of training in aircraft maintenance fundamentals and 35 days of B-52 weapon system familiarization. Training also consists of career progression, security, technical orders, maintenance management and documentation, and aircraft and flight line (AFOSH) safety. Students are taught to use handtools and hardware, aerospace ground equipment, and to perform aircraft ground handling, corrosion identification, and inspection procedures. Airframe, electrical, egress, environmental, fuel, hydraulics, landing gear, flight control, engines, and related systems are also taught.

Prerequisites: ECL 70.

Special Requirement: Personnel selected for training must be screened for PRP requirements according to AFI 36-2104 (formerly AFR 35-99). Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A531G 000—Aerospace Maintenance Apprentice, (All 135s)—PDS Code TAZ—Sheppard/11 wk 4 days/AFSC 2A531G/MASL D141199—Apr 96

This is an AFSC-awarding course. Training includes 23 days of aircraft maintenance fundamentals and 36 days of C-135 weapon system familiarization. Training also includes items such as career progression, security, technical orders, maintenance management and documentation, and aircraft and flight line (AFOSH) safety. Students are taught to use handtools and hardware, aircraft ground equipment, and to perform aircraft ground handling, corrosion identification, and inspection procedures. Airframe, electrical, egress, environmental, fuel, hydraulics, landing gear, flight control, engines, and related systems are also taught.

Prerequisites: ECL 70.

Special Requirements: Personnel selected for training must be screened for PRP requirements according to AFI 36-2104 (formerly AFR 35-99). Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AQR2A531G 001—Aerospace Maintenance Apprentice (E-3)—PDS Code HQJ—Sheppard/4 wk 3 days—Oct 96

First phase of a training program leading to the award of AFSC 2A531G (E-3 aircraft specific). Training of aircraft maintenance fundamentals to include career progression, security, technical orders, maintenance management and documentation, aircraft and flight line (AFOSH) safety. Students are taught to use handtools and hardware, aerospace ground equipment, and to perform aircraft ground handling, corrosion identification, and inspection procedures. Airframe, electrical, egress, environmental, fuel, hydraulics, landing gear, flight controls, engines and related systems are also taught. The second phase of the training program is conducted by training detachments at Tinker AFB OK. Students must complete both this course and J4ABF2A531G 000, E-3 Aircraft Maintenance Specialist (Crew Chief), before being awarded the 2A531G AFSC.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

NOTE: This course replaces J3AQR2A531K 001 and J3AQR45730C 001.

J3AQR2A531H 000—Aerospace Maintenance Apprentice (KC-10)—PDS Code KST—Sheppard/6 wk 3 days—Apr 96

First two phases of a training program leading to the award of AFSC 2A531H. The AFSC-awarding training will be conducted by training detachments. All phases must be completed before the AFSC can be awarded. Training includes 23 days of aircraft maintenance fundamentals at Sheppard AFB TX and 10 days of KC-10 weapon system familiarization. Training also includes such items as career

progression, security, technical orders, maintenance management and documentation, and aircraft and flight line (AFOSH) safety. Students are taught to use handtools and hardware, aerospace ground equipment, and to perform aircraft ground handling, corrosion identification, and inspection procedures. Airframe, electrical, egress, environmental, fuel, hydraulics, landing gear, flight control, engines, and related systems are also taught.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABP2A532A 002—Helicopter Maintenance Apprentice (H-53 MRT)—PDS Code Z7K—Kirtland/4 wk/AFSC 2A532—Oct 96

Must attend 21 days of helicopter maintenance fundamentals training, followed by 71 days of H-53 helicopter training at Ft Eustis VA prior to this course. Training includes ground handling, aircraft fuel servicing, electrical system operation, auxiliary powerplant operation, aircraft tracking and balancing, aircraft vibrations, isochronal and supplemental aircraft inspections, and servicing.

Prerequisites: Course J3AQP2A532A 002, Helicopter Maintenance Apprentice (H-53 MRT). ECL 70**.** Due to the technical nature of the technical orders, the required reading level must be attained and cannot be waived.

Special Requirements: Safety-toed boots.

Quota Control: 2 AF/DOP.

J3AQP2A532 000—Helicopter Maintenance Apprentice (Fundamentals)—PDS Code X39—Ft Eustis/4 wk 1 day—Oct 96

Fundamentals of mechanics with emphasis on the maintenance and inspection of helicopter aircraft currently used by the Air Force. Aircraft and flight line safety practices, use of tools, aircraft support equipment, and care and use of special tools. Corrosion identification and cleaning. Maintenance management and aircraft inspection and maintenance systems. Use of technical orders, publications, and maintenance forms.

Prerequisites: ECL 70. Due to the technical nature of the technical orders, the required reading level must be attained and cannot be waived.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AQP2A532A 002—Helicopter Maintenance Apprentice (H-53 MRT)—PDS Code Z7T—Ft Eustis/18 wk 2 days/AFSC 2A532—Oct 96

Students attend 21 days of helicopter maintenance fundamentals training, then 71 days of H-53 helicopter specific training. Includes helicopter familiarization, airframe components, ground handling, fuel systems, electrical systems, utility systems, landing gear system, wheel, tire, and brakes, main rotor system, box components, flight control systems, flight control rigging, aircraft tracking and balancing, aircraft vibrations, isochronal and supplemental aircraft inspections, servicing, and task certification.

Prerequisites: ECL 70. Due to the technical nature of the technical orders, the required reading level must be attained and cannot be waived.

Special Requirements: Safety-toed boots.

Quota Control: 2 AF/DOP.

J3ABP2A532C 001—Helicopter Maintenance Apprentice (UH-1N)—PDS Code XD0—Ft Eustis/11 wk 3 days/AFSC 2A532C—Oct 95

Students attend 21 days of helicopter maintenance fundamentals training, then 37 days of H-1 helicopter specific training. Includes helicopter familiarization, ground handling and ground handling wheels, landing gear system, utility systems, hydraulic systems, electrical, radio and instrument systems, fuel system, powerplant systems, main and tail rotor, transmission and drive system, flight control systems, aircraft vibrations, phase and supplemental inspections, and servicing.

Prerequisites: ECL 70. Due to the technical nature of the technical orders, the required reading level must be attained and cannot be waived.

Special Requirements: Safety-toed boots.

Quota Control: 2 AF/DOP.

J5ABP2A532B 000—UH-60 Helicopter Repairer (Intro)—PDS Code XKF—Ft Eustis/14 wk 3 days/AFSC 2A532—Oct 96

Includes Air-Force-unique helicopter maintenance fundamentals. Covers helicopter familiarization, airframe components, ground handling, fuel systems, electrical systems, radio and instrument systems, auxiliary powerplant systems, engine systems, hydraulic systems, utility systems, landing gear systems, wheel, tire, and brakes, main rotor systems, tail rotor systems, transmission and drive systems, main gear box, intermediate and tail gear box components, flight control systems, flight control rigging, aircraft tracking and balancing, aircraft vibrations, isochronal and supplemental aircraft inspections, and servicing.

Prerequisites: ECL 70. Because of the technical nature of the technical orders, the required reading level must be attained and cannot be waived.

Special Requirments: Safety-toed boots.

Quota Control: HQ 2AF/DOP.

J3ABR2A533A 000—B-1/B-2 Offensive Avionic Systems Apprentice—PDS Code XE1—Sheppard/11 wk 2 days/AFSC 2A533A—Apr 95

Provides training in skills and knowledge necessary to perform organizational maintenance and inspections on the B-1B Offensive Avionic Systems, Central Integrated Test System (CITS), and Doppler Radar System. Training will cover technical order procedures, performance of ground readiness tests, and troubleshooting and isolation of malfunctions. Also includes use of test equipment to perform functional and specific tests.

Prerequisites: Must attend electronics principles course (L3AQR2A533A 200) before attending this course.

Special Requirements: Reliability screening according to AFI 36-2204.

Quota Control: 2 AF/DOP.

J3ABR2A533A 001—B-52 Offensive Avionic Systems Apprentice—PDS Code XE2—Sheppard/16 wk 1 day/AFSC 2A533A—Apr 95

Provides training in skills and knowledge necessary to perform

organizational maintenance and inspections on the B-52 offensive avionic systems, strategic radar, electro-optical viewing system, and photographic systems. Training will cover system specific test equipment, technical order procedures, system theory of operation, and systems troubleshooting and fault isolation.

Prerequisites: Must attend Electronics Principles course, L3AQR2A533A 200, before attending this course.

Special Requirements: Secret clearance required before entering this course. Reliability screening according to AFI 36-2204.

Quota Control: 2 AF/DOP.

L3AQR2A533A 200—Electronic Principles—PDS Code W4K—Lackland/14 wk 1 day—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A533A. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A533A 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR2A533A 220—Electronic Principles—PDS Code W4K—Lackland/14 wk 1 day—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A533A. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A533A 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3ABR2A533B 000—B-1/B-2 Instrument and Flight Control Systems Apprentice—PDS Code XE3—Sheppard/12 wk 4 days/AFSC 2A533B—Apr 95

Provides training in skills and knowledge necessary to perform organizational level maintenance and inspections on the B-1B instrument and flight control systems. Training will cover data flow, the use of test equipment for troubleshooting and isolation of unit malfunctions, and technical order procedures. Operation, adjustment, inspection, and malfunction analysis of engine monitoring systems, liquid quantity systems, gyroscopic flight instrument, central air data computer, and flight director systems. Inspection and malfunction analysis of automatic flight control surfaces to include spoilers, flaps, and wing sweep surfaces.

Prerequisites: Students must attend L3AQR2A533B 200, Electronic Principles, before attending this course.

Special Requirements: Reliability screening according to AFI 36-2204.

Quota Control: 2 AF/DOP.

L3AQR2A533B 200—Electronic Principles—PDS Code W4K—Lackland/14 wk 1 day—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A533B. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A533B 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3ABR2A533C 000—B-1B Communication/Navigation/Defensive Avionic Systems Apprentice—PDS Code XE4—Sheppard/16 wk 2 days/AFSC 2A533C—Apr 95

Provides training in skills and knowledge necessary to perform organizational level maintenance, repair, and performance testing of B-1B communication, navigation, and defensive avionics systems, to include use of general purpose and systems-specific test equipment. Training will cover theory and application of system logic analysis, system testing and troubleshooting, and system hardware. Technical order procedures wil also be covered.

Prerequisites: Students must attend L3AQR2A533C 200, Electronic

Principles, before attending this course.

Special Requirements: Reliability screening according to AFI 36-2204. Secret clearance before attending course.

Quota Control: 2 AF/DOP.

L3AQR2A533C 200—Electronic Principles—PDS Code W4K—Lackland/14 wk 1 day—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2A533C. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2A533C 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3AZR2A553A 000—B-52 Offensive Avionic Systems Journeyman (MIDATS)—PDS Code PV4—Sheppard/6 wk 3 days—Oct 95

Provides training for Air Force personnel in AFSC 2A553A, 2A573A, or civilian equivalent in the knowledge and performance skills needed for operation and maintenance of the AN/ASM-623 (V) 1 Electrical-Electronic Test Station (MIDATS) and maintenance and alignment of airborne video tape recorder (AVTR). Training includes theory of operation, data flow, diagnostics, maintenance, alignment and calibration of the MIDATS, safety, technical orders, and manuals and other maintenance publications.

Prerequisites: AFSC 2A533A, 2A573A, or civilian equivalent, and at least 1 year of experience on the AN/ASQ-176 Offensive Avionics System.

Quota Control: 2 AF/DOP.

J3ACR2A573 000—Advanced Avionics Management Course—PDS Code XDZ—Sheppard/2 wk—Oct 96

A 7-skill level upgrade course providing advanced training in aircraft status reporting, aircraft generations, aircraft forms and inspection systems, supervision, Quality Air Force, surveys, and using crossfeed within the 2A5X3 career field.

Prerequisites: Must have completed all required core tasks, all required CDCs, and 18 months of on-the-job training as a SSgt.

Quota Control: HQ AFPC/DPPAPEO.

J3AQR2A611 001—Aerospace Propulsion Fundamentals, Jet Engine—PDS Code 763—Sheppard/2 wk—Oct 96

A non-AFSC awarding course. Prerequisite for courses J3ABR2A631C, Aerospace Propulsion Apprentice, Jet Engine (CONVL), J3ABR2A631D 007, Aerospace Propulsion Apprecentice, Jet Engine (F100), and J3ABR2A631E 006, Aerospace Propulsion Apprentice, Jet Engine (F110). Includes general engine maintenance, special/measuring tools, environmental hazards, Air Force occupational safety and health program, engine operating principles, supply responsibility, deficiency reporting system, Quality Air Force awareness, technical order system, and the core automated maintenance system. Safety is integrated throughout the course.

Prerequisites: ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOPS.

J3ABR2A631B 001—Aerospace Propulsion Apprentice, Turboprop and Turboshaft Engine—PDS Code X16—Sheppard/11 wk/AFSC 2A631B/MASL D141015—Apr 95

Primarily uses T56-A-7A and support equipment to teach operation, removal, disassembly, inspection, repair, test and installation of hydraulically operated propellers, controls, and accessories. Operating principles, engine change, adjustments and conditioning of turboprop engine and systems. Disassembly, inspection, repair, and assembly of turboprop engine. Emphasis in ground safety practices, associated ground support equipment, electrical fundamentals, technical publications, and familiarization with organizational and intermediate maintenance, maintenance forms, and maintenance documentation, and man-hour accounting as applicable to engine and propeller maintenance.

Prerequisites: ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A631C 001—Aerospace Propulsion Apprentice, Jet Engine (CONVL)—PDS Code 767—Sheppard/7 wk 1 day/AFSC 2A631C—Oct 96

Primarily uses TF33, TF39, and F108 engines and support equipment to teach technical orders, engine preparation, support equipment, preliminary maintenance procedures, core automated maintenance system, and standard base supply system. Includes flightline maintenance procedures; engine removal and installation; fan section maintenance; engine plumbing; removal, inspection, and installation of engine accessories; and rigid borescope operation. Some tasks taught in this course will be task certified. Use of technical and standard publications for maintenance is practiced throughout. Safety is integrated throughout the course.

Prerequisites: ECL 70 SA and J3AQR2A611 001, Aerospace Propulsion Fundamentals, Jet Engine Course, that is automatically programmed when this course is requested.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2 AF/DOPS.

J3ABR2A631D 007—Aerospace Propulsion Apprentice, Jet Engine (F100)—PDS Code 764—Sheppard/11 wk/AFSC 2A631D—Oct 96

Primarily uses F100-PW-100/200/220/229 series engines and support equipment to teach constructional features, engine rigging, preliminary maintenance, gearbox and accessory removal, inspection,

and installation. Also includes horizontal engine disassembly, inspection and assembly, servicing, removal and installation of the airframe mounted engine, and rigid borescoping. Some tasks taught in this course will be task certified. Use of technical and standard publications for maintenance is practiced throughout. Safety is integrated throughout the course.

Prerequisites: ECL 70 SA and J3AQR2A611 001, Aerospace Propulsion Fundamentals, Jet Engine Course, that is automatically programmed when this course is requested.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2 AF/DOPS.

J3ABR2A631E 006—Aerospace Propulsion Apprentice, Jet Engine (F110)—PDS Code 766—Sheppard/11 wk/AFSC 2A631E—Oct 96

Primarily uses F110-GE-100/129/229 series engines and support equipment to teach constructional features, engine rigging, preliminary maintenance procedures, engine servicing, augmentor and gearbox maintenance, removal and installation of accessories and plumbing. Also includes low pressure compressor and turbine removal and installation, core engine maintenance, compressor inspection and core automated maintenance system, and standard base maintenance supply system. Some tasks taught in this course will be task certified. Use of technical and standard publications for maintenance is practiced throughout. Safety is integrated throughout the course.

Prerequisites: ECL 70 SA and J3AQR2A611 001, Aerospace Propulsion Fundamentals, Jet Engine Course, that is automatically programmed when this course is requested.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2 AF/DOPS.

J3ABR2A632 001—Aerospace Ground Equipment Apprentice and Mission Ready Technician—PDS Code 362—DOD 602—Sheppard/21 wk 1 day—AFSC 2A632/MASL D148020—Oct 96

Trains personnel to maintain, troubleshoot, and repair aerospace ground equipment systems in an on-equipment environment, in support of aircraft maintenance and operations. Specific training includes electrical/electronic principles, basic system theory of operation, system components, component removal and installation, system operation, introduction to maintenance concepts, inspection and maintenance systems; core automated maintenance systems (CAMS), supply discipline, general flight line maintenance practices, use of technical publications, common handtools, special electrical/test equipment, maintenance documentation, forms, and equipment familiarization and use, soldering techniques, hardware, safety wiring, foreign object damage (FOD) prevention, corrosion control, safety as it applies to the AGE Air Force specialty code (AFSC), career progression, security, hazardous materials and waste handling. Also included in specific training are charging and starting systems, hands-on troubleshooting and correcting malfunctions of gas turbine compressor/diesel generator sets, motor generator sets, light carts, air cycle machines, air-conditioners, hydraulic test stands, bomb lifts, diesel engines, heaters, air compressors, electric motors, load banks, and various subsystems of each, nonpowered equipment, wheel and tire maintenance, procedures for capturing chlorofluorocarbons (CFC) on flight line air-conditioners, and DoD Environmental Protection Agency (EPA) refrigeration certification. Training includes certification on service inspections and operational checks on diesel/gas turbine compressor generators, air compressors, air-conditioners, bomb lifts, hydraulic test stands, heaters, and light carts; load check of the diesel generators, and wheel and tire maintenance. Fundamentals of flightline driving and radio operation.

Prerequisites: ECL 70 SA.

Special Requirements: Protective foot wear (safety-toed shoes). All prior service, Air Force Reserve, and Air National Guard will report for duty (school) with safety-toed shoes.

Quota Control: 2 AF/DOPR.

J3ABR2A633 001—Aircrew Egress Systems Apprentice—PDS Code XNW—DOD 602—Sheppard/7 wk 1 day/AFSC 2A633/MASL D148016—Apr 95

Principles of operation, removal, disassembly, inspection, repair, adjustment, assembly, and installation of aircrew egress systems and related aerospace ground equipment. Ground safety practices, electrical, pneudraulic, ballistic, and rocket fundamentals. Use of aerospace ground equipment, special tools, technical order system, technical publications, maintenance data collection management, and man-hour reporting.

Prerequisites: ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A634 001—Aircraft Fuels System Apprentice—PDS Code XPT—Sheppard/7 wk 2 days/AFSC 2A634/MASL D141044—Apr 95

Provides formal training in the introduction to structure of a maintenance organization; aircraft safety; hazardous materials/waste management and spill containment; aircraft familiarization; technical publications; fuel system tools and equipment; aerospace ground equipment; operation of fuel subsystems; removal, installation, and inspection of components; confined space entry; fuel cell removal, inspection, and installation; fuel leak detection; internal tank repairs; and application of sealants and corrosion control.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

J3ABR2A635 000—Aircraft Pneudraulic Systems Apprentice—PDS Code GQH—DOD 602—Sheppard/9 wk 4 days/AFSC 2A635/MASL D141057—Oct 96

Principles of operation; disassembly, inspection, assembly, test, adjust, and repair of pneudraulic units; and normal and emergency operation of aircraft pneudraulic systems. Remove and replace pneudraulic components. Basic troubleshooting. Operating and using associated ground support and test equipment. Aircraft familiarization, ground safety practices, electrical and pneudraulic fundamentals technical order system, and use of technical publications. Principles of aircraft maintenance management system and use of maintenance data collection forms. Familiarization with maintenance system as applicable to pneudraulic system specialists.

Prerequisites: ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AZR2A635 001—KC-135 In-Flight Refueling System—PDS Code 2W0—DOD 602—Sheppard/2 wk 1 day/MASL D141018—Apr 95

Supplemental training for maintenance personnel in the knowledge and skills necessary to perform field/intermediate level maintenance on aircraft inflight refueling pneudraulic systems. Includes identification, location, function, operation, servicing, inspection, removal, disassembly, repair, assembly, installation, troubleshooting, and adjustment of boom type refueling systems and controls.

Prerequisites: AFSC 2A6X5 and assignment to KC/EC-135 aircraft. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABR2A636 001—Aircraft Electrical and Environmental Systems Apprentice—PDS Code WC1—Sheppard/17 wk/AFSC 2A636/MASL D141239—Oct 96

Provides training in the knowledge and skills needed to perform maintenance on aircraft electrical and environmental systems. Includes AFOSH program, safety, federal hazard communication program, maintenance management, core automated maintenance system, maintenance and inspection systems, fundamentals and use of technical publications, and supply discipline. Electrical and environmental fundamentals to include use of handtools, soldering, wire maintenance, corrosion control, safetying devices, appropriate hardware, DC, AC, electronics and elements of physics and mechanics. Use of digital and analog multimeters and applicable systems test equipment. Operational fundamentals, operational check, and troubleshooting of AC power, DC power, external power, lighting, landing gear, fire extinguishing, takeoff warning, master caution/warning, antiskid, nose gear steering, flight controls, overheat/fire warning, NESA anti-icing, bleed air distribution, air-conditioning, pressurization, and oxygen systems. Operational fundamentals of fuel warning and control, liquid coolant refrigeration, and cryotainer systems.

Prerequisites: ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AZR2A651A 006—F110 Engine Maintenance—PDS Code W5L—Sheppard/4 wk—Oct 96

Provides aerospace propulsion specialist (jet engine) (AFSC 2A6X1A) personnel with the knowledge and skills needed to maintain the F110 jet engine. Includes component identification, accessory maintenance, disassembling and assembling major engine assemblies, disassembling and assembling the core engine, and performing a borescope inspection.

Prerequisites: Personnel en route to PACAF bases who have not had previous training on F110 engines.

Quota Control: 2 AF/DOP.

J3AZR2A652 000—Theater Air Control Systems (TACS) Power Plant O/I Maintenance—PDS Code MJ9—DOD 602—Sheppard/5 wk 1 day/MASL D148121—Jan 96

Maintenance of A/E24U-8 and MEP404B power plants. Use of test equipment to troubleshoot the turbine control and generator control units. Testing of the generator and turbine control unit input/output signals to include voltage regulation, fault sensing, parallel aid modules and electronic governor and battery charging systems. Performance in the adjustments of the turbine control, generator paralleling components, and final adjustment and repair of the mechanical and electrical systems.

Prerequisites: AFSCs 2A652, 2A672, 3E052, or 3E072. ECL 70.

Special Requirements: All personnel reporting to the school will bring protective footwear (safety-toed shoes).

Quota Control: 2 AF/DOP.

J3AZR2A652 001—Tactical Quiet Power Plant (TQPP) O & I Maintenance—PDS Code XN9—DOD 602—Sheppard/2 wk—Jan 96

Inspection, operation, and maintenance of the MJQ1612 power plant. The use of test equipment for testing of the generator and the engine control systems to include voltage regulation, electronic governor adjustments, battery charging system, fault sensing, paralleling circuits, and load banking the generator in the single and parallel mode. The training on the trailer includes air, hydraulic, and emergency braking system.

Prerequisites: AFSCs 2A652, 2A672, 3E052, and 3E072. ECL 70.

Special Requirements: Protective footwear (safety-toed shoes).

Quota Control: 2 AF/DOP.

J3ACR2A671A 002—Aerospace Propulsion Craftsman, Jet Engine—PDS Code XJT—Sheppard/2 wk/AFSC 2A671A—Oct 96

Developed as 7-skill level AFSC awarding course to enhance training in propulsion systems maintenance. Includes reading and interpreting schematics related to F100, F110, TF33, and F108 engines, how to use test equipment in troubleshooting analysis, advanced fault isolation techniques, evaluating installed and uninstalled engine performance, advanced troubleshooting techniques for small gas turbine engines, and damage analysis to determine preventive measures. Mandatory course for active duty SSgts who have completed the Air Force core tasks, CDCs, and have 18 months of time in grade prior to attending.

Special Requirements: Safety-toed shoes.

Quota Control: HQ AFPC/DPPAPEO.

J3AZR2A671A 001—Aerospace Propulsion Craftsman, Jet Engine Mishap Investigation—PDS Code B8Y—DOD 601—Sheppard/1 wk 4 days/MASL D122007—Apr 95

Provides general introduction to design and construction variations of jet engine, to include small, large, and turbo fan engines, as needed for mishap investigation. Policies and procedures of investigation, fluid system contamination, and identification of material failures. Identification and causes of engine failures in relation to compressor and turbine failures, identification of overtemperature damage, identification of bearing failures, and a comparison on inflight and post-impact fire damage. Engine power analysis procedure and temperature analysis. Inspection of crash damaged engine and components and jet engine case history studies.

Prerequisites: AFSCs 2A671A, 2A671B, and 1S071 or civilian equivalent. For safety personnel assigned foreign object damage (FOD) duties and for officers who may be assigned mishap investigation responsibilities. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3ACR2A671B 001—Aerospace Propulsion Craftsman, Turboprop/Turboshaft Engine—PDS Code XJZ—Sheppard/3 wk/AFSC 2A671B—Jan 96

A 7-skill level AFSC awarding course which enhances training in propulsion systems maintenance. It contains advanced troubleshooting techniques using test equipment and flow

charts/wiring diagrams of the T56, T64, and T700 engines and the 54H60-91 propeller. Mandatory for active duty SSgts who have completed the Air Force core tasks, CDCs, and have 18 months of time in grade prior to attending.

Special Requirements: Safety-toed shoes.

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A671B 003—Aerospace Propulsion Craftsman, Turboprop/Turboshaft Engine—PDS Code XJU—Sheppard/2 wk/AFSC 2A671B—Apr 95

A 7-skill level AFSC awarding course which enhances training in propulsion systems maintenance. It contains advanced troubleshooting techniques using test equipment and flow charts/wiring diagrams on the T56 engine and the 54H60-91 propeller. Mandatory course for ANG/AFRES SSgts who have completed the Air Force core tasks, CDCs, and have 18 months of time in grade prior to attending.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AAR2A672 000—Aerospace Ground Equipment (AGE)Technician—PDS Code A8J—DOD 602—Sheppard/7 wk 3 days/MASL D148021—Oct 96

Diagnosis of unusual malfunctions and determination of proper maintenance procedures to correct such malfunctions; perform difficult repair of aircraft ground support equipment, such as diesel engines, diesel and turbine driven generator sets, equipment coolers (air-conditioners), air compressors, heaters, hydraulic test stands, gas turbine compressors, bomblifts, and load banks; and operate related diagnostic and test equipment. This course is designed to train AGE technicians SSgt and above.

Prerequisites: AFSC 2A652/72; SSgt, TSgt, or MSgt. Civilians must have 3 years of experience in actual accomplishment of maintenance on aircraft ground equipment. Satisfactory completion of courses in aircraft ground equipment in recognized military or civilian technician school may be substituted for maximum of 1 year of experience. ECL 70 SA.

Special Requirements: All personnel reporting to school will bring safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ACR2A672 001—Aerospace Ground Equipment Craftsman—PDS Code XJJ—Sheppard/2 wk/AFSC 2A672—Oct 96

Mandatory 7-skill level AFSC awarding course for ANG/AFRES personnel. Provides indepth advanced system troubleshooting skills on diesel generator sets, air-conditioners, and gas turbine compressors. Includes enhanced training in the use of schematics, wiring diagrams, flow charts, advanced fault isolation techniques, and the use of test equipment as it applies to aerospace ground equipment. Training in management and supervision of an AGE flight. (MAJCOM/unit must project for school allocations during the yearly Training Personnel Requirements Conference.)

Prerequisites: AFSC 2A652, SSgt. Personnel selected to attend must have completed course J3ABR2A632, Aerospace Ground Equipment Apprentice Course, be in upgrade training, have completed mandatory Air Force core tasks, 7-skill level career development course (CDC), and 18 months of on-the-job training as a SSgt.

Special Requirements: Protective foot wear (safety-toed shoes).

Quota Control: AFPC/DPPAPEO.

J3ACR2A672 002—Aerospace Ground Equipment Craftsman (Active Duty)—PDS Code XJK—Sheppard/3 wk 3 days/AFSC 2A672—Oct 96

Mandatory 7-skill level AFSC awarding course for Air Force active duty personnel. Provides formal indepth advanced system troubleshooting skills on diesel generator sets, air-conditioning, hydraulic test stands, and gas turbine compressors. Includes enhanced training in the use of schematics, wiring diagrams, flow charts, advanced fault isolation techniques, and the use of test equipment as it applies to aerospace ground equipment. Training in management and supervision of an AGE flight. MAJCOM/unit must project for school allocations during the annual Training Personnel Requirements Conference.

Prerequisites: AFSC 2A652, SSgt. Personnel selected to attend must have completed course J3ABR2A632, Aerospace Ground Equipment Apprentice Course, be in upgrade training, have completed mandatory Air Force core tasks, 7-skill level career development course (CDC), and 18 months of on-the-job training as a SSgt.

Special Requirements: Protective foot wear (safety-toed shoes).

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A673 000—Aircrew Egress Systems Craftsman—PDS Code XR7—Sheppard/2 wk/AFSC 2A673—Jan 96

Mandatory 7-skill level AFSC awarding for all Air Force egress personnel, including ANG/AFRES. Provides indepth training on egress systems, advanced maintenance concepts, supervisory and troubleshooting techniques, and egress-related management concepts. MAJCOMs/units must project for school allocations during the yearly Training Personnel Requirements Conference.

Prerequisites: AFSC 2A653, SSgt. Personnel selected to attend this course must be on upgrade training to the 7-skill level and have completed all mandatory Air Force core tasks, 18 months of on-the-job training as a SSgt, and the 7-skill level career development course.

Special Requirements: Protective footwear (safety-toed shoes).

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A674 001—Aircraft Fuels Systems Craftsman—PDS Code XR8—Sheppard/2 wk/AFSC 2A674/MASL D141072—Oct 96

Mandatory 7-skill level AFSC awarding for Air Force active duty and ANG/AFRES personnel. Provides formal indepth advanced system troubleshooting skills in aircraft electrical circuits, engine feed and crossfeed, transfer system, ground refueling/defueling systems, pressurization and vent system, and fuel leak isolation procedures. Includes enhanced training in maintenance and supply, equipment management, aircraft fuel tank/cell maintenance, and discussion of new fuel system technologies, products, and procedures. MAJCOM/units must project for school allocations during the annual Training Personnel Requirements Conference.

Prerequisites: AFSC 2A654, SSgt. Personnel selected to attend this course must be on upgrade training to the 7-skill level and have completed all mandatory Air Force core tasks, 18 months of on-the-job training as a SSgt, and the 7-skill level career development course. ECL 70 SA.

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A675 000—Aircraft Hydraulic Systems Craftsman—PDS Code XZY—Sheppard/2 wk—Oct 96

Mandatory course for upgrade to 7-skill level for all active duty, ANG, and AFRES personnel. Course broadens the troubleshooting skills of the aircraft hydraulic systems craftsman through analysis of aircraft electrical and hydraulic system schematics and diagrams. There are lessons on troubleshooting methods and techniques and troubleshooting hypothetical malfunctions of hydraulic power, landing gear, brake, and flight control subsystems. Instruction also uses schematics to troubleshoot hypothetical malfunctions of the hydraulic test stand. Students are given the opportunity to engage in crosstalk on specific key maintenance management and aircraft generation issues. Microsoft Windows and mouse skills helpful.

Prerequisites: AFSC 2A655, SSgt. Personnel selected to attend this course must be on upgrade training to the 7-skill level and have completed all mandatory Air Force core tasks, and have completed 18 months of on-the-job training as a SSgt and the 7-skill level career development course.

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2A676 000—Aircraft Electrical and Environmental Systems Craftsman—PDS Code XZX—Sheppard/2 wk—Oct 96

Mandatory course for upgrade to 7-skill level for all active duty, ANG, and AFRES personnel. Course broadens the troubleshooting and management skills of the aircraft electrical and environmental systems craftsman through analysis of aircraft electrical and environmental systems schematics and diagrams and various management-related lessons. Lessons are included on time domain reflectometers, advanced soldering, troubleshooting techniques, AC and DC power systems, landing gear, air-conditioning systems, pressurization systems, explosive safety programs, property accountability, funds management and depot level reparables, and supply reports. Microsoft Windows and mouse skills helpful.

Prerequisites: AFSC 2A656, SSgt. Must be on upgrade training to the 7-skill level and have completed the following: mandatory Air Force core tasks, 18 months of on-the-job training as a SSgt, and the 7-skill level career development course.

Quota Control: HQ AFPC/DPPAPEO.

J4AST2A6X6 061—Liquid Oxygen/Nitrogen Storage Tanks—PDS Code VFY—location: on-site/1 wk—Apr 95

Provides training for Air Force personnel, AFSC 2A6X6 or civilian equivalent, in the knowledge and skills necessary to maintain the 50-gallon liquid oxygen storage and servicing cart, and the Libby and Zwick liquid nitrogen servicing cart. Includes application of safety practices, operation, inspection, purge and vacuum procedures, operational and leak checks, troubleshooting, and repair of liquid oxygen/nitrogen storage tanks and components. This is a special training course conducted under the provisions of AFI 36-2201.

Prerequisites: AFSC 2A6X6.

Special Requirements: The host base needs to furnish the following equipment and facilities: 220/440 volts, 3 phase, 60 Hz electrical power, air purging unit, vacuum thermocouple, vacuum pump, vacuum hose 1-inch ID, PNYP69064, 50-gallon LOX servicing cart, liquid nitrogen servicing unit, overhead projector, and classroom.

Quota Control: 2 AF/DOP.

J3ABP2A731 001—Aircraft Metals Technology Apprentice—PDS Code SF0—DOD 700—Aberdeen Proving Ground/16 wk 1 day/AFSC 2A731/MASL D148210—Jan 96

Provides training on principles, procedures, techniques, and processes of machining, welding, cutting, soldering, brazing, heat treating and hand forming various types of ferrous and nonferrous metals and materials used in fabrication, modification, and reapir of mechanical parts required in maintaining Air Force weapons and general ground support equipment. Training includes identification, characteristics, and selection of metals and shop mathematics to compute math functions, such as, equations, trigonometry, and triangulations used to construct and use shop drawings, working sketches, and blue prints. Also covers the use and care of handtools, precision and nonprecision measuring devices. Operation and maintenance of powered and nonpowered shop equipment, such as drill presses, lathes, milling, contour and grinding machines, power saws, metal cutting shears, welding equipment and heat treating furnaces. Use machining equipment to assembly, layout, inspect, testing, file, assembly and rework machine parts, removal and replacement of broken or faulty plugs, studs, screws, and inserts. Use oxyacetylene, metallic arc and gas-shielded arc welding process, principles, procedures, and techniques on metals such as carbon steel, heat and corrosion resistant steels, aluminum and aluminum alloys, magnesium and magnesium alloys, titanium and titanium alloys and super alloys used in fabrication and repair of Air Force weapon systems and equipment. Use heat treatment theory, furnaces, and equipment to treat and test regular and exotic metals. Use technical data, Air Force, and commercial publications to perform all functions while complying with AFOSH and safety precautions. Use computers to input Core Automated Maintenance System transactions into simulated aircraft and equipment records.

Prerequisites: Normal color vision and depth perception. ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3ABP2A732 000—Nondestructive Inspection Apprentice—PDS Code 2T9—DOD 760—Naval Air Station Memphis/9 wk 4 days/AFSC 2A732/MASL D148047—Apr 96

Principles and applications of nondestructive inspection methods; government specifications and Air Force publication related to nondestructive inspection. Basic metallurgy relating to types, causes, and characteristics of discontinuities in metals; identification of metals; preparation of materials for nondestructive inspection. Theory of basic electricity, magnetism, liquid penetrant, optical, conductivity, ultrasonic, eddy current, bond testing, composite components, and radiographic and spectrometric oil analysis inspection equipment. Development of techniques, interpretation and evaluation of magnetic, penetrant, optical, conductivity, ultrasonic, eddy current, bond testing, composite component inspection, radiographic inspections, and spectrometric oil analysis. All safety requirements included with the above items.

Prerequisites: ECL 70 SA. Vision correctable to 20/30.

Special Requirements: Advise personnel attending this course that light sensitive (lenses) glasses cannot be worn when performing fluorescent (magnetic particle, penetrant) inspections.

Admin Instructions: Air Force NDI Program Office Manager, SA ALC/MMEI, Kelly AFB TX, must approve all requests for training waivers or to evaluate training equivalency prior to MAJCOM approval to awarding AFSC 2A732.

Quota Control: 2 AF/DOP.

J3ABP2A732 001—Nondestructive Inspection Apprentice (Army

68D20/30)—PDS Code 8M5—Naval Air Station Memphis/8 wk 2 days/MASL D148047—Apr 96

Provides training in the role of the Army nondestructive inspection technician; the Army Maintenance Management System (TAMMS); aerospace construction features and Occupational Safety and Health Association (OSHA) rules and regulations. Principles and application of nondestructive inspection methods, government specifications, Army and Air Force publications related to nondestructive inspection. Basic metallurgy relating to type, cause, and characteristics of discontinuities in metals; identification of metals; preparation of materials for nondestructive inspection. Theory of basic electricity, magnetism, liquid penetrant, optical conductivity, ultrasonic, eddy current, bond testing, composite components, and radiographic inspection equipment. Development of techniques, interpretation and evaluation of magnetic, penetrant optical conductivity, ultrasonic, eddy current, bond testing, composite component, and radiographic inspections. All safety requirements included with the above items.

Prerequisites: Army students in MOS 68D20/30 and who have 9 months of retainability by graduation. Vision correctable to 20/30.

Special Requirements: Light sensitive glasses (lenses) cannot be worn when performing fluorescent (magnetic particle penetrant) inspection.

Quota Control: 2 AF/DOP.

J3ABP2A733 000—Aircraft Structural Maintenance Apprentice—PDS Code LBR—DOD 603—Naval Air Station Memphis/8 wk 2 days/AFSC 2A733/MASL D141104—Apr 96

Provides training in repair, replacement, and modification of aircraft and missile airframe structures constructed of aluminum, corrosion resistant steel, titanium, and fiberglass. Use of technical orders and Air Force publications; development of layouts for repairs and fabrications; identification and selection of fasteners, and nonmetallic repair materials; replacement and modification of parts; fabrication of cable assemblies and tubing assemblies. Operation of dimpling equipment, squaring shears, sheet metal brakes and rollers, grinders, drill presses, contour cutting saws, stretching and shrinking machine, turret punches, microshaver, arbor presses, sanders, lever shears, pneumatic drills, rivet guns, pull guns, cable swaging and pull-testing equipment, tube-cutting and flaring equipment, power-slip roll former, routers, and vacuum pumps. Upon graduation from this course, the students will be awarded their 3-level in AFSC 2A7X3.

Prerequisites: Satisfactory completion of J3AQR2A733 001, Apprentice Aircraft Structural Maintenance Specialist. ECL 70 SA.

Special Requirement: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AQR2A733 001—Aircraft Structural Maintenance Apprentice—PDS Code LBT—DOD 603—Sheppard/5 wk 3 days/MASL D148183—Jan 96

This course is a portion of the training program leading to AFSC 2A733. The follow-on course, J3ABP2A733 000, must be completed before the AFSC is awarded. Training includes career field structure, shop mathematics, maintenance management, maintenance and inspection, use of drawings, metal characteristics, equipment construction features, corrosion control program, handtools, shop and flight line safety, paint removal from metal, technical publications, metal identification, characteristics of composites, corrosion principles, corrosion inspection, mechanical and chemical corrosion removal and chemical surface treatment, composition of coatings, care and use of coating equipment, mechanical paint removal from advanced composites, fiberglass surface preparation, aerospace equipment markings, and application of coating systems and markings.

Prerequisites: ECL 70 SA.

Special Requirements: Before departing for training, students must have baseline audiograms, fitted earplugs, safety-toed boots, and be able to be placed in the respiratory program as prescribed in AFOSH Standard 161-1, Respiratory Protection Program.

Quota Control: 2 AF/DOP.

J3ABR2A734 001—Fabrication and Parachute Apprentice—PDS Code XPU—Sheppard/12 wk 1 day/AFSC 2A734/MASL D148010—Oct 95

Techniques and functions of a fabrication and parachute apprentice. Training includes use of technical data, common hand tools, special test equipment, and support equipment. Also, performing procedures and operations pertaining to inspection and repack of selected items to include aspects of fabrication, flotation and parachute systems, and associated support equipment. Includes performing operational and functional checks, determining shelf or service life of time change components, and manufacturing/modifying basic items of fabric to required specifications.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

J3AZP2A751 001—Advanced Metals Technology—PDS Code 745—Aberdeen Proving Gd/3 wk 3 days—Oct 96

Trains Air Force and civilian personnel in the knowledge and skills needed to perform advanced lathe, milling, and grinding operations. Training includes shop math; left hand, multiple lead, and acme threading operations; toolpost grinding; rotary table operation; transfer of bathtub molds; surface grinding angles; and tool and cutter grinder operation.

Prerequisites: AFSCs 2A751 and 71 or civilian equivalent.

Quota Control: HQ 2 AF/DOP.

J3AZP2A751 002—Heat Treatment—PDS Code BZY—DOD 701—Aberdeen Proving Gd/3 wk/MASL D148075—Jan 96

Identification and specification of metals, mechanical and physical properties of metals, theory and principles of heat treating. Furnace operation and adjustment and calibration of furnace controls. Heat treatment of ferrous and nonferrous metals to include hardening, tempering, annealing, normalizing, and case hardening of steels and solution and precipitation heat treatment of heat and corrosion resistant metals, and aluminum metals. Applicable safety precautions.

Prerequisites: AFSCs 2A751, 2A771, 2A752, 2A772, 2A753, 2A773, or civilian equivalent. Personnel who have attended course C3AZR42754 000 should not attend this course. ECL 70.

Special Requirements: Protective footwear (safety-toed shoes).

Quota Control: 2 AF/DOP.

J3AZP2A752 000—Defense Joint Oil Analysis Program Training Course (Atomic Emission Spectrometer)—PDS Code S4F—DOD 760—Naval Air Station Memphis/2 wk 2 days/MASL D148070—Jun 94

Provides DOD personnel with a working knowledge in the principles, procedures, and operation of the atomic emission fluid

analysis spectrometer. Provides training in the principles and evaluation techniques used in spectrometric analysis of used oils for wearmetal content. Provides knowledge required for successful spectrometric oil analysis laboratory operation on such subjects as oil analysis data automation, the correlation and certification program and the recommending of maintenance action based on analytical results.

Prerequisites: AFSC 2A752 or higher, civilian or other service equivalent. Personnel who have received spectrometric oil analysis training in courses C3ABR45831 000 or J3ABP2A732 000, Apprentice Nondestructive Inspection Specialist; and C3AZR45851 000, Defense Spectrometric Oil Analysis Operator/Evaluator (Atomic Emission Spectrometer), should not attend this course. En route oversea requirements apply. ECL 70.

Special Requirements: Light-sensitive lenses (glasses) and contact lenses cannot be worn in the laboratories.

Quota Control: 2 AF/DOP.

J3AZP2A752 003—Defense Joint Oil Analysis Program Training Course (Physical Properties Testing)—PDS Code V79—DOD 760—Naval Air Station Memphis/3 wk 4 days—Jun 94

Provides Navy and Army personnel with a working knowledge in the principles, procedures, and operations of the atomic emission fluid analysis spectrometer and training in evaluation techniques used in spectrometric analysis of used oils for wearmetal content. Provides knowledge required for successful spectrometric oil analysis laboratory operation on such subjects as oil analysis data automation, the correlation and certification program, and the recommending of maintenance action based on analytical results. Teaches principles of physical property—water content, fuel dilution, flash point, viscosity, neutrality, particle count, blotter, and microscopic analysis testing.

Prerequisites: Navy, Army, or civilian employees equivalent to Air Force AFSC 2A752. Personnel who have received initial spectrometric oil analysis training in course C3AZR45851 000 before 1 Dec 92 should not attend this course. ECL 70.

Special Requirements: Light sensitive lenses (glasses) and contact lenses cannot be worn in the laboratories.

Quota Control: 2 AF/DOP.

J3AZP2A752 004—Defense Joint Oil Analysis Program Training Course (Ferrography Testing)—PDS Code V7K—DOD 760—Naval Air Station Memphis/4 wk 2 days—Jun 94

Provides Army personnel with a working knowledge in the principles, procedures, and operations of the atomic emission fluid analysis spectrometer as well as training in evaluation techniques used in spectrometric analysis of used oils for wearmetal content. Provides knowledge required for successful spectrometric oil analysis laboratory operation on such subjects as oil analysis data maintenance action based on analytical results. Teaches principles of physical property—water content, fuel dilution, flash point, viscosity, neutrality, particle count, blotter, and microscopic analysis testing. Also, principles of ferrography testing, sample preparation, sample evaluation, and ferrography and performance testing.

Prerequisites: Army or civilian employees equivalent to Air Force AFSC 2A752. Personnel who have received initial spectrometric oil analysis training in course C3AZR45851 000 before 1 Dec 92 should not attend this course. ECL 70.

Special Requirements: Light sensitive lenses (glasses) and contact lenses cannot be worn in the laboratories.

Quota Control: 2 AF/DOP.

J3AZP2A752 005—Weld Certification Specimen Inspection—PDS Code 77X—Naval Air Station Memphis/1 wk—Oct 96

Trains Air Force and civilian personnel in the skills and knowledge needed to perform weld certification inspections. Includes training on weld thickness, types of metal, joints, butts and tees, tube x-ray, penetrameters, and enhancers, optical equipment including the comparator, and inspection of weld specimens.

Prerequisites: AFSCs 2A752, 2A772, or civilian equivalent.

Quota Control: 2 AF/DOP.

J3AZP2A752 006—Penetrant/Magnetic Particle and Radiographic Techniques—PDS Code 77Y—Naval Air Station Memphis/2 wk—Oct 96

Training in liquid penetrant process control includes use of the brightness check to determine wetability of penetrant and use of cracked chromed panels to check penetrant sensitivity. In magnetic particle process control, training includes use of the shunt meter to check for amperage and use of the ketos ring to check for surface and subsurface defects. Radiographic inspection emphasizes radiation protection, and includes training on radiation area survey, classification of radiographic inspection installation, radiation protection standard, and radiation protection survey. Methods of radiation calculations include training on geometric unsharpness such as undercutting, fogging, backscatter, and use of special techniques such as triangulation, special image method, and special purpose techniques. Students learn to use, interpret, create, and correct the H&D Correction Chart, and to inspect and interpret film for defects including cracks and corrosion.

Prerequisites: AFSCs 2A752, 2A772, or civilian equivalent.

Quota Control: 2 AF/DOP.

J3AZP2A752 007—Ultrasonic and Phase Amplitude—PDS Code 77Z—Naval Air Station Memphis/2 wk—Oct 96

Trains Air Force and civilian personnel to perform ultrasonic and phase amplitude inspections. Includes training on ultrasonic thickness testing on coatings, corrosion, and multi-thickness materials; skip distance; distance amplitude correction; phase amplitude inspection to include application of current field inspections, boltholes, use of scanner and methods, fastener scans, metal sorting, impedance inspection, and inspection of titanium and steel.

Quota Control: HQ 2AF/DOP.

J3AZP2A753 000—Aircraft Structural Technology—PDS Code YKE—DOD 703—Naval Air Station Memphis/4 wk 2 days/MASL D141109—Oct 96

Use of various technical order publications; safety guidelines relating to airframe repairs; aircraft control surface balancing; identification, installation, and removal of special fasteners; minor service/maintenance of installation tools; use of hotbond curing equipment and vacuum bagging procedures; repair of radome assemblies; repair of metal bonded honeycomb structures to include core replacement of one or two facings, transitional close-out, and trailing edge areas.

Prerequisites: Military 5- or 7-skill level in AFSC 2A7X3. Minimum of 18 months' experience as a 5 level in actual repair of metal airframe structures (related Services should have equivalent). Civilians should have 3 years' experience in repairing metal airframe

structures. Personnel who have attended course C3AZR42775 000, C3AZR45872 000, or C3AZR2A773 000 should not attend this course. ECL 70.

Quota Control: 2 AF/DOP.

J3AZP2A753 002—General Advanced Composite Repair—PDS Code 6G7—Naval Air Station Memphis/3 wk 1 day/MASL D141219—Oct 96

Repair of advanced composite aircraft structures. Introduction to advanced composites; use of associated technical orders; visual and tap testing inspections; damage evaluations and classification using nondestructive inspection results; moisture removal procedures; cutting, trimming, drilling, countersinking, liquid shimming and installation of advanced composite structures; damage removal and repairs to aramid fiber and graphite structures; surface defect repairs; fastener hole repairs; the use of programmable hot bond curing equipment, and tools required for advanced composite repair; airborne fiber, chemical handling, and in-shop safety.

Prerequisites: 5- and 7-level AFSC 2A7X3, civilian or other services equivalent. Minimum of 1 year of experience in airframe repair. Completion of course C3AZR45872 001 or J3AZP2A753 000 desirable. Personnel not meeting prerequisites may not meet proficiency levels as stated in course training standard. Personnel who have attended course C3AZR42775 001 or J3AZP2A773 001 should not attend this course. ECL 70.

Special Requirements: Females should receive a Serum Beta-HCC test to medically confirm they are not pregnant prior to arriving at the course. Pregnant females will not attend the course.

Quota Control: 2 AF/DOP.

J3AZR2A753 000—Aircraft Corrosion Control—PDS Code E9N—DOD 603—Sheppard/1 wk/MASL D141059—Mar 94

Provides training in the knowledge and skills necessary to identify metals, inspect aircraft for corrosion, and classify corrosion severity. Scope of knowledge training includes corrosion principles, characteristics of advanced composites identification of aerospace metals, corrosion preventive maintenance and inspection, mechanical corrosion removal, chemical corrosion removal and treatment, and protective coatings.

Prerequisites: Any 5- or 7-level AFSC, grade E-4 or above, or civilian equivalent, engaged in aerospace equipment maintenance, other than personnel having attended course J3AZR42751 000 or J3AZR45852 000. ECL 70 SA.

Quota Control: 2 AF/DOP.

J4AZT2A753 000—Aircraft Corrosion Control—PDS Code E9N—DOD 790—Sheppard/1 wk/MASL D141059—Mar 94

Provides training in the knowledge and skills necessary to identify metals, inspect aircraft for corrosion, and classify corrosion severity. Includes corrosion principles, characteristics of advanced composites, identification of aerospace metals, corrosion preventive maintenance and inspection, mechanical corrosion removal, chemical corrosion removal and treatment, and protective coatings.

Prerequisites: Any 5- or 7-level AFSC, grade E-4 or above, or civilian equivalent, engaged in aerospace equipment maintenance, other than personnel having attended course J3AZR42751 000 or J3AZR45852 000. ECL 70 SA.

Quota Control: 2 AF/DOP.

J4AZT2A753 001—Plastic Media Blasting Booth O and M—PDS Code 4YP—DOD 790—Sheppard/1 wk/MASL D141059—Mar 94

Training is designed for the walk-in PMB booth (AGBR) operation. Tailored to basic system operation and maintenance, types of media and their uses, preoperation requirements of the AGBR, types and uses of the nozzles, blasting requirements to include cause and effect of improper PMB applications, support equipment used in the AGBR, post-operational requirements; preventive maintenance, equipment troubleshooting, and safety.

Prerequisites: AFSC 2A7X3, 5- and 7-skill level, civilian, or other services equivalent.

Quota Control: 2 AF/DOP.

J3AZR2A754 000—Sewing Machine Maintenance—PDS Code CXL—DOD 760—Sheppard/1 wk 3 days—Oct 95

Trains Air Force and civilian personnel in the skills and knowledge needed to perform sewing machine maintenance. Training includes inspection, timing adjustment, troubleshooting, and overhaul of light weight, medium weight, and special sewing machines used in the repair of parachutes, protective covers fabric, and rubber products. Safety will be stressed throughout this course.

Prerequisites: AFSCs 2A754 and 2A774, A1C or higher, or civilian equivalent. ECL 70.

Quota Control: 2 AF/DOP.

J3ACP2A771 000—Aircraft Metals Technology Craftsman—PDS Code XZP—Aberdeen Proving Ground/2 wk—Jan 96

Training in knowledge and skills needed to perform as a craftsman in the aircraft metals technology subject matter area. Training includes planning/scheduling maintenance, analyzing requirements, management of resources, and advanced maintenance technologies.

Prerequisites: Completion of 7-skill level core tasks, 18 months of on-the-job training as a SSgt, and completion of 7-skill level CDC (when available).

Quota Control: 2 AF/DOP.

J3ACP2A772 000—Nondestructive Inspection Craftsman—PDS Code XZR—Naval Air Station Memphis/2 wk—Oct 96

Training in knowledge and skills needed to perform as a craftsman in the nondestructive inspection subject matter area. Training includes performance of liquid penetrant process control, magnetic particle process control, and phase amplitude; ultrasonic inspection; bond testing; advanced composites, radiographic interpretation; technique development; and joint oil analysis program.

Prerequisites: Completion of 7-skill level core tasks, 18 months of on-the-job training as a SSgt, and completion of 7-skill level CDC.

Quota Control: HQ AFPC/DPPAPEO.

J3ACP2A773 000—Aircraft Structural Maintenance Craftsman—PDS Code XZS—Naval Air Station Memphis/2 wk—Oct 96

Training in knowledge and skills needed to perform as a craftsman in the aircraft structural maintenance subject matter area. Training includes aircraft damage assessment and classification, advanced composites, and management and supervision.

Prerequisites: Completion of 7-skill level core tasks, 18 months of on-the-job training as a SSgt selectee, and completion of 7-skill level CDC.

Quota Control: 2 AF/DOP.

J3ACR2A774 000—Fabrication and Parachute Craftsman—PDS Code XR9—Sheppard/2 wk/AFSC 2A774—Oct 95

Mandatory 7-skill level AFSC awarding course for Air Force active duty and ANG/AFRES personnel in 2A7X4 AFSC. Provides formal indepth training in operating theory, characteristics, and failure analysis of the ACES II, MT-1X, back automatic, AP28S-18 parachute systems. Also includes explosive safety program, interpreting blueprints and repair symbols, and advanced maintenance repairs to survival equipment. Also includes analysis of maintenance reports and procedures, product improvement programs, supply management, forecasting time change items, and supervisory and management concepts as they relate to the career field. MAJCOMs and units must project for school allocations during the annual Training Personnel Requirements Conference.

Prerequisites: AFSC 2A754, SSgt. Personnel selected to attend this course must be on upgrade training to the 7-skill level and have completed all mandatory Air Force core tasks, 18 months of on-the-job training as a SSgt, and the 7-skill level career development course.

Quota Control: HQ AFPC/DPPAPEO.

E3AZR2E000 001—High Reliability Soldering and Connections—PDS Code GUW—DOD 100—Keesler/2 wk/MASL D147045—Jan 96

Trains personnel in the knowledge and skills necessary for high reliability soldering of miniature and microminiature circuits. Instruction is provided on selecting solder, flux, and cleaning solvents for each task and inspection of soldered connections. Training also includes care and use of specialized handtools, standard soldering iron, and the PACE 350 repair unit. Detailed instruction and practical experience are provided on soldering terminal connections, removal and replacement of resistors, transistors and assorted integrated circuits, removal and application of conformal coatings as well as repair of printed circuit cards.

Prerequisites: Maintenance personnel of 5- or 7-skill level or civilian equivalent. ECL 70 SA.

NOTES: 1. Duty uniform for military personnel is the fatigue uniform. When a holiday occurs during the course, students will be accelerated to prevent an additional 3-day TDY. 2. Detailed training (high reliability) on microminiature component soldering is available from the US Navy under course L5AZN2E351 003, Microminiature Component Repair, PDS Code 17G, duration: 4 weeks. L5AZN2E351 003 is a prerequisite L5AZN2E351 002.

Quota Control: 2 AF/DOP.

E3AQR2E020A 014—Common Electronic Training Program (Keesler)—PDS Code WEF—Keesler/15 wk 4 days/MASL D132104—Dec 93

Basic principles-oriented course in the fundamentals of electronics. Training includes a study of direct and alternating current with emphasis on circuit applicaton; the principles of resistance, inductance, and capacitance and use within electrical circuits; the principles of circuit application of solid state devices, waveshaping circuits, digital logic and electron tubes; principles involved in transmitting and receiving radio waves and block diagram analysis of circuits used; principles of microprocessor control; and computer principles and circuits. Hands-on training, using electronic test equipment is provided as students perform laboratory exercises to learn techniques used in fault isolation and troubleshooting of electronic equipment.

Prerequisites: ECL 70 SR.

Quota Control: 2 AF/DOP.

E3ABR2E031 000—Ground Radar Systems Apprentice—PDS Code XNF—Keesler/33 wk/MASL D137002/AFSC 2E031—Oct 96

Training includes generic apprenticeship knowledge required to support installation, maintenance, and repair of fixed or mobile air traffic control, weather, ground aircraft control and warning, and automatic tracking radar systems; electronic combat systems; and associated closed circuit television display equipment, signal analysis equipment, related radar operator training devices, radar beacon systems, aircraft identification equipment, remoting systems, video mappers, computerized processors, common and specialized radar test equipment and communications subsystems in support of the ground radar systems specialist career field (AFSC 2E0X1). The student begins with the development and application of electronic principles, circuit analysis, alignment, use of safety procedures, maintenance publications, testing and troubleshooting. Using selected ground radar equipment systems as vehicles, instruction is included on various types of transmitters and RF systems, receivers, digital signal processors, antenna controls, indicator, IFF/SIF auxiliary equipment and associated test equipment.

Prerequisites: ECL 70 SR.

CCAF Credit: 67 hours.

Quota Control: 2 AF/DOP.

E3AZR2E051 006—Modular Control Equipment Interface Group (MIG) Maintenance—PDS Code MJG—Keesler/1 wk—Oct 96

Training includes system overview, functional description to the block diagram level, and system level maintenance on the tactical air operation interface group OA 9194/TYQ-23(V)2, modular control equipment interface group (MIG) including associated test equipment. Graduates of course E3AZR2E051 010 should not require this training.

Prerequisites: ECL 70. Completion of applicable career development course, AFSC 2E051, 2E071, or civilian equivalent and a working knowledge of solid state devices and digital techniques.

Special Requirements: Compliance with AFOSH Standard 127-31.

Admin Instructions: On class start date, report to 334 TRS/TTERS, Cody Hall, bldg 4202, room 159, at 0600. Course supervisor can be reached at DSN 597-5642. Government quarters are available for civilian students. If government quarters are not used, adequate commercial facilities are located within 2 miles of the base. TDY student enlisted members will be housed in transient quarters (VAQ) according to AFI 32-6005 and AFI 34-601. Billeting reservations accepted. Call DSN 597-3663/2631 or (601) 377-3705, extension 2631/2923. Billeting at Muse Manor, bldg 2101, reporting NET 0800 and NLT 1600, 1 day before class start date.

CCAF Credit: 19 hrs.

Quota Control: 2 AF/DOP.

E3AZR2E051 010—AN/TPS-75 Maintenance—PDS Code RV0—Keesler/9 wk—Oct 96

This is a deployable/transportable radar system capable of providing long-range radar data to support operations and control of tactical aircraft. Provides training on the AN/TPS-75 radar system to include the UPX-27 IFF/SIF equipment. Tactical air operation interface group 0A 9194/TYQ-23(V)2, modular control equipment interface group (MIG), and AN/TLQ-32 anti-radiation missile (ARM) decoy. Training conducted on equipment description and capabilities, system operation and checkout, scheduled and unscheduled maintenance including alignments, fault isolation, and removal and replacement of assemblies, according to technical documentation and procedures, included associated test equipment.

Prerequisites: ECL 70. Completion of applicable career development course, AFSC 2E051, 2E071, or civilian equivalent and a working knowledge of solid state devices and digital techniques..

Special Requirements: Comply with AFOSH Standard 127-31. Secret clearance before class start date. Personnel without proper security clearance will graduate 4 days early.

Admin Instructions: On class start date, report to 334 TRS/TTERS, Cody Hall, bldg 4202, room 159, at 0600. Course supervisor can be reached at DSN 597-5642. Government quarters are available for civilian students. If government quarters are not used, adequate commercial facilities are located within 2 miles of the base. TDY student enlisted members will be housed in transient quarters (VAQ) according to AFI 32-6005 and AFI 34-601. Billeting reservations accepted. Call DSN 597-3663/2631 or (601) 377-3705, extension 2631/2923. Billeting at Muse Manor, bldg 2101, reporting NET 0800 and NLT 1600, 1 day before class start date.

CCAF Credit: 19 hours.

Quota Control: 2 AF/DOP.

E3AZR2E051 012—DBRITE O/I Maintenance—PDS Code 98X—Keesler/2 wk—Oct 96

Theory of operation, alignments, maintenance procedures, and troubleshooting to the LRU on the Digital Bright Radar Indicator Tower Equipment (DBRITE) as driven by PIDP II and AN/TPX-42 equipment, including associated test equipment.

Prerequisites: Completion of applicable career development course, AFSC 2E051, 2E071, or civilian equivalent, and a working knowledge of solid state devices and digital techniques. Compliance with AFOSH Standard 127-31. ECL 70.

Admin Instructions: On class start date, report to 334 TRS/TTERS, Cody Hall, bldg 4202, room 159, at 0600. Course supervisor can be reached at DSN 597-5642. Government quarters are available for civilian students. If government quarters are not used, adequate commercial facilities are located within 2 miles of the base. TDY student enlisted members will be housed in transient quarters (VAQ) according to AFI 32-6005 and AFI 34-601. Billeting reservations accepted. Call DSN 597-3663/2631 or (601) 377-3705, extension 2631/2923. Billeting at Muse Manor, bldg 2101, reporting NET 0800 and NLT 1600, 1 day before class start date.

CCAF Credits: 4 hrs.

Quota Control: 2 AF/DOP.

E3AZR2E051 013—Principle User Processor (PUP) O/I Maintenance—PDS Code M2L—Keesler/1 wk 3 days—Oct 96

The PUP is a display system that provides the next-generation weather radar (NEXRAD) information and electronic maps to operators (meteorologist) with current weather data including visual presentation of derived products such as hail, tornadoes, etc. Includes system description, capabilities, limitations, block diagram analysis, maintenance procedures, operational checks, systematic troubleshooting, and use of common and special test equipment. This course is also part of E3AZR2E051 014 and graduates of that course should not require this training.

Prerequisites: Completion of applicable career development course, AFSC 2E051, 2E071, or civilian equivalent, and a working knowledge of solid state devices and digital techniques. ECL 70. Compliance with AFOSH Standard 127-31.

Admin Instructions: On class start date, report to 334 TRS/TTERS, Cody Hall, bldg 4202, room 159, at 0600. Course supervisor can be reached at DSN 597-5642. Government quarters are available for civilian students. If government quarters are not used, adequate commercial facilities are located within 2 miles of the base. TDY student enlisted members will be housed in transient quarters (VAQ) according to AFI 32-6005 and AFI 34-601. Billeting reservations accepted. Call DSN 597-3663/2631 or (601) 377-3705, extension 2631/2923. Billeting at Muse Manor, bldg 2101, reporting NET 0800 and NLT 1600, 1 day before class start date. Navy/USMC reporting office: Alley Hall, bldg 4331, room 236, DSN 597-5906.

CCAF Credits: 3 hrs.

Quota Control: 2 AF/DOP.

E3AZR2E051 014—WSR-88D Weather Radar O/I Maintenance—PDS Code M3B—Keesler/6 wk—Oct 96

This is a new Next Generation Weather Radar (NEXRAD) system that provides advanced warning time of hazardous weather by providing weather radar information converted to weather data for distribution to the principle user processor display system. Includes system description, capabilities, limitations, block diagram analysis, maintenance procedures, operational checks, systematic troubleshooting and use of command special test equipment to support the WSR-88D weather radar, including the principle user processor display system..

Prerequisites: Completion of applicable career development course, AFSC 2E051, 2E071, or civilian equivalent, and a working knowledge of solid state devices and digital techniques. Compliance with AFOSH Standard 127-31.

Admin Instructions: On class start date, report to 334 TRS/TTERS, Cody Hall, bldg 4202, room 159, at 0600. Navy/USMC report to Alley Hall, bldg 4331, room 236, DSN 597-5906. Course supervisor can be reached at DSN 597-5642. Government quarters are available for civilian students. If government quarters are not used, adequate commercial facilities are located within 2 miles of the base. TDY student enlisted members will be housed in transient quarters (VAQ) according to AFI 32-6005 and AFI 34-601. Billeting reservations accepted. Call DSN 597-3663/2631 or (601) 377-3705, extension 2631/2923. Billeting at Muse Manor, bldg 2101, reporting NET 0800 and NLT 1600, 1 day before class start date.

CCAF Credits: 11 hrs.

Quota Control: 2 AF/DOP.

E3AZR2E066 003/E4AST2E066 010—Communications-Electronics Maintenance Support Procedures—PDS Code RFV—DOD 100—Keesler/2 wk/MASL D148100—Apr 96

Provides communications-electronics maintenance support and chief

of maintenance staff personnel with a working knowledge of their responsibilities. Includes: communications-electronics organization, Maintenance Standardization and Evaluation Program (MSEP), standard publications and technical order systems, maintenance support communicative requirements, configuration management, deficiency reporting, and investigative and analytical procedures.

Prerequisites: SrA or above and civilians GS-7 and above recently assigned or with projected assignment to communications-electronics maintenance support, or a chief of maintenance staff function. Attendees must complete both Extension Course Institute (ECI) course 1200, Air Force Technical Order System, and Air Force job qualification standard (AFJQS) 2EXXX-20IG, Maintenance Support, to attend. Must have a working knowledge of the Air Force technical order and standard publication systems and comply with AFMAN 36-2108 according to special experience identifier (SEI) requirements. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR2E066 006—Quality Assurance - Aircraft—PDS Code 5PG—Sheppard/1 wk 3 days/MASL D148097—Oct 96

Provides training in the knowledge and skills necessary to perform various duties within a quality assurance organization. Training includes quality assurance responsibilities, product improvement program, quality assurance concepts and philosophy, quality assurance programs and assessments, and US Air Force publications including technical order management and time compliance technical orders.

Prerequisites: SSgt or above, minimum of 5-skill level (7-skill level desired) in any aircraft maintenance AFSC. Civilian qualification same as for airmen. Open to officers and GS-7 and above. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR2E066 007—Technical Order Account Custodian—PDS Code 5X5—Sheppard/4 days/MASL D165000—Mar 94

Trains Air Force personnel in the skills and knowledge associated with the maintenance of Air Force technical orders and technical order accounts. Includes types of technical orders (TO), types of TO files, TO improvements reporting, maintaining TOs and files in current status. Course design is targeted to personnel in the grade of E-4 or above, and (or) selected for assignment as a TO distribution office (TODO), distribution account (TODA), distribution subaccount (TODS), or monitor.

Prerequisites: Grade E-4 and above and (or) selected for assignment as a TODO, TOA, TODS, or TO monitor. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR2E066 008—Engine Management—PDS Code T5B—DOD 558—Sheppard/2 wk 2 days/MASL D141223—Oct 95

Provides training on CAMS familiarization; the use of computer remote terminals and remote printer, the procedures for accounting for, reporting, controlling, and inventorying of propulsion units; storage and transportation criteria of propulsion units; and the interpretation and use of engine reports. Students who have attended C3AZR39270 001, Engine Management, PDS Code 3QV, should NOT attend this course.

Prerequisites: Possess control AFSC of 2R151, 2A651A/B, 2A353, 2A551J, 2A551, 2A552, or 2S051 or higher, or civilian GS-5 or above assigned or scheduled to be assigned to an engine management position. ECL 70 SA.

Quota Control: 2 AF/DOP.

J4AST2E066 008—Engine Management—PDS Code T5B—Tinker/2 wk 2 days—Oct 96

Provides training for personnel with AFSC 2ROX1, 2A6X1, or 2SOX1 and civilians (GS-5 and above) who are assigned or scheduled to be assigned to a base engine management position. Includes specific procedures for updating and maintaining the CEMS (including CAMS and DLR), engine documentation duties, and the use of remote terminal devices. Also includes reporting, control, inventory, modification, and transportation of propulsion units.

Prerequisites: Personnel with AFSC of 2R0X1, 2A6X1, or 2S0X1 and civilians (GS-5 and above) who are assigned to or scheduled to be assigned to a base engine management position.

Quota Control: 2 AF/DOP.

J4AST2E066 054—Quality Assurance - Aircraft (ACC)—PDS Code 5PE—on site/1 wk 1 day/AFSC 2E000/MASL D149305—Oct 96

Provides training in the knowledge and skills necessary to perform various duties in the quality assurance flight. Course targeted for Air Combat Command (ACC) and other organizations whose maintenance quality policy parallels ACC policy. Scope of training includes quality assurance responsibilities, US Air Force publications systems including technical orders and time compliance technical orders, the product improvement program, the Gold Flag program, quality assurance concepts and philosophy, and the maintenance quality improvement program programs and assessments.

Prerequisites: SSgt or above, minimum of 5-skill level (7-skill level desired) in any aircraft maintenance AFSC. Civilian qualification same as for airmen. Open to officers and GS-7 and above. ECL 70.

Quota Control: 2 AF/DOP.

J4AST2E066 055—Quality Assurance - Aircraft (ANG, AFRES, AETC, AFMC)—PDS Code 5P6—on site/1 wk 3 days/AFSC 2E000—Oct 95

Course targeted for personnel assigned to ANG, AFRES, AETC, or AFMC. Includes responsibilities of the quality assurance organization, the Air Force publication systems including technical orders and time compliance technical orders (TCTO), product improvement including deficiency analysis and reporting, quality assurance inspections and evaluations, and evaluation of the maintenance program.

Prerequisites: SSgt or above, minimum of 5-skill level (7-skill level desired) in any aircraft maintenance AFSC. Civilian qualification same as for airmen. Open to officers and GS-7 and above. ECL 70.

Quota Control: 2 AF/DOP.

E3ABR2E131 000—Satellite and Wideband Communications Equipment Apprentice—PDS Code V9Z—Keesler/26 wk 3 days/AFSC 2E131/MASL D132031—Apr 95

Provides apprentice level training for airmen in the satellite and wideband communications equipment ladder of the airman communications-electronics systems career field. Completion of a basic satellite and wideband communications systems equipment course is mandatory for award of AFSC 2E131. Training includes, but is not limited to, theory of electronics including tubes, transistors, microminiature components, solid-state devices, fiber optics, parametric amplifiers, waveguide components, traveling wave tubes, klystrons, and low-noise amplifiers; principles of computers,

cryogenics, spread spectrum techniques, satellite tracking, and servo drive mechanisms; interpreting publications, blueprints, wiring and logic diagrams, and schematics; communications theory; principles of fixed and transportable wideband and earth terminal communications systems and equipment, and their operational procedures; satellite orbital mechanics; data analysis procedures; test equipment and circuit analysis; principles of multiplexing, analog-to-digital conversion, and digital data transmission; networks associated with multichannel equipment; installing and testing practices; atomic frequency generating devices; voice and record communication equipment including manual and semiautomatic teletypewriters operation; and Defense Communications Agency technical and satellite control and testing procedures.

Special Requirements: Must be a US citizen.

Quota Control: 2 AF/DOP.

E3ABR2E132 000—Meteorological and Navigation Systems Apprentice—PDS Code MQ4—Keesler/34 wk/AFSC 2E132/ MASL D146003—Mar 94

Operation, tuning, adjustment, calibrations, alignment, troubleshooting, inspection, organization maintenance and repair of instrument landing system VHF omnirange and TACAN, and weather equipment such as cloud height, visibility, temp-humidity, wind, and pressure sensing.

Prerequisites: ECL 70.

Special Requirements: Personnel in this AFSC are required to climb a tower in excess of 100 ft in height.

Quota Control: 2 AF/DOP.

E3ABR2E133 001—Ground Radio Communications Apprentice—PDS Code 1NX—Keesler/35 wk 2 days/AFSC 2E133—Oct 95

Provides apprentice-level training for Air Force personnel in the ground radio communications equipment ladder of the Airmen's Communications-Electronics System career field. Includes, but is not limited to, electronic principles, test equipment operation, magnetic recording principles, operation and maintenance, AM receiver principles, operation, and maintenance, AM transmitter principles, operation, and maintenance, AM transceiver principles, operation, and maintenance, air traffic control console operational principles and maintenance, air traffic control systems maintenance, HF systems principles, operation, and maintenance, antijam system operational principles and maintenance, and tactical systems orientation, operational principles, and maintenance.

Prerequisites: ECL 70.

Special Requirements: US citizen (to attend entire course). Course teaches Have Quick II material not releasable to international students. International students are not permitted to attend block 2.9 and 2.10 of this course.

Quota Control: 2 AF/DOP.

NOTE: This course is a new mission ready technician course (MRT) which replaces course E3ABR2EI33-000.

E3ABR2E134 000—Television and Intrusion Detection System Apprentice—PDS Code WGH—DOD 191—Ft Meade/28 wk/AFSC 2E134/Army MOS 26T10/MASL D132042—Oct 95

Provides a working knowledge of electronic and television fundamentals, test equipment operation, supply, maintenance procedures, maintenance and operation of television receivers and monitors, cameras, studio accessories, audio systems, video tape recorders, radio/audio systems; AM, FM, and TV transmitters, closed circuit and studio systems.

Prerequisites: Army, MOS 25R. Trainees with extensive electronics background should request a waiver for course L3AQR2E134 100 according to paragraph 2.10 of this catalog. ECL 70.

Special Requirements: US Army students must pass an Army physical fitness test (APFT) to qualify for completion of this course.

Quota Control: 2 AF/DOP.

L3AQR2E134 100—Electronic Principles—PDS Code W4J—Lackland/14 wk 4 days/MASL D131135—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2E1X4. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to E3ABR2E134 002, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1). Army: MOS 26R. ECL 70.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

E3AZR2E151 020—AN/TRC-170 O/I Maintenance—PDS Code 8RX—DOD 101—Keesler/6 wk/MASL D132069—Oct 95

Organizational and intermediate level maintenance on the AN/TRC-170, AN/TSQ-146 Multiplexer Terminal, Tropo Satellite Support Radio, field exposed multiplexer equipment, and COMSEC strapping on KG-81, KG-84/A, and KY-68. Includes TRI-TAC system concepts and equipment configuration, link engineering, digital techniques, multiplexing, operation, functional analysis, radio maintenance and repair, perofrmance checks, setup and teardown procedures, and system operation.

Prerequisites: Completion of applicable career development course, AFSC 2E151, 2E171, or civilian equivalent with a working knowledge of digital and solid-state devices. Trainees entering this course at a level below that specified cannot be expected to achieve the knowledge and performance level indicated. Students who have attended course E3ABR2E131 000 should not be scheduled to attend this course. The AN/TRC-170 training was included in the basic course with the merger of the old 304X0 and 204X6 AFSCs. ECL 70 SA.

Special Requirements: Student's orders must reflect that he or she is a US citizen. Safety shoes are required for antenna erection and

tear-down.

Quota Control: 2 AF/DOP.

E3AZR2E152 006—AN/FRN-45 TACAN O/I Maintenance—PDS Code PDJ—Keesler/3 wk 4 days/MASL D132066—Oct 95

Trains personnel in AFSC 2E152/72 in the knowledge and skills needed to maintain the AN/FRN-45 TACAN. Scope of training includes functional description, technical characteristics, operating procedures, block and circuit analysis, test equipment, preventive maintenance, and troubleshooting.

Prerequisites: Completion of applicable career development course, AFSC 2E152, 2E172, or civilian equivalent with a working knowledge of solid state devices, digital techniques, and general test equipment (including familiarity with spectrum analyzer). Trainees entering this course at a level below that specified cannot be expected to achieve the knowledge level and performance level indicated. ECL 70 SA.

Quota Control: 2 AF/DOP.

E3AZR2E153 045—AN/PRC-113, AN/TRC-176 O/I Maintenance—PDS Code 8L5—Keesler/1 wk—Oct 95

Trains Air Force maintenance personnel in skills and knowledges necessary to perform duties of organizational and intermediate maintenance on the AN/PRC-113 and AN/TRC-176 radios. Includes familiarization of system functions and configurations; block diagram analysis; isolation of equipment malfunctions test; operation; alignment of various components of the radios; and the use of speciaIized test equipment.

Prerequisites: Completion of applicable career development course, AFSC 2E153, 2E173, or civilian equivalent.

Special Requirements: NOFORN. Orders must state member is a US citizen.

Quota Control: 2 AF/DOP.

E3AZR2E153 046—AN/GRC-206 O/I Maintenance—PDS Code 8L6—Keesler/3 wk 4 days—Oct 95

Trains Air Force maintenance personnel in skills and knowledges necessary to perform operational checks, inspection, and O/I maintenance of the AN/GRC-206 Radio. Includes familiarization of system functions and configurations; block diagram analysis; isolation of equipment malfunctions; test; operation; alignment of various components of the radios; and the use of specialized test equipment.

Prerequisites: Completion of applicable career development course, AFSC 2E153, 2E173, or civilian equivalent.

Special Requirements: NOFORN. Orders must state member is a US citizen.

Quota Control: 2 AF/DOP.

E3AZR2E153 053—Ground Wave Emergency Network (GWEN) Input-Output and Receive Only Organizational Maintenance—PDS Code 91Y—Keesler/1 wk 4 days—Oct 95

Provides training for Air Force personnel in the knowledge and skills needed to perform the duties of maintenance personnel on GWEN, Input-Output (I/O) and Receive Only (RO) Nodes. Includes GWEN System operation, GWEN I/O and RO nodes, message processing, unscheduled maintenance, troubleshooting, hardness assurance pulse (HAP) testing, and hardness assurance shielding effectiveness (HASE) testing.

Prerequisites: Completion of applicable career development course, AFSC 2E153, 2E173, or civilian equivalent.

Special Requirements: The statement “US citizen” must be on the student's orders.

Quota Control: 2 AF/DOP.

E3AZR2E153 057—GPS Manpack/Vehicular/Precision Lightweight GPS Receiver (PLGR) Organizational Maintenance—PDS Code JKG—Keesler/1 wk—Oct 95

Trains Air Force maintenance personnel in skills and knowledge necessary to perform duties of organizational maintenance on the Navstar GPS M/V Navigation Sets AN/PSN-8, AN/VSN-8, and Precision Lightweight GPS Receiver (PLGR) AN/PSN-11. Includes concepts and architecture of Navstar GPS, system operation, block diagram analysis, isolation of equipment malfunctions to the module/assembly level, and module assembly removal and replacement procedures. Also includes AN/GSM-336(V)1 Test Set block diagram analysis, test set operation, and isolation of test set malfunctions to the module/assembly level.

Prerequisites: Completion of applicable career development course, AFSC 2E153, 2E173, or civilian equivalent.

Quota Control: 2 AF/DOP.

E3AZR2E153 058—AN/GRC-171B(V)4 O/I Maintenance—PDS Code RFJ—Keesler/1 wk 4 days—Oct 95

Trains AF maintenance personnel in skills and knowledge necessary to perform operational checks, inspection, and O/I maintenance of the AN/GRC-171B(V)4 radio, including transmitter and receiver functional analysis.

Prerequisites: Completion of applicable career development course, AFSC 2E153, 2E173, or civilian equivalent.

Special Requirements: Orders must state that member is a US citizen. Personnel from NATO nations may attend upon approval of the AFSC training manager.

Quota Control: 2 AF/DOP.

E3AZR2E153 060—AN/TRC-187A Time Signal Set O/I Maintenance—PDS Code V4Z—Keesler/1 wk 3 days—Oct 95

Training in skills and knowledge necessary to perform maintenance on the AN/TRC-187A time signal set. Includes equipment characteristics, theory of operation, equiment operation, performance checks, and troubleshooting.

Prerequisites: Completion of applicable career development course, AFSC 2E153, 2E173, or civilian equivalent.

Special Requirements: Orders must state “Member is a US Citizen.” NOFORN.

Quota Control: 2 AF/DOP.

X3AZR2E153 061—Ground Systems Digital Technician—PDS Code WF8—Goodfellow/16 wk 2 days—Oct 96

Provides training for maintenance personnel on the WOLFERS/ROCKETEER Subsystem, the CHAINWORK system, and miscellaneous electronic equipment and systems used by Air Intelligence Agency (AIA). Provides training on AN/TNH-21B/25 and HW-96 recorders, OM-62/FGC demodulator group, spectrum analyzers (operational procedures), WJ8618B receivers, system standards, AN/GSQ-237 master timing systems, AN/FTC-54 telephone connecting/switching equipment, ROCKETEER (DIACOM) system, AN/GSQ-216(V)1 time/frequency equipment, principles of fiber optics, local area network (LAN), and corrosion control.

Prerequisites: Must have AFSC 2E153, 2E173, or civilian equivalent, completed basic electronic maintenance training, and have completed at least one field assignment.

Quota Control: 2 AF/DOP.

X3AZR2E153 062—WOLFERS/ROCKETEER Subsystem Maintenance—PDS Code 35C—Goodfellow/2 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel on the WOLFERS/ROCKETEER Subsystem. This course is designed to provide maintenance training on the AN/FTC-54 Telephone Connection/Switch Equipment, DICOM Equipment (ROCKETEER), and the AN/GSQ-216(V)1 time/frequency equipment. Includes theory of analysis, system diagnostics, system operations, electrical/mechanical alignments and

adjustments, and fault detection and isolation. Training will be to the line replaceable unit (LRU) level.

Prerequisites: Must have completed basic electronic maintenance training and a field assignment. Must have AFSC 2E153, 2E173, or DoD equivalent.

Quota Control: 2 AF/DOP.

E3AZR2E153 063—AN/GRC-242 I/O Maintenance—PDS Code WL0—Keesler/2 wk—Oct 95

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel on the AN/GRC-242 system. This includes receiver, exciter, power amplifier, power supply, and antenna coupler theory. Troubleshooting and scheduled maintenance will be performed on the different units of the AN/GRC-242.

Prerequisites: Completion of applicable career development course, AFSC 2E153, 2E173, or civilian equivalent.

Quota Control: 2 AF/DOP.

X3AZR2E153 063—CHAINWORK Maintenance Training—PDS Code 394—Goodfellow/1 wk 3 days—Jan 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel on the CHAINWORK System. Includes theory of analysis, system diagnostics, system operations, electrical/mechanical alignments and adjustments, and fault detection and isolation. Training will be to the line replaceable unit (LRU) level.

Prerequisites: Must have completed basic electronic maintenance training and have AFSC 2E153, 2E173, or DoD equivalent.

Quota Control: 2 AF/DOP.

X3AZR2E153 064—Local Area Networking (LAN) and Fiber Optic Concepts—PDS Code 5G5—Goodfellow/4 days—Jan 96

Provides training to Department of Defense (DoD) personnel in the knowledge and skills needed to perform maintenance on LANs and the fiber optic cables required to connect LANs together. Instruction includes LAN theory, fiber optic theory, preparation of and splicing fiber optic cables using both manual and fusion splices and installation of various connectors and terminators on fiber optic cables.

Quota Control: 2 AF/DOP.

E3AZR2E154 034—Consolidated BISS Maintenance—PDS Code WH2—Keesler/9 wk 3 days—Oct 95

Provides training for personnel in AFSCs 2E151, 2E171, 2E154, and 2E174, or equivalent in the knowledge and skills necessary to perform maintenance of BISS equipment. Includes, but is not limited to, systems overview of typical annunciators, interior sensors, exterior sensors, camera surveillance systems and BISS unique test equipment. Training will also consist of block diagram analysis, systems operation, maintenance fault detection, fault isolation and removal and replacement action to the lowest replaceable unit (LRU). Equipment includes AN/GSS-20, AN/GSS-29, AN/GSS-32, AN/GSS-34, AN/GSS-37, AN/GSS-39, AN/GSS-40, AN/GSS-41, AN/GSS-42, and AN/GXS-2.

Prerequisites: Completion of applicable career development course, AFSC 2E154, 2E174, or civilian equivalent with a working knowledge of digital and solid state techniques.

NOTE: This course is a major revision to course E3AZR30450 016, BISS Consolidated Maintenance, PDS Code 5N6. Students who previously attended this course should not be scheduled to attend course E3AZR2E151 034.

Quota Control: 2 AF/DOP.

E3AZR2E171 000—Advanced Digital Wideband Communications Systems—PDS Code XT6—Keesler/7 wk 4 days/MASL D132064—Oct 96

A comprehensive examination of digital wideband communications systems is presented. Designed for advanced students and presents course materials using applied science concepts. Students will spend approximately 3.5 weeks in a lecture/discussion environment exploring theoretical aspects of digital communications as it relates to both terrestrial and satellite systems. Students then spend approximately 4 weeks applying these concepts in an equipment laboratory using digital radio and multiplexer systems as the training model. Major educational areas are communications system concepts, digital source encoding, communications mathematics, noise types, analog source encoding, time division multiplexing, timing and synchronization, digital modulation methods, digital radio principles, transmission lines and antennas, radio path and propagation, diversity systems and combiner improvement, terrestrial system performance assessment, satellite systems, fiber optic systems, precision measurement techniques and hands-on radio, multiplex, and systems performance evaluation with interpretation and application of specifications.

Prerequisites: A basic understanding of algebra and logarithmic functions and must have a good working knowledge of electronic communications. ECL 80 SR.

Eligibility: Multiservice and multinational officers and NCOs in the grade of SSgt or above, must hold an AFSC in 2El7l, 3C271, 33SlA/B, or 33S3A/B, and DoD civilian employees in equivalent duties and grade. Others serving in related duties may be eligible to attend on a case-by-case basis with permission from the OPR.

Special Requirements: Scientific calculator.

Quota Control: 2 AF/DOP.

OPR: 338 TRS/TTKRR, Keesler AFB MS. DSN 597-5882/4375 or (601) 377-5882/4375, Fax DSN 597-1962 or (601) 377-1962. http://158.157.130.233/seshome.htm

E3AZR2E171 001—Advanced Narrowband Communications Systems—PDS Code XT5—Keesler/7 wk 4 days/MASL D132073—Oct 96

Provides a comprehensive examination of advanced narrowband radio communications training, both theoretical and practical. Designed for the advanced student and presents course materials using applied science concepts. Students will spend approximately 3.5 weeks exploring theoretical aspects of advanced narrowband communications in a lecture/discussion environment and then about 4 weeks applying those concepts in a laboratory analysis of radio communications, systems, subsystems, and ancillary equipment. The procedures used are applicable to high frequency (HF), very high frequency (VHF), and ultra high frequency (UHF) equipment. The system concept (versus black box) approach is emphasized. Major educational areas are systems concepts, communications mathematics, transmission lines and antennas, radio path and propagation, digital techniques (including ALE/adaptive HF and digital radio), diversity systems, modulation types, single sideband principles, radio components, noise types,

systems and subsystems evaluation, precision measurement techniques and hands-on transmitter, receiver, audio, and systems performance evaluation with interpretation and application of specifications.

Prerequisites: A basic understanding of algebra and logarithmic functions and a good working knowledge of electronic communications. ECL 80 SR.

Eligibility: Multiservice and multinational officers, NCOs in the grade of SSgt or above, must hold an AFSC in 2El7l, 2El73, 3C271, 33SlA/B, 33S3A/B**,** and DoD civilian employees in equivalent duties and grade. Mature A1Cs and SRA or others serving in related duties may be eligible to attend on a case-by-case basis with permission from the OPR.

Special Requirements: Scientific calculator.

Quota Control: 2 AF/DOP.

OPR: 338 TRS/TTKRR, Keesler AFB MS. DSN 597-1393/1390 or (601) 377-1393/1390, Fax DSN 597-1962 or (601) 377-1962. http://158.157.130.233/seshome.htm

E3AZR2E171 002—Information Networks Systems Evaluation—PDS Code XT4—Keesler/7 wk 4 days—Oct 96

Provides network managers, systems administrators, engineers, and technicians an indepth study of networking theories and concepts. Students spend approximately 4 weeks learning theoretical aspects of data and voice computer networks in a lecture/discussion environment. Approximately 3.5 weeks are spent applying these concepts in a laboratory setting. Throughout the course, instructors emphasize the systems approach toward testing and analysis. Major education areas are systems concepts, applied mathematics for data and voice computer networks, indepth study of OSI model, examination of the GOSIP architecture and protocols, information networks, LAN to WAN internetworking with TCP/IP, the Internet (Information Superhighway) including the world wide web, DDN, ISDN, packet radio, asynchronous transfer mode, network management, and transmission line theory including media types and impairments, modulation methods and fiber optic theory. The course also includes hands-on test and evaluation of transmission lines and local and wide area network protocol analysis of digital communications across the subnet, including analysis of packets (network layer), frames (data link layer), and bit- and character-oriented protocols (physical layer).

Prerequisites: A basic understanding of algebra and a good working knowledge of electronic communications.

Eligibility: Multiservice and multinational officers, NCOs in the grade of SSgt or above, must hold an AFSC in 2El7l, 2E371, 3C271, 3C071, 33SlA/B, or 33S3A/B, and DoD civilian employees in equivalent duties and grade. Others serving in related duties may be eligible to attend on a case-by-case basis with permission from the OPR.

Special Requirements: Scientific calculator.

Quota Control: 2 AF/DOP.

OPR: 338 TRS/TTKRR, Keesler AFB MS. DSN 597-1395/1396 or (601) 377-1395/1396, Fax DSN 597-1962 or (601) 377-1962. http://158.157.130.233/seshome.htm

E3AZR2E172 005—Meteorological Equipment Maintenance—PDS Code YWQ—DOD 198—Keesler/11 wk 2 days—Apr 95

Special training and technical knowledge required to operate and maintain meteorological equipment in use at a major unit ashore within the Naval and Marine Corps Weather Service.

Prerequisites: Navy: graduate of Electronics Technician Courses A-102-0225, A-102-0228, A-104-0171, and A-104-0174 (E-4 or above) having 18 months of fleet experience. Marine Corps: graduates of Electronic Technician Courses A-102-0225, A-102-0228, A-104-0171 and A-104-0174 (A1C or above).

Quota Control: 2 AF/DOP.

E3AQR2E231 001—Electronic Computer and Switching Systems Apprentice—PDS Code 313—Keesler/25 wk 1 day—Oct 96

A principles- and performance-oriented basic computer maintenance course. Teaches the initial skills in general computer maintenance and prepares airmen to perform on a broad inventory of computer equipment. Training includes electronic and computer principles, system orientation, maintenance concepts, test routines, troubleshooting techniques, malfunction analysis and use of test equipment. Covers application of system servicing, system alignment, calibration, troubleshooting and isolation to the lowest replaceable unit. Stresses technical orders, maintenance publications, schematic diagrams, security, safety, general shop practices, system logic and data flow throughout the course. Hands-on training is provided on processors, input/output, power supplies, disk systems, magnetic tape systems, displays and printers using a sophisticated computer system as a training vehicle, and tactical electronic telephone switching using the SB-3865 unit-level circuit switch.

Prerequisites: Completion of E3AQR2E020 101, Common Electronic Training Program, 11 weeks and 4 days. ECL 70.

Special Requirement: For AQR 001 (Slick): This is a qualification course for additional follow-on training. For additional special requirements, see course descriptions for E3AQR2E231M 000 (MCE), E3ABR2E231B 000 (AWACS), E3ABR2E231C 000 (SACCS/DTS), and E3ABP2E231A 000 (JSS) (old JSS course), Q-JSS-2E231 (new JSS course).

Quota Control: HQ 2AF/DOP.

E3AQR2E231A 001—Electronic Computer and Switching Systems (MCE) Apprentice—PDS Code 314—Keesler/31 wk 1 day—Oct 96

A performance-oriented basic computer maintenance course. Teaches the initial skills and prepares airmen to perform the duties of maintenance personnel on the modular control equipment. Training includes system orientation, maintenance concepts, test routines, troubleshooting techniques, malfunction analysis and use of test equipment. Covers application of system servicing, system alignment, calibration, troubleshooting and isolation to the lowest replaceable unit. Uses technical orders and maintenance publications schematic diagrams. Includes security, safety, general shop practices, system logic and data flow throughout the course. Hands-on training is provided on data processing equipment, radar interface equipment, operator interface equipment, voice communications equipment, digital communications equipment, and modular/control equipment system.

Prerequisites: Completion of E3AQR2E020 101, Common Electronic Training Program, 11 weeks and 4 days, and E3AQR2E231 001, Electronic Computer and Switching Systems Apprentice (General Computer Systems), 13 weeks and 2 days. ECL 70.

Special Requirement: This is a qualification course for additional follow-on training. For additional special requirements, see course descriptions for E3ABP2E231A 000 (JSS) (old JSS course) and Q-JSS-2E231 (new JSS course). Secret clearance eligibility is mandatory for award and retention in this specialty. Students must have a secret clearance before entry into the equipment portion of the course.

E3ABR2E231B 000—(Airborne Computer Maintenance) Electronic Computer and Switching Systems Apprentice—PDS Code Y8R—Keesler/30 wk 4 days/AFSC 2E231B—Oct 96

Airborne computer equipment-oriented basic course. Includes basic electronic and computer principles, basic computer maintenance concepts, and troubleshooting procedures. Also includes functional analysis of E-3 Airborne Warning and Control System (AWACS) computer system hardware and software components to the extent necessary to satisfy initial skills training requirements for performance of organizational and intermediate (O/I) maintenance. This course utilizes a computer-assisted maintenance simulator set for organizational maintenance training. Intermediate level maintenance training is provided on those airborne computer systems components and support equipment for which maintenance responsibility is assigned.

Prerequisites: Completion of courses E3AQR2E020 010, Common Electronic Principles, 66 days, and E3AQR2E231 000, Electronic Computer & Switching, 76 days. These courses are included in the total course duration. ECL 80 SR.

Quota Control: 2 AF/DOP.

E3ABR2E231C 000—Electronic Computer and Switching Systems (SAACS-DTS) Apprentice—PDS Code 312—Keesler/8 wk 4 days/AFSC 2E231C—Oct 96

Initial skills in general computer maintenance for strategic automated command and control system-data transmission subsystem and missile control communications. System orientation, maintenance concepts, test routines, and malfunction analysis. Perform system servicing and troubleshooting equipment to component level. Training in the use of technical orders, maintenance publications, security, missile safety, general shop practices, theory of operation of the WS-133A and WS-133B missile systems, system logic, data flow, schematics diagrams, calibration and checkout, and missile system alignment. Inspects and operates commercial standard test equipment used to generate and monitor operational ground equipment/maintenance ground equipment (OGE/MGE) electronic test signals. Provides training on hardened intersite cable system (HICS) computer loading and downloading and HICS equipment trouble isolation, including line printer, disk memory unit, and modems. Reflects merger of 2E231L and 2E732.

Prerequisites: Completion of courses E3AQR2E020 010, Common Electronic Principles, 11 weeks and 4 days, and E3AQR2E231 001, Electronic Computer & Switching System Apprentice, 13 weeks and 2 days. Eligibility for a Secret clearance is mandatory for award and retention of this speciality. ECL 70.

Quota Control: HQ 2 AF/DOP.

Q-JSS-2E231—Electronic Computer and Switching Systems Apprentice (JSS)—PDS Code 5KQ—DOD 150—Tyndall/13 wk/AFSC 2E231A—Oct 96

Equipment-oriented basic course. Operation, inspection and O/I maintenance of the Joint Surveillance System (JSS) data processor and display equipment. System orientation, electronic and computer principles, maintenance concepts, test routines, malfunction analysis, and use of pertinent aerospace ground equipment.

Special Requirements: Student must possess a Secret clearance for access to training area.

Quota Control: 325 OSS/OSTT.

E3AZP2E251 005—AN/TYC-39A O/I Maintenance (Army #150-F14)—PDS Code 9V8—Ft Gordon/6 wk 3 days—Apr 95

Provides training for Air Force personnel in the knowledge and skills needed to perform organizational and intermediate maintenance on automatic message switching central AN/TYC-39(A) equipment. Includes skills and knowledge to perform maintenance and repair of the time division interface group, modified communication interface group, communication equipment support group, central processing group, and peripheral equipment.

Prerequisites: AFSC 2E251/71 or equivalent.

Special Requirements: Confidential access.

Quota Control: 2 AF/DOP.

V3AZP2E251 007—Command Center Processing and Display System Replacement (CCPDS-R) and Common Sub-system Maintenance—PDS Code QOM—Falcon/7 wk 4 days—Oct 96

Provides training for Air Force personnel with AFSC 2E231/51/71 or civilian equivalent in the knowledge and skills needed to perform CCPDS-R and common sub-system maintenance. Scope of training includes theory of operation, diagnostic analysis, and troubleshooting CCPDS-R equipment.

Prerequisites: Completion of applicable CDCs, AFSC 2E251/71 or civilian equivalent.

Special Requirements: Secret clearance.

Quota Control: HQ 2 AF/DOP.

E3AZP2E251 009—AN/TTC-39A(V)4 O/I Maintenance (Army #150-F13)—PDS Code T32—Ft Gordon/9 wk—Apr 95

Theory of operation, alignment, maintenance procedures, and troubleshooting of the AN/TTC-39A circuit switch.

Prerequisites: AFSC 2E251/71 or equivalent.

Special Requirements: Confidential access.

Quota Control: 2 AF/DOP.

V3AZP2E251 012—Processing and Display System (PDS) Maintenance—PDS Code 263—Falcon/2 wk 4 days—Oct 96

Provides training for Air Force personnel with AFSC 2E251/71 or civilian equivalent in the knowledge and skills needed to perform PDS maintenance. Scope of training includes theory of operation, diagnostic analysis, and troubleshooting PDS equipment.

Prerequisites: Completion of applicable CDCs, AFSC 2E251/71 or civilian equivalent.

Special Requirements: Secret clearance.

Quota Control: HQ 2 AF/DOP.

E3AZR2E251 020—AN/TTC-42 Intermediate Maintenance (ULCS)—PDS Code EDG—Keesler/5 wk—Jan 96

Provides intermediate maintenance training for the AN/TTC-42

Electronic Switch. Includes the checkout, operation, fault recognition, repair, and adjustments beyond the capability at the organizational level.

Prerequisites: Completion of applicable 5-skill level career development courses, or equivalent.

Special Requirements: Confidential clearance or higher required by class start date.

Quota Control: 2 AF/DOP.

E3AZR2E251 038/E4AST2E251 070—Air Force Mission Support System (AFMSS) Organizational Maintenance—PDS Code TWT—Keesler/various locations/2 wk—Oct 95

Provides the skills and knowledge necessary to perform organizational level maintenance on the Air Force Mission Support System. Includes system description, preparation for use and installation, theory of operation, maintenance concept, and system troubleshooting.

Prerequisites: Completion of applicable career development course, AFSC 2E2XX, or 2E3XX.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

E3AZR2E251 039/E4AST2E251 071—Mission Support System (MSS) IIA Organizational Maintenance—PDS Code UC7—Keesler/various locations/2 wk—Oct 95

Provides the skills and knowledge necessary to perform organizational level maintenance on the MSS IIA. Includes system description, preparation for use and installation, theory of operation, maintenance concept and system troubleshooting.

Prerequisites: Completion of applicable career development course, AFSC 2E2XX or 2E3XX.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

E3AZR2E251 040—AN/TSQ-111, CNCE O/I Maintenance—PDS Code 8SS—Keesler/8 wk—Oct 95

Equipment-oriented to intermediate and organizational level maintenance of the CNCE, AN/TSQ-111. Instruction includes theory of operation, block diagiam analysis, characteristics and functions, communications systems interface requirements, and troubleshooting. An overview of how the AN/TSQ-111 fits into the TRI-TAC system is provided.

Prerequisites: Completion of applicable career development courses, AFSC 2E251, 2E271, or civilian equivalent. Students should have a working knowledge of analog and digital communication techniques to include modulation, multiplex, and circuit conditioning.

Quota Control: 2 AF/DOP.

E3AZR2E251 041—AN/TSC-110(V) Adaptable Surface Interface Terminal (ASIT) Maintenance—PDS Code 8SB—DOD 150—Keesler/7 wk—Oct 95

Includes system operation and maintenance, system description, functional configurations, block diagram analysis, maintenance tests, fault isolation software, fault detection, operational software and firmware, SRU removal and replacement, and use of support equipment.

Prerequisites: Completion of applicable career development course, AFSC 2E251, 2E271, or civilian equivalent.

Special Requirements: Secret clearance and US citizen.

Quota Control: 2 AF/DOP.

E3AZR2E251 042—Intelligent Hub—PDS Code 4KN—Keesler/2 wk—Jan 96

Provides training on network applications, UNIX and DOS operating systems, network software, configurations and concepts, system analysis with lowest replaceable unit (LRU) troubleshooting and extensive knowledge and hands-on training of local area network operation, network protocols, router operations and troubleshooting commands.

Special Requirements: Top Secret clearance/SCI indoctrinated prior to class start--this requirement cannot be waived.

Quota Control: 2 AF/DOP.

E3AZR2E251 048—SB-3865 Intermediate Maintenance (ULCS)—PDS Code EDK—Keesler/4 wk—Jan 96

Provides intermediate maintenance training for the SB-3865 Switchboard. Includes the checkout, operation, fault recognition, fault isolation, repair and adiustments beyond the capability at the organizational level.

Prerequisites: Completion of applicable 5-skill level career development courses or equivalent.

Special Requirements: Confidential clearance or higher required by class start date.

Quota Control: 2 AF/DOP.

E3AZR2E251 054—NEWSDEALER Maintenance—PDS Code 9UF—Keesler/3 wk—Oct 96

Provides training on the concepts, configuration, and maintenance of the NEWSDEALER system, subsystems, and network. Training includes the UNIX File System Structure and basic commands, maintenance uers functions, diagnostics, troubleshooting, and equipment and network repair to the lowest replaceable unit.

Prerequisites: Completion of applicable career development course, AFSC 2E251, 2E271, civilian equivalent, or other military equivalent.

Special Requirements: Top Secret clearance/SCI certification must be sent to SSO Keesler AFB at least 10 days before class start date. This requirement cannot be waived.

Quota Control: 2 AF/DOP.

E3AZR2E251 060—Modular Control Equipment (MCE) Computer Systems Specialist—PDS Code MJM—Keesler/9 wk 2 days—Jan 96

Provides training for personnel in AFSC 2E2X1 in the knowledge and skills required to perform the duties of maintenance personnel on the MCE system. Includes operation and maintenance theory, general maintenance, system maintenance, and troubleshooting and repair.

Prerequisites: Completion of applicable 5-skill level career development courses (CDC) or equivalent.

Special Requirements: Secret clearance prior to class start date.

Quota Control: 2 AF/DOP.

E3AZR2E251 061—SEAMARK Maintenance—PDS Code 80C—Keesler/5 wk 3 days—Oct 96

Provides training on the concepts, configuration, and maintenance of the SEAMARK system, subsystems, and network. Training includes the UNIX File System Structure and basic commands, maintenance user functions, diagnostics, troubleshooting, and equipment and network repair to the lowest replaceable unit.

Prerequisites: Completion of applicable career development course, AFSC 2E251, 2E271, civilian equivalent, or other military equivalent.

Special Requirements: Top Secret clearance/SCI certification must be sent to SSO Keesler AFB at least 10 days before class start date. This requirement cannot be waived.

Quota Control: 2 AF/DOPR.

X3AZR2E251 259—Conventional Signals Upgrade and PARSEC II Maintenance—PDS Code W3V—Goodfellow/7 wk 1 day—Oct 95

Trains Air Force personnel in the knowledge and skills needed to perform the duties of a conventional signals upgrade (CSU) and PARSEC II maintenance technician. Includes PARSEC II system; AT&T 3B15 system, console, and printer; cipher magnetic tape unit; Control Data Corp (CDC) 340 MegaByte disk drive, TB1000 line printer, and CSU system level components; CP-1609(V)6/GYQ interface processor unit and the NITPIC II system level equipment. Upon completion, the graduate may require on-the-job familiarization to become fully proficient.

Prerequisites: Must have completed basic electronics, be qualified in computer fundamentals, and have completed a field assignment. Completion of applicable career development course, AFSC 2E251, 2E271, or civilian equivalent.

Special Requirements: Top Secret clearance with SCI access prior to class start date. Student may not depart for training until approval of application by HQ USAF/INS.

Quota Control: 2 AF/DOP.

X3AZR2E251 260—Combined Conventional Signals Upgrade Maintenance—PDS Code XAQ—Goodfellow/6 wk—Oct 95

Provides academic and practical instruction to perform corrective maintenance on the conventional signals upgrade (CSU) system and the NITPIC II System. CSU system level training includes: AT&T 3B15 System, console and printer maintenance, CIPHER 920X magnetic tape unit, Control Data Corp 340 megabyte disk drive, TB1000 line printer, and CSU system level subassembly faulty detection and isolation. NITPIC II system training includes fault detection and isolation on the CP-1609(V)6 interface processor unit and the NITPIC II system level equipment. Upon course completion, the graduate requires on-the-job familiarization to become fully proficient as a C2SU system maintenance technician.

Prerequisites: Must have completed basic electronics, be qualified in digital computer fundamentals, and have completed a field assignment. Completion of applicable career development course, AFSC 2E251, 2E271, or civilian equivalent.

Special Requirements: Top Secret clearance with SCI access before class start date. Applicants may not depart for training until application is approved by HQ USAF/INS. This requirement may not be waived.

Quota Control: 2 AF/DOP.

R-JSS-2E251—JSS Data Processor and Display Maintenance—PDS Code 2GN—DOD 150—Tyndall/13 wk 1 day/MASL D137073—Oct 96

Course is equipment-oriented toward the JSS processor and display equipments. Instruction includes theory of operation, logic symbology, functional analysis, block diagram data flow, programming instructions, diagnostic programs, use of test equipment, and malfunction analysis.

Prerequisites: Completion of applicable 5-skill level career development courses or equivalent. ECL 70 SA.

Special Requirements: Secret clearance prior to class start date. Students possessing AF Form 1199 A/B/C/D (USAF Restricted area badge) should bring it with them.

Quota Control: 325 OSS/OSTT.

L3ABR2E331 001—Secure Communications Systems Maintenance Apprentice—PDS Code W1R—Lackland/9 wk 4 days/AFSC 2E331/MASL D137077—Oct 96

Provides training on OPSEC vulnerabilities, COMSEC principles, emission security (TEMPEST), use of technical orders and standard publications, safety precautions, C-E maintenance system inspecting, reporting and forms, use of Core Automated Maintenance Systems (CAMS) and corrosion control. Also provides basic communication theory including transmission systems, protocols, modulation techniques, multiplexing, interface standards, data terminal equipment/data communication equipment, transmission impairments and loopbacks. Theory of operation of the AN/UGC-141 and MS DOS based computer. Limited maintenance on the TSEC/KG-84/84A and TSEC/KG-57/58 and TSEC/KG-194 COMSEC devices and multi-channel crypto controller. Operation of common fill devices including AN/CYZ-10. Operational testing of and fault isolation within systems containing the TSEC/KG-84 and TSEC/KG-194, use of patch panels, and signal tracing.

Prerequisites: Must have completed L3AQR2E331 700, Electronic Principles.

Special Requirements: US citizen with Secret clearance by class start date. ECL 80.

Quota Control: 2 AF/DOP.

L3AQR2E331 700—Electronic Principles—PDS Code W4P—Lackland/10 wk 3 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2E3X1. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. A training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to L3ABR2E331 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions:

a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L5AZN2E351 002—Microminiature Electronics Repair Phase 2 (A-100-0073)—PDS Code 17F—DOD 160—Various Locations/2 wk—Oct 96

Provides qualified maintenance personnel with sufficient knowledge and skills to perform microminiature electronics repair to multilayer and flexible printed wiring boards, remove welded lead components, illuminated plastic panel repair, remove and install surface mounted components, and perform station maintenance, utilizing a microminiature repair station without supervision for certification as a microminiature technician in the 2M program. Includes 2M station familiarization; 2M micro station preventive maintenance, multilayer repair, flexible conductor repair, welded lead repair, plastic panel repair, soldering microminiature connections, and surface mounted technology.

Prerequisites: Successful completion of Miniature Electronics Repair, A-100-0072, and "E" level certification. No security clearance required. (Security clearance may vary by location based upon area/building in which taught. See annual schedule of courses for a particular location.) All students must be physically capable of performing very intricate and delicate manual repairs using miniature tools or medical equipment. Dexterity and mechanical ability required for microminiature repair is greater than that required for miniature repair and this factor is considered on the certification level assigned to each repair technician. All candidates must meet the following minimum visual requirements which may be met with corrected vision:

a. Far Vision: Snellen Chart 20/50

b. Near Vision: Jaeger 1 at 14 in., or reduced Snellen 20/20 equivalent

c. Color Vision: Ability to distinguish red, green, blue, and yellow colors as prescribed in Boorline Charts, Ishihara Plates, or ADD-HRR Test

d. Depth Perception: Titmus Stereo Circle Chart, or equivalent. NOTE: Contact lens wearers are recommended to bring glasses.

Quota Control: 2 AF/DOP.

L5AZN2E351 003—Miniature Electronics Repair Phase I (A-100-0072)—PDS Code 17G—DOD 160—Various Locations/4 wk—Oct 96

Provides qualified maintenance personnel with sufficient knowledge and skills to perform miniature electronics repair to single-sided and double-sided Printed Wiring Boards (PWB), up to and including the removal and replacement of multilead devices; repair PCB laminate damage; repair conductor damage including fabrication of replacement conductors; remove and apply conformal coating; install wires on common types of terminals and solderable connectors; perform station maintenance, utilizing a miniature repair station without supervision for initial certification in the 2M program. Includes 2M station familiarization; 2M micro station preventive maintenance; conformal coating identification and removal; component installation; printed wiring board laminate repair; printed wiring board conductor repair; wire preparation; turret terminals; hook terminals; connector pins; task identification and procedural analysis; multilead desoldering and multilead installation.

Prerequisites: All E-4 and above personnel in technical electronic/electrical ratings completing (A) School and all civilian with equivalent training. No security clearance required. (Security clearance may vary by location based upon area/building in which taught. See annual schedule of courses for a particular location.) All students must be physically capable of performing very intricate and delicate manual repairs using miniature tools or medical equipment. All candidates must meet the following minimum visual requirements which may be met with corrected vision:

a. Far Vision: Snellen Chart 20/50

b. Near Vision: Jaeger 1 at 14 in., or reduced Snellen 20/20 equivalent

c. Color Vision: Ability to distinguish red , green, blue, and yellow colors as prescribed in Boorline Charts, Ishihara Plates, or ADD-HRR Test

d. Depth Perception: Titmus Stereo Circle Chart, or equivalent. NOTE: Contact lens wearers are recommended to bring glasses

Quota Control: 2 AF/DOP.

L3AZR2E351 005—Depot Maintenance TSEC/KG-30/31/33/34/35/36/37/38—PDS Code LGK—DOD 160—Lackland/7 wk 2 days—Dec 93

Depot maintenance of TSEC/KG-30( ), TSEC/KG-31( ), TSEC/KG-33( ), TSEC/KG-34( ), TSEC/KG-36( ), TSEC/KG-37( ), and TSEC/KG-38( ). Training includes COMSEC, TEMPEST, safety and use of test equipment.

Prerequisites: Completion of applicable career development course, AFSC 2E351, 2E371, Army MOS 32F, 32G, or civilian equivalent. Detailed knowledge of electronic fundamentals, solid-state devices and digital techniques. Experience in use of oscilloscope and multimeter.

Special Requirements: Must be a US citizen with Secret clearance by class start date or have specific release authority from HQ USAF/CVAII to attend this course of instruction. Clearance or release authority must arrive 10 working days prior to class start date. Certification of US citizenship or release authority is required on all orders. Personnel with formal training or maintenance experience on this equipment within the preceding 3 years are ineligible to attend. (See AFI 21-109, *Communications Security (COMSEC) Equipment Maintenance, Modification and Training* [formerly AFR 66-5]/DOD Instruction 3135.1 regarding recertification.)

Quota Control: 2 AF/DOP.

L3AZR2E351 010—O/I Maintenance, AN/UGC-141(V)5—PDS Code 7UN—DOD 160—Lackland/2 wk—Oct 95

Provides training to Air Force personnel and selected government personnel on modes of operation, fault isolation, corrective maintenance, and removal or replacement of major components. Personnel who have graduated from courses J3ABR30633 000, PDS Code 7PP; J3AZR30653 000, PDS Code 7UN; or L3ABR2E331 000, PDS Code K14; are ineligible to attend this course.

Prerequisites: Completion of applicable career development course, AFSC 2E351, 2E371, or civilian equivalent. Civilian must have a minimum of 3 years of experience as a teletypewriter equipment repairman. All DOD military and civilians must have a knowledge of

electronic fundamentals and the ability to analyze circuit operations.

Special Requirements: TDY orders must show US citizenship and have at least a Secret clearance by class start date. Forward security clearance information to 342 TCHTS/Security Section at least 10 days before class start date. Clearance information must include name, grade, SSN, date of birth, clearance, and U.S. citizen.

Quota Control: 2 AF/DOP.

L3AZR2E351 012—Organizational Maintenance Model 40 Data Terminal—PDS Code 1BX—DOD 160—Lackland/4 wk—Oct 95

Model 40 data terminal organizational maintenance. Application of teletypewriter transmission principles and signaling techniques, circuit and machine function characteristics, use of technical publications, equipment testing, troubleshooting, and maintenance procedures. Use of maintenance tools and test equipment. Operation of central processing unit, maintenance of CRT/display monitor, printers, cassette drive storage units and external interfacing.

Prerequisites: Completion of applicable career development course, AFSC 2E351, 2E371, or civilian equivalent. Civilian must have a minimum of 3 years of experience as a teletypewriter equipment repairman. All DOD military and civilians must have a knowledge of electronic fundamentals and solid-state and logic circuit operations. PREFERRED: Personnel with knowledge of microprocessor/computers and advanced soldering techniques.

Special Requirements: TDY orders must show US citizenship and have at least a Secret clearance by class start date. Forward security clearance information to 342 TCHTS/Security Section at least 10 days before class start date. Clearance information must include name, grade, SSN, date of birth, clearance, and U.S. citizen.

Quota Control: 2 AF/DOP.

L3AZR2E351 013—AN/UGC-129(V)1 Teletypewriter O/I Maintenance—PDS Code YYW—DOD 160—Lackland/2 wk—Oct 95

Installation and maintenance of teletypewriter equipment. Application of teletypewriter transmission principles, circuit and machine function analysis, use of technical publications, maintenance management and equipment testing and maintenance procedures. Use and care of maintenance tools and test equipment, safeguarding of classified information and installation criteria.

Prerequisites: Completion of applicable career development course, AFSC 2E153, 2E173, 2E251, 2E271, or 2E351, 2E371, or civilian equivalent.

Special Requirements: TDY orders must show US citizenship and have at least a Secret clearance by class start date. Forward security clearance information to 342 TCHTS/Security Section at least 10 days before class start date. Clearance information must include name, grade, SSN, date of birth, clearance, and U.S. citizen.

Quota Control: 2 AF/DOP.

L3AZR2E351 016—O/I Maintenance (Limited) KL-51—PDS Code 5VB—Lackland/1 wk 3 days—Oct 95

O/I maintenance of TSEC/KL-51 equipment. Course provides training to Air Force personnel and selected government personnel on modes of operation, fault isolation, corrective maintenance, and removal or replacement of major components.

Prerequisites: Completion of applicable career development course, AFSC 2E351, 2E371, or civilian equivalent. Civilians must have a minimum of 3 years of experience as teletypewriter equipment repairman, have a knowledge of electronic fundamentals, and have the ability to analyze circuit operations.

Special Requirements: TDY orders must show US citizenship and have at least a Secret clearance by class start date. Forward security clearance information to 342 TCHTS/Security Section at least 10 days before class start date. Clearance information must include name, grade, SSN, date of birth, clearance, and U.S. citizen.

Quota Control: 2 AF/DOP.

L3AZR2E351 022—TSEC/KG-28/29(A) Depot Maintenance—PDS Code XAX—DOD 160—Lackland/5 wk 3 days—Oct 96

Trains DoD personnel who possess AFSC 2E3X1 or other DoD equivalent in the knowledge and skills needed to perform depot maintenance on the TSEC/KG-28/29(A). Training includes safety, security precautions, TEMPEST, operational analysis, identification of malfunctioning circuit cards in reference units, and of faulty modules and replaceable detail parts in the CYT-8 system. Covers OPSEC vulnerabilities, COMSEC principles, emission security (TEMPEST), use of technical orders.

Prerequisites: Completion of applicable career development course, AFSC 2E351 or civilian equivalent. Detailed knowledge of electronic fundamentals, solid-state devices, digital techniques, and experience in the use of oscilloscopes and multimeters for detecting equipment malfunctions.

Special Requirements: Students must be US citizens with a Secret clearance by class start date. “US Citizen” is required on student orders. Personnel certified to perform maintenance on this equipment within preceding 5 years (AFI 21-109) are not eligible to attend.

Quota Control: 2 AF/DOP.

L3AZR2E351 024—TSEC/KI-25 Limited Maintenance—PDS Code 2E5—DOD 160—Lackland/1 wk 1 day—Oct 95

Provides training in the knowledge and skills needed to perform limited maintenance on the TSEC/KI-25, data encryption equipment. Training includes operation, adjustment, and maintenance of the TSEC/KI-25. Also included is training on security, TEMPEST, and safety related to the TSEC/KI-25.

Prerequisites: Completion of applicable career development course, AFSC 2E351, 2E371, other military equivalent, or civilian equivalent. Detailed knowledge of electronic fundamentals, solid-state devices, digital techniques, and experience in the use of oscilloscopes and multimeters for troubleshooting.

Special Requirements: Course content is Secret NOFORN. Students must be US citizens with a Secret clearance by class start date or have specific release authority from HQ USAF/CVAII to attend this course. Clearance and release authority must arrive 10 workdays prior to class start date. Certification of US citizenship or release authority is required on all orders. Personnel previously certified (according to AFI 21-109 [formerly AFR 66-5/]DODI 3135.1) to perform maintenance on the equipment are ineligible to attend.

Quota Control: 2 AF/DOP.

L3AZR2E351 026—Depot Overhaul, TSEC/KI-23—PDS Code PBX—DOD 160—Lackland/7 wk 3 days—Oct 95

Training includes operation, locating malfunctioning components, security, safety, and use of test equipment as applied to the TSEC/KI-23.

Prerequisites: Completion of applicable career development course, AFSC 2E351, 2E371, or civilian equivalent. Working knowledge of electronic fundamentals to include solid-state devices. Experience in use of oscilloscope and multimeter for detecting equipment malfunctions and making adjustments on equipment.

Special Requirements: Must be US citizen with Secret clearance by class start date. "US Citizen" is required on student orders. Personnel certified to perform maintenance on this equipment within preceding 5 years (AFI 21-109 [formerly AFR 66-5]/DODI 3135.1) are ineligible to attend.

Quota Control: 2 AF/DOP.

E3AZR2E351 041—Integrated Digital Network Exchange (IDNX) Maintenance—PDS Code W62—Keesler/2 wk 2 days—Oct 96

Provides training for personnel in AFSCs 2E251, 2E271, 2E351, 2E371, or DoD equivalent in the knowledge and skills needed to perform the duties of maintenance personnel on the IDNX equipment. Includes two blocks of instruction which are IDNX Operations and IDNX Maintenance. The operations block includes training in network theory and transmission medium familiarization, operational characteristics of the IDNX 20/90, SPX-50, DCB-24 Channel Bank, Tellabs 2531 Echo Canceller, as well as system operation, management, and troubleshooting. The maintenance block includes training in characteristics of IDNX cabinet layouts, card modules, busses and timing, characteristics of the SPX-50 statistical multiplexer, Telco systems channel banks, and Tellabs 2531 echo canceller, configuration, strapping options, switches, control and indicators of IDNX, SPX-50, Channel Banks and Echo Canceller, installation of IDNX modules and cabling harnesses, SPX-50, Channel Banks and Echo Cancellers, and troubleshoot IDNX, SPX-50, Telco systems channel banks, and Tellabs echo cancellers.

Prerequisites: Completion of applicable career development course, AFSC 2E251, 2E271, 2E351, or 2E371, DoD civilian equivalent, or other military service equivalent. Top Secret/SCI certification must be sent to SSO Keesler AFB at least 10 days before class start date. This requirement cannot be waived.

Quota Control: 2 AF/DOP.

E3AZR2E351 043—SIGINT Information Systems—PDS Code 1QD—Keesler/4 wk 2 days—Jan 96

Provides training on IDNX equipment which encompasses network theory, transmission medium familiarization, and the operational characteristics of the IDNX 20/90, SPX-50 statistical multiplexer, DCB-24 channel banks, TELLABS 2531 echo canceller as well as IDNX system operation, management test procedures, and troubleshooting. Training also includes the installation of IDNX modules, cabling harnesses, SPX-50, channel banks, and echo cancellers. Training for the Wagonload equipment covers equipment characteristics, and operating and test procedures which includes troubleshooting the CODEX 2600 series modem, DP CAU-4200 crypto ancillary unit, DAC-24 data converter, and the DPMUX-2048AT-16 multiplexer.

Prerequisites: Completion of applicable CDCs AFSC 2E2XX, 2E3XX, or the civilian or military equivalent.

Quota Control: 2 AF/DOP.

L3AZR2E391 001/L4AST2E391 001—TEMPEST Criteria for System/Facility Installation—PDS Code 7SD—Lackland/1 wk—Dec 93

Designed to train personnel who have a need to know the TEMPEST criteria applicable to national security information processing system/facility installation. Includes TEMPEST criteria applicable to: physical security and equipment selection guidelines; separation, utility system, and power distribution requirements; hardware specifications; grounding philosophy; shielded enclosures; tactical equipment guidelines; and system facility inspection and countermeasure assessment. Developed for installation personnel although the knowledges are applicable to installation, engineers, supervisors, and managers.

Prerequisites: TEMPEST Fundamental Course (L3OZR33S3A 000) or equivalent knowledge or experience.

Special Requirements: Must be US citizen and possess a Secret clearance. The entry "US Citizen" is required on the student's orders.

Admin Instructions: The entry "US Citizen" is required on student orders. Forward clearance information to 342 TTS/TTOTS, 1220 Truemper St, Suite 1, Lackland AFB TX 78236-5546.

Quota Control: 2 AF/DOP.

E3ABR2E431 003—Space Systems Equipment Maintenance Apprentice—PDS Code NQJ—DOD 104—Keesler/24 wk 1 day/AFSC 2E431—Apr 95

Trains students in the skills and knowledges necessary to operate and maintain satellite command and control systems, data acquisition systems, and satellite imagery processing equipment.

Prerequisites: Completion of high school with courses in geometry, trigonometry, algebra, and physics is desirable. Possession of mandatory knowledge will be determined according to AFI 36-2101 (formerly AFR 35-1). Normal color vision as defined in AFI 48-123 (formerly AFR 160-43) is mandatory.

Special Requirements: Minimum ENTNAC investigation opened by the Defense Investigative Service by class start date is mandatory. Student must be US citizen and so stated on assignment orders.

Quota Control: 2 AF/DOP.

E3AZR2E451 000—MARK IV TACTERM System—PDS Code HG2—DOD 104—Keesler/14 wk 4 days—Oct 95

Operate, adjust, and perform organizational and intermediate level maintenance on the Mark IV Tacterm System. Requires a working knowledge of electronic fundamentals, solid-state devices, and digital techniques. Experience in the use of oscilloscopes and multimeters for detecting equipment malfunctions and equipment adjustment is required.

Prerequisites: Completion of applicable career development course, AFSC 2E451, 2E471, USMC MOS 5938, or civilian equivalent.

Special Requirements: Must hold a Secret security clearance and proof of US citizenship. Trainee orders must state special requirements above to include date clearance granted and agency which conducted investigation. Eye examination as prescribed according to AFOSH Standard 161-10, *Health Hazards Control for Laser Radiation*.

Quota Control: 2 AF/DOP.

E3AZR2E451 001—MARK IVB TACTERM System—PDS Code NQK—Keesler/16 wk 1 day—Oct 95

Trains students in the skills and knowledge necessary to operate, adjust, and perform organizational and intermediate level maintenance on the MARK IVB Defense Meteorological Satellite

Program (DMSP) system. Requires a working knowledge of electronic fundamentals, solid-state devices, digital techniques, and computer processing equipment. Experience in equipment adjustment and detection of equipment malfunctions is required.

Prerequisites: Completion of applicable career development course, AFSC 2E451, 2E471, or civilian equivalent.

Special Requirements: Secret clearance. Proof of US citizenship. Trainee orders must state special requirements listed above to include the date clearance was granted and the agency which conducted the investigation. Eye examination as prescribed according to AFOSH standard 161-10.

Quota Control: 2 AF/DOP.

L3AQR2E531 100—Electronic Principles—PDS Code W4J—Lackland/14 wk 4 days/MASL D131135—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel in AFSC 2E5X1. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, computer principles, microprocessors, and soldering. The training day constitutes a 6-hour day plus 2 hours of supervised study. This is a prerequisite to E5ABD2E531 004, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force, see AFMAN 36-2108.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3ABR2E631 001—Communication Antenna Systems Apprentice—PDS Code W8M—DOD 621—Sheppard/6 wk 2 days/AFSC 2E631/MASL D132014—Oct 96

Provides training in outside plant construction fundamentals and antenna principles, installation and maintenance of antenna systems, pole climbing with gaffs, pole line construction, construction hand signals, support construction fundamentals, antenna supports, antenna fundamentals, and operation and maintenance on rotable log periodic antenna, testing antenna systems, and installation and pressurization of transmission lines.

Prerequisites: Must successfully complete L3AQR2E631 950, Electronic Principles, at Lackland AFB TX, before entering J3ABR2E631 001. ECL 70.

Special Requirements: All prospective students must be pretested before arrival at Sheppard to determine physical capability to climb and work on poles. Physical and psychological limitations that impede ability to climb and work on poles at considerable height disqualify. Recent graduates of BMT will be issued boots, pole climbing. All others must bring this item upon reporting to Sheppard.

Quota Control: 2 AF/DOP.

L3AQR2E631 950—Electronic Principles—PDS Code W4U—Lackland/2 wk 4 days/MASL D131130—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2E631. Includes safety and first aid, DC principles, and AC principles. A training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This is a prerequisite to J3ABR2E631 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1). ECL 70.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3ABR2E632 005—Communications Cable Systems Apprentice—PDS Code XR5—DOD 621—Sheppard/12 wk/AFSC 2E632/MASL D132045—Oct 96

Training in the knowledge and skills required of a communication/missile cable splicer. Includes pole climbing with gaffs, splicing, and sealing of hardened missile and communication cables; aerial, underground, and buried cable splicing techniques; conductor identification and detection and location of cable faults; theory, installation, operation and maintenance of pressurized cable systems; cable plant performance testing using various test equipment; fiber optic splicing procedures; pole line construction; installation and maintenance of aerial, buried and underground cable systems; and hardened intersite cable systems (HICS) pressure monitoring system.

Prerequisites: Must successfully complete course L3AQR2E632 950, Electronic Principles, at Lackland AFB TX before entering course J3ABR2E632 005. ECL 70.

Special Requirements: All prospective students must be pretested before arrival at Sheppard to determine physical capability to climb and work on poles. Physical and psychological limitations that impede ability to climb and work on poles at considerable height disqualify. Recent graduates of BMT will be issued boots, pole climbing. All others must bring this item upon reporting to Sheppard.

Quota Control: 2 AF/DOP.

L3AQR2E632 950—Electronic Principles—PDS Code W4U—Lackland/2 wk 4 days/MASL D131132—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2E632. Includes safety, first aid, DC principles, and AC principles. A training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2E632 004, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1). ECL 70.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3ABR2E633 000—Telephone Systems—PDS Code XPV—Sheppard/14 wk/AFSC 2E6X3/MASL D132003—Oct 96

Fundamentals of AC and DC circuits and solid-state amplifiers and digital techniques; basic telephony, telephone substation installation and maintenance, cabling and terminations; capabilities, circuit description, installation, and maintenance of the 1A2 (includes key service units, service panels, and intercom panels) independent solid-state intercom systems, electronic key systems, circuit analysis, installation and maintenance of key telephones, modular key telephones, call directors; electronic and digital switching principles; application of switching principles to telephone systems; fundamental knowledge of associated peripheral devices (that is, printer and visual display units); testing and maintenance through the use of the maintenance administration functions (MAP); testing and measuring of trunks and circuits through the use of applicable test equipment; principles of wire transmissions; monitoring and analysis of performance of base wire systems; and use of technical and commercial publications and AFOSH procedures.

Prerequisites: Successfully complete course L3AQR2E633 900, Electronic Principles, at Lackland AFB TX. ECL 70.

Quota Control: 2 AF/DOP.

L3AQR2E633 900—Electronic Principles—PDS Code W4T—Lackland/5 wk 1 day/MASL D131129—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2E633. Training includes safety, first aid, DC principles, AC principles, semiconductors, power supplies, and soldering. A training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to J3ABR2E633 000, and electronics training is tailored to meet AFSC requirements.

Prerequisites: See AFI 36-2108. ECL 70 EL.

Admin Instructions: Students who demonstrate proficiency by passing all measurement may be advanced. Retrainees who provide the required documentation on previous training will be advanced without measurement. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

J3AZR2E652 007—Fiber Optic Cable Installation, Splicing, and Maintenance—PDS Code YTS—Sheppard/1 wk 3 days/MASL D132072—Oct 95

Training in the knowledge and skills required of a fiber optic cable splicer. Includes a fiber optic overview in the theory and principles of light wave communication; fiber optic cable installation practices; FO cable end preparation; connectorization; fusion splicing; fiber termination; closure installation; use of the time domain reflectometer and the optic multimeter; and the application of FO modem and optic T-carriers.

Prerequisites: Completion of applicable career development course, AFSC 2EX5X, 2EX7X, or civilian equivalent.

NOTE: Students who have graduated from J3ABR2E632 003, Apprentice Communications Cable Systems Installation/ Maintenance Specialist, after 15 Jul 89 are not authorized to attend. Fiber optic maintenance and installation is taught in J3ABR2E632 003.

Quota Control: 2 AF/DOP.

J3AZR2E653 003—Telephone Installer—PDS Code 684—DOD 623—Sheppard/6 wk/MASL D132068—Oct 96

Telephony, telephone substation installation and maintenance, cabling, and cable terminations; capabilities, circuit description, installation, and maintenance of 1A2 key systems TIE Business Comm Plus, and ITT 3100 (includes key service units, service panels, and intercom panels). Independent solid-state intercom systems and electronic key systems. Circuit analysis, installation and maintenance of key telephones, modular key telephones, and call directors. Use of technical and commercial publications and AFOSH standards.

Prerequisites: Completion of applicable career development course, AFSC 2E653, or other DoD equivalents who maintain telephone substation/key system. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AZR2E653 004—Digital Switching (NORTEL)—PDS Code 685—Sheppard/7 wk/MASL D132070—Oct 96

Fundamental of Digital Switching System (DSS), analog to digital or digital to analog conversion and transmission. Operation and maintenance of the DSS Management of the DSS through operational and measurements and LOGUTIL reports. Troubleshooting techniques through the use of the Maintenance Administration Function (MAF). Fundamental knowledge of associated peripheral devices, i.e., printer, visual display units (VDU), dial service attendant (DSA) consoles, to include peripheral modules incorporated in the main frame. Use of commercial publications and safety procedures.

Prerequisites: Completion of applicable career development course, AFSC 2E653, 2E673, or DoD civilian equivalent.ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AZR2E653 005—Digital Switching (KNS 4100)—PDS Code 686—Sheppard/4 wk—Oct 96

Provides DoD personnel with training in digital switch operation; management of system using system programs; operation of switch access terminals (attendant console and system console) and test sets; system troubleshooting/correcting system faults using safeguarding and operating programs; and use of technical publications and safety procedures.

Prerequisites: Completion of applicable career development course, AFSC 2E653, 2E673, DoD or civilian equivalent.

Quota Control: 2 AF/DOP.

E3ABR2E831 004—Instrumentation and Telemetry Systems Apprentice—PDS Code 2UP—Keesler/24 wk/AFSC 2E831/

MASL D131107—Oct 95

Assemble, install, adjust, and maintain mechanical, electrical, and electronic equipment used to monitor and collect flight test range data and to measure the performance of test and research projects. Strong emphasis on the practical application of electronic principles and use of electronic schematics; adjustment, calibration, and malfunction analysis of instrumentation and telemetry components; and familiarization with Air Force technical orders, manuals, directives, and other maintenance publications. Uses electronic fundamental trainers, transmitters, receivers, recorders, ground and airborne digital/analog telemetry equipment, closed circuit TV systems, microprocessors, and computers.

Prerequisites: ECL 70 SR.

Quota Control: 2 AF/DOP.

E/J/L 3ACR2EX7X 000—Communications-Electronics Career Advancement Course—PDS Code X2H—Keesler, Sheppard, and Lackland/4 wk—Oct 96

Mandatory course for all personnel in the 2EXXX career field who are in upgrade training to the 7-skill level. Content is designed to provide future communications-electronics (C-E) managers and supervisors with the insight and training in how to manage C-E workcenters and to be effective members of the unit staff. Mixing the 2EXXX AFSCs in one course will provide these future managers with an indepth understanding of the varied and diverse nature of the C-E maintenance mission. Students will receive an overview of all C-E functions on a typical base including air traffic services and base operations support. In addition, provides an introduction to deployable communications, long haul communication, missile communication, range functions, command and control functions, and special function organizations and missions. Additionally, students will receive training subjects similar to those covered in AFQTP 2EXXX-201L, CE Workcenter Manager’s Handbook.

Prerequisites: All AFSC specific upgrade training requirements and completion of AFQTP 2EXXX-201L, formerly AFQTP 300X0-201L, C-E Workcenter Manager's Handbook. Students are required to bring handbook to the course.

Quota Control: HQ AFPC/DPPAPEO.

E6AZS2EX7X 000—Communications-Electronics Career Advancement Course—PDS Code X2J—on-site/self-paced—Oct 96

Successful completion of this course is a prerequisite to attendance of E3ACR2EX7X 001, Communications-Electronics Career Advancement Course in residence. Students must bring their certificate of course completion to the in-residence training. Without proof of course completion, students will not be allowed to attend training. Mandatory course for all Air Force National Guard (ANG) and Air Force Reserve (AFRES) personnel in the 2EXXX career field who are in upgrade training to the 7-skill level. Content is designed to provide future communications-electronics (C-E) managers and supervisors with the insight and training in how to manage C-E workcenters and to be effective members of the unit staff. Additionally, students will receive an overview of all C-E functions on a typical air base, including air traffic services and base operational support. Provides an introduction to deployable communications, long-haul communications, command and control functions, and special organizations and missions.

Prerequisites: All AFSC specific upgrade training requirements.

Quota Control: HQ 2AF/DOP.

E3ACR2EX7X 001—Communications-Electronics Career Advancement Course—PDS Code X2J—Keesler/2 wk—Oct 96

Mandatory course for all Air Force National Guard (ANG) and Air Force Reserve (AFRES) personnel in the 2EXXX career field who are in upgrade training to the 7-skill level. Content is designed to provide future communications-electronics (C-E) managers and supervisors with the insight and training in how to manage C-E workcenters and to be effective members of the unit staff. Mixing the 2EXXX AFSCs in one course will provide these future managers with an indepth understanding of the varied and diverse nature of the C-E maintenance mission. Students will receive training in subjects similar to those covered in AFQTP 2EXXX-201L, C-E Workcenter Manager’s Handbook.

Prerequisites: All AFSC specific upgrade training requirements and completion of AFQTP 2EXXX-201L, formerly AFQTP 300X0-201L, C-E Workcenter Manager's Handbook. Students are required to bring handbook to the course. Additionally, successful completion of E6AZX2EX7X 000, Communications-Electronics Career Advancement course, is required to attend the E3ACR2EX7X 001 course in residence. Students must bring their certificate of completion of course to class. Without proof of course completion, students will not be allowed to attend training.

Quota Control: HQ AFPC/DPPAPEO.

J3ABR2F031 000—Fuels Apprentice—PDS Code AK0—DOD 821—Sheppard/6 wk 2 days/AFSC 2F031/MASL D152013—Jun 94

Provides training in the skills and knowledge necessary to perform tasks related to the receipt, storage, issue, and quality control of petroleum and cryogenic products. Training is also included on Air Force publications, initiating base fuels management office accounting forms; automated data processing familiarization, and the inspection, operation, and operational maintenance of storage and dispensing equipment to include fuel servicing vehicles.

Prerequisites: Personnel who have graduated from C3ABR63130 000 or J3ABR63130 000, Apprentice Fuels Specialist Course, PDS Code AK0, need not attend. ECL 70.

Special Requirements: A valid, privately owned vehicle (POV) driver’s license, normal color vision, and H-1 hearing level.

Quota Control: 2 AF/DOP.

J3AZR2F051 001—Fuels Quality Control—PDS Code BYP—DOD 821—Sheppard/3 wk/MASL D152025—Apr 96

Trains Air Force personnel with AFSC 2F0X1 or civilian equivalent in the knowledge and skills necessary for fuels quality control specialist duties. Includes methods and procedures used to maintain quality control while receiving, storing, and issuing aviation petroleum products. Detailed training is provided on sampling and analyzing aviation fuels to determine solids, free water, fuel systems icing inhibitor content, API gravity, flashpoint, conductivity and fiber content; care and maintenance of fuels sampling and laboratory equipment; metric system as applied to analysis; recording, reporting, and interpreting results of analysis; quality control of aviator’s liquid breathing oxygen and cloud point analysis of diesel fuels; using computer systems to record and review test results. This course provides one of the prerequisites for awarding special experience identifier (SEI) 039.

Prerequisites: AFSC 2F031 and satisfactory completion of the 5-level CDC, 2F051 or higher. Thirty days laboratory experience is desirable. Civilians must have equivalent specialty qualifications.

Personnel who have graduated from C3AZR63150 001, Aviation Fuel Monitoring Specialist Course, C3AZP63150 005, or C4AST63150 005, Fuels Quality Control Specialist Course, PDS Code BYP, or C3AZR63150 001, Fuels Quality Control Specialist Course, PDS Code BYP, and J3AZR63150 001, Fuels Quality Control Specialist Course, PDS Code BYP, need not attend. ECL 70.

Special Requirements: Authorized clothing issue - BDUs, cold or foul weather gear, normal color vision, and a copy of AF Form 55 verifying hazardous material training.

Quota Control: 2 AF/DOP.

J3AZR2F051 002—Fuels Accounting—PDS Code T3N—DOD 821—Sheppard/2 wk 4 days/MASL D152043—Jun 94

Trains Air Force personnel with AFSC 2F0X1 or civilian equivalent in the knowledge and skills necessary for fuels accounting duties. Includes a functional overview of the petroleum, oil and lubricant (POL) requirements, requisition, and status of a fuels accounting operation; the details of computer processing fuel receipts, issues, change documents, and inventory management products. Training is also included on fuel accounting documents and reports and interpretation of fuels accounting management products. This course provides one of the prerequisites for awarding Special Experience Identifier (SEI) 040.

Prerequisites: AFSC 2F031 and satisfactory completion of the 5-level CDC, 2F051 or higher, and a minimum of 3 months of experience in the fuels accounting office. Personnel who have graduated from C3AZP63150 004, C4AST63150 004, or C3AZR63150 002 or J3AZR63150 002, Fuels Accounting Course, PDS Code T3N, need not attend. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR2F051 005—Cryotainer Maintenance and Support Equipment—PDS Code DDG—DOD 821—Sheppard/2 wk/MASL D148181 —Apr 96

Trains Air Force personnel with AFSC 2F0X1 or civilian equivalent in the knowledge and skills necessary to maintain cryogenic storage vessels of 400 gallons or larger capacity. Includes the application of safety practices, completion of forms and records, use of technical orders, and the properties of cryogenic products. Training is also included on components and functions of cryogenics and support equipment, and the hands-on troubleshooting and maintenance of cryotainers and support equipment. This course provides one of the prerequisites for awarding special experience identifier (SEI) 036. This course is a prerequisite for the J3AZR2F051 006, Cryogenic Production course.

Prerequisites: AFSC 2F031 and satisfactory completion of the 5-level CDC, 2F051 or higher. Personnel who graduated from C4AST63150 006 or C3AZR63150 005 or J3AZR63150 005, Cryotainer Maintenance and Support Equipment Course, PDS Code DDG, need not attend. ECL 70.

Special Requirements: Physical profile of H-1 and normal color vision; protective footwear (safety-toed shoes), and a copy of AF Form 55 verifying hazardous material training.

Quota Control: 2 AF/DOP.

J3AZR2F051 006—Cryogenic Production—PDS Code WCW—DOD 821—Sheppard/8 wk 3 days/MASL D148117—Apr 96

Course is conducted on one shift for 23 academic days, 8 hours per day, and three shifts for 20 academic days, 24 hours per day. Provides training for DoD personnel with AFSC 2F0X1 or equivalent, in the knowledge and skills necessary for operation, inspection, troubleshooting, and maintenance of the 1.0 and 1.5 T/D low pressure cryogenic plants; and familiarization of 5 T/D low pressure cryogenic plant components and sequence of operation, prior to being assigned to an operational cryogenic production facility. Training is provided on the principles of air separation and distillation that are unique to the 1.0, 1.5, and 5 T/D cryogenic plants: operating principles of the diesel engine, electric motors, rotary screw air compressors, air purification systems, air separation systems, air separation systems, vapor compression refrigeration, turboexpanders, pneumatic components, gas storage cylinders, and cryogenic pumps. Training is also included on product quality control equipment, safety, forms, technical orders, and environmental concerns unique to cryogenic production. Provides one of the prerequisites for awarding special experience identifier (SEI) 037.

Prerequisites: Students must have successfully completed course C3AZR63150 005, J3AZR63150 005, or J3AZR2F051 005 before attending this course. ECL 70.

Special Requirements: Physical profile of H-1, normal color vision, protective footwear (safety-toed shoes), and a copy of AF Form 55 verifying hazardous material training.

Quota Control: 2 AF/DOP.

J3ACR2F071 000—Fuels Craftsman—PDS Code X3C—Sheppard/2 wk/AFSC 2F071—Jan 96

Provides training in the knowledge and skills necessary to perform duties as a fuels craftsman. Focuses on a variety of fuels-related subjects taught at a supervisory level. Includes training on fuels quality control, fuels accounting, cryogenics, fuels support, FCC controller/expeditor and environmental concerns. Course completion required for the award of a 7-skill level.

Prerequisites: AFSC 2F051 and satisfactory completion of the 7-skill level exportable course.

Quota Control: HQ AFPC/DPPAPEO.

J3AZR2F091 001—Petroleum Logistics Management—PDS Code 5EB—Sheppard/3 wk/MASL D151021—Jun 94

Provides training for Air Force personnel, AFSC 2F071, in the knowledge and skills needed to perform the duties of a fuel superintendent or chief enlisted manager possessing AFSC 2F091/2F000. Training includes planning, organizing, directing, and coordinating fuels operation activities. It is designed to enhance the executive ability of the 7-level supervisor in the areas of quality assurance, war planning, and logistics management.

Prerequisites: Must be a LEAP selectee, MSgt selectee, or above (AFSC 2F071/2F091). Personnel who graduated from the C3AZR63190 001 and J3AZR63190 001 courses need not attend. ECL 70 SA.

Quota Control: 2 AF/DOP.

L3ALR2G031 005—Logistics Plans Apprentice—PDS Code WM1—DOD 551—Lackland/4 wk 3 days/MASL D151013/ AFSC 2G031—Oct 96

Trains personnel on the duties and responsibilities of the retail level logistics plans and programs NCO at the operational wing. Includes an overview of the logistics plans career field; the relationship of logistics planning to other major logistics disciplines; the programming functions of logistics, to include support agreements and war reserve materiel; wing level logistics planning and base support planning; all aspects of the Air Force mobility program to

include a mobility exercise; and Contingency Operations/Mobility Planning and Execution System (COMPES). Throughout the course, practical application of knowledge is applied to include performance exercises and written tests.

Prerequisites: See AFMAN 36-2108 for lateral retraining requirements. Personnel attending this course must be assigned or scheduled for immediate assignment to an Air Force operational or retail AFSC 2G0X1 position. Eligible personnel should attend immediately after serving a minimum of 3 months in their first operational or retail logistics plans assignment. Only personnel with duties in an operational Air Force unit at the wing level or below should attend this course. ECL 80SR.

Quota Control: 2 AF/DOP.

L3ACR2G071 000—Logistics Plans Craftsman—PDS Code XB1—Lackland/2 wk/AFSC 2G071—Oct 96

Trains personnel (AFSC 2G051) in the knowledge and skills needed to perform logistics planning functions. Includes deliberate planning, crisis action planning, war reserve material (WRM), support agreements, base support planning, and deployment planning.

Prerequisites: SSgt or above, completed CDCs 2G051 and 2G071, and have been awarded the 5-skill level. Must have been in 7-skill level upgrade training (UPG) for 18 months before attending this course.

Quota Control: HQ AFPC/DPPAPEO.

V3ABR2M031A 003—Missile and Space Electronic Systems Maintenance Apprentice (ICBM)—PDS Code 03R—DOD 1Z1—Vandenberg/15 wk 2 days/AFSC 2M031A—Oct 96

Operation, inspection, checkout, and periodic maintenance on WS-133 and WS-118A systems including launch facility, launch control facility, support base, and aerospace ground equipment. Electronic fundamentals, assembly, and installation of components, use of standard and special test equipment, technical orders, inspection and maintenance records, manuals, directives, and other maintenance publications.

Special Requirements: Screen for physical and (or) psychological limitations that would prevent working in enclosed or high places. Reliability screen according to AFI 36-2104. Requires steel-toe boots before start of class.

Prerequisites: L3AQR2M031A 400, Electronic Principles.

Quota Control: 2 AF/DOP.

V3ABR2M031B 000—Missile and Space Electronic Maintenance Apprentice (ALCM/ACM)—PDS Code M5L—Vandenberg/14 wk 3 days/AFSC 2M031B—Oct 96

Theory of operation for the AGM-86B/C and AGM-129A missile systems, system logic flow, schematics, and diagrams; alignment, calibration, and checkout of missile systems using the electronic system test set; perform self-verification tests of the checkout equipment; perform system servicing; troubleshooting to the component level on systems and equipment; replacement of defective modules; repair interconnections, principles of electronics, micro-electronic and digital comoputers; Air Force technical publications; Air Force maintenance procedures and missile safety.

Prerequisites: L3AQR2M031B 400, Electronic Principles.

Special Requirements: Secret clearance. Requires steel-toed boots before start of class.

L3AQR2M031A 400—Electronic Principles—PDS Code W4M—Lackland/12 wk 2 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2M031A. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to V3ABR2M031A 002, and electronics training is tailored to meet AFSC requirements.

Prerequisites: See AFMAN 36-2108.

Admin Instructions: a. Retrainees who have received prior Air Force electronics principles training in subject content covered by this course must request a waiver by message through their MAJCOM to the 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR2M031B 400—Electronic Principles—PDS Code W4M—Lackland/12 wk 2 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for reporting identifier 2M031B. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours supervised study. This course is a prerequisite to V3ABR2M031B 000, and electronics training is tailored to meet AFSC requirements.

Admin Instructions: Students who demonstrate proficiency by passing all measurement may be advanced. Retrainees who provide the required documentation on previous training will be advanced without measurement. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

V3ABR2M032A 004—Missile and Space Systems Maintenance Apprentice—PDS Code 021—Vandenberg/11 wk 2 days/AFSC 2M032A—Oct 96

Provides entry-level students training in the skills and knowledge needed to perform the duties of an apprentice missile and space systems maintenance specialist. The duties include the operation and maintenance of hydraulic, pneumatic, electrical, and mechanical systems involved in handling, transporting, installing, and removing missiles, missile guidance sections, reentry systems, and associated equipment. Training is provided on technical orders, inspection and maintenance records, manuals, directives and other maintenance publications.

Prerequisites: L3AQR2M032A 950, Electronic Principles.

Special Requirements: Screen for physical and psychological limitations that would prevent working in enclosed or high places. Reliability screening according to AFI 36-2104. Requires steel-toed

boots before start of class.

L3AQR2M032A 950—Electronic Principles—PDS Code W4U—Lackland/2 wk 4 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2M032A. Also contains selected DoD personnel and is the prerequisite for follow-on courses at Vandenberg AFB CA. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours supervised study. This course is a prerequisite to V3ABR2M032A 003, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFMAN 36-2108 (formerly AFR 39-1).

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

V3ABR2M033A 002—Missile and Space Facilities Apprentice (ICBM)—PDS Code 029—DOD 633—Vandenberg/16 wk 4 days/AFSC 2M033A—Oct 96

Fundamentals of electrical circuits, components, and symbols; electrical wiring; internal combustion engines and systems; diesel electrical units; electrical microprocessor/monitor for electrical power systems; operation of support vehicles; and refrigeration and environmental systems and components. Training is also provided on LF power systems, LF/ECS, waste disposal systems, and elevator workcage. Maintenance training includes inspection and troubleshooting of electrical control systems, diesel electrical units, and auxiliary power units. Additional training in use of test equipment, servicing of refrigeration systems, adjustment of motor and pneumatic controls and thermostats, electrical and soldering, technical publications, maintenance forms, tools, corrosion, security, safety, and maintenance management.

Special Requirements: Screen for physical and psychological limitations that would prevent working in enclosed or high places. Reliability screening according to AFI 36-2104.

Prerequisites: L3AQR2M033A 750, Electronic Principles.

Quota Control: 2 AF/DOP.

L3AQR2M033A 750—Electronic Principles—PDS Code W4Q—Lackland/10 wk—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 2M033A. The course also contains selected DoD personnel and is the prerequisite for follow-on at Vandenberg AFB CA. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, mircoprocessors, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to V3ABR2M033A 001, and electronics training is tailored to meet AFSC requirements.

Prerequisites: See AFI 36-2108.

Admin Instructions: a. Retrainees who have received prior Air Force electronic principles training in subject content covered by this course must request a waiver by message through their MAJCOM to 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

V3AZR2M051 000—Verification and Checkout Equipment (Support Equipment Maintenance)—PDS Code 6C5—Vandenberg/10 wk 3 days—Oct 96

Advanced course instructs alignment, calibration, and repair of AGM-86B/C and AGM-129 checkout equipment. Includes detailed circuit analysis of schematic diagrams for special test equipment, operation of self-check portion of special test equipment to isolate malfunctions; removal, repair, replacement, and testing of test equipment subassemblies, troubleshooting and repair of checkout equipment interconnecting wiring and microelectronic circuits.

Prerequisites: Career-committed airmen with AFSC 2M051 or 2M071 with 12 months operator experience on the electronic system test set.

Special Requirements: Secret clearance before class start date and reliability screening according to AFI 36-2104.

Reporting Instructions: Report to bldg 8250, room 101, on Vandenberg AFB CA, at 0730 PST on the first day of training.

V3AZR2M051 004—Maintenance of Electronic Equipment Test Station—PDS Code TPG—Vandenberg/7 wk 1 day—Oct 96

Advanced maintenance of the electronic equipment test station, AN/GSM 315. Includes blocks of basic soldering, connector repair, standard test equipment operation, ESD principles, diagram analysis and in-depth self-testing, complete computer off-line testing and troubleshooting, general computer operation, chief ATS capabilities, disk drive management and test executive troubleshooting.

Prerequisites: Assigned to electronic laboratory and possess SEI 809/857 or 809/858, or 809/860.

Special Requirements: Reliability screening according to AFI 36-2104.

Reporting Instructions: Report to bldg 8250, room 101, on Vandenberg AFB CA, at 0730 PST on the first day of training.

V3AZR2M071 001—Technical Engineering WS-133 AM/CDB—PDS Code PYT—Vandenberg/7 wk 3 days—Oct 96

Trains selected Air Force personnel to perform ICBM missile technical engineering duties. Includes detailed theory and operations of the WS-133B weapon system's electronics, checkout procedures, adjustment, fault isolation, removal, replacement, and repair of missile system components, logic level signal flow, integrated system data flow, and detailed system analysis. Its sister course for officer

training is V3OZR62E3E 006, PDS Code PYW, Technical Engineering (WS-133AM/CDB).

Prerequisites: Must hold AFSC 2M0XX (5- or 7-skill level).

Reporting Instructions: Report to bldg 9307, room 27, at 0730 PST on the first day of training.

V3AZR2M071 002—Technical Engineering WS-133B—PDS Code U8Q—Vandenberg/2 wk—Oct 96

Followon course that trains selected Air Force personnel to perform ICBM missile technical engineering duties. Includes detailed theory and operations of the WS-133B weapon system's electronics; checkout procedures; adjustment; fault isolation; removal, replacement, and repair of missile system components; logic level signal flow; integrated system data flow; and detailed system analysis. Its sister course for officer training is V3OZR62E3E 002, PDS Code FLY, Technical Engineering (WS-133B).

Prerequisites: Must complete V3AZR2M071 001, Technical Engineering (WS-133 AM/CDB), and hold AFSC 2M0XX (5- or 7-skill level).

Reporting Instructions: Report to bldg 9307, room 27, at 0730 PST on the first day of training.

V3AZR2M071 003—Spacelift Maintenance—PDS Code RBN—Vandenberg/7 wk—Oct 96

Trains selected Air Force technicians and engineers in the skills required to perform duties at spacelift units. The scope of training includes familiarization with spacecraft and launch vehicles, contractor interface, launch base management. Also includes theory and operation of major systems and facilities used for spacelift.

Prerequisites: Selected individuals with AFSCs 2M071, 2M072, 2M073, civilian equivalents, and others requiring the skills and knowledge needed to perform duties associated with spacelift maintenance.

Reporting Instructions: Report to bldg 9307, room 25, at 0730 PST on the first day of training.

E3ABR2P031 006—Precision Measurement Equipment Apprentice (USMC 6492/6493)—PDS Code 1YA—DOD 198—Keesler/32 wk 3 days/MOS 6492/6493—Apr 95

Use of Air Force and Marine base calibration standards to analyze and isolate malfunctions, repair, and calibrate electrical/electronic precision measurement equipment. Emphasis is placed on the principles of electronics and metrology (science of measurement).

Prerequisites: EL score = 120 (81%) Basic Elect-Memphis Grad. Normal color vision.

Quota Control: 2 AF/DOP.

E3ABR2P031 008—Precision Measurement Equipment Laboratory Apprentice (Army 35H10)—PDS Code 7J2—DOD 198—Keesler/39 wk 1 day/AFSC S35H10/MASL D131056—Jan 96

Basic electronic theory; circuit analysis; operation, calibration, adjustment, and troubleshooting of test measurement and diagnostic equipment; metrology principles in AC, DC, time domain, signal generation, and physical dimensional; use of US Army secondary transfer calibration standards; cross checks; preparation of required Army forms; use of Army publications; Calibration Management Information System (CALMIS) procedures.

Prerequisites: ECL 70 SR.

Special Requirements: US Army students must pass an Army physical fitness test (APFT) to qualify for completion of this course.

Quota Control: 2 AF/DOP.

E3ABR2P031 009—Precision Measurement Equipment Laboratory Apprentice (Air Force)—PDS Code 2I4—Keesler/31 wk 4 days/AFSC 2P031—Oct 96

Use of Air Force base calibration standards to analyze and isolate malfunctions, repair, and calibrate electrical-electronic precision measurement equipment. Emphasis on the principles of electronics and metrology (the science of measurement).

Mission-ready Certification: Students will be certified on the calibration of certain equipment, such as the passive analog multimeter, oscilloscope, pressure gauge, torque wrench, frequency counter, and digital multimeter.

Prerequisites: ECL 70 SR. Completion of E3AQR2E020 010, blocks 1.1 through 1.14, Common Electronic Training Program, 70 academic days or equivalent and completion of E3AQR2P031 000, blocks 2.1 through 2.9, Precision Measurement Equipment Laboratoroy Apprentice, 76 academic days.

Quota Control: 2 AF/DOP.

E3ABR2P031 010—Test Measurement and Diagnostic Equipment (TMDE) Maintenance Technician (USA)—PDS Code 2I3—Keesler/36 wk/AFSC S35H10—Oct 96

Introduction to the US Army TMDE calibration and repair support program, use of the US Army secondary transfer calibaration standards cross checks, preparation of required army forms, and use of calibration automated data systems.

Prerequisites: ECL 70 SR. Completion of E3AQR2E020 010, blocks 1.1 through 1.14, Common Electronic Training Program, 70 academic days or equivalent and completion of E3AQR2P031 000, blocks 2.1 through 2.9, Precision Measurement Equipment Laboratoroy Apprentice, 76 academic days.

Special Requirements: US Army students must pass an Army physical fitness test to qualify for completion of this course.

Quota Control: 2 AF/DOP.

E3AZR2P051 008—Physical Measurement and Calibration (USAF)—PDS Code XRL—Keesler/8 wk 2 days/MASL D131106—Jan 96

This consolidated Interservice Training Review Organization (ITRO) course provides training in the knowledge and skills needed to maintain and calibrate physical measurement equipment. Includes principles of metrology, the operation application, and mathematical analysis of measurement methods, calibration techniques of physical and optical measuring, and calibration standards. Also provides training in the operation and calibration of aircraft engine test stands and valibration.

Prerequisites: AFSC 2P051 or 2P071 or Air Force equivalent. A working knowledge of algebra is desirable.

Quota Control: 2 AF/DOP.

E3AZR2P051 009—Physical Measurement and Calibration (USA)—PDS Code XRP—Keesler/4 wk 3 days/MASL D131035—Apr 95

This consolidated Interservice Training Review Organization (ITRO)

course provides training in the knowledge and skills needed to maintain and calibrate physical measurement equipment. Includes principles of metrology, the operation application, and mathematical analysis of measurement methods, calibration techniques of physical and optical measuring, and calibration standards.

Prerequisites: Open to US Army personnel with 34H20 or equivalent experience. ECL 70 SR.

Quota Control: 2 AF/DOP.

E3AZR2P051 010—Physical Measurement and Calibration (USN)—PDS Code XRN—Keesler/8 wk 1 day—Apr 95

This consolidated Interservice Training Review Organization (ITRO) course provides training in the knowledge and skills needed to maintain and calibrate physical measurement equipment. Includes principles of metrology, the operation application, and mathematical analysis of measurement methods, calibration techniques of physical and optical measuring, and calibration standards. Also provides training in METCAL, environmental monitoring, and thermo units.

Prerequisites: AFSC 2P051, 2P071, or Navy equivalent.

Quota Control: 2 AF/DOP.

E3AZR2P051 011—Physical Measurement and Calibration (USMC)—PDS Code XRM—Keesler/6 wk 3 days/MASL D131075—Jan 96

This consolidated Interservice Training Review Organization (ITRO) course provides training in the knowledge and skills needed to maintain and calibrate physical measurement equipment. Includes principles of metrology, the operation application, and mathematical analysis of measurement methods, calibration techniques of physical and optical measuring, and calibration standards.

Prerequisites: AFSC 2P051, 2P071, or civilian equivalent. ECL 70 SR.

Quota Control: 2 AF/DOP.

E3AZR2P051 012—DCLF Reference Measurement and Calibration (USA 35H30)—PDS Code 32F—DOD 198—Keesler/6 wk/MASL D131075—Oct 96

Theory of operation, analysis of circuitry, and use of systematic troubleshooting and malfunction isolation techniques on selected Army calibration standards and equipment. Emphasis on calibration and repair techniques at the laboratory level of expertise. Designed primarily for US Army military and civilian personnel.

Prerequisites: Open to US Army civilians with 35H20 or equivalent experience. ECL 70 SR.

Quota Control: 2 AF/DOP.

E3AZR2P051 013—Microwave Measurement and Calibration (USA 35H30)—PDS Code 32H—DOD 198—Keesler/5 wk 3 days/MASL D131048—Oct 96

Theory, operation, use, and calibration of advanced microwave standards and calibration techniques. Specific instruction in advanced microwave measurements in impedance, attenuation, frequency, and power using dual channel substitution systems and swept frequency methods. Designed to support current advanced microwave systems used in calibration facilities.

Prerequisites: Open to US Army civilians with 35H20 or equivalent experience. ECL 70 SR.

Quota Control: 2 AF/DOP.

E3AZR2P051 0l4—Advanced Calibration Technician School—PDS Code 588—Keesler/12 wk/MASL P148209—Jan 96

Training includes principles of metrology, math analysis of measurement methods, operation, application, and calibration of electrical-electronic precision measurement equipment. Also includes theory, operation, use, and calibration in advanced microwave standards and calibration techniques. Specific instruction in advanced microwave measurement in impedance, attenuation, frequency, and power, using dual channel substitution systems and swept frequency methods. This portion of course is designed to support current advanced microwave systems used in Navy facilities.

Prerequisites: USN and USMC personnel pass preentrance test. Civilians must meet equivalent qualifications. Air Force personnel - AFSC 2P0X1 or civilian equivalent. ECL 70 SR. ***NOTE:*** Designed primarily for USN and USMC personnel.

Quota Control: 2 AF/DOP.

E3AZR2P051 041—Advanced Calibration, Measurement, and Diagnostics—PDS Code NYW—Keesler/12 wk/MASL D131104—Jan 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel who operate, maintain, and calibrate advanced TMDE and ATE systems. Includes time domain waveform analysis: frequency domain spectrum analysis; fixed frequency measurement; swept frequency measurements; circuit analysis and fault isolation; and computer operator training required for calibrations and measurements of ATE systems including the Phase Noise Measurement Calibration System, Portable Automatic Test Equipment Calibration (PATEC) System, Millimeter Wave Power Calibration System, Global Positioning System, and the Test Program Generator Calibration System.

Prerequisites: AFSC 2P051 or 2P071 or civilian or other military service equivalents. Completion of an exportable training package covering advanced electronics and microwave theory. ECL 70 SR.

Quota Control: 2 AF/DOP.

E3AZR2P051 045—TACAN/DOD AIMS Diagnostics Principles—PDS Code WEE—Keesler/6 wk/MASL D131105—Oct 96

Theory, operation, use, troubleshooting, and calibration of test measurement and diagnostic equipment used for navigational aids (NAVAIDS). These principles include tactical air navigation (TACAN) and DoD air traffic control radar beacon system (ATCRBS) identify friend or foe (IFF) Mark 12 system (DOD AIMS). Specific instruction emphasizes development of diagnostic principles concerning pulsed RF techniques, TACAN, and DOD AIMS theory.

Prerequisites: AFSC 2P051, 2P071, or equivalent. A firm background in solid-state devices, binary and decimal numbering systems, and logic circuits. Equivalent qualifications for civilians. Prerequisite appraisal given. ECL 70 SR.

Quota Control: 2 AF/DOP.

E3AZR2P051 046—"I" Level Calibration of Physical/Dimensional/Test and Measuring Systems—PDS Code 4Z7—Keesler/3 wk—Apr 96

Covers physical dimensional calibration course indoctrination, pressure and vacuum measurement/inflator instrument calibration, torque, force, tension measurement instrument calibration, and

dimensional measurement instrument calibration. Designed to provide Navy and Marine Corps technicians sufficient knowledge and theory to perform, under limited supervision, intermediate level calibration of physical dimensional test and measuring systems in an intermediate maintenance environment.

Prerequisites: Navy and Marine Corps personnel, E-2 through E-6.

Quota Control: 2 AF/DOP.

E3AZR2P051 047—Field Calibration Activity (FCA) Maintenance (USN)—PDS Code 52K—Keesler/3 wk—Apr 96

Provides theory of operation, procedures, and operator maintenance of the standards used to perform electrical and electronic calibration to general purpose electronic test equipment using MECCA phase packages: A1A - electrical/electronic and digital meters; A7A - differential/digital voltmeters; C1B - oscilloscopes; C1C - oscilloscopes including TER 7000 series; C4A - electronic counters/frequency standards; and C5B - signal generators (150 KHg to 1.3 GHz). Course also provides basic knowledge of calibration reporting and equipment recall using Metrology Automated System for uniform recall and reporting (measure).

Prerequisites: Graduates of electronic technician (A) school or other maintenance personnel with equivalent qualifications.

Quota Control: 2 AF/DOP.

E3AZR2P051 048—GPETE Calibration and Maintenance (USN)—PDS Code 52M—Keesler/15 wk/AFSC 1589 or 6673—Oct 96

Provides technicians with operating procedures, detailed theory of operation, calibration, and maintenance procedures for general purpose electronic test equipment (GPETE). Six functional areas are covered: meters, oscilloscopes, frequency, counters, spectrum analyzers, signal generators, and power measurements. Technical training equipment will utilize various fault insertion techniques to provide realistic calibration and repair scenarios. The technician will have sufficient skills, knowledge, and techniques to operate, calibrate, analyze, troubleshoot, and repair GPETE to the lowest replaceable component or assembly under limited supervision within an intermediate maintenance environment.

Prerequisites: AT, ET, or CTM (A) school graduate or equivalent, or completion of "I" level calibration of physical dimensional test and measuring systems (phases B/D), or field calibration activity (FCA).

Quota Control: 2 AF/DOP.

E3ACR2P071 000—Precision Measurement and Calibration Craftsman—PDS Code 46H—Keesler/2 wk—Jan 96

Provides training in PMEL management and operations. Subjects include: Quality Air Force (QAF) and the Total Quality Program (TQP), logistics, resources, calibration facility operational requirements, occupational safety and health hazard programs, hazardous materials (HAZMAT), production management, RADIAC program management, and laboratory practices, procedures, and administration.

Prerequisites: SSgt (Air Force), AFSC 2P051.

Quota Control: HQ AFPC/DPPAPEO.

E3AZR2P071 000—Radiac Instrument Repair and Calibration—PDS Code CTL—DOD 198—Keesler/1 wk 3 days/MASL D131061—Apr 95

Theory, operation, repair, calibration, and certification of radiation monitoring equipment. Health physics, regulations for the handling, storage, and identification of radioactive materials as required for industrial radiological monitors and US Air Force individuals users permit certification.

Prerequisites: AFSC 2P051/71. Equivalent grade for civilians. ECL 70 SR.

Special Requirements: Students must be enrolled in the Air Force Film Dosimetry Program prior to arrival at Lowry AFB for training. Per TO 00-110N-3, Requisition, Handling, Storage, and Identification of Radioactive Material, persons under 18 years of age and women known to be pregnant will be denied access to this course.

Quota Control: 2 AF/DOP.

E3AZR2P071 032—Type A/E 35U-3 Spectrometer Maintenance/Calibration—PDS Code 3TD—Keesler/4 wk/ MASL D131007—Apr 95

Theory, operation, use, troubleshooting, repair, and calibration of the Type A/E 35U-3 Spectrometer.

Prerequisites: AFSC 2P051/71, equivalent specialty identifier for other service branches and equivalent background for civilians. A firm background in transistorized electronic circuitry, a working knowledge of optical physics and logic analysis are required. ECL 70 SR.

Quota Control: 2 AF/DOP.

J3ABR2R031 004—Maintenance Data Systems Analysis Apprentice—PDS Code XM4—DOD 558—Sheppard/11 wk 1 day/AFSC 2R031/MASL D141012—Apr 95

Consists of training in statistical methods of data analysis, microcomputer applications, data retrieval techniques, and the operation and maintenance of management information systems. Training will include the use of computer remote terminals, microcomputers, and printers, the procedures for maintaining and correcting data systems, the interpretation and use of reports from management information systems, and the presentation of maintenance data.

Prerequisites: Computer literacy and completion of high school with courses in algebra, English composition, effective writing, and typing are desirable. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AZR2R051 003—Maintenance Data System Analysis Journeyman—PDS Code XM5—DOD 558—Sheppard/6 wk/MASL D148162—Apr 95

Provides training for Air Force personnel in AFSC 2R0X1 in the knowledge and skills needed to perform the duties of a maintenance data system analyst. The scope of data base management training includes use of a microcomputer system to interface with the standard base level computer (SBLC), retrieve data, and troubleshoot a Core Automated Maintenance System (CAMS) data base. Training also includes development and interpretation of statistical control charts, performance of statistical tests, and use of the analysis process.

Prerequisites: Civilians: Currently in or projected for a position as a maintenance data system analyst. Completion of algebra or equivalent mathematics mandatory. Requires working knowledge of microcomputers. Military: Possess 5-skill level CDCs with 6 months

of data base manager/analyst experience desirable. Completion of the interactive processing facility (IPF) tutorial, and have a working knowledge of microcomputers, peripherals, and the SBLC system. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3ACR2R071 005—Maintenance Data Systems Analysis Craftsman—PDS Code XM6—DOD 558—Sheppard/4 wk/MASL D141132—Jan 96

Consists of advanced data base maintenance training on Sperry/UNISYS standard base level computer (SBLC) to include indepth training on query language processing (QLP) and interactive query utility (IQU). Emphasis is given to microcomputer applications for trend analysis, statistical techniques for analysis studies, to include probability applications, and use of parametric and nonparametric statistical test in the analysis process and presentation of results using analysis studies.

Prerequisites: Civilians: GS-7 or higher currently assigned as a maintenance data systems analyst. Must have 2 years of experience as a data base manager (DBM) or previously attended course J3AZR2R051 003. Working knowledge of microcomputers is mandatory. Completion of the interactive processing facility (IPF) tutorial is mandatory. Military: Completion of 7-skill level career development courses (CDC), completion of core task training, and 18 months of on-the-job training as a SSgt. International Students: Must complete the Maintenance Data Systems Analysis Apprentice Course, J3ABR2R031 004, and the Maintenance Data Base Management Course, J3AZR2R051 003, with at least 2 years of experience using standard Air Force data base systems. ECL 70. Waiver of any of the prerequisites for international students is highly discouraged. Without the prerequisites, it is highly doubtful a student would be able to achieve a passing score on even the simplest of course objectives and would not graduate from the course.

Quota Control: HQ AFPC/DPPAPEO.

J3ACR2R071 006—Maintenance Data Systems Analysis Craftsman (ANG/RES)—PDS Code X3B—Sheppard/2 wk/AFSC 2R071—Oct 96

Provides advanced training for Air National Guard and Air Force Reserve personnel in AFSC 2R0X1 in the skills needed to perform the duties of a maintenance data systems analyst. The scope of data base management training includes the use of a microcomputer to perform query language processor report writer programming actions. Includes development and interpretation of statistical control charts, performance of statistical tests, and use of the analysis process.

Prerequisites: Working knowledge of microcomputers is mandatory. Completion of the interactive processing facility (IPF) tutorial is mandatory. Civilian: GS-7 or higher currently assigned as a maintenance data systems analyst. Must have 2 years of experience as a data base manager or previously attended course J3AZR2R051 003. Military: Completion of 7-skill level career development courses, completion of core task training, and 18 months of on-the-job training as a SSgt.

Quota Control: HQ 2AF/DOP.

J3ABR2R131 003—Maintenance Scheduling Apprentice—PDS Code XKX—DOD 558—Sheppard/6 wk 1 day/AFSC 2R131/MASL D162011—Oct 96

Training consists of familiarization of aircraft maintenance organizations, concepts, and responsibilities; familiarization of technical orders and Air Force instructions. Automated products and the automated management system will be used to plan and schedule the utilization and maintenance of aircraft through all phases of maintenance. Training includes engine parts tracking and the maintenance of aerospace weapon systems records, using computer remote terminals and associated equipment.

Prerequisites: ECL 70 SA.

Quota Control: 2 AF/DOP.

J3ACR2R171 004—Maintenance Scheduling Craftsman—PDS Code XK1—DOD 558—Sheppard/2 wk/MASL D141223—Jan 96

Consists of advanced maintenance scheduling training on theory, concepts, principles, and applications of maintenance scheduling. Emphasis will be given to provide a greater depth of knowledge in microcomputers, aerospace vehicle inventory management, the design and development of unit generation flow plans, and advanced instruction in the operational planning process.

Prerequisites: Civilians: GS-5 or higher and currently assigned as a maintenance scheduler. Must have 2 years of experience as a maintenance scheduler. Working knowledge of microcomputers. Military: Completion of 7-skill level CDCs, completion of core task training, and 18 months of on-the-training as SSgt. International Students: Must complete the Maintenance Scheduling Apprentice Course, J3ABR2R131 003, with at least 2 years of experience using the Core Automated Maintenance System (CAMS) and the ability to interpret products generated from CAMS. Minimum of 2 years or experience developing aircraft flying and maintenance schedules. Working knowledge of microcomputers. ECL 70 SA. Waiver of any of the prerequisites for international students is highly discouraged. Without the prerequisites, it is highly doubtful a student would be able to achieve a passing score on even the simplest of course objectives and would not graduate from the course.

Quota Control: HQ AFPC/DPPAPEO.

L3ABR2S031 004—Supply Management Apprentice—PDS Code XXE—Lackland/7 wk 4 days/AFSC 2S031/MASL D151002—Oct 96

Trains personnel (AFSC 2S011) in the knowledge and skills needed to operate the base supply system. Includes supply career field, Air Force Supply System, microcomputers, input-output devices, national stock number, item and part number records, rejects/management notices and inquiries, issue process, nonmission capable (MICAP) process, document control process, repair cycle process, warehouse management, selection and movement of property, inspection, bench stock, receiving process, receipt discrepancies, turn-in process, pick up and delivery, stock control process, inventory process, equipment management, retail sales, war reserve materiel, and post-post.

Prerequisites: ECL 70 SA.

Quota Control: 2 AF/DOP.

L3ALR2S032 004—Supply Systems Analyst Apprentice—PDS Code WN8—Lackland/9 wk 3 days/AFSC 2S032/MASL D152030—Oct 96

Trains Air Force personnel in AFSC 2S032 in the knowledge and skills needed to operate the remote processing station (RPS). Includes introduction to the Standard Base Supply System (SBSS), microcomputers, system processors, interactive processing facility (IPF), query language processor (QLP), supply system user report

generator (SURGE), RPS management, and RPS processing.

Prerequisites: Retrainees from AFSC 2S051 with a minimum of 3 years of supply experience and a mandatory assignment to a base supply computer operations (RPS) element for 45 consecutive days. Time in the RPS is waiverable up to 15 days by the chief of supply in writing to AFPC/DPMRADL, attention: supply functional manager. AFPC will coordinate all actions with 344 TRS/TTL. Students must complete the AFJQS 2S012 and hand-carry the completed AFJQS to class. Civilian personnel must have a minimum of 5 months of experience in the base supply computer operations element, completed the AFJQS 2S012, hand-carry the completed AFJQS to class, and 3 years of experience in base supply. ECL 80 SR.

Quota Control: 2 AF/DOP.

L3ACR2S071 003—Supply Management Craftsman—PDS Code XXD—Lackland/2 wk/AFSC 2S071/MASL D152029—Oct 96

Provides technical training for Air Force personnel in AFSC 2S051. Provides knowledge and skills necessary to perform the duties to operate the base supply system. Includes War Plans Additive Requirement Report, contingency supply support, and property management.

Prerequisites: SSgt or above with at least 18 months time in grade, have completed CDCs 2S051A and 2S051B, have been awarded the 5-skill level, and have successfully completed the 7-skill level CDC. ECL 70 SR.

Special Requirements: Steel-toed safety boots and battle dress uniforms.

Quota Control: HQ AFPC/DPPAPEO.

L3AZR2S071 004—Supply Management Business Area (SBMA)—PDS Code P9X—Lackland/3 wk 3 days/MASL D152038—Oct 96

Training for Air Force personnel, AFSC 2S071, in the knowledge and skills required for positions as a supply management business area (SMBA) manager in the Standard Base Supply System (SBSS). Training includes course introduction and orientation, SMBA concept, relationship and responsibilities, issue and due-out transactions, turn-in transactions, shipments and transfer-out transactions, miscellaneous transactions and inquiries, miscellaneous reports, trend analysis, and planning, programming, and budgeting.

Prerequisites: Military with AFSC 2S051 or higher and civilians. Personnel must be assigned to the SMBA in the SBSS and must have a minimum of 6 months of experience in SBSS SMBA before attending this course. The 6-month experience criteria is waived for personnel en route to oversea assignments who will be working in SMBA. Chief of supply, asst chief of supply, management and systems chief and superintendent, auditors, personnel in SMBA management functions at numbered Air Force or higher level, and those individuals who have direct supervisory responsibilities over these functions are eligible. ECL 80 SR.

Quota Control: 2 AF/DOP.

L3AZR2S071 007—Supply Analysis—PDS Code 02S—Lackland/4 wk/MASL D152049—Oct 96

Provides technical training to Air Force personnel in AFSC 2S0XX. Provides knowledge and skills necessary to perform the duties of supply analysts in the Standard Base Supply System (SBSS). Training includes deficiency identification, data gathering techniques, problem-solving methods, trend analysis, performance analysis, manpower standards, and microcomputer applications including inventory analysis program (IAP) and supply management analysis (SMA) programs.

Prerequisites: SSgt or above; GS-5 or above with 2 years of supply experience and successful completion of CDCs 2S051A and 2S051B; or 1st Lt and captain. ECL 70 SA.

Quota Control: 2 AF/DOP.

L3AAR2S072 004—Supply Systems Analyst—PDS Code WN7—Lackland/6 wk/MASL D152045—Oct 96

Provides training for Air Force personnel, AFSC 2S072, in the knowledge and skills needed to perform the duties of supply system analyst in the Air Force Standard Base Supply System (SBSS). Includes supply system analyst responsibilities, processing concepts, SBSS integrity, data base concepts, query language processor (QLP), processing techniques, and supply user report generator (SURGE). Civilian attendees may be required to complete homework assignments after class hours.

Prerequisites: SSgt with a minimum of 2 years of experience in AFSC 2S072. Civilians, GS-6 and above, with 2 years of SBSS S2200/400 experience. Must complete AFJQS 2S072. ECL 80 SR.

Quota Control: 2 AF/DOP.

L3AZR2T000 005/L4AZT2T000 005—Hazardous Materials Preparer (Initial)—PDS Code RCS—Lackland/on site/2 wk/MASL D153019—Apr 95

Provides training for selected DoD military and civilian personnel to prepare hazardous material shipments for transport via military air, commercial air, rail, motor, and water modes. Provides packaging requirements and procedures for marking, labeling, placarding, and compatibility requirements. This course meets the formal training requirement for preparers of hazardous materials according to AFM 24-204J and meets the provisions stated in the ITRO common core curriculum. Authorizes personnel to certify the shippers certification on government bills of lading and provides training to complete and certify legally binding certification documents (such as, shipper's declaration for dangerous goods, and shipper's certification for military air) for shipments of hazardous materials according to DoD, commercial, and military publications.

Prerequisites: AFSC 2TXXX personnel (or civilian equivalent, and other services personnel) who are assigned to or will be assigned to a position where they are required to prepare and certify hazardous material shipments for transportation on a daily basis. A working knowledge of Title 49 CFR, IATA, IMDG, and AFM 24-204J is desirable. Individuals not meeting these prerequisites are discouraged from attending. ECL 80.

Quota Control: 2 AF/DOP.

L3AZR2T000 007—CMOS System Administrator—PDS Code 283—Lackland/2 wk—Apr 96

Provides training for personnel to function as Cargo Movement Operations System (CMOS) administrators. Course curriculum involves aspects of CMOS to include basic computer fundamentals, the operating system, CMOS administration support menus, system maintenance, hardware maintenance, automated date processing equipment (ADPE) control, system diagnostic procedures, and system operations.

Quota Control: 2 AF/DOP.

L3ABR2T031 000—Traffic Management Apprentice—PDS Code WN9—Lackland/13 wk/MASL D153029—Oct 96

Provides training for planning, arranging, and procuring air, rail, motor carrier, and bus transportation service for DOD military and civilian personnel and dependents, including shipment and storage of personal property, house trailers, and privately owned vehicles; classifying, documenting, and arranging for shipment of government-sponsored cargo by military air and motor vehicle and by commercial air, rail, express, motor carrier, and parcel post. Provides instruction in operating material handling equipment; procedures for receiving inbound shipments; performing packing and crating procedures; preservation of items; custom requirements; freight terminal operations; saw operations and heat sealing; deployment operations; data automation; security and safety. Utilizes the TOPS and CMOS computer systems.

Prerequisites: ECL 70.

Special Requirements: Steel-toed boots.

Quota Control: 2 AF/DOP.

L3AZR2T051 006—Transportation Combat Readiness and Resources—PDS Code PA3—Lackland/2 wk—Oct 96

Training in base level transportation combat readiness and resources functions. The course centers on understanding and implementing combat readiness responsibilities and supporting contingency activities within transportation units. Includes basic functions and responsibilities, wartime and contingency planning concepts, deployment operations, and resource management, to include war reserve materiel, resource management accounting systems, manpower and personnel process, and facility planning.

Prerequisites: Air Force officers, civilians, or NCOs (SSgt or above), projected for assignment to duty requiring the knowledge of base level transportation combat readiness and resources function.

Quota Control: 2 AF/DOP.

L3ACR2T071 003—Traffic Management Craftsman—PDS Code XKB—Lackland/2 wk—Oct 96

Centers around passenger travel, personal property movement, special and expedited handling shipments, second-destination transportation, budgeting process, manpower process, and deployment operations. Students work as members of a group to decide upon their course of action to given scenarios and then present briefings before the class.

Prerequisites: NCOs (AFSC 2T051) or civilians of equivalent grade or skill. Completion of OJT requirements and CDC 2T071. Completion of CDC 2T071 must be documented in orders. A minimum of 15 months of experience in traffic management journeyman duties is desirable. Computer-based graphics knowledge is desirable.

Quota Control: HQ AFPC/DPPAPEO.

L3ABR2T131 000—Vehicle Operator Apprentice—PDS Code WKG—Fort Leonard Wood/6 wk/AFSC 2T131—Oct 96

Provides training to personnel in the processes, functions, duties, and responsibilities applicable to vehicle operations. Provides familiarization training on certain Air Force vehicle types. Topics covered include quality Air Force, objectives wing structure, and organizational structure (transportation squadron and flights). Emphasis on vehicle operations flights, vehicle operator/dispatcher responsibilities, safe driving practices, extreme driving conditions, and the transportation of hazardous substances. Also includes training on accident reporting, flight line operations, vehicle operator maintenance (inspecting vehicles and operator care), vehicle servicing and cleaning (detailing a vehicle and changing tires), and familiarization with wrecker and tractor-trailer components, protocol. Personnel receive training on safe loading procedures, lashing and cover on cargo, driving commercial and military designed trucks, computer fundamentals, forklift (safety practices and loading of cargo), communication equipment, and career field specifics training. Personnel receive training on 28/44 passenger bus, map reading, convoy practices, and mobility and contingency training. Course discusses utilization of the Automated Fleet Information Systems (AFIS) computer modules.

Prerequisites: Valid state driver's license (mandatory). ECL 70.

Special Requirements: Safety-toed shoes, hearing protection, gloves, and back support equipment. BDUs required for all practical performance areas.

Prerequisites: 2 AF/DOP.

L3ACR2T171 004—Vehicle Operations Craftsman—PDS Code X2E—Fort Leonard Wood/2 wk—Oct 96

Includes the processes for control and management of base level vehicle operation's activities and development of fleet management actions and listings using automated fleet information system (AFIS) software; identification of training, manpower and resource requirements for base support, mobility, and contingency operational planning, as well as status of resources and training system (SORTS); manpower and personnel processes to include unit manning document (UMD), unit personnel management roster (UPMR), and functional responsibilities of convoy and mobility operational planning.

Prerequisites: NCOs (AFSC 2T151) or civilians of equivalent grade or skill. Completion of OJT requirements and CDC 2T171. Completion of CDC 2T171 must be documented in orders. A minimum of 15 months of experience in vehicle operations journeyman duties and computer-based knowledge is desirable.

Quota Control: HQ AFPC/DPPAPEO.

L3ABR2T231 003—Air Transportation Apprentice—PDS Code 21E—Lackland/5 wk 4 days/AFSC 2T231/MASL D153005—Oct 96

Trains personnel in the techniques, functions, responsibilities, and duties pursuant to air cargo and air passenger handling. Instruction incorporates training on both manual and automated cargo, mail, and passenger processing systems. Covers originating, in-transit, and terminating cargo and passenger processing operations; storage and warehousing of general cargo, mail, and hazardous material; aircraft loading and offloading procedures for cargo, passengers, and baggage; originating, in-transit, and terminating aircraft fleet services operations; scheduling of cargo and personnel for air movement, and principles of customer relations and communications are introduced. Includes preparation and maintenance of records for all cargo and passenger movement activities. Operator maintenance and inspection of 463L material-handling equipment (MHE), and passenger/baggage-handling equipment is introduced.

Prerequisites: Possess a valid drivers license. ECL 70.

Special Requirements: Safety-toed boots, hearing protection, gloves, and back support equipment. BDUs are required in all practical performance areas and service uniforms are required for the classroom environment.

Quota Control: 2 AF/DOP.

L3ACR2T271 005—Air Transportation Craftsman—PDS Code X2F—Lackland/2 wk—Oct 96

Includes creating an air terminal; establishing passenger and cargo terminals; developing records and reports section to include publications, documentation of records and records maintenance; preparing training and deployment plans to include deliberate, joint, and operational planning, as well as status of resources and training system (SORTS); creating facility justification and resource management and accounting systems; detailing airlift roles in peacetime and wartime; managing manpower and personnel processes to include unit manpower document (UMD) and unit personnel management roster (UPMR); planning, funding, and coordinating of facilities; preparing airdrop missions; and writing transportation awards.

Prerequisites: NCOs (AFSC 2T251) or civilians of equivalent grade or skill. Completion of OJT requirements and CDC 2T271. Completion of CDC 2T271 must be documented in orders.

Quota Control: HQ AFPC/DPPAPEO.

L3ABR2T331 002—Special Purpose Vehicle and Equipment Maintenance Apprentice—PDS Code G1M—Port Hueneme/16 wk/AFSC 2T331/MASL D148157—Oct 96

Vehicle maintenance inspection systems, policies, and procedures. Fundamentals of automotive mechanics as applied to aircraft deicers, cargo loaders, cranes, crawler tractors, forklifts, graders, materials handling equipment, servicing vehicles, towing vehicles, snow removal equipment, and sweepers. Use of special tools and test equipment. Inspecting, troubleshooting, servicing, and repairing of diesel and gasoline engines; power train components; steering mechanisms; brakes; suspension systems; hydraulic system components; electrical systems; hoist and swing mechanisms; heaters and dispensing systems. Use of Air Force and commercial publications; security and safety.

Prerequisites: ECL 70 SA.

Special Requirements: Safety shoes.

Quota Control: 2 AF/DOP.

L3ABR2T332A 001—Special Vehicle Maintenance Apprentice, Firetrucks—PDS Code G20—DOD 610— Port Hueneme /15 wk 2 days/AFSC 2T332A/MASL D148022—Oct 96

Fundamentals of automotive mechanics. Vehicle maintenance inspection system; policies and procedures. Use of special vehicle tools and test equipment. Inspecting, troubleshooting, servicing, and repairing firefighting vehicles and mounted equipment to include gasoline and diesel engines and associated components; vehicle and equipment electrical systems; power train components; steering systems; brakes; suspension systems; dispensing systems; heaters; hydraulic systems; and air-conditioning. Use of Air Force and commercial publications; security and safety.

Prerequisites: ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L3ABR2T332B 001—Special Vehicle Maintenance Apprentice, Refueling Vehicle—PDS Code G2G—DOD 610— Port Hueneme /13 wk 2 days/AFSC 2T332B/MASL D148086—Oct 96

Fundamentals of automotive mechanics. Vehicular maintenance inspection system, policies, and procedures. Use of special vehicle tools and test equipment. Inspecting, troubleshooting, servicing, and repairing refueling vehicles to include gasoline and diesel engines and associated components; vehicle electrical systems; power train components; steering systems, brakes, suspension systems; dispensing systems; heaters and bottom loading system. Use of Air Force and commercial publications; security and safety.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L3ALR2T333 000—Vehicle Maintenance Control and Analysis Apprentice—PDS Code Z5T—DOD 558—Port Hueneme/5 wk/AFSC 2T333/MASL D148173—Oct 96

Includes maintenance management, on line vehicle integrated management system (OLVIMS), standards analysis, visual media, technical management and data systems.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

L3AZR2T351 000—Diesel Engine Maintenance (2T3XX Application)—PDS Code SUT—DOD 612—Port Hueneme/2 wk 2 days/MASL D148096—Oct 96

Operation, troubleshooting, and maintenance of the diesel engine cooling, lubrication, air intake, and exhaust systems. Includes inspecting and testing system accessory components (turbochargers and blowers). Operation and troubleshooting of the diesel engine fuel system components includes disassembly, reassembly, inspection, servicing, and testing of injection pumps, injectors, governors, mechanical and hydraulic advance mechanisms, and emission control devices. Tuneup procedures include injection pump to engine timing and adjustments to governor (racks, hi-low idle speed circuits and buffer screws), valve lash clearance, crossheads, and injection pumps.

Prerequisites: AFSC 2T351, 2T352A/B, 2T451, 2T353 or higher, or equivalent civilian experience necessary to perform as diesel engine specialist.

Special Requirements: Safety-toed shoes and earplugs.

Quota Control: 2 AF/DOP.

L4AST2T351 005—Diesel Engine Maintenance—PDS Code RLQ—various locations/2 wk—Oct 96

Provides technicians the needed training on operation, troubleshooting, and maintenance of diesel engines; troubleshooting and maintenance of unit injection, pressure time, distributor, multiple pump, and multi-fuel systems. Tune-up procedures include injection pump to engine timing, adjustments to governor (racks, hi-low idle speed circuits and buffer screws), valve lash clearance, crossheads, and injector pumps. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, 2T451 or higher, or equivalent civilian experience needed to perform tasks on diesel engines. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOP.

L4AST2T351 021—Landoll Deicer O/I Maintenance—PDS Code 8AU—various locations/1 wk 3 days—Oct 96

Provides technicians the needed training on operation of Landoll

deicer; maintenance of auxiliary engine electrical circuits, hydraulic system, dispensing system, and heater system as they apply to Landoll deicer. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher, or equivalent civilian experience needed to perform tasks on Landoll deicer. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOP.

L4AST2T351 029—Emerson 25K Loader O/I Maintenance—PDS Code 5L3—various locations/1 wk 1 day—Oct 96

Provides technicians the needed training on operation of the Emerson 25K loader; maintenance of engine systems (including engine tune-up procedures), electrical sub-systems, and hydraulic sub-systems as they apply to the Emerson 25K loader. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher, or equivalent civilian experience needed to perform tasks on Emerson 25K loader. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOP.

L4AST2T351 030—Space Corp 40K A/S H-6 A/Cargo Loader—PDS Code 6NJ—various locations/4 days—Oct 96

Provides technicians the needed training on operation of the Space Corporation A/SH-6 40K aircraft cargo loader; maintenance of air system, electrical sub-systems as they apply to Space Corporation A/SH-6 40K aircraft cargo loader. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, 2T451 or higher, or equivalent civilian experience needed to perform tasks on Space Corporation 40K loader. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOP.

L4AST2T351 034—A/S 32H-19 Tac Cargo Loader O/I Maintenance—PDS Code P6W—various locations/2wk 3 days—Oct 96

Provides technicians the needed training on operation of the A/S 32H-19 tactical cargo loader; maintenance of air sub-systems, electrical sub-systems, and hydraulic sub-systems as they apply to the A/S 32H-19 tactical cargo loader. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher, or equivalent civilian experience needed to perform tasks on the A/S 32H-19 tactical cargo loader. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOP.

L3AZR2T352A 004—A/S32P-19 Fire Truck O/I Maintenance—PDS Code 5VS—Port Hueneme/2 wk 3 days/MASL D148180—Oct 96

Maintenance of vehicle engine, power divider, transmission, axle assemblies, power steering, brakes, air system, dispensing system, halon system, turret systems, winterization system, electrical system, air-conditioning, and organizational maintenance of the A/S32P-19 firetruck. Safety emphasized in all areas.

Prerequisites: US Air Force AFSC 2T352A or higher, USMC MOS 3521/22/29 (recommend echelon 2 and 3), USN Aviation Support Equipment Technician, or equivalent civilian experience necessary to perform as technician on this vehicle. Personnel graduated from C4AST47251A 009, PDS Code 5MA, should not attend. ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L4AST2T352A 007—A/S 32P-15 Fire Truck O/I Maintenance—PDS Code YLB—various sites/2 wk 3 days—Oct 96

Provides technicians the needed training on the operation of A/S 32P-15 fire truck; maintenance of engine governors, power dividers, transmission components, air sub-systems, dispensing sub-systems, chassis and winterization electrical systems of A/S 32P-15 fire truck. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher or equivalent civilian experience necessary to perform tasks on P-15 fire truck. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L4AST2T352A 009—A/S 32P-19 Fire Truck O/I Maintenance—PDS Code 5MA—various sites/2 wk 2 days—Oct 96

Teaches the operation of A/S 32P-19 fire truck; maintenance of engine, power dividers, transmission, differential lockups, power steering, air brakes, dispensing, dry chemical, turret, winterization, and air conditioning systems on the A/S 32P-19 fire truck. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher or equivalent civilian experience necessary to perform tasks on P-15 fire truck. Personnel graduated from L3AZR2T352A 005, PDS Code PBL, should not attend. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L4AST2T352A 364—A/S 32P-23 Fire Truck O/I Maintenance—PDS Code P40—various sites/2 wk 1 day—Oct 96

Provides technicians the needed training on the maintenance and operation of A/S 32P-23 fire truck in all modes. Maintenance training includes isolate and repair chassis electrical subsytem, chassis air subsystem, engine tune-up, transmission and power divider controls, drive axle and differential locks, dispensing system, turret system, and winterization system of A/S 32P-23 fire truck. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher or equivalent civilian experience necessary to perform tasks on this vehicle. Personnel graduated from L3AZR2T352A 005, PDS Code PBL, should not attend. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L4AST2T352B 011—Oshkosh R-11 Refueler O/I Maintenance—PDS Code 8M4—various sites/2 wk 2 days—Oct 96

Provides technicians the needed training on the pre-operational inspection and the operation of Oshkosh R-11 refueler in all modes. Maintenance training includes isolate and repair PTO interlock, bottom loading, bypass, dispensing hose reel, mainline dispensing fuel, defuel, and chassis air and electrical systems of the Oshkosh R-11 refueler. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher or equivalent civilian experience necessary to perform tasks on this vehicle. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L4AST2T352B 012—Tri-State R-12 Hydrant/Hose Truck O/I Maintenance—PDS Code 9C3—various sites/2 wk—Oct 96

Provides technicians the needed training on the operation of A/S 32R-12 hydrant hose refueler. Maintenance of electrical, air, interlock, platform, hose reel, and pumping systems on the A/S 32R-12 hydrant hose refueler. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher or equivalent civilian experience necessary to perform tasks on A/S32R-12 hydrant hose refueler. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L4AST2T352B 016—Kovatch Model K-500 R-9 Refueler O/I Maintenance—PDS Code 33N—various sites/2 wk—Oct 96

Provides technicians the needed training on the operation of Kovatch A/S 32R-9 refueler. Maintenance of interlock, bottom loading, pumping, and dispensing systems on the Kovatch A/S 32-R-9 refueler. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, or higher or equivalent civilian experience necessary to perform tasks on A/S 32R-9 refueler. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L3ACR2T371 000—Vehicle Maintenance Craftsman—PDS Code X25—Port Hueneme/2 wk—Oct 96

Provide personnel in 7-skill level upgrade training (AFSCs 2T351, 2T352A/B, 2T353, 2T451, and 2T452) with the knowledge and skills needed to perform duties as a craftsman. Includes maintenance policies and procedures, maintenance management, maintenance training programs, maintenance data collection system, concepts of contingency operations, and automated information systems.

Prerequisites: Noncommissioned officers (AFSCs 2T351, 2T352A/B, 2T353, 2T451, and 2T452) or civilians of equivalent grade or skill. Completion of OJT and 7-skill level requirements. Completion of CDCs must be documented in orders. A minimum of 18 months on-the-job training as SSgt in special purpose vehicle, maintenance control and analysis of general purpose vehicle.

Quota Control: HQ AFPC/DPPAPEO.

L3ABR2T431 000—General Purpose Vehicle Maintenance Apprentice—PDS Code AD5—DOD 610—Port Hueneme/11 wk 2 days/AFSC 2T431/MASL D148027—Oct 96

Fundamentals of automotive mechanics. Vehicle maintenance inspection systems, policies, and procedures. Use of special tools and test equipment. Inspecting, servicing, troubleshooting, and repairing general purpose vehicles to include gasoline and diesel engines; emission control systems; lubrication and cooling systems; transmissions and power trains; front-end and steering systems; electrical system; brakes; and heating and air-conditioning systems. Use of Air Force and commercial publications; security and safety.

Prerequisites: ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L3AZR2T451 003—General Purpose Automatic Transmission Maintenance—PDS Code RMX—DOD 610—Port Hueneme/2

wk 2 days/MASL D148089—Oct 96

Inspection, repair, operational testing, troubleshooting, and final adjustment of general purpose vehicle torque converters and automatic transmissions made by major US manufacturers.

Prerequisites: AFSC 2T351, 2T352A, 2T452 or higher, or equivalent civilian experience in the skills and knowledge necessary to perform as a technician on general purpose vehicle torque converters and automatic transmissions. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L3AZR2T451 006—Steering Systems, Wheel Alignment, and Transaxle Suspension—PDS Code VHE—DOD 610—Port Hueneme/2 wk/MASL D148090—Dec 93

Inspecting, adjusting, and pressure testing steering system; removal; disassembly, inspection, reassembly, and replacement of transaxle suspension and performing four-wheel alignment.

Prerequisites: AFSC 2T351, 2T352A, 2T452 or higher equivalent civilian experience necessary to perform as repairmen on steering systems, front wheel drive suspension and drive axles, and four-wheel alignment on general purpose vehicles. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L3AZR2T451 007—General Purpose Vehicle Automotive Air-Conditioners O/I—PDS Code QHJ—DOD 610—Port Hueneme/1 wk/MASL D148177—Oct 96

Principles, inspection, troubleshooting and servicing of automotive air-conditioning systems with emphasis on the use of special testing and servicing equipment.

Prerequisites: AFSC 2T351, 2T352A, 2T354 or higher, or equivalent civilian experience in the skills and knowledge necessary to perform as a technician on general purpose vehicle automotive air-conditioning systems. ECL 70 SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L3AZR2T451 008—Diagnostic Test Equipment and Electrical Systems—PDS Code 7HY—Port Hueneme/4 wk/MASL D148071—DOD 610—Oct 96

Includes use of vehicle diagnostic test equipment to analyze general purpose vehicle starting, charging, ignition, fuel delivery, engine mechanical, computer, and supplemental restraint systems. Instruction also includes principles of automotive electrical and electronic systems.

Prerequisites: AFSCs 2T351, 2T352A/B, 2T451, or higher or equivalent civilian experience in the skills and knowledge necessary to perform as technicians on vehicle diagnostic test equipment and electrical systems. Graduates of courses C3AZR47252 001, Vehicle Diagnostic Test Equipment (PDS code FCP), or C3AZR47252 002, Automotive Electrical Systems (PDS code BFY), should not attend. ECL 70SA.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

L4AST2T451 008—Power Steering and Power Brakes Maintenance—PDS Code RMT—various locations/1 wk—Oct 96

Designed to teach inspecting, adjusting, and pressure testing of power steering and power brake systems. Training includes maintenance of hydraulic brake systems (drum and disk type), vacuum booster brake systems, and power steering system on general purpose vehciles equipped with power steering and power brakes. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, 2T451 or higher or equivalent civilian experience necessary to perform tasks on power steering and power brakes systems. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOP.

L4AST2T451 009—Vehicle Test Equipment—PDS Code ZPB—various locations/1 wk 3 days—Oct 96

Tains technicians on operation of various pieces of vehicle test equipment. Includes test starting, engine ignition, charging, and electrical systems on general purpose vehicles. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, 2T451 or higher or equivalent civilian experience necessary to perform tasks on power steering and power brakes systems. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOP.

L4AST2T451 011—Automotive Electrical System (JST/DL)—PDS Code VHM—various locations/1 wk—Oct 96

Distant learning course. Teaches principles of electricity as it applies to automotive electrical systems and test equipment, inspection and troubleshooting of automotive starting and charging systems. Safety emphasized in all areas.

Prerequisites: AFSC 2T351, 2T352A/B, 2T451 or higher or equivalent civilian experience necessary to perform tasks on power steering and power brakes systems. ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: HQ 2AF/DOP.

J3ABR2W031 003—Munitions/Armament Systems Specialist (SATP)—PDS Code ZBH—DOD 645—Sheppard/4 wk 3 days/MASL D142006—Oct 96

Receipt, identification, inspection, storage, reconditioning, issue, delivery, maintenance, assembly, and physical protection of conventional munitions. Maintenance management, handtools, and Air Force technical publications. Military explosives, pyrotechnics, cartridge and propellant actuated devices. Rockets, rocket launchers, and test equipment. Transportation, handling equipment, and explosive or missile safety. Principles of electricity, aircraft wiring schematics test equipment and troubleshooting. Aircraft bomb racks and missile launchers. Automatic aircraft gun operating principles, disassembly and maintenance procedures.

Prerequisites: ECL 70 SR. Students must be proficient in driving motorized four-wheeled vehicles. AFM 50-29 language qualification. General qualifications prescribed by MAAG. Ability to perform strenuous physical labor such as lifting.

Admin Instructions: Students are assigned to 363 MTF, Sheppard AFB TX. Student must process through International Military Training Office, building 843, room 1029.

Quota Control: 2 AF/DOP.

J3ABR2W031 004—Munitions Systems Apprentice—PDS Code 5NZ—Sheppard/9 wk/AFSC 2W031—Oct 96

Trains personnel in the tasks and knowledge required for positions in munitions materiel and production functions. Provides maintenance management concepts, operational and physical security of Air Force munitions, use of Air Force technical publications, use of hand tools and munitions-related support equipment. Transportation equipment, handling equipment, and explosive and missile safety. Introduction to the safety, security, storage, identification, handling, and transportation of nuclear weapons. Training involves receipt, identification, inspection, storage, issue, reconditioning, testing, assembly, maintenance, and delivery of unguided and guided conventional munitions. Training encompasses military demolition explosives, pyrotechnics, countermeasure devices, aircraft rockets, grenades, small arms ammunition, aircraft cannon ammunition, cartridge and propellant-actuated devices, and cluster bomb units. Provides introduction on the inspection, maintenance, and preparation for use of the munitions assembly conveyor, aircraft universal ammunition loader and replenisher systems. Training incorporates ground handling, inspection criteria, test equipment, assembly and disassembly, and maintenance and storage data of the air intercept missile (AIM) and air-to-ground Missile (AGM) systems. Includes munitions operations, stock control, customer support, property accounting, conventional and nuclear assets inventory management, Combat Ammunition System (CAS) munitions support, and contingency accounting..

Prerequisites: Graduates of the following courses cannot attend: G3ABR2W031A 000, G3ABR2W031B 000, G3ABR2W031 003, J3ABR2W031A 000, and J3ABR2W031B 000. Must be proficient in driving motorized, four-wheeled vehicles and have the ability to perform strenuous physical labor such as lifting. Must possess valid state driver's license.

Special Requirements: Safety-toed shoes. Losing unit must screen and identify personnel selected for training as PRP resource according to AFI 36-2104.

Quota Control: 2 AF/DOP.

J3AZR2W051 000/J4AST2W051 000—Munitions Inspection—PDS Code 29Z—Sheppard/3 wk/MASL D142068—Oct 96

Designed for munitions personnel upon first assignment as a munitions inspector. Includes product assurance, product quality deficiency reporting system, material deficiency reporting system, technical order improvement program, types of corrosion and corrosion control, storage and transportation, packaging requirements, research of munitions data, preparation of inspection forms, munitons inspector requirements, and serviceability requirements and CAS procedures as applicable. Also covers application of condition codes, identification of restricted or suspended munitions, munitions color coding, inspection of reusable containers and scrap materials, and perform and document munitions inspections.

Prerequisites: Air Force personnel in AFSC 2W051, 2W071, and DAF civilian equivalent. Ability to converse fluently in the English language is essential for international students. ECL 70 SA and 70 EL.

Special Requirements: All uniform combinations are authorized; work utility uniform is required.

Quota Control: 2 AF/DOP.

J3AZR2W051 003—CAS-B 3B2 System Administrator Training—PDS Code P2M—Sheppard/3 wk—Oct 96

Provides system security officer, system administrator, and mainframe system operator knowledge and skills needed to operate the ATT&T 3B2G computer. Includes CAS-B 3B2 on site administration and maintenance of the computer and related peripheral units, system administrator and security officer responsibilities, screen VI editor and system operaitons, establishing files and directories, networking basics, communication utilities, system diagnostics and recovery, monitoring system performance, database fundamentals, trusted official application programs, backups and restores procedures.

Prerequisites: Air Force personnel in AFSC 2W031 with 2 years apprentice training in the career field having already successfully completed the CDC (2W051) course, 2W071, 2W151, 2W171, 2W251, 2W271, 2M051, 2M071, officer (2d Lt through captain), and DAF civilian equivalent selected to perform CAS-B 3B2 trusted official duties. Attendees should be based at or en route to sites with an active 3B2 system or within 45-60 days of delivery of a 3B2 system. Recommend a background in computer operations. Must possess basic keyboard knowledge and skills.

Quota Control: 2 AF/DOP.

J3ACR2W071 000—Munitions Systems Craftsman—PDS Code XWV—Sheppard/3 wk/AFSC 2W071—Oct 96

Trains future munitions craftsmen in a variety of subjects. Major areas of training include solid and hazardous waste management requirements, major inspections, acquisition of vehicles, manning requirements, facilities, peacetime automated accounting, contingency automated accounting, publications, use of Fedlog, serviceability of conventional munitions, serviceability of equipment, serviceability of missiles, transportation storage area management, and security. Completion of this course will award a 7-skill level.

Prerequisites: AFSC 2W051, SSgt who has completed a minimum of 18 months of on-the-job training and meets the experience and educational requirements contained in the Career Field Education and Training Plan (CFETP).

Quota Control: HQ AFPC/DPPAPEO.

J3ABR2W131C 002—Aircraft Armament Systems Apprentice (A-10)—PDS Code F8S—DOD 646—Sheppard/12 wk 4 days/AFSC 2W131C—Oct 96

A-10 aircraft oriented armament systems training. Use of publications, tools, test equipment. Fundamentals of electricity, solid-state electronics, soldering, and applicable safety precautions. Servicing, inspection, installation, removal, replacement, troubleshooting, maintenance of the weapons launching system and associated components, and automatic gun systems. Loading, positioning, safetying, and unloading of conventional bombs, missiles, and ammunition. Inspection and operation of aerospace ground support equipment.

Special Requirements: Reliability screening according to AFI 36-2104 (formerly AFR 35-99). Secret clearance according to AFMAN 36-2108 (formerly AFR 39-1) and AFI 31-501 (formerly AFR 205-32). Safety shoes required.

Quota Control: 2 AF/DOP.

J3ABR2W131E 003—Aircraft Armament Systems Apprentice, F-15 Mission Ready Technician (MRT)—PDS Code 279—DOD 646—Sheppard/15 wk 3 days/AFSC 2W131E—Oct 96

F-15 aircraft oriented armament systems training. Use of publications, tools, test equipment. Fundamentals of electricity, solid-state electronics, soldering, and applicable safety precautions. Servicing, inspection, installation, removal, replacement, troubleshooting, and maintenance of conventional and nuclear weapons launching systems, automatic gun systems, and associated components. Loading, positioning, safetying, and unloading of conventional bombs, nuclear weapons, missiles, and ammunition. Inspection and operation of aerospace ground support equipment.

Special Requirements: Reliability screening according to AFI 36-2104 (formerly AFR 35-99). Secret security clearance according to AFMAN 36-2108 (formerly AFR 39-1) and AFI 31-501 (formerly AFR 205-32). Safety shoes required.

Quota Control: 2 AF/DOP.

J3ABR2W131F 004—Aircraft Armament Systems Apprentice (F-16) Mission Ready Technician (MRT)—PDS Code 278—DOD 646—Sheppard/14 wk 3 days/AFSC 2W131F—Oct 96

F-16 aircraft oriented armament systems training. Use of publications, tools, test equipment. Fundamentals of electricity, solid-state electronics, soldering, and applicable safety precautions. Servicing, inspection, installation, removal, replacement, troubleshooting, and maintenance of conventional and nuclear weapons launching systems and associated components. Loading, positioning, safetying, and unloading of conventional bombs, nuclear weapons and missiles. Inspection and operation of aerospace ground support equipment.

Special Requirements: Reliability screening according to AFI 36-2104. Secret clearance according to AFMAN 36-2108 and AFI 31-501. Safety shoes required.

Quota Control: 2 AF/DOP.

J3ABR2W131F 003—Aircraft Armament System Apprentice (SATP) (F-16)—PDS Code LUZ—Sheppard/11 wk 4 days/AFSC 2W131F/MASL D142069—Oct 96

This course is for international students only. Specialized aircraft oriented armament system training. Use of publications, tools, test equipment. Fundamentals of electricity, solid-state electronics, soldering, and applicable safety precautions. Servicing, inspection, installation, removal, replacement, troubleshooting, and maintenance of conventional launching systems and associated components and automatic gun systems. Loading, positioning, safetying, and unloading of conventional bombs, missiles, and ammunition. Inspection and operation of aerospace ground support equipment.

Prerequisites: ECL 70 SR.

Special Requirements: Safety shoes required.

Quota Control: 2 AF/DOP.

J3ABR2W131K 003—Aircraft Armament Systems Apprentice (B-52H) Mission Ready Technician (MRT) —PDS Code FDY—DOD 646—Sheppard/13 wk 3 days/AFSC 2W131K—Oct 96

B-52 aircraft oriented armament systems training. Use of publications, tools, test equipment. Fundamentals of electricity, solid-state electronics, soldering, and applicable safety precautions. Servicing, inspection, installation, removal, replacement, troubleshooting, and maintenance of conventional and nuclear weapons launching systems, and associated components. Loading, positioning, safetying, and unloading of conventional bombs, nuclear weapons, and missiles. Inspection and operation of aerospace ground support equipment.

Special Requirements: Reliability screening according to AFI 36-2104 (formerly AFR 35-99). Secret clearance according to AFMAN 36-2108 (formerly AFR 39-1) and AFI 31-501 (formerly AFR 205-32). Safety shoes required.

Quota Control: 2 AF/DOP.

J3ABR2W131L 002—Aircraft Armament Systems Apprentice, B-1B—PDS Code W78—DOD 646—Sheppard/11 wk 4 days/AFSC 2W131L—Oct 96

B-1B aircraft oriented armament systems training. Use of publications, tools, test equipment. Fundamentals of electricity, solid-state electronics, soldering, and applicable safety precautions. Servicing, inspection, installation, removal, replacement, troubleshooting, and maintenance of conventional and nuclear weapons launching systems and associated components. Loading, positioning, safetying, and unloading of conventional bombs, nuclear weapons, and missiles. Inspection and operation of aerospace ground support equipment.

Special Requirements: Reliability screening according to AFI 36-2104 (formerly AFR 35-99). Secret clearance according to AFMAN 36-2108 (formerly AFR 39-1) and AFI 31-501 (formerly AFR 205-32). Safety shoes required.

Quota Control: 2 AF/DOP.

J3ABR2W131Z 003—Aircraft Armament Systems Apprentice (Special Mission) Mission Ready Technician (MRT)—PDS Code 3SM—DOD 646—Sheppard/9 wk 2 days/AFSC 2W131Z/MASL D142O64—Oct 96

Specialized aircraft oriented armament systems training. Use of publications, tools, test equipment. Fundamentals of electricity, solid-state electronics, soldering, and applicable safety precautions. Servicing, inspection, installation, removal, replacement, troubleshooting, and maintenance of conventional weapons release systems, automatic gun systems, and associated components. Loading, positioning, safetying, and unloading of ammunition. Inspection and operation of aerospace ground support equipment.

Special Requirements: Reliability screening according to AFI 36-2104 (formerly AFR 35-99). Secret clearance according to AFMAN 36-2108 (formerly AFR 39-1) and AFI 31-501 (formerly AFR 205-32). Safety shoes required.

Quota Control: 2 AF/DOP.

J3ACR2W171 000—Aircraft Armament System Craftsman—PDS Code WTS—Sheppard/2 wk—Oct 96

Provides advanced system knowledge and hands-on training for 2W171 armament systems personnel in upgrade training to the 7-skill level. Includes advanced weapon system technologies, discussion and practicable application for aircraft and general purpose testers; electrical safety; hazardous materials handling and awareness; troubleshooting; aircraft fault isolation; technical orders; wire, cable, and cannon plug repair; protective measures and CAMS products. Equipment hazards and personnel safety will be integrated with each course subject.

Prerequisites: Complete all Career Field Education and Training Plan (CFETP) skill level training requirements identified for 7-skill level craftsman upgrade training. As a minimum, students must complete the armament system technician (7-skill level) career development course (CDC 2W171, 1 volume), computer-based Armament System Weapons Expediter course (#00CCB8053V1.0), all 7-skill level core tasks (flightline and backshop), and have 18 months of time in grade

as a SSgt.

Special Requirements: Comply with AFCAT 36-2223 procedures.

Reporting Instructions: Students report on the first day of class to bldg 1060, room F217, Sheppard AFB TX, at 0700. Duty uniforms are battle dress uniforms for normal duty hours (organizational hats are not authorized) and the service dress uniform for graduation. For additional information, call DSN 736-4713/3279.

Quota Control: HQ 2 AF/DOP.

J3ABR2W231 002—Nuclear Weapons Apprentice—PDS Code 5MJ—Sheppard/11 wk 2 days/AFSC 2W231—Oct 95

Training on inspection, assembly, maintenance, repair, and modification of nuclear weapons, warheads, related components, and test equipment. Trains in the necessary nuclear safety principles and procedures, use of Air Force technical publications, and use of special tools and test equipment. Also trains on maintenance forms, systems, and documentation as applicable to nuclear weapons, warheads, related components, and test and handling equipment.

Special Requirements: Secret clearance by class start date. Reliability screening according to AFI 36-2104 (formerly AFR 35-99).

Quota Control: 2 AF/DOP.

J2ASR2W251 000—Nuclear Weapons Refresher Course—PDS Code XXB—Sheppard/1 wk 4 days—Oct 96

Trains personnel with AFSC 2W2X1 in a variety of subjects to include B61 description, B61 external maintenance, B61 internal maintenance, and B61 handling procedures.

Prerequisites: Personnel with AFSC 2W2X1 who have received PCS orders to USAFE and meet the experience requirements contained in the Career Field Education and Training Plan (CFETP).

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

J3ACR2W271 000—Nuclear Weapons Craftsman—PDS Code XWU—Sheppard/2 wk 3 days/AFSC 2W271—Oct 95

Trains nuclear weapons craftsmen in a variety of subjects. This is the 7-skill level awarding course. Major areas of training include nuclear theory, nuclear weapons community, explosive safety, radiation safety, nuclear surety information, security, permissive action link, weapons handling and transportation, maintenance management, inspection systems, general maintenance, and supervisory techniques.

Prerequisites: AFSC 2W251, SSgt, who has completed a minimum of 18 months of on-the-job training and meets the experience requirements contained in the Career Field Education and Training Plan (CFETP).

Special Requirements: Secret clearance with CNWDI access authorized.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR3A031 002—Information Management Apprentice—PDS Code 7ES—DOD 510—Keesler/4 wk 3 days/AFSC 3A031/MASL D161005—Oct 96

General administrative support and office management. Includes keyboarding, microcomputer operations, document and computer security, quality Air Force awareness, publications maintenance, customer account representative procedures, correspondence management, Air Force messages, records management, mail handling, and electronic forms preparation. The instructional design is computer-based instructions (CBI) and group paced lecture.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

E3ACR3A071 001—Information Management Craftsman—PDS Code 3AI—DOD 510—Keesler/2 wk—Oct 96

Introdution to business planning, life-cycle management, electronic information transfer, electronic recordskeeping, emerging technologies, information warfare, functional managment responsibilities, wartime/contingency operations, and networking.

Prerequisites: SSgt or above who has completed a minimum of 18 months of on-the-job training (12 months for crosstraining) and the 7-level career development course.

Quota Control: HQ AFPC/DPPAPEO.

J3AZR3A652 001—Tactical Quiet Power Plant (TQPP) O&I Maintenance—PDS Code XN9—DOD 602—Sheppard/2 wk 1 day—Jan 96

Inspection, operation, and maintenance of the AN/MJQ1612 power plant. The use of test equipment for testing of the generator and the engine control systems to include voltage regulation, electronic governor, electronic governor adjustments, battery charging system, fault sensing, paralleling circuits, and load banking the generator in the single and parallel mode. Training on the trailer includes air, hydraulic, and emergency braking system.

Prerequisites: AFSC 2A652, 2A672, E052/72. ECL 70.

Special Requirements: Protective footwear (safety-toed shoes).

Quota Control: 2 AF/DOP.

E3ABR3C031 003—Apprentice Communications-Computer Systems Operations—PDS Code 788—Keesler/13 wk/3C031—Oct 96

Provides students with a solid foundation in microcomputer principles, to include basic operation and processing to configuration, maintenance, and repair. Also included is knowledge of specific hardware and software configuration, use of application software, communications-computer systems security, network principles and management, equipment control and management, multiuser systems concepts and operation, and Telecommunications Center (TCC) and mobile communications operations.

Prerequisites: ECL 70.

Special Requirements: Students must arrive with a full compliment of uniforms.

Quota Control: 2 AF/DOP.

E3ABR3C032 000/E3AZR3C032 001—Apprentice Communications-Computer Systems Programming Specialist—PDS Code 7P4—DOD 532—Keesler/10 wk 1 day/AFSC 3C032/MASL D156016—Oct 96

Introduction to software technology, hardware concepts, software concepts, software engineering goals and principles, software life cycle, problem solving and algorithm design. Ada programming fundamentals, data types, packages, subprograms, control statements, exception mechanisms, generic program units, and generic Ada application. Computer concepts, internal data representation, computer architecture, and communications fundamentals are also

covered. Low level programming concepts, microprocessor family architecture, operating system functions, assembly language characteristics, basic assembly language programming, reusable software, low level assembly language programming, and Ada low level programming. Software maintenance concepts and entry level COBOL. Data base management systems, systems overview, development, usage, and maintenance.

Prerequisites: Students must have a minimum score of 71 on the USAF Electronic Data Processing Test (EDPT). International students must achieve ECL score of 80 and have completed 1 week of computer-aided instruction (CAI) to include courses E6AZU3C031 004, Terminal User Course; E6AZU3C032 000, Introduction to Data Processing.

Special Requirements: Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. Battle dress uniforms will be worn on designated days.

Quota Control: 2 AF/DOP.

E3AZP3C051 001—AN/TYC-39A Automatic Message Switch Operator (260-F1)—PDS Code 3KS—Ft Gordon/4 wk 4 days—Apr 95

Provides training for Air Force personnel in the knowledge and skills needed to install, operate, and perform system analysis on the tactical automatic message switch central AN/TYC-39A. Includes equipment characteristics and COMSEC subsystems and operating traffic service positions on-line and off-line job functions.

Prerequisites: AFSC 3C051 or higher.

Special Requirements: Confidential access and must be a US citizen. The statement “US citizen” is required on student's orders.

Reporting Instructions: Refer to AFCAT 36-2223, chapter 3, section C.

Quota Control: 2 AF/DOP.

E3AZP3C051 002—AN/TTC-39A(V)4 Operator—PDS Code T30—Ft Gordon/5 wk—Apr 95

Provides training on the operation of the AN/TTC-39A, Tactical Automatic Central Office Telephone Switch, to include automatic data processor startup procedures, data base input procedures, initialization of COMSEC equipment, installation of remote call service position (RCSP) and operation of call service position (CSP), and performance of operator fault identification and isolation.

Prerequisites: AFSC 3C051 or higher.

Special Requirements: Confidential access and must be a US citizen. The statement “US citizen” is required on student's orders.

Reporting Instructions: Refer to AFCAT 36-2223, chapter 3, section C.

Quota Control: 2 AF/DOP.

E3AZR3C051 002—COMSEC Account Management—PDS Code R4C—DOD 580—Keesler/3 wk—Oct 95

Trains personnel in all aspects of COMSEC account management. Instruction includes security practices; COMSEC policies, self-inspections; identifying and reporting insecurities; use of COMSEC publications; preparation of user training guidelines and emergency plans; STU-III procedures; receipt, transfer, destruction, inventory, and storage of COMSEC material; and preparation of reports, records, and correspondence.

Prerequisites: Must be assigned or projected for duties as a COMSEC manager, alternate COMSEC manager, or COMSEC accountant. Must meet the Air Force specialty code (AFSC) and grade requirements of AFKAG-1. Those not meeting the AFSC, skill code, or grade requirements must send a copy of their MAJCOM-approved waiver before entry. DoD contractors must have approval from HQ AFC4A/SYSC to attend the course. Info approval to 333 TRS/TTOT.

Special Requirements: TDY orders must indicate US citizen and at least a Secret clearance by class start date. Forward security clearance information to 333 TRS/TTCSS, 600 First St, Ste 204, Keesler AFB MS 39534-2494, at least 7 days prior to class start date. Clearance information must include name, grade, SSN, date of birth, clearance, and citizenship.

Quota Control: 2 AF/DOP.

E3AZR3C051 003—Automatic Data Processing Equipment (ADPE) Inventory and Management System—PDS Code 00H—Keesler/2 wk/AFSC 3C351—Oct 95

Training for personnel involved with automated data processing equipment (ADPE) management. Introduction to management of ADPE, to include documentation and ECO contract monitoring responsibilities. Inventory subsystems, equipment ordering, maintenance reliability, inventory records, and inventory listings. Familiarization of DDN/IPMS log-on procedures and MAPPER/Tote Tutorials. Hands-on instruction accessing and updating the ADPE inventory through computer terminals.

Quota Control: 2 AF/DOP.

E3AZR3C051 008—AN SB-3865 Installer Maintainer (ULCS)—PDS Code EGA—Keesler/3 wk—Jan 96

Provides installer maintainer training for the SB-3865 Switchboard. Includes the installation, initialization, shutdown, operation, data-base management, system interfacing, systems networking, fault isolation, COMSEC operation, and operator maintenance of the SB-3865.

Prerequisites: Completion of applicable 5-skill level career development courses (CDC) or equivalent.

Special Requirements: Confidential clearance or higher required by class start date.

Quota Control: 2 AF/DOP.

E3AZR3C051 011—NEWSDEALER Operator—PDS Code 6BB—Keesler/2 wk 2 days—Oct 96

Provides training on the concepts, configuration, and operation of the NEWSDEALER system, its subsystems, and network. Training includes system management duties and responsibilities, the UNIX File System structure, UNIX commands, main switch menus, subordinate menus, and system management menus.

Prerequisites: AFSC 3C051, 3C071, or the civilian or other military service equivalent and knowledge of the Defense Special Security Communications System (DSSCS) format.

Special Requirements: Top Secret /SCI certification must be sent to SSO Keesler at least 10 days before class start date. This requirement cannot be waived.

Quota Control: 2 AF/DOPR.

E3AZR3C051 012—ULCS Operator Maintainer—PDS Code SCM—Keesler/6 wk—Jan 96

Provides operator maintainer training for the AN/TTC-42 Electronic Switch and SB-3865 Switchboard. Includes the installation, initialization, shutdown, operation, data base management, system interfacing, system networking, fault analysis, COMSEC operation, and operator maintenance of unit level circuit switch equipment.

Prerequisites: Completion of applicable 5-skill level career development courses (CDC) or equivalent.

Special Requirements: Confidential clearance or higher required by class start date.

Quota Control: 2 AF/DOP.

E3AZR3C051 014—AMC C2 IPS System Administrator—PDS Code WJA—Keesler/4 wk—Apr 95

Provides training for personnel assigned as a system administrator for the Air Mobility Command (AMC) Command and Control Information Processing System (C2IPS). Includes the purpose and concept of the system, hardware components, operating system software, applications software, system administration, data base administration, network administration, security administration, and system maintenance.

Quota Control: 2 AF/DOP.

E3AZR3C051 016—UNISYS DMC System Management—PDS Code XLU—Keesler/6 wk—Apr 95

Provides training in AFSCs 3C051 and 3C052 or equivalent in the skills and knowledge needed to perform the duties of a system monitor or data base manager within the UNISYS standard base level or defense megacenter environment. Includes an indepth coverage of system software, ECL, IPF, network administration, TPA, DBA, security, scheduler, and performance management.

Prerequisites: AFSC 3C051, 3C052, or equivalent.

Quota Control: 2 AF/DOP.

E3AZR3C051 017—System Network Support—PDS Code XW8—Keesler/7wk—Oct 96

Provides the necessary knowledge for individuals to work in the base network control centers (BNCC) as system technicians. Topics include networking principles, network management, protocols, routing, LAN and WAN technologies, LAN and WAN troubleshooting, Hewlett Packard Openview network node manager, modem management systems, and telecom. Course is network knowledge intensive and more than 75 percent is hardware and software troubleshooting of active networks to include Ethernet and standard base level computer (SBLC) environments. The network environment hardware consists of routers, hubs, bridges, workstations, distributive communication processors, modems, DSUs, PC terminals, and distributive printers. The network environment hardware consists of routers, hubs, bridges, workstations, modems, DSUs, PC terminals, and network printers.

Prerequisites: AFSCs of 3C051 and 3C251 or higher skill level or equivalents. Skill level is waiverable through HQ USAF/SCBX. Students must have completed the UNIX CBTs. CBTs can be accessed by telephone, DSN 597-1919, or send Email to mjeffrey@sns.kee.aetc.af.mil to obtain downloading instructions.

Special Requirements: Nonconductive glasses. Classroom uniform is battle dress uniforms. Light blue shirt or blouse with short or long sleeves and dark blue pants or skirt will be worn on designated days.

Quota Control: 2 AF/DOP.

E3ACR3C071 000—Communications-Computer Systems Control Craftsman—PDS Code XHQ—Keesler/4 wk—Oct 96

Provides training for personnel in AFSC 3C251 in the knowledge and skills needed to perform the duties of communications computer systems control craftsman. Includes work center management, Air Force networks, network architectures and interface techniques, network control, and network management and administration.

Quota Control: HQ AFPC/DPPAPEO.

E3ACR3C071 001—Advanced Communications-Computer Systems Operations Craftsman—PDS Code XM2—Keesler/2 wk—Oct 96

Provides training for communications-computer systems operations personnel in office automation software, career field progression, C4 mission and organization, C4I security issues, workcenter and equipment management, network system administration, network management, various message systems to include the Defense Message System, and special purpose application software. Training will greatly rely on guided discussion to facilitate maximum student interaction. The purpose is to assist technicians to make the transition to craftsmen, prepare them to better understand their function and role in the organization, and prepare them for supervisory positions in the career field.

Prerequisites: Minimum rank of Ssgt, successful completion of 3C071 CDC end of course examination, and a minimum of 18 months of on-the-job training on 7-level tasks.

Special requirements: Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. Battle dress uniforms will be work on designated days.

Quota Control: HQ AFPC/DPPAPEO.

E3ACR3C072 001—Advanced Communications-Computer Systems Programming Craftsman—PDS Code XNY—Keesler/3 wk—Oct 96

Second-term and career NCOs bear much of the responsibility for the learning experience in this course. The course focuses on software engineering and the software life cycle. Students discuss risk management, software maturity assessment, reuse, and independent validation and verification (IV&V). Teams discuss pros and cons of various operating systems to determine suitability for different applications. Students work together to develop an object-oriented design and are individually responsible to present and defend their team's design before the class in an oral presentation. Students convert algebraic formulas into pseudo code to simulate the algebraic design process. They then design the appropriate data structures needed for implementation of the algebraic design. Teams develop a configuration management plan and explain its application throughout the software life cycle. Teams define standards and policy for the collection and analysis of software quality metrics for a software development project scenario. They define characteristics and benefits of an open systems architecture. Students design a relational database. They perform a requirements' analysis and determine whether it is feasible (cost effective) to automate. Students determine whether user requirements are met in delivered software. Students simulate the process of acquiring software. Teams apply software security practices to a problem scenario to identify potential vulnerabilities and effective countermeasures. Representative automated tools permeate the course as much as possible. Students research and present a briefing on new software and hardware technologies.

Prerequisites: Minimum rank of Ssgt, successful completion of 3C072 CDC end of course examination, and a minimum of 18 months of on-the-job training on 7-level tasks.

Special Requirements: Classroom uniform is light blue short or blouse wtih short or long sleeves and dark blue pants or skirt. Battle dress uniforms will be worn on designated days.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR3C131 002—Radio Communications Systems Apprentice—PDS Code WRF—DOD 201—Keesler/6 wk 1 day/AFSC 3C131—Oct 96

Training includes keyboarding, radio wave concept, characteristics of wave travel and propagation, application of radio emissions, introduction into computer technology, communications agencies, systems, security, HF/VHF/UHF and EHF systems and their capabilities, air-ground-air and point-to-point communications by voice, record, and log-keeping, inspection, minor maintenance, tuning and operation of ground transceivers, and familiarization with transceiver principles and antenna systems.

Special Requirements: Secret clearance by class start date. Course teaches FOUO material not releasable to international students. International students are not permitted to this course.

Quota Control: 2 AF/DOP.

E3ALR3C132 001—Joint Spectrum Management—PDS Code L98—DOD 201—Keesler/11 wk 4 days/AFSC 3C132/MASL D133033—Jan 96

Provides spectrum management education for DoD technicians, engineers, managers, and other individuals who require entry level training on national, interntaional, and DoD spectrum management publications and procedures. The curriculum provides maximum exposure to techniques common to all DoD spectrum personnel. Emphasis is placed on those national and international publications and standards that have particular impact on the global mission of US military forces. Also covers various communications systems concepts with emphasis on operational employment.

Prerequisites: SSgt through CMSgt with AFSC 3C2XX or 2EXXX. Completion of high school with courses in algebra is desirable.

Special Requirements: Secret/NAC clearance by class start date.

Quota Control: 2 AF/DOP.

E3AZR3C151 004—MILSTAR Command Post Terminal Operator—PDS Code R54—Keesler/4 wk—Oct 96

Trains personnel in AFSCs 1A3X1 or 3C1X1 (including Army and Navy equivalents) in the knowledge and skills required to operate a command post MILSTAR terminal. The scope of training includes system theory, EHF/UHF command post functional theory, and EHF/UHF command post terminal operation.

Prerequisites: US citizen. Secret or Top Secret clearance. Completion of AFSC 1A351 or 3C151 career development course.

Special Requirements: “US Citizen” must be stamped on student orders.

Quota Control: 2 AF/DOP.

E3ACR3C171 000—Radio Communications Systems Craftsman—PDS Code XA3—Keesler/2 wk—Oct 96

Covers job opportunities within the 3C1X1 career field and the mission of different work centers, high-powered and low-powered HF systems capabilities and parameters, satellite systems capabilities and parameters, radio/computer interface, and mission planning for radio communications systems.

Prerequisites: SSgt or SSgt selectee with AFSC 3C151.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR3C231 001—Communications-Computer Systems Control Apprentice—PDS Code 96M—DOD 101—Keesler/16 wk/AFSC 3C231/MASL D132024—Oct 96

Prepares communications-computer system controllers for award of their 3-skill level. Provides an understanding of basic electronic principles, microwave, tropospheric scatter, fiber optic, copy based, HF, and satellite communication facilities. The integration of computer technology across transmission medium via modems, multiplexers, and routing devices, the Defense Communication System components and its hierarchy, local and wide area networking installation, troubleshooting and management, internet and open systems protocols suites used to perform internetworking traditional telephone signaling techniques and program automated circuit switching frames, analog and digital circuit testing and system and network troubleshooting with the most advanced test equipment available.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

V3AZP3C251 000—CSSR Tech Control Operator/Maintenance—PDS Code 8CQ—Falcon/4 wk—Oct 96

Trains Air Force personnel in AFSC 3C251 and 3C251 in the knowledge and skills needed to peform CSSR tech control operations and CSSR computer maintenance. Scope of training includes CSSR tech control, message processing and distribution system overview, CSSR tech control operation functions, operations of CSSR test equipment, and the operational theory, fult isolation, and repair of CSSR system equipment.

Prerequisites: Completion of applicable CSCs 3C231 or 3C251.

Special Requirements: Secret clearance.

Quota Control: HQ 2AF/DOP.

E3AZR3C251 004—SEAMARK Operator—PDS Code 9DA—Keesler/3 wk 4 days—Oct 96

Provides training on the concepts, configuration, and operation of the SEAMARK system and subsystems. Includes the UNIX File System Structure and commands, technical control user functions, privileged user functions, maintenance user functions, system management functions, Generalized Interactive Reporting System (GIRS) and Local Decision Support System (LDSS).

Prerequisites: AFSC 3C251, 3C271, or the civilian or other military service equivalent.

Special Requirements: Top Secret /SCI certification must be sent to SSO Keesler AFB at least 10 days before class start date. This requirement cannot be waived.

Quota Control: 2 AF/DOP.

E3AZR3C251 006—Integrated Digital Network Exchange (IDNX) Operations—PDS Code W64—Keesler/1 wk 2 days—Jan 96

Provides training for personnel in AFSC 3C251 or DoD equivalent in the knowledge and skills needed to perform duties of operator

personnel on the IDNX system. Includes the concepts, configuration, and operation of the IDNX system. Includes network theory, transmission medium familiarization, operational characteristics of the IDNX 20/90, SPX-50, DCB-24 Channel Bank, Tellabs 2531 Echo Canceller, system operation, management, and troubleshooting.

Prerequisites: AFSC 3C251, 3C271, or the civilian or other military service equivalent.

Quota Control: 2 AF/DOP.

E4AST3C251 002—AN/TSQ-111 Communications Nodal Control Element (CNCE)—PDS Code WY3—Keesler/3 wk—Dec 93

Provides training to communications-computer system controller personnel on the operation of the AN/TSQ-111, CNCE. Includes power up and initialization of the AN/TSQ-111; operation of the data processing subsystem to include the software, data base generation (DBG), user application software (UAPS), and field maintenance diagnostics (FMS); cross-connections and patches necessary to run the shelter in varying configurations of analog, digital, analog-digital circuits, channels, or groups; and oepration of test equipment for troubleshooting faults to isolate inter-and intra-nodal malfunctions.

Prerequisites: AFSC 3C251 or higher skill level (Army, Navy, Marine, and civilian equivalents). Working knowledge of analog and digital communication techniques to include modulation, multiplex, and circuit conditioning.

Quota Control: 2 AF/DOP.

E3ACR3C371 000—Advanced Communications-Computer Systems Planning and Implementation Management Specialist—PDS Code XM3—Keesler/2 wk/AFSC 3C371—Oct 96

Training for personnel in command, control, communications, and computer (C4) systems; DoD and Air Force planning and program/project management doctrine; career field progression and evolution; C4 missions and relationships; and systems technology and architecture. Emphasis will be placed on taking a proactive approach to C4 systems planning, requirements development, project implementation, and resource management. Students will be trained in the increasing role as mobility planners and the concepts behind Comm Squadron 2000 Initiative. Course is open to DoD civilian personnel in the grades of GS-5 through GS-14 (or equivalent).

Prerequisites: Minimum rank of Ssgt, and a minimum of 18 months of on-the-job training on 7-level tasks.

Special Requirements: Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. Battle dress uniforms will be worn on designated days.

Quota Control: HQ AFPC/DPPAPEO.

J3ABR3E031 002—Electrical Systems Apprentice (Air Force)—PDS Code SAV—DOD 721—Sheppard/13 wk 4 days/AFSC 3E031/MASL D148006—Oct 96

Trains Air Force personnel in pole climbing; electrical fundamentals; mathematical fundamentals, national electric code; blueprint reading; electrical grounding theory and application; substation maintenance; construction and maintenance of overhead and underground distribution systems; installation and maintenance of interior electrical systems including special purpose systems, transformers, electrical services, distribution panels, protective devices, conduit and branch circuits, motors and motor controls; installation and maintenance of airfield lighting and lighting systems; and contingency responsibilities.

Prerequisites: ECL 70. Freedom from fear of heights.

Special Requirements: Safety-toed boots. Prospective students must be pretested before arrival at Sheppard AFB to determine physical capability to climb and work on poles. Physical or psychological limitations which impede ability to climb and work on poles at considerable heights disqualifies the individual.

Quota Control: 2 AF/DOP.

J3ABR3E031 003—Electrical Systems Apprentice (Army)—PDS Code WGF—Sheppard/7 wk 2 days—Oct 96

This course is piggy-backed with the first 37 days of J3ABR3E031 002, Electrical Systems Apprentice (Air Force). Provides training for Army personnel in pole climbing; electrical fundamentals; mathematical fundamentals, national electric code; blueprint reading; electrical grounding theory and application; substation maintenance construction and maintenance of overhead and underground distribution systems.

Prerequisites: Freedom from fear of heights. ECL 70.

Special Requirements: Safety-toed boots. Students must be pretested before arrival at Sheppard AFB to determine physical capability to climb and work on poles. Physical or psychological limitations which impede ability to climb and work on poles at considerable heights disqualifies the individual.

Quota Control: 2 AF/DOP.

J3ABR3E032 004—Apprentice Electrical Power Production Specialist—PDS Code W7V—DOD 662—Sheppard/8 wk 3 days/MASL D148025—Oct 96

Use of Air Force publications. Safety, handtools, engine performance test devices and electrical test equipment. Fundamentals of gasoline and diesel engines, hydraulic, and heat transfer principles. Basic electricity and electronic applications. Power generating system maintenance to include engine and control system components, electric generators, electrical switchgear components, and power plant auxiliary equipment. Use of wiring diagrams to troubleshoot and locate defective components. Single and parallel unit operation of prime power plants and standby emergency generators. Operation and maintenance of aircraft arresting barriers.

Prerequisites: Members attending the J3ABR3E032 004 course must bring a copy of their completed AF 55, **Employee Safety and Health Record,** which shows when the initial federal hazardous communication training program was completed. Members who do not possess either a copy or the original AF 55 will be required to go through initial hazardous communication training before graduation. ECL 70.

Special Requirements: Electrical hazard safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AZR3E051 003—Cathodic Protection Maintenance—PDS Code 2TE—DOD 721—Sheppard/2 wk/MASL D148138—Apr 95

Theory and methods used to protect structures from corrosion; types and forms of corrosion; purpose and use of field test equipment. Practical experience in the operation, inspection, and adjustment of galvanic and impressed current system components, repair of protective coatings, underground cable splicing, and interpreting drawings.

Prerequisites: AFSCs 3E051/71 or civilian equivalent. Graduates of

course J3AZR54250 003 should not attend this course. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR3E051 006—JSIIDS Installation and Maintenance—PDS Code 8ZL—Sheppard/2 wk—Apr 95

Provides knowledge of installation procedures and operating principles of equipment and troubleshooting techniques and procedures; electrically connects and tests equipment typical of capacitive, mechanical, and ultrasonic interior intrusion detection systems; determines causes of system malfunctions.

Prerequisites: AFSC 3E051, 3E071, or civilian equivalent. Graduates of courses J3AZR54250 001, J3AZR54553 000, and J3AZR54250 006 should not attend this course.

Quota Control: 2 AF/DOP.

J3AZR3E051 007—Airfield Approach Lighting, Condenser Discharge—PDS Code C89—DOD 721—Sheppard/1 wk 3 days/MASL D148137—Apr 95

Theory and methods used to establish and maintain airfield approach lighting systems, identification and location of lighting system components and test equipment. Practical experience in the operation, inspection, troubleshooting, and maintenance of system components and equipment.

Prerequisites: AFSC 3E051, 3E071, or civilian equivalent. Military personnel must be on their second enlistment. Personnel in retraining must also be on their second enlistment, with a minimum of 6 months of experience after being awarded their 5 level. Waivers may be granted to first-term personnel, only if the base civil engineer and electrical superintendent determine that training is required due to individual's primary duties. Duties must involve the maintenance and operation of the condenser discharge system. Personnel who do not meet the standard criteria or arrive at Sheppard without the appropriate waiver will be returned to their unit. Graduates of courses J2ASR54251-9, J3AZR54251 000, and J3AZR54250 007 should not attend this course. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AZR3E051 008—Electric Distribution System Maintenance—PDS Code EJ8—DOD 721—Sheppard/4 wk/MASL D148111—Apr 95

Provides training on the theory and maintenance of energized overhead electrical distribution systems and connected equipment to include: types of systems; system components; purpose, types, use and testing of high voltage electrical maintenance equipment to include rubber protective equipment and hotline tools. Works energized overhead distribution systems with voltages from 2,400 to 12,470 from wooden poles and isolated structure. Safety will be discussed while performing energized and de-energized system maintenance and troubleshooting on selected pieces of distribution and substation equipment.

Prerequisites: AFSC 3E051, 3E071, or civilian equivalent. Upon arrival for training, the students must be able to climb wooden poles, using gaffs, to a height of 40 feet and work safely from that height. Military personnel must be on their second enlistment. Personnel in retraining must be on their second enlistment, with a minimum of 6 months of experience after being awarded their 5-level AFSC. Graduates of courses J2ASR54251-10, J3AZR54251 001, and J3AZR54250 008 should not attend this course. International students should possess a working knowledge of overhead systems and ECL 70.

Special Requirements: A current CPR card upon arrival for training.

Quota Control: 2 AF/DOP.

J3AZR3E051 009—High Voltage Cable Testing and Splicing—PDS Code 9EK—DOD 721—Sheppard/1 wk 3 days/MASL D148164—Apr 95

Provides knowledge and skills needed to perform splicing, terminating, and testing of high voltage power cables. Training includes tape splices and terminating, hybrid splices, lead transitions, cable components, and testing of underground distribution systems.

Prerequisites: AFSC 3E051, 3E071, or civilian equivalent. Graduates of courses J3AZR54251 001 and J3AZR54250 009 should not attend this course. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AZR3E052 001—Uninterruptible Power Supply (Exide)—PDS Code ON1—DOD 662—Sheppard/6 wk/MASL D148114—Oct 96

Operating principles and characteristics of exide solid state uninterruptible power system, normal and emergency operating procedures, system inspection, maintenance, and alignment. Troubleshooting and repair of system and components.

Prerequisites: AFSC 3E051/71, 3E052/72, or Army, Navy, or civilian equivalent. Personnel must have completed course J3AZR3E052 012, Civil Engineering Advanced Electronics, or an equivalent course during the preceding 2-year period prior to attending this course or fulfill the following experience and knowledge requirements: possess a thorough working knowledge of three-phase AC power and digital and analog electronics to include analog/digital interfacing, operational amplifiers, and complementary metal oxide semiconductors (CMOS). Personnel must also be experienced in the use and operation of oscilloscopes, digital multimeters, and frequency counters. ECL 70.

Special Requirements: Fatigues for class and lab objectives.

Quota Control: 2 AF/DOP.

J3AZR3E052 004—Arresting Barriers—PDS Code 3SX—Sheppard/1 wk 3 days/MASL D148113—oct 96

Design features, operating principles, and operating procedures of arresting barrier systems. Use of technical orders governing inspection and maintenance requirements. Performs maintenance, inspections, adjustments, services, and troubleshoots arresting barrier systems in accordance with applicable technical orders. Training supports BAK-9, BAK-12, and BAK-13 arresting systems and BAK-14 hook cable support system.

Prerequisites: AFSCs 3E052/72 or civilian equivalent. Personnel who have attended courses J2ASR54252 000 or J3AZR54252 000 should not attend this course. ECL 70.

Special Requirements: Safety-toed boots. Work utility clothing for performance of inspections and preventive maintenance of equipment. Graduation from course will be with service dress or civilian equivalent.

Quota Control: 2 AF/DOP.

J3AZR3E052 006—Uninterruptible Power Systems (Emerson)—PDS Code 8VP—Sheppard/6 wk/MASL D148188—Oct 96

Operating principles and characteristics of Emerson Uninterruptible Power Systems, normal and emergency operating procedures,

systems, normal and emergency operating procedures, system inspection, maintenance and alignments. Troubleshooting and repair of system and components.

Prerequisites: AFSC 3E051/71, 3E052/72, or Army, Navy, or civilian. Personnel must be a graduate of course J3AZR3E052 012, Civil Engineering Advanced Electronics, or an equivalent course within 2 years prior to attending this course, or fulfill the following requirements: Possess a thorough working knowledge of three-phase AC power and digital and analog electronics to include analog/digital interfacing, operational amplifiers, and complimentary metal oxide semiconductors (CMOS). Personnel must also be experienced in the use and operation of oscilloscopes, digital multimeters, and frequency counters. ECL 70.

Special Requirements: Fatigues for class and lab objectives.

Quota Control: 2 AF/DOP.

J3AZR3E052 007—Diesel Engine Overhaul and Generator Set Operation—PDS Code G52—DOD 721—Sheppard/6 wk/MASL D148051—Dec 93

Use of tools, shop equipment, test equipment, and technical orders for generator set diesel engines. Operating principles and practical work in maintenance of diesel engine fuel systems, lubricating system, governor systems, intake and exhaust systems, cooling system, and engine start system. Engine disassembly, inspection, reassembly, and test. Maintenance of alternator, exciter, and switchgear. Operation and maintenance of gas turbine generator set. Practice in operating generator set and operating checks. Operation and maintenance of air compressors. General knowledge of high voltage safety and storage batteries.

Prerequisites: AFSC 3E052/72 or civilian equivalent. ECL 70.

Special Requirements: Safety-toed boots. Work utility clothing for performance of inspections and preventive maintenance of equipment. Graduation from course will be with service dress or civilian equivalent.

Quota Control: 2 AF/DOP.

J3AZR3E052 009—Powerware Series Uninterruptible Power Supply—PDS Code PC5—Sheppard/4 wk—Oct 96

Operating principles and characteristics of exide powerware series uninterruptible power supply, normaal and emergency operating procedures, system inspection, maintenance, and calibration. Troubleshoot and repair of system to lowest reparable unit.

Prerequisites: AFSCs 54252, 54272, 54250, 54270, or Army, Navy, or civilian equivalent. Must have completed course J3AZR3E052 012, Civil Engineering Advanced Electronics, or an equivalent course before attending this course or fulfilled the following experience and knowledge requirements: possess a thorough working knowledge of three-phase AC power and digital and analog electronics to include analog/digital interfacing, operational amplifiers, complementary metal oxide semiconductors (CMOS), and microprocessors; and have experience in the use and operation on oscilloscopes, digital multimeters, and frequency counters. ECL 70.

Special Requirements: Fatigues for class and lab objectives.

Quota Control: 2 AF/DOP.

J3AZR3E052 012—Civil Engineering Advanced Electronics—PDS Code PTX—Sheppard/6 wk/MASL D148130—Oct 95

Provides training on basic electronic theory, advanced training in solid-state analog and digital circuits, amplifiers, operational amplifiers, logic circuits, power supplies, filters, and microprocessors. Repair of printed circuit cards, and use of standard electronic test equipment: multimeters, oscilloscopes, signal generators, frequency counters, and soldering stations.

Prerequisites: Air Force military personnel must be on their second enlistment. Waivers may be granted to first-term personnel only if the base civil engineer deems that training is required due to individual's duties. Students planning to attend the following courses must have attended this course or possess equivalent knowledge and experience: J3AZR3E052 001, Uninterruptible Power Supply (Exide), PDS Code 0N1; J3AZR3E052 006, Uninterruptible Power Systems (Emerson), PDS Code 8VP; J3AZR3E052 009, Exide Powerware Series Uninterruptible Power Supply, PDS Code PC5. A1C through MSgt in AFSCs 3E051, 3E071, 3E052, 3E072, 3E151, 3E171, or Army, Navy, or civilian equivalents. ECL 70.

Special Requirements: Fatigues for class and lab objectives.

Quota Control: 2 AF/DOP.

J4AZT3E052 003—Aircraft Arresting Barriers, BAK-9, BAK-12—PDS Code GZ0—various locations/1 wk—Oct 96

The mobile training team (MTT) instructs on the design features, operating principles, and operating procedures; use of technical orders government inspection and maintenance requirements; and troubleshooting procedures for BAK-9 and BAK-12 aircraft arresting barriers. Students perform maintenance, inspections, adjustments, and services according to the applicable technical orders.

Prerequisites: AFSCs 3E052/72 or civilian equivalent. Personnel who have attended courses J3AZR54252 004 or J4AST4252 003 should not attend this course. ECL 70.

Quota Control: 2 AF/DOP.

J4AZT3E052 007—Hook Cable Support System, BAK-14—PDS Code 3MJ—various locations/3 days—Mar 94

The mobile training team (MTT) instructs on the design features, operating principles, and operating principles, and operating procedures; use of technical orders governing inspection and maintenance requirements; and troubleshooting procedures for the BAK-14 hook cable support system. Students perform maintance, inspections, adjustments, and services according to the applicable technical orders.

Prerequisites: AFSC 3E052/72 or civilian equivalent. Personnel who have attended courses J3AZR54252 004 or J4AST54252 007 should not attend this course.

Quota Control: 2 AF/DOP.

J3ACR3E070 000—Civil Engineering Management Craftsman—PDS Code 2S5—Sheppard/2 wk—Jan 96

Provides Air Force civil engineering personnel the knowledge and skills necessary to perform duties as a CE manager. Includes computer security, CE management, environmental awareness and compliance, and CE organization and career field structure.

Special Requirements: Individuals attending the course must complete "read-ahead material" before attending. Units not having a copy of the material should contact 366 TRS, 727 Missile Road, Sheppard AFB TX 76311-2254.

Uniform Requirement: Battle dress uniform (BDU) is considered

uniform of the day for this course.

Quota Control: HQ AFPC/DPPAPEO.

J3AZR3E071 000—Fire Alarm System—PDS Code 0MW—DOD 721—Sheppard/3 wk 3 days—Apr 95

Training includes principles of fire alarm and suppression systems, inspection and operational check procedures, electronic fundamentals, energy monitoring and control system (EMCS) interface and development of system checklist. Safety in the operation and maintenance of alarm and suppression systems is emphasized. Practical experience in connecting, testing, troubleshooting, and repairing the electrical/electronic portions of representative fire detection, alarm, and suppression systems is provided.

Prerequisites: AFSCs 3E051/71 or civilian equivalent. AFSC 3E051 must have 1 year of field experience in the 3E051 skill level. Graduates of course J3AZR54270 000 should not attend this course.

Quota Control: 2 AF/DOP.

J3AZR3E071 001—CE Advanced Electrical Troubleshooting—PDS Code 9JF—DOD 720—Sheppard/4 wk/MASL D148185—Apr 95

Provides formal training in the knowledge and skills needed to perform advanced electrical troubleshooting on motors, motor control circuits, motor control centers, frequency converters, door openers, electric winches/hoists, transformers, grounding systems, and low voltage power circuit breakers.

Prerequisites: AFSCs 3E051/71 with at least 1 year of retainability. Personnel with AFSC 3E051 must have 1 year of field experience in the 5-skill level. Graduates of course J3AZR54270 001 should not attend this course. ECL 70.

Special Requirements: Safety-toed boots.

Quota Control: 2 AF/DOP.

J3AZR3E071 102—Bare Base Electrical Systems—PDS Code WA3—Sheppard/3 wk—Mar 94

Supports Bare Base training requirements for those MAJCOMs with OPlan tasking for Southwest Asia. Provides training in the knowledge and skills needed to maintain and repair Bare Base electrical distribution systems. Includes the Bare Base primary distribution systems, substations and components, and secondary electrical systems. Training will encompass all electrical systems in latrines, laundry units, the Harvest Falcon kitchen equipment, and the reverse osmosis water purification unit (ROWPU).

Prerequisites: AFSCs 3E051 and 3E071 with at least 1 year of retainability. 3E051 personnel must have 1 year of field experience as a 5-skill level.

Special Requirements: Safety-toed boots.

Quota Control: 2 AF/DOP.

J3AZR3E072 002—Troubleshooting Electrical Power Generating Equipment—PDS Code G37—Sheppard/3 wk 1 day/MASL 148132—Oct 96

Analysis of basic electrical circuits, reading and interpreting wiring diagrams of MEP generator sets, ONAN generator sets, and auto-starting transfer systems and troubleshooting generator set control circuits and auto-starting transfer systems.

Prerequisites: A1C through MSgt in AFSC 3E052/72 or civilian equivalent. ECL 70.

Special Requirements: Safety-toed boots, fatigues for class and lab objectives, and a service dress uniform for graduation.

Quota Control: 2 AF/DOP.

J3AZR3E072 112—Bare Base Power Generation (Diesel)—PDS Code X02—Sheppard/3 wk 4 days—Apr 95

Provides training for Air Force personnel, AFSC 3E052 and 3E072 or civilian equivalent, in the knowledge and skills necessary to operate and maintain the bare base diesel and related auxiliary power plant equipment.

Prerequisites: AFSCs 3E052 and 3E072 with at least 1 year of retainability; 3E052 personnel must have 1 year of field experience as a 5-skill level.

Special Requirements: Personal electrical safety gear and safety shoes. Work utility clothing for performance of inspections and preventive maintenance of equipment. Graduation from course will be with service dress or civilian equipment.

Quota Control: 2 AF/DOP.

J3ABR3E131 003—Heating, Ventilation, Air-Conditioning and Refrigeration Apprentice—PDS Code V4Y—Sheppard/17 wk/AFSC 3E131/MASL D148003—Mar 94

Provides training in heating, ventilation air-conditioning/refrigeration (HVAC/R) systems. Fundamentals of heating, refrigeration, air-conditioning, and air compressors trouble analysis and maintenance of refrigeration and air-conditioning systems, including hermetic and open type condensing units with air and water cooled condensors. Refrigeration and heating tubing fabrication, repair, installation, and oxyacetylene soldering, welding, and cutting, and servicing of refrigerant flow and control devices. Also, the operation of indirect and direct expansion industrial air-conditioning systems to include reciprocating centrifugal and absorption systems. Operation and maintenance of oil and gas burning units for space heaters, furnaces, and boilers; operation and maintenance of complete steam and water heating systems; boiler water testing, treatment, and corrosion prevention. Provides training in electrical fundamentals and troubleshooting system electrical components, control system theory, and procedures to maintain, calibrate, and troubleshoot simple and complex mechanical, pneumatic, electrical, and electronic controls. Balancing heat loads, adjusting sensors, motor controls, relays, and associated test equipment will also be trained as it related to HVAC/R systems. AFSC specific contingency training will be covered to include heating, refrigeration, air-conditioning, and miscellaneous support equipment.

Prerequisites: ECL 70.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J3AZR3E151 006—Refrigeration and Air-Conditioning Systems I—PDS Code 8PW—Sheppard/5 wk/MASL D148168—Oct 95

Principles of operation, applications operational servicing, troubleshooting, repair at the major component level, pressure enthalpy, psychrometric system analysis, systems installation to include pipe sizing and electrical wiring for commercial refrigeration systems, cold storage systems, field portable systems (Harvest Bare), package air-conditioning systems, heat pumps, computer air-conditioning, and electrical resistive heating systems. Course supports Harvest Bare training requirements for those MAJCOMs

with OPlan taskings for Southwest Asia.

Prerequisites: AFSCs 3E151/71 or civilian equivalent. Must have knowledge of and experience in electronics, electricity, and air-conditioning controls and be a graduate of course J3AZR3E151 007 or an equivalent course. Personnel must have 1 year of field experience as a 5-skill level in refrigeration and air-conditioning. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR3E151 007—Mechanical Systems Electrical/Controls Troubleshooting—PDS Code 8XB—Sheppard/5 wk 3 days/MASL D148082—Oct 95

Electrical troubleshooting to include circuit configuration and interpreting schematic drawings and (or) diagrams. Also training on hardware-oriented electric, electronic, and pneumatic controls to include controllers, self-contained stats, sensors, adapters, controlled devices, and electrical components and (or) accessories.

Prerequisites: AFSC 3E151/71 or civilian equivalent. Personnel must have knowledge of and experience in basic electrical circuitry or be a graduate of 3ABR3E131 or an equivalent course. Personnel who have attended course J3AZR54573 000 should not attend this course. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR3E151 008—Refrigeration and Air-Conditioning Systems II—PDS Code 9SX—DOD 720—Sheppard/3 wk/MASL D148191—Dec 93

Formal training on facility blueprint interpretation; servicing of hydronic systems, to include valves, strainers, rodding, leak checking, and plugging heat exchanger tubes; types of condensers and their operation, to include air, water and glycol cooled systems; operation of the various types of system controls, including electric, pneumatic, electronic, and micro-processor system analysis units; operation, service and troubleshooting of reciprocating indirect expansion package and remote systems; types and operation of centrifugal air-conditioning systems, to include controls, service, troubleshooting, and performance analysis; and absorption (lithium bromide) air-conditioning system applications, operations, servicing, and performance analysis of solution concentration and concentration adjustment.

Prerequisites: AFSC 3E151/71 or civilian equivalent. Must have knowledge of and experience in electronics, electricity, and air-conditioning controls and be a graduate of course J3AZR3E151 007 or an equivalent course. Must have 1 year of field experience as a 5-skill level in refrigeration and air-conditioning. ECL 70.

Quota Control: 2 AF/DOP.

J4AZT3E271 000—Pavements Maintenance, Inspection, and Repair—PDS Code WF7—various locations—2 wk—Dec 93

This mobile training team (MTT) provides special training to Air Force military or civilian personnel working in the pavement maintenance and equipment operator career field. Includes soil fundamentals, rigid and flexible pavement maintenance and repair, pavement inspection, equipment maintenance, supply functions, environmental hazards and concerns, and new technology.

Prerequisites: Pavements maintenance and construction equipment operator personnel, military grades E-4 through E-7 with AFSC 3E251/71 who have completed their first enlistment or civilian equivalent.

Special Requirements: High top safety-toed boots, hearing protection, gloves, eye protection, BDU uniform. Civilians should wear appropriate utility clothing.

Quota Control: 2 AF/DOP.

J3ABR3E331 001—Structural Apprentice—PDS Code 9DQ—Sheppard/11 wk/AFSC 3E331/MASL D148200—Mar 94

Construction and maintenance of wood and masonry structures; maintenance and use of structural tools and equipment; installation of building hardware; interpretation of construction drawings; compiling bills of materials; cabinet construction, installation, and repair; finish work; installing gypsum board, suspended ceilings, paneling, interior trim, windows, doors, stairs, glass, and insulation; erection of prefabricated metal buildings; laying brick, building block, and structural tile; setting wall and floor tile; preparing concrete, mortar, stucco, and plaster mixes; installing concrete forms and reinforcement materials; placing and finishing concrete; applying protective coating materials; identifying built-up roofing components; and contingency.

Prerequisites: ECL 70.

Special Requirements: Must have baseline audiograms and be fitted with earplugs prior to departure for training. Recent graduates of BMT will be issued safety-toed boots at training site.

Quota Control: 2 AF/DOP.

J4AZT3E371 001—Bare Base Structures Erection—PDS Code WY8—Sheppard/1 wk/MASL D149386—Mar 94

This mobile training team course supports Bare Base training requirements for MAJCOMs with OPlan taskings for Southwest Asia. Includes academic and hands-on training in the setup, teardown, and preparing of shipment of the general purpose (GP) shelter, expandable shelter container (ESC), and tent extendable, modular personnel (TEMPER).

Prerequisites: Training is for all civil engineering AFSCs. Other AFSCs are eligible to attend provided they are assigned to mobilization positions destined to Base Base locations. ECL 70 SR.

Quota Control: 2 AF/DOP.

J3ABR3E431 003—Utilities Systems Apprentice—PDS Code V9L—Sheppard/7 wk 2 days/AFSC 3E431—Mar 94

Trains airmen to perform duties prescribed in AFMAN 36-2108 (formerly AFR 39-1) for utilities specialist, AFSC 3E4X1. Includes an introduction to water processing, water analysis, operating principles of water treatment plants, maintenance of water and wastewater processing system components, operating principles, configuration, construction, maintenance and repair of water supply systems, waste systems, and natural gas systems. Also includes installing fixtures, faucets, valves, appurtenances and the use and maintenance of tools and equipment. Installation and removal of backflow prevention devices and training on contingency.

Prerequisites: Completion of high school with courses in mathematics, chemistry, biology, earth sciences, drawing and specification use and shop mechanics is desirable. ECL 70.

Special Requirements: Safety-toed boots.

Quota Control: 2 AF/DOP.

J3ABR3E432 003—Liquid Fuel System Maintenance Apprentice—PDS Code ANR—DOD 720—Sheppard/8 wk 3 days/AFSC 3E432/MASL D148004—Apr 96

Inspection and maintenance of liquid conventional fuel storage and dispensing systems. Application of Air Force technical orders, manuals, directives, maintenance publications, and forms; fundamentals of basic hydraulics and electricity; fabrication of piping and fitting assemblies; inspection and maintenance of storage tanks, pumps, unloading facilities, filtration systems, gauges, meters, valves, strainers, and type I, II, III, and IV hydrant aircraft refueling systems components; and troubleshooting the installed mechanical and hydrant systems used for storing and dispensing aviation and ground fuels.

Prerequisites: Personnel who have graduated from the C3ABR54630 001 course and the C3ABR56632 002, Apprentice Liquid Fuel System Maintenance Specialist Course, PDS Code ANR, need not attend. ECL 70.

Special Requirements: Must meet minimum physical requirements for use of respirator equipment and have no history of claustrophobia or eardrum injury. Recent graduates of BMT will be issued safety-toed boots at training site.

Quota Control: 2 AF/DOP.

J3ABR3E433 001—Environmental Apprentice—PDS Code 99B—DOD 720—Sheppard/5 wk/AFSC 56630—Oct 95

Training includes procedures for identifying, surveying for, and controlling disease-vectoring pests, venomous arthropods and reptiles, stored products pests, structural pests, ornamental and turf pests, household pests, vertebrate pests, bird pests, and weeds. Also includes training on the pest management laws and regulations, civil engineering structure and management, formulation of chemicals, operation of pesticide dispersal equipment, and pest management safety. This course meets formal training requirements for certification in the Core Phase of Pest Control and Pest Control Category 3, Ornamental and Turf; Category 5, Aquatic; Category 6, Right of Way; Category 7, Industrial, Institutional, Structural, and Health-Related; and Category 8, Public Health.

Special Requirements: Must have baseline audiograms and fitted with earplugs prior to departure for training. Steel-toed boots required.

Quota Control: 2 AF/DOP.

J3AZR3E451 004—Fire Suppression System Maintenance—PDS Code 5S5—Sheppard/3 wk—Apr 95

Test, troubleshoot, and repair the mechanical portions of systems. Inspection and operational checks, principals of operation, troubleshooting and repairing wet pipe, dry pipe and deluge systems. Repair of pumps and the principles of operation of other suppression systems.

Prerequisites: AFSC 3E451, 3E471, or civilian equivalent. Graduates of courses J3AZR55255 003 and J3AZR56651 004 should not attend this course.

Quota Control: 2 AF/DOP.

J4AZT3E451 001—Natural Gas Distribution Systems Maintenance—PDS Code ZFJ—DOD 720—various locations/1 wk—Apr 95

Training includes installation, repair, and maintenance procedures for natural gas distribution systems; detection and isolation of gas leaks; and installation, repair maintenance, and operating principles of gas pressure regulators.

Prerequisites: AFSC 3E451, 3E471, 3E151, 3E171, or civilian equivalent.

Quota Control: 2 AF/DOP.

J4AZT3E451 002—Backflow Prevention Devices Testing—PDS Code 1HN—DOD 720—location varies/4 days—Dec 93

Training includes theory of backflow prevention and cross connections, maintenance, troubleshooting, repair, overhaul and testing backflow prevention devices, and maintaining test and maintenance records.

Prerequisites: AFSC 3E451, 3E471, 3E151, 3E171, or civilian equivalent.

Quota Control: 2 AF/DOP.

J3ARR3E453 002/J4ART3E453 000—Pest Management (Recertification)—PDS Code ZVW—DOD 720—Sheppard/1 wk—Dec 93

Meets the basic requirements for recertification training under the DOD 4150.7-M, Plan for Certification of Pesticide Applicators of Restricted Use Pesticides. Achievement of the minimum passing scores satisfies the formal testing requirements for recertification in the core phase of pest control and pest control Category 3, Ornamental and Turf; Category 5, Aquatic; Category 6, Right-of-Way; Category 7, Industrial, Institutional, Structural, and Health-Related; and Category 8, Public Health. Students are allowed to return to duty after testing in only the core phase and in the categories in which they hold initial certification.

Prerequisites: DOD personnel who require triennial recertification to apply restricted use pesticides. Personnel should be within 1 year before expiration of their DD Form 1826.

Quota Control: 2 AF/DOP.

J3AZR3E453 003—Pest Management Journeyman—PDS Code JK4—DOD 720—Sheppard/4 wk—Mar 94

Meets the basic requirements for initial certification training under the DOD 4150.7-M, Plan for Certification of Pesticide Applicators of Restricted Use Pesticides. Achievement of the minimum passing scores satisfies the formal training and testing requirements for initial certification in the core phase of pest control and pest control categories 3, Ornamental and Turf; 5, Aquatic; 6, Right-of-Way; 7, Industrial, Institutional, Structural, and Health-Related; and 8, Public Health. This course DOES NOT satisfy the OJT and correspondence course requirements for certification.

Prerequisites: All DoD personnel who have held DOD certification in one or more pest control categories but cannot meet the requirements for triennial recertification according to DOD 4150.7-M. Personnel who possess current certification are NOT eligible to attend this course.

Special Requirements: Steel-toed boots.

Quota Control: 2 AF/DOP.

J3AZR3E471 000—Wastewater Plant Operations—PDS Code 0FG—DOD 720—Sheppard/3 wk/MASL D148118—Apr 95

Mathematics; chemistry; biology; sources, composition, and characteristics of wastewater; laboratory analysis, pollution control policies and programs; treatment processes and systems; operation and maintenance; and records, reports, and safety.

Prerequisites: AFSC 3E451/71 civilian equivalent. The 5-skill level must have elected to reenlist to be eligible; civilians should have at

least 1 year of experience in wastewater treatment. Graduates of courses J3AZR56651 000 and J3AZR56671 000 should not attend this course. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR3E471 001—Water Plants and Systems—PDS Code 0G9—DOD 720—Sheppard/3 wk 3 days/MASL D148119—Apr 95

Basic mathematics; chemistry; sources, characteristics, and composition of water supplies; laboratory analysis of water; water plant operation; swimming pool operation; ion exchange; electrodialysis; principles of reverse osmosis and distillation; and industrial water treatment.

Prerequisites: AFSC 3E451/71 or civilian equivalent. The 5-skill level must have elected to reenlist to be eligible; civilians should have at least 1 year of experience in water treatment. Graduate of course J3AZR56671 001 should not attend this course. ECL 70.

Quota Control: 2 AF/DOP.

J3AZR3E472 000—Liquid Fuels Storage Tank Entry Supervisor—PDS Code CNK—DOD 720—Sheppard/1 wk 4 days/MASL D148116—Apr 96

Provides formal training to Air Force personnel (military or civilian) in responsibilities and duties of tank entry supervisor. Training includes use of safety devices for tank ventilation; tank preventive maintenance records; inspection of equipment; hazardous characteristics of fuels; safety and emergency procedures; precleaning inspection; tank cleaning processes, disposal of contaminated fuels, acceptance inspection; and returning tank to service.

Prerequisites: AFSC 3E432 or civilian equivalency with a minimum of 3 years of experience in AFSC. Due to the supervisory responsibilities, the person selected must be grade E-4 (Sgt) or civilian equivalent, and must have actual tank-cleaning experience on a minimum of two tanks. Personnel have face shaven in such a way as to not interfere with wearing of breathing apparatus. Students must bring documented proof of physical, AF Form 422 or 2770, or equivalent given within 1 year of class start date. Physical to determine individual's ability to wear respiratory equipment and enter confined spaces must be performed by individual's base hospital examinations section. Students must also bring documented proof of initial hazardous communications training (AF Form 55 or equivalent). ECL 70.

Special Requirements: Students should attend this class every 5 years. Individuals wearing eyeglasses must bring inserts for full face masks.

Admin Instructions: All travel orders will include the date of the last physical and the following statement, "Student meets the minimum requirements for wearing respirator equipment and has no history of claustrophobia."

Quota Control: 2 AF/DOP.

J3AZR3E472 001—Liquid Fuel Systems Maintenance Technician—PDS Code X9M—DOD 720—Sheppard/2 wk/MASL D148045—Apr 96

Provides formal training to DoD personnel in the constructional features, operation, inspection, maintenance, and troubleshooting of automatic valves, pumps, and filter separators.

Prerequisites: AFSC 3E452, 3E472, or civilian equivalent with 3 years of experience in liquid fuel system (conventional fuels) maintenance. Personnel who have graduated from the C3AZR54571 001, Liquid Fuel Systems Maintenance Technician Course, PDS Code X9M, need not attend.

Special Requirements: Nonconductive clothing and safety-toed shoes. Students must also bring documented proof of initial hazardous communications training (AF Form 55 or equivalent).

Quota Control: 2 AF/DOP.

J3AZP3E571 000—Contract Construction Inspector—PDS Code 547—DOD 7V7—Ft Leonard Wood/5 wk/MASL D148170—Oct 96

Provides training in the knowledge and skills needed to monitor construction contracts for installation, maintenance, repair and modification of facilities. Training includes guidance on standards of conduct; contract documents; documentation of construction activities; constructibility reviews; pre-performance conferences; government-furnished property; material submittals; progress documents; warranties and guarantees; surveillance and acceptance procedures; basic inspection requirements for safety and environmental compliance; testing of soils, asphalt, concrete, paint and lumber; basic inspection requirements for construction materials and methods; and blueprint reading. Emphasizes administrative duties and inspection practices.

Prerequisites: Normal color vision. AFSC 3E0XX, 3E1XX, 3E2XX, 3E3XX, or 3E5XX. Must be assigned to, or pending assignment to, construction management at 5-, 7-, or 9-skill level or civilian equivalent. Must have knowledge of blueprint reading and mathematics associated with construction inspection. ECL 70 SA.

Special Requirements: Must bring seasonal clothing such as thermal underwear, field jacket with liner, boots, and gloves when attending training between September and April. Must also bring steel-toed boots for laboratory testing.

Admin Instructions: Upon arrival, students should report to the billeting office on the first floor of the Soldier Service Center, bldg 470. Reservations should be made in advance by calling DSN 581-0999 or 1-800-677-8356. An automated locator service is available at the billeting office for directions to the course, which is located in bldg 10302, DSN 581-3453. Transportation services at Ft Leonard Wood are primarily limited to commercial taxi. Private transportation is recommended. Duty uniform is battle dress uniform with battle dress uniform style cap or subdued organizational cap.

Quota Control: 2 AF/DOP.

J3AZP3E571 001—Construction Materials Testing—PDS Code 549—Ft Leonard Wood/1 wk 4 days—Oct 96

Trains in the knowledge and skills for sampling and testing construction materials. Soils reconnaissance and testing, asphalt testing and mix design, and concrete mix design, sample preparation, and testing are covered.

Prerequisites: AFSC 3E551/71/91 on second or subsequent enlistment. Civilians should have equivalent qualifications.

Special Requirements: Steel-toed combat boots. Cold weather gear such as thermal underwear, field jacket with liner, gloves, etc., when attending between September and April.

Adminstrative Instructions: Upon arrival, students should report to the billeting office located on the first floor of the Soldier Service Center, bldg 470. Reservations should be made in advance by calling DSN 581-0999 or 1-800-677-8356. An automated locator service is

available at the billeting office for directions to the course, which is located in bldg 10302, DSN 581-3453. Transportation services at Ft Leonard Wood are primarily limited to commercial taxi. Private transportation is recommended. Duty uniform is battle dress uniform with battle dress uniform style cap or subdued organizational cap.

Note: Because of design of instruction, course may be completed in less than 1 week and 4 days.

Quota Control: HQ 2 AF/DOP.

J3AZP3E571 002—Construction Surveying—PDS Code 548—Ft Leonard Wood/2 wk—Oct 96

Provides training and refresher training in surveying computations and operations. Includes horizontal control, vertical control, topography, grade stakes, and instrument adjustment.

Prerequisites: AFSC 3E551/71/91 on second or subsequent enlistment. Civilians should have equivalent qualifications. Personnel not currently performing surveying tasks cannot expect to complete this course without a math review before attending.

Special Requirements: Steel-toed combat boots. Cold weather gear such as thermal underwear, field jacket with liner, gloves, etc., when attending between September and April.

Adminstrative Instructions: Upon arrival, students should report to the billeting office located on the first floor of the Soldier Service Center, bldg 470. Reservations should be made in advance by calling DSN 581-0999 or 1-800-677-8356. An automated locator service is available at the billeting office for directions to the course, which is located in bldg 10302, DSN 581-3453. Transportation services at Ft Leonard Wood are primarily limited to commercial taxi. Private transportation is recommended. Duty uniform is battle dress uniform with battle dress uniform style cap or subdued organizational cap.

Note: Because of design of intstruction, course may be completed in less than 1 week and 4 days.

Quota Control: HQ 2 AF/DOP.

J3AZP3E571 003—Engineering Design—PDS Code 209—Ft Leonard Wood/2 wk—Oct 96

Provides training in design structures for architectural, structural, plumbing, HAVC, electrical and civil disciplines. Completes program documents and cost basic cost estimating. Examines aspects of construction methods and material decisions.

Prerequisites: AFSC 3E551/71/97 on second or subsequent enlistment. Civilians should have equivalent qualifications.

Special Requirements: Steel toed combat boots. Cold weather gear such as thermal underwear, field jacket with liner, gloves, etc., when attending between September and April.

Administrative Instructions: Upon arrival, students should report to the billeting office located on the first floor of the Soldier Service Center, building 470. Reservations should be made in advance by calling DSN 581-0999 or 1-800-677-8356. An automated locator service is available at the billeting office for directions to the course, which is located in building 10302, DSN 581-3453. Transportation services at Fort Leonard Wood are primarily limited to commercial taxi. Private transportation is recommended. Duty uniform is BDUs with BDU style cap or subdued organizational cap.

Note: Due to instruction design, course may be completed in less than 2 weeks.

Quota Control: HQ 2 AF/DOP.

J4AST3E571 001—Contract Construction Inspector—PDS Code BK5—Sheppard/2 wk 3 day—Oct 96

Provides training in the knowledge and skills needed to monitor construction contracts for installation, maintenance, repair, and modification of facilities. Training includes guidance on standards of conduct, contract documents, documentation of construction activities, consructibility reviews, pre-performance conferences, government-furnished property, material submittals, progress documents, warranties and guarantees, surveillance and acceptance procedures, basic inspection requirements for safety and environmental compliance and construction materials and methods and blueprint reading. Emphasizes administrative duties and inspection practices.

Prerequisites: Normal color vision. AFSC 3E0XX, 3E1XX, 3E2XX, 3E3XX, or 3E5XX. Attendees must be assigned to, or pending assignment to, construction management at 5-, 7-, or 9-skill level or civilian equivalent. Must have knowledge of blueprint reading and mathematics associated with construction inspection. ECL 70 SA.

Quota Control: 2 AF/DOP.

J3AZR3E600 000—Work Information Management System (WIMS) Operator Course—PDS Code PZC—Sheppard/1 wk 4 days—Oct 95

Training for Air Force personnel working in the WIMS computer room. Includes system shutdown procedures, initial program load, file recovery procedures, system tape operations, system disk opertions, file backup procedures, hardware installation and maintenance, supply requirements, hardware troubleshooting, configuration management, telecommunications, and system security.

Prerequisites: Air Force civil engineering personnel and civilian equivalent grades with a minimum of 6 months of WIMS user experience but less than 1 year assigned as a WIMS operator. The reading comprehension of the attendees should be a minimum of a tenth grade level. This course is primarily targeted toward newly assigned personnel working as a WIMS operator, or for personnel to be assigned as a WIMS operator. All others, request waiver from 366 TRS/TOC, Sheppard AFB TX.

Quota Control: 2 AF/DOP.

J3ALR3E631 007—Operations Apprentice—PDS Code 1P1—Sheppard/5 wk/AFSC 3E631—Apr 96

Provides training for work force managers in processing and scheduling concepts for work requests, work orders, and direct scheduled work orders, analysis of data to determine efficiency and effectiveness of work force and customer relations. Training also encompasses command and control concepts including Harvest Eagle and Harvest Falcon assets. Information management systems are used to demonstrate work control methods, and development of tailored reports.

Prerequisites: Must be a fully qualified 5-skill level in another civil engineer skill and meet mandatory eligibility requirements listed in AFMAN 36-2108 for later entry into this AFSC.

Special Requirements: Report with a hand-held calculator.

Quota Control: 2 AF/DOP.

J3AZP3E671 003—Engineering Design—PDS Code 209—Ft Leonard Wood/2 wk—Oct 96

Provides training in design structures for architectural, structural, plumbing, HVAC, electrical and civil disciplines. Completes

program documents and cost basic cost estimating. Examines aspects of construction methods and material decisions.

Prerequisites: AFSC 3E551/71/91 on second or subsequent enlistment. Civilians should have equivalent qualifications.

Special Requirements: Steel-toed combat boots. Cold weather gear such as thermal underwear, field jacket with liner, gloves, etc., when attending between September and April.

Adminstrative Instructions: Upon arrival, students should report to the billeting office located on the first floor of the Soldier Service Center, bldg 470. Reservations should be made in advance by calling DSN 581-0999 or 1-800-677-8356. An automated locator service is available at the billeting office for directions to the course, which is located in bldg 10302, DSN 581-3453. Transportation services at Ft Leonard Wood are primarily limited to commercial taxi. Private transportation is recommended. Duty uniform is battle dress uniform with battle dress uniform style cap or subdued organizational cap.

Note: Because of design of intstruction, course may be completed in less than 1 week and 4 days.

Quota Control: HQ 2 AF/DOP.

J3AZR3E671 005—Civil Engineering Work Estimating—PDS Code 1SI—Sheppard/3 wk/MASL D148189—Apr 96

Provides training for Air Force personnel performing planner or estimater duties. Training includes planner responsibilities, facility file contents, work authorization, material and equipment, technical aspects of engineered performance standards, lump sum estimates, and Work Information Management System (WIMS) (FEJE) estimation system.

Prerequisites: Personnel assigned to or scheduled to be assigned as a planner or estimator, maintenance engineering, the position of chief of resources, deputy chief of operation (or equivalent positions in the Army or Navy). All others must request a waiver from 366 TRS/TOC, Sheppard AFB TX. ECL 70.

Quota Control: 2 AF/DOP.

J4AZT3E671 000—Engineer Performance Standards (EPS)/Work Information Management System (WIMS) Knowledge—PDS Code QA2—Sheppard/2 wk 1 day—Oct 95

This mobile training team (MTT) is designed to provide special training to Air Force, Army, and Navy military or civilian personnel developing work plans. Training includes work authorization documents, technical aspects of EPS, application of EPS for lump-sum estimates and labor estimates; and knowledge only on the identification of the characteristics and procedures for operating the WIMS and facilities engineering job estimating computer systems.

Prerequisites: Personnel assigned or scheduled to be assigned to planning, industrial engineering branch, chief of requirements, chief of operations, or deputy chief of operations (or equivalent position in the Army and Navy). All other personnel wishing to attend this course must request a waiver from 366 TRS/TOC, Sheppard AFB TX.

Special Requirements: A calculator.

Quota Control: 2 AF/DOP.

X3ABR3E731 003—Fire Protection Apprentice—PDS Code XN0—DOD 495—Goodfellow/13 wk 3 days/AFSC 3E731/MASL D122002—Apr 95

Training in skills and knowledge necessary to perform fire protection apprentice duties. Includes fire fighting tactics and operations with aircraft (crash), structural, and automotive fires as well as knowledge of hazardous materials, wild land, and miscellaneous fire fighting. Also includes security; fire protection mission and organization; AFOSH program; fire science; principles of combustion, portable fire extinguishers; fire protection publications; protective clothing; self-contained breathing apparatus; rescue carries; emergency first aid; CPR; rescue operations; alarm/communications center operations; fire fighting accessories; fire protection hydraulics; emergency response activities; inspection, operator maintenance, and operation of fire protection vehicles, fire fighting equipment, and facilities; vehicle positioning, hose operations; control and extinguishment of live fires involving structures, aircraft, and automobiles, fire prevention, and inspection techniques; POL storage area fire fighting techniques; fire protection readiness; and Federal Hazard Communication Training Program.

Prerequisites: ECL 80.

Special Requirements: Civilians will be required to wear their uniform during classroom portion of the course according to AFI 36-801, *Uniform for Civilian Employees* (formerly AFM 40-12). Safety-toed shoes.

Quota Control: 2 AF/DOP.

X3ABR3E731 004—Fire Protection Apprentice (Army 51M10)—PDS Code XN1—DOD 495—Goodfellow/13 wk 1 day/AFSC MOS 51M10/MASL D122064—Apr 95

For Army personnel only. Training in skills and knowledge necessary to perform fire protection apprentice duties. Includes fire fighting tactics and operations with aircraft (crash), structural, and automotive fires as well as knowledge of hazardous materials, wild land, and miscellaneous fire fighting. Also includes security; fire protection mission and organization; AFOSH program; fire science; principles of combustion, portable fire extinguishers; fire protection publications; protective clothing; self-contained breathing apparatus; rescue carries; emergency first aid; CPR; rescue operations; alarm/communications center operations; fire fighting accessories; fire protection hydraulics; emergency response activities; inspection, operator maintenance, and operation of fire protection vehicles, fire fighting equipment, and facilities; vehicle positioning; hose operations; control and extinguishment of live fires involving structures, aircraft, and automobiles, fire prevention, and inspection techniques; POL storage area fire fighting techniques; fire protection readiness; and Federal Hazard Communication Training Program.

Prerequisites: Specified in AR 611-201, enlisted career management fields and military occupational specialties and course administration data for 51M AIT course. ECL 80.

Quota Control: 2 AF/DOP.

X3AZR3E751 003—Fire Rescue—PDS Code NQ9—DOD 495—Goodfellow/3 wk/MASL D122044—Oct 96

Provides training for DoD personnel who may perform fire rescue duties. Provides training on skill and knowledge required to perform fire rescue duties to include inspection, operator maintenance, and operation of rescue vehicles and equipment; motor vehicle extrication; self-contained breathing apparatus; confine space rescue that complies with 29 CFR 1910.146 and AFOSH 91-25. In the realm of aircraft systems, the training covers aircraft egress system; rescue operation for small framed aircraft, and bomber aircraft. Subjects covered in structural operations include building construction principles; rescue carries; search and miscellaneous rescue; rescue procedures; rescue rope operations; rescue entry; and

ventilation.

Prerequisites: AFSC 3E731, Fire Fighter II/51/71, or civilian equivalent in fire protection organization. Career interest, highly aggressive, motivated, and physically fit personnel are desirable and should be the primary consideration when selecting the person who attends this course. Military and civilian students must have a physical examination according to AFI 48-123 within 12 months of class start date to identify any potential difficulties that may occur due to the extreme physical stress associated with many of the objectives within the course. Civil service fire fighting personnel must meet the standard of OPM qualification standards for GS-081, Firefighting, and fire prevention series. Any impairment of pulmonary or cardiovascular function is a disqualifier. ECL 80.

Special Requirements: The following actions must be taken before course attendance. NOTE: If prerequisites and items b and c below are not completed, the member will return immediately to home station. A message or phone call will be made to both the MAJCOM and the member's commanders.

a. Face must be shaved and maintained in a way that will not interfere with the wearing of the breathing apparatus.

b. The physical that is required for all personnel (military and civilian) attending this course is outlined in AFI 48-123. As directed by HQ AETC/SG, an AF Form 422, **Physical Profile Serial Report**, must be completed within 60 days of the applicant's projected class date. The remarks section must clearly state that "a physical examination, as described in AFCAT 36-2223 has been accomplished and the applicant is medically qualified to participate in the demanding physical requirements of this course." The physical examinations and standards personnel will conduct a medical records review and schedule the applicant to see a health care provider. The provider's examination will be as extensive as deemed necessary in order to determine the applicant's suitability for attending this course. Medical personnel should pay particular attention to the following required tests and disqualifying defects:

(1) Inability to participate in extended periods of extreme physical exertion.

(2) Any condition that may preclude the member's ability to wear a respirator or speak clearly.

(3) Any orthopedic condition, or history of, that could be expected to interfere with, or be exacerbated by, extreme physical exertion (knee, ankle stress fractures, vertebral fractures, recurrent back pain, etc.).

(4) History of heat exhaustion or stroke.

(5) Any psychiatric condition that indicates the trainee may be unable to accept constructive criticism or function in a high stress environment. History of drug or alcohol abuse or suicide attempts must be thoroughly evaluated.

(6) History of claustrophobia, acrophobia, or pyrophobia.

(7) History of reactive airway disease or exercise-induced breathing difficulties.

(8) Defective color vision (inability to pass the farnsworth lantern).

(9) Uncorrected distant visual acuity worse than 20/200 in either eye, corrected to at least 20/20 in one eye and 20/30 in the other.

(10) A current (within 1 year) EKG, CXR, and PFT must be completed.

(11) Must have a H-2 profile.

c. The following statement MUST be on the DD Form 1610, **Request and Authorization for TDY Travel of DoD Personnel**, Block 16, Remarks, and verified by the individual's fire chief: Military (fire fighters): "A physical examination was accomplished IAW AFCAT 36-2223 on date. Additionally, the student named in these orders is certified as a fire instructor I, signed _____, Fire Chief." Civilian (fire fighters): Individual meets all GS-081, Fire Fighting and Fire Prevention series, OPM qualification standards, and a physical exam was accomplished IAW AFCAT 36-2223 on (date). Additionally, the student named in these orders is certified as a fire instructor I, signed: _____, Fire Chief."

d. The BDU or service specific uniform will be worn during both the classroom and performance training. The seasonal service uniform will be brought with the student in the event of a change to local policy. Civilians will be required to wear their uniform during the classroom portion of the course according to AFI 36-801. Protective clothing will be provided. Bring clothing to wear under protective clothing that can be soiled; i.e., jumpsuit, coveralls, sweat pants, and long sleeve shirts, etc. Steel-toed boots that cover the ankle are required.

Quota Control: HQ 2 AF/DOP.

X3ACR3E771 000—Supervisory Firefighter—PDS Code XL3—Goodfellow/2 wk—Oct 96

A 7-skill level training course for active-duty, Guard, Reserve, and civilian personnel. A new course developed to meet the recently updated specialty training standard, the needs of the career field, and directions from the Air Force Civil Engineering Support Agency (AFCESA). Provides training and evaluation for fire protection personnel who possess AFSC 3E751 and are aspiring to receive their 7-skill level and performing in positions up to the assistant chief of operations. Includes Quality Air Force, environmental concerns for fire protection, principles of aircraft entry during emergencies, principles of entry for buildings during emergencies, fireground emergency operations, strategies and tactics for POL and wildland fire emergencies, and simulator operations. The fireground emergency operations will include a minimum of two aircraft exercise responses involving hydrocarbon fuels and two structural fire exercises.

Prerequisites: AFSC 3E751 Staff sergeants or civilian equivalent in up-grade training to 3E771. Personnel should be qualified to operate structural and aircraft rescue and fire fighting vehicles. Civilian or military personnel currently filling the positions of driver/operator, crew chief, or station chief.

Special Requirements: Must be certified by the DoD Fire Fighter Certification System as a Fire Officer I and Fire Instructor I. These certification requirements are mandatory prerequisites and must be completed before attending the in-residence 7-level course at Goodfellow AFB TX. Must meet NFPA Standard 1582, *Medical Requirements for Fire Fighters,* and have no record of pyrophobia, acrophobia, or claustrophobia for entry, award, and retention of this AFSC. Must have a Secret clearance according to AFI 31-501, **Personnel Security Management Program**, for award and retention of this AFSC. Qualification to operate government vehicles is mandatory for retention of this AFSC. Normal color vision as defined in AFI 48-123, **Medical Examination and Standards**, is mandatory for retention of this AFSC.

Quota Control: HQ AFPC/DPPAPEO

X3AZR3E771 003—Fire Inspector/Investigator—PDS Code XX9—Goodfellow/5 wk 4 days—Apr 95

Provides the skills and knowledge necessary to perform fire prevention responsibilities in preparing written correspondence and inspection reports; managing time, information, complaint, and permit requests; researching codes and standards; conducting field inspections; assessing and applying of life safety requirements; classifying construction types; evaluating fire alarm and suppression systems or devices; estimating fire growth; verifying code compliance of commercial processes and operations, hazardous substances or materials, and building service equipment; verifying emergency planning and access; verifying fire flows; reviewing project plans; Air Force fire investigation requirements; role of the fire fighter in fire investigations; legal aspects; process of combustion; nature and behavior of fire; flammable liquids and gases; static electricity; classes of fire cause; fire effects on building materials; building collapse hazards; and fire investigation.

Prerequisites: AFSC 3E771, 3E791, or civilian equivalent, SSgt and GS-7 or higher; or in a fire protection organization assigned to fire prevention; assigned as a base fire chief; assistant chief of fire prevention, operations and readiness, operations, training, or station chief. Civilians in the fire prevention function area 70. Before attending course, students must be certified at the hazardous material awareness level and meet the requirements in NFPA Std 1031, section 1-3.1.

Special Requirements: The following actions must be taken before course attendance. ***NOTE***: If prerequisites and item a below are not completed, the member will be returned immediately to home station. A message will be sent to both the MAJCOM and the member's commanders.

a. The following statement MUST by on the DD Form 1610, **Request and Authorization for TDY Travel of DoD Personnel**, block 16, Remarks, and verified by the individual's fire chief: The individual is certified at the hazardous material awareness level and meets NFPA 1031, section 1-3.1, signed _____,Fire Chief.

b. All military personnel are required to bring at least one BDU and other service uniforms. Service uniforms will be worn during the classroom portion of the course. Civilians will be required to wear their uniforms during the course according to AFI 36-801. Students are required to bring coveralls, safety-toed footwear, and eye and hearing protection.

Quota Control: 2 AF/DOP.

X3AZR3E771 012—Hazardous Materials Train-the-Trainer—PDS Code WCX—DOD 495—Goodfellow/3 wk/MASL D122065—Oct 96

Trains DoD personnel in hazardous materials response team duties. Provides the knowledge and skills needed to become HazMat Train-the-Trainer (T-t-T) qualified/certified. Students graduating from this course graduate trained, qualified, and certified to teach HazMat at the awareness, operations, technician, and incident commander levels using the DoD-accredited HazMat policies, procedures, and program. This course meets all National Fire Protection Association (NFPA) Standard 471-472 requirements and fully complies with the Code of Federal Regulations (29 CFR 1910.120). Air Force fire fighters who succcessfully complete this course are eligible for the award of a 356 special experience identifier (SEI) as a HazMat Train-the-Trainer.

Prerequisites: AFSC 3E951/71, 3E771, or civilian equivalent. The course is designed to create DoD Hazmat T-t-T qualified/certified instructors who can provide comprehensive HazMat training at their home duty station. Career interest and an ambition to instruct others are desirable and should be the primary consideration when selecting someone to attend the course. The student selected to receive this training must be a high school graduate (or GED equivalent) and have a clear speaking voice, free of speech impediments. AFSC 3E771 or SSgt on 7-skill level upgrade training must be certified at the Fire Instructor I level before attending this course. Disaster preparedness personnel must be disaster preparedness apprentice course graduates (J3ALP3E391 003) and should obtain self-contained breathing apparatus training from their local base fire department before attending the course. All students (fire fighters and disaster preparedness personnel) selected to attend this course must receive a physical exam according to AFCAT 36-2223 within 12 months of the class start date to identify potential difficulties that may occur due to the extreme physical stress associated with the practical objectives of the course. Any impairment of pulmonary or cardiovascular functions disqualifies the student from the course. Civil service employees (lead fire fighters and above) must also meet the GS-081, Fire Fighting and Fire Prevention, series OPM qualification standards. ECL 80.

Special Requirements: The following actions must be taken before course attendance. ***NOTE***: If prerequisites are not met, students will be immediately returned to their home station. A message will be sent to both the MAJCOM and the member's commander.

a. Face must be shaven and maintained in a way that will not interfere with the wearing of the breathing apparatus.

b. A physical exam is required for all personnel attending this course (both military and civilian). An AF Form 422, **Physical Profile Serial Report**, must be completed within 60 days of the applicant's projected class date. The remarks section must clearly state that "a physical examination, as described in AFCAT 36-2223 has been accomplished and the applicant is medically qualified to participate in the demanding physical requirements of this course." The physical examinations and standards personnel will conduct a medical records review and schedule the applicant to see a health care provider. The provider's examination will be as extensive as deemed necessary in order to determine the applicant's suitability for attending this course. Medical personnel should pay particular attention to the following required tests and disqualifying defects:

(1) Inability to participate in extended periods of extreme physical exertion.

(2) Any condition which may preclude the member's ability to wear a respirator or speak clearly.

(3) Any orthopedic condition, or history of, which could be expected to interfere with, or be exacerbated by, extreme physical exertion (knee, ankle, stress fractures, vertebral fractures, recurrent back pain, etc.).

(4) History of heat exhaustion or stroke.

(5) Any psychiatric condition that indicates the trainee may be unable to accept constructive criticism or function in a high stress environment. History of drug or alcohol abuse or suicide attempts must be thoroughly evaluated.

(6) History of claustrophobia, acrophobia, or pyrophobia.

(7) History of reactive airway disease or exercise-induced breathing difficulties.

(8) Defective color vision (inability to pass the farnsworth lantern).

(9) Uncorrected distant visual acuity worse than 20/200 in either eye, corrected to at least 20/20 in one eye and 20/30 in the other.

(10) A current (within 1 year) EKG, CXR, and PFT must be completed.

(11) Must have an H-2 profile.

c. The following statement must be entered on DD Form 1610, **Request and Authorization for TDY Travel of DOD Personnel**, block 16, remarks section: MILITARY (fire fighter): "A physical examination was accomplished according to AFCAT 36-2223 on (date). Additionally, the student named in these orders is certified as a Fire Instructor I, signed _____, Fire Chief." CIVILIANS (fire fighter): "Individual meets all GS-081, Fire Fighting and Fire Prevention, series OPM qualification standards and a physical examination was accomplished according to AFCAT 36-2223 on (date). Additionally, the student named in these orders is certified as a Fire Instructor I, signed _____, Fire Chief." DISASTER PREPAREDNESS (military and civilian): "A physical exam was accomplished according to AFCAT 36-2223 on (date), signed _____, Readiness Flight Chief."

d. The BDU will be worn during classroom training. Civilians are required to wear their uniforms during the classroom portion of the course according to AFI 36-801. Students assigned to CONUS bases must bring their own protective clothing (turnouts or bunkers) to the course. Students assigned to overseas locations and students not assigned to USAF Fire Protection will be issued required protective clothing. Additionally, students should bring clothing to wear under their protective clothing that can be soiled (e.g., jumpsuit, coveralls, sweat pants, and long sleeve shirts, etc.). Steel-toed boots that cover the ankle are required.

Quota Control: 2 AF/DOP.

X3AZR3E771 015—Fire Inspector—PDS Code APG—Goodfellow/5 wk 4 days—Oct 96

Provides the skills and knowledge needed for all DoD firefighters to perform fire prevention responsibilities in preparing written correspondence and inspection reports; managing time, information, complaint and permit requests; researching codes and standards; conducting field inspections; assessing and applying life safety requirements; classifying construction types; evaluating fire alarm and suppression systems or devices; estimating fire growth; verifying code compliance of commercial processes and operations, hazardous substances or material, and building service equipment; verifying emergency planning and access; verifying fire flows; reviewing project plans.

Prerequisites: AFSC 3E771, 3E791, or civilian equivalent, SSgt, and GS-7 or higher or in a fire protection organization assigned to fire prevention; assigned as a base fire chief; assistant chief or fire prevention, operations and readiness, operations, training or station chief. Civilians in the fire prevention function area 70. Before attending, students must be certified at the hazardous material awareness level and meet the requirements in NFPA standard 1031, sections 1-3.1.

Special Requirements: The following actions must be taken before course attendance. NOTE: If prerequisites and the required statement below are not completed, the member will be returned immediately to home station. A message will be sent to both the MAJCOM and the member's commanders.

The following statement MUST be on the DD Form 1610, **Request and Authorization for TDY Travel of DoD Personnel**, block 16, Remarks, and verified by the individual's fire chief: "The individual is DoD certified at the hazardous material awareness level (IFSAC) and meets NFPA 1031, section 1-3.1, signed _____, Fire Chief."

Quota Control: HQ 2 AF/DOP.

L3AQR3E831 000—Explosive Ordnance Disposal (EOD) Preliminary—PDS Code 2CV—Lackland/1 wk 1 day—Mar 94

Provides formal preliminary training for nonprior service USAF, ANG, and Air Force Reserve personnel selected for duty in AFSC 3E8X1, Explosive Ordnance Disposal (EOD). Prepares trainees for further formal training conducted at Eglin AFB FL, and the US Navy Ordnance School at Indian Head MD. Trainees will be formally tested by use of both written and performance measurement instruments that conform to standardized AETC/USAF criterion referenced testing concepts. Training includes identification of munitions, use of EOD technical orders, EOD mission and history, performance of selected EOD tasks while wearing various chemical protective clothing ensembles, EOD range operations, chemical agents, explosives and explosive safety, and performance of demolition using live explosives. Students will also participate in a mandatory physical training program consisting of various calisthenics and a minimum of a timed 2-mile run. Students should be prepared to participate in this training. Students will also take a comprehensive testing covering all material in the course and meet a formal training board that will determine whether the student is qualifed to continue further in technical training.

Prerequisites: As outlined in AFMAN 36-2108.

Special Requirements: The following actions must be taken before course attendance. If these requirements are not met, student will be returned immediately to home station.

a. Student must be a US citizen and have a Secret (ENTNAC) clearance and BI initiated. Individuals selected for training must also be screened and identified as a Personal Reliability Program (PRP) resource according to AFI 36-2104. Air Force reserve components are exempt from the PRP requirement.

b. The following statements must be entered on the DD Form 1610, **Request and Authorization for TDY Travel of DoD Personnel**, "Amn is authorized incentive pay for hazardous duty while attending course of instruction in demolition duty. Identified member has been initally screened and meets reliability criteria stated in AFI 36-2104 for performance of nuclear weapons associated duties or other high risk duties. Background investigation was initiated on the following date: _____."

c. Students are required to bring three sets of battle dress uniforms, three short-sleeved blue shirts, two long-sleeved blue shirts, service coat, three service trousers, tie, and all appropriate accouterments and rank insignia. Students will also need foul weather gear. All classroom training will require students to be in blues; battle dress uniform is required for practical training, and service dress is required for graduation and formal board.

Administrative Instructions: Air Force Reserve students will report by 0800 2 duty days before class start date for inprocessing actions. Students will fax two copies of orders and travel itinerary to 342 TRS/CTFX, ATTN: EOD Preliminary Course (Fax DSN 473-4869.)

Quota Control: 2 AF/DOP.

J3ALP3E931 002—Readiness Apprentice Phase II (AFRES)—PDS Code L88—DOD 494—Ft McClellan/2 wk/AFSC 3E931—Apr 96

Provides training for civil engineer readiness technician qualification for AFRES personnel in the areas of HAZMAT management, nuclear accident response operations; and principles of land navigation. Students will receive training in peacetime and wartime response actions, effects of nuclear, biological, and chemical (NBC) warfare agents, and in the chemical defense training facility. NORAD plotting and both peacetime and wartime exercises are conducted. This course follows the J6AQP3E931 000, Readiness Apprentice, Phase I - Exportable (AFRES), which is a prerequisite for attendance at this course.

Prerequisites: Must have completed course J6AQP3E931 000, Readiness Apprentice, Phase I-Exportable (AFRES), training. Ability to speak clearly and distinctly. Must be physically and mentally fit to perform duties in actual chemically contaminated environment, using protective garments and mask.

Special Requirements: Secret clearance before class start date. Military students report to class in BDUs with BDU issue cap. Civilian employees should have clothing suitable for field wear. Students who wear glasses are required to have spectacle inserts for the MCU-2/P mask.

Special Instructions: Females who are pregnant are not to attend this course because of the nature of the numerous hazardous chemicals and radiological materials they will be exposed to. Females who discover they are pregnant while attending the course will be returned to their home unit. A subsequent medical evaluation should be accomplished upon return.

Admin Instructions: Report to the welcome center, bldg 3295, Ft McClellan AL, 1 day before class start date for assignment to quarters. Request an Air Force welcome package from the Welcome Center staff. Report to Munson Hall, bldg 2281, by 0700 on class start date. Make reservations for quarters in advance by calling (205) 848-4338, or DSN 865-4338. Transportation services on Ft McClellan are limited to commercial taxi. The cost for taxi service is $1 from billeting to anywhere on post, a reimbursable claim on the travel voucher. School phone number is (205) 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

J3ALP3E931 003—Readiness Apprentice—PDS Code LR3—Ft McClellan/8 wk 3 days/AFSC 3E931/MASL D173005—Apr 96

Training for airmen and civilians before initial assignment as readiness technicians within an Air Force civil engineer organization. Training includes: Air Force civil engineer organization and career field structure; general contingency responsibilities; Air Force Disaster Preparedness Program, organization, and responsibilities; readiness disaster response planning and supporting document preparation, peacetime response and recovery requirements for major accidents and natural disasters; wartime operations; nuclear, biological, and chemical (NBC) operations including detection and decontamination, plotting and reporting procedures for NBC hazards, and associated reports; installation training program; and instructor fundamentals. Students will perform wartime/peacetime exercises wearing protective equipment. Students will be required to perform wartime skills in a chemically contaminated environment under the direct supervision of qualified chemical specialists in the chemical detection training facility. Additional training covers threat vulnerabilities; tactical deception; camouflage, concealment and deception; Prime BEEF; and command and control actions.

Prerequisites: Ability to speak clearly and distinctly. Must be physically and mentally fit to perform duties in actual chemically contaminated environment, using protective garments and mask. ECL 70.

Special Requirements: Secret clearance by class start date. Military students report to class in BDUs with BDU issue cap or BDU baseball cap. Organizational caps are not authorized. Civilian employees should have clothing suitable for field wear. Students who wear glasses are required to have spectacle inserts for the MCU-2/P mask.

Special Instructions: Females who are pregnant are not to attend this course because of the nature of the numerous hazardous chemicals and radiological materials they will be exposed to. Females who discover they are pregnant while attending the course will be returned to their home unit. A subsequent medical evaluation should be accomplished upon return.

Admin Instructions: Students report to the Welcome Center, bldg 3295, Ft McClellan AL, 1 day before class start date for assignment to quarters. Request an Air Force welcome package from the Welcome Center staff. Report to Munson Hall, bldg 2281, by 0650 on class start date. Students must make reservations for quarters in advance by calling DSN 865-4338 or commercial (205) 848-4338. BDUs are the primary uniforms worn. Issue headgear must be worn. Transportation services on Ft McClellan are limited to commercial taxi. The cost for taxi service is $1 from billeting to anywhere on post, a reimbursable claim on the travel voucher. School phone number is 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

J3AQP3E931 000—Disaster Preparedness Specialist (ARF Phase I)—PDS Code L87—DOD 494—Ft McClellan/2 wk—Oct 95

Designed for ANG and Air Reserve personnel to become partially proficient as DP officers and NCOs. Not designed to train specialist DP teams. This course covers the following subiects: DP organization and mission; planning and management; major accidents; natural disasters conventional wartime defense. This course plus J3ALP3E931 002 (ARF Phase II) satisfy the requirement for completing a formal disaster preparedness course.

Prerequisites: Personnel from any career field with current or anticipated assignment to DP duty. Must speak clearly and distinctly and be able to use protective field mask.

Admin Instructions: Students report to the Welcome Center at Ft McClellan, bldg 3295, 1 day before class start date. Request a welcome package for Air Force disaster preparedness students at the welcome center desk. Report to Munson Hall, bldg 2281, by 0700 on class start date. Directions will be provided to guide students to classroom.

Quota Control: 2 AF/DOP.

J3ACP3E971 000—Readiness Craftsman—PDS Code 2A7—Ft McClellan/2 wk—Apr 96

Trains 5-skill level readiness journeymen upgrading to the 7-skill level with the appropriate balance of advanced technical skills and management tools necessary for mid-level management positions in a civil engineer readiness function. Training focuses on wartime threat analysis, command and control, passive defense, mobility issues and NBC warfare actions. Peacetime training issues focus on readiness flight management. Students are provided enhanced training on

major accident response, along with flight training management and logistics.

Prerequisites: Secret clearance. Five-skill level in the readiness career field.

Special Requirements: Students who wear glasses are required to have spectacle inserts for the MCU-2/P mask.

Special Instructions: Females who are pregnant are not to attend this course because of the nature of the numerous hazardous chemicals and radiological materials they will be exposed to. Females who discover they are pregnant while in attendance at this course will be returned to home unit. Subsequent medical evaluation should be accomplished upon return.

Admin Instructions: Students must report the Welcome Center, bldg 3295, Ft McClellan AL, 1 day before class start date for assignment to quarters. Request an Air Force welcome package from the Welcome Center staff. Report to Munson Hall, bldg 2281, by 0700 on class start date. Students must make reservations for quarters in advance by calling DSN 865-4338 or commercial (205) 848-4338. Transportation services on Ft McClellan are limited to commercial taxi. The cost for taxi service is $1 from billeting to anywhere on post, a reimbursable claim on the travel voucher. Bring BDUs and BDU issue cap. Organizational headgear is not authorized. Bring wet weather gear (if available). Civilians bring clothing suitable for field wear. School phone number is (205) 848-7512 or DSN 865-7512.

Quota Control: HQ AFPC/DPPAPEO.

J3AZP3E971 003—Readiness Refresher—PDS Code YJR—DOD 494—Ft McClellan/1 wk—Apr 96

Updates readiness flight program information for readiness flight personnel who have been fully qualified for 3 to 5 years. Emphasis of the course is placed on current management procedures to meet program requirements. Course provides training on recently field materials and assets. Stresses joint issues and interoperability. Includes guest speakers on special interest areas. Students receive training in the chemical defense training facility.

Prerequisites: Ability to speak clearly and distinctly. Must be physically and mentally fit to perform duties in actual chemically contaminated environment, using protective garments and mask.

Special Requirements: Secret clearance before class start date. Students who wear glasses are required to have spectacle inserts for the MCU-2/P mask.

Special Instructions: Females who are pregnant are not to attend this course because of the nature of the numerous hazardous chemicals and radiological materials they will be exposed to. Females who discover they are pregnant while attending the course will be returned to their home unit. A subsequent medical evaluation should be accomplished upon return.

Admin Instructions: Students report to the Welcome Center, bldg 3295, Ft McClellan, 1 day before class start date for assignment of quarters. Request an Air Force welcome package from the Welcome Center staff. Report to Munson Hall, bldg 2281, by 0700 on class start date. Students must make reservations for quarters in advance by calling DSN 865-4338 or commercial (205) 848-4338. Transportation services on Ft McClellan are limited to commercial taxi. The cost for taxi service is $1 from billeting to anywhere on post, a reimbursable claim on the travel voucher. Military must wear BDUs (bring issue headgear - organizational caps are not authorized). Civilian students must bring clothing suitable for field wear. School phone number is (205) 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

J3AZP3E971 005—Nuclear, Biological, Chemical (NBC) Cell Operations—PDS Code M0W—Ft McClellan/1 wk—Apr 96

Provides readiness officers, NCOs, and civilians with the basic knowledge and skills required to perform NBC attack and prediction and reporting of hazard areas in overseas theaters. Students will participate in an exercise which requires them to perform duties required to accomplish NBCC attack plotting, warning, and reporting, and assessment of NBC hazards. Students will evaluate incompacitation and lethal levels and will predict the duration of associated hazards.

Prerequisites: AFSC 32XX/3E9X1 or graduate of a disaster preparedness or readiness initial skills, AFSC-awarding course.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Students report to the Welcome Center at Ft McClellan, bldg 3295, 1 day before class start date for assignment to quarters. Request an Air Force welcome package from the Welcome Center staff. Report to Munson Hall, bldg 2281, by 0650 on class start date. Students must make reservations for quarters in advance by calling DSN 865-4338 or commercial (205) 848-4338. Transportation services on Ft McClellan are limited to commercial taxi. The cost for taxi service is $1 from billeting to anywhere on post, a reimbursable claim on the travel voucher. All authorized uniform combinations are acceptable. If BDUs are worn, the BDU cap must also be worn. School phone number is (205) 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

J4AST3E971 005—Nuclear, Biological, and Chemical (NBC) Cell Operations (MTT)—PDS Code W7D—various locations/1 wk—Apr 96

This mobile training team (MTT) provides training in NBC cell operations for readiness officers, NCOs, and civilians, giving them the basic knowledge and skills required to perform NBC attack predictions and reporting of hazard areas in overseas theaters. Students will participate in an exercise which requires them to perform the duties in an NBC cell.

Prerequisites: AFSC 32XX, 3E9X1, or graduate of a disaster preparedness or readiness initial skills, AFSC-awarding course.

Special Requirements: Secret clearance prior to class start date.

Admin Instructions: Requests for MTTs will be made by the organization requesting training through the 366 TRS readiness training manager at DSN 736-5227, commercial (817) 676-5227. Readiness school phone number is (205) 848-7512 or DSN 865-7512.

Quota Control: 2 AF/DOP.

L3ABR3M031 000—Apprentice Services Specialist—PDS Code XDB—Lackland/6 wk 1 day/AFSC 3M031/MASL D163001—Jun 94

Trains Air Force enlisted personnel entering the 3M0X1 career field. Duties of the AFSC cover quality Air Force, OPSEC, services career field, AFOSH and recreation safety; service automation; subsistence storage operations; sanitation and personal hygiene; principles of food preparation; cooking methods; flight and ground feeding operations; procedures for preparing food items; food preparation and serving techniques; program objectives and team concept; field feeding; field billeting; field laundry; wartime mortuary; field fitness

and recreation operations; field hygiene and sanitation; deployment practicum; Air Force sports and fitness program; wellness; program, activities, and operations management; lodging management; protection of assets; and program development, promotion, and planning.

Prerequisites: ECL 70.

Special Requirements: The following uniform requirements apply to assignment of ANG/AFRES students: three each long and short sleeve shirts, three pants, ribbons, ties, name tag and stripes, shoes, and flight cap. BDUs (three sets), steel-toed boots, BDU cap, and BDU jacket. Whites (three sets).

Quota Control: 2 AF/DOP.

L3ACR3M071 000—Services Craftsman—PDS Code WPH—Lackland/2 wk—Jan 96

Provides training for services enlisted personnel at the craftsman level. Trains personnel in the duties and responsibilities of a services craftsman for the Air Force to include concepts of Quality Air Force, automation, readiness, marketing and merchandising, customer service, financial management, strategic capital improvement planning, and services awards and recognition programs.

Prerequisites: Must have at least 18 months of time in grade as a SSgt in the services career field to attend the course.

Special Requirements: Report to the base lodging for quarters assignment. At this time, students will receive a base map of Lackland AFB as well as reporting instructions for the location of the services craftsman course. Course is taught on main base Lackland from 0730 to 1630. Bring one set of BDUs and ample sets of blue uniforms to wear every day. The uniform of the day is short sleeve blue shirt or blouse, blue pants or skirt, tie or tab, and ribbons. Bring two copies of orders on the first day of class.

Quota Control: HQ AFPC/DPPAPEO.

L3ABR3P031 000—Security Apprentice—PDS Code 3E9—Lackland/4 wk/AFSC 3P0X1—Oct 96

Trains personnel to perform the duties of a security apprentice. Includes training in OPSEC vulnerabilities of the AFSC, legal considerations and provisions, application of force, threats to US Air Force installations and resources, general security police duties, aerospace systems security operations, resource protection, nuclear security, cardiopulmonary resuscitation, Air Force Occupational Safety and Health Program, blood-borne pathogens and weapons safety, suicide awareness, and stress management.

Prerequisite: All students must attend either L3AQR3P031 003, Security Apprentice Ground Combat Skills, or L3AQR3P031 004, Security Apprentice (M60) Ground Combat Skills. ECL 70.

Special Requirements: International students must have a completed favorable background investigation. All entering students must meet weight and fitness standards according to AFI 40-502.

Note: Requests for waivers to any part of this course or prerequisite to this course should be directed to AFCFM according to AFI 36-2101. This course is now the AFSC-awarding course for the security police career field.

Quota Control: HQ 2AF/DOP.

L3ALR3P031 002—Security Apprentice—PDS Code 39H—DOD 830—Lackland/4 wk 2.5 days/AFSC 3P031/MASL D173006—Oct 96

Retrains personnel under the “Palace Balance” program in the knowledge and skills necessary to perform duties as a security apprentice including Security Police career field, programs, related areas, element sergeant duties and responsibilities, legal considerations, application of force, law enforcement operations, security operations, and cardiopulmonary resuscitation (CPR).

Prerequisites: MSgt (E-7) or above. Completion of course number L3AQR3P031 002. Members of other DoD services are not excluded; however, emphasis of the course is on law enforcement and security responsibilities specific to Air Force installations.

Special Requirements: In addition to seasonal requirements, students must have two pair of combat boots, at least three sets of BDUs, two sets of light blue short/long sleeve shirts with epaulets with appropriate pant/skirt, and service dress uniform. Students must have physical conditioning gear appropriate for current weather, including a good pair of running shoes. Non-USAF students must have comparable uniform items. Losing unit must screen and identify personnel selected for training as a PRP resource according to AFI 36-2104.

NOTE: This course runs concurrently with L3OBR31P1 004, Security Police Officer.

Quota Control: USAF, AFPC/DPMRA; All others, 2 AF/DOP.

L3AQR3P031 002—Security Apprentice Ground Combat Skills (Pal Bal)—PDS Code 269—Lackland/7 wk 3 days—Oct 96

Trains security police officers and senior noncommissioned officers cross-training into the security police career field to perform ground combat skills from a leadership perspective. Includes air base defense concepts and principles, air base defense mission, military operations other than war, air base defense communications, land navigation, indirect fire operations, individual tactical training, unit tactical training, command control and communications, and US weapons.

Prerequisites: Company grade officers in AFSC 31P1 and senior enlisted in AFSC 3POX1/2. Students must meet Air Force weight standards. Must also be prepared to perform vigorous physical conditioning to achieve field training objectives. Physical training program is based on Army FM 21-20. These courses are prerequisites to attending courses L3OBR31P1 004 and L3ALR3P031 002.

Special Requirements: Must have as a minimum three sets of woodland pattern battle dress uniforms to include the BDU cap, two pair of combat or tropical boots, running shoes, hygiene articles, and black leather gloves. In addition, from September through May, students must have as a minimum field jacket with liner, wool inserts for leather gloves, black wool cap, and cold weather underwear. Students must be prepared to purchase 40 meals-ready-to-eat (MREs) depending on dining facility availability. Students must hand carry medical records. Non-Air Force students must have comparable uniform items. Losing unit must screen and identify personnel selected for training as a PRP resource according to AFI 36-2104.

Quota Control: Air Force officers AFPC/DPMAPO, all others HQ 2 AF/DOP.

L3AQR3P031 003—Security Apprentice Ground Combat Skills (GCS)—PDS Code 268—Lackland/Camp Bullis/5 wk 1 day/MASL D173012—Oct 96

Trains security police (Amn thru SSgt) to perform duties as members of base defense flight elements. Course content includes basic communications, hand grenades, pyrotechnic signals, military operations in urban terrain (MOUT), employment of US mines, anti-armor techniques, map reading and terrain association/land navigation, patrolling, bivouac, US weapons, advanced marksmanship training, individual/unit tactical training, laws of land warfare, ABGD mission, and missions other than war.

Prerequisites: AFSC 3P011, 3P031 (Amn through SSgt). Must be prepared to perform rigorous physical conditioning to achieve field training objectives. ECL 70.

Special Requirements: Students must have a minimum of three sets of BDUs, to include BDU cap; two pair of combat or tropical combat boots; field jacket, normal toilet articles, to include towels and washcloths; and PT clothing. Mission readiness training students: a field jacket liner, military black gloves, and cold weather underwear are also required from 15 October thru 31 March. Mission readiness training students must bring AF Form 522, **Weapons Card**, to verify current qualification with the M-16 rifle. NOTE: PT clothing should include a good pair of running (jogging) shoes, not high-top basketball shoes that promote foot and leg injuries.

Admin Instructions: Mission readiness training students will report NET 0730 and NLT 1400 the day before class start date. Students will report at 0630 to Carter Hall, bldg 10215, for inprocessing. Mission readiness training students must present a commander's letter certifying that the student meets the requirements of AFMAN 36-2108 and AFI 40-502.

Quota Control: 2 AF/DOP.

L3AQR3P031 004—Security Apprentice (M-60) Ground Combat Skills—PDS Code 267—Lackland/Camp Bullis/6 wk 1 day/MASL D-173064—Oct 96

Trains security police (Amn thru SSgt) to perform duties as members of base defense flight elements. Course content includes basic communications, hand grenades, pyrotechnic signals, military operations in urban terrain (MOUT), employment of US mines, anti-armor techniques, map reading and terrain association/land navigation, patrolling, bivouac, US weapons, advanced marksmanship training, individual/unit tactical training, laws of land warfare, ABGD mission, and missions other than war.

Prerequisites: AFSC 3P011, 3P031 (Amn thru SSgt). Must be prepared to perform rigorous physical conditioning to achieve field training objectives.

Special Requirements: Students must have a minimum of three sets of BDUs, to include BDU cap; two pair of combat or tropical combat boots; field jacket, normal toilet articles, to include towels and washcloths; and PT clothing. Mission readiness training students: a field jacket liner, military black gloves, and cold weather underwear are also required from 15 October thru 31 March. Mission readiness training students must bring AF Form 522, **Weapons Card**, to verify current qualification with the M-16 rifle. NOTE: PT clothing should include a good pair of running (jogging) shoes (not hightop basketball shoes that promote foot and leg injuries).

Admin Instructions: Mission readiness training students will report NET 0730 and NLT 1400 the day before class start date. Students will report at 0630 to Carter Hall, bldg 10215, for inprocessing. Mission readiness training students must present a commander's letter certifying that the student meets the requirements of AFMAN 36-2108 and AFI 40-502.

Quota Control: 2 AF/DOP.

L3ABR3P032 000—Law Enforcement Apprentice—PDS Code 399—Lackland/4 wk 3 days/AFSC 30PX2—Oct 96

Trains personnel to perform the duties of a law enforcement apprentice. Includes training in OPSEC vulnerabilities of the AFSC, legal considerations and provisions, application of force, threats to US Air Force installations and resources, law enforcement tactics, general security police duties, law enforcement operations, aerospace systems security operations, resource protection, crisis intervention anad crime scenes, traffic operations, cardiopulmonary resuscitation, Air Force Occupational Safety and Health Program, blood-borne pathogens and weapons safety, suicide awareness, and stress management.

Prerequisites: All students must attend L3AQR3P032 002, Law Enforcement Ground Combat Skills. ECL 70.

Special Requirements: International students must have a completed favorable background investigation. All entering students must meet weight and fitness standards according to AFI 40-502. Note: Waivers to any part of this course or prerequisite to this course should be directed to AFCFM IAW AFI 36-2101.

Quota Control: HQ 2 AF/DOP.

L3AQR3P032 001—Law Enforcement Apprentice (Navy)—PDS Code XGD—Lackland/4 wk 2 days—Apr 95

Trains selected US Navy personnel to perform specialized duties at Naval installations and facilities as a member of the Navy Security Guard Force. Includes operations security, weapons safety, legal considerations and provisions, threat spectrum, law enforcement tactics, general police duties, cardiopulmonary resuscitation (CPR), challenging, search procedures, communications, law enforcement operations, resources protection, use of force and applying force, crisis intervention and crime scenes, traffic operations, aerospace systems security, terrorism/antiterrorism, and Air Force Occupational Safety and Health (AFOSH) Program (weapons safety).

Prerequisites: Students are screened according to ENLTRANS Manual, paragraph 9.07, to determine suitability for security assignment. Student will be required to meet minimum standards of physical readiness as outlined in OPNAVINST 6110.1 (series). Male students will not be more than 22 percent body fat composition; females not more than 30% body fat composition upon reporting to school. Must possess a valid state driver's license.

Special Requirements: Prescribed uniform is whites from the first Monday in March to the last Monday in November at which time it is blues. Full PT gear, to include running shoes, is required.

Admin Instructions: Government messing is available; berthing is available at $5.00 per day cost to the member. Student personnel are normally placed on per diem. Report to Navy Technical Training Center Detachment, Lackland AFB TX.

Quota Control: 2 AF/DOP.

L3AQR3P032 002—Law Enforcement Apprentice Ground Combat Skills—PDS Code 266—Lackland/Camp Bullis/5 wk/MASL D173042—Oct 96

Trains security police (Amn thru SSgt) to perform duties as members of base defense flight elements. Course content includes basic communications, hand grenades, pyrotechnic signals, military operations in urban terrain (MOUT), employment of US mines, anti-armor techniques, map reading and terrain association/land navigation, patrolling, bivouac, US weapons, advanced marksmanship training, individual/unit tactical training, laws of land warfare, ABGD mission, and missions other than war.

Prerequisites: AFSC 3P011, 3P031 (Amn through SSgt). Students must be prepared to perform rigorous physical conditioning in order to achieve field training objectives. ECL 70.

Special Requirements: Students must have a minimum of three sets of BDUs, to include BDU cap; two pair of combat or tropical combat boots; field jacket, normal toilet articles, to include towels and washcloths; and PT clothing. Mission readiness training students: a field jacket liner, military black gloves, and cold weather underwear are also required from 15 October thru 31 March. Mission readiness training students must bring AF Form 522, **Weapons Card**, to verify current qualification with the M-16 rifle. NOTE: PT clothing should include a good pair of running (jogging) shoes (not high-top basketball shoes that promote foot and leg injuries).

Admin Instructions: Mission readiness training students will report NET 0730 and NLT 1400 the day before class start date. Students will report at 0630 to Carter Hall, bldg 10215, for inprocessing. Mission readiness training students must present a commander's letter certifying that the student meets the requirements of AFMAN 36-2108 and AFI 40-502.

L3ALR3P032A 000—Military Working Dog Handler—PDS Code X34—Lackland/11 wk/AFSC 3P0X2A/MASL D173052—Oct 96

Provides training in the knowledge and skills needed to perform duties as a military working dog handler capable of handling dogs trained in patrol or detector tasks. Training includes safety procedures; maintenance of a dog to include grooming, inspecting health checkpoints, diseases, internal and external parasites, first aide, feeding and watering, medication and veterinary clinic procedures; maintenance of kennel and equipment; principles of conditioning; maintenance of the proficiency of dog in obedience, obedience course, controlled aggression, scouting, building search, vehicle patrol, conditions under gunfire, tracking, acting as a decoy; maintaining proficiency of dog teams; advice on use of dog teams; maintenance of records, reports, and forms; concepts of use; employment of search techniques; reaction to behavioral changes; explosive and chemical safety procedures; and legal considerations of military working dog use.

Prerequisites: AFSC 3P032, 3P052, 3P072, or equivalent for branches of the service other than the Air Force. Insofar as it is possible to determine, personnel selected should have a genuine liking for animals. Personnel who have had a splenectomy are prohibited from attending this course because of the significant occupational risk of working with dogs and encountering a life-threatening organism (DF2). ECL 70.

Special Requirements: Three sets of utility uniforms (battle dress uniforms or fatigues), two pair of combat or jungle boots, and appropriate headgear. TDY students must bring rain gear. Nonmilitary students are required to have a minimum of three work uniforms, two pair of utility shoes, and an organizational hat for protection from the sun. Cold weather gear, to include thermal underwear, gloves, and field jacket, are strongly recommended from October to May.

Quota Control: HQ 2 AF/DOP.

L3AZR3P051 001—81MM Mortar/Fire Direction Center—PDS Code JTR—DOD 830—Ft Hood/Lackland/2 wk 4 days—Dec 93

Qualifies student on mortar. Provides training in the maintenance and operation of the 81MM mortar and associated equipment. Training includes crew drills and tactical employment of the weapon, fire direction center operation, FO techniques, and live fire training with the weapon.

Prerequisites: AFSC 3P031/51/71 or 3P032/52/72 (AB through SSgt) or AFSC 3P1X1.

Admin Requirements: Students will be billeted on Lackland AFB. Training will be at Lackland and Ft Hood TX. Student's TDY orders should reflect the following in the itinerary section: "FROM: Home Base; TO: Lackland AFB; TO: Ft Hood, TO: Lackland AFB; RETURN TO: Home Base or Next Base" (as applicable). The remarks section of student's TDY orders must state "Billeting at Ft Hood will be IAW Interservice Agreement W45NQ85109-109, section 10, paragraph 5 (all Air Force personnel will be billeted together). Use of government mess facilities adversely affects the required mission. (AUTHORITY: AR 1-35, FORSCOM Sup, and DOD Manual 4000.19M with changes.) Training is not under field conditions."

Special Requirements: In addition to seasonal uniform clothing requirements, students are required to have three pairs of long sleeve fatigue/BDU uniforms, two pairs of combat or tropical combat boots, physical conditioning clothes and shoes, and a field jacket. Field jacket liner and thermal underwear are required from October through April. Due to limited storage, students should bring only essential personal clothing and effects.

Quota Control: 2 AF/DOP.

L3AZR3P051 002—.50 Caliber Machine Gun—PDS Code K5Q—DOD 830—Ft Hood/Lackland/1 wk 4 days—Dec 93

Qualifies student as machine gunner. Provides training in the maintenance and operation of the .50 caliber machine gun and associated equipment. Training includes crew drills, tactical employment of the weapon, and live fire training with the weapon.

Prerequisites: AFSC 3P031/32/51/52/71/72 (AB through SSgt) or AFSC 3P1X1.

Admin Requirements: Students will be billeted on Lackland AFB. Training will be at Lackland and Ft Hood TX. Student's TDY orders should reflect the following in the itinerary section: "FROM: Home Base; TO: Lackland AFB; TO: Ft Hood; TO: Lackland AFB; RETURN TO: Home Base or Next Base" as applicable. The remarks section of student's TDY orders must state "Billeting at Ft Hood will be IAW Interservice Agreement W45NQ85109-109, section 10, paragraph 5 (all Air Force personnel will be billeted together). Use of government mess facilities adversely affects the required mission. (AUTHORITY: AR 1-35, FORSCOM Sup, and DOD Manual 4000.19M, with changes.) Training is not under field conditions."

Special Requirements: In addition to seasonal uniform clothing requirements, students are required to have three pairs of long sleeve fatigue/BDU uniforms, two pairs of combat or tropical combat boots, physical conditioning clothes and shoes, and a field jacket. Field jacket liner and thermal underwear are required from October through April. Due to limited storage, students should bring only essential personal clothing and effects.

Quota Control: 2 AF/DOP.

L3AZR3P051 010—M60 Crew-Served Machine Gunner Qualification—PDS Code 1U5—DOD 012—Lackland/Camp Bullis/1 wk—Oct 95

Provides training in the operation and maintenance of the M60 machine gun. Training includes weapons safety, disassembly and assembly, inspection, preventive maintenance, techniques of fire, tripod, traversing and elevation mechanism, and range firing to the crew-served level according to AFI 36-2226.

Prerequisites: Students must possess either an 3P0XX or 3P1X1 AFSC.

Special Requirements: In addition to the seasonal uniform clothing requirements, students must have three pairs of long sleeved fatigue/BDU uniforms, two pairs of combat or tropical combat boots, physical conditioning clothes and shoes, and a field jacket. Field jacket liner and thermal underwear are required from October through April. Training is not under field conditions. Due to limited storage, students should bring only essential personal clothing and effects.

Quota Control: 2 AF/DOP.

L3AZR3P051 012—Base and Installation Security System (BISS) Operator—PDS Code 4FR—DOD 830—Lackland/2 wk/MASL D173058—Jun 94

Trains Air Force personnel in the knowledge and skills necessary to perform duties as a BISS operator. Training includes characteristics and limitations of sensors, Small Permanent Communications and Display Segment (SPCDS), Perimeter Surveillance System-Closed Circuit Television (PSSCCTV), and operation of SPCDS and PSSCCTV. Other areas of training include BISS concept of operations, response force control, SPCDS and PSSCCTV verification procedures, technical orders familiarity, and deficiency reporting. Course graduates are certified BISS operators (SPCDS and PSSCCTV) and are eligible for awarding of special experience identifier 323.

Prerequisites: AFSC 3P0XX and civilians of comparable experience selected for duties requiring BISS operator qualifications. ECL 80.

Special Requirements: Assigned or en route PCS to a base that has or will have BISS systems. Students must have three sets of fatigues or BDUs, two pairs of combat boots, and a security police beret. Rain gear and field jacket are recommended. Thermal underwear is recommended from November to March. Restrictions: Organizational headgear is not authorized. The security police blue jacket will not be worn with the utility uniform while attending this course.

Quota Control: 2 AF/DOP.

L3AZR3P051 013—MK 19 Mod 3 40mm Machine Gun Qualification—PDS Code 45N—Lackland/Camp Bullis/1 wk—Dec 93

Provides training for Air Force personnel with AFSC 3P1XX or 3P0XX and other DOD personnel in the knowledge and skills needed to perform the duties of an MK 19 40mm machine gunner. Training includes weapon safety, operator maintenance, fundamentals and techniques of firing, loading and unloading, and firing. Firing includes completion of prescribed qualification course of fire from both tripod and vehicle mounting platforms.

Prerequisites: Air Force personnel should possess AFSC 3P1XX or 3P0XX.

Special Requirements: In addition to seasonal uniform clothing requirements, students must have three pairs of long sleeve fatigue/BDU uniforms, two pairs of combat or tropical combat boots, field jacket, and physical conditioning clothes and shoes. A field jacket liner and thermal underwear are also required from October through April. Training is not under field conditions. Due to limited storage, students should bring only essential personal clothing and effects.

Quota Control: 2 AF/DOP.

L3ACR3P071 000—Security Craftsman—PDS Code XB7—Lackland/2 wk/AFSC 3P071/MASL D173048—Oct 96

Training in the knowledge and skills necessary to be awarded the 7-skill level. Students are NOT taught how to supervise. Training focuses on a variety of security police related functions taught at the supervisory level. Includes security operations, Air Force physical security program, law enforcement operations, security police training and quality control programs, budget, supply and manpower, suicide awareness, stress management, technical updates security policy automated system, and supervisory ground combat skills.

Prerequisites: SSgt with 18 months of time in grade with CAFS 3P051. ***NOTE***: Because this course is a skill level awarding course, DoD civilians, international students, and other branches of the DoD will not be authorized to attend.

Special Requirements: BDUs (only authorized uniform for course).

Quota Control: HQ AFPC/DPPAPEO.

L3AZR3P071 005—NCO Ground Combat Skills (GCS)—PDS Code 398—Lackland/5 wk 1 day—Oct 96

Trains security police noncommissioned officers to perform as flight sergeants and squad leaders of base defense flights. Includes tactical communications, land navigation, artillery operations, early warning devices, troop-leading procedures, combat orders, patrolling, military operations on urban terrain, light offensive and defensive operations, and flight weapons refresher training.

Prerequisites: AFSCs 3P051/52A/72A in grades of SSgt or SSgt-selectees through master sergeant are eligible to attend. Students must meet Air Force weight standards. Furthermore, students must be highly motivated and prepared to perform rigorous physical conditioning to achieve training objectives.

Special requirements: Must have a minimum of three sets of woodland pattern battle dress uniforms to include cap, two pair of combat or tropical boots, running shoes, hygiene articles, and black leather gloves. In addition, from September through May, students must have at a minimum field jacket with liner, wool inserts for leather gloves, black wool cap, and cold weather underwear. Students must be prepared to purchase 15 to 24 meals-ready-to-eat (MREs) depending on dining facility availability. Students must handcarry medical records.

Quota Control: HQ 2AF/DOP.

L3ACR3P072 000—Law Enforcement Craftsman—PDS Code XB8—Lackland/2 wk/AFSC 3P072/MASL D173044—Oct 96

Training in the knowledge and skills necessary to be awarded the 7-skill level. Students are NOT taught how to supervise. Training focuses on a variety of security police related subjects taught at the supervisory level. Includes law enforcement operations, Air Force physical security program, security police training and quality control programs, suicide awareness, stress management, security police automated system, operations planning, budget, supply and

manpower, community policing, and supervisory ground combat skills.

Prerequisites: SSgt with 18 months of time in grade with CAFS 3P052 or 3P052A. ***NOTE:*** Because this course is a skill level awarding course, DoD civilians, international students, and other branches of the DoD will not be authorized to attend. ECL 80.

Special Requirements: The light blue shirt with long or short sleeves, with ribbons for males and the long or short sleeve blouse with ribbons for females, and skirt or pants will be worn for normal class functions. In addition, students will bring two sets of BDUs. Students will report for the first day of class in the blue shirt/blouse combination with ribbons.

Quota Control: HQ AFPC/DPPAPEO.

L3AZR3P072 005/L4AST3P072 005—Traffic Management and Accident Investigation—PDS Code N40—DOD 830—Lackland/3 wk 2 days/MASL D173043—Dec 93

Training in legal aspects of installation traffic offenses, speed measurement devices, drug and alcohol countermeasures, investigative planning, analyzing components of a traffic accident, speed estimates of accident vehicles, accident investigation photography, diagramming a traffic accident, preparation of traffic accident reports, and hit-and-run investigation.

Prerequisites: USAF: AFSC 3P052, 3P072, 3P090 in grade E-4 or above, and 1S0X1; AFSC 31P3/1 in grade 2d Lt through Capt. USMC: MOS 5811 or 5813 in grade E-4 through E-7 and 5803 in grade O-1 through O-3. USA: MOS 95B20, 95B30, 95B40, or 95B50 in grade E-4 or above; MOS 31A in grade O-1 through O-3. USN: Master-at-Arms in grade E-4 or above, O-1 through O-3. All DoD civilians, regardless of grade who are performing a law enforcement mission. (Requests for waiver may be granted on a case-by-case basis.) ECL 80.

Special Requirements: Fatigues, BDUs, or utilities are the only authorized uniforms to be worn during the duration of the course. DOD civilians will wear the prescribed DoD duty uniform during training. Cold and wet weather gear are necessary based on seasonal requirements.

Quota Control: 2 AF/DOP.

L3AZR3P072A 003—Military Working Dog Trainer/ Supervisor—PDS Code 51P—DOD 830—Lackland/4 wk/MASL D173004—Oct 96

Instruction on Air Force management and supervision of the Military Working Dog Program at the unit level. Provides training for DoD personnel and international students. Includes transportation requirements for military working dogs and teams; a kennel section's operational responsibilities; resources required to operate a military working dog section; procedures for management of military working dog teams during air base survivability operations; principles of conditioning; procedures for procurement and maintenance requirements of drug training aids; evaluating employment of military working dog teams; proficiency training requirements for a military working dog; procedures for procurement and maintenance requirements of explosive training aids; evaluation and remedial action procedures for military working dog teams; and aspects of dog care and conduct protocol training on a potential detector dog. NOTE: Graduates of L3AZR3P072A 001 are required to attend the new course.

Prerequisites: Students: 1. Must be in AFSC 3POX2A or equivalent if from another service, DoD hired, or international personnel. Student must also be a graduate of the military working dog handler course or any equivalent course. (This request is nonwaiverable).

2. Should have a minimum of 18 months of experience in the Military Working Dog Program.

3. Must be in the grade of Sgt (E-4) through CMSgt for all military personnel.

4. Must hold the position of kennelmaster or military working dog trainer.

5. Must be a graduate of the military working dog handler course. This requirement is waiverable for kennelmasters, but not for trainers. Request for waiver should contain a summary of the individual's experience from the chief of security police or the unit commander. This summary should include dates, duty positions, and assignment locations.

6. International personnel: ECL 70.

7. Personnel who have had a splenectomy (surgical removal of the spleen) are NOT authorized to attend this course due to occupational risk of being exposed to a life-threatening organism identified as DF2.

Special Requirements: 1. One light blue shirt with long or short sleeves.

2. Three sets of utility uniforms or battle dress uniforms with appropriate accessories. Civilian students will be required to wear long pants and high boots when training in the field. Thermal underwear is recommended from October through May.

3. Organizational headgear is not authorized for military personnel.

4. TDY students must bring rain gear.

5. A $12 reimbursable fee is required to observe training sessions with mammals at Sea World. This requirement is an official curriculum item.

NOTE: Graduates of the previous Military Working Dog Trainer/Supervisor Course, L3AZR3PO72A 002, meet the requirements of attendance according to AFI 31-202, *Military Working Dog Program*. Past graduates need not attend this new course.

Quota Control: 2 AF/DOP.

L3AZR3P090 001—Security Police Superintendent Symposium—PDS Code 7L0—DOD 830—Lackland/1 wk/MASL D173050—Dec 93

Provides training in security police programs and systems, activities, career field, and resource issues. Students share mutually beneficial career experiences and receive timely information from authorities in the aforementioned security police functions and related areas.

Prerequisites: AFSC 3P071, 3P072, 3P072A, 3P090, MSgt (and selectees) through CMSgt, and civilians of comparable grade and position. This course is not recommended for members of other branches of service. ECL 70.

Special Requirements: Seasonal uniform required.

Quota Control: 2 AF/DOP.

L3ABR3P131 001—Combat Arms Training and Maintenance Apprentice—PDS Code ZSJ—DOD 012—Lackland/9 wk 3 days/AFSC 3P131/MASL D122079—Jun 94

Provides weapons maintenance training for the handgun, rifle, grenade launcher, machine gun, and shotgun. Training includes live fire qualification according to AFHB 36-2227, range operations, the fundamentals of marksmanship, and principles and techniques of instruction. Students will prepare and present lessons during the principles and techniques of instruction part of the course.

Prerequisites: Must have the ability to speak English clearly and distinctly according to AFMAN 36-2108 (formerly AFR 39-1). ECL 80 SR.

Special Requirements: In addition to seasonal uniform clothing requirements, students are required to bring three pairs of long sleeve fatigue/BDU uniforms, two pairs of combat or tropical combat boots, physical conditioning clothes and shoes, field jacket, and a minimum of three blue uniforms (any combination). Field jacket liner and thermal underwear are required from October through April. Training is not under field conditions. Due to limited storage, students should bring only essential personal clothing and effects.

Quota Control: 2 AF/DOP.

L3ACR3P171 000—Combat Arms Training and Maintenance Craftsman—PDS Code X0K—Lackland/2 wk/AFSC 3P171—Oct 96

Provides training on combat arms training and maintenance (CATM) operations and facility maintenance, arming and use of force, ground and explosive safety, resource protection, AF Inspection Program, and environmental protection.

Prerequisites: Must possess either 3P151 or 3P151A AFSC and must have completed a minimum of 18 months of 7-skill level OJT toward the 3P171 AFSC.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR3S031 004—Personnel Apprentice—PDS Code XDN—Keesler/5 wk 4 days/AFSC 3S031/MASL D161006—Jun 94

Covers personnel duties such as keyboarding and recorded and written communications, general administrative procedures, computer operations, personnel relocation and personnel employment, career enhancement, customer service, and orderly room procedures.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

E3ALR3S032 002—Personnel Systems Management Apprentice—PDS Code TS2—Keesler/5 wk 4 days/AFSC 3S032—Apr 95

Provides training in the functions and procedures of the personnel systems management (PSM) workcenter of the MPF. Instruction is provided in central tables, personnel systems fundamentals, PSM responsibilities, Direct English Statement Information Retrieval (DESIRE), data base management, PC-III fundamentals and HAF access.

Prerequisites: Must possess AFSC 3S051 or 3S071. ECL 70.

Quota Control: 2 AF/DOP.

E3ACR3S071 002—Personnel Craftsman—PDS Code WKF—Keesler/2 wk/AFSC 3S071—Apr 95

Provides training for Air Force personnel who meet the requirements for award of the personnel craftsman 7-skill level AFSC. Includes personnel structure and mission, military personnel data system management products, support of contingency operations, management and supervision, oral communications skills, and quality Air Force (QAF).

Prerequisites: Must have completed all requirements for award of the AFSC 3S071.

Quota Control: HQ AFPC/DPPAPEO.

E3AZR3S071 011/E4AST3S071 009—MANPER-B Systems Course—PDS Code W1M—DOD 221—Keesler/2 wk—Dec 93

Teaches Air Force personnel to operate the contingency operations/planning and execution system (COMPES), manpower and personnel base level (MANPER-B) computer system-a component of the Air Force Command and Control System (AFC2S). Trains personnel in AFSCs 36XX, 38XX, and 3SXXX on all the functional capabilities of MANPER-B to support deliberate planning, mobility management, OPlan execution, deployment processing and Air Force personnel accountability/reporting requirements, and force management.

Prerequisites: One year of experience in manpower or personnel. Experience requirements may be waived by MAJCOM. Must be assigned to a personnel readiness unit, a PERSCO team member, or assigned to a manpower position currently operating or projected to operate the MANPER-B system.

Special Requirements: Military personnel must bring at least one blue uniform. BDUs will be worn during the entire training period.

Quota Control: 2 AF/DOP.

E3ACR3S072 000—Personnel Systems Management Craftsman—PDS Code WKE—Keesler/2 wk/AFSC 3S072—Apr 95

Provides training for Air Force personnel who meet the requirements for award of the personnel systems management craftsman 7-skill level AFSC. Includes systems architecture, security and customer support, trend analysis utilizing management products and SAMUEL, problem solving, status reports, and DESIRE.

Prerequisites: Must have completed all requirements for award of the AFSC 3S072.

Quota Control: HQ AFPC/DPPAPEO.

J3AIR3S200 002/J4AIT3S200 000—Principles of Instruction—PDS Code 7U7—DOD 570—Sheppard/2 wk/MASL D166039—Apr 95

Trains active duty Air Force, USAFR, ANG, and other DOD personnel involved in conducting instruction. Includes instructional methodology with emphasis on actual practice teaching. The major subject areas include the learning process, communicative skills, curriculum development, instructional media, student measurement, lesson planning, questioning techniques, and student counseling. This course is taught at Sheppard AFB. The mobile version J4AIT3S200 is dispatched from Sheppard AFB.

Prerequisites: Course is available for instructor candidates from all MAJCOMs for both T-Prefix and non T-Prefix instructor positions. T-Prefix may be awarded according to provisions of AFMAN 36-2105 or AFMAN 36-2108, as applicable. Career interest and ambition to instruct are desirable. Clear-speaking voice and quality appearance and personal habits are desirable. ECL 70.

Quota Control: 2 AF/DOP.

NOTE: Does not qualify personnel for award of “T” prefix.

J3AZR3S200 003/J4AST3S200 003—Computer-Based Instruction (CBI) Designer—PDS Code 6DQ—Sheppard/4 wk 3 days/MASL D166046—Oct 95

Provides training for Air Force and other DOD personnel with responsibility to design computer-based training. Students receive hands-on training using computers to develop instruction. Includes computer familiarization, media selection, CBI methods of presentation and management, and the use of authoring tools in creating instruction. Instructional methods used include CAI tutorials, lecture, group work, and independent study.

Prerequisites: None. Completion of either J3AZR3S200 005 or J4AZT3S200 005, Instructional Systems Designer Course, or an equivalent is desirable. In addition, 6 months of instructional development experience is desirable. ECL 70.

NOTE: Mobile training version of this course is J4AST3S200 003.

Quota Control: 2 AF/DOP.

J3AZR3S200 006—Managing Multimedia—PDS Code RVC—DOD 570—Sheppard/2 wk 3 days/MASL D166014—Apr 95

Training for selected Air Force instructors, instructor supervisors, and training specialists in designing and developing audiovisual materials for Air Force training programs. Includes learning theories and communications process, media selection and operational characteristics of audiovisual production and playback equipment, development of visual materials, writing principles for audiovisual packages, development of audio narratives, construction of audiovisual storyboard and production of audiovisual lessons. Students will produce a sound/slide program, develop a video recording (working as team members), prepare transparencies design flip charts, demonstrate effective chalkboard techniques, and develop an audio recording. Approximately 80 percent of this course consists of performance, including script writing and use of cameras (video and still), photographic copy equipment, audio and video recorders, computer graphics, video editing, mixers, transparencies, flip charts, and chalkboards.

Prerequisites: One year as instructor, instructor supervisor, or training specialist. Satisfactory completion of a course in ISD is desired. Qualified officers, airmen, and Air Force civilians are eligible. ECL 70.

Special Requirements: Students should bring the reference material, graphics or small photographable materials to support visual portion of program. Students may use personal 35mm single-lens (through the lens metering) reflex camera.

Quota Control: 2 AF/DOP.

(*)3AIR3S200 072—Fundamentals of Teaching—PDS Code XLP—location: designated training centers/1 wk—Oct 96

Trains selected personnel to instruct in technical training courses. Provides training on instructor roles, group dynamics, counseling, learning theory, instructional systems development (ISD), communicative process, questioning techniques, evaluations, outlining, and delivery of a presentation. ***NOTE:*** This course is also 1 of 3 modules that, when combined, make up ( )3AIR3S200-075. Instructors teaching CCAF affiliated courses must obtain at least a CCAF degree within 1 year of assignment.

Quota Control: 2 AF/DOTF.

*Goodfellow (X3AIR3S200 072); Keesler (E3AIR3S200 072); Lackland (L3AIR3S200 072); Sheppard (J3AIR3S200 072), Vanderberg (V3AIR3S200 072).

(*)3AIR3S200 073—Training Methodologies—PDS Code XLQ—location: designated training centers/2 wk—Oct 96

Trains selected personnel to instruct in technical training courses. Training is primarily performance based. Students plan, develop, and present lessons using lecture and demonstration/performance methods of instruction. ***NOTE:*** This course is also 1 of 3 modules which, when combined, make up ( )3AIR3S200-075. Instructors teaching CCAF affiliated courses must obtain at least a CCAF degree within 1 year of assignment.

Special Requirements: TDY students are to bring reference material on their specialty for use in preparing and presenting a job or course related lesson.

Quota Control: 2 AF/DOTF.

*Goodfellow (X3AIR3S200-073); Keesler (E3AIR3S200-073); Lackland (L3AIR3S200-073); Sheppard (J3AIR3S200-073), Vandenberg (V3AIR3S200 073).

(*)3AIR3S200 074—AETC Training Policy and Procedures—PDS Code XLR—location: designated training centers/1 wk—Oct 96

Trains selected personnel to instruct in technical training courses in AETC. Provides training on AETC technical training organization, AETC course control documents, AETC forms, instructional methods and media, AETC lesson plan format, and delivery of a presentation. ***NOTE***: This course is also 1 of 3 modules that, when combined, make up ( )3AIR3S200-075. Instructors teaching CCAF affiliated courses must obtain at least a CCAF degree within 1 year of assignment.

Quota Control: 2 AF/DOTF.

*Goodfellow (X3AIR3S200-074); Keesler (E3AIR3S200-074); Lackland (L3AIR3S200-074); Sheppard (J3AIR3S200-074), Vandenberg (V3AIR3S200 074).

(*)3AIR3S200 075—Basic Instructor Course—PDS Code XLS—location: designated training centers/4 wk—Oct 96

Trains selected personnel to instruct in technical training courses in Air Education and Training Command. Provides training on instructor roles, group dynamics, counseling, learning theory, instructional systems development (ISD), communicative process, questioning techniques, evaluations, outlining, AETC technical training organization, AETC course control documents, AETC forms, instructional methods and media, and AETC lesson plan format. Students plan, develop, and present lessons using lecture and demonstration/performance methods of instruction. ***NOTE:*** This course is made up of 3 modules: ( )3AIR3S200-072; ( )3AIR3S200-073; and ( )3AIR3S200-074. Instructors teaching CCAF affiliated courses must obtain at least a CCAF degree within 1 year of assignment.

Special Requirements: TDY students are to bring reference material on their specialty for use in preparing and presenting a job or course related lesson.

Quota Control: 2AF/DOTF.

*Goodfellow (X3AIR3S200-075); Keesler (E3AIR3S200-075); Lackland (L3AIR3S200-075); Sheppard (J3AIR3S200-075), Vandenberg (V3AIR3S200 075).

J3ACR3S271 000—Education and Training Craftsman—PDS Code XHL—Sheppard/2 wk/MASL D166050—Jan 96

Provides training in program administration and management functions of a work center, conducting external analysis of education and training programs, evaluating the instruction of training courses, training education and training personnel, and responsibilities of an OPR for Enlisted Specialty Training.

Quota Control: HQ AFPC/DPPAPEO.

E3ALR3U031 002—Manpower Management Journeyman—PDS Code R9T—DOD 500—Keesler/8 wk 3 days/AFSC 3U031/MASL D162007—Oct 96

Teaches basic Air Force management engineering tools and techniques for continuous process improvement and process reengineering. Also teaches Air Force policies and procedures on the use of manpower resources, productivity programs, and Air Force organizations. Instruction includes computer-based and statistical analysis. Wing manpower office chief must interview applicant, and applicant must show proficiency in algebra.

Prerequisites: A certificate is required by a MET commander indicating applicant has been interviewed and found acceptable for duty as a manpower management specialist. Grade series for civilians (GS-5 to GS-9). Current proficiency in basic algebra. ECL 80.

Quota Control: 2 AF/DOP.

E3ACR3U071 000—Manpower Management Craftsman—PDS Code XX5—Keesler/2 wk—Oct 96

Teaches Air Force advanced management engineering tools and techniques for continuous process improvement and process reengineering. Also teach advanced concepts on the use of manpower resources and productivity programs. Includes computer-based and statistical analysis. E3ALR3U031 002 is a prerequisite.

L3AQR4A231 800—Electronic Principles—PDS Code W4R—Lackland/9 wk 2 days/MASL D131133—Apr 95

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for AFSC 4A231. Training includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, computer principles, microprocessors, and soldering. A training day for this course constitutes a 6-hour day plus 2 hours of supervised study. Training is tailored to the prerequisites of the follow-on course (J3ABR4A231 001).

Prerequisites: Air Force: See AFI 36-2108. ECL 70.

Admin Instructions: a. Retrainees who have received prior Air Force electronics principles training in subject content covered by this course must request a waiver by message through their MAJCOM to the 342 TRS/TTX, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, citing by course number when and where the training was received. Upon approval of waiver, the retrainee will be scheduled for the equipment portion of the basic course.

b. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

M3ALR5J031—Paralegal Apprentice Course—PDS Code WV8—Maxwell/6 wk 1 day/AFSC 5J031—Apr 96

Legal office administration procedures include legal research, legal assistance program, and law library. Application of the manual for courts-martial and Air Force policy and procedures in the administration of military justice and legal organization and functions; prepares papers for pretrial, trial proceedings, post-trial, and Article 15, UCMJ actions; and operation of personal computer. Claims administration includes investigation and processing claims. Refer to table 3.14, rule 1, for fund citation and tables 4.3 and 4.4 for reporting instructions and orders preparation.

Prerequisites: No defects in hearing or speech or record of emotional instability. High school graduate with course in English desirable. Must meet minimum typing requirements as specified in AFI 36-2108.

Quota Control: HQ USAF/JA.

M3AZR5J051—Claims Administration—PDS Code WVQ—Maxwell/2 wk—Apr 96

Paralegal claims administration including investigating and processing for and against the government. Refer to table 3.4, rule 1, for fund citation and tables 4.3 and 4.4 for reporting instructions and orders preparation.

Prerequisites: No defects in hearing or record of emotional instability. High school graduate with courses in math. Course is for new JAG department civilian claims examiners.

Quota Control: HQ USAF/JA.

M3ACR5J071—Paralegal Craftsman Course—PDS Code 589—Maxwell/6 wk—Apr 96

This course is divided into five curriculum areas: (1) supervision, training, law office administration and management, and ethics, (2) legal research and office automation, (3) civil law, (4) military justice, and (5) claims. The curriculum provides an indepth review of all statutes applicable to the operation of a legal office. **Area I** is designed to tailor supervision and training to the legal office environment, as rotation within the different divisions of a legal office plays a major role in these areas and, if not done properly, can degrade the mission. **Area II** is devoted to legal research and office automation. Students are trained in the use of computer research and the preparation of a legal brief. They are given several cases to research through the use of both manual and computer legal research methods. They are also trained on the various software developed by AFLSA/JAS for use within the JAG department. **Area III** deals with the many issues which arise in the area of civil law to include the process for administrative separation actions and the preparation of the legal reviews of these actions; adverse administrative actions, inquiries, and investigations; civil law programs and directives; and environmental law, contract law, labor law, and international and operations law. **Area IV** provides indepth coverage of military justice. Major areas covered are jurisdiction, quality force management, pretrial procedures, court-martial proceedings, post-trial procedures, automated military justice analysis management system, and Article 15 actions. **Area V** provides advanced instruction on potential claims and tort litigation both in favor of and against the Air Force; the investigation, adjudication, and settlement of tort litigation; and management of all phases of Air Force claims and tort litigation operations.

Prerequisites and Selection: Must possess a 5-skill level and be in the grade of SSgt or higher and meet the minimum time in upgrade training to the 7-skill level.

Quota Control: HQ USAF/JA.

L3ABR6C031 005—Contracting Apprentice—PDS Code FQS—Lackland/4 wk/AFSC 6C031—Oct 96

20-day course divided into two 10-day phases of training. The first 10-day phase allows participants to complete detailed study of small purchase procedures and regulations as outlined in the Federal Acquisition Regulation (FAR) and the Defense Federal Acquisition Regulation Supplement (DFARS). Emphasizes developing competencies and applying ethical principles in performing basic small purchase tasks. Geared to those individuals assigned to a base, post, camp, or station with examples and exercises representative of these experiences. The second 10-day phase is designed to assist Air Force personnel at the operational contracting level. Focuses on Air Force-specific requirements ensuring a mission-ready graduate. Topics include Air Force contracting mission, the contracting environment, and actual hands-on experience with real-time awards through the use of small and simplifired purchasing procedures. Special emphasis placed on providing individuals the ability to interact with automation through the use of the base contracting automated system and soon electronic commerce/electronic data interface.

Prerequisites: Airman basic and above who perform small purchasing contracting duties.

Quota Control: HQ 2 AF/DOP.

L3ACR6C071 000—Contracting Craftsman—PDS Code YEF—Lackland/4 wk/AFSC 6C071—Oct 96

Covers preaward and postaward issues in depth for service, construction, and commodity contracts at the Air Force level. Includes review of specifications, preparation of invitation for bids, requests for proposal, and basic purchasing agreements, types of contracts, clearance process, protests, disputes, post-orientation conferences, labor laws, modifications, negotiations, payments, and contract closeout. Additionally, simplified acquisition base engineering requirements contracts, architect and engineering contracts, environmental contracts and contingency contracting issues will be discussed.

Prerequisites: SSgt with 5-skill level in 6C0X1 career field with completed upgrade training necessary to obtain 7-skill level.

Quota Control: HQ AFPC/DPPAPEO.

L3AZR6C071 004—Contract Placement—PDS Code 5CW—Lackland/2 wk 4 days/MASL D152021—Jun 94

Designed for intermediate level contracting personnel, this preaward course concentrates on management functions in the preaward phase of contracting above the small purchase threshold and contract problem analysis resolution. Contract placement provides participants with the skills and knowledge necessary to make effective preaward contracting decisions as it relates to base/installation level contracting functions. The course provides participants with a full working knowledge of the Federal Acquisition Regulation (FAR) policies and procedures. Core curriculum consists of contracting authority and responsibility, requirements of CICA, types of contracts, procedures associated with technical requirements reviews, sealed bidding and source selection policies and procedures, and negotiation strategies and techniques. There is the possibility of up to 2 hours of homework each academic day.

Prerequisites: Intermediate level contracting personnel with not less than 1 year of contracting experience above the small purchase threshold. ECL 70 SA.

Quota Control: 2 AF/DOP.

L3AZR6C071 008—Base Level Quality Assurance Evaluation Program Coordinator—PDS Code 4QB—Lackland/1 wk 4 days—Jun 94

Provides extensive knowledge of quality assurance and contractor surveillance policies and procedures. Specific attention is given to the complete understanding of the performance work statement and varying degrees of quality assurance requirements. Further, since the participants are to provide training to others, emphasis is placed on instructional methodology, creation and use of training documents, and preparing and conducting instruction. Individuals are expected to prepare for and provide oral presentations. There is the possibility of up to 2 hours of homework each academic day.

Prerequisites: Only personnel designated to provide contracting officer's representatives with training in the area of quality assurance policies and procedures.

Quota Control: 2 AF/DOP.

L3AZR6C071 009–Base Contracting Automated System (BCAS)–PDS Code 5JS–Lackland/3 wk 1 day-Oct 96

Provides training in the knowledge and skills needed for an overall understanding of systems administrator operations, setup, and maintenance. Introduces students to the virtual storage (VS) system, its components, configuration, storage, and processing capabilities. Instruction will include actual automated processing of all contracting phases: requisition, solicitation, award, and administration to include analysis of management data.

Prerequisites: Course is open to officers, enlisted, or civilians who are assigned as chief, management analysis branch, or equivalent, and the system administrator or equivalent with 6 months of BCAS related experience when appropriate with no restriction to grade, rank, or job series. A waiver can be granted for the 6 months when appropriate.

Quota Control: 2 AF/DOP.

J3ABR6F031 003—Financial Management Apprentice—PDS Code VBP—Sheppard/9 wk 4 days/AFSC 6F031/MASL D156013—Oct 96

Trains personnel in the duties and responsibilities of a financial management apprentice. Includes principles of double entry and accrual accounting, operation of automated data processing equipment, manual and mechanized billing and collection procedures, fuels accounting, medical/dental accounting, funding procedures, general ledger accounting systems, and end-of-month statements and reports.

Prerequisites: Designed primarily for enlisted or civilian personnel projected for assignment to accounts payable/receivable processing centers (PC), travel accounting positions, or personnel currently assigned with no more than 1 year of recent experience in the applicable area. ECL 70.

Quota Control: 2 AF/DOP.

J3ABR6F032 002—Financial Services Apprentice—PDS Code VB8—Sheppard/8 wk 3 days/AFSC 6F032/MASL D156047—Apr 95

Training includes preparing and processing input data, operating equipment in a mechanized disbursement system, computing military and civilian TDY and PCS vouchers, principles of leave accounting, status and event transaction, and allotment transactions. Special emphasis is placed on procedures for Defense Joint Military Pay System (DJMS) and Defense Retiree and Annuitant Pay System (DRAS). Training also includes facts on items of pay, allowances,

payments, collections, indebtedness, allotments, and the documentation that is required.

Prerequisites: Designed primarily for enlisted or civilian personnel projected for assignment to military pay or travel PC, or for personnel currently assigned with no more than 1 year of recent experience in the applicable area. ECL 70.

Quota Control: 2 AF/DOP.

J3ACR6F070 000—Financial Management and Services Craftsman—PDS Code SR4—Sheppard/2 wk/AFSC 6F070—Oct 96

Trains in supervisor skills for upgrade training as a 7-skill level. Includes a description of duties in military pay, data elements and codes, travel, disbursing, fund control, reconciliation and follow-up, training (AFI 36-2201), supervision functions and responsibilities. Prerequisites: SSgt in upgrade training for 7-level and have successfully completed the required CDCs.

Quota Control: HQ 2AF/DOP.

J3AZR6F070 005/J4AZT6F070 001—Travel—PDS Code VQ5—DOD 541—Sheppard/3 wk—Apr 95

Training in knowledge and skills needed to perform as technicians in the travel processing center (PC). Training includes a description of functions and responsibilities; computation of distances; computation of travel claims for military and civilian personnel and dependents of military personnel; travel-generated leave accounting; components of accounting classifications; posting media for computer processing; operation of online remote device and printer; transaction processing; and by-others transaction processing and management principles.

Prerequisites: AFSC 6F052 (SrA and above), 6F051 (SrA and above-satisfactory completion of CDC 6F052C is desirable), 6F070, 6F090, 6F000; civilian equivalent; or AFSC 65F1, 65F3. Primarily for personnel projected for assignment in the travel PC or personnel currently assigned with no more than 1 year of recent experience in the SMA. Senior airmen (SrA) should have at least 12 months of time in grade.

Quota Control: 2 AF/DOP.

J3AZR6F070 007/J4AZT6F070 002—Military Pay—PDS Code VQ4—DOD 541—Sheppard/2 wk—Apr 95

Provides training for Air Force personnel in knowledge and skills needed to perform as technicians in the military pay processing center (PC). Training includes a description of military pay functions and responsibilities, including DJMS interface with AFPC and DFAS-DE; document preparation and control; items of pay and deductions; allowances; status and event transactions; allotments; indebtedness and collection procedures; payment computation; leave accounting system; DJMS output products processing; CRT operation; and management notices.

Prerequisites: AFSC 6F052 (SrA and above); AFSC 6F051 (SrA and above-satisfactory completion of CDC 6F052B is desirable), 6F070, 6F090, 6F000; civilian equivalent; or AFSC 65F1, 65F3. Primarily for personnel projected for assignment in the military pay PC or personnel currently assigned with no more than 1 year of recent experience in the PC. Senior airmen (SrA) should have at least 12 months of time in grade.

Quota Control: 2 AF/DOP.

J3AZR6F070 010—Civilian Pay—PDS Code 9V9—Sheppard/2 wk—Dec 93

Provides training for Air Force personnel in basic knowledge and skills needed to perform as payroll technicians in the civilian pay area. Instruction includes a description of civilian pay responsibilities, types of civilian employees, pay and leave entitlements, authorized deductions, permanent and temporary change processing, biweekly payroll technical functions, employee data, accounting procedures, reports, and hands-on training on ADPE.

Prerequisites: AFSC 6F052 (SrA and above), 6F051 (SrA and above-satisfactory completion of CDC 6F070A is desirable), 6F070, 6F090, 6F000; civilian equivalent; or AFSC 65F1, 65F3. Primarily for personnel projected for assignment in the civilian pay subject matter area or personnel currently assigned with no more than 1 year of recent experience in the SMA. Senior airmen (SrA) should have at least 12 months of time in grade.

Quota Control: 2 AF/DOP.

J3AZR6F070 012—Accounting—PDS Code 3MB—Sheppard/3 wk 3 days—Oct 96

Trains personnel to perform as financial management supervisors in accounting. Instruction includes a complete description of the functions and responsibilities of accounting, fund authorization and control, general systems description, computer concepts, transaction processing, system output and recovery, billings, collections, system interfaces, Defense Business Operating Fund (DBOF) concepts, supply records, adjustment transactions, fuels, medical-dental, and trial balance preparation.

Prerequisites: Designed primarily for personnel who possess AFSC 6F051, 6F070, or 6F090, and civilians with comparable experience and qualifications in the skills and knowledge necessary to perform as financial management supervisors in accounting.

Quota Control: HQ 2AF/DOP.

J3AZR6F070 013/J4AZT6F070 005—Accounts Payable—PDS Code 296/364—Sheppard/3 wk—Oct 96

Trains personnel to perform as financial management supervisors in accounting. Instruction includes a complete description of the functions and responsibilities of accounting, local procurement transactions-SBSS, integrated accounts payable system sign on and sign off procedures, IAPS/BQ interface processing, IAPS commitment document records, IAPS obligation document processing, IAPS end of day and optional products processing, and the Prompt Payment Act report (1619).

Prerequisites: Designed primarily for personnel who possess AFSC 6F051, 6F070, or 6F090, and civilians with comparable experience and qualifications in the skills and knowledge necessary to perform as financial management supervisors in accounting.

Quota Control: HQ 2AF/DOP.

J3ALR6F131 002—Financial Analysis Apprentice—PDS Code V9B—Sheppard/9 wk/AFSC 6F131/MASL D156050—Oct 96

Prepares lateral retrainees to perform as apprentice financial analysis specialists. Training includes the concepts of financial, cost, and economic analysis; the application of mathematical and statistical techniques in support of analytical efforts; familiarization with the small computer as an analytical tool; cost and resource analysis to assist decisionmakers in the efficient allocation of resources; fundamentals of Air Force budgeting; Air Force financial planning system; development of requirements; preparation of operating budgets and financial plans; Air Force financial management; and

nonappropriated funds oversight.

Prerequisites: SrA through MSgt (prior qualification in any 5-skill level AFSC, or 3-skill level if no 5-skill level exists) and equivalent grade civilians, with high school algebra course credit. A statement is required by the local financial office certifying that the applicant was interviewed and found acceptable for duty as an apprentice financial analysis specialist. Personnel who have completed either the J3ALR67430 001 or J3AZR67230 000 are not eligible to attend this course. ECL 80 SR.

Quota Control: 2 AF/DOP.

L3ALR8B000 000—Military Training Instructor Course—PDS Code CGD—DOD 012—Lackland/5 wk 2 days/AFSC SDI 8B000/MASL D166037—Mar 94

Provides professional training expertise on matters unique to the US Air Force basic training environment for selected male and female personnel to perform as military training instructors. Graduates are awarded special duty identifier (SDI) 8B000, are Air Training Command (AETC) assigned, and perform duties only at Lackland AFB TX with the 3720 Basic Military Training Group. The course provides preservice training required to give students the knowledge and skills relevant to perform duty in the basic training MTI field. The course is the only formal course of instruction by which personnel from active, reserve, and guard components of the Air Force may become MTIs. Training includes fundamentals of teaching and job-oriented practice teaching of military training activities. Subjects include MTI qualities, instructional methodology, counseling techniques, first aid, drill, flight administration, dormitory arrangement, and physical conditioning.

Prerequisites: AFSC in career field listed in AFMAN 36-2110 (formerly AFR 39-11). Minimum aptitude cluster percentile of 50. No waiver will be considered. High school graduate or GED equivalent. Application must be accompanied by a copy of airman's last five APR/EPRs containing no overall rating lower than 8 with the last three APRs being rated overall 9. EPRs will have an overall rating indicator of between an excellent to exceptional performer. If a total of less than five reports have been rendered, then the total number will be acceptable. Physical profile series 1212212 and height and weight within Air Force standards verified within last 90 days. Verification consists of interview by physician, and psychiatrist if available, to ensure airman has no disqualifying physical defects or mental disorders. Necessary mental and physical ability to supervise and guide young airmen on 24-hour-a-day basis. Possess physical stamina sufficient to endure training activities and ceremonies under adverse climatic conditions; integrity and high moral character (attested to by local unit commander); ability to lead and have sympathetic understanding of young people away from home in new environment; ability to make sound decisions (attested to by local commander); good speaking voice free of any speech impediment; and a high standard of military appearance and conduct (attested to by local commander). SrA through CMSgt. Must not exceed maximum allowable weight for age and height (10 lbs under maximum is desired as maximum consideration).

Quota Control: 2 AF/DOP.

L3AAR8R000 000—Recruiter Supervisor—PDS Code XQ4—Lackland/2 wk—Oct 95

Provides knowledge and skills necessary to perform the duties unique to a recruiter flight supervisor. Training teaches the student to determine the role of the flight supervisor, analyze leadership styles, establish a plan for setting standards, and to apply counseling skills. Also includes learning skills related to writing a performance report, analyzing production needs, establishing a training plan, identifying resources associated with recruiting service, establishing an office visit plan, key elements of an expectation letter, and applying steps used in recruiter accountability.

Special Requirements: Seasonal uniform with tie or tab, ribbons, and appropriate devices and clusters is required. Physical conditioning clothing and athletic shoes are mandatory. BDUs and service dress uniforms are not required.

Quota Control: HQ AETC/DPRAR.

L3ALR8R000 001—Air National Guard Recruiter—PDS Code QVQ—DOD 501—Lackland/3 wk 4 days/AFSC SDI 8R000—Oct 95

Provides training for selected ANG personnel in SDI 8R000 in the knowledge and skills needed to perform duty as recruiters. Includes speech fundamentals and delivery of a persuasive speech, sales fundamentals and making a sales presentation, eligibility requirements, applicant processing and classification, advertising and promotion, telephone techniques, the basic concepts of time and stress management, and the use of a planning guide.

Special Requirements: Seasonal uniform with tie or tab, ribbons, and appropriate devices and clusters. Physical conditioning clothing and athletic shoes are highly recommended. The service dress uniform is not required. Unit commanders must certify that individuals meet weight standards within 15 days of their departure for this course.

Quota Control: 2 AF/DOP.

L3ALR8R000 003—Air Force Reserve Recruiter—PDS Code RE8—DOD 501—Lackland/3 wk 4 days/AFSC SDI 8R000—Oct 95

Provides training for selected Air Force personnel in SDI 8R000 in the knowledge and skills necessary to perform duty as recruiters. Includes speech fundamentals and delivery of persuasive speech, sales fundamentals and making a sales presentation, eligibility requirements, applicant processing and classification, advertising and promotion, telephone techniques, the basic concepts of time and stress management, and the use of a planning guide.

Special Requirements: Seasonal uniform with tie or tab, ribbons, and appropriate devices and clusters. Physical conditioning clothing and athletic shoes are highly recommended. The service dress uniform is not required. Unit commanders must certify that individuals meet weight standards within 15 days of their departure for this course.

Quota Control: 2 AF/DOP.

L3ALR8R000 005—Recruiter—PDS Code XY3—Lackland/6 wk 1 day/AFSC SDI 8R000—Oct 95

Provides training for selected Air Force personnel (SDI 8R000) in the knowledge and skills necessary to perform duty as recruiters. Includes speech fundamentals and delivery of a persuasive speech, sales fundamentals and making a sales presentation, eligibility requirements, applicant processing and classification, delayed enlistment program, advertising and promotion, telephone techniques, management of recruiter activities, recruiter-related safety, stress management, and PROMIS II computer functions including familiarization, lead management, files management, electronic mail, and files maintenance.

Special Requirements: Seasonal uniform with tie or tab, ribbons, and appropriate devices and clusters are required. Physical conditioning

clothing and athletic shoes are highly recommended. The service dress uniform is not required. Squadron commanders must certify that individuals meet weight standards within 15 days of their departure for this course.

Quota Control: HQ AETC/DPRAR.

L3AQR9S100 400—Electronic Principles—PDS Code W4M—Lackland/12 wk 2 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for reporting identifier 9S100. Training includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits, and soldering. The training day for this course constitutes a 6-hour day plus 2 hours of supervised study. This course is a prerequisite to X3ABR9S100 002, and electronics training is tailored to meet AFSC requirements.

Prerequisites: Air Force: See AFI 36-2108.

Admin Instructions: Students who demonstrate proficiency by passing all measurement may be advanced. Retrainees who provide the required documentation on previous training will be advanced without measurement. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

L3AQR9S200 400—Electronic Principles—PDS Code W4M—Lackland/12 wk 2 days—Oct 96

Provides training in the knowledge and skills needed to perform the duties of maintenance personnel for reporting identifier 9S200. Includes safety and first aid, DC principles, AC principles, semiconductors, power supplies, amplifiers, waveshaping circuits, digital circuits and soldering. The training day for this course constitutes a 6-hour day plus 2 hours supervised study. This course is a prerequisite to X3ABR9S200 010, and electronics training is tailored to meet AFSC requirements.

Prerequisites: See AFI 36-2108.

Admin Instructions: Students who demonstrate proficiency by passing all measurement may be advanced. Retrainees who provide the required documentation on previous training will be advanced without measurement. Retrainees who previously served in other military services may be given the same opportunity to be advanced without measurement if records on related training and equivalent course control documents are available for review.

Quota Control: 2 AF/DOP.

LMABM9T000—Basic Military Training, USAF Male/Female—PDS Code 998—DOD 959—Lackland/6 wk—Oct 96

Airmen (male and female) of the regular Air Force, Air Force Reserve, and Air National Guard undergo basic military training if they have no previous military service. Basic Military Training (BMT) objectives are to provide an orderly transition from civilian to military life; provide initial records preparation, classification, and assignment; evaluate and discharge airmen who fail to meet minimum standards for retention in the Air Force; issue initial clothing and related items; provide the essential military knowledge and skills requisite to initial duty in the Air Force; develop in each recruit trainee the concept that Air Force mission accomplishment depends on the effective performance of its individual members; help each trainee understand, accept, and support Air Force mission, organization, traditions, customs, and courtesies; and develop high standards of conduct, morals, and integrity in each trainee.

The course's military training requires that the trainee demonstrate a strong sense of mission and Air Force pride; understand the need for and foster teamwork; respect for authority and other Air Force personnel; possess a positive attitude; follow instructions and orders willingly; assume responsibility as a situation may dictate; be self disciplined and confident of his or her abilities; willingly place organizational goals above self; and demonstrate honorable conduct at all times. Military training is measured by the acceptable performance of the trainee in maintaining issued clothing and equipment; reporting in a military manner; wearing Air Force uniforms; aerobics and running 1 1/2 miles within the allowed timeframe; negotiating the confidence course; and firing the M-16 rifle.

The course's military studies require the trainee to score 70 percent or better on an end-of-course written by identifying basic facts on Air Force mission and heritage; missions of the Air Force; Air Force customs and courtesies; military responsibilities; national security; information security; career information; personal affairs; human relations; Air Force substance abuse control; self aid and buddy care; and nuclear, biological, and chemical warfare.

Prerequisites: Enlistment in the US Air Force.

Quota Control: 2 AF/DOP.

LMABM9T000 001—Basic Military Training, USAF Academy Preparatory—Lackland/4 wk—Oct 96

Prepares airmen for assignment to the USAF Academy Preparatory School. Provides training in essential military skills and knowledge (AFI 36-2202, *Airman Basic Military Training* [formerly AFR 50-42]).

Prerequisites: Selection for the USAF Academy Preparatory School and enlistment in the US Air Force.

Quota Control: 2 AF/DOP.

J5AZA1A251 000—Airdrop Load Inspector—PDS Code FCR—DOD 860—Ft Lee*/1 wk/MASL B148369—Mar 94

Qualifies and provides certification for personnel whose duties as airdrop supervisors or aircraft loadmasters require that they perform final joint inspections on equipment and supply loads to be airdropped from aircraft.

Prerequisites: AFSC 1A251 or higher, with 1 year of experience in the AFSC. Must be actually assigned to or under orders to a unit authorized the above AFSC. ECL 80.

Special Requirements: Students must have fatigue uniforms and six each military issue T-shirts. T-shirts will be stenciled with student's name at quartermaster school. Uniform for classes will be fatigues with steel-toed boots; trousers will be bloused. Air Force students in grades E-6 and below must furnish all personal hygiene items, including washcloths, towels, soap, etc.

Quota Control: 2 AF/DOP.

*US Army Quartermaster School.

E5AZG1C371 001—Inland Search and Rescue Coordinator—PDS Code SU9—DOD 250—various CONUS sites/1 wk—Oct 95

Provides introductory, refresher, or informational search and rescue (SAR) training. Training is general in nature and does not incorporate field exercises. This course consists of classroom lectures

and at least one practical exercise. Emphasis is placed on the Incident Command System, incident management responsibilities, and inland search planning factors. Procedures for a missing aircraft search are incorporated with selected segments of the National Interagency Incident Management System's (NIIMS) Incident Command System and numerous texts authored by acknowledged experts in the land search and rescue theater. Air and ground managers and planners learn to integrate their procedures and increase the coordination and cooperation between federal and nonfederal SAR management personnel.

Prerequisites: Designed for military SAR supervisors and coordinators who are assigned to rescue coordination centers and are responsible for inland missions; active duty Air Force Civil Air Patrol (CAP) liaison officers; CAP emergency service officers; and civilian personnel from federal, state, local, and volunteer SAR organizations who are responsible for SAR mission planning.

Admin Instructions: Forward one copy of orders to AFRCC/RCS, National SAR School, USCG RTC, Yorktown VA 23690-5000, not later than 60 days before class start date. Additional information may be obtained from Air Force faculty, (757) 898-2273/2380, or dial Langley AFB VA, DSN 574-9990, and ask for connection to 898-2273-2380.

Quota Control: 2 AF/DOP.

E5AZGlC371 002—Joint Combat Search and Rescue Coordinator—PDS Code 7G5—DOD 250—Yorktown VA/4 days—Oct 95

Introduces concepts, doctrine, and procedures for combat search and rescue (CSAR) mission management based upon JCS 3-50.XX-series publications. The UNCLAS curriculum encompasses: CSAR definitions, benefits, and types; isolated personnel profiles, legal status, and responsibilities; US military service organization and missions; CSAR and joint battlefield management involving the Air Operations Center, Special Instructions (SPINS), Air Tasking Order (ATO) and SAR duty officers; search and rescue center organization, missions, set-up, and documentation; CSAR stages, mission planning factors, and recovery options; multiservice CSAR policy and resources; coordinate plotting systems and search patterns; intelligence, reconnaissance, and threat definitions, types, and reports; and sample CSAR scenarios. This course consists of classroom lectures and at least one practical exercise.

Prerequisites: Designed for US military personnel, all grades (Air Force: AFSCs lC3XX-- enlisted; 13BXX--command and control officers), primarily those en route to worldwide search and rescue centers, CSAR contingency operations, CSAR exercise positions, or CSAR-related duties.

Admin Instructions: Forward one copy of orders to AFRCC/RCS, National SAR School, USCG RTC Yorktown, VA 23690-5000. Additional information may be obtained from Air Force faculty, (757) 898-2273, or dial Langley AFB, DSN 574-9990, and ask for connection to 898-2273.

Quota Control: AFRCC/RCS (HQ ACC).

E5AZG1C371 003—Maritime Search Planning (MSP)—PDS Code V66—DOD 250—Yorktown/2 wk—Oct 96

Provides training in oceanic search planning techniques and the performance of duty as search and rescue (SAR) mission coordinator. Parallels the sequential stages and supporting components of the SAR system as organized by the National SAR Manual. Upon successful completion, the student will have the ability to manage SAR cases of a reasonable scope.

Prerequisites: Officer and enlisted personnel assigned to duty as controller or assistant controller at a maritime rescue coordination center. Requires previous experience in SAR operations and proficiency in plotting, navigation, and mathematics. A screening test for plotting, navigation, and mathematics is administered to all students before they begin training. Failure to attain a passing grade will result in student's disenrollment.

Admin Instructions: Forward one copy of orders to AFRCC/RCS, National SAR School, US CG RTC, Yorktown VA 23690-5000, not later than 60 days before class start date. Additional information may be obtained from Air Force faculty, (757) 898-2273/2380, or dial Langley AFB VA, DSN 574-9990, and ask for connection to 898-2273-2380.

Quota Control: 2 AF/DOP.

X5AZG1NX51 009—Operator Technology for Satellite Communication (EC-250)—PDS Code U9U—DOD 231—Ft Meade/7 wk—Apr 95

Gives intensive and comprehensive training to prospective collection operators assigned to sites that are working communications satellite traffic. Material is presented at the basic entry level, both in lecture mode and in laboratory hands-on operation. It covers an introduction to waveforms and modulation; satellite functions, orbits, and communications systems; missions and applications of major satellite communications systems now in operation; laboratory training and exercises in frequency, amplitude, time measurement, video signal identification, frequency-shift key (FSK) and phase-shift key (PSK) signal displays, and the down-conversion process; procedures for using a collection plan in site operations (collection management and tasking); procedures for intercept, monitoring, identification, and recording of communications satellite signals; procedures for collection, reporting, and forwarding of signal intercept.

Prerequisites: Graduate of signals intelligence production or electronic signals intelligence exploitation course. Strongly recommend completion of EA-183, Mathematics of SIGINT, or have college mathematics through pre-calculus.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

Quota Control: 2 AF/DOP.

X5AZD1N072 000/X5AZK1N072 000—Point Positioning System—PDS Code V70—DOD 411—207—Ft Belvoir/1 wk 4 days—Oct 96

Provides students with the basic concepts and theory of operation of point positioning systems (PPS), and a working skill in using a PPS with DMA-produced point positionint data bases for point positioning. Training in rapid and accurate determination of UTM and geographic coordinate positions, and examples of appropriate PPS applications are stressed. This course is available by mobile training team.

Prerequisites: DOD and other intelligence community personnel who possess Air Force AFSCs 14N3, 14N4, 1N131, or their equivalents.

Special Requirements: Secret clearance and access to before reporting for training. Confirmation of Secret clearance must arrive at Defense Mapping School (DMS) 30 days before class start date transmitted by letter or message addressed to DMS, ATTN: PPO, Ft Belvoir VA 22060-5828. Clearance must also be included on the

student's orders.

Quota Control: Air Force, AFPC/DPMRS; others, 2 AF/DOP.

X5ABN1N231 006—Signals Intelligence Production Apprentice—PDS Code XPQ—Corry Station/19 wk 4 days/AFSC 1N231—Oct 96

Includes instruction in the principles of security, the classification process, the intelligence community, network operating procedures, radio wave transmission and reception, teleprinter principles and fundamentals, basic modulation, and related topics necessary to understand the duties and responsibilities of a signals intelligence production apprentice. Instruction in international Morse code continues from X5AQA1N231 000 with the airman learning to copy at 20 groups per minute. The airman also learns how to prepare appropriate logs and reports associated with the media produced.

Special Requirements: Secret clearance by the first day of class and indoctrinated for Top Secret/SCI by the 51st day of training. Reliability screening according to AFI 36-2104 (formerly AFR 35-99).

Quota Control: 2 AF/DOP.

X5AQA1N231 000—Signals Intelligence Production Apprentice—PDS Code 8H9—DOD 231—Ft Huachuca/21 wk—Oct 96

This course is a prerequisite for follow-on AFSC-awarding training at Corry Station FL.

International Morse Code transcription at 20 groups per minute. Students also taught standard communications typewriting skills, familiarization with electronic equipment, and computer operations. Transcribe Morse signals at 20 groups per minute through varying degrees of interference. Operate radio receivers, conduct frequency search missions, make frequency measurement, and maintain operational logs.

Special Requirements: Top Secret with SCI access before start of 15th week of course.

Quota Control: 2 AF/DOP.

X5AZN1N251 001—Advanced Signals Analysis—PDS Code X81—DOD 232—Corry Station/24 wk—Mar 94

Training provides instruction in advanced signal analysis procedures, techniques, and concepts to prepare the professional person as a non-Morse analyst in a SIGINT operation. Includes instruction in the analysis of electronic emissions found in the radio spectrum.

Prerequisites: Be a graduate of a basic signals intelligence production course with a minimum of one tour of field experience in non-Morse operations, preferably with some signal analysis experience. Be a graduate of course X5AZN1N251-003 (A-232-0060), Basic Signals Analysis. Be in the grade of A1C or above. Students will incur a 36-month service obligation upon completion of course. A good knowledge of basic math and electronics (basic algebra, trigonometry, simple calculus, basic electronics, computer logic, and waveform analysis) is an asset towards completion of the course. Therefore, if the student has not yet completed EA-183, Mathematics for SIGINT, it is highly recommended that the course be completed either in residence or by correspondence from the National Cryptologic School prior to attending this course.

Special Requirements: Must possess a Top Secret security clearance and be indoctrinated for Special Intelligence. Authority to indoctrinate should be forwarded according to AFI 31-501 (formerly AFR 205-32). Must report NLT 1600 on Wednesday before Monday class start date to facilitate inprocessing and obtain security badge. This course is open to US citizens only.

Quota Control: 2 AF/DOP.

X5AZN1N251 003—Basic Signals Analysis—PDS Code Z07—DOD 232—Corry Station/16 wk—Apr 95

Includes training in the initial stages of SIGINT signals search analysis, target identification, and reporting to selected enlisted personnel of the Air Force. Graduates will be able to properly intercept, record, process, analyze, identify, and report selected communications and electronic signals found between 1kHz and 18GHz.

Prerequisites: Be a graduate of a basic signals intelligence production course with a minimum of one tour of non-Morse field experience. Be a career designate and have 2 years of obligation upon completion of course. Be in the grade of A1C or above. Knowledge of basic algebra is an asset towards completion of course. Therefore, it is highly recommended that EA-183, Mathematics for SIGINT, be completed either in residence or by correspondence from the National Cryptologic School prior to attending this course.

Special Requirements: Must have a Top Secret clearance and be indoctrinated for Special Intelligence. Authority to indoctrinate should be forwarded according to AFI 31-501 (formerly AFR 205-32). Must report NLT 1600 on Wednesday prior to the Monday class start date to facilitate inprocessing and obtain a security badge. This course is open to US citizens only.

Quota Control: 2 AF/DOP.

X5ASD1N471 000—Multidiscipline Counter Intelligence Analyst Course (MDC1A)—PDS Code 8ZJ—Wash DC/2 wk—Mar 94

An intensive professional development course designed to improve the all source counter intelligence analyst's capability to produce a finished counterintelligence analytical product. Provides information on historical and current national counterintelligence multidiscipline hostile intelligence threat; describes and examines HUMINT, SIGINT, and IMINT analytical processes and current national community data bases; and demonstrates the positive impact on finished counterintelligence production of a professional interservice and interdepartmental network of CI analysts who routinely consult among themselves.

Prerequisites: Currently occupy a MDCI analyst position or have a current job-related requirement to have a MDCI background. Possess a basic, working knowledge of hostile intelligence threat.

Special Requirements: Top Secret/SCI/G clearance and access to before reporting for training. (No waiver on security clearance requirement.) Clearances should be passed through the appropriate local SSOs to the Defense Intelligence College.

Quota Control: Air Force, HQ AFPC/DPMRS; others, 2 AF/DOP.

X5AZG1N471 000—Introduction to ELINT Fusion Analysis and Reporting—PDS Code YAZ—Ft Meade/duration*—Mar 94

A basic introductory course for COMINT analysts and managers with no ELINT background. Topics include introduction to radar theory. types of radar systems, missile systems and associated radars, IFF systems, electronic warfare, ELINT collection and processing techniques, fusion analysis, and reporting. An equivalency examination is available for this course (IS-070).

Prerequisites: Training conducted for agency-assigned personnel

only; no TDY students because course is self-paced.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

Quota Control: 2 AF/DOP.

* Course Duration: 20 hours (6 weeks) self-paced.

X5ASG1N551 002—WHIPPOORWILL ELINT Analysis (EA-212)—PDS Code L2C—DOD 233—Ft Meade/3 wk—Mar 94

Introduces the student to ELINT signals analysis using the VAX WHIPPOORWILL system. Discussion topics include WHIPPOORWILL ELINT software, time-based analysis, and waveform analysis. Laboratory operations will include several programs used for ELINT signals analysis. This course is designed for signals analysts requiring WHIPPOORWILL training in ELINT digital analysis.

Prerequisites: Completion of course EA-105, Introduction to WHIPPOORWILL Digital Analysis (Air Force course X5ASG1N551 003) or the EA-105 bypass test.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

Quota Control: 2 AF/DOP.

X5AZA1N551 004—Electronic Processing and Dissemination System (EPDS) Operator/Analyst (3B/ASI9C/233-ASIT4)—PDS Code 9NN—DOD 233—Ft Huachuca/8 wk 2 days—Apr 95

Trains personnel to operate the Electronic Processing and Dissemination System (EPDS) AN/TSQ-234(V) and perform operational analysis on the electronic order of battle resident data base. Designated personnel will attend the common EPDS operation and analysis blocks of the course and then be trained to operate both the tactical users's terminal and interim tactical electronic processor positions associated with the EPDS. Army course 233-F13.

Special Requirements: Top Secret clearance with SI access prior to starting class.

Quota Control: 2 AF/DOP.

X5AZA1N551 007—Telemetry Collection Operations (233-ASIJ1)—PDS Code X64—Ft Huachuca/11 wk 1 day—Oct 96

Prepares students to perform duties of an electronic intelligence analyst. Characteristics of missile and earth satellite vehicle configurations, electronic analysis, equipment theory and operation, telemetry and beaconry, signal analysis and recognition, radar types and functions, and radar signal analysis. Students participate in a practical exercise on electronic analysis and reporting.

Prerequisites: Top Secret clearance and indoctrination for SCI before starting class.

SEI awarded: 3ZC.

Quota Control: 2 AF/DOP.

X5AZG1N551 001—ELINT Digital Analysis Training (EA-281)—PDS Code 88B—DOD 233—Ft Meade/3 wk—Mar 94

Provides the student with practical and theoretical training in performing digital analysis, including the ability to digitize analog signal information, transfer that information to a digital computer, and use the computer with available software to perform digital analysis upon the selected signal.

Prerequisites: Completion of course EA-280, Intermediate ELINT Collection and Analysis (Air Force course X5AZG1N551 000).

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

Quota Control: 2 AF/DOP.

X5AZN1N551 000—CLASSIC WIZARD System Reporter (S-231-0003)—PDS Code XY6—DOD 231—Winter Harbor/15 wk—Oct 95

Includes the theory and operational skill to allocate, monitor, and control the processing and reporting resources within the AN/FYK-24(V) and to perform quality control checks and issue corrections to generated reports sent to the external communications subsystem.

Prerequisites: Airman basic through SSgt, graduate of electronic signals intelligence exploitation course (or equivalent) or signals intelligence production course (or equivalent), and presently occupying, or will occupy, a designated CLASSIC WIZZARD billet.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence and SAO as determined by appropriate clearance authority.

Quota Control: 2 AF/DOP.

X5AZN1N551 001—CLASSIC WIZARD System Support (S-231-0042)—PDS Code XY7—DOD 231—Winter Harbor/16 wk—Oct 95

Provides training to personnel without prior or only limited CLASSIC WIZZARD experience on the role of the system supervisor in CLASSIC WIZZARD operations.

Prerequisites: TSgt through SMSgt and graduate of either electronic signals intelligence exploitation course (or equivalent) or signals intelligence production course (or equivalent).

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence and SAO as determined by appropriate clearance authority.

Quota Control: 2 AF/DOP.

X5AZG1N571 000—Advanced ELINT Collection/Analysis (EA-380)—PDS Code X66—DOD 233—Ft Meade/8 wk—Oct 96

Propagation theory, collection antennas, and radar systems and their applications, system noise figure and sensitivity, ERP calculations, detection of radar signals, and analysis and collection techniques.

Prerequisites: It is very desirable for to be graduates of course EA-280, Intermediate ELINT Collection and Analysis (Air Force course X5AZG1N551 000). Minimum of 3 years of experience in collection and/or signals analysis and have successfully completed mathematics to include basic algebra, trigonometry, and logarithms.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

Quota Control: 2 AF/DOP.

X5ASG1N651 000—Transmission Security Course—PDS Code 9R9—Ft Meade/3 days—Dec 93

The fundamentals of transmission security with emphasis on tactical applications of equipments, threat capabilities and countermeasures,

and manual techniques. Course includes: radioelectronic combat, US electronic warfare, spectrum analysis, TRANSEC in war, OPSEC, and others to include a class participation exercise.

Prerequisites: Minimum grade: civilian GGD-07; military O-1 or E-5 with current or future assignment requiring fundamental knowledge of TRANSEC principles and applications.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

Admin Instructions: Clearance required NLT 60 days prior to class start date. Forward name, grade, SSN, place and date of birth, course number and dates, and clearance status through CRITICOM channels to NSA/CSS, Attn: E121, M5114, 6943ESS, and 6940 ESW/SP, Ft George Meade MD 20755-6000. Students report for inprocessing between 0730 and 0830 3 duty days prior to class start date. Upon receipt of quota, contact TDY coordinator, DSN 923-5008, for further instructions.

Quota Control: 2 AF/DOP.

X5ASN1N651 000—Electronic Warfare Tech AN/SLG-32 Operator (A-102-0210)—PDS Code QD4—DOD 102—Corry Station/3 wk—Mar 94

Consists of classroom instruction and laboratory exercises providing system characterictics and performance, the procedures to energize, initialize, and interpret, perform computer subrouting, and to deenergize the AN/SLG-32. Consists of classroom instruction and laboratory exercises involving watchstanding procedures, operator equipment techniques, radio-telephone exercises, simulated system faults, and use of selected publications.

Prerequisites: Be a graduate of the Air Force 1N631 AFSC-awarding course and possess a 5-skill level.

Special Requirements: Students must possess a Secret clearance to enter the compound.

Quota Control: 2 AF/DOP.

X5AZG1NX51 008—Analyst Technology for Satellite Communications (EC-251)—PDS Code 88A—DOD 231—Ft Meade/10 wk—Apr 95

Gives intensive and comprehensive training to prospective collection analysts who will be working communications satellites. The material is presented at the technician level and is intended to be a natural continuation of the Operator Technology for Satellite Communications (EC-250) material, aimed at the analyst's more demanding requirements. Material is presented both in the lecture mode and in laboratory hands-on operation. The course will cover a review of mathematics for signals intelligence; properties and characteristics of electromagnetic waves; waveform analysis; modulation; multiplexing; analog-digital conversion; antennas, receivers; and laboratory training and exercises in a variety of related topics.

Prerequisites: Completion of Operator Technology for Satellite Communications (EC-250). Successful completion of Mathematics for SIGINT (EA-183) or college mathematics, to include trigonometry and pre-calculus.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

Quota Control: 2 AF/DOP.

X5AZG1NX71 000—Cryptologic Skills for Noncommissioned Officers (CK-155)—PDS Code 2HZ—Ft Meade/21 wk—Oct 96

Provides middle-level enlisted military students with the skills and knowledge necessary for key positions in cryptologic operations. The comprehensive program includes major sections on collection operations, cryptanalysis, traffic analysis, technical reporting, SIGINT reporting, and ELINT orientation. Modules equivalent to the following courses are included: introduction to cryptography and exploitation of manual cryptosystems (CA-105), effective agency writing II (EG-155), introduction of ELINT analysis and reporting (IS-070), introduction to SIGINT reporting (IS-180), SIGINT analysis and reporting (IS-280), introduction to UNIX (MP-119), basic traffic analysis (TA-103), intermediate traffic analysis (TA-225), technical reporting (TA-180), UNIX/PINSETTER applications for traffic analysis (TA-270), COPES, SCOL writing techniques (TM-210), and principles of collection management (TM-201).

Special Requirements: Military grades SSgt through MSgt selected by parent service, minimum of 18 months of SIGINT or SIGSEC experience, and at least 2 years of obligated service remaining upon completion of course, or in accordance with service requirements. Students must be cleared for Top Secret clearance and indoctrinated for Special Intelligence with TK access.

Quota Control: 2 AF/DOP.

X5AZG1NX91 001—Senior Military Cryptologic Supervisor Course—PDS Code PM2—Ft Meade/6 wk—Apr 95

Designed to increase military cryptologic supervisors' understanding of the relationship and functions of the cryptologic community within the National Intelligence Community; make them aware of the latest developments in cryptologic technology, operations, policies and plans; and broaden their career possibilities by exposing them to a variety of subjects outside their area of specialization. The course provides a comprehensive survey of the SIGINT operational process with emphasis on the technical aspects of the mission. A survey of the Information Security missions of the NSA/CSS is also included. A 20-minute student presentation on an approved cryptologic subject of choice is required for graduation. All segments of the course must be successfully completed for CY-200 credit.

Prerequisites: Selected personnel in supervisory positions. Military: TSgt to SMSgt and Warrant Officers O1 and O2. Students should have a minimum of 8 years of cryptologic experience. Since this is an advanced course, it contains material which would be unfamiliar to personnel with no intelligence background. Preference should be given to personnel in grades TSgt and MSgt.

Special Requirements: Top Secret clearance, indoctrinated for Special Intelligence, TK, GAMMA, VRK-11A, and LM.

Admin Instructions: Access required NLT 45 days prior to class start date. Transmit clearance by TANGO SSO to NSA/CSS, Attn: E1/M5114, 6940ESW/SP, and OLAB 1100ABG. Submit student's name, grade, SSN, DOB, POB, DOR, and official mailing address, along with a statement that nominee meets course prerequisites to: NSA/CSS, Attn: E1, Ft Meade MD 20755-6000.

Quota Control: 2 AF/DOP.

L5AZA1T231 001—Airborne (Parachutist)—PDS Code A9M—Ft Benning*/3 wk/MASL B121182—Oct 95

Trains volunteer officers and airmen whose duty assignment requires parachutist qualification in use of parachute and powered aircraft as a means of transportation. Ground operation, tower and live jumps, and strenuous physical training and conditioning. Personnel who

have completed this training and are awarded a parachutist rating may be required to perform parachutist duties in future assignments.

Prerequisites: Personnel must volunteer in writing. Only those who are assigned or selected for assignment to a position requiring jump qualification (J prefix position) will attend. Must meet physical qualification for parachute duty (AFI 48-123). Meet the following Army physical readiness test (APRT) entry requirements: pushups - male 42, female - 18; situps - male 52, female - 50; 2-mile run - male 15 minutes, 54 seconds, female - 18 minutes, 54 seconds. Pushup and situp series each must be done within 2-minute time limit. Run is in fatigues and running shoes, after strenuous exercise, in formation, on non-flat terrain and at an average pace of 7 1/2 to 8 minutes per mile. These are minimum entry requirements. Training requirements will increase during the course of training. Applicant's commander will certify by letter that stamina performance has been demonstrated and witnessed and applicant is undergoing continuous physical conditioning. One copy of the physical fitness certification must accompany the application and one copy must accompany the orders issued. Applicants will be placed on parachute jump status according to AFI 11-402, *Aviation and Parachutists Service*, for 21 days effective the date of scheduled class entry, and they will have the orders in their possession upon reporting for training. Air Force pararescue and combat control trainees must have successfully completed the basic indoctrination course.

The APRT is required to be administered by the parent command or last permanent duty station not more than 15 days before the class convening date. Personnel who were administered the APRT in excess of the 15-day period will be required to be tested by the Air Force Representative, USAIS, prior to enrollment in the course. The certificate or AF Form 379 must explicitly state "Successfully completed the physical fitness test according to AFCAT 36-2223 on (date) with the number of pushups and situps accomplished, and the time for the 2-mile run," and it must be hand-carried by the individual when reporting for the course. It is also essential that the SF 88 in the member's medical records specifically state he or she is qualified for airborne training in blocks 5 and 77. It should also be included in the orders issued. Air Force personnel must hand-carry their medical records when reporting for the course. Personnel reporting without this requirement will not be enrolled in the course. ECL 80.

Special Requirements: Must have following clothing: fatigue uniforms (three to five each); undershirts, brown, T-shirts (six each); drawers, cotton, white (six each); socks, wool cushion sole (five pairs); cap, fatigue (two each); web belt with buckle (one each); and boots, black, all leather, basic issue, broken in and highly shined (two pairs). Field equipment will be issued by school. Clean fatigue uniforms are required daily. Cloth insignia should be sewn on officers' fatigues to prevent injury. During October through March bring your field jacket with liner, gloves, and pile cap. Only civilian clothing in good taste should be worn off duty. Students must have current qualifying class III flying physical record with them on reporting to school.

Quota Control: 2 AF/DOP.

*The Infantry School. Refer to Section C--Army School Information and Reporting Instructions--Army Training Locations.

J5AZA1T251 001—Survival Evasion Resistance and Escape (SERE) High Risk Level C—PDS Code 9U5—Ft Bragg/18 continuous days—Dec 93

Provides intensive training in support of the Code of Conduct; survival fieldcraft with application to worldwide environments and techniques of evasion; resistance to interrogation and exploitation; and escape from captivity. Students also participate in a Resistance Training Laboratory.

Prerequisites: Must be active or Reserve component personnel of the US Armed Forces specified by DOD Directive 1300.7 and AR 350-30 to receive Level C Code of Conduct/SERE training (NOFORN). Must possess minimum fitness standards as prescribed in AFI 48-123 (formerly AFR 160-43), chapter 3, including current (within 12 months of class reporting date) SF 88 and 93. Complete a physical readiness test conducted according to FM 21-20 and passed within 30 days of reporting date. Must attain a score of 180 points, with at least 60 points per event, on the Army physical readiness test. Secret clearance required.

Special Requirements: All personnel attending the course will have the following in their possession on day 1 of the class: official document stating security clearance; complete medical records (including exams); and all required clothing and equipment including 1 each barracks bag, ID card, trouser belt with subdued buckle, sewing kit, sleeping sweater or shirt, duffle bag with lock, sweat shirt, survival knife with sharpening stone, BDU field cap, BDU field jacket, two each towels, three each BDU camouflage or H/WEA OG-107 shirts and trousers, one pair of running shoes and shower sandals, two pairs of combat or jungle boots, six each undershorts and six each OD or brown undershirts and socks, one set of ID tags, a three-ring binder with paper, pencils, and pens, and laundry soap powder.

Quota Control: 2 AF/DOP.

E5ASN2A453 001—VLF Power Amplifier—PDS Code H0J—DOD 101—Tinker/4 wk 3 days—Apr 95

Provides training on the E-6A mission avionics system very low frequency power amplifier (VLFPA). Attendees receive advanced system analysis and troubleshooting techniques for organizational level maintenance.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

E5ASN2A453 002—Dual Trailing Wire Antenna—PDS Code P30—DOD 101—Tinker/12 wk—Apr 95

Provides training on the OE-159 VLF/LF dual trailing wire antenna system and power amplifier group. Attendees receive advanced systems analysis and troubleshooting techniques for organizational level maintenance.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

J5AZA2A751 001—Welding from Machinist—PDS Code MAF—Aberdeen Proving Ground/2 wk—Jun 94

Provides machinist transition personnel with training associated with the use of the tungsten inert gas (TIG) shielded arc welder. Includes principles and processes of welding and procedures and techniques to weld butt, tee, lap and tube-to-plate joints on heat and corrosion resistant ferrous and aluminum alloys. Applicable AFOSH and safety precautions.

Prerequisites: AFSC 2A751/71 or civilian equivalent personnel who are transitioning from the 42750/70 (machinist) AFSC. Normal color vision and depth perception.

Special Requirements: Protective footwear (safety-toed shoes).

Quota Control: 2 AF/DOP.

Prerequisites: AFSC 2A751/71 or civilian equivalent personnel who are transitioning from the 42754/74 (Welder) AFSC. Normal color vision and depth perception.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

J5AZA2A754 000—Free Fall Auto Ripcord Assembly (FF-2) (860-F2)—PDS Code Q19—Ft Lee/1 wk—Apr 95

Provides instruction on procedures, unit, and intermediate maintenance of the FF-2 automatic ripcord release assembly.

Prerequisites: Member of the active or reserve Army possessing MOS 43E, Air Force, Navy, Marine Corps, or National Guard with a minimum grade of Sgt. Must have 1 year remaining in service and 1 year of experience in airdrop rigging. Must meet minimum weight standards.

Quota Control: 2 AF/DOP.

J5AZA2A754 001—Ram-Air Parachute Systems—PDS Code 5ZF—Ft Lee/1 wk—Apr 95

Provides instruction and certification on packing and inspection procedures of the Ram-Air tandem parachute systems.

Prerequisites: Active and Reserve Army, Navy, Air Force, and Marines. Commissioned officers, warrant officers, enlisted personnel, and allied students who are programmed for, or specifically assigned to, parachute rigger positions supporting Ram-Air parachute systems or specifically identified for special training. Must be a graduate of the parachute rigger course 43E10 or a graduate of the parachute maintenance and aerial supply officer course 92D. Must meet minimum weight standards.

Quota Control: 2 AF/DOP.

E5ASN2E151 000—Commercial Satellite Equipment Maintenance—PDS Code 5DN—Corry Station/12 wk—Oct 95

Provides CTM personnel and DoD equivalents maintenance principles required to perform basic operations and documented corrective maintenance, with supervision, on commercial satellite communication equipment including UHF receivers, demultiplexers, demodulators, distribution systems, up and down converters, exciters, and signal processors. Training includes background information in analog and digital telecommunication signal technologies and functional operation of satellite communication systems. Instruction is given on specific types of modems, demultiplexers, receivers, etc., but geared to the generic operation of a modem (for example). Trainees can apply knowledge to a number of satellite communication signal analysis equipment configurations. The Navy course ID number (CIN) is A-102-0396.

Prerequisites: CTM "A" school or equivalent Army or Air Force school. Attendees also require a Top Secret* clearance based on a special background investigation. Air Force requirements: 5-skill level in one of the following AFSCs: 2E1X1, 2E1X3, 2E2X1, or 2E6X1.

*Requires a Top Secret SCI access clearance.

Quota Control: 2 AF/DOP.

E5AZA2E151 016—Digital Communications Subsystems (DCSS)—PDS Code R00—Ft Gordon/8 wk—Oct 95

This is Army course 102-F40 and is designed to train triservice personnel to operate and maintain, through direct support level, the digital communications system. Students attending this course will receive training on operating and maintaining time division multiplexers, synchronous time division multiplexers, biphase shift keying/quadraphase shift keying (BPSK/QPSK) modems, encoder/decoder, and associated equipments.

Prerequisites: Completion of applicable career development course, AFSC 2E151, 2E171, or civilian equivalent. Army selected trainees must be qualified in satellite communications system repairer (MOS 31S).

Special Requirements: Interim Secret/Secret clearance.

Quota Control: 2 AF/DOP.

E5AZA2E151 028—SATCOM Terminal AN/FSC-78/79 and AN/GSC-39—PDS Code R0Y—Ft Gordon/8 wk—Oct 95

This is Army course 102-F42 and is designed to train Army, Navy, and Air Force personnel to operate and maintain, through direct support level, the AN/FSC-78/79 and AN/GSC-39. Students attending this course will receive training on operating and maintaining up/down converters, communications transmitting and receiving subsystem, and control/monitor equipment.

Prerequisites: Completion of applicable career development course, AFSC 2E151, 2E171, or civilian equivalent. Army, Air Force, or Navy personnel must have completed course 102-F39 or 102-F40, or their equivalent.

Special Requirements: Interim Secret/Secret clearance.

Quota Control: 2 AF/DOP.

E5AZA2E151 039—AN/USC-28 I/O Terminal—PDS Code 2KW—Ft Gordon/8 wk—Oct 95

Trains triservice Army, Air Force, and Navy personnel in the skills and knowledge needed to operate and maintain the SATCOM AN/USC-28(V) set in a stressed and unstressed electronic counter-countermeasure environment.

Prerequisites: Air Force: completion of applicable career development course, AFSC 2E151, 2E171, or civilian equivalent; Navy: enlisted personnel with NEC 1461 who have completed courses 102-F40 and the 102-F42 or their equivalent; Army: enlisted personnel with MOS of 29Y10 who have 9 months of active duty remaining after completion of the course.

Special Requirements: Secret clearance and be a US citizen. The statement “US Citizen” must be on the student's orders.

Quota Control: 2 AF/DOP.

E5AZA2E151 051—SATCOM Terminal AN/GSC-52(V)—PDS Code 39U—Ft Gordon/7 wk 4 days—Oct 95

This is Army course 102-ASIQ7 and is designed to train triservice personnel to operate and maintain, through the DS/GS support level, the SATCOM terminal AN/GSC-52(V). Personnel will receive training on the operation and maintenance of system specific up/down converters, communications transmitting and receiving subsystems, antenna positioning subsystems, frequency generation subsystems, and computer control/monitor equipment.

Prerequisites: Completion of applicable career development course, AFSC 2E151, 2E171, or civilian equivalent. Completion of course 102-F40 or equivalent.

Special Requirements: Interim Secret/Secret clearance.

Quota Control: 2 AF/DOP.

E5AZA2E151 053—Satellite Communications Terminal AN/GSC-49 (102-ASIP4)—PDS Code UBE—Ft Gordon/4 wk—Oct 95

Provides training in the knowledge and skills necessary to perform organizational and intermediate maintenance on the Jam Resistant Satellite Communications (JRSC) Terminal, AN/GSC-49. Includes training on the operation and maintenance of voice frequency (VF) and digital baseband equipment; transmit and receive frequency conversion and amplification equipment; antennas and satellite tracking equipment; and power distribution.

Prerequisites: Air Force--completion of applicable career development course, AFSC 2E151, 2E171, or civilian equivalent and be qualified in the operation and maintenance of the AN/USC-28 (AF course E5AZA2E151 039, PDS 2KW, Army course 102-F60).

NOTE: This is a revision of course E5AZA2E151 038 (PDS code 2KV), therefore, personnel who have attended this course should not be scheduled for training in course E5AZA2E151 053. Army - active Army enlisted personnel qualified in MOS 29Y including training on the AN/USC-28(V), or have received 102-F60 (AN/USC-28) training and have an assignment to an AN/GSC-49 terminal.

Special Requirements: Secret clearance. US citizen. The statement “US Citizen” must be on student's orders.

Quota Control: 2 AF/DOP.

E5ASN2E153 020—AN/FLR-9 Radio Frequency Distribution O/I Maintenance with Enlarger and VCATS—PDS Code XTZ—Corry Station/17 wk—Oct 95

Formal training in theory, operation, maintenance, and repair of AN/FLR-9(V) system. Includes electronic and digital techniques, radio frequency distribution, direction finding group, computer architecture, instruction sets, peripherals, DEC diagnostics and troubleshooting, Comfy Fix system application, and operation, diagnostics, and troubleshooting. Also provides training for Air Force, Army, and Navy personnel in the operation, maintenance, and repair of the AN/FRQ-25(V) radio frequency switch matrix. Includes PDP 11/23 computer architecture, peripherals, operation, and troubleshooting. Awards Air Force SEI 4ZW upon completion of course. Navy course number is A-102-0319.

Prerequisites: Must have completed basic electronics maintenance training and a field assignment. Completion of applicable career development course, AFSC 2E153, 2E173, or civilian equivalent, Army MOS 33M/P/Q/Y. Air Force entries are limited to ESC personnel who have been selected for assignment to AFMAN 36-2108 (formerly AFR 39-1) or maintenance responsibility of training equipment. Personnel who have attended course E3AZR2E153 055 and E3ASN2E153 are not eligible to attend this course.

Special Requirements: Top Secret clearance with SCI access prior to class start date. Personnel must comply with the instructions contained in paragraph 3.12.7, this catalog.

Quota Control: 2 AF/DOP.

E5AZD2E154 011—Broadcast TV Systems Maintenance—PDS Code N9A—DOD 191—Ft Meade/16 wk/MASL D132056—Oct 95

Provides formal training to field experienced television equipment specialists on maintenance procedures, AM, FM, and TV transmitters, switch processing, digital still store and video effects. The audio automation system, SATNET test, ONET operation, troubleshoot and align TV camera systems, VTR/VTP/TBC video signal processing and troubleshooting.

Prerequisites: Completion of applicable career development course, AFSC 2E154, 2E174, or civilian equivalent. ECL 70.

Special Requirements: US Army students must pass an Army physical fitness test (APFT) to qualify for completion of this course.

Quota Control: 2 AF/DOP.

X5AZA2E251 000—Constant Source Operator Terminal (CSOT) Maintenance—PDS Code XH9—Ft Huachuca/2 wk 3 days—Oct 95

Provides hands-on practical experience and evaluation strategies designed to train the skills and knowledge required to perform maintenance on CSOT. Instruction on RISC computer architecture, UNIX operating system, SUN operating system, workstation troubleshooting, peripheral troubleshooting, and subsystem level troubleshooting. Training vehicle will be representative of a CSOT position.

Prerequisites: AFSC 2E231, 2E251, 2E271, or DoD equivalent.

Quota Control: 2 AF/DOP.

E5AZA2E251 008—Communications Terminal AN/UGC-144 Maintenance—PDS Code KUS—Ft Gordon/1 wk—Oct 95

Provides training on the installation, operation, maintenance, and troubleshooting for the An/UGC-144 Communications Terminal.

Prerequisites: Completion of applicable career development course, AFSC 2E251, 2E271, or civilian equivalent.

Quota Control: 2 AF/DOP.

X5AZA2E251 011—Spectrum High-Powered Workstation Maintenance Training (102-F112)—PDS Code 3SB—Ft Huachuca/5 wk—Oct 96

Provides instruction on workstation configuration, power up and down procedures, media building, operating system environment, UNIX instruction, and SUNVIEW environment. Includes identifying peripheral controllers and CPU architectures, understanding SPARC and other SUN CPU internal components, internal bussing, and SUN system architecture. Trains on SUN network fundamentals, stand-alone network operations, security and configuration, diskless clients and servers, Network Information Service, and configuring a workstation for distributed processing network using diagnostic routines. Troubleshooting includes analyzing power-up diagnostics, running system diagnostic routines, using UNIX commands as diagnostic tools, interpreting diagnostic error messages, SCSI peripherals, and identifying defective cards and modules. Upon graduation, students will be able to distinguish between software and hardware faults.

Prerequisites: AFSC 2E251 or DoD equivalent.

Quota Control: 2 AF/DOP.

E5ABR2E531 004—Imagery Systems Maintenance Apprentice—PDS Code 5U3—DOD 198—Pensacola/8 wk 2 days/AFSC 2E531/MASL D173018—Jan 96

Provides training on the theory and application of electronic and mechanical fundamentals in organizational and intermediate maintenance of imagery systems: emphasis on electronic fundamentals, repair of still and motion media acquisition

processing, reproduction and display equipment; use of test equipment and fault detection methods; use of technical publications; and principles and practical application of troubleshooting procedures, functional analysis, adjustments, and calibration.

Prerequisites: ECL 70.

Quota Control: 2 AF/DOP.

E5AZD2E551 008—Advanced Imagery System Equipment System Specialist—PDS Code MPU—DOD 198—Pensacola/3 wk 3 days—Jan 96

Provides supplemental advanced career training for Air Force personnel in the knowledge and skills needed to perform the duties of an imagery systems maintenance specialist. Includes operational check, cleaning, demagnetizing, alignment, and inspection procedures on a camcorder; operational check, description and operational theory of a graphic imaging system (GIS); description, operational theory, periodic maintenance, adjustment, and troubleshooting procedures on photographic printers; and description, operational theory, periodic maintenance, and troubleshooting procedures on mini labs.

Prerequisites: Completion of applicable career development course, AFSC 2E154, 2E174, 2E551, 2E571, or civilian equivalent.

Quota Control: 2 AF/DOP.

E5AZD2E551 009—Camcorder Maintenance—PDS Code NRT—DOD 198—Pensacola/4 days—Jan 96

Provides training for personnel who possess AFSC 2E531 or higher in the knowledge and skills needed to perform organizational maintenance on camcorders. Includes an operational check, cleaning, demagnetizing, inspection and alignment procedures on the camcorder. Course content is the same as Block I of course E5AZD2E551 008.

Prerequisites: Completion of applicable career development course, AFSC 2E154, 2E174, 2E551, 2E571, or civilian equivalent.

Quota Control: 2 AF/DOP.

E5AZD2E551 010—Graphic Imaging Systems Maintenance—PDS Code NRU—DOD 198—Pensacola/3 days—Oct 95

Provides training for personnel in the knowledge and skills needed to perform organizational maintenance on graphic imaging systems (GIS). Includes an operational check, description, and operational theory of the GIS. Course content is the same as Block II of course E5AZD2E551 008.

Prerequisites: Completion of applicable career development course, AFSC 2E154, 2E174, 2E551, 2E571, or civilian equivalent.

Quota Control: 2 AF/DOP.

E5AZD2E551 011—Photographic Printer Maintenance—PDS Code NRV—Pensacola/1 wk—Oct 95

Provides training for personnel in the knowledge and skills needed to perform organizational maintenance on the Mark IV R5A/DS photographic printer. Includes the description, operational theory, periodic maintenance procedures, adjustment, and troubleshooting procedures of the Mark IV R5A/DS photographic printer. Course content is the same as Block III of course E5AZD2E551 008.

Prerequisites: Completion of applicable career development course, AFSC 2E154, 2E174, 2E551, 2E571, or civilian equivalent.

Quota Control: 2 AF/DOP.

E5AZD2E551 012—Mini Lab Maintenance—PDS Code NRW—DOD 198—Pensacola/1 wk 1 day—Oct 95

Provides training for personnel in the knowledge and skills needed to perform organizational maintenance on the Moritsu mini lab. Includes the description, operational theory, periodic maintenance, and troubleshooting procedures on the mini lab. Course content is the same as Block IV of course E5AZD2E551 008.

Prerequisites: Completion of applicable career development course, AFSC 2E154, 2E174, 2E551, 2E571, or civilian equivalent.

Quota Control: 2 AF/DOP.

L5AZA2T051 001 (8C-F5/514-F2)—Basic Joint Personal Property Course—PDS Code R73—DOD 514—Ft Eustis*/2 wk—Dec 93

Training in HHG and personal property shipment programs including: baggage allowance and entitlements; WHIST program; carrier qualification and mode and storage selection; excess costs and claims; documentation of personal property shipment and inspection of HHG; quality control procedures and shipment of housetrailers.

Prerequisites: Military and civilian personnel with AFSC 2T051 or higher (or equivalent) assigned or under orders to position at the operating level in transportation or traffic management offices whose duties require a knowledge of personal property shipments.

Quota Control: 2 AF/DOP.

*Army Transportation School.

L5AZA2T251 002—Fabrication of Aerial Delivery Loads—PDS Code E8Y—DOD 514—Ft Lee/3 wk/MASL B153763—Oct 96

Trains in heavy cargo parachute packing, containers, preparing and rigging heavy cargo for airdrop, loading and securing cargo, extraction procedures, and recovery of equipment used in airdrop.

Prerequisites: AFSC 2T2X1. Personnel must be assigned or projected for assignment to a mobile aerial port (MAPS), a combat support branch (CMB), an aerial delivery section (AD), or any other position requiring knowledge of Army procedures for preparing and rigging heavy cargo. ECL 70.

Special Requirements: Students must have fatigue uniforms and six each military issue T-shirts. T-shirts will be stenciled with student's name at the Quartermaster School. Uniform for classes will be fatigues with steel-toed boots; trousers will be bloused. Air Force students in grades E-6 and below must furnish all personal hygiene items, including washcloths, towels, soap, etc.

Quota Control: 2 AF/DOP.

L5ABA2T432 000—Vehicle Body Mechanic—PDS Code DGV—DOD 704—Aberdeen*/12 wk 4 days/AFSC 2T432—Oct 96

Repairs and replaces automotive body panels and fenders. Checks vehicle frames, refinishes vehicle bodies, and welds metals using gas and electrical methods. Repairs and replaces radiators. Repairs vehicle glass by cutting and fitting. Applies protective coating and paint. Determines feasibility and best method of repair by inspection of damaged vehicle. Items of test and repair equipment are used in the instructional area.

Reporting Instructions: Students report on Sunday prior to class start date.

Special Requirements: Safety-toed shoes.

Quota Control: 2 AF/DOP.

*US Army Ordnance Center and School.

X5AZD3A051 000—SCI Administration Course—PDS Code K1U—Bolling (DIAC)/1 wk—Mar 94

Detailed instruction in personnel security, billet management, clearance passing procedures, indoctrination and debriefing procedures, security education, information security, document control, courier procedures, and handling of security violations. This administrative skills course prepares administrative and clerical personnel to perform the regular SCI administrative and control procedures accomplished at DOD special security offices (SSO).

Prerequisites: Course is for newly assigned or to be assigned personnel with less than 6 months of experience within an SSO or special security work.

Selection is limited to US Government personnel nominated by their agency or service.

Special Requirements: Course requires TS/SI/TK clearance. Security clearance must be passed through SSO channels to SSO DIA//OS-4A//DIC-1D. Collateral security clearances certified by the nominating activity's Security Officer must be sent with student nomination. Clearances must be received 20 workdays prior to class start date.

Quota Control: 2 AF/DOP.

E3ACR3A071 001—Information Management Craftsman—PDS Code 3AI—Keesler/2 wk—Oct 96

Introduces business planning, life-cycle management, electronic information transfer, electronic records keeping, emerging technologies, information warfare, functional management responsibilities, wartime and contingency operations and networking.

Prerequisites: SSgt or above who has completed a minimum of 18 months of on-the-job training (12 months for cross-trainer) and the 7-skill level career development course.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR3C031 003—Apprentice Communications-Computer Systems Operations—PDS Code 788—Keesler/13 wk—Oct 96

Provides students with a solid foundation in microcomputer principles including basic operation and processing to configuration, maintenance, and repair. Includes knowledge of specifi hardware and software configuration, use of applications software, communications-computer systems security, network principles and management, equipment control and management, multi-user systems concepts and operation, and telecommunications center and mobile communications operation.

Prerequisites: ECL 70.

Special Requirements: Students must arrive with a full complement of uniforms.

Quota Control: HQ 2AF/DOP.

E6AZU3C031 018—MS-DOS Operating System Version 6.22—PDS Code 7XF—user's site/1 day—Oct 96

Provides training for small computer users in the use of the MS-DOS operating system. The assumes version 6.22. Training includes getting started with MS-DOS, data storage, MS-DOX help function, and internal and external commands.

Course Entry: This is an exportable diskette training package available from MAJCOMs or the ICW distribiution section DSN 597-2985. Entry and completion are controlled by the user. Forward comments and suggestions to 81 TRSS/TTOX, 825 Hercules Street, room 114, Keesler AFB MS 39534-2038.

E3ACR3C271 000—Communications-Computer Systems Control Craftsman—PDS Code XHQ—Keesler/4 wk—Oct 96

Trains personnel in AFSC 3C251 in the knowledge and skills needed to perform the duties of communication-computer systems control craftsman. Scope of training includes work center management, Air Force networks, network architectures and interface techniques, network control, and network management and administration.

Quota Control: HQ AFPC/DPPAPEO.

E3ABR3C331 004—Apprentice Communications-Computer Systems Planning and Implementation Management Specialist—PDS Code 5FM—Sheppard/5 wk 1 day/AFSC 3C331—Oct 96

Training for personnel in command, control, communications, and computer (C4) systems; DoD and Air Force planning and program/project management; biennial planning, programming, and budgeting system; architecture and systems configuration; base-level C4 systems planning; and programming requirements and implementation monitoring, and resource management. Introduction to C4 systems technology including computer setup and operation; interoperability; peripheral devices; digital signal characteristics and devices; and transmission media; networks; and basewide C4 cable systems. Introduces relationships between support agreements, contracts, war/contingency/support plans, the C4 Systems Blueprint, and C4 systems infrastructure. Familiarization of communications security (COMSEC), computer security (COMPUSEC), and operations security (OPSEC).

Prerequisites: Open to DoD civilians GS-5 through GS-14 (or equivalent).

Special Requirements: Classroom uniform is light blue shirt or blouse with short or long sleeves and dark blue pants or skirt. Battle Dress Uniforms (BDUs) will be worn on designated days.

Quota Control: 2 AF/DOP

J5ABA3E231 000—Pavement Maintenance Construction Equipment Operator Apprentice—PDS Code VA1—Ft Leonard Wood/14 wk/AFSC 3E231/MASL D148060—Jan 96

This is an Interservice Review Organization (ITRO) course. Construction, maintenance, and repair of rigid and flexible pavements, excavation, subgrade stabilization, and base course compaction; operation and inspection of power tools and equipment; operation, inspection, and maintenance of dump trucks, front-end loaders with fork attachment, backhoes, and multi-purpose sweepers; knowledge of installation, inspection, and repair of fences and drainage structures; rapid runway repair; snow and ice control operations; and general and specific contingencies.

Prerequisites: Possession of valid state vehicle operator license. ECL 70.

Special Requirements: High-top safety boots.

Quota Control: 2 AF/DOP.

J5ABA3E531 000—Engineering Apprentice—PDS Code Y35—DOD 412—Ft Leonard Wood/12 wk 3 days*/AFSC 3E531/MASL D148079—Jan 96

This is an Interservice Review Organization (ITRO) course. Mathematics as applied to surveying; principles, procedures, and performance of plane surveying; use and care of surveying equipment; basic drafting fundamentals; use and care of drafting equipment; multiview and engineering drawings. Safety; Air Force publications; engineering publications; methods of reproducing drawings and plans; operation of reproduction machines; basic autoCAD software operation.

Prerequisites: Successful completion of algebra I, trigonometry, and plane geometry are mandatory. ECL 70.

Special Requirements: Combat boots.

Quota Control: 2 AF/DOP.

J5ABN3E831 001—Explosive Ordnance Disposal Apprentice Phase II—PDS Code 9BR—Indian Head MD/15 wk/AFSC 3E831—Oct 96

Provides training in the best methods and procedures for safe identification, recovery, evaluation, and disposal of all conventional and nuclear explosive ordnance. Instruction encompasses placed, projected, and dropped munitions and associated fuzes, aircraft explosive hazards, guided missiles and detailed instruction on the recovery, evaluation, and disposal of nuclear weapons. Course material includes Critical Nuclear Design Information (CNDWI). There are two phases of training (phases I and II). Personnel will not be entered for only one phase of training. Airmen will be awarded AFSC 3E831 after successful completion of both phases.

Prerequisites: Meet requirements for Air Force explosive ordnance disposal (EOD) duty as reflected in AFMAN 36-2108 (formerly AFR 39-1).

Special Requirements: Secret clearance required by class start date. Reliability screening (AFI 36-2104 [formerly AFR 35-99])qualification standards mandatory. NPS personnel must have satisfactory clearance by 319 TRS, Lackland AFB TX. Background investigation (SSBI) for critical PRP completed or initiated before departure from parent base. Unit initiating SSBI on nonprior service personnel will have SSBI Report of Investigation sent to Det 3, 366 TCHTS/CC, Eglin AFB FL 32542. All initiating organizations include in orders a statement that SSBI has been completed or initiated, date action was taken, and which district has or will have final results. Individuals who require glasses should bring protective mask glasses. NOTE: Reliability screening (AFI 36-2104) for Air Reserve components are exempt.

Admin Instructions: Orders must direct student to report to Eglin AFB FL to attend phase I course J5AQN3E831 001, 11 weeks duration, and then proceed to US Naval School, EOD, Naval Ordnance Station, Indian Head MD 20640.

Quota Control: 2 AF/DOP.

J5AQN3E831 000—Explosive Ordnance Disposal Apprentice, Phase I—PDS Code 8Z1—Eglin/11 wk/AFSC 3E831—Oct 96

Trains personnel in best methods for performing explosive ordnance reconnaissance, ordnance identification procedures, access and recovery of dud ordnance and disposal operations involving nonnuclear and chemical/biological ordnance, both foreign and domestic. Instruction encompasses use of explosive ordnance disposal (EOD) publications, applied physical principles, explosive effects, safety precautions, munitions storage, handling and transportation, fuze and fuze functioning, EOD tool operations, and maintenance. Heavy emphasis is placed on safety precautions, ordnance reconnaissance and identification, and use of EOD publications. The course provides comprehensive instruction in general demolition procedures. Additionally, the course deals with aspects of EOD operations in a chemical environment to include chemical agent identification and classification, calculations of chemical vapor hazard areas, personnel protection and protective clothing, operation of decontaminating stations, sealing of leaking munitions, and munition identification. There are two phases of training (phase I and phase II). Personnel will not be entered for only one phase of training.

Prerequisites: Meet requirements of AFSC 3E8X1 as reflected in AFMAN 36-2108 (formerly AFR 39-1).

Special Requirements: Personnel must be screened or administratively certified for PRP nuclear weapons-related duties according to AFI 36-2104 (formerly AFR 35-99), chapter 6. Secret clearance is required and an SSBI completed or initiated by class start date. Nonprior service (NPS) personnel must have satisfactory clearance by 319 TRS, Lackland AFB TX. Prior service personnel must have background investigation (SSBI) completed or initiated prior to departure from parent base. Unit initiating SSBI or prior service personnel who have SSBI Report of Investigation sent to Det 3, 366 TTS/CC, Eglin AFB FL 32542-6009. Individuals who require corrective lenses must bring corrective lens inserts for the M9A1 and M17A1 protective masks. ANG personnel must provide copy of orders to Det 3, 366 TTS/CC, NLT 30 days prior to course start date. NOTE: Personnel reliability program screening IAW AFI 36-2104 does not apply to Air Reserve Component personnel. Air Reserve Component personnel are those personnel in the Air National Guard and Air Force Reserve.

Admin Instructions: Orders must state SSBI has been completed or initiated, the date action was taken, and which DIS district has or will have final results. Orders must reflect one of the following statements as applicable: “Individual has been screened for PRP nuclear weapons related duty according to AFI 36-2104 (formerly AFR 35-99), chapter 6" (for NPS personnel) or “Individual has been administratively certified for PRP nuclear weapons related duties according to AFI 36-2104 (formerly AFR 35-99), chapter 6" (for prior-service personnel). Orders must direct students to report to Eglin AFB FL to attend Phase I course J5AQN3E831 001, 11 weeks duration, and then proceed to US Naval School, EOD, Naval Ordnance Station, Indian Head MD 20640.

Quota Control: 2 AF/DOP.

J5AZN3E871 001—Advanced Access and Disablement—PDS Code 6AQ—DOD 431—Indian Head MD/2 wk—Apr 95

Provides training in advanced procedures and techniques employed to counter the increasing terrorist threat. Provides new technology and methods of access when dealing with hostile situations.

Prerequisites: Satisfactory completion of basic surface explosive ordnance disposal course. 3E8X1 currently explosive ordnance disposal (EOD) qualified SSgt or above with at least 3 years of operational EOD experience. EOD qualified officer currently assigned in EOD position.

Special Requirements: Secret clearance with CNWDI access authorized. Message confirmation must be sent to MD//08/20/00B// NLT 25 workdays prior to class start date with SSN, grade, name, proper course title, course dates, and security clearance level with CNWDI access.

Admin Instructions: Assignment orders must state: “Attached to 366 TRS, Det 2, Indian Head MD, for administration,” and “TDY is being performed to attend a course in demolition duty.” Orders must

contain a statement that student is authorized to receive "Critical Nuclear Weapons Design Information" as defined in DoD Directive 5210.2 and is certified by a designated certifying official (AFI 31-401 [formerly AFR 205-1]). Nominees are not allowed to attend course unless this requirement is satisfied. Students are to report to the quarterdeck at NAVEODTECHDIV, Stump Neck, at 0730 for inprocessing on the first day of class. There is no government transportation provided for this course. Uniform required for reporting is the BDU. All students must bring their medical records because this is a high safety risk course. Foul weather gear is also required.

Quota Control: 2 AF/DOP.

J5AZN3E871 002—Advanced EOD Management and Technology—PDS Code 3E5—DOD 431—Indian Head MD*/2 wk—Apr 95

Supplementary advanced refresher training for officers and airmen in explosive ordnance disposal. Encompasses latest developments in explosive ordnance disposal (EOD). Personnel must complete advanced or refresher training either: every 36 to 48 months; before departing on an overseas assignment of 36 months or longer, if more than 18 months have elapsed since candidates completed the basic, advanced, or refresher training course; or within 12 months after their return from an overseas assignment of 36 months or more according to AFI 32-3001, *Explosive Ordnance Disposal* (formerly AFR 136-10).

Prerequisites: Satisfactory completion of basic surface explosive ordnance disposal course.

Special Requirements: Secret clearance with CNWDI access authorized. Message confirmation must be made to NAVSCOLEOD DET INDIAN HEAD MD//08/20/00B// NLT 25 workdays prior to class start date with SSN, grade, name, proper course title, course dates, and security clearance level with CNWDI access.

Admin Instructions: Assignment orders must state: "Attached to 366 TRS, Det 2, Indian Head MD, for administration," and "TDY is being performed to attend a course in demolition duty." Orders must contain a statement that student is authorized to receive "Critical Nuclear Weapons Design Information" as defined in DoD Directive 5210.2 and is certified by a designated certifying official (AFI 31-401 [formerly AFR 205-1]). Nominees are not allowed to attend course unless this requirement is satisfied. Students are to report to building 901 for inprocessing at 0730 on the first day of class. Reporting and inprocessing uniform is the blue uniform, the tie is optional. The battle dress uniform is acceptable for some days of instruction. Also, class participants will be required to wear civilian attire on some occasions-neat casual shirts with collars, slacks, and shoes. No jeans or tennis shoes are permitted. Foul weather gear is also required.

Quota Control: 2 AF/DOP.

*US Naval School, US Naval Ordnance Station.

J5AZO3E871 000—Joint Nuclear Explosive Ordnance Disposal (JNEOD)—PDS Code 2EZ—Kirtland/1 wk—Oct 96

Detailed sustainment training for officers and airmen on nuclear weapons, hazards, weapon stockpile safety features and safeguards and weapon effects, and history of weapons accidents and weapons development. Nuclear weapon design information with emphasis on nuclear physics, enhanced electrical safety, component subsystems, and identification features. Provides detailed component familiarization. EOD support of nuclear accident recovery is reviewed along with the role of organizations, such as Defense Nuclear Agency and the Department of Energy. General foreign systems information is also covered.

Prerequisites: EOD technician in an operational EOD position.

Special Requirements: Must have "DNWS and Sandia National Laboratories, Kirtland AFB NM" in the itinerary section of travel orders. Minimum Secret/RD clearance with CNWDI access authorized. Must submit properly formatted message (see para 3.13.6.4) to FCDNA/FCINTR, ATTN: TSgt Llarraza, 1900 Wyoming Blvd, SE, Kirtland AFB NM 87117-5669, or letter to same address or fax to (505)846-9168, or DSN 246-9168, 15 workdays before class start date. Questions should be directed to (505)846-5666 or DSN 246-5666. Uniform for the course is the battle dress uniform (BDU). BOQ/BEQ reservations will be made by FCDNA/FCINTR for military personnel.

Admin Instructions: Report to the Sandia National Laboratories Badge Office, bldg 801, by 0715 on the first day of class.

Quota Control: 2 AF/DOP.

L3AZR3M051 004—Lodging Fundamentals—PDS Code 7FY—Lackland/1 wk—Oct 96

Trains personnel in the knowledge and skills needed to perform their duties in an Air lodging facility. Training includes authorized customers, transient quarters, aircrew support, reservations, assigning and terminating quarters, locator services and continuity folders.

Prerequisites: Individuals must currently be assigned to a lodging operation or assigned upon completion of the course. Additionally, military members must have attained their 3-skill level.

Special Requirements: TDY students should report to the base lodging office for quarters assignment. At this time they will receive a base map of Lackland AFB as well as reporting instructions for the location of the Lodging Fundamentals Course. The course is taught on main base Lackland and the hours are from 1730 to 1630. The uniform of the day is short/long sleeve blue shirt/blouse, blue pants/skirt, tie/tab, and ribbons. Civilians attending the course should wear attire that projects a professional image. Students are also required to bring three copies of their orders on the first day of class.

Quota Control: 2 AF/DOP.

E5ABD3N031 001—Basic Public Affairs-Journalism Course (570-46Q10)—PDS Code AED—DOD 570—Ft George Meade*/10 wk 2 days/AFSC 3N031—Oct 95

Application of communication techniques (printed, oral and graphic, and radio and television) in support of internal and external public affairs programs and community relations programs. Trains airmen to prepare news releases, articles, photographs, radio programs, and other public affairs material for public dissemination; to participate in the conduct of community relations; to collect, evaluate, and prepare materials for internal information; and to participate in the operation of newspapers and other internal media.

Prerequisites: Military personnel E-1 and above. Civilian personnel in grade of GS-5 or below and having a requirement for this training. Must be able to type 20 words per minute. General AQE of 69 percentile.

NOTE: Waivers of prerequisites must be approved by the Commandant, Defense Information School (DINFOS) before arrival for training.

Quota Control: 2 AF/DOP.

*Defense Information School.

E5ABD3N032 000—Basic Public Affairs-Broadcaster Course (570-46R10)—PDS Code E77—DOD 570—Ft George Meade/12 wk/AFSC 3N032—Apr 95

Training for assignment as staff members of oversea Armed Forces Radio and Television Stations (AFRTS). Includes AFRTS organization, function, station management, and administrative services; news writing; spot announcements, and feature material for radio and television; students are trained in announcing news, sports, features and special events; interview techniques; control room operation; programming and production; and regulatory agencies and broadcast standards.

Prerequisites: Military personnel E-1 and above. Civilian personnel in grade of GS-5 or below requiring this skill training. Must be able to type 20 words per minute. General AQE of 69 percentile. Voice quality is essential for this course. Determination of acceptable voice quality is made by the Defense Information School (DINFOS) staff and faculty on the basis of a typed audition. Taped auditions must be forwarded for review before acceptance into this course of instruction.

NOTE: Waivers for attendance in this course of instruction will be granted only by the Commandant, DINFOS. Written waiver must be obtained before arrival for training.

Application and Selection Procedures: Accession from basic military training. In first days of training, airmen are briefed on nature of 3N0X2 career field and mandatory entry prerequisites. Interested volunteers (includes those with such abilities as prior broadcasting experience but for whom other prerequisites may require waiver) are identified to Lackland AFB (DPUI) to complete an audition tape. Audition tapes are forwarded for review by DINFOS. Upon notification by DINFOS to Lackland (DPUI) that an airman is qualified, approved application is forwarded to HQ AFPC/DPMRA for allocation of such quota.

Accession Through Retraining: See AFI 36-2204 (formerly AFR 39-4) for processing of retraining applications into the broadcast specialist-television and radio production technician career field.

Quota Control: 2 AF/DOP.

E5AZD3N051 001—Editor's Course (AFIS-EC)—PDS Code H2Y—DOD 570—Ft George Meade*/4 wk—Oct 96

Provides training on the principles, techniques, and skills of editing military publications. Includes practical hands-on application of principles and techniques employed in modern newspaper design and instruction in desktop publishing.

Prerequisites: Must be A1C and above with AFSC 3N051 or higher and have the ability to type minimum of 20 words per minute (computer experience is desirable). Have education or experience in one of the following: graduate of E5ABA3N031 001, Basic Public Affairs Journalism Course (AFIS-BJC), with a minimum of 6 months of experience on a military news publication staff; graduate of E5OBA35P1 003, Public Affairs Officer Course (AFIS-PAOC), with 6 months of experience working on a military news publication staff; or have worked a minimum of 1 year as writer or editor of a civilian or military news publication; or have 20 or more hours/credits of college-level work in journalism with 6 months of experience working on a military or civilian news publication staff.

Quota Control: 2 AF/DOP.

*Defense Information School.

E5AZD3N051 002—Intermediate Photojournalism Course (570-ASIJ8)—PDS Code 3N8—DOD 570—Ft George Meade*/8 wk—Oct 95

Provides service journalists and photographers, military and civilian, with photojournalism skills necessary to support public affairs objectives and programs.

Prerequisites: Military members, E-4 and above, with AFSC 3N051 or 3V032, and DOD civilians, GS-5 and above, with similar qualifications. Type minimum of 20 words per minute. 3N051: minimum of 1 year of service journalism experience; graduate of course G5ABA3N031 001, Basic Public Affairs-Journalism Course (570-46Q10), or a minimum of 15 semester credit hours of college-level courses in related or comparable areas, and be recommended by base PAO. 3V052; minimum of 1 year of experience in service photography; general AQE of 60 percentile; minimum of 60 on the English diagnostics test; military members in grade of Airman through TSgt, civilians in grades of GS-4 through GS-9 and equivalent WGs; a graduate of course E5ABD3V032 002, PDS Code 7XV, Still Photography Apprentice, or a minimum of 15 semester credit hours of college-level courses in a related or comparable area; must be recommended by the base visual information manager.

NOTE: Waivers of prerequisites must be approved by the Commandant, Defense Information (DINFOS) before arrival for training.

Quota Control: 2 AF/DOP.

*Defense Information School.

E5AZD3N051 003—Public Affairs Supervisor Course (570-F1)—PDS Code MUE—DOD 570—Ft George Meade*/2 wk—Oct 95

Provides training in the planning, supervision, and coordination of Public Affairs (PA) activities for selected E-4s and E-5s in the PA field who will perform supervisory duties in a PA office.

Prerequisites: E-4 or E-5 possessing AFSC 3N051, must have at least 2 years of experience in military public affairs, and be a graduate of either course E5ABA3N031 001, Basic Public Affairs Journalism Course (570-46Q10), or course E5ABA3N032 000, Basic Public Affairs-Broadcaster Course (570-46R10). Must be currently assigned in the PA field. Attendance is limited to military only.

NOTE: Waivers of prerequisites must be approved by the Commandant, Defense Information School (DINFOS) before arrival for training.

Quota Control: 2 AF/DOP.

*Defense Information School.

E5AZD3N052 000—Electronic Journalism Course (570-F3)—PDS Code ZYU—DOD 570—Ft George Meade*/2 wk—Oct 95

Provides Public Affairs personnel with electronic journalism skills necessary to support military television stations and/or production facilities.

Prerequisites: Open to all military personnel serving in the public affairs field and all civilian personnel requiring electronic journalism skills. Graduate of course E5ABA3N032 000, Basic Public Affairs-Broadcaster Course (570-46R10), before 1 Oct 86, or currently working in an electronic journalism assignment that requires the training this course offers, or currently projected for an

AFRTS station assignment that requires electronic news gathering (ENG) skills.

NOTE: Request for waiver of prerequisites must be approved by the Commandant, Defense Information School (DINFOS) before arrival for training. As of 1 Oct 86, electronic journalism training was incorporated into the final 2 weeks of course E5ABA3N032 000. Graduates of the basic broadcaster course with a completion date after 1 Oct 86 should NOT attend this course.

Quota Control: 2 AF/DOP.

*Defense Information School.

E5AZD3N071 001—Senior Enlisted Public Affairs (SEPAC) (7G-F9/57O-F5)—PDS Code 3CF—DOD 570—Ft George Meade*/1 wk—Oct 95

Provides continuing, professional development of military public affairs NCOs.

Prerequisites: Senior NCOs MSgt through CMSgt responsible for or performing duty in military public affairs. Graduate of the Defense Information School's Public Affairs Supervisor Course, or have equivalent training or experience. AFSC 79170/71 or 79199.

NOTE: Request for waiver of prerequisites must be approved by the Commandant, Defense Information School (DINFOS) before arrival for training.

Admin Instructions: A brief resume that describes current military duty assignment, previous public affairs or media experience, and formal education is required of each participant in this course. It will be requested by letter on receipt of orders at the Defense Information School (DINFOS) on the individual concerned.

Quota Control: 2 AF/DOP.

*Defense Information School.

E5AZD3N071 002—Public Affairs Craftsman (570-46Q/R40)—PDS Code MU7—DOD 570—Ft George Meade*/2 wk—Jan 96

Provides advanced training in the planning, supervision, and coordination of Public Affairs (PA) activities for selected SSgts and above in the PA field. Must complete this course for award of a 7-skill level.

Prerequisites: Must be a graduate of either course E5ABA3N031 001, Basic Public Affairs-Journalism Course (570-46Q10). Must possess AFSC 3N051.

Quota Control: HQ AFPC/DPPAPEO.

*Defense Information School.

E5ACD3N072 004—Public Affairs Broadcast Craftsman Course (AFIS-BMC)—PDS Code OR5—DOD 400—Ft Meade*/4 wk—Oct 96

Primary emphasis of training will be placed on teaching the student to apply management, administrative, and broadcast knowledge and skills in organizing, supervising, evaluating, and training involved in Armed Forces Radio And Television Service networks and station operations in accordance with DoD and American Forces Information Service policies and directives. Training is conducted on the computer applications of the organized network of extended terminals system in use throughout AFRTS. Training will equip the student with advanced techniques in policy, administration, and public affairs procedures. Styles of management, counseling, and team building are addressed in both theory and practical application.

Prerequisites: E-5 and higher, graduate of BBC or 1 year AFRTS experience, completion of professional military training in respective grade and skill (USAF: Professional Military Education (PME)).

Note: Non-waiverable assignment or enroute to AFRTS or reserve component broadcast public affairs detachment is mandatory.

Quota Control: HQ AFPC/DPPAPEO.

*Defense Information School (DINFOS).

L5AZN3P052 000—Corrections Specialist—PDS Code 7NA—Lackland/4 wk 4 days—Apr 95

Provides selected DoD law enforcement personnel with entry-level training of the principles, theories, and practices which are required for the administration, operating, and supervising of DoD corrections facilities. Includes confinement procedures and regulations, UCMJ, confinement organization, conducting physical training, substance abuse, programming/phases of confinement, prisoner classification, quarters supervision, mail and visitor, prisoner communication, contraband control, administration/disciplinary measures, use of force, prisoner escorting, hospital prisoners, physical security checks and patrols, emergency plans, bomb threats, riot control, CPR, and mock confinement facilities operations.

Prerequisites: Air Force must be in the grade of A1C or higher, be at least 21 years of age, with 4 years of military service. Must have passed the Air Force physical fitness requirements within the past 3 months. Cannot have nonjudicial punishment or court martial on current enlistment. Pregnancy is a disqualifying factor due to the physical requirements of the course.

Special Requirements: BDU (primary class uniform) and service dress. Intense physical training is involved in the corrections course-PT uniforms required for Navy and Air Force is navy blue running shorts, white crew neck t-shirt, white socks, and running shoes.

Admin Instructions: Students will report NLT 1630 the day before class start date. Training is at Naval Technical Training Center Detachment, Lackland AFB TX.

Quota Control: 2 AF/DOP.

L5AZA3P072 000 (830-F8)—Military Police Investigation—PDS Code RZ4—DOD 830—Ft McClellan*/8 wk/MASL B173582—Oct 96

Provides training for security police in receiving and processing complaints; collecting and preserving physical evidence; obtaining and recording testimonial evidence from witnesses, complaints, victims, and suspects; evaluating evidence in criminal and traffic cases; identifying drugs and drug offenders; preparing reports; and providing testimony in court.

Prerequisites: AFSC 3P052/72. The installation's Chief of Security Police should select his or her best candidate for the school, regardless of time in service. Upon completion of the course, the graduate will incur an 8-month service commitment. ECL 70.

Special Requirements: US Air Force students must bring a copy of their latest passing cycle ergometry test for entry into this course.

Quota Control: 2 AF/DOP.

*US Army Military Police School.

L5AZN3P072 001—Navy Correctional Counselor—PDS Code 049—DOD 830—Lackland/5 wk—Jan 96

Provides selected DoD law enforcement personnel with advanced-level training of the principles, theories, and practices which are required for counselors working in DoD correctional facilities.

Prerequisites: Air Force must be in the grade of SSgt or above, must have graduated from the basic corrections course, assigned to a correctional facility for at least 6 months, have a high school or college background in psychology, good communications skills, desire to work with others, and be recommended by supervisor or officer in charge.

Special Requirements: BDU (primary duty/class uniform) and service dress. Physical training required in training--PT uniforms required for Navy and Air Force is navy blue running shorts, white crew neck T-shirt, white socks, and a good pair of running (jogging) shoes (not basketball hightops--which are conducive to ankle and leg injuries).

Quota Control: 2 AF/DOP.

*Defense Equal Opportunity Management Institute.

L5ALO3S131A 001—Equal Opportunity Management I (USAFR/ANG)—PDS Code 2C3—Patrick*/2 wk 1 day/AFSC 3S131A—Mar 94

Provides students with the basic equal opportunity management tools to begin working with new methods upon returning to their home units. Increases awareness and skills in areas of interpersonal involvement, such as communication, advising and helping situations, conflict management, and problem solving. Increases awareness of sexist, racist, and other discriminating behavior and the institutional forms of discrimination.

Prerequisites: Attendance limited to USAFR and ANG airmen with an approved application for retraining into AFSC 3S131A.

Quota Control: 2 AF/DOP.

*Defense Equal Opportunity Management Institute.

L5ALO3S131A 002—Equal Opportunity Management II (USAFR/ANG)—PDS Code 2C4—Patrick*/2 wk 1 day/AFSC 3S131A—Mar 94

Develops skills in applying organizational development techniques to improve the functioning of an organization through planned, systematic efforts designed to enhance equal opportunity. Applies the knowledge and skills acquired during the entire course in the operational configuration of a military unit.

Prerequisites: Attendance limited to USAFR and ANG airmen with an approved application for retraining into AFSC 3S131A. Successful completion of course L5ALO3S131A 001, nonresident correspondence requirements, and the nonresident weekend program are also required.

Quota Control: 2 AF/DOP.

*Defense Equal Opportunity Management Institute.

E5ABD3V031 000—Visual Information Apprentice—PDS Code VNX—DOD 414—Ft Meade/11 wk 2 days/AFSC 3V031/MASL D164005—Apr 95

Introduction to graphics, lettering, basic drawing, and perspective; applying basic and illustrating techniques; reproduction methods and processes; visual communication; and graphics imaging systems.

Prerequisites: USAF: see AFMAN 36-2108 (formerly AFR 39-1); USMC: normal color vision, minimum aptitude level of GT 100; USA: ST score minimum 95, high school graduate, 11 months or more of active duty upon completion of course. ECL 70.

Special Requirements: USMC member must have Secret clearance by class start date. US Army students must pass an Army Physical Fitness Test (APFT) to qualify for completion of this course.

Quota Control: 2 AF/DOP.

E5ABD3V033 001—Visual Information Production Documentation Apprentice—PDS Code PY0—DOD 400—Ft Meade/15 wk 3 days/AFSC 3V033/MASL D164591—Oct 96

Provides training in basic motion media techniques; recording of controlled and uncontrolled actions in field and studio environments; basic audio recording, audio and video production operations; and videotape editing under field and studio conditions.

Prerequisites: USAF: See AFI 36-2108 (formerly AFR 39-1). ECL 70.

Special Requirements: US Army students must pass an Army physical fitness test (APFT) to qualify for completion of this course. Students will perform in a combat camera operation during a 3 to 5 day (minimum of 48 hours on location) tactical field exercise. Students must ensure they have proper uniforms to operate in a field exercise environment.

Quota Control: 2 AF/DOP.

E5AAD3V090 002—Visual Information Management—PDS Code JH9—Ft Meade/2 wk 3 days—Oct 95

Provides instruction in the mission and management of the Visual Information Service Center (VISC); duties and responsibilities of the Base Visual Information Manager (BVIM); administration, production and cost accounting; acquisition and control of VI resources; environmental protection and AFOSH programs; quality assurance and production control; customer relations; and security.

Prerequisites: Air Force officer, enlisted, or civilian personnel in AFSCs 3VXX, 3V07X, 3V17X, 3V000, and 3V099. Personnel should be assigned to or selected for positions requiring knowledge and skills necessary to manage a VISC.

Special Requirements: Students will bring a video tape, 8mm or 1/2". The video will contain interior and exterior views of their combined VISC or separate facilities showing new construction, renovations (with before and after shots, if possible), and unique or new equipment, with running time of 8 to 15 minutes.

Quota Control: 2 AF/DOP.

L5ABO8G000 000—USAF Honor Guard—PDS Code 087—Bolling/7 wk—Apr 96

Trains basic military training (BMT) graduates and lateral retrainees (Regular Air Force, Air National Guard, and Air Force Reserve) as ceremonial guardsmen. Includes military drill and ceremonies and physical fitness. Training is designed to produce a proud, productive, and disciplined airman who displays the standards, values, and attitudes of the United States Air Force Presidential Honor Guard.

Special Requirements: Basic uniform issue.

Admin Instructions: Phone (202) 767-0586 upon arrival for any assistance.

Quota Control: 2 AF/DOP.

E5ABA8M000 001—Postal Operations (510-ASIF5)—PDS Code 25K—DOD 554—Ft Jackson/5 wk—Oct 95

Provides instruction to personnel designated for assignment to the USAF Postal Service in SDI 8M000 positions with the knowledge to perform as postal operations administration officers, custodians of postal effects and Air Force postal clerks. Emphasis is placed on principles, policies, procedures, and administration of APOs and AMTs. Specific subject matter includes postal activities, domestic mail, international mail, postal supplies and equipment, postal service center operations, claims and complaints, mail processing, transportation and documentation, administration of postage accounts and money order services.

Prerequisites: Airmen who have been designated for assignment with USAF Postal Service as SDI 8M000. Airmen must meet selection criteria for military postal clerks.

Special Information: This course is self-paced. It is a prerequisite to E5ALA8M000 000, Postal Supervisor Course.

Quota Control: 2 AF/DOP.

E5ALA8M000 000—Postal Supervisor Course (7A-F59/510-ASIF5)—PDS Code 9YF—DOD 515—Ft Jackson/5 wk 3 days—Oct 95

Provides instruction to Air Force commissioned and noncommissioned officer personnel in postal technical skills and management techniques required of postal supervisory personnel. Includes domestic and international mail, money orders business, audit procedures, postal claims disposition, aerial mail terminal procedures, mail receipt and dispatch operations, mailroom inspections, express mail, postal management information system, security, postal operating plans, overview of the Military Postal Service (MPS), search and seizure procedures, postal incidents reporting, official postage meter monitoring, and use of the Military Postal Service.

Prerequisites: Enlisted: SSgt and above; officer: 2d Lt through Major. Personnel must either be assigned to or en route to a postal supervisor or higher headquarters position. Graduation for the postal operations course.

Special Information: This course is both self-paced and platform instruction.

Quota Control: 2 AF/DOP.

E5ALA8M000 001—Postal Operations—PDS Code 25K—DOD 515—Ft Jackson/5 wk—Oct 95

Provides instruction to personnel designated for assignment to the USAF Postal Service in SDI 8M000 positions with the knowledge to perform as postal operations administration officers, custodians of postal effects and Air Force postal clerks. Emphasis is placed on principles, policies, procedures, and administration of APOs and AMTs. Specific subject matter includes postal activities, domestic mail, international mail, postal supplies and equipment, postal service center operations, claims and complaints, mail processing, transportation and documentation, administration of postage accounts and money order services.

Prerequisites: Amn through E-4 who has been designated for assignment with USAF Postal Service as SDI 8M000. Airmen must meet selection criteria for military postal clerks.

Special Information: This course is self-paced. It is a prerequisite to E5ALA8M000 000, Postal Supervisor Course.

Quota Control: 2 AF/DOP.

Medical and Dental, 882d Training Group

Professional Specialty Courses

Admin Procedures: Students must have 15 copies of orders with them when reporting. All orders, to include active duty and all reserve components, must state “essential unit messing is in effect” to prevent overpayment of TDY students. Reserve and ANG students are not entitled to advance pay according to DOD Pay Manual, paragraph 80251. However, Reserve and ANG students are entitled to casual payments according to DOD Pay Manual, paragraph 40111. Administrative procedures are provided in AFM 171-373, volumes I and III. All students must know their blood type and Rh factor before attending this course.

Prerequisites: Recent commission in the United States Air Force Medical Service.

ANG Medical Service Requirements: All newly appointed officers of the ANG Medical Service are required to complete MIMSO within 2 years of the initial appointment. Those individuals with prior commissioned military service who have completed similar training (courses provided by the Army, Navy, ARNG, NAVRES, etc., which are similar) are exempt. In instances where the previous training is in question, a waiver should be requested.

AFRES Medical Service Requirements: All newly appointed officers of the USAFR medical service are required to complete MIMSO within 1 year of initial appointment. Those individuals with prior commissioned military service who have completed similar training in courses provided by other services or have equivalent experience will be considered for waiver. HQ

AFRES/SG has waiver authority. EXCEPTION: Where MIMSO is a prerequisite for the flight nurse course, HSC has waiver authority. Forward all requests through training channels to HQ AFRES/SG.

Quota Control: USAF, AFPC/DPMMES; others, HQ AETC/SGAW.

Waiver Control: ANGSC/SGAX.

*Note: Two additional days of training on the weekend are provided for Medical Readiness Indoctrination.

L3OQR4000 000—Medical Readiness Indoctrination—PDS Code 68G—Maxwell/2 days—Jun 94

Presents information on combat medical support during field operations. Subject matter is general in nature and allows students to learn and apply basic knowledge and skills through performance exercises. Subject areas include: USAF medical service wartime concept of operations; combat stress; triage and casualty assessment; medical aspects of conventional, nuclear, biological, and chemical warfare; field sanitation and hygiene; field support equipment; field wound management; transportation of the injured; mobile unit set-up; chemical warfare defense ensemble and confidence chamber; aeromedical evacuation; and a casualty management exercise. Personnel attending this course may be exempt from continuing medical readiness training (CMRT) for the calendar year of completion (AFI 41-106, *Medical Readiness Planning and Training*).

Prerequisites: Attendance in course LMOB0104 003, Military Indoctrination for Medical Service Officers (MIMSO).

Special Requirements: BDUs (one set) and combat boots are required.

Quota Control: HQ AETC/SGAW.

J3ORR4000 001—Medical Red Flag (Reserve)—PDS Code WDA—Sheppard/1 wk—Oct 96

Provides deployment-oriented training in the function and operation of various wartime taskings (air transportable hospitals, aeromedical staging facilities). Provided to officer and enlisted personnel assigned to medical units with a deployable mission. Each class will be given instruction in identification and inventory of wartime assets (supplies and equipment), site selection, assembly and disassembly of DEPMEDS facility composed of TEMPER tents and International Standards Organization (ISO) shelters, aeromedical evacuation procedures, and facility security. In addition, command elements will receive guidance in command, control, and decision making. Evaluation will be conducted during a 23-hour casualty flow exercise.

Prerequisites: Currently assigned to a unit with a deployable mission and meet current mobility requirements. Attendees should have at least 6 months of retainability in a unit with a deployable mission.

Special Requirements: Training will occur under field conditions. As a minimum, midday meals, and at times, all three meals will consist of meals ready to eat (MRE). Required personal gear: military ID card, dog tags, chemical ground crew ensemble and MCU-2P chemical mask with appropriate eyewear inserts and filter cartridge inserts, minimum of three sets of BDUs, belt, BDU hat, field jacket, rain poncho, combat boots, undergarments, five black or brown T-shirts, five pair of socks, duffle bag, sleepwear, civilian attire for off-duty hours, medications, deodorant, toothbrush, toothpaste, soap, brush or comb, towels, personal hygiene products, shaving gear, shower clogs, flashlight, military leather work gloves, insect repellent, sunscreen, and sunglasses. Personnel on profiles limiting their physical activity should not attend training.

Quota Control: HQ AETC/SGAW.

J3OZR4000 003—Introduction to Executive Management—PDS Code 8CX—Sheppard/2 wk—Oct 96

Prepares new clinical service chiefs, department chiefs, and new chiefs of hospital/clinic services (SGH) to assume managerial responsibility by making them aware of and sensitive to key managerial issues involved in providing quality medical care through optimal use of resources. Course is designed to identify key organizational issues as they relate to the function and responsibilities of the entry to mid-level medical manager. Emphasis is on operational management at the individual MTF level, and the focus is tactical rather than strategic, though there is some attention to "the Big Picture." Includes recognizing how various functions of hospitals/clinics depend on one another to comprise total health care delivery system. Course deals with managerial skills of an effective health care executive, and the role and relationship of the entry to mid-level medical manager with his or her staff and the external environment.

Prerequisites: Open to all corps. Selectees must be incumbents of or selectees for a medical management position at the entry level (department or clinical service chief) or mid-level SGH. Must have rank of captain through colonel.

Quota Control: HQ AETC/SGAW.

J3OZR4000 004—Operational Problems in Behavioral Science—PDS Code 3NT—Sheppard/3 days—Oct 95

Seminar encompassing recent clinical advances, research, and review presentations in areas directly related to the behavioral sciences in the USAF. Intended for members of the behavioral evaluation/treatment team, to include clinical social workers, clinical psychologists, psychiatrists, mental health nurses, and mental health clinic/unit technicians. General presentation for combined disciplines as well as separate sessions for each discipline. Presentation material actively solicited from all groups involved. Speakers from civilian institutions, other military services, and USAF.

Prerequisites: Limited to members of the behavioral evaluation/treatment team; officers and airmen (E-4 and above).

Quota Control: HQ AETC/SGAW.

J3OZR4000 005—Medical Readiness Planners—PDS Code M15—Sheppard/1 wk—Oct 96

Prepares officers and NCOs to perform duties as a medical readiness officer or NCO. Subject areas include: planning at the JCS, HQ USAF, MAJCOM, and medical facility level with emphasis on MAJCOM and facility level planning. Associated requirements for the Air Reserve component; medical intelligence data sources; exercises; readiness training; medical reports; inspections; Status of Resources and Training Systems; mobility planning operations, and disaster preparedness.

Prerequisites: Officer - 2d lieutenant through colonel; enlisted - senior airman through chief master sergeant. Individuals should attend prior to or within 6 months of being assigned as medical readiness officer/NCO, training officer or NCO, civilian readiness manager, mobility officer or NCO, or in any position responsible for planning medical responses to warfare or disaster operations. Personnel who have attended the Battlefield Medical Operations Course (BMOPS), B3OZY9300 003, or graduates of J3OBR41A1 001 after 15 March 1990, should not attend.

Special Requirements: Students should bring computer disks and current unclassified copies of their medical facility's DCCP, CSP, and mobility plans for review during the course. Duty uniform for the entire course will be the camouflage uniform with combat boots. Organizational caps are not authorized.

Quota Control: HQ AETC/SGAW.

J3OZR4000 007—Medical Red Flag—PDS Code MW9—Sheppard/4 days—Oct 96

Provides deployment-oriented training in the function and operation of an air transportable hospital (ATH). Training will be provided to officer and enlisted personnel assigned to a medical unit with a deployable mission. Each class will be given instruction in identification and inventory of wartime assets (supplies and equipment), site selection, assembly and disassembly of a DEPMEDS facility composed of TEMPER tents and International Standards Organization (ISO) shelters, concept of operations, aeromedical evacuation procedures, alert- and mission-oriented protective postures (MOPP) levels and medical aspects of NBC, procedures in donning and doffing ground crew ensembles, and facility security. In addition, command elements will receive guidance in command, control, and decision making. Evaluation will be conducted during a 13-1/2-hour casualty flow exercise.

Prerequisites: Must be currently assigned to a unit with a deployable mission and meet current mobility requirements. Attendees should have at least 6 months of retainability in a unit with a deployable mission.

Special Requirements: The following reporting instructions apply:

a. Plan to arrive at Sheppard AFB no later than 2200 1 day before course start date. Busing to the field training site (FTS) will be provided by base transportation. Students must board the bus, with required personal gear, in front of billeting office (bldg 1600) at 0630 on the first day of training. Students assigned to Sheppard AFB are also required to board the bus for transportation to the FTS. Student personal vehicles are not allowed on the FTS. Individuals should not schedule return transportation prior to 1400 on the last scheduled day of the course. Transportation back to the base or to the airport (on the last day of class) will be provided by base transportation for all students.

b. The training will occur under field conditions. As a minimum, all midday meals, and at times all three meals, will consist of meals ready to eat (MRE)*. Enlisted personnel will be issued 10 MREs. Officers must pay for their 10 MREs at the current rate. Checks and credit cards are not accepted for MREs. Individuals should bring enough cash to cover billeting and incidental expenses prior to class start. Check cashing services will not be available at the FTS.

c. Required personal gear: Military ID card, dog tags, three sets of BDUs, belt, BDU hat, field jacket and liner, rain poncho combat boots, blousing straps, undergarments, four black or brown t-shirts, four pair of socks, duffle bag, sleepwear, civilian attire for off-duty hours, medications, deodorant, toothbrush, toothpaste, soap, brush or comb, towels, personal hygiene products, shaving gear, shower clogs, flashlight, work gloves (leather), insect repellent, sunscreen, sunglasses, and MCU-2P chemical mask with appropriate eyewear inserts and filter cartridges. Personnel on profiles limiting their physical activity should not attend training.

Quota Control: HQ AETC/SGAW.

* Enlisted personnel assigned to Sheppard AFB will be required to purchase MREs.

J3OZR4000 011—Infection Control and Epidemiology—PDS Code 57M—Sheppard/4 wk—Apr 95

Provides beginning infection control officers with the skills and knowledge necessary to develop a safe and effective infection control program. Instruction is geared to developing investigative methodologies specific to infection control (such as epidemiology, surveillance, and consultation) and skills needed to develop, manage, and evaluate all elements of a facility infection control program. Course content is correlated with appropriate JCAHO standards, OSHA laws, CDC guidelines and recommendations, Air Force policies, and any other related directives. Students are given the opportunity to demonstrate an understanding of infection control practice and to express this knowledge to others.

Prerequisites: Active duty Air Force officer assigned or selected as facility infection control officer. Health care related AFSC with a minimum of 6 months of experience in an Air Force medical treatment facility. Bachelor's degree desirable. A working knowledge of basic clinical microbiology, aseptic technique principles in patient care practices, and committee structure and function are beneficial.

Application Procedures: Local medical treatment facility identifies officer requiring training to MAJCOM SG.

Quota Control: HQ AETC/SGAW.

J3OZR4000 013—Clinical Quality Management Symposium—PDS Code O0Q—Sheppard/3 days/—Oct 96

Provides clinical quality managers at all levels with tools, techniques, and information to administer and improve credentials and privileging, risk management, clinical performance improvement activities, and information management. Gives current US health services inspection and Joint Commission on Accreditation of Healthcare Organizations findings in clinical programs. Facilities crossfeed among participants to capitalize on best practices. Attendees provide input for policy initiatives affecting Air Force clinical quality management issues.

Prerequisites: Must be a quality manager, risk manager, chief of the medical staff, nurse executive, dental adviser, or credentials monitor. ECL 80 SA.

J4OZT4000 007—Medical Red Flag (Mobile)—PDS Code MW9—various locations/42 hours—Oct 96

Provides deployment-oriented training in the function and operation of an air transportable hospital (ATH). Training will be provided to officer and enlisted personnel assigned to a medical unit with a deployable mission. Each class will be given instruction on identification and inventory of wartime assets (supplies and equipment), site selection, assembly and disassembly of a DEPMEDS facility composed of TEMPER tents and International Standardized Organizations (ISO) shelters, concept of operations, aeromedical evacuation procedures, alert- and mission-oriented protective postures (MOPP) levels and medical aspects of NBC, procedures in donning/doffing ground crew ensembles, and facility security. In addition, command elements will receive guidance in command, control, and decisionmaking. Evaluation will be conducted during a 13-1/2-hour casualty flow exercise.

Prerequisites: Be currently assigned to a unit with a deployable mission and meet current mobility requirements. Attendees should have at least 6 months of retainability in a unit with a deployable mission.

Special Requirements: Training will occur under field conditions. All meals during training will consist of meals ready to eat (MRE)*. Required personal gear: military ID card, dog tags, chemical ground crew ensemble and MCU-2P chemical mask with appropriate eyewear inserts and filter cartridge, three sets of BDUs, belt, BDU hat, field jacket with liner, rain poncho, combat boots, undergarments, four black or brown t-shirts, four pair of socks, duffle bag, sleepwear, civilian attire for off-duty hours, medications, deodorant, toothbrush, toothpaste, soap, brush or comb, towels, personal hygiene products, shaving gear, shower clogs, flashlight,

military work gloves (leather), insect repellent, sunscreen, and sunglasses. Personnel on profiles limiting their physical activity should not attend training.

Quota Control: HQ AETC/SGAW.

*If MKT service is available, breakfast and evening meal may be provided by service; midday meal will consist of MREs.

J5ORO4000 000—Health Services Executive Management (ARF) Symposium—PDS Code 66S—various locations*/3.5 days/MASL D175126—Oct 95

Assist medical executives in carrying out managerial responsibility by making them aware of and sensitive to key managerial issues involved in providing quality medical care through optimal use of resources. Course is designed to identify key organizational issues as they relate to the medical executives inter-disciplinary responsibility. Includes recognizing how various functions of the unit depend on one another to comprise the total health care delivery system. Scope of the course includes current headquarter's policies and relationship. However, primary emphasis is on the technical foundations and knowledge essential to day-to-day management decisions.

Prerequisites: Selectee must be a member of ANG or USAFR Medical Service Unit with at least 1 year of commissioned experience. Students will be in grade of Lt through Col. ECL 80 SA.

Quota Control: HQ AETC/SGAW.

*Determined yearly by ANG and USAFR.

J5OZO4000 002—HIV Prevention Train-The-Trainer—PDS Code WCK—Lackland*/1 wk—Oct 96

Designed to create a military community environment of HIV prevention, have an impact on averting or reducing risk behavior and provide skills and resources to HIV resource prevention teams within the Air Force. The team is charged to teach their colleagues, base level commanders, all supervisors, base community and patients who need HIV and AIDS information. Curriculum includes epidemiology, diagnosis, and treatment of HIV infection, Air Force HIV policy; educational methodology; social marketing concepts; military community planning techniques; prevention strategies, psychosocial, legal, ethical, and administrative complexities of HIV disease in the Air Force; services available for persons with HIV infection; and skills to arrange training in the student's own specialty, workplace, and community. Curricula is based upon behavioral and social sciences, past research, and provides a clinical HIV/AIDS update.

Consider the following criteria when selecting personnel for this course: An HIV Resource Team consisting of the HIV designated physician, infection control officer or clinical nurse, a public health officer, and an enlisted public health technician. These recommended participants for course attendance are selected by the local commander and the chief of the appropriate corps within the medical treatment facility. Team members must complete precourse reading requirements, have an interest in HIV prevention and clinical care, and be committed to serving on an HIV Resource Team to establish HIV education and prevention programs for local base personnel and patients. In addition to HIV Resource Team members, health professionals in other specialties who have strong personal commitment to HIV education and behavioral change strategies are encouraged to attend this course.

Admin Instructions: Complete student registration form no later than 2 January 1997. Initial packets will be mailed in October 1996 to all HIV designated physicians, infection control officers, dental officers, and public health officers. Forty-two funded slots are available (22 MC, 10 NC, 10 BSC). All attendees must have a training line number and be entered in the Air Force Training Management System. This requirement applies to funded and unfunded quotas. Contact the major command education office for registration and course information. Other funding should be requested locally. Direct questions about the course to Administrative Coordinator, Wilford Hall Medical Center, HIV unit. DSN 554-7897/7365, 1-800-468-6961, or commercial 210-670-7897/7365, 59 MDW/PSMI-H, 2200 Bergquist Dr, Ste 1, Lackland AFB TX 78236-5300.

Quota Control: HQ AETC/SGAW.

* Wilford Hall Medical Center.

J5OZO4000 003—Joint Medical Planners Course (JMPC)—PDS Code XH6—various locations/3 wk—Mar 94

Prepares intermediate level officers to effectively function as medical planners at the Joint Staff, Service headquarters, unified command or component command levels. Provides training, skill progression, familiarization, and proficiency in the concepts, procedures, and applications of joint planning, with emphasis on joint medical issues critical to strategic and operational planning. Subjects covered include JOPES deliberate planning and crisis action systems, interagency relationships, medical TPFDD development and management during deliberate planning and execution, medical portion of an OPORD/OPlan, host-nation negotiations, noncombatant evacuation operations, security assistance, humanitarian relief, MPM, LPXMED, and WWMCCS.

Prerequisites: None. Contingency Wartime Planning Course (CWPC) and Medical Readiness Planning Course (MRPC) preferred.

Special Requirements: Current or projected assignment at Joint, HQ USAF, or MAJCOM level.

Admin Instructions: Course is usually conducted four times a year at the Naval School of Health Sciences in Bethesda MD.

Quota Control: HQ AFPC/DPMMUE.

J3OBR41A1 001—Health Services Administration—PDS Code EAA—Sheppard/11 wk 1 day/AFSC 41A1/MASL D175010—Oct 96

Trains newly commissioned USAF Medical Service Corps (MSC) officers in the knowledge and skills needed to perform the duties in Health Services Administration. Prepares MSC officers for performance of administrative duty with the USAF Medical Service and emphasizes techniques for effective management of Air Force medical resources: personnel, facilities, funds, and materials. Course includes instruction in communication techniques, medical practice management, resource management, medical logistics, personnel and administrative services, medical readiness, information systems management, managed health care, and executive leadership skills. Course is designed to incorporate team interaction through case studies, role playing, problem solving, and group dynamics. The course emphasizes personal interaction within the medical facility and interpersonal relationships with all members of the Air Force community. Class is divided into specialty groups during last 2 weeks to simulate actual work experience. Students are assigned duty as requested by commander of their gaining unit.

Prerequisites: USAF Medical Service Corps officer with AFSC 41A1, active duty or career Reserve. ECL 80 and must be a commissioned officer.

Admin Instructions: Travel by military aircraft and use of military quarters directed when available. Service dress and BDUs are mandatory for the course. Reservists may attend the course in increments. USAFR and ANG are encouraged to attend the full 11 weeks 1 day of the course. Attendance of the last 2-week increment is optional for USAFR and ANG members.

Quota Control: USAF, AFPC/DPMMES; others, HQ AETC/SGAW.

J3OZR41A3 000—Facility Management Symposium—PDS Code YF4—DOD 7M—Sheppard/4 days—Mar 94

Identify and explore key issues which impact on the medical facility manager. Bring problem areas into the open so that participants may benefit from each other's knowledge and experience. Provides the current status of the medical facility management programs to the overall medical mission. Incorporates briefings from civilian agencies that share common requirements with military facility managers. Annual software exchange enables facility managers to share written material.

Prerequisites: Officers, NCOs, or civilians of any service currently occupying a position as medical facility managers. USAFR and ANG personnel are eligible and encouraged to attend.

Quota Control: HQ AETC/SGAW.

J3OZR41A3 001—Medical Logistics Management Symposium—PDS Code MBA—DOD 7M—Sheppard/4.5 days—Mar 94

Latest techniques and procedures in medical logistics services management. Resources and WRM. Financial planning, procurement, inventory and equipment management. Analysis and use of management reports; analysis of management problems and management improvement techniques. Administration of services contracts. Staff duty of a health services administrator.

Prerequisites: Officer on active duty currently associated with the duty in this field for at least 1 year immediately preceding attendance. USAFR and ANG personnel are eligible and encouraged to attend.

Special Requirements: Secret clearance required by class start date.

Quota Control: HQ AETC/SGAW.

J3OZR41A3 005—Clinical Engineering Officer Orientation—PDS Code APE—Sheppard/2 wk—Dec 93

Provides training for newly commissioned officers of the USAF Medical Service Corps, who have extensive engineering background, in the knowledge and skills needed to perform the duties of a clinical engineer. Includes hospital accreditation and safety standards and codes, medical facility management functions, biomedical instrumentation and measurements, preprocurement and technical acceptance inspection protocol for high tech and high dollar medical systems, equipment maintenance contract administration, and analysis and use of technology assessment reports for medical devices.

Prerequisites: USAF Medical Service Corps officer with AFSC 41A1, active duty or career reserve and have completed course J3OBR41A1 001, Health Services Administration. Officers must be serving in or have an assignment to a position requiring clinical engineering expertise or a medical logistics internship.

Frequency of Class: Classes are scheduled to coincide with the completion of course J3OBR41A1 001, Health Services Administration.

Quota Control: HQ AETC/SGAW and AFMLO/FOM.

J3OZR41A3 006—Medical Information Systems Symposium—PDS Code 3JL—DOD 7M—various locations/1 wk—Oct 95

Presents the latest technology and developments in medical information systems. Offers guidance in systems planning and implementation and orientations on application of standard Air Force microcomputer software and hardware. Provides an interchange between MTF information system personnel and higher headquarters for ideas, trends, and problem solutions.

Prerequisites: Officer, enlisted, or civilian with primary or additional duty in medical information systems. USAFR and ANG personnel are eligible and encouraged to attend.

Quota Control: HQ AETC/SGAW.

J3OZR41A3 007—Resource Management Symposium—PDS Code MCZ—DOD 7M—Sheppard/4 days—Oct 95

Provides an interchange of ideas, trends, and recent developments for conferees and attending faculty or speaker. Further knowledge of resource management officer in medical service managment of fiscal, manpower, management analysis organizational development, and medical systems management. Emphasizes coordinating efforts required to ensure efficient operation at base level.

Prerequisites: Must be Medical Service Corps officer or civilian, assigned primary duty at base level in financial management, manpower programs, or organizational development; or hospital administrator serving in grade of major or below. Exceptions are MAJCOM representatives designated to present major problems or important topics for discussion. These representatives will send a brief outline and explanation of the problem to: 882d Training Group, Sheppard AFB TX 76311, to arrive not later than 8 weeks prior to symposium starting date. USAFR and ANG are eligible and encouraged to attend.

Quota Control: HQ AETC/SGAW.

J5OZO41A3 004—Health Facility Officers Symposium—PDS Code 62W—selected AETC locations/4 days—Mar 94

Serves as a forum for officers who are responsible for the planning, programming, design, and construction of all Air Force medical facilities. The symposium is held on an annual basis to maintain officers' awareness of changing life, safety, accreditation, design, and construction standards for medical facilities.

Prerequisites: Assigned as health facility officer or responsible for planning, programming, design, or construction of Air Force medical facilities as approved by AFMSC/SGSF.

Quota Control: HQ AETC/SGAW.

J3OZR41A4 001—Medical Readiness Planner's Symposium—PDS Code 1CU—DOD 7M—Sheppard/3 days—Jun 94

Provides medical planners from major commands and medical treatment facilities an update of the initiatives in medical readiness topics. Provides current status and changes of programs as outlined in AFI 41-106, *Medical Readiness Planning and Training*, including responsibilities for training, manpower, and funding for current and proposed programs. Provides attendees with the latest aspects of planning in medical readiness with USAFE, PACAF, CENTCOM, and MAJCOMs. Topics include 500-bed contingency hospitals, air transportable hospitals, DEPMEDs, second and third echelons of care tasking, evacuation methods and procedures, CONUS Medical Mobilization Planning, and the National Disaster Medical System (NDMS).

Prerequisites: CONUS Medical Mobilization Planning attendees should be in a medical planning function, knowledgeable in the above topics, and be prepared to discuss these topics in working groups.

Special Requirements: Secret clearance.

Quota Control: HQ AETC/SG.

J5OZO41A4 000—Hospital/Clinic Administrators Symposium—PDS Code 5WD—Keesler/1 wk—Mar 94

Trains the new administrator in the art of techniques of total health facility operations. The administrator is trained to look for key management indicators in functional areas over which he or she has authority, cross-functional areas which demand the administrator's coordination, and internal and external relationships which develop the administrator. Future trends and issues are addressed. Attendees develop a personal perspective on the art of administrating.

Prerequisites: Medical Service Corps officers selected to serve as administrators for either the first time or immediately after a non-hospital/clinic assignment of at least 3 years duration. Grades: Capt through Col. Individuals selected to attend must review and be familiar with the following documents before arrival at course: AFI 44-102, *Professional Procedures* (formerly AFR 160-12), AFI 44-108, *Infection Control Program* (formerly AFR 160-41), AFI 41-106, AFI 41-212, *Personnel and Administrative Services* (formerly AFR 168-4), AFI 41-101, *Obtaining Medical and Dental Care from Civilian Sources* (formerly AFR 168-10), and AFI 44-119, *Quality Assurance and Risk Management in the Air Force* (formerly AFR 168-13); AFISC/SG functional management guides for the Administrator and the Chief of Hospital Services; and the Joint Commission on the Accreditation of Healthcare Organizations (JCAHO) Accreditation Manual for Hospitals.

Quota Control: HQ AETC/SGAW.

J3OZR4200 001—Physical and Occupational Therapy Management—PDS Code 3N3—Sheppard/1 wk—Mar 94

Provides instruction by civilian and military speakers on principles and techniques of resource management, personnel supervision, and the planning of delivery of health care services in the clinical setting. Defines and outlines current trends, recent developments, and policies of Air Force medical service. Presents newly developed concepts and professionally recognized techniques of patient treatment. Students discuss problem areas, explore and exchange ideas with representatives from Air Force hospitals, MAJCOM surgeon offices, and the Air Force Surgeon General Office.

Prerequisites: Lt through Col serving as physical or occupational therapist in a USAF medical facility.

Quota Control: HQ AETC/SGAW.

J3OZR4200 002—Biomedical Officer Management Orientation—PDS Code 5X7—Sheppard/3 wk—Apr 95

Provides training for Air Force pharmacists, laboratory officers, and dietitians in the knowledge and skills needed to perform the duties of an Air Force biomedical sciences corps officer. Includes medical budgeting, logistics, personnel management, information systems, standards of practice, quality improvement, professional and patient relationships, workload reporting, medical readiness, and current issues of the Biomedical Sciences Corps.

Prerequisites: Graduate of US Air Force course LMOBM0104 003. Hold AFSC 43DX, 43TX, or 43PX, have 6 months and less than 2 years of experience in above career field, and be eligible for assignment to a management position.

Quota Control: HQ AETC/SGAW.

J5OZO42B3 000—Physical Therapy (Advanced)—PDS Code WS0—WHMC, Lackland/3 wk—Mar 94

Provides Air Force physical therapists opportunity to update knowledge of physical therapy theories and techniques with special emphasis on patient evaluation, cardiac function testing, cardiac and exercise physiology, manual therapy, pediatrics, medical pharmacology, management of acute and chronic pain, anatomy of frequently treated joints, radiographic analysis, and introduction to principles of clinical research. Also, added emphasis is placed on war readiness skills for physical therapists. Course is primarily oriented toward physical therapists who have recently been, or are presently assigned to small facilities where specialties in certain facets of medicine are not available. Course is taught during September and March of each year.

Prerequisites: AFSC 42B3.

Quota Control: HQ AETC/SGAW.

J5OZO42E4 000—Tri-Service Optometry Seminar—PDS Code XFE—various locations/1 wk—Apr 96

Provides attendees with knowledge of current Armed Forces optometric developments and future plans, and relates them with other federal and nonfederal programs in their profession. Emphasis is on trends in the detection, diagnosis, and treatment of certain pathological conditions, and the use of therapeutic pharmaceutical agents.

Prerequisites: Military and civilian optometry officers of the Armed Forces of the US and foreign allied nations and optometrists of the Public Health and VA Services are eligible.

Application Procedures: MAJCOM selects candidates for training from applications initiated locally IAW procedures established by command.

Frequency of Classes: Annually.

Quota Control: HQ AETC/SGAW.

J5OZO42F3 000—Annual USAF Podiatry Seminar—PDS Code UJU—WHMC, Lackland/3 days—Mar 94

Agenda covers current Air Force podiatric plans and policies and latest developments in podiatric medicine and surgery.

Prerequisites: Podiatry officers of Armed Forces, Veterans Administration, and Public Health Service.

Application Procedures: MAJCOM selects candidates for training from applications submitted locally IAW procedures established by the command.

Quota Control: HQ AETC/SGAW.

J5OQA42G1 000—Military Physician Assistant Phase I—PDS Code 1IX—Ft Sam Houston/50 wk—Jan 96

Course is the didactic portion of the physician assistant training program. It provides the basic sciences and clinical courses needed to prepare the student for Phase II of the program. Training is in a classroom setting and includes instruction in pathology, anatomy, and physiology, chemistry, biochemistry, public health, medical terminology, clinical lab, mircrobiology, clinical medicine, surgery and its subspecialties, physical examination, medical ethics, and medical service management and policies.

Prerequisites:

a. Applicant must be on active duty in grade A1C through CMSgt with minimum of 2 years of active military service as of 30 April.

b. Armed Services Vocational Aptitude Battery (ASVAB) test scores.

c. Scholastic Requirements:

(1) Scholastic Aptitude Test (SAT) scores (within the past 5 years) are required on all applicants including those with degrees.

(2) Sixty semester hours of transferable college credit with a grade point average of 2.5 or better on a 4.0 scale. A minimum of 30 semester hours must be actual in-classroom study at an accredited college or university. Thirty semester hours may be met from one or more of the following:

(a) DANTES, CLEP, USAFI correspondence courses, end-of-course test, or specific subject examination. Academic credit is allowed as recommended by the American Council on Education.

(b) Correspondence work, off-campus classroom study, or resident course programs conducted by an accredited college or university.

(c) Community College of the Air Force (CCAF) credits for in-residence, technical training courses are acceptable for application; however, such credits are subject to evaluation by the civilian university affiliated with the course.

(3) College courses mandatory for acceptance include:

(a) Chemistry (4 semester hours). Cannot CLEP this requirement.

(b) Algebra (3 semester hours). Cannot CLEP this requirement.

(c) Social Sciences (6 semester hours). May CLEP this requirement.

(d) English (6 semester hours). Composition recommended. May CLEP 3 hours of this requirement.

(4) Courses in anatomy and biology are highly desirable.

d. Be physically qualified for worldwide duty with no history of emotional instability. Able to pass commissioning physical in accordance with AFI 48-123 (formerly AFR 160-43), chapter 4. Physical must be completed after notification of selection and certified prior to PCS orders being published.

e. Never convicted by court-martial or received an Article 15 during current enlistment.

f. Evidence of entrance National Agency Check (NCA or LNAC).

g. Eligible to extend or reenlist for 4 years within 60 days before class start date.

h. Meet age limitations specified in AFI 36-2005, *Appointment in Commissioned Grades and Designation and Assignment in Professional Categories* (formerly AFR 36-15) for appointment as second lieutenant in Biomedical Sciences Corps upon completion of Phase II training (waiverable up to 3 years).

Application Procedures:

a. Servicing MPFs will submit application directly to AFPC/DPAMW, 550 C Street W, Ste 27, Randolph AFB TX 78150-4729, by letter of transmittal (or AF Form 330) NET 1 Oct and NLT 25 Jan annually.

b. Applicants must arrange to have letters of recommendation submitted by the authors directly to their servicing Personnel Flight (Classification and Training) from the following sources:

(1) An Air Force commissioned Physician Assistant who has 2 or more years Air Force experience. The author is required to conduct a personal interview with applicant.

(2) Applicant's immediate supervisor.

(*3) A physician familiar with the role of physician assistants.

(4) Applicant's immediate unit commander.

(5) Applicants may submit only two additional letters of recommendation. Letters from individuals working in health care fields are preferred.

*Requires personal interview with applicant.

c. The application must include the following items:

(1) A statement from Personnel Flight or custodian of applicant's personnel records reading: "Applicant meets all the prerequisite qualifications (except those requested or eligible for waiver). Applicant has been thoroughly counseled that reenlistment or extension (according to AFI 36-2606, *US Air Force Reenlistment, Retention, and NCO Status Programs* [formerly AFR 35-16]) could result in recoupment or loss of bonus entitlements, and loss of travel to home of record and accrued leave pay for those selectees subject to reenlistment more than 90 days prior to current DOS." Applicant will acknowledge receipt and understanding of counseling by signed endorsement on MPF statement.

(2) A current copy of report on individual personnel (RIP) records review list.

(3) SAT results. Consult the base education office for application procedures. Tests are given only a limited number of times annually and should be taken in sufficient time for scoring and statistical data return by testing centers. Applicant should at time of testing enter code 6900 in item 11a of "Score Report Recipients" of the SAT test registration form. Applicants who have completed SAT testing may submit applications without the test results if they include a signed statement giving the date and location of SAT test, and insure a score is reported directly to AFPC/DPAMW prior to the selection board.

(4) AF Form 1020 (Applicant must request that each college attended and CCAF submit official transcripts to servicing education office. Transcripts from all schools attended are forwarded to the Personnel Flight to be forwarded with application package. Official transcripts are required even though course may have been incorporated into transcripts from colleges subsequently attended.)

(5) Copies of all APRs or EPRs.

(6) A statement signed by applicant that, if selected, he or she will extend or reenlist for a period of 4 years within 60 days before course start date and that the applicant understands a 4-year commitment is automatically incurred upon successful completion of the course and commissioning as an Air Force officer.

(7) A statement signed by an Air Force medical representative reading, "Based upon review of the applicant's medical record, I certify the applicant has no history of emotional instability

and is physically qualified for worldwide duty.

(8) A statement signed by the DBMS reading, “I certify that the applicant has no history of emotional instability and no humanitarian, CHAP, or other family condition to preclude worldwide assignment upon completion of training.”

(9) Each applicant must include a self-composed, handwritten essay (250 words or less) expressing his or her reasons for wanting to become a physician assistant.

(10) DD Form 785, Record of Disenrollment from Officer Candidate- Type Training, for airmen who attended, but did not complete, an officer commissioning program.

(11) Individual Physical Fitness and Weight Evaluation record, or computer-generated equivalent.

(12) A statement signed by the applicant's unit commander which states, "I certify that the applicant has no humanitarian, EFMP, or other family conditions pending which would preclude the member from worldwide duty assignment.

(13) AF Form 2030, Drug and Alcohol Abuse Certificate. (Complete in accordance with AFI 36-2002.)

(14) (Optional) Applicants may include a one-page brief summary of their past experience working in health care fields, military awards and decorations, and voluntary and community efforts.

Quota Control: HQ AETC/SGAW.

J5OBO42G1 000—Physician Assistant (Phase II)—PDS Code JMS—designated hospitals/52 wk—Jan 96

Course is the clinical preceptorship portion of the physician assistant training program. It provides for the clinical application and correlation of the basic sciences and clinical medical information gained didactically in Phase I of the physician assistant program. Prepares students to plan, conduct, coordinate, and assist in the performance of patient evaluations in order to diagnose and treat injuries and diseases of the human body. Training is under the supervision of precepting physicians and other nonphysician health care providers. Includes training in obtaining medical histories, performing physical examinations, ordering appropriate laboratory, radiologic, and other diagnostic studies, providing and arranging for a broad range of therapeutic interventions, performing minor surgeries, interpreting medical and surgical findings, and communicating with other health professionals including consulting and supervising physicians. Primary media of instruction is assignment of student through a series of medical and surgical clinical rotations accomplished under the individual instruction and supervision of the chief of the specialty services or designated preceptors who are staff physicians with equivalent training in the particular specialties. The series of practicum rotations include: (1) internal medicine, (2) pediatrics, (3) surgery, (4) dermatology, (5) otorhinolaryngology, (6) orthopedics, (7) obstetrics and gynecology, (8) opthalmology, (9) psychiatry, (10) emergency medicine, and (11) family practice/primary care disciplines. Primary emphasis in each area is on types of problems most commonly encountered in Air Force family practice clinics. During each rotation, the student attends all rounds and professional conferences with his or her preceptor, attends formal lectures and seminars on various medical and surgical topics, attends all post-mortems and conferences on the patients. Each rotation includes at least 2 hours of seminar per week (except internal medicine, which requires a to of 20 hours of seminars), reading assignments, and end-of-block examinations. A formal evaluation of each student’s progress is done during each rotation. Following completion of this course and required general education courses, students will receive a baccalaureate degree and be commissioned in the grade of 2d Lt in the Biomedical Sciences Corps (BSC).

Prerequisites: Satisfactory completion of course Physician Assistant, Phase I.

Admin Instructions: Student receives PCS assignment to his or her respective Phase II hospital before graduation from Phase I. To permit clearing and travel, classes begin approximately 3 weeks after graduation from Phase I classes.
