Prerequisites: Active duty Armed Forces physician non-allergist OIC of allergy/immunization clinic at a small medical facility that does not have an established allergy service; or projected for assignment to such a medical facility; or at discretion of course director.

Quota Control: HQ AETC/SGAW.

J5OZO4400 010—Clinical Oncology—PDS Code 5NY—WHMC, Lackland/1 wk—Apr 95

Covers fundamentals of oncologic diagnosis, with particular attention to appropriate use and misuse of laboratory tests while searching for a primary cancer; the clinical course of common malignancies in particular, lymphoma, breast cancer, GI, leukemia, prostate, testicular, ovarian, bone and ENT tumors; principles of radiation therapy; principles of chemotherapy; principles of cancer surgery, fundamental principles of pathology; and the fundamental use of radiologic testing.

Prerequisites: Any physician designated as primary care provider of oncologic patients.

Quota Control: HQ AETC/SGAW.

J5OZA4400 032—Combat Casualty Care (C-4)—PDS Code 1Q3—Camp Bullis/1 wk 2 days—Jun 94

Designed to enhance medical readiness of health care providers by providing training in skills necessary for direct medical support of tactical units under combat conditions. The practical goal is to develop skills whereby students function as military staff officers and successfully assess and manage casualties at the battalion aid station, air transportable hospital, or division clearing station. This is a tri-service medical readiness course conducted by the Joint Medical Readiness Training Center (JMRTC) under the auspices of the Army's Academy of Health Sciences.

Prerequisites: Must be a member of the DC, MC, NC, BSC, or MSC for TAC officer and have 1 year Air Force retainability after completion of course. The target audience is O-3 and O-4.

Application Procedures: MAJCOM SGs nominate candidates.

Special Requirements: Students must have four fatigue uniforms/utilities (camo), two pair of combat boots (broken in), rain gear, one field jacket and liner, and long underwear. (Flight suits and jackets, parkas, etc., are prohibited.) Also bring shower items and personal toilet articles. Laundry facilities are not available. Students must be able to accomplish strenuous physical activities. Direct questions regarding this to the JMRTC staff.

Reporting Instructions: Specific instructions will be furnished to member's MPF.

Quota Control: HQ AETC/SGAW.

J5OZA4400 075—Combat Casualty Care Course - Administration (C4A)—PDS Code X3T—various locations/1 wk 2 days—Apr 95

A leadership development course designed to prepare senior medical department officers (Lt Col and Col) to function in leadership roles in the operational environment of a deployed Echelon III combat health support facility. The instruction provides these officers with an awareness of overall joint medical planning and deals with critical areas of concern for those who are responsible for the administration of such facilities. The learning objectives focus on leadership development and include block didactic presentations in joint medical planning, deployable medical assets, medical evacuation and regulation, logistical support and command and control. The large didactic blocks, presented in the mornings, then flow into the combat health support exercise conducted during the afternoon sessions. This exercise is done with small groups of 10 officers. The designated leader of each group then gives a "brief" at the end of the daily exercise to a flag or general officer. Other specific topics include what an operational Echelon III medical commander needs to know about predeployment planning and training, family support mechanisms while deployed, nuclear, chemical and biological warfare, combat psychiatry, the UCMJ, public affairs, terrorism, weapons threats, and a presentation from AFMIC. A brief from former commanding officers of combat health support facilities in Bosnia and Somalia as well as a CIA brief on UN peacekeeping operations are integral components.

Prerequisites: Must be a member of the DC, MC, NC, BSC, or MSC and have 1 year of Air Force retainability after completion of the course.

Application Procedures: MAJCOM SG nominates candidates.

Special Requirements: Duty uniform will be any blue combination with course being held in a classroom environment. Special instructions to be furnished to attendees by HSHA-JN, DSN 471-9266/2835.

Quota Control: HQ AETC/SGAW.

J5OZO44D3B 000—Clinical Cytology and Fine Needle Aspiration—PDS Code Q1J—WHMC, Lackland/4.5 days—Mar 94

Didactic lectures followed by workshop and (or) laboratory sessions provide intensive practical experience in diagnostic study cases under the direct supervision of the faculty. Covers all the different aspects of cytology, which includes current cytopreparatory techniques, neoplastic and non-neoplastic disease of female genital tract, respiratory tract, gastrointestinal tract, urinary tract, body cavity fluids, and cerebrospinal fluid. Emphasis is on "fine needle aspiration" of superficial and deep organs. A practical (hands-on) session in aspiration and smearing techniques is included. Discussions include the role of immunocytochemistry and flow cytometry in diagnostic cytology.

Prerequisites: Must be a practicing pathologist or cytotechnologist providing active patient care.

Quota Control: HQ AETC/SGAW.

J5OZO44M4 001—Critical Care Refresher for Internist (CCRI)—PDS Code XRG—Lackland/2 wk—Apr 95

Provides critical care refresher for internists, particularly newly assigned to mobility positions, with the principles and practice of critical treatment of pre-and post-operative trauma and emergency treatment of medical patients. The goal is to better prepare the internists for their wartime and national emergency role of caring for battle casualties and nonbattle emergencies in a deployed location. Preference will be given to internists who do not work in an ICU setting at the present time. Each internist will be rotated through a surgical ICU and a medical ICU. The internist will be an integral member of the team, participating in all appropriate rounds, conferences, and grand rounds. In addition, a series of didactic lectures are given throughout the 2 weeks to include airway and ventilatory management, surgical and orthopedic trauma, thermal injuries, CNS trauma, and shock. The internist will be on call with the trauma team during the weekend between the medical ICU and the surgical ICU to develop first-hand experience with trauma patients.

Prerequisites: a. Assignment to a mobility position as an internist.

b. Current advance trauma life support (ATLS) certification.

c. Current advance cardiac life support (ACLS) certification.

Admin Instructions: Prepare TDY orders for a 2-week TDY at Wilford Hall Medical Center, Lackland AFB TX. Internist should report to Wilford Hall's Director of Critical Care by 0730, Monday morning of the first week of the course for assignment and processing.

Quota Control: HQ AETC/SGAW.

J5OZO45S3 000—Trauma Refresher and Critical Care Course for Surgeons (TRACCCS)—PDS Code XJ4—Ft Sam Houston, Lackland, and Houston TX*/3 wk 2 days—Apr 95

Provides trauma refresher training for surgeons in the management of critically ill and traumatized patients to improve the ability of surgeons to manage combat-related injuries and medical care in support of military operations. Surgeons rotate through two 7-day schedules, one 6-day schedule, and one 3-day schedule. Three days of advanced trauma life support (ATLS) training is provided for those surgeons who have not received the training before coming to TRACCCS. The training will be provided on Friday through Sunday before TRACCCS starts on Monday, or scheduled Saturday through Monday following the last Friday of TRACCCS. Ten days of training are provided at Wilford Hall Medical Center (WHMC) where the surgeons rotate through a schedule that includes three in-house trauma calls; surgical intensive care unit (SICU)/trauma ward rounds; and TRACCCS lectures. The next 4 days of training are at Ben Taub Hospital where the surgeons observe ER shock resuscitation procedures, attend the chief residents morning reports, and attend basic science lectures. The last 6 days of training will again be provided at WHMC where the surgeons will rotate through a schedule that includes two in-house trauma calls, SICU/trauma ward rounds, and TRACCCS lectures.

Prerequisites: Board certified and eligible general surgeon currently in practice in the USAF Medical Corps (on active or reserve status) who has received prior credentialing through appropriate channels with SGH approval.

Admin Instructions: Prepare TDY orders for 23 calendar days, 16 days at WHMC, 4 days at Ben Taub Hospital, and 3 days at Ft Sam Houston. The individual will report to the WHMC General Surgery Clinic on Monday for assignments and processing. Surgeons who will attend the ATLS training must coordinate with the course director at WHMC, Lackland AFB TX, DSN 554-7495, for scheduling.

Quota Control: HQ AETC/SGAW.

* Brooks Army Medical Center, Joint Medical Readiness Training Command (JMRTC), Ft Sam Houston TX; Wilford Hall Medical Center, Lackland AFB TX; and Ben Taub Hospital, Houston TX.

J3OZR4600 001—Advanced Nursing Practice Symposium—PDS Code QSR—Sheppard/3 days—Oct 96

Provides Nurse Corps officers an update on selected nursing practice issues. The symposium focus rotates on an annual basis among three subjects: infection control, staff development, and research. Leading military and civilian experts address current procedures, standards, and trends in the focus subject. Innovative developments and strategies for implementation are presented.

Prerequisites: Active duty Air Force and Air Reserve component nurses attending the research symposium must be planning to submit a research proposal for a federal nursing research grant. For all other symposia, nurses must have at least 6 months of full or part-time experience in the subject area of the symposium being presented. Non-nurse officers desiring to attend a symposium must obtain a waiver from HQ AETC/SGAW.

Quota Control: HQ AETC/SGAW.

J3ORR46A3 004—Nursing Service Management for Air Reserve Components (ARC)—PDS Code 09H—DOD GE—Sheppard/2 wk—Apr 95

Familiarizes selected ARC Nurse Corps officers with nursing management tools and practices relevant to middle management positions in Air National Guard and Air Force Reserves nursing services. Instructions are provided in leadership and management strategies, organizational structure, continuous quality improvement, and staff development. Students develop or refine management tools such as nursing practice standards, operational plans, and unit operating directives. Total force policy, Air Force instructions, HSI guidelines, and JCAHO standards are integrated throughout the course.

Prerequisites: ARC Captain or above with a minimum of 2 years of commissioned service. General knowledge of nursing service organizational structure and managerial framework is desirable. Course content is designed for mid-level nurse managers, but senior nurse executives with limited management experience may benefit from attendance.

Special Requirements: Service dress uniform required.

Quota Control: HQ AETC/SGAW.

J3OZR46A3 000—Executive Leadership Symposium (ELS)—PDS Code FBF—DOD 6E—various locations/4 days—Oct 96

Annual symposium with leading authorities from nursing and related health care disciplines sharing expertise on a wide range of topics. Contributes innovative strategies for managing current challenges confronting nursing's senior leaders. Advances knowledge and personal growth of nurse executives to meet their diverse and evolving realm of administrative responsibilities. Symposium connects students with a broad spectrum of nursing profession's experts and colleagues to exchange information and develop solutions to new and recurring problems influencing present and future management practices.

Prerequisites: USAF or Air Reserve Component Nurse Corps officers, in the rank of major and above, who are assigned in assistant chief nurse, chief nurse, or executive management positions in their military duties and senior enlisted personnel.

Application Procedures: USAF and Air Reserve Component nurses request student allocations for symposium from their respective major command nurses. Major commands receive student allocations from HQ AETC/SGN. Non-Nurse Corps officers requiring this training may apply for a quota with the approval of the MTF executive staff.

Quota Control: HQ AETC/SGAW.

J3OZR46A3 005—Nursing Service Management—PDS Code 89A—DOD 6E—Sheppard/7 wk 2 days/MASL D175078—Oct 95

Prepares selected Air Force Nurse Corps officers to use fundamentals of management theories and practices relevant to nursing middle management positions. Instruction is provided in problem solving, interpersonal relationships, communication skills, and team building. Appropriate JCAHO and professional standards, Air Force instructions, quality improvement and medical readiness applications are integrated throughout course content. Students are given opportunities to apply leadership and management principles, develop or refine management tools, and use computer technology which enhance nurse manager duties.

Prerequisites: Conditional Reserve Status (CRS) or Regular Nurse Corps Officers with no more than 10 years of active Federal commissioned service at time of entry into course. *Beginning Jan 96, to attend Nursing Service Management course, each student must successfully complete the Nursing Service Fundamentals Course, 46A1. To enroll in Nursing Service Fundamentals, the student should visit his or her base education office. (Students with master's degree in nursing administration or management may already have knowledge of information presented in course. Selection is made by major commands on the basis of quotas allocated by HQ AETC/SGAW.) Students who have attended the course J3OZP9736 002 or J3OZP46S3 002, Operating Room Management, are not eligible to attend this course. Nonretirement-eligible nurse corps officers in their third year of active duty may apply. ECL 80.

Quota Control: HQ AETC/SGAW.

* Submit waiver requests to HQ AETC/SGAW.

J5OZO46N1 002—Nurse Transition Program (NTP)—PDS Code XQF—location: designated hospitals/12 wk—Oct 96

Facilitates the transition of novice level nurses into roles as USAF Nurse Corps officers in Air Force medical treatment facilities. The primary focus is to provide these nurses the opportunity to gain medical-surgical clinical experience and competence in direct patient care under the supervision of a nurse preceptor. Students receive 1 week of initial "get started" didactics followed by two clinical rotations. The first rotation is 5 weeks long and will focus on basic skills attainment. The second rotation, which is 6 weeks, will be on their permanent unit of assignment and will focus on nursing team leading, decision making, delegation, and continued reinforcement of basic skills. Usually one rotation is of medical nursing, the other of surgical nursing. Students will have their permanent unit of assignment designated before the first rotation. TDY-status students will be identified before entry into training and will have their rotations scheduled after individualized input from gaining facility. Course includes didactic and clinical components correlated with JCAHO and ANA standards, and Air Force directives. Course is taught at six designated medical treatment facilities. Assignments for training are based on the facility's operating bed capacity and staffing needs.

Prerequisites: This is a mandatory program for all nurses accessed with less than 12 months of acute patient care experience. Successful completion of the National Council Licensing Exam (NCLEX) is mandatory before entry into the program. Course MOTS 002, Commissioned Officer Training, is required before entry into the Nurse Transition Program with the exception of those graduating within the last 5 years from a Reserve Officers Training Corps (ROTC) nursing scholarship program.

Application Criteria:

1. Enrollment in an NLN accredited or Surgeon General-approved program leading to a bachelor of science in nursing. Or, if already an RN, applicant must have received a BSN degree from an NLN-accredited or Surgeon General-approved program.

2. Minimum of three letters of recommendation from nursing instructors.

3. Completion of first semester of the senior year, with those transcripts available.

4. A maximum of 12 months of acute patient care experience before start of class.

5. Compliance with all Air Force Nurse Corps commissioning criteria.

6. Application is made through Recruiting Service. Selection is determined by board action.

NOTE: Refer to table 3.3 for student travel status. Failure to complete the course could result in separation from the Air Force Nurse Corps (see AFI 36-3207 [formerly AFR 36-12]).

Quota Control: HQ AETC/SGAW.

J5OZO46N3 000—Accelerated Basic Obstetrical Nursing—PDS Code 6NY—Keesler and Langley/6 wk—Oct 96

This course is conducted according to AFI 41-105 as a supplemental course and is governed by Annex L to the Consolidated Training Plan. It provides entry level obstetrical nurses with skills and knowledge to augment orientation at home base. Instruction is focused on continuous patient assessment, planning, organizing, implementing, and evaluating care of the obstetrical and neonatal patient. Areas of emphasis include anatomy and physiology, intrapartum care, maternal-fetal monitoring, and management of

major complications of the obstetrical and neonatal patients. Appropriate standards impacting practice, Association of Women's Health, Obstetrics, and Neonatal Nurses (AWHONN), ACOG, JCAHO, including Air Force regulations, and legal implications, are applied throughout the course. The course includes didactic and clinical components.

Prerequisites: Nurse Corps officers (AFSC 46N3) with demonstrated proficiency in basic nursing skills and a minimum of 1 year nursing (civilian and military) of experience. Applicant must be assigned to an obstetrical unit with a minimum of 4 weeks of experience and a maximum of 8 months of experience at class start. Recommend a minimum of 2 weeks of intrapartum exposure prior to class start. Student must be able to work 12 hour shifts throughout the clinical component. Bring CPR card current for duration of course and nursing license; written proof of Hepatitis B vaccine series completion, in progress, or presence of Hepatitis B surface antibody; proof of immunity to or immunization for rubella and rubeola; Tuberculin testing status; HIV testing status; proof of immunity to or antibody test results for varicella; and Neonatal Resuscitation Program (NRP) card, if available. Requests to waiver maximum experience prerequisites must be processed through HQ AETC/SGAW. Non-retirement eligible Nurse Corps officers in their third year of active duty may apply.

Quota Control: HQ AETC/SGAW.

J3OZR46N3D 002—Nursing Staff Development Officer-Basic—PDS Code J7Z—Sheppard/4 wk—Jan 96

Course prepares Air Force Nurse Corps officers to effectively fulfill staff development officer positions. Instruction is geared to planning, organizing, implementing, and evaluating all phases of the Nursing Service Staff Development Program. Roles and functions of staff development officers, management of a staff development unit including basic management tools, quality improvement, the inspection process, procurement of resources, and computers in staff development are emphasized. Content includes orientation, continuing education competency assessment, and in-service education for nursing service personnel. Instruction is also provided on principles of teaching and instructional designs and aids. Course content is correlated with appropriate JCAHO, ANA standards, and Air Force regulations. Students are given the opportunity in the classroom to apply principles of teaching and learning.

Prerequisites: A Nurse Corps officer who is assigned or will in the near future be assigned to a staff development officer position. Conditional Reserve Status (CRS) or Regular Nurse Corps officer preferred. A bachelor's degree in nursing is mandatory. Nonretirement-eligible nurse corps officers in their third year of active duty may apply. Noncommissioned officers may attend; however, a waiver request with justification must be sent to HQ AETC/SGAW for prior approval.

Quota Control: HQ AETC/SGAW.

J5OZO46S1 000—Operating Room Nursing—PDS Code J7Y—Keesler and Lackland/16 wk/MASL D175101—Oct 96

This course is conducted according to AFI 41-105 as a supplemental course and is governed by Annex J to the Consolidated Training Plan. It provides training for active duty Air Force Nurse Corps officers from other AFSCs to enter the operating room nursing career field, AFSC 46S1. Emphasis is placed on development of the perioperative role and ability to function effectively and safely as a surgical team member during the performance of surgical procedures. Creation of an optimal surgical environment, utilizing the principles of aseptic technique and infection control practices is stressed. Operating room nursing responsibilities during operating room emergencies, peacetime disasters, and wartime medical readiness are also emphasized.

Prerequisites: Desire to enter the operating room nursing specialty; demonstrated proficiency in nursing practice with competitive performance evaluations. Specific student prerequisites are determined by HQ USAF/SGN through HQ AFPC/DPAMN. Prerequisites are published prior to selection boards by HQ AFPC/DPAMN. Bring CPR card current for duration of course and nursing license; written proof of Hepatitis B vaccine series completion, in progress, and presence of Hepatitis B surface antibody; proof of immunity to or immunization for rubella and rubeola; Tuberculin testing status; HIV testing status; and proof of immunity to or antibody test results for varicella. ECL 80.

Application Procedures: Application procedures, deadlines, and selection board dates are published by HQ AFPC/DPAMN.

Quota Control: HQ AETC/SGAW.

J5OZO46S3 000—Operating Room Management—PDS Code 9WY—Keesler/Lackland/4 wk—Oct 96

This course is conducted according to AFI 41-105 as a supplemental course and is governed by Annex K to the Consolidated Training Plan. It provides training for Nurse Corps officers (AFSC 46S3) to assume the responsibilities and duties of an operating room (OR) supervisor. Instruction is provided in fundamentals of operating room and central sterile service function, management, and supervision. Areas of emphasis include quality Air Force philosophy, infection control, personnel communication, staff development, environmental control, safety, quality assurance/risk management, and contingency operations. The course is integrated with applicable Air Force regulations, OSHA, JCAHO, AORN, and other regulatory agency standards and directives. The course provides an opportunity to evaluate an operating room and central sterile service.

Prerequisites: Conditional Reserve status or Regular officer. The operating room nurse should have less than 1 year of experience as an operating room supervisor or be identified to become an operating room supervisor on the next assignment. Previous attendance at Nursing Service Management, J3OZR46A3 005, within the last year precludes attendance at this course. Nonretirement-eligible nurse corps officers in their third year of active duty may apply. Bring CPR card current for duration of course and nursing license; written proof of Hepatitis B vaccine series completion, in progress, and presence of Hepatitis B surface antibody; proof of immunity to or immunization for rubella and rubeola; Tuberculin testing status; HIV testing status; and proof of immunity to or antibody test results for varicella.

Application Procedures: Facility identifies officer requiring training to senior nurse executive who, in turn, requests course slot through respective command and HQ AETC/SGN.

Quota Control: HQ AETC/SGAW.

J3OZR4703 000—Dental Executive Leadership Course—PDS Code FC8—Sheppard/2 wk/MASL D175110—Apr 96

Developed to provide training in dental management for dental squadron commanders and dental advisors. Covers specific dental strategic planning concepts to include special dental service line workshops, dental resource and business case management, and dental data system analysis and evaluation. Provides an opportunity to apply management skills gained from other management courses. Attendees will include dental squadron commanders and projected

dental squadron commanders.

Prerequisites: Limited to career or Air Reserve Component dental officers, Lt Col or Col.

Quota Control: HQ AFPC/DPAMD, others HQ AETC/SGAW.

J3OZR4703 003—Dental Administration Course—PDS Code 44A—various locations/1 wk—Apr 96

Designed for all dental officers in the grade of Major and selected enlisted personnel to teach basic dental administrative knowledge and skills required to manage and run the day-to-day operations of various dental programs. Course will include information on skills necessary to be an effective flight chief, element leader, enlisted manager, or OPR for dental-specific programs required in a dental clinic.

Prerequisites: Limited to career dental officers, active duty and Air Reserve Component, in the grade of Major, and other individuals as requested by HQ USAF/SGD.

Quota Control: HQ AFPC/DPAMD, others HQ AETC/SGAW.

J5OZO47E3 001—Endodontics—PDS Code NJP—Lackland*/2 wk—Mar 94

Designed to give the general dental officer a better understanding and more complete knowledge of pulpal and periapical dental disease, its diagnosis and the rationale for the methods of treatment. Graduate can approach endodontic problems with assurance based on thorough knowledge and technical skill gained from the seminar discussion and clinical experience format.

Prerequisites: Officers of USAF Dental Corps.

Application Procedures: MAJCOM selects candidates for training from applications initiated locally according to procedures established by the command.

Quota Control: HQ AFPC/DPMMUD.

*Wilford Hall Med Center, McKown Dental Clinic.

J5OZO47G3 002—Temporomandibular Disorders—PDS Code 9NG—Keesler/1 wk—Mar 94

Designed to enhance the dental officer's ability to diagnosis and treat temporomandibular joint dysfunction. The course provides information on anatomy, clinical examination, history taking, and treatment modalities for temporomandibular disorders (TMD). Attendees design and fabricate their own hard night guard.

Prerequisites: Officers of the military dental service.

Application Procedures: MAJCOM selects candidates from moninations initiated locally according to procedures established by command. Non-command sponsored individuals need to check with the course director (DSN 597-5147) before obtaining local funding.

Quota Control: HQ AFPC/DPMMUD.

J5OZO47G3 003—Clinical Operative Dentistry—PDS Code 0SP—Lackland*/2 wk—Mar 94

Designed to enhance the general dental officers' ability to provide excellent clinical services in operative dentistry. Emphasis on quality of amalgam, resin, glass ionomer, and gold restorations. Includes diagnosis, operating field preparation, cavity design, and selection and placement of restorative materials. Also includes patient treatment.

Prerequisites: Dental officer in a military dental service with AFSC 47G3 or equivalent.

Application Procedures: MAJCOM selects candidate for training from applications initiated locally IAW procedures established by the command.

Quota Control: HQ AFPC/DPMMUD.

*Wilford Hall Medical Center, Benjamin W. Dunn Dental Clinic.

J5OZO47G3 004—Oral Diagnosis and Treatment Planning—PDS Code 1B2—Lackland*/1 wk—Mar 94

Covers the process of evaluating medical and dental status, developing complete and accurate diagnoses, and formulating treatment plans that meet patient needs and are within clinical capabilities. Example cases are evaluated and treatment planned by attendees. Treatment plans are discussed in a seminar format with teaching staff. Emphasis is on development of treatment plans that can be accomplished with the resources available.

Prerequisites: Officers of Military Dental Corps.

Application Procedures: MAJCOM selects candidates from applications initiated locally according to procedures established by the command.

Quota Control: HQ AFPC/DPMMUD.

*Wilford Hall Medical Center, Benjamin M. Dunn Dental Clinic.

J5OZO47G3 005—Dental Implantology—PDS Code F5W—Lackland* and Keesler/4 days/DoD 6C—Oct 96

Provides current practical information to enhance the ability of the comprehensive general dentist, oral and maxillofacial surgeon, periodontist, and prosthodontist to provide diagnostic and comprehensive care to the patient requiring dental implants. Students receive training in both the surgical and restorative aspects of dental implantology via didactic and laboratory experience.

Prerequisites: US Air Force dental officers with PAFSC of 47G3, 47H3, 47P3, or 47S3.

Application Procedures: MAJCOM selects candidates for training from applications initiated locally according to procedures established by the command.

Quota Control: HQ AFPC/DPAMD

*Wilford Hall Medical Center.

J5OZO47G3 006—Pediatric Dentistry—PDS Code F61—Lackland/2 wk—Mar 94

Designed to enhance the general dental officer's ability to provide excellent clinical services in pediatric dentistry. Covers pulpal treatment, trauma, and emergencies of the pediatric patient. Emphasis on need and type of space maintainers, construction of lingual arch holding appliances, and the value of interceptive orthodontics. Successful demonstration of didactic and clinical proficiency in use of nitrous oxide leads to certification in its use.

Prerequisites: Dental officer in a Federal dental service with AFSC 47G3 or equivalent.

Application Procedures: MAJCOM selects candidate for training from applications initiated locally according to procedures established by the command.

Quota Control: HQ AFPC/DPMMUD.

J5OZO47G3 007—Clinical Update in Dentistry—PDS Code

Y7P—Lackland/2 wk—Mar 94

Provides a comprehensive review and update of all dental disciplines for the general dental officer. This course should substantially improve the participants' knowledge and background in the latest findings, techniques, and changes in dentistry. The course will primarily by given by means of lectures and seminars.

Prerequisites: Be a dental officer in the US Armed Services with at least 4 years of clinical experience. A candidate who has received 1 or more years of formal training must be out of training a minimum of 4 years.

Application Procedures: MAJCOM selects candidates for training from applications initiated locally according to procedures established by the command.

Quota Control: HQ AFPC/DPMMUD.

J5OZO47G3 008—Operational Dental Training Program (Top Drill)—PDS Code Z9D—Kingsley Fld/1 wk 3 days—Apr 95

Operationally oriented course which provides dental officers first-hand training in the unique aeromedical aspects of fighter aviation. The graduate will have a thorough comprehension of dental and physiologic aspects of flying high performance fighter aircraft in the aerial combat environment. Continuing Medical Education (CME) Category I credit will be awarded by the Air Force Academy. The program involves computer-interaction where personnel become familiar with aircraft systems. There is simulator time as well as survival training provided. Top Drill students take part in mission planning, briefs, and debriefs. Students are also eligible to fly on contract civilian target aircraft used to simulate enemy intercept profiles. Provides operational exposure through one dedicated flight to the rigors of the aircrew. Students are required to be in the dental clinic for 1.5 hours each class day to provide sick call assistance to flight crew and base personnel. The clinic provides a fully equipped dental operatory for their use. The medical academic portion of the course is self-paced with an end-of-course exam to ensure students have retained key points of the course.

Prerequisites: Must be a fully qualified, licensed dental officer serving as a dentist with responsibility for care of rated personnel in the Air National Guard, Air Force Reserve, or active duty Air Force. Must have a current physiologic training record, current flying physical examination, and the medical commander and unit commander endorsement.

Admin Instructions: Prepare TDY orders for 10 calendar days at Kingsley Field, Klamath Falls Oregon. Submit copy of credentials to course manager at Kingsley Field to review and to ANG surgeon general's office for approval. The selectee will be met at Klamath Falls International Airport the Sunday before class starts on Monday by a staff member who will assist in billeting. The student will report to the west end of bldg 207 no later than 0700 Monday morning for class. ***NOTE***: The billeting office at Kingsley Field does NOT honor credit cards.

Quota Control: HQ AETC/SGAW.

J5OZO47G4 005—Dental Plans and Programs—PDS Code N43—Bolling/3 days—Jun 94

Provides interchange of information, trends, recent developments in the management of dental programs, and resources. Updates managerial concepts and practices dealing with local, major command, and Air Force policies. Affords attendees the opportunity to discuss and develop solutions to new and recurring problems in the Dental Service.

Prerequisites: USAF dental officers and dental enlisted personnel.

Application Procedures: HQ USAF/SGD selects attendees in coordination with MAJCOMs.

Quota Control: HQ AFPC/DPMMED.

J5OZO47H3 001—Periodontics—PDS Code WTF—Lackland*/6 wk/MASL D175112—Mar 94

Broadens capabilities of general dental officers in the recognition, diagnosis, treatment planning, and surgical and conservative approaches, and maintenance requirements associated with the treatment of periodontal disease. Student gains confidence in treatment and judgment in determining the need for referral.

Prerequisites: Officers of USAF Dental Corps.

Application Procedures: MAJCOM selects candidates for training from applications initiated locally according to procedures established by the command.

Quota Control: HQ AFPC/DPMMUD.

*Wilford Hall Med Center, McKown Dental Clinic.

J5OZO47P3 001—Prosthodontics—PDS Code WTH—Lackland*/4 wk/MASL D175113—Mar 94

The clinical phase stresses fixed prosthodontics with a fixed partial denture, metal ceramic crown and orthosis (acrylic night guard) fabricated for patients. Theory of RPD design is developed through lectures and the technique laboratory. A didactic overview is made for complete dentures and maxillofacial prosthodontics. Theories of occlusion, shade matching, and the need for accurate communication and optimal utilization of the dental laboratory is addressed. The importance of a multi-disciplined approach in patient treatment is emphasized. A number of technique casts and a facial moulage cast will be provided to students. Osseointegrated implant techniques will be presented in lecture and laboratory demonstration to familiarize the post graduate student in implant therapy and maintenance.

Prerequisites: Officers of USAF Dental Corps who have not taken this course within the last 5 years.

Application Procedures: MAJCOM selects candidates for training from applications initiated locally according to procedures established by the command.

Quota Control: HQ AFPC/DPMMUD.

*Wilford Hall Medical Center, McKown Dental Clinic.

J5OZO47S3 001—Exodontics—PDS Code WTE—Lackland*/4 wk/MASL D175111—Jun 94

Implements and broadens capabilities of dental officers in field of minor oral surgery and exodontia. Makes them relatively self-sufficient in most forms of exodontia. Through improved diagnostic acumen and stimulated interest, student is prepared to recognize and properly evaluate oral surgery problems for treatment locally or referral to a consultant center. Emphasis is on third molar surgery, but surgical principles will improve skills in all areas of minor surgery. Provides experience in hospital admission procedure and discharge of patients. Successful completion of didactic and clinical aspects of use of intravenous sedation leads to certification in its use. Required current certification (within 1 year) in advanced cardiac life support (ACLS).

Prerequisites: Officers of USAF Dental Corps who have not taken this course within the last 5 years. Current certification in ACLS before course start date.

Application Procedures: MAJCOM selects candidates for training from applications initiated locally according to procedures established by the command.

Quota Control: HQ AFPC/DPMMED.

*Wilford Hall Med Center, Benjamin W. Dunn Dental Clinic.

J5OZO48G3 000—Flight Surgeons Trauma Triage Refresher Course—PDS Code XRF—Lackland/Houston/1 wk 2 days—Apr 95

Provides the flight surgeon with the skills necessary to perform triage duties as required by Air Force contingency operations doctrine. During the first 4 days, flight surgeons will attend lectures, observe trauma surgery and patient care by Wilford Hall Trauma Service and Emergency Department. Selectees will then spend 3 days at Ben Taub Hospital Emergency Department, observing high volume casualty care and resource allocation.

Prerequisites: Must be a flight surgeon assigned to a mobility position, have completed the combat casualty care course, be current in advanced trauma life support certification, and have a minimum of 1 year of retainability in the current position.

Admin Instructions: Prepare TDY orders for 7 calendar days—4 at Wilford Hall, and 3 at Ben Taub Hospital. Travel time between Wilford Hall and Ben Taub Hospital are not included in the course hours; however, travel and training may both occur on the same day. The selectee will report to the Wilford Hall Medical Center Trauma Service and Emergency Department on Sunday for assignment and processing. The selectee will depart for home station from Ben Taub Hospital on Monday the following week.

* Wilford Hall Medical Center, Lackland AFB TX, and Ben Taub Hospital, Houston TX.

Quota Control: HQ AETC/SGAW.

J5OZO48X3 000—USAF Flight Surgeon High Performance Aircraft Training Course (Top Knife II)—PDS Code 2WZ—location*/2 wk—Apr 95

Provides initial and refresher training to flight surgeons on their role as crewmembers in high performance aircraft. Provides a comprehensive background in the physiology of high performance flight as well as tactical operational and squadron environment. Training is accomplished through a combination of medical didactics, flying academics, tactical flying sorties, and various simulators.

Prerequisites: Must be a flight surgeon currently assigned as an active (ASC 8A) flight surgeon in a high performance mission or in T-37/T-38 aircraft, or enrolled in the resident in aerospace medicine course. Flight surgeons assigned to other aircraft types may be approved for attendance on a space-available basis. HQ AETC/SGPA is the approval authority. Each student must have completed centrifuge training—contact HQ AETC/SGPA for specific requirements. Must have a current physiological training record (AF Form 702), a Secret clearance or higher, be medically qualified without categorical waiver, have a letter of recommendation from the medical treatment facility commander, have a current medical recommendation for flying (AF Form 1042), and have a current copy of flying physical examination. Must also have at least 1 year of retainability in current assignment, current altitude chamber training according to existing publications, and, if class is held at Tyndall AFB FL, be current (within 1 year) in water survival training.

Admin Instructions: Prepare TDY orders for 14 calendar days at either Tyndall AFB FL or Luke AFB AZ. The 14 days include 2 travel days.

Selection Control: HQ AETC/SGPA.

Continuing Medical Education Credits: Forty-six category I credits approved by HQ AFPC/DPMMUE. All end-of-course documents must be forwarded to HQ AFPC/DPMMUE within 60 days of the end of course.

Quota Control: HQ AETC/SGAW.

* Luke AFB AZ and Tyndall AFB FL.

Airman Courses

J3ABR4A031 000—Health Service Management Apprentice—PDS Code EMN—DOD 513—Sheppard/6 wk 1 day*/AFSC 4A031/MASL D175036—Apr 96

Trains health services management specialists to perform duties in support of patient services activities to include admission and disposition procedures, outpatient and inpatient records functions, medical terminology, anatomy and physiology, inpatient unit administration, appointment system, managed care programs, third party liability, line of duty determinations and misconduct, and medical air evacuation of patients; in resources and information management to include the medical expense and performance reporting system, safeguarding of patient valuables, and basic information systems knowledge to include hands-on use of computer terminals; and in general, all functional areas include development of Air Force correspondence, word processing and keyboard skills, publications and forms management, electrical messages, and communications management programs.

Prerequisites: ECL 70.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

Quota Control: HQ AETC/SGAW.

*Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J3ACR4A071 000—Health Services Management Craftsman—PDS Code 7PH—Sheppard/2 wk—Jan 96

Mandatory course providing a 4A051 journeyman the skills needed to function as a 4A071 craftsman. Students will be challenged to apply 18 months of technical upgrade training into managerial and supervisory decision-making processes. Small groups will be assigned case studies to analyze, research, discover root problems, and determine possible solutions. These case studies and scenarios will focus on analyzing personnel interactions at all levels within a medical treatment facility, strong emphasis will be given to management of managed care, patient services, and resource management.

Prerequisites: SSgt and have successfully completed the prerequisite training as outlined on AF Form 797 found in the career field education and training plan. Task trainer and task certifier will ensure completion of training. Student will hand-carry OJT records to course. Attendees will be notified a minimum of 90 days before class start date of selection.

Special Requirements: Service dress uniform is mandatory.

Classroom attire includes BDU and any combination of blue uniform. Ribbons and medical badges are encouraged.

Quota Control: HQ AETC/SGAW.

J3AZR4A071 012—Medical Expense and Performance Reporting System (MEPRS)/EAS III—PDS Code W0Q—Sheppard/3 wk 1 day—Dec 93

Trains newly assigned personnel in the Medical Resource Management Office as Medical Expense and Performance Reporting System (MEPRS) managers or personnel who are responsible for the operations of the Expense Assignment System (EAS III) at a medical treatment facility. Provides initial training in the MEPRS coding system, collection of personnel utilization, workload and direct expense data collection, EAS III, EAS III equipment, system maintenance requirements, and stepdown process, and comparing or interpreting system-generated reports.

Prerequisites: Possess AFSC 4A051 or higher and projected for or assigned to MEPRS or EAS III duties.

Quota Control: HQ AETC/SGAW.

J3AZR4A071 013—Health Services Management Craftsman—PDS Code V54—Sheppard/6 wk—Dec 93

Provides training to personnel who are assigned to or projected into health services management supervisory positions. Includes personnel management, medical squadron section, administrative services, communications management, medical manpower management, medical service account (MSA), Medical Expense and Performance Reporting System (MEPRS), financial management and budgeting, report of patients, patient administration, aeromedical evacuation, medical readiness planners activities, and the Automated Quality of Care Evaluation Support System (AQCESS) and related subfunctions.

Prerequisites: Active duty only. PAFSC 4A071 in grades E-5 or E-6 and hold a supervisory position or be projected to that position in a medical treatment facility (MTF) or air evacuation squadron (AES). Nominee must be approved by his or her major command career field manager.

Quota Control: HQ AETC/SGAW.

J5ARO4A071 000—Health Services Technician Management (ARF) Symposium—PDS Code EKR—various USAFR/ANG bases/3.5 days—Oct 95

Assists medical technicians in carrying out daily operations by making them aware of key issues in the health care delivery system. Designed for the health services craftsman to reinforce current policies, initiatives, and programs affecting ANG and USAFR medical technicians through lectures and demonstrations on various functions of the unit and how these functions interact with one another. The symposium includes an overview of the respective headquarters policies and relationships. Primary emphasis is on technical foundations and knowledge essential to day-to-day management decisions.

Prerequisites: Selectee must be a member of the ANG or USAFR medical unit. Students will be SrA through CMSgt.

Quota Control: HQ AETC/SGAW.

J3ABR4A131 000—Medical Materiel Apprentice—PDS Code EMU—DOD 551—Sheppard/5 wk*/AFSC 4A131/MASL D175048—Oct 96

Provides training to enable enlisted personnel entering medical materiel field to perform duties prescribed in AFM 36-2108. Includes procedures in computer operations, requisitioning, document control, stock control, warehouse procedures, and related procedures necessary for the operation of an Air Force medical materiel account.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

Prerequisites: ECL 65 SA.

Quota Control: HQ AETC/SGAW.

*Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J3ACR4A171 001—Medical Materiel Craftsman—PDS Code 7PS—Sheppard/2 wk—Oct 96

Mandatory course that provides training in the knowledge and skills needed to perform the duties as an NCOIC in medical logistics. Emphasis is placed on medical logistics management techniques. Includes acquisition and inventory management, medical equipment management office function, war reserve materiel, and reports and functional management. Course is based on medical logistics (MEDLOG) computer system of inventory control and includes discussion of computer input and output in relationship to the management of a medical stock record account.

Prerequisites: Career personnel, Ssgt or above, must have 12 months' experience with MEDLOG computer system. NONWAIVERABLE

Quota Control: HQ AETC/SGAW.

J3AZR4A171 003—Medical Materiel Supervisor—PDS Code UTD—Sheppard/4 wk—Oct 96

Provides training in knowledge and skills needed to perform the duties in medical logistic system procedures emphasizing medical logistic management techniques. Includes records maintenance, inventory control, procurement, issues, property disposition, gains and losses, quality control report, war reserve materiel, medical equipment management office procedures, and financial management. Course is based on Medical Logistics (MEDLOG) Computer System of inventory control and includes quality control of computer input and output for management purpose.

Prerequisites: Career personnel, SSgt or above, with AFSC 4A171 or 4A191 minimum. Must have a minimum of 12 months of MEDLOG computer system experience. NONWAIVERABLE.

Quota Control: HQ AETC/SGAW.

J3ABR4A231 001—Biomedical Equipment Apprentice—PDS Code W8S—DOD 198—Sheppard/32 wk 4 days*/AFSC 4A231/MASL D175016—Oct 96

Provides training for biomedical equipment personnel to include clinical application, operation, inspection, maintenance, and troubleshooting of a wide variety of medical equipment systems used in peacetime.

Prerequisites: Personnel with AFSC 4A2X1who are not graduates of 3ABR91830 001 or 3ABR40330 002 and do not have more than 14 years of service are eligible for attendance. ECL 70. Normal color vision as defined in AFI 48-123 (formerly AFR 160-43) is

mandatory. Student must have attained the age of 18 years prior to entry in course according to AFR 161-28, *Personnel Dosimetry Program and the USAF Master Radiation Exposure Registry*. Successful completion of L3AQR4A231 800 is mandatory.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and consumption of meals ready to eat (MRE). Attendees are required to have an occupational health eye examination per paragraph 3.9.5.2.4 of this catalog.

Admin Instructions: Graduates of DOD medical maintenance courses eligible for entry into this course may be phase advanced depending on skill and previous training. Graduates of civilian institutions eligible for entry into this course must attend the performance phase of the course as a minimum. Instruction in the last 31 weeks is a combination of group/lock step. Self-pacing in the last block provides for early graduation.

Quota Control: HQ AETC/SGAW.

*Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J3AZR4A271 008—X-Ray Procurement and Acceptance Inspection Procedures—PDS Code 6CC—DOD 198—Sheppard/2 wk—Dec 93

Provides supplemental training in X-ray procurement and acceptance inspection procedures. Course enables biomedical equipment maintenance personnel assigned to medical equipment repair centers to fulfill the additional responsibilities prescribed in AFI 41-201, *Clinical Engineering Services* (formerly AFR 167-7). The course provides the necessary skills and knowledge required to perform preprocurement surveys, acceptance inspections, and post-calibration radiation surveys for X-ray systems, and to provide advice on the X-ray procurement surveys.

Prerequisites: Graduate of basic course J3ABR4A231 000 or J3ABR40330 002 and possess a 5-skill level. Desired personnel should possess a 7-skill level or be assigned to a medical equipment repair center. Designed primarily for grades E-4 through MSgt. Enlisted grades of SMSgt and CMSgt and officers with AFSC 41A1 or 41A3 and SEI MFF in grade of 2d Lt through Capt are eligible to attend. NOTE: Completion of or concurrent scheduling of course J3AZR4A271 013 is also recommended.

Special Requirements: Hospital whites and battle dress uniforms (BDU) are the primary duty uniforms.

Quota Control: HQ AETC/SGAW.

J3AZR4A271 010—Maintenance Management and Safety—PDS Code 7XY—Sheppard/1 wk—Dec 93

Prepares personnel assigned to supervisory positions in the biomedical equipment maintenance program to assume managerial responsibilities. Students will be exposed to management concepts and policies necessary for development and management of an effective medical equipment maintenance program. Training will include instruction by subject matter specialists in areas of resource management, regulatory requirements, hospital accreditation, contract administration, risk management, and safety.

Prerequisites: AFSC 4A271 or higher and be in grade of SSgt or above; AFSC 4A171 or higher, be in grade of MSgt or above and be serving in a MAJCOM position; or an officer with AFSC 41A1 or 41A3 in grade 2d Lt through Capt assigned to medical logistics position.

Special Requirements: Any blue uniform combination is the primary duty uniform and required for graduation.

Quota Control: HQ AETC/SGAW.

J3AZR4A271 011—X-Ray Systems Craftsman—PDS Code 5XJ—Sheppard/3 wk—Apr 95

Provides supplemental instruction in medical imaging for a select cadre of biomedical equipment maintenance craftsmen. Course trains personnel assigned to medical equipment repair centers and MAJCOMs with technical consultant responsibilities in all X-ray matters within their area of responsibility. Quotas will be available for 82 TRG instructors responsible for teaching maintenance of X-ray equipment. Training in the first 2 weeks includes: Air Force Diagnostic Imaging Program; clinical application of X-ray systems; equipment principles, applications and services; film processing and quality assurance; system installation, inspection, and safety. The third week will be in attendance at the Radiological Society of North America (RSNA) conference, Chicago IL.

Prerequisites: Must have primary AFSC 4A271 or 4A291. Officers with AFSC 41A1 or 41A3 in the grade of 2d Lt through Capt with SEI MFF are eligible to attend. Selection of the individuals will be accomplished by AFMLO/FOM taking into consideration previous experience, TIS, time on station, grade, and attendance at previous 91870 supplemental courses.

Special Requirements: Light blue shirt with epaulets will be worn while attending 882 TRG portion of the course. Service dress and equivalent civilian attire will be required for follow-on RSNA conference.

Quota Control: HQ AETC/SGAW.

J3AZR4A271 012—Medical Facilities Management—PDS Code 91N—Sheppard/2 wk 3 days—Dec 93

Trains selected personnel in the organization of facilities management and functions of related base support organizations, operations and maintenance, facility programming, financial management, safety management, fire protection/prevention, hospital accreditation procedures, energy conservation, disaster planning, resource protection, contract administration, and communication.

Prerequisites: Officers (41A1 or 41A3), NCOs (SSgt 4A271 and above), or civilians who are or will be immediately engaged in duties of medical facilities management. Personnel who attended course J3AZR90670 005 are not eligible to attend. Interservice personnel serving in medical facility management positions are welcome to attend.

Special Requirements: Any blue uniform combination is the primary duty uniform and is required for graduation.

Quota Control: HQ AETC/SGAW.

J3AZR4A271 013—Advanced Diagnostic X-Ray Systems—PDS Code 7UA—DOD 198—Sheppard/6 wk 2 days—Dec 93

Provides training for Air Force biomedical equipment technicians and clinical engineers in the maintenance of advanced diagnostic X-ray generators; fluoroscopic viewing and recording systems; positive beam limiting devices; and diagnostic X-ray monitoring systems and interface. Training includes advanced electronics, application of modern diagnostic X-ray systems, digital imaging, microprocessor programmed radiography, and hands-on

troubleshooting.

Prerequisites: Graduate of basic course J3ABR4A231 000 or J3ABR40330 000. Possess a minimum grade E-4 in AFSC 4A251, 4A271, or 4A291 or officers with AFSC 41A1 or 41A3 filling a clinical engineering position.

Special Requirements: Hospital whites or battle dress uniforms (BDU) are the primary duty uniforms.

Quota Control: HQ AETC/SGAW.

J3AZR4A271 014—Advanced Medical Instrumentation—PDS Code RM4—Sheppard/4 wk—Dec 93

Provides supplemental training for Air Force personnel in AFSC 4A251, 4A271, or 4A291. Designed to enable biomedical equipment specialists to maintain advanced medical instrumentation. Training includes a review of solid-state electronics, digital techniques, microprocessor systems, and hands-on troubleshooting.

Prerequisites: Desired personnel should be in grade E-4 through MSgt. Enlisted grades of SMSgt and CMSgt and officers with AFSC 41A1 or 41A3 and SEI MFF in grade of 2d Lt through Capt are eligible to attend.

Special Requirements: Hospital whites and battle dress uniforms (BDU) are the primary duty uniforms. Any blue uniform combination is required for graduation.

Quota Control: HQ AETC/SGAW.

J4AZT4A271 008—X-Ray Procurement/Acceptance Inspection —PDS Code 6CC—various locations/2 wk—Apr 95

Provides supplemental training in X-ray procurement and acceptance inspection procedures. Enables biomedical equipment maintenance personnel assigned to medical equipment repair centers to fulfill the additional responsibilities prescribed in AFI 41-201 (formerly AFR 167-7). Provides the necessary skills and knowledge required to perform preprocurement surveys, acceptance inspections, and post-calibration radiation surveys for X-ray systems, and provides advice on the X-ray procurement surveys.

Prerequisites: Graduate of basic course J3ABR4A231 001 or J3ABR91830 001 and possess a 5-skill level. Desired personnel should possess a 7-skill level or be assigned to a medical equipment repair center. Designed primarily for grades SrA/Sgt through MSgt. Enlisted grades of SMSgt and CMSgt and officers with AFSC 41A1 or 41A3 and SEI MFF in grade of 2d Lt through Capt are eligible to attend. ***NOTE***: Completion of or concurrent scheduling of course J3AZR4A271 013 is recommended.

Special Requirements: Hospital whites and battle dress uniforms (BDU) are the primary duty uniforms.

Quota Control: HQ AETC/SGAW.

J3ABR4C031 001—Mental Health Service Apprentice—PDS Code XPZ—Sheppard/13 wk*/AFSC 4C031—Apr 96

Prepares airmen to perform as assistants to professional personnel in the care and treatment of patients in mental health clinics/units. Students learn basic medical nursing procedures, and mental health theories and skills to include: human anatomy and physiology; medical terminology; physiological assessments; medical conditions, procedures, and comfort measures; infection control; Basic Cardiac Life Support provider certification; professional and interpersonal relationships; introduction to major theories in psychotherapy; milieu therapy; group dynamics; individual interventions, suicide prevention; personality theories; pharmacology; specific mental health psychopathologies according to the Diagnostic and Statistical Manual of Mental Disorders IV (DSM IV); interviewing skills, psychological testing, family advocacy concepts, combat stress management; nonviolent crisis management techniques; drug and alcohol abuse case management; administrative and documentation procedures. Clinical experience follows didactics. Course orientation complies with Joint Commission on Accreditation of Healthcare Organizations, American Nurses Association, and American Heart Association standards; Centers for Disease Control guidelines; and Air Force regulations.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

Retraining Note: For active duty, ANG, and USAFR, a favorable personal interview with base-level OPR for this AFSC is required for mental health evaluation prerequisites that cannot be validated from personnel records. Send report of interview with application to MAJCOM or attach statement indicating no base-level OPR is in the locale.

Quota Control: HQ AETC/SGAW.

* Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

L3AQR4D031—Diet Therapy Apprentice—PDS Code XDB—DOD 800—Sheppard/6 wk 1 day*/AFSC 4D031—Oct 96

Knowledge in basic nutrition, calculating, modifying, preparing, and serving therapeutic diets; operation and cleaning of nutritional medicine service equipment; procurement, storing, issuing dietetic foods and supplies; accounting procedures; and nutritional medicine service administration.

Prerequisites: Must successfully complete course L3AQR4D031 001 before entry into this course.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

Quota Control: HQ AETC/SGAW.

* Four days of course consist of course J3AQR40030 002, Basic Medical Readiness.

J3AZR4D071 000—Diet Therapy Craftsman—PDS Code S6E—DOD 800—Sheppard/5 wk—Apr 95

Provides training for Air Force personnel, AFSC 4D051 and higher, in the technical and managerial skills necessary to perform duties as NCOIC of nutritional medicine service activities. Develops the diet supervisor's ability to contribute competent dietary support to Air Force medical mission. Training includes principles of therapeutic nutrition planning and use of selective cycle menus for normal and modified diet preparation, economy, and efficiency of operations, food service cost accounting procedures, quality assurance, disaster operations, and the application of data automation.

Prerequisites: SSgt (E-5) or above with AFSC 4D051 or 4D071. Retrainees must have obtained AFSC 4D051 and completed 2 years

of experience in nutritional medicine service prior to attending the course. Civilians should be functioning in a diet therapy supervisor position and have successfully completed the 4D071 CDC. Must score at least 70% on prerequisite test. The test is obtained by contacting the MAJCOM dietitian.

Quota Control: HQ AETC/SGAW.

L3AQR4D0X1 001—Diet Therapy Apprentice—PDS Code XDB—Lackland/6 wk 1 day/AFSC 4D031—Jun 94

Trains Air Force enlisted personnel entering the 4D0X1 career field. Covers Quality Air Force, OPSEC, services career field, AFOSH and recreation safety; services automation; subsistence storage operations; sanitation and personal hygiene; principles of food preparation; cooking methods; flight and ground feeding operations; procedures for preparing food items; food preparation and serving techniques; program objectives and team concept; field feeding; field billeting; field laundry; wartime mortuary; field fitness and recreation operations; field hygiene and sanitation; deployment practicum; Air Force sports and fitness program; wellness; program, activities, and operations management; lodging management; protection of assets; and program development, promotion, and planning.

Prerequisites: ECL 70.

Special Requirements: The following uniform requirements apply to assignment of ANG and AFRES students: Three each long and short sleeve shirts, three pairs of pants, ribbons, ties, name tag, and stripes, shoes, and flight cap. Three sets of BDUs, steel-toed boots, BDU cap, and BDU jacket. Three sets of whites.

Quota Control: 2 AF/DOP.

J3AQR4H031 003—Cardiopulmonary Laboratory Apprentice (Phase I)—PDS Code 0UF—DOD 300—Sheppard/12 wk 2 days*—Dec 93

Provides training in basic theory and skills to assist cardiologists and pulmonary physicians in examination, evaluation, and management of cardiovascular and pulmonary dysfunction by performing a broad spectrum of diagnostic procedures and respiratory therapy such as electrocardiography, echocardiography, Holter monitoring, cardiovascular stress testing, pulmonary function studies, flow/volume loops, airway resistance, lung diffusion capacity, blood and gas analysis, induced asthma studies, maximum voluntary ventilation, maximum 02 study, lung volume, bronchoscopy, management of mechanical ventilation, airway management, and emergency team functions in cardiopulmonary arrest. Also instructs on collecting, processing, calculating, and maintaining data for permanent record through operation and maintenance of diagnostic equipment. Major areas of study are mathematics and physics related to the cardiopulmonary specialty, anatomy and physiology, acid-base physiology, medical terminology, cardiovascular and pulmonary dysfunction, and emergency procedures. NOTE: Students must attend follow-on Phase II training (course J5ABO4H031 001) in order to receive 5-level AFSC.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and consumption of meals ready to eat (MRE).

Quota Control: HQ AETC/SGAW.

*Four days of course consist of course J3AQR40030 002, Basic Medical Readiness.

J5ABO4H031 001—Cardiopulmonary Laboratory Apprentice (Phase II)—PDS Code 0UG—DOD 300—designated hospitals/30 wk/AFSC 4H031—Dec 93

Phase II training in hospital environment to provide assistance to cardiologist and pulmonary physician in examination, evaluation, diagnosing, and management of cardiovascular and pulmonary dysfunction by performing a broad spectrum of diagnostic procedures and respiratory therapy such as administration of electrocardiogram, echocardiogram, Holter monitoring, cardiovascular stress tests, pulmonary function studies, flow/volume loops, airway resistance, and blood gas analysis. Assist in the performance of bronchoscopy max 02 studies, management of mechanical ventilator patients, respiratory therapy, airway management, and operation and maintenance of diagnostic equipment.

Prerequisites: Graduate of course J3AQR4H031 003 at Sheppard AFB.

Quota Control: HQ AETC/SGAW.

J5AZO4H051 002—Updates in Respiratory Care for Cardiopulmonary Technicians—PDS Code 032—Lackland/2 days—Apr 95

Provides training to cardiopulmonary technicians in optimal management of patients who are frequently complex and critically ill with pulmonary disease. Instruction includes knowledge of disease states, up-to-date techniques, and evaluation methods for patients with respiratory diseases; management of the disease; and, how to recognize clinical deterioriation for early intervention enabling the technician to provide quality management of the disease. Steps will be taken to ensure continuing education units will be provided to members completing this course.

Prerequisites: 4H031 qualified cardiopulmonary technician.

Admin Instructions: Student's home unit will fund for 4 days of TDY, which includes 2 days of travel. TDY-to-school funds are expected to become available during FY 95.

Quota Control: HQ AETC/SGAW.

J3ACR4H071 000—Cardiopulmonary Laboratory Craftsman—PDS Code O8C—Sheppard/2 wk—Oct 96

Mandatory 7-skill level course that provides extensive management, administrative, and supervisory training needed for mid-level cardiopulmonary laboratory noncommissioned officers. Also provides training in medical material procedures to include procurement and management of equipment and supplies. Other areas of study include workload data reports, quality improvement, quality control, accreditation and regulatory agencies, counseling, cost accounting and manpower management.

Prerequisites: Ssgt with 18 months time in grade and hold AFSC 4H051.

Special Requirements: Report with three blue uniforms (long or short sleeve) and one battle dress uniform. Ribbons and medical badge are encouraged.

Quota Control: HQ AETC/SGAW.

J5ABA4J031 000—Occupational Therapy Apprentice—PDS Code SQL—DOD 303—Ft Sam Houston/29 wk/AFSC 4J031—Oct 96

Study of anatomy, kinesiology, and psychology, and their

relationship to human performance; physical and mental clinical conditions; techniques and application of craft activities, such as woodworking, leatherworking and ceramics. Course prepares student to assist the occupational therapist in planning and implementing therapeutic activity programs directed toward functional restoration of patients with physical and (or) psychosocial dysfunction.

Admin Instructions: Students assigned PCS to the 59th Medical Wing, Squadron F, Wilford Hall Medical Center, PAS: LAOJFGTS, with 17 weeks of duty at the Academy of Health Sciences, Ft Sam Houston TX; 12 weeks phase II training at Wilford Hall USAF Medical Center, Lackland AFB TX, or 74th Medical Group, Wright-Patterson AFB OH. Orders will indicate: "For attendance of course J5ABA4J031 000 (Army Course 303-91L10) Occupational Therapy Specialist (17 weeks) at Ft Sam Houston. After completion of didactics at Ft Sam Houston, airmen will complete remaining 12 weeks of clinical training (phase II) at Wilford Hall Medical Center, Lackland AFB TX or 74th Medical Group, Wright-Patterson AFB OH (airmen will be billeted in base dorms (if available), VAQ, or procure lodging off base." Students will report to 59th Medical Wing, Squadron F, Wilford Hall Medical Center, Lackland AFB TX, NLT 1200 5 duty days before class start date or the 74th Medical Group/SGOPZ, Wright-Patterson AFB OH, NLT 0730 on phase II training start date.

Prerequisites: Successfully complete J3AQR4N031 003, Medical Service Apprentice Course.

J3ABR4J032 001—Physical Therapy Apprentice—PDS Code XX7—DOD 303—Sheppard/12 wk 1 day*/AFSC 4J032/MASL D175082—Apr 95

Training in theory and practical application of physical therapy procedures and modalities needed to assist the physical therapist in administering physical therapy care. Includes psychology of diseased and injured, physiology, anatomy, medical condition in physical therapy, administration, communication, and ethics, physical therapy procedures and modalities, and clinical activities with emphasis on patient interaction.

Prerequisites: ECL 70.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

NOTE: Graduates must be assigned only to hospitals with an assigned physical therapy officer. Reference AFMAN 36-2110 (formerly AFR 39-11), attachment 6, code 9UH.

Quota Control: HQ AETC/SGAW.

* Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J3AQR4N031 003—Medical Service Apprentice—PDS Code 82G—Sheppard/13 wk 2 days*/MASL D175020—Oct 96

Provides airmen entering the medical service apprentice career field with basic knowledge and skills needed to perform patient care within the parameters of this specialty. Subjects presented in the curriculum include anatomy and physiology, interpersonal relationships, emergency medical treatment, processes of illness, basic psychology as related to mental health, and nursing technologies. Course content complies with Joint Commission on Accreditation of Healthcare Organizations (JCAHO), American Heart Association (AHA), and American Nurses Association (ANA) standards; Centers for Disease Control (CDC) guidelines; National Registry of Emergency Medicine Technician (EMT) standards; Department of Transportation standards, and Air Force instructions. After successful completion of this course, graduates receive National Registry of Emergency Medical Technician Certification, and are eligible for CCAF hours. This course serves as a prerequisite for course J5ABO4N031 000, Medical Service Apprentice - Phase II.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site.

Prerequisites: Current driver's license. ECL 65 MS.

Quota Control: HQ AETC/SGAW.

* Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J5ABO4N031 000—Medical Service Apprentice - Phase II—PDS Code 82F—designated hospitals/7 wk 4.5 days/AFSC 4N031—Oct 95

This course is conducted under the authority of AFI 41-105. It follows the prerequisite Medical Service Apprentice Course (J3AQR4N031 003), and it provides airmen entering the medical service specialist career field with 8 weeks of supervised clinical experience prior to the awarding of AFSC 4N031. The curriculum taught in this course includes clinical practice in direct patient care, interpersonal communication skills, and emergency vehicle operation. It provides students with as much exposure to actual patient care settings as possible prior to their first duty assignment. Course content complies with Joint Commission on Accreditation of Healthcare Organizations (JCAHO), American Heart Association (AHA), and American Nurses Association (ANA) standards; Centers for Disease Control (CDC) guidelines; and Air Force regulations. The course is conducted at various major Air Force medical treatment facilities within CONUS. Graduates of this course will be awarded the AFSC 4N031 and will be eligible for CCAF hours.

Prerequisites: Successful completion of course J3AQR4N031 003 and a current driver's license.

Reporting Instructions: Student will report to the Commander, Medical Squadron Section, at the designated Air Force hospital. Report not later than 1200 at least 1 duty day before class start date.

Quota Control: HQ AETC/SGAW.

J5ABA4N031A 001—Allergy/Immunology Apprentice—PDS Code 224—Walter-Reed AMC/4 wk/AFSC 4N031A—Oct 96

Provides: (1) didactic instruction for medical technicians in the specialized field of allergy-immunology to perform administrative tasks required in an allergy-immunology service, to include maintenance of records, supply sources, and procurement procedures; and (2) instructions, under the supervision of a physician, on how to prepare allergen extract prescriptions, conduct diagnostic procedures, and administer treatment for patients, using basic and advanced sciences of allergy-immunology in a clinical practicum/rotation environment.

Prerequisites: Air Force personnel. Completion of courses J3AQR4N031 003, Medical Service Apprentice, J3AQP4N031A 000, Allergy-Immunology Apprentice, or J5AQO4N031A 001, Allergy/Immunology Apprentice - Phase II.

Reporting Instructions: Students will report to Delano Hall (bldg 11), Student Company, Walter Reed Army Medical Center, Wash DC, no later than 1600 on the Sunday before class start date for billeting and further instructions. Contact Air Force instructor, DSN 662-7325, immediately upon notification of assignment.

Quota Control: HQ AETC/SGAW.

J5ABN4N031B 000—Neurology Apprentice—PDS Code 8N2—Bethesda/26 wk/AFSC 4N031B—Oct 95

Provides advanced training in electroneurodiagnostic techniques. Includes an indepth study in neuroanatomy and neurophysiology of the human body as it relates to neurology; concepts of basic electricity; neurological disorders and how they affect neurodiagnosis; instrumentation and troubleshooting of the electroencephalogram and evoked potential averager; interpretation of basic wave patterns, normal variants, artifacts, and abnormal patterns and waveforms; clinical guidelines used in electroneurodiagnosis. Includes an introduction to nerve conduction, electromyography, video monitoring, telemetry, and polysomnography.

Prerequisites: Air Force personnel. Completion of courses J3AQR4N031 003, Medical Service Apprentice, J3AQP4N031B 000, Neurology Apprentice, or J5AQO4N031B 002, Neurology Apprentice - Phase II.

Reporting Instructions: Student will report to the Commanding Officer, Naval School of Health Sciences, Bethesda, MD, building 141, no later than 1500, 5 duty days before class start date. Further administrative support will be provided by the Commander, HQ Troop, Uniformed Services University of Health Sciences, Bethesda, MD.

Quota Control: HQ AETC/SGAW.

J3ACR4N071 003—Medical Service Craftsman - Resident—PDS Code XQD—Sheppard/2 wk—Oct 96

Mandatory course provides training to individuals assuming the responsibilities of a nursing unit/clinic NCOIC or assistant NCOIC. Areas of study include management skills with emphasis on staff development, counseling, duty schedules; selected Air Force correspondence; Air Force job descriptions and appraisals; resource management; Air Force manpower documents; and Air Force safety programs. Practical nursing instructions include identifying cardiac arrhythmias, auscultatory breath sounds, selected orthopedic procedures, and field triage. Course content correlates with the Joint Commission and Accreditation of Health Care Organizations (JCAHO), American Nurses Association (ANA) Standards, and Air Force publications.

Prerequisites: Must be staff sergeant and have successfully completed the Medical Service Craftsman readahead module. Literacy in both computer usage and basic typing skills is recommended. Completed 18 months of upgrade training for active duty; 12 months upgrade training for Air Force Reserve and Air National Guard.

Special Requirements: Service dress uniform is mandatory. Classroom attire includes any combination blue uniform 1 through 4. Wear of the Medical Service Badge is mandatory. Recommend students bring readahead module only. Textbooks are provided at course.

Quota Control: HQ AETC/SGAW.

J3AZR4N071 001—Medical Service Craftsman—PDS Code CFU—DOD 300—Sheppard/7 wk 2 days/MASL D175032—Dec 93

Provides training to individuals assuming the responsibilities of NCOIC or assistant NCOIC of a nursing unit or clinic. Areas of study include: human growth and development from conception to death as a basis for age-appropriate care; promoting biopsychosocial well-being of individuals and families, particularly during crisis; normal and abnormal function of all body systems; interventions for patients with impaired body systems; management skills, with emphasis on quality improvement, legal concepts, infection control, computer usage, and inservice presentations. Instruction is provided in the effective training and supervision of medical service technicians and specialists. Principles of advanced nursing care, based on nursing process theories, are introduced. Course content correlates with Joint Accreditation of Healthcare Organizations (JCAHO) and American Nurses Association (ANA) standards and Air Force regulations. Upon successful completion, the graduate is eligible for CCAF hours.

Prerequisites: Students with less that 6 months of NCOIC experience are recommended. Students must have 4 years of military service with at least 2 years of 4N051 experience; 6 months of experience in direct inpatient care is desirable. Students must be current in cardiopulmonary resuscitation training as directed in AFI 44-102 (formerly AFR 160-12). ECL 70.

Special Requirements: Classroom attire is any combination blue uniform, 1 through 4. Graduation attire is combination 1 blue uniform. Recommend a review of human anatomy and physiology prior to arrival. Recommend students bring a small calculator for use during the medical calculation lesson. Individuals who have completed J3AZR4N071 004, Medical Service Craftsman-Independent Duty, or J3AZR90720 004, Medical Service Technician-Independent Duty, courses are ineligible to attend.

Quota Control: HQ AETC/SGAW.

J3AZR4N071 004—Medical Service Craftsman-Independent Duty—PDS Code NN5—DOD 300—Sheppard/10 wk—Oct 96

Provides mandatory training for individuals from the 4N0X1 career field and for specially selected individuals of the 4F0X1 career field to operate a medical aid station at a remote or isolated duty location, to provide medical support to a non-medical field unit; or to provide medical support to other government agencies and joint service missions as directed by DoD. Instructions are provided for students to obtain a medical history, examine, assess for disorder, treat, and document patient care encounters in the absence of a physican. Includes training in emergency medical, dental, and surgical procedures to stabilize patient condition until evacuation for definitive care can occur. Provides general knowledge and procedural skill in medical administration, monitoring medical aspects of special interest program, health promotions, pharmacy, and medical laboratory. Also addresses procedures for conducting preventive medicine and food safety inspections in lieu of public health and bioenvironmental health personnel. Upon successful completion, the graduate is eligible for CCAF hours and NREMT continuing education hours.

Prerequisites: Minimum of 4 years' experience in 4N/4F0X1 career fields with a minimum of 24 months direct patient care experience. 4F0X1 personnel must be selected by the MAJCOM functional manager. SSgt through Msgt. Current NREMPT. Medically qualified to perform isolated or remote duty IAW AFI 48-123, A7.8. Member must also be interviewed by a mental helath officer and must have written statement clearing individual from history of substance abuse or emotional or behavioral problems. Certified in

IV therapy and suture skills. Qualified and licensed to operate an ambulance. Students must have a written statement from the senior 4N0X1 stating that they have met all prerequisites and are qualifed for duty as an independent duty medical technician. Students arriving without documentation of having met prerequisites will not be permitted to begin class. USCG and other military students must meet grade, NREMT, and IV therapy and suture skill requirements. Minimum experience and medical qualifications for isolated or remote duty requirements must be met by similar standards of each military member's respective service.

Special Requirements: Classroom attire is blue shirt, short or long sleeve. Field attire is BDUs or USCG work uniform. Overcoats or field jackets and gloves are recommended for winter wear. Knowledge of the metric system, medical terminology, medication administration, and human anatomy are recommended before attendance.

Quota Control: HQ AETC/SGAW.

J5AZN4N071 000—Dermatology Technician—PDS Code 9NH—San Diego/12 wk—Apr 96

Trains 4N0X1 personnel in the knowledge and skills required to prepare personnel to assist medical officers in all phases of care of skin disorders and sexually transmitted diseases. Includes instruction in bacteriology, serology, hematology, pathology, parasitology, general and special operating room procedures, recognition of the common dermatoses, carrying out of special dermatological treatment procedures, preparation of periodic reports and records, and study of staff and patient personnel relations.

Prerequisites: Must have completed course J5ABO4N031 000. Grade of SrA/SSgt with AFSC 4N0X1, minimum 5-skill level, with minimum of 3 years of experience as 4N0X1. Must be worldwide qualified. Members requiring medical attention, including pregnancy, shall not be transferred to the school. Must have approval of medical facility functional manager. Must have 2 years of retainability. Uniforms required: service dress/blues. ***NOTE:*** Graduates must be assigned only to hospitals with an assigned dermatologist.

Admin Instructions: Report to commanding officer, officer-of-the-day desk, Naval School of Health Sciences, bldg 14, San Diego CA 92134, NLT 1200, 1 duty day before class start date. Telephone: DSN 522-7827, commercial (619) 532-7827.

Quota Control: HQ AETC/SGAW.

J6ACS4N071 000—Medical Service Craftsman - Exportable—PDS Code XQC—various locations—Apr 96

Mandatory course that provides students with the task and subject knowledge required by the CFETP. It is a prerequisite to attend the 4N071 resident course (J3ACR4N071 003). Provides the student with a foundation of management skills geared to duties of the 4N071. Areas addressed are AFOSH, budgeting and manning, writing correspondence, computer skills, and counseling techniques. Also includes knowledge and theory on critical skills such as suturing lacerations, drawing blood gases, field triage, and skeletal traction, and assisting with complex procedures.

Prerequisites: Line number for SSgt, AFSC 4N051.

Quota Control: HQ AETC/SGAW.

J3AQR4N131 001—Surgical Service Apprentice—PDS Code R40—DOD 301—Sheppard/7 wk 2 day*/MASL D175051—Oct 96

Provides airmen with knowledge and skills necessary to perform sterile and non-sterile functions in the operating room when assisting the surgeon as scrub specialist or assisting the nurse in performing circulating duties; includes basic knowledge and techniques for preparing and processing sterile supplies and equipment, and in providing nursing care for patients in preparation for surgery, during surgery, and immediately after surgery in the post-anesthesia phase. This course is accredited by the Commission on Accreditation on Allied Health Education Program (CAAHEP). Graduates of the course are eligible to take the certifying examination of the Association of Surgical Technologists after completion of 5-level training. Course content complies with Joint Commission on Accreditation of Healthcare Organizations (JCAHO), American Nurses Association (ANA), and Association of Operating Room Nurses, American Heart Association (AHA) standards and Air Force instructions. With the successful completion of this course, the graduate is eligible for CCAF hours. This course serves as a prerequisite for courses J5ABO4N131 002, Surgical Service Apprentice - Phase II, J5AQO4N131C 000, Orthopaedic Surgical Apprentice - Phase II, and J5AQO4N131D 001, Otolaryngology Apprentice - Phase II.

Prerequisites: ECL 65 MS.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a training site.

Quota Control: HQ AETC/SGAW.

* Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J5ABO4N131 002—Surgical Service Apprentice - Phase II—PDS Code R3U—designated hospitals/6 wk/AFSC 4N131—Oct 95

This course is conducted under the authority of AFI 41-105. It follows the prerequisite Surgical Service Apprentice, J3AQR4N131 001, and provides airmen entering the Surgical Service Apprentice career field with 6 weeks of supervised clinical experience prior to the awarding of the 4N131 AFSC. Includes clinical practice in direct patient care, interpersonal communication skills, and hands-on experience for a variety of surgical specialties. Provides students with as much exposure to actual surgery as possible prior to their first duty assignment. Course content complies with Joint Commission on Accreditation of Healthcare Organizations (JCAHO), American Heart Association (AHA), Association of Operating Room Nurses (AORN) standards, Center for Disease Control (CDC) guidelines, and Air Force instructions. The course is conducted at various major USAF medical treatment facilities within CONUS. Graduates of this course will be awarded the 4N131 AFSC and be eligible for CCAF hours.

Prerequistes: Successful completion of course J3AQR4N131 001.

Reporting Instructions: Students report to the commander of the medical squadron section at the designated USAF hospital. Report not later than 1200 at least 1 day before class start date.

Quota Control: HQ AETC/SGAW.

J5ALN4N131B 000—Urology Surgical Service Apprentice—PDS Code 3FO—Portsmouth/16 wk/AFSC 4N131B—Oct 96

Prepares airmen for the duties of a urological surgical apprentice. Provides general knowledge of anatomy, medical terminology, care and handling of urology patients. Prepares airmen to assist with the

management of urology clinics, assist the physician in treatment of patients with urologic conditions or injuries. Provides pre-op and post-operative care specific to the speciality, and assit in minor and major surgery. Provides 10 weeks of supervised practice in the operating room with emphasis on procedures common to the specaility and in the clinic with emphasis on clinic procedures and administration management.

Prerequisites: Possess AFSC 4N151.

Reporting Instructions: Students report to CO, Naval School of Health Sciences, Portsmouth VA, NLT 1200 1 workday before class entry date.

Quota Control: HQ AETC/SGAW.

J5ABA4N131C 000—Orthopaedic Surgical Apprentice—PDS Code SZ3—Ft Sam Houston/6 wk/AFSC 4N131C—Oct 95

Prepares airmen for the duties of orthopaedic surgical apprentice. General knowledge of anatomy, medical terminology, care and handling of orthopedic patients. Assist with management of orthopedic clinics. Assist physician in treatment of patients with orthopedic conditions or injuries. Assist in minor surgery. Fabricate and modify casts. Apply plaster. Perform traction procedures.

Prerequisites: Air Force personnel. Completion of courses J3AQR4N131 001, Surgical Service Apprentice, J3AQP4N131C 000, Orthopaedic Surgical Apprentice, or J5AQO4N131C 000, Orthopaedic Surgical Apprentice - Phase II.

Reporting Instructions: Students will report to the Commander, Medical Squadron Section, at Wilford Hall Medical Center. Report not later than 0700 at least 2 duty days before class start date.

Quota Control: HQ AETC/SGAW.

J5AQO4N131C 000—Orthopaedic Surgical Apprentice - Phase II—PDS Code SZQ—designated locations/6 wk—Oct 95

This course is conducted under the authority of AFI 41-105. It follows the prerequisite Surgical Service Apprentice Course (J3AQR4N131 001). Provides airmen entering the surgical service apprentice career field with 6 weeks of supervised clinical experience. Includes clinical practice in direct patient care, interpersonal communication skills, and hands-on experience for a variety of surgical specialties. Provides students with as much exposure to actual surgery as possible before their first duty assignment. Course content complies with Joint Commission on Accreditation of Healthcare Organizations (JCAHO), American Heart Association (AHA), Association of Operating Room Nurses (AORN) standards, Center for Disease Control (CDC) guidelines, and Air Force regulations. Conducted at designated major Air Force medical treatment facilities within CONUS. Graduates will be eligible for CCAF hours.

Prerequisites: Successful completion of course J3AQR4N131 001.

Reporting Instructions: Students will report to the Commander, Medical Squadron Section, at the designated USAF hospital. Report not later than 1200 at least 1 day before class start date.

Quota Control: HQ AETC/SGAW.

J5ABN4N131D 000—Otolaryngology Surgical Apprentice—PDS Code 1TU—DOD 300—San Diego/12 wk 1 day/AFSC 4N131D—Oct 95

Prepares airmen to function as a clinical and surgical assistant to an otolaryngologist; do audio evaluation; maintain and care for specialized otolaryngolic instruments and equipment; diagnose and treat common, simple ear, nose, and throat disorders; and give pre- and post-operative patient care. Provides practice in the operating room with emphasis on the procedures common to this specialty, in audiology with emphasis on routine and specialized audiologic tests and procedures, and in the clinic with emphasis on clinic procedures and administration management.

Prerequisites: Must successfully complete course J3AQR4N131 001, Surgical Service Apprentice, course J3AQP4N131D 000, Otorhinolaryngology Apprentice, or J5AQO4N131D 001, Otolaryngology Surgical Apprentice - Phase II, before entry into this course.

Special Requirements: Students report with combination blues.

Reporting Instructions: Students report to CO, Naval School of Health Sciences, San Diego CA 92134, NLT 1200 one workday prior to class entry date.

Quota Control: HQ AETC/SGAW.

J3ACR4N171 002—Surgical Service Craftsman - Resident—PDS Code XQE—Sheppard/2 wk—Oct 96

This course provides mandatory upgrade training with 2 weeks of in-resident instruction before awarding of the AFSC 4N171. Includes advanced instruction in medical readiness, professional and patient relationships, and quality improvement/risk management. Provides students with hands-on practice in counseling, manpower management, budget and cost analysis, medical logistics, and infection control and safety. Course content complies with Joint Commission on Accreditation of Healthcare Organizations (JCAHO), Association of Operating Room Nurses (AORN) standards, Center for Disease Control (CDC) guidelines, and Air Force publications. Upon successful completion, the graduate is eligible for CCAF hours.

Prerequisites: Minimum grade of staff sergeant, AFSC 4N151, have completed 18 months of upgrade training, and successful completion of Read-Ahead Module (RAM).

Special Requirements: Classroom attire is any blue combination. Mandatory one set of BDUs, also.

Reporting Instructions: Report to the 383d Training Squadron Unit Personnel Office no later than 1200 at least 1 day before class start date.

Quota Control: HQ AETC/SGAW.

J3AQR4P031 001—Pharmacy Apprentice (Phase I)—PDS Code XPY—DOD 312—Sheppard/12 wk 4 days*/MASL D175035—Oct 96

Basic technical phases of pharmacy and the minimum essential knowledge and skills necessary for compounding and dispensing of drugs, chemicals, and biological products. Emphasis is placed on pharmaceutical math computations, computer information systems, outpatient dispensing, inpatient dispensing, intravenous admixture preparation, anatomy and physiology, and drug terminology.

Prerequisites: ECL 70.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

Quota Control: HQ AETC/SGAW.

* Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J5ABO4P031 000—Pharmacy Apprentice (Phase II)—PDS Code XPX—DOD 312—Lackland/3 wk/AFSC 4P031—Oct 96

Provides practical clinical training and experience in all aspects of pharmacy practice to include outpatient dispensing, inpatient dispensing, and medical logistics procedures.

Prerequisites: Successful completion of course J3AQR4P031 001, Pharmacy Apprentice (Phase I), before entry into this course.

Reporting Instructions: All students will report to Phase II student dormitory (bldg 10656). Report no later than 1600 at least one duty day prior to class start date. Students will report to the course supervisor, 59 Medical Wing (WHMC), room BM20, no later than 0700 the day following authorized travel day.

Quota Control: HQ AETC/SGAW.

J3ACR4P071 000—Pharmacy Craftsman—PDS Code 5K4—Sheppard/2 wk—Oct 96

Mandatory 7-level upgrade course which provides extensive management and supervision training needed for mid-level pharmacy NCOs. Also provides limited training on highly technical tasks to include updates and operations of latest pharmacy equipment. Other areas of study include pharmacy practice, supplies and pharmacy inventory control, sterile products, pharmaceutical dispensing, drug therapy, and pharmaceutical calculations.

Prerequisites: Minimum grade of SSgt and have completed exportable read-ahead module prior to arrival. Student will receive module 60 to 90 days prior to class start date. Supervisor and EST monitor will certify completion of read-ahead module prior to class start date. To obtain read-ahead module, contact training personnel at DSN 736-3846.

Reporting Instructions: Report to the 382d Training Squadron Unit Personnel Office (bldg 596) no later than 1200 at least 1 day prior to class start date. Uniform requirement is the service uniform.

Quota Control: HQ AETC/SGAW.

J5ASA4P071 000—Pharmacy Sterile Products Course—PDS Code 5VZ—Ft Sam Houston/2 wk—Oct 95

Provides pharmacy technicians and pharmacists with the technical knowledge in procedures and administrative functions involved in preparing sterile products. Emphasis is placed on the manufacturing of intravenous admixtures to include large volume parenterals, piggybacks, hyperalimentations, and cytotoxic preparations.

Prerequisites: Successful completion of the precourse self-paced exportable pharmaceutical calculations modules (provided by Academy of Health Sciences upon receipt of the enrollment application for this course).

Admin Instructions: Due to training requirements stated in the prerequisites, students arrive no less than 2 days before start date through appropriate channels to the Commandant, Academy of Health Sciences, Pharmacy Branch, Ft Sam Houston TX 78234-6100.

Quota Control: HQ AETC/SGAW.

J3AQR4R031 000—Diagnostic Imaging Apprentice (Phase I)—PDS Code AS6—DOD 313—Sheppard/14 wk*/MASL D175033—Oct 96

Theory of basic electricity, atomic theory, production of X-rays, radiographic technique, radiographic film and chemical processing, radiographically oriented anatomy and physiology; theory of, and practice in operation of fixed and mobile radiologic equipment; routine and special radiographic positioning; theory of, and practice in accomplishment of, special radiographic techniques; and introduction to special radiographic procedures and the associated equipment.

Prerequisites: Students must be 18 years of age prior to entry into course. Successful completion of an Algebra course. ECL 70.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

Admin Instructions: All students entering this course must attend the 38-week Phase II course, J5ABO4R031 001. Airmen meeting admission requirements may take part in the associate degree program at Midwestern State University, Wichita Falls TX. Information concerning the associate and baccalaureate degree programs available in conjunction with this course may be obtained from Division of Health Sciences, Midwestern State University, 3400 Taft Blvd, Wichita Falls TX 76308, 1-800-MSU-RADS.

Quota Control: HQ AETC/SGAW.

* Four days of course consist of course J3AQR40030 002, Basic Medical Readiness.

J5ABO4R031 001—Diagnostic Imaging Apprentice (Phase II)—PDS Code QPN—DOD 313—designated hospitals/38 wk/AFSC 4R031—Oct 96

Provides practical clinical training and experience in nursing, orthopedic, and surgical procedures; department administration; film processing and exposure techniques; bedside and surgical radiographic procedures; night emergency call; and proficiency training in radiologic technology and radiation protection.

Prerequisites: Graduate of J3AQR4R031 000, Diagnostic Imaging Apprentice (Phase I). Course is open to active duty airmen, ANG, and Reserve.

Unit of Assignment: Designated hospitals.

NOTE: Completion of course J3AQR4R031 000 and J5ABO4R031 001 satisfies 1 year of the 2-year JRCERT accredited program. The second year of informal training may be accomplished at any Phase-III-qualified Air Force medical facility with a full time radiologist on its staff. Assignment to a Phase III site is not guaranteed. Upon completion of the full 2-year training period, the individual may apply to the 381st Training Squadron for a training record evaluation and quality control testing. Satisfactory completion of the 24-month Air Force JRCERT accredited radiologic technology training program fulfills the academic and experience requirements for application to test for certification through the American Registry of Radiologic Technologists (ARRT).

Reporting Instructions: Students report to Phase II site NLT 10 duty days (plus permitted travel) after graduation from Phase I or NLT 0730, 2 duty days before class start date, whichever is sooner. Early reporting is authorized.

Quota Control: HQ AETC/SGAW.

J5ALN4R031A 000—Nuclear Medicine Journeyman—PDS Code Q3W—DOD 311—Bethesda/19 wk 4 days—Oct 96

Didactic phase (Phase I) of training provides instruction on principles of mathematics, chemistry, and physics as applied to field of nuclear medicine; preparation and uses of radiopharmaceuticals; radiation detection, effects, dose calculation and safety; hemotologic and radionuclide dilution procedures and protocol; techniques and procedures of gastrointestinal and organ concentration-excretion measurements; imaging techniques and procedures; radioassy and radiation therapy procedures.

Prerequisites: Grade E-4 or above, on second or subsequent enlistment, have AFSC 4R051 with at least 1 year of experience and 36 months retainability, be eligible for testing by ARRT, and be eligible to retrain according to AFI 36-2204 (formerly AFR 39-4). Successfully complete a preemployment radiation physical examination as described in AFR 160-132, *Control of Radiological Health Hazards*.

Admin Instructions: Students attend this course TDY en route to the 36-week Phase II course J5ALO4R031A 000, at a designated Air Foce medical facility.

Reporting Instructions: Student will report to the Commanding Officer, Naval School of Health Sciences, Bethesda MD, building 141, no later than 1500 2 duty days prior to class start date. Further administrative support will be provided by the Commander, HQ Troop, Uniformed Services University of Health Sciences, Bethesda MD.

Quota Control: HQ AETC/SGAW.

J5ALO4R031A 000—Nuclear Medicine Journeyman—PDS Code GAH—DOD 311—designated hospitals/32 wk 1 day/AFSC 4R031A—Oct 96

Clinical phase (Phase II) of training. Develops the skills required to operate radionuclide imaging and detection devices and to assist medical officers in preparing and administering radiopharmaceuticals and in organizing and administering radionuclide imaging service. Provides instruction in math used in working with radionuclides, computer methods, general chemistry, clinical practices, laboratory procedures, radiochemistry, nuclear physics, and health physics.

Prerequisites: Graduate of course J5ALN4R031A 000, Nuclear Medicine Journeyman (Phase I), at the National Medical Training Center, Bethesda MD.

Quota Control: HQ AETC/SGAW.

J3ACR4R071 000—Diagnostic Imaging Craftsman—PDS Code XJH—Sheppard/2 wk—Oct 96

Provides advanced management and supervisory training for all active-duty, guard and reserve. For staff sergeants, includes specific diagnostic imaging management and supervisory issues such as career ladder progression, operation security (OPSEC), Air Force Occupational Safety and Health (AFOSH) standards, supervision of military and non-military personnel, personnel training, supply and equipment budgeting, professional ethics, radiology service administration, and technical and regulatory overview of shredouts and special experience identifiers (SEIs). Upon successful completion, the graduate is eligible for CCAF hours and upgrade to the 7 skill level.

Prerequisites: Minimum grade of staff sergeant, AFSC 4R051, and have completed 18 months of EST.

Special Requirements: Classroom attire is any service (blue) combination. Recommend one set of BDUs also.

Quota Control: HQ AETC/SGAW.

J5AZO4R031B 000—Diagnostic Ultrasound—PDS Code PXZ—Lackland*/8 wk/AFSC 4R031B—Oct 96

Provides diagnostic ultrasound training designed to satisfy the short course criterion for award of SEI 488, Diagnostic Ultrasound Technician. Training includes principles of diagnostic ultrasound; basic scanning procedures; and performance of obstetrical, pelvic, abdominal, thyroid, breast, and testicular scans.

Prerequisites: Grade E-4 or above, AFSC 4R051 or higher with at least 1 year of experience as a radiologic specialist or technician, on second or subsequent enlistment, registry eligible or certified by the ARRT, and recommended for training by the Chairman, Department of Radiology.

Quota Control: HQ AETC/SGAW.

J3AQR4T031 000—Medical Laboratory Apprentice (Phase I)—PDS Code FCO—DOD 311—Sheppard/17 wk*/MASL D175034—Oct 95

Basic theory and skills, collection, preparation, and analysis of blood and biological fluids and other substances by standard procedures used in medical laboratories to aid the physician in the diagnosis, treatment, and prevention of disease. Emphasis on routine methodology employed in the fields of urinalysis, hematology, blood banking, immunology, clinical chemistry, bacteriology, mycology, and parasitology. Introduction to medical laboratory automated data processing and workload reporting.

Prerequisites: High school or college algebra and chemistry are required—not waiverable. Normal color vision as defined in AFI 48-123 is mandatory. ECL 70.

Special Requirements: All prior service enlistees and retrainees entering the course must attend the 36-week Phase II course J5ABO4T031 000. All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

Quota Control: HQ AETC/SGAW.

* Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J5ABO4T031 000—Medical Laboratory Apprentice (Phase II)—PDS Code E9Z—DOD 311—designated hospitals/36 wk/AFSC 4T031/MASL D175094—Apr 95

Uses actual patient specimens and simulated specimens to perform fundamental techniques used in a medical laboratory. Students develop an understanding of routine lab procedures and are trained to perform basic lab tests with minimum of supervision. In addition, they gain knowledge of medical subjects to the extent necessary for their effective performance of duty as medical lab specialists. Emphasis on the proper collection, processing and analysis of specimens, and accurate reporting of results in urinalysis, hematology, blood banking, immunology, clinical chemistry, bacteriology, mycology, and parasitology. Emphasis on medical laboratory automated data processing and workload reportlng.

Prerequisites: Graduate of J3AQR4T031 000. ECL 70.

Unit of Assignment: Designated hospitals.

Quota Control: HQ AETC/SGAW.

J3AQR4T032 000—Histopathology Apprentice—PDS Code 2LA—Sheppard/17 wk*—Dec 93

Basic theory and skills in medical laboratory procedures to aid the physician in diagnosis, treatment, and prevention of disease. Emphasis on routine methodology employed in the fields of urinalysis, hematology, blood banking, serology, clinical chemistry, bacteriology, mycology, and parasitology.

NOTE: This course is a prerequisite and furnishes general medical laboratory training for students scheduled to attend course J5ABD4T032 000 at the Armed Forces Institute of Pathology, Washington DC. Personnel who have completed course J3AQR4T031 000 (Phase I) (previously J3ABR90430 000) are ineligible to attend this course.

Prerequisites: ECL 65 MS.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE).

*Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J5ABD4T032 000—Histopathology Apprentice—PDS Code 3EA—Armed Forces Institute of Pathology/20 wk/AFSC 4T032—Dec 93

Provides training necessary to perform the duties of histopathology specialist as outlined in AFMAN 36-2108 (formerly AFR 39-1). Students receive training in overall operation of pathology laboratory. Major areas of study: process specimens and slides for histologic study; histochemistry and special tissue stains; assists in autopsies; and performs histopathology administration.

Prerequisites: Graduate of course J3AQR4T032 000, Histopathology Apprentice. ECL 65 MS.

Special Requirements: This training environment is considered “high risk” and pregnant personnel should not be enrolled in this course according to AFIP Policy Statement PD-2-85, 14 May 1985.

Quota Control: HQ AETC/SGAW.

J5ABA4T033 000—Cytotechnology Apprentice—PDS Code T43—Brooke Army Medical Center/52 wk/AFSC 4T033—Jun 94

Study of cells and changes caused by disease conditions. Determines typical cells through systematic microscopic slide examination. Stains cytology specimens. Examines body fluids and prepares smears, cell blocks, and microporous filters. Interprets cytologic changes. Refers all abnormal findings to the pathologist for review.

Prerequisites: Normal color vision and completion of 60 college semester hours, to include 20 semester hours in biological sciences, is mandatory for entry. University of Oklahoma, Health Science Center, requires 10 hours of chemistry and 3 hours of math.

Special Requirements: Duty uniform is whites or BDUs.

Admin Instructions: Students are assigned PCS to 59th Medical Wing, Squadron A, Wilford Hall Medical Center, PAS: LAOJFWLG, with 52 weeks of duty at Brooke Army Medical Center, Ft Sam Houston TX. Orders will indicate “For attendance of course J5ABA4T033 000 (Army course 311-91E20), Cytotechnology Specialist, at Brooks Army Medical Center, Ft Sam Houston TX.” Students will report to 59th Medical Wing, Squadron A, bldg 3350, rm 35, Wilford Hall Medical Center, Lackland AFB TX, no later than 1200, 2 duty days before class start date. Then report to bldg 2376, rm 31 south, cytology classroom, no later than 0730 on class start date.

Quota Control: HQ AETC/SGAW.

J3ACR4T071 000—Medical Laboratory Craftsman—PDS Code 282—Sheppard/2 wk—Oct 96

Mandatory 7-skill level course which provides extensive management, administrative, and supervision training needed for mid-level medical laboratory NCOICs. Also provides training in medical material procedures to include procurement and management of equipment and supplies. Other areas of study include work load data reports, quality improvement, quality control, accreditation and regulatory agencies, cost accounting, manpower, and new technologies.

Prerequisites: SSgt with 18 months of time in grade and have completed courses 92470A, 92470B, and 92470C.

Reporting Instructions: Report to the 382d Training Squadron unit personnel office (bldg 596) no later than 1200 at least 1 day before class start date. Uniform requirements will be service uniform.

Quota Control: HQ AETC/SGAW.

J5ABO4U031 000—Orthotic Apprentice—PDS Code WSJ—DOD 304—WHMC, Lackland/50 wk/AFSC 4U031—Jun 94

Provides training in the USAF Medical Service professional ethics and patient relationships as they pertain to the orthotic career field. Includes instruction in basic anatomy, kinesiology, physiology, and treatment for pathophysiological conditions. Trains students in interpretation of prescriptions for treatment; identification and safe use of orthotic equipment and supplies; taking measurements and making tracings; preparing negative and positive plaster of paris molds; fabricating and fitting upper, spinal, and lower extremity orthoses out of metal, plastic and/or leather; locating and identifying bony landmarks to insure proper fit of orthoses; fabricating and fitting molded foot orthoses; shoe modifications; and fitting soft-good/modular orthoses. Students will also complete requirements for CPR certification.

Quota Control: HQ AETC/SGAW; 2 AF/DOPR controls active duty USAF student selections.

J3ABR4V031 001—Optometry Apprentice—PDS Code 42H—Sheppard/10 wk 2 days*/AFSC 4V031—Oct 95

Basic ocular anatomy and physiology, basic visual physiology, vision classification, basic optics, use and maintenance of optometric testing equipment, medical ethics, clinic asepsis, ocular photography, keratometry, visual field testing, electronic ordering of spectacles, and ocular referrals. The course prepares the student to perform visual screening tests, assist in examining and treating patients, assist in preparing and fitting spectacles, assist in fitting contact lenses, to perform eyewear prescription order, verification, and dispensing duties, and to perform related administrative duties.

Special Requirements: All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes two overnight stays

and consumption of meals ready to eat (MRE).

Quota Control: HQ AETC/SGAW.

* Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J3ALR4V031A 000—Ophthalmology Apprentice—PDS Code 370—Sheppard/6 wk 3 days/AFSC 4V031A—Oct 96

Provides airmen with knowledge and skills necessary to perform sterile and nonsterile functions in the operating room when assisting the ophthalmologist. Includes basic knowledge and techniques for preparing and processing sterile supplies and equipment, and in providing care for patients in preparation for surgery, during surgery, and immediately after surgery in the post-anesthesia phase. This course is accredited by the Committee on Allied Health Education and Accreditation (CAHEA). Course content complies with Joint Commission on Accreditation of Healthcare Organizations (JCAHO), American Nurses Association (ANA), and Association of Operating Room Nurses, American Heart Association (AHA) standards and Air Force instructions. With the successful completion of this course, the graduate is eligible for CCAF hours.

Prerequisites: Retrainees from AFSC 4V051.

Quota Control: HQ AETC/SGAW.

J3ABR4Y031 002—Dental Assistant Apprentice—PDS Code ZHP—DOD 330—Sheppard/9 wk 3 days*/AFSC 4Y031/MASL D175026—Jan 96

Provides training for personnel to accomplish duties and responsibilities required to assist in basic dental treatment procedures: oral and dental anatomy; material; infection control procedures; sterilization and disinfection of instruments; dental health procedures; radiology to include safety and radiographic techniques; care of dental instruments and equipment; dental administrative procedures; restorative, specialty, and surgical dentistry; patient motivation; and assisting the dental officer. Graduates of this course will be awarded the 4Y031 AFSC and will be eligible for CCAF hours.

Prerequisites: Must be 18 years of age to enter course.

Special Requirements: TDY personnel must bring service dress, light blue shirt or blouse with short sleeves, and service cap or hat. Ribbons and specialty badges are encouraged. All airmen entering 3-skill level courses will attend course J3AQR40030 002, Basic Medical Readiness. BDUs, combat boots, and field jacket (with liner appropriate for the season) are required. Organizational headgear is NOT permitted. Instruction is conducted in a field training site and includes consumption of meals ready to eat (MRE). White shoes with the medical white uniform are optional. If worn, they will conform with guidelines in AFI 36-2903 (formerly AFR 35-10). Medical whites and safety glasses will be issued. Guard/Reserve personnel refer to Chapter 3, AETC Procedures and Instruction, paragraph e, STTC.

Quota Control: HQ AETC/SGAW.

* Four days of the course consist of course J3AQR40030 002, Basic Medical Readiness.

J3ALR4Y032 000—Dental Laboratory Apprentice—PDS Code 7PE—Sheppard/24 wk/AFSC 4Y032/MASL D175038—Jan 96

Provides fundamental instruction for procedures accomplished in Air Force dental laboratories. Includes training on complete denture fabrication, acrylic base reline and repair, fabrication of orthodontic appliances and specialized prostheses, removable partial denture fabrication, crown and fixed partial denture fabrication and dental ceramics.

Prerequisites: Must have attained a 5-skill level from the dental assistant AFSC (4Y051). Normal color vision and normal depth perception are required. Minimum score of 64 on the Armed Services Vocational Aptitude Battery (ASVAB) general aptitude is mandatory. Dental journeymen who meet the qualification prerequisites should apply through their MPF. ECL 70.

Special Requirements: AF Form 422, **Physical Profile**, must include statement to verify member has normal color vision and normal depth perception before member enrolls in the course.

Quota Control: HQ AETC/SGAW.

J3ACR4Y071 000—Dental Craftsman—PDS Code 288—Sheppard/2 wk—Oct 96

Provides career NCOs with advanced training in dental clinic administration, supervision, and training skills. Includes career progression, professional and patient relations, dental administration, medical materiel, supervision, and training. It is necessary to attend this course before award of the 7-skill level, dental craftsman.

Prerequisites: AFSC 4Y051, SSgt or higher on second or subsequent enlistment. Journeyman must be certified on all core task and duty position training *not* provided by AETC formal training. Complete at least 18 months of on-the-job training.

Special Requirements: Report with three blue uniforms (long or short sleeve), tie or tie tab, and one BDU. Ribbons and medical badge are encouraged. One 3.5-inch computer disk, one calculator, and an OJT record.

Quota Control: HQ AETC/SGAW.

J5AZO4Y071 000—Periodontal Therapist Course—PDS Code F5U—Lackland/4 wk—Mar 94

Trains personnel in the didactic and clinical skills necessary to assist the base periodontist in the treatment of periodontal disease and maintenance. Trainee makes appropriate referrals for oral lesions, documents periodontal status via various charts, educates patients in disease cause and control, fully scales and rootplanes teeth, and manages and organizes a periodontal maintenance program.

Prerequisites: SrA or above (4Y051 or higher) assigned to a base with a periodontist and committed to or already in second enlistment. A minimum of 12 months retainability at base with periodontist, a strong motivation toward periodontics, and proven aptitude in accomplishing scaling. Experienced in basic preventive dentistry procedures.

Application Procedures: Nominations through MAJCOMs to HQ AFPC/DPMMUD, Randolph AFB TX 78150-4729.

Quota Control: HQ AFPC/DPMMUD.

J5AZO4Y071 003—Advanced Oral Hygiene—PDS Code O0P—Lackland/4 wk 4 days—Oct 96

Trains personnel in the didactic and clinical skills required to provide oral prophylaxis and to establish a local dental hygiene training program. Introduces the various skills and tools required to treat periodontally compromised patients. Trainee makes appropriate referrals for oral lesions, records oral health status via various indexes and forms, educates patients in disease causes and control.

The ability to provide a comprehensive oral prophylaxis and scaling and root planing will be measured through various patient encounters.

Prerequisites: SrA or above (4Y051 or higher) career airman. A minimum 12 months retainability, a strong motivation toward dental health and proven aptitude in scaling. Experienced in basic preventive dentistry procedures.

Special Requirements: All students will report with three blue uniforms (long or short sleeved), one battle dress uniform, and four sets of utility uniforms (whites). Ribbons and medical badge are encouraged.

Quota Control: HQ AETC/SGAW.

J3ACR4Y072 000—Dental Laboratory Craftsman—PDS Code 223—Sheppard/2 wk—Oct 95

Provides career NCOs with advanced training in dental clinic administration, supervision, and training skills to include laboratory fabrication standards, quality of prosthodontic casework, laboratory workload, reports and correspondence, dental laboratory administration files, medical materiel and performance standards, and training needs and programs.

Prerequisites: AFSC 4Y072, SSgt or higher on second or subsequent enlistment. Journeyman must be certified on all core task and duty position training *not* provided by AETC formal training. Complete at least 18 months of on-the-job training.

Special Requirements: Report with three blue uniforms (long or short sleeve) and one BDU. Ribbons and medical badge are encouraged.

Quota Control: HQ AETC/SGAW.

J3AZR4Y072 011—Removable Prosthodontics—PDS Code 71U—Sheppard/3 wk 3 days—Oct 96

Supplemental advanced career training for dental laboratory technicians on complete denture and orthodontic prostheses. Instruction includes studies of oral anatomy and physiology, occlusion, articulation, bilaterally balanced and lingualized tooth arrangements, fully characterized denture bases, overdenture fabrication, acrylic processing, removable and fixed orthodontic appliances.

Prerequisites: Hold and have performed duties in AFSC 4Y052 for at least 12 months immediately preceding the course and have 1 year of retainability following graduation. Prior qualification training in this specialty (knowledge and performance) to the 5-skill level in order to meet training requirements.

Special Requirements: All students report with protective eyewear; also, any blue uniform combination for graduation. Waxing and porcelain stacking kits are provided. Students are encouraged to bring their personal instruments.

Quota Control: HQ AETC/SGAW.

J3AZR4Y072 012—Functional and Esthetic Fixed Prosthodontic—PDS Code 71V—Sheppard/6 wk—Oct 96

Supplemental advanced career training for dental laboratory technicians. This course is divided into two general areas: fabrication of full gold restorations, and fundamental instruction on metal-ceramic restorations. Instruction includes studies of oral anatomy and physiology, occlusion, articulation, functional anatomic wax-ups, casting production, soldering, semi-precision attachments, and all aspects of fabricating porcelain-fused-to-metal prostheses.

Prerequisites: Hold and have performed duties in AFSC 4Y052 for at least 12 months immediately preceding the course and have 1 year of retainability following graduation. Prior qualification in fabricating full gold restorations (knowledge and performance) to the 5-skill level in order to meet training requirements.

Special Requirements: All students report with protective eyewear; also, any blue uniform combination for graduation. Waxing and porcelain stacking kits are provided. Students are encouraged to bring their personal instruments.

Quota Control: HQ AETC/SGAW.

J3AZR4Y072 013—Advanced Porcelain Techniques—PDS Code 71W—Sheppard/3 wk 4 days—Oct 96

Supplemental advanced career training for dental laboratory technicians on metal-ceramic and full porcelain restorations. Instruction includes studies of dental alloys, substructure fabrication, dental ceramics, porcelain application with emphasis on intrinsic color modifications, full porcelain crowns, and porcelain laminate veneers.

Prerequisites: Technicians attending the course must be competent in the fabrication of basic single and multiple unit metal-ceramic restorations with 1 year of retainability following graduation. Prior attendance in the Dental Ceramics Course, J3AZR98270 007, or the Functional and Esthetic Fixed Prosthodontics Course, J3AZR98270 012 (J3AZR4Y171 012 and J3AZR4Y072 012). Previous experience must include a minimum of 4 years in fixed prosthodontics, of which two must be in dental ceramics.

Special Requirements: All students report with protective eyewear; also any blue uniform combination for graduation. Waxing and porcelain stacking kits are provided. Students are encouraged to bring their personal instruments.

Quota Control: HQ AETC/SGAW.

J5AZO4Y072 000—Implant Laboratory Technology Course—PDS Code J38—Lackland/1 wk—Oct 96

Advanced instruction for the experienced dental laboratory technician in the most current, effective, and high quality osseointegrated (implant) dental laboratory techniques and procedures. The attendee becomes familiar with the components and armamentarium used in the fabrication of intraoral implant prosthesis. Attendees will be introduced to prosthodontic clinical techniques used for implant diagnosis and treatment planning. Course participants will retain their implant projects to serve as local training aids.

Prerequisites: Hold AFSC 4Y171, have performed duties in AFSC 4Y171 for at least 12 months immediately preceding the course, and have 1 year of retainability following graduation.

Special Requirements: Bring protective eyewear.

Quota Control: AFPC/DPMMED.

J3AQR40030 002—Basic Medical Readiness—PDS Code V7Q—Sheppard/4 days—Apr 96

Provides all active duty, AFRES, and ANG attending 3-level medical AFSC-awarding courses at the 882d Training Group with an overview of their role in providing combat medical support and generalized training in the skills and knowledge required to perform basic medical tasks during field operations. Due to field conditions, the purchase and consumption of meals ready-to-eat (MRE) is required. Subject training includes the Air Force medical wartime

mission and concept of operations; field care of casualties to include hemorrhage control, treatment for shock, management of specific wounds, burns, and fractures, and combat stress; principles of triage; transportation of the sick and injured; medical aspects of conventional, nuclear, biological, and chemical warfare; individual and casualty decontamination use of chemical protection equipment (including confidence chamber); familiarization with deployable medical facilities. Personnel attending this course can be exempt from continuing medical readiness training (CMRT) for the calendar year of completion (AFI 41-106).

Special Requirements: BDUs (minimum two sets), combat boots, and field jacket (with liner appropriate to the season) are required. Organizational headgear is not permitted. Electrical devices are not permitted in the field.

Defense Management Education and Training (DMET) Courses

The DMET catalog (DOD Catalog 5010.16-C) requires DD Form 1556 nominations for all Defense Management Education and Training courses. Instructions for completing the form are found in Chapter 1 of that catalog.

National Defense University

Information Resources Management College (IRMC)

The IRMC is the capstone institution for Defense IRM education. As such, it provides graduate-level courses in information resources management. Training is conducted at the IRMC, Marshall Hall, bldg 62, Ft McNair DC. Listed below are USAF course numbers, PDS codes, and titles:

AF Course No.	PDS Code	IRMC Course No.	Course Title
E5OZD33S4 000	PCM	AMP	Advanced Management Program (80 days)
E5OZD33S4 007	R68	EXD	Executive Decision-Making Strategies (3 days)
E5OZD33S4 010	XH2	IBW	Intermediate Information Technologies (5 days)
E5OZD33S4 012	XPE	EIT	Emerging Information Technologies (3 days)
E5OZD33S4 021	385	PIA	Public Policy for the Information Age (3 days)

Defense Resources Management Education Center Courses

The Defense Resources Management Education Center courses are conducted at the Naval Postgraduate School, Monterey, CA. Descriptions, prerequisites, and administrative procedures are in Defense Management Education and Training Catalog, DOD 5010.16-C. Listed below for cross-reference to that catalog are the USAF course numbers, PDS codes, and titles.

AF Course No.	PDS Code	Course Title
L5OZN6916 000	MMZ	Defense Resources Mgt

Army Management Engineering College (AMEC) Courses

The U.S. Army Management Engineering College (AMEC), located at Rock Island, IL 61299-7040, conducts courses in management engineering which are available to selected Air Force personnel. Course descriptions, prerequisites, and administrative procedures are in the Defense Management Education and Training Catalog, DOD 5010.16-C. AMEC course numbers and titles with corresponding Air Force course numbers and PDS codes are listed below for cross-reference to that catalog.

US Army Logistics Management College (USALMC) Courses

The US Army Logistics Management College (USALMC), Fort Lee VA 23801, conducts courses in wholesale logistics which are available to selected Air Force personnel. Course descriptions, prerequisites, and administrative procedures are in the Defense Management Education and Training Catalog, DOD 5010.16-C. USALMC course numbers and titles with corresponding Air Force course numbers and PDS codes are listed below for cross-reference to that catalog.

AF Course No.	PDS Code	USALMC Course No.	Course Title

NOTE: Type 6 medical courses are listed in this chapter under the section titled Medical and Dental, 882 Training Group.

E6ADL2A1X2 033—KC-135R Avionics GAC Sys (FCAS) Flight Control Augmentation Sys (I/M)—PDS Code QC2—location: user's site/36 hrs—Oct 95

Provides training in knowledge and skills to use flight control augmentation system (FCAS) computer test set, associated test equipment, and FCAS computer to perform FCAS computer bench check. Training also includes system theory of operation, interior computer monitors and built-in test, and required test equipment and

tools.

Prerequisites: AFSC 2A1X2 or equivalent.

Quota Control: 2 AF/DOP.

J6ADL2A3X3A 007—F-15 Aircraft Maintenance Orientation—PDS Code UY0—location: user's site/27 hrs—Jan 96

Provides training on the F-15 technical order system, aircraft safe for maintenance procedures, location of aircraft protection devices, and location of danger areas. Also provides insight to the following systems: egress, canopy, hydraulic, electrical (normal and emergency), environmental control, high pressure water separator, bleed air, flight control, automatic flight control, landing gear, nose wheel steering, arresting gear, wheel brake and anti-skid, fuel, air inlet, engine starting, engine, fire/overheat, armament, attack control, communication/navigation, and instrument.

Prerequisites: SSgt or higher, an officer, or DoD civilian equivalent.

J6ADL2A3X3A 016—F-15 Tactical Aircraft Maintenance Journeyman/Craftsman (Pneud)—PDS Code UFE—location: user's site/62 hrs—Jan 96

Provides training on the hydraulic power system, hydraulic-powered subsystems, landing gear and related subsystems, flight control system, and hydraulic system maintenance.

Prerequisites: Must have a minimum of 6 months of F-15 experience.

Special Requirements: Computer-based instruction workstation and technical orders 1F-15( )-2-29FI-00-1, 1F15( )-2-29GS-00-1, 1F-15( )-2-29SD-00-1, 1F-15( )-2-00GV-00-1, 1F-15( )-2-21GS-00-1, 1F-15( )-2-21SD-00-1, 1F-15( )-2-28GS-00-1,1F-15( )-2-28SD-00-1, 1F-15( )-2-71GS-00-1, 1F-15( )-2-71SD-00-1, 1F-15( )-2-80GS-00-1, 1F-15( )-2-80SD-00-1, 1F-15( )-2-95GS-00-1, 1F-15( )-2-95SD-00-1, 1F-15( )-2-32GS-00-1, 1F-15( )-2-32SD-00-1, 1F-15( )-2-32FI-00-1, 1F-15( )-2-22GS-00-1, 1F-15( )-2-27GS-00-1, 1F-15( )-2-27SD-00-1, 1F-15( )-2-05JG-00-1, 1F-15( )-2-05JG-10-1, 1F-15( )-2-29JG-00-1, 1F-15( )-2-29JG-10-1.

J6ADL2A3X3B 017—F-16 Tactical Aircraft Maintenance Technician (F-110-GE-129 OM Difference)—PDS Code WRA—location: user's site/14 hours—Jan 96

Provides training for Air Force personnel with AFSC 2A3X3B to perform organizational maintenance on the F-110-GE-129 engine. Training is directed toward the identification of engine components, engine systems, and operational principles.

Prerequisites: Complete course J3AQR2A333B 000 or equivalent.

Special Requirements: Technical order 1F-16CJ-2-70GS-00-1 should be available in the classroom.

E6ADL2A5X1X 005—C-130 Self-Contained Navigation System (SCNS)—PDS Code 4ZV—location: user's site/duration: 3 hrs—Oct 95

Provides training on the SCNS system description, on-aircraft SCNS initialization procedures, tuning of all communication radios, and accessing maintenance pages.

Prerequisites: Information required for the performance of aircraft-related duties.

J6ADL2A6X1A 027—KC-135R Quick Start Auxiliary Power Unit System (QSAS)—PDS Code 5P8—location: user's site/20 hrs—Jan 96

Provides training on the KC-135R Quick Start Auxiliary Power Unit System (QSAS). Includes identifying facts and general principles of the enclosure and equipment cabinet, engine system components, electrical power system components, QSAS operation, and engine removal and installation.

Prerequisites: Should have a minimum of 6 months of KC-135R aircraft experience and basic QSAS knowledge.

J6ADL2A6X5 017—KC-135R Pneudraulic System Repair Tech (Diff)—PDS Code 6ZS—location: user's site/9 hrs—Jan 96

Provides training on the KC-135R pneudraulic system for those students already familiar with the KC-135A. Includes identifying the modifications of the hydraulic power supply system, hydraulic main landing gear system, hydraulic flight control system, and quick start auxiliary power unit hydraulic system.

Prerequisites: Should have a minimum of 6 months of experience on the KC-135A or completion of course J4AMF/ASF/AST2A6X5 016.

J6AGL2A3X3A 012—F-15 Tactical Aircraft Maintenance Journeyman/Craftsman (Adv C/C)—PDS Code 64G—location: user's site/64 hrs—Jan 96

Provides training on the organizational maintenance manual set. Also provides training on the facts and principles of the following aircraft systems: emergency escape, canopy, ejection, electrical power, hydraulic, landing gear, flight control, automatic flight control, fuel, weapons, environmental control, engine starting, engine, fire control, instrument, and comm/Nav/TEWS. Facts and principles of weight and balance are also included.

Prerequisites: Possession of AFSC 2A3X3A and a minimum of 6 months of experience on the F-15 aircraft.

Special Requirements: Computer-based instruction workstation and technical orders: 1F-15( )-2-00JG-00-1, 1F-15( )-2-00GV-00-1, 1F-15( )-4-1, 1F-15( )-4-3, 1F-15( )-4-5, 1F-15( )-4-7, 1F-15( )-2-( )SD-( )-1, 1F-15( )-2-( )WD-( )-1, 1F-15( )-2-21GS-00-1, 1F-15( )-2-21-SD-00-1, 1F-15( )-2-22GS-00-1, 1F-15( )-2-23GS-00-1, 1F-15( )-2-24GS-00-1, 1F-15( )-2-27GS-00-1, 1F-15( )-2-27SD-00-1, 1F-15( )-2-28GS-00-1, 1F-15( )-2-28SD-00-1, 1F-15( )-2-29GS-00-1, 2-29SD-00-1, 2-32GS-00-1, 1F-15( )-2-32SD-00-1, 1F-15( )-2-33GS-00-1, 1F-15( )-2-34GS-00-1, 1F-15( )-2-35GS-00-1, 1F-15( )-2-71GS-00-1, 1F-15( )-2-71SD-00-1, 1F-15( )-71GS-01-1, 1F-15( )-2-71GS-02-1, 1F-15( )-2-80GS-00-1,1F-15( )-2-80SD-00-1, 1F-15( )-2-94GS-00-1, 1F-15( )-2-95GS-00-1, 1F-15( )-2-99GS-00-1, 13A5-56-11.

E6AGL2A4X1 002—KC-135R Avionics GAC Technician (O/M)—PDS CODE QC1—location: user's site/28 hrs—Oct 96

Consists of two parts: video teletraining and computer-based training. Video teletraining consists of identifying facts and principles about turbine engine monitoring systems, air data computers, instruments, and flight control augmentation systems (total of 24 hours) system. Course is incomplete without the videoteletraining part. The computer-based training provides simulated operational checkout of the flight control augmentation (total of 4 hours).

Prerequisites: AFSC 2A4X1 or equivalent.

Quota Control: 2 AF/DOP.

E6AGL2A4X1 048—C-12 Compass System Technician (O/M)—PDS Code W67—location: user's site/35 hrs—Oct 96

Consists of both video teletraining and computer-based training. The

videoteletraining is given first and provides training on the operating characteristics of the C-12 compass systems and compass swing procedures. Includes a demonstration of the operational checkout of the C-12 compass system (29 hours). Course is incomplete without the videoteletraining portion. The computer-based portion trains on the operational checkout of the C-12 compass system (6 hours).

Prerequisites: AFSC 2A4X1 or equivalent.

Quota Control: 2 AF/DOP.

E6AGL2A4X2 018—AN/ARC-164 (RT-1288/URC-108A) Satellite Comm Sys Tech (O/M)—PDS Code W8L—location: user's site/16 hrs—Oct 96

The course consists of both videoteletraining and computer-based training. The videoteletraining is given first and consists of training on the URC-108 SATCOM system. Includes STACOM theory, system theory, system interface component removal and replacement, CY-58 keying procedures. Also contains a demonstration of the operation of portable SATCOM installation. System troubleshooting to line replaceable unit is included (16 hours). The computer-based training provides simulated system operational checkout of the portable SATCOM system (2 hours). The course is incomplete without the videoteletraining portion.

Prerequisites: AFSC 2A4X2 or equivalent.

Quota Control: 2 AF/DOP.

J6AGL2A6X1A 041—C-141 (GTCP85-106A) Jet Engine Technician (OM)—PDS Code VFM—location: user's site/32 hrs—Oct 96

Consists of both video teletraining (VTT) and computer-based training (CBT). The VTT instruction is given first and consists of identification of APU constructional features, fuel system component functions, bleed air system component functions, lubrication system component functions, electrical system component functions, starter system component functions, APU fire warning component functions, and demonstration of the operational checkout of the GTCP85-106A(APU). VTT Time: 24 hours. The CBT portion provides training to determine corrective actions for APU discrepancies. CBT Time: 8 hours.

Note: Students must have a basic understanding of jet engines. The course is designed for aerospace propulsion craftsmen.

Special Requirements: Compatible computer workstation/hardware.

J6AGL2A6X1A 042—C-141 TF-33 Jet Engine Technician (O/M)—PDS Code U8F—location: user's site/62 hrs—Oct 96

The course consists of both video teletraining (VTT) and computer-based training (CBT). The VTT instruction is given before the CBT and consists of identifying the nacelle system, engine oil system, starter and ignition system, fuel system and engine starter controls, thrust reverser system, constant speed drive system, and engine performance. VTT Time: 48 hours. The CBT portion provides training associated with the compressor bleed air system, fuel and engine throttle controls, and fault isolation. CBT Time: 14 hours. Course is incomplete without completion of both the VTT and CBT portions.

Special Requirements: Computer-based instruction work station/hardware.

J6AGL2A6X1B 010—GTC-85-71A Small Gas Turbo Engine Technician—PDS Code Q8Z—location: user's site/32 hrs—Oct 96

This course consists of both video teletraining (VTT) and computer-based training (CBT). The VTT instruction is given first and consists of identifying GTC system components operating principles, GTC removal and installation procedures, preflight inspection of the GTC, and demonstration of a GTC operational check. VTT Time: 22 hours. The CBT portion provides training associated with isolating malfunctions of the GTC-85-71A fuel systems, electrical system, and bleed air control system. Setting control adjustments to correct malfunctions is also covered. Course is incomplete without VTT portion. CBT time: 10 hours.

Note: Students must have a basic understanding ofjet engines. The course is designed for aerospace propulsion craftsmen.

Special Requirements: Compatible computer workstation or hardware.

J6AGL2A6X1B 012—GTCP-85-180L Small Gas Turbine Engine Technician—PDS Code OBA—location: user's site/33 hrs—Oct 96

The course consists of both video teletraining (VTT) and computer-based training (CBT). The VTT instruction is given first and consists of discusssing the APU components, airflow through the APU and inspection procedures for APU component servicability, demonstration of the fuel atomizer flow test, and a demonstration of the operational checkout of the APU with the APU analyzer. VTT Time: 15 hours. The CBT portion provides training associated with auxiliary power unit (APU) oil, fuel, pneumatic, and electrical systems. CBT Time: 18 hours. Course is incomplete without the VTT portion.

Note: Students must have a basic understanding of jet engines. The course is designed for aerospace propulsion craftsmen.

Special Requirements: Compatible computer workstation and hardware.

X6OZS14N3A 003—Defensive Missile Systems, Joint Imagery Analysis Course—PDS Code XWJ—various locations—Jan 96

Provides training for Air Force and other DoD and US Intelligence community personnel in the knowledge and skills necessary to perform duties as accomplished imagery analysts. Provides intermediate imagery analysis training on launch sites, support facilities, and equipment. The course is computer-based instruction and is exportable. The course is designed to be self-paced, but must be completed within a 6-month period after enrollment. The course is designed to operate on SUN, DEC ALPHA, and Hewlett Packard workstations used for imagery analysis and requires at least 1 gigabyte of hard disk space.

Prerequisites: Student must have completed an imagery-community approved basic imagery training course. Additionally, it is strongly recommended that individual has spent a minimum of 1 year in the field performing imagery analysis since basic imagery training and be at least a SSgt or equivalent.

Special Requirements: Secret clearance.

Quota Control: 2 AF/DOP.

L6OLU21S1 000—Supply Operations Officer (Bridge) (Read-ahead)—PDS Code 63W—on site/8 wk—Oct 96

Provides read-ahead training for officers selected for course L3OLR23S1 000. Includes introduction to the Air Force supply system, basic fundamentals of supply, issue, and requisitioning processes, principles of stockage policy, supply officer professional development, supply mission support concepts and operations,

inventory and management of control processes, repair cycle management process, principles of storage and distribution, equipment management, supply management business area, oversight programs and agencies, basic fundamentals of fuels, fuels accounting and administration, contingency and wartime mission support, and fuels environmental concerns.

Prerequisites: Commissioned officer in the Air Force, Air National Guard, or Air Force Reserves in the grade of Capt and above, possessing a fully qualified logistics AFSC who has been selected to attend L3OLR21S1 000. The officer must spend 60 days at a field level supply (orientation period) rotating through each flight of base supply before attending formal training. Officers will not attend L3OBR21S1 000, Supply Operations Officer (Bridge) Course, without successfully completing L6OLU21S1 000 first.

Special Requirements: Students must have access to a personal computer with the following minimum specifications: 486 Dx2 or higher processor @50 Mhz (90 Mhz Pentium recommended); 16 megabytes RAM (24 recommended); 3.5" high density floppy drive; 540 megabyte hard drive (2 ea 540 drives or 1.0 gigabyte drive recommended); internal double speed CD-ROM (quad-speed recommended); compatible 16-bit sound card with speakers; compatible video card with 1 megabyte RAM (2 megabytes VRAM recommended); all appropriate Windows software.

Quota Control: 2 AF/DOP.

E6OZU33S3C 009*—Ada for Managers (H6000-CDT)—PDS Code 7DB—user's site/5 hrs*—Jan 96

Provides an overview of the Ada development for managers. Training includes: Introduction to Ada, DOD usage of Ada, software engineering, Ada programming team, and Ada language concepts.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: This is a familiarization-type course. Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Zenith 248 or Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

* This course is also available to WWMCCS personnel as course number ICW20ADA.

E6OZU33S3C 011*—Application of Ada Principles (H6000-CDT)—PDS Code 8KK—user's site/24 hrs—Jan 96

Provides experienced programmers with the application of software engineering principles as they apply to Ada programs. Training includes: Basic TEXT-IO, operators, programming statements, subprograms and packages, numeric types and objects, enumeration types and objects, and composite types and objects.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: This is a familiarization-type course. Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Zenith 248 or Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

* This course is also available to WWMCCS personnel as course number ICW22ADP.

E6OZU33S3C 012*—Ada Concepts (H6000-CDT)—PDS Code 8KL—user's site/6 hrs—Jan 96

Provides experienced programmers with an overview of Ada concepts. Training includes: the evolution of Ada and the significance of the software engineering goals and principles as they apply to Ada, Ada syntax, program unit structure, data typing, and the Ada reference manual.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: This is a familiarization-type course. Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Zenith 248 or Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

* This course is also available to WWMCCS personnel as course number ICW23ADC.

E6OZU33S3C 013*—Concurrent Programming in Ada (H6000-CDT)—PDS Code 8SM—user's site/7 hrs—Jan 96

Provides experienced programmers the knowledge and skills to perform tasking in Ada. Training includes how to declare tasks, the relationship between parent program units and offspring tasks, what happens at rendezvous, how to apply select statements, methods of termination, and other advanced task features.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: This is a familiarization-type course. Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Zenith 248 or Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

* This course is also available to WWMCCS personnel as course number ICW24ACP.

E6OZU33S3C 014*—Ada Applied Programming (H6000-CDT)—PDS Code 8SN—user's site/25.5 hrs—Jan 96

Provides experienced programmers with the advanced features of Ada and the application of good programming principles to reach software engineering goals. Training includes: Advanced usage of program units, generic program units, advanced I/O, exception handlers, and compilation issues.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: This is a familiarization-type course. Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Zenith 248 or Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

* This course is also available to WWMCCS personnel as course number ICW25AAP.

E6OZU33S3C 032—Introduction to POSIX/UNIX—PDS Code 8ZT—user's site*/11 hrs—Jan 96

Provides training in the knowledge and skills needed to familiarize Air Force personnel with the POSIX standard version of the UNIX Operating System used with the multiuser and Desktop III environment. This course is designed to run on MS-DOS version 3.2 + systems. Training includes an introduction to the UNIX system, accessing and logging out procedures, system command concepts, practice on specific commands, intrasystem communications, advanced concepts and commands, and miscellaneous utilities available.

Prerequisites: E6AZU3C031 018, MS-DOS for the Z-248, and E6OZU33S3C 034, POSIX/UNIX Overview, are available upon request.

Requirements for Course Credit: This is a familiarization-type course. No CCAF credit is currently awarded. Forward comments and suggestions to 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

*Any Z-248 or IBM compatible microcomputer with at least 512K RAM.

E6OZU33S3C 034—POSIX/UNIX Overview—PDS Code 8TA—user's site*/1 hr—Jan 96

Provides training in the knowledge and skills needed to give Air Force personnel an overview of the POSIX standard version of the UNIX Operating System used with the multiuser and Desktop III environment. This course is designed to run on MS-DOS version 3.2+ systems. Training includes a description of what an operating system does, similarities between MS-DOS and UNIX, and advantages of UNIX in a multiuser environment. This course is recommended before taking E6OZU4925 032, Introduction to POSIX/UNIX.

Prerequisites: Some operating system familiarity is suggested. E6AZU3C031 018, MS-DOS for the Z-248, is available upon request.

Requirements for Course Credit: This is a familiarization-type course. No CCAF credit is currently awarded. Forward comments and suggestions to 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

*Any Z-248 or IBM compatible microcomputer with at least 512K RAM.

E6AZU1C032 001—Introduction to AFORMS—PDS Code 9AC—location: */13.5 hrs—Jan 96

Provides training in the knowledge and skills needed to operate the Air Force Operations Resource Management System (AFORMS). Training includes AFORMS overview, data organization, operations, management of nonrated and rated aircrew member resources, auditing flying time, nonrated and rated flight pay, and training management.

Prerequisites: Familiar with small computer operation.

Requirements for Course Credit: This is a familiarization-type course. No CCAF credit is currently awarded. An AF Form 1256, Certificate of Training, will be issued upon completion of this course by returning the Presentation diskette, comments, and suggestions to 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

*Any user site that has a Z-248 or IBM compatible small computer.

J6AZU2A000 000—Weight and Balance (General)—PDS Code 50S—location: user's site/14 hrs—Apr 95

Provides training on the purpose and contents of weight and balance technical orders, unsatisfactory flight characteristics that may occur if proper weight and balance controls are not properly applied, command weight and balance responsibilities, weight and balance terms, and filing of DD Form 365-4, **Weight and Balance Clearance Form "F."** Training also provided on determining the effect of center of gravity (CG) when loading or unloading or shifting weight, converting the CG in inches to the percent mean aerodynamic chord (MAC), and determining ballast weight or ballast position.

Prerequisites: AFSC 45254, 45254A, 45750, 45751, 45752, or higher or any AFSC when currently assigned to weight and balance duties.

Special Requirements: Computer-based instruction work station. The following technical orders are also required: 1-1B-40, Weight and Balance Data; 1-1B-50, Basic Technical Order for USAF Weight and Balance; and 1X-XXX-5, Basic Weight and Balance Checklist (as applicable).

J6ANU2A000 016—Automated Weight and Balance System (AWBS)—PDS Code SY6—location: user's site/12 hrs—Oct 96

Provides training on documentation of the automated weight and balance system records.

Prerequisites: Completion of course J6AZU2A000 000, Weight and Balance General, or equivalent and one of the following courses, or their equivalent: J6AZU2A3X3 000, Weight and Balance (Tactical Aircraft); J6AZU2A5X2 004, Helicopter Weight and Balance; J6AZU2A5X1 001, Weight and Balance (Airlift Aircraft); or J6AZU2A5X1 002, Weight and Balance (Bomber Aircraft), excluding B-1, and other graduates previously trained.

Special Requirements: Computer-based instruction work station, and technical orders 1-1B-40 and 1-1B-50.

Quota Control: 2 AF/DOP.

J6AQU2A071 000—Avionic Test Equipment Craftsman (ATLAS)—PDS Code XCV—location: user's site/2 wk 1 day—Oct 95

Provides Air Force personnel, AFSC 2A0X1A and 2A0X1B, the knowledge and skills necessary to perform troubleshooting duties utilizing ATLAS statements, system software procedures, ATLAS programs, and utility programs. This course is an exportable computer-based training type instruction to be administered in the field to personnel on upgrade training to the 7-skill level and is a prerequisite for attending course J3ACR2A071 000, Avionics Test Station and Aircraft Component Craftsman (resident course at Sheppard).

E6AZU2A27X 000—Supervisory CAMS—PDS Code XAL—location: user's site/4.5 hrs—Apr 95

Provides training for Air Force personnel in the knowledge and skill needed to use the training and personnel subsystems in the Core Automated Maintenance System (CAMS). Includes task training, course training, and personnel.

Prerequisites: Be familiar with the operation of a microcomputer with MS-DOS.

Requirements for Course Credit: Satisfactorily completing the performance progress checks for lessons one through three. Entry and completion are controlled by the user. Forward comments to 81 TRSS/TTTI, 844 Phantom St Suite 102, Keesler AFB MS 39534-2064.

J6ANU2A3X2C 001—F-16 Avionics System Technician (Com/Nav/Pen Aids C/D Diff)—PDS Code 6QH—location: user's site/26 hrs—Oct 96

Provides training on the basic facts and principles of the Up-Front Controls (UFC) Data Entry System, Head Down Display (HDD) System, Data Transfer Equipment (DTE) Automatic Initialization (ADI) System, Aircraft Safe For Maintenance Inspection, Comm/Nav System Operation and Nav/ECM System operation.

Prerequisites: Completion of course J4ABF45232C 001, J4ALF45232C 004, or equivalent.

Special Requirements: Computer-based instruction work station and technical orders 1F-16( )-2-00GV-001, 1F-16( ) 2-23GS-00-1, 1F-16( ) -2-34GS-00-1, 1F-16( ) -2-34JG-00-1, 1F-16( ) 34-1-1, 1F-16 ( ) 2-94GS-00-1, 1F-16( ) -2-10JG-00-1, 1F-16( ) -2-23JG-20-1, 1F-16( ) -23JG-30-1, 1F-16( ) -23JG-40-1, 1F-16( ) -2-34JG-00-1, 1F-16( ) -2-34JG-50-1, 1F-16( )-2-99JG-00-1.

J6ANU2A3X3A 000—Weight and Balance (Tactical Aircraft)—PDS Code 50P—location: user's site/16 hrs—Jan 96

Provides training on accomplishing entries on DD Forms 365-1, Basic Weight Checklist Record, 365-2, Aircraft Weighing Record, 365-3, Basic Weight and Balance Record, and 365-4, Weight and Balance Clearance Form "F" Tactical.

Prerequisites: Completion of course J6AZU2A000 000, Weight and Balance General, or equivalent.

Special Requirements: Computer-based instruction workstation and technical orders 1-1B-40, 1-1B-50, and the aircraft applicable -5, Basic Weight Checklist and Loading Data.

J6AZU2A3X3B 009—F-16 Aircraft Familiarization—PDS Code 0NY—location: user's site/26 hrs—Jan 96

Provides training on the general aircraft characteristics, organizational maintenance manual set, aircraft danger areas, aircraft safe for maintenance procedures, emergency power unit, and the following systems: crew escape, fuel, environmental control, oxygen, electrical, hydraulic, landing gear, flight control, engine, stores management, radar, inertial navigation, and weapons delivery, and the aircraft walkaround.

Prerequisites: Should be an aircrew member, operations officer, NCO assigned to a maintenance management position, or personnel assigned to maintenance support positions (nonmaintenance and management personnel), or other personnel requiring familiarization only.

Special Requirements: Computer-based instruction work station.

J6ANU2A5X1 001—Weight and Balance (Airlift Aircraft)—PDS Code 50R—location: user's site/17 hrs—Oct 96

Provides training on accomplishing entries on DD Forms 365-1, 365-2, 365-3, and 365-4, Weight and Balance Clearance Form F.

Prerequisites: Possess AFSC 2A551, 2A55X, or higher and complete course J6AZU2A000 000, Weight and Balance General, or equivalent.

Special Requirements: Computer-based instruction workstation, and technical orders 1-1B-40, 1-1B-50, and 1C-130 B-5.

J6ANU2A5X1 002—Aerospace Maintenance Craftsman (Weight and Balance/ Bomber Aircraft)—PDS Code 50Q—location: user's site/B-52 (16 hrs)/B-1B (20 hrs)—Oct 96

Provides training on weight and balance bookkeeping for the B-52H and B-1B aircraft, to include documentation of DD Forms 365-1, 365-2, 365-3, and the automated weight and balance record.

Prerequisites: AFSC 2A551 or higher skill level and course 2A000 000 or equivalent.

Special Requirements: Computer-based instruction workstation and technical orders 1-1B-40, 1-1B-50, 1B-52H-5, 1B-1B-5-1, and 1B-1B-5-2, as applicable.

J6ANU2A5X1X 002—C-130 B/E/H Aircraft Systems Technician—PDS Code 8BJ—location: user's site/122 hrs—Oct 96

Provides training to analyze the following aircraft systems for malfunctions: electrical distribution, fire detection and protection, hydraulic power, ramp and aft cargo door, landing gear, flight control, GTC/ATM or APU, (as applicable), bleed air, air-conditioning, anti-icing, deicing, cabin pressurization, fuel, power plant, and propeller.

Prerequisites: Possess a minimum 5-skill level in AFSC 2AXXX and 2 years of weapons system experience.

Special Requirements: Computer-based instruction workstation and technical orders 1C-130H-2-7, 1C-130H-2-4, 1C-130B-2-10, 1C-130 (H)H-2-8, 1C-130( )-2-3, 1C-130( )-2-9,1C-130( )-2-12, 1C-130( )-2-10, 1C-130(H) H-2-4, 1C-130(H) H-2-7, 1C-130(H) H-2-9, 1C-130( ) -2-4, 1C-130(H) H-2-2, 1C-130( )-2-5, 1C-130(H) H-2-6, 1C-130( )-2-11, and 4T-1-3.

J6ANU2A5X2 004—Helicopter Weight and Balance—PDS Code 5RF—location: user's site/32 hrs—Oct 96

Provides training on accomplishing entries on DD Forms 365-1, 365-2, 365-2 modified, 365-3, 365-4 (using chart "E"), and the aircraft weighing record.

Prerequisites: Completion of course J6AZU2A000 000, Weight and Balance General, or equivalent.

Special Requirements: Computer-based instruction workstation and technical orders 1-1B-40, 1-1B-50, 1H-1(U)N-5/1H-53(M)J-5, 35-BX-X.

J6ANU2A6X1A 024—Aerospace Propulsion Technician (TF33-P-3/P-5/P-9/ P-102 Engine Trim)—PDS Code Y4G—location: user's site/15 hrs—Oct 96

Provides training in pretrim preparation, trim equipment calibration, engine operating limits, trim procedures and adjustments, and trim data evaluations.

Special Requirements: Compatible computer workstation or

hardware.

J6ANU2A6X2 004—Aerospace Ground Equipment (MD-4/MD-4M/ ECU-105/E Motor Gen Set)—PDS Code QNR—location: user's site/32 hrs—Oct 96

Provides training in the areas of operational checks, periodic inspections, voltage regulator tests, and troubleshooting malfunctions.

Special Requirements: Compatible computer workstation or hardware.

J6ANU2A6X2 008—Aerospace Ground Equipment Technician (Diesel Ground/Shelter Heater)—PDS Code YNQ—location: user's site/26 hrs—Oct 96

Provides training on service inspections, operations, and adjustments.

Special Requirements: Compatible computer workstation or hardware.

J6ANU2A6X2 009—Aerospace Ground Equipment Technician (Trucklift, Munitions Handling)—PDS Code 43X—location: user's site/38 hrs—Oct 96

Provides training on the operational check, periodic inspection, and troubleshooting.

Special Requirements: Compatible computer workstation or hardware.

J6ANU2A6X2 015—Aerospace Ground Equipment (AGE) Technician (A/M32A-86, Diesel Generator Set)—PDS Code 7A1—location: user's site/56 hrs—Oct 96

Provides training in A/M32A-86 diesel generator set operation, engine system maintenance, generator electrical system, and troubleshooting.

Special Requirements: Compatible computer workstation or hardware.

J6ANU2A6X2 022—Aerospace Ground Equipment Technician (Maintenance Platform, Split-Deck, Diesel)—PDS Code GVD—location: user's site/50 hrs—Oct 96

Provides training in diesel maintenance platform operational checks, component adjustments, and troubleshooting.

Special Requirements: Compatible computer workstation or hardware.

J6ANU2A6X2 030—Aerospace Ground Equipment Technician (ACE 406/802 Series Air Cond/ACE 410-922/927 Liquid Cool Set)—PDS Code LFF—location: user's site/54 hrs—Oct 96

Provides training on the operational check, periodic inspection, and troubleshooting.

Special Requirements: Compatible computer workstation or hardware.

J6ANU2A6X2 036—Aerospace Ground Equipment Technician (EPU-5E Solid State Frequency Converter)—PDS Code TR0—location: user's site/38 hrs—Oct 96

Provides training on operational checks, in-circuit checks, oscilloscope test point check, circuit board adjustments, and troubleshooting of converter systems.

Special Requirements: Compatible computer workstation or hardware.

E6AZU2AXXX 000—Core Automated Maintenance System (CAMS) Maintenance Data Collection (MDC)—PDS Code 3Y4—location: user's site/13.5 hrs—Jan 96

Provides training for Air Force personnel in the knowledge and skills needed to operate the CAMS and the on-line MDC subsystem. Includes CAMS and MDC familiarization, remote and screen familiarization, inquiries and reports (part I), inquiries and reports (part II), documented discrepancies, event maintenance, job data documentation, standard base supply system, and automated forms and debriefing.

Prerequisites: Familiarity with the operation of a microcomputer with MS-DOS.

Requirements for Course Credit: Satisfactorily completing the progress checks and projects for lessons 1 through 10. Entry and completion are controlled by the user. Forward comments to 81 TRSS/TTTI, 844 Phantom St, Suite 102, Keesler AFB MS 39534-2064.

J6AZU00066 038—Air Force Technical Order System (General)—PDS Code AVH—location: user's site/14 hrs—Oct 96

Provides training on the different types of technical orders, the different types of technical order files, the correct use of technical order forms, and procedures used to update technical orders.

Special Requirements: Computer-based instruction work station. Technical orders 00-5-1, 00-5-2, and 00-5-18 must also be available.

J6ANU00066 039—Air Force Technical Order System (Advanced)—PDS Code 0BA—location: user's site/20.5 hrs—Oct 96

Training is provided on the Automated Technical Order Management System (ATOMS) as follows: alteration of ATOMS database information, documentation of routine and annual file checks, documentation of AFTO Forms 276, 187, 110, verification and correction of CSRL, and printing AFTO Form 187 and saving to a diskette.

Prerequisites: Completion of course J6AZU2E0066 038 or equivalent, or be assigned to a technical order distribution office (TODO), technical order distribution account (TODA), or technical order distribution subaccount (TODS).

Special Requirements: Computer-based instruction workstation and technical orders 00-5-2, 00-5-2, 00-5-102, 0-1-01, selected technical order indexes, and AFTO Form 276.

J6ANU2R066 057—B-1B Organizational Maintenance Manual Set (OMMS)—PDS Code 7XT—location: user's site/14 hrs—Oct 96

Provides training on the organizational maintenance manual set (B-1B).

Special Requirements: Computer-based instruction workstation technical order 00-5-3 and the organizational maintenance manual set.

J6AZU00066 058—Air Force Maintenance Data Collection System (CAMS)—PDS Code 9DU—location: user's site/25 hrs—Oct 96

Provides training on maintenance documentation, requirements, core automated maintenance system (CAMS), event maintenance, documentation of on/off equipment and support general maintenance, and maintenance data collection documentation and

corrections.

Prerequisites: CAMS operator's course, J6AZU2E066 061 (or equivalent), or a working knowledge of CAMS to include terminal and printer operation, and processing of CAMS screens. Course is directed to the student who knows how to get in and move around in the system, but needs maintenance data collection (MDC) training and more indepth knowledge of how the system correlates with MDC.

Special Requirements: Computer-based instruction work station and AFM 66-279, volume 1.

J6AZU00066 059—Core Automated Maintenance System (CAMS) (781 Automated Forms)—PDS Code MU1—location: user's site/14 hrs—Oct 96

Provides training on maintenance discrepancy creation and automated forms documentation.

Prerequisites: Course J6AZU2E066 061, Core Automated Maintenance System Operator's Course (or equivalent), or a working knowledge of CAMS to include terminal and printer operation, knowledge of AFM 66-279, and processing of CAMS screens. Course is directed primarily to the student who needs 781 automated aircraft forms training.

Special Requirements: Computer-based instruction work station and AFM 66-279, volume 1.

J6AZU00066 061—Core Automated Maintenance System Operator's Course (Intro)—PDS Code PCP—location: user's site/14 hrs—Oct 96

Gives an introduction to the core automated maintenance system (CAMS) and provides training on core automated maintenance input information, signing on to CAMS, selecting menu screens, and documentation and processing.

Special Requirements: Computer-based instruction work station and AFM 66-279 volume 1.

J6AZU00066 062—Core Automated Maintenance System (Mid-Level Maint Managers)—PDS Code QRA—location: user's site/19 hrs—Oct 96

Provides training on creating and scheduling maintenance documentation, equipment loading, suspense validation/automated history load, cannibalization documentation, and production quality deficiency reporting, maintenance inquiries, and training inquiries.

Prerequisites: Core Automated Maintenance System (CAMS), J6AZU2E066 061 (or equivalent), Air Force maintenance data collection system (CAMS), J6AZU2E066 058 (or equivalent), or a working knowledge of CAMS to include terminal and printer operation, knowledge of AFM 66-279, and processing of CAMS screens applicable to those taught in the J6AZU2E066 061 and J6AZU2E066 058 courses.

Special Requirements: Computer-based instruction work station and AFM 66-279 volume 1.

J6AZU00066 063—Core Automated Maintenance System (Senior-Level Maint Managers)—PDS Code QRQ—location: user's site/15 hrs—Oct 96

Provides instruction and training for executive level maintenance personnel. Designed to familiarize personnel with the various products available through the Core Automated Maintenance System (CAMS) subsystem to reduce the need for daily briefings. Course consists of instruction on principles of CAMS and familiarization of inquiries.

Prerequisites: The individual performs duties as logistics group or operations group commander or maintenance staff officers.

Special Requirements: Computer-based instruction work station and AFM 66-279, volume 1.

J6ANU2R066 064—C-17A Organizational Maintenance Manual Set (OMMS)—PDS Code V7Z—location: user's site/14 hrs—Oct 96

Provides training on the C-17A organizational maintenance manual set to include the numbering system. Training is also provided on the C-17A warranty.

Special Requirements: Computer-based instruction workstation, warranty information book (from vendor) and technical orders 1C-17A-2-00GV-00-1, 1C-17A-2-00WD-00-1, 1C-17A-2-00SD-00-1, 1C-17A-2-00JG-00-1, 1C-17A-2-XXGS-00-1, 1C-17A-2XXFI-00-1, 1C-17A-2-00FR-00-1, 1C-17A-4-3, 1C-17A-4-1, 1C-17A-4-(SYSTEM), 1C-17A-4-2, 1C-17A-4-4.

E6AZU2EXXX 000—Ground Communications-Electronics CAMS—PDS Code UA0—user's site/15 hrs—Jan 96

Provides training for Air Force personnel in the knowledge and skill needed to operate the Core Automated Maintenance System and the On-line Maintenance Data Collection Subsystem. Includes CAMS and MDC familiarization, remote and screen familiarization, inquiries and reports, documented maintenance, event maintenance, supply requests, task and course training, personnel, and maintenance control.

Prerequisites: Students enrolled in this course should be familiar with the operation of a microcomputer with MS-DOS.

Requirements for Course Credit: Satisfactorily completing the progress checks and projects for lessons 1 through 10. Entry and completion are controlled by the user. Forward any comments to 81 TRSS/TTTI, 844 Phantom St, Ste 102, Keesler AFB MS 39534-2064.

Quota Control: 2 AF/DOP.

J6AZU2S051 000—Base Engineering Automated Management System (BEAMS) Material Control—PDS Code 8TU—user's site*/5 hrs—Mar 94

This course is designed for personnel with the 2S051 AFSC. Provides training for Air Force personnel in the knowledge and skills needed to perform file maintenance and make inquiries using a remote terminal for accessing BEAMS on-line files while working within the Material Control area. Training includes Material Processing subsystem and BEAMS Production Control products (see AFM 50-108, volume I).

Requirements for Course Credit: Completion of lessons one through four. Forward comments and suggestions to 396 TCHTG/TTOI, Sheppard AFB TX 76311-5434.

*Any base-level computer system with Authoring System for Education and Training (ASET) capabilities and a remote terminal.

E6AZU3C031 001—Host AUTODIN Message Processing System (HAMPS)—PDS Code K9B—location: */9 hrs—Jan 96

Provides training in the knowledge and skills needed to operate the HAMPS at the Data Processing Center (DPC). Training includes: HAMPS overview, operating environment, initialization and start-up

procedures, AUTODIN Operators Console (AOC) operations, Traffic Management (TFM) terminal operations, System Status Display (SSD) operations, and the accountability and support functions.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Zenith 248 or Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

E6AZU3C031 016—Introduction to the Z-248 Microcomputer—PDS Code 7XF—location: */3 hrs—Jan 96

Provides training for small computer users on the utilization of the Z-248 microcomputer. Includes computer terms, components of the Z-248, booting procedures, purposes of an operating system, and selection of software packages.

Prerequisites: This course is designed for anyone who will be using a Z-248 microcomputer. No prior knowledge or training is required.

Requirements for Course Credits: Completion of the course and return of student diskette with critique to 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

Course Entry: This is an exportable training package and may be ordered by writing the above address. Include four 5-1/4 inch blank diskettes with the request. Any user site that has a Z-248 microcomputer system.

E6AZU3C031 018—MS-DOS Operating System Version 6.22—PDS Code 7XF—on site/1 day—Oct 96

Provides training for small computer users in the use of the MS-DOS operating system. The course assumes version 6.22. Includes getting started with MS-DOS, data storage, MS-DOS help function, and internal and external commands. No prior knowledge or training required.

Course entry: This course is an exportable diskette training package available from MAJCOMs or the ICW distribution section DSN 597-2985. Entry and completion are controlled by the user. Forward comments and suggestions to 81 TRSS/TTOX, 825 Hercules Street, Room 114, Keesler AFB MS 39534-2038.

E6AZU3C032 000*—Introduction to Data Processing (H6000-CDT)—PDS Code VWT—user's site/7.5 hrs—Jan 96

Provides an introduction to data processing concepts and principles. Includes an introduction to computer terminology, computer evolution characteristics, processing concepts and information processing elements, input-output attributes, data representation methods, auxiliary storage attributes, data organization terminology, data communications characteristics, system analysis and design methods, and programming procedures.

Requirements for Course Credit: Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course. Completion of four lessons, IDP010 through IDP050. (See AFM 50-752 for more information.)

Special Requirements: This course is taken at the user's site utilizing a Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

* This course is also available to WWMCCS personnel as course number ICW06IDP.

E6AZU3C032 002—Executive Control Language (ECL)—PDS Code 5A4—location: user's site/9.5 hrs—Jan 96

Provides training in the knowledge and skills needed to code ECL statements. Training includes: runstream concept; UNISYS 1100 file concepts, run card utilization; XQT, ADD, and START statements; tape assignment, file and mass storage assignments; USE, QUAL, CAT, and FREE statements; and FURPUR commands, ELT, data processors, and conditional runstream control.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

E6AZU3C032 003—BASIC Language Programming—PDS Code 5K3—location: user's site/7.5 hrs—Jan 96

Provides training in the knowledge and skills needed to develop, code, and run BASIC programs. Training includes: introduction to BASIC, data input and branching, loops and arrays, matrix statements and subroutines, library and user-defined functions, and string functions.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

E6AZU3C032 004—FORTRAN 77 Programming—PDS Code 5A6—location: user's site/18 hrs—Jan 96

Provides training in the knowledge and skills needed to develop FORTRAN 77 programs. Training includes: introduction to FORTRAN, constants and variables, arithmetic statements, arithmetic operations, data initialization, format descriptors, input and output statements, conditional statements, looping procedures, arrays, intrinsic and statement functions, and subprograms.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing

a Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

E6AZU3C032 005—COBOL 74 Programming—PDS Code 5A7—location: user's site/6 hrs—Jan 96

Provides training in the knowledge and skills needed to develop and code COBOL 74 programs. Training includes: introduction to COBOL, COBOL terms and structure, files, records, picture clauses, output files and working storage section, and COBOL procedure division.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

E6AZU3C051 001—Computer Operator Training (COT) (2200/400)—PDS Code R7N—location: user's site/19 hrs—Jan 96

Provides training in the knowledge and skills needed to manage the UNISYS 2200/400 Computer System. Training includes console operation, operator console interface, facility and symbiont control keyins, facility status keyins, run processing, system status synopsis, miscellaneous system messages, system initialization procedures, and system recovery procedures.

Prerequisites: Familiarity with small computer operation.

Requirements for Course Credit: Entry and completion are controlled by the user and OPR. An AF Form 1256, Certificate of Training, is issued upon request after completion of this course.

Special Requirements: This course is taken at the user's site utilizing a Desktop II/III computer. Copies of this course are available through MAJCOM points of contact. Contact the OPR for more information.

OPR: 81 TRSS/TTTI, 844 Phantom, Ste 102, Keesler AFB MS 39534-2064.

X6AZS1N050 000—Data Transmission Systems—PDS Code PH0—various locations*/36 hrs—Dec 93

Provides the fundamentals of data transmission systems. Emphasis on knowledge, data content, and users needed for duty at Electronic Security Command field sites. This course is an exportable computer-based training package. Units requiring this course should notify their respective MAJCOM training elements. MAJCOM training elements contact the 310 TSS/DOXP, Goodfellow AFB TX 76908-5000.

Prerequisites: AFSC 1NXXX or service equivalent.

Special Requirements: Top Secret clearance and eligibility for SCI access.

Requirements for Course Credit: Completion of course. Entry and completion controlled by user.

* Course is taught at user's site and requires a Z-248 or comparable microcomputer with MS-DOS.

L6AZS2E351 000—TSEC/KG-30 Family, Limited Maintenance—PDS Code YCG—various locations/ duration: self-paced—Dec 93

Training includes operation, adjustment, identification, and replacement of plug-in subassemblies of TSEC/KG-30 series equipment. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic fundamentals, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 001—TSEC/KG-81, Limited Main-tenance—PDS Code 2R3—various locations/duration: self-paced—Dec 93

Training includes operation, adjustment, identification, and replacement of plug-in subassemblies of the TSEC/KG-81. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic fundamentals, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 002—TSEC/KG-84 Series, Limited Maintenance—PDS Code 59A—various locations/ duration: self-paced—Dec 93

Training includes operation, adjustment, identification, and replacement of plug-in subassemblies of the TSEC/KG-84 series equipment. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: NO FORN/FOUO clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic fundamentals, solid state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 003—TSEC/KI-1A, Limited Maintenance—PDS Code HAV—various locations/duration: self-paced—Dec 93

Training includes operation, adjustment, identification, and replacement of plug-in subassemblies of the TSEC/KI-1A. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic fundamentals, solid state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 005—TSEC/KY-57/58, Limited Maintenance—PDS Code YC2—various locations/duration: self-paced—Dec 93

Training includes operation, adjustment, identification, and replacement of plug-in subassemblies of the TSEC/KY-57/58. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic fundamentals, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 006—TSEC/KY-65/75, Limited Maintenance—PDS Code YC1—various locations/duration: self-paced—Dec 93

Training includes operation, adjustment, identification, and replacement of plug-in subassemblies of the TSEC/KY-65/75. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic fundamentals, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 008—TSEC/KG-94/94A/194/194A Limited Maintenance—PDS Code AJQ—various locations/duration: self-paced—Oct 96

Training includes performing operational check, operating common fill devices, isolating faulty subassemblies (theory only), and safety precautions relevant to the equipment. Also provides COMSEC and TEMPEST training.

Prerequisites: NOFORN. The requirements of AFI 21-109 and detailed knowledge of electronic principles, solid state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546, DSN 473-2133.

L6AZS2E351 010—TSEC/KY-71, Limited Maintenance—PDS Code HP8—various locations/duration: self-paced—Dec 93

Training includes operation, identification, and isolating faulty subassemblies (theory only) of the TSEC/KY-71. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirement of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic principles, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 011—TSEC/CI-10, Limited Maintenance—PDS Code JKD—various locations/duration: self-paced—Dec 93

Includes operation and isolating faulty subassemblies (theory only) of the TSEC/CI-10. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirement of AFI 21-109 (formerly AFR 66-5) plus detailed knowledge of electronic principles, solid state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 012—TSEC/KY-68/78, Limited Maintenance—PDS Code KCB—various locations/duration: self-paced—Dec 93

Training includes operation, identification, and isolating faulty subassemblies (theory only) of the TSEC/KY-68/78. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic principles, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 013—STP COMSEC Awareness Training—PDS Code L8R—various locations/duration: self-paced—Dec 93

Provides knowledge training for personnel in all AFSCs or civilian equivalent who are tasked with any level of maintenance on COMSEC equipment, a system employing COMSEC equipment, or equipment with embedded COMSEC devices. Training includes COMSEC doctrine, policy and procedures; principles of tempest; technical threat awareness; physical handling, accounting, and destruction requirements; and applicable directives. This course is not required for individuals previously qualified as COMSEC technicians via award of AFSC 2E3X1 or equivalent or by completion of COMSEC training that included all of the above areas.

Prerequisites: Identified in AFI 21-109 (formerly AFR 66-5) and all personnel who have not received previous COMSEC awareness training and who are tasked with any level of COMSEC equipment maintenance, a system employing COMSEC functions, or equipment with embedded COMSEC devices.

L6AZS2E351 014—TSEC/KI-23, Limited Maintenance—PDS Code MR4—various locations/duration: self-paced—Dec 93

Training includes operation, identification, and isolating faulty subassemblies (theory only) of the TSEC/KI-23. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic principles, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 015—TSEC/KGR-28/KGT-7/ST-19, Limited Maintenance (STP)—PDS Code NMV—various locations/duration: self-paced—Oct 96

Training includes operation, isolating faulty assemblies (theory only), and safety precautions relevant to the TSEC/KGR-28/KGT-7. Also provides COMSEC and TEMPEST training.

Prerequisites: Secret clearance. The requirements of AFI 21-109, plus detailed knowledge of electronic principles, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-2133.

L6AZS2E351 016—STP TSEC/KG-28/29, Limited Maintenance—PDS Code SUF—various locations/duration: self-paced—Dec 93

Training includes operation, identification, and isolating faulty subassemblies (theory only) of the TSEC/KG-28/29. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic principles, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 017—TSEC/KG-45, Limited Maintenance—PDS Code 2R8—various locations/duration: self-paced—Dec 93

Training includes operation, identification, and isolating faulty subassemblies (theory only) of the TSEC/KG-45. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic principles, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 018—TSEC/KG-83, Operational Certification Training—PDS Code M4D—various locations/duration: self-paced—Oct 96

Includes operational training on the TSEC/KG-83 cryptographic equipment. Also includes COMSEC and TEMPEST training.

Prerequisites: Secret clearance. The requirements of AFI 21-109 A KT-83 test set is required on site to complete this course.

NOTE: This course does not qualify the individual to perform maintenance on the equipment. It only provides certification training.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546, DSN 473-2133.

L6AZS2E351 019—TSEC/KY-90, Limited Maintenance—PDS Code M4E—various locations/ duration: self-paced—Dec 93

Includes operation, identification, and isolating faulty subassemblies (theory only) of the TSEC/KY-90. Also includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirement of AFI 21-109 (formerly AFR 66-5), plus detailed knowledge of electronic principles, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546.

L6AZS2E351 021—TRI-TAC COMSEC Equipment, Limited Maintenance—PDS Code PJH—various locations/duration: self-paced—Oct 96

Limited maintenance of TRI-TAC COMSEC equipment. Includes operation, identification, and replacement of malfunctioning subassemblies for the HGX-82, KG-82, KG-83, ST-34, and KGX-92. Does not include the KY-68/78, KY-90, KG-81, KG-84/84A/84C (AFI 21-109). Includes training on COMSEC, TEMPEST, and safety.

Prerequisites: Secret clearance. The requirements of AFI 21-109 and a detailed knowledge of electronic principles, solid-state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper Street, Suite 1, Lackland AFB TX 78236-5546, DSN 473-2133.

L6AZS2E351 022—TSEC/KY-67/HYP-67, Limited Maintenance—PDS Code PJK—various locations/duration: self-paced—Dec 93

Provides training in the knowledge and skills for personnel in AFSCs 2EXXX, 2AXXX, 45XXX, or civilian equivalent to perform limited maintenance on the TSEC/KY-67/HYP-67 cryptographic equipment. Includes operation, adjustment, isolating faulty subassemblies (theory only), and safety precautions relevant to the equipment. Generic TEMPEST and COMSEC information is also provided.

Prerequisites: Secret clearance. The requirements of AFI 21-109 (formerly AFR 66-5) and a working knowledge of electronic fundamentals, solid-state devices, and digital techniques, and experience in the use of the electronic text equipment.

Quota Control: 342 TS, Lackland AFB TX 78236-5000.

L6AZS2E351 024—TSEC/KG-109 Limited Maintenance—PDS Code WLU—various locations/40 hrs—Apr 95

Includes operation, performing preventive maintenance (battery removal/replacement), isolating faulty printed circuit boards (theory only), preparation for use and reshipment of the rekey drawer, and safety precautions relevant to the equipment. Generic COMSEC and TEMPEST information is also provided.

Prerequisites: The requirements of AFI 21-109, plus detailed knowledge of electronic principles, solid state devices, digital techniques, and experience in the use of test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, DSN 473-2133.

L6AZS2E351 029—TSEC/KY-99 Limited Maintenance—PDS Code X3F—various locations/duration: self-paced—Oct 96

Includes operation of common fill devices, operational check, and isolating faulty subassemblies (theory only), and safety precautions relevant to the equipment. COMSEC and TEMPEST training is also provided.

Prerequisites:NOFORN. The requirements of AFI 21-109, plus detailed knowledge of electronic principles, solid state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, DSN 473-2133.

L6AZS2E351 028—TSEC/KG-40A Limited Maintenance—PDS Code XPA—various locations/duration: self-paced—Oct 96

Includes operation, performing preventive maintenance, isolating faulty circuits (theory only), preparation for use, and safety precautions relevant to the equipment. COMSEC and TEMPEST training is also provided.

Prerequisites: NOFORN. The requirements of AFI 21-109, plus detailed knowledge of electronic principles, solid state devices, digital techniques, and experience in the use of electronic test equipment.

Quota Control: 342 TRS/TTSCD, 1220 Truemper St, Ste 1, Lackland AFB TX 78236-5546, DSN 473-2133.

J6AST2E652 000—Local Area Network/Wide Area Network (LAN/WAN) Distribution Systems—PDS Code X3E—location: user's site—duration: self-paced—Oct 95

Provides the fundamental knowledge of a basic LAN/WAN

distribution system. It defines LAN/WAN terminology, types of media (cabling), topology (cabling configuration), protocols (computer communications rules), and procedures on media installation, termination, testing, grounding, marking of circuits, and records maintenance.

Prerequisites: Course restricted to DoD personnel (military or civilian) possessing AFSC 2E6X2 or equivalent MOS/NEC.

Admin Instructions: To obtain course, send a letter to: 364 TRS/TTKMS, 511 9th Ave, Ste 1, Sheppard AFB TX 76311-2338 (DSN: 736-6497). The letter must list the individual's grade, name (last, first, middle initial), SSN, AFSC, and must be signed by unit commander.

NOTE: This is a familiarization-type course and only describes a basic LAN/WAN distribution system. It has no bearing on the award of an AFSC. Furthermore, it does not qualify the individual to install or maintain a LAN/WAN system.

OPR: 364 TRS/TTKMS, 511 9th Ave, Ste 1, Sheppard AFB TX 76311-2338.

J6AST2E653 000—Digital Switching System Familiarization—PDS Code X46—location: user's site/duration: self-paced—Oct 95

Provides the fundamental knowledge of a basic digital switching system. It defines what a digital switch is.

Prerequisites: Course restricted to DoD personnel (military and civilian) possessing AFSC 2E6X3 or equivalent MOS/NEC.

Admin Instructions: To obtain course, send a letter to 364 TRS/TTKMS, 511 9th Ave, Ste 1, Sheppard AFB TX 76311-2338 (DSN: 736-6497). The letter must list the individual's grade, name (last, first, middle initial), SSN, and AFSC, and must be signed by unit commander.

NOTE: This is a familiarization-type course and only describes a basic digital switching system. It has no bearing on the award of an AFSC. Furthermore, it does not qualify the individual to install or maintain a digital switch.

L6AZS2T000 000—Hazardous Materials Inspector (Initial)—PDS Code X4R—various locations/duration: self-paced—Oct 96

Provides verification training for selected Air Force and civilian personnel to prepare hazardous material shipments for transport via military air, commercial air, rail, motor, and water modes. Personnel enrolled will demonstrate knowledge and skills in packaging requirements and procedures for marking, labeling, placarding, certification, and compatibility requirements. This course meets the formal refresher training requirement for preparers of hazardous materials according to AFJM 24-204. Training authorizes personnel to certify the shipper's certification on government bills of lading and provides training to complete and certify legally binding certification documents (i.e., Shipper's Declaration for Dangerous Goods, and shipper's certification for military air) for shipments of hazardous materials according to DOT, commercial, and military publications.

Prerequisites: AFSC 2TXXX personnel (or civilian equivalent) who have successfully completed L3AZR2T000 005/L4AZT2T000 005, Hazardous Materials Preparer (Initial), and are assigned to or will be assigned to a position in which they are required to prepare and certify hazardous material shipments for transportation on a daily basis. A detailed knowledge of Title 49 CFR, IATA, and AFJM 24-204 is desirable. Do not enroll individuals who do not meet these prerequisites.

Special Requirements: To request this exportable training package (ETP), contact the ETP course manager at DSN 473-4885 and ask for the ETP enrollment form. The course manager will fax the form to you. Simply fill in the blanks and fax the form back to the course manager.

Admin Instructions: The commander and unit training monitor may enroll personnel as required. However, they must ensure that all personnel enrolled meet the prerequisites. Units will receive a print-ready copy of all materials needed to conduct training. Simply take the print ready copies to your local reproduction center and run off as many copies as you need to meet your training demands. Each unit may set time constraints based on their mission requirements. When students have completed the training, order the final test with the form provided in the ETP. Testing must be coordinated with an approved test control officer and must be administered in a controlled environment (e.g., education center). All materials will be provided for the student to take the test. Any questions should be directed to the ETP course manager at DSN 473-4885.

Quota Control: 345 TRS, Lackland AFB TX.

L6AZS2T000 001—Hazardous Materials Inspector Preparer (Refresher)—PDS Code XQ4—various locations/duration: self-paced—Apr 95

Provides verification training for selected DoD military and civilian personnel to prepare hazardous material shipments for transport via military air, commercial air, rail, motor, and water modes. Personnel enrolled will demonstrate knowledge and skills in packaging requirements and procedures for marking, labeling, placarding, certification, and compatibility requirements. This course meets the formal (refresher) training requirement for preparers of hazardous materials according to AFM 24-204J. Authorizes personnel to certify the shipper's certification on government bills of lading and provides training to complete and certify legally binding certification documents (i.e., Shipper's Declaration for Dangerous Goods, and shipper's certification for military air) for shipments of hazardous materials according to DOT, commercial, and military publications.

Prerequisites: AFSC 2TXXX personnel (or civilian equivalent) who have successfully completed course L3AZR2T000 005/L4AZT2T000 005, Transportation of Hazardous Materials/Hazardous Materials Preparer (Initial), and are assigned to or will be assigned to a position where they are required to prepare and certify hazardous material shipments for transportation on a daily basis. Detailed knowledge of Title 49 CFR, IATA, IMDG, and AFM 24-204J is mandatory. Individuals not meeting these prerequisites will not be enrolled.

Special Requirements: When requesting this specialty training package (STP), the commander will certify that there is a qualified STP trainer available; the STP is requested for personnel who have a valid need for the training. A qualified STP trainer must be currently certified to prepare hazardous materials.

Admin Instructions: The commander will request the STP by letter to 345 TS/TTTD, ATTN: STP Course Manager, 1370 Selfridge Ave, Lackland AFB TX 78236-5231, or FAX DSN 473-4913. The request will contain the trainee's full name, grade, SSN, date graduated from the initial preparer's course, the unit training monitor's name, grade, and DSN. Include in the request the commander's certification stating the organization has a qualified STP trainer who meets the criteria above. Once received, the student will be enrolled in the course and have 120 days to complete it. The STP will be sent to the unit training monitor who will ensure that the trainee receives the student workbook and extracts of HAZMAT

publications. The requesting unit may have to provide publications for which we cannot obtain a copyright release. When the student is ready for the written test, notify us in writing and include the address and DSN of the base education office so that we can forward the test. When the test arrives, the student will report to the education office. All materials will be provided for the student to take the test. Quota Control: 345 TS, Lackland AFB TX.

J6AQP3E931 000—Readiness Apprentice Phase I (AFRES)—PDS Code L87—location: user's site/duration: self-paced—Apr 96

Provides training for civil engineer readiness apprentice qualification for AFRES personnel in the areas of readiness management, disaster preparedness program management; and nuclear, chemical, and biological (NBC) signs, symptoms, and emergency actions. Peacetime and wartime operations actions, disaster preparedness equipment, and disaster preparedness training program requirements. This course is a prerequisite for course J3ALP3E931 002, Disaster Preparedness Apprentice Phase II (AFRES), taught at Ft McClellan AL, which awards AFSC 3E931 for AFRES personnel only. ANG and active duty Air Force personnel will attend course J3ALP3E931 003 in residence. Phase I is no longer offered as an in-resident course.

Prerequisites: Secret clearance before class start date. Personnel from any career field with current or anticipated assignment to a civil engineer readiness position.

Admin Instructions: Individual enrollment requests will be forwarded through the squadron training manager to the MAJCOM/DRU/SOA headquarters. Headquarters will compile requests and forward a letter to the Air Force Civil Engineer Readiness School with the following information: student's name, SSN, grade, unit of assignment, name and grade of training supervisor. Materials will be sent by first class mail to the supervisor of the student. Ninety days are allowed for completion of the course. Extensions can be granted on a case-by-case basis when warranted by extenuating circumstances in the same manner as initial enrollment. A comprehensive, closed-book examination is conducted when test request letter (included in the back of volume II) is filled out and mailed or faxed to the OPR.

OPR: Air Force Civil Engineer Readiness School, Ft McClellan AL.

Quota Control: 2 AF/DOP.

L6AZS3P051 000—STP-Base and Installation Security System (BISS) Operator—PDS Code 4FR—location: user site/duration: self-paced (18 wk maximum)—Oct 95

This specialized training package (STP) trains personnel on the knowledge and skill necessary to perform duties as a base and installation security system (BISS) operator. Training includes operation of Small Permanent Communications Display Segment (SPCDS) and Perimeter Surveillance System Closed Circuit Television (PSSCCTV), sensor subsystems, control of response forces, technical order familiarity and deficiency reporting, and characteristics and limitations of sensors. All hands-on training will be under the strict supervision of the STP instructor/trainer. Course graduates are certified BISS operators and are eligible for award of special experience identifier (SEI) 323.

NOTE: For those bases that do not have a complete system (that is, RDA, LDA, and PSSCCTV), the SEI cannot be awarded until all performance objectives have been completed.

Prerequisites: AFSC 3P0XX and civilians of comparable experience selected for duties requiring BISS operator qualification. Graduates of courses L3AZR81150 012, L3AZR3P051 012, and L4AST81150 012, BISS Operator, resident course and mobile training team course are not permitted to enroll in the STP.

Special Requirements: Students must be assigned to a base that has BISS equipment. Students will be assigned to an instructor/trainer who is a SSgt or higher, a graduate of course L3AZR81150 012, L3AZR3P051 012, or L4AST81150 012, has been awarded the SEI 323, and is the current Sensor NCOIC. The Sensor NCOIC may select flight-level trainers to assist in training, but the sensor NCOIC must administer and document ALL written and performance measurements. During performance exercises and tests, the Test Set Sensor Simulator (TSSS) will be connected to the Coder Multi-Plexer Sensor Data (CMSD) to simulate all alarm scenarios. Security compensatory measures must be taken during this time to ensure security is not downgraded. Trainee will not be allowed to operate the equipment in the local display area (LDA) or remote display area (RDA) without direct supervision of the instructor/trainer. Recommend between three and six students for hands-on training for each session to reduce down time for the operational system.

Admin Instructions: The commander will request the STP by letter or message to 343 TRS/TACT, Lackland AFB TX 78236-5429, ATTN: STP Monitor. The request will contain the trainee's full name, grade, and SSN, along with the Sensor NCOIC's name, grade, and DSN number. When requesting by message, include a statement reflecting commander's approval of enrollment as well as the commander's name and grade. The STP package will be sent to the sensor NCOIC. The sensor NCOIC ensures the trainee receives the student study guide (SSG) to complete. The trainee will notify the sensor NCOIC when he or she is ready to take the written test. The trainee MAY NOT take the performance test until he or she has passed the written test. When the trainee has met all the course requirements, the certification letter in the STP package must be completed by the trainee, sensor NCOIC, and commander for verification. Trainees have 90 days to complete this course.

NOTE: For sensor NCOICs gaining a partially trained operator from a previous unit, determine which training standard line-items need completion, using the trainee's graduation certificate. (Contact the STP monitor for assistance if necessary.) Begin training on those areas, and, using previously identified criteria, request (by letter) new performance certificates. Complete and mail to the STP monitor for issuance of a final graduation certificate without SEI restrictions.

J6AJS3S2X1 000—Task Certifier—PDS Code XCX—location: Air Force wide/18.5 hours—Jun 94

This is an exportable course which will be used as the basis for mandatory training for OJT task certifiers under the Year of Training policy. The course covers the following areas: principles of evaluation, select/modify and develop evaluation tools, and conduct task evaluations.

Prerequisites: Student should be assigned duties as a task certifier. To be appointed, trained, and certified, certifiers will possess at least a 7-skill level or have equivalent experience. Must NOT be the OJT trainer (third party).

J6AJS3S2X1—Training the Trainer—PDS Code XHM—location: Air Force wide/20 hours—Jun 94

This is an exportable course which will be used as the basis for mandatory training for OJT trainers under the Year of Training policy. The course covers the following areas: learning process, interpret training requirements, plan training, schedule and conduct

training, and evaluate training.

Prerequisites: To be appointed, trained, and certified, trainers will be graduates of the Airman Leadership School (ALS) (if enlisted), and possess a higher skill level or experience level (if civilian) than trainees.

J6OQP32E1D 000—Readiness Officer Phase 1 (AFRES)—PDS Code L87—location: user's site/duration: self-paced—Apr 96

Provides initial training for AFRES civil engineer officers fulfilling readiness positions. Includes all aspects of readiness management, disaster preparedness program management; nuclear, chemical and biological (NBC) signs, symptoms, and emergency actions. Peacetime and wartime operations actions, readiness equipment, and disaster preparedness training program requirements. This course is a prerequisite for course J3OLP32E1D 000, Readiness Officer Phase II (AFRES), taught at Ft McClellan AL. Course is intended for AFRES personnel only. ANG and active duty Air Force officers will attend course J3OZP32E1D 008, Readiness Flight Officer, in residence. Phase I is no longer offered as an in-resident course.

Prerequisites: Personnel from any career field with current or anticipated assignment to a civil engineer readiness position.

Admin Instructions: Individual enrollment requests will be forwarded through the squadron training manager to the MAJCOM/DRU/FOA headquarters. Headquarters will compile requests and forward to the USAF Civil Engineer Readiness School a letter with the following information: student's name, SSN, grade, unit of assignment, and name and grade of training supervisor. Materials will be sent by first class mail to the supervisor of the student. Ninety days are allowed for completion of the course. Extensions can be granted on a case-by-case basis when warranted by extenuating circumstances in the same manner as initial enrollment. A comprehensive, closed-book examination is conducted when test request letter (included in the back of volume II) is filled out and mailed or faxed to the OPR.

OPR: USAF Civil Engineer Readiness School, 366 TRS/TCD (Ph I POC), bldg 2281, Galloway Gate Road, Ft McClellan AL.

Quota Control: 2 AF/DOP.

Chapter 4

Air University Procedures and Instructions

(OPR: HQ AU/RP)

Air University (AU) OPR. HQ AU/RP is the OPR for this chapter. Requests for new course announcements, changes, or revisions must be prepared according to paragraph 1.10 and sent to HQ AU/RPXP for required processing.

Section A—AU Administrative and Reporting Instructions

4.1. Authorized Use of AU Mission Readiness Training Funds. Student travel orders cite funds only if all four of the following conditions are met:

4.1.1. Training is conducted by AU or civilian agencies under AU contract.

4.1.2. Student is an active-duty Air Force officer or airman, DAF civilian employee, or exchange officer filling an Air Force position.

4.1.3. Quota has been issued by HQ AU (or by HQ USAF or other agencies when specifically authorized by course announcement to issue quotas and commit AU funds). Use of AU fund citation when a school quota has not been allocated or when it has been canceled may result in the orders publishing agency being designated as responsible for a violation under AFR 177-16, *Administrative Control of Appropriations*.

4.1.4. Authorized travel status of student is TDY, TDPFO, or PCS with TDY en route as defined in attachment 2.

4.1.5. MAJCOMs may use local civilian personnel training funds (BA 03) when an unfunded quota is allocated by AU/RP.

4.2. AU TDY Fund Citations. When AU funds are authorized for use (paragraph 4.1), the following applies:

4.2.1. Use table 4.1 to select proper fund citation for TDY to school for courses administered by AU.

4.2.2. CIC for AU courses is 4 4 *64 0336 504200. Effective 1 Dec 95, ADSN changes from 504200 to 667100. (Insert applicable fiscal year in lieu of asterisk.)

4.2.3. Advances are authorized in accordance with AFI 65-104, *Government Charge Card Program*, and AFR 177-103, *Travel Transactions at Base Level*, chapter 13, paragraph 13-5.

4.2.4. Fund citations for courses administered by the Air Force Institute of Technology (AFIT), Wright-Patterson AFB OH, are shown in table 4.2. CIC for AFIT courses is 4 4 *64 A836 503000. (Insert applicable fiscal year in lieu of asterisk.)

4.3. Special Authorizations:

4.3.1. Three pieces of accompanied baggage may be shipped as excess when traveling military or commercial air only and TDY exceeds 45 days. This is the only special authorization for TDY to school orders that does not require prior HQ AU/RP approval. Orders issuing activities must not confuse allowances with authorizations to use the allowances when orders cite AU funds.

4.3.2. All other special authorizations require prior AU approval. A special authorization is something that adds to the cost of normal travel. When using the AU fund citation, all special authorizations, including shipment of unaccompanied household goods, do-it-yourself (DITY) moves, travel by private auto more advantageous to the government, special conveyance (GSA rental car, GSA contractor, private rental), variations in itinerary, etc., must be approved by HQ AU/RP before issuance of orders. After-the-fact requests will not be considered. The student is responsible for ensuring that all approved special authorizations are contained in Item 16 of the DD Form 1610 before travel. Requests may be faxed to DSN 493-6899 for expeditious processing.

4.3.3. Travel by POV may be authorized as a convenience to the traveler if it will not increase the total cost to the government. When POV travel is not advantageous to the government, it is necessary to coordinate with the TMO to obtain the lowest government transportation fare available. This cost will be cited on the travel order, and reimbursement for POV travel will not exceed this amount.

4.3.4. Approval for special authorizations may be requested to HQ AU/RP. Justification for special authorizations must be based on advantage to the government when essential to accomplish the TDY mission. Factors prescribed in AFI 37-128, *Administrative Orders*, must be considered and provided in the request or justification. When approval is received from HQ AU/RP, the approval reference for the special authorization must be included in the "REMARKS" item of the TDY order (DD Form 1610, item 16). Also, for unaccompanied household goods shipped by the traffic management office (TMO), the specific weight limit authorized by HQ AU/RP must be contained in the member's TDY orders. Failure to obtain HQ AU/RP approval for any special authorizations may result in charging the funds of the member's home station for additional TDY costs incurred.

4.4. Reporting Instructions. See table 4.3.

4.5. Preparation of Student's Orders. See table 4.4.

4.6. Clothing Requirements. Summer uniform combinations are authorized year-round. The tie/tab is optional during all periods except when required by AFI 36-2903, *Dress and Personal Appearance of Personnel* (formerly AFR 35-10) for other uniform combinations (service dress, pullover sweater, etc.). Air War College resident course classmembers must bring service dress, mess dress, and battle dress uniforms (BDU). Students attending the Professional Military Comptroller Course, Reserve Forces Professional Military Comptroller Course, Judge Advocate Staff Officer Course, USAF First Sergeant Academy (USAFFSA), and Air Force Senior Academy (AFSNCOA) are required to bring the service dress uniform and battle dress uniform (BDU). USAFFSA and AFSNCOA students must also bring white shirt and bow tie or mess dress uniform for special functions. USAFFSA students must bring one battle dress uniform. SOS students must hand-carry service dress uniform (for wear on first day of class), BDUs (for wear at field exercises), and career specific utility uniforms (flight suits, missile crew suits, etc.).

4.7. Student Housing. Students who need billeting at Maxwell AFB report to billeting office, Bldg 157, Maxwell AFB. USAFSNCOA students report to bldg 826, Maxwell AFB, Gunter Annex, for room assignments. All USAFSNCOA students must reside in billeting rooms. Students attending courses at the civilian personnel management division report to bldg 826, Maxwell AFB, Gunter

Annex, for billeting unless otherwise notified in acceptance letters. Billeting reservations accepted. Call DSN 493-2055/2430 or commercial (205) 953-2430/2055. Privately owned weapons are not normally authorized for TDY students at Maxwell AFB or Gunter Annex unless the student is TDY-en route-PCS. Special requests must be approved in advance by HQ AU/SP. For SOS students, see table 4.3, line 3, columns c, d, and e.

*Insert applicable FY in lieu of asterisk.
**Insert applicable FY in lieu of asterisks (for example, 97).
NOTES:
1. Fund citation used for per diem return transportation is chargeable to next fiscal year as applicable.
2. Members are under unit essential messing and meals are provided at no cost. Members will be paid the incidental rate of $2.00 per day IAW JFTR U4125 A3f. Nonprior service officer basic military training students will not be paid $2.
3. Fund citation for NCO academies will only be used for students attending a CONUS NCO academy. Students attending an overseas NCO academy will be funded by their parent MAJCOM.
4. Orders for direct appointee judge advocates called to extended active duty under 10 U.S.C. 672(D) should reflect permanent change of station chargeable to unit of assignment; TDY chargeable to Air University.

4.8. Sign-out Procedures. ACSC and AWC students must sign out no later than 5 duty days after graduation unless approved by school administration for extenuating circumstances that do not affect gaining unit report no later than date. Students enrolled in concurrent civilian degree programs that end 6 duty days or more after graduation must request terminal Bootstrap TDY or complete the program in ordinary leave status unless approved by school administration for extenuating circumstances that do not affect gaining unit report no later than date.

NOTES:

1. Due to the ATRAS System, TDY orders must be sent to the accountable AFO before paying travel advances. Orders-initiating activities are required to provide estimates for EEICs 407, 408, and 409 on all TDY orders issued using the AFIT fund citation. Forward one copy of the TDY order to 88 ABW/FMFPT, 1940 Allbrook Drive, Suite 2, Wright-Patterson AFB OH 45433-6503. Commercially owned and operated hotels located on military installations are considered government quarters, and the applicable deductions from the meals and incidental expenses (M * IE) rate for available government mess are required.
2. Replace * with applicable FY.
3. **K6582 used with A through E only.

4.9. Purpose of the Programs. PCE programs include courses that are less than 20 weeks in duration and are conducted in residence at the CPD, Maxwell AFB. They provide concentrated instruction in specialized subjects needed to improve the performance of Air Force and DOD personnel in their present duties or to prepare them to assume greater responsibilities. HQ AU authorizes the establishment of courses and specific quotas necessary to meet Air Force and DOD needs. Course descriptions for available CPD PCE courses are in section J. These programs are subject to adjustments based on changing requirements. More detailed course information may be found in the Air Universiy Catalog.

4.9.1. **Academic Instructor School (CPD/ED)**. Located at Maxwell AFB, this school prepares selected personnel for instructor duties in Air Force schools and other agencies. The school accomplishes it mission by achieving six objectives. These objectives are to: develop attitudes appropriate for Air Force instructors, apply basic principles of learning to specific learning situations, plan meaningful instruction, use sound teaching methods, commuinicate effectively, and evaluate the achievement of learning objectives.

4.9.2. **International Officer School (CPD/FA)**. Located at Maxwell AFB, this school prepares international officers to increase their capabilities to participate in AU professional military education schools.

4.9.3. **USAF Chaplain Service Institute (CPD/HC)**. The USAF Chaplain Service Institute is the central manager for all chaplain service education. The institute is located at Maxwell AFB. The education division of the institute (CPD/HCP) provides education for chaplains and enlisted chaplain service support personnel. Enlisted personnel complete 3- and 7-skill level courses. Chaplains receive initial qualification training and are educated to meet Chaplain Service requirements for intermediate and senior positions. All chaplains attend the institute to receive graduate-level PCE short courses to supplement their college and seminary education in support of the chaplain service mission and vision.

4.9.4. **Air Force Judge Advocate General School (CPD/JA)**. Located at Maxwell AFB, this school provides basic and continuing legal education to active duty, USAFR, and ANG judge advocates, NCOs in the paralegal career field, civilian attorneys, and civilian paralegals.

4.9.5. **Air Force Human Resource Management School (CPD/DP)**. Located at Maxwell and Gunter AFBs, this school provides military and civilian Air Force human resource managers and family service providers with an update on policies, plans, programs, and operations; leadership and modern management theories; behavioral science applications; contemporary social issues; and technological skills to enhance their effectiveness as professional staff members and develop their technical and professional competence in Air Force human resources management.

4.9.6. **Commanders' Professional Development School (CPD/CL)**. Located at Maxwell AFB, this school provides selected senior officers with an understanding of the major influences bearing on the Air Force, Air Force positions on major issues of concern to Air Force members, the impact of these issues at the base level, and a forum in which to discuss alternative concepts and processes to deal with leadership and management issues of crucial interest.

★Table 4.3. AU Administrative and Reporting Instructions. (see note)

LINE	A School/Course	B Advance Notification Required	C Special Administrative Instructions	D Report To	E Reporting Times
1	Air War College	Mail UPR Gp (AF Form 10) on AD, AF Reserve, ANG to: 502 MSSQ/ MSPAC, Maxwell AFB AL 36112	(Accomplished by losing MPF/CRPO/State Adj Gen.)	Commandant, AWC, bldg 1401, Maxwell AFB	*NET 5 duty days before class start date.
2	Air Command and Staff College			Commandant, ACSC, bldg 1402, Maxwell AFB	
3	Squadron Officer School	MAJCOM and FOA send consolidated roster of selectees NLT 30 days before class start date to: SOS/EDV, Maxwell AFB AL 36112. Include grade, DAFSC, SSN, security clearance, and complete mailing address of servicing MPF. Furnish changes to HQ AFPC/DPMRS.	Students must hand-carry medical records, AF Form 422, Physical Profile Serial Report, TAFCSD waiver (if required), and four ID-size photos. Students bringing dependents with them must notify the SOS/EDO duty officer NLT 5 duty days before class start date. (DSN 493-6060/2701/ 7321, 0730 - 1630)	Bldg 157 if more than 3 days before class start. Report to bldg 1403 1 day before class start date.	Oversea arrivals may report NET 3 days before class start date. All others, NLT 1700, 1 day before class start date

71	ECI Course for Authors	MAJCOM/FOA furnishes names and grades of students through TMS NLT 30 days before class start date. Additional info to be provided out of system IAW TMS reporting instructions.	In accordance with DOD Instruction 4165.47, the ECI Commandant has determined that students assigned TDY to the ECI course at Maxwell AFB, Gunter Annex will reside on base when rooms are available.	ECI classroom, bldg 832, Maxwell AFB, Gunter Annex	0730 on class start date.

NOTE: Include the following statement in the remarks section of student TDY orders: "Report to the Maxwell/Gunter AFBs billeting office (as appropriate) no later than 1700 central time on date of arrival if on-base housing is not guaranteed in advance."

4.9.7. **Professional Military Comptroller School (CPD/FM)**. Located at Maxwell AFB, this school enhances a student's ability to adapt the role of the comptroller to a changing economic, political, and military environment; gives students a better understanding of major contemporary problems, issues, and national policies affecting the efficient and effective allocation of resources to and within the defense establishment; and reviews other skills to improve the ability of students to serve effectively as comptrollers in DoD.

4.9.8. **USAF First Sergeant Academy (CPD/FS)**. Located at Maxwell AFB, bldg 833, the USAF First Sergeant Academy conducts eight classes each fiscal year for 360 active duty and Air National Guard first sergeants. Attendance at the academy is required for all active members within 6 months subsequent to their approved retraining request for first sergeant duty. Air National Guard first sergeants attend as soon as possible after their selection for the position of first sergeant. The academy prepares these selected senior noncommissioned officers to fulfill their responsibilities of advising and assisting commanders in maintaining the health, morale, welfare,

and discipline of assigned enlisted personnel by providing a better understanding of the current environment as well as the resources available to increase their effectiveness in meeting mission requirements.

Section C—AFIT General Information

4.10. Purpose of the Programs. AFIT's mission is to support national defense through graduate and PCE and research programs.

4.10.1. **Degree Programs**. AFIT conducts selected degree programs at Wright-Patterson AFB and arranges for other degree programs at civilian institutions. These programs are designed to give selected officers the ability to analyze and solve complex technical and managerial problems faced by the Air Force and DoD.

4.10.2. **PCE Programs**. AFIT conducts PCE programs at Wright-Patterson AFB and arranges for other continuing education programs at selected civilian institutions. These programs are designed for specific Air Force officers, senior NCOs, and officer-equivalent civilians who must maintain currency in technical and managerial skills.

4.10.3. **Medical Programs**. AFIT administers Air Force Medical programs at selected civilian, Army, or Navy institutions. These programs are designed to educate career officers, and in some instances, to attract qualified medical professional into the vaious Air Force Medical Corps. They permit selected medical personnel to attend institutions to earn graduate professional degrees in their discipline. Programs are also conducted at various civilian, Army, or Navy institutions for graduate medical education leading to specialization. In addition, postgraduate continuing education courses are conducted at civilian institutions to permit members of the various corps of the Air Force Medical Service to maintain currency and increase their technical skills.

4.10.4. **Education with Industry (EWI) Programs**. AFIT administers management education programs in cooperation with leading companies throughout the country. These programs are designed to give selected Air Force officers an insight into the operation and management of a civilian organization with emphasis in their specialty area. The objective is to improve the managerial qualities and technical competence of participating officers and to develop a greater understanding of management common to industry and its government counterparts.

4.11. Governing Directives. In addition to the provisions of this catalog, the following Air Force directives apply:

4.11.1. AFR 36-16, *Foreign Area Studies Program*.

4.11.2. AFR 177-102, *Commercial Transactions at Base Level*.

4.11.3. AFI 11-401, *Flight Management* (formerly AFR 60-1).

4.11.4. AFI 16-105, *Joint Security Assistance Training (JSAT) (Joint)* (formerly AFR 50-29).

4.11.5. AFI 36-2009, *Delay in Active Duty for AFROTC Graduates* (formerly AFR 45-31). 4.11.6. AFI 36-2013, *Airman Commissioning Programs and Officer Training School*.

4.11.7. AFMAN 36-2105, *Officer Classification.*

4.11.8. AFI 36-2107, *Active Duty Service Commitments.*

4.11.9. AFMAN 36-2110, *Assignments*.

4.11.10. AFPAM 36-2126, *Preparation of Personnel Selected for Relocation*.

4.11.11. AFI 36-2201, *Developing, Conducting, and Managing Training*.

4.11.12. AFI 36-2302, *Professional Development.*

4.11.13. AFI 36-2306, *Operations and Administration of Education Services Program.*

4.11.14. AFPAM 36-2611, *Officer Professional Development Guide*.

4.11.15. AFI 41-110, *Medical School and Medical Program Application Procedures*.

4.11.16. AFI 51-101, *Judge Advocate Accession Program.*

4.12. Active Duty Service Commitments (ADSC). Students participating in AFIT programs incur an ADSC according to AFI 36-2107.

Section D—AFIT Degree Programs

4.13. Degree-Granting Schools. There are three AFIT activities to which Air Force personnel are assigned to attain academic degrees.

4.13.1. **AFIT Graduate School of Engineering (AFIT/EN)**. This school is located at Wright-Patterson AFB. It offers fully accredited programs at the master's and doctoral levels in areas for which resident education facilities are uniquely suited to the Air Force requirement. Degree programs offered are master's programs in aeronautical engineering, astronautical engineering, systems engineering, electrical engineering, computer engineering, nuclear engineering, engineering physics, operations research, space operations, operational analysis, computer systems, applied mathematics, and meteorology, electro-optics, and environmental management. Doctoral degree programs offered include aeronautical engineering, astronautical engineering, electrical engineering, computer engineering, nuclear engineering, engineering physics, operations research, electro-optics, computer systems, and applied mathematics.

4.13.2. **AFIT Graduate School of Logistics (AFIT/LA)**. Located at Wright-Patterson AFB, this school offers the Graduate Logistics Management Program with majors in logistics management, acquisition logistics management, maintenance management, supply management and transportation management; and the Graduate Systems Management Program, the Graduate Contracting Management Program, the Graduate Cost Analysis Program, the Graduate Information Resources Management Program, Graduate Air Mobility Program, and the Graduate Software Systems Management Program. These programs are offered in limited numbers.

4.13.3. **AFIT Civilian Institution Programs (AFIT/CI)**. Located in AFIT Headquarters at Wright-Patterson AFB, AFIT/CI manages degree programs conducted at selected civilian educational and medical institutions throughout the US. AFIT/CI program managers closely supervise students and their programs. The diversity of courses at civilian institutions enables the Air Force to satisfy many of its requirements through existing academic programs.

4.14. Degree-Granting Programs. Course descriptions are in section I. These programs are subject to adjustments based on changing Air Force requirements. More detailed information can be found in the AFIT Catalog and Educational Information Bulletins available at base education offices. Current programs are the:

4.14.1. **Regular AFIT Degree Program**. This includes all degree education conducted at the AFIT Graduate School of Engineering

and School of Logistics and Acquisition Management, Wright-Patterson AFB OH, and at civilian institutions.

4.14.2. **Special AFIT Degree Programs**. This includes the Scholarships, Fellowships, and Grants Program; USAF Foreign Area Studies Program, Legal Education Programs, and USAF Academy and AFIT Faculty Preparation Programs.

4.14.3. **Airman Education and Commissioning Program (AECP)**. This program provides airmen undergraduate education at civilian institutions in fields of study commensurate with Air Force needs. Upon graduation, airmen attend Officer Training School and are given a Reserve commission. Eligibility, application, selection, and administrative procedures are in AFI 36-2013.

4.14.4. **Educational Delay Program for AFROTC Graduates**. This program allows AFROTC graduates to earn a post baccalaureate degree before entry onto active duty. Eligibility, application, assignment, and administrative procedures are in AFI 36-2009.

4.14.5. **Terminal TDY Program (Operation Bootstrap)**. AFIT monitors the academic programs of Air Force officers studying for advanced degrees at civilian institutions in permissive TDY status for 26 weeks or longer. Responsibility and authority for personnel, pay, and medical matters remain with the local unit of assignment (AFI 36-2306).

4.15. Student Selection Procedures for AFIT Degree and EWI Programs. Requests for enrollment in these programs are processed as follows:

4.15.1. **Academic Evaluation**:

4.15.1.1. Individual requests an academic evaluation from AFIT.

4.15.1.2. AFIT Admissions issues a letter of eligibility.

4.15.1.3. Medical service officers endorse the letter of eligibility in accordance with instructions contained in Section F.

4.15.1.4. Line officers need take no further action because AFIT Admissions informs AFPC of eligibility and applicant status.

4.15.2. **Military Review**. AFPC determines applicant's military availability.

4.15.3. **Selection**. Selection is made by the:

4.15.3.1. AFPC AFIT selection board for line officers below the grade of colonel.

4.15.3.2. Medical Service Education Selection Committee for medical service officers.

4.15.3.3. AFPC/DPMO for colonels.

4.15.4. **Notification and Assignment**:

4.15.4.1. Applicants are notified of selection by their commander and MPF.

4.15.4.2. Once the board selects a person for AFIT, AFPC/DPMRJJ2 loads the assignment which includes the program, AFSC, and earliest possible entry date. Volunteers are considered for AFIT assignments, but once the AFIT Board selects an officer for AFIT, he or she must accept the assignment or separate under the 7-day option provisions of AFMAN 36-2110.

4.15.5. **Student Monitoring**. AFIT monitors the student's performance.

4.15.6. **Forecast**. Officers enter assignment cycle automatically at 10 months before graduation.

4.16. Student Eligibility and Availability for AFIT Degree and EWI Programs. Specific academic and military prerequisites for each program are given in the course descriptions. Unless specifically noted otherwise, officers must meet the following prerequisites:

4.16.1. **Military Availability**. Officers must:

4.16.1.1. Be medically unrestricted for worldwide duty.

4.16.1.2. Be serving in the grade of colonel or below.

4.16.1.3. Have a competitive military record.

4.16.1.4. Be available for reassignment.

4.16.1.5. Have at least 3 years of intervening service since last PCS education assignment on the date of class entry.

4.16.2. **Academic Eligibility**:

4.16.2.1. Officers must have undergraduate records that qualify them for admission to accredited graduate schools. In most cases, a grade point average (GPA) of at least 3.0/4.0 is required. The GPA required for entry into some programs may be less than 3.0 depending on the option for which an officer is considered.

4.16.2.2. Before school assignment can be made, officers must complete applicable graduate admissions tests.

4.16.2.3. Officers must be in a Regular or career Reserve status to enter AFIT. However, all officers, regardless of length of service, are eligible to request a letter of evaluation from AFIT, and if eligible, they may apply for AFIT. ***NOTE***: Nurse Corps officers not age-qualified for career reserve or regular status may receive a waiver for this requirement through HQ AFPC/DPAMN.

4.16.2.4. Officers can be selected for entry into an AFIT program if, in the judgment of AFPC/DPMRJ, they can complete the program and the subsequent ADSC according to AFI 36-2107 (formerly AFR 36-51) before their mandatory retirement or separation.

4.16.2.5. Officers may be eligible for a second AFIT tour after completing an interim duty assignment of at least 3 years. However, the 3-year interim duty requirement does not apply to Airman Education and Commissioning Program (AECP) graduates selected for entry into AFIT or to USAF Academy faculty members selected for doctoral programs under paragraph 4.18.

4.16.2.6. The total career AFIT education for one individual may not exceed 54 months. (AECP time does not count toward the 54-month total.)

4.16.2.7. The maximum time an individual may spend at an institution (resident or civilian) during a single AFIT tour is 36 consecutive months.

4.16.2.8. Officers below the grade of colonel (O-6) who have been considered but not selected for promotion to the next grade are

NOTE: Effective 1 Dec 95, DFAS mailing address changes to DFAS LI/D, 3 Arkansas Rd, Loring AFB ME 04751-1500.

not eligible to apply or be considered for AFIT long course or degree programs. Officers who were selected for AFIT and subsequently fail selection for promotion are removed from selected status if they have not yet begun their AFIT program. AFPC/DPMRJ (DPAM) for medical officers) reviews the records of each person in an AFIT program who is nonselected for a promotion and approves or disapproves the person's continuance in the AFIT program. The decision is based on the merits of each case.

4.16.2.9. Air Force personnel may not attend civilian institutions full time during duty hours at their own expense while on active duty status and may not be granted special leave for this purpose, except as authorized in AFI 36-2306 or AFI 51-101.

4.16.3. **Assignment Availability**:

4.16.3.1. On-station Requirements:

4.16.3.1.1. Normally, the AFIT entry date provides for a minimum of 24 months on station before school entry.

4.16.3.1.2. Officers serving on or projected to serve on overseas tours are scheduled for school entry to coincide with their DEROS.

4.16.3.1.3. Officers serving on or projected to serve on stabilized tours will be scheduled for school entry to coincide with their tour termination dates. AFPC/DPMRJ will consider applicants for early AFIT entry only upon receipt of an approved tour curtailment from the appropriate career management team.

4.16.3.2. Pipeline Status. Officers may not enter AFIT programs directly from PCS technical training or PCS professional military education schools.

4.16.3.3. Rated Status. Rated officers on flying status must have already met the 12- or 18-year utilization standard imposed by the Aviation Career Incentive Pay Act of 1974 or the length of training and prescribed directed duty assignment must be such that they can be returned to operational flying duty and qualify before being reviewed at the 12th or 18th year of aviation service. Officers selected under this rule will be returned to rated duty upon completion of their directed duty assignments (DDA) if they remain physically qualified.

4.16.3.4. DDAs. Generally, if AFIT education results in a change in career field, the officer must not be serving in a DDA at the time of school entry.

4.17. Academic Prerequisites for AFIT Degree and EWI Programs:

4.17.1. Officers with a degree from an accredited institution are normally eligible for study at the next higher level or for EWI programs only. However, AFPC may approve a lateral degree program, based on Air Force requirements for the degree held and the degree desired, providing the following conditions are met:

4.17.1.1. The degree held by the individual cannot be applied against validated Air Force educational requirements.

4.17.1.2. Vacancies exist in the desired degree program that cannot be filled by active duty officers with a degree at that level.

4.17.1.3. Award of the lateral degree will enhance the individual's career development and value to the Air Force.

4.17.2. Eligibility requirements vary from program to program, but, in general, to be considered for an AFIT graduate program, an officer must be a career commissioned officer not currently in PCS technical training or PCS professional military education assignment. The officer must also meet the following criteria:

4.17.2.1. Eligibility for AFIT programs is determined by the Admissions/Registrar Directorate under the advisement of the appropriate resident school (for all specialties currently offered in residence) or the appropriate functional manager in the Civilian Institutions Directorate (for all other fully funded programs).

4.17.2.2. Beginning with FY 91 selection, a new procedure was implemented for PhD eligibility for the programs offered in residence at AFIT.

4.17.3. Officers may receive college credit for courses completed with grades of C or higher through any of the following means or a combination thereof:

4.17.3.1. DANTES correspondence or self-teaching courses, end-of-course tests, or subject examinations. Academic credit is allowed on the basis of recommendations made by the American Council on Education.

4.17.3.2. Correspondence work completed through the extension division of an accredited college or university.

4.17.3.3. Course work completed during off-duty study in programs conducted by an accredited college or university.

4.17.3.4. Course work completed in residence on the campus of an accredited college or university.

4.17.4. Applicants must complete testing requirements specified in course descriptions. Submission of an applicant's credentials to a civilian university depends upon receipt of acceptable test scores. These should be completed early enough to ensure that scores are available for inclusion in the request for evaluation. However, if the test scores are not available, applicants may request a preliminary academic evaluation without test results. The request must indicate the date testing is scheduled and the applicant must ensure test scores are sent to AFIT/RRE, 2950 P Street, Wright-Patterson AFB OH 45433-7765, by the testing agency. A brochure containing information on test administration, test center locations, sample questions, and application procedure is available on request from AFIT/RRE. All test costs must be paid by the individual.

4.18. Application Procedures for Regular AFIT Programs:

4.18.1. Officers wanting to apply for degree programs should first request an evaluation of their academic background. The requests for evaluation are submitted using the format shown in figure 4.2. This format will also be used to apply for EWI programs.

4.18.2. Candidates are advised of the results of their academic evaluation by letter. If officers meet the basic eligibility criteria and the academic prerequisites established for the desired program, they are issued a letter of eligibility. The letter of eligibility and the attached evaluation summary inform the officers of:

4.18.2.1. Their academic eligibility for each program requested.

4.18.2.2. Any deficiencies that must be corrected for any of the programs requested or identified.

4.18.3. The following applies to submission of applications:

4.18.3.1. For line officers below the grade of colonel, the request for evaluation serves as the application. AFIT transmits to AFPC eligibility and volunteer status for programs listed on the letter of eligibility in the respective order shown by means of PTI BA 402 or PTI BA 409. No further action is required of the applicant unless a

change in the application is desired. Requests for change should be made in writing to AFIT/RRE.

Table 4.5. Maxwell AFB Reporting Instructions.

LINE	A Type of Personnel	B Type of Training	C Unit of Assignment	D Report to	E Reporting Times
1	NPS Pipeline	5J0X1	CPD/JA	see note 1	see note 2
2		5R0X1	CPD/HC	see note 3	see note 4
3	Enlisted in TDY Status	5J0X1	CPD/JA	Base billeting, bldg 157	Billeting open 24 hrs, 7 days a week.
4		5R0X1	CPD/HC		Report not earlier than 1 day before class start date.

NOTES:
1. 5J0X1 NPS will contact the Air Force Judge Advocate General School at DSN 493-2802 and notify the lead instructor of arrival time in the local area NLT 2 duty days before departure from Keesler AFB MS.
2. Military training manager or lead instructor will provide in-processing instructions, training locations, and time.
3. 5R0X1 NPS should be held at Lackland AFB TX until 2 working days before class start date and then shipped en masses. They will be picked up at the airport by the military training manager.
4. Military training manager will provide in-processing instructions, training locations, and time.

(5) Information required in card column position

The Personnel Systems Manager (PSM) at the MAJCOM should review and input this data.

Figure 4.1. Standard Personnel Information Retrieval System (SPIRES).

4.18.3.2. Colonels indorse their letter of eligibility to the senior officer management section of their MAJCOM, which in turn indorses the letter to AFPC/DPMO, Randolph AFB TX 78150-6001, with comments concerning the officer's availability.

4.18.3.3. Officers under the jurisdiction of the surgeon general apply by endorsing the letter of eligibility according to the instructions in section F.

4.18.3.4. Applicants for special AFIT programs should follow procedures in paragraph 4.19.

4.18.4. Application Deadline. Officers may apply at any time regardless of their availability status. Aplications will be considered by AFPC for the earliest fiscal year where vacancies exist.

4.19. Application Procedures for Special AFIT Programs. In addition to the regular AFIT programs, special provisions exist to fulfill unique Air Force educational requirements. Officers being considered for special programs must meet the same academic and military requirements specified for the regular AFIT programs.

4.19.1. **USAF Academy Faculty**:

4.19.1.1. The Air Force Academy annually sends AFPC its advanced degree vacancies projected for the next 3 fiscal years.

4.19.1.2. AFPC screens the advanced degree inventory (including officers currently enrolled in AFIT), and sends a list of all available qualified nominees to the Air Force Academy for consideration.

4.19.1.3. The Academy reviews the nominations and informs AFPC/DPMRJ of those officers found acceptable for further consideration.

4.19.1.4. When AFPC cannot identify an available resource meeting Academy qualifications, the Academy nominates officers to AFPC/DPMRJ for attendance at AFIT in preparation for instructor duty at the Academy. (Officers interested in this program should apply to AFPC/DPMRSS1 according to AFMAN 36-2110.) Nomination requests must contain the following information.

4.19.1.4.1. Name, grade, SSN.

4.19.1.4.2. Educational program and degree level desired.

4.19.1.4.3. Suggested schools and entry dates.

4.19.1.4.4. Desired reporting date to the Academy.

4.19.1.4.5. Projected duty AFSC.

4.19.1.4.6. Certification from AFIT/RRE that the officer is academically qualified for the requested education, an estimate of the time required (in months) to complete requirements for the requested degree, and total time (in months) of prior AFIT education, if any.

4.19.1.5. Academy instructors for whom tenure status is planned may enter AFIT doctoral programs at any time after the completion of 2 years of their initial stabilized tours. Other instructors may enter AFIT only between the second and third year of their stabilized tours.

4.19.1.6. Before AFIT entry, rated officers selected for Air Force Academy faculty must have served at least 3 years in aircrew duty.

4.19.2. **Air University**:

4.19.2.1. AFIT Resident Faculty Program (PhD):

4.19.2.1.1. AU sends AFPC/DPMRJJ2 the advanced degree vacancies projected through the next 3 fiscal years for faculty positions at AFIT School of Engineering and Services, School of Systems and Logistics, and Civil Engineering School.

4.19.2.1.2. AFPC/DPMRSS1 screens the advanced degree inventory (including officers currently enrolled in AFIT programs), and sends nominations to AU for consideration.

4.19.2.1.3. AU reviews the nominations and advises AFPC of those officers found suitable for further consideration.

4.19.2.1.4. When AFPC cannot identify an available and qualified resource, AU nominates officers to AFPC/DPMRJJ2 for attendance at AFIT in preparation for instructor duty. Nominations must include the information shown in paragraph 4.19.1.4.

4.19.2.1.5. Except for advanced degree requirements, applicants must meet the eligibility requirements given in AFMAN 36-2110 for faculty duty with AU and be eligible for AFIT attendance according to paragraph 4.19.1.4.

4.19.2.1.6. Officers apply, using the format in figure 4.3.

4.19.2.2. AU Faculty and Staff (PhD). The procedures contained in paragraphs 4.19.1.1 through 4.1.1.4 above are used to satisfy faculty requirements at Maxwell AFB or for HQ AU staff positions. Officers apply, using figure 4.3.

4.19.3. **Air Force Foreign Area Studies Program (FASP)**. This program develops and sustains a resource of qualified officers to meet functional requirements within the Air Force and other governmental agencies.

4.19.3.1. Applicants must meet criteria in paragraph 4.16.

4.19.3.2. The application should follow the format shown in figure 4.4. Officers must apply directly to their resource manager for career broadening via their AF Form 90, **Officer Assignment Worksheet**. Officers must ensure their AF Form 90 is current, reflects their desire to enter the FASP, and includes a Defense Language Aptitude Battery (DLAB) score. Any AFSC is eligible if the officer is releasable to an appropriate concurrent AFSC - 80XX, 82XX, 09XX, or designated special duty assignments. Officers must also have Top Secret/SCI clearance eligibility.

4.19.3.3. Officers must request academic evaluation from AFIT/RRE according to the format shown in figure 4.2. If certified as academically eligible, AFIT/RRE will indicate the number of months required to complete the program and the total number of months of prior AFIT education, if any, and forward to AFPC/DPMRSN5.

4.19.3.4. AFPC/DPMRSN5 determines assignment desirability and availability. If the nomination package meets all necessary criteria, it will be provided to the appropriate AFIT selection board at AFPC for final selection approval. Each nomination must include the following information:

4.19.3.4.1. Name, grade, SSN.

4.19.3.4.2. Educational program desired, including language.

4.19.3.4.3. Suggested school entry date.

4.19.3.4.4. Desired assignment upon completion of the AFIT program.

MEMORANDUM FOR (MPF Formal Training Section)

FROM:

SUBJECT: Offer of AFIT Attendance Decision

1. I elect option _____ (A—accept, B—decline) regarding the AFIT assignment offered me.

2. If accepting, I am aware of the service commitment which I will incur under the provisions of AFI 36-2107 (formerly AFR 36-51), table _____.* I also understand and agree to reimburse the Government for all tuition, fees, books, laboratory expenses, and other educational services which it incurred, or any portion thereof, as determined by the Secretary of the Air Force, if, due to my conduct or actions, I fail to complete my obligation under this contract. The Secretary of the Air Force may waive this requirement if he determines that such waiver is in the best interest of the Government.

3. If accepting, I also understand that my selection is contingent upon successful completion of all AFIT admission requirements to include providing appropriate test results as outlined under course description.

4. If declining, I understand that my declination will be accepted without prejudice and will not disqualify me for future consideration. My reason for declining is _____ (1 — do not desire program/AFSC; 2 — other).

NAME .....

GRADE .....

SSN .....

*Insert appropriate number.

Table 4 - Regular AFIT Programs
Table 10 - Health Services Officers

Figure 4.5. Offer of AFIT Attendance Decision.

4.19.3.4.5. Projected duty AFSC and special experience identifier (SEI) appropriate to the area of study (AFMAN 36-2105).

4.19.3.4.6. Certif,cation from AFIT/RRE that the applicant is academically qualified for the program.

4.19.4. **USAF Academy Honor Graduate Program (Blue Chip)**. This program provides USAF Academy honor graduates with priority for AFIT-sponsored graduate education consideration.

4.19.4.1. Honor graduates will be considered for entry into an AFIT-sponsored graduate education program during the 4th to 8th year following graduation if they have formally applied according to paragraph 4.18, have demonstrated a high level of performance, and have a competitive military record. Formal applications must be received no later than 4 years after graduation. AFIT/RRE screens the honor graduates' applications that have been received for the year in question to determine currency of honor graduates' preferences. Honor graduates may request any degree program they qualify for if Air Force has current or projected shortages in the program.

4.19.4.2. If an honor student declines an opportunity for graduate schooling, special consideration conferred by the Blue Chip status will no longer apply. The officer is still eligible, however, for AFIT consideration under regular AFIT selection procedures (see paragraph 4.18).

4.19.5. **USAF Judge Advocate Procurement Program**. The Secretary of the Air Force is authorized to select Air Force officers each year to attend accredited law schools under the Funded Legal Education Program or the Excess Leave Program for the purpose of obtaining law degrees and subsequently serving as career judge advocates. Eligibility requirements, program prerequisites, and application procedures are contained in AFI 51-101.

4.19.6. **Part-time Contractor Students**. To expedite application processing, all correspondence, transcripts, and test scores must be sent to AFIT/RRE, PART-TIME ADMISSIONS. Application consists of an AFIT Form 2, official transcripts from each college attended (if unavailable, state when requested), Graduate Record Exam (GRE) and (or) Graduate Management Admissions Test (GMAT) scores. AFIT/RRE prepares three copies of AFIT Form 2 and submits this form and one each copy of transcripts and test scores to the appropriate school.

4.20. Processing Applications:

4.20.1. After determining that a line officer below the grade of colonel meets eligibility requirements, AFIT transmits PTI BA

402 and/or PTI BA 409 to AFPC. The application is scheduled for consideration by the appropriate AFIT selection board at AFPC. The same card format and PTI are used to notify the applicants' MAJCOM and MPF of release from consideration. Release codes are listed below. If selected, applicants will be notified accordingly.

4.20.2. MAJCOMs who have information that would prevent an applicant's entry or who desire a change of entry date should notify AFPC/DPMRJ, Randolph AFB TX 78150-6001. Desired changes should be fully justified.

4.20.3. Upon processing of TIC BA4O2 with release codes 002 through 012, the applicants' MPF/DPMC (Formal Training) will forward an AFIT Eligibility/Ineligibility RIP to the applicants, notifying them of release from further AFIT consideration.

002 Combined length of requested and previous AFIT education would exceed the 54-month total AFIT education limitation imposed by current directives.

003 Removal of this officer from his or her present career field would not be in the best interest of the Air Force. For AFIT: Applicants should be advised if they are qualified for any academic program that would allow them to remain in their present career field.

004 Programs requested are not currently available under AFIT sponsorship. For AFIT: Applicants should be advised if they are qualified for any academic program currently offered under AFIT sponsorship.

005 Officer requested release.

006 Officer cannot complete AFIT education and sub sequent ADSC before separation or retirement.

007 Reserve officer not serving in career Reserve status.

008 Officer is no longer academically qualified.

009 Officer does not qualify for lateral degree education. For AFIT: Officers should be advised if they are qualified for any academic program at the next higher level.

010 Officer has failed selection for promotion and may reapply for AFIT when selected for promotion.

011 Officer requested changes in AFIT selection which could not be accommodated.

012 Other. See trailer cards.

013 Officer selected as alternate.

4.21. Postapplication Responsibilities:

4.21.1. Applicants must keep AFIT/RRE advised of their academic status by sending one official transcript for academic credits earned after submission of initial request for evaluation.

4.21.2. Unit commanders must monitor the performance of selectees and report any adverse change in attitude, personal appearance, or duty performance. Such reports should be directed to AFPC/DPMRPC2 (AFPC/DPMME for Medical Service officers) through the local MPF and MAJCOM with information copies to AFIT/RR. Marginal or substandard officers will not be allowed to enter AFIT programs (AFMAN 36-2110) nor will officers be allowed to proceed on an AFIT assignment while on the control roster even though their reassignment is mandatory under AFMAN 36-2110.

4.21.3. MAJCOMs will monitor the medical status of selectees and report any change from a medically unrestricted status to AFPC/DPMRPC2. Address reports on Medical Service officers to AFPC/DPMME.

4.22. Central Identification of Officers for AFIT:

4.22.1. AFIT and AFPC identify line officers academically qualified and who can be made available to enter AFIT education programs. These officers are considered by the AFIT selection board as outlined in paragraph 4.23.

4.22.2. Officers who wish to be selected for an AFIT program should not depend solely on central identification and selection. To be eligible, officers must have a complete set of transcripts in the AFIT Central Transcript Repository.

4.22.3. Officers are encouraged to apply for AFIT because the application assures consideration, permits officers to identify their desired program in advance, and allows AFIT to counsel officers who lack academic qualifications.

4.23. Selection of Candidates:

4.23.1. A continuous selection board convenes beginning in July to consider line of the Air Force applicants and centrally identified officers below the rank of colonel for AFIT entry during the next fiscal year. Out-of-cycle selections are made throughout the year from eligible officers to fill any remaining vacancies. Nominees for special programs are considered upon receipt of nominations from sponsoring agencies.

4.23.2. The selection process is highly competitive and considers overall academic military performance and post-AFIT assignment suitability. Factors include promotability, career progression, prior academic and assignment experience, and the qualifications of the individual to perform in positions requiring the education to be obtained through AFIT. The selection process is designed to select officers whose potential contribution after graduation will most benefit the Air Force.

4.23.3. Program content and projected duty AFSC are an integral part of the selection process. The duty AFSC is that in which officers are assigned to AFIT and in which their resulting DDA will be served, based on Air Force requirements, personal preferences, academic program, and job experience. AFMAN 36-2110 specifies the period of directed duty resulting from AFIT schooling.

4.23.4. Selections are announced incrementally until the fiscal year AFIT quotas are filled.

4.23.5. Colonels are selected by HQ USAF.

4.24. Selection Notification Procedures:

4.24.1. Officers receive a normal assignment notification through their MPF and commander.

4.24.2. MPFs will advise officers of requirements to complete tests prescribed under the course description (not required for EWI).

4.24.3. Volunteers are considered, but once the AFIT Board selects an officer for AFIT, the officer must accept the assignment or separate under the 7-day option provisions of AFMAN 36-2110.

4.25. Reapplication if not Selected. Line officer applicants not selected for an AFIT Master's program need not submit a new request for evaluation to AFIT/RRE if they want to apply for the

next fiscal year's program. (See AFI 51-101 for procedures on the Judge Advocate Procurement Program.) Transcripts are required for additional course work completed since the previous application.

4.26. Assignment Procedures:

4.26.1. Officers selected for degree and EWI programs are assigned to AFIT in pipeline status with duty station at the school or industry selected by AFIT. Officers may inform AFIT of the school or industry they desire to attend, but the final determination is made by AFIT. Although programs of study in certain fields are offered both at the AFIT resident schools and at civilian universities, vacancies in resident school programs are given priority.

4.26.2. Selectees must sign a statement acknowledging they will incur an ADSC according to AFI 36-2107 as a result of AFIT attendance. In addition, officers selected for a degree program are required to sign a statement (figure 4.6) that they understand they may be required to reimburse the Air Force for the education if they fail to fulfill their ADSC because of their own actions. The selectee's MPF (assignment section) must ensure all applicable statements are completed and filed in accordance with assignment instruction codes MIS and MIU (AFMAN 36-2110) upon receipt of assignment instructions to AFIT.

4.27. Costs and Reimbursements. AFIT provides for payment of tuition and other approved expenses to Air Force students authorized to participate in AFIT degree programs.

4.27.1. Providing sufficient funds are available, personnel enrolled in degree programs may be reimbursed for other expenses as follows:

4.27.1.1. Airman Education and Commissioning Program students receive a maximum $240 book and supply allowance annually. The entitlement is computed at $60 per fiscal quarter. Advanced payments are authorized.

4.27.1.2. Students attending law school under PL 93-155 receive a maximum $150 book and supply allowance annually. The entitlement is computed at $37.50 per fiscal quarter. Advanced payments are authorized.

4.27.1.3. Nonmedical officer students receive a maximum $240 book and supply allowance annually. The entitlement is computed at $60 per fiscal quarter. Advanced payments are authorized. Student in graduate programs are limited to eight quarters of reimbursement. Payment is based on certification by AFIT.

4.27.1.4. Officer graduate students who are required to prepare master's thesis or major reports in lieu of these may be reimbursed up to $100; those required to prepare doctoral dissertations may be reimbursed up to $200.

4.27.1.5. International (SATP) students are reimbursed for actual expenses for books and supplies which have been calculated in the tuition rate.

4.27.1.6. Payments are made according to AFM 177-102.

4.27.2. AFIT sponsorship after the completion of an AFIT tour:

4.27.2.1. If an officer in an AFIT civilian institution graduate degree program has not completed all requirements for the degree at the end of an AFIT tour, AFIT may pay tuition and fees for one additional term under the following conditions:

4.27.2.1.1. AFIT determines the officer will be able to complete all remaining degree requirements during that term, in spite of being assigned full-time at another location.

4.27.2.1.2. The term in question begins not later than 1 year after the officer's AFIT completion date or 1 year after departing a remote tour immediately following the officer's AFIT program.

4.27.2.2. AFIT may pay:

4.27.2.2.1. Those costs associated with any remaining research hours that will be completed during the term and are needed to fulfill the thesis or dissertation requirement.

4.27.2.2.2. Fees charged for submission and defense of the thesis or dissertation, but only if these events occur during the term described in this paragraph and only if AFIT has not previously paid these fees.

4.27.2.3. AFIT may pay the charges described above whether or not the officer successfully completes degree requirements during the term described in this paragraph.

4.27.2.4. AFIT may not pay:

4.27.2.4.1. Any additional charges for academic course work or fees, except research hours, the officer may take during the additional term.

4.27.2.4.2. Any additional charges for academic work the officer may undertake in the future, unless the officer is reassigned to AFIT as a student.

4.27.2.4.3. Any per diem or travel costs for the former student to return to the civilian institution for any purpose after the completion of his or her original AFIT tour. This includes the additional term.

4.27.2.5. AFI 36-2107, table 4, does not apply for time used in attempted defense of a thesis or dissertation; that is, an officer receives no additional ADSC rom the AFIT sponsorship described in this paragraph.

4.28. Orders and Their Distribution. Based upon selection and availability dates established by AFPC, AFIT furnishes instructions to the MAJCOM for preparing orders assigning personnel to PCS programs. The losing command must send AFIT two copies of PCS orders for personnel attending AFIT programs.

4.29. Availability Code Assignment:

4.29.1. Officers attending degree programs are assigned an availability code in accordance with AFMAN 36-2110 upon TED to AFIT. The estimated date of course completion (year and month) is based upon the approved course length, and it is entered as the availability date. The availability date is revised when a firm course completion date is established.

4.29.2. AFIT may establish an earlier availability date if a student can complete the program sooner than originally planned, or if a student is removed from AFIT by faculty board action.

4.29.3. Other changes in the availability date, except as shown in this paragraph, must be approved by AFPC.

4.30. Extension of AFIT Program Lengths:

4.30.1. All degree programs must be planned and managed to ensure completion of the required degree in the shortest time possible. Failure to complete a program in the authorized time is justification fot removal from school. If the student cannot

complete the degree within established program lengths, he or she may request an extension of the academic tour. The Commandant, AFIT, may grant an extension of up to 6 months provided all of the following conditions are met:

4.30.1.1. The officer's academic performance merits extension.

4.30.1.2. The officer can complete all degree requirements within the additional time allotted.

4.30.1.3. The officer has not been forecast for reassignment.

4.30.1.4. For AFHPSP, the total number of man-years does not exceed the man-year authorization.

4.30.1.5. The officer's total career AFIT education will not exceed 54 months (AECP and BMP time excepted).

4.30.1.6. The officer's current AFIT tour, with extension, will not exceed 36 months.

4.30.1.7. The extension will not exceed one academic term or 6 months, whichever is longer.

4.30.2. In instances requiring a waiver of conditions in paragraphs 4.30.1.3, 4.30.1.5, 4.30.1.6, or 4.30.1.7, AFPC is the approving authority. Requests should be made as early as possible and must include justification for the additional time and a statement of additional dollar and manpower costs.

4.31. Change of Degree Level. Officers are normally entered into an AFIT program to satisfy requirements for one degree and are not permitted to attain two degrees in the same tour. However, requests for conversion to the next higher level may be sent through AFIT to AFPC. Recommendations may be forwarded to AFPC/DPMRPC. Requests will normally be approved only when the following conditions are met:

4.31.1. The officer's academic and military performances are superior.

4.31.2. The officer's current AFIT tour, with extension, will not exceed 36 months.

4.31.3. The officer's total career AFIT education will not exceed 54 months.

4.31.4. A vacancy exists in the desired discipline, based on current and projected requirements.

4.32. Program Monitoring. Air Force educational programs are expressed in terms of academic specialty codes (AFM 300-4). In the selection process, AFPC identifies one of these codes for each selectee. AFIT ensures the academic program of each selectee is compatible with the designated specialty code. AFIT further ensures the academic specialty code reflected on the UOR of each student is identical to that designated by AFPC. Exceptions to this policy require the written approval of AFPC/DPMRJ. To stabilize the inventory of AFIT-trained personnel, subsequent changes to an AFIT graduate's academic specialty code may not be made without HQ USAF/DPPE approval.

4.33. Disenrollment. The AFIT Commandant is delegated the authority to disenroll students from AFIT Civilian Institution Programs by administrative action, rather than faculty board action.

4.34. Assignment From School. Officers are forecast for reassignment 10 months before graduation or scheduled program completion date. Officers are normally assigned in their directed duty AFSCs. The officers' education, prior experience, and rated status are considered by AFPC in determining assignments.

4.35. Official Transcript Requirements. An official transcript from each school attended is required to gain entrance to an AFIT program. These transcripts and other documents are retained permanently by AFIT Admissions.

4.36. Administrative and Reporting Instructions:

4.36.1. **Resident Programs**:

4.36.1.1. Selectees will comply with reporting instructions provided by AFIT/DP through PDS-O or by message. Code MIW, AFMAN 36-2110, Attachment 2, applies.

4.36.1.2. Military uniform is required for reporting and class attendance. Summer uniform is authorized from 1 March through 3O November.

4.36.2. **Civilian Institutions**:

4.36.2.1. Selectees will comply with reporting instructions provided by AFIT/DP through PDS-O or by message. Code MIU, AFMAN 36-2110, Attachment 2, applies.

4.36.2.2. Civilian attire will normally be worn while attending classes and functions at civilian institutions. However, periodic wear of the military uniform may be prescribed at some institutions according to AFIT instructions.

FROM: (Individual's MPF)

SUBJECT: Active Duty Service Commitment for AFIT Attendance

Please acknowledge receipt of the following information regarding your active duty service commitment:

I agree to serve the active duty service commitment which I will incur under the provisions of AFI 36-2107 (formerly AFR 36-51), table _____.* I also understand and agree to reimburse the Government for all tuition, fees, books, laboratory expenses, and other educational services which it incurred, or any portion thereof, as determined by the Secretary of the Air Force, if due to my conduct or actions, I fail to complete my obligation under this contract. The Secretary of the Air Force may waive this requirement if he or she determines such waiver is in the best interest of the Government.

_____
(Name, SSN)

*Insert appropriate table number.

Figure 4.6. Active Duty Service Commitment and Recoupment Agreement.

Section E—AFIT Professional Continuing Education (PCE) Programs

4.37. Purpose of the Programs. PCE programs include courses that are less than 20 weeks duration and conducted in residence at AFIT, civilian institutions, and other DOD and civilian facilities. They provide concentrated instruction in specialized subjects needed to improve the performance of Air Force and DOD personnel in their present duties or to prepare them to assume greater responsibilities. HQ AU authorizes the establishment of courses and specific quotas necessary to meet Air Force and DOD needs. Course descriptions for available AFIT Continuing Education courses are in section L. These programs are subject to adjustments based on changing requirements. More detailed course information may be found in the AFIT Catalog, Defense Management and Education Training Catalog (DOD 5010.16c), and the Educational Information Bulletins available at base education offices.

4.38. The Civil Engineer and Services School (AFIT/CE). One of three resident schools of AFIT at Wright-Patterson AFB. Its purpose is to provide PCE for the Air Force Civil Engineer and Services (AFCES) functional fields. Included in the school's curriculum are both technical and management courses designed to broaden and update the professional knowledge of engineering, management, or services doctrine. AFIT and the Civil Engineer and Services School are accredited by the Commission of Institutions of Higher Education of the North Central Association of Colleges and Schools. All courses are offered for continuing education units (CEU) credit. The entire curriculum is reviewed annually by the MAJCOM DCSs for Engineer and Services, and courses are revised, added, or deleted according to the current needs of Air Force Civil Engineer and Services. The school is the Air Force focal point for education and training development of civil engineer and services officers and officer-equivalent civilians (GS-7 or above). In addition, this school offers courses for personnel who are not in civil engineer or services career fields on subjects for which the Director of Civil Engineer and Services, HQ USAF, has been designated OPR.

4.39. School of Systems and Logistics (AFIT/LS). Located at Wright-Patterson AFB, this school conducts Air Force and DOD continuing education courses to provide professional education in logistics and management areas related to military and senior civilian duty assignments. AU authorizes establishment of these logistics-oriented courses to meet both Air Force and DOD requirements.

4.40. Civilian Institution Programs (AFIT/CI). Located in AFIT Headquarters at Wright-Patterson AFB, AFIT/CI manages PCE programs conducted at selected civilian education and medical institutions throughout the US. These programs are designed to meet specific Air Force requirements and include courses which generally coincide with regular university curricula. In instances where unique Air Force requirements exist, special courses of study may be developed.

4.41. PCE Applications and Processing:

4.41.1. Quotas are allocated through training management system (TMS) to the MAJCOM or FOA. Personnel who want to attend continuing education courses should apply to the unit education and training officer for submission to the MAJCOM.

4.41.2. Candidates should refer to the course descriptions in section L of this chapter to determine unique course eligibility requirements.

4.42. PCE Selection and Notification:

4.42.1. MAJCOM and FOA functional managers suballocate quotas through TMS.

4.42.2. AFIT notifies the nominees' MAJCOM through TMS of their approval or disapproval for requested courses.

4.42.3. For the Civil Engineer and Services School, the MAJCOM submits one copy of DD Form 1556 or application letter with the following information: name, grade/rank, SSN, duty organization address, base and ZIP code, MAJCOM, DSN number, duty title with brief description of duties, length of time in career field, length of time in current job, educational level, course number and offering, dates of course desired, and security clearance to

AFIT/CEA (Academic Support Division), 2950 P Street, Bldg 643, Wright-Patterson AFB OH 45433-7765. Quotas will be cancelled if AFIT/CEA does not receive the MAJCOM's application at least 30 days before course start date.

4.43. PCE Costs and Reimbursements:

4.43.1. Per diem, travel, and tuition costs for Air Force military and civilian personnel are paid by AFIT with the following exceptions:

4.43.1.1. For Reserve Forces, AFIT pays tuition only.

4.43.1.2. For the Military Assistance Program (MAP), AFIT pays tuition only.

4.43.1.3. When using the AFIT TDY fund citation, all special authorizations including travel by private auto (TPA) more advantageous to the government, special conveyance (rental car—GSA, GSA contractor, private rental), excess baggage, variations in itinerary, and registration fees, etc., must be approved by AFIT before issuance of orders.

4.43.2. Orders for Air Force civilians must specify per diem allowance prescribed in JTR, volume II, appendix C, part III. Civilian students are encouraged to travel by military air and are strongly urged to use government quarters to assure the most economical use of TDY funds.

4.43.3. Fund citations are provided in table 4.2. CIC for AFIT courses is 4 4 *64 A836 503000. (Insert applicable fiscal year in lieu of asterisk.)

4.43.4. When manuals and other study materials required for special courses at civilian institutions are unavailable through regular supply channels, they are supplied and paid for by AFIT through the tuition contract.

4.44. Credit for Continuing Education Courses. Effective 1 July 1974, AFIT began granting academic credit and issuing transcripts for certain continuing education courses in the School of Systems and Logistics and the School of Civil Engineering and Services. (Courses completed before 1 July 1974 are not retroactively eligible for credit.) Credit courses are designated in the course descriptions in section L. Credit for courses at civilian institutions is at the discretion of the institution. AFIT will not authorize funds for civilian institution credit. Most civilian institutions do offer credits for their courses, but the students must pay the institution fees if they want transcripts for that institution.

4.45. PCE Administrative and Reporting Instructions:

4.45.1. **Resident Programs**:

4.45.1.1. The agency issuing TDY orders provides reporting instructions, which are received through TMS. Additional reporting instructions may be sent directly to the student from the school.

4.45.1.2. For students attending the School of Engineering, send two copies of TDY orders to AFIT/ENA, Wright-Patterson AFB OH 45433 at least 2 weeks before class start date.

4.45.1.3. All students must bring at least five copies of their TDY orders when reporting to class.

4.45.1.4. Commercial limousine service is available from Dayton International Airport to Wright-Patterson AFB. Government quarters for both military and civilian students are available and reserved before students' arrival. Officers and equivalent civilians report to the VOQ office, Bldg 825, the day before class begins. NCOs report to the TAG office, building 1058, the day before class begins.

4.45.1.5. Government transportation for students is provided from the VOQ and TAQ to and from classes daily. Parking space is available for privately owned vehicles. Classes of the School of Systems and Logistics are held in Bldg 641, Area B; School of Engineering in Bldg 640, Area B; and School of Civil Engineering and Services in Bldg 643, Area B.

4.45.1.6. For military members, uniforms are required for all classes. Combination 4 is authorized year-round. Parkas are not authorized. Civilian students are expected to comply with reasonable dress and appearance standards.

4.45.2. **Civilian Institutions**:

4.45.2.1. Selectees will comply with reporting instructions provided by AFIT/DP through PDS-O or by message. Code MIU, AFMAN 36-2110, Attachment 2, applies.

4.45.2.2. Civilian attire will normally be worn while attending classes and functions at civilian institutions. However, periodic wear of the military uniform may be prescribed at some institutions according to AFIT instructions.

Section F—AFIT Medical Service Education Program Descriptions

4.46. Medical Degree-Granting Schools. Air Force officers and future officers are assigned full time to various degree granting civilian and medical institutions to attain a medical, dental, nursing, health care administration, or biomedical sciences degree. The AFIT Civilian Institution Program (AFIT/CI) located in AFIT Headquarters at Wright-Patterson AFB, manages and monitors these programs through the Health Care Education Division (AFIT/CIM).

4.47. F. Edward Hebert Armed Forces Health Professions Scholarship and Financial Assistance Program. This program awards Air Force scholarships to a select number of applicants who attend various health care institutions. Applicants may be either military or civilian. The scholarships provide for the payments of educational expenses plus a monthly stipend for studies in the fields of allopathic and osteopathic medicine, nurse anesthesia, optometry, and dentistry. The Financial Assistance Program extends to civilian applicants who are in nonmilitary residency or fellowship training programs. Recipients of this program receive a monthly stipend, an annual grant, and reimbursement of required education expenses. Students attend both programs in Reserve status, and upon graduation, they are called to active duty in the Medical, Dental, Nurse or Biomedical Sciences Corps, depending upon the discipline.

4.48. Dental Postgraduate Specialty Training. This program enables dental officers to receive graduate and postgraduate training in oral surgery, endodontics, periodontics, general dentistry, prosthodontics, orthodontics, oral pathology, and pedodontics.

4.49. Medical Residency and Fellowship Training Programs. Through this program, the Air Force sponsors physicians in AMA/AOA approved specialty and subspecialty training programs at various civilian, Army, and Navy institutions. Application forms should be requested directly from AFPC/DPMMUE, 550 C Street West, Suite 27, Randolph AFB TX 78150-4729, according to chapter 5.

4.50. Graduate Degree Programs. These programs enable selected officers in the USAF Medical Service to pursue a graduate degree at a civilian institution. The graduate degree programs are available to Biomedical Sciences Corps, Medical Corps, Dental Corps, Medical Service Corps, and Nurse Corps officers.

Section G—Prerequisites and Application Procedures for Medical Service Education Programs

4.51. F. Edward Hebert Armed Forces Health Professions Scholarship and Financial Assistance Program. Candidates refer to AFI 41-110.

4.52. Medical Corps Residency and Fellowship Training:

4.52.1. Candidates refer to chapter 5.

4.52.2. Medical Corps candidates seeking sponsorship for residency training in a civilian institution are required to gain acceptance in an appropriate program before applying.

4.53. Nurse Corps Graduate Education:

4.53.1. Graduate programs in nursing clinical specialties, nursing administration, nursing education, nurse anesthesia, and other specialties are available to selected Nurse Corps members in civilian schools or colleges of nursing accredited by the NLN or the Council on Accreditation of Nurse Anesthesia Educational Programs/Schools. Opportunities to pursue nonnursing graduate degrees are limited and must be based on Air Force needs and specific eligibility criteria. Applicants should contact HQ AFPC/DPAMN, 550 C Street West, Suite 27, Randolph AFB TX 78150-4729, for eligibility and selection criteria for all graduate programs.

4.53.2. Successful completion of the master's educational program results in the award of the master of science degree in nursing, nurse anesthesia, or designated nonnursing major. Successful completion of the doctoral program results in award of the PhD, EdD, or DNS.

4.53.3. Duration of master's-level education is 12 to 27 months depending on program selected, but may not exceed 27 months. Doctoral programs may not exceed 36 months.

4.53.4. Student prerequisites are determined by HQ USAF/SGN through HQ AFPC/DPAMN. Prerequisites are published prior to selection boards by HQ AFPC/DPAMN.

4.53.5. Selection board dates and application procedures are published by HQ AFPC/DPAMN.

4.53.5.1. Time on station requirements for duty location must be met at the time of anticipated entrance into the education program. HQ AFPC/DPAMN determines specific TOS eligibility dates. Waivers are granted only for exceptional circumstances; waiver authority is HQ AFPC/DPAMN.

4.53.5.2. Determine applicant's military availability and academic eligibility under paragraph 4.16 of this catalog.

4.53.5.3. Review the Active Duty Service Commitment (ADSC) that will be incurred as a result of sponsored graduate study under AFI 36-2107. For USUHS-sponsored study, see table 1.3, rule 5; for AFIT-sponsored study, see table 1.10, rule 23.

4.53.5.4. The Graduate Record Exam (GRE) is required for all candidates. The Miller Analogy Test (MAT) may be submitted in addition to, but not in lieu of, the GRE. Contact the local base education office for information and application forms. Applicants should plan to sit the exam no later than 4 months before the application deadline. Indicate institutional code 1827 as recipient of test scores.

4.53.5.5. Applicants must assure official copies of transcripts from all certificate programs, colleges, and universities attended are on file at AFIT/RRE prior to requesting a letter of eligibility.

4.53.5.6. If eligibility criteria in paragraphs 4.55.5.1 and 4.55.5.2 are met, apply for evaluation and letter of eligibility from AFIT/RRE according to paragraph 4.18, requesting the educational program desired.

4.53.5.7. Prepare application according to guidelines published before the selection board by HQ AFPC/DPAMN. Forward to HQ AFPC/DPAMN by deadline.

4.54. Biomedical Sciences Corps Graduate Training:

4.54.1. Graduate level (including postdoctoral training—Clinical Psychology and Podiatry Surgical residencies) programs in civilian colleges and universities are available and will be considered in those allied sciences associated with the specialty area.

4.54.2. Student prerequisites are:

4.54.2.1. Must be in a career Reserve or Regular status before entering training.

4.54.2.2. Completion of appropriate allied science degree and overall grade point average of at least 2.5 for graduate program applicants or 3.25 in an appropriate MS degree for PhD program applicants (does not apply to postdoctoral training—Clinical Psychology or Podiatry Surgical residencies). The GPA is based on a scale of A=4, B=3, C=2, D=1, F=0, for all academic course work attempted.

4.54.2.3. Completion of the GRE within 5 years preceding request for AFIT letter of eligibility with a minimum combined verbal and quantitative score of 1000 for graduate program applicants, or 1100 for PhD program applicants (does not apply to postdoctoral training-Clinical Psychology or Podiatry Surgical residencies). Information and application for this examination is available at base education office.

4.54.2.4. Applicant may not have more than 14 years of promotion list service at time of program entry (for postdoctoral training—Clinical Psychology only).

4.54.3. Application procedures are:

4.54.3.1. Request for evaluation and letter of academic eligibility from AFIT in accordance with paragraph 4.18 (does not apply to postdoctoral training—Clinical Psychology).

4.54.3.2. Send application to HQ AFPC/DPMMUW through the DBMS or equivalent commander, MAJCOM SG, and associate chief of the Biomedical Sciences Corps representing the applicant's specialty. Application must arrive no earlier than 1 February and no later than 1 August annually for consideration of school entry in the following year. (For example, submit applications 1 February to 1 August 1991 for entry July 1992 to January 1993.) Application will include:

4.54.3.2.1. An AFIT letter of academic eligibility and first indorsement thereto (does not apply to postdoctoral training—Clinical Psychology).

4.54.3.2.2. A statement by the DBMS or equivalent commander that applicant has a current physical examination (as defined by AFI 48-123 [formerly AFR 160-43]) on file and the DBMS has reviewed it and found the applicant to be physically qualified for worldwide assignment.

4.54.3.2.3. A statement by immediate commander that applicant meets the prerequisites and has no humanitarian, CHAP, or other family condition to prevent worldwide assignment upon completion of sponsored training.

4.54.3.2.4. A letter of recommendation from applicant's immediate supervisor.

4.54.3.2.5. Concurrence or nonconcurrence by the MAJCOM SG.

4.54.3.2.6. A statement by the appropriate associate chief of the Biomedical Sciences Corps that the applicant's career timing, educational background, and job-related experience for the prospective educational programs, are appropriate.

4.54.3.2.7. A curriculum vitae and college transcripts (for postdoctoral training application).

4.55. Medical Service Corps Graduate Training:

4.55.1. Graduate level programs in hospital and health care administration and computer science are offered in civilian colleges and universities and at the US Army's Baylor University Graduate Program in Health Care Administration, Ft Sam Houston TX, for officers serving in the Medical Service Corps. Opportunities also exist for Medical Service Corps officers to enter the AFIT in-residence Graduate Logistics Management or Information Resource Management courses for award of an MS Degree. Interested applicants for all programs must obtain an AFIT academic evaluation and letter of academic eligibility for selection consideration.

4.55.2. Student prerequisites are:

4.55.2.1. Must be in a career Reserve or Regular status before entering training and must have the required retainability to serve the active duty service commitment according to AFI 36-2107, table 10, rule 23, which is three times the length of the program for the first year, or portion thereof, then one-half year for each one-half year, or portion thereof, maximum of 6 years.

4.55.2.2. A bachelor's degree in an appropriate field with a GPA of at least 2.75 for graduate program applicants or 3.25 in an MS degree for PhD program applicants. The GPA is based on a scale of A=4, B=3, C=2, D=1, F=0, for all academic course work attempted.

4.55.2.3. Completion of the GRE with a minimum combined verbal and quantitative score of 1000 for graduate program applicants or 1100 for PhD program applicants or the Graduate Management Admission Test (GMAT) (formerly the ATGSB) with a minimum score of 500 for graduate program applicants or 550 for PhD program applicants. Test scores must be within 5 years preceding the request for an AFIT letter of eligibility. Applicants are encouraged to submit scores for both tests because submission of only one test may limit placement in choice of schools. Applicants may be required to undergo other testing due to particular requirements of certain civilian institutions (after selection for AFIT training and prior to school entry).

4.55.3. Application procedures are:

4.55.3.1. Request for academic evaluation and letter of academic eligibility from AFIT according to paragraph 4.18. Submit letter request to AFIT/REE.

4.55.3.2. Send application to the DBMS or equivalent commander through MAJCOM SG channels to AFPC/DPMMUS, Randolph AFB TX 78150-4729. Application must arrive no earlier than 1 February and no later than 1 August annually for consideration of school entry in the following year. (For example, submit applications 1 February to 1 August 1993 for entry July 1994 to January 1995.) Application will include:

4.55.3.2.1. An AFIT letter of academic eligibility and first endorsement thereto.

4.55.3.2.2. A statement that the DBMS has reviewed it and found the applicant to be physically qualified for worldwide assignment.

4.55.3.2.3. A statement by the immediate commander that applicant meets prerequisites and has no humanitarian, CHAP, or other family condition to preclude worldwide assignment upon completion of sponsored training

4.55.3.2.4. A letter of recommendation from applicant's immediate supervisor.

4.55.3.2.5. Request for waivers of GREs and GPAs not meeting minimum requirements will be considered on an individual basis. However, waivers will not be issued to PhD candidates.

4.56. Dental Corps Specialty Training:

4.56.1. Graduate and postgraduate programs in dental materials endodontics, general dentistry, hospital dentistry, maxillofacial prosthodontics, oral pathology, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics, prosthodontics, radiology, and TMD are available in institutions approved by the American Dental Association Council on Dental Education. The Air Force strongly encourages dental specialists to become certified by the respective American Dental Specialty Board upon completion of training. Air Force needs determine the type and numbers of specialty selections.

4.56.2. Air Force sponsored specialty training may be:

4.56.2.1. AFIT-sponsored training entirely in an ADA-approved civilian program.

4.56.2.2. A 1-year basic science program under AFIT sponsorship in a civilian institution followed by completion of a residency—in endodontics, periodontics, or prosthodontics—at Wilford Hall USAF Medical Center.

4.56.2.3. Air Force residencies at the following medical centers:

4.56.2.3.1. David Grant—4-year oral and maxillofacial surgery.

4.56.2.3.2. Keesler—general dentistry.

4.56.2.3.3. Wilford Hall—general dentistry and a 6-year oral and maxillofacial surgery program (integrated with UTHSCSA).

4.56.3. Residencies in selected specialties are periodically available at US Army, Navy, and Armed Forces Institute of Pathology (AFIP) facilities. Priority is given to filling combined military and civilian programs before AFIT sponsorship in an all civilian program.

4.56.4. Although applicants are not required to obtain an AFIT evaluation and letter of eligibility, they must:

4.56.4.1. Have completed 1 year of active duty as an Air Force dental officer before the end of the calendar year of application.

4.56.4.2. Have been selected for conditional Reserve status (CRS) before entry into the training program. A specified period of time contract (SPTC) may be granted in extenuating circumstances.

4.56.4.3. Have a current, valid, and unrestricted state dental license.

4.56.5. The application package consists of the following:

4.56.5.1. Items submitted in the format shown in figure 4.7.

4.56.5.1.1. A 250-word synopsis stating reasons for requesting Air Force-sponsored specialty training.

4.56.5.1.2. A statement by the medical group commander (or equivalent) that the applicant has a current physical examination (as defined by AFI 48-123) on file, the medical group commander (or equivalent) has reviewed the examination, and has found the applicant physically qualified for worldwide duty. Also include a statement that the applicant has no humanitarian, Exceptional Family Member Program (EFMP), or other family condition to preclude worldwide assignment upon completion of training.

4.56.5.1.3. Personnel data in the format in figure 4.8.

4.56.5.2. Items submitted under separate cover to HQ AFPC/DPAMD, Randolph AFB TX 78150-4729.

4.56.5.2.1. One official copy of dental school transcript. It must bear the seal and (or) the school official's signature. Photostatic copies are not acceptable.

4.56.5.2.2. Results of the Graduate Record Examination (GRE) Aptitude Test.

4.56.5.2.2.1. For residencies that include time at a civilian institution, the applicant's GRE test scores must meet the requirements of the civilian institution.

4.56.5.2.2.2. Use institution code of 6900 as recipient of test scores.

4.56.5.2.3. A letter from either the dental school dean or registrar explaining grade point average and class standing.

4.56.5.2.4. A letter of recommendation from the dental squadron commander (or equivalent) sent through the applicant's MAJCOM dental surgeon. If the applicant has been stationed at his or her current duty station for less than 6 months, a letter from his or her previous dental squadron commander or equivalent is also required.

4.56.5.2.5. Up to three additional letters of recommendation. (Optional.)

4.56.5.2.6. An optional interview with a designated Air Force dental specialist in the area of interest. Although the interview is not mandatory, it is highly desirable. Applicants are responsible for arranging the interview. Permissive TDY, under the provisions of AFI 36-3003, *Leave and Administrative Absence Policy*, may be authorized. Interview results are to be summarized utilizing the dental residency applicant interview form and forwarded by the interviewer directly to HQ AFPC/DPAMD.

4.56.6. Applicant selection procedures:

4.56.6.1. The Dental Education Selection Board meets during the fall of each year. The Board selects officers for entry into training for the following or subsequent calendar year.

4.56.6.2. Selectees may initiate personal efforts to gain acceptance and placement in civilian institutions only after receipt of official notification of selection from HQ AFPC/DPAMD. Upon request, HQ AFPC/DPAMD will forward the file, original transcript, and other documents to a designated institution. Selectees should use permissive TDY according to AFI 36-3003 to accomplish travel for screening interviews.

4.56.6.3. Applicants selected for civilian training must obtain an acceptance letter that indicates the effective dates of training, an outline of the training program by year (stating any periods of TDY to another institution), the approximate yearly tuition costs, and any requirement for Air Force support of research efforts in a master's degree program. Upon receipt, the applicant must forward a copy of such acceptance letter to both AFIT/CIM and HQ AFPC/DPAMD.

4.56.6.4. Selectees who do not gain entrance in a civilian program may be removed from selectee status.

4.57. Costs and Reimbursements for Medical Service Education:

4.57.1. AFIT ensures provisions are made for payment of approved tuition and expenses to Air Force students who participate in AFIT graduate Medical Service programs.

4.57.2. Graduate and postgraduate medical and dental students in clinical residencies and fellowships are reimbursed for supplies and equipment required in their professional course of training.

4.57.3. Air Force Health Professions Scholarship Program students are reimbursed for all educational expenses incurred, including books, materials, equipment, and supplies required by the schools (AFI 41-110). Students whose program requires a thesis will be reimbursed for AFIT preapproved thesis expenses.

4.57.4. Students who have prepared a master's thesis or major report in lieu of thesis are paid $100; those required to prepare doctoral dissertations are paid $200.

4.57.5. Medical Service Academic Program students receive a maximum $240 book and supply allowance annually. The entitlement is computed at $60 per fiscal quarter. Advanced payments are authorized. Students in graduate programs are limited to eight quarters reimbursement.

4.57.6. Officers authorized funds under the above paragraphs must account for their expenditures in order to receive payment or reimbursement.

4.57.7. Payments are made according to AFR 177-103, paragraph 20853.

4.57.8. Students may lack a thesis or dissertation at the end of their tour. If all other degree requirements have been completed, AU may pay tuition and fees related solely to the thesis or dissertation if individuals enroll for the thesis or dissertation in an academic term that begins not later than 1 year after reassignment from AFIT, or 1 year after their reassignment from a remote tour immediately following their AFIT program. This authority applies for only one term. If students fail at this time to submit an acceptable thesis or dissertation, later efforts should be their own responsibility. AFI 36-2107, table 13, does not apply for time used in defense of the thesis or dissertation and award of the graduate degree.

4.58. Administrative and Reporting Instructions for Medical Service Programs. Selectees will comply with reporting

instructions provided by AFIT/DPM through APDS or by message. Code MIU, AFMAN 36-2110, Attachment 2, applies.

4.59. Medical Service Continuing Education Courses:

4.59.1. **Admission Procedures**:

4.59.1.1. Certain continuing education courses (normally 3 to 10 days in duration) within civilian institutions or agencies may be attended by USAF Medical Service officers when required and authorized.

4.59.1.2. Attendance is authorized only after AFPC/DPMMUD (Dental Corps applicants) or applicant's MTF/MAJCOM (Nurse Corps applicants) or AFIT/CIME (Medical Corps, Medical Service Corps) or BSC Associate Corps Chiefs (Biomedical Sciences Corps applicants) has approved the requested course and AFIT/CIME issues a letter of authorization to publish orders to the attendees organization/orders issuing agency.

4.59.1.3. See chapter 5 for the availability, prerequisites, and application procedures for continuing education courses provided by other federal agencies.

4.59.1.4. Meetings that can be documented by brochure and subject content to reflect a continuing education of minicourses and subject areas throughout may meet the criteria for approval.

4.59.1.5. See AFI 36-2201 for special training.

4.59.2. **Prerequisites**:

4.59.2.1. Applicant must have at least 1 year of retainability upon completion of the course.

4.59.2.2. Applicant will ensure requested education is not available in schools of the uniformed services or schools of other federal agencies.

4.59.2.3. Applicants in the CONUS may not attend courses outside the CONUS. However, personnel serving overseas may attend courses conducted in the CONUS or within their immediate oversea MAJCOM theater. Attendance at intertheater courses is not allowed; for example, USAFE to PACAF.

4.59.2.4. Personnel in a sponsored military education program, such as a residency or fellowship, may be approved under this program. However, the requested education must be a requirement of the approved curriculum for completion of the overall education program.

4.59.2.5. Applicants must apply to the institution or agency to obtain acceptance and space reservation (course enrollment).

4.59.2.6. Generally, applicants will be authorized no more than one continuing education course every other fiscal year; quotas are extremely limited.

4.59.2.7. Requested course must offer at least 6 CME credit hours or 6 class hours per day.

4.59.3. **Application Procedures**:

4.59.3.1. Applicant must forward three copies of AF Form 1983, **AFIT Sponsored Medical Service Continuing Education Course Application**. Submit all copies through the department chairperson or designee for endorsement. (The department chairperson may delegate endorsing authority to the appointed education officer.) Submit endorsed applications as follows:

4.59.3.1.1. Dental Corps applications to HQ AFPC/DPAMD to arrive no later than 45 days before course start date.

4.59.3.1.2. Medical Corps, Biomedical Sciences Corps, Medical Service Corps, and Nurse Corps applications to AFIT/CIME. Applicant must forward the original of AF Form 1983. Facsimile transmittals will not be accepted.

4.59.3.2. To accommodate administrative processing, the following conditions must be met:

4.59.3.2.1. Applications should be submitted beginning 1 June through 31 July of the preceding fiscal year in which the course will be held (1 Oct through 30 Sep); quotas are extremely limited and applications should be submitted as early as possible within the above constraints.

4.59.3.2.2. A complete copy of a current course brochure must be submitted with the AF Form 1983. In lieu of a brochure, a copy of an official note or letter from the course director is acceptable. Applications submitted without current brochure or letter should be annotated with the statement: "I will forward a current brochure NLT 45 days prior to course start date." If brochure is not received 45 days prior to start date of the program, the application will be disapproved. The brochure or letter must contain the following information about the course:

MEMORANDUM FOR SGD (Base Dental Surgeon)
SG (Hospital/Clinic Commander)
MAJCOM/SGD
HQ AFPC/DPMMED
In Turn

FROM: SGD (Grade, Surname, DSN)

SUBJECT: Application for Dental Corps Training

1. I hereby apply to the annual USAF Dental Specialty Training Selection Board for training in the specialty of _____.

2. I am aware of the requirement for board certification and will seek certification at the earliest acceptable time following completion of training.

3. I am aware of the incurred active duty service commitment as prescribed in AFI 36-2107.

4. I understand that I must be serving in career status before entering training. (NOTE: Career status is not required at time of application.)

5. I have not and will not contact or negotiate my acceptance or entrance into any civilian institution before I am officially notified of my selection by the Dental Education Selection Board.

_____
(applicant's signature block)

(signature) (date)

Figure 4.8. Personal Information Attachment to Application for Dental Training.

4.59.3.2.2.1. Program title.

4.59.3.2.2.2. Inclusive program dates.

4.59.3.2.2.3. Specific location of program.

4.59.3.2.2.4. Description of program subject matters.

4.59.3.2.2.5. Professional certification of program.

4.59.3.2.2.6. Actual tuition costs, not estimated.

4.59.3.2.2.7. Number of contact hours offered and/or schedule of sessions with times.

4.59.3.2.2.8. Name and address of sponsoring institution or agency.

4.59.4. Administrative and Reporting Instructions:

4.59.4.1. Seldom will special authorizations be approved; however, if justified, a written request, including detailed cost comparison, will be completed by the applicant and submitted with the AF Form 1983. Insufficient justification will result in disapproval. Justification must be based on significant advantage to the government. Convenience to the traveler is never a reason for approving any special authorization. Only AFIT may approve the special authorization. No special authorization will be included on TDY orders without this approval.

4.59.4.2. Applicants must make all of their own arrangements for the course—registration, housing, transportation, etc. Ensure commercial air reservations are made through the local transportation office or SATO as soon as possible in an effort to use discount air fare. Military air should be used if available.

4.59.4.3. When HQ AFPC, MAJCOM/SGN, or AFIT approves an application, AFIT/CIME will forward issuance of orders authorization and reporting instructions to the applicant's organization/orders issuing agency. The organization or orders issuing agency will publish the TDY orders.

4.59.4.4. If applicant will not attend the course as scheduled, he or she will cancel enrollment arrangements made with the sponsoring institution and submit written notification, endorsed by the supervisor or someone in the chain of command and noting any penalties incurred for such cancellation, to AFIT/CIME. The Air Force will not be responsible for any late cancellation penalties unless the applicant was directed to cancel for mission essential or emergency reasons.

4.59.4.5. When acceptance for enrollment is pending and the applicant receives notification of nonacceptance or course cancellation, immediately notify, in writing, AFIT/CIME and applicant's organization or orders issuing agency. Forward an information copy for Dental Corps to MAJCOM/SGD.

4.59.4.6. AFIT funding consists of travel, per diem, actual tuition and other required course costs. Travel and per diem reimbursement are in accordance with JTR, volume I.

4.59.4.7. Applicants are required to pay authorized tuition fees directly to the sponsoring institution or agency. Upon issuance of TDY orders, applicant may collect advance tuition from their local accounting and finance office. If advance tuition is required to gain acceptance or space reservation in a particular course or receive a reduced rate, applicants must pay this tuition and collect reimbursement from their local accounting and finance office upon issuance of TDY orders. To ensure reimbursement, the applicant's organization should contact HQ AFPC/DPMMUD or MAJCOM/SGN or AFIT/CIME for tentative course approval before expending funds.

4.59.4.8. In the event of unforeseen course fees, applicant must provide AFIT/CIME a letter signed by the course director stating that expenses in addition to the tuition fee, such as books, etc., not known at time of course enrollment, were a required part of the course curriculum. Applicant may forfeit authorization for reimbursement without this documentation.

4.59.4.9. Depending on the circumstances, AFIT may not authorize reimbursement for late enrollment fees.

4.59.4.10. Applicants approved for a continuing education course will receive an ADSC according to AFI 36-2107, table 1.10.

Section H—AFIT Nonresident Programs (PCE)

4.60. School of Systems and Logistics:

4.60.1. **Onsite Program**:

4.60.1.1. Courses offered through the onsite program parallel the resident courses and enable organizations with large training requirements to efficiently and simultaneously upgrade the skills and knowledge of their staffs. Approval of an onsite course request is based on having at least 25 qualified students within the local area (including, for most courses, 7 to 10 students from an organization other than the requesting organization), timely submission of the request, and AFIT/LS faculty availability. Student TDY expenses, if any, are the responsibility of the student's organization. Exceptions require approval by HQ AU/XP. The following courses are available for onsite presentation (other courses may be presented, but requests for them must be coordinated with AFIT/LSA):

WLOG 262 Applied Maintenance Management Concepts

WPPM 151 Industrial Property Administration

WPPM 152 Contract Administration

WPPM 153 Production Management I

WPPM 300 Advance Property Administration

WPPM 301 Contract Management of Civilian Engineering Programs

WPPM 302 Government Contract Law

WPPM 304 Advance Contract Administration

WPPM 305 Production Management II

WPPM 306 Contractural Aspects of Value Engineering

WQMT 170 Principles of Contract Pricing

WQMT 345 Quantitative Techniques for Cost and Pricing Analysis

WQMT 372 Reliability SYS 360 Evaluation of Cost Schedule Control Systems Criteria

WSYS 361 Surveillance of Cost Schedule Control Systems

4.60.1.2. Direct inquiries to AFIT/LSA, DSN 785-6335.

4.60.2. **Seminar Program**:

4.60.2.1. The seminar program meets training requirements that cannot be met by resident and onsite programs. It provides a highly flexible (geographic as well as organizational) medium for students who cannot attend the equivalent course in residence. Seminars are open to military personnel and civil service employees, and prerequisites are the same as for the resident courses. Approval of a seminar is based upon having an AFIT-approved facilitator and at least 12 prospective students who meet the course prerequisites. To process a request for a seminar, it is necessary to prepare a seminar application at least 30 days prior to the preferred start date. Course materials are provided at no cost to any DOD organization. Seminars are available in five courses: WSYS 028S, WSYS 100S, WSYS 225S, WPPM 3025, and WQMT 020S.

4.60.2.2. Inquiries may be directed to AFIT/LSA, Seminar Program Manager, DSN 785-6844.

4.60.3. **Correspondence Courses**:

4.60.3.1. The AFIT/ECI Correspondence Program meets training requirements not met by resident and onsite programs. It is for students who cannot attend the residence course. Presently, five courses are available for enrollment: 6601, Introduction to the Quality Function; 6608, Introduction to Provisioning Management; 6610, Principles of Contract Pricing; 6611, Introduction to Acquisition Management; and 6612, Introduction to Logistics. Courses on government contract law, value engineering, materiel management, introduction to labor relations for Air Force supervisors, and contract administration have been deactivated. Correspondence courses are open to officers and enlisted personnel of the Air Force, Army, Navy, Marine Corps, and Coast Guard on active duty and members of the USAFR and ANG, as well as civil service employees.

4.60.3.2. Enrollment application should be made on Extension Course Institute (ECI) Form 23, ECI Enrollment Application. Obtain these forms at your base education office. For those without access to a base education office, forms may be obtained by writing the ECI registrar at ECI CADRE/EDEOR, Maxwell AFB-Gunter Annex AL 36118-5643. For further information, consult the USAF ECI Catalog or call the ECI registrar at DSN 596-4331; (205) 416-4331.

4.60.3.3. There is also an equivalency exam offered through ECI for SYS 100, Introduction to Acquisition Management (and SAS 001 taught at Brooks AFB). Register for this equivalency exam through the base education office.

4.61. The Civil Engineer and Services School:

4.61.1. **Onsite Program**:

4.61.1.1. The Onsite program provides continuing education to base civil engineering and MWR and services personnel at their home base. Two advantages of this program are: (1) cost of transportation and per diem is reduced, and (2) courses are provided to students who may otherwise be unable to attend. These courses are the same as the resident version, and course credits are awarded. AFIT normally funds instructor travel and per diem and provides all educational materials. Should AFIT TDY funds be unavailable, requesters may consider funding instructor TDY costs. The requesting agency is responsible for funding student travel and per diem. Onsite courses are normally provided to overseas commands although the school will consider all requests on an individual basis. Requesting agencies will arrange billeting and local transportation requirements for instructors. Certain scholastic resources, such as appropriate classrooms, video players, monitors, 35mm slide projectors, chalkboard, overhead projector, screen, and flip chart stand, must be available for a successful educational program.

4.61.1.2. Several courses are available for onsite presentation. Examples of onsite courses include: Air Base Combat Engineering; Civil Engineering and Services Management Applications Regional Seminar; Environmental Compliance Assessment Management Program; and Mortuary Affairs. Contact the appropriate department for information on other courses.

4.61.1.3. Onsite courses should be requested by MAJCOMs and bases by letter to the Dean, The Civil Engineer and Services School, Air Force Institute of Technology, 2950 P Street, Bldg 642, Wright-Patterson AFB OH 45433-7765. Requests must be signed by a MAJCOM director, deputy director, organization commander, or other personnel higher in the chain of command.

4.61.2. **Seminar Program**:

4.61.2.1. The seminar program provides continuing education to base civil engineering, MWR, and services personnel at their home base in five general subject areas: engineering design and programming, engineering management, environmental management, environmental restoration management, and MWR and services management.

4.61.2.2. Numerous topics are available through the seminar program, each designed to meet the specific needs of the requester. The following topics are examples of seminars in the five general subject areas: engineering design and programming—architect-engineer contract management, construction contracts, construction cost estimating, HVAC control systems, industrial water treatment, national electrical code, pavement maintenance and repair, paver, protective coatings, short circuit analysis and coordination, combat engineering, project programming; engineering management—customer service, financial management, zonal maintenance management, quality management, theory of constraints, housing management; environmental management—ECAMP, environmental impact analysis process, environmental protection committee, hazardous waste management; environmental restoration management—installation restoration, restoration project management, restoration contracting; MWR and services management—customer service, mortuary affairs, MWRS flight management. Contact the appropriate department for information on other available topics.

4.61.2.3. Seminars should be requested by MAJCOMs and organization commanders by letter to the Dean, The Civil Engineer and Services School, Air Force Institute of Technology, 2950 P Street, Bldg 642, Wright-Patterson AFB OH 45433-7765. Requests must be signed by a MAJCOM director, deputy director, organization commander, or other personnel higher in the chain of command.

4.62. School of Engineering:

4.62.1. **Onsite Courses**:

4.62.1.1. These courses are identical to the full-time PCE courses offered in residence, and they are designed to economically improve and update the analytic and applied engineering capabilities of Air Force officers and civil service technical personnel. Such courses stress application and typically have example exercises and outside reading. Course completion certificates are awarded to attendees. Onsite presentations are based on having at least 15 full-time students. The MAJCOM provides funds for any student TDY needed for onsite courses. Exceptions require approval by HQ AU/XP. The following courses are available for onsite presentation; additional

courses may be generated by AF Form 19 or the AFIT/ENA Annual Program Call. (See section I for course descriptions.)

WENE 451 Modulation Theory

WENE 452 Random Signals and Noise

WENE 453 Stochastic Communication Theory

* WENE 461 Introduction to Microprocessors

WENE 462, Computer Communication Networks

* Laboratory facilities required.

4.62.1.2. Requests for onsite presentations should be submitted through PMS according to annual screening instructions. Inquiries may be directed to the Professional Continuing Education Branch, AFIT/ENA, DSN 785-5241.

4.62.2. **Seminar Program**:

4.62.2.1. This program provides technical managerial overviews of various topics at the request of a MAJCOM or operating agency. Overview seminars typically last from 1 to 3 half days, do not have homework or outside reading requirements, and do not award completion certificates. Overview seminar presentations are based on having approximately 20 students. Examples of topics are: Spread Spectrum Techniques, Introduction to Radar, Fiber Optics, and Electronic Switching Systems.

4.62.2.2. Requests for a seminar overview presentation may be made by the MAJCOM's response to the annual Program Call or by direct request to the Professional Continuing Education Branch, AFIT/ENA, DSN 785-5241.

Section I—Air University - Professional Military Education (PME) Course Announcements

Professional Military Education (PME) is education in the profession of arms and the employment of forces. It provides and develops the skills, knowledge, understanding, and appreciation required of leaders in the nation's armed forces.

Air War College—Highest-level Air Force service school. The mission of the Air War College is to educate senior officers to lead at the strategic level in the employment of air and space forces, including joint operations, in support of national security.

Air War College (Resident Program)—PDS Code D—Maxwell/10 mo/MASL D171010—Jan 96

Focus is on developing senior officers who are able to think strategically, critically, and analytically. In doing so, the College will better prepare these officers to deal with both current and future environments as they relate to the effective employment of air and space forces--with emphasis on joint and combined operations--in support of US national security interests. The overarching areas of leadership, airpower, strategy, and joint operations guide instructional blocks dealing with, for example: conflict and change, and what drives nations to make war or peace; military history, doctrine, strategy, and airpower, and their tie to the evolution of war and operations other than war; national and international security issues and relationships, and the strategic policy decision-making processes used to address such issues; the effective employment of an integrated joint forces team to bring the military arm of national power to bear in winning our nation's wars; and the moral and ethical implications and accountability required of leadership to responsibly and effectively lead large and complex organizations in the dynamic, strategic environment of today and tomorrow. Elective studies and regional field studies are a large part of the curriculum and are student tailored to cover areas of high interest and importance to future senior leaders. The curriculum meets requirements and guidelines for Phase I Joint Professional Military Education (JPME). Active duty Air Force and other US military service officers as well as officers of the Guard and Reserve forces, select international officers, and civilians from US government departments and agencies may attend.

Prerequisites: All officers attending the AWC will be lieutenant colonels or colonels or the equivalent Navy rank. Prerequisites for civilians, ANG, and USAFR officers are in pertinent chapters of AFI 36-2301, *Professional Military Education.*

Selection Procedures: Active duty line officers become eligible for resident SSS attendance upon their selection for promotion to Lt Col and Col. Lt Cols are eligible to compete for in-residence SSS until considered in the promotion zone for Col. Col and Col selectees must have been promoted to Col (at least one below-the-zone promotion to Maj, Lt Col, and/or Col) to be eligible for SSS consideration. Col and Col selectees must have fewer than 23 years of total active federal commissioned service (TAFCS) at class graduation. Annually, MAJCOMs and equivalent levels nominate candidates to meet a central selection board at AFPC for specific school assignments. Nominations are based on a "best qualified" method. Medical, legal, and chaplain officers are selected by their respective agencies. Not all officers will attend. Selection procedures for civilians and ARC officers are contained in AFI 36-2301 (formerly AFR 53-8).

Special Requirements: Top Secret/SCI clearance, based on a current SSBI, is required for access to SCI. PCS orders should state that the individual has a Top Secret clearance based on an SSBI. If SCI is current, transfer IAW USAFINTEL 201-1. If a TS/SSBI has not been completed, AF Form 899, block 26, must show the date when DD Form 398 was submitted. (NOTE: This requirement applies to U.S. classmembers only.) Prior to arrival, officer must have, or have made application for, an official passport, which must be valid through at least the month of August following graduation.

Admin and Reporting Instructions: ARC officers are to be placed on Reserve orders for school training and assigned to AWC. Servicing MPF for these officers will be Maxwell MPF. Orders assigning students to AWC must confirm security clearance.

For International Officers only: Quotas allocated by AFSAT/TO. International officers must meet the following additional criteria: grade equivalent to an Air Force lieutenant colonel or colonel; minimum ECL score of 80; and completion of international officer school preparatory course (MASL D171011). Course is unclassified for international students. Advise CPD/FA of student's ETA in Montgomery, AL, including carrier, flight number, arrival time, and number and age of accompanying dependents. Schedule arrival during normal duty hours and at least 1 week prior to class start date. Students will be met by an International Officer School official. International officers arriving unannounced during duty hours should report to Bldg 904, Maxwell AFB: during nonduty hours report to Billeting, bldg 157, Maxwell AFB. Summer uniform is authorized year-round. Service dress uniform (coat and tie) and formal uniform are required for special occasions. Comply with AFCAT 36-2223, paragraph 1.4.

Air War College Nonresident Studies—PDS Code D—1 yr/MASL D171018—Oct 96

Seminar Program. Objectives and content parallel those of the resident program. Program includes readings, and evaluation instruments. Seminars are composed of 5 to 18 students who meet regularly at military installations and receive annual visits from members of the Air War College faculty. Seminar members receive valuable experience in conducting and participating in group activities in extemporaneous presentation of ideas and viewpoints, analyzing subjects and problems in AWC curriculum, and in oral presentations and written requirements. Complete seminar requirements in 1 year, 40 sessions, with once-a-week seminars. Each student must read two books from prescribed list on elective topics upon completion of the seminars. Students must take exams on the books within 6 additional months.

Correspondence Program. Objectives and content parallel those of the resident program. Requirements are the same as those used in the seminar program. This method of completion has the advantage of guided self-study without limiting the student to a particular hour or place for meetings. This program is especially useful for those not near an active Air Force installation or for those whose schedule is such that regular meetings are difficult to attend. Students have 6 months to complete each of three volumes, but they can proceed at their own pace and complete all requirements in less than a year. Each student must read two books from prescribed list on elective topics upon completion of the third volume. Exams on the books must be taken within 6 additional months.

Prerequisites: The seminar and correspondence programs are available to lieutenant colonel selectees (or equivalent) and above, GS-13 and above, and international officers of comparable grade.

Address inquiries regarding procedures for establishing seminars and application for individual correspondence study to the Director of Nonresident Studies, AWC/NS, 325 Chennault Circle, Maxwell AFB AL 36112-6427. As a rule, eligibility waivers outside the provisions of AFI 36-2301 will not be granted.

Air Command and Staff College (Resident Course)—PDS Code L—Maxwell/40 wk/MASL D171002—Jan 96

ACSC educates mid-career officers to lead in developing, advancing, and applying air and space power in peace and war. The college's resident curriculum emphasizes the analytical and practical tools students will need as future military leaders. This book-based curriculum explores the works of many great thinkers and strategists—military and civilian. The students begin their studies by addressing the large conceptual issues of air campaigning and end with a practicum allowing the students to apply their knowledge of air and space power in a practical application. This challenging educational environment is enhanced by advanced technology including a combat applications facility which provides students an understanding of space capabilities. Also, a demanding research program fosters teamwork and team building between faculty and students and between students. The faculty helps students reach new levels of creative, analytical thought and a deeper understanding of the requisites of command and the application of air and space power. The core curriculum addresses joint operations from the Air Force perspective in support of Phase I of the Program for Joint Education (PJE).

Prerequisites: a. Air Force line officers: Major or major selectee with less than 15 years of TAFCS as of 1 January in the year of graduation and be selected by an annual selection board at AFPC.

b. Non-EAD USAFR officers: Major with less than 17 years of total service or major selectee with less than 15 years of total service and successful completion of SOS resident or nonresident program, selection by HQ USAF/RE.

c. Non-EAD Air Force ANG officers: Major or major selectee with less than 15 years of TAFCS. Major selectees must have successfully completed SOS resident or nonresident program and be selected by the National Guard Bureau.

d. Air Force civilians: GS-12 or 13 and designated by AFCPC/DPCRT.

e. US Army, US Navy, and USMC officers: Major or major selectee designated by respective service.

Special Requirements: Top Secret/SCI clearance based on a current SSBI is required for access to SCI. PCS orders should state that the individual has a Top Secret clearance based on an SSBI. If SCI is current, transfer according to USAFINTEL 201-1. If a TS/SSBI has not been completed, AF Form 899, block 26, must show the date when DD Form 398 was submitted. (NOTE: This requirement applies to U.S. class members only.)

Selection Procedures: Active duty line officers are selected for intermediate service school (ISS) candidacy by central promotion boards. Each officer's candidacy is valid for 3 years. Annually, MAJCOMs and equivalent levels nominate candidates to meet a central selection board at AFPC for specific school assignments. Nominations are based on a "best qualified" method. Selection for a specific ISS is based on the individual's background, desires, and the needs of the Air Force. Nonline officers (medical, legal, and chaplain) are selected by their respective agencies. Not all officers will attend.

Admin and Reporting Instructions: a. ANG and USAFR officers are placed on Reserve orders for school and assigned to ACSC. Maxwell MPF will service ARC officers.

b. Civilian students are placed on TDY to ACSC by their CCPO.

c. All students scheduled to attend the upcoming class should notify ACSC/DPS of current mailing address. Students may report up to 7 days before class start date. Students will call ACSC/DPS, 493-6494/7911, with local address and phone number upon arrival. Orders assigning students to ACSC must confirm security clearance.

For International Officers Only: Quotas are allocated by AFSAT/TO. International officers must meet the following criteria: grade equivalent to a US Air Force senior service captain, major, or lieutenant colonel; minimum ECL score of 70 (80 is desirable); and completion of International Officer School preparatory course (MASL D171014). Course is unclassified for international students. Advise CPD/FA, 953-6914, of student's ETA in Montgomery AL, including carrier, flight numbers, arrival time, and number and age of accompanying dependents. Schedule arrival during normal duty hours and at least 1 week prior to class start date. Students will be met by an International Officer School official. International students arriving unannounced during duty hours should report to bldg 904, Maxwell AFB; during nonduty hours report to Billeting, bldg 157, Maxwell AFB. Summer uniform is authorized year-round; winter wear is recommended. Service dress uniform (coat and tie) is required for special occasions. Comply with AFCAT 36-2223, paragraph 1.4.

Quota Control: Director of Distance Learning, ACSC/DTD.

Air Command and Staff College Distance Learning Programs (Nonresident)—PDS Code L—Maxwell/MASL D171025—Jan 96

ACSC's distance learning programs are integral to the college, paralleling the concepts presented by the resident school curriculum with a focus on war fighting at the operational level, professional skills, military history, doctrine, and jointness. The AY 96 Version 10 curricula, identical for both seminar and correspondence programs, consists of 40 lessons administratively divided into three courses. The primary difference between the two programs lies in presentation methodologies. While the correspondence program is based on guided self-study, the seminar program is structured around self-study but enhanced by an interactive group classroom environment.

Available for the first time in AY 96 Version 1.0, a computer-based interactive multimedia program. This program offers a condensed version of the resident book-based curricula in a multimedia interactive computer software application, stored on CD-ROM, using online computer and TV-satellite broadcast technology to enhance the learning experience.

Correspondence Program. The Version 10 correspondence program is specifically designed to meet the needs of individuals who prefer self-paced learning opportunities. The curriculum is presented in three blocks of instruction with 1 year allotted to complete each block. Correspondence methodologies include self-study, case studies, tabletop exercises, problem simulations, thought-provoking questions, supplementary reading, and suggested activities to enhance learning. We also recommend correspondence students check with their base education offices about the availability of ACSC seminars to audit as appropriate. Students must pass a closed-book exam for each block of instruction and successfully analyze a book on leadership.

Seminar Program. In the Version 10 seminar program, student-led seminars meet weekly for approximately 3 hours to discuss each lesson. The program uses a variety of instructional methods and delivery media to enhance its core, text-based curriculum. Group discussion, problem-solving simulations, and other active learning methods account for much of the teaching time. Examples include: computer-assisted instruction, simulations, case studies, tabletop exercises, faculty teaching visits, guest experts, panel discussions, student briefings, and videotapes. Each seminar member is required to regularly attend and actively participate in the seminar meetings. To graduate from the program, seminar members are required to lead lessons, give briefings, complete a book analysis, take closed-book examinations, and contribute to seminar discussions. Seminars run from August to June, and members complete the curriculum within 1 year of enrollment.

Version 1.0. As a follow-on to the Version 10 programs, ACSC developed an interactive multimedia program to enhance the learning experience. The new Version 1.0 program reflects the current resident curriculum and strives to narrow the difference between the resident and distant learning courses. Version 1.0 will be distributed on CD-ROM with enhancements and updates available online for computer access. The release of the ACSC multimedia edition ushers in the next generation of distance learning for our students for two reasons. First, it takes advantage of new technologies to provide the distant student greater access to the faculty and real-time assessment, feedback, and reinforcement. Second, for the first time the distance learning curriculum comes directly from the resident faculty and the book-based lessons taught to our resident students.

Eligibility. ACSC distance learning programs, correspondence and seminar, are offered to US active duty, Reserve, and National Guard major selects and above. DoD civilian employees in or above the grade of GS-11 (or equivalent) may also enroll. Civil Air Patrol (CAP) officers serving in the grade of major or above may enroll in the correspondence program, but not the seminar program. Address inquiries regarding ACSC distance learning programs to the Director of Distance Learning, ACSC/DTD, 225 Chennault Circle, Maxwell AFB AL 36112-6426.

Eligibility for International Officers. Foreign military officers and civilian employees of a military department of foreign countries or international organizations eligible for foreign military sales (FMS) training programs may request enrollment in the US Air Force PME correspondence and seminar programs under certain conditions. Individuals interested in applying for the correspondence program must send an enrollment application to the in-country US representative who will sponsor the applicants. Individuals interested in applying for the seminar program must apply through the local base education office. In both cases, applications must be accompanied by letters from their Government agreeing to their enrollment and identifying which existing FMS training case against which charges may be applied. Applications will be forwarded to HQ USAF/CVAII, Washington DC 20330, for approval.

Air Command and Staff College Associate Programs (Nonresident)—PDS Code L—Maxwell/MASL D171025—Oct 95

ACSC's nonresident correspondence and seminar programs are integral to the college, paralleling the resident school curriculum with a focus on war fighting at the operational level, doctrine, jointness, and the profession of arms. While the correspondence program is based on guided self-study, the seminar program is structured around self-study but enhanced by an interactive group classroom environment.

Correspondence Program. This program is specifically designed to meet the needs of individuals who prefer self-paced learning opportunities. The curriculum, composed of three separate blocks (A, B, and C), covers three areas of instruction: communications, history, and foundations of doctrine; combat support, policy, and joint force planning; and operational art, campaign planning and execution, and global challenges. Students must pass a closed-book exam for each block of instruction and successfully complete a book analysis and writing assignment. The time limit for completing the correspondence program is currently 4 years. This limit is under review with a proposed 18-month completion period.

Seminar Program. The 40-lesson seminar curriculum covers the same three areas of instruction as the correspondence program. Student-led seminars meet weekly for approximately 3 hours to discuss each lesson. Seminar members are required to lead lessons, give briefings, complete a book analysis and writing assignment, take closed-book examinations, and contribute to seminar discussions. Members normally complete the curriculum within 1 year of enrollment. Seminars run from August to June.

Eligibility. ACSC nonresident programs, correspondence and seminar, are offered to US active duty, Reserve, and National Guard major selects and above. DoD civilian employees in or above the grade of GS-11 (or equivalent) may also enroll. Civil Air Patrol (CAP) officers serving in the grade of major or above may enroll in the correspondence program, but not the seminar program. Address inquiries regarding ACSC nonresident programs to the Director of Associate Programs, ACSC/DED, 225 Chennault Circle, Maxwell AFB AL 36112-6426.

Eligibility for International Officers: Foreign military officers and civilian employees of a military department of foreign countries or international organizations eligible for foreign military sales (FMS) training programs may request enrollment in Air Force PME correspondence and seminar programs under certain conditions. Individuals interested in applying for the correspondence program must send an enrollment application to the in-country US representative who will sponsor the applicants. Individuals interested in applying for the seminar program must apply through the local base education office. In both cases, applications must be accompanied by letters from their government agreeing to their enrollment and identifying which existing FMS training case against which charges may be applied. Applications will be forwarded to HQ USAF/CVAII, Washington DC 20330, for approval.

USAF NCO Academy—PDS Code T—various locations/5 1/2 wk/MASL D171007—Oct 96

Provides professional military education that prepares noncommissioned officers for positions of increased responsibility by broadening their leadership and supervisory skills and expanding their perspective of the military profession. Guided discussion is the principal method of instruction in a 12- to 14-member seminar that allows students to share ideas, experiences, and work together to achieve various educational objectives. Formative evaluations are an integral part of the NCOA curriculum and serve as feedback tools for the student and instructor. Summative objective and performance evaluations are used to determine whether the educational requirements outlined in the course are met.

Prerequisites: NCOs in the grade of SSgt (ANG and AFRES only). TSgt and TSgt selectees. ECL 70. The following requirements apply to all personnel:

a. Not be on the control roster, under investigation, or charged with an offense punishable under the Uniform Code of Military Justice.

b. Be within weight standards as shown in AFI 40-502, *The Weight Management Program*.

c. Have at least 1 year of retainability after graduation from the NCOA.

d. Individuals meeting all other criteria, but having a documented permanent physical limitation (granted by medical review board), are eligible to attend school with the concurrence of medical authorities. Members with certified temporary profiles (granted by medical authority) are eligible to attend school, but recommend attendance be delayed until the temporary condition is resolved.

e. Requests for waivers to eligibility requirements must be submitted through the MAJCOM to HQ USAF/DPPE for approval. Include the medical authorities' assessment of the members' limitations as a part of the waiver request.

f. Be recommended by the unit commander.

Selection Procedures: Each MPF identifies TSgt selectees and TSgts to attend the NCO Academy based on the quotas allocated by HQ AFPC/DPPAPEO. Active-duty TSgts must complete an in-residence NCOA before assuming the grade of MSgt. ANG and AFRES will develop selection procedures for members of their organization. HQ AFPC/DPPAPEO allocates quotas to the ANG and AFRES. Members may decline attendance to the NCOA. A declination renders the member ineligible for promotion, reenlistment, or extension of enlistment. NCOs will separate on the date of separation (DOS) or expiration term of service (ETS) specified in their current enlistment contract (and extensions thereto), whichever is later. Members whose current enlistment contract enables them to obtain 18 but less than 20 years' of service are ineligible for promotion or reenlistment, but may remain on active duty until the first day of the month following retiremement eligibility. Members will decline by signing the following statement, "I refuse to attend mandatory resident professional military education. I understand refusal renders me ineligible for promotion and reenlistment, and I will retire (if eligible) or separate on the date of separation or ETS specified in my current enlistment contract, whichever is later." Members are still eligible for reassignment if there is sufficient retainability to the DOS. Declinations to attend the NCOA must arrive at the individual's MAJCOM not later than 30 calendar days before the scheduled class start date.

USAF Airman Leadership School (ALS)—PDS Code 0—various locations/4 1/2 wk—Oct 95

The ALS is an Air Force educational program implemented at the base level that prepares senior airmen for positions of greater responsibility. It provides leadership skills required of supervisors and reporting officials throughout the Air Force. ALS enhances the development of senior airmen by strengthening their ability to lead, follow, and manage while they gain a broader understanding of the military profession.

Prerequisites: SrA who has reenlisted or has 48 months of time in service or SSgt selectee. The following requirements apply to all personnel:

a. Not be on the control roster, under investigation, or charged with an offense punishable under the Uniform Code of Military Justice.

b. Be within weight standards as shown in AFI 40-502, *The Weight Management Program*.

c. Have at least 1 year of retainability after graduation from the ALS.

d. Individuals meeting all other criteria, but having a documented permanent physical limitation (granted by medical review board), are eligible to attend school with the concurrence of medical authorities. Members with certified temporary profiles (granted by medical authority) are eligible to attend school, but recommend attendance be delayed until the temporary condition is resolved.

e. Requests for waivers to eligibility requirements must be submitted through the MAJCOM to HQ USAF/DPPE for approval. Include the medical authorities' assessment of the members' limitations as a part of the waiver request.

f. Be recommended by the unit commander.

g. Once selected, attendance is mandatory.

Selection Procedures: The MPF provides the ALS commandant a list of eligible airmen by organization. The ALS commandant allocates quotas to local units based on the number of eligibles. Active-duty SrA must complete the resident ALS before assuming the grade of SSgt (unless member has completed the NCO Preparatory Course).

MAFSNCOA100—USAF Senior NCO Academy—PDS Code S—Maxwell/Gunter/7.5 wk/MASL D171029—Oct 96

Conducts an advanced professional military education program for selected senior NCOs to better prepare them for their leadership responsibilities by expanding their managerial capabilities and their

perspective of the military profession. The curriculum, designed to meet senior NCO needs, consists of lectures and small group work seminars. The principal instructional method is the 12 to 14 member discussion and problem-solving seminar. In this forum, students share ideas and experiences and work collectively to achieve various educational objectives. Members of the Academy's faculty and speakers from AU, Headquarters USAF, other commands, and civilian agencies lecture at the Academy. The Academy curriculum is based on the belief that the senior NCOs attending the course bring with them some understanding and competence in all areas of the curriculum.

Prerequisites: a. NCOs in the grade of MSgt, SMSgt and SMSgt-selectees, and CMSgt-selectees serving in the CONUS and overseas. NCOs may attend while en route PCS. The following requirements apply to all personnel:

(1) Not be on the control roster, under investigation, or charged with an offense punishable under the UCMJ.

(2) Be within weight standards as shown in AFI 40-502, *Air Force Weight Management Program*.

(3) Have a Secret clearance upon reporting to the school.

(4) Have at least 1 year retainability after graduation from the school.

(5) Wait at least 2 years between completion of an NCO Academy and the start of a USAF Senior NCO Academy class.

(6) Be recommended by the unit commander.

(7) Not have a temporary medical waiver that would prevent participation in any part of the course curriculum. Upon notification of selection to attend the AFSNCOA, prospective students must schedule a personal and medical records screening. This must be conducted by a medical authority. Document the results on AF Form 422, **Physical Profile Serial Report**, or sister service equivalent form.

a. NCOs with certified temporary medical or physical conditions that preclude meeting course requirements will not attend a class until after their temporary profile change expires.

b. NCOs with certified permanent physical limitations are eligible to attend. Before attending, each NCO must be reevaluated by medical authority.

(8) No waivers of eligibility are permitted. Unqualified students will be returned to unit of assignment at member's unit expense.

Selection Procedures:

a. Annually, HQ AFPC/DPMYME will identify SMSgt selectees, SMSgts, and CMSgt selectees to attend the SNCOA.

b. CMSgt selectees must attend the AFSNCOA before they are promoted to CMSgt.

c. Requests for changes in class preference or designation is limited to humanitarian, medical, or mission-essential reasons. Deferments based on mission-essential reasons must arrive at AFPC/DPMYME by 45 calendar days before the individual's scheduled class start date.

d. ANG and USAFR will develop specific selection procedures for members of their organizations. Quotas are allocated by the AFSNCOA/RP, with approval of the AU, on an as-requested basis.

e. The Army, Navy, Coast Guard, and Marine Corps selects individuals for attendance based on specific selection procedures for their service. Quotas are allocated by the AFSNCOA/RP, with approval of the AU Commander, on an as-requested basis.

For International NCOs: Quotas are allocated by the AFSNCOA to AFSAT/TO on an as-requested basis. NCOs will meet the following criteria: grade equivalent of an Air Force SMSgt (E-8); minimum ECL score of 80; meet the medical and physical requirements established in AFI 16-105; and possess proper physical fitness necessary to participate in a rigorous and demanding physical fitness program consisting of running, flexibility exercises, and volleyball. Required running times will begin at the Air Force standard contained in AFI 40-502 for both male and female age groups. Advise AFSNCOA of student's ETA in Montgomery, AL, including carrier, flight number, and arrival time. Schedule arrival during normal duty hours and at least 2 days prior to class start date. Students will be met by an international officer school official. Those arriving unannounced during duty hours should report to bldg 904, Maxwell AFB; during nonduty hours report to Billeting, bldg 826, Gunter Annex. International students must bring their service's equivalent of the following uniform: (1) service dress, (2) service uniform, (3) BDU (utility uniform, and (4) mess dress or semi-formal equivalent.

For All Other Students: Battle dress uniforms (BDU) and issue hat will be worn by all students (Navy Coast Guard will wear the summer khakis [which is your BDU equivalent] on specified days while attending the academy.

Members may decline attendance to SNCOA. A declination renders the member ineligible for promotion, reenlistment, or extension of enlistment. NCOs will separate on the date of separation (DOS) or expiration term of service (ETS) specified in their current enlistment contract (and extensions thereto), whichever is later. Members whose current enlistment contract enables them to obtain 18 but less than 20 years' of service are ineligible for promotion or reenlistment, but may remain on active duty until the first day of the month following retirement eligibility. Members will decline by signing the following statement, "I refuse to attend mandatory resident professional military education. I understand refusal renders me ineligible for promotion and reenlistment, and I will retire (if eligible) or separate on the date of separation or ETS specified in my current enlistment contract, whichever is later." Members are still eligible for reassignment if there is sufficient retainability to the DOS. Declination statements must arrive at AFPC/DPPAT NLT 30 days before the individual's scheduled class start date.

Quota Control: AFSNCOA/RP.

MESC001—NCO Academy Instructor Course—PDS Code WZ3—Maxwell/2 wk—Sep 93

Provides NCO Academy instructors the skills necessary to teach the course. Instructors will attend the course immediately after completing academic instructor school (AIS). Prepares instructors to teach the NCO Academy course, provides QAF instruction relevant to the course, and provides instructors with standardized program implementation policies and procedures. Attendees will be provided learning materials.

MESC002—Airman Leadership School (ALS) Instructor Course—PDS Code WZ4—Maxwell/2 wk—Sep 93

Provides ALS instructors the skills necessary to teach the course. Instructors will attend the course immediately after completing academic instructor school (AIS). Prepares instructors to teach the

ALS course, provides QAF instruction relevant to the course, and provides instructors with standardized program implementation policies and procedures. Attendees will be provided learning materials.

MSOS001—Squadron Officer School (Resident)—PDS Code Q—Maxwell/7 wk/MASL D171003—Oct 96

Improves the professional competence of company grade officers and inspires their dedication to the profession of arms. Instruction is in officership values, application, leadership tools, and air and space power. Course assists the development of the whole person into a seasoned professional officer capable of increased contributions to varied Air Force missions. A small number of international officers, DOD civilians, and nonactive duty Reserve and ANG may attend.

Prerequisites: Active-duty Captains with more than 4 and less than 7 years of TAFCS who are not in a failed or deferred promotion status are eligible to attend SOS. Officers who have less than 4 years' TAFCS must get a waiver through HQ USAF/DPPE. Officers with more than 7 years' TAFCS may attend with a MAJCOM waiver. Any waiver must be annotated on the student's orders. If the officer is to return to an oversea duty station after attending SOS, his or her commander will schedule SOS attendance to ensure the officer has at least 120 duty days remaining upon return to the overseas duty station. Officers completing a short tour may attend TDY en route to their next assignment.

Special Requirement: Secret clearance by class start date for US military and DOD civilian students.

Selection Procedures: AFPC allocates quotas to each MAJCOM, FOA, and DRU proportional to the number of eligible officers assigned. MAJCOMs, FOAs, or DRUs may reallocate quotas and delegate to subordinate units the responsibility to designate best qualified officers as primary and alternate resident SOS attendees. Eligible health care and legal officers are selected by their respective MAJCOM staff agency. Students must have a completed certification of qualifications (attachment to the commandant's welcome letter) completed not more than 30 days before departing TDY to attend SOS. The form states that the student is not subject to temporary occupational or duty restrictions and has no chronic medical conditions that preclude active participation in the SOS physical conditioning or field leadership program; the student meets weight and body fat standards; the commander concurs with information above and is aware of student's accompanied or nonaccompanied status. Officers or civilians with temporary medical or physical conditions such as overweight, fractures, pregnancy, torn ligaments, or surgical recovery will attend a later class after becoming medically capable of participating in the SOS physical conditioning and field leadership program and passing the annual physical fitness test specified in AFI 40-502. Officers with any medical or physical restrictions must obtain a permanent profile change prior to reporting to SOS. Officers and civilians must be within Air Force weight standards according to AFI 40-502. Selection agencies (MAJCOM, FOA, and DRU) are encouraged to the maximum extent possible to time attendance of officers at SOS to coincide with PCS moves. Officers who want to attend SOS TDY en route are encouraged to send a request through appropriate channels.

Admin Instructions: TDY orders must include date of temporary grade for all active duty officers and permanent date of rank for ANG and USAFR (non-EAD) officers. The orders must show that the student completed the certification of qualifications within 30 days of the student's enrollment at SOS.

For Air Force Reserve (AFRES) only: Air Reserve technicians (ART) must meet the military grade requirements for attendance at SOS.

For International Officers Only: Quotas are allocated by AFSAT/TO. International officers will meet the following criteria: grade equivalent to an Air Force lieutenant, captain, or junior major; minimum ECL 70; completion of the International Officer School preparatory course; minimum medical/physical requirements established in AFI 16-105; and proper physical fitness necessary to participate in a rigorous and demanding physical training program. Advise CPD/FA of student's ETA in Montgomery, AL, including carrier, flight number, arrival time, and number and age of accompanying dependents. Schedule arrival during normal duty hours and at least 1 week prior to class start date. Students will be met by an International Officer school official. Those arriving unannounced during duty hours should report to bldg 904, Maxwell AFB; during nonduty hours, report to Billeting, bldg 157, Maxwell AFB. Summer uniform is authorized year-round. Service dress uniform (coat and tie) is required for special occasions. Comply with AFCAT 36-2223, paragraph 1.4.

For DoD Civilian Students Only: A total of 125 civilian authorizations (5 classes per year; 25 students per class) are available. All GS-09 and above civilian employees with at least 3 years of continuous civilian service are eligible for SOS. While not mandatory, possession of a bachelor's degree is highly desirable since all military who attend SOS have degrees. Also, the ability to meet the physical and weight standards identified in AFI 40-502 is mandatory. Selection Procedures: Nominations will be made by supervisors or career programs and reviewed by boards at MAJCOM and career program level. Boards or supervisors should consider the career potential as well as physical ability of the individual for this demanding course. Candidates should complete the special nomination format for SOS available at their CCPO. CCPOs should forward nomination packages through MAJCOMs, and MAJCOMs should convene appropriate panels to prioritize the nominations before submission to HQ USAF/DPCS. A special adjunct Air Force selection panel will make the final selections. Civilian students must also complete the certification of qualifications (attachment to the commandant's welcome letter) not more than 30 days before departing TDY to SOS.

MSOS001—Squadron Officer School Associate Program (Nonresident)—PDS Code Q—Maxwell/18 mos—Apr 95

The SOS nonresident program parallels the resident program. It is divided into four courses: officership, staff communications, leadership, and force employment. Officership focuses on the student's unique role as a commissioned officer and responsibilities inherent in an officer's position of trust and confidence. Course study includes various concepts and perspectives on officership, leadership, and officer obligations. Staff communications is a programmed text which teaches the student to write and speak in a well organized, well supported, concise manner. Leadership helps students develop a more accurate concept of human behavior. Students also learn how to improve their abilities to lead, follow, and manage so they can positively influence group morale, cohesion, and effectiveness. Force employment defines the arena where professional Air Force officers operate by examining national objectives, doctrine, and strategy, and the roles and mission of the Air Force and the other services.

Eligibility: Any US armed forces officer (active duty, Reserve, or National Guard) in the grade of Captain or above is eligible. Commissioned officers of the Civil Air Patrol in the grade of Captain and above and US federal civilian employees in the grade of GS-9,

WG-10, WL-9, and WS-8 and above are eligible. Eligibility criteria and procedures for enrollment by international officers are described in AFI 36-2301.

Length: The SOS nonresident program is 18 months long which includes mail time, administrative processing time, and posting of grades. NOTE: Exams are mailed via first class mail and average 7 days for stateside delivery and 14 days for overseas delivery. Course materials (via fourth class mail) average 21 days for stateside and 42 days for overseas delivery.

Testing: Students must pass a multiple choice exam for each course. Students are permitted one retest per failed exam.

Penalties: Students who fail a retest are restricted for 6 months from reenrolling in the program. Students who fail to complete the program within 18 months of enrollment will be terminated from the program and restricted for 6 months from reenrolling in the program.

Section J—Air University Professional Continuing Education (PCE) Course Announcements

Professional Continuing Education (PCE) provides short course instruction in a broad range of essential educational programs to meet specific skills and functional competencies required in designated career fields. PCE provides students with the opportunity to think critically, plan strategically, and gives students the ability to apply those skills and knowledge to undefined future programs and challenges.

COLLEGE FOR PROFESSIONAL DEVELOPMENT (CPD)

MAFJAG600—Judge Advocate Staff Officer Course—PDS Code WXD—Maxwell/8 wk/MASL D176001—Jun 90

Provides judge advocates with a foundation in the principles and concepts of military law and the art of advocacy in the military setting. Emphasis is placed on those areas of the law most frequently performed by base-level judge advocates. The course adapts professional skills to the Air Force in order to increase each judge advocate's potential as a member of the commander's staff.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from officers in the grade of first lieutenant or captain who have been selected to perform judge advocate duties. Selectees have fewer than 18 months' duty as judge advocates. ECL 80.

Admin and Reporting Instructions: Students should hand-carry eight copies of their orders.

Quota Control: HQ USAF.

MAFJAG610—Staff Judge Advocate Course—PDS Code QWA—Maxwell/2 wk—Jan 96

Provides judge advocates selected to be senior legal advisors to commanders with legal and management principles and concepts which will enhance the quality of their legal advice and their ability to provide timely mission support.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from Air Force officers in the grades of captain through colonel who are serving or have been selected to perform the duties of staff judge advocates.

Special Requirements: A Secret clearance is not required for course attendance, but show the Secret clearance in the orders of those selectees who have one.

Quota Control: HQ USAF/JA.

MAFJAG623—Reserve Forces Paralegal Course—PDS Code WVT—Maxwell/2 wk—Apr 95

Application of Manual for Courts-Martial and Air Force policy and procedures in the administration of military justice, legal organization, and functions; examine papers for pretrial, trial, posttrial, and Article 15. Legal office administration procedures including legal research and assistance and the law library. Claims administration including investigations and processing claims, and microcomputer.

Prerequisites: Must have completed the paralegal apprentice course (or former equivalent) and have applied those tasks and knowledge as a reservist over a period of at least 3 years.

Quota Control: HQ USAF/JA.

MAFJAG630—Military Judges' Seminar—PDS Code STP—Maxwell/1 wk—Jan 96

Provides interservice judges with a forum for discussion and resolution of commonly experienced problems affecting the judge's pretrial, trial, and post-trial role in courts-martial. Seminar topics include discussion and analysis of the judge's responsibilities at trial, courtroom procedures, the rules of evidence, and recent court decisions impacting significantly on judges.

Prerequisites and Selection: Active duty and Reserve officers in the grades of major through colonel (or equivalent), who are currently sitting or have been selected to sit as military judges and have previously served as military judges, are selected by the Judge Advocate General of each service.

Quota Control: HQ USAF/JA.

MAFJAG640—Law Office Managers Course—PDS Code TW9—Maxwell/2 wk—Dec 86

Provides NCOs in charge of base-level legal offices with an overview of various legal areas that will enhance their understanding of the law, and provides them with the principles and concepts of office management to improve their effectiveness in supporting the mission.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from Air Force NCOs in grades of SSgt through MSgt who are or have been selected to serve as NCOIC of wing or base-level legal offices.

Quota Control: HQ USAF/JA.

MAFJAG650—Air Force Claims and Tort Litigation Course—PDS Code 0G0—Maxwell/2 wk (nonlawyer), 2 wk (lawyer)/MASL D176002—Dec 90

Provides claims and supervisory personnel an understanding of the principles and concepts of claims and tort processing, settlement and litigation. Also provides them an understanding of claims organization, procedures and management philosophy to improve their effectiveness in handling claims and related issues.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from individuals serving or selected to serve as claims officers or first-level supervisors engaged in claims and tort litigation activities. Selectees are in the grades of first lieutenant through lieutenant colonel (officer), staff sergeant through chief master sergeant (NCO), and GS-5 through GS-13 (civilian).

Quota Control: HQ USAF/JA.

MAFJAG660—Federal Employee and Labor Law Course—PDS Code 1P4—Maxwell/1 wk 2 days—Jan 96

Provides Air Force judge advocates and civilian attorneys with an understanding of the principles and concepts of civilian personnel management and litigation to enhance the effectiveness of attorneys providing advice to commanders on civilian personnel matters. The course is organized into five curriculum areas: principles of federal civilian employment law, litigation before the Merit Systems Protection Board, equal employment opportunity, labor-management relations, and practice and procedures in administrative proceedings. The first area includes instruction on the regulatory and procedural rules of Government appointment and related matters. The second area concerns employee discipline and appeal rights. The third area addresses the statutory and regulatory framework for equal employment opportunity in the Air Force. The fourth area emphasizes unfair labor practices, the obligation to bargain, the judge advocate's role in the collective bargaining agreement, alternative dispute resolution, and arbitration. The fifth area explains the tactical approaches that must be considered before an administrative hearing.

Prerequisites and Selection: The Judge Advocate General, US Air Force, selects judge advocates and civilian attorneys who are engaged in advising Air Force management and representing the Air Force in proceedings involving civilian personnel. Graduates of the course will perform as labor relations counsel and management representatives at the base, major command, or headquarters level.

Quota Control: HQ USAF/JA.

MAFJAG670—Environmental Law Course—PDS Code 4B1—Maxwell/1 wk—Jan 96

Provides attorneys having primary responsibility for addressing and resolving environmental law issues with instruction on potential environmental law problems, liability issues, violations procedures, and litigation support. Federal and state jurisdiction, statutes, regulations, case law, federal policy, and the environmental impact process are also covered to enhance the ability of attorneys to operate in this highly technical area.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from judge advocates and Air Force civilian attorneys performing or selected to perform in positions providing advice and representation on environmental issues.

Quota Control: HQ USAF/JA.

MAFJAG680—Trial and Defense Advocacy Course—PDS Code 6CS—Maxwell/2 wk—Jan 96

Provides judge advocates having limited courtroom experience with lectures, faculty demonstrations, and exercises designed to improve their advocacy skills. During the first week, students prepare and present voir dire, opening statements, direct and cross examinations, and findings and sentencing arguments to experienced trial practitioners, who then critique the strengths and weaknesses of the exercise and make recommendations to enhance the students' advocacy skills. Each exercise is videotaped and then critiqued by another faculty member. Students then perform the exercise again before one or more additional faculty members. This format maximizes each student's opportunity to practice their advocacy skills and exposes them to a variety of experienced trial practitioners. During the second week, students conduct a fully litigated court-martial through the findings phase. After the trial is completed, students are provided an extensive critique by one or more faculty members. Students receive a case file and related materials several weeks in advance of the course and are tasked to prepare a trial brief prior to the start of the course. Extensive preparation is thus required prior to the start of the course.

Prerequisites and Selection: The Judge Advocate General, US Air Force, makes selections from certified trial and defense counsel who are nominated by their staff judge advocates or chief circuit trial or defense counsel.

Quota Control: HQ USAF/JA.

MAFJAG690—Advanced Trial Advocacy Course—PDS Code 6AT—Maxwell/1 wk—Jan 96

Provides experienced lawyers, serving or selected to serve as circuit trial and defense counsel, with lectures and exercises designed to enhance and sharpen their advocacy skills. Technical areas such as forensic evidence, toxicology, expert testimony, demonstrative evidence, and psychiatry are addressed through lectures, demonstrations, and practical exercises. Students will receive a case file and related materials several weeks in advance of the course. Extensive preparation is required prior to the start of the course.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from experienced trial and defense counsel who have previously attended the Trial and Defense Advocacy Course. Most of these judge advocates are, or have been selected to become, circuit trial or defense counsel.

Quota Control: HQ USAF/JA.

MAFJAG700—Operations Law Course—PDS Code 82V—Maxwell/1 wk/MASL D176005—Jan 96

Provides students with background materials in the complexities of Air Force operations in the international arena. Topics include operational planning, the role of the JCS and unified commands, military justice during deployments and conflicts, law of armed conflict, legal assistance before and during deployments, deployment-related claims, rules of engagement, combined and joint operations, and contingency contracting.

Prerequisites and Selection: The Judge Advocate General, USAF, will select attendees from judge advocates who may be deployed overseas or perform duties involving international operations. ECL 80.

Special Requirements: A Secret clearance is required for course attendance and will be shown on the orders of course attendees.

Quota Control: HQ USAF/JA.

MAFJAG710—Air Force Systems and Logistics Contracting Course—PDS Code PDN—Maxwell/1 wk—Jan 96

Affords a comprehensive, indepth understanding of major defense systems procurement law. Acquisition and logistics are covered at an advanced level, from initiation of the contracting process through award, including post-award administration and dispute resolution. The format is primarily lecture, with round-table seminar discussions as a supplement. This is a distance learning course and may be audited by students who do not meet formal prerequisite and selection criteria.

Prerequisites: Juris Doctorate, plus completion of the Army JAG School course in Government contracts. At least 6 months of practical experience in major defense systems acquisition is recommended, but not required.

Quota Control: HQ USAF/JA.

MAFJAG720—Paralegal Advanced Law Course—PDS Code PDP—Maxwell/1 wk—Jun 93

Provides NCOs assigned to military justice and civil law sections at base levels with an indepth understanding of principles and concepts involved in handling adverse actions.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from Air Force NCOs in the grades of SSgt through MSgt assigned to civil law or military justice with a minimum of 2 years in the paralegal career field.

Quota Control: HQ USAF/JA.

MAFJAG730—Fiscal and Appropriations Law Course—PDS Code WDQ—Maxwell/1 wk—Jan 96

Provides students instruction regarding the statutory and regulatory limitations governing the obligation and expenditure of appropriated funds and an insight into the current fiscal issues within the Air Force and DoD. The course covers basic statutory constraints and administrative procedures involved in the system of appropriation, control, and obligation of funds within the DoD. This is a distance learning course and may be audited by students who do not meet formal prerequisite and selection criteria.

Prerequisites and Selection: The Judge Advocate, US Air Force, will select attendees primarily from judge advocates who have at least 6 months of practical experience in the area of procurement and systems acquisition.

Quota Control: HQ USAF/JA.

MAFJAG740—Advanced Environmental Law Course—PDS Code W41—Maxwell/3 days—Jan 96

Provides environmental law practitioners with a graduate level update on federal and state environmental laws and regulations, as well as information on pending legislation with major potential impact on environmental issues. Allows exchanges of views on environmental compliance strategies with sister service practitioners and senior advisers in a seminar-type setting. Gives judge advocates an expanded ability to provide advice to commanders, designed for attorneys with regional, major command, or service-wide level responsibilities or service-wide on issues of substantial operational and financial impact on the military.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from Air Force officers in the grades of captain through colonel, civil service equivalents, and from nominees provided by the Army, Navy, and other Department of Defense full-time environmental practitioners.

Quota Control: HQ USAF/JA.

MAFJAG750—Environmental Law Update Course—PDS Code WDR—Maxwell/3 days—Jan 96

Provides environmental law practitioners with a graduate level update on federal and state environmental laws and regulations, as well as information on current trends in environmental enforcement by state and federal environmental regulatory agencies. Course assists installation, regional, and command level lawyers who are familiar with the basics of environmental law in improving and updating their knowledge of this complex and constantly changing field. Gives judge advocates an expanded ability to provide advice to commanders on issues of substantial operational and financial impact on their installation.

Prerequisites and Selection: Selection is made by the Judge Advocate General, US Air Force, from Air Force officers in the grades of captain through colonel or civil service equivalents and from nominees provided by the Army, Navy, and other DoD agencies who have attended the basic environmental course or who are regular environmental practitioners.

Quota Control: HQ USAF/JA.

MAFJAG760—International Law Course—PDS Code WZ5—Maxwell/3 days—Jan 96

Provides students who are staff judge advocates assigned overseas with an understanding of the complexities of Air Force operations in the international arena. Topics covered include foreign criminal jurisdiction, overseas legal assistance, foreign claims, foreigh civil litigation, and mobility preparation.

Prerequisites and Selection: The Judge Advocate General, US Air Force, will select students from staff judge advocates assigned overseas.

Special Requirements: A Secret clearance is required for course attendees and will be shown on the orders of course attendees.

Quota Control: HQ USAF/JA.

MAFJAG770—Federal Income Tax Law Course—PDS Code WZ6—Maxwell/1 wk—Jan 96

Provides judge advocates, attorneys, and other personnel engaged in management of basewide tax assistance programs, with basic information on federal tax law, estate planning, legal ethics, tax implications of the Soldiers' and Sailors' Civil Relief Act, and current policies and practice regarding the administration of a full service tax program.

Prerequisites and Selection: Selection for Air Force judge advocates, civilian attorneys, and paralegals is made through HQ USAF/JAX. Nominees from the Army are provided through the Army Judge Advocate General School. Nominees from the Navy are provided through the Naval Justice School. Nominees from other agencies are approved on a case-by-case basis through the Air Force Judge Advocate General School. Attendees should be those personnel performing or selected to perform as base tax officers.

Quota Control: HQ USAF/JA.

MAFHRMS102—Civilian Personnel Officers Course—PDS Code RM8—Gunter/1 wk 4 days—Oct 96

Improves effectiveness of civilian personnel officers (CPO). Typical subjects include: problem solving and decision making related to civilian personnel administration and management, time management, work-year cost management, civilian personnel career programs, management application of PDS-C, labor-management relations, affirmative employment, budget process, program evaluation, and student presentations on civilian personnel topics. Scheduled as needed, every 18 to 24 months.

Prerequisites: CPOs, assistant CPOs, with less than 2 years of experience as Air Force CPOs.

Selection Procedures and Quota Control: AFCPMC/DPCRT.

MAFHRMS104—Position Classification Course—PDS Code UB0—Gunter/1 wk 4 days— Oct 96

Provides personnel with skills and knowledge necessary to perform work in such areas as: wage grade classification, general schedule classification including factor evaluation system, planning and

conducting classification surveys, fact gathering, interview techniques, position description writing, position structure and charting, background information and controls over work, and classification appeals.

Prerequisites: Personnel specialists assigned to the position classification function with less than 12 months' experience in the function. Priority will be given to trainees or interns in the GS 221 series at the GS-5 and GS-7 levels. All others require written justification and approval of waiver from AFHRMS before by-name confirmations are entered into the Training Management System (TMS). This course is not appropriate for employees in the GS 203 series.

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS105—Position Classification Advanced Course—PDS Code UB1—Gunter/1 wk 4 days— Oct 96

Improves effectiveness of experienced classification specialists by providing insight into the various aspects of position management (grade and salary control, environmental differential pay, position structuring, etc.); complex, controversial and precedent-setting classification case studies; techniques in classification; the classifier as an expert witness in adverse action and arbitration hearings; program evaluation and exposure to other personnel specialties and programs such as LMR, EMR, EEO, staffing, training, and development, as they relate to classification.

Prerequisites: Personnel assigned to the position classification function with at least 12 months' experience at the GS-221-09 or above grade level. All others require written justification and approval of waiver from AFHRMS before by-name confirmations are entered into the Training Management System (TMS).

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS106—Affirmative Employment Course—PDS Code UB2—Gunter/1 wk 4 days— Oct 96

Provides personnel assigned to the affirmative employment function with skills and knowledge necessary to perform work in the staffing and equal employment opportunity areas. Subjects covered include qualification determinations, merit promotion, PPRS, job analysis, FEORP, reduction in force, and affirmative action planning.

Prerequisites: Personnel specialists assigned to the affirmative employment function with less than 12 months' experience in staffing and (or) equal employment opportunity. Priority will be given trainees or interns in the GS 212 and GS 260 series and to those classified as EEO and staffing specialists in the GS 201 series at the GS-5 and GS-7 levels. All others require written justification and approval of waivers from AFHRMS before by-name confirmations are entered into the Training Management System (TMS).

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS108—Employee Development Specialist Course—PDS Code UB4—Gunter/1 wk 4 days—Oct 96

Provides employee development specialists with basic skills and knowledge in areas of training and development. Subject coverage includes: legal and regulatory requirements, planning and determining training needs, the training survey process, the automated training system, evaluation of training, supervisory and management training, methods and sources of training, career management, development and conduct of local training, and management of the training budget.

Prerequisites: Personnel specialists assigned to the employee development function with less than 12 months' experience. Priority will be given to trainees or interns in the GS 235 series at the GS-5 and GS-7 levels. All others require written justification and approval of waiver from AFHRMS before by-name confirmations are entered into the Training Management System (TMS).

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS109—Employee Development Advanced Course—PDS Code UB5—Gunter/1 wk 4 days—Oct 96

Provides experienced employee development specialists insight into the overall EDS function and its relationship to the total civilian personnel management program. Covers complex, controversial, and precedent-setting aspects of such areas as career programs, developing and managing the training budget, advising management on the determination of training needs, staff development, upward mobility, procurement of training, use of PDS-C in training management, and evaluating the training program.

Prerequisites: Personnel assigned to the employee development function with at least 12 months' experience at the GS-9 level or above in the function. All others require written iustification and approval of waiver from AFHRMS before by-name confirmations are entered into the Training Management System (TMS).

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS110—Employee Management Relations Course—PDS Code ZWZ—Gunter/1 wk 4 days— Oct 96

Provides personnel assigned to EMR function with the basic skills and procedures for dealing with situations in areas such as conduct, discipline, appeals and grievances, health and safety, premium pay, drug and alcohol abuse control, and program evaluation.

Prerequisites: Personnel specialists assigned to the EMR function with less than 12 months of experience in EMR. Priority will be give to trainees or interns in the GS 230 and 233 series at the GS-5 or GS-7 level. All others require written justification and approval of waiver from AFHRMS before by-name confirmations are entered into the Training Management System (TMS). This course is not appropriate for employees in the GS 203 series.

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS112—Employee-Management Relations Advanced Course—PDS Code 0VD—Gunter/1 wk 4 days—Oct 96

Improves effectiveness of employee-management relations specialists by providing insight into the overall EMR program and its relationship to the total civilian personnel management program. Covers complex, controversial and precedent-setting aspects of various employee-management relations program areas including discipline, performance management, drug and alcohol abuse occupational health and safety, arbitration, and (or) Merit System Protection Board proceedings.

Prerequisites: Personnel assigned to the EMR function as GS 230-, 233-, and 201-09 and above, who have at least 12 months of experience at the GS-09 level or above in EMR. All others require written justification and approval of waiver from AFHRMS before by-name comfirmations are entered into the Training Management System (TMS).

Selection Procedures: Requirement must be requested through the TMS. Quotas will be allocated by AFHRMS. In coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS113—Affirmative Employment Advanced Course—PDS Code 0VE—Gunter/1 wk 4 days—Oct 96

Improves effectiveness of experienced equal opportunity and staffing specialists by providing insight into the overall affirmative employment program and its relationship to the total civilian personnel management program. Covers complex, controversial and precedent-setting aspects of such areas as reduction in force, staffing and affirmative action planning, job analysis, program evaluation, and management through PDS-C.

Prerequisites: Personnel assigned to the affirmative employment function with at least 12 months' experience at the GS-9 level or above in the function. All others require written justification and approval of waiver from AFHRMS before by-name confirmations are entered into the Training Management System (TMS).

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS114—Systems Manager Course—PDS Code 0VJ—Gunter/1 wk 4 days—Oct 96

Provides personnel system managers (PSM) with skills and knowledge in the management of the base-level personnel data system-civilian. Emphasis is directed in three areas: basic system fundamentals, DESIRE writing, and introduction to civilian personnel functions. Areas covered are: basic system components, central table maintenance, update and inquiry techniques, employee record maintenance, quality control, and manpower and personnel interface.

Prerequisites: Personnel assigned to the PSM function who have responsibility for management of PDS-C. Priority will be given to PSMs and assistant PSMs. All others require written justification and approval of waiver from AFHRMS before by-name confirmations are entered into the Training Management System (TMS). This course is not appropriate for clerks and data transcribers.

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS115—Equal Employment Opportunity Counselors Course (EEO)—PDS Code 3TJ—Gunter/1 wk—Oct 96

Provides EEO counselors with an understanding of their roles and responsibilities, laws and regulations governing discrimination complaints, and Air Force complaint policy and procedures. Subjects include basic laws, regulations and theories of discrimination, communications and interview techniques, analysis, acceptance, and investigation of complaints, and remedial actions and report preparation.

Prerequisites: EEO counselors with less than 12 months of experience, either full-time or collateral duty assignment. All others require written justification and approval of waiver from AFHRMS before by-name confirmations are entered into the Training Management System (TMS). This course is not appropriate for EEO managers, special emphasis program managers, or civilian personnel specialists.

Selection Procedures: Requirements must be requested through the TMS. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS116—Advanced Systems Manager Course—PDS Code 6MB—Gunter/1 wk 4 days—Oct 96

Provides experienced personnel system managers (PSM) with an indepth knowledge and understanding of various elements of the PDS-C, such as: advanced DESIRE writing, reading and understanding PDS-C translation language, data file accuracy and management, phase IV architecture, and writing and understanding other job control languages. Also covers related personnel functional areas.

Prerequisites: Nominees for the course must be current PSMs, GS-09 and above, with at least 1 year of experience.

Selection Procedures: Requirements must be requested through the Training Management System. Quotas will be allocated by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPC.

MAFHRMS117—Resource Management Course—PDS Code WRS—Gunter/1 wk—Oct 96

Provides orientation, basic knowledge, and skills building in managing to the dollar either all, or a portion of, an installation's annual civilian pay bogey using as a resource the Civilian Human Resource Management System (CHRMS) Decision Support Software (DSS). The course is appropriate for those delegated responsibility for the direct management process, or for those providing advisory services on resource management, position classification and management, manpower issues, or financial management issues.

Prerequisites: Personnel responsible for resource management programs.

Selection Procedures: Requirements must be requested through the Training Management System. Quotas will be allocated by AFHRMS in coordination with MAJCOM and SOA. Nominations approved by AFHRMS in coordination with MAJCOM and SOA and appropriate functional chief at HQ USAF/DPCR.

MAFHRMS118—Chief EEO Counselor Course—PDS Code WRT—Gunter/1 wk—Oct 96

Prepares new chief counselors to perform their duties and responsibilities. Target Audience: Newly assigned EEO counselors, grades GS-9 through 13.

Selection Procedures: Requirements must be requested through the Training Management System. Quotas will be allocated by AFHRMS in coordination with MAJCOM and SOA. Nominations approved by AFHRMS in coordination with appropriate functional chief at HQ USAF/DPCW.

MAFHRMS119—Labor Relations Course—PDS Code WRU—Gunter/1 wk 4 days/MASL D151017—Oct 96

Prepares participants to administer and negotiate labor union contracts and increases effectiveness of labor-management relations practitioners in providing advice and guidance to managers representing the Air Force's position in arbitration and other third party proceedings. Target audience: civilians, GS-9 through GM-14, and officers, captain through colonel.

Prerequisites: Civilian and military personnel responsible for administering and managing labor and management relations programs. ECL 80.

Selection Procedures: Requirements must be requested through the Training Management System. Quotas will be allocated by AFHRMS in coordination with MAJCOM and FOA. Nominations approved by AFHRMS subject to concurrence of appropriate functional chief at HQ USAF/DPCW.

MAFHRMS120—Multifunctional Personnel Specialist Course—PDS Code WRV—Gunter/2 wk—Oct 96

Provides a concentrated orientation and exposure to fundamental elements of position classification, personnel staffing, or employee relations for experienced civilian personnel specialists who are assigned duties in a second or third personnel specialty. Target audience: GS-9 or GS-11 personnel specialists assigned duties across functional lines who require additional orientation and preparation.

Selection Procedures: Requirements must be requested through the Training Management System. Quotas will be allocated by CPD/DPC in coordination with MAJCOM, SOA, and appropriate functional chief at HQ USAF/DPC.

MAFHRMS121—Civilian Personnel Management Course—PDS Code WRW—Gunter/4 wk 2 days—Oct 96

Teaches new personnel specialists about how the Air Force system works. Explains how a base-level civilian personnel office functions. Target audience: GS-5 through GS-9 entry level personnel specialists.

Selection Procedures: Requirements must be requested through the Training Management System. Quotas will be allocated by AFHRMS in coordination with MAJCOM, SOA, and HQ AFCPMC/DPCRT.

MAFHRMS122—Elements of Civilian Personnel Administration—PDS Code 1ZM—location: on site/various durations—Oct 96

Prepares experienced personnel specialists to provide expanded management advisory services in more than one specialty area. Specifically, the course provides personnel assigned to civilian personnel flights fundamental skills and knowledge in other civilian personnel functions. The course of instruction can be selected in the areas of position classification, affirmative employment, employee management relations, labor relations, and employee development. Specific topics are selected from current curriculum plans based on local needs in consultation with the civilian personnel school faculty. Target audience: GS-9 or GS-11 personnel specialists affected by reorganization requiring additional preparation in one or more civilian personnel functions.

MAFHSRM407—Joint Family Support Director Course—PDS Code 8BJ—Maxwell and Washington DC/1 wk 3 days—Oct 96

Designed for all family center or family program directors from the active and reserve components of all the Services. The student population for each class includes representatives from each of these Service components. Designed to support the implementation of DoD Directive 1342.7, which states that family agencies and organizations that make up the DoD Family Support System must collaborate and coordinate with each other and with civilian agencies to ensure maximum use of family support resources. The increasingly joint nature of the DoD mission requires that family support services and programs from the respective Services collaborate to provide "joint family support and service" whereever appropriate and possible. Held 4 to 6 times per year and requires a TDY of 10 days. Class size is 25 students. Specific class dates are announced through the training management system and by the Family Program Offices of the respective Services.

Prerequisites and Selection: Selections are made by the Family Program Offices of the respective Services. Students for each class are drawn from a specific geographic region of CONUS or OCONUS and must be a senior manager of the family program that they serve.

Admin Instructions: All admin and reporting instructions will come from one or more of the following sources: the student's respective headquarters-level family program office; the Family Matters Division of the College for Professional Development (CPD/HRF), Maxwell AFB AL 36112; the Army Community and Family Support Training Center (CFSC-HRT), 6245 Leesburg Pike, Suite 400, Falls Church VA 22044.

MAFQI007—QAF Awareness—PDS Code 2DI—location */4 hr min—Oct 95

Designed for military and civilian members. Designed to be a minimum of 4 hours in length. Introduces the history of quality Air Force (QAF), change, key concepts, Air Force values, and QAF principles. Course is designed to be taught locally by MAJCOMs throughout their units. Personnel desiring to attend should contact their base's wing quality office.

Quota Control: AFQI/ER.

*various locations/base level.

MAFQI008—QAF Tool and Techniques—PDS Code 2IJ—location *—Oct 95

For military and civilian members, the course covers histograms, flowcharts, cause and effect diagrams, pareto charts, scatter diagrams, run charts, control charts, checksheets, forcefield analysis, and storyboarding. Upon completion, the student will be able to use the tools individually in daily operations: use tools in a group environment for continuous improvement processes; use the tools to present results of process improvement efforts; and apply the appropriate tools or technique to collect, display, analyze, or make a decision. The student will also gain an understanding of the tools' relation to performance goals. Course is designed to be taught locally by MAJCOMs throughout their units. Personnel desiring attendance should contact their base's wing quality office.

Prerequisites: Applied by MAJCOM.

Quota Control: AFQI/ER.

*various locations/base level.

MAFQI009—QAF Facilitator—PDS Code 2IK—location *—Oct 95

For military and civilian members, the main objectives of the course are to comprehend the following: the roles and associated observation, communicative, and feedback techniques required of a successful facilitator; the various responsibilities, coaching techniques, and actions a coach or facilitator may be expected to employ to enhance team dynamics; the advisory role, techniques, and actions an advisor or facilitator might employ to improve team dynamics; the basics of adult learning and the instructional techniques associated with the facilitator's role of teaching QAF teams; the important roles the champion plays in QAF team building, team presentations, and publicity; and the personal and professional challenges associated with becoming an effective facilitator. Course designed to be taught locally by MAJCOMs throughout their units. Personnel desiring attendance should contact their base wing quality office.

Prerequisites: Applied by MAJCOM.

Quota Control: AFQI/ER.

*various locations/base level.

MAFQI010—QAF Quality Air Force Leader—PDS Code 2IL—location *—Oct 95

For military and civilian members. Main objectives of course are for the student to comprehend the following: brainstorming and to demonstrate basic brainstorming techniques used throughout the course; the QAF system and the style, values, principles, and components associated with it as they relate to daily activities; the infrastructure and resources available for use in their role of supporting QAF in an organization; the importance of supporting continuous improvement in the workplace; and the personal and professional challenges associated with implementing quality in the work area or organization. Course designed to be taught locally by MAJCOMs throughout their units. Personnel desiring attendance should contact their base wing quality office.

Prerequisites: Applied by MAJCOM.

Quota Control: AFQI/ER.

*various locations/base level.

MAFQI011—QAF Team Leader—PDS Code 2IM—location*—Oct 95

For military and civilian members. Main objectives of course are for the student to comprehend the following: brainstorming and to demonstrate basic brainstorming techniques used throughout the course; the QAF system and the style, values, principles, and components associated with it as they relate to daily activities; the roles, responsibilities, and techniques which foster team efficiency and effectiveness; the seven-step continuous improvement process and the tools and techniques associated with it; that using sound team-building processes and techniques leads to more effective teams; the importance of evaluating overall team performance, team presentation techniques, and avenues for team recognition. Course designed to be taught locally by MAJCOMs throughout their units. Personnel desiring attendance should contact their base wing quality office.

Prerequisites: Applied by MAJCOM.

Quota Control: AFQI/ER.

*various locations/base level.

MAFQI012—QAF Team Member—PDS Code 2IN—location*—Oct 95

For military and civilian members. Main objectives of course are for the student to comprehend the following: brainstorming and to demonstrate basic brainstorming techniques used throughout the course; the QAF system and the style, values, principles, and components associated with it as they related to daily activities; the roles, responsibilities, and techniques which foster team efficiency and effectiveness; the seven-step continuous improvement process; and interpreting basic quality tools—process flowcharts, cause and effect diagrams, pareto charts, histograms, scatter diagrams, checksheets, and run charts. Course designed to be taught locally by MAJCOMs throughout their units. Personnel desiring attendance should contact their base wing quality office.

Prerequisites: Applied by MAJCOM.

Quota Control: AFQI/ER.

*various locations/base level.

MAFCSI101—Chaplain Orientation Course—PDS Code WVE—Maxwell/4 wk/AFSC 52R3—Oct 96

Introduces chaplains to the Air Force. Facilitates their transition from civilian status teaching them to apply their professional skills in Air Force environments, including the Air Force readiness environment. Increases their ability to work as a team with clergy of various faiths, enhances their communication skills, and increases their confidence to serve effectively as Air Force chaplains.

Prerequisites and Selection: Must first successfully complete the Air Force Officer Orientation Course before attending this course. The Chief of Air Force Chaplains selects qualified clergy appointed in USAFR according to AFI 36-2610, *Appointment of Officers in the Regular Air Force and Conditional Reserve Status* (formerly AFR 36-5), usually in the grade of first lieutenant and captain. Successful completion of this course is a prerequisite for AFSC 52R3 and for retention in the Air Force Chaplain Service.

Unit of Assignment or Attachment: USAF Chaplain Service Institute, Air University, CPD, Maxwell AFB AL.

Quota Control: HQ USAF/HCP.

MAFCSI113—Chaplain Professional Continuing Education—PDS Code 66P—Maxwell/3 days—Oct 96

Approximately eight chaplain PCE courses are held each fiscal year. These courses are designed to develop and improve professional skills in identified areas of Air Force needs. The courses target the 12 manpower core processes of the USAF chaplain service and enhance chaplains' skills in fulfilling those processes. The faculty of the Chaplain Service Institute selects the resource leaders and topics to be addressed.

Prerequisites and Selection: The USAF Chaplain Service Institute selects chaplains to attend these courses. Chaplains will be afforded the opportunity to attend every 2 to 3 years, based on previous attendance.

Unit of Assignment or Attachment: USAF Chaplain Service Institute, Air University, CPD, Maxwell AFB AL.

Quota Control: CPD/HCP.

MAFCSI114—Chaplain Intermediate Course—PDS Code WL7—Maxwell/2 wk 2 days—Oct 96

Prepares selected chaplains to function as developers and supervisors of major faith group religious programs and prepares chaplains for increased responsibilities in leadership and management areas. Topics include personnel management, chapel programs and resources, leadership development, and other areas as identified by the functional manager.

Prerequisites and Selection: The Air Force Chaplain Service Institute selects from major or major selectees who have completed a minimum of Squadron Officer School and serves as rating official for other chaplains. For CAT A or Guard, may be Maj or Capt if senior chaplain at unit.

Unit of Assignment or Attachment: USAF Chaplain Service Institute, Air University, CPD, Maxwell AFB AL.

Quota Control: CPD/HCP.

MAFCSI115—Chaplain Senior Course—PDS Code WJJ—Maxwell/2 wk 2 days—Oct 96

Prepares selected chaplains to function as senior chaplains at wing level, command chaplain, and senior chaplains of direct reporting units (DRU) and functional operating agencies (FOA). Topics include structure, mission, and vision of the Air Force Chaplaincy, dynamics of leadership in the multi-faceted role of the senior chaplain, personnel and resources management, and other issues as identified by the functional manager.

Prerequisites and Selection: The Air Force Chaplain Service Institute selects from lieutenant colonels and colonels who have completed a minimum of Air Command and Staff College and have received assignments as senior chaplain at the wing, MAJCOM, DRU, or FOA level. For CAT A or Guard, may be a Senior Maj or above selected for senior chaplain at a unit.

Unit of Assignment or Attachment: USAF Chaplain Service Institute, Air University, CPD, Maxwell AFB AL.

Quota Control: CPD/HCP.

MAFCSI116—Chaplain Readiness Course—PDS Code 1CI—Maxwell/1 wk 3 days—Oct 96

Prepares selected chaplains in planning and providing religious support and ministry during war, contingency operations, national emergencies, and operations other than war. Included in the 8 academic days is a 5-day deployed field exercise conducted at Silver Flag Readiness Training Center, Tyndall AFB FL.

Prerequisites and Selection: The Air Force Chaplain Service Institute selects from 1st Lts, Capts, and Majs who have not completed this training during chaplain orientation.

Unit of Assignment or Attachment: USAF Chaplain Service Institute, Air University, CPD, Maxwell AFB AL.

Quota Control: CPD/HCP.

MAIS001—Academic Instructor Course—PDS Code AAA—Maxwell/4 wk/MASL D171001/AFSC: "T" Prefix—Oct 96

Prepares graduates to instruct in educational systems of the Air Force and DoD. A rigorous, comprehensive, and fast-paced course which requires extensive reading and preparation and moderate research. Major curricular areas are learning theory, communication skills, teaching methods, instructional aids, and evaluation. Course organized to provide for maximum participation in learning. Majority of class time devoted to small group activity. Students write level-of-learning and criterion objectives, plan and present teaching lessons, develop rating scales and criterion-referenced test items, and participate in specialized electives to meet individual needs. Teaching lessons are videotaped for playback and review. Students must demonstrate (1) ability to plan and present teaching lessons, and (2) mastery of selected academic content areas. Portions of AIS may be tailored to fit individual or command needs. Commands may include requests for emphasis on any teaching method or elective which is considered essential for the individual concerned in student's orders. The following methods are taught: demonstration-performance, teaching interview, guided discussion, case study, and lecture (formal and informal). The following electives are usually offered: counseling, creative thinking for the instructor, observational skills, critiquing of writing and speaking, instructional system development, instructional aids, test construction, test analysis, learning styles and theories, and computers in education. Students should bring teaching materials from their home unit if available.

Prerequisites: Officers, civilians (GS-7, WG-1O or above), NCOs (SSgt and above), and international officers performing primary duty as an instructor, supervisor instructor, or curriculum developer (or selected for such duties within the educational system of Air Force or DOD). Individuals who instruct in a purely technical training environment, or who deal solely with training records and files, should not attend AIS. Examples of individuals who should not attend AIS are instructors in aircraft maintenance, firefighting, OJT, basic roofing/refrigeration, loadmaster, and firing range. Individuals in these categories would find a technical instructor course (TIC) more appropriate to their needs. However, individuals in these categories who are responsible for developing curriculum, writing test items, and or developing performance evaluation instruments are eligible to attend AIS.

Priorities: Quotas will be allocated using the following priorities as guidelines:

Code Definition:

A. Those required by regulation to attend AIS.

B. Those transferring to an instructor position who have not attended an instructor training course. Those transferring to a position of supervisor of instructors (or working curriculum development, test analysis, or evaluation areas) who have not attended an instructor training course.

C. Those instructors who have advanced from the academic classroom setting (to supervisor of instructors or working curriculum development, test analysis, or evaluation) and have attended a TIC.

Students are selected by MAJCOM according to the above priorities.

TDY-en route quotas (except for AFROTC instructors) are controlled by HQ AFPC/DPMRO.

MAIS003—AF JROTC Academic Instructor School—PDS Code W9V—Maxwell/1 wk—Oct 96

Prepares newly assigned AFJROTC faculty to instruct in educational systems of the Air Force and DOD. A rigorous, comprehensive, and fast-paced course which requires extensive reading, preparation, and moderate research. Major curricular areas are learning theory, communication skills, teaching methods, lesson planning, and evaluation. Methods usually taught are the formal and informal lecture, guided discussion, teaching interview, and demonstration performance. Course organized to provide for maximum participation in learning. Majority of class time devoted to Seminar activity. Students plan and present teaching lessons, develop test

items, and participate in specialized labs to meet AFJROTC needs. Each student must effectively plan and present teaching lessons. Students are urged to use AFJROTC lesson plans to prepare the required AIS teaching lessons.

Prerequisites: Must have been selected for AFJROTC faculty duty.

MAIS005—PAS Academic Instructor Course—PDS Code 1W6—Maxwell/3 wk—Oct 96

Prepares selected Lt Col and Col assignees to instruct and supervise instruction within the AFROTC academic environment. Requires outside reading, preparation, and light research. Major areas are learning theory, teaching methods, critiquing of student writing and speaking, and evaluation. Methods usually taught are the informal lecture, guided discussion, teaching interview, demonstration-performance, and case study. Course organized to provide for maximum participation in learning. Majority of class time devoted to small-group activity. Each student must plan and present teaching lessons. Students are urged to use AFROTC lesson material to prepare the required AIS teaching lessons and test items.

Prerequisites: Must have been selected for PAS duty by AFROTC.

MAIS006—AFIT Academic Instructor Course—PDS Code 8EE—Maxwell/3 wk—Oct 96

Prepares newly assigned AFIT faculty to instruct in the resident graduate or professional continuing education programs. Requires extensive reading, preparation, and moderate research. Major areas are learning theory, teaching methods, including Distance Learning lessons and evaluation. Methods taught are the lecture, guided discussion, and case study. Provides maximum participation in learning. Majority of class time devoted to small-group activity. Students plan and teach lessons using a variety of teaching methods, develop rating scales, write valid test items, and construct a curriculum-development project. Each student must demonstrate effectiveness in planning and presenting teaching lessons.

Prerequisites: Must have been selected for AFIT faculty duty.

MAIS007—ACSC Academic Instructor Course—PDS Code 8EG—Maxwell/4 wk—Oct 96

Prepares selected ACSC graduates to instruct within the ACSC academic environment. A rigorous, comprehensive, and fast-paced course which requires extensive reading, preparation, and moderate research. Major areas are learning theory, teaching methods, critiquing of student writing and briefing, and evaluation. Methods usually taught are the informal lecture, guided discussion, and case study. Provides maximum participation in learning. Majority of class time devoted to small-group activity. Students plan and teach lessons, and develop test items. Each student must demonstrate an understanding of instructional content areas and effectiveness in planning and presenting teaching lessons. Students are urged to use ACSC faculty guidance to prepare the required AlS teaching lessons and ACSC evaluation instruments to complete the test-analysis exercises.

Prerequisites: Must have been selected for faculty duty by ACSC.

MAIS008—AWC Academic Instructor Course—PDS Code 8EF—Maxwell/2 wk—Oct 96

Prepares selected faculty to instruct within the AWC academic environment. A rigorous, tailored, and fast-paced course which requires extensive reading, preparation, and moderate research. Major areas are instructional systems development, teaching methods, critiquing of student writing, and seminar facilitation. Methods usually taught are the formal and informal lecture, guided discussion, and case study. Provides maximum participation in learning. Majority of class time devoted to small-group activity. Students plan and teach lessons and participate in specialized labs to meet AWC needs. Each student must plan and present teaching lessons. Students are urged to use AWC faculty guidance to prepare the required AIS teaching lessons.

Prerequisites: Must have been selected for faculty duty by AWC.

MAIS009—Quality Air Force Instructor's Course—PDS Code W2Z—location */2 wk/MASL D179011—Oct 96

Prepares graduates to deliver core Quality Air Force (QAF) instruction to their organization. Course is a broad-brushed approach to educating future instructors on the concepts and principles associated with teaching adults quality. AFQI and the academic instructor school will partner to ensure students comprehend education and quality concepts and principles and can then apply effective instructor skills to teach representative quality lessons. Course replaces the traditional 4-week QAFI and the 3-week AIS for quality instructors.

Prerequisites: Completion of the Air Force quality core courses. ECL 80.

*Location: Residence and off site.

MAIS010—Dentists Resident Graduate Students Instructional Mobile Course—PDS Code 3IC—location: on site/3 days—Oct 96

Assists dentists with instructional skills and is a very structured and comprehensive fast-paced course, which requires extensive reading and writing by students to prepare personalized lesson plans. Major curricular areas are focused on learning communication skills, teaching methodologies, cognitive lesson planning and construction of basic instructional aids. Method emphasized in the course is demonstration performance. Course is designed to maximize opportunities for learning and practicing basic instructor skills. The majority of the course is devoted to small group activities. Students plan and present teaching lessons.

Prerequisites: Must have been selected for AFIT's residence graduate program in dentistry. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS011—AIS Counseling Course—PDS Code 3ID—location: on site/1 wk—Oct 96

Teaches individuals how to use effective interpersonal relations skills (attending, observing, listening, and responding) to help cope with everyday problems. The workshop gives a detailed review of the basic interpersonal relations skills, stress management, counseling theories, and counseling role-playing scenarios. Designed for military and civilian employees.

Prerequisites: Approval of supervisor. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS012—Communication Skills Course—PDS Code 3IE—location: on site/3 days—Oct 96

Designed for students with little or no speaking experience. Study of the basic techniques of effective speaking. Emphasis on organizing and providing support material for military briefings, development and use of visual aids, and effective delivery skills. Practical exercises require students to present two different speaking presentations. Speaking presentations are critiqued by an experienced speaker and are videotaped. Students are required to view their

videotaped presentations and critiques during the course. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS013—AIS Institutional Effectiveness Course—PDS Code 3IF—location: on site/4 days—Oct 96

Prepares graduates to conduct institutional effectiveness planning and research. Institutional effectiveness ensures that schools provide instruction of sufficient quality to prepare their students to do the tasks to which they are assigned. This course begins with the institutional effectiveness link to accreditation and moves to the requirements for local validation of institutional effectiveness. Statement of purpose, educational goals, mission, and collection of evaluation results are discussed. Collection and analysis of evaluation data and data usage in strategic planning and continuous improvement are covered.

Prerequisites: Assignment to a position requiring institutional effectiveness expertise. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS014—Academic Instructor School Mobile Course—PDS Code 3IG—location: on site/2 wk—Oct 96

Prepares instructors to instruct in Air Force and DoD programs. A very structured and comprehensive fast-paced course which requires extensive reading and writing by students to prepare personalized lesson plans. Major curricular areas are focused on learning communication skills, teaching methodologies, cognitive lesson planning, evaluation methodology and construction of basic instructional aids. Methods emphasized in the course generally are informal lecture, guided discussion and demonstration performance. Designed to maximize opportunities for learning and practicing basic instructor skills. The majority of the course is devoted to small group activities. Students plan and present teaching lessons that meet instructor needs. Students are encouraged to use their core course lesson plans and subject matter to prepare the required lessons.

Prerequisites: Must have been selected by home office and supervisor. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS015—AIS Advanced Test Item Analyst Course—PDS Code 3IH—location: on site/3 days—Oct 96

Prepares graduates to empirically gather and analyze test data. Specific analysis of data centers on qualitative and quantitative aspects of validity and reliability. Detailed procedures are covered to establish optimal cut-scores using several empirically based standard setting models for a variety of tests including multiple weighted alternative tests and interpretive exercises. Detailed discussions will cover criterion-, domain-, and norm-referenced test item analysis. A variety of statistical procedures will be used in an attempt to acquaint the student with the different test item analysis procedures available.

Prerequisites: Completion of AIS or equivalent. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS016—Curriculum Evaluation Course—PDS Code 3II—Maxwell/2 days—Oct 96

Prepares graduates to construct and administer course evaluations. An intensive 2-day course teaching the critical aspects of developing a curriculum evaluation. This primer class concentrates on the evaluation of lessons, course administration, and organization in general. Outlines the four purposes for conducting a course evaluation: (1) find out, overall, how the classes are doing; (2) weed out weak teachers; (3) improve or help teachers; and (4) provide data on the quality of learning or participant satisfaction. Course then moves to methods for evaluating classes through participant questionnaire, participant complaints, lack of registrations and drop out rate, the open book, sitting in on classes, and calls to participants. The class then looks at developing, designing, and distributing a course questionnaire. Concludes with a brief look at results collection and analysis of data collected.

Prerequisites: Completion of Academic Instructor School or equivalent. (User funded; user provides on-site resources and instructor TDY costs.)

MAIS017—AIS Student Evaluation Course—PDS Code 3IJ—location: on site/3 days—Oct 96

Prepares graduates to construct performance evaluation instruments and test items measuring achievement of educational objectives. Intensive course begins with the fundamentals of test reliability and validity which are verified through proper statistics, and continues with the construction and use of a table of specifications to ensure accurate representation of areas on tests. Supply and selected test questions are further divided into specific question types: true/false, alternative response, matching, multiple choice, interpretive exercises, and essay. Students demonstrate development, advantages, and limitations of various test question types by creating questions for each type. Types, construction, and use of various performance evaluation instruments are also discussed.

Prerequisites: Completion of Academic Instructor School or equivalent. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS018—AIS Advanced Course for Teleseminar Instructors—PDS Code 3IK—location: residence/1 wk—Oct 96

Prepares experienced instructors to teach in the teleseminar environment using current technology (one-way video and two-way audio) in an educational setting. A rigorous, comprehensive, and fast-paced course which requires extensive reading and classroom preparation. Builds on student's previous classroom experience and foundation in educational theories and principles. Major curricular areas are teleseminar instructional design, planning for the teleseminar environment, the effective component of teleseminar instruction, the production environment, storyboarding, teleseminar instructional methodologies, coordinating for successful teleseminar delivery, and contingency planning for the teleseminar environment. Students are taught in a small group setting with maximum participation in the learning process. Students write cognitive and effective objectives and samples of behavior for three teleseminar presentations. Students must demonstrate ability to effectively plan and present teleseminar instruction. Students should bring materials from proposed lessons or courses to be taught via teleseminar.

Prerequisites: Officers, civilians (GS-7, WG-10 or above), NCOs (SSgt and above) who have been selected to teach in the teleseminar (distance learning) environment. Individuals must have completed AIS or equivalent to be eligible; i.e., have a thorough understanding of instructional system development (ISD), be knowledgeable in current theories of education, taxonomies of learning (cognitive, effective, and psychomotor), teaching methodologies (informal lecture, discussion, case study, teaching interview, etc.), and the process of lesson planning (including writing student-centered objectives, samples of behavior, classroom strategies, and teaching plans). This course does not teach basic instructor skills but is an advanced instructor course designed to enhance the skill set of practicing instructors and course directors.

MAIS019—AIS Instructional System Design (ISD) in Education Course—PDS Code 3IL—location: on site/1 wk—Oct 96

Designed for students with little or no background, experience, or education in applying instructional systems to education. Practice exercises will be used to develop initial mastery of the functions and phases called for by the USAF ISD Model. Each phase (evaluation, analysis, design, development, and implementation) will be applied to new or existing courses of study. Emphasis throughout the course will be on the applications of ISD to education. Students must be thoroughly familiar with and bring instructional materials from their school's subject matter areas to fully benefit from their application-led exercises.

Prerequisites: Completion of Academic Instructor School or equivalent. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS020—Basic Academic Instructor School Mobile Course—PDS Code 3KI—location: on site/1 wk—Oct 96

Introduces or reviews instructor skills for Air Force and DoD educational programs. Structured and abbreviated fast-paced course which requires moderate reading and writing by students to prepare or modify organizational lesson plans. Major curricular areas are communication skills, teaching methodologies, cognitive and effective lesson planning, basic evaluation methodology and introduction of basic instructional aids. Methods emphasized in the course are generally informal lecture, guided discussion, and one other method chosen by the client. The course is designed to maximize opportunities for learning and practicing, whenever possible, basic instructor skills. The majority of the course is devoted to small group activities and informal lectures. Students may plan and present a teaching lesson or part of a lesson that meets instructor and client needs. Students are encouraged to use their core course lesson plans and subject matter to prepare or modify the required lesson or lesson segment.

Prerequisites: Must have been selected by home office and supervisor. (User funded; users provide on-site resources and instructor TDY costs.)

MAIS021—AIS Squadron Officer School (SOS) Instructor Prep Course—PDS Code 3JO—Maxwell/2 wk—Oct 96

Prepares newly assigned SOS faculty to instruct SOS curriculum. Designed to be taken in conjunction with a follow-on curriculum and evaluation course. Focuses primarily on methods of instruction used at SOS (informal lecture, guided discussion, demonstration performance, and case study methods) and delivery skills. Students are introduced to educational theories, instruction systems design, feedback techniques, and the use of questions for learning. AIS instructor provides constructive feedback to the students, and students practice critiquing lessons using the SOS feedback form.

Prerequisites: Students must be on the faculty of SOS to attend.

MFSA8F000—USAF First Sergeant Academy—PDS Code XBV—Maxwell/4 wk/AFSC 8F000—Apr 96

The instructional design for this course is group paced. Trains selected noncommissioned officers to perform duties prescribed in AFMAN 36-2108, *Airman Classification* for first sergeants, AFSC 8F000. Training includes responsibilities, interpersonal relationships, counseling, base referral agencies, orientation and guidance of newly assigned personnel, unit administration management, facilities management, resources management, dependend care, morale, welfare, and recreation, quality force management, military standards, administrative discharges, and military justice. Enables first sergeants to fulfill their responsibility of advising the unit commander on the health, morale, welfare, and discipline of assigned enlisted personnel.

Prerequisites: Recommended by unit commander, approved by a first sergeant review panel; in the grade of MSgt or above; and a volunteer.

Training Allocator: HQ AFPC/DPMRAD2, First Sergeant Resource Advisor.

Training Quota OPR: HQ USAF/DPXEP, First Sergeant Functional Manager.

MANG 8F000—ANG First Sergeant Course—PDS Code 7PC—Maxwell/2 wk/SDI 8F000—Jan 96

Group-paced course that educates senior noncommissioned officers on performing duties prescribed in AFI 36-2108 for first sergeants, AFSC 8F000. Curricula includes first sergeant responsibilities, interpersonal relationships, counseling, base referral agencies, orientation and guidance of newly assigned personnel, unit administration management, PC III, resources management, dependent care, morale, welfare, and recreation, quality force management, military standards, military pay, UTA participation and nonparticipation, military discharges, and military justice.

Prerequisites: Recommended by unit commander, approved by a first sergeant review panel; in the grade of MSgt or above; and a volunteer. First sergeants attending this school must be in good physical condition because they must participate in 6 hours of physical training. Before reporting to the Academy, each first sergeant will be provided a scenario with instructions to prepare a state code briefing.

Training Allocations OPR: ANGRC/TEE.

Training Quota OPR: ANGRC/TEE.

MIOS001—SOS International Officer School Course—PDS Code (Not Req)—Maxwell/6 wk/MASL D171003—Apr 95

Prepares international officers in the Air Force grade equivalent of lieutenant, captain, or junior major to participate in Squadron Officer School (SOS). Instruction centers on providing a foundation in officership values, application, leadership tools, and air and space power in order to improve the professional competence of the students. Instruction also includes the traditions and ideals of US society, extensive physical training commensurate with the officership application program at SOS, and language and communicative skills specific to SOS. The purpose of the course is to develop: an awareness of the organizational structure, curriculum content, terminology and instructional methods used at SOS; an awareness of the United States military mission and organization; and an appreciation of US society, institutions, and ideals. Provides a forum for exchange of ideas, fostering a greater understanding of regional, cultural, and societal issues. Course is designed to meet individual needs by providing course work based on language fluency. The majority of class time is devoted to lectures and seminars with military or civilian instructors. Local and extended field trips provide students with insights into US society, institutions, and ideals. A sponsor program aids students in becoming acquainted with the military and civilian communities.

Prerequisites: ECL 70. Must possess the proper physical fitness necessary to participate in a rigorous and demanding physical training program. Attendance is limited to those Security Assistance

Training Program (SATP) trainees who are programmed to attend SOS.

Admin and Reporting Instructions: Advise CPD/FA of student's ETA in Montgomery, AL, and flight itinerary including carriers, flight numbers and arrival times. Also include number and age of accompanying dependents. Schedule arrival during duty hours (0730 to 1630) at least 1 week prior to class start date. Expect to accomplish administrative in-processing during the 3 duty days prior to the class start date. Students must be present at class start date in order to complete the course. Students will be met at the airport by an International Officer School official. Those arriving unannounced during duty hours should report to bldg 904, Maxwell AFB; during nonduty hours, report to the billeting office. Summer uniform is authorized year-round. Service dress uniform (coat and tie) is required for special occasions. Students should also bring a complete set of their country's equivalent of the Air Force camouflaged fatigue (BDU) uniform. They may bring other mission-unique utility uniforms in addition to, but not in lieu of, a fatigue equivalent. Comply with AFCAT 36-2223, paragraph 1.4.

Quota Control: AFSAT/TO.

MIOS002—ACSC International Officer School Course—PDS Code (Not Req)—Maxwell/7 wk/MASL D171014—Apr 95

Prepares international officers in the grade equivalent to an Air Force senior captain, major, or junior lieutenant colonel to participate in the Air Command and Staff College (ACSC). Instruction centers on ACSC's book-based curriculum, exploring the works of many great thinkers and strategists and focusing on developing creative, analytical thought and a better understanding of command and application of air power to foster teamwork and team building. Instruction also includes the traditions and ideals of US society, US Defense organization, leadership topics, and language and communicative skills specific to ACSC. The purpose of the course is to develop an awareness of the organizational structure, curriculum content, terminology and instructional methods used at ACSC; an awareness of the United States military mission and organization; and an appreciation of American society, institutions, and ideals. Provides a forum for exchange of ideas, fostering a greater understanding of regional, cultural, and societal issues. Some physical training is accomplished commensurate with ACSC programs. The course is designed to meet individual needs by providing course work based on language fluency. The majority of class time is devoted to lectures and seminars with military or civilian instructors. Local and extended field trips provide students with insights into US society, institutions, and ideals. A sponsor program aids students in becoming acquainted with the military and civilian communities.

Prerequisites: ECL 70. Attendance is limited to those SATP trainees who are programmed to attend ACSC.

Admin and Reporting Instructions: Advise CPD/FA of student's ETA in Montgomery, AL, and flight itinerary including carriers, flight numbers, and arrival times. Also include number and age of accompanying dependents. Schedule arrival during duty hours (0730 to 1630) at least 1 week prior to class start date. Expect to accomplish administrative in-processing during the 3 duty days prior to the class start date. Students must be present on class start date in order to complete the course. Students will be met at the airport by an International Officer School official. Those arriving unannounced during duty hours should report to bldg 904, Maxwell AFB; during nonduty hours, report to the billeting office. Summer uniform is authorized year-round. Service dress uniform (coat and tie) is required for special occasions. Comply with AFCAT 36-2223, paragraph 1.4.

Quota Control: AFSAT/TO.

MIOS003—AWC International Officer School Course—PDS Code (Not Req)—Maxwell/6 wk/MASL D171011—Apr 95

Prepares international officers in the grade equivalent to an Air Force lieutenant colonel or colonel to participate in Air War College (AWC). Instruction centers on providing a foundation for AWC's focus on war fighting, including introductions to air power doctrine, strategic thought, and military theory. Instruction also includes the history and traditions of US society, the US defense organization, and language and communicative skills specific to AWC. Course prepares international officers to attend AWC by developing an awareness of the organizational structure, curriculum content, terminology, and instructional methods used at AWC; an awareness of the United States military mission and organization; and an appreciation of American society, institutions, and ideals. Provides a forum for exchange of ideas, fostering a greater understanding of regional, cultural, and societal issues. Some physical training is accomplished commensurate with AWC programs. The course is designed to meet individual needs by providing course work based on language fluency. The majority of class time is devoted to lectures and seminars with civilian or military instructors. Local and extended field trips provide students with insights into US society, institutions, and ideals. A sponsor program aids students in becoming acquainted with the military and civilian communities.

Prerequisites: ECL 80. Attendance is limited to those SATP trainees who are programmed to attend AWC.

Admin and Reporting Instructions: Advise CPD/FA of student's ETA in Montgomery, AL, and flight itinerary, including carriers, flight numbers and arrival times. Also include number and age of accompanying dependents. Schedule arrival during duty hours (0730 to 1630) at least 1 week prior to class start date. Expect to accomplish certain administrative in-processing during the 3 duty days prior to class start date. Students must be present on class start date in order to complete the course. Students will be met at the airport by an International Officer School official. Those arriving unannounced during duty hours should report to bldg 904, Maxwell AFB; during nonduty hours, report to the billeting office. Summer uniform is authorized year-round. Service dress uniform (coat and tie) is required for special occasions. Comply with AFCAT 36-2223, paragraph 1.4.

Quota Control: AFSAT/T0.

MAFHRMS400—Advanced Personnel Officer Course—PDS Code WVX—Maxwell/3 wk 4 days—Oct 96

Provides personnel managers multiple career enhancement skills needed to successfully lead and manage diverse personnel situations. Designed to enable attendees to acquire the competencies required to excel and to become more effective at and beyond the mid-management level. This is accomplished at five areas of advanced instruction: military personnel, civilian personnel, leadership and management, behavioral science, and functional integration. Instructional development is further supported by specific reading assignments, individual, and group projects. The curriculum is presented at graduate, practical, and professional level and is designed to encourage a student-centered exchange of ideas, experiences, problems, and solutions. The resident faculty is augmented by an adjunct faculty consisting of experts from Congressional staffs, DoD, Air Staff, corporate executive levels, and

college campuses. Provides a broad view of the environment in which personnel managers functions. Intended to be directly responsive and supportive of the needs of personnel managers.

Prerequisites: Active Air Force, Air Force Reserve, Air National Guard majors, major selectees, and equivalent grade civilians who occupy or have been selected for key personnel management positions.

Special Requirements: Secret clearance by class start date.

Quota and Selection Procedures: Students are selected by AFPC/DPMRS, AFPC/DPMO, AFCPMC/DPCRT, NGB/TET, HQ USAF/REP, ARPC/DRMP, AFRES/DPTE.

Quota Control: AFPC/DPMRSN1.

MAFHRMS401—Air Force Family Support Center Director Qualification Education Course—PDS Code JBM—Maxwell/4 wk—Oct 96

Provides newly selected Family Support Center (FSC) directors with primary education in the conduct, administration, and management of FSCs. The course will thoroughly familiarize attendees with Air Force organization, structure, and mission-enhancing role of FSCs. Students will gain an operational and functional understanding of all FSC areas, programs, and associated procedures. The course will also focus on the unique demographic characteristics and stresses of Air Force families and related topics. Directors are educated on relevant issues relating to military and Air Force families ensuring FSCs are operated in accordance with guidelines and standards established by senior Air Force leadership. Those areas include but are not limited to spouse employment, crisis intervention, exceptional family members, family separation, financial management, transcultural relationships, and related areas.

Prerequisites: Air Force officers, captain through lieutenant colonel and civilian grades GS-11 through GS-13 (or occupying positions with promotion potential to GS-11), newly assigned as director or programmed for such position. MAJCOM Family Matters Program Managers are also eligible to attend.

Admin and Reporting Instructions: Attendees report to the billeting office, Bldg 157, Maxwell AFB, before 2200 hrs on the day prior to class start date. MAJCOM family program managers should provide student's name, grade/rank, SSN, duty telephone, duty title, duty address, date of assignment, base, command, home address, and nickname to CPD/DPF not later than 40 days before class start date. Travel arrangements should ensure attendees arrive the day prior to class start date. Contact CPD/DPF, DSN 493-3452 for more information.

Quota and Selection: Attendee selection is made by HQ USAF/DPPHF.

MAFHRMS402—Air Force Family Support Center Deputy Director Qualification Education Course—PDS Code LXL—Maxwell/3 wk—Oct 96

Provides newly selected Family Support Center (FSC) deputy directors with primary education in the conduct, administration, and management of FSCs. The course will thoroughly familiarize attendees with Air Force organization, structure, and mission-enhancing role of the FSCs. Students will gain an operational and functional understanding of all FSC areas, programs, and associated procedures. The course will also focus on the unique demographic characteristics and stresses of Air Force families and related topics. Deputy directors are educated on relevant issues relating to military and Air Force families ensuring FSCs are operated in accordance with guidelines and standards established by senior Air Force leadership. Those areas include, but are not limited, to spouse employment, crisis intervention, exceptional family members, family separation, financial management, transcultural relationships, and related areas.

Prerequisites: Enlisted personnel, MSgt through CMSgt, newly assigned as deputy director or programmed for such position. MAJCOM Family Matters Deputy Program Managers are also eligible to attend.

Admin & Reporting Instructions: Attendees report to the billeting office, bldg 157, Maxwell AFB, before 2200 hrs on the day prior to the class start date. MAJCOM family program managers should provide student's name, grade/rank, SSN, duty telephone, duty title, duty address, date of assignment, base, command, home address, and nickname to CPD/DPF not later than 40 days before class start date. Travel arrangements should ensure attendees arrive the day prior to class start. Contact CPD/DPF, DSN 493-3452, for more information.

Quota and Selection: Attendee selection is made by HQ USAF/DPPHF.

MAFHRMS403—DOD Relocation Manager Course—PDS Code WJG—Maxwell/2 wk—Oct 96

Prepares DOD relocation assistance managers for providing direct services and educational programs to military members and their families, being focal point for relocation assistance concerns at installation level, and coordinating existing programs and services provided by other agencies. This is accomplished through four major course elements:

a. Service specific mission organization and structure as well as family center concept and organization.

b. Relocation assistance manager role and responsibilities.

c. Community organization and consultation skills such as networking, marketing, conflict resolution, project planning, and formal briefings.

d. Development of family education programs and outreach initiatives and enhanced information and referral through automated data system.

Prerequisites: JOB: Family Center Relocation Assistance Manager. GRADE: GS-4 through GS-11 and military (all grades).

Selection Control: Service branches in coordination with CPD/DPF.

Quota Control: OASD (Office of Family Policy, Support, and Services).

Allocation: DoD funded. Orders originated from CPD/DPFR. Contact CPD/DPF, DSN 493-3452, for more information.

MAFHRMS405—Professional Manpower Staff Officer Course (PMSOC)—PDS Code 7C9—Maxwell/2 wk 4 days—Oct 96

Prepares individuals to meet the demands of MAJCOM, Air Staff, and Joint Staff positions, with duties involving manpower resource determination, allocation, and utilization. Course design challenges participants' managerial thinking around the following specific topics: manpower and budget interface, manpower programming, resource management, manpower and personnel interface, force structure beddown, OSD/joint arena manpower management, contingency manpower planning/execution, organization, quality and manpower interface, professional development, and executive communication and skills. The course is presented by resident

faculty, augmented by an adjunct faculty consisting of experts and practitioners from the Joint Staff, OSD Staff, Air Staff, unified commands, MAJCOMs, corporate executive levels, and academia. Teaching methodologies include lecture, seminar, and individual/group (project) exercises.

Prerequisites: Active Air Force, Air Reserve, and Air National Guard officers in the grades of senior captain (8 or more years commissioned service), major, lieutenant colonel, and equivalent grade civilians (GS-12 through GS-14) who occupy or have been selected for key manpower or resource management positions. Civilians grade GS-11 are waiverable based on level and nature of job responsibility with the approval of their command manpower and organization chief or equivalent senior manpower official. Officers and civilians of equivalent grades from related resource management career fields (for example, personnel, finance, plans, and etc.) and joint activities are welcome to attend.

Special Requirements: Secret clearance by class start date.

Quota and Selection Procedures: Students are identified and selected through the Air Force Management Engineering Agency (AFMEA) focal point and entered in the Air Force Training Management System (AFTMS) against training requirements. Candidates outside of Air Force manpower management career field may be nominated according to local procedures by respective MAJCOM or equivalent activity and submitted to AFMEA focal point for consideration in course allocation cycle.

MLMDC501—Professional Military Comptroller Course—PDS Code PBH—Maxwell/6 wk/MASL D155061—Apr 95

Enhances the ability to assess and adapt the role of the comptroller to changing economic, political, and military environment. Broadens the professional horizons of the student by providing an understanding of the major contemporary problems, issues, and national policies that bear on the decision-making process involved in the efficient and effective allocation of resources to and within the defense establishment. Enhances individual capacities to serve effectively as a comptroller generalist at a high level of professional competence in the Department of Defense.

Prerequisites: Major (select) and above through colonel and GS-12 through GS/GM-15 (captains and GS-11 may be considered on an exception basis); actual or anticipated assignment as comptroller or assistant comptroller at wing or higher levels or as the head of a branch, division, or directorate in the comptroller staff at intermediate command headquarters or higher; and others within and outside the comptroller field who, with the approval of the MAJCOM comptroller, are qualified because of their positions and responsibilities in resource and associated fund management.

Special Requirements: A Secret clearance is required by class start date and must be shown in the orders. A baccalaureate degree is preferred.

Selection Procedures: Air Force students are selected by a central selection board which meets at Maxwell AFB approximately 8 weeks before the class start date. The board members are: a representative from SAF/FMs, a MAJCOM comptroller, representatives from AFPC and AFCPMC, the PMCS Commandant, and a PMCS faculty member who serves as the recorder. The board selects students from nominees submitted by MAJCOMs and FOAs. Army and Navy students are selected using their respective service procedures. DoD agency nominations will be considered by the Air Force selection board.

Quota Control: CPD/FM. For further information, contact CPD/FM, Selection Board Recorder, DSN 493-6656.

MLMDC502—Reserve Forces Professional Military Comptroller Course—PDS Code 4LB—Maxwell/2 wk—Apr 95

Develop in selected National Guard/Reserve personnel a capacity to evaluate and adapt the role and tasks of the comptroller to the economic, political, and social environment of the military organization and its mission. Broaden the professional horizons of the student by providing a comprehension of major contemporary problems, issues and national policies which bear on the decision making process within the defense establishment. Enhance the individual capacities to serve effectively, if mobilized, as comptroller generalists by providing a comprehension of the academic disciplines which are prerequisite to the practice of comptrollership in DoD.

Prerequisites: The course is open to Guard and Reserve personnel, major through colonel (captains may be considered on an exception basis) or equivalent serving as or selected to serve as comptrollers or assistant comptrollers or who are the heads of a branch, division, or directorate. Others within and outside the comptroller field who are in positions with responsibilities for resource and associated fund management are also eligible to apply.

Selection Procedures: A central selection board convened at the Professional Military Comptroller School (PMCS), Maxwell AFB, will fill the class quotas from nominations received. Nominations will be consolidated at HQ NGB and ARPC for forwarding to the PMCS at least 60 days before class start date. Specific questions regarding the school or selection procedures may be addressed to CPD/FM, 525 Chennault Circle, Maxwell AFB AL 36112-6429, or by calling DSN 493-6656.

Special Requirements: A Secret clearance is required by class start date and must be reflected in orders.

Quota Control: CPD/FM.

MLMDC800—USAF Wing Commanders' Seminar—PDS Code PLT—Maxwell/1 wk—Jun 93

Provides an understanding of contemporary attitudes, approaches to leadership and management, legal responsibilities of command, and selected staff functions needing management emphasis. Attendees are provided an update on current Air Staff policies and procedures associated with command. Students have the opportunity to discuss issues and problems with key staff members as well as their peers in a seminar environment.

Prerequisites: Air Force officers (active duty, reserve, or air guard) assigned to one of the following positions: wing or vice wing commander.

Special Requirements: Secret clearance by class start date. Orders must show security clearance.

Admin Instructions: Students must ensure the following information is provided to CPD/CLW (DSN 493-7716) 30 days before class start date: name, grade, nickname, SSN; duty title, address, and phone; and travel plans.

Quota Control and Selection Procedures: CPD/CLW provides quotas to MAJCOMs and FOAs. MAJCOM and FOA DPs select students in coordination with CPD/CLW.

MLMDC810—USAF Support Group Commanders' Course—PDS Code V0D—Maxwell/2 wk—Oct 95

Prepares support group commander selectees to meet the multiple responsibilities of air base support leadership and introduces attendees to their roles as commander of base suppport organizations within the framework of Air Force policy. Provides an understanding of command responsibility, accountability, and discipline; approaches to leadership and management; contemporary attitudes; and cultural diversity. Also provides a background in group level functional areas, including civil engineering, services, personnel, security police, and communications. Attendees will have the opportunity to discuss current base level issues and problems with functional area experts, experienced commanders, and their peers in a seminar environment. The USAF On-Scene Commanders' Course, MLMDC813, is presented the week following the support group commanders' course. Attendees completing the on-scene commanders' course will be qualified for certification as on-scene commanders. For details, see MLMDC813 listing in this publication.

Prerequisites: Air Force colonels and lieutenant colonels selected to become support group commanders.

Special Requirements: Secret or higher clearance must be shown on TDY orders.

Admin Instructions: TDY orders should reflect "Variations Authorized" and the statement "Dual billeting authorized for military necessity." Uniform for course is short or long sleeve shirt with or without tie or tab; BDUs optional for field trip. Service dress not required. First-day class information will be in welcome package available at Maxwell Billeting Office.

Quota Control and Selection Procedures: HQ USAF/DPO controls quotas. MAJCOMs select attendees.

MLMDC813—AF On-Scene Commander's Course—PDS Code X0H—Maxwell/4 days/MASL D122083—Oct 96

Provides training on techniques and procedures necessary to effectively perform command and control functions during emergency and contingency situations involving aircraft, munitions, and hazardous material accidents and incidents, and natural disaster situations. Includes problem solving and exercises associated with situation assessment, on-scene commander duties and responsibilities, communications, special resources, planning, public affairs, and logistics support.

Prerequisites: Senior officers, NCOs, civilian equivalents assigned as on-scene commander, installation fire chief or deputy chief, MAJCOM IG team chief, and wing or base exercise evaluation team chief. ECL 80.

Admin Instructions: BDUs and flight suits may be worn but are not required. Pick up welcome package at Maxwell Billeting Office. Recommend return reservations to home station be made after 1300 on last day of class.

Quota Control: CPD/CL provides quotas to MAJCOMs and FOAs based on identified requirements. MAJCOM and FOA functional managers select individuals to fill quotas.

MLMDC871—USAF Logistics Group Commanders' Course—PDS Code T9P—Maxwell/2 wk—Oct 95

Prepares logistics group commander selectees to meet the responsibilities of logistics group leadership and introduces attendees to their roles as commander of a logistics group within the framework of Air Force policy. Provides an understanding of command responsibility, accountability, and discipline; approaches to leadership and management; contemporary attitudes; and cultural diversity. Also, provides a background in group level functional areas, including supply, transportation, maintenance, depot operations, personnel, and enlisted matters. Attendees will have the opportunity to discuss current logistics issues and problems with functional area experts, experienced commanders, and their peers in a seminar environment.

Prerequisites: Air Force colonels and lieutenant colonels selected to become logistics group commanders.

Special Requirements: Secret or higher clearance must be shown on TDY orders.

Admin Instructions: TDY orders should reflect "Variations Authorized" and the statement "Dual billeting authorized for military necessity." Uniform for course is short or long sleeve shirt with or without tie or tab. Service dress not required. First-day information will be in welcome package available at Maxwell Billeting Office.

Quota Control and Selection Procedures: HQ USAF/DPO controls quotas. MAJCOMs select attendees.

MLMDC872—USAF Medical Group Commanders' Course—PDS Code 7EK—Maxwell/2 wk—Oct 95

Prepares medical group commander selectees to meet the responsibilities of medical group leadership and introduces attendees to their roles as commanders of medical groups within the framework of Air Force policy. Provides an understanding of command responsibility, accountability, and discipline; approaches to leadership and management; contemporary attitudes; and cultural diversity. Also provides a background in group level functional areas, including medical services patient administration, and medical facilities and logistics management. Provides instruction in DoD-mandated competencies to include military medical readiness, health law and policy, health resource allocation, medical ethics, organization behavior, clinical understanding, and alternate health care delivery systems. Attendees will have the opportunity to discuss current operations issues and problems with functional area experts, experienced commanders, and their peers in a seminar environment.

Prerequisites: Air Force colonels and lieutenant colonels selected to become operations group commanders.

Special Requirements: Secret or higher clearance must be shown on TDY orders.

Admin Instructions: Uniform for course is short or long sleeve shirt with or without tie or tab. Service dress is not required. First-day information will be in welcome package available at Maxwell Billeting Office.

Quota Control and Selection Procedures: HQ USAF/DPO controls quotas. MAJCOMs select attendees.

MLMDC873—USAF Operations Group Commanders' Course—PDS Code 7MZ—Maxwell/2 wk—Oct 95

Prepares operations group commander selectees to meet the responsibilities of operations group leadership and introduces attendees to their roles as commander of an operations group within the framework of Air Force policy. Provides an understanding of command responsibility, accountability, and discipline; approaches to leadership and management; contemporary attitudes; and cultural diversity. Also provides a background in group level functional areas, including intelligence, weather, airfield operations, and aircraft accident investigation, reporting, and disposition. Attendees will have the opportunity to discuss current operations issues and problems with functional area experts, experienced commanders, and their peers in a seminar environment.

Prerequisites: Air Force colonels and lieutenant colonels selected to become operations group commanders.

Special Requirements: Secret or higher clearance must be shown on TDY orders.

Admin Instructions: Uniform for course is short or long sleeve shirt with or without tie or tab. Service dress is not required. First-day class information will be in welcome package available at Maxwell Billeting Office.

Quota Control and Selection Procedures: HQ USAF/DPO controls quotas. MAJCOMs select attendees.

M3ABR3H031—Historian Apprentice Course—PDS Code TW8—Maxwell/3 wk 3 days/AFSC 3H031/MASL D161023—Oct 96

Contributes to professional development of airmen and NCOs selected to serve as unit historians or as assistants to major air command historians by providing a foundation in the principles and methods of preparing Air Force historical reports. Covers historical services and administration, the historian in contingency operations, the nature and sources of historical materials, preparation of unit and contingency histories, and the research and writing of unit, contingency, and other historical reports. Requires students to compile a contingency report and write a historical study.

Prerequisites: Air Force enlisted personnel (active duty, reserve, or guard) approved for retraining into the historian AFSC 3H0X1 will be given priority for class seats. With approval of the MAJCOM/HO and the course director, the following individuals may attend on a space-available basis: (1) enlisted personnel assigned additional or part-time duties as unit historians; (2) civilian personnel with collateral or part-time duties as unit historians; and (3) civilian interning historians. All attendees must be proficient typists and familiar with computers and word processing software. Selected personnel must not have submitted a request for reassignment from the history AFSC. ECL 80.

Special Requirements: Secret clearance by class start date.

Admin and Reporting Instructions: For quarters and issue of material packets, attendees report to billeting office, Bldg 157, Maxwell AFB, before 2200 on day before class start date.

Selection Procedures: Active duty, guard, and reserve personnel will be assigned a class date in conjunction with approval of retraining application. Selection of non-AFSC personnel for space available seats will be controlled by respective MAJCOM/HO with course director having final approval authority.

Quota Control: HQ USAF/HO.

M3ACR3H071—Historian Craftsman Course—PDS Code 1M0—Maxwell/2 wk/AFSC 3H071—Apr 96

An intense, practicum-based course designed to train the experienced wing historian in the complete production of historical studies and monographs; arranging, conducting, and transcribing research interviews; the use of various government reference agencies to include the Inferential Retrieval Indexing System (IRIS) at the Air Force Historical Research Agency; the use of computer software to produce manuscripts, historical data bases, informational spreadsheets, and oral presentations; the evaluation of Air Force unit histories, studies, and monographs; the interpretation and implementation of higher headquarters policies and directives; and the assessment and evaluation of wing history programs. The course also includes study in air power history and the formulation of aerospace doctrine, as well as advanced time management principles. Historian craftsman course graduates will be awarded the 7-skill level. The course is critical in developing the advanced skills of the wing historian whose wide-ranging peacetime and wartime mission assists today's commanders in the decision-making process, and captures the Air Force's corporate memory for use by the senior leaders of tomorrow.

Prerequisites: Must be a SSgt or higher, enrolled in 7-skill level upgrade training, and have met the minimum time requirement in upgrade training. Must also be familiar with Microsoft Word 6.0 and Microsoft Powerpoint 4.0. Before arriving at Maxwell, students must also have a personal password for the Air Force Historical Research Agency's IRIS.

Admin Instructions: Standard uniform is blues without tie, ribbons optional. Do not bring laptop computers as they will be issued during class. Report to billeting, bldg 157, Maxwell AFB, NLT 1600 CST on day before class start date. Student inprocessing will be held at Ira C. Eaker College for Professional Development, Bldg 1404, 1700 CST on day before class start date. Class start time is 0730 in Bldg 1404.

Unit of Assignment or Attachment: USAF Historian Development School, Air University, CPD, Maxwell AFB AL 36112.

Section K—CADRE Course Announcements

MAAFNJ007—Joint Flag Officer Warfighting Course—PDS Code Q7Y—Maxwell/2 wk—Oct 95

Prepares service chief-selected, two-star flag officers for theater-level combat leadership responsibilities. This joint course is tailored to provide our future CINCs and service component commanders with a unique perspective of the operational level of war. Instruction for the course comes from senior national-level civilian and military spokesmen, CINCs, and retired battle-tested flag officers. Retired warrior generals also draw from their CINC and component commander experience to lead wargaming scenarios focused in various parts of the world, across the continuum of conflict. The attendees pursue an intense study of war, military doctrine, and application of combat forces so they will be better prepared to face any future enemy. This two-week course is offered three times per year. Attendance is limited to 18 flag officers per class and is open to all military services.

Prerequisites: Flag officers in the grade of major general or major general-select from all four services—service chief-selected.

Special Requirements: TOP SECRET/SCI clearance required. Must be sent backchannel to SSO AU before class start date.

Selection Procedures: Attendees are selected by each service chief based on nominations from the field through the respective service general officer management offices. Those needing more information should contact CADRE/WGJ, 401Chennault Circle, Maxwell AFB AL 36112-6428, DSN 493-5101.

Quota Control: Chief of Staff, USAF; Chief of Staff, USA; Commandant, USMC; and CNO, Navy.

MCADRE002—Contingency Wartime Planning Course—PDS Code 82U—Maxwell/3 wk—Oct 96

Instructs Air Force war planners in grades SSgt through Lt Col and civilian equivalents the basics of Air Force planning. Personnel assigned or en route to an 'R' prefix position or a staff war planning position in any functional area from base to Air Staff level may attend this 3-week course. CWPC is one of the formal courses

identified by the Air Staff as a prerequisite for the award of the "R" prefix. The curriculum consists of five blocks of instruction covering the following aspects of planning: players, resources, plan development, execution, and analysis. It includes important features of the Planning, Programming, and Budgeting System (PPBS), the Joint Strategic Planning System (JSPS), and the joint planning process; emphasizes Air Force 10-series publications, the Joint Operation Planning and Execution System (JOPES) volumes, and the USAF War and Mobilization Plan (WMP); deals with Time-Phased Force and Deployment Data (TPFDD), the Joint Deployment System (JDS), and the Contingency Operation/Mobility Planning and Execution System (COMPES); contains a series of exercises designed to reinforce academic presentations. The exercises address such topics as force selection, support planning, OPlan development, and base support planning.

Prerequisites: Air Force officers and NCOs in the grades SSgt through Lt Col and equivalent grades en route or assigned to staff contingency wartime planning functions at wing level or above. Requests for attendance by personnel of other services will be considered on an individual basis by the department chairman.

Special Requirements: Secret clearance must be reflected on the students' orders. Clearance is necessary in the first week of classes.

Admin Instructions: Uniform--short-sleeved blue shirt or equivalent, year-round.

Selection Procedures: MAJCOM and FOA DPs control selection in coordination with CADRE/ARS. HQ AFPC functional managers control TDY-en route quotas.

Quota Control: CADRE/ARS.

MCADRE003—Joint Doctrine Air Campaign Course—PDS Code W1B—Maxwell/2 wk/MASL D121076—Oct 96

Educates officers from unified, combined, or supporting air component commands in the fundamental concepts, principles, and doctrine required to plan a joint or combined air campaign at the theater level. There are three areas of instruction built around specific learning objectives. The first area (air campaign planning fundamentals) examines the doctrine, strategy, organization, and capabilities of forces employed in a military campaign. The second area (air campaign planning process) covers currently available procedures and historical air campaign analysis. The final area of concentration (air campaign planning exercise) allows students to use their attained skills in planning an air campaign plan in stages.

Prerequisites: U.S. officers in the grades of captain through colonel and civilian equivalents en route or assigned to flight operations, operational plans (contingency or deliberate), intelligence or logistics functions at wing level and above, as well as joint, unified, or combined command staffs.

Special Requirements: Secret clearance must be reflected on the student's orders.

Selection Procedures: Personnel that require attendance should contact their unit training manager. Unit training managers should contact their MAJCOM, SOA, joint command, or unified command quota manager. MAJCOM quota managers enter AF nominees into the Air Force Training Management System. US Army, Navy, and Marine Corps officers wishing to attend should contact their appropriate training managers or CADRE/ARS, DSN 493-7831. For more information, view the following internet page: http://www.cdsar.af.mil/jdacc/jdacc.htm.

Quota Control: CADRE/ARS.

MCADRE004—Joint Force Air Component Commander Course—PDS Code 63T—Maxwell/1 wk—Oct 95

Prepares service selected, one-star flag officers for theater-level combat leadership responsibilities. This course is tailored to provide future JFACCs with a unique perspective of the operational level of aerial warfare. Instruction for the course comes from senior military spokesmen, CINCs, and retired battle-tested flag officers. Attendees pursue a study of war, military doctrine, and application of air forces so they will be prepared to face any future enemy. Course is offered two times per year. Attendance is limited to 15 flag officers per class and is open to all military services.

Prerequisites: Flag officers in the grade of brigadier general or rear admiral (lower) from all four services--service selected.

Special Requirements: Top Secret/SCI (SAP) clearance. Must be sent backchannel to SSO AU/INS before class start date.

Selection Procedures: Attendees are selected by each service through the respective service general officer management offices. Those needing more information should contact AU CADRE/WG, Maxwell AFB AL 36112-6428, DSN 493-5101.

Quota Control: HQ USAF/XO.

MCADRE005—Information Warfare Applications—PDS Code 138—Maxwell/1 wk—Oct 96

Prepares US Air Force junior and senior officers and enlisted personnel for theater-level combat responsibilities. Attendees study warfighting, military doctrine, and information warfare concepts and principles. Course objectives are to understand current US Army, Navy, Air Force, and Marine Corps doctrinal concepts for information warfare (IW); understand the integration of lethal and non-lethal weapon systems and IW assets from different services to provide effective theater information warfare capabilities; understand and respond to differences of opinion among the services over theater information warfare employment; and understand the role IW plays in theater campaign development. Be able to execute theater information warfare strategy and understand the inherent capabilities and limitations of information warfare.

Prerequisites: All officers, A1C through chief master sergeant, GS-7 through GS-13.

Special Requirements: Briefings to the Top Secret/SCI level must be presented backchannel to SSO-AU/INS.

MCADRE006—Senior Information Warfare Applications—PDS Code 139—Maxwell/2.5 days—Oct 96

Prepares US Air Force senior officers for theater- and national-level combat responsibilities. Attendees study warfighting, military doctrine, and information warfare concepts and principles. Course objectives are to understand current DoD and joint doctrinal concepts for information warfare (IW), understand the integration of lethal and non-lethal weapon systems and IW assets from different services or nations to provide effective theater- and national-level information warfare capabilities, understand and respond to differences of opinion among the services over theater- and national-level information warfare employment concepts, and understand the role IW plays in campaign development. Be able to execute theater information warfare strategy and understand the inherent capabilities and limitations of information warfare.

Prerequisites: US Air Force flag officers in the grade of brigadier general, major general, or lieutenant general and members of the Senior Executive Service.

Special Requirements: Briefings to the Top Secret/SCI level must be presented backchannel to SSO-AU/INS.

MCADRE007—Combined Force Air Component Commander Course—PDS Code 141—Maxwell/1 wk—Oct 96

Prepares flag officers from the United States and other countries to function as the combined force air component commander (CFACC) in a joint task force. The attendees study warfighting, military doctrine, and the application of unified, joint, and combined combat forces with particular emphasis on air power employment in theater-level operations. Covers current US doctrine for joint and combined operations and the role of the CFACC, US and allied doctrinal concepts for theater warfare, the integration of weapon systems and command and control systems to provide effective theater air defense, and how to respond to differences of opinion among the services over theater air power employment concepts and the role of the CFACC. Instructs on how to assist CINC/JTF development of military objectives, end states, and the joint scheme of maneuver. Discusses theater air strategy development to support the theater campaign and how to execute theater air strategy.

Prerequisites: Brigadier general, major general, or selects. US Secret clearance.

Administration Instructions: The course is conducted in the Air Force Wargaming Institute, bldg 1406, Maxwell AFB AL, and at the Air Ground Operations School, Hurlburt AFB FL. Advance security clearance notification must be forwarded before class start date. Building is cleared for open storage of classified material up to and including US Secret. CADRE/WGJ, Maxwell AFB AL, 36112-6428, DSN 493-5101 or (334) 953-5101, will provide information on use of CFACC fund cite to Air Force attendees by datafax, e-mail, or phone before the class start date. Obtain reporting instructions from the same source.

Quota Control: Managed by HQ USAF/DPG and HQ USAF/XO. For more information, contact CADRE/WGJ, Maxwell AFB AL, 36112-6428, DSN 493-5101 or (334) 953-5101.

MECI 100—Extension Course Institute Course for Authors—PDS Code 8K1—Gunter/1 wk—Oct 95

Course provides career development course (CDC) writers with the basic knowledge and experiences needed to produce effective extension course materials. It is a practicum in the use of Instructional System Development (ISD) to write and revise CDCs. Students work under the tutorage of ECI educators and gain hands-on experience in every phase of course development—planning; writing objectives, tests, and text; and processing and evaluating a course. They also become familiar with ECI personnel and procedures.

Prerequisites: Course primarily for Air Force CDC writers. Course director will individually consider requests for attendance of writers of other types of military extension course materials.

Selection Procedures: ECI CADRE/EDEC coordinates selection with each CDC-preparing agency.

Quota Control: ECI CADRE/EDEC.

Section L—Air University Program Announcements

Graduate Education (GRAD ED) is formal instruction beyond the baccalaureate level designed to meet specific advanced degree requirements. Grad Ed is conducted in residence within Air University and selected civilian institutions.

SAAS 000—School of Advanced Airpower Studies—PDS Code T—Maxwell/48 wk—Jan 96

Prepares Air Force staff officers and future commanders to shape airpower strategy in its role of supporting national security. Building on the curricula and themes of resident intermediate service schools (ISS), the School of Advanced Airpower Studies (SAAS) examines the historical record of airpower in the context of western military theory, considers airpower's human, theoretical, economic, and technological facets, and focuses on the use of airpower across the operational spectrum of war. A very competitive record is required. Further, students must possess both the ability and the willingness to complete a graduate level program of reading, colloquia, research, and writing. Successful completion of SAAS results in award of Master of Airpower Art and Science degree.

Prerequisites: When class begins, applicant must be a major or lieutenant colonel selectee. Line of the Air Force officers must have less than 16 years of TAFCS when class begins. Application can only be made while attending an ISS in residence and the applicant must successfully complete ISS in residence.

Special Requirements: Top Secret/SCI clearance required and must be shown on orders. If not completed, AF Form 899, block 26, must show date AF Form 398 submitted. Top Secret/SCI clearance must be based on current SBI.

Selection Procedures: Volunteer for SAAS and complete the application generally while attending ISS. Selections made by general officer board convened at AFPC.

Admin and Reporting Instructions: Students may report 5 days after the completion of ISS in residence, or 7 days before class start date, whichever is earlier. Students PCSing to Maxwell to attend SAAS will call ACSC/AS (953-5155) upon arrival to sign in. Orders assigning student to SAAS must confirm security clearance.

Quota Control: HQ USAF/DPPE.

Undergraduate Programs

Airman Education and Commissioning Program (Undergraduate)—Sep 93

Provides qualified enlisted members the opportunity to complete BS degree requirements in technical career areas. Following program completion, Officer Training School is attended, resulting in commission as second lieutenant, USAFR.

Prerequisites: Forty-five semester hours of college credit, of which 30 semester hours must be traditional college classroom credit transferable to the curriculum the individual wishes to pursue. The remaining 15 semester hours may consist of technical or vocational credits or evaluated credit for subiect examinations. Credit for physical education, art, music and other ancillary subjects cannot be counted toward the required 45 semester hours. Mathematics requirements include completion of the first year college mathematic courses for engineering students. Under traditional mathematics sequences, this implies completion of analytic geometry and differential calculus or two or more courses of a unified analytic geometry and calculus sequence, depending on the structure of the math sequence at the college or university attended. Students in the AECP curriculums must be prepared to take ordinary differential equations by the second semester of enrollment. Grades below C in mathematics are not acceptable, nor is a mathematics GPA below 2.4 on the 4-point scale. Science requirements include at least one semester of college physics or college chemistry designed for engineering students or science majors for all academic areas. Good

standing at the last college or university attended is required. A GPA of at least 2.4 or higher for the last term of enrollment is also required. Applicant should be able to complete degree requirements in maximum of 36 calendar months, must receive his or her commission before 35th birthday, have 1 year of continuous active Air Force duty, and be physically qualified for Air Force commission. The AECP also affords enlisted members commissioning opportunities in medical career fields. See the base ESO at the Education Center or contact AFIT/RRA (DSN 785-6231) for more information.

Selection Procedures: The Air Force selection board, meeting at AFPC in August and February of each fiscal year, reviews military and academic records of academically eligible applicants and selects individuals to fill approximately one-half of the annual quota at each board. Final decision is contingent on selectee passing physical examination. See AFI 36-2013 for more information.

Class Start Date: Varies with civilian institution attended. Duration: Maximum of 36 months.

AFSC in which graduates are normally assigned is varied.

Graduate Programs

Engineering and Science

Aeronautical Engineering (M.S.)—18-month curriculum/ MASL D178013—Oct 96

This program provides the student with a broad background in aeronautical engineering and indepth specialization in one or more of the areas of aerodynamics, propulsion, structures, and flight mechanics. The program leads to the degree of master of science degree in aeronautical engineering or master of science. The program nominally begins in June and ends 18 months later in December. Officers completing the program are normally assigned duties in the Air Force specialty code of 2855.

Curriculum: An individual program of study is prepared for each student with content depending upon the student's academic background and interest, the needs of the Air Force, and degree requirements. Each program provides preparation in aerodynamics, aircraft stability, propulsion, and structures. It also provides three courses in mathematics, at least two three-course specialty sequences, and a thesis. Completion of the program leads to assignment of an educational code in the 4A- or 4M-series. A 1-month review session which covers mathematics, aeronautics, dynamics, and computer systems is provided prior to the first quarter.

Mechanical Engineering Specialty. Each year, a number of students are identified for graduate study in the 4M (Mechanical Engineering) series of educational codes. Those students assigned to the resident school are placed in the aeronautical engineering program and complete the core requirements of that program. Their specialty sequences, however, are selected from those which strongly emphasize the mechanical sciences, such as structural materials, structural analysis, structural dynamics, robotics, heat transfer, air-breathing propulsion, and rocket propulsion. Upon graduation with the degree of master of science in aeronautical engineering, students in this specialty are normally assigned to positions requiring the 2835 AFSC. However, the completion of this specialty provides excellent preparation for duty as aeronautical engineers in later assignments.

Start dates: June.

Astronautical Engineering (M.S.)—18-month curriculum/MASL D178166—Oct 96

Provides the Air Force officer-engineer with a broad education in the scientific and engineering disciplines associated with astronautical engineering and helps to develop considerable depth of knowledge in selected areas of these disciplines. The curriculum prepares the Air Force officer to make direct contributions as an engineer in the astronautical engineering field and also prepares him or her to evaluate, monitor, and administer astronautical research and development projects. The program leads to the degree of master of science in astronautical engineering or master of science.

Curriculum: An individual program of study is prepared for each student. Its content varies depending upon the student's academic qualifications and interests, the needs of the Air Force, and degree requirements. Study programs are divided into four areas—a core program in the basic disciplines, specialty sequences, mathematics, and electives. A thesis is also required which usually addresses a problem of current Air Force interest. The student chooses the research problem with the help of the faculty.

Space Facilities Specialty. A special 21-month version, requiring 3 additional months from the 18-month curriculm for the astronautical engineering program, is offered for officers in the civil engineering career field to prepare them for roles in the development and operation of launch facilities and large permanent space facilities.

Starting date: June.

Computer Engineering (M.S.C.E.) Computer Systems (M.S.)—18-month curriculum/MASL D178096—Oct 96

Prepares officers for assignments involving the design, test, evaluation, and management of computer systems. These programs develop a broad competence in the application of concepts and techniques of computer engineering and computer systems, emphasizing the specialized areas of interest to the Air Force. The programs include a background in several specialty areas and an indepth investigation in an area leading to a thesis. The breadth of the curricula prepares students for a variety of Air Force assignments involving research, development, and program management in the computer engineering and computer systems areas. The programs include a series of fundamental courses, specialty sequences, electives, and an independent study. Emphasis is placed on the design and development of hardware and software systems, their integration, and application. The primary focus of this education is embedded computer systems and the interaction of the computer in all aspects of meaningful problem solving. The computer engineering program meets the educational requirements for Air Force specialty codes (AFSC) 2825 and 2885 with the 4WXX and 4IDY academic specialty codes (ASC). The computer systems program meets the educational requirements for the 4925, 4935B, 494X and 2625 AFSCs with 0CXX ASCs. The computer engineering program leads to the degree of master of science in computer engineering. The computer systems program leads to a master of science degree.

Starting date: June.

Electrical Engineering (M.S.)—18-month curriculum—Oct 95

The graduate electrical engineering program is conducted by the Department of Electrical and Computer Engineering and is designed to develop technical expertise in specialty areas of electrical engineering which are of particular importance to the Air

Force. Its objective is to develop a broad background in several specialty areas with the ability to apply this knowledge in the design, development, test, and evaluation of Air Force systems. The program leads to the degree of master of science in electrical engineering. The typical master's degree program consists of at least 72 hours of full-time study over a period of six academic quarters (18 months), and includes course work in two areas of specialization and a master's thesis. The program satisfies the advanced educational requirements of Air Force specialty codes (AFSC) 282X and 493X, and prepares the student for a wide range of Air Force assignments in research, development, and program management in these specialties.

Electrical Engineering (M.S.) Electro-Optics—18-month curriculum—Oct 95

Provides a student who has a background in electrical engineering with the knowledge of optics and laser technology necessary for work in the field of electro-optics. The program is under the joint supervision of the Departments of Engineering Physics and Electrical and Computer Engineering. In general, students entering this program will have completed an undergraduate major in electrical engineering. The basic requirements for admission to the program are an overall undergraduate grade point average of at least a B (3.00), a grade point average of at least a B (3.00) in all mathematics courses, and GRE scores of at least 500 on the verbal test and 600 on the quantitative test. Waivers of some of these may be granted on an individual basis.

The program is normally six quarters in length. Five quarters are devoted to course work and one quarter to thesis research. The research is conducted either at AFIT or under a cooperative research program at one of the Air Force laboratories. The course work in this program is in the areas of electrical engineering, optical and laser physics, and optical solid-state devices. It emphasizes the application of fundamental knowledge in the design, development, test, and evaluation of Air Force systems.

Each student must complete an independent study or thesis in an area related to electro-optics selected from topics proposed by Air Force development organizations. This independent study may be done under the direction of either the Department of Engineering Physics or the Department of Electrical and Computer Engineering. Flexibility in the program is maintained in order to take full advantage of the varied backgrounds and abilities of individual students. The program leads to the degree of master of science in electrical engineering.

Starting date: June.

Applied Physics (M.S.)—18-month curriculum—Oct 95

Provides each student with a broad foundation in applied physics at the graduate level with specialization available in general applied physics, engineering physics, or nuclear engineering. Laboratory practice and computational methods are emphasized in all three specializations through courses and research apprenticeships which are designed to probe minor research problems in a group environment. The unique combination of coursework and laboratory practice provides the student with the background for work involving laser systems, optical modulators and detectors, optical propagation, solid-state devices, plasma diagnostics, nuclear detection, nuclear weapon effects, nuclear power, and environmental transport.

Engineering Physics Specialty. Specialization in engineering physics is designed for the student with a strong engineering background at the undergraduate level. This background, with a degree in engineering or engineering physics should preferably be from an ABET-accredited undergraduate program. Emphasis is placed on the engineering and design aspects of applied physics. Courses are chosen from those offered for the applied physics specialization; however, one of the design courses, PHYS 790 or OENG 740, is required and the thesis must be chosen to provide sufficient emphasis on design. In addition, student and advisor must work together to guarantee a program which meets ABET requirements at the advanced level. Specialization in engineering physics leads to the master of science degree in engineering physics and satisfies the Air Force educational codes of 8HYY and its subspecialties.

Nuclear Engineering Specialty. Specialization in nuclear engineering is designed for the student who has an interest or Air Force education code in nuclear engineering. The specialization prepares the student in the areas of space nuclear power, nuclear weapon effects, nuclear detection, nuclear testing, and nuclear environmental engineering. The entering student will generally have an undergraduate degree in engineering or engineering physics, preferably from an ABET-accredited undergraduate program; however, students with a non-ABET undergraduate degree may be eligible if the ABET requirements can be met at the advanced level by a suitably designed program. The curriculum consists of those courses offered under the applied physics specialization but with specialty sequences drawn from the NENG courses including NENG 790, Nuclear System Design.

This specialization, although offered at AFIT by the Department of Engineering Physics, is similar to nuclear engineering programs in other schools in that it includes a core of basic and engineering science courses in thermal physics, quantum physics, electromagnetism, nuclear physics, nuclear instrumentation, radiation transport, and radiation effects, followed by courses in nuclear technology and systems. The program differs from other nuclear engineering programs, however, in that emphasis is placed on the design of nuclear weapons, nuclear weapon effects and simulation, space nuclear power, and nuclear environmental engineering. Reactor systems are included through the course on space nuclear power and small military reactors. The independent study, NENG 799, normally involves a nuclear weapons, space power, or nuclear detection problem of interest to the Department of Defense. The specialty leads to a master of science degree in nuclear engineering and satisfies the Air Force education codes of 4QYY, 4QCY, 8HKY, and 8HLY.

Starting date: June.

Graduate Applied Mathematics (M.S.)—18-month curriculum—Oct 95

The Graduate Applied Mathematics (GAM) Program provides officers with the background of graduate work in applied mathematics, statistics, and computing science needed for faculty assignments in the Air Force Academy's Department of Mathematical Sciences. In view of the Academy's current needs, students select specializations in analysis, statistics, or numerical analysis.

The core course requirement for the GAM Program consists of three courses in analysis and three courses in statistics. A three-course mathematics specialization sequence is then added to this core requirement.

Starting date: June.

Operations Research (M.S.)—18-month curriculum/MASL D178044—Oct 96

Prepares officers for analysis roles to assist decisionmakers in allocating resources for the planning, development, acquisition, and use of military systems. Provides an extensive background in mathematics, probability, statistics, simulation, economic analysis, operations research, and related disciplines. While its courses are comparable to those of applied operations research program at civilian institutions, the graduate operations research program at AFIT remains unique with its emphasis on the application of operations research techniques to Air Force and Department of Defense problems. The program leads to a master of science degree in operations research.

The recommended career fields for assignment of the graduates of this program are scientific analysis (AFSC 268X) and information systems (AFSC 49XX). Potential assignments can be found at all levels of the Air Force and the Department of Defense including the Air Force Studies and Analyses Agency, the Joint Analysis Directorate of the Joint Chiefs of Staff, major command headquarters, Air Force Materiel Command product centers, the Air Force Operational Test and Evaluation Agency, and other DoD agencies. Principal courses in the program include models.

Starting date: June.

Operational Analysis (M.S.)—18-month curriculum—Oct 95

Prepares military officers with operational backgrounds to conduct analysis relating to the planning, deployment, and employment of military forces. The program focuses on providing students with a strong foundation in the techniques and methodology of quantitative analysis. Areas of study include probability and statistics, mathematics, deterministic and probabilistic operations research, and simulation. The program also includes an emphasis on the sciences of military analysis. Subjects covered include weapons effects, communications for command and control, electronic warfare, modeling of mobility systems, and issues in operational analysis.

The recommended career fields for use of these graduates are air operations, intelligence, and the commander and director specialties although other Air Force career fields may also be appropriate. Positions suitable for graduates are those requiring both operational experience and quantitative analytic capabilities.

Starting date: June.

Space Operations (M.S.)—18-month curriculum—Oct 95

Prepares Air Force officers for management roles involving the use of engineering principles and scientific management techniques in planning, executing, and evaluating space operations. Provides a thorough grounding in quantitative and qualitative approaches to the analysis and management of space missions. The program is highly interdisciplinary in nature; all students study subjects spanning the areas of space sciences, engineering, and management sciences.

Space operations graduates are prepared to apply scientific management techniques to the accomplishment of the full spectrum of space missions. They are educated in the areas of probability and statistics, operations research, systems simulation, effectiveness and trade-off analyses, contracting and acquisition, and operations planning. They have an understanding of the space environment, orbital mechanics, propulsion systems, computers, communications systems, surveillance systems, and systems design and integration. The space operations graduate is prepared to plan, operate, and analyze military space systems.

The recommended career fields for assignment of the space operations graduate are space systems (20XX), communication and computers (49XX), and weather (25XX). The career progression starts with an officer serving one or more nonacademic tours prior to attending this program. After graduation, these officers are assigned to space-related middle management positions, and form a cadre from which the senior leadership and management of Air Force space operations may be selected.

Typical students in the graduate space operations program are senior lieutenants through majors. While the program is primarily oriented to the Space Operations (20XX) career field, academically qualified officers from any career field are encouraged to apply.

Entry requirements for the program include:

1. Two semesters or three quarters of general calculus-based physics or equivalent engineering courses. The following topics must be covered: mechanics (statics and dynamics), thermodynamics, electromagnetic theory, and electronics. All courses must have calculus as a prerequisite.

2. A minimum of 8 semester hours or 12 quarter hours of differential and integral calculus.

3. One course in differential equations.

4. One course in computer programming or equivalent experience.

5. A minimum 2.75 GPA in the courses listed in 1 through 4 above.

6. A minimum 3.00 GPA for all undergraduate work.

All potential candidates for this program should complete these requirements prior to application.

Systems Engineering (M.S.)—18-month curriculum/MASL D178218—Oct 96

The application of scientific and engineering knowledge to the analysis and design of complex systems and their associated components, a system being a collection of objects which operate together to perform some function. The goal of the systems engineer is to understand the entire system, its internal structure and its interactions with its environment. This understanding forms the basis for both analysis and synthesis of systems.

Typically, the systems engineer is required to develop system objectives and means of measuring satisfaction of those objectives, create feasible alternatives, and apply rational decision-making procedures to select the best solution. In addition, the large scale problems involved generally require team efforts for solution. The systems engineer must be able to understand and integrate contributions from other specialists, as well as make his or her own contributions. Thus, the systems engineer must be a generalist, with a broad interdisciplinary background, but with depth of knowledge in a particular specialty. The systems engineering curriculum at AFIT is structured to develop such a person. On successful completion of the program, the student receives the master of science or master of science in systems engineering degree.

Starting date: June.

Engineering and Environmental Management (M.S.)—18-month curriculum—Oct 95

The goals of the engineering and environmental management (EEM) program are to educate mid-level managers in the theories, concepts, and techniques of environmental management and to integrate science and policy issues into a decision-making framework for enhanced management of organizations and their impact on the environment.

The EEM program provides students with the opportunity to develop and apply a variety of quantitative and qualitative concepts, skills, and techniques to integrate science and policy issues into a decision-making framework for enhanced management of the environment. Upon completion, students are granted a master of science (MS) degree. A thesis is required for graduation. The curriculum includes courses in engineering management, environmental engineering and management, economic decision analysis, organizational management, and communications.

The EEM program is conducted in six academic quarters. This program is designed for both the civil and bioenvironmental engineering career fields (55XX and 91XX) and meets the educational requirements for both the 1AGE and 1AGY advanced academic specialty codes.

The curriculum consists of 10 core courses, 5 electives to provide needed breadth and depth, and 12 hours of thesis research. The courses provide a wide variety of quantitative and qualitative information concerned with the many facets of engineering and environmental management: environmental, fiscal, technical, behavioral, logistical, contractual, and legal. Electives are designed to broaden the student's horizons and provide more indepth information in a specific area of interest. A heavy emphasis on environmental science and management addresses the continuing problems with the impact of base operations on the environment (air, water, and land). The thesis must address a real-world problem in an engineering and environmental management area. Principal purposes of the thesis are to demonstrate the student's ability to integrate concepts and techniques acquired through course work and to demonstrate the student's written communication skills. Many of the thesis topics are provided by DoD and Air Force agencies interested in sponsoring student research in areas of practical concern.

Program graduates are assigned to engineering and environmental management duties at the base, MAJCOM, and higher levels. The output AFSC from the program is normally 55XX or 91XX.

Starting date: June.

Doctor of Philosophy (PhD)—Oct 95

Educates officers for positions of technological leadership in the Air Force. Provides the doctoral students with an indepth scientific or engineering background and develops in them the ability to derive practical results from fundamental principles for previously unsolved problems. Upon completion of the course work and dissertation research, each student should be in a position to contribute to a wide variety of scientific and technological areas of Air Force interest.

The course work in the program requires about 1 year of full-time study beyond the MS degree and consists of a specialty (major) consisting of at least 24 hours, a minor consisting of at least 12 hours, and a mathematics requirement. A brief description of the specialty, minor, and mathematics requirement courses is as follows:

Specialty (Major) Courses. These graduate-level courses furnish the necessary background to bring the student to the forefront of knowledge in his or her chosen dissertation area. For a well-prepared student continuing in the same area as his or her M.S. degree, the specialty may consist of as few as 24 hours. A specialty may be interdepartmental.

Minor Courses. These graduate level courses are selected to broaden the student's scientific and engineering capabilities while complementing, to some degree, his or her area of specialization. These minor courses consist of an integrated sequence of courses and are often outside the department in which the student takes his or her specialty.

Mathematics Requirement. The mathematics requirement of the doctoral program is met by passing an examination on the material of three approved mathematics courses at or above the 6XX level.

Examinations. Each doctoral student is required to pass an examination in the specialty area, the minor area, and in mathematics. These examinations are administered and graded by the specialty department, the minor department, and the mathematics department, respectively. The mathematics and minor examinations may be waived by the sponsoring department.

Dissertation Research. Upon completion of the academic phase (normally 15 months), the officers undertake a full-time research project which is offered as their dissertation. This research is carried out under the supervision of a faculty committee and involves a problem of current interest to the Air Force. The projects are sponsored by some Air Force or other DoD agency. The sponsor often provides funds for equipment and support, but not for salary or overhead. The student may carry out the research at AFIT facilities or may be detached to work at the sponsor's location. In any case, the officers remain assigned to AFIT, in pipeline status, for the full duration of the program, including the research phase. Officers whose research arrangements require location at a facility other than one at WPAFB are moved PCS without a permanent change of assignment (PCA). Although every effort is made to complete the dissertation including the written document in the allotted time, some officers will require longer to complete. This often happens because of the unpredictable nature of original research. In such a case, and although the officer is reassigned after a total of 36 months, the remaining requirements (if any) may be completed during off-duty time. The faculty research committees continue to work with active students during this additional time as required.

Starting dates: January, June.

Management and Arts and Social Science

Acquisition Logistics Management (Graduate)—MASL D178193—Sep 93

Prepares students to operate effectively within the DOD acquisition process and to understand the interrelationships between decisions made in the early stages of an acquisition and their ultimate effects on the total costs of system ownership. Courses in advanced quantitative techniques of cost estimation, life cycle costing, reliability and maintainability, and availability assessment provide the student with the capability of applying these techniques to a variety of complex and critical acquisition situations. Provides the student with an understanding of the acquisition process as an entity,

rather than a series of fragmented, functionally-oriented tasks. Satisfactory completion of the curriculum leads to award of a master of science degree in logistics management.

Prerequisites: Bachelor's degree in business administration, transportation, economics, the physical sciences, industrial engineering or a degree from a service academy. As a minimum, officer must have completed college algebra with a grade of C or higher. Intermediate algebra does not satisfy this requirement. Applicants must complete either the aptitude test of the GRE or the admission test for Graduate Study in Business before a letter of eligibility will be issued. Experience in one or more of the following career fields is desirable: 31XX, 40XX, 60XX, 62XX, 64XX, and 66XX.

Class Start Date: June. Duration: 15 months. Conducted by AFIT Resident School of Systems and Logistics.

AFSC in which graduates are normally assigned: 004X, 009X, 31XX, 40XX, 60XX, 62XX, 64XX, and 66XX.

Area Specialist Program (ASP) (Graduate)—Dec 79

Develops and sustains a resource of area-qualified Air Force officers needed in selected positions at home and abroad where special knowledge and understanding of countries or geographical areas of the world are essential. Through the ASP, officers will be fully qualified in their specialty by being specially trained, educated, and experienced in the language of country or area of the world; and by being thoroughly knowledgeable of the political and economic conditions and cultural environment of that country or area of the world.

Prerequisites: Meet sponsoring agency's requirements for minimum and maximum commissioned service, normally 6 to 14 years; minimum experience in career field; medical requirements for self and family. Meet AFIT requirements: bachelor's degree in history, geography, economics, political science, international relations, sociology, anthropology, other related areas, or a degree from a service academy. An applicant with an extensive education in mathematics and the physical sciences may receive preference for the intelligence area of the ASP; successfully complete the GRE aptitude test; and attain a satisfactory score on the Air Force Language Aptitude Test.

Selection Procedures: Selectees are sponsored by Intelligence or Air Attache (AFIS), and Special Investigations (AFOSI). Those agencies request academic evaluation from AFIT/RRE for each applicant they desire to sponsor in the ASP. Selections are made by sponsoring agencies and approved by AFPC.

Class Start Class: September. Duration: 18 to 24 months.

AFSC in which graduates are assigned: L80XX and L82XX.

Contracting Management (Graduate)—MASL D178148—Jun 90

Provides the knowledge and skills necessary to specify, evaluate, and manage the human, financial, material, and contractual resources students will direct in future assignments as middle and upper level managers in the contracting management career field.

Prerequisites: Bachelor's degree, preferably in business administration, economics, engineering, mathematics, or physical sciences, or a degree from a service academy. Must have completed mathematics through first year college algebra with grades of C or higher. An acceptable score on either the aptitude test of the GRE or the Graduate Management Admission Test is required. Prior experience in the 65XX career field is desirable.

Class Start Date: June. Duration: 15 months. Conducted by AFIT Resident School of Systems and Logistics.

AFSC in which graduates are normally assigned: 65XX.

Cost Analysis (Graduate)/MASL D178206—Dec 90

Prepares the student to analyze and evaluate costs of alternative decisions in DOD. Instruction includes a wide variety of quantitative and qualitative principles, concepts, and methods available for analysis and management that are useful in the Air Force environment. The program's principal cost analysis focus is on life cycle costing during the acquisition phase of weapon system development. Implications of non-weapon system and ownership costs are covered as well. Satisfactory completion of the curriculum leads to the award of a Master of Science degree in Cost Analysis.

Prerequisites: Bachelor's degree. As a minimum, students must have completed college algebra with a grade of C or higher. Applicants must complete either the GRE or Graduate Management Admission Test before a letter of eligibility will be issued. Experience in the Comptroller field is desirable, but not a prerequisite.

Class Start Date: June. Duration: 15 months. Conducted by AFIT Resident School of Systems and Logistics.

AFSC in which graduates are normally assigned: 674X; usually at an AFSC product division, an AFLC Air Logistics Center, a MAJCOM headquarters, or HQ USAF.

Criminology and Police Administration (Graduate)—Dec 79

Provides graduate education in the application of current police administration, law enforcement, criminal iustice and rehabilitation, investigation, and security theories and practices. By participating in this program, Security Police officers broaden their knowledge and increase their skills in managing the Air Force Security Police programs to include installation security, air base ground defense, weapon systems security, law enforcement, resources protection, administrative security, corrections and retraining; and enhance their qualification to perform staff function such as base Chief of Security Police, and to MAJCOM Security Police units. AFOSI officers broaden their knowledge and increase their skill in managing and conducting criminal investigative and counterintelligence activities, including criminal, fraud, and loyalty investigations; and acquire greater expertise in commanding units performing investigative and counterintelligence functions.

Prerequisites: Bachelor's degree in police administration, criminal justice, corrections, or sociology; 3 to 7 years in Security Police or Special Investigations career field.

Class Start Date: September. Duration: 12 to 15 months.

AFSC in which graduates are assigned: 82XXX and 81XXX.

Excess Leave Legal Education Program—Dec 79

This program authorizes excess leave for a period not to exceed 36 months to permit career officers to obtain a basic law degree, take a bar examination, and subsequently serve as career judge advocates. No pay or allowances are authorized while in excess leave. Excess leave is leave other than that accrued under 10 U.S.C. 701. Excess leave is not charged against an officer's leave account and does not have to be repaid. Applications are made according to AFI 51-101.

Prerequisites: Applicant must be a US citizen; regular or career

commissioned officer; have served on active duty not less than 2 years as of the first day of class; be in the grade of captain (with less than 3 years in grade) or below; and a graduate of accredited college or university with a BA degree or equivalent.

Selection Procedures: Officers may apply to HQ USAF/JAEC through a local Staff Judge Advocate Office. The officers are competitively selected by a board of JAG officers (with AFIT and AFPC nonvoting representatives) to fill specific requirements. Selectees must be approved by the Judge Advocate General and by AFPC.

Class Start Date: September. Duration: maximum of 36 months.

AFSC in which graduates are normally assigned: 8824.

Executive Seminar (Graduate, nondegree)—Dec 79

The most advanced training program available to selected senior grade officials of US Government agencies with foreign affairs responsibilities. Program goal is to broaden members' understanding of contemporary political, economic, social and cultural trends in the US and how they interact with US congressional-executive relations, management of foreign affairs and negotiations. Extensive reading, travel, in-house discussions, individual case studies and on-the-spot exchanges of view with prominent educators, scientists, business, labor and agricultural leaders, figures in the media and the arts, government officials and law enforcement authorities are important components of the seminar program. Officer attends this program in lieu of a senior service school.

Prerequisites: Must hold Top Secret, COSMIC, and "Q" clearances valid for duration of the seminar; be a colonel (or colonel selectee) or equivalent grade for other services and civilians; and meet the eligibility criteria for attendance at a senior service school per AFI 36-2301.

Selection Procedures: After an officer has been selected for attendance at a senior service school and identified for the Executive Seminar Program by a board of general officers, he or she is nominated to the Ambassador/Coordinator of the seminar after appropriate screening by the Colonel's Group.

Class Start Date: September. Duration: 10 months.

AFSC in which graduates are assigned: 0003.

Food Service Management (Graduate)—Sep 93

Graduate study in the management of hotel and commercial food service. Emphasis is placed on business and management problems peculiar to this type of activity, particularly from the standpoint of production, accounting and finance, management, marketing, and facilities.

Prerequisites: A bachelor's degree in business administration, accounting, or hotel and restaurant management. Satisfactory completion of the Graduate Management Admissions Test is required.

Class Start Date: September. Duration: 12 to 18 months, depending on the background of the student.

AFSC in which graduates are normally assigned: 78XX.

Forensic Science (Graduate)—Dec 79

The program is jointly sponsored by the Armed Forces Institute of Pathology and George Washington University (GWU). Program includes training at AFIP in death investigation, such as pathology, examination of body fluids, hair and fibers, toxicology, odonotology (bite marks and dental identification), fingerprints, etc. At GWU, training is offered in the broader aspects of forensic science required in criminal investigations, such as microscopy, analysis of questioned documents, photography, voiceprints, instrumental and chemical analysis, firearms and toolmarks, explosives, xylotomy (wood evidence), fraud and counterintelligence investications. Program includes visits to DC Homicide Squad and Medical Examiners' offices in Baltimore, MD, and Washington, DC, to observe medicolegal autopsies. In addition, 2-week courses are attended at the Drug Enforcement Administration and the Smithsonian Institution (forensic anthropology).

Prerequisites: AFOSI agents with minimum of 3 and not more than 7 years of active service and at least 18 months of criminal investigation experience in AFOSI; a bachelor's degree from accredited college or university, with cumulative GPA of 2.5/4.0 or higher; and successful completion of GRE aptitude test.

Selection Procedures: Student is selected by HQ AFOSl, subject to approval by AFPC.

Class Start Date: September. Duration: 12 months.

AFSC in which graduates are normally assigned: 82XX.

Industrial and Personnel Psychology (Graduate)—Jun 81

Prepares the officer to conduct and manage behavioral sciences research and development programs, projects, and activities. The curriculum will include studies in research methods and statistics, personnel measurement, theory and procedures, physiological psychology, psychological processes, and human factors.

Prerequisites: A bachelor's degree in psychology, with work in physiological psychology and statistics. Satisfactory completion of the aptitude test of the GRE is required.

Class Start Date: September and June. Duration: 24 to 30 months.

AFSC in which graduates will normally be assigned: 26XX.

Industrial and Personnel Psychology (PhD)—Jun 79

Advanced graduate study in the conduct and management of behavioral science research and development programs, projects and activities; enhances the officer's ability to serve as a liaison between the Air Force and the scientific community. Program includes studies in research methods and statistics, measurement, theory and procedures, psychometrics, and physiological and experimental psychology.

Prerequisites: Master's degree in psychology with a GPA of at least 3.5/4.0. Must have completed mathematics through integral calculus and course work in the areas of physiological, experimental and psychometrics. Completion of the aptitude test of the GRE is required.

Class Start Date: January, June, and September. Duration: 2 to 3 years.

Information Resource Management (Graduate)—Sep 89

An interdisiciplinary program which emphasizes the management aspects of effectively designing, developing, and implementing information systems for Air Force organizations. It provides students with the concepts and methodologies necessary to effectively match information technology to organizational needs. The program leads to a Master of Science degree in information resource management.

Prerequisites: Bachelor's degree and completion of math through college algebra with grades of C or higher. Undergraduate GPA must

be at least 2.5 on a 4.0 scale. An acceptable score on either the aptitude test of the GRE or the Graduate Management Admission Test is required.

Class Start Date: June. Duration: 18 months. Conducted by AFIT Resident School of Systems and Logistics.

AFSC in which graduates are normally assigned: 49XX, 70XX, 90XX.

Logistics Management (Graduate)—MASL D178007—Jun 90

Provides a broad, diversified curriculum that will equip students with the skills required to perform effectively as middle and upper managers in any of a variety of Air Force and defense logistics systems. Satisfactory completion of the curriculum leads to award of a Master of Science degree in logistics management.

Prerequisites: Bachelor's degree in business administration, transportation, economics, the physical sciences, or industrial engineering or a degree from a service academy. As a minimum, officer must have completed college algebra with a grade of C or higher. Intermediate algebra does not satisfy this requirement. Applicants must complete either the aptitude test of the GRE or the admission test for graduate study in business before a letter of eligibility will be issued. Experience in one or more of the following career fields is desirable: 40XX, 60XX, 62XX, 64XX, and 66XX. ECL 80.

Class Start Date: June. Duration: 15 months. Conducted by AFIT Resident School of Systems and Logistics.

AFSC in which graduates are normally assigned: 004X, 009X, 31XX, 40XX, 60XX, 62XX, 64XX, and 66XX.

Maintenance Management (Graduate)—MASL D178164—Jun 90

Provides a variety of quantitative and qualitative concepts designed to enhance the logic and objectivify of decision making. A diversified curriculum increases the maintenance managers' practical understanding of how their job relates to the other logistics processes and how these processes are integrated in the life cycle management of weapon systems. Satisfactory completion of the curriculum leads to award of a Master of Science degree in logistics management.

Prerequisites: Bachelor's degree in business administration, transportation, economics, the physical sciences, industrial engineering or a degree from a service academy. As a minimum, officer must have completed college algebra with a grade of C or higher. Intermediate algebra does not satisfy this requirement. Applicants must complete either the aptitude test or the admission test for GRE or the admission test for graduate study in business before a letter of eligibility will be issued Experience in one or more of the following career fields is desirable: 31XX, 40XX, 60XX, 62XX, 64XX, or 66XX. ECL 80.

Class Start Date: June. Duration: 15 months. Conducted by AFIT Resident School of Systems and Logistics.

AFSC in which graduates are normally assigned: 004X, 009X, 31XX, 40XX, and 66XX.

Mass Communications (Graduate)—Sep 90

Provides the academic background to direct and administer an effective public affairs program at higher levels of command. While individual programs may vary, the course content usually includes work in the areas of journalism, radio, television, and motion pictures, as related to public relations.

Prerequisites: Bachelor's degree with a major in public relations, education, journalism, speech, or communicative arts. Satisfactory completion of the aptitude test of the GRE is required.

Class Start Date: September. Duration: 12 months; conducted by civilian universities.

AFSC in which graduates are normally assigned: 79XX.

Research and Development Management (Graduate)—Dec 79

Provides the skills necessary for management of research and development operations. The curriculum includes courses in the areas of accounting, financial analysis, managerial finance, economics, statistics, quality control, electronic data processing, systems management, and operational analysis.

Prerequisites: Bachelor's degree, completion of math through integral calculus with grades of C or higher; satisfactory completion of the admissions test for graduate study in business.

Class Start Date: September and June. Duration: 15 to 18 months.

AFSC in which graduates are normally assigned: 26XX, 27XX, and 28XX.

Research Associates (Graduate)—Dec 79

Ten to 12 carefully chosen, experienced majors and lieutenant colonels serve at selected civilian study centers concerned with national and military strategy and national security policy. Through the research associates (RA), the Air Force gains insights into the thinking of noted scholars on defense strategy and security policy issues and has the opportunity to articulate Air Force perspectives in the academic forum. The Air Force also benefits from the enduring relationships and continued influence with scholars and civilian officials.

Prerequisites: Considered desirable: master's degree in political science, international relations, public administration, or economics; graduation from a senior service school; Air Force record reflecting career success; recent planning duty at Air Staff level. Personal attributes: high intellectual ability, initiative, competence in writing and speaking, and a personality indicating officer would fit into the academic community.

Student Selection Procedures: Action officers from the Directorate of Doctrine and Concepts survey personnel records and likely sources for nominees and present slate of candidates to Director, HQ/XO, for selection and approval. After officers accept, HQ/XOXLD nominates them to study centers. AFPC must approve selection and release to RA program.

Class Start Date: September. Duration: 10 months.

AFSC in which assigned: 0211.

Software Systems Management (Graduate)—Dec 90

Prepares students to manage the acquisition and development of cost-effective, reliable, and maintainable software systems. A diversified curriculum increases the student's understanding of software engineering and management principles including life cycle models, structured system development methodologies, and systems management concepts (including topics such as contracting and acquisition management, project management, and financial management).

Prerequisites: Bachelor's degree, preferably with a major in mathematics, engineering, or computer sciences. Applicants must have completed college calculus with a grade of C or higher. Applicants must complete either the GRE or the Graduate Management Admissions Test before a letter of eligibility will be issued. Applicants must also have experience with a higher-order programming language such as Ada, Pascal, Fortran, or Cobol.

Class Start Date: June. Duration: 18 months. Conducted by AFIT Resident School of Systems and Logistics.

AFSCs in which graduates are normally assigned: 27XX, 49XX.

Supply Management (Graduate)—Dec 90

A specialized program designed to raise the professional competence of supply officers. Curriculum includes course work in the following subject areas: (1) forecasting management, (2) inventory management, and (3) the practical application of quantitative and qualitative techniques to supply systems. The forecasting management class examines the theoretical and practical aspects of a wide variety of forecasting techniques for application within supply and logistics systems. The inventory management class examines a diverse array of techniques for managing both consumable and reparable supply items in logistics systems.

Prerequisites: Completion of a bachelor's degree program, preferably in business administration, transportation, economics, physical sciences,or industrial engineering, or a degree from a service academy. As a minimum, the officer must have completed college algebra with a grade of C or higher. Intermediate algebra does not satisfy this requirement. Applicants must complete either the GRE or the Graduate Management Admission Test or graduate study in business before a letter of eligibility will be issued. Experience in one or more of the following career fields is desirable: 64XX, 40XX, 66XX, or 60XX.

Class Start Date: June. Duration: 15 months. Conducted by AFIT Resident School of Systems and Logistics.

AFSCs in which graduates are normally assigned: 64XX and 66XX.

Systems Management (Graduate)—MASL D178085—Jun 90

Provides students with a broad theoretical and applied background in the concepts and principles of qualitative management, economic, operations research, and allied disciplines. It gives mature, technically-oriented officers a graduate educational program aimed at improving their skills in managing a variety of research, engineering, and development systems and related activities. The program leads to a Master of Science degree in systems management.

Prerequisites: Bachelor's degree, completion of math through integral calculus with grades of C or higher. All applicants must complete the admission test for graduate study in business before a letter of eligibility will be issued.

Class Start Date: June. Duration: 15 months. Conducted by the AFT Resident School of Systems and Logistics.

AFSC in which graduates are normally assigned: 27XX.

Systems Technology (Graduate)—Sep 93

Program is taught only at the Naval Postgraduate School and is called Joint Command, Control, and Communications (C3). Program objective is to educate officers in the principles behind such C3 systems and develop the capability to integrate the technological advances with military operational requirements. The start date is approximately 1 October each year; but if the officer needs refresher courses, he or she can begin a preliminary course approximately 15 August. The preliminary course has proven to be very beneficial to past students and should be used whenever possible.

Prerequisites: Bachelor's degree with math through integral calculus.

Class Start Date: September. Duration: 15 to 18 months.

AFSC in which graduates are assigned: 49XX.

Telecommunications Management (Graduate)—Jun 90

An interdisciplinary program to qualify officers to function at the executive level in the field of telecommunications management. The program is structured specifically to accept a variety of undergraduate disciplines. The curriculum includes operational research, organizational theory and practice, statistics, communication system theory, and seminar in telecommunications.

Prerequisites: Bachelor's degree to include completion of college algebra. Applicant must be serving in 49XX career field. Completion of the admissions test for graduate study in business is required for officers qualifying for the program in conjunction with C-E Staff Officers Course; all others are required to take the GRE.

Class Start Date: At the direction of AFPC. Duration: When conducted in conjunction with the AETC C-E Staff Officers Course, duration is 30 weeks; in other instances duration is approximately 1 year.

AFSC in which graduates are normally assigned: 49XX.

Transportation Management (Graduate)/MASL D178207—Jun 79

A specialized program designed to raise the professional competence of transportation officers. Curriculum includes course work in the following subject areas: (1) rail, motor, air, and water transportation regulations, (2) traffic management and other appropriate transportation courses, (3) accounting, (4) personnel management, (5) production management, and (6) production control.

Prerequisites: Academic completion of bachelor's degree program. Satisfactory completion of the graduate management admissions test.

Class Start Date: September and June. Duration: 12 to 18 months.

AFSC in which graduates are normally assigned: 60XX.

Instructor Preparatory

Air Force Academy Instructor Program—Sep 72

Officers selected for duty at the Air Force Academy, who request additional formal education to perform as fully qualified instructors, are enrolled in selected universities for graduate study in fields related to their particular department of instruction. The primary purpose is to provide formal subject matter background as preparation for teaching academy courses. Effort is made, however, to enroll students in academic fields that will also provide preparation for teaching academy courses and future Air Force responsibilities. Programs are offered in the following fields: aeronautical engineering, astronautics, chemistry, economics and geography, electrical engineering, English, French, Russian, history, leadership studies, mathematics, mechanical engineering, mechanics, philosophy, physical education, physics, physiology, and political science.

Prerequisites: Bachelor's or master's degree in appropriate field.

Application Procedures: Officers apply for instructor duty at the Air Force Academy according to AFMAN 36-2110 (formerly AFR 36-20). Applicants are selected by the Air Force Academy and approved for training by HQ USAF.

Class Start Date: January, June, and September. Duration: 12 to 30 months, depending upon academic background and as determined by the Commandant, AFIT. Officers must arrange to complete their educational programs within the minimum period of time required to obtain the academic level for which they entered training.

Air University Faculty and Staff Advanced Academic Degree Program (Master/PhD)—Jun 85

Officers are selected for faculty or staff duty in AU (AFIT resident school: School of Engineering, and the School of Systems and Logistics; AU/Maxwell Faculty or Staff; Air Command and Staff College, Air War College, Center for Professional Development (CPD), AU Staff, HQ AFROTC Staff, and AFROTC Detachment Faculty) and enrolled in selected universities for graduate study at master and PhD level in fields related to their particular projected duty. The following levels and course lengths apply:

Program Length	*Level*	*Avg Prgm*
AU/Maxwell Faculty/Staff	Masters	12-18 Months
AU/Maxwell Faculty/Staff	PhD	24-30 Months
AFIT Faculty	PhD only	30-34 Months
AFROTC Det Faculty	Masters only	12-15 Months

Programs are offered in engineering, math, science, management, social science, and educatipn. Following completion of their academic programs, officers are assigned to the faculty or staff position for which they were sponsored.

Prerequisites: Master's degree in appropriate field for PhD. A bachelor's degree in the appropriate field for the AU/Maxwell Faculty or Staff Master's Degree Program. For AFROTC Detachment Faculty, officers may have a bachelor's degree in practically any academic specialty with overall grade point average of 2.5 or higher based on the scale of A2104, B2103, C2102, D2101. Completion of either ATGSB or GRE aptitude test is required, depending upon the type of academic program desired, and officers should ensure test results are on file at the AFIT Central Transcript Repository.

Application Procedures: Officers desiring a PhD with a follow-on assignment to AU organizations or the AU/Maxwell Faculty or Staff Master's Degree Program. For AFROTC Detachment Faculty, officers may have a bachelor's degree in practically any academic specialty with overall grade point average of 2.5 or higher based on the scale of A2104, B2103, C2102, D2101. Completion of either ATGSB or GRE aptitude test is required, depending upon the type of academic program desired, and officers should ensure test results are on file at the AFIT Central Transcript Repository.

Application Procedures: Officers desiring a PhD with a follow-on assignment to AU organizations or the AU/Maxwell Faculty or Staff Master's Degree Program should apply according to AFMAN

36-2110 (formerly AFR 36-20), using figure 4.3 of this manual. Those wanting a master' degree with a follow-on assignment to AFROTC detachment faculty duty should apply per AFMAN 36-2110 (formerly AFR 36-20) and include a transcript of all college work. Selection is made by AU and approved by HQ USAF.

Class Start Date: January, June, and September. Officers must arrange to complete their educational program within a minimum period established by AFIT according to academic level and educational program.

Chaplain

Chaplain Education (Graduate)—Jun 82

Each year the Air Force offers graduate education to a limited number of Air Force chaplains. These are nondegree programs, but applicants must meet the prerequisites to qualify for an advanced degree. Applicants must be career reserve or regular officers. Programs offered are based on current Air Force chaplaincy needs as determined by the Chief of Air Force Chaplains, HQ USAF/HCX. Some areas in which programs are offered are journalism, writing, publishing-editing, hospital ministry, religious education, holistic spirituality, and communications.

Evaluations and Selections: AFIT Admissions Division evaluates applications. HQ USAF/HCX selects applicants.

Law

Legal Education Program—Sep 74

The Secretary of the Air Force is authorized to select not more than 25 Air Force officers each fiscal year to attend accredited law schools to obtain their law degrees and subsequently serve as career judge advocates. Applications are submitted to the Judge Advocate General's Department Personnel Selection Board through the office of the nearest base staff judge advocate. A letter of acceptance from an American Bar Association accredited law school must accompany each application.

Prerequisites: Applicant must be a US citizen; regular or career reserve commissioned officer; have served on active duty not less than 2 years or more than 6 years; be in the grade of captain or below; and a graduate of an accredited college or university with a BA degree or equivalent.

Judge Advocate Education Program (Graduate)—Sep 74

The Judge Advocate General's department is authorized a limited number of spaces each fiscal year for graduate training in law. Programs in government procurement law, taxation law, labor law, international law, and environmental law are offered. These programs enhance the officer's ability to cope with complex procurement, tax, and labor problems, provide the Air Staff and commanders expert legal advice and protect vital interests of the US Air Force.

Prerequisites: Applicant must be a regular or career reserve Judge Advocate officer currently serving in the grade of major or below, with a minimum of 2 years of active duty completed. Officer must meet AFIT academic prerequisites.

Education With Industry

EWI-CIP401—Contracting and Manufacturing Management—PDS Code WXE—Dec 79

On-the-job training with selected industrial concerns at the management level; specifically, companies with which the Air Force has contracts. During the tour, officers are rotated through the various departments of the company, actually working on management level problems in each department. The training stresses industrial organization and operations, management of raw materials and finished products, production and assembly, recording and accounting. industrial and public relations, legal department activities, service and maintenance department activities and inspection of all phases of production. Students assigned to this on-the-job training program receive management training similar to that provided junior executives. This program does not lead to a degree or the granting of academic credit.

Prerequisites: Bachelor's or master's degree in business administration, engineering, physical sciences, economics, finance, marketing or management, or degree from a service academy. Captain through maior with less than 13 years of TAFCSD/PLS as of the course entry date may request an evaluation.

Special Requirements: Secret clearance by class start date.

Class Start Date: September. Duration: 10 months.

AFSC in which graduates are normally assigned: 652X and 653X.

EWI-CIP474—Systems Acquisition Management—PDS Code 0G1—Dec 90

Provides an insight to the responsibilities, problems, managerial techniques, and practices employed by major defense contractors. Officers will be deployed in the company as project engineers concerned with the development and acquisition of defense systems. Initial training includes orientation within the major division of the development and acquisition process, including: research, contracts, production, and quality assurance, before assignment as project engineer.

Prerequisites: Bachelor's or master's degree in engineering, engineering management, or business administration. Experience in a system program office is desirable.

Class Start Date: September. Duration is 10 months.

AFSC in which graduates are normally assigned: 27XX.

AFIT—Professional Continuing Education (PCE) Course Announcements

International Programs

WIOP100—AFIT International Officer Preparatory Course (IOPC)—PDS Code 387—Wright-Patterson/6 wk—Apr 95

Prepares international officers to participate in graduate education programs at the Air Force Institute of Technology. Instruction centers on contributing to responsible defense resource management, fostering an understanding of democracy and civilian rule of law, improving military justice systems, promoting internationally recognized human rights, resource methodology, and computer and mathematics refresher training. The course will assist the students in acquiring an understanding of democracy, military justice, and human rights. Designed to meet individual student needs by providing course work at a level based on the individual's language fluency. The majority of class time is devoted to lectures and seminars with civilian or military instructors. Field trips provide students with insights into US institutions, society, and ideals. A sponsor program assists students in becoming acquainted with the civilian and military communities.

Prerequisites: Attendance is limited to international trainees who have been selected to attend an AFIT program.

Admin and Reporting Instructions: Advise AFIT/XOI of student's ETA in Dayton OH and flight itinerary including carriers, flight numbers, arrival times, and include number and age of accompanying dependents. Schedule arrival during duty hours (0730 to 1630) at least 1 week before class start date. Expect to accomplish administrative inprocessing during the 2 duty days before class start date. Students will be met at the airport by an international officer representative or sponsor. Students arriving during nonduty hours should report to the billeting office, telephone DSN 787-3810. Students arriving unannounced (during duty hours) should report to the International Office, Bldg 125, area B, room 2002, telephone DSN 785-6800. Summer uniform is authorized year round. Service dress uniform (coat and tie) is required for special occasions. Students should also bring a complete set of their country's equivalent of the camouflaged fatigue (BDU) uniform. They may bring other mission-unique uniforms in addition to, but not in lieu of, a fatigue equivalent. Comply with paragraph 1.4 of this publication.

Quota Control: AFSAT/TO.

Civilian Institutions

WCIPAP1—Acquisition Systems Engineering Course—PDS Code WJH—various locations/1 wk—Mar 93

Emphasizes the systems engineering process as followed in the Department of Defense. This is accomplished by use of a requirements document which addresses requirements for a system demanding the integration of high technology items with new software interfaces. This course takes the student through the entire systems engineering process.

Prerequisites: 2d Lt through Lt Col with AFSC 28XX, 49XX, or 27XX with engineering or scientist degrees.

Quota Control: HQ AFSC/EN.

WCIP05A—Aircraft Mishap Investigation Course (AMIC)—PDS Code PZW—Kirtland/2 wk—Apr 95

Trains officers and civilians in aircraft mishap investigation techniques and procedures; analyses of human and material factors involving aircraft systems and power plants. Curriculum is similar to investigative portion of Flight Safety Officer (FSO) course.

Prerequisites: Officer or civilian (GS-9 or above) who is a potential voting member in a formal class A flight mishap investigation board (AFI 91-204, *Investigating and Reporting Mishaps*), and technical experts from Air Force Materiel Command.

Admin Instructions: MAJCOM Safety Office will consolidate attendee information and send list to AFSA/SEDE 45 days before class start date. Include name, grade, SSN, AFSC or job series, complete address of unit assigned, and DSN. If individual is scheduled to PCS/PCA, include projected unit of assignment and reporting date.

Course Reporting Information: UNIFORM: Flight suit/BDU; appropriate attire for civilian attendees. High-top boots required for Crash Lab. Recommend gloves, heavy jacket, and hat to cover ears in winter; sunscreen and brimmed hat in summer. LODGING: Billeting reservations have been made by AFSA/SEDE beginning at 1400 the day before class starts and must be used. TRANSPORTATION: Attendees should contact Dispatch, DSN 246-2297, in advance to arrange pick up from Albuquerque Airport. Government transportation provided to and from class—bus pick up at 0745 in front of Officer's Club and Rec Center. CLASS HOURS: Starts 0800; last day ends 1100. No early release authorized. MATERIALS REQUIRED: Two sets of TDY orders, note paper, pens, and pencils.

Location: Kirtland AFB NM, HQ AFSA Bldg 24499, 1st floor.

Selection Procedures: MAJCOM Safety Office controls student selection with AFSA/SEDE approval.

Quota Allocation: AFSA/SEDE to MAJCOM Safety Office.

WCIP05B—Chief of Safety Course (COS)—PDS Code EAE—Kirtland/4 days—Apr 95

Instruction in safety and related academic subjects for the effective conduct of Air Force safety programs at wing or base level. The curriculum includes introduction to Air Force safety programs; principles of safety management; wing/base level chief of safety duties; mishap prevention program, planning and implementation; management of time; mishap investigation and reporting; problem solving and decision making; communicating for safety; review of Air Force occupational safety and health program; traffic and other off-duty safety programs; safety education and training; inspection techniques; and safety office administration.

Prerequisites: Officer or civilian (GS-11 or higher) who is a newly assigned chief of safety at the host base safety office.

Admin Instructions: MAJCOM Safety Office will consolidate attendee information and send the list to AFSA/SEDE 45 days before class start date. Include name, grade, SSN, complete address of unit assigned, DSN, and date appointed in chief of safety position. If individual is scheduled to fill a chief of safety position, include projected unit of assignment and reporting date.

Course Reporting Information: UNIFORM: Blue shirt combination uniform only—no flight suits. LODGING: Billeting reservations have been made by AFSA/SEDE beginning at 1400 the day before class starts and must be used. TRANSPORTATION: Attendees should contact Dispatch, DSN 246-2297, in advance to arrange pick up from Albuquerque Airport. Government transportation is provided to and from class—bus pick up is at 0745 in front of the Officer's Club and rec center. CLASS HOURS: Starts 0800; last day ends 1600—no early release authorized. MATERIALS REQUIRED: Two sets of TDY orders.

Location: Kirtland AFB NM, HQ AFSA Bldg 24499, 1st floor.

Selection Procedures: MAJCOM Safety Office controls student selection with AFSA/SEDE approval.

Quota Allocation: AFSA/SEDE to MAJCOM Safety Office.

WCIP05C—Flight Safety Officer Course (FSO)—PDS Code EPD—Kirtland/5 wk—Apr 95

Provides safety education for officers assigned to manage Air Force flight safety programs. Objective is to provide students with a working knowledge of aircraft mishap investigation and aircraft mishap prevention procedures, policies and techniques. The course graduate should be capable of conducting a base level aircraft mishap prevention program; investigating and reporting all classes of aircraft flight mishaps; and functioning as the investigating officer (or Safety Advisor) on an aircraft mishap investigation board IAW AFI 91-204.

Prerequisites: Officer with minimum of 4 years of pilot or navigator rated service and assigned as full-time flying safety officer or safety staff officer. Only personnel currently filling UDL safety positions or actually designatedto fill a safety position are eligible to attend. MAJCOM Safety Office is the authority for granting waiver of 4 years of rated service.

Admin Instructions: MAJCOM Safety Office will consolidate attendee information and send list to AFSA/SEDE 45 days before

class start date. Include name, grade, SSN, AFSC, complete address of unit assigned, and DSN. If individual is scheduled to PCS/PCA, include projected unit of assignment and reporting date.

Course Reporting Information: UNIFORM: Flight suit/BDU. High-top boots required for Crash Lab. Recommend gloves, heavy jacket, and hat to cover ears in winter; sunscreen and brimmed hat in summer. LODGING: Billeting reservations have been made by AFSA/SEDE beginning at 1400 the day before class starts and must be used. TRANSPORTATION: Attendees should contact Dispatch, DSN 246-2297, in advance to arrange pick up from Albuquerque Airport. Government transportation provided to and from class—bus pick up at 0745 in front of Officer's Club and Rec Center. CLASS HOURS: Starts 0800; last day ends 1100. No early release authorized. MATERIALS REQUIRED: Two sets of TDY orders, note paper, pens, and pencils.

Location: Kirtland AFB NM, HQ AFSA Bldg 24499, 1st floor.

Selection Procedures: MAJCOM Safety Office controls student selection with AFSA/SEDE approval.

Quota Allocation: AFSA/SEDE to MAJCOM Safety Office.

WCIP05D—Ground Safety Management Course (GSM)—PDS Code EPF—Univ of Wash, Seattle/2 wk—Apr 95

Provides state-of-the-art safety management methodologies and techniques in safety and related academic subjects to enhance student's ability to effectively manage ground safety programs. Comprehensive undergraduate-level educational program contributing to the professional development of Air Force ground safety personnel. This is a three-credit course - ENGR 498. Students desiring to receive college credit from the university must pay the current university fee.

Prerequisites: Civilians GS-11 and above and NCOs MSgt and above, with 5 years or more of safety experience, currently assigned to a full-time safety position with safety management responsibilities; that is, base level chief of ground safety, base-level NCOIC of ground safety, NAF and MAJ-COM/DRU/FOA ground safety program segment managers, or supervisors within the ground safety organization.

Admin Instructions: MAJCOM Safety Office will consolidate attendee information and send list to AFSA/SEDE 45 days before class start date. Include name, grade, SSN, complete address of unit assigned, DSN, AFSC or job series, duty title, and number of years of safety experience.

Course Reporting Information: UNIFORM: Civilian attire authorized. LODGING: Campus dormitories and meal cards are provided by the university and must be used—attendees only authorized reduced per diem for miscellaneous expenses. TRANSPORTATION: Shuttle express van service available from Seattle-Tacoma Airport to the university at minimal cost. CLASS HOURS: Starts Monday, 0800; last day ends 1100. No early release authorized. MATERIALS REQUIRED: Two sets of TDY orders, note paper, pens, pencils, and pocket calculator with square root function.

Location: University of Washington, Seattle, WA.

Selection Procedures: MAJCOM Safety Office controls student selection with AFSA/SEDE approval.

Quota Allocation: AFSA/SEDE to MAJCOM Safety Office.

WCIP05G—Advanced Transportation Management—PDS Code WVL/3 wk—Jan 82

Designed to deepen understanding of economic, social, and political developments affecting transportation; teach application of latest techniques of business analysis; increase awareness of interrelationships among departments of transportation business, develop ability to analyze operations, planning, and strategy through top-management perspective. Major subject areas: financial management, marketing management, management science, and distribution management and logistics.

Prerequisites: Major or above with AFSC 6016 or civilian equivalent. Grade waivers may be authorized by HQ USAF/LETX.

Location: Northwestern University, Evanston, IL.

Selection Procedures: MAJCOMs and HQ USAF/LETX establish requirements.

Quota Control and Selection: HQ USAF/LETX in coordination with HQ AFPC/DPMROS1D and MAJCOMs.

WCIP05H—Advanced Vehicle Maintenance Management—PDS Code WV1—various civilian schools—1 wk 4 days—Dec 88

Three sequential 3-day seminars designed to stimulate improvement in management and supervision of maintenance operations; present modern shop techniques and newest engineering developments; and suggest methods to increase efficiency, reduce accidents, and minimize costs. Upon completion of the course, students apply for professional certification by the National Committee for Motor Fleet Supervisor Training. Certification is obtained by preparing an exhibit of practical experience and satisfactorily completing a comprehensive written examination. The course is comprised of three seminar blocks:

1. Maintenance of Commercial Vehicles, Phase A, 3 days

2. Maintenance of Commercial Vehicles, Phase B, 3 days

3. Maintenance Management, 3 days

Prerequisites: MSgt through CMSgt, or civilian equivalent, with AFSC 472XX. Grade waivers may be authorized by HQ USAF/LET. Nominees must be available to attend all three seminars or will not be considered.

Quota Control and Selection: HQ USAF/LET.

WCIP05J—Software Configuration Management Seminar—PDS Code VHD/3 days—Dec 88

Instructs managers and supervisors in software project development methodology using aerospace pioneered concepts. Presents the techniques, tools, and procedures that have been used successfully to organize, schedule, control, direct, finance, or budget, and coordinate software developments. Designed to provide project managers, systems analysts and programmers with a uniform discipline and procedure for the development of future automated data processing (ADP) systems, contract, and logistics management throughout the Department of the Air Force. Compatible with the guidelines in AFR 700 and 800 series.

Prerequisites: Captain, master sergeant, or civilian GS-12 or above, with working knowledge in ADP with at least 2 years of experience in project management.

Selection Procedures: HQ SSC/KST, Gunter AFB AL 36114-6343, DSN 446-4886/4996, controls student selection in coordination with MAJ-COM/DP.

Location: To be determined.

Quota Allocation: SSC/KST.

WCIP05K—Air National Guard Aircraft Mishap Prevention Course (ANG/AMPC)—PDS Code WWJ—Kirtland/2 wk—Apr 95

A formal flight safety management course specifically designed for ANG. Oriented toward operations officers, flying training supervisors, aircraft maintenance officers and flight safety officers. Subject matter stresses safety program development and management. Provides key ANG personnel with effective techniques to implement a viable accident prevention program in their units.

Prerequisites: All rated officers in VE aircraft and other officers in the following AFSCs: 0002, 0066, 0036, and 40XX. Waiver required for FSO course graduates to attend, approval required by ANGRC/SE.

Admin Instructions: ANGRC Safety Office will consolidate attendee information and send list to AFSA/SEDE 45 days before class start date. Include name, grade, SSN, complete address of unit assigned, and DSN.

Course Reporting Information: UNIFORM: Flight suit/BDU. LODGING: Billeting reservations have been made by AFSA/SEDE beginning at 1400 the day before class starts and must be used. TRANSPORTATION: Attendees should contact Dispatch, DSN 246-2297, in advance to arrange pick up from Albuquerque Airport. Government transportation provided to and from class—bus pick up at 0745 in front of Officer's Club and Rec Center. CLASS HOURS: Starts 0800; last day ends 1100. No early release authorized. MATERIALS REQUIRED: Two sets of TDY orders, note paper, pens, and pencils.

Location: Kirtland AFB NM, HQ AFSA Bldg 24499, 1st floor.

Quota Allocation: AFSA/SEDE to ANGRC/SE, Wash DC 20330.

WCIP05L—Logistics/Distribution—PDS Code WVZ—1 wk—Dec 86

Focuses on total cost analysis, warehousing and location theory, transportation, inventory control, customer service, computer applications, modeling, and organizational design. Focus is on the development of integrated physical distribution systems. Relationships among inventory, transportation, and warehousing costs are explored. Consideration is also given to administration, organization, and control of logistics and distribution systems, including people problems, that may occur when a new function is introduced.

Prerequisites: Major or above with AFSC 6016 or civilian equivalent. Grade waivers may be authorized by HQ USAF/LETX.

Selection Procedures: MAJCOMs and HQ USAF/LETX establish requirements.

Location: Northwestern University, Evanston, IL.

Quota Control and Selection: HQ USAF/LETX in coordination with HQ AFPC/DPMRSL2 and MAJCOMs.

WCIP05R—Police Administration—PDS Code WVW—Richmond KY/6 wk—Jan 96

Current principles of public organization and management for Security Police officers and NCOs; includes organizational problems of authority, delegation, staff concepts, managerial functions; community relations, police operations. Includes exposure to local police communities.

Prerequisites: Security police officers (Capt through Lt Col) and NCOs (SSgt through CMSgt in AFSC 811XX), with a bachelor degree and 3 years of security police experience. Officers should be filling staff or supervisory positions. NCO attendees should be law enforcement staff superintendents, operations superintendents or NCOICs, or flight chiefs with potential to fill these positions. Personnel selected to attend must arrange for an official transcript of their undergraduate work, showing their bachelor degree, to be provided Dr. Larry K. Gaines, Eastern Kentucky University, Stratton 410, Richmond KY 40475, prior to class completion.

Reporting Instructions: Students may contact Dr Larry Gaines, Eastern Kentucky University Department of Police Studies at (606)622-1978 or 623-8312 for billeting and reporting instructions but should not report earlier than 1 day before class start date. Students arriving by air must advise the University of arrival plans for transportation to the University. Quarters and tuition are paid by AFIT contract. Rental vehicles and excess baggage are not authorized. Smart civilian dress may be worn to class. Jeans may not be worn on field trips. Students must maintain an appropriate appearance as Air Force representatives. Return travel arrangements should not be made prior to 1500 on graduation day. POC is Dr. Larry K Gaines (606-622-1978).

Selection Procedures: Selection by MAJCOM.

Location: Eastern Kentucky University, Richmond, KY.

Quota Control: HQ AFSPA/SPLT.

OPR: HQ AFSPA/SPLT (DSN 263-0039).

WCIP05S—Religious Education Research CPCE—PDS Code S5F—various civilian institutions/2 wk—Mar 88

An intensive graduate level research course for chaplains working in religious education (RE). The course is designed for chaplains who direct RE programs in chapels, who have RE sensitive assignments, or who are identified as having strong potential for leadership in RE. Significant research and study is done both in theological foundations of religious education and in RE program development.

Quota Allocation and Selection: Chief of Chaplains, HQ USAF/HCX, Wash DC.

WCIP05U—Security Assistance Training Program, Flight Safety Officer (SATP/FSO)/Kirtland/10 wk/MASL D122005—Apr 95

Safety education for officers assigned to manage flight safety programs. Provides students with an understanding of safety program management fundamentals, safety principles and mishap investigation techniques. Course includes applied aerodynamics, engineering communications, management, psychology, accident prevention and investigation. Is general in nature, providing an overview of flight safety problems and useful methods of dealing with these problems. Includes a field visit to an operational USAF unit to conduct an on-scene safety survey. Designed as an educational process rather than a training tool to prepare an individual for day-to-day operations. Not intended to qualify personnel in any specific aircraft system. Upon graduation, the adaptation of this knowledge to local programs requires the personal motivation and initiative of the individual.

Prerequisites: Allied Air Force flying safety officer, must be pilot or navigator. Minimum of 80 ECL.

Course Reporting Information: UNIFORM: Authorized country uniform or flight suit. High-top boots required for instruction at USAF Crash Laboratory. Recommend gloves, heavy jacket, and hat

to cover ears in winter; sunscreen and brimmed hat in summer. LODGING: Billeting reservations have been made by AFSA/SEDE beginning at 1400 on Wednesday, 2 days before orientation which is scheduled on Friday—class instruction starts the following Monday. Trainees accompanied by their spouses will be charged an additional fee—children are not allowed in the visiting officer's quarters. Temporary family type quarters are extremely limited and can only be obtained on a "space available" basis. Recommend trainees bringing children make other lodging arrangements before arrival. Trainees with special needs should contact the Kirtland International Military Student Manager, DSN 246-9812, or commercial (505) 846-9812, for assistance. TRANSPORTATION: Government transportation provided to and from class. Bus will pick up trainees at 0745 in front of the Officer's Club and Rec Center. MATERIALS REQUIRED: Two sets of invitational orders, note paper, pens, pencils, and engineering or scientific calculator with logarithmic/exponential (squares, powers, roots) and trigonometric (sine, cosine, tangent, cotangent) functions.

Location: Kirtland AFB NM, HQ AFSA Bldg 24499, 1st floor.

Quota Allocation: AFSAT/TOXS.

WCIP05V—Foreign Service Institute Area Studies—PDS Code WVN—2 wk—Jun 74

Intensive seminars designed for officers who are scheduled to serve in a given OS area, or who are otherwise responsible for some aspect of US operations in an area in which they have not served or have not had recent experience. Enables such officers to acquire broad understanding of those political, economic, military, social, and cultural factors which should be taken into account in carrying out their professional responsibilities both in general area and in country of assignment. Participation and approach are interdepartmental in nature.

Prerequisites: Selection to serve as IO in OS area and command or SAFOI had indicated requirement for this instruction.

Location: Foreign Service Institute, Department of State, Wash DC.

TDY fund citation is furnished by AFIT/CI, Wright-Patterson AFB OH 45433, upon notification of selectee's name, grade, SSN, present and projected assignment, security clearance; FSI course desired with beginning date; and approval by SAFOII. AFIT submits Form DS-755 to the Institute. Send to HQ USAF/SAFOII four copies of orders placing officers on TDY to FSI.

Quota Allocation: Director of Information, HQ USAF, SAF/OIR and HQ AFPC.

WCIP05W—Public Communications—PDS Code AH8—7 wk 3 days/MASL D178106—Sep 90

Graduate-level university professional education in state-of-the-art communication theory, research, strategies, and tactics for selected public affairs officers, civilians, and NCOs. Scholarly study of human behavior; human interpersonal and organizational communication; types of research; research theory; directions, perspectives, methodology, evaluation, and application; nature and use of public opinion; development of effective communication strategies through image formulation and change; communication role of print, electronic, and film media; and legal, political, sociocultural, economic, and educational aspects of media employment.

Prerequisites: ECL 80.

Location: University of Oklahoma, Norman OK.

Quota Allocation: Management Division, Office of Public Affairs, Secretary of the Air Force (SAF/PAR)/AU or AFIT.

WCIP051—Public International Law—PDS Code WVY—3 wk—Sep 72

Symposium on international law for AFJAG officers.

Quota Allocation: Office of the Judge Advocate General, HQ USAF/JA.

Military air to be used for oversea travel. AFIT fund includes registration fee. No tuition costs involved.

WCIP052—Advanced Management Program—PDS Code S5D—4-13 wk—Jan 82

Refines skills, knowledge, and understanding essential to top management; strengthens executive competence in long range planning; reinforces capacities for qualitative analysis and decision-making; encourages critical judgment in analysis of quantitative data for managerial control; measurement and decision-making, as well as its use in measurement and communication of performance; deepens perception and refines skills in handling human elements in organization; examines environmental factors within national and international community.

Prerequisites: Two years in the grade of colonel before class entry. Location: Various civilian institution executive development programs are utilized; locations announced following participant selection.

Selection Procedures: HQ AFPC/DPMOC controls student selection in coordination with MAJCOM/DP.

Quota Control: HQ AFPC/DPMO.

WCIP053—Aerospace Test Facilities Course—PDS Code WVB—2 wk—Nov 72

Includes test facility designs; performance, application, and testing methods.

Lectures on aerodynamic wind tunnels, propulsion test facilities—both model and full scale—for air breathing and rocket-type propulsion systems; space simulation facilities and ballistic ranges. Offers tour and inspections of such facilities in operation at Arnold Engineering Development Center.

Location: Arnold Engineering Development Center, Tullahoma, TN.

Quota Allocation: AFSC/DPAT, Andrews AFB.

WCIP056—Trial Judges—PDS Code PZ2—4 wk—Sep 73

Continuing education in trial procedures for Air Force JAG officers.

Location: University of Nevada, Reno, NV.

Quota Allocation: Office of the Judge Advocate, HQ USAF/JA.

WCIP057—System Safety Management Course (SSM)—PDS Code WWN—various locations/1 wk 3 days—Apr 95

System safety education for officers and civilians performing system safety management, system acquisition and development, or systems engineering tasks. Intended for Product Center, Air Logistics Center, program office, and using command personnel who have system safety management responsibilities during design, development, or modification of weapon systems or who are involved in the definition, review, and evaluation of systems design efforts.

Prerequisites: Officers and civilians (GS/GM-11 or higher or intern

program leading to this level). All nominees must have a job-oriented (system safety or systems design management responsibilities) need for this highly specialized course. Except for AFMC, nominees must be performing system safety management duties at the MAJCOM. Waiver to any prerequisite will be evaluated by AFSA/SEDE on a case-by-case basis with written justification only.

Admin Instructions: MAJCOM Safety Office will consolidate attendee information and send list to AFSA/SEDE 45 days before class start date. Include name, grade, SSN, complete address of unit assigned, DSN, AFSC or job series, position title, and brief description of duties.

Course Reporting Information: UNIFORM: Blue shirt combination uniform for military; appropriate business attire for civilians. LODGING/TRANSPORTATION: Host base project officer will make group billeting reservations and arrange transportation. CLASS HOURS: Starts 0800; last day ends 1200. No early release authorized. MATERIALS REQUIRED: Two sets of TDY orders, note paper, pens, and pencils.

Location: Kirtland AFB NM, HQ AFSA Bldg 24499, 1st floor.

Selection Procedures: MAJCOM Safety controls student selection with AFSA/SEDE approval.

Location: Various military installations. Government quarters will be used to meet mission requirements.

Quota Allocation: AFSA/SEDE to MAJCOM Safety.

WCIP06H—Senior Managers in Government—PDS Code S3F—Harvard Univ/3 wk—Sep 91

A 3-week program for senior executives who have attained positions of broad responsibility and seek to gain fresh perspectives on their jobs and hone their managerial skills. The central aim is to enhance operational capacity of those who play major roles in the development and implementation of public policy.

Prerequisites: Must be in grade of O-7 or above.

Location: John F. Kennedy School of Government, Harvard University, Cambridge MA.

Selection Procedures: Selections made by HQ USAF/CC.

Quota Control and Selection: HQ USAF/DPG.

WCIP06J—Criminal Law Judges—PDS Code UX9—National Judicial College, Reno NV/1 wk—Jan 83

Provides indepth analysis of trends in the criminal justice system and studies current significant United States Supreme Court criminal law decisions with emphasis on Fourth, Fifth, Sixth, and Fourteenth Amendment cases. Specific subjects are: the adversary system in a criminal trial; pretrial and omnibus hearings; right to counsel; search and seizure; standing; warrants and warrantless searches; identification; double jeopardy; confessions; confrontation; jury problems; guilty pleas and plea bargaining; and avoiding successful habeas corpus attacks.

Location: National Judicial College, University of Nevada, Reno, NV.

Quota Control: HQ USAF/JA.

WCIP06K—Open Mess Management—PDS Code PA8—4 wk—Dec 87

Designed to provide advanced management training to selected open mess managers. Recognizes the responsibility of Air Force open mess managers to operate a civilian-type business within a military environment. Acquaints the student with proven operational methods successfully used in civilian enterprise and gives an insight to relevant problem solving and applications of academic techniques. Successful completion will enable open mess managers to recognize member needs and carry out with improved efficiency the three principle functions of the open mess mission-essential feeding, military protocol, and an acceptable membership social program.

Location: Michigan State University, East Lansing, MI.

Selection Procedures: HQ AFPC/DPMSBC controls student selection in coordination with MAJCOM/DP.

Quota Allocation: HQ AFPC/DPMSSB.

WCIP060—System Safety Analysis Course (SSA)—PDS Code WYK—various locations/2 wk—Mar 89

Practical application of system safety analysis techniques. Covers fault tree methods of analyzing systems for hazardous events, preliminary hazard analysis (PHA), failure mode effects and criticality analysis (FMECA), probability theory, statistics needed for quantitative analysis of fault trees, human factors, and an introduction to software safety techniques. Intended for engineers involved in the actual development of fault trees or the definition, evaluation, and view of contractor's fault tree efforts. Emphasis is placed upon the actual techniques and methodology used in fault tree construction and PHA/FMECA preparation.

Prerequisites: Officers and civilians (GS-11 or higher or intern program leading to this level). A bachelor's degree in engineering, science, or allied technical area is required. AFSA/SEDE may accept nominees without the required degree if their assignment requires the training and the nominee has the education and background necessary to successfully complete the course. All nominees must have a job-oriented need for this highly specialized course.

Admin Instructions: Command will send name, grade, SSN, AFSC, complete military address of anticipated unit of assignment, DSN, home mailing address, position and title, and brief description of duties to AFSA/SEDE 45 days prior to class start date.

Selection Procedures: MAJCOM Safety controls student selection with AFSA/SEDE approval.

Location: Various military installations. Government quarters must be used to meet mission requirements.

Quota Allocation: AFSA/SEDE to MAJCOM Safety.

WCIP06Y—Senior Executives in National and International Security—PDS Code S34—Harvard Univ/2 wk—Sep 91

Designed to meet the special needs of senior executives whose decisions affect the critical political military and economic interests of the United States. It aims to strengthen participants' understanding of major security-related issues such as regional security, arms control, international economic arrangements, energy, and force development. It also provides an increased sensitivity to the wide divergence in perceptions that generally surround such issues.

Prerequisites: Must be in the grade of O-7 or above.

Location: John F. Kennedy School of Government, Harvard University, Cambridge MA.

Selection Procedures: Selections made by HQ USAF/CC.

Quota Control and Selection: HQ USAF/DPG.

WCIP07A—Resource Protection/Crime Prevention Theory, Practice, and Management—PDS Code 1F2—Richmond KY/3 wk—Jan 96

Designed to prepare the person already proficient in the security police field to assume the role of a crime prevention and resources protection program manager. Includes cost effectiveness of alarm and locking systems, target hardening risk management principles, crime data analysis and use, commercial and residential crime prevention, partnerships in crime prevention, marketing crime prevention concepts, and current problems. The person, upon graduation, will provide technical and consultation services in the coordination of efforts between the security police and military community in the application of physical and procedural security techniques to reduce crime.

Prerequisites: Personnel who have attained a minimum of the 5-skill level in AFSC 811XX and currently in or programmed to fill base level or MAJCOM crime prevention or resources protection positions. Qualified civilians may attend.

Reporting Instructions: Students may contact Eastern Kentucky University, Loss Prevention and Safety Department, at (606)622-1009 for billeting and reporting instructions, but should not report earlier than 1 day before class start date. Personnel arriving by air must advise the university of arrival plans for transportation to the university. Quarters and tuition are paid by AFIT contract. Rental vehicles and excess baggage are not authorized. Students must bring service dress uniform for class picture, banquet, and graduation. Smart civilian dress may be worn to class. Jeans may not be worn on field trips. Students must maintain an appropriate appearance as Air Force representatives. Return travel arrangement should not be made prior to 1500 on graduation day.

Selection Procedures: Selection by MAJCOM.

Location: Eastern Kentucky University, Richmond KY.

Quota Control: HQ AFSPA/SPLT.

OPR: HQ AFSPA/SPLT (DSN 263-0039).

WCIP07G—Rabbinical CPCE—PDS Code 11E—various civilian institutions/1 wk—Mar 88

Provides graduate level theological and rabbinical education for Jewish Chaplains. It assures currency of pastoral models in support of Jewish military personnel throughout the world. The course provides opportunity for religious program development and models for utilization of lay-leadership assistance at the many bases where rabbis are not available.

Quota Allocation and Selection: Chief of Chaplains, HQ USAF/HCX, Wash DC.

WCIP07K—Aviation Human Performance—PDS Code 2LY—1 wk—Dec 87

Includes subject areas of aviation physiology, psychology, human engineering, and communications. Designed to teach selected current principles of pilot performance particularly appropriate to the advancement of aviation safety. Focus of the course is the man-product-environment system. Completion will provide student with a working knowledge of human performance techniques within this subject area.

Prerequisites: First lieutenant through colonel with AFSCs 1495A, 2295A, and 9166.

Selection Procedures: MAJCOMs and HQ USAF/SGPA establish requirements.

Quota Control and Student Selection: HQ USAF/SGPA in coordination with MAJCOMs.

WCIP07L—Liturgical Institute CPCE—PDS Code 2TT—Crestwood NY/1 wk—Mar 88

This course is a liturgical institute for the professional upgrading of Orthodox Chaplains. It establishes significant academic goals which serve to enlarge the professional abilities of students in their military ministries. Attending chaplains are given academic credit. The course is designed to enhance the ministry of Orthodox Chaplains in the pluralistic Air Force environment.

Quota Allocation and Selection: Chief of Chaplains, HQ USAF/HCX, Wash DC.

WCIP07Q—Essentials of Chemical Dependence—PDS Code 4LD—Johnson Institute/1 wk—Sep 89

Presents the approach of the Johnson Institute to the effects of chemical dependency. It expands and clarifies the students' existing knowledge of chemical dependence and helps create an appreciation of the scope of the problem of drug and alcohol abuse through lectures, group discussion, role playing, and an experimental learning laboratory. The workshop is designed to give the participant both an intellectual and a highly personal understanding of the emotional strains that chemical dependency places on significant interpersonal relationships. The course provides 6 hours of instruction concerning professional ethics which is required to obtain drug and alcohol counselor certification.

Prerequisites: Military and civilian personnel (to include social actions, medical/mental health, chaplain, and family support center personnel) engaged in activities involving counseling personnel with drug or alcohol problems.

Location: Johnson Institute, Minneapolis MN 55436.

Quota Allocation: HQ AFPC/DPMYS.

WCIP08A—Transportation Marketing Strategy—PDS Code L0E—Northwestern Univ/1 wk—Jun 89

Provides an overview of factors which have caused growth of transportation in the national economy and examines strategies for success. Its objectives are to demonstrate the relevance of analytical techniques, interpret current developments, increase marketing effectiveness, develop management leadership skills, and broaden the outlook of participants.

Prerequisites: Officers and civilians, Lt Col, GM-13, or higher, AFSC 6016 or civilian series 21XX. Waivers may be granted by HQ USAF/LET.

Location: Northwestern University, Evanston, IL.

Selection Control: HQ USAF/LET.

Quota Control: AU allocation administered by AFIT/CI through HQ USAF/LET.

WCIP08B—How to Manage Traffic the EDI Paperless Way—PDS Code L0J—Univ of Wisconsin/3 days—Jun 89

Workshop addresses key issues and concerns in implementing electronic data interchange (EDI) in traffic management. opics include defining developments to support EDI implementation-data collection systems, terminals, computers, communication networks, and selling managers on implementation. The program provides a

foundation day, an applications day, and a half-day specifically oriented to getting started.

Prerequisites: Officers and civilians, Major, GS-12, or higher, AFSC 60XX or civilian series 21XX. Waivers may be granted by HQ USAF/LET.

Location: University of Wisconsin, Madison, WI.

Selection Control: HQ USAF/LET.

Quota Control: AU allocation administered by AFIT/CI through HQ USAF/LET.

WCIP08G—Executive Development Program for Distribution Managers—PDS Code 1CS—Univ of Tenn/1 wk 1 day—Dec 88

This course is designed for the senior physical distribution or logistics manager. Emphasis is on the relationship of physical distribution management to other areas of an organization. Focuses on strategic planning, marketing interface, managerial and distribution accounting, decisionmaking, and customer service.

Prerequisites: Lt Col and above or civilian equivalent. Military officer AFSC 6016 and civilian career series 2150/2130.

Location: University of Tennessee, Knoxville TN.

Quota Control and Selection: HQ USAF/LET.

The Civil Engineer and Services School

(Professional Continuing Education)

WENG001-0—Engineering Design and Programming On-Site Seminar—PDS Code XXH—location: on-site/2 days - 2 wk—Apr 95

Provides technical education to engineering professionals to help them program and design the construction, maintenance, and repair of major base facility and infrastructure systems. Topics include project programming, MILCON project programming, cost estimating, the National Electric Code, HVAC control, construction contracts, cathodic protection, and airfield pavements. Also included will be project management topics and reliability and maintainability issues.

Course Objective: To further develop the technical skills of engineering professionals to better maintain base engineering systems. This seminar must be requested by the host base civil engineer, civil engineering squadron commander, or MAJCOM director. AFIT provides all educational materials and the requesting agency funds instructor TDY costs. The host base provides classrooms, chalkboards, desks, chairs, and audiovisual support. Seminars are available to major commands and base civil engineering organizations by writing to AFIT/CEA, 2950 P Street, Wright-Patterson AFB OH 45433-7765.

Prerequisites: TARGET AUDIENCE: Civil Engineering personnel in grades 1st Lt through Lt Col and GS-7 through GS-14. EDUCATION: No restrictions, but student must be able to complete upper level undergraduate course work.

Course Credit: CEUs commensurate with course content and duration.

WENG400—Construction Cost Estimating—PDS Code 2WR—Wright-Patterson/2 wk/D178150—Oct 95

Increases the student's capability to prepare programming and design estimates that accurately reflect project costs and facilitate full scope construction within the funds programmed. Actual USAF construction project case histories are provided to the student for classroom use and analysis. Instruction covers preparation of cost estimates for programming documents and project books and the background and use of Air Force and commercial pricing guides. The course has three distinct perspectives, covering comprehensive unit price estimates for projects of any size; preliminary, conceptual and 60% design estimates using a systems approach; and cost estimates for renovating or modifying existing facilities.

Prerequisites: Job: Design architects or engineers assigned to the engineering design section, RED HORSE, or to the MAJCOM engineering and construction staff. Grade: Commissioned officer or GS-5 minimum. Education: Bachelor's degree. Nominees not holding a baccalaureate, but who meet all other prerequisites for this course, will be considered. However, all students must be able to complete upper-level undergraduate course work. DD Form 1556 required. Waivers will be considered if accompanied by appropriate justification.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WENG440—Roof Design and Management—PDS Code 5BA—Wright-Patterson/1 wk/MASL D178176—Oct 95

Increases the knowledge and capabilities of Air Force civil engineering personnel responsible for implementing the Air Force low slope roof management program described in AFR 91-36, *Roof Management Program*. Emphasis is on the roofing technology and management concepts necessary for application of this catalog. Topics include an overview of traditional and nonconventional roofing systems, nondestructive roof surveying and analysis procedures, proper government inspection techniques, and roof construction management.

Prerequisites: JOB: Individuals responsible for base and MAJCOM roof management program; roof engineers and roof technicians; construction managers, engineers, and architects assigned to roofing projects. GRADE: Commissioned officer or GS-5. EDUCATION: Bachelor's degree. DD Form 1556 required. Waiver requests are encouraged for personnel who are directly responsible for the roof management program but do not meet the grade or education requirements. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 3 CEUs.

WENG460—Mechanical Systems for Managers—PDS Code RJ6—Wright-Patterson/1 wk/MASL D178107—Oct 96

Broadens and increases manager's understanding of design procedures, principles of operation, energy conservation principles, and maintenance requirements of mechanical systems as they apply to real property facilities. Student receives basic instruction in the operating principles, characteristics, control, and maintenance of mechanical systems and central plant distribution systems, system energy analysis, and energy conservation. Emphasis is placed on reliability and maintainability of mechanical systems, energy conservation techniques, and energy analysis systems. This course runs back to back with WENG470, Electrical Systems for Managers, so that students may take both courses in sequence. Students who

have previously taken WENG561, HVAC Design, need not attend this course other than for review. Priority will be given to students who sign up for both WENG460 and WENG470.

Prerequisites: Assigned at base level as a BCE, deputy BCE, chief of operations, deputy chief of operations, chief of maintenance engineering, chief of engineering and environmental planning, or chief of engineering design. Also those assigned as project managers responsible for management of real property design, construction, or maintenance programs. GRADE: Commissioned officer and GS-9 and above. EDUCATION: Bachelor's degree in architecture or engineering. WAIVER REQUESTS: Attendance by nonmanagement personnel and mechanical engineers will be considered on a case-by-case basis with job history and relationship to other professionals being a primary factor in the evaluation.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation, administered by the AFIT Civil Engineer and Services School.

WENG464—Energy Management Technology—PDS Code X3M—Wright-Patterson/1 wk—Jan 96

Broadens and increases the knowledge, understanding, and capabilities of Air Force civil engineer and other DoD personnel responsible for facility energy programs. Includes all areas of study required for a "trained energy manager" as defined by the Energy Policy Act of 1992. These areas include: (1) fundamentals of building energy systems; (2) building energy codes and applicable professional standards; (3) energy accounting and analysis; (4) life cycle cost methodologies; (5) fuel supply end pricing; and (6) instrumentation for energy surveys and audits. In addition, various DoD programs as well as energy efficient devices and techniques will be discussed. Course emphasis will be placed on the operation and design of energy efficient, reliable, and maintainable electrical and mechanical systems. Course objective is for each student to understand energy management and conservation principles as they apply to basewide facility systems.

Prerequisites: Individuals responsible for base and MAJCOM energy management programs. Individuals assigned at MAJCOM or base level responsible for project design, project management, or maintenance engineering. GRADE: Commissioned officer or GS-5 or greater. EDUCATION: Bachelor's degree in architecture or engineering. OTHER: Waiver requests will be considered for personnel who are directly responsible for energy management programs but do not meet the educational requirements. DD Form 1556 required.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Course Credit: 3 CEUs.

WENG470—Electrical Systems for Managers—PDS Code RJ7—Wright-Patterson/1 wk/MASL D178108—Oct 96

Broadens and increases managers' understanding of design procedures, principles of operation, energy conservation principles, and maintenance requirements of electrical systems as they apply to real property facilities and the base infrastructure. The student receives basic instruction in interior and exterior electrical power distribution systems, indoor lighting systems, electric utility contracts, grounding and electrical safety, computer grounding, and short circuit coordination basics. Emphasis is placed on the components and design of electrical systems. This course will run back to back with WENG460, Mechanical Systems for Managers, so that students may take both courses in sequence. Students who have previously taken WENG571, Electrical Power Systems Design, need not attend this course other than for review. Priority will be given to students who sign up for both WENG460 and WENG470.

Prerequisites: JOB: Assigned at base level as engineering flight chief, engineering design chief, BCE, deputy BCE, operations flight chief, maintenance engineer, SABER personnel, construction engineer or construction manager or MAJCOM equivalent. GRADE: Commissioned officer or GS-7 minimum. EDUCATION: Bachelor's degree in architecture or engineering. WAIVER REQUESTS: Attendance by non-management personnel will be considered for waiver on a case-by-case basis with job history and relationship to other professionals being primary factors in the evaluation.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by AFIT Civil Engineer and Services School.

WENG480—Facility Design—PDS Code WYM—Wright-Patterson/3 wk/MASL D178021—Oct 95

Strengthens the lines of communication between the various members of a design team through increasing their understanding and appreciation of one another's jobs and by teaching them to "speak the language" of the other disciplines. To accomplish this, facilities are considered as an assembly of interdependent systems with important relationships. These systems are presented as individual blocks of instruction on such topics as mechanical, electrical, and structural design, plumbing, roofing, fire protection, and other important building systems. Though presented individually, the underlying theme of the course is the proper integration of these various systems with emphasis on the reduction of life cycle costs through proper design.

Prerequisites: JOB: Design architects or engineers assigned to engineering design, contract management, RED HORSE, or MAJCOM engineering and construction staff. GRADE: Commissioned officer or GS-5 minimum. EDUCATION: Bachelor's degree in architecture or engineering. DD Form 1556 required. Waivers will be considered if accompanied by appropriate justification. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 12 CEUs.

WENG520—Comprehensive Planning Development—PDS Code V2H—Wright-Patterson/2 wk—Oct 95

Broadens and increases the student's ability to implement and manage the base comprehensive planning process. The increasing complexity and visibility of the community planner's job requires knowledge and skills in many diverse yet intricately interrelated topics. The course is organized along three broad areas of instruction: (1) Topics specifically addressing community planning issues and concerns (BCP, AICUZ, QD, ADPs, etc.); (2) Introduction to environmental issues and concerns (environmental law, NEPA, AFI 32-7004, *Environmental Education and Training* [formerly AFR 19-2], etc.); and (3) Topics and skills related to architecture yet required of the community planner (architectural excellence, graphic presentation, problem solving, etc.). The majority of the course will address topics of specific concern to the base level community planner. The areas of environmental planning and architectural design and presentation are introduced, where appropriate, to provide both the background knowledge and practical skills necessary to

increase the student's effectiveness as an installation community planner. The integration of these diverse discipliens is reinforced with a comprehensive practical planning exercise.

Prerequisites: JOB: Officers AFSC 5516 or 552X and civilians assigned to the base development or environmental and contract planning sections (or other offices) directly involved in the development and management of the base comprehensive plan or any of the component plans. GRADE: Commissioned officer or civilians in the grade of GS-5 or higher. EDUCATION: Bachelor's or higher degree in architecture, planning, or other disciplines within the design sciences. Course work or experience in design, economics, and physical planning is desired. OTHER: Waivers will be considered if accompanied by appropriate justification. An emphasis will be placed on current job responsibilities when evaluating waivers.

Selection Procedures: Student selection controlled by MAJCOM/DP/CE in coordination with AFIT/CEA.

Quota Control: Quotas are allocated by the Civil Engineer and Services School and controlled by Air University.

Course Credit: 6 CEUs.

WENG550—Airfield Pavement Maintenance and Rehabilitation—PDS Code AM4—Wright-Patterson/3 wk/MASL D178059—Oct 95

Includes theory, principles and techniques for rehabilitation design which includes reconstruction, overlays, maintenance, repair, and management of flexible and rigid pavement systems. Specific areas covered include the pavement rehabilitation process, project evaluation, rehabilitation materials, rehabilitation alternatives, alternative selection, pavement construction and pavement management. A significant number of hours are dedicated to project evaluation which includes pavement condition data, pavement foundation (soils), drainage and structural analysis. Expedient and state-of-the-art techniques are used to evaluate the load-carrying capacity of existing pavements before and after rehabilitation occurs. Teaching methods include formal lectures, a field exercise, computer exercises, and guided discussion.

Prerequisites: JOB: Pavement engineer, civil engineer, or the construction management engineer responsible for pavements at base or MAJCOM level. GRADE: Commissioned officer or GS-5 minimum. EDUCATION: Bachelor's degree in civil engineering. DD Form 1556 required. Waivers will be considered if accompanied by appropriate justification.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 9 CEUs.

WENG555—Airfield Pavement Construction Inspection—PDS Code 17C—Wright-Patterson/1 wk—Oct 95

Increases student's ability to implement quality assurance/quality control measures during the design and construction of airfield pavements. Provides students with the necessary tools to recognize design and contractor deficiencies during the design and construction phases of airfield pavement projects. Topics covered include paving processes for quality construction; pavement theory; airfield pavement criteria; submittal evaluation for asphalt and concrete; asphalt paving operations; compaction of asphalt pavement; asphalt testing; airfield pavement specification; concrete batch plants; control, handling, and storage of materials; placement of concrete; field testing and test results; joint sealing; airfield marking; and contracting officer responsibilities. Teaching methods include formal and informal lectures.

Prerequisites: GRADE: Commissioned officer or GS-5 minimum. EDUCATION: No restrictions, but student must be able to complete upper level undergraduate course work. COURSE CREDITS: 3 CEUs.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 3 CEUs.

WENG561—Heating, Ventilating, and Air-Conditioning Design—PDS Code RJ4—Wright-Patterson/4 wk/MASL D178089—Oct 95

Develops the professional skills of mechanical engineers in identifying, selecting, and designing complete, efficient, and maintainable heating, ventilating and air-conditioning systems in accordance with current Air Force criteria and the ASHRAE techniques. Instruction includes the fundamental areas of psychometrics, heat transfer, thermodynamics, and fluid mechanics; design topics such as heating and cooling load estimating, air distribution, basic HVAC systems, water vapor diffusion and refrigerant piping; and system considerations for air systems, hydronic systems, and steam heating systems. Consideration of equipment room layout, balancing, energy estimating and economics round out the course. Comprehensive daily homework provides reinforcement for the material covered in the classroom.

Prerequisites: JOB: Officers and civilians assigned as design engineers in functional account code 442X, 173X, 174X, engineers assigned as EMCS systems managers, or officers assigned as design engineers to Prime Base Engineer Emergency Force (BEEF) Teams or RED HORSE units. GRADE: Commissioned officer or GS-5 minimum. EDUCATION: Degree in mechanical engineering, or degree in engineering for individuals assigned as EMCS systems manager. DD Form 1556 required. Waivers will be entertained if accompanied by appropriate justification. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 12 CEUs.

WENG563—HVAC Control Systems—PDS Code 0GM—Wright-Patterson/4 wk/MASL D178178—Oct 95

Broadens and updates the professional abilities of the systems engineer or mechanical engineer to apply environmental controls to minimize the use of energy and enhance system reliability and maintainability. The course considers methods of control for existing and new energy consuming systems with emphasis on retrofit options. Course content is directed toward the elements, principles of operation, control mechanisms, documentation, and efficiency considerations of local loop HVAC control systems.

Prerequisites: JOB: MAJCOM or base level mechanical engineers or energy management and control system (EMCS) managers. GRADE: Commissioned officer or GS-7 minimum. EDUCATION: Bachelor's degree in mechanical, electrical, or electronic engineering and successful completion of WENG 561, Heating, Ventilating, and Air-Conditioning Design, with minimum of 1 year job performance

after completion of WENG 561. Indicate completion month and year in block 15b of DD Form 1556, 1 Jun 78 version, or block 18 of DD Form 1556, Mar 87 version. Waivers for the successful completion of ENG 561 will be entertained. Waivers will only be granted if the individual has a minimum of 4 years of experience in HVAC design and can show proof of completion of an HVAC design course which included psychrometrics, hydraulic design, thermodynamics, heat transfer, and applied HVAC systems design. When the preliminary waiver is accepted, the individual must pass a written examination given at the local education office. Waivers must be submitted to AFIT/DES a minimum of 60 days prior to course start date. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 12 CEUs.

WENG571—Electrical Power Systems Design—PDS Code P8T—Wright-Patterson/4 wk/MASL D178105—Oct 95

Increases the professional skills of electrical engineers who do not have extensive education or practical experience in electric power. Presents principles and procedures involved in design of electrical power systems and includes instruction in motor selection and use, interior and exterior power system design, indoor and outdoor lighting design, power factor correction, short circuit analysis of medium and low voltage power systems, protective device selection and coordination, electric utility contracts, and energy conservation policies.

Prerequisites: MAJCOM or base level electrical engineers assigned as design maintenance engineers. Commissioned officer or GS-5 minimum. Bachelor's degree in electrical engineering. DD Form 1556 required. Waivers will be considered if appropriately justified. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 12 CEUs.

WENG590—Corrosion Control Course—PDS Code WV3—Wright-Patterson/2 wk/MASL D178179—Oct 95

Broadens the professional skills of architects and engineers assigned as base corrosion control engineers or who are responsible for base cathodic protection or protective coating systems. Stresses how to apply current principles for design and maintenance of cathodic protection and protective coating systems for base facilities, including management procedures, testing, records analysis, and characteristics of available products. Includes an overview of industrial water treatment from the base corrosion control engineer's viewpoint. Students should bring a calculator with logarithmic capability to the course. Familiarity with corrosion problems at the student's home station is helpful.

Prerequisites: Assigned as base corrosion engineer or assigned responsibility for protective coatings or cathodic protection. Commissioned officer or GS-5 minimum. Bachelor's degree in engineering, architecture, metallurgy, or chemistry. Engineers assigned responsibility for industrial water treatment only should not attend this course, but should attend WENG 595, Industrial Water Treatment. The National Association of Corrosion Engineers has awarded this course 32 advanced corrosion education credit points. DD Form 1556 required. Waivers will be considered if appropriately justified. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WENV001-0—Environmental Management—PDS Code XXG—location: on-site/2 days - 2 wk—Apr 95

Provides technical and management skills to environmental professionals, engineers, and waste generators. Topics include hazardous waste management, environmental flight management, environmental impact analysis, and ECAMP and environmental publications. Emphasis is on effective and efficient compliance with current laws and publications and the prevention of future pollution.

Course Objective: To further develop the technical and management skills of Air Force professionals to help them protect the environment at a minimum cost to the taxpayers. This seminar must be requested by the host base civil engineer, squadron commander, director of environmental management, or MAJCOM director. AFIT provides all educational materials and the requesting agency funds instructor TDY costs. The host base provides classrooms, chalkboards, desks, chairs, and audiovisual support. Seminars are available to major commands and base civil engineering/environmental management organizations by writing to AFIT/CEA, 2950 P Street, Wright-Patterson AFB OH 45433-7765.

Prerequisites: TARGET AUDIENCE: Civil engineering personnel in grades 1st Lt through Lt Col and GS-7 through GS-14. EDUCATION: No restrictions, but student must be able to complete upper level undergraduate course work.

Course Credit: CEUs commensurate with course content and duration.

WENV002—Commanders Environmental Leadership—PDS Code VRM—Wright-Patterson/2 days—Oct 95

Designed to enhance the environmental awareness of installation commanders and senior MAJCOM staff officers. The commanders are introduced to the concepts and management objectives of Air Force environmental programs. The course provides an overview of environmental issues, legislation, and policies affecting Air Force installations. Emphasis is placed on integrating environmental concerns and sensitivities into installation activities and operations. The course has been formatted to assist commanders and senior staff officers in addressing the important environmental concerns of their commands.

Prerequisites: Assigned or projected assignment as installation commander or senior MAJCOM staff officer.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 1 CEU.

WENV020—Environmental Compliance Assessment and Management Program (ECAMP)—PDS Code QA4—Wright-Patterson/1 wk/MASL D178208—Oct 95

Provides both the theory and an explanation of the management philosophy behind the various aspects of ECAMP. As such, graduates will be able to serve as team chiefs on any visit. Be

developing an indepth understanding of the program, a familiarity with team responsibilities, and environmental compliance programming assessments, hosting external teams at their home installation, and planning and programming for environmental compliance requirements.

Prerequisites: A member of the active duty or civilian work force in an area that has an environmental responsibility (e.g., fuels, supply, maintenance, CE, corrosion control, legal, etc.). In addition, a person who is eligible to be tasked to serve on an ECAMP assessment team. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 3 CEUs.

WENV021—Installation Restoration Program—PDS Code MTX—Wright-Patterson/1 wk/MASL D178209—Oct 95

Provides integrated education to familiarize students with the requirements, procedures, and responsibilities of the Installation Restoration Program (IRP). Includes lessons on hydrogeology, remedial action planning, legal requirements, and community/public affairs. Case studies are used in the course to demonstrate conduct of successful IRP remedial actions.

Prerequisites: JOB: Base environmental coordinator, public affairs officer, judge advocate, or bioenvironmental engineer, having duties concerned with implementation of the installation restoration program. GRADE: commissioned officer or GS-7 minimum. EDUCATION: bachelor's degree. CREDITS: None. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 3 CEUs.

WENV022—Pollution Prevention Program Operations and Management—PDS Code VRU—Wright-Patterson/1 wk/MASL D178210—Oct 95

Emphasizes source reductions of hazardous and toxic chemicals, solvent substitutions, reuses and recycling, process changes, and environmental awareness, and introduces management practices that can be used to implement a sound pollution prevention program. These management techniques include ways to establish and run the program, conduct pollution prevention opportunity evaluations, implement process changes to incorporate pollution prevention, assess pollution prevention program success, and establish awareness training. The students are also introduced to numerous technical alternatives that have been implemented, both in the federal government and in private industry, as means of pollution prevention. Various economic analysis techniques for evaluating these alternatives are presented. The students are provided essential education on how to plan, organize, and execute a viable installation pollution prevention program.

Prerequisites: ECL 80.

Selection Control: MAJCOM DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 3 CEUs.

WENV024—Relative Risk Evaluation and Management—PDS Code 7FY—AFIT/CE/1 wk—Oct 95

Provides initial education of newly developed DoD relative risk evaluation method for federal prioritization of IRP sites. Includes an overview of site-specific advisory boards and restoration advisory boards (RAB), applicable policy and guidance, explanation of relative risk evaluation factors, and detailed examples demonstrating the application of methodology. Course will also include the application of standards used in relative risk evaluation.

Prerequisites: Individual should be assigned to a position involved in IRP project management. Primary audience will be IRP project managers, personnel from the Public Affairs and Judge Advocate officers, and other RAB members.

WENV025—Remedial Action Cost Engineering and Requirements (RACER) System—PDS Code 1GI—Wright-Patterson/2 days—Oct 95

Provides environmental personnel with hands-on education in the use of the RACER system. This PC-based environmental cost estimating system was developed by the Air Force to assist environmental personnel in developing accurate cost estimates for all phases of remediation.

Prerequisites: Environmental personnel in management, supervisory, or oversight positions with Installation Restoration Program responsibilities.

Special Requirements: Some experiencewith Windows-based PC software is helpful.

Admin Instructions: Onsite education is available. Contact AFIT/CEV-ONEE, DSN 785-0381, ext 3513, for more information.

WENV100-0—Environmental Restoration Management—PDS Code XQT—location: on-site/2 days-2 wk—Apr 95

Provides technical and management skills to environmental professionals, engineers, and restoration team members. Topics include principles and mechanics of the Installation Restoration Program (IRP), community relations, and legal (CERCLA, RCRA, etc.) impacts on the Air Force. Emphasis is on effective and efficient management of the base's entire IRP effort.

Course Objective: To further develop the technical and management skills of Air Force professionals to help them restore the environment at a minimum cost to the taxpayers. This seminar must be requested by the hose base civil engineer, squadron commander, director of environmental management, or MAJCOM director. AFIT provides all educational materials and the requesting agency funds instructor TDY costs. The host base provides classrooms, chalkboards, desks, chairs, and audiovisual support. Seminars are available to MAJCOMs and base civil engineering/environmental management organizations by writing to AFIT/CEA, 2950 P Street, Wright-Patterson AFB OH 45433-7765.

Prerequisites: TARGET AUDIENCE: Personnel in grades 1st Lieutenant through Lt Colonel and GS-7 through GS-14 who are actively working the base IRP. EDUCATION: No restrictions, but student must be able to complete upper level undergraduate course work.

Course Credit: CEUs commensurate with course content and duration.

WENV400—Commander's Environmental Management—PDS Code VS6—Wright-Patterson/3 days/MASL D178212—Oct 95

Teaches squadron and group commanders their responsibilities regarding environmental protection and management. The course is based on the Chief of Staff's five environmental goals: environmental restoration, compliance with environmental laws, pollution prevention, environmental impact analysis as part of the planning and decisionmaking processes, and stewardship of natural resources. Air Force environmental programs designed to attain the Chief's goals are discussed, as well as strategies which may be used to successfully implement these programs at base and squadron levels. The team approach to solving environmental problems is emphasized, with guest speakers providing engineering, public affairs, legal, and regulatory agency perspectives.

Prerequisites: JOB: Squadron or group commander. ECL 80.

Selection Control: MAJCOM DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by the Civil Engineer and Services School.

Course Credit: 2 CEUs.

WENV416—Environmental Management Applications—PDS Code VS8—Wright-Patterson/2 wk/MASL D178213—Oct 95

Prepares environmental flight management personnel to perform their jobs in the objective squadrom by providing management knowledge and understanding and by developing application skills targeted to the students' respective jobs. The first major objective is for the students to know their functional tasks; secondly, to comprehend their interdependency as members of a civil engineering team; and lastly, to apply functional skills and team principles to realistic problem scenarios. Some functional responsibilities covered in the first part of the course include compliance with environmental laws, media training, working with regulators, use of computer support (WIMS-ES, etc.), and management of existing Air Force programs that have been established to comply with environmental laws and policies (ECAMP, EIAP, IRP, etc.). This course is conducted simultaneously and is integrated with WMGT406, 411, 420, 425, and 430.

Prerequisites: Job: Flight leaders only. ECL 80.

Selection Control: MAJCOM DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by the Civil Engineer and Services School.

Course Credit: 6 CEUs.

WENV417—Environmental Restoration Project Management—PDS Code VR1—Wright-Patterson/2 wk/MASL D178214—Apr 95

Delineates project management for the environmental restoration process from problem identification through completion of the remediation action. Specific topics include project definition, programming, contract methods and types, a comparison of various cleanup methodologies, design considerations, A-E selection process, contract management, interagency coordination, interagency agreements negotiations, project management principles, cost controls, and claims avoidance. Teaching methods include informal lectures, case studies, exercises, and guided discussions.

Prerequisites: JOB: Personnel responsible for managing environmental restoration projects. GRADE: Commissioned officer or GS-7 minimum. EDUCATION: Bachelor's degree in engineering, architecture, or other appropriate field. OTHER: Personnel must have a minimum of 3 months of experience in a section responsible for some aspect of environmental remediation. ECL 80.

Selection Control: MAJCOM DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by the Civil Engineer and Services School.

WENV418—Environmental Restoration Contracting—PDS Code WJV—Wright-Patterson/2 wk—Oct 95

Increases the capabilities of contracting, engineers, and contract management personnel to prepare, manager, and administer environmental restoration contracts. The fundamentals of government contract preparation, such as determining the type of contract, method of contracting, and method of specifying are stressed. The basics of organizing, writing, and coordinating specifications are presented and applied. The fundamentals of managing environmental restoration contracts, such as modification, inspection, documentation, and remedies are stressed. Contracting, design, and contract management functions are treated as an interrelated process.

Prerequisites: JOB: Contracting officers or administrators, personnel in the environmental organization, and MAJCOM equivalents. GRADE: Commissioned officers, noncommissioned officers, or GS-7 minimum. EDUCATION: Bachelor's degree. Nominees not holding a baccalaureate, but who meet all other prerequisites for this course, will be considered for admission. To be considered on a waiver basis, students must be able to complete upper level undergraduate course work.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WENV419—Environmental Planning, Programming, and Budgeting (PPB)—PDS Code W40—Wright-Patterson/3 days—Oct 95

Introduces students to the principles, procedures, and systems for identifying, programming, and funding environmental requirements. Specific areas of emphasis include environmental compliance, restoration, and pollution prevention requirements and resources. Document preparation, management information systems, and roles and responsibilities of the Air Staff, major commands, and the installation are discussed.

Prerequisites: JOB: Personnel assigned responsibility at the installation or major command level for environmental management or environmental programming. GRADE: Commissioned officers, noncommissioned officers, or GS-7 minimum. COURSE CREDIT: Two CEUs.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 2 CEUs.

WENV521—Hazardous Waste Management—PDS Code 79A—Wright-Patterson/1 wk—Oct 95

Provides education in the principles and practices of hazardous waste management. Describes the requirements of federal, state, local, and Air Force hazardous waste management laws and regulations. Enables the student to develop, propose, and implement plans for hazardous waste management, personnel training, and emergency responses. Provides the methods and techniques of treatment,

handling, storage, transportation, and disposal of hazardous wastes. Strives to motivate and broaden the professional skills of personnel managing hazardous waste programs at the installation and major command level.

Prerequisites: Job: Personnel assigned responsibility for the base or major command hazardous waste management program. Individuals attending should be performing duties as the base or major command environmental coordinator, environmental/sanitary engineer, or bioenvironmental engineer.

Selection Control: MAJCOM DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 3 CEUs.

WENV531—Air Quality Management—PDS Code XS0—Maxwell/1 wk—Apr 95

Provides broad overview of federal, state, regional, and local requirements to meet clear air standards; provides familiarity with specifications for air inventories; identifies points of contact and arrangements with EPA, FAA, Navy, Army, and within the Air Force (HSC, AFCEE, MAJCOMs); familiarizes students with Air Force policies, required studies, reports, plans, and terms regarding air quality management. Introduces air modeling concepts, sampling and analysis techniques, principles of toxicology, and quantitative techniques for risk assessment.

Prerequisites: JOB: Individual should be assigned as installation air quality program manager or compliance program manager with responsibility for air quality. EDUCATION: Bachelors degree in engineering, science, ecology, or equivalent area required. GRADE: Commissioned officer or GS-9 minimum.

Course Credits: 3 CEUs.

Selection Control: MAJCOM/DP in coordination withAFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

WMGT001-0—Engineering Management On-Site Seminar—PDS Code XXK—location: on-site/2 days - 2 wk—Apr 95

Provides management skills to civil engineering managers and first and second level supervisors. Topics include understanding human behavior, motivation, communications, funds management, zonal maintenance, and squadron management applications. Customer service and customer relations are also emphasized along with basic concepts in quality management to include the theory of constraints, performance measurement, quantitative analysis, and a major emphasis on team building.

Course Objective: To promote the use of sound management techniques, analysis, and communication to better manage base civil engineering resources. This seminar must be requested by the hose base civil engineer, civil engineering squadron commander, or MAJCOM director. AFIT provides all educational materials and the requesting agency funds instructor TDY costs. The host base provides classrooms, chalkboards, desks, chairs, and audiovisual support. Seminars are available to major commands and base civil engineering organizations by writing to AFIT/CEA, 2950 P Street, Wright-Patterson AFB OH 45433-7765.

Prerequisites: TARGET AUDIENCE: Civil engineering personnel in grdes 2d Lt through Lt Col and GS-7 through GS-14. EDUCATION: No restrictions, but student must be able to complete upper level undergraduate course work.

Course Credit: CEUs commensurate with course content and duration.

WMGT005—Civil Engineering and Services Management Applications Regional Seminar—PDS Code 15K—onsite/4.5 days—Apr 95

Designed to provide management skills to the first and second level supervisors. Understanding human behavior, motivation, communications, and coordination are a few of the subjects presented. The School of Civil Engineering and Services provides all course materials and funds instructor per diem and travel costs. The host base provides classrooms, suitable auditorium, seminar rooms, chalkboards, desks, chairs, and audiovisual support.

Prerequisites: Job: Primarily designed for mid-level military or civilian managers, below flight leader level, in civil engineering or MWRS. Other: Recent graduates of AFIT SOCES classes or PME classes, such as NCO Academy or leadership school, should not attend due to duplication of materials.

Selection Control: AFIT/CEM in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Allocation: The Civil Engineer and Services School.

WMGT101—Introduction to Base Civil Engineering*—PDS Code AMV—Wright-Patterson/Tyndall/8 wk/MASL D178037—Oct 95

The objective is for students to understand the peacetime organization of the objective Air Force Civil Engineer squadron, the responsibilities of each flight in the squadron, the flights' interfaces with other activities at base level, and how to plan and execute programs in these flights. In addition, military students have further objectives to select, explain, and apply expedient methods of force beddown, air base operability, and base recovery for mission essential facilities during contingency operations. Civilians attend the first 4 weeks. Military personnel attend all 8 weeks. The first 2 weeks of this course provide all officers and officer-equivalent civilian personnel entering the civil engineer career field familiarization of Air Force CE organization, management systems, techniques, and operations. The course includes a general overview of CE organizational structure, work requirements and resources, the WIMS systems, in-service versus contract work, and professional development. General management topics are also included in the course which aid the student in developing management skills required as a future Air Force leader and manager. For weeks 3 and 4 of this course, students are assigned (based on their home station duties) to either the engineering, resources, environmental, or operations specialty session. During these 2 weeks, the student learns how flight-specific processes are accomplished. This session covers the processes, forms, and other tools used to perform flight activities. In addition, the student learns the key products and services provided by other flights and organizations which support the student's flight. The next 3 weeks of the course (for military students only) describe expedient methods of force beddown, air base operability, and base recovery. The focus is on bases in forward theaters of operation, but techniques are applicable to any airfield. Topics covered include Air Force civil engineer responsibilities; assets; troop and aircraft beddown; expedient airfield pavements; airfield criteria; expedient buildings and munitions storage; disease control; EOD wartime operations; foreign cultural overviews; water, waste, fuel, and electrical systems; arresting barriers; wartime fire protection and

crash rescue; base and personal survivability; facility hardening measures, camouflage, concealment, and deception; structural and utility repair; chemical defense; damage assessment; explosive ordinance reconnaissance; rapid runway repair; and leadership of troops under stress. The course does not address contingency planning above base level. The last week of the course is a 1 week field laboratory (officer field education [OFE]) at Detachment 1, 823d RED HORSE, Tyndall AFB FL. OFE provides "hands-on" education in force beddown, rapid runway repair, disaster preparedness, services, fire rescue bare base assets, and command and control.

Prerequisites: Officers or civilians newly assigned in the Air Force CE career field. Also, officers or civilians newly assigned to a flight may attend (on a space-available basis) weeks 3 and 4 of this course. GRADE: Officer or GS-7 minimum or Palace Acquire interns. Education: Bachelor's degree.

Special Requirements: Secret clearance to assure attendance at all lessons. Clearance should be printed on orders. Complete CWD training ensemble (including eyeglass inserts) required. BDUs and safety-toed boots are mandatory for military students.

Admin Instructions: Uniforms for military students will be both blues and BDUs (both are required). Military students must be in good physical condition to avoid possible injury while at OFE. Students who are on a physical profile change must submit a copy of the profile change with their DD Form 1556. Students who may not be able to meet the physical fitness requirements at OFE (due to a profile change or other factors) will be placed on standby to attend a future offering of WMGT101 when the student can fully participate in all activities at OFE. Bring a valid military ID to class. Initial CWD training is highly recommended before attendance. Military students must have the following information in Section 11 of DD Form 1610: FROM: (student's home station), TO: WPAFB OH, TO: Tyndall AFB FL, TO: WPAFB OH, RETURN TO: (student's home station). Section 16 of DD Form 1610 must have the following statements: "(1) Travel between WPAFB and Tyndall AFB will be provided by AFIT, (2) It is assumed all entitled meals available under field conditions are consumed unless otherwise indicated, (3) Students will be under field conditions from 1000 (OFE start date) to 1500 (OFE end date), and (4) CONUS students deploying to OFE are authorized one piece of excess baggage." Overseas students are not authorized excess baggage; they will be provided field gear upon arrival at AFIT. Variations are not authorized. Bring three copies of orders to class. Amendments will be required if orders do not contain this information. POVs are authorized for round-trip transportation between home station and WPAFB when it is deemed to be more cost effective to the Government. Transportation will be provided between WPAFB and Tyndall AFB. Students must make return flight arrangements from AFIT before departing from home station. Students will be released at Wright-Patterson after 1730 on the final day of OFE.

Officer Field Education (OFE) Requirements: Students require their mobility "A" bag and personal bag according to equipment supply list or AFCESA guidance (with the exception of extreme cold weather clothing). One set of training chemical warfare defense equipment; i.e., one overgarment, one pair of rubber gloves with inserts, one pair of boots, and one gas mask with hood and eyeglass inserts. Students will run 1 1/2 miles and participate in gym activities and should bring appropriate athletic gear. Also suggested are flashlight, shower clogs, gym clothes, suntan lotion, insect repellent, pillow, mosquito netting, pillowcase, and sheet. Students should be prepared to carry a maximum of two bags plus one smaller hand-carry item on the military air flight between WPAFB and Tyndall AFB and return. Storage for remaining baggage will be provided at WPAFB during OFE.

Selection Control: Mandatory for all officer accessions into civil engineer career field. For civilians, MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by AFIT/CEA. New accessions will be funded by 2d Air Force and administered by AFPC in coordination with AFIT/CEA.

WMGT102—Introduction to the Base Civil Engineer Organization for Reserve Forces—PDS Code O0F—Wright-Patterson/2 wk—Oct 96

Discusses the peacetime organization of the objective Air Force civil engineer squadron, the responsibilities of each flight in the squadron, and the flights' interfaces with other organizations at base level. Familiarizes Air Force Reserve and Air National Guard officers and civilians entering the civil engineering career field with Air Force civil engineer organization, management systems, techniques, and operations. Includes a general overview of civil engineer organizational structure, work requirements and resources, flight responsibilities, in-service versus contract work, and professional development. General skills required as a future Air Force leader and manager.

Prerequisites: Air Force and Air National Guard officers and GS-7 and above newly assigned to the Air Force civil engineer career field. Bachelor's degree.

Course Credit: 6 CEUs.

WMGT400—Civil Engineering Commander/Deputy—PDS Code WWA—Wright-Patterson/2 wk/MASL D178118—Oct 95

Broadens the management skills and professional attitudes in effective application of current civil engineering management processes. Curriculum includes personal skills, effectiveness through others' skills, and updates on all aspects of civil engineering management and responsibility. Lessons directed toward updating students concerning areas of change are taught by guest lecturers from the Air Staff, the Air Force Civil Engineering Support Agency, and other senior management personnel.

Prerequisites: Must be the base civil engineering squadron commander, deputy base civil engineer, or selectees. Major through colonel or GS-11 through GS-15. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT406—Housing Management Applications—PDS Code SPF—Wright-Patterson/2 wk—Oct 95

Prepares the housing flight management personnel to perform their jobs in the objective squadron by providing management knowledge and understanding and by developing application skills targeted to the students' respective jobs. The first major objective is for the students to know their functional tasks; secondly, to comprehend their interdependency as members of a civil engineering team; and lastly, to apply functional skills and team principles to realistic problem scenarios. Some functional responsibilities covered in the first part of the course include: shop rates, reimbursements, programming, logistics, appliance management, customer service, unaccompanied personnel housing, furnishings management, general

officer quarters management, engineering design standards, environmental concerns, contracting, budget creation, Air Staff and MAJCOM functions, and discrimination and landlord-tenant complaint resolution. This course is conducted simultaneously, and is integrated with, WMGT 411, 420, 425, 430, and WENV 416.

Prerequisites: JOB: Housing flight leaders. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT410—Readiness Management Applications—PDS Code 5BD—Wright-Patterson/2 wk/MASL D178190—Oct 95

Introduces students to the management systems and procedures used in Air Force base civil engineering organizations to administer the Prime BEEF, base recovery, and other readiness programs. Lessons concerning home station training, mobility planning, WIMS, contingency planning, SORTS, base recovery planning, and load planning are included in the course. Classroom experiences include both formal lectures to develop management concepts and hands-on seminar sessions to gain practical experience with key management principles. This course also deals with the interface among the various branches and their responsibilities in executing the civil engineering mission.

Prerequisites: JOB: Air base operability flight leader, Prime BEEF program manager, or MAJCOM readiness manager. GRADE: Commissioned officers, noncommissioned officers (E-7 and above) and GS-5 minimum. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

WMGT411—Resources Management Applications—PDS Code WJW—Wright-Patterson/2 wk—Apr 95

Prepares the resources flight management personnel to perform their jobs in the objective squadron by providing management knowledge and understanding and by developing application skills targeted to the students' respective jobs. The first major objective is for the students to know their functional tasks; secondly, to comprehend their interdependency as members of a civil engineering team; and lastly, to apply functional skills and team principles to realistic problem scenarios. Some functional responsibilities covered in the first part of the course include: general management lessons including information on communications, meetings, supervision, and personnel issues; financial management lessons including lessons on resource management, reimbursements, and shop rates; manpower lessons including determination of manpower, use of the unit manning document (UMD), position descriptions and performance standards; WIMS education lessons including systems administration, maintenance contracts, and interfacing with other computer systems; and real estate lessons including an overview of real estate management policies and procedures. The functional section is taught in three different tracks, one each for financial managers, industrial engineers, and real estate specialists. This course is conducted simultaneously and is integrated with WMGT 406, 420, 425, 430, and WENV 416.

Prerequisites: JOB: Primarily designed for individuals assigned as or programmed to become the resources manager or MAJCOM financial management representative. Personnel must have a minimum of 1 year of experience in financial management, industrial engineering or WIMS administration, or real estate management. GRADE: Commissioned officer or GS-7 minimum.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Course Credits: 6 CEUs.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

WMGT412—Financial Management Applications—PDS Code 0GN—Wright-Patterson/2 wk/MASL D178157—Oct 95

Broadens the students' understanding of current concepts and principles of financial management within a standard base CE organization. The curriculum includes lessons in four topic areas. General lessons include information on stress, time management, negotiating skills, and total quality management. The financial management topics include budget formulation, resource management, reimbursements, shop rates, and year-end procedures. Civil Engineering management topics include information on operations management, logistics, and readiness. Computer education includes WIMS report writing, current financial management programs on the WIMS, and CEMAS.

Prerequisites: JOB: Primarily designed for the recently assigned financial manager or assistant financial manager at base level. Other base or MAJCOM CE financial management personnel may attend. Personnel must have a minimum of 3 months of experience in financial management. GRADE: Commissioned officer or GS-5 minimum. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT420—Engineering Management Applications—PDS Code P8U—Wright-Patterson/2 wk/MASL D178140—Oct 96

Prepares engineering flight management personnel to perform their jobs in the objective squadron by providing management knowledge and understanding and by developing application skills targeted to the students' respective jobs. The first major objective is for the students to know their functional tasks; secondly, to comprehend their interdependency as members of a civil engineering team; and lastly, to apply functional skills and team principles to realistic problem scenarios. Some functional responsibilities covered in the first part of the course include base comprehensive planning, programming, design schedules, project management, contracts, and computer information management systems. This course is conducted simultaneously, and is integrated, with WMGT 406, 411, 425, 430, and WENV 416.

Prerequisites: JOB: Engineering flight leader. GRADE: Commissioned officer or GS-11 minimum. EDUCATION: Bachelor's degree. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT421—Contracting for Civil Engineering—PDS Code UFB—Wright-Patterson/2 wk/MASL D178124—Oct 96

Increases the capabilities of contracting, design architects and engineers, and contract management personnel to prepare, manage, and administer construction and service contracts. The fundamentals of government contract preparation, such as determining the type of contract, method of contracting, and method of specifying are stressed. The basics of organizing, writing, and coordinating specifications are presented and applied. The fundamentals of managing construction and service contracts, such as modification, inspection, documentation, and remedies are stressed. Contracting, design, and contract management functions are treated as an interrelated process.

Prerequisites: JOB: Contracting officers/administrators, engineering and construction branch personnel, and MAJCOM equivalents. GRADE: Commissioned officers noncommissioned officers, or GS-7 minimum. EDUCATION: Bachelor's degree. Nominees not holding a baccalaureate, but who meet all other prerequisites for this course, will be considered for admission. To be considered on a waiver basis, students must be able to complete upper level undergraduate course work.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT422—MILCON Project Management—PDS Code MTS—Wright-Patterson/2 wk/MASL D178195—Oct 96

Increases the student's ability to better manage USAF construction projects. Concepts taught can be applied to projects funded from different sources (i.e. MILCON, P-341, NAF, O&M, and MFH). The course content will include topics on planning development of projects, design management, construction management, and contracting.

Prerequisites: JOB: Personnel with MAJCOM or AFRCE level project management responsibilities. EDUCATION: As a minimum, students must have a Bachelor's degree in Engineering or Architecture. OTHER: Personnel must have completed MGT 101, Introduction to Base Civil Engineering, or have a minimum of 3 months experience in the management of design or construction of military construction projects. Personnel must also have read the "USAF Project Manager's Guide for Design and Construction" and are required to bring a copy to the class. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT423—Project Programming—PDS Code 7XH—Wright-Patterson/2 wk/MASL D178182—Oct 96

Specifically designed to increase the project programming capability of Air Force civil engineering personnel. Increases the student's capability to develop programming documents reflecting complete and accurate information as required in the various Major Force Program avenues. Actual USAF project case histories are provided to the student for classroom use and analysis. Instruction covers programming avenues (O&M, NAF, MFH, MCP and Unspecified Minor Construction P-341), work classification and documentation. Also discussed are statutory cost limitations, project book preparation and use, and use of Air Force and commercial pricing guides. Other topics will stress program management and identifying and analyzing user requirements.

Prerequisites: JOB: Personnel engaged in or supervising project programming activities. GRADE: Commissioned officer or GS-5 minimum. EDUCATION: Bachelor's degree. Nominees not holding a baccalaureate, but who meet all other prerequisites for this course, will be considered for attendance. However, all students must be able to complete upper-level undergraduate course work. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT424—Real Estate Management—PDS Code 5BC—Wright-Patterson/2 wk—Oct 95

Broadens the students' understanding of the concepts and principles associated with the acquisition, management, and disposal of Air Force real estate. The curriculum gives real estate officers a greater ability to manage a real estate function. The roles and interrelationships between Congress, the Office of the Secretary of the Air Force, Headquarters Air Force, major commands, the Corps of Engineers, the General Services Administration, and the Real Estate accountable officer will be covered. The concept of stewardship as the overriding principle in effective Air Force real estate transaction is presented. General real estate topics will include public laws, legislative jurisdiction, map reading, legal descriptions, appraisals, and negotiations. General office management topics are included to increase the students' ability to communicate with and manage associates and subordinates. Teaching methods include formal lectures, case studies, exercises, and guided discussion.

Prerequisites: Real estate officers with 1 year of experience.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT425—Fire Protection Management Applications—PDS Code 0GS—Wright-Patterson/2 wk/MASL D178120—Oct 95

Prepares the fire protection flight management personnel to perform their jobs in the objective squadron by providing management knowledge and understanding and by developing application skills targeted to the students' respective jobs. The first major objective is for the students to know their functional tasks; secondly, to comprehend their interdependency as members of a civil engineering team; and lastly, to apply functional skills and team principles to realistic problem scenarios. Some functional responsibilities covered in the first part of the course include labor-management relations, fire school update, resources management, OSHA, fire protection research and development, service contracts, manpower, logistics, fire protection engineering, readiness, critical incident stress management, environmental (hazmat) overview, WIMS, and effective written and oral communications. This course is conducted simultaneously, and is integrated, with WMGT 406, 411, 420, 430, and WENV 416.

Prerequisites: Fire protection flight leader and assistant flight leaders (fire chief and assistant fire chief). ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil

Engineer and Services School.

Course Credit: 6 CEUs.

WMGT426—SABER Management—PDS Code O0G—Wright-Patterson/1 wk—Oct 96

Consists of both contracting- and civil engineering-specific material related to this type of contracting. Civil engineering-related issues will include engineering disciplines, Simplified Acquisition of Base Engineer Requirements (SABER) software, construction management, and environmental issues. Contracting issues will include contract administration and SABER policy. Also covers SABER goals, SABER policy, process work flow, roles and responsibilities, negotiations, year-end planning and execution, and funding issues.

Prerequisites: Primary—Chief of SABER and SABER contract administrators. Secondary—SABER project manager and contracting officers. Officers, Msgt and above, and GS-7 and above. Students must be able to complete upper-level undergraduate course work.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation, administered by the AFIT Civil Engineer and Services School.

WMGT430—Operations Management Applications—PDS Code P8W—Wright-Patterson/2 wk/MASL D178142—Oct 95

Prepares the operations flight chief and deputy flight chief to perform their jobs in the objective squadron by providing management knowledge and understanding and by developing application skills targeted to the students' respective jobs. The first major objective is for the students to know their functional tasks; secondly, to comprehend their interdependency as members of a civil engineering team; and lastly, to apply functional skills and team principles to realistic problem scenarios. Some functional responsibilities covered in the first part of the course include managing civil engineering resources and requirements, customer service concepts, technology management, manpower, logistics, readiness, environmental overview, and WIMS. This course is conducted simultaneously, and is integrated, with WMGT 406, 411, 420, 425, and WENV 416.

Prerequisites: JOB: Chief or deputy chief of operations at base level. Commissioned or noncommissioned officers or GS-9 minimum. EDUCATION: Bachelor's degree. Nominees not holding a baccalaureate, but who meet all other prerequisites for this course, will be considered for admission. However, all students must be able to complete upper level undergraduate course work. ECL 80.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT436—Maintenance Engineering—PDS Code WJX—Wright-Patterson/2 wk—Oct 95

Broadens the student's understanding of current maintenance engineering responsibilities and methods to effectively perform those responsibilities. Class exercises and lectures will speed the transformation of traditional civil, electrical, industrial, mechanical, and general engineers into CE maintenance engineers by reinforcing the lines of communication between the various members of the inhouse design team (customer, engineer, and craftsman) through increasing the understanding and appreciation of one another's jobs and by teaching them to speak the language of the other disciplines. Specific lessons will cover the recurring work program, infrastructure programs management, infrastructure/facility project review, nondesign drafting, service and utility contract management, and work analysis/methods improvement. The primary theme of the course is infrastructure management with an emphasis on the reduction of life cycle costs through proper design and facility maintenance.

Prerequisites: JOB: Any degreed civil, electrical, industrial, general, or mechanical engineer assigned to maintenance engineering within the operations flight of a base-level civil engineering squadron. GRADE: Commissioned officer or civilian grade equivalent. EDUCATION: Bachelor's degree.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT438—Logistics Mgt for Civil Engineering—PDS Code WJY—Wright-Patterson/2 wk—Oct 95

Increases the student's understanding and management of the support system for supplies, vehicles, and self help for base civil engineering. The relationship between work requirements, funds, and the type of support needed for accomplishment will be stressed. Lessons concerning acquisition, management, accountability, and disposition of supplies and vehicles are included.

Prerequisites: JOB: Operations flight management personnel. GRADE: Commissioned officers, noncommissioned officers E-7 and above, or GS-5 minimum. EDUCATION: Bachelor's degree. Nominees not holding a baccalaureate, but who meet all other prerequisites for this course, will be considered for attendance. However, students must be able to complete upper level undergraduate course work.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT450—Facilities Maintenance/Zonal Management—PDS Code WJZ—Wright-Patterson/2 wk—Oct 95

Provides students with the skills needed to balance resources and requirements to meet the needs of the base mission and ensure customer satisfaction. The course covers identification and validation of requirements, establishment of an effective customer service program, effective programming and scheduling of resources to meet customers' requirements and keep commitments, and management of similar requirements under the objective squadron.

Prerequisites: JOB: Primary target audience is the chief of zonal maintenance. GRADE: Commissioned and noncommissioned officers or GS-7 minimum. EDUCATION: Students must be able to complete upper level undergraduate course work.

Selection: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 3 CEUs.

WMGT484—Reserve Forces Air Base Combat Engineering—

PDS Code 7WN—Wright-Patterson/2 wk—Oct 96

Mandatory course for all National Guard and Reserve civil engineer officers to receive 32E3X AFSC. Prepares civil engineer officers to provide and maintain essential facilities in contingency situations. Describes expedient methods of force beddown, air base operability, and base recovery. The focus is on theater of operations joint use bases, but techniques are applicable to any air base. Topics covered include Air Force civil engineering responsibilities; assets; troop and aircraft beddown; expedient airfield pavements; expedient buildings and munitions storage; water, disaster preparedness wartime operations; foreign cultural overview; disease control; water, waste, fuel, and electrical systems; arresting barriers; base and personal survivability; facility hardening measures, camouflage, concealment and deception; structural/utility repair; chemical defense; damage assessment; base denial; and rapid runway repair. The course does not address contingency planning above base level.

Prerequisites: JOB: Open to all Air National Guard (ANG) and Air Force Reserve civil engineer officers. Nonengineers with a significant responsibility for air base operability will be considered on a case-by-case basis. EDUCATION: Bachelor's degree.

Special Requirements: Must possess a Secret clearance to assure attendance at all lessons. Clearance should be printed on orders. Bring a valid military ID to class. BDUs are mandatory for this course.

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University allocation: The Civil Engineer and Services School.

Course Credit: 6 CEUs.

WMGT585—Contigency Engineer Command Course—PDS Code O0H—Wright-Patterson/1 wk—Oct 96

Prepares mid-level civil engineer officers (senior captains and majors) for command during wartime contingency operations (including force beddown and military operations other than war) and peacetime contingencies such as natural disasters. Major components of the course include trends and impacts, organizational structures, command control, resources, installation development, leadership and management, and natural disasters. Officers will also learn how to operate with federal (e.g., FEMA), state, and local agencies while functioning within the military realms of responsibility.

Prerequisites: Civil engineering career officers with AFSC 32EX in the grade of senior captain or major with a minimum of 8 years of commissioned service. Commissioning dates must be included on DD Form 1556 or message requesting quota. Uniform for this course is the battle dress uniform (BDU).

Selection Control: MAJCOM/DP in coordination with AFIT/CEA.

Quota Control: Air University-allocated; administered by the AFIT Civil Engineer and Services School.

WSVS001-0—Services On-Site Seminar—PDS Code XXJ—location: on-site/2 days - 3 wk—Apr 95

Provides management skills to services managers and first and second level supervisors. Topics include understanding human behavior, motivation, communication, funds management, flight chief management, and mortuary affairs. Customer service and customer relations are also emphasized along with basic concepts in quality mangaement.

Course Objective: To promote the use of sound management techniques and communication to better manage base services resources. This seminar must be requested by the host services squadron commander or director or MAJCOM director. AFIT provides all educational materials and the requesting agency funds instructor TDY costs. The host base provides classrooms, chalkboards, desks, chairs, and audiovisual support. Seminars are available to major commands and base services organizations by writing to AFIT/CEA, 2950 P Street, Wright-Patterson AFB OH 45433-7765.

Prerequisites: TARGET AUDIENCE: Services personnel in grades 1st Lt through Lt Col and GS-4 through GS-14. EDUCATION: No restrictions, but student must be able to complete upper level undergraduate course work.

Course Credit: CEUs commensurate with course content and duration.

WSVS101—Services Initial Skills Management—PDS Code WSX—Wright-Patterson/6 wk/MASL D178185—Oct 96

Provides new company grade officers entering the services career field familiarization with the services readiness mission, mortuary affairs, and general services management. The course is broken into three blocks of instruction. The first block addresses the readiness mission. After a week of classroom readiness instruction, the students will deploy to the field for a full week of officer field education (OFE). At OFE, hands-on education will include: Harvest Eagle/Falcon bare base assets, Prime BEEF, food service, fitness, mortuary affairs, laundry, and explosive ordnance recognition. After OFE, students will return to AFIT to complete the readiness block and move into the mortuary affairs block of instruction. This block will include mortuary entitlements, eligibility, military honors, summary court officer, escort officer, search and recovery, and next-of-kin briefings. Afterwards, students will move into the services management block of the course. Some of the topics covered in the service management block include services mission and organization, NAF and APF personnel management, NAV and APF financial management and analysis, budgeting, marketing, training, food service, lodging, and management information systems.

Course Objective: For each student to comprehend the mission, organization, and operation of Air Force services (SV) squadrons and their interface with other base-level and headquarters activities.

Prerequisites: TARGET AUDIENCE: Company grade officers entering the services career field. GRADE: 2d Lt through Capt. EDUCATION: Bachelor's degree. OTHER: This course is required according to AFMAN 36-2105 (formerly AFR 36-1) for an officer to qualify for the services AFSC. Graduates of WSVS101 are ineligible to attend WSVS410, Services Flight Chiefs, for 24 months. Secret clearance. Students must be in good physical condition to avoid possible injury while at OFE. Students who may not be able to meet the physical fitness requirements of OFE (due to a profile change or other factors) will be placed on standby to attend a future offering of WSVS101 when the student can fully participate in all OFE activities. Students are required to bring a complete CWD ensemble (including eyeglass inserts), BDUs, and steel-toed boots. ECL 80.

Admin Instructions: Students will report to Wright-Patterson (AFIT) for the first week of instruction, then deploy to Tyndall AFB for OFE. Students *must* have the following information in Section II of DD Form 1610:

FROM: (student's home station)

TO: WPAFB OH

TO: Tyndall AFB FL

TO: WPAFB OH

RETURN TO: (student's home station)

Section 16 of DD Form 1610 *must* have the following statements: "Mil air will be provided from WPAFB OH to Tyndall AFB FL and return to WPAFB. Students will be under field conditions from 1000 (day 6) to 1300 (day 13). It is assumed all entitled meals available under field conditions are consumed unless otherwise indicated. Excess baggage is authorized." Amendments will be required if orders do not contain this information. Variations are *not* authorized. Bring three copies of orders to class. DD Form 1556 is required.

Selection Control: MAJCOM services training manager in coordination with AFIT/CEA.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

Course Credit: 23 CEUs.

WSVS102—Reserve Forces Services Management—PDS Code WRX—Wright-Patterson/1 wk—Oct 96

Provides ARC officers in the services career field a familiarization with the Air Force services mission and organization. Particular emphasis is placed on the skills and knowledge required to successfully operate active duty services squadrons. The course addresses the responsibilities of base level units, interface between the service's flights and activities, relationships with other base-level and headquarters organizations, management of resources, and operational techniques.

Course Objective: For each student to comprehend the mission, organization, and operation of the Air Force active duty services organization.

Prerequisites: TARGET AUDIENCE: ARC Services officers. GRADE: 2d Lt through Captain. EDUCATION: Bachelor's degree. OTHER: Waiver requests by those not meeting specified prerequisites may be considered on a case-by-case basis when accompanied by appropriate justification. Students must be able to complete upper-level undergraduate work. Recommend officers attending this course enroll consecutively in WSVS462, Reserve Forces Mortuary Affairs, when offered. DD Form 1556 required. ECL 80.

Selection Control: HQ AFRES or HQ ANGB in coordination with AFIT/CEA.

Course Credit: 3 CEUs.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

WSVS400—Services Leadership Course—PDS Code WTG—Wright-Patterson/3 wk—Oct 95

Emphasizes management and leadership lessons aimed at highlighting key issues in services squadrons. Some lessons are presented by senior leaders to update students on key contemporary issues in the services career field. Provides the technical aspects of mortuary affairs presented from a managerial perspective.

Course Objective: For each student to comprehend leadership theories and management skills and to apply these theories and skills in managing a base level services squadron or organization.

Prerequisites: TARGET AUDIENCE: Services squadron commander or deputy, services director, or deputy director. GRADE: Major through Lt Colonel or GS-11 minimum. EDUCATION: Bachelor's degree. OTHER: This is not an introductory course. Students should have experience in the services career field in order to effectively participate in this course. Students who are not familiar with the services organization, NAF policies and procedures, or NAF management should attend the first week of WSVS410 before attending this course. This course is required according to AFMAN 36-2105 to be completed within 9 months of assuming duties as a services squadron commander, deputy, or director. DD Form 1556 is required.

Selection Control: MAJCOM services training managers in coordination with AFIT/CEA.

Quota Control: Funded quotas - Air University allocation administered by The Civil Engineer and Services School. Unfunded quotas - allocation administered by The Civil Engineer and Services School in coordination with the services civilian careers program manager, HQ AFRES, and HQ ANG.

Course Credit: 10 CEUs.

WSVS410—Services Flight Chief—PDS Code 1ZR—Wright-Patterson/2 wk—Oct 95

Provides officers and civilians holding one of the services flight chief's positions with services general management concepts during week one. The second week does into flight-specific instruction and students will branch off into their flight-specific seminar: resource management, military support, youth, membership support, recreation support, plans, and force management. APF/NAF personnel, financial management/analysis, marketing, contracting, facility programming and construction, mortuary affairs, and services information management issues are also covered.

Course Objective: For each student to comprehend the services general management concepts and to be able to apply them to flight-specific situations.

Prerequisites: Target Audience: Services flight chiefs (squadron commanders without a background in MWR and Guard/Reserve field grade officers have the option of attending the first week of WSVS410 before attending WSVS 400), 2d Lt to Lt Col, or GS-9 through GS-12. Priority for attending this course is as follows:

1. Field grade services squadron commanders who don't have a background in MWR.

2. Field grade officers in a flight chief position/field grade Guard/Reserve officers.

3. Company grade officers in a flight chief position.

4. Civilians in a flight chief position.

5. Field grade or company grade officers going into a flight chief position.

6. Civilians moving into a flight chief position.

Education: Bachelor's degree.

Other: This course is required according to AFI 36-2105 for all field grade officers to qualify for the services AFSC. Waiver requests by those not meeting specified prerequisites may be considered on a case-by-case basis when accompanied by appropriate justification. All students must be able to complete upper-level undergraduate work. DD Form 1556 required.

Selection Control: HQ AFRES and HQ ANGB in coordination with AFIT/CES.

Course Credit: 6 CEUs.

WSVS462—Mortuary Affairs—PDS Code WTK—Wright-Patterson/1 wk—Oct 96

Provides active-duty and air reserve component officers with the technical aspects of mortuary affairs presented from a managerial perspective. Procedures for care and disposition of deceased, communications with next-of-kin and higher headquarters, escort and transportation of remains, eligibility criteria, search and recovery operations, Air Force and contract mortuaries, honor guard, and summary court officer's duties will be discussed at length. Introduces students to the psychological aspects of the mortuary affairs arena. The class will look at current case studies.

Course Objective: For each student to comprehend the mortuary affairs program and be able to apply this knowledge.

Prerequisites: TARGET AUDIENCE: Active-duty and air reserve component officers, assigned as base mortuary officer or alternate base mortuary officer. Capt or GS-9 minimum. EDUCATION: Bachelor's degree. OTHER:. Waiver requests by those not meeting specified prerequisites may be considered on a case-by-case basis when accompanied by appropriate justification. All students must be able to complete upper-level undergraduate work. DD Form 1556 required. ECL 35.

Selection Control: MAJCOM training managers and HQ AFRES and HQ ANGB in coordination with AFIT/CEA.

Course Credit: 3 CEUs.

Quota Control: Air University allocation administered by the Civil Engineer and Services School.

WSVS484—Reserve Forces Wartime/Contingency Support—PDS Code 7WW—Wright-Patterson/2 wk—Oct 95

Provides Air Reserve Forces officers in the services career field a familiarization with the Air Force services wartime and contingency missions. During the first week of the course, students will cover readiness assets, national planning, Prime FARE, home station training, current threat, and SORTS in a classroom at AFIT. The second week, students will deploy for hands-on education in the areas of Harvest Falcon/Eagle equipment, water purification, recreation, Prime BEEF, field food service, field laundry, MWR, and mortuary affairs.

Course Objective: For each student to comprehend the services readiness and wartime/contingency missions. For each student to apply the principles of contingency planning, and managing readiness activities in contingency and wartime environments.

Prerequisites: TARGET AUDIENCE: Air National Guard or Air Force Reserve services officers. GRADE: 2d Lt through Capt. EDUCATION: Bachelor's degree. OTHER: This course is required according to AFI 36-2105 for all field grade officers to qualify for the services AFSC. Waiver requests by those not meeting specified prerequisites may be considered on a case-by-case basis when accompanied by appropriate justification. All students must be able to complete upper-level undergraduate work. DD Form 1556 required. Students are required to enroll consecutively in WSVS102, Reserve Forces Services Management, and WSVS462, Reserve Forces Mortuary Affairs, when offered.

Special Requirements: Students must be in good physical condition to avoid possible injury while at OFE. Students who may not be able to meet the physical requirements of OFE (due to a profile change or other factors) will be placed on standby to attend a future offering of WSVS101 when the student can fully participate in all OFE activities. Students are required to bring a complete CWD ensemble (including eyeglass inserts), BDUs, and steel-toed boots.

Admin Instructions: Students will report to Wright-Patterson (AFIT) for the first week of instruction then deploy to Tyndall AFB for OFE. *Students must have the following information in Section II of DD Form 1610: FROM: (student's home station); TO: WPAFB OH; TO: Tyndall AFB FL; RETURN TO: (student's home station). Students must have the following statements in Section 16 of DD Form 1610: (1) Mil air will be provided from WPAFB OH to Tyndall AFB FL. Students should make commercial air transportation arrangements for their home station departing from Panama City FL, (2) Students will be under field conditions from 1000 (day 6) to 1300 (day 13), and (3) It is assumed all entitled meals are available under field conditions are consumed unless otherwise indicated.

*Amendments will be required if orders do not contain this information. Variations are not authorized. Bring three copies of orders to class.

Selection Control: HQ AFRES/HQ ANGB in coordination with AFIT/CES.

Course Credit: 6 CEUs.

WSVS485—Services Wartime/Contingency Support—PDS Code WTP—Wright-Patterson/1 wk—Apr 95

Provides field grade services officers (active duty and air reserve component) without a background in MWR or services familiarization with the services wartime and contingency role in a field setting. Topics include services home station training, command/control/communication, disaster planning, and force beddown. Student instruction takes place both in the classroom and in the field. The field exercises involve "hands-on" education in the areas of Harvest Eagle/Falcon equipment, wartime mortuary, tactical field laundry, field billeting, field food service, and recreation/fitness.

Course Objective: For each student to comprehend the services readiness, wartime/contingency missions. For each student to apply the principles of contingency planning and managing readiness activities in contingency and wartime environments.

Prerequisites: TARGET AUDIENCE: Field grade services squadron commanders or field grade officers going into a services squadron commander position, and field grade air reserve component officers. GRADE: Major through Lt Colonel. EDUCATION: Bachelor's degree. OTHER: Waiver requests by those not meeting specified prerequisites may be considered on a case-by-case basis when accompanied by appropriate justification. All students must be able to complete upper-level undergraduate work.

Special Requirements: Students will report directly to Tyndall AFB Silver Flag training site. BDUs and steel-toed boots are worn for the entire course.

Admin Instructions: Students *must* have the following information on their orders, Section II of DD Form 1610:

FROM: (student's home station)

TO: Tyndall AFB FL

RETURN TO: (student's home station)

Section 16 of DD Form 1610 *must* have the following statements: "Students will be under field conditions from 1000 (CSD) to 1300 (CGD). It is assumed all entitled meals available under field conditions are consumed unless otherwise directed." Amendments will be required if orders do not contain this information. Variations are *not* authorized. ECL 80.

Selection Control: MAJCOM training managers and HQ AFRES/HQ ANGB in coordination with AFIT/CEA.

Course Credit: 3 CEUs.

Quota Control: Air University allocation administered by The Civil Engineer and Services School.

School of Systems and Logistics

(Continuing Education Program)

WACQ101—Fundamentals of Systems Acquisition Management—PDS Code 3IU—Wright-Patterson/1 wk 4 days—Oct 96

Introduces the DoD systems acquisition process including the basics of systems acquisition program management and the developmental life cycle of a system from inception to retirement. Covers system concept exploration, development, production, and deployment. Uses examples and case studies of DoD acquisition organizations, DoD resource allocation processes, ethics, contemporary issues in acquisition strategy, and details of the phases of system development. Discussions are conducted on mission area analysis, directives, procedures, documentation, and current issues. Designed for individuals with limited experience in DoD systems acquisition management. Useful to personnel in headquarters, program management, and functional or support offices.

Prerequisites: Recommended for 1st Lt through captain and GS-5 and above.

WACQ201—Intermediate Systems Acquisition—PDS Code 3IV—Wright-Patterson/4 wk—Oct 96

Focuses on acquisition processes, the role of the major acquisition players, and their interactions. Covers the system life-cycle management process, technical and business processes, and program integration. Subject areas include life-cycle acquisition management policy and integration; technical management including systems engineering, software management, integrated logistics support, test and evaluation, and production management; and business management covering contract management, government funds management, contractor financial management, and cost and schedule control. A comprehensive exercise integrates the subject matter. Total quality management and ethics are stressed throughout the course.

Prerequisites: Successfully complete WACQ101 before taking WACQ201.

WCSE492—Software Systems Engineering—PDS Code 692—Wright-Patterson/10 wk—Oct 95

Provides an introduction to the major activities in software project management and the software development life cycle. Tecnical and managerial aspects are interlaced throughout the course so that both can be discussed in terms of specific software activities. The intent is to expose mid-level technical and managerial software professionals to the basic concepts of software engineering and to familiarize them with the role software engineering plays in the development of large systems. Project management issues discussed include cost estimating, risk analysis, configuration management, planning quality assurance, documentation, and standards. Phases of the software development life cycle surveyed include requirements analysis, design implementation, maintenance, verification, and validation. Detailed coverage of these topics is provided in WCSE 493, WCSE 494, WCSE 495, and WCSE 496.

Prerequisites: Acceptance into the Software Professional Development Program (SPDP) before applying for this course.

Selection Procedures: For details on application to the SPDP, contact AFIT/LSS.

WCSE493—Software Requirements and Design Engineering—PDS Code 693—Wright-Patterson/10 wk—Oct 95

The determination of software requirements and the formulation of design representations comprise two important components of the software life cycle. Errors discovered and corrected during the requirements or design phase of a software development project are much less costly than errors corrected during implementation or maintenance. Therefore, it is crucial that software is well specified and provides a basis for evaluating design decisions. The first half of the course provides coverage of software requirements analysis and includes issues such as domain modeling, prototyping, and formal specification. Various approaches to requirements analysis will be examined including structured analysis and data-structured analysis. Object-oriented analysis is briefly discussed here and covered in detail in course WCSE 494. A framework for evaluating various approaches will be developed and the applicability of different approaches to a range of application areas will be examined including information systems, distributed systems, and real-time systems. The second half of the course will explore techniques for designing quality software. Fundamental concepts such as modularity, functional independence, cohesion, and coupling will be explored in the context of structured design. Like object-oriented analysis, the object-oriented design paradigm is covered in course WCSE 494. Issues in user-interface design, information systems, and real-time design will be explored as well as the role of design issues in the context of software process management. Detailed design issues are briefly discussed here and covered in detail in WCSE 495.

Prerequisites: WCSE 492 (co-requisite). (The co-requisite for WCSE 493 means that WCSE 493 may not be taken before WCSE 492; that is, WCSE 492 may precede WCSE 493, or they may be taken

together.)

Selection Procedures: Students must be accepted into the Software Professional Development Program (SPDP) before applying to take this course. For details on application to the SPDP, contact AFIT/LSS.

WCSE494—Object-Oriented Analysis and Design—PDS Code 694—Wright-Patterson/10 wk—Oct 95

This course examines an object-oriented approach to modeling during all phases of the life cycle with particular attention being paid to analysis and design. The applicability of object-oriented techniques during domain analysis and modeling, detailed design, and implementation using object-oriented programming languages, non-object oriented programming languages, and data base systems will be discussed. Topics include object-oriented analysis (to include domain analysis, context analysis, problem analysis, and specification) and object-oriented design (to include preliminary and detailed design).

Prerequisites: WCSE 493.

Selection Procedures: Students must be accepted into the Software Professional Development Program (SPDP) before applying to take this course. For details on application to the SPDP, contact AFIT/LSS.

WCSE495—Software Creation and Maintenance—PDS Code 695—Wright-Patterson/10 wk—Oct 95

Provides an introduction to software creation and maintenance for large systems. Software, in the context, includes the code, documentation and support material; while large is defined as being complex as to size; uncertainties, and impacts of the real world. In the context of creation, the critical activities of detailed design, design-to-implementation analysis, creating software (especially software creation through reuse), and unit testing and analysis will be carefully discussed. Software maintenance will examine the activities of maintenance as applied to (1) error detection and correction, (2) enhancement evaluation and implementation, (3) adaptation of the software to meet new environments (hardware and software), and (4) improving the effectiveness and efficiency of the software. These activities are viewed from both the technical and managerial aspects with considerations for properly structured systems and recovering poorly structured systems. Software rejuvenation will be covered in depth as a means of recovering existing systems.

Prerequisites: WCSE 493.

Selection Procedures: Students must be accepted into the Software Professional Development Program (SPDP) before applying to take this course. For details on application to the SPDP, contact AFIT/LSS.

WCSE496—Software Engineering Practicum—PDS Code 696—Wright-Patterson/3 wk—Oct 95

Provides an opportunity to apply the knowledge gained from the four academic courses in the program—WCSE 492, WCSE 493, WCSE 494, and WCSE 495. The students will be given a project in the form of a problem statement. They will perform requirements analysis on the problem, generating a requirements document and functional specification. They will then complete a high-level design, producing a software design document and an interface design document. Lastly, the students will perform detailed design and generate code for at least a portion of the software. The students will participate in reviews of each phase of the product. A requirements review will be conducted on the requirements document and functional specification. A preliminary design review and detailed design review will be conducted and a limited user acceptance test will be performed.

Prerequisites: WCSE 494 and WCSE 495.

Selection Procedures: Students must be accepted into the Software Professional Development Program (SPDP) before applying to take this course. For details on application to the SPDP, contact AFIT/LSS.

WLAW050—Alternative Dispute Resolution—PDS Code 5MG—Wright-Patterson/3 days—Oct 95

Provides an introductory understanding of alternative dispute resolution (ADR). It focuses on conflict resolution within the legal framework of government-related disputes. Attorneys who are ADR practitioners will help the students develop appropriate skills necessary to use various ADR methods effectively. The material presented will describe such ADR procedures as conciliation, interest-based negotiation, mediation, mini-trials, and others, and compare ADR to litigation. Actual and hypothetical cases employing different ADR techniques will be reviewed. The course was designed to address Government contracting disputes. However, it can be adjusted to accommodate such areas as environmental management, base closure, and personnel and EEO. Through role-playing exercises involving negotiation and mediation, students will have an opportunity to develop specialized problem-solving skills which enhance the practical ability to manage disputes in any functional area. Course is taught in residence and on site.

Prerequisites: Preference is given to supervisors, managers, and warranted contracting officers.

Quota Control: Administration will be done by Air Force Institute of Technology, Department of Government Contract Law (AFIT/LSL).

WLOG032—Reliability Centered Maintenance Analysis (AF)—PDS Code 0GP—Wright-Patterson and onsite/1 wk/MASL D178125—Oct 96

Provides students with an understanding of the US Air Force Reliability Centered Maintenance (RCM) Program, to include history, objectives, responsibilities, methods, and procedures. Designed for acquisition specialists responsible for developing preventive maintenance programs for new weapon systems and equipment and for engineers and technicians responsible for updating preventive maintenance programs for fielded systems and equipment. Familiarizes students with reliability theory and the background of the RCM Program. Uses the principles of RCM theory and the RCM decision logic to determine preventive maintenance tasks. Provides step-by-step examples of how to conduct and document an RCM analysis on weapon systems and equipment. Methods to determine preventive maintenance task intervals and perform age exploration analysis are emphasized. Students perform an RCM analysis on selected major items of equipment according to Air Force guidance.

Prerequisites: 1Lt through major, MSgt through CMSgt, or GS-7 through GS-13. Personnel who are currently assigned or pending immediate assignment to duties of determining scheduled maintenance requirements for weapon systems and equipment. Open to non-US personnel. ECL 80.

Selection Control: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or approppriate training office is required. The final review and selection approval is made by the course director. Requests for waiver will be considered by the course director.

Academic Department: LSM.

WLOG092—Senior Transportation Executive Development Program—PDS Code 6NV—Wright-Patterson/2 wk—Oct 96

Provides senior Air Force transportation executives with the latest developments in national policies, management techniques, and new technologies affecting the commercial transportation and physical distribution disciplines. Emphasizes national transportation policies and their impact on Air Force transportation activities; current theories and techniques regarding human and physical resources management; state-of-the-art developments in the transportation field; and new productivity improvement initiatives. Increases students' understanding of both military and commercial physical distribution systems and provides insight into the motivation and strategies employed by the commercial transportation industry. Teaching methods include discussions, workshops, case analyses, and onsite tours of transportation and distribution facilities.

Prerequisites: Open to US only. Secret clearance. Lieutenant colonels and colonels with 24T AFSC, and civilian equivalents with 2130 or 2150 job series. Because of dynamics and currency of the seminar, graduates may apply to attend again 3 years after graduating. Applications are submitted in response to announcements made by HQ USAF/LGT. Final review, waiver of prerequisites, and selection of participants is made by HQ USAF/LGT.

Quota Control: HQ USAF/LGT.

WLOG101—Acquisition Logistics Fundamentals—PDS Code 3IY—Wright-Patterson/2wk—Oct 96

Students integrate logistics support policy, support performance requirements, and practices applicable to acquisition programs during the various defense systems' life cycles. Provides a broad overview of the acquisition logistics life-cycle process, the system engineering process, and the role integrated logistics support (ILS) plans and products play in these two processes. Presentations cover ILS-related subjects such as life-cycle costing, reliability, availability, maintainability, materiel acquisition processes, logistics support analysis processes, logistics-relevant test and evaluation, and technical information management. Guest lecturers will discuss real-world examples of developing and executing support for DoD programs and policies.

Prerequisites: Recommended—2d Lt through captain, technical sergeant through chief master sergeant; GS-5 through GS-9. Successfully complete WACQ101.

WLOG131—Industrial Maintenance Management (JT)—PDS Code EBB—Wright-Patterson and on-site/2 wk/MASL D178053—Oct 96

Improves the management abilities of entry- and mid-level managers and supervisors assigned to the DoD depot maintenance system. Examines industrial maintenance management principles and analytical techniques to determine how they can best be applied to enhance support of operational combat forces. Emphasizes the use of computer-based information and reports, forecasting, and human factors present in problem analysis and decisionmaking. Evaluates activities required to determine and manage industrial workload cost, and studies their interrelationships in a logistics system management exercise.

Prerequisites: Open to non-US personnel. Nominees should be currently assigned as entry- and mid-level managers or supervisors at depot, industrial, or rework maintenance activity. Captain and major, master sergeant through chief master sergeant, GS-9 through GS-12, and wage grade foreman of equivalent grade. ECL 80.

Selection Procedures: Initial review is required of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval controlled by course director. Requests for waiver will be considered by course director.

WLOG199—Introduction to Logistics (AF)—PDS Code WR7—Wright-Patterson/2 wk/MASL D178205—Oct 96

Prepares Air Force personnel for entry into logistics career fields. Provides a core of knowledge to which subsequent formal education and training programs can be keyed for progression of the logistician. Provides a conceptual overview of Air Force logistics and its environment including organizations, planning, integration of logistics systems, functions, principles, processes, and issues. Presented as a series of lectures, discussions, small group activities, and exercises.

Prerequisites: Open to non-US personnel. For newly assigned logisticians and persons pending immediate assignment to the logistics field. 2d Lt through captain, staff sergeant through master sergeant, GS-5 through GS-12.

Selection Procedures: Initial review of application (DD Form 1556) and student selection is performed by MAJCOM/DP, MAJCOM functional manager, or appropriate training office. Final review and selection approval will be controlled by the course director. The course director may consider requests for waiver for more senior personnel without experience in logistics. ECL 80.

WLOG205—Provisioning—PDS Code 3IZ—Wright-Patterson/1 wk—Oct 96

Covers the total provisioning process including requirements generation, system acquisition, and functional-level provisioning requirements. Reviews provisioning policies, procedures, and management techniques for different acquisition strategies and provides functional training in selected provisioning activities. Emphasizes the interrelationships and interdependencies of logistics functions. Students discuss new concepts and techniques and the application of ethical principles. Focuses on the management aspects of provisioning a system or end item. Emphasizes the flow of the provisioning process to ensure a sound understanding of the normal sequence of events that occur in the provisioning of a system or end item of equipment. Participants will develop competencies in planning, executing, managing, and assessing the provisioning of DoD weapon systems and equipment. Practical exercises will allow students to engage in significant technical activities in the provisioning process.

Prerequisites: Recommended GS-9 and above, military officers, warrant officers, enlisted personnel assigned to or anticipating assignment to a position requiring familiarity with the provisioning process. Successfully complete WACQ201, WLOG201, and WLOG202.

WLOG260—Provisioning Management (AF)—PDS Code EMT—Wright-Patterson and onsite/2 wk/MASL 178076—Oct 96

Focuses on the management aspects of the provisioning process associated with the acquisition of new weapon systems and equipment entering the Air Force inventory. Designed for personnel in provisioning, equipment, standardization, requirements determination, and cataloging positions, as well as logistics or

program managers at program offices, headquarters, and MAJCOM level who actively participate in the provisioning process. Reviews current DoD provisioning policies and management procedures, emphasizes interrelationships and interdependencies between logistics functions, and discusses new concepts and techniques. Emphasis is on an overview of the entire flow of the provisioning process to ensure a sound understanding of the normal sequence of events that occur in the provisioning of a system or end item. Instructional methods include participatory concepts as well as lectures and discussions. A computer-assisted exercise is conducted, during which students play roles of staff and technical decisionmakers participating in the major segments of the provisioning process and the initial support environment.

Prerequisites: Open to non-US personnel. Personnel assigned to positions in commands or agencies who are actively participating in or associated with the provisioning process. 1st Lt through lieutenant colonel, GS-7 through GS-13. ECL 80.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM DP or appropriate training office. Final review and selection made by course director. Requests for waiver will be considered by the course director.

WLOG262—Applied Maintenance Management Concepts (AF)—PDS Code WW6—Wright-Patterson and on site/2 wk/MASL D178119—Oct 96

Provides maintenance managers and supervisors with an array of executive skills that can be applied to the management functions that support operational units. Covers the latest policies and initiatives and challenges students to apply both theory and techniques to current management problem scenarios that confront base-level maintenance managers. Emphasizes application of current concepts in management science through seminars, informal lectures, guided discussions, case studies, exercises, and management simulations. Current topics examine excellence in the public service, group decisionmaking dynamics, the logistics environment, and repair-cycle processes. Illustrates application of statistical concepts, statistical process control, and reliability and maintainability measures through practical exercises.

Prerequisites: Open to non-US personnel. Priority given to nominees currently assigned to, pending assignment to, or working in direct support of organizational-level maintenance positions. 2d Lt through major, technical sergeant through chief master sergeant, GS-9 through GS-13, and wage grade equivalents. Students are required to bring calculators to support various course requirements. A basic familiarity of statistical concepts is desirable. ECL 80.

Selection Process: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval is made by the course director. Waivers for personnel in other logistics-related career fields, levels of assignment, and other prerequisites will be considered by the course director.

WLOG290—Combat Capability Assessment (JT)—PDS Code 4LE—Wright-Patterson/2 wk/MASL D178139—Dec 88

Provides practical training for AFLC's Weapon System Management Information System (WSMIS), particularly the Sustainability Assessment Module (SAM). All four modules of WSMIS are presented with an emphasis on the management uses of the information system. WSMIS is a standard Air Force information system used for providing units with their readiness and capability status. Although all four modules are covered, particular attention is focused on SAM and the Dyna-METRIC model. The course develops necessary background in statistics, probability and modeling concepts, operational planning, WRM program and associated requirements process, analysis techniques, and computer operations. The evolution of the underlying theory of the model is reviewed and critiqued. The major part of the course involves several "hands-on"exercises using hypothetical war plan scenarios.

Prerequisites: Military officers, senior NCOs, and civilian personnel, minimum grade GS-7, who are currently assigned or pending assignments to duties involving the use of WSMIS. Although directed toward students without experience in any aspect of the system, some familiarity with probability theory and professional or personnel experience with computers is very helpful. Students are encouraged to bring calculators to support course requirements. ECL 80.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate Provides an overview of the wartime roles and responsibilities of the logistics manager and an understanding of how logistics contributes to the overall war effort. Provides an introduction to combat logistics planning, strategies, and contingency procedures that will likely be implemented in a wartime scenario. Includes logistics in wartime; lessons learned in WWII, Korea, Vietnam, and other conflicts; current procedures and concepts include depot surge, aircraft battle damage repair, logistics C, prepositioning, combat environment, Army logistics, and civil engineering capabilities. Logistics responsibilies and planning are employed in JOPS deliberate planning, Crisis Action Procedures, and operational planning. Students complete a simulated force planning process including transportation feasibility estimates and shortfall resolution. Concludes with an examination of near term logistics systems and the logistic environment of the future.

Prerequisites: 1st Lt - Captain, SSgt - SMSgt, and civilians (GS-9 - GS-12) in the logistics career field assigned to operational logistics positions at joint and unified commands, major/intermediate command headquarters, and wing/base level. College degree strongly advised. ECL 80.

Special Requirements: Secret clearance.

OPR: AFIT/LSM.

WLOG299—Combat Logistics (AF)—PDS Code 1L4—Wright Patterson and onsite/2 wk/MASL D178144—Oct 96

Discusses the roles and responsibilities of the logistics manager in war and in operations other than war (OOTW). Focuses on how logistics contributes to war and OOTW efforts and introduces students to combat logistics planning, strategies, and contingency procedures that will likely be implemented in wartime and contingencies. Subjects include logistics in wartime; lessons learned in recent conflicts; analysis of overall combat environment; and current procedures and concepts including depot surge, aircraft battle damage repair, logistics command and control, prepositioning, and joint logistics support concepts. Explores the interaction between planning for logistics support and the JOPES deliberate planning and crisis action planning system. Students complete a simulated force-planning process including transportation feasibility estimates and shortfall resolution. Concludes with an examination of near-term logistics systems and the logistics environment of the future battlefield.

Prerequisites: Open to non-US personnel. Designed for personnel in a logistics career field assigned to an operational logistics position at

base level through joint and unified commands. 1st Lt through captain, SSgt through SMSgt, and civilians GS-9 through GS-12. ECL 80.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office is required. Final review and selection approval is made by the course director. Requests for waiver will be considered by the course director.

OPR: AFIT/LSM.

WLOG399—Strategic Logistics Management (AF)—PDS Code JBH—Wright-Patterson/1 wk—Oct 96

Broadens student understanding of Air Force and joint logistics doctrine, policies, processes, programs, planning, and current and future issues. Provides a forum for the free exchange of ideas and concepts between students, faculty, and guest speakers. Fosters creative problem-solving and enhances each student's potential by providing an understanding of a broad, complex range of critical issues facing the Air Force and joint logistics communities. Focuses on logistics at the strategic level. Emphasizes the interdependency of strategy, tactics, and logistics, and the importance of treating all logistics functions and processes as an integrated system for providing combat capability. Students link US national security objectives to logistics policies, plans, and resources and examine how the evolving logistics environment, changes in the total force concept, and future concepts of service roles and missions impact logistics. Relies extensively on presentations from guest speakers (primarily from HQ USAF, JCS, joint commands, and DoD), industrial tours, and the students themselves who share the wealth of their own diverse backgrounds and experience in logistics.

Prerequisites: Open to US personnel only. For personnel in all logistics career field specialties. Major and lieutenant colonel and SMSgt and CMSgt at MAJCOM or above; GS-13 and GS-14. Five years' experience in one or more logistics specialties recommended. ECL 80.

Special Requirements: Secret clearance.

Academic Department: LSM.

Quota Control: Initial review of DD Form 1556 and selection is performed by MAJCOM/DP or appropriate training office. Final review and selection approval by course director. Requests for waiver for exceptionally experienced captains and GS-12s may be approved by the course director.

WLOG499—Logistics Executive Development Seminar (AF)—PDS Code JBJ—Wright-Patterson/2 wk .5 day—Oct 96

Provides logistics executives an increased understanding of the interrelationship of the logistics disciplines, management systems, and values affecting organizational policy within the broader context of national policies and objectives. Provides senior logistics managers the opportunity to examine policies and issues currently affecting logistics. Flag officers, SESs, and private-sector senior managers present various topics. Offers students an opportunity to interact with these policymakers by exchanging ideas, discussing current issues, and assessing common problems.

Prerequisites: Open to US only. Open to colonels-select and colonels in all logistics career field specialties and GS-15s. Senior lieutenant colonels and GS-14s will be considered on a space available basis.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Because of the dynamics and currency of the seminar, graduates may apply to attend again 3 years after graduating. Final review and selection is made by HQ USAF/LGX and the seminar director.

WCON104—Principles of Contract Pricing (JT)—PDS Code PBC—Wright-Patterson/2 wk 4 days/MASL D178078—Oct 95

First and basic course in the DoD curriculum of courses in cost and price analysis. Provides the foundation for the study and practice of cost and price analysis. Includes an estimation of the environment in which cost and price analysis takes place, sources of data for cost and price analysis, methods for analyzing direct and indirect costs, performing profit analysis, selected current pricing topics, and instruction on the fundamentals of the negotiation process including essential techniques, strategy, tactics, and individual and group negotiation workshops. An actual cost analysis is used to illustrate and integrate the various concepts and methods taught in the course. Credit for this course is also available through an equivalency examination. For more information on these alternative methods, contact AFIT/LSA, DSN 785-6844. Students are taught contract negotiation skills and participate in simulated contract negotiations.

Prerequisites: Successful completion of Management of Defense Acquisition Contracts (Basic) or Air Force Procurement Officer Course, or 12 months procurement or comptroller experience prior to attending WCON104. Military personnel: Commissioned officers and NCOs (E-5 or higher). Civilian personnel: GS-5 and above. ECL 80. Waivers may be granted on an individual basis. Available in seminar, correspondence, and on-site modes. No security clearance required. ACE mandatory students Level I (chapter 1, paragraph 1.32).

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval controlled by AFIT/LS course director.

Quota Control: Air University allocation administered by AFIT School of Civil Engineering and Services.

WCON201—Government Contract Law (JT)—PDS Code D99—Wright-Patterson and onsite/2 wk/MASL D178130—Oct 96

Provides an understanding of the impact of government contract law on daily decisionmaking in acquisition. Introduces basic legal principles and sources of contract law as they apply to the Government's acquisition of supplies and services as well as construction services. Discusses court cases and administrative decisions (e.g., General Accounting Office, Boards of Contract Appeals) with emphasis on how the law affects the government/contractor interface and how to avoid legal disputes and maintain ethical business relationships. Recommended for intermediate-level personnel who have some experience with government contracting and are responsible for contract formation or management.

Prerequisites: Captain and above, SrA and above, and GS-7 and above with contracting responsibilities. Required Level I courses must be completed before enrollment. ECL 80.

WCON221 and WCON221-0—Intermediate Contract Administration–PDS Code AAS—Wright-Patterson and onsite/2 wk/MASL—D178068—Oct 96

Presents intermediate-level personnel with an intensive examination of important areas in contract management. Topics include cost and

profit/fee adjustments, cost accounting, contract adminstration organizations, contract surveillance, and quality assurance. Covers financial management, terminations, disputes, labor relations, subcontractor controls, environmental management, and current government publications related to contract administration and close out. Emphasizes providing students with an opportunity to identify and evaluate relevant facts and analyze alternative solutions in the management of government contracts. Students are required to develop a written case study relating to contract administration based upon their work experience. Student cases provide a basis for classroom presentations and situational analysis corresponding to relevant contract administration topics.

Prerequisites: Recommended–Captain and above, staff sergeant and above, and GS-9 and above. Successfully complete all mandatory Level I courses at least 1 year before attendance.

WCON232—Overhead Management of Defense Contracts—PDS Code Z1M—Wright-Patterson and onsite/2 wk/MASL D178126—Oct 96

Covers both introductory and advanced overhead management concepts. Instruction is appropriate for contracting officers, buyers, price analysts, auditors, and contract administration personnel. Emphasizes overhead process, rate development, final rate determination, pricing applications, cost accounting standards, cost principles, cost monitoring, contract administration, and ethical principles. The use of ASBCA, Court of Claims, and other decisions is an important part of this course; the complex accounting issues make coverage of these cases beyond the scope of government contract law courses. This is an assignment-specific course.

Prerequisites: Recommended for personnel being assigned to program projects in which contractor overhead situations are present and are important elements of cost. Review "Indirect Cost" chapter of the Armed Services Pricing Manual. Must successfully complete all Level I courses.

WCON321—Contract Administration Executive—PDS Code JBK—Wright-Patterson/1 wk/MASL D148189—Oct 95

Provides senior-level government contracting personnel wiith an indepth study of executive leadership, team building, and management concepts within the contract administration office (CAO). Course addresses executive management and problem solving within the CAO. Leadership, communication, professionalism, and team-building strategies are emphasized. Senior level CAO managers are given the opportunity to examine priorities and goals within the CAO.

Prerequisites: Civilian personnel GS/GM-13 and above in the DOD-wide civilian career program for contracting/acquisition personnel. Military personnel O-4 and above (acquisition/contracting specialty designator or assigned to an acquisition/contracting billet), with a minimum of 4 years of contracting experience. Required level I and level II courses must also be completed before enrollment. ECL 80.

*Individuals who do not meet the prerequisites must submit a request for a waiver of the prerequisites before application for enrollment in the course.

WCON331—Advanced Contract Pricing (JT)—PDS Code PBE—Wright-Patterson and onsite/2 wk/MASL D178083—Oct 95

Develops capability in advanced pricing techniques used in the estimating and analyzing of costs in large procurements. Final course for pricing and procurement personnel in the DOD cost and price analysis curriculum. It provides the experienced procurement analyst with the statistical and accounting tools necessary to analyze costs, establish cost estimating relationships, and develop reasonable cost estimates in large system procurements. The course examines statistical analysis, regression analysis, leasing, selected special topics, and computer applications.

Prerequisites: Successful completion of WQMT345. First lieutenants and above or GS-9 and above engaged in the procurement of large systems. ACE mandatory students Level III (see chapter 1, paragraph 1.32.) ECL 80.

WIND101—Contract Property Administration Fundamentals—PDS Code AAW—Wright-Patterson and onsite/2 wk/MASL D178158—Oct 96

Designed for industrial property management specialists, property administrators, plant clearance officers, and other government personnel who manage government property in possession of contractors. Participants gain strong foundation in the management and control of government property according to contract and regulatory requirements. Covers policy, programs, organization, and procedures relating to the administration of government property. Focuses on objectives and methods of monitoring contractors involved with government materiel, special tooling, special test equipment, facilities and agency-peculiar property and the application of system analysis programs. Participants are introduced to the fundamental concepts of government property administration; the legal aspects of risk of loss, damage, and destruction of government property; the property administrator's authority; property control systems; system analysis; disposal of contractor-held Government property; ethics; and quality.

Prerequisites: Recommended for 2d Lt through majors; SrA through master sergeant, GS-5 through GS-7 assigned as property administration and industrial property management specialists as well as other specialities involved with the control of government property.

WIND103—Contract Property Systems Analysis—PDS Code WTW—Wright-Patterson/1 wk—Oct 96

Provides a solid foundation in audit principles and techniques for entry-level property administrators and industrial property management specialists. Covers contractual and regulatory requirements for establishing and maintaining a system to control all government property for which the contractor is responsible and accountable. Underscores the importance of property control system requirements and provides the tools necessary for the property administrator to plan and perform a property control system analysis. Examines the functions, functional segments, and criteria specified in DoD 6161.2M, *Manual for the Performance of Contract Property Administration.* Reviews basic theories of inferential statistics and applications; the use and effective implementation of statistical sampling of selected populations; data analysis of both transactions, attributes, and ethical principles; the analysis of data collected from an audit; and the assessment of a contractor's system for compliance. Covers audit strategies for performance before, during, and as follow up to the systems analysis and techniques for reporting and resolving system deficiencies.

Prerequisites: Recommended for 2d Lt through major, SrA through master sergeant, and GS-5 through GS-7 assigned as property administration and industrial property management specialists. Successfully complete WIND101 at least 1 year before attendance.

WIND201—Intermediate Contract Property Administration—

PDS Code QNN—Wright-Patterson/2 wk/MASL D178095—Oct 96

For experienced property administrators, plant clearance officers, their supervisors, and other government personnel whose duties and responsibilities relate to the management of government property controlled by contractors. Covers planning, organization, and conduct of the overall functions of property administration. Emphasizes critical analysis of current management policy and practice at three levels: top management, field activity management, and contractor management. Primarily considers setting and attaining objectives, implementing advanced management techniques, and identifying and analyzing current problem areas. Participants will analyze and discuss current issues in property administration including the property clauses, acquisition, receiving, records, storage and movement, maintenance, subcontract control, liability for loss, damage or destruction of government property, and disposition. Students analyze and discuss current property administration problems and issues. Students are required to prepare and present a case on a relevant property administration topic.

Prerequisites: Recommended for captains and above, technical sergeant and above, and GS-9 and above in the property management series. Successfully complete WIND101 and other mandatory Level I courses at least 1 year before attendance. ECL 80.

WIND202—Contract Property Management—PDS Code WTV—Wright-Patterson/1 wk—Oct 96

Designed for property administrators, industrial property management specialists, and plant clearance officers at both field level and staff locations. Builds upon the introductory and intermediate contract property courses. Participants analyze problems solutions, policies, and programs that affect the property administration function. Property administrators collaborate in developing management and problem-solving strategies and examine priorities and goals within the property administration office. Leadership, communication, professionalism, ethics, and team building are emphasized. Participants discuss DoD property management initiatives, new ideas developed in their own organizations, and explore the challenges and problems faced by property administration offices. Methods of instruction include case studies, simulations, guided discussions, and group projects. Guest lecturers, teaching interviews, and round-table discussions expose participants to new ideas and trends.

Prerequisites: Recommended for captains through lieutenant colonels, SrA through master sergeant, and GS-9 through GS-14 assigned as property administration and industrial property management specialists. Successfully complete WIND201 at least 1 year before attendance.

WPPM153/EE—Production Management I/Equivalency Exam—PDS Code VSK—Mar 93

This equivalency exam is designed to enable DOD employees with extensive job knowledge to receive credit for that knowledge. The exam will determine the extent of this knowledge compared to information presented through AFIT course WPPM153. Successful completion of this exam will fulfill DOD mandatory training requirements in this area.

Contact AFIT/LSA-EE for more information or applications, DSN 785-6844.

WPPM302/EE—Government Contract Law/Equivalency Exam—PDS Code VT7—Mar 93

This equivalency exam is designed to enable DOD employees with extensive job knowledge to receive credit for that knowledge. The exam will determine the extent of this knowledge compared to information presented through AFIT course WCON201. Successful completion of this exam will fulfill DOD mandatory training requirements in this area.

Contact AFIT/LSA-EE for more information, DSN 785-6844.

WPPM302 JA—Government Contract Law for Attorneys (AF)—PDS Code TB0—Wright-Patterson/2 wk—Dec 91

Provides beginner Air Force judge advocates specialized education in government contract law to help anticipate, focus on, and provide answers to government contract law problems they have or will encounter. Instruction is lecture and discussion and case study.

Prerequisites: Must be commissioned judge advocate or designated as a civilian attorney advisor.

Selection Procedures: AF/JAEC based on nominations submitted from field.

WPPM304/EE—Advanced Contract Administration/Equivalency Exam—PDS Code WJM—Mar 93

Designed to enable DOD employees, with extensive job knowledge, to receive credit for that knowledge. The exam will determine the extent of this knowledge compared to information presented through AFIT course WCON221. Successful completion of this exam will fulfill DOD mandatory training requirements in this area. Contact AFIT/LSA-EE for more information or applications, DSN 785-6844.

WPPM305/EE—Production Management II/Equivalency Exam—PDS Code VU4—Mar 93

This equivalency exam is designed to enable DOD employees with extensive job knowledge to receive credit for that knowledge. The exam will determine the extent of this knowledge compared to information presented through AFIT course APPM305. Successful completion of this exam will fulfill DOD mandatory training requirements in this area.

Contact AFIT/LSA-EE for more information or applications, DSN 785-6844.

WPPM306—Contractual Aspects of Value Engineering (JT)—PDS Code WW8—1 wk/MASL D178202—Dec 79

Provides an awareness of the methods and objectives of value engineering and more particularly of the value engineering contract clauses, their provisions and applications. Designed to meet the needs of those government personnel responsible for negotiating, reviewing, approving, administering and evaluating the contractual value engineering effort of defense contractors. Includes examples whereby reductions in development and weapon system costs were accomplished without compromising approved technical requirements. It also provides a brief exposure to the interrelations between the engineer, the buyer, and the contract administrator inherent in productive value engineering projects. An analysis is made of the value engineering incentive and program requirement clauses in use.

Prerequisites: Military and civilian personnel assigned as contracting officers (ACOs and PCOs), cost analysts and other personnel who directly participate in value engineering contractual agreements and performance. This course is not meant to instruct specialists in the practice of the VE discipline, but may be useful to them. In addition to resident offerings, this course is offered in the onsite mode. For information on this mode, see section F. ECL 80.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval controlled by AFIT/LS course director.

WPQM101—Production and Quality Management Fundamentals—PDS Code 3J0—Wright-Patterson/2wk—Oct 96

An entry-level course that emphasizes basic production and manufacturing and quality assurance principles, policies, processes, and practices used in DoD. Discusses topics such as automation tools, industrial base, materiel control, technical support to negotiations, pre-award and post-award activities, producibility, technical surveillance, process evaluation, statistical tools, quality assurance planning, and engineering.

Prerequisites: Recommended for 2d Lt through captain and GS-5 through GS-7 assigned to a production, manufacturing, or quality assurance position. Must successfully complete WACQ101.

WPQM201—Intermediate Production and Quality Management—PDS Code 3H0—Wright-Patterson/3 wk—Oct 96

Explores the concepts and actions in manufacturing and quality management of DoD acquisition programs. Curriculum uses the life-cycle approach centered on establishing a "predictable factory" capable of on-time delivery of uniform, defect-free hardware at affordable costs. Major areas of study include industrial base issues, producibility, theory of variability, process control, concurrent (integrated product development) engineering, production readiness validation, and performance measurement. Covers DoD policies and concepts related to material review and corrective action, as well as engineering change proposal evaluation, technical data package review and evaluation, test monitoring and analysis, configuration management reviews, pre-award surveys and post-award conferences, quality system review, International Standards and American National Standards Institute, Society of Quality Control (ISO/ANSI-ASQC) and MIL-Q-9858A, and defect control through statistical processes.

Prerequisites: Recommended for captain and above and GS-12 and above in manufacturing production or quality assurance. Must successfully complete WACQ101, WACQ201, WPQM101.

WQMT020—Reliability and Maintainability Overview (JT)—PDS Code 54H—Wright-Patterson/2 days/MASL D178219—Oct 96

Acquaints program/project managers with the need to include reliability and maintainability (R&M) in weapon system acquisition. Includes an overview of current R&M policy, R&M management, design techniques, reliability testing, and an introduction to R&M mathematics.

Prerequisites: Officers, senior enlisted, and civilians in managerial positions who need a familiarization with R&M. ECL 80.

WQMT082—Quality Improvement Teams (AF)—PDS Code 1L3—Wright-Patterson/1 wk—Jun 90

Designed for individuals who are responsible for developing, educating, and managing problem-solving groups. The curriculum is built around a problem-solving process, and the tools used in that process. Lectures, workshops, experimental exercises, and a simulation are used to give the attendees an opportunity to practice using statistical techniques, team development models, and other techniques used by problem-solving groups. Air Force organizations involved in a quality improvement process, and other participative management groups that want to know how to use simple statistics to solve problems, will learn how to implement and manage a quality improvement strategy. In addition to resident offerings, this course is offered on site.

Prerequisites: Military members in the grades of 1st Lt or SSgt and above; and civilians of grades GS-5 or above. Waivers will be granted on an individual basis.

Admin Instructions: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval controlled by AFIT/LS course director.

WQMT084/WQMT084-0—Quality Management (JT)—PDS Code 68V—Wright-Patterson and onsite/4 days—Jun 90

For upper managers who seek to enhance the performance of their organizations through the concept of managing to achieve ever increasing quality, and thereby greater productivity, stability, and customer satisfaction. The course curriculum includes the philosophies of recognized quality leaders, particularly Dr. Deming and Dr. Juran. The relevance of these philosophies to white collar and blue collar jobs, in the DOD and among its contractors/subcontractors is covered. Teaching methods used are: informal lectures by faculty and guest lecturers from government/contractors, video presentations, quiz/exam, skit, and small group workshops. Specific subject areas covered in the course include Deming's obligations of management, the diseases/obstacles that inhibit quality, and the chain reaction of quality; Juran's quality management trilogy and quality leadership concepts; Crosby's quality management maturity grid; the cost of poor quality; the federal government's Total Quality Management (TQM) strategy; a TQM implementation strategy; an overview of problem-solving tools; and Air Force's R&M 2000 Variability Reduction Process. The criticality of upper management leadership in quality is emphasized.

Prerequisites: At least a lieutenant colonel or GM-14. Reason: To assure upper managers with the greatest responsibility and authority to improve systems are afforded the opportunity to learn and adopt these philosophies.

WQMT088—Advanced Quality Circle Methods (AF)—PDS Code 68Z—Wright-Patterson and onsite/3 days—Sep 87

The objective of this course is to improve skills of group facilitators. Gives experienced facilitators an opportunity to identify current problems and to develop solutions to those problems. Several workshops are conducted during the course. Facilitators are also updated on current trends in the problem-solving process.

Prerequisites: Involvement in group decision-making processes or other job-related needs for the course and at least 1 year experience in facilitating group is required. Waivers will be granted on an individual basis. Security clearance not required.

Admin Instructions: The initial review of applications (DD Form 1556) and student selection will be performed by MAJCOM/DP or appropriate training office. Final review and selection approval will be controlled by AFIT/LS course director.

WQMT089/WQMT089-0—Advanced Process Control Methods (AF)—PDS Code 69A—Wright-Patterson and onsite/1 wk—Jun 90

Shows how to use advanced statistical process control methods to improve the quality of products and services. This is an advanced course in statistical process control. The course is built around a technique called the Analysis of Means (ANOM). Air Force and other DoD personnel currently using statistical process control will

find this course useful.

Prerequisites: WQMT 090 or comparable courses in statistical process control and involvement in group decision-making processes. Waivers will be granted on an individual basis. Security clearance not required.

Admin Instructions: The initial review of applications (DD Form 1556) and student selection will be performed by MAJCOM/DP or the appropriate training office. Final review and selection approval will be controlled by the AFIT/LS course director.

WQMT090—Statistical Process Control Methods (AF)—PDS Code 69B—Wright-Patterson and onsite/1 wk/MASL D178191—Oct 96

Designed for individuals in one of the following categories: (1) Involved in a group-solving process, such as task teams, quality improvement teams, process action teams, etc.; (2) involved in an effort to reduce the variability of a process; or (3) involved in a total quality management process aimed at continuous improvement. In addition to resident offerings, this course offered on site. NOTE: For offerings conducted at the user's facility, a follow-up visit should be scheduled. If possible, schedule this visit to occur after the course is completed so the course director can review the progress being made on special projects.

Prerequisites: Basic statistics background, involvement in group decision-making processes, or job-related needs for the course are required. Waivers will be granted on an individual basis. Security clearance not required. ECL 80.

WQMT170/EE—Principles of Contract Pricing/Equivalency Exam—PDS Code VUJ—Mar 93

This equivalency exam is designed to enable DOD employees with extensive job knowledge to receive credit for that knowledge. The exam will determine the extent of this knowledge compared to information presented through AFIT course WCON104. Successful completion of this exam will fulfill DOD mandatory training requirements in this area.

Contact AFIT/LSA-EE for more information or applications, DSN 785-6844.

WQMT175—Principles of Cost Analysis —PDS Code 8NU—Wright-Patterson/2 wk/MASL D178186—Oct 96

First and basic course in DoD curriculum of courses in financial cost analysis. Provides the foundation for the study and practice of financial cost analysis. Includes an introduction to the financial cost estimating environment, sources of data for developing independent estimates, cost analysis of contractor proposals, methods of developing and analyzing cost estimates, computer software application and electronic spreadsheet documentation, and selected current cost analysis topics. An independent cost estimate is developed using the electronic spreadsheet to illustrate and integrate the various concepts and methods taught in the course.

Prerequisites: Three to 6 months of comptroller experience before attending WQMT 175. Commissioned officers, master sergeant and above, GS-5 and above. ECL 80.

WQMT180—Cost Improvement Curve Analysis—PDS Code ZYC—Wright-Patterson and onsite/1 wk/MASL D178153—Oct 96

Develops the student's capability to analyze the effects of the cost improvement curve phenomenon in a production environment and to use the analysis as a basis for predicting future production costs. Provides the analyst with a working knowledge of cost improvement curve theory, competence in the ability to apply different mathematical formulations of the cost improvement curve, and an understanding of how the basic assumptions of the cost improvement curve model interact with the realities of the production environment. Emphasis is placed on the application of the unit (Boeing) and the cumulative average (Northrup) cost improvement curve formulations. Various techniques are presented for estimating the parameters necessary to define a particular cost improvement curve, both in the preproduction and production environment. Students will be required to demonstrate their skills by solving short problems and analyzing cases. The computer will be introduced as a tool in conjunction with quantitative analytical techniques.

Prerequisites: Three to 6 months of comptroller experience before attending QMT180. Officers, master sergeant and above, GS-5 and above.

WQMT185—Computer Software Applications—PDS Code 0HG—Wright-Patterson/2 wk—Sep 86

Provides the basic skills necessary to use the COPPER IMPACT library of programs and cost models. Enables the student to quickly acquire a wide variety of computer capabilities without actually being familiar with a computer language. Covers systems and editing features of the COPPER IMPACT system; data base creation; system simulation models; statistical and mathematics models including univariate statistical analysis, regression analysis, learning curve routines, graphics; electronics spreadsheet application; data base management; and the use of the proposal pricing system (PPS). In addition, new concepts and subjects will be added as they become available on the COPPER IMPACT. The lecture and case analysis method is used with significant time spent in actual computer terminal operation.

Prerequisites: No computer background is required for this course; however, the applicant should be knowledgeable in the area of cost and price analysis. The candidate's organization should have access to, or anticipate access to, the COPPER IMPACT system.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval controlled by AFIT/LS course director.

WQMT335—Reliability and Maintainability Design in Systems Acquisition—PDS Code 54G—Wright-Patterson/2 wk/MASL D178154—Oct 96

Consists of lectures, discussions, and exercises in three major subject areas:

1. Understanding the nature of operational and contractual reliability and maintainability (R&M) requirements. Includes lessons on developing operational R&M requirements using operational R&M terms, allocating system level requirements, and translating operational R&M to contractural R&M.

2. Designing for R&M. Includes an introduction to handbook design, probabilistic stress-strength analysis, failure modes/effects analysis, diagnostics and human factors, software reliability. Also includes prediction techniques and specific R&M design tools used for electronic and jet engine designs.

3. Testing, screening, and failure analysis. Includes an introduction to reliability growth theory, failure analysis, demonstration testing, and an overview to environmental stress screening theory and policy.

As individual subjects are discussed, various mathematical and statistical tools are introduced as needed. Includes an introduction to probability and statistics and discussions on modeling and allocation techniques. Students are not expected to master these subjects in this short course.

Prerequisites: A technical degree or technical background is necessary. A minimum of 1 year of experience is desired. ECL 80.

WQMT340 (CON 231)--Intermediate Contract Pricing--PDS Code 2M1--Wright-Patterson/2 wk--Apr 95

Reinforces pricing skills taught in CON 104 and develops skills at performing more advanced pricing duties. There are four areas of concentration within the course. Part 1 concentrates on quantitative methods for cost and price analysis. Students are provided MSDOS, public domain software for these methods. Part 2 covers advanced preaward pricing decisions. Student will develop skill at (1) pricing leases, (2) developing prenegotiation positions on proposed indirect rates (with special emphasis on depreciation, G&A, IR&D, B&P, fringe benefits, environmental pools, and uncompensated overtime), and (3) analyzing the cost realism of best and final offers. Part 3 covers post-award pricing decisions. Students will develop skill at (1) estimating cost-to-complete, (2) pricing equitable adjustments (with exercises related to claims and contract modifications), (3) adjusting and applying indirect cost rates (featuring an exercise in quick closeout), and (4) defective pricing.

Prerequisites: Completion of WCON 104 or equivalent. Officers, 1st Lt and above; enlisted personnel, TSgt and above; and civilian personnel, GS-7 and above.

WQMT345—Quantitative Techniques for Cost and Price Analysis (JT)—PDS Code UGH—Wright-Patterson/2 wk 4 days/MASL D178062—Sep 91

Second in the DOD curriculum of courses in cost and price analysis. Oriented to analysts operating either in the comptroller or procurement fields. Provides the journeyman analyst with necessary knowledge for the application of quantitative techniques in the estimating and analyzing of individual elements of cost. Computer programs will be utilized throughout the course to teach and study basic statistics, bivariate linear regression, economic analysis, index numbers, and time series forecasting. Emphasis placed on the application of computer-aided techniques in comprehensive problems and cases. In addition to resident offerings, this course is available in the onsite mode. For information on this mode, see section F.

Prerequisites: Completion of one of the following: WCON104, Principles of Contract Pricing; WQMT 175, Principles of Cost Analysis; ECI 6610—Principles of Contract Pricing; WCON104 (Seminar)—Principles of Contract Pricing; and successful demonstration of basic math skills required by meeting minimum criteria established for Math Screening Evaluation—WQMT345. Students taking this course to satisfy ACE requirements must be level II (see chapter 1, paragraph 1.32). First lieutenants and above, TSgt and above, and civilian personnel in the grade of GS-7 and above. Comptroller Analysts: performing duty in cost estimating and analysis. Procurement Analysts: performing price analysis in negotiated procurements in excess of $100,000. One year of working experience in current field is desirable. Any individual for whom the course will provide essential job-related training is eligible to attend if prerequisites are met or request for waiver is approved.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval controlled by AFIT/LS course director.

WQMT353—Introduction to Life Cycle Costing—PDS Code X8E—Wright-Patterson/2 wk/MASL D178098—Oct 96

Acquaints students from various functional fields (procurement, cost analysis, engineering, logistics, program management) with the fundamental concept of life cycle cost (LCC) as it applies to the acquisition of systems and subsystems. The intent is for students to understand how to use their functional expertise to achieve LCC objectives. Combines formal lecture, discussion, and team problems. Stresses the interdisciplinary nature of LCC analysis as the course examines LCC and the influences of reliability and maintainability, cost-estimating techniques, LCC models, logistics support, and procurement.

Prerequisites: A bachelor's degree in engineering, science, business administration, accounting, economics, or related fields and at least 2 years of experience in an acquisition or logistics function. 1st Lt through colonel, master sergeant through chief master sergeant, or GS-9 through GS-15. Exceptions will be permitted on an individual basis. ECL 80.

WQMT372—Reliability (AF)—PDS Code ENW—Wright-Patterson and onsite/3 wk/MASL D178063—Oct 96

Provides an understanding of the principles and assumptions of reliability and maintainability (R&M) and their affect on life-cycle costs. Provides the skills necessary to employ the techniques of reliability to solve problems and to carry out reliability programs. Includes a study of the statistical distributions used in reliability including the binomial, Poisson, normal, exponential and Weibull; reliability allocation and prediction techniques; test plans, O.C. curves, and the use of military standards; data analysis and the construction and interpretation of confidence intervals; applications of mathematical models; reliability program management; and current problems of reliability. The concepts and philosophy of total quality management and statistical process control are presented to show how they can be used to improve product reliability. The participants spend the last week applying these principles and techniques to life-cycle costing in a reliability management simulation exercise.

Prerequisites: Personnel whose work requires an understanding of the basic concepts of reliability. Officers, master sergeants through senior master sergeants, and GS-7 and above. ECL 80.

Special Requirements: A course in statistics or a working knowledge of algebra equivalent to a semester of college algebra.

WQMT550—Advanced Quantitative Methods for Cost Analysis—PDS Code AJU—Wright-Patterson/2 wk/MASL D178065—Oct 96

Develops the more-advanced skills necessary for analyzing regression statistics from cost-estimating equations. Covers single and multiple input linear ($Y=a+b*X$) relationships and single and multiplicative ($Y=a*X^b$) relationships. Emphasizes evaluating whether the relationship provides accurate cost estimates. Student-solved case problems are used for this purpose to apply the learned techniques.

Prerequisites: Successfully complete WBCE204. Students will need a hand-held calculator with a logarithm function. ECL 80.

WQMT551—Advanced Cost Analysis—PDS Code WW4—Wright-Patterson/3 wk/MASL D178064—Oct 96

Provides extensive application of advanced techniques for estimating costs of acquisition and support of weapon systems as well as developing the judgment necessary for selecting appropriate estimating techniques and correctly interpreting the results. The final course for costing personnel in the DOD cost and price analysis curriculum. Provides the experienced cost analyst with the mathematical and statistical tools necessary to develop cost estimates for weapon systems. Covers estimating the cost of an entire weapon system, forecasting techniques, advanced regression techniques, treatment of uncertainty in cost analysis, forecasting, use of modeling, and estimating operations and support costs.

Prerequisites: Successfully complete WQMT550. Students with exceptional qualifications may submit a request for waiver from WQMT550 requirement. Request must contain a description of student's education and experience. 1st Lt and above or GS-9 and above who are engaged in cost analysis or cost estimating. ECL 80.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval controlled by AFIT/LS course director.

WQMT578—Reliability and Maintainability Research and Applications (AF)—PDS Code 05B—Wright-Patterson/3 wk—AFSC 2891—Mar 90

This course, combined with WQMT 577 and 579, prepares the attendee to carry out the function of a reliability and maintainability (R&M) engineer. Covers government and contractor R&M activities throughout the life cycle of a system, beginning with the development of operational R&M requirements by the using command. Includes material on developing specification requirements from operational requirements, developing statements of work, establishing reliability growth and R&M demonstration plans, environmental stress screening, field R&M data collection and processing systems, and warranties. Various statistical and other mathematical R&M tools are introduced as needed. Students will be assigned homework and will participate in individual and small group exercises.

Prerequisites: An undergraduate degree in engineering or satisfactory completion of WQMT 372 or WQMT 335 is required. Assignment to an R&M engineering or closely related position is also required. Individual not meeting these prerequisites must contact the course director for approval to attend.

WSYS028-VT—Introduction to Configuration Management (AF)—PDS Code 3EL—local site/2.5 days/MASL D178147—Dec 86

Provides an overview of the basic philosophy and practices of configuration management. For personnel involved in the acquisition, support, and (or) operation of Air Force systems, equipment, and computer programs; however, relates primarily to the activities involving configuration management as a part of the acquisition process. Covers the basic policy and procedures of configuration management in DOD directives, Air Force regulations and pamphlets, and in military standards and specifications. Also covers the basic philosophy and tailored application of configuration management through examples of actual program's experiences. Course material is presented on videotape. Presentations are intended to be covered in five 4-hour sessions. The first session provides a general overview of configuration management and the primary documents describing its practice. The succeeding four sessions then look at each of the key areas of configuration management (namely identification, audits, change control, and status accounting) in more detail. Each session includes 1 class hour for group solution of a multiple choice quiz using copies of the primary documents covered in the first session.

Prerequisites: There are no grade level or experience prerequisites for this course. However, it will be more beneficial if the student has had at least 1 month on the job. Prior attendance at a local acquisition process familiarization seminar/course would also be helpful. ECL 80.

Special Requirements: To present this course at a site, a monitor who is a subject-area expert should be in the classroom. It is preferred that the monitor have graduated from the SYS 228 configuration management course. Monitor will be responsible for answering student questions, for interfacing with AFIT on student rosters, and for submitting course material for grading.

Admin Instructions: The site monitor with the local training office reviews and approves student applications.

WSYS100E—Equivalency Examination for WSYS100—PDS Code 3KV—various locations/.5 day—Sep 83

This is an equivalency examination for WSYS 100, Introduction to Acquisition Management. It is intended for persons who have not had the opportunity to attend WSYS 100 at the appropriate time, but need credit for WSYS 100 as a prerequisite for upgrade or other AFIT courses.

Prerequisites: Same as WSYS 100. In addition, it is desirable that applicant have at least 1 year of acquisition experience.

Admin Instructions: Registration for this course is handled the same as any other ECI managed course. The ECI course identifier is 00100S. The only course material is the examination. It will be mailed to the appropriate test control officer for administration. ECI will grade tests and issue grade reports and certificates.

WSYS111—Operational Requirements Process—PDS Code V1V—Wright-Patterson/4.5 days—Jun 94

Provides an overview to the DoD operational requirements process and its interface between the acquisition system and planning, programming, and budgeting system (PPBS). Designed to meet the introductory needs of personnel in the operating commands (MAJCOMs) who are responsible for preparing mission need statements (MNS), operational requirements documents (ORD), cost and operational effectiveness analysis (COEA) and associated requirements-related documents and processes. Covers the necessary coordination of these documents with acquisition's premilestone I activities and the requirements evolution and operational testing required in later phases of acquisition. Builds on the joint and Air Force planning processes that include defense planning guidance, strategy-to-task assessments, mission area assessments, mission needs analysis, threat analysis, and other planning functions described in DoDI 5000.2 and AFPD 10-6.

Prerequisites: MAJCOM/FOAs action officers (AO) assigned to requirements offices, AFMC staff and field development planners, AFOTEC AOs, and Air Staff and SAF level (requirements-related) AOs. The targeted grade structure is E-7 to E-9, O-1 to O-5, and GS-9 to GS/GM-14. Exceptions should be coordinated through the AFIT course director in advance.

Special Requirements: Curriculum includes access to secret documents. Verification of security clearance for each student is required at onset of each class.

WSYS150—Engineering Data Management (AF)—PDS Code

9AG—Wright-Patterson/2 wk—Dec 86

Teaches the management concepts which underlie the acquisition of engineering data. Management responsibilities of the engineering data management officer (EDMO) is the primary theme. Outlines the processes involved in the identification, acquisition, and management of engineering data for use in spare parts and component acquisition. An overview of engineering data management discusses the types and uses of engineering data, the governing policies and regulations, and the acquisition process. The process for acquiring engineering data is conceptualized and dissected via specific treatment of the role and responsibilities of the EDMO, early program acquisition phase activities, production phase activities, and the contracting process for identification and procurement of engineering data. Special issues affecting this acquisition process are also explored. Among these issues are spare parts acquisition, data rights, contractor overpricing, and AFSC/AFLC disparities in the engineering data management process. The sole objective of this course is to educate on the engineering data acquisition and management process. It does not attempt to provide a checklist approach to the EDMO function and is not designed as a technical training course in engineering drawing or the analysis thereof.

Prerequisites: Applicants must be military officers, NCOs TSgt through CMSgt, or civilians GS-7 and above. Priority should be given to Air Force EDMOs, for whom this course was primarily designed. As space is available, those personnel who manage or support the EDMO function in the engineering data acquisition process may also apply.

Selection Procedures: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training officer. Final review and selection approval controlled by AFIT/LS course director.

WSYS227—Financial Management in Major Weapon Systems Acquisition—AFIT/LS, Wright-Patterson—PDS Code UGJ—2 wk/MASL D178127—Oct 96

An introduction to financial management and the responsibilities of financial managers in dealing with the unique problems associated with the development and production of major weapon systems. Relates financial management functions to the specific activities of the financial manager in a systems program control office. Discusses and applies the tools and techniques of cost control and funds control to show their relationship in achievement of effective financial management. Uses cases and computer exercises to augment lecture and seminar instruction. Students are required to do considerable outside work.

Prerequisites: Recommended for 1st Lt and above and GS-7 and above in career series 343, 501, 510, 560, or 1515. Working knowledge of simple algebra, minimum 6-month staff or systems program directorate experience in financial activities associated with acquisition of major weapon systems.

WSYS228—Applied Configuration Management (AF)—PDS Code VG6—Wright-Patterson/1 wk 4 days/MASL D178093—Dec 89

Enhances the management effectiveness of personnel assigned to, or working directly in support of, the configuration management function in a system program office. Provides students with details of principles and techniques of configuration management, enabling them to simulate configuration management events and documentation. The events covered by the simulations relate to the development and acquisition of items. Actual program documentation (such as the contract, statement of work, contract data requirements list and specifications) are used to involve the students in the simulation problems. Problems include the drafting of a statement of work for a new contract, reviewing specifications before authentication, conducting a combined functional and physical configuration audit, and processing an engineering change proposal through a change control board.

Prerequisites: Applicants should either have a responsible configuration management position, have a management position where configuration management is directly involved, or be in training for a responsible configuration management position. Persons nominated should have demonstrated a potential for managerial development. At least 4 months of system program office experience is required. Logistics command personnel directly involved with systems/items under development will also be considered. Second lieutenants through lieutenant colonels and GS-7 through GS/GM-14 are eligible. Requests for grade and position waivers will be considered. NOTE: Applicants must have successfully completed course WSYS028 (or an AFIT-sponsored configuration management seminar). The course prerequisite will not be waived, although an equivalency exam is available. ECL 80.

Admin Instructions: The site monitor for configuration management should not be allowed to proceed without formal AFIT approval.

WSYS230—Air Force Technical Order Acquisition and Management—PDS Code 4Z0—Wright-Patterson/2 wk—Mar 86

Teaches the concept and management of the USAF Technical Order System in accordance with Air Force policies as primarily related to acquisition. Air Force policies and responsibilities will be discussed in relation to the preparation, review, acceptance, and dissemination of technical orders (TOs). The course is oriented towards personnel who are assigned to a MAJCOM, ALC, AFALC, System Program Office/Project Office and who are responsible for acquisition and management of Air Force TOs. The course will develop the TO acquisition concept from its inception and discuss the various types of TOs, role of the major Air Force commands in implementing an effective TO system, industry's role in preparation of TOs, validation and verification of TOs, and the numerous other actions necessary to insure that TOs are available to Air Force users on a timely basis. It is important to understand this is not a course in how to set up and maintain a TO library.

Prerequisites: Students should have an actual or anticipated assignment to a responsible position in MAJCOM, ALC, AFALC, System Program Office/Project Office, or in support of activities for managing the acquisition of TOs. Nominees should have demonstrated potential for managerial development and have a basic understanding of the Air Force Technical Order System. Preference is given to civilians GS-7 to GS-12; military, 1st Lt through Maj and TSgt through CMSgt.

Admin Instructions: Initial review of application (DD Form 1556) and student selection will be done by MAJCOM/DP or appropriate training officer. Final review and selection approval will be done by AFIT/LS course director. Students should only report if they receive specific notification from AFIT.

Course Credit: Effective FY 84 students that successfully complete the course will receive two undergraduate credit hours.

WSYS361—Surveillance of Cost/Schedule Control Systems Criteria (C/SCSC)—PDS Code QNP—AFIT/LS, Wright-Patterson/2 wk/MASL D178174—Oct 96

Increases the effectiveness of surveillance team members at surveillance offices. Focuses on the intent of the C/SCSC, the interrelationship of the criteria and contractor management systems, validation and surveillance functions in program visits as well as joint/contractor government and system surveillance reviews, and report surveillance and analysis methodology for use in system data analysis. Teaches the concept of performance measurement and the intent of the C/SCSC. Discusses in detail the role of the surveillance office in accomplishing system surveillance. Central issue is the methodology for surveilling management system compliance with the C/SCSC. Heavy emphasis on understanding contract management-systems-generated data reports. Analysis methods, forecasting techniques, and presentation models are taught for this purpose. Includes C/SCSC system description review exercises and data analysis case studies.

Prerequisites: Officers and GS-9 or above. ECL 80. Open to contractors and international students. Structured primarily for surveillance personnel whose duty includes responsibility as a C/SCSC surveillance monitor or surveillance team member. Program personnel with C/SCSC validation review or data analysis responsibility will also benefit from this course. Students who have previously completed WSYS362 should not apply. The criteria concepts taught in WSYS361 are sufficiently addressed in WSYS362. Before attending class, students should familiarize themselves with the DoD 5000-series publications, the DoD Joint Implementation Guide, and a contractor system description, as appropriate. Students should bring portable calculators to class. This course is offered at AFIT and on site. Tailored versions are available.

Selection Procedures: Review of applications (DD Form 1556) and student selection is performed by the student's training office. The AFIT/LS course director controls the final selection.

WSYS362—Cost Schedule Control Systems Criteria—PDS Code 22H—AFIT/LS, Wright-Patterson/3 wk/MASL D178156—Oct 96

Enhances DoD personnel understanding of performance measurement concepts relative to contractor management systems. Covers the intent of the C/SCSC, the interrelationship of the criteria and contractor management systems, the validation and surveillance functions to enable participation in C/SCSC reviews, and the application of data emanating from contractor management systems for internal government program management use. Provides students with an understanding of the C/SCSC and the evaluation and surveillance techniques applied to contractor-initiated performance measurement systems. Discusses in detail the role of the program office in validating contractor management systems including post-implementation and the use of both monitoring and analysis techniques. Focuses on the indepth understanding of the C/SCSC and the interrelationship with contractor management systems. Emphasizes how to review contractor management systems to determine compliance with the criteria and the validity of the data emanating from these systems. Includes a continuing system description exercise and case studies designed to promote a thorough understanding of how management systems relate to performance measurement, data analysis, and contractor status reporting.

Prerequisites: Officers and GS-9 and above. Open to contractors and international students who willl be using, evaluating, or surveilling contractor management systems. Potential students should be in a C/SCSC assignment or have validation review and data analysis responsibilities. Students should be familiar with the DoD 5000-series publications, the Joint Implementation Guide, and a contractor system description, as appropriate. Students should bring portable calculators to this course. This course is offered in residence at AFIT and on site. Tailored versions are available. ECL 80.

Selection Procedures: The student's training office reviews the application (DD Form 1556) and selects students. AFIT/LS course director controls the final selection.

WSYS363—Basic Analysis of Performance Measurement Data—PDS Code 24X—AFIT/LS, Wright-Patterson and onsite/1 wk/MASL D178192—Oct 96

Provides program office, functional, and support personnel with the basic methodologies for analyzing contractor-submitted performance measurement data as reflected on the cost performance report (CPR) and the cost/schedule status report (C/SSR) or tailored format. Covers the concept and basic mechanisms for measuring performance, how the CPR and C/SSR portray performance measurement data, the basic techniques for analyzing contracting performance and representing program status, and how to forecast impact of performance by generating revised estimates for management.

Consists of lectures, discussions, and individual and group exercises in three areas. The "basic concept" area includes presentations on the performance measurement baseline and the mechanisms for measuring performance to this baseline. The "reports" area includes presentations on the performance data reflected on the CPR and C/SSR. Case exercises are employed to give students practice in extracting meaningful information from the performance measurement reports. The "measuring performance" area includes presentations on basic analytical methods and status presentation techniques; data interpretation and the potential for data distortion is also taught. The third area also teaches forecasting techniques. A group exercise requires students to analyze contractor forecasts and to generate estimates at completion. NOTE: This course does not include a discussion of the cost/schedule control system criteria. This class is offered at AFIT and on site. A tailored version is available.

Prerequisites: Officers, technical sergeant through chief master sergeant, and GS-7 or higher whose duties include analyzing CPRs or C/SSRs. Students should have a mathematical understanding of algebra and simple graphing methodology. Students who have previously completed WSYS361 or WSYS362 should not apply. The concepts taught in WSYS363 are also taught in each of the courses. This course is intended to aid those who must work with CPRs or C/SSRs or both but who do not get involved with the contractor management systems generating these reports. ECL 80.

Special Requirements: Students should bring a portable calculator to class.

Selection Procedures: Review of applications (DD Form 1556) and student selection is performed by the student's training office.

WSYS370—Defense Data Management (JT)—PDS Code EAY—Wright-Patterson/1 wk 4 days/MASL DL178057—Jun 90

Provides an overview of the acquisition of contractually required deliveries of recorded technical and management information (data) from defense contractors for all phases of acquisition. Emphasizes the changing nature of the data management (DM) career and DM environment by highlighting the transition from ordering paper and microfilm (non-digitized) to ordering (digitized) data and databases. Covers management of data contractually acquired from industry via the DD Form 1423, Contract Data Requirements List (CDRL), and use of the Acquisition Management Systems and Data Requirements

Control List (AMSDL) as regulated by the P.L. 96-511, Paperwork Reduction Act. Linkage of the CDRL to the statement of work (SOW) is demonstrated and analyzed. Coverage of data-related areas includes planning for and issuing the data call, holding a data reqirements review board (DRRB), contracting for data, managing data flows (paper and electronic), using the data rights list, and study of data clauses in the Federal Acquisition Regulations. High visibility, historically expensive data areas covered from the data manager's perspective are: technical manuals, engineering drawings, software documentation, integrated logistics databases, and configuration management data.

Prerequisites: Personnel assigned as data management officers, data managers, data specialists, and data assistants are given primary consideration for attending this course. (Essential in the career development of a fully qualified data manager.) Grade levels: All commissioned officers, master sergeant through chief master sergeant, and civilians GS-9 and above. (Requests for waiver of grade will be considered on an individual basis by the AFIT/LS Course Director) also, DOD contractor personnel involved in data management aspects of a DOD contract are authorized to attend this course on a space-available, paid-fee basis upon recommendation of their Administrative Contracting Officer (ACO) and approval by AFIT/XPO. (See paragraph 1.51 of this catalog.) ECL 80.

Selection Procedures: DOD students: Initial review of application (DD Form 1556) and student selection performed by MAJCOM/DP or appropriate training office. Final review and selection approval controlled by AFIT/LS course director.

WSYS400/WSYS400-0—Advanced Program Management (AF)—PDS Code 2RZ—Wright-Patterson/2 wk—Jun 90

Prepares people who are experienced in acquisition management, either as a project manager or functional support specialist, for new responsibilities in program management. SYS 400 is for senior captains and field grade officers, and civilian equivalents performing as program managers in an Air Force systems acquisition program office. Enables people experienced in acquisition management and just stepping into a leadership position to understand their role as a middle manager and apply problem-solving and decision-making techniques to acquisition management problems. Discussion of a systems review of management, the human element of project management, organizing and building a project team, and developing a program strategy are used to clarify the individual's management role. Case studies and group exercises aid in concept application.

Prerequisites: Satisfactory completion of SYS 200, or Systems Acquisition School (SAS) 006, or DSMC Business Management Course, or DSMC Management of Systems Acquisition Process Course, or certified at Level II under the Air Force Acquisition Manager Career Development Program. An Air Force officer, captain and above, or Air Force civilian, GS-9 and above with at least 8 years of active Air Force duty; or an Air Force captain or Air Force civilian, GS-12, with 6 years of acquisition experience, and minimum of 2 years of experience following completion of SAF 006, SYS 200, or equivalent DSMC specialty course. Assigned as a middle manager in an Air Force program office, functional support office, or staff position where interaction with a program office is required, or a duty AFSC of 26XX-28XX, 49XX, 65XX-67XX, 99501 or civilian equivalent. At least 2 years of acquisition experience following completion of the course prerequisite of level II certification. Bachelor's degree.

Selection Procedures: Student nomination and initial review of application and applicant's records for prerequisites performed by MAJCOM/DP or appropriate training office. Final review and selection by AFIT/LS course director.

SAS002—Computer Resources Acquisition Course (CRAC)—PDS Code 8B3—Brooks/2 wk—Oct 96

Provides students with an understanding of the policies, procedures, and problems of acquiring mission-critical computer resources. Mission-critical is defined as those resources that are critical to the acquisition, training, use, and maintenance of defense systems; it does not include automatic data processing equipment such as that used by personnel, finance, supply, etc. Through student exercises and lectures, the student is exposed to software acquisition management as it relates to the phases of the system life cycle. The course generally follows the system life cycle focused on the contracting process and software acquisition management. Additional special topics include such areas as DOD-STD-2167A, software reuse, software quality program, configuration management, and Ada. Various exercises give students experience with reviewing management plans, tailoring specifications, management reviews, cost estimating, contract types, and configuration management.

Prerequisites: Course is structured for personnel currently involved in the acquisition of mission-critical computer resources. Individuals should be noncommissioned officers in grades SSgt through CMSgt, officers in the grades of 2d Lt through colonel, and civilians GS-7 and above who occupy or have been selected to occupy positions directly involved in the acquisition of mission-critical computer resources. Individuals must have successfully completed ACQ101, Fundamentals of Systems Acquisition Management. Primary selectees should be working in AFSC 61SXA, 62EXC, or hold an AFSC 61SXXX, 63AXX, 62EXX, or 33SXX. WSYS212 is not equivalent to this course.

Selection Procedures: Student quotas will be provided by the Systems Acquisition School, 7903 Lindbergh Dr, Brooks AFB TX 78235-5333. Selection of students is the responsibility of the sending organization.

Funding: Funding to attend this course is the responsibility of the sending organization.

Additional Information: Upon arrival, students will report to the Brooks AFB billeting office, Bldg 214, for assignment to quarters. Reservations are held until 1700 the day before class start date unless the student makes arrangements directly with billeting for a later arrival. All TDY students must notify Brooks AFB billeting at DSN 240-1844 or (210) 536-1844 of any room cancellation or nonuse of a room. On the first day of class, students must report to Bldg 558, Systems Acquisition School, at 0745. Students will be dismissed not earlier than 1200 on the last day of class. Military students are required to wear the light blue, short or long sleeve shirt for the classroom. Civilian attendees should wear appropriate business attire. Please see your local training monitor for additional information and for a copy of the SAS Student Handbook.

Quota Control: Systems Acquisition School, Brooks AFB TX 78235-5333.

SAS010—Laboratory Acquisition Management Course—PDS Code VWV—Brooks/2 wk—Oct 96

Provides students with an orientation to acquisition and project management as practiced at Air Force laboratories. Lecture and group exercises are used to provide the student with an understanding of laboratory funding, planning, contracting, management, and reporting processes at the working level.

Prerequisites: Designed for the student who is newly assigned to the

laboratory, 2d Lt through Capt or GS-7 through GS-11 level, working in AFSCs 61SX, 62EX, or 63AX. Other AFSCs may attend as required. Completion of an initial acquisition course is strongly recommended. The course is not considered equivalent to APDP-required courses.

Selection Procedures: Student quotas will be provided by the Systems Acquisition School, 7903 Lindbergh Drive, Brooks AFB TX 78235-5333. Selection of students is the responsibility of the sending organization.

Funding: Funding to attend this course is the responsibility of the sending organization.

Additional Information: Upon arrival, students will report by telephone or in person to the Brooks billeting office, Bldg 214, for assignment to quarters. Reservations are held until 1700 the day before class start date unless the student makes arrangements directly with billeting for a later arrival. TDY students must notify Brooks AFB billeting, DSN 240-1844 or (210) 536-1844, of any room cancellation or nonuse of a room. On the first day of class, students will report to Bldg 558, Systems Acquisition School, at 0745. Students will be dismissed by 1200 on the last day of class. Military students are required to wear the light blue, short or long sleeve shirt for the classroom. Civilian attendees should wear appropriate business attire.

Quota Control: Systems Acquisition School, Brooks AFB TX 78235-5333.

SAS011—Integrated Product Support Course (IPSC)—PDS Code XW4—Brooks/2 wk—Oct 96

Provides students with insight to plan and manage support for fielded military systems. Designed for mid-level managers who work for the military system Single Manager (System Program Director/Product Group Manager/Materiel Group Manager and associated System Support Manager/Development System Manager). Looks at all aspects of the product's life cycle and serves as a bridge between acquisition and sustainment activities at product centers and logistics centers. The course explores the customer/partner interface in the Integrated Weapon System Management environment, life cycle logistics planning, maintaining customer's readiness and sustainment, and other logistics challenges. We encourage Integrated Product Team members under a Single Manager and associated System Support Manager to attend the same course offering.

Prerequisites: The IPSC is structured for AFMC personnel, TSgt to CMSgt, Captain and above, and civilians GS-12 and above. Although not required, understanding of basic acquisition is very desirable.

Selection Procedures: Student quotas will be provided by the Systems Acquisition School, 7903 Lindbergh Dr, Brooks AFB TX 78235-5333. Selection of students is the responsibility of the sending organization.

Funding: This course is centrally funded. Confirmed students must contact base-level training monitor for fund cite information. Students must bring three copies of travel orders and copy of travel itinerary for registration purposes.

Additional Information: Upon arrival, students will report to the Brooks AFB billeting office, Bldg 214, for assignment to quarters. Reservations are held until 1700 the day before class start date unless student makes arrangements directly with billeting at DSN 240-1844 or (210) 536-1844 of any room cancellations or nonuse of a room. Daily ground transportation only to and from class and the lodging facility will be provided by the School. On the first day of class, students must report to Bldg 558, Systems Acquisition School, at 0745. Students will be dismissed not earlier than 1200 on the last day of class. Military students are required to wear the light blue short or long sleeve shirt for the classroom. Civilian attendees should wear appropriate business attire. See your local training monitor for additional information and for a copy of the SAS Student Handbook.

Quota Control: Systems Acquisition School, Brooks AFB TX 78235-5333.

SAS013—Risk Management Course—PDS Code X47—Brooks/1 wk—Oct 96

Provides students with the policies, concepts, tools, and techniques to assess and manage risks associated with systems acquisition and sustainment management. Designed for personnel in decision-making positions in all functional areas. Topics covered include the Risk Management Process, policies, procedures, and risks in each functional area. Provides tools and techniques to identify, assess, analyze, and abate risks. Students are required to perform analyses as part of course exercises.

Prerequisites: Designed for personnel in all functional disciplines (program management, engineering, manufacturing, logistics, contracting, financial management, software management, configuration management, etc.). The course is open to Air Force officers (typically capt and above), civilians (typically GS-11 and above), and noncommissioned officers (typically MSgt and above).

Selection Procedures: Student quotas will be provided to MAJCOMs by the Systems Acquisition School, 7903 Lindbergh Drive, Brooks AFB TX 78235-5333. Selection of the students is the responsibility of the sending organization.

Funding: This course is centrally funded. Confirmed students must contact base-level training monitor for fund cite information. Students must bring three copies of travel orders and a copy of travel itinerary for registation purposes.

Additional Information: Upon arrival, students will report to the Brooks AFB billeting office, Bldg 214, for assignment to quarters. Reservations are held until 1700 the day before class start date unless the student makes arrangements directly with Billeting for a later arrival. All TDY students must notify Brooks AFB billeting at DSN 240-1844 or (210) 536-1844 of any room cancellations or nonuse of a room. On the first day of class, students must report to Bldg 558 at 0745. Students will be dismissed by 1200 on the last day of class. Military students are required to wear the light blue, short or long sleeve shirt. Civilian students should wear appropriate business attire. See your local training monitor for additional information and for a copy of the SAS Student Handbook.

Quota Control: Systems Acquisition School, Brooks AFB TX 72835.

SAS014—AFMC/DCMC Teaming for Product Management—PDS Code 1QI—Brooks/2-3 days—Oct 96

Designed for mid-level to senior managers occupying responsible functional and leadership positions and others requiring regular contact with Defense Contract Management Command (DCMC). Important areas of product management as well as preaward and postaward contract management processes will be examined. Exposes student to the organization, initiatives, operating policies, and procedures used by DCMC for the administration of contracts and the support of programs at the contractor's facility. Emphasizes the concept of DCMC as an "agent" of the contracting officer and program manager and the need to create a complementary operating

environment to foster efficient use of resources without duplication of effort. Includes at the survey level an examination of various oversight functions that are executed by DCMC and the roles and responsibilities of both DCMC personnel and Air Force program and contract managers. Reviews key elements of postaward contract management such as technical support, engineering surveillance, contract changes, financial oversight, field pricing, subcontract management, government property, contract closeout, and other product management functions. Course to be supported by guest instructors and speakers from DCMC's field and staff offices as well as industry representatives.

Prerequisites: APDP Level 1 certification in at least one functional area. Capt and above, civilians in the grades of GS-12 and above.

Selection Procedures: Student quotas will be provided by the Systems Acquisition School, 7903 Lindbergh Dr, Brooks AFB TX 78235-5333. Selection of students is the responsibility of the sending organization.

Funding: This course is centrally funded. Confirmed students must contact base-level training monitor for fund cite information. Students must bring three copies of travel orders and a copy of travel itinerary for registration purposes.

Admin Instructions: Upon arrival, students will report to the Brooks AFB billeting office, Bldg 214, for assignment to quarters. Reservations are held until 1700 the day before class start date unless student makes arrangements directly with billeting at DSN 240-1844 or (210) 536-1844 of any room cancellations or nonuse of a room. On the first day of class, students must report to Systems Acquisition School, Bldg 558, at 0745. Students will be dismissed by 1200 on the last day of class. Military students are required to wear the light blue, short or long sleeve shirt for the classroom. Civilian attendees should wear appropriate business attire. Please see your local training monitor for additional information and for a copy of the SAS Student Handbook.

SASW01—Conflict Resolution for Acquisition Managers—PDS Code 7BC—various locations/2 days—Oct 96

Provides participants a forum for awareness and understanding of the interaction between acquisition managers, including program, finance, and project and contract managers. Themes are cooperation through conflict resolution, group dynamics, establishing communication within integrated product teams and team building for group unity.

Prerequisites: Personnel with 1 year of acquisition experience in present position. Individuals should be in the grades of 1st Lt and above, noncommissioned officers, SSgt and above, or civilians, GS-9 and above. Individuals must have successfully completed ACQ 101, SYS100, or an equivalent entry level course.

Selection Procedures: Student quotas will be provided by the Systems Acquisition School, 7903 Lindbergh Drive, Brooks AFB TX 78235-5333. Selection of students is the responsibility of the sending organization.

Additional Information: This workshop is centrally funded and will be conducted on location.

Quota Control: Systems Acquisition School, Brooks AFB TX 78235-5333.

SAS15/SAS015(DL)—Acquisition Excellence Course—PDS Code 20Y—host site/various locations/1 wk—Oct 96

Comprehensive program designed to enhance and keep the acquisition workforce as current as possible in light of initiatives relative to acquisition reform. Focuses on more in-depth knowledge for the larger segment of personnel who have already attended current acquisition courses. Also be taught by satellite broadcast (distance learning) to various locations.

Prerequisites: All students are required to have APDP level 2 certification in any of the career fields.

Selection Procedures: Student quotas will be provided to organizations by the Systems Acquisition School, 7903 Lindbergh Drive, Brooks AFB TX 78235-5333.

Funding: Funding to attend this course is the responsibility of the sending organization.

Additional Information: Upon arrival, students will report to the Brooks AFB billeting office, Bldg 214, for assignment to quarters or directly to the assigned lodging facility. Reservations are held until 1700 hours the day before class start date unless the student makes arrangements directly with billeting for later arrival. All TDY students must notify Brooks AFB billeting at DSN 240-1844 or (210) 536-1844 of any room cancellations or nonuse of a room. On the first day of class, students must report to Bldg 558, Systems Acquisition School, at 0745. Students will be dismissed by 1200 on the last day of class. Military students are required to wear light blue short- or long-sleeved shirt for the classroom. Civilian attendees should wear appropriate business attire.

Quota Control: Systems Acquisition School, Brooks AFB TX 78235-5333.

WTST101—Introduction to Acquisition Workforce Test and Evaluation—PDS Code 3C0—Wright-Patterson/1 wk—Oct 96

Emphasizes the basic test and evaluation management and engineering principles, policies, and practices used by DoD. Emphasizes the unique role of test and evaluation as a feedback mechanism for systems engineering during all phases of the system life cycle. Introduces students to the special relationship between test and evaluation and the interfacing disciplines of systems engineering, program management, logistics support, and production and manufacturing. Faculty and guest speakers will present lectures, case studies, and class exercises that examine the roles of government and industry organizations in test and evaluation management. Common tools used in test and evaluation include detailed test plan, test and evaluation master plan, test reports, and test plan working groups. The many types of tests covered include developmental testing, operational testing, live fire testing, qualification testing, and production acceptance testing. A primary objective of this course is to enhance the ability of junior test and evaluation professionals to interact with program managers and to function effectively within the acquisition process.

Prerequisites: Acquistion workforce professionals (2d Lt through captain and GS-5 through GS-9). Successfully complete WACQ101.

M3ABR5R031—Chaplain Service Support Apprentice Course—PDS Code AF1—DOD 561—Maxwell/5 wk 3 days/AFSC 5R031—Apr 95

Training for military personnel to perform duties prescribed in AFMAN 36-2108 (formerly AFR 39-1) for chaplain service support apprentice, AFSC 5R031. Includes career field structure, duties and responsibilities; introduction to world religions, concepts of religious pluralism and faith group requirements, requirements for worship and religious observances; support ot laity programs, religious education, and visitation ministries; principles of interpersonal

relationships and related software; chapel budgeting process and chaplain fund accounting procedures; readiness and chaplain readiness team support.

Prerequisites: Pipeline from Basic Military Training, Lackland AFB TX. Otherwise, certification is required by senior chaplain and NCO that individual possesses the necessary sensitivities to religious convictions to serve in the Air Force Chaplain Service. Personnel who have completed E3ABR70130 000 or E3ABR89330 000 are ineligible to attend. Refer to table 4.3 for reporting instructions.

Quota Control: HQ USAF/HC.

M3ACR5R071—Chaplain Service Support Craftsman Course—PDS Code T97—DOD 561—Maxwell/4 wk—Apr 96

Education in advanced concepts of support for chaplain service ministries. Training for military personnel to perform duties prescribed in AFMAN 36-2108 for chaplain service support craftsman, AFSC 5R071. Training includes career field duties and responsibilities; support for counseling and visitation ministries; managing support of chapel program special projects; training and advising laity; developing statistical data and unit self-inspection programs; readiness and chaplain readiness team support, including operations, assessments, and developing religious program support plans chapel resource management, including budget, supply and equipment process, manpower requirements, and reserve component support.

Prerequisites: Minimum grade of staff sergeant with 18 months in grade. Must have completed 89370 or 5R071 career development course prior to attendance.

Quota Control: HQ USAF/HC.

Chapter 5

GRADUATE MEDICAL EDUCATION PROGRAMS

(OPR: HQ AFPC/DPMMUE)

Command OPR. HQ AFPC/DPMMUE is the OPR for graduate medical education programs in AFCAT 36-2223. Requests for new course announcements, changes, or revisions must be prepared according to paragraph 1.10 and sent to HQ AFPC/DPMMUE for required processing.

Section A—Procedures and Instructions

5.1. Applicability of This Chapter. This chapter applies to active duty medical service officers and to participants in the following medical and osteopathic programs:

5.1.1. Armed Forces Health Professions Scholarship Program (AFI 41-110, *Medical School and Medical Program Application Procedures* [formerly AFR 36-17]).

5.1.2. Uniformed Services University of Health Sciences (USUHS) (AFI 41-110 [formerly AFP 36-24]).

5.1.3. Civilians volunteering for extended active duty (AFI 36-2008, *Voluntary Entry on Extended Active Duty (EAD) of Commissioned Officers* [formerly AFR 45-26]).

5.1.4. AFROTC education delay students (AFI 36-2009, *Delay in Active Duty for AFROTC Graduates* [formerly AFR 45-31]).

5.2. Requirements for Entry:

5.2.1. **General Procedures**. Air Force physicians may compete each year for graduate medical education (GME) programs in both military and civilian teaching facilities to meet Air Force needs. Priority is given to programs in USAF teaching facilities. Normally, medical programs in civilian medical institutions are approved only after openings in USAF teaching programs are filled and when such training is not available at another uniformed services training facility. Civilian sponsorship is normally limited to the Continental United States. Air Force needs determine the specialties in which training will be sponsored. While every consideration will be given to the desires of the individual, selection is based on the needs of the Air Force. Physicians selected for sponsorship after the first year of GME can complete their specialty program providing their progress is satisfactory. Normally, sponsorship is limited to the minimum time required by the specialty board for board eligibility.

5.2.2. **Second Residencies**. Personnel who have completed a US Government sponsored program of GME may not take part in a second program unless a need exists in the Air Force for the specialty desired which exceeds the requirement for the specialty already held or when the second program adds to the previous program. In addition, training must be done at an Air Force facility unless no such training is offered for the needed specialization. The following specific requirements, also applicable, may be waived depending on Air Force requirements:

5.2.2.1. Applicant should have no more than 12 years of total active Federal military service creditable for retirement at the beginning of training period.

5.2.2.2. Applicant should be in the grade of lieutenant colonel or below at the time of entering training.

5.2.2.3. Applicant must not be in the payback period resulting from previous GME.

5.2.2.4. Applicant must have a minimum of 5 years of practice experience and be board certified in his or her initial specialty before being considered for a second residency.

5.2.3. **Fellowship Training**:

5.2.3.1. Physicians applying for fellowships, who have completed basic residency training more than 3 years prior to application, are required to be board certified in their basic specialty.

5.2.3.2. Active duty and deferred physicians may apply for preselection 2 years in advance of starting fellowship training (if no Air Force program exists) due to the early selection process in many civilian programs. Preselections are subject to confirmation by the Physician Forecast Board.

5.2.4. **Senior Fellowships**. Air Force physicians may compete each year for a limited number of 1-year senior fellowships. These programs will be in civilian institutions. Purpose is to give Air Force medical teachers a chance to learn the latest developments in their areas of expertise and to bring this new information back into Air Force medical programs. To be eligible, officers must apply to the GME selection board as shown in paragraph 5.4. In addition, this application requires the MAJCOM surgeon's indorsement. Further, applicants must have been out of training for at least 6 years, be teaching in an Air Force medical training program, and be able to show that this training is beneficial to the Air Force. At the end of training, in most cases, officers will be returned to their previous assignments.

5.2.5. **International Students**. International medical graduates are ineligible to apply for residencies or fellowships.

5.3. Programs Available. All Air Force residencies and fellowships are Accreditation Council for Graduate Medical Education (ACGME) approved training programs. Air Force family practice and transitional year programs may also meet requirements of the American Osteopathic Association (AOA). Osteopaths participating in DOD or civilian allopathic programs must coordinate with the program director and get AOA approval before entry, if desired.

5.3.1. **59 Medical Wing/ET, Lackland AFB TX**. Wilford Hall Medical Center, Lackland AFB TX 78236, offers residencies in transitional year, allergy, anesthesiology, dermatology, neurology, ophthalmology, orthopedic surgery, otolaryngology, pathology, pediatrics, psychiatry, general surgery, urology, internal medicine, obstetrics and gynecology, radiology, nuclear medicine, and emergency medicine. Fellowships and subspecialty training are offered in cardiovascular disease, endocrinology and metabolism, gastroenterology, hematology, infectious diseases, neonatology, pulmonary disease, renal disease, cytology, radiology special procedures, rheumatology, and plastic surgery.

5.3.2. **60 Medical Group**. 60 Medical Group, Travis AFB CA 94535, offers residencies in family practice, transitional year, surgery, internal medicine, obstetrics and gynecology, pediatrics, and radiology. A fellowship in magnetic resonance imaging is offered.

5.3.3. **81 Medical Group.** 81 Medical Grooup, Keesler AFB MS 39534. Residencies are available in surgery, internal medicine,

obstetrics and gynecology, and pediatrics, and additional training in thoracic surgery.

5.3.4. **89 Medical Group.** 89 Medical Group, Andrews AFB, Washington DC 20331, offers residencies in family practice and transitional year.

5.3.5. **375 Medical Group.** 375 Medical Group, Scott AFB IL 62225, offers residencies in family practice and transitional year.

5.3.6. **645 Medical Group.** 645 Medical Group, Wright-Patterson AFB OH 45433, offers residencies in pediatrics, internal medicine, surgery, OB/GYN, psychiatry, and emergency medicine.

5.3.7. **School of Aerospace Medicine**. School of Aerospace Medicine, Brooks AFB TX 78235, offers a residency in aerospace medicine and a fellowship in hyperbaric medicine.

5.3.8. **646 Medical Group.** 646 Medical Group, Eglin AFB FL 32542, offers an integrated residency in family practice.

5.3.9. **55 Medical Group.** 55 Medical Group, Offutt AFB NE 68113, offers an integrated residency in family practice starting at PG-1 and PG-2 levels.

5.3.10. **Armed Forces Institute of Pathology (AFIP)**. Armed Forces Institute of Pathology (AFIP), Washington DC 20306 serves as the central laboratory for DOD and other federal agencies. Fellowship training for 1 year is available to Air Force physicians in the pathological aspects of several specialties. Applicants must be certified by the American specialty board of the specialty in which training is requested. Specific information may be obtained from AFIP.

5.3.11. **Civilian Institutions**. The Air Force sponsors physicians in approved residencies and fellowships in civilian institutions as shown in paragraph 5.2. Applicants for civilian programs must obtain the appointment and furnish a copy of the letter of acceptance and a detailed outline of the program by year. Any rotations away from the primary training facility must be identified. Programs with rotations away from the primary institution which require extensive TDY or PCS expenditures will not be favorably considered. Failure to accurately identify rotations for board consideration may result in denial of the selection. Physicians selected for civilian programs are assigned to the Air Force Institute of Technology (AFIT) with permanent duty station at the institution where the program is conducted.

5.3.12. **Redeferment**. The redeferment program allows physicians the opportunity to be released from active duty to pursue specialty training and then return to active duty to complete a service obligation. The program is intended to allow physicians to complete residencies and fellowships in selected specialties for which the Air Force has no available man-years for sponsorship. The program guidelines are as follows:

5.3.12.1. Application will be submitted using the GME application booklet published by AFPC/DPMMUE. The GME selection board will approve/disapprove all requests. If approval is granted, the physician will be provided instructions to apply for separation, including a “Statement of Understanding” which must accompany the separation application. HQ AFPC/DPMARS has the approval authority for separations.

5.3.12.2. All physicians with at least 1 year on active duty, meeting time on station or DEROS requirements, and serving as Lt Col or below are eligible to apply. Career physicians are required to relinquish their career status and will reenter active duty in non-career status upon completion of their training.

5.3.12.3. Upon completion of the training program, physicians will incur a 2-year active duty service commitment, which can be served concurrently with any other obligation. Physicians having an educational obligation at the time of separation will be required to complete service of that obligation upon return to active duty.

5.3.12.4. Once released from active duty, physicians will be in obligated reserve status until completion of the original program approved by the GME Selection Board. Physicians who resign from their approved training program, change programs without approval of HQ AFPC/DPMMUE, or leave training are subject to immediate recall to active duty.

5.3.12.4.1. Transfers from one specialty to another will not be authorized without AFPC/DPMMUE approval.

5.3.12.4.2. Failure to complete the program or withdrawal will result in immediate recall to active duty. The minimum obligation to be served upon such recall to active duty will be 2 years.

5.3.12.4.3. Physicians in obligated reserve status for training will annually document satisfactory progress in the program on AFPC Form 190, Hospital Agreement. HQ AFPC/DPMMUE will provide the form and completion instructions to each individual.

5.3.12.5. Selection for the program will be based on the needs of the Air Force. ***NOTE***: For further information, write to the program director at the medical facility or HQ AFPC/DPMMUE (Physician Education Branch), Randolph AFB TX 78150-4729. Availability of the above programs is subject to change.

5.4. How to Apply for Programs:

5.4.1. **Who May Apply**. All AFI 41-110 (formerly AFR 36-17 and AFP 36-24) and AFI 36-2009 (formerly AFR 45-31) students are required to apply for GME in an Air Force program. AFI 41-110 (formerly AFR 36-17) and AFI 36-2009 (formerly AFR 45-31) students may also apply for deferment to take part in a civilian program. Residency deferments are based on Air Force needs with consideration given to the desires of the individual. All active duty applicants may, in addition to applying for GME in an Air Force program, apply for sponsorship in other DOD or civilian GME programs. Selections are made by the Air Force GME Selection Board based on projected needs and available training man-years. Selections made by the board are final and may not be appealed. Applicants selected for PG-1 in an Air Force program following completion of medical school must take part in the program for which they are selected. Applicants selected for training in an Air Force medical facility for,GME past their PG-1 year may decline such participation but, if obligated for military service, will be assigned for duty in the appropriate AFSC in an Air Force medical facility.

5.4.2. **Procedures and Deadline**:

5.4.2.1. In June of each year, send a request directly to HQ AFPC/DPMMUE, Randolph AFB TX 78150-4729, for an application. Specific application deadlines for each applicant category will be provided in the application.

5.4.2.2. Indefinite reserve officers who will incur ADSCs for education or training beyond 20 years of total active federal military service date (TAFMSD) must apply and be appointed a regular officer prior to entry into training.

5.4.2.3. Noncareer medical officers who will incur ADSCs for education or training beyond their DOS and who do not desire to apply for IRS or regular appointment will have their DOS changed to

agree with the ADSC incurred for participation in education or training.

5.4.2.4. Civilian applicants for military service may be considered for military GME at the discretion of the GME board in order to meet military needs.

5.5. Selection Process. The USAF Graduate Medical Education School Selection Board is held annually, usually in the late fall. Selections are announced 30 to 45 days after the board has met. The board's president may waive provisions of this chapter. When the board is not in session, AFPC/DPMMUE may act on behalf of the board in the best interest of the Air Force with the approval of the board's president.

Section B—Medical Education Programs (AFPC)

5OBY42P1—Clinical Psychology Internship—PDS Code WUV—Location*/1 yr—Mar 94

Clinically oriented course. Approved by American Psychological Association as predoctoral internship. Tailored to meet individual interests and needs based on prior clinical experience. Major rotations through inpatient, adult outpatient, and child and adolescent mental health services. Optional rotations available through consult-liaison, community outreach, neuropsychology, inpatient alcohol treatment, and stress management mental health services. Training includes psychological and neuropsychological evaluations, therapeutic techniques, and mental health administration. A wide range of therapeutic approaches are represented by the teaching staff including traditional, individual, and group therapy; behavior therapy; crisis intervention; biofeedback; hypnotherapy; family therapy; play therapy; chemotherapy; and psycho-educational approaches to the development of life coping skills.

Prerequisites: Satisfactory completion of all academic requirements for the doctorate in clinical psychology. Dissertation prospectus must have been accepted and data collected prior to start of internship. Applicants must meet the requirements for appointment or reappointment to the Biomedical Sciences Corps (AFI 36-2005, Appointment in Commissioned Grades and Designation and Assignment in Professional Categories [formerly AFR 36-15]) including a favorable MAC, a commissioning physical for civilians or enlisted applicants, or physical qualification IAW AFI 48-123, *Medical Examination and Medical Standards* (formerly AFR 160-43) for worldwide assignment for active duty officer applicants.

Application Procedures: Military personnel request application from HQ AFPC/DPMMUW (AFI 36-2005 [formerly AFR 36-1]5). Line of the Air Force officers forward DPMMUW application along with cover letter, GPA, transcripts, and three letters of recommendation from professors, training directors, or people who are familiar with the applicant's academic and clinical training to HQ AFPC (DPMAJB for Regular, DPMRP for Reserves). Civilians and Reserve officers not EAD apply through local Air Force medical recruiter. (Recruiters obtain application from HQ AFPC/DPMMUW and process for commission IAW AFI 36-2005 [formerly AFR 36-15]). Completed application deadline is 1 January. Class begins in August.

Quota Control: HQ AFPC/DPMMUW.

*Wilford Hall Medical Center, Lackland AFB TX, USAF Medical Center Wright-Patterson, Wright-Patterson AFB OH, and Malcolm Grow USAF Medical Center, Andrews AFB DC.

B5OZY43A4 001—Clinical Hyperbaric Physiology Fellowship—PDS Code 0SQ—Brooks/39 wk—Jan 96

Provides the education and practical training necessary to function as a fully qualified clinical hyperbaric physiologist in Air Force clinical hyperbaric medicine facilities. Selectees attend, as required, B3OZY43A1 001, Hyperbaric Training for Aerospace Physiology Officers. Academic topics include: basic hyperbaric physiology and medicine; advanced hyperbaric physiology; seminars in hyperbaric medicine; recent developments in diving medicine, and other selected topics. The academic program includes: lectures; seminars, library investigations, research proposal development, and participation as principal investigator for an approved proposal. Students will be exposed to civilian and other DOD hyperbaric facilities while on temporary duty. Attendees participate in the practice of clinical hyperbaric medicine in the AL/Hyperbaric Medicine Division, including patient care before, during, and following hyperbaric exposures and emergency patient care. Students get experience in emergency practices which include: treatment of decompression sickness; air embolism; carbon monoxide poisoning; and gas gangrene. Students also gain experience in the daily hyperbaric chamber operations, design and calculation of routine and emergency decompression schedules, routine and emergency equipment maintenance, tests and inspections, and limited patient data collection and administrative procedures related to the practice of clinical hyperbaric medicine.

Prerequisites: Aerospace physiologists with AFSC 43A3 and 2 years of active duty. Must have a bachelor's degree in biology, zoology, or physiology and meet medical standards for hyperbaric chamber duty per AFI 48-123. Experience in field-level compression chamber team operations is desirable.

Application Procedures: Send application through command surgeon channels to HQ AFPC/DPMMUW, 550 C Street W, Ste 27, Randolph AFB TX 78150-4729, NLT 1 August of the year preceding class start date. Applications must include the following items in numerical sequence: (1) completed AF Form 215 (in duplicate); (2) copies of all college transcripts; (3) copies of current physical certified for hyperbaric chamber duty per AFI 48-123 (AF Form 1042); and (4) letter from applicant to include individual qualifications and goals desired.

Admin Instructions: Students must hand-carry the following to class registration: health care record with documentation of current physical including documentation of all standards met according to AFI 48-123, AF Form 1042, and at least three copies of orders.

Class Frequency: Annually in September.

Quota Control: HQ AFPC/DPMMUW.

5OBO43DX—USAF Dietetic Internship—PDS Code VGB—Andrews*/40 wk—Mar 94

Provides the knowledge and practical training necessary to function as a generalist dietitian in a small facility or as a staff dietitian at larger medical facilities. Develops administrative skills in food management, clinical dietetics, and in the nutritional care of the Air Force community. Curriculum includes units in food service administration, food production and service, clinical dietetics, and education and research. Training includes supervised inpatient and outpatient nutritional care activities, supervised food production and service training, didactics, seminars, and field trip experiences. Course is accredited by the American Dietetic Association (ADA). It qualifies dietitians as nutritional medicine service officers and for membership in the American Dietetic Association. The graduate is eligible to take the registration examination for dietitians.

Prerequisites: Applicant must have, or be enrolled in the final year of a program leading to, a baccalaureate degree from an accredited university with a course emphasis which meets the academic requirements for entrance to a general dietetic internship approved by the American Dietetic Association. Applicants must meet the requirements for appointment or reappointment to the USAF Biomedical Sciences Corps for dietetic training. Must have a favorable national agency check and be physically qualified for an Air Force commission or physically qualified (for active duty applicants) IAW AFI 48-123 (formerly AFR 160-43).

Application Procedures: 1. Applications will consist of all documentation outlined in AFI 36-2005 (formerly AFR 36-15), all applicable recruiting regulations, and the following:

a. A verification statement (only if already graduated) or a declaration of intent listing courses in progress or to be completed to fulfill ADA didactic program in dietetics requirements.

b. A copy of all official college transcripts to include the first quarter/semester of the senior year. Final transcripts are required if an applicant has already graduated.

c. An autobiography of no more than 500 words describing personal background, reasons for selecting dietetics and the USAF Dietetic Internship, reasons for wanting to be an officer in the US Air Force, career, professional, and educational goals, and assessment of self-direction, ability to perform under pressure, and interpersonal skills. The autobiography may be typed or handwritten.

d. Three (3) letters of recommendation. One letter of recommendation must be from a faculty member. The applicant's personal and professional characteristics, communication and human relation skills, and leadership potential MUST be addressed.

e. Telephonic interview with USAF Dietetic Internship designated interviewer. Call DSN 858-3901 or commercial (301) 981-3901 for names and numbers of interviewers. Deadline date for interviews is mid-February.

f. ROTC and active duty applicants send a statement from their commander regarding their academic and military performance.

g. A Privacy Act Statement from applicant which reads: "The information submitted with this application is subject to the Privacy Act of 1974. Authority Title 10 US Code, Section 8012 (Secretary of the Air Force Powers and Duties Delegated by) and Executive Order 9397 (Number System for Federal Accounts Relating to Individual Persons). The purpose of providing this information is to ascertain your intent and evaluate your request for education and training. Information will be used to evaluate your eligibility, for selection consideration, determine appropriate assignment action, make selection notification, and provide the training center with personal information (for all selectees) to facilitate the educational process and assure an application repository for any required personnel actions. Disclosure is voluntary. However, without this information, selection and processing of application cannot be made."

h. A signed and dated statement as follows: "I understand that, if appointed, continuation in the appointment is contingent upon my completing the requirements for a baccalaureate degree and the USAF Dietetic Internship. Failure to complete requirements will result in: (1) termination of my appointment as a Reserve of the Air Force (for direct appointees); or (2) termination of my Biomedical Sciences Corps appointment and utilization or separation as determined by the needs of the Air Force (for reappointees or ROTC). I agree to serve any active duty service commitment specified in AFI 36-2107 (formerly AFR 36-51)."

i. Completed mark/sense computer card prioritizing dietetic internship preferences. Mandatory participation per the American Dietetic Association. Contact Coordinator, Dietetic Internship, at DSN 858-3901 or commercial (301) 981-3901 prior to mid-January for more specific information.

2. Line officers and airmen send application through channels requesting appointment or reappointment IAW AFI 36-2005 (formerly AFR 36-15) and line release contingent upon acceptance. Civilian applicants send all required documents for commissioning (Air Force recruiters to assist and forward such documents) in addition to above required prerequisites to Air Force Recruiting Service, Randolph AFB TX 78150-4527.

Quota Control: HQ AFPC/DPMMUW.

*Malcolm Grow USAF Medical Center.

B5OAY48A4—Residency in Aerospace Medicine—PDS Code WT6—Brooks/3 yr/MASL D175105—Jan 96

Provides advanced training in aerospace and occupational medicine and leads to eligibility for certification by the American Board of Preventive Medicine in aerospace medicine and occupational medicine. The residency consists of the following:

a. One academic year (Phase I) of graduate study in preventive medicine at an accredited school of public health culminating in an MPH degree. This year includes training in epidemiology, public health management and practice, occupational and environmental health, biostatistics, toxicology, and other required subjects as specified by the school of public health.

b. One aerospace medicine practicum year (Phase II) accredited by the Accreditation Council for Graduate Medical Eduation at the USAF School of Aerospace Medicine. This year includes training in aerospace physiology, aircrew selection, health maintenance of aircrews, flying safety, environmental medicine, aeromedical support of patients, health administration and management, aeromedical research, operational support, medical officer flight familiarization training, basic combat survival training, water survival training, aircraft mishap investigation, and clinical aerospace medicine, space medicine, community and international health, and hyperbaric medicine.

c. One occupational medicine practicum year (Phase III) at the USAF School of Aerospace Medicine. This year includes training in clinical occupational medicine, preventive medicine, public health, and occupational health administration and management.

Objectives: Prepare selected flight surgeons to accomplish all aspects of operational medical support to include the practice of aerospace and occupational medicine, to be authorities in the field of aerospace medicine and occupational medicine, and to be board certified as specialists in aerospace medicine and occupational medicine by the American Board of Preventive Medicine.

Prerequisites: In addition to requirements specified in paragraph 5.2, applicants must have the following prerequisites:

a. Satisfactory completion of B3OBY48G1-000, Aerospace Medicine, Primary.

b. 24 months professional work experience in operational aerospace medicine by course start date.

c. Physically qualified for unrestricted Flying Class II.

d. No more than 35 years of age as of class start date. Authority for waiver of this prerequisite rests with the Surgeon General, USAF.

e. Meet appropriate civilian university graduate school requirements.

f. Successfully completed a year of supervised postgraduate clinical training provided as part of an accredited residency or internship program and comprising experience involving direct patient care.

g. Hold an unrestricted and currently valid license to practice medicine in a state, territory, commonwealth, or possession of the United States or in a province of Canada.

Application Procedures: Send application to HQ AFPC/DPMMUE per section A.

Class Frequency: Annually in July.

Quota Control: HQ AFPC/DPMMUE.

B5OZY48A4 001—Clinical Hyperbaric Medicine Fellowship—PDS Code 0R9—Brooks/52 wk/MASL D175117—Jan 96

Provides education and practical training necessary to function as a fully qualified clinical hyperbaric physician in USAF clinical hyperbaric medicine facilities. Selectees attend, as required, B3OZY48X0-009, Hyperbaric Training for Health Care Officers. Approximately 20% of the fellowship is academic which includes lectures, seminars, and library investigations in the subjects of hyperbaric physiology, respiratory physiology, hyperbaric medicine, diving medicine, and biostatistics. Approximately 70% of the fellowship is participation in the practice of clinical hyperbaric medicine. Students get experience in examination and evaluation of potential patients, consultation with referring physicians, and direct patient care. This also includes emergency on-call procedures and practices. Approximately 10% of the fellowship involves research experience in human clinical, animal, and literature research projects conducted by the Hyperbaric Medicine Division and the Wilford Hall Medical Center.

Prerequisites: In addition to requirements shown in section A, applicants must be physically qualified for hyperbaric chamber duty per AFI 48-123, must be documented with a current AF Form 1042. Satisfactory completion of course B3OBY48G1 000, Aerospace Medicine, Primary.

Application Procedures: Send application to HQ AFPC/DPMMUE per section A.

Class Frequency: Annually in July.

Quota Control: HQ AFPC/DPMMUE.

5OZO9021 001—Medical Logistics Internship—PDS Code YHC—designated hospitals/40 wk—Jun 94

Provides on-the-job training to newly commissioned Medical Service Corps officers who have completed AETC course J3OBR9021 001. This program provides detailed training and base-level experience in all aspects of medical logistics. It prepares officers for assuming management of the logistics function at most USAF medical treatment facilities.

Prerequisites: Completion of AETC course J3OBR9021 001; assumption of a follow-on assignment in medical logistics; selection by AFPC.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Intern trainee will be assigned in student status to a designated hospital. Upon completion of training he or she will assume the duty of medical logistics officer at training location or be assigned PCS as a medical logistics officer. While in training, the student will be required to go 2 weeks TDY for briefings on AFMMFO, DPSC, and HQ USAF/SGSL. Local hospital O&M funds will be used to support the required TDY.

Quota Control: HQ AFPC/DPMMUS.

J5OZO9025 003—Medical Logistics Training—PDS Code 6T9—Location*/18 wk—Sep 93

Provides wholesale medical logistics management training to Medical Service Corps officers. The management and operational aspects of the military wholesale distribution system are studied from the entry of items into the system to receipt by the customer. The course covers Department of Defense management concepts and policies relating to federal specifications, military specifications and purchase descriptions; stock control policies; inventory accounting procedures; depot operations; inventory management; technical operations and contracting and production.

Prerequisites: Medical Service Corps officer in the grade of captain or major. Experience in logistics must be sufficient to enable him or her to readily comprehend the terminology and educational techniques employed in the course and have at least 2 years of active duty remaining after completion of the course. Frequency and length of class: class conducted once each year for a period of 18 weeks.

Application Procedures: Qualified officers should send letter of application with recommendation from hospital administrator or equivalent through director of base medical services or equivalent commander and command surgeon's office to HQ AFMSA/SGSL, 2504 D Drive, Ste 2, Brooks AFB TX 78235-5105, not earlier than 1 April and not later than 1 August each year for following January class entry.

Quota Control: HQ AFPC/DPMMUS.

Funded by AFIT.

*Defense Personnel Support Center, Philadelphia, PA.

5OZO9151 000—Medical Technology Program—PDS Code YE8—Andrews/52 wk/AFSC 9151—Sep 93

Graduate level medical laboratory studies. Provides the knowledge and practical training necessary to function as a generalist laboratory officer in a small facility or as a staff laboratory officer in a larger medical center. Develops administrative skills in laboratory management, personnel utilization, resource management, and technical problem solving. Curriculum includes medical microbiology, serology, clinical chemistry, hematology, urinalysis, immunohematology blood banking, and laboratory management. Course is accredited by the Committee of Allied Health Education and Accreditation (CAHEA) in cooperation with the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). Course completion qualifies officers to take the medical technologist certifying examination of the American Society of Clinical Pathologists (ASCP), National Certifying Agency (NCA), or equivalents.

Prerequisites: Bachelor's degree required (master of science degree strongly recommended) in one of the clinical sciences; for example, chemistry, virology bacteriology, hematology, toxicology, histology, parasitology, acceptable to the Surgeon General, HQ USAF. Course work must encompass 16 semester hours (24 quarter hours) of biology to include one semester of microbiology, 16 semester hours

(24 quarter hours) of chemistry to include one semester of organic or biochemistry, and four semester hours in mathematics. Courses in anatomy, genetics, physiology, quantitative analysis, physical chemistry, physics, instrumentation, management, and statistics are recommended. Also, applicants must be physically qualified and eligible for an Air Force commission.

Application Procedures: Line of the Air Force apply for line release and transfer to Biomedical Sciences Corps according to AFI 36-2106, *Competitive Category Transfers* (formerly AFR 36-18). Non-line of the Air Force apply for competitive promotion caategory transfer to Biomedical Sciences Corps according to AFI 36-2106 (formerly AFR 36-18). AFROTC cadets apply through command channels to HQ AFPC/DPMMUW, 550 C Street West, Ste 27, Randolph AFB TX 78150-4729. Enlisted apply by letter according to AFI 36-2005 (formerly AFR 36-15), table 3-1, rule 18. Nonmilitary applicants apply through Air Force Recruiting Service. Applications must arrive at HQ AFPC/DPMMUS NET 1 January and NLT 1 March annually, and they must include the following:

a. A copy of all official college transcripts to include the first quarter or semester of the senior year. Final transcripts are required if an applicant has already graduated.

b. Three letters of recommendation: two letters from individuals familiar with the applicant's clinical and (or) academic background or training and one letter from an Air Force clinical laboratory officer.

c. A handwritten autobiography of no more than 500 words describing personal background; reasons for selecting a career in clinical laboratory medicine and the USAF Medical Technology Program; reasons for wanting to be an officer in the US Air Force; career, professional, and educational goals; and assessment of applicant's ability to perform under pressure. The autobiography is not to be typewritten.

d. Telephone interview with USAF Medical Technology Program Director or Malcolm Grow Laboratory Manager at DSN 858-6083 or commercial (301)981-6083. Deadline date for interviews is mid-February.

e. A recent photograph (desirable).

f. Complete commissioning packet according to AFI 36-2005 (formerly AFR 36-15) for all enlisted and nonmilitary applicants.

g. For ROTC and active duty applicants: a statement from applicant's commander regarding academic and military performance.

h. A Privacy Act Statement. This statement from the applicant will read as follows: "I understand that information submitted with this application is subject to the Privacy Act of 1974, Authority: Title 10, US Code, Section 8012 (Secretary of the Air Force Powers and Duties Delegated by) and Executive Order 9397 (Numbering System for Federal Accounts Relating to Individual Persons). The purpose of providing this information is to ascertain my intent and evaluate my request for education and training. Information will be used to evaluate my eligibility, make selection notification, and provide the training center with personal information application repository for any required personnel actions. Disclosure is voluntary. However, without this information, selection and processing of application cannot be made."

i. For enlisted candidates: all EPRs.

Class Frequency: Annually.

Quota Control: HQ AFPC/DPMMUW.

Masters of Physical Therapy Program—Ft Sam Houston*/1 yr 6 mo—Mar 93

The US Army-Baylor University Program in Physical Therapy prepares students for careers in physical therapy. This program, taught at the Academy of Health Sciences, Fort Sam Houston, Texas, is accredited by the American Physical Therapy Association. Upon satisfactory completion of the course, the graduate physical therapist will receive a masters of physical therapy degree from Baylor University and a certificate in physical therapy from the Academy of Health Sciences. Graduates are eligible to take state board examinations for state licensure. Course begins annually in December and is 18 months in length.

Prerequistites: Air Force active members who possess a baccalaureate degree with satisfactory completion of courses as follows: biological sciences with lab, 8 semester hours; anatomy, 3 semester hours; physiology, 3 semester hours; chemistry with lab, 3-4 semester hours; physics with lab, 8 semester hours; behavior sciences, 9 semester hours (including at least two courses in psychology, one of which must be growth and development); statistics, 3 semester hours (covering such topics as chi square analysis and analysis of variance). Have attained a minimum overall grade point average of 3.0 on a 4.0 scale and a 3.0 in the required science category. Receive a minimum cumulative score of 1000 on verbal and quantitative sections for the Graduate Record Examination (GRE). Complete 20 to 30 hours voluntary service in direct patient care in a phpysical therapy function.

Application Procedures. Line of the Air Force apply for line release and transfer to Biomedical Sciences Corps according to AFI 36-2106 (formerly AFR 36-18). Non-line of the Air Force apply for competitive promotion category transfer to Biomedical Sciences Corps according to AFI 36-2106 (formerly AFR 36-18). AFROTC cadets apply through command channels to HQ AFPC/DPMMUW, 550 C Street W, Ste 27, Randolph AFB TX 78150-4729. Enlisted apply by letter according to AFI 36-2005 (formerly AFR 36-15), table 3-1, rule 18. Nonmilitary applicants apply through Air Force Recruiting Service. Applications must arrive at HQ AFPC/DPMMUW NET 1 January and NLT 1 March annually, and they must include the following:

a. Official transcripts of all undergraduate or graduate studies.

b. A letter of recommendation from an Air Force physical therapist.

c. Complete commissioning packet IAW AFI 36-2005 (formerly AFR 36-15).

d. All APRs/EPRs (for enlisted members).

e. A self-composed, handwritten, essay (250 words or less) expressing applicant's reasons for desiring to become a physical therapist.

f. A Privacy Act Statement from applicant which reads: "I understand that information submitted with this application is subject to the Privacy Act of 1974, Authority: Title 10, US Code, Section 8012 (Secretary of the Air Force Powers and Duties Delegated by) and Executive Order 9397 (Numbering System for Federal Accounts Relating to Individual Persons). The purpose of providing this information is to ascertain my intent and evaluate my eligibility, make selection notification, and provide the training center with personal information application repository for any required personnel actions. Disclosure is voluntary. However, without this information, selection and processing of application cannot be made."

Quota Control: HQ AFPC/DPMMUW.

*Academy of Health Sciences.

Medical Training With Other Federal Agencies

A number of medical postgraduate courses are conducted annually by other federal agencies and the Air Force frequently receives spaces in certain of these courses. Courses range from 2 to 120 days in duration and cover subject material applicable to the majority of Medical Service personnel. Agencies through which courses are available are:

1. Army.

2. Navy.

3. US Public Health Service (includes the National Communicable Disease Center).

4. Veterans Administration.

5. Armed Forces Institute of Pathology.

Prerequisites: Must be an officer of the USAF Federal Service performing duty in the general subject area of course for which application is made. Preference for attendance is given to Regular and career Reserve officers.

Application Procedures: Send officer's application for any course offered in military letter format through SG channels to HQ AFPC/DPMMUE, Randolph AFB TX 78150-4729. (Send applications for airmen and civilians to HQ AETC/SG, Randolph AFB TX 78150-4544, per AFI 36-2201, *Developing, Conducting, and Managing Training* [formerly AFR 50-9]). Applications must specify course number, title, location, and date of course, if known, as well as name, grade, Corps, SSN, and organization of assignment of individual desiring training. Include a statement of justification indicating that training is required incident to performance of assigned duties. For CDC courses: State if any tuition or registration costs; attach a completed "Application for Training" (obtained from Dept of Health, Education and Welfare, Public Health Service, Center for Disease Control, Atlanta GA 30333). Officers in sponsored training programs, such as residencies and fellowships are approved for short courses only when such courses are a required part of their overall training program. Applications should arrive at HQ AFPC/DPMMUE NLT 60 days before class start date.

Student Orders for AETC Authorized Medical Funds:

1. Due to the requirements which must be met to permit accurate reporting of students' attendance at courses allocated by AFPC/DPMMUE, when AETC TDY-to-School funds are authorized, complete and accurate data to include the following must be included in students' orders:

a. Name and location of school.

b. Course number, title and PDS code.

c. Class starting and graduation dates.

d. Appropriate AETC fund cite number from table 3.6.

2. It is imperative that two copies of student's orders be mailed to the 3790 MSTW/MSOR, Sheppard AFB TX, 76311-5465, and the training facility at least 2 weeks prior to class starting date.

3. Upon graduation, the education coordinator appointed by HQ AFPC/DPMMUE will certify attendance on the back of a copy of the orders, or will prepare a certificate of attendance, and send it to 3790 MSTW/MSOR, Sheppard AFB TX 76311-5465 within 5 workdays of course completion.

Quota Control: HQ AFPC/DPMMUE.

J5OZG9016 000—Interagency Institute for Federal Health Care Executives—PDS Code QVU—Jun 94

The Interagency Institute for Federal Hospital Executives conducts a 2-week course semiannually under the sponsorship of the Federal Medical Services. A total of 40 hospital and health agency executives are named by the sponsoring services to attend each course. These individuals hold responsible administrative positions in one of the services and are selected by their service because of demonstrated competence in administration. The educational backgrounds of those selected vary quite widely with a representation of physicians, graduates of university programs in hospital administration, and a variety of other advanced degrees.

The purpose of the Institute is to provide a mid-career opportunity for practicing executives to examine some of the current thought in management and some of the contemporary developments in the health field. The 2-week course can be described as advanced rather than basic. It is intended to provide insights rather than principles or tools. The design of the course assumes a high level capability gained from experience in management and seeks to stimulate the thinking and broaden the perspective of participants as regards their management role. The course content is not intended to be specific to the Federal Medical Services nor to the health field. The sophistication of the participants will enable them to identify the relevancy of the presentations to their own management situation and their own experiences.

Prerequisites: Career officers in the USAF Medical Service, colonel or lieutenant colonel, who are currently assigned or are candidates for medical command-management positions, and 1-year retainability on active duty upon completion of the course. All corps representation desired.

Frequency and Length of Institutes: Twice each fiscal year for 2 weeks.

Application Procedures: Interested officers send a letter application through director of base medical services or equivalent commander, command surgeons office to HQ AFPC/DPMMUS, 550 C Street W, Ste 27, Randolph AFB TX 78150-4729, not earlier than 1 June and not later than 1 September each year. Applicants should indicate class desired.

Special Requirements: Neither contractual arrangements nor course objectives permit any family member to accompany students. Students are required to pay for housing accommodations from authorized per diem allowances. Therefore, recommend consideration be given to requesting advance per diem.

Content of Institute: A faculty of visiting Health Care executive, university graduate school professors or dean, and Health Care Association directors present a concentrated curriculum in the following areas of health care management administration:

Development and Nurturing of the Administrator, A Conceptual Basis for Admin, The Scientific March of Medicine, Theories and Dynamics of Organization, Trends in Medical Education, The Philosophy of Administration, The Processes of Administration, Labor-Management Relations, Goal and Policy Formulations, Decision Making and Problem Solving, Research in Health Care Delivery, Modes and Strategies of Communication and Administration, Structural Aspects of Administration, Joint

Commission on Accreditation of Hospitals, Dimensions of the Administrator, and The Administrator and Social Change.

Funded by AETC.

Quota Control: HQ AFPC/DPMMUS.

Chapter 6

FIELD TRAINING

(OPR: 373 TRS/TXFR)

Command OPR. 373 TRS/TXFR is the command OPR for this chapter of AFCAT 36-2223. Requests for new course announcements, changes, or revisions must be prepared in accordance with paragraph 1.10 and sent to 373 TRS/TXFR for required processing.

Section A–Programs and Requirements

6.1. Field Training Program:

6.1.1. AFI 36-2201, *Developing, Conducting, and Managing Training* (formerly AFR 50-54 and AFR 50-9) establishes the FTD Program, explains the objectives of the program, and sets forth the responsibilities. AETC is responsible for administering the program.

6.1.2. Instructions for submitting requests for FTDs are in AFI 36-2201 (formerly AFR 50-54).

6.1.3. Training detachments (TDs) are located at selected bases of the operating commands. TDs give onsite training services by means of permanent or temporarily assigned instructors and mobile training set (MTS) equipment. Training is designed for the system assigned to the base on which the TD is located. Training is given on one or more systems depending upon the need. TDs use locations such as flight line and maintenance shops in addition to classrooms to give instruction. A TD is normally composed of a detachment commander, an administrative specialist, and the required AETC instructors.

6.1.4. Special training is requested according to AFI 36-2201. A TD, through its assigned personnel, is authorized to assist the operational activity in arriving at special training requirements. If required training cannot be satisfied through TD training capabilities, the TD advises and assists the activity in determining the extent of the required training and in preparing a request for training under AFI 36-2201. These requests are sent by the operating activity through channels to the MAJCOM. After review by the MAJCOM, the requests are forwarded to HQ AETC for action. An approved request may be satisfied using AETC mobile training teams, or field training teams.

6.1.5. TDs conduct system courses for maintenance and aircrew personnel.

6.1.5.1. Maintenance courses are designed for maintenance personnel assigned to organizational and intermediate maintenance activities. Instruction also includes other training within TD capabilities as may be necessary to meet the requirements of the using activity including familiarization of maintenance management procedures and 00-20 series technical orders.

6.1.5.2. Aircrew familiarization courses are designed to acquaint aircrew personnel with aircraft systems. Instruction is limited to those subject areas that are contained in the AFSC description (under duties and responsibilities listed in AFMAN 36-2108, *Airman Classification*, of the instructor presenting the course.

6.1.6. Support and services for TDs are required as shown in AFI 25-201, Support Agreements Requirements and AFI 36-2201. Facilities required for the operation of TDs are shown in paragraph 6.3 and table 6.1.

6.1.7. Movement of MTS equipment is as follows:

6.1.7.1. Movement to oversea locations will be by channel or special aircraft.

6.1.7.2. Within an oversea command, movement will be by air-ride van, when available, or by airlift.

6.1.7.3. Between CONUS sites, movement will be by air-ride van or airlift.

6.1.7.4. Waiver of air-ride van or airlift requirement may be approved by 982 TRG.

6.2. Instructor Procurement Program:

6.2.1. Each TD commander is designated AETC instructor recruitment liaison officer for the base or organization to which he or she is deployed.

6.2.2. Authority for recruiting liaison activity on bases of oversea MAJCOMs is derived from approval granted by the MAJCOM concerned. The term “recruiting liaison” as used in this context requires specific definition. It is not intended that AETC personnel undertake unilateral actions that will interfere with or compromise the parent unit mission in any way. Actions must conform strictly to the following guidelines and policy. The purpose of the program is to disseminate factual information such as AETC instructor requirements and overall opportunities for instructors. All action in support of this effort must be through and with the concurrence of the local unit commander. In effect, recruiting liaison personnel must aid the commander in discharging their obligation to ensure adequate and timely field support of the Air Force training mission.

6.2.3. The mission of the instructor liaison officer is to:

6.2.3.1. Provide information, as required, to advise personnel assigned to organizations served concerning all facets of a tour of duty as a member of the AETC Instructor Corps.

6.2.3.2. As directed by Headquarters AETC, advise using organization of AETC instructor needs and, if required, provide suitable publicity.

6.2.3.3. Identify to the unit commander concerned well qualified airmen deemed to be potentially qualified for instructor duty.

6.2.3.4. With the concurrence of the local commander, encourage potentially well qualified instructor candidates who meet AETC standards and assist them in submitting applications.

6.2.3.5. In oversea areas, coordinate with local commander(s) and personnel officer(s) in identification of well qualified prospects being forecast for return to CONUS. Establish procedures to seek out such personnel and provide them with detailed information relative to training centers and the AETC instructor program. Counsel and assist such personnel as appropriate.

6.2.3.6. For CONUS instructor selection when requested, assist local commander(s) and personnel officers in identification, screening, interviews, and selection of potential instructors required to fill instructor levies imposed by HQ USAF. Provide counseling and related assistance to selected nominees with view toward motivations for instructor duty.

13	High Bay Classroom 35x40x20		1			1 (12)														

NOTES:

1. Numbers in parentheses refer to notes below.
2. Facility requirements in this table are to support mobile training sets only and do not reflect total facility requirements. The need for academic classrooms varies from location to location and must be tailored to meet those individual requirements. Basic academic classrooms are 20' x 30' which was arrived at by using AFI 32-8004 (formerly AFR 86-2).
3. Classroom dimensions (length, width, height, in feet) are approximate, but represent near minimum area requirements. Minor variations are permitted. Ceiling heights are minimum, clear of obstruction including lights, to allow free movement of equipment. Interior hallways must be 10 feet wide. Each classroom must have double entrance doors of varying width and height depending upon trainer requirements. Each classroom will have special power requirements, which depend on the weapon system supported and the particular trainer.
4. Requires 16' ceilings.
5. Requires 12' ceilings.
6. Requires 10' x 10' insulated exterior door.
7. Requires 20' ceilings to accommodate trainers. One must have an 18' x 20' exterior door, and two must have 12' x 14' exterior doors.
8. Requires 14' ceilings.
9. Requires 17' ceilings.
10. Requires 14' x 14' overhead door with 20' ceilings.
11. Requires 32' ceilings.
12. Requires 12' x 14' overhead doors.

6.3. TD Training Facility Requirements:

6.3.1. TD facilities are provided by the host command and should, when possible:

6.3.1.1. Be adjacent to the maintenance complex but away from noise centers such as engine test or taxiway areas.

6.3.1.2. Have all classrooms on the ground floor when the TD is required to have an MTS.

6.3.1.3. Satisfy peculiar training requirements resulting from trainer configuration, radiation or electromagnetic hazards, electrical, pneudraulic, and environmental control requirements.

6.3.2. AFI 32-1024 should be consulted for additional guidance.

6.3.3. Classroom Space and Power Requirements:

6.3.3.1. Space requirements for TDs without an MTS are determined by considering the quantitative and qualitative trained personnel requirements (TPR). Special power is normally not required.

6.3.3.2. Classroom and power requirements for an MTS assigned to a TD are shown in table 6.1. This does not include the requirement for academic classrooms.

6.3.3.3. Facility and power requirements for the Space Support Program can be obtained from the training center administering the program.

6.3.3.4. Each TD, in addition to classroom space, also requires office space, a technical order and instructor room, student lounge, and storage space. Specific requirements vary with the size of the detachment and the nature and amount of the assigned equipment.

6.3.4. Outlined TD facility requirements are valid for planning purposes only. A site survey should be accomplished by the 982 TG to define detailed facilities requirements before an FTD is activated at a new site or to identify new or modified facilities required to support a unit mission change (AFI 36-2201). New systems require close coordination and cooperation between the contractor, SPO, using command, and AETC to ensure satisfactory and timely facility requirements.

Section B–Administrative and Reporting Instructions

6.4. General Instructions. Instructions applicable to all TDs are indicated below, unless changed by specific course reporting instructions.

6.4.1. Base housing, messing, and transportation are normally available and must be used by military personnel. Students reporting to TDs for training en route should be prepared to live off base; base housing may not be available due to heavy transient student traffic. Civilians are encouraged to use these facilities.

6.4.2. Military personnel use military aircraft if available for travel from their home stations to the training locations. Civilians are also encouraged to use military aircraft for travel.

6.4.3. Where practical, students must report to unit of assignment between 0800 and 1600, 1 day before class start date. After duty hours, report to base billeting office.

6.4.4. TDY orders must indicate that students are to report to administrative unit of assignment for in and out processing before reporting to TD for training. The administrative unit of assignment and the TD must be provided an advance copy of orders to ensure proper scheduling. Students report to TD for training no later than 0730 on class start date. At some locations class start times vary; TD or administrative unit of assignment provides class start times during TDY student processing.

(See next page for exceptions to general instructions)

Exceptions to General Instructions

REPORTING NOTES:

1. Beale - Students arriving at Sacramento Metropolitan Airport can obtain transportation to Beale AFB by calling Yellow Cab, (916)743-4661. Reservations 48 hours prior to arrival are necessary. Approximate cost is $30. Base billeting and transportation are limited; therefore, car rental authorization should be considered for TDY students. Beale students report to TD 315 at Bldg 1086, room 181, ext 8790, upon arrival on station or the next duty day.
2. Eglin—TD students report to the 24-hour reception center, building 1101, immediately upon arrival, and ask for the TD 204 OL-B welcome letter. Call TD 204 OL-B, ext 2-2898/2696, the next duty day by 0630.
3. Hill—Students reporting for class report 1 duty day before class start date. If this cannot be accomplished due to weekend/holiday travel, then report no later than 0600 the first day of class.
4. Langley—Students must contact TD 204 OL-A before class start date to determine class start times. Call DSN 574-7741, 0700-1600, Monday through Friday. Students arriving at Norfolk IAP can obtain commercial taxi transportation to Langley for approximately $25.
5. Minot—Students contact TD 208 OLA before class start date to determine class start times and travel conditions. Students reporting for class 1 Oct thru 15 May are required to have appropriate cold weather clothing; insulated footwear, gloves, cold weather mittens, winter cape, insulated underwear, parka, and cold weather pants. Call DSN 453-3520 between 0700-1600, Monday through Friday.
6. Nellis—Students must contact Det 213 before class start date to determine class start time and location. Call DSN 682-2670/2671, 0700-1600, Monday through Friday.
7. Offutt—When practical, students must report to unit of assignment between 0800-1600, 1 day before class start date. Students reporting during nonduty hours should report to Bldg 44, 24-hour arrival point (billeting), ext 271-3671. All ACC TDY personnel report to 55 LSS orderly room, Bldg 457, ext 271-5370. Fax 271-5370. Once on station, students are encouraged to contact Detachment 311 before class start to verify class start time and location, ext 271-5891.
8. Robins—TD 306 classes start at 0700.
9. Shaw—All TDY/enroute students report to billeting office, Bldg 929, ext 666-3658. Report to Bldg 1029 at 0645 on the first day of class. All students attending TD flight line and inshop courses must bring steel-toed safety boots.
10. Tinker—When practical, students must report to unit of assignment between 0800-1600, 1 day before class start date. Student reporting during nonduty hours should report to Bldg 5604, 24 hour arrival point (billeting), ext 734-2822. All ACC TDY personnel report to 552 LSS orderly room, Bldg 230, ext 736-2774. Fax number 336-3168. Once on station, students are encouraged to contact TD 309 prior to class to verify class start time and location (734-5003/3866/3901/3924).
11. Whiteman—B-2 Special Access Required (SAR). TDY personnel will submit a visit notice indicating name, grade, security clearance, level of access, and SSN to: TD 206, Visitor Control, ext 7518, no later than 5 working days prior to class start. Fax number 975-1980. Students arriving at Kansas City International Airport can obtain transportation to Whiteman AFB by calling the base taxi, extension 1843. Reservations 48 hours before arrival are necessary. Base billeting and transportation are limited; therefore, car rental authorization should be considered for TDY students. All TDY personnel report to 509 LGLT, ext 1595, Bldg 152, 1 day prior to class start. Students reporting during nonduty hours should report to Bldg 3011, base billeting, ext 1844. All students report to Det 6, Bldg 152, room 43, on the first day of class. DSN 975-7518.
12. Hurlburt Field—Students report to billeting, Bldg 90509, DSN 579-7115, upon arrival and ask for the TD 307 TDY brochure. Students will report to TD 307 by 0730 with two copies of their orders on class start date.
13. Charleston—Report to Charleston House (Billeting Office), Bldg 322. All students attending TD flight line and in-shop courses must bring steel-toed safety boots.
14. Fairchild—Students must report to billeting office, Bldg 2392, DSN 657-5519, upon arrival. Report to TD 313, Bldg 2001A, no later than 0800 on the first day of class.
15. Little Rock—Students must contact TD 310 before class start date to determine class start times. Call DSN 731-6179/6667, 0700-1600, Monday through Friday.
16. McChord—TD 312, all students attending maintenance courses are required to have steel-toed safety boots.
17. Travis—All personnel will report to the West Wind Transient Quarters, Bldg 404, ext 2987, for billeting. All personnel attending flight line or inshop courses at Travis must have steel-toed safety shoes or steel-toed combat boots in their possession upon arrival at TD 314. All TDY students will be assigned to 60 LSS/LST for administrative control.
18. Kirtland—All TDY/en route students report to billeting office, Bldg 2016, ext 6-9652 (DSN 246-9652). Report to Bldg 976 at 0745 on the first day of class.
19. Luke—Students must contact TD 212 before class start date to determine class start times and locations. Call DSN 896-5684/3012, 0900-1700 Eastern Standard Time, Monday through Friday.
20. Tyndall—Students report to Bldg 260 during duty hours. After dury hours report to billeting, Bldg 1332, ext 34210. All personnel (SrA and below) will be housed in the 325 MTS dormitories.
21. Ramstein—Contact 86 LSS/LGLT (480-5440) before class start date to verify class start time and to make billeting reservations. You will need to acquire a rental vehicle if not billeted on Ramstein. All students are required to hand-carry training records to class..

6.6. Detachment Curriculum–General:

6.6.1. System and general courses are listed according to the following major areas: aircraft systems, communications/ electronic/missile systems, multisystems, and general. Therefore, any search of section C to determine training required for a specific system should consider the multisystem courses, communications/electronic/missile systems, and general courses.

6.6.1.1. Aircraft system courses are courses supporting a specific aircraft weapon system. The courses are listed alphanumerically by aircraft designator (that is, attack, bomber, cargo, fighter, trainer, utility, etc.).

6.6.1.2. Missile/communications/electronic systems courses are listed

by system designation (that is, C&E system, aircraft communications, aircraft navigation, etc.).

6.6.1.3. Multisystem courses are not directly associated with a specific weapon system and are listed under the major headings of aerospace ground equipment (AGE), armament, engines, and pneudraulic. Multisystem courses normally cover theory and subsystem or AGE training common to more than one weapon system.

6.6.1.4. General courses provide prerequisite, refresher, or general knowledge training not related to a specific system.

6.6.2. Formal courses are those courses of instruction which have an AETC assigned course number and PDS code. A formal course is considered complete when evidence of satisfactory attainment of all objectives (CC/TS line items applicable to the weapon system) of the approved course exists. Attainment of all objectives is demonstrated by passing all tests ordinarily used to cover the entire course.

6.6.3. In TD course announcements, duration is the time required to teach the course using standard facilities and operational equipment when the students meet the prerequisites. If there are instructional elements contained in the course that do not apply to the locally configured weapon system, TDs in conjunction with the chief of maintenance are authorized to delete the nonapplicable items. The course length is then adjusted accordingly and a revised course length is established for the local unit. Actual time required to teach the course may vary due to student-instructor ratio, student aptitude, and availability of equipment. (See course completion criteria, table 6.2.) To meet special local training requirements, the host agency is authorized to request and receive instruction on any block or unit of instruction listed on a course chart for which the field training detachment provides instructional coverage. However, when all objectives (CC/TS line items applicable to the weapon system as locally configured) of the course are not attained, the course identifier and PDS code are not used to identify the training.

★Table 6.2. Course Completion Criteria.

RULE	A If the student	B then
1	satisfactorily attained all objectives of the approved course pertaining to the weapon system and associated equipment as locally configured *and* in-training time was 80 percent or more of the approved or revised course duration	(1) provide an AF Form 1256 to the student. (2) provide training management at student's unit of assignment an annotated copy of MMICS/CAMS product. TDY students will provide a copy of AF Form 1256 to their unit of assignment in lieu of the MMICS/CAMS product. (See paragraph 6.6.4.2.)
2	satisfactorily attained all objectives of the approved course pertaining to the weapon system and associated equipment as locally configured, but in-training time was *less* than 80 percent of the approved or revised course duration (if proficiency advanced by TD Commander or if course completion is accelerated solely due to reduced class size or the course is self-paced)	
3	did not satisfactorily attain all objectives of the course pertaining to the weapon system and associated equipment as locally configured, regardless of in-training time	provide training management, at student's unit of assignment, on AF Form 2426 or annotated student's copy of MMICS/CAMS product (see paragraph 6.6.4.3 and note below).
4	in-training time was less than 80 percent of the approved or revised course duration (not proficiency advanced by TD Commander)	

NOTE: Students are briefed on course completion criteria at the beginning of training. They are advised of local conditions that are expected to preclude award of AF Form 1256. When unpredictable factors are involved, the students will be advised as soon as practical. See AFI 36-2202 (formerly AFR 8-13) for AFSC awarding courses.

6.6.4. Training Documentation (see course completion criteria, table 6.2):

★6.6.4.1.TD. See AETCI 36-2215, attachment 4, paragraph A.4.1.2 for details on student accounting.

6.6.4.2. Training Management. An AF Form 1256 wil be used for recording on AF Form 623, **On-the-Job Training Record**. The AF Form 1256 must identify the course by course number, official course title, PDS code, and course duration in hours.

6.6.4.3. TD. When instruction given does not meet the requirement of a complete formal course, the TD will provide only an AF Form 2426 or an annotated MMICS/CAMS product to the student's unit of assignment (training management) for recording the training on AF Form 623. The remarks section (or attachment thereto) of AF Form 2426 will contain a brief narrative description of the training given, training duration, and reflect the block(s) and unit(s) of the course from which the training was extracted. AF Form 2426 must not include a PDS code for incomplete courses. (For units under MMICS/CAMS, the TD may use MMICS/CAMS products in lieu of the AF Form 2426 to record training.)

6.6.5. TDs do not have authority to develop new courses without HQ AETC, 982 TRG direction; therefore, base level agencies should request MAJCOM assistance when local training requirements cannot be satisfied by use of a formal course(s) (or extraction of block and units of courses). If the MAJCOM has no capability to resolve the unit's training needs, the MAJCOM should request AETC assistance under AFI 36-2201. Additionally, if a host (base level) agency determines that a TD formal course is unrealistic (for example, the course provides insufficient training or contains objectives which preclude issuance of an AF Form 1256), the unit should ask its MAJCOM for assistance. The MAJCOM should evaluate the suggested course modification and make appropriate recommendations to the appropriate field training squadron.

6.6.6. Courses listed in section C may be requested as special training (AFI 36-2201) when desired training is not available within the Field Training Program of the requesting command. When training is incidental to overseas PCS, this is considered special training regardless of availability in the command.

★6.6.7. Required student prerequisites for entry into each course are listed in the applicable CTS. To accommodate training requirements, all maintenance organizations are authorized to enter personnel into TD courses regardless of their AFSC/CEM code only if all CTS prerequisites are met.

6.6.8. Personnel who have been designated by the host unit to attend TD, may, regardless of their AFSC, attend a required or related TD course and receive an AF Form 1256 upon satisfactory completion of all course objectives. All students who attend TD courses must satisfactorily complete all criterion objectives, written and

performance tests before award of the AF Form 1256. If training is less than a complete course, training will be reported on the AF Form 2426 or MMICS/CAMS product.

Section C–Field Training Course Announcements/Course Control Documents (CCD)

6.7. Guide to Using the Listing:

6.7.1. This section has four general groups. Group A, Weapon System Courses; Group B, Communication/Electronic/Missile Courses; Group C, Multi-System Courses; and Group D, General Courses.

6.7.2. The groups are divided and titled by subject of class within which they are listed alphanumerically. A course can be quickly located by using the table of contents and the course listing by groups. To locate the subject or class of training, find the page number and go down the alphanumerical list of courses.

6.7.3. The majority of field training Type 4 courses are triple identified.

6.7.3.1. AMF - Training conducted at a host base or by a field training team (FTT) at a conversion site.

6.7.3.2. ASF - Training conducted at TDs with students in TDY status. (Does not include intracommand students. Example: ACC to a TD within ACC.)

6.7.3.3. AST - Training provided by a Mobile Training Team (MTT)/Field Training Team (FTT).

6.8. Terms and Symbols:

6.8.1. **Instructional System Development (ISD) Project**. All courses are either presently being developed or revised using ISD principles or have been completed as an ISD project unless otherwise stated in the remarks column.

6.8.2. **Task Oriented Training (TOT)**. TOT is weapon systems maintenance training produced by the combined efforts of AETC TDs and host personnel through the application of the ISD process. TOT courses consist of training on actual maintenance tasks in specific Air Force Specialty (AFS) functional areas. TOT is jointly conducted and supported by the TD and host base as required.

6.8.3. **Tentative (T)**. The “T” after the course CCD dates indicates the CCDs are tentative and are being validated or coordinated.

6.8.4. **Waived (W)**. When the Plan of Instruction (POI) is waived, the currently approved POI may be used until the next course revision.

6.8.5. **Class Column**. If the classification column is blank, the course is unclassified. Otherwise, there will be a “TS” for Top Secret, “S” for Secret, and “C” for Confidential courses.

6.8.6. **Preq Column**. If column is blank, the course has no prerequisites for student entry. If the course has a prerequisite, it will be identified in the preq column as follows:

6.8.6.1. A–Aerospace Ground Equipment (AGE) Qualified Required.

6.8.6.2. E–Egress Familiarization Training Required.

6.8.6.3. S–Secret Security Clearance.

6.8.6.4. 3–Must hold 5 or 7 level in AFSC (or equal experience).

6.8.6.5. 5–Must hold 5-level AFSC (or equal experience).

6.8.6.6. 7–Must hold 7-level AFSC (or equal experience).

6.8.6.7. M–Must hold the AFSC of the course requested.

6.8.6.8. C–Must have attended another course, contact local TD or 982 TG HQs.

6.8.6.9. O–Other - Contact local TD or 982 TRG headquarters.

6.8.6.10. A TD number with asterisk (*) in the remarks column means that an assigned instructor is qualified to teach the course and the host organization has no requirement for the course. The TD number and asterisk indicate availability to support an FTT only. The course entry on the AF Form 898, **Field Training Requirements Scheduling Document**, at that base is not required.

6.8.6.11. An “X” in the skill level (2A3X4) indicates any skill level may attend, except when course prerequisite shows 3 as in paragraph 6.8.6.4.

6.8.6.12. $–Must possess a valid AF Form 2293, US Air Force Motor Vehicle Operator Identification Card.

6.9. Instructions for the 982 TRG (paragraphs 6.9 through 6.12 apply). This section:

6.9.1. Provides a listing of current combined course charts and training standards (CC/TSs), and plans of instruction (POIs) for use by TDs.

6.9.2. Identifies the prime TDs (PTDs), coordinating TDs (CTDs), and other using TDs (UTDs) for each active course. Each TRS selects PTDs and CTDs based on frequency of use, equitable distribution of course responsibility, and MAJCOM representation.

6.9.3. Establishes the month of completion for annual Instructional System Review (ISR), which is based on the date established in the CC/TS. ISRs are conducted according to field training directives.

6.10. Submitting Requests. Requests submitted by TDs for additions or deletions to the course announcement index for all AETC host courses (T-37, T-38, and T-43) will be processed through HQ AETC/LGMMR for endorsement and coordination.

6.11. Management of CCDs. TDs will manage and control this section and CCDs as follows:

6.11.1. Maintain one copy of the latest section in the TD administration office.

6.11.2. Classified POI(s) will be developed, published, and maintained at the TD level and approved by the TD commander. The TD will notify the appropriate training squadron in writing of new or revised POI dates.

6.11.3. TDs will send all recommended changes to this section to the appropriate curriculum manager with an information copy to the PTD except as shown in paragraph 6.11. Requests for deletion from this section will be accompanied by a letter of concurrence or noncurrence from the chief of maintenance of the using organizations.

6.11.4. Each TD with a field training team (FTT) functional account code will be listed as a UTD, if not already listed as P/CTD, for those courses for which the assigned FTT instructor is qualified.

6.11.5. TDs may request copies of CCDs from the appropriate curriculum manager.

6.12. Disposition of CCDs:

6.12.1. **Discontinued Course(s)**. Upon receipt of written notification from the curriculum manager responsible for the course, TDs will destroy all CCDs, training literature, and all correspondence

pertaining to the course(s).

6.12.2. **Superseded Course(s)**.

6.12.2.1. Continue using old CCDs and training literature for classes in session and those scheduled to start before the effective date of the new or revised documents. For classes scheduled to start after the effective date of the new or revised documents, the new or revised CCDs will be used. The TD commander may waive use of new or revised CCDs for up to 30 days if there is a delay in receipt of the documents. However, training literature (study guides, workbooks, etc.) from the superseded course may be used up to 60 days to allow for materials to be updated.

6.12.2.2. TDs will start using tentative course control documents (TCCDs) upon receipt to conduct training with the next class scheduled subsequent to the effective date. One copy of the TCCDs will be placed in the nonrecord set file, one copy will be used by the instructor in the classroom, and one copy will be returned to the PTD or 982 TRG, as appropriate, showing any changes made to the documents. TCCDs will continue to be used for all subsequent classes, unless otherwise directed by appropriate curriculum manager, until final approved CCDs are received. TDs will dispose of all outdated and superseded CCDs.

6.12.2.3. Upon receipt of approved CCDs, all TCCDs will be disposed of and replaced with the new approved documents in the nonrecord set file and classroom(s).

Chapter 7

AIR MOBILITY COMMAND

(OPR: HQ AMC/DPPET)

Command OPR. HQ AMC/DPPET is command OPR for this chapter. Requests for new course announcements, changes, or revisions must be prepared in accordance with paragraph 1.10 and sent to HQ AMC/DPPET for required processing.

Section A—Procedures and Instructions

7.1. AMC Schools:

7.1.1. The procedures for requesting quotas are as follows:

7.1.1.1. Requests made in system must be input 90 days before the desired class dates.

7.1.1.2. Quotas must be confirmed in the pipeline management system (PMS) at least 30 days prior to the class start date. Units must provide confirmation to the MPF NLT 45 days prior to the class start date.

7.1.1.3. Confirmed quotas cannot be returned within 30 days of the class start date, unless an emergency arises.

7.1.2. The 375th Maintenance Squadron (MS), Scott AFB IL, conducts initial and instructor C-9A, C-12F, and C-21A flying training; instructor lead-in training; OSA/C-9 instructor pilot lead-in training; and a maintenance course, C-9A-M. For information on training class schedules and quotas, call 375 AW/DOT, DSN 576-2001; for the C9A-M maintenance course, call 375 MS/MAMT, DSN 576-5050.

7.1.3. AMC airlift courses conducted by the 97 AMW, Altus AFB OK, include C-5 and C-141 Aircrew Initial Qualification Aircraft Commander Qualification, Instructor Pilot Qualification, Air Refueling Qualification, C-141 Airdrop Qualification, Aircrew Instructor (nonflying), AMC Line Instructor Course, Classroom Instructor Course, Instruction Development Course, Basic Flight Engineer Qualification. All C-5 and C-141 training quotas are controlled by HQ AFPC/DPMROT3 except AMC upgrade and special courses. See specific course announcement for quota control for those courses.

7.1.4. AMC/OL-H AMCOS, Lackland AFB TX, conducts AMC 11510/27310-Pararescue/Combat Control Indoctrination Course, PDS Code: XBC/9TR, to prepare pararescue/combat control students for courses J5AZA11000 000 (Airborne Parachutist), C5AZA 11530 000 (Combat Diver), S-V80-A (Basic Survival), S-V86-A (Water Survival), SV84-A (USN Underwater Egress Training), J5AZA 11000 003 (Military Free Fall Parachutist), E3AQR27330 000 (Combat Control Operation Course), and 11530/AMC 60000 (Pararescue Initial Qualification/Combat Control School).

7.1.5. The Air Mobility Warfare Center conducts more than 35 classes to educate mobility managers and customers to effectively integrate and employ the global air mobility system. For information on class schedules, call AMWC/WCS at DSN 944-2514.

7.1.6. AMC/1 Special Operations Wing (SOW), Hurlburt Fld FL, conducts USAF MC-130 and AC-130H training. Courses include mission qualification training for MC-130 and AC-130H crew positions. HQ AFPC/DPMROT3 controls training quotas for all courses.

7.1.7. The AMC Combat Aircrew Training School (CATS), Nellis AFB NV, conducts advanced combat tactics ground training courses for selected AMC instructor pilots, instructor navigators, and intelligence officers/NCOs. All quotas are controlled by HQ AMC/DPPET through AMC AFs/DOT, NGB/TEE and/or HQ AFRES/DOT.

7.1.8. The USAF Air Mobility Warfare Center, Air Transportation Training Branch, Ft Dix NJ, conducts three intermediate level air transportation training courses for 2T2X1 personnel in grades A1C through SSgt and 2d Lt through Capt in air passenger, air cargo, and wartime contingency training. They also have an air transportation manager's course for personnel in the grades of TSgt and MSgt and 2d Lt through Maj. Quotas are controlled by HQ AMC/DOTV, DSN 576-5080.

★7.1.9. The 97OG, Altus AFB OK (AETC) conducts KC-135 initial qualification, requalification, and instructor training for pilots, navigators, and boom operators. Quota control for initial qualifications is HQ AFPC/DPMROT3, refresher and upgrade training is HQ AMC/XOTF.

7.2. Administrative and Reporting Procedures:

7.2.1. Unit of assignment and attachment, periods of wear of uniform combinations, and related reporting information are in tables 7.1, 7.2, and 7.3. Additional information may be found in section B of this chapter.

★7.2.2. Official class dates for courses at the 375 AW, Scott AFB; 97 AW, Altus AFB; 542 OPG, Kirtland AFB; 314 OG, Little Rock AFB AR; and 1 SOW, Hurlburt Fld, are listed in the PFT document for all aircrew positions except helicopter simulator refresher courses. Helicopter simulator refresher courses begin each Monday and continue for 5 consecutive days. If a holiday falls on Monday, the class begins Tuesday. If a holiday falls any time during the week, class completion is Saturday.

7.2.3. Dates for the AMC/CATS courses are scheduled as required with approximately 13 classes a year. Contact the AMC/CATS (Det 2 AMCOS/CATS, Nellis AFB NE) for course dates.

7.2.4. The policy on reentry of eliminees at a later date is:

7.2.4.1. Career airman and civilians eliminated without prejudice from an advanced, lateral, or supplemental course may be entered into the same course after 1 year of additional field experience. Exception to this limitation may be made for other than flying

★Table 7.1. Unit of Assignment/Attachment - AMC.

Notes:
1. The training location active duty aircrew training is based on member's unit of assignment. The training location for AFRES aircrew members is determined by HQ AFRES.
2. Active duty aircrew members report according to PCS orders.

training eliminees only if the wing commander of the airman concerned certifies the individual has gained sufficient experience

after elimination to enable him or her to satisfactorily absorb the training.

7.2.4.2. Career airmen eliminated with prejudice may not be considered for entry into any type of course until at least 1 year after elimination.

7.3. Security Clearance and Access. Clearance and access requirements are shown in the course announcements, if required. See AFI 16-105, *Joint Security Assistance Training (JSAT)(Joint)* (formerly AFR 50-29) and AFI 16-201, *Foreign Disclosure of Classified and Unclassified Military Information to Foreign Governments and International Organizations* (formerly AFR 200-9) for specific instructions regarding disclosure authority for classified information to international students and exchange officers.

7.4. Preparation of Student Orders. Instructions shown in paragraph 3.6.1 for AETC courses also apply to AMC courses. Orders must show variations authorized in itinerary for all flight training courses and Det 3, AMCOS, Combat Control School students. This ensures wings are not hampered in their plans for full use of training resources to meet training needs. For trainees at 542 OPG and 97 AW, all flying courses taught by the 375 AW, 314 OG/189 AG, Det 3, AMCOS, and 8 SOS orders must authorize 100 pounds excess baggage to allow for specialized and professional equipment issued to the students by the schools for their permanent retention. Combat Control School trainees must be placed on parachute jump status. Pararescue trainees must also be put on flying and parachute jump status. All student PCS and TDY orders must show current security clearance in the security clearance block. Additional instructions are included in the allocation RIP under reporting instructions. (See table 7.4 for advanced distribution of orders.

7.5. Funding Procedures. The following are the funding procedures for AMC-owned schools:

7.5.1. **TDY Not Incident to PCS**. If training is conducted at the following bases, these funding procedures apply:

7.5.1.1. Altus AFB OK. Funding is the responsibility of the using unit. For basic flight engineer training, obtain fund citation by referring to paragraph 3.6.6.

7.5.1.2. Andrews AFB MD. Funding is the responsibility of the using unit. For non-AMC C-12 training, funding will include reimbursement to AMC for commercial training costs.

7.5.1.3. Holloman AFB NM. Funding is the responsibility of the using unit.

7.5.1.4. Hurlburt Fld FL. Funding is the responsibility of the using unit. (See chapter 12, paragraph 12.13, for AFSOC courses (including USAFSOS courses).) Overseas units must assume funding responsibility between the oversea location and CONUS port of entry.

7.5.1.5. Pope AFB NC. Obtain a fund citation for course AMC 60000 by contacting the 23 AW/FMSTT, Pope AFB NC, DSN 486-2284.

7.5.1.6. Scott AFB IL. Funding is the responsibility of the using unit.

7.5.1.7. Travis AFB, CA. Funding is the responsibility of the using unit. ***NOTE***: For any AMC-owned training or noncentrally funded training not referenced above, funding is the responsibility of the using/benefiting unit.

11	McGuire AFB billeting office, Bldg 2717	base billeting office	0001, 1 day before CSD	1600, 1 day before CSD (note 11)

NOTES:
1. Oversea students should report at least 2 days before CSD.
2. Students report at 0800 the following day to Bldg 87. (C-5 and C-141 Initial Qualification pilots will report at 0730.)
SPECIAL TRAVEL INSTRUCTIONS: All incoming personnel traveling by commercial air should plan to arrive at Lawton. (Oklahoma Airport or Will Rogers World Airport, and arrange ground transportation to Altus AFB. Personnel arriving at Lawton Airport should arrive NLT 1800 local time. Personnel arriving Oklahoma Airport or Will Rogers World Airport, Oklahoma City, should arrive NLT 1500 local time. Bus departs Will Rogers Airport for Altus at 1545 local time. Students arriving attimes other than those above will have to use more costly limousine service, which requires advance reservations.

Reservations may be made by calling Lawton AC (405) 353-5503. Upon arrival at the Altus Bus Terminal, students may call Altus AFB 481-7273 or 481-6346 for transportation. Government transportation will not be provided from Oklahoma City or Lawton. For assistance in routing, origin TMOs are invited to call the Altus AFB TMO travel section at DSN 866-7272. Personnel reporting TDY to Altus AFB should make advanced billeting reservations with the Altus Billeting Office, DSN 866-7144, Monday through Friday, 0700-1600.
3. During the C-9 instructor pilot course, students will travel to Minneapolis MN for simulator training but will initially report to the 1375 FTS. Students must bring coat and tie attire with them for travel to and from Minneapolis.
4. Students then report at 0800 on CSD to Bldg 861.
5. All C-21A, C-12F, and C-9 initial qualification students will report to the designated commercially contracted academic/simulator training facility for approximately 2 weeks for the C-12F and C-21A and 4 weeks for the C-9. Students will then report to Scott AFB for flying.
6. Applies to students requiring instrument refresher course, instructor pilot course attendees, and all initial qualification students after completion of commercial contract simulator. Normally, initial qualification students not requiring instrument refresher course will report directly to the commercially contracted simulator (address given by 89 AW/DOT).
7. Upon arrival to Andrews, students will report to Bldg 1352, Officers Open Mess, at 0730 on CSD.
8. Students report to the AMC Combat Control School, Bldg 140, Monday through Friday, 0715-1645. Students arriving at other times, on weekends, or holidays will report to the base billeting office, Bldg 235. Incoming personnel traveling by commercial air should plan to arrive at Grannis Field Municipal Airport. Grannis Field is open between the hours of 0600 and 2400. Students arriving in groups of six or more may call Pope AFB NC, 394-4527, for transportation. Students arriving in groups of five or less should plan to hire a commercial taxi or limousine.
9. At least 30 days prior to CSD, notify Det 2 AMCOS/CATS by telecon (DSN 682-3386) of your arrival time. Det 2 AMCOS/CATS will provide billeting and transportation information at that time. Students arriving earlier than 1 day before CSD will pass on the arrival time as soon as it is known. Det 2 AMCOS/CATS will provide daily transportation. Det 2, AMCOS/CATS will provide daily transportation. Students should not expect base support or be authorized GSA or rental cars.
10. Report to Bldg 163 at 0800 on CSD.
11. Report to Ft Dix NJ, Bldg 5656, no later than 0745 on CSD. Unit funded per para 7.5, this catalog. Students may be billeted approximately 5-20 miles from the AMWC; therefore, we strongly suggest units consider authorizing rental cars.

★Table 7.3. Optional Periods for Wear of Summer Uniform Combinations - AMC.

LINE	A Installation	B Period
1	Altus AFB OK	year round
2	Scott AFB IL	
3	Lackland AFB TX	
4	Andrews AFB MD	
5	Offutt AFB NE	
6	Nellis AFB NV	
7	Travis AFB CA

9	Barksdale AFB LA	
10	March AFB CA	

★Table 7.4. Advance Distribution of Orders - AMC.

LINE	A Training Location	B Mail two copies of orders to	C To arrive NLT
1	Altus AFB OK 73523	1443 Stu Sq/RRA	8 days before CSD
2	Scott AFB IL 62225	375 AW/DOT	
3	Andrews AFB MD 20331	89 AW/DOT	14 days before CSD
4	Nellis AFB NV 89191	OL-A,, 443 MAW/CC	15 days before CSD
5	Seymour Johnson AFB NC 27531	4 OPG/DOT	
6	Barksdale AFB LA 71110	458 OPG/DOT	
7	March AFB CA 92508	22 OPG/DOT	

7.5.2. **TDY Incident to PCS**. If the TDY-to-school is incident to PCS, regardless of a cost-effective determination either TDY and return or TDY en route, the funding procedures in paragraphs 7.5.2.1, 7.5.2.2, and 7.5.2.3 apply. (The MAJCOM functional area has determined TDY-to-school to be mission essential for the PCS move, especially to the oversea area. AFOs must provide the fund citation upon request. Commanders cannot deny the use of the fund citation for a TDY-to-school without prior approval of their MAJCOM functional area.)

7.5.2.1. Losing unit is AMC - gaining unit is AMC (including field training detachment (FTD) training not in PMS). Losing unit fund citation is used. Exception: Courses taught at Kirtland AFB NM. Obtain fund citations for all AMC courses by contacting the 542 CPTS/ACFTT, Kirtland AFB NM 87117, DSN 244-9229. For course Basic Flight Engineer Course (BFE), obtain fund citation by contacting 97 AMW/FMFPT, DSN 866-6522.

7.5.2.2. Losing unit is not AMC - gaining unit is AMC. Gaining unit fund citation is used. The losing AFO is responsible for obtaining the fund citation from the gaining AFO. Exceptions:

7.5.2.2.1. FTD Training. HQ AMC/DPRA includes the gaining unit's fund citation to the losing MPF on the message directing en route training. The gaining unit and AFO will be informed on the tasking message of the use of the fund citation.

7.5.2.2.2. USAF students attending BFE Course. Obtain a fund citation by contacting the 443 AW/ACFT, Altus AFB OK 73523, DSN 866-6522.

7.5.2.3. The funding for units in different commands is the responsibility of the gaining unit, unless otherwise stated in table 1.3.

7.6. Clothing and Equipment Requirements:

7.6.1. **Flying Training**. Clothing and equipment for individuals to be trained are shown in table 7.5. AFM 67-1, volume IV, part one, chapter 21, gives instructions on clothing and equipment items to be kept for those who are to leave their unit. MPFs that have quotas in courses shown in AFM 67-1, volume II, chapter 7, must contact students as soon as possible after being told of the selection and tell them to go to the Equipment Management Office (EMO). Whether they are on flight status or returning to flight status, individuals who need flight clothes and equipment must read and sign the statement shown in table 7.5 in two copies. The original is filed in the TDY/PCS relocation folder and the duplicate is given to the individual. Other rated personnel will be told to go to the EMO for additional processing. Direct entry international military trainees

attending C-130 training at Little Rock AFB AR will receive flight clothing and equipment during in-processing. International trainees coming to Little Rock AFB AR for simulator refresher training or from another USAF training location will bring clothing and equipment with them.

7.6.2. **Other Than Flying Training**. Academic and performance uniform requirements are in table 7.5.

Table 7.5. Flying Clothing and Equipment—C-9 and KC-10 Training.*

35	Clipboard, plt type MXU-163/P		1	1 ea

* Numbers refer to notes below.

NOTES: 1. First pilot, aircraft commander candidates only.
2. *First Pilot/Instructor Candidates*: AMC Form 21 folders must include a recommendation by unit commander for upgrade.
3. Required during the period of 1 October through 31 March.

Reference AFM 67-1, vol IV, part one, chapter 21, paragraph 3f(4). I understand that I am required to hand-carry the flying clothing and equipment as required for the flying training course listed in my orders. I further understand that I must report to the Equipment Management Office (EMO) as soon as prior to departure to have required equipment issued.

DATE SIGNATURE/GRADE

7.7. Pay and Allowances. Students who want pay and allowances while on TDY should inform the AFO at their parent unit before departure, according to AFM 177-373. These are in addition to other clothing requirements.

7.8. Records Requirements. All other students attending a course in TDY-en route-PCS or TDPFO status must hand-carry all records required for PCS movement. Regardless of attendance status, all students at AMC flying training courses must hand-carry the records shown in table 7.6.

7.8.1. It is AMC policy for all aircrew members to have a valid official passport.

7.8.1.1. Personnel who have either a valid or an outdated passport, and who are in a pipeline school status and have not reported to their unit of assignment, will hand-carry their passports to the school.

7.8.1.2. Personnel who have reported to their unit of assignment and are TDY to the school for training do not need to have passports with them while at the school.

7.8.1.3. Applications for the official passports will be initiated at Altus AFB or Little Rock AFB only for those who have never had a passport or have an outdated one.

7.8.1.4. Airmen must have an original or a certified copy of their birth certificate to apply for a passport. An old passport meets this requirement when applying for a renewal.

7.8.1.5. Officers do not need a birth certificate if their personnel records are available. Officers holding a Reserve commission must meet the requirements of 7.8.1.4.

7.8.1.6. All applicants must be able to supply the information required by Department of State Form 11, Passport Application.

7.8.2. Students TDY en route PCS will carry their AFORMS transfer deck. Other TDY students will carry their flight records or AFORMS deployment tapes. Obtain these from the flight management office (AFM 171-190, vol II, chap 3).

7.8.3. For nonflying courses conducted at Altus AFB, no records are required. Exceptions: course 11330C requires AF Form 1042, Medical Recommendations for Flying or Special Operations Duty.

7.9. Numbered Air Force (NAF) Controlled Training Quotas. AMC NAFs control training quotas for some AMC-owned courses in this chapter. AMC units do not request or cancel quotas in the following courses through their servicing MPF.

7.9.1. Air Mobility School (AMS) taught at the Air Mobility Warfare Center, McGuire AFB NJ. AMC wings nominate individuals to the NAF for attendance at this school.

7.9.2. Combat Aircrew Training School (CATS) courses taught at Nellis AFB NV.

7.9.3. Operational courses taught at Altus AFB OK, Kirtland AFB NM, and Little Rock AFB AR. These are listed in PFT documents for each base. ***Exception***: AMC units request or cancel quotas through their servicing MPF for course AMCILIC.

Table 7.6. Records Requirements - AMC.

LINE	A Training Location	B Type Training	C Medical Records	D Indiv Flt Record	E Flt Eval Folder	F See Note
1	Andrews	Flying	X	X	X	1
2	Scott		X	X	X	
3	Seymour Johnson		X	X	X	
4	Barksdale		X	X	X	
5	March		X	X	X	

NOTES:
1. AFORMS/Flight records requirements:
   a. TDY-PCS en route - hand-carry both a current AFORMS Individual Data Sheet (IDS) and flight records to the training base.
   b. TDY - returning to home station:
      (1) Students attending courses 90 days duration or less must bring AFORMS IDS in lieu of flight record.
      (2) Students attending courses 91 days duration or more must have their AFORMS record electronically transfered and hand-carry their flight record.

Section B—Course Announcements

4021 C5A 000—Aircraft Maintenance Officer Systems Training/C-5—PDS Code 31D—Altus/5 wk—Mar 93

Trains and familiarizes aircraft maintenance officers on C-5 aircraft systems, using the academic part of the C-5 pilot initial qualification course (1045N) which covers aircraft systems interface, aircrew normal and emergency procedures, and ground school.

Prerequisites: Trainee must be a qualified aircraft maintenance officer (4021, 4024,4011,4016) with at least 6 months field experience on aircraft.

Special Requirements: Secret clearance.

Quota Control: HQ AMC/LGQRT.

C-9A-IP—C-9A Instructor Pilot Course—PDS Code RCJ—Scott/3 wk 2 days/AFSC K1045M—Jan 96

Qualifies aircraft commanders as instructor pilots (IAC) in the C-9A aircraft. Provides 5 days of academics, 1 CPT, 3 simulators, 4 training flights, and an IP evaluation. Students will develop training flight profiles, conduct pre-mission briefings, perform and instruct maneuvers from the right seat, and conduct critiques. Fulfills requirements of annual simulator refresher training.

Prerequisites: Trainees must meet applicable 51-series upgrade criteria and have completed OSA/C-9 Instructor Pilot Lead-In (non-flying) course, or equivalent. Flight physical and physiological training (altitude chamber) must be current for at least 30 days after class start date.

Quota Control: HQ AMC/DPPET, 375 AW/DOT.

C-9A-M—C-9 Airframe and Systems Maintenance—PDS Code YS9—Scott/6 wk—Sep 93

Provides maintenance personnel with a general knowledge of the C-9 aircraft, engines/APU and avionics systems. Personnel are required to attend portions of the course applicable to their AFSC.

Prerequisites: Personnel associated or assigned to C-9 aircraft maintenance.

Special Requirements: Forward one copy of orders in advance for personnel selected to attend to 375 AW/MAT, Scott AFB IL 62225-5000.

Quota Control: 375 MS/MAMT.

C-9A-P-A/B—C-9 Pilot Initial Qualification—PDS Code QQN—Scott/8 wk/AFSC 1045M—Dec 91

Qualifies pilots in C-9 aircraft. Includes commercially contracted ground school and simulator training follwed by USAF flight training at Scott AFB. The “A” course shredout identifies initial conversion for retrainees. The “B” course shredout identifies requalification trainees who have ben unqualified in the C-9 for greater than 5 years.

Prerequisites: Must be rated pilots currently on flying status. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after class completion date.

Quota Control: HQ AFPC/DPMROT3.

C17ACLD—C-17 Aircraft Commander Airdrop Lead—PDS Code W82—Charleston/2 wk—Jun 93

Provides designated C-17 pilots with the knowledge and skills required to upgrade to lead airdrop aircraft commander. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A qualified C-17 airdrop aircraft commander. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after scheduled class completion date.

Quota Control: HQ AMC/XOTI7.

C17ACLP—C-17 Aircraft Commander Low Altitude Parachute Extraction—PDS Code W8V—in-unit/2 wk—Jun 93

Qualifies designated C-17 pilots in low altitude parachute extraction. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A qualified C-17 airdrop aircraft commander and LAPE copilot. Medical flight physical and physiological training (altitude chamter) must be current for at least 30 days after scheduled class completion date.

Quota Control: HQ AMC/XOTI7.

C17CPLP—C-17 Copilot Low Altitude Parachute Extraction—PDS Code W69—in-unit/2 wk—Jun 93

Qualifies C-17 pilots in low altitude parachute extraction. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A qualified C-17 airdrop pilot. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after scheduled class completion date.

Quota Control: HQ AMC/XOTI7.

C17FEAC—C-17 Flight Examiner Aircraft Commander—PDS Code W88—in-unit/1 wk—Jun 93

Provides designated C-17 pilots with the knowledge and skills required to upgrade to flight examiner aircraft commander. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: A qualified C-17 instructor aircraft commander. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after scheduled class completion date.

Quota Control: HQ AMC/XOTI7.

C17FELM—C-17 Flight Examiner Loadmaster—PDS Code W5T— in-unit/1 wk—Jun 93

Provides designated C-17 instructor loadmasters with the knowledge and skills required to upgrade to flight examiner loadmaster. Consists of contractor-administered academic and simulator training followed by Air Force-conducted flight training.

Prerequisites: Trainee must be a qualified C-17 instructor loadmaster. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after scheduled class completion date.

Quota Control: HQ AMC/XOTI7.

C17FP—C-17 First Pilot—PDS Code W68—in-unit/2 wk—Jun 93

Provides designated C-17 pilots with the knowledge and skills required to upgrade to first pilot. Emphasizes flying from the left seat, advanced aircraft performance, and making decisions affecting the aircraft, the crew, and the mission. Consists of contractor-administered academic and simulator training followed by an Air Force evaluation in the C-17 simulator.

Prerequisites: A qualified C-17 pilot who meets requirements outlined in the current contract. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after scheduled class completion date.

Quota Control: HQ AMC/XOTI7.

C20AC—C-20 Aircraft Commander Qualification-In Unit—PDS Code P4N—in unit/4 wk—Dec 90

Unit-conducted aircrew training. Qualifies aircraft commander candidates on the knowledge and skills necessary to perform aircraft commander duties on the C-20.

C20IAC—C-20 Instructor Aircraft Commander-In Unit—PDS Code P4P—in unit/4 wk—Dec 90

Unit-conducted aircrew training. Qualifies instructor pilot candidates on the knowledge and skills necessary to perform instructor pilot duties on the C-20.

C20P-IU—C-20 Pilot lnitial/Requalification-In Unit—PDS Code P4R—in unit/10 wk—Dec 90

Unit-conducted aircrew training. Qualifies pilot candidates on the knowledge and skills necessary to perform pilot duties on the C-20.

C25AC-IU—C-25 Aircraft Commander-In Unit—PDS Code P55—in unit/4 wk—Dec 90

Unit-conducted aircrew training. Qualifies aircraft commander candidates on the knowledge and skills necessary to perform aircraft commander duties on the C-25.

C25P-IU—C-25 Pilot Qualification/Requalification-In Unit—PDS Code P56—in unit/10 wk—Dec 90

Unit-conducted aircrew training. Qualifies pilot candidates on the knowledge and skills necessary to perform pilot duties on the C-25.

C29AC-IU—C-29 Aircraft Commander-In Unit—PDS Code P57—in unit/4 wk—Dec 90

Unit-conducted aircrew training. Qualifies aircraft commander candidates on the knowledge and skills necessary to perform aircraft commander duties on the C-29.

C29APIQ—C-29A Pilot Initial Qualification—PDS Code NX6—Scott/5 wk/AFSC 1041P—Oct 95

Qualifies pilots on the C-29A aircraft. Includes commercially contracted ground school and simulator training followed by USAF flight training at Scott AFB IL.

Prerequisites: Must be rated pilot currently on flying status. Medical flight physical and physiological training (altitude chamber) must be current for at least 30 days after class graduation date.

Quota Control: HQ AMC/DPPET.

C29P-IU—C-29 Pilot Qualification/Requalification—In Unit—PDS Code P5A—in unit/10 wk—Dec 90

Unit-conducted aircrew training, pilot candidates on the knowledge and skills necessary to perform pilot duties on the C- 29.

4021 C130 002—Aircraft Maintenance Officer Systems Training—C130—PDS Code 31C—Little Rock/3 wk—Jun 93

Trains and familiarizes aircraft maintenance officers on C-130 aircraft systems, using the academic part of the C-130 pilot initial qualification course (C130EPO1PR) which covers aircraft systems interface, aircrew normal and emergency procedures, and ground school.

Prerequisites: Trainee must be a qualified aircraft maintenance officer (4021, 4024, 4011, 4016).

Special Requirements: Secret clearance.

Quota Control: HQ AMC/LGQRT.

HC130LMRQ—HC-130 Loadmaster Qualification—PDS Code W8B—Kirtland/3 wk 4 days—Jun 93

Qualifies loadmasters who have completed the HC130LMMQ course in intercept, escort, on-scene commander, airborne mission commander, search and rescue, aerial delivery, and the rescue procedures associated with these events.

Prerequisites: On flying status and qualified for flying duty. Current and mission qualified (graduate of HC130LMMQ) or equivalent course. Medical flight physical and physiological training (altitude chamber) must be current for 30 days past published graduation date.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AMC/XOTT.

MC130HP—MC-130H Pilot COMBAT TALON II Initial/Mission Qualification—PDS Code 4YE—Hurlburt/12

wk/AFSC 1311C—Mar 93

Mission qualifies pilots in the MC-130H as a copilot or aircraft commander candidate IAW AMCR 51-130 and AFSOCR 51-130 flying hour prerequisites. Includes specialized ground training in mission-peculiar equipment and MC-130H initial/mission qualification flight training.

Prerequisites: Currently qualified for flying duty and C-130 qualified. Flight physical and physiological training (altitude chamber) must be current. Must meet visual standards for NVGs IAW AFI 48-123 (formerly AFR 160-43) prior to class entry. Must meet one of the following criteria:

(a) Currently or previously C-130 tactical airlift airdrop qualified IAW AMCR 51-130 and have 1 year of tactical airlift airdrop experience.

(b) Currently or previously HC-130 NVG mission qualified IAW AFSOCR 51-130 and have 1 year of HC-130 NVG mission experience.

(c) Must have a minimum of 1,000 total flight hours (any aircraft). Candidate must complete C-130PTVF.

Special Requirements: By class start date, Top Secret clearance or paperwork submitted for a Top Secret clearance.

Quota Control: HQ AFPC/DPMROT3.

AMC PHII C-141—AMC Phase II Load Planning/Supervisor C-141—PDS Code 7C2—various locations/2 wk—Mar 93

Qualifies AMC personnel to perform Phase II load planning and loading supervisor duties on the C-141 aircraft.

Prerequisites: A1C or above, DAFSC 60551 or equivalent. Department of Defense civilians must be in UDL positions in above AFSC. Must have 6 months' retainability, recommended by supervisor and approved by squadron operations officer, port operations officer, or squadron commander.

Special Instructions: Subdued work utility uniform is required for aircraft load simulator on-hands training.

Quota Control: Individual's unit commander.

CASA 212AC-IU—CASA 212 Aircraft Commander-In Unit—PDS Code P4B—in unit/4 wk—Dec 90

Unit-conducted aircrew training. Qualifies aircraft commander candidates on the knowledge and skills necessary to perform aircraft commander duties on the CASA 212.

CASA 212IP-IU—CASA 212 Instructor Pilot-In Unit—PDS Code P4C—in unit/4 wk—Dec 90

Unit-conducted aircrew training. Qualifies instructor pilot candidates on the knowledge and skills necessary to perform instructor pilot duties on the CASA 212.

CASA 212P-IU—CASA 212 Pilot Qualification/ Requalification-In Unit—PDS Code P4D—in unit/10 wk—Dec 90

Unit-conducted aircrew training. Qualifies pilot candidates on the knowledge and skills necessary to perform pilot duties on the CASA 212.

KC10B—KC10 Boom Operator Initial Qualification Training—PDS Code ZXQ—location (note 1)/9 wk 4 days (notes 2 & 3)—Mar 93

Provides proficiency training to initially qualify boom operators in the KC-10. Course consists of academic, aircrew training device (ATD), and flight training in KC-10 systems, normal and abnormal operating procedures, weight and balance data computations, cargo loading operations, associated duties, and inflight refueling duties. Overall training is a combination of contractor and Air Force administered training. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Training is composed of: Academics/AETC (contractor administered) - 3 weeks, 4 days; and flying (Air Force administered) - approximately 6 weeks (notes 2 and 3).

Prerequisites: Meet the experience requirements outlined in AMCR 51-1.

Special Requirements: 1. Top Secret clearance.

2. Medical - Current medical Flying Class III. If expiration date falls within course training dates, the flight physical must be renewed before course entry.

3. Physiological training (altitude chamber) must be current for at least 90 days after scheduled class completion date.

4. Must report for contractor administered academic/simulator training with required KC-10 aircrew technical orders.

Quota Control: HQ AMC/XOTT through HQ AFPC/DPMRTP2. Waivers: HQ AMC/XOT.

Notes:

1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student's previous flying experience, proficiency, or schedule changes.

3. After initial air refueling qualification training, cargo loading qualification training is required. Completion of this training is subject to the availability of suitable cargo loads.

KC10BIC—KC10 Boom Operator Instructor Upgrade Course—PDS Code ZXN—location (note 1)/5 wk (note 2)—Jan 96

Prepares personnel for duties as KC-10 instructor inflight refueling operators. Consists of academic, aircrew training device (ATD), and flight training in KC10 systems, normal and abnormal operating procedures, cargo loading operations, and ground/flight instructor role. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Training is composed of: Academics/AETC (contractor administered) - 3 wk, 1 day; and flying (Air Force administered) - approximately 1 wk, 4 days (note 2).

Prerequisites: 1. Qualified and current in the KC-10 as a boom operator.

2. Be nominated by the unit commander.

3. Meet AMCR 51-1 requirements.

Quota Control: Quotas allocated to ARF and NAF by HQ AMC/DPPET. Nominees to fill quotas must be announced to HQ AMC/DPPET and the school a minimum of 30 days prior to CSD. Waivers: HQ AMC/XOT.

Notes:

1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student proficiency or schedule changes.

KC10BRQ—KC10 Boom Operator Requalification—PDS Code 8VY—location (note 1)/9 wk 4 days (notes 2 & 3)—Oct 95

Accelerated academic, aircrew training device, and flight instruction individually tailored to student's needs in KC-10 systems, normal and abnormal operating procedures, weight and balance data computations, cargo loading operations, and inflight refueling duties. Overall training is a combination of contractor and Air Force administered training. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. This course qualifies student for duties as a KC-10 inflight refueling operator.

Prerequisites: 1. Must be scheduled for assignment as a KC-10 boom operator.

2. Previously qualified as an inflight refueling operator in the KC-10 and physically qualified for flying duty.

3. Must meet AMCR 51-1 requirements.

Special Requirements: 1. Top Secret clearance.

2. Medical - Flying Class III. If expiration date falls within course training dates, the flight physical must be renewed before course entry.

3. Physiological training (altitude chamber) must be current for at least 90 days after scheduled class completion date.

4. Must report for contractor administered academic/simulator training with required KC-10 aircrew technical orders.

Quota Control: HQ AMC/XOTT. HQ AMC/DOTT/DPPET must be provided a minimum of 120 days lead time to coordinate requal training with the contractor. Waivers: HQ AMC/DOT.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student proficiency or schedule changes.

3. After initial air refueling qualification training, cargo loading qualification training is required. Completion of this training is subject to the availability of suitable cargo loads.

KC10C—KC10 Copilot Initial Qualification Course—PDS Code 8VZ—location (note 1)/13 wk 1 day (notes 2 & 3)/AFSC 1063D—Jun 93

Provides proficiency training to initially qualify rated pilots as copilots in the KC-10. Training emphasizes procedures and techniques to effectively and safety operate the KC-10 in all phases of flight. Teaches student copilots the duties, responsibilities, and crew coordination requirements of the KC-10. Overall training is a combination of contractor and Air Force administered training. Training and evaluation are conducted IAW the current contract. AMCR 51-1 and AMCR 60-1. Personnel attending this course would benefit by obtaining the course book prior to start of training. Training consists of: academics and simulators (contractor administered) - 8 weeks, 1 day; and flying (Air Force administered) - approximately 5 weeks (note 2).

Prerequisites: 1. Rated pilot on flying status.

2. Regular Air Force officer, or career Reserve officer who has less than 17 years of TAFMS.

3. Meet the experience requirements outlined in AMCR 51-1.

4. Physiological training (altitude chamber) must be current for at least 90 days after scheduled class completion date.

5. Must report for contractor-administered academic and simulator training with required KC-10 aircrew technical orders.

6. Crossflows must complete annual instrument school NET 60 days and NLT 30 days prior to departing last duty station. UPT accessions must complete course KC10TIC immediately prior to starting KC10C.

Special Requirements: 1. Top Secret clearance. BI completed or initiated before departure for training.

2. Medical - Flying Class II. If expiration date falls within course training dates, the flight physical must be renewed before course entry.

Quota Control: HQ AMC/XOTT. Waivers: HQ AMC/XOT.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student's previous flying experience, proficiency, or schedule changes.

3. After initial air refueling qualification training, additional mission qualification (off station) training is required. Completion of this training is subject to the availability of suitable off-station mission.

KC10F—KC10 Flight Engineer Initial Qualification Training—PDS Code ZXM—location (note 1)/14 wk 1 day (notes 2 & 3)—Jun 93

Provides proficiency training to initially qualify flight engineers in the KC-10 aircraft. Student is trained in aircraft procedures, techniques, crew responsibilities, systems, performance, air refueling procedures, weight and balance data computations, general navigation, approach monitoring procedures, and other duties required to safely operate the KC-10 in all phases of flight. Training is conducted IAW the current contract, AMCR 51-1 and AMC 60-1. Personnel attending this course would benefit by obtaining the course book prior to start of training. Training consists of academics and simulators (contractor administered) - 9 weeks, 1 day; and flying (Air Force administered) - approximately 5 weeks (note 2).

Prerequisites: 1. SSgt or higher. Member must reenlist or extend to have 36 months active duty service commitment at the completion of flight training.

2. Must meet all requirements listed in AMCR 51-1.

Special Requirements: 1. Top Secret clearance. (BI completed or initiated before departure for training).

2. Medical - Flying Class III. Must be current for at least 90 days after scheduled class completion date.

3. Physiological training (altitude chamber) must be current for at least 90 days after scheduled class completion date.

4. Must report for contractor administered academic and simulator training with required KC-10 aircrew publications.

Quota Control: HQ AMC/XOTT. Waivers: HQ AMC/XOT.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student proficiency or schedule changes.

3. After initial qualification training, additional mission qualification (off-station) training is required. Completion of this training is subject to the availability of suitable off-station missions.

KC10FIC—KC10 Flight Engineer Instructor Course—PDS Code ZXK—location (note 1)/5 wk—Oct 95

Qualifies flight engineers for instructor duties on the KC-10 aircraft. Course consists of contractor-administered academic and simulator training. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Personnel attending this course would benefit by obtaining course book prior to start of training.

Prerequisites: 1. Qualified and current in the KC-10.

2. Be nominated as an instructor candidate by the unit commander.

3. Must meet the requirements listed in AMCR 51-1.

Special Requirements: Must report for contractor administered academic and simulator training with required KC-10 aircrew publications.

Quota Control: Quotas allocated to ARF and NAF by HQ AMC/DPPET. Nominees to fill quotas must be announced to HQ AMC/DPPET and the school a minimum of 30 days prior to CSD. Waivers: HQ AMC/XOT.

Note: Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements. Course consists of academics and simulators (contractor administered) - 3 weeks and 1 day; and unit certification (Air Force administered) - 2 weeks and 1 day.

KC10FRQ—KC10 Flight Engineer Requalification Course—PDS Code 8VQ—location (note 1)/8 wk (notes 2 & 3)—Oct 95

Trains to proficiency previously qualified KC-10 flight engineers who have been out of the aircraft for an extended period of time. Specific training is dependent upon previous experience, date last qualified in the KC-10, and student performance. Overall training is a combination of contractor and Air Force administered training tailored to the individual's needs. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Personnel attending this course would benefit by obtaining the course book prior to the start of training. Training consists of academic and simulators (contractor administered) - 3 weeks; and flying (Air Force administered) - approximately 5 weeks (note 2).

Prerequisites: 1. Previously qualified as a KC-10 flight engineer.

2. Meet the requirements listed in AMCR 51-1.

Special Requirements: 1. Top Secret clearance (BI complete or initiated before departure for training).

2. Medical Flying Class III. Must be current at least 90 days after scheduled class completion date.

3. Physiological training (altitude chamber) must be current for at least 90 days after scheduled class completion date.

4. Must report for contractor administered academic and simulator training with required KC-10 aircrew technical orders.

Quota Control: HQ AMC/DOTT. HQ AMC/DOTT/DPPET must be provided a minimum of 120 days lead time to coordinate requal training with the contractor. Waivers: HQ AMC/DOT.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student proficiency or schedule changes.

3. After requalification training, additional mission qualification (off-station) training may be required. Completion of this training is subject to the availability of suitable off-station missions.

KC10IPR—KC-10 Instructor Pilot Requalification—PDS Code WSB—location (note 1)/8 wk (notes 2 and 3)/AFSC K1065D—Oct 95

Trains to proficiency previously qualified KC-10 instructor pilots who have been out of the aircraft for an extended period of time. Specific training is dependent on previous rated experience, date last qualified in the KC-10, and student performance. Overall training is a combination of contractor and Air Force administered training tailored to the individual's needs. Training and evaluation are conducted according to the current contract, MCR 51-1, and MCR 60-1. Personnel attending this course would benefit by receiving the course book before start of training. Training consists of academics and simulator (contractor administered) - 3 weeks, 4 days; and flying (Air Force administered) - approximately 4 weeks (note 2).

Prerequisites: 1. Previously qualified as an instructor aircraft commander in the KC-10 and currently on flying status.

2. Physiological training (altitude chamber) must be current for at least 90 days after scheduled class completion date.

3. Must report for contractor administered academic and simulator training with required KC-10 aircrew technical orders.

Special Requirements: 1. Top Secret clearance. BI completed or initiated before departure for training.

2. Flying Class II. If expiration date falls within course training dates, the flight physical must be renewed before course entry.

Quota Control: 1. HQ AMC/DOTK. HQ AMC/DOTK/DPPET must provide a minimum of 120 days lead time to coordinate requal training with the contractor. Waivers: HQ AMC/DOTK.

2. Personnel are scheduled for training by HQ AFPC/DPMRO or HQ AMC/XOT. HQ AMC/XOT must be provided with an individual's previous rated record/experience and date last qualified in the KC-10 aircraft.

NOTES: 1. Barksdale, March, or Seymour Johnson AFB as required by training or personnel system requirements.

2. Time to complete this training can vary due to student proficiency or schedule changes.

3. After requalification training, additional mission qualification (off-station) training may be required. Completion of this training is subject to the availability of suitable off-station missions.

KC10P—KC10 Pilot Initial Qualification Course—PDS Code ZXJ—location (note 1)/13 wk 1 day (notes 2 & 3)/AFSC 1065D—Jun 93

Provides proficiency training to initially qualify rated pilots as crew commanders of the KC-10 aircraft. Student is trained in aircraft procedures, techniques, and crew commander responsibilities to effectively and safely operate the KC-10 in all phases of flight. Particular emphasis is placed on air refueling (tanker and receiver), traffic pattern operations, and crew coordination. Overall training is a combination of contractor and Air Force administered training. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Personnel attending this course would benefit by obtaining the course book prior to start of training. Training consists of academics and simulators (contractor administered) - 8 weeks, 1 day; and flying (Air Force administered) - approximately 5 weeks (note 2).

Prerequisites: 1. Rated pilot on flying status.

2. Regular Air Force officer or a career Reserve officer who has less than 17 years of TAFMS.

3. Meet the experience requirements outlined in AMCR 51-1.

4. Physiological training (altitude chamber) must be current for at least 90 days after scheduled class completion date.

5. Must report for contractor administered academic and simulator training with required KC-10 aircrew technical orders.

Special Requirements: 1. Top Secret clearance. BI completed or initiated before departure for training.

2. Medical - Flying Class II. If expiration date falls within course training dates, the flight physical must be renewed before course entry.

Quota Control: HQ AMC/XOTT. Waivers: HQ AMC/XOT.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student proficiency or schedule changes.

3. After initial air refueling qualification training, additional mission qualification (off-station) training is required. Completion of this training is subject to the availability of suitable off-station missions.

KC10PIC—KC10 Instructor Pilot Upgrade Course—PDS Code ZXG—Location (note 1)/7 wk 1 day (note 2)/AFSC K1065D—Oct 95

Qualifies aircraft commanders as instructor pilots in the KC-10 aircraft. Course consists of contractor-administered academic and simulator training followed by Air Force flight training. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Personnel attending this course would benefit by obtaining course book prior to start of training. Training is composed of: academics and simulator (contractor administered) - 3 wk, 1 day; and flying (Air Force administered) - approximately 4 weeks (note 2).

Prerequisites: 1. Qualified and current in the KC-10 as an aircraft commander.

2. Be nominated as an instructor candidate by the unit commander.

3. Meet AMCR 51-1 requirements.

4. Flight physical and physiological training (altitude chamber) must be current for at least 60 days after scheduled class completion date.

Quota Control: Quotas allocated to ARF and NAF by HQ AMC/DPPET. Nominees to fill quotas must be announced to HQ AMC/DPPET and the school a minimum of 30 days prior to class start date. Waivers: HQ AMC/XOT.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student proficiency or schedule changes.

KC10PRQ—KC10 Pilot Requalification Course—PDS Code 8V1—location (note 1)/7 wk (notes 2 & 3)/AFSC 1065D/1063D—Oct 95

Trains to proficiency previously qualified KC-10 pilots who have been out of the aircraft for an extended period of time. Specific training (aircraft commander or copilot) is dependent upon previous rated experience (overall and specific KC-10), date last qualified in the KC-10 and student performance (note 4). Overall training is a combination of contractor and Air Force administered training tailored to the individual's needs. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Personnel attending this course would benefit by obtaining the course book prior to the start of training. Training consists of academics and simulator (contractor administered) - 3 weeks; and flying (Air Force administered) - approximately 4 weeks (note 2).

Prerequisites: 1. Regular Air Force officer or career Reserve officer who has less than 17 years of TAFMS.

2. Previously qualified as an aircraft commander or copilot in the KC-10 and currently on flying status.

3. Physiological training (altitude chamber) must be current for at least 90 days after scheduled class completion date.

4. Must report for contractor-administered academic and simulator training with required KC-10 aircrew technical orders.

Special Requirements: 1. Top Secret clearance. BI completed or initiated before departure for training.

2. Medical - Flying Class II. If expiration date falls within course training dates, the flight physical must be renewed before course entry.

Quota Control: HQ AMC/DOTT. HQ AMC/DOTT/DPPET must be provided a minimum of 120 days lead time to coordinate requal training with the contractor. Waivers: HQ AMC/DOTT.

Personnel are selected for specific training (aircraft commander or copilot) by HQ AFPC/DPMRO or HQ AMC/DPROR after coordination with HQ AMC/DOT. HQ AMC/DOT must be provided with the individual's previous rated record/experience and date last qualified in the KC-10 aircraft.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student proficiency or schedule changes.

3. After requalification training, additional mission qualification (off-station) training may be required. Completion of this training is subject to the availability of suitable off-station missions.

KC10PUP—KC10 Pilot Upgrade Training—PDS Code ZXH—Location (note 1)/6 wk (notes 2 & 3)/AFSC 1065D—Mar 93

Provides proficiency training for KC-10 copilots to upgrade to aircraft commanders. Overall training is a combination of contractor and Air Force administered training. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Personnel attending this course would benefit by obtaining the course book prior to the start of training. Training consists of academics and simulators (contractor administered) - 2 weeks; and flying (Air Force administered) - approximately 4 weeks (note 2).

Prerequisites: Current KC-10 copilot meeting AMCR 51-1 requirements.

Quota Control: Quotas allocated to ARF and NAF by HQ AMC/XOTT. Nominees to fill quotas must be announced to HQ AMC/XOTT and the school a minimum of 30 days prior to class start date. Waivers: HQ AMC/XOTT.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required

by training and/or personnel system requirements.

2. Time to complete this training can vary due to student's flying experience, proficiency or schedule changes.

3. After initial qualification training, additional mission qualification (off-station) training may be required. Completion of this training is subject to the availability of suitable off-station missions.

KC10SSOC—KC10 Senior Staff Officer Qualification Course—PDS Code 69U—location (note 1)/4 wk (note 2)—Jan 96

Provides training for senior staff officers in procedures and techniques of operating the KC-10 aircraft. Training is a combination of contractor and Air Force administered training. Training and evaluation are conducted IAW the current contract, AMCR 51-1 and AMCR 60-1. Graduates of this course are restricted IAW AMCR 51-1 (i.e., this course does not lead to unrestricted aircraft qualification). Training consists of academic and simulator (contractor administered) - 12 days; and flying (Air Force administered) - approximately 2 weeks (note 2).

Prerequisites: 1. Rated pilot on flying status.

2. Attendance limited only to individuals who have a requirement for this training.

3. Medical flight physical and physiological training (altitude chamber) must be current for at least 60 days after class completion date.

Quota Control: HQ AMC/XOTT through HQ AMC/DPPET. Nominees to fill quotas must be announced to HQ AMC/DPPET and the school a minimum of 30 days prior to class start date. Requests for training will be submitted to the respective NAF 90 days prior to class start date. Waivers: HQ AMC/XOTT.

Notes: 1. Barksdale AFB, March AFB, or Seymour Johnson AFB as required by training and/or personnel system requirements.

2. Time to complete this training can vary due to student's previous flying experience, proficiency, or schedule changes.

KC10TIC—KC-10 Tanker Indoctrination Course—PDS Code T0A—location */1 wk/AFSC **—Mar 93

Provides tanker indoctrination training prior to initially qualifying rated pilots as copilots in the KC-10. Training emphasizes tanker and receiver air refueling procedures and techniques. Exposes student copilots to the duties, responsibilities, and crew coordination requirements of the KC-10. Training consists of academics (contractor administered).

Prerequisites: Must be a recent UPT graduate and meet prerequisites of KC-10C.

Quota Control: HQ AMC/XOTT.

* Barksdale, March, and Seymour Johnson AFBs as required by training and (or) personnel system requirements.
** This class is a requirement for UPT accessions prior to course KC-10C.

RC135CFIAC—RC135 Central Flight Instructor Academic Course (Electronic Warfare Officer)—PDS Code 86N—Castle/2 wk—Oct 95

Trains RC-135 electronic warfare officers in the fundamentals and concepts of ground and flight instruction to prepare them as ground training instructors and flight instructors in the RC-135 aircraft. Consists of preattendance study and academics course AZ10. (Course is nonflying.)

Prerequisites: 1. Qualified and current in RC-135 as an electronic warfare officer.

2. Nominated by unit commander as an instructor candidate.

Quota Control: HQ AMC/XOTK through HQ AMC/DPPET.

Quotas allocated to NAF by HQ AMC/DPPET. Quotas controlled and allocated to units by NAF/DOT. Attendee's name and unit of assignment must be announced to CFIC a minimum of 60 days before class start date.

NOTE: Completion training to be conducted in unit.

VC137AC—VC-137 Aircraft Commander-In Unit—PDS Code P7J—in unit/4 wk—Dec 90

Unit-conducted aircrew training. Qualifies aircraft commander candidates on the knowledge and skills necessary to perform aircraft commander duties on the VC-137.

VC137IAC-IU—VC-137 Instructor Pilot Qualification-In Unit—PDS Code P7L—in unit/4 wk—Dec 90

Unit-conducted aircrew training. Qualifies instructor pilot candidates on the knowledge and skills necessary to perform instructor pilot duties on the VC-137.

VC137P—VC-137 Pilot Qualification/Requalification-In Unit—PDS Code P7R—in unit/10 wk—Dec 90

Unit-conducted aircrew training. Qualifies pilot candidates on the knowledge and skills necessary to perform pilot duties on the VC-137 aircraft.

Flying Related

AMC 3S2X1 000—AMC Maintenance Training Management Course—PDS Code 3O5—Fort Dix/1 wk—Oct 96

Qualifies AMC aircraft maintenance training personnel who have been selected to perform as education and training managers in the maintenance arena. Instruction is geared to specific tasks and knowledges that are required in management principles and their application in Air Force training and management situations. Covers various techniques and procedures used to properly and effectively manage a maintenance training program. Air Force and Air Mobility Command indexes, policies, and directives are integrated with course content.

Prerequisites: Students must be assigned to an AMC aircraft maintenance training duty position (3S2X1, additional duty or civilian) before attending this course.

Quota Control: 15 AF/LGM, DSN 837-2545; 21 AF/LGM, DSN 440-3944; HQ AFRES/LGMMT, DSN 497-1653.

AMC ALCE-APE—Airlift Planners Course—PDS Code 9N1—Location: On-Site/1 wk—Mar 93

Indoctrinates unit movement officers and supervisory personnel in the airlift planning and execution of joint combat airlift operations. Instruction includes, but is not limited to, AMC/CRAF aircraft capabilities and limitations, transported force responsibilities, A/DACG/MCC duties, equipment weighing and marking procedures, equipment palletization requirements, aircraft weight and balance, load planning, shoring, inspection and marshalling techniques, and documentation (cargo & passenger manifesting) requirements.

Prerequisites: Personnel must be assigned to or projected for assignment to duty as a unit mobility officer or NCO or Arrival/Departure Airfield Control Group (A/DACG)/Mobility Control Center (MCC) staff. Augmentee or war skill training

requirements accepted.

Quota Control: AMC/DOCOM.

AMC AMSS—Air Mobility Support Squadron Senior Leaders Course—PDS Code 3O4—Fort Dix/1 wk—Oct 96

Provides selected senior officers with supplementary knowledge to enhance managing an air mobility support squadron. Information is AMC-specific and includes command and control, maintenance, and aerial port issues. Command and control subjects include C2, command post, air mobility control center, information processing system/global decision support system, and diplomatic clearances. Maintenance subjects include maintenance management, process improvement and control, tanker airlift control center/logistics operations center, and environmental concerns. Aerial port subjects include aerial port structure and responsibilities, automated transportation systems, terminal security, departure and arrival airfield operations, air reserve component, and air transportation training.

Prerequisites: Newly appointed air mobility support squadron commanders or deputy commanders who have little or no experience in an air mobility support squadron.

Quota Control: HQ AMWC/WCO, DSN 944-3715.

AMC AMOC—Air Mobility Operations Course—PDS Code ZRP—Ft Dix/2 wk/MASL D129011—Oct 96

Education for individuals responsible for effectively integrating and employing the global air mobility process. Course defines air mobility capabilities and components of the air mobility process that planners, executors, and users must consider in conducting airlift and air refueling operations. Stresses how AMC, as the global reach arm of the Air Force, employs air mobility strategy and doctrine in support of US national defense objectives. Hands-on exposure to crisis planning and air mobility concepts is provided during the last week of the course.

Prerequisites: Major, senior captain, lieutenant colonel (with limited air mobility experience), and their civilian equivalents, who are assigned or en route to air mobility assignments requiring planning knowledge of strategic deployment and theater air mobility relationships. Junior captains and senior NCOs are admitted by exception following receipt of a justification letter and AMWC/CC approval. Education is applicable to MAJCOM, NAF, wing and squadron levels; installation, base, division, and higher headquarters personnel; and personnel assigned to liaison positions within AMC. ECL 80 SR.

Special Requirements: Secret clearance stated in orders or available by class start date. Foreign students must have written authorization for access to Air Force, US Army, and US Navy Secret material. Low-quarter shoes required for selected blocks.

Admin Instructions: Report to Bldg 2708, McGuire AFB billeting, no later than 1800, 1 day before class start date. Report to Bldg 5656, Ft Dix NJ, no later than 0745 on class start date (CSD). Assigned to HQ Air Mobility Warfare Center for administrative purposes. The summer uniform is the uniform of the day. Forward two copies of TDY orders no later than 30 days before CSD to HQ AMWC/WCOM, Bldg 5656, Ft Dix NJ 08640-7200. Unit funded per paragraph 7.5, this catalog. BDUs or flight suits will not be worn as the uniform of the day. ***NOTE:*** High-heeled shoes should not be worn for the flight line tour.

Quota Control and Waivers: HQ AMWC/WCOM, DSN 944-2071.

AMC ASAM—Advanced Study of Air Mobility—PDS Code 38Z—Ft Dix/13 mo—Oct 96

This is a 13-month program including an accredited Air Force Institute of Technology (AFIT) master's program designed to build core competency in every aspect of the global reach mission. This intensive curriculum involves 45 graduate credit hours and a graduate research project. It also incorporates existing courses taught at the Air Mobility Warfare Center such as the Air Mobility Operations Course, AMWC Combat Aircrew Tactics Training Course, AMWC Computer-Aided Mission Planning Systems Course, DIRMOBFOR Course, as well as visits to and seminars at the Space Warfare Center, the Information Warfare Center, and the Weapons and Tactics Center. The program also involves TDY to overseas locations for allied air mobility orientation. Graduates receive a fully accredited "Master of Air Mobility" degree from AFIT.

Prerequisites: Rated or support officers with 9 to 13 years of commissioned time. Rated officers must be qualified as an instructor or prior instructor in an AMC weapon system, C-130, or other MAJCOM air refueling platform. Secret clearance. Program will involve a PCS to McGuire AFB NJ.

Special Requirements: Candidates must be recommended and will meet a selection board for approval by HQ AMC/DP. Refer questions concerning the process to DSN 576-5729.

Quota Control: HQ AMC/DPAD, DSN 576-5729.

AMC STGMGR—Stage Managers Course (Aircrew)—PDS Code X0P—Ft Dix/2 days—Oct 96

Provides focused training to predominantly Capts and Majs on the fine art of developing and maintaining an aircrew stage flow at an airfield hub. Students use their operational and air refueling backgrounds to interact with instructor-led exercises. Previous stage managers present lessons learned and tricks of the trade. Graduates receive a special TACC identifier and are often immediately notified to deploy in support of a stage requirement.

Prerequisites: First pilot about to upgrade to aircraft commander, aircraft commanders, or navigators, Capt through Lt Col. AFSCs 11XX, 12XX, 13XX, 14XX, 22XX, or 1C3XX. Personnel selected must have at least 1 1/2 years of experience in the AMC system, at least 1 year of retainability in their mobility position, and be worldwide deployable within 24 hours. A limited number of NCOs will be accepted if they are in TALCE command and control positions.

Special Requirements: Report to McGuire AFB Billeting Office no later than 1600, 1 day before class start date. On the day class starts, report to the Air Mobility Warfare Center, Bldg 5656, Ft Dix, at 0800 with one copy of TDY orders and any amendments. Any combination of the service uniform is authorized for classroom.

Quota Control and Waiver Authority: HQ AMWC/WCOM.

AMC CAFAC—Contingency Airfield Analysis Course—PDS Code OU0—Fort Dix/3 days to 1 wk—Oct 96

Provides background in air mobility systems and detailed global reach laydown concepts. Focuses on the methods for determining the suitability of an airfield for continuous flying operations, maximum on-ground theories, material-handling and fire protection requirements, contingency airfield lighting characteristics, and pavements analysis methods. Students will learn the use of the dynamic cone penetrometer (DCP).

Prerequisites: Civil engineering officers, pavement and equipment

senior noncommissioned officers, heavy repair superintendents, engineering assistants, fire senior noncommissioned officers, deployed commanders, TALCE members, HQ readiness personnel. Attendance at AFIT ENG485, Air Base Combant Engineering Course, Silver Flag training, or AMC CABOC, Contingency Air Base Operations Course, is recommended.

Special Instructions: BDUs/flight suits are authorized for classroom activities.

Quota Control: HQ AMC/CEOX, DSN 576-3950.

AMC CAFLC—Contingency Airfield Lighting Course—PDS Code OS0—Fort Dix/3 days—Oct 96

Provides background in air mobility systems, details global reach laydown concepts, and describes and explains maximum on-ground requirements, calculations, and operations. Course addresses sustainment requirements, airfield lighting requirements and repair procedures for airfield lighting of host nation, bare base, and austere airfields. Course describes in detail the methodology, equipment, and procedures to provide expedient airfield lighting systems.

Prerequisites: Civil engineering officers, utilities superintendant, electricians, power pro, readiness planners, deployed commanders, TALCE members, HQ readiness personnel. Attendance at AFIT ENG485, Air Base Combant Engineering Course, Silver Flag training, or AMC CABOC, Contingency Air Base Operations Course, is recommended.

Special Instructions: BDUs/flight suits are authorized for classroom activities.

Quota Control: HQ AMC/CEOX, DSN 576-3950.

AMC CAFSC—Contingency Airfield Surfaces Course—PDS Code OTS—Fort Dix/3 or 4 days—Oct 96

Provides background in air mobility systems, details global reach laydown concepts, and describes and explains maximum on-ground requirements, calculations, and operations. Course addresses airfield sustainment requirements and repair procedures for host nation, bare base, and austere airfields. Course describes in detail the methodology, equipment, and procedures to expedite airfield surface preparation and repair.

Prerequisites: Civil engineering officers, heavy repair superintendants, pavement and equipment senior noncommissioned officers, deployed commanders, TALCE members, HQ readiness personnel. Attendance at AFIT ENG485, Air Base Combant Engineering Course, Silver Flag training, or AMC CABOC, Contingency Air Base Operations Course, is recommended.

Special Instructions: BDUs/flight suits are authorized for classroom activities.

Quota Control: HQ AMC/CEOX, DSN 576-3950.

AMC CAFUC—Contingency Airfield Utilities Course—PDS Code OT0—Fort Dix/3 days—Oct 96

Provides background in air mobility systems, details global reach laydown concepts. Course focuses on utilities requirements to support an airdrome during contingency operations and the application, use, operation, and reconstitution of the reverse osmosis water purification unit, rapid utilities repair kit, and bare base water distribution systems. Course will also address methods for determining alternate water sources (expansion of water facilities, surface water (locations)), and methods for esstablishing and calculating contingency utilities requirements.

Prerequisites: Civil engineering officers, civil engineering senior noncommissioned officers, utilities superintendants, utilities technicians, deployed commanders, TALCE members, HQ readiness personnel. Attendance at AFIT ENG485, Air Base Combant Engineering Course, Silver Flag training, or AMC CABOC, Contingency Air Base Operations Course, is recommended.

Special Instructions: BDUs/flight suits are authorized for classroom activities.

Quota Control: HQ AMC/CEOX, DSN 576-3950.

AMC CAMP AOC—Computer-Aided Mission Planning - Air Operations Center Track—PDS Code 3OI—Fort Dix/1 wk—Oct 96

Familiarizes personnel with computerized mission planning and execution tools used for command and control of tanker and airlift aircraft during theater employment. Encompasses both lecture and hands-on training on the contingency theater automated planning system in the creation of the air tasking order and airspace control order. Course targets operations and intelligence captains and above in wing and unit tactics or plans who have the potential to deploy as part of a unit, wing, or air operations planning staff.

Prerequisites: Graduate of the AMWC Combat Aircrew Tactics Training Course. Secret or above clearance.

Quota Control: ANG, DSN 278-8333; ACC, DSN 474-7764; AFRES, DSN 497-1301; HQ AMWC/WCOX, DSN 944-2088.

AMC CAMP INTEL—Computer-Aided Mission Planning Intelligence Level—PDS Code 3O0—Fort Dix/1 wk—Oct 96

Familiarizes unit and wing intelligence personnel with the combat intelligence system and the automated associator. Encompasses both lecture and hands-on training. Course targets unit and wing intelligence personnel who have the potential to deploy as part of a unit, wing, or air operations planning staff.

Prerequisites: Graduate of the AMWC Combat Aircrew Tactics Training Course. Secret or above clearance.

Quota Control: ANG, DSN 278-8333; ACC, DSN 474-7764; AFRES, DSN 497-1301; HQ AMWC/WCOX, DSN 944-2088.

AMC CAMP UNIT—Computer-Aided Mission Planning - Unit Track—PDS Code 31O—Fort Dix/1 wk—Oct 96

Familiarizes wing and unit planners with automated mission planning tools currently available to AMC. Encompasses both lecture and hands-on training. Emphasis is on the Air Force mission support system and the multi-source tactical system as well as PC- and laptop-based planning software to include the tactical sensor planner and combat flight planning software. Course targets operations and intelligence captains and above in wing and unit tactics or plans who have the potential to deploy as part of a unit or wing planning staff.

Prerequisites: Graduate of the AMWC Combat Aircrew Tactics Training Course. Secret or above clearance.

Quota Control: ANG, DSN 278-8333; ACC, DSN 474-7764; AFRES, DSN 497-1301; HQ AMWC/WCOX, DSN 944-2088.

AMC CCOC—CE Contingency Operations Course—PDS Code OUI—Fort Dix/1 wk—Oct 96

Provides background in air mobility systems, details global reach laydown concepts. Discusses deployment, force beddown, sustainment, redeployment, and air base operability at bare base and

austere airfields. Details the contingency planning methodology, equipment, and procedures to support air mobility airfield operations.

Prerequisites: Civil engineering officers, civil engineering noncommissioned officers, engineer assistants, readiness noncommissioned officers, deployed commanders, TALCE members, HQ readiness personnel. Attendance at AFIT ENG485, Air Base Combat Engineering Course, Silver Flag training, or AMC CABOC, Contingency Air Base Operations Course, is recommended.

Special Instructions: BDUs/flight suits are authorized for classroom activities.

Quota Control: HQ AMC/CEOX, DSN 576-3950.

AMC CEMC—Contingency Environmental Management Course—PDS Code OUB—Fort Dix/3 days—Oct 96

Provides background in air mobility systems, details global reach laydown concepts. Explains contingency and overseas environmental requirements. Details the methodology, equipment, and procedures to provide the required environmental protection during contingency operations.

Prerequisites: Civil engineering officers, civil engineering superintendants, deployed commanders, TALCE members, HQ readiness personnel, civil engineering environmental technicians. Attendance at AFIT ENG485, Air Base Combant Engineering Course, Silver Flag training, or AMC CABOC, Contingency Air Base Operations Course, is recommended.

Special Instructions: BDUs/flight suits are authorized for classroom activities.

Quota Control: HQ AMC/CEOX, DSN 576-3950.

AMC CSOC—Contingency Support Operations Course—PDS Code 7KX—Ft Dix/2 wk—Oct 96

Provides training for deployed base operations support unit tasking codes in a realistic environment. The course is built on a core of common skills, then adds critical functional tasks in a field environment. After 6 days of training, students participate in a 5-day field training exercise where they work together as an integrated team. Students will be under field conditions for the duration of the class.

Prerequisites: Individuals are scheduled for this course based on unit and wing requirements. No physical profile waivers will be accepted.

Special Requirements: Participants will bring team or individual equipment and be under field conditions for the entire course.

Quota Control and Waiver Authority: HQ AMC/SP, DSN 576-4966.

AMC CCO—AMC Combat Camera Officer Training Course—PDS Code 352—Ft Dix/2 wk—Oct 96

Formal training for all new combat camera and visual information officers (33VX). Encompasses a broad spectrum of topics including hands-on orientation to digital imaging, still and video photographic documentation and production skills, operations plan requirements, combat camera UTC team composition and capability, LOGDET requirements, integration with Joint Task Forces and Unified Commands, foreign clearances, Joint Combat Camera Center (Pentagon) requirements, armament delivery recording, aerial photography and aircrew management, communications, maintenance, officership and field leadership, crew and team management, and combat camera support areas.

Prerequisites: Officers in AFSC 33VX (combat camera and visual information).

Special Requirements: Secret clearance stated in travel orders. Both the service uniform and BDUs are required for classroom activities. Students are also required to bring athletic gear for physical conditioning three times a week.

Quota Control: HQ AMC/SCMV (DSN 576-4600/4609).

AMC CTCRT—AMC Combat Camera Readiness Training Course—PDS Code 353—Ft Dix/2 wk—Oct 96

Trains, coaches, and evaluates combat camera and visual information personnel in basic combat skills and combat-camera-unique courses. Run in conjunction with the 421st Training Squadron's contingency support operations course (CSOC). Designed to familiarize combat camera and combat camera support personnel in basic combat and contingency operations and to be able to survive and operate more effectively in a real world environment. Course is tailored to the unit's experience level, UTC, and LOGDET requirements. Composed of a mix of classroom and field environment instruction of combat skills and critical functional skills along with practical evaluations in the field. The culmination of this training is a 3- to 5-day field training exercise that brings all the deployable functions together as an integral team in a realistic challenging combat experience.

Prerequisites: Combat camera and visual information personnel. No physical profile waivers will be accepted.

Quota Control: HQ AMC/SCMV (DSN 576-4600/4609).

AMC ECU/MEP—AMC TALCE Environmental Control Unit and Generator Operations and Maintenance—PDS Code 347—Ft Dix/2 wk—Oct 96

Provides operations and intermediate maintenance training for the environmental control unit (ECU) and MEP-005A/MEP-805A generator sets. For the ECU, this includes operating procedures; indoor, compressor, and outdoor section operation; heating and cooling refrigerant flow; thermostatic controls; and electrical system troubleshooting. For the generators, this includes controls and instruments for operation of power generation; lubrication system; cooling system; fuel system AC and DC electrical control circuit troubleshooting; paralleling procedures; and service and periodic inspections at fixed and deployed locations.

Prerequisites: 5-skill level (minimum) in AFSC 2A4X2 or 2E1X3 assigned to ALCS, AMOS, AMCS, AMCF, or AMCOMS. EPA certification required to handle refrigerants.

Special Requirements: BDUs or flight suits are authorized for classroom activities.

Quota Control and Waiver Authority: HQ AMWC/WCOMM.

AMC ECU/MEP 001—TALCE Environmental Control Unit and General Troubleshooting—PDS Code 31I—Fort Dix/1 wk—Oct 96

Provides an overview of the wiring diagrams, unit operations, and troubleshooting for the MARC environmental control unit and MEP-005A/MEP-805A generator sets. For the ECU, this includes electrical system troubleshooting, refrigerant recovery, recycling, and recharging the ECU using the Robinair 17800 Recovery System. For the generators, this includes unit operations, AC and DC electrical control circuit troubleshooting, and paralleling procedures.

Prerequisites: Attendees should be familiar with the equipment. If not, recommend that the ECU/GEN exported course be reviewed

before attending. A 3-skill level minimum in AFSC 2A6X2 is required. Active-duty, Reserve, or Guard assigned to ALCS, AMOS, AMCS, AMCF. EPA certification required to handle refrigerants.

Special Instructions: BDUs are authorized for classroom activities.

Quota Control: HQ AMWC/WCOMM, DSN 944-5512.

AMC FIXEDC-2—AMC Fixed Command and Control—PDS Code IVO—Fort Dix/2 wk—Oct 96

Trains airmen, noncommissioned officers, and officers newly assigned to AMC on AMC mission monitoring concepts and the Command and Control Information Processing System (C2IPS). First week covers 10 blocks of instruction including AMC C2 structure, global airlift, mission scheduling, mission numbers, purpose codes, ground times/delay start times, delay indicator system, aircrew management, mission reliability reporting system, and general information. The second week provides hands-on experience with C2IPS. Accuracy on misison movement reporting and aircrew management are stressed.

Prerequisites: Any active-duty, Reserve, or Guard officer with AFSC 13B3E and any noncommissioned officer or airman with AFSC 1C3XX with an assignment to an AMC command post or an air mobility control center may attend.

Quota Control: HQ AMC/DOOCF, DSN 576-5423.

AMC EMT—AMC Emergency Medical Technician—PDS Code 354—Ft Dix/3 wk—Oct 95

Department of Transportation national standard course which prepares students for the National Registry of EMT testing.

Prerequisites: Minimum grade requirement is Sgt and above assigned mobility duties in support of a unit tasking code (UTC). Self-aid/buddy care and American Heart Association basic life support courses required before entry into this course.

Reporting Instructions: Report to Bldg 5656, Ft Dix (Air Mobility Warfare Center). Billeting will be arranged by the AMWC/421st TRS.

Quota Control: HQ AMWC/421st TS.

AMC GYQ55 000—AN/GYQ-55C2IPS Operations—PDS Code 363—Ft Dix/4 days—Oct 96

Provides training for operators on the Command and Control Information Processing System (C2IPS). Practical hands-on instruction for all functional areas of an IPS node. Instructs operators how the IPS application works. Areas covered are logging into IPS, starting and stopping the IPS application; performing data base downloads; creating mission schedules; entering arrivals, departures, and revisions to schedules; crew, air refueling events, maintenance and cargo status; using the mail, phone, and editor utilities; and transmitting messages.

Prerequisites: Officer, noncommissioned officer, or airman assigned to ALCS, AMOS, AMCS, or AMCF. Active duty, Guard, or Reserve personnel may attend.

Special Requirements: Secret clearance. BDUs are authorized for classroom activities.

Quota Control: HQ AMWC/WCOMM, DSN 944-5512.

AMC GYQ55 001—AMC GYQ-55C2IPS System Administrator—PDS Code 348—Ft Dix/5 wk—Oct 96

Provides training for system administrators (SA) on the Command and Control Information Processing System (C2IPS). Provides practical hands-on instruction of hardware and software procedures. Course is divided into six areas—IPS operations, Open Virtual Memory System (Open VMS) operating system, C2IPS architecture, LAN and WAN communication, database procedures, and system administrator duties.

Prerequisites: 5-skill level (minimum) in AFSC 2A4X2 or 3C0Z1 assigned to ALCS, AMOS, AMCS, AMCF, or AMCOMS. Active duty, Guard, and Reserve personnel may attend. Individuals should have familiarity with computer operating systems, data base software, communications protocols, and computer hardware maintenance.

Special Requirements: Secret clearance. BDUs are authorized for classroom activities.

Quota Control: HQ AMWC/WCOMM, DSN 944-5512.

AMC HF ANTENNA—AMC HF Antenna Course—PDS Code 344—Ft Dix/1 wk—Oct 96

Theoretical and practical applications of tactical high frequency (HF) antennas. Includes HF theory, antenna configurations, and mast setup practicals. Antenna configuration practicals include lessons for the Fan-Lite, Sloping Vee, Inverted L and EFTW. Mast lessons include AB-86/GRA-4 and CSA CTM15J. Supports deployable short, medium, and long-range HF communications of the MARC (AN/TSC-114) and C2IPS (AN/GYQ-55) command and control systems.

Prerequisites: Officer, noncommissioned officer, or airman assigned to ALCS, AMOS, AMCS, AMCF, or ALCF. Reserve, Guard, or active-duty personnel may attend.

Special Requirements: BDUs are the authorized uniform for classroom activities.

Quota Control: HQ AMWC/WCOMM, DSN 944-5512.

AMC HOSM—AMC Host Operations System Management—PDS Code 3D0—Fort Dix/3 wk—Oct 96

Comprehensive training for personnel assigned to host operations systems management (HOSM) or tenant operations system management (TOSM) offices. Estimate implementation 1st quarter FY 96. Replaces and improves the Operational Resource Management Journeyman Recurring Training course. Provides the base 1C0X2 functional manager with a supplemental training program and continuation training on the Career Field Education and Training Plan. Concentrates on those areas and tasks most often found to be difficult to teach in the normal work environment. Provides training in publications, system control files, operations resource system management report, aeronautical rating upgrade list, aviation service code upgrade list, auditing of headquarters operations resource information system report, updates to the master reconciliation errors listing, publishing aeronautical orders, aeronautical ratings and badges, flight recorder folder, jump record folder, inprocessing and outprocessing, proper flight records review, conditional and continuous aviation career incentive pay, the different types of conditional hazard duty incentive pay, and updating and auditing flight time and the operational flying data accumulator.

Prerequisites: Noncommissioned officers, airmen, and civilians assigned to HOSM or TOSM offices. Individuals with a DAFSC of 1C0X2 and civilian equivalent may attend this course with supervisor recommendation. 4F0X1 may attend on a standby basis only. Complete the prerequisite checklist before attending the course.

Special Requirements: Uniform will be any combination of blue service uniform authorized for classroom activities. Civilian attire comparable.

Quota Control: HQ AMWC/WCOMA, DSN 944-3486.

AMC INTEL—AMC Intelligence Orientation Course—PDS Code 3O6—Fort Dix/1 wk—Oct 96

Provides newly assigned AMC intelligence personnel an orienation on the AMC mission, organization, intelligence products, and systems. Additional modules include operations and intelligence interface, contingency support, and lessons learned from recent deployments. Concludes with a seminar during which students apply information learned to a series of deployment scenarios.

Prerequisites: Students must be assigned to AMC: active-duty, Air National Guard, or Reserve. 1Lt through major and SrA through senior master sergeant will be accepted to class.

Special Requirements: Secret clearance, stated in travel orders.

Quota Control: HQ AMWC/WCOI, DSN 944-2088.

AMCIP(N)*—Instructor Pilot (Nonflying)—PDS Code D1U—Altus/1 wk 1 day—Oct 95

Ground school course to familiarize pilots and supervisory personnel with the standards and responsibilities of AMC instructor pilots. Conducted as a seminar. Other discussion areas include: psychology of instruction, mechanics of presentation, training procedures and techniques, and evaluation methods. In addition, students observe one entire transition training unit (TTU) regular flight in either the aircraft or simulator. Students participate in workshop exercises, make practice presentations, and complete homestudy assignments.

Prerequisites: Selectees must be currently assigned or scheduled for assignment as instructor pilot or to a position requiring supervision of instructor pilot.

Special Requirements: Secret clearance by class start date. Students should bring applicable 51 series manuals for their aircraft.

Quota Control: HQ AMC/DPPET.

*Course is academic portion of course C141IAC or C5IAC.

AMC IQC—AMC Instructor Qualification Course—PDS Code 358—Ft Dix/2 wk—Oct 96

Qualifies selected AMC personnel to perform as instructors in their assigned unit's training program. Covers principles of instruction, with heavy emphasis on required task and knowledge items and their application in Air Force teaching and learning situations; various teaching methods and techniques; and ways to evaluate learning and rationale for evaluations; problem solving, interpersonal relationships, and communication skills.

Prerequisites: PAFSC 5-skill level or higher (3-skill level for AFSCs with no 5-skill level) serving in or selected for AMC instructor duty.

CCAF credit: 1.

Quota Control: 15 AF/LGM (DSN 837-2545), 21 AF/LGM (DSN 440-3944), HQ AFRES/LGMMT (DSN 497-1653).

AMC JOAMP—AMC Maintenance Officer Procedures—PDS Code WTU—Ft Dix/1 wk 2 days—Oct 96

Provides junior aircraft maintenance officers with pertinent aircraft maintenance management information. Curriculum addresses perspectives on maintenance officer responsibility, aircraft maintenance management per AMCI 21-101, QAFA/ORI inspections, maintenance analysis, HQ AMC/LG logistics readiness division LRC/LRM, environmental issues, maintenance training, career progression, supply, mobility and TALCE operations, process improvement and control, aircraft scheduling, and health of force issues.

Prerequisites: Officers serving in 21A3 AFSC position, capt and below only (unless new to the career field and waived by HQ AMWC/WCLA), with less than 2 years of aircraft maintenance experience. To maximize course benefits, we suggest a minimum of 6 months of aircraft maintenance experience.

Special Requirements: Secret clearance.

Quota Control: 15 AF/LGM; 21 AF/LGM; HQ AFRES/LGMMT; HQ AETC/LGM.

AMC OSM—AMC Operations System Management Manager—PDS Code 30U—Fort Dix/2 wk—Oct 96

Gives OSM managers at any level a better overall view of their responsibilities to HQ AMC, the NAFs, their commanders, and subordinates. Designed to be scenario-based, allowing students to study real-world problems and develop workable solutions. Emphasizes providing the 1C0X2 managers with a wide base of experience in the operations resource management arena. Covers in detail support arrangements, aaeronautical rating board and flight evaluation board procedures, higher headquarters reports, 1C0X2 training management, AFORMS system troubleshooting, mishap procedures, and office and manning concerns. Guest speakers provide real-world experiences to students.

Prerequisites: Noncommissioned officers and civilians assigned to HOSM, SOSM, or TOSM offices. Individuals with a DAFSC of 1C0X2 or civilian equivalent may attend this course with supervisor recommendation. Complete the prerequisite checklist before attending the course.

Special Requirements: Uniform will be any combination of blue service. Civilian attire comparable.

Quota Control: HQ AMWC/WCOMA, DSN 944-3486.

AMC PRO SUPER—AMC Production Superintendent Course—PDS Code WIP—Ft Dix/1 wk 2 days—Oct 96

Provides aircraft maintenance senior noncommissioned officers and civilians with pertinent aircraft maintenance management information. Curriculum addresses production superintendent duties, aircraft maintenance management per AMCI 21-101, *HQ ORI Inspections*, ORIs, HQ AMC/LG logisitics readiness division LRC/LRM, aircraft scheduling, mobility and deployments, process improvement and control, status reporting and MESL, supply, conventional and EWO aircraft generation, and disaster preparedness.

Prerequisites: Experienced MSgt (select) through SMSgt and civilian equivalent serving in or selected for production superintendent duty, with less than 18 months in position.

Special Requirements: Secret clearance.

Quota Control: 15 AF/LGM (DSN 837-2545), 21 AF/LGM (DSN 440-3944), HQ AFRES/LGMMT (DSN 497-1653), HQ AETC/LGM (DSN 487-4600).

AMC SGF—AMC Maintenance Flight Chief—PDS Code 342—Ft Dix/1 wk 2 dys—Oct 96

Provides aircraft maintenance senior noncommissioned officers and civilians with pertinent aircraft maintenance management information. Curriculum addresses maintenance flight chief duties, aircraft maintenance management per AMCI 21-101, UTC familiarization, UMPR/UMD familiarization, environmental concerns, disaster preparedness, mobility/TALCE operations, TACC/LOC familiarization, HQ AMC/LG logistics readiness division LRC/LRM, QAFA, ORI, EWO aircraft generation, training management, maintenance analysis, aircraft scheduling, and health of the force issues.

Prerequisites: Experienced SMSgt (select) through CMSgt and civilian equivalent now filling or selected to fill a flight chief position with less than 18 months in flight chief duty.

Special Requirements: Secret clearance.

Quota Control: 15 AF/LGM (DSN 837-2545), 21 AF/LGM (DSN 440-3944), HQ ARES/LGMMT (DSN 497-1653).

AMC SOSM—AMC Squadron Operations System Management—PDS Code 30V—Fort Dix/3 wk—Oct 96

Comprehensive training for personnel assigned to squadron operations system management (SOSM) or tenant operations system management (TOSM) offices. Replaces and improves the Operational Resource Management Journeyman Training course. Provides the base 1C0X2 functional manager with a supplemental training program and continuation training on the career field eduation and training plan. Concentrates on those areas and tasks most often found to be difficult to teach in the normal work environment. Provides training in publications, aeronautical rating and badges, flight record folder, inprocessing and outprocessing, proper flight records review, requirements for conditional aviation career incentive pay and the different types of conditional hazard duty incentive pay, updating and auditing flight time, the operational flying data accumulator, building and ordering selective training reports, training management reports, scheduling individuals for upgrade, ordering training and resource products, updating training events and upgrading individuals using an AMC Form 46, and updating the AMC-unique system.

Prerequisites: Noncommissioned officers and civilians assigned to SOSM or TOSM offices. Individuals with a DAFSC of 1C0X2 and civilian equivalents may attend this course with supervisor recommendation. 4F0X1 may attend on a standby basis only. Complete the prerequisite checklist before attending the course.

Special Requirements: Uniform will be any combination of blue service. Civilian attire comparable.

Quota Manager: HQ AMWC/WCOMA, DSN 944-3486.

AMC SOT—AMC Senior Officer Tacticians Course—PDS Code 34C—Ft Dix/ 2.5 days—Oct 96

Course is targeted to senior staff officers, lieutenant colonel and above, currently serving in a supervisory or leadership position in flying or intelligence units. Provides AMC senior officers and leaders an executive overview of AMC's tactics program, command initiatives in tactics, and the combat aircrew tactics training and computer-aided mission planners course.

Prerequisites: Lieutenant colonel and above, assigned as squadron-level assistant operations officer or higher.

Special Requirements: Secret clearance stated in travel orders.

Quota Control: ANG (DSN 278-8333), ACC (DSN 474-7764), AFRES (DSN 497-1301), HQ AMWC/WCOX (DSN 944-2088).

AMC TACTICS—Combat Aircrew Tactics Training—PDS Code 349—Ft Dix/3 wk—Oct 96

Trains selected aircrew instructors and intelligence personnel. Curriculum includes lessons on airborne and ground-based threats, combat lessons learned, joint combat operations, tactical mission planning, and culminates in a tactical planning and employment exercise. Graduates serve as tactics instructors and unit program managers.

Prerequisites: Aircrew attendees must be instructors in their weapon system. Aircrew members and intelligence personnel must be prepared to actively discuss and answer questions on their assigned weapon systems function and combat employment. Students must have a Secret or above security clearance stated in their travel orders.

Quota Control: ANG (DSN 278-8333), ACC (DSN 574-7764), AFRES (DSN 497-1301), HQ AMWC/WCOX (DSN 944-2088).

AN/TSC-114MX—AN/TSC-114 MARC Maintenance—PDS Code W9W—Ft Dix/3 wk—Oct 96

Maintenance of the mobility air reporting and communications (MARC) deployable command, control, and communication shelter. The first half of the course includes advanced DOS commands, computer theory, troubleshooting and repair, network theory and troubleshooting, equipment setup, software installation, and LAN administration procedures. Teaches the setup and maintenance of the Have DAMA satellite communication system. The second half of the course covers troubleshooting and repair of MARC shelter internal power distribution; TRC-181 radio fault isolation and repair, including ACP; TRC-182 maintenance; AN/TYQ-26 troubleshooting down to LRU, cable, and wire level; special emphasis on programmable communications processor repair.

Prerequisites: 2A4X2 or 2E1X3, assigned to ALCS, ALCF, AMCS, or AMCF. Reserve, active duty, or guard personnel may attend. A working knowledge of MS-DOS and Windows is encouraged.

Special Requirements: BDUs are authorized for classroom activities. Secret clearance or higher.

Quota Control: HQ AMWC/WCOMM, DSN 944-5512.

AMWC AIC—Air Mobility Warfare Center Academic Instructor Course—PDS Code OTI—Fort Dix/2 wk 2 days—Oct 96

Provides attendees a background in Air Force standards of academic instruction in accordance with AFMAN 36-2236. Patterned after the US Air Force Academic Instructor School. Course graduates attain a basic comprehension of principles related to instruction systems development and delivery such as the instruction systems development process, domains of learning, developmental learning, lesson plan writing, and basic platform skills.

Prerequisites: Must be assigned to the Air Mobility Warfare Center (AMWC) or be selected to teach AMWC-sponsored courses.

Special Requirements: All personnel instructing AMWC courses must attend this course within 6 months of arrival if they have not already attended Academic Instructor School at Maxwell AFB AL.

Quota Control: HQ AMWC/WCSI, DSN 944-2514.

CATS/HELO—Helicopter CATS—PDS Code 4ZN—Nellis/2 wk 4 days—Oct 95

Trains AMC helicopter instructor pilots and unit-assigned intelligence personnel to implement, conduct, and supervise combat

aircrew training programs within their respective units. Classroom presentations and mission planning activities provide information on threat analysis, combat force employment, mission planning, and mission execution. Commanders are responsible for ensuring that graduates instruct in combat aircrew training programs for a minimum of 1 year after graduation. Personnel on a short tour are exempt from this 1-year requirement. Course does not include aircraft flying training.

Prerequisites: Aircrew members must be mission ready instructor qualified. Intelligence officers must possess an AFSC 80XX; intelligence enlisted must possess AFSC 20150 or 20151 and have 1 year's experience at unit level. Waiver authority: Det 2 AMCOS/CATS.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Sixty days before class entry date, any unit having a quota sends the name, rank, SSN, security clearance, and duty title to Det 2 AMCOS/CATS, Nellis AFB NV 89191, info copy to HQ AMC/DOT/INX/DPPET. TDY orders will include the following statement, "Team integrity will be maintained."

Quota Control: HQ AMC/DPPET.

DIRMOBFOR—Director of Mobility Forces (DIRMOBFOR)—PDS Code X0Q—Ft Dix/3 days—Oct 96

Prepares selected senior officers to manage, monitor, and coordinate air mobility forces deploying in support of a contingency, war, natural disaster, humanitarian relief operation, or JCS or command-specific exercise. Stresses how USTRANSCOM and AMC as the global reach arm of the Air Force employs air mobility assets in support of these operations. Emphasizes command relationships, command and control concepts, hands-on interface with communication systems (fixed and deployed) and other topics directly supporting the DIRMOBFOR. Contains a CAPSTONE-type exercise (1 to 2 days) and direct interface with support personnel and past DIRMOBFORs, highlighting problems encountered and their solutions from previous operations. Graduates receive the DIRMOBFOR handbook, a general reference guide and initial activities checklist.

Prerequisites: Officers serving in or selected to fill command billets, nominated or selected by AMC or their respective NAFs and theater air component commands. Students are colonel or colonel- selectees or flag officers.

Quota Control: HQ AMWC/WCOM, DSN 944-2071.

AMC11000 003—AMC Military Freefall HGRP—PDS Code 44W—Location: Various/3 wk—Mar 93

Trains and qualifies officers and airmen whose duty assignment requires military freefall halo parachuting using the High Glide Ratio Parachute (HGRP). The course uses the accelerated freefall technique that provides in-the-air instruction focusing on student freefall stability, aerial maneuvers, air sense, and practice parachute opening procedures. Each student receives a minimum of 12 HGRP freefall jumps, including 2 day and 2 night jumps with oxygen equipment and field gear. Command/Service qualified jumpmasters will receive jumpmaster training and qualification.

Prerequisites: Must be a graduate of an approved military parachutist course; have a current Class III flight physical; and completion of physiological training in the last 3 years. Applicant must be assigned to a unit detail listing (UDL) position that requires active jump status (P prefix or A/K/M 115X0 AFSCs) or be attached to another US military unit requiring active HGRP parachute duty.

Quota Control: HQ AMC/XOTTT-8.

AMC60001—TALO Contingency Training—PDS Code 86Z—Hurlburt/1 wk—Oct 96

Trains theater airlift liaison officers (TALO) in land navigation, portable/tactical radio communications, assault zone operations, ground marked release, verbally initiated, and computed air release point airdrop procedures. The 3 days this course runs are included in the Joint Firepower Control Course (JFCC-A) under the airlift track.

Prerequisites: Open to all officers with assignments requiring the primary duty of AFSC 11A3U or 12A3U. Students must possess a government motor vehicle operators license and be qualified to operate the M-998. USAF weight standards are strictly enforced.

Admin Instructions: Students should possess at least two sets of BDUs and seasonal clothing (e. g., field jacket, insulated underwear, cold/hot weather boots). Required field equipment will be issued. Recommended reading includes Joint Pub 3-17, AMCI 13-101, and AFI 13-217.

Quota Control: HQ AMC/DOOM TALO Functional Manager, DSN 576-3392. Quotas are tied to JFCC quotas..

OSA Lead-In—Instructor Lead-In—PDS Code 4LS—Scott—4 days—Oct 95

Course conducted by the 1375 FTS primarily for C-12F, C-21C, C-9A, and C-29A flight crew members. Training is focused on instruction philosophy, student and instructor relationships, student performance analysis, and practical planning and instructional presentation. This course is a prerequisite to entering into a AMC instructor flight course unless previously qualified as a USAF instructor.

Prerequisites: Must be a flight crew member and be selected to instruct in the respective crew position in the operational environment.

Quota Control: HQ AMC/DPPET.

335AMC2T2X1 004—Air Transportation Manager (ATM) Course—PDS Code 8EV—Ft Dix/1 wk 2 days—Oct 96

Prepares selected officers and NCOs for management positions in AMC-owned and -operated air terminals. Training includes familiarization with all aerial port management functions including the management of budget and resources, unit manpower, and civilian personnel. Detailed instruction is provided in mobility operations. Strong emphasis is placed on upgrading overall career field knowledge through instruction in contracting, vehicle management, records management, passenger and cargo movement management, Air Reserve Component and terminal security. Graduates will have a distinct advantage over nongraduates when transitioning from aerial port supervisors to aerial port managers.

Prerequisites: Active duty - TSgt and MSgt with a PAFSC of 2T271, 2d Lt through Capt with AFSC 21TX; Guard/Reserve - TSgt through SMSgt with a PAFSC 2T2X1, 2d Lt through Maj with AFSC 21TX; and DoD civilians occupying equivalent positions and performing duties in support of AMC airlift. Personnel must be high school graduates or equivalent and be recommended by their supervisors and unit commanders.

CCAF Credits: 2.

Special Instructions: Personnel will report to the McGuire Billeting Office NLT 1600, 1 day before class start date. On the day class starts, report to the Air Mobility Warfare Center, Bldg 5656, Ft Dix,

at 0730 with one copy of TDY orders and any amendments. Any combination of the service uniform is authorized for classroom activities. BDUs are NOT authorized. Civilians must be comparably attired.

Quota Control and Waiver Authority: HQ AMC/DOTV (DSN 576-5080).

335AMC2T2X1 006—Cargo Operations and Systems (COS) Course—PDS Code WD7—Ft Dix/1 wk 4 days—Oct 96

Provides supplemental training in the knowledge and skills necessary to perform air cargo duties in AMC-owned and -operated cargo terminals, with additional familiarization training on the Remote Consolidated Aerial Port Subsystem (RCAPS). Training prepares students for duty within various aerial port work centers, such as the Air Terminal Operations Center (ATOC), cargo processing, and special handling sections. Subjects include command/port structure, automated systems, MILSTAMP, special/hazardous cargo, mission/load planning, center of balance, roller limitations, air inbound processing, and data base management. Students are trained to the intermediate task knowledge and performance level (some hands-on training).

Prerequisites: Active duty – A1C (with a minimum of 12 months of time in grade) through TSgt with a PAFSC of 2T2X1; personnel retraining into the 2T2X1 career field; 2d Lt through Capt with AFSC 21TX; Guard/Reserve - A1C (with a minimum of 12 months of time in grade) through MSgt with a PAFSC of 2T2X1; 2d Lt through Maj with AFSC 21TX; and DoD civilians occupying equivalent positions and performing duties in support of AMC airlift. Personnel attending this course must be high school graduates or equivalent and be recommended by their supervisors and unit commanders. Individuals selected for this course of instruction should possess an entry-level knowledge of the air transportation career field, with emphasis on cargo operations.

CCAF Credits: 2.

Special Instructions: Personnel will report to the McGuire billeting office NLT 1600, 1 day before class start date. On the day class starts, report to the Air Mobility Warfare Center, Bldg 5656, Ft Dix, at 0730 with one copy of TDY orders and any amendments. BDUs are the only authorized uniforms for classroom activities. Service uniforms are NOT authorized. Civilians must be comparably attired. Handheld calculators, gloves, aural hearing protection, and steel-toed boots are required.

Quota Control: HQ AMC/DOTV (DSN 576-5080).

335AMC2T2XX 007—Passenger Operations and Systems (POS) Course—PDS Code WD8—Ft Dix/1 wk 4 days—Oct 96

Provides supplemental training in the knowledge and skills necessary to perform air passenger terminal duties in AMC-owned and -operated passenger terminals with additional familiarization training on the Remote Consolidated Aerial Port Subsystem (RCAPS). Prepares students for duty within various air passenger terminal workcenters, such as passenger processing, passenger service center, passenger ground services, and baggage. Subjects include command structure, passenger support, customer relations, automated systems, travel eligibility, terminal briefings, passenger registration, flight setup, baggage services, passenger comfort, border clearance, flight processing, antihijacking, funds management, mishandled baggage, and data records. Students are trained to the intermediate task knowledge and performance level (some hands-on training).

Prerequisites: Active duty - A1C (with a minimum of 12 months of time in grade) through TSgt with a PAFSC 2T2X1 or personnel retraining into the 2T2X1 career field; 2d Lt through captain with AFSC 21TX; Guard and Reserve - A1C (with a minimum of 12 months of time in grade) through MSgt with PAFSC 2T2X1; 2d Lt through Maj with AFSC 21TX; and DoD civilians occupying equivalent positions supporting AMC airlift. Must be high school graduates or equivalent and be recommended by their supervisors and unit commanders. Individuals should possess an entry-level knowledge of the air transportation career field, with emphasis on passenger service operations.

CCAF Credits: 3.

Special Instructions: Personnel will report to the McGuire billeting office NLT 1600, 1 day before class start date. On the day class starts, report to the Air Mobility Warfare Center, Bldg 5656, Ft Dix, at 0730 with one copy of TDY orders and any amendments. Any combination of the service uniform is authorized for wear during classroom activities. BDUs are NOT authorized. Civilians must be comparably attired.

Quota Control: HQ AMC/DOTV (DSN 576-5080).

335AMC2T2XX 000—Intermediate Wartime Contingency (IWC) Course—PDS Code 7C4—Ft Dix/1 wk 4 days—Oct 96

Provides supplemental training in the knowledge and skills necessary to perform aerial port duties during deployments and contingencies. Training helps prepare students for duty as joint inspectors. Subjects include familiarization with base mobility operations, deployed movement operations, departure and arrival airfield operations, engine running on- and off-loads, installation deployment plan, cargo preparation procedures, center of balance, restraint, hazardous cargo, military and civilian aircraft, contingency load planning, computer-aided load manifesting (CALM) system, and joint inspection. Students are trained to the intermediate task knowledge and performance level (some hands-on training).

Prerequisites: Active duty - A1C (with a minimum of 12 months of time in grade) through TSgt with a PAFSC of 2T2X1; 2d Lt through Capt with AFSC 21TX; Guard/Reserve - A1C (with a minimum of 12 months of time in grade) through MSgt with a PAFSC 2T2X1, 2d Lt through Maj with AFSC 21TX; and DoD civilians in equivalent positions and performing duties in support of AMC airlift. Because the main emphasis of this course is on mobility operations and joint inspections, personnel with no air cargo experience may find this course difficult.

Special Requirements: Recommend individuals with no air cargo experience attend the cargo operations and systems (COS) course before attending IWC. Previous attendance in either the air cargo or intermediate air transportation courses will also suffice. In addition, a review of appropriate ATCBT lessons as listed in the lesson catalog will be helpful to those people attending this challenging course. See AFCAT 36-2223 for additional instructions.

CCAF Credits: 3.

Admin Instructions: Personnel will report to the McGuire billeting office NLT 1600, 1 day before class start date. On the day class starts, report to the Air Mobility Warfare Center, Bldg 5656, Ft Dix, at 0730 with one copy of TDY orders and any amendments. BDUs are the only authorized uniform for classroom activities. Service uniform is NOT authorized. Civilians must be comparably attired. Handheld calculators, gloves, aural hearing protection, and steel-toed boots are required.

Quota Control: HQ AMC/DOTV (DSN 576-5080).

Chapter 8

AIR COMBAT COMMAND

(OPR: HQ ACC/DPTTC)

Command OPR. HQ ACC/DPTTC is command OPR for this chapter. All changes to this chapter must be prepared in accordance with paragraph 1.10 and sent to HQ ACC/DPTTC for required processing.

Section A—Procedures and Instructions

8.1. Selectee's Qualifications. Before sending students to any course listed in Section B, review their qualifications to ensure they meet all course prerequisites. Comply with all administrative and reporting procedures and any special instructions. Students reporting for training who do not meet course prerequisites may be refused entry into training.

8.2. Administrative and Reporting Procedures. For ease of interpretation, certain course information has been consolidated into tables as follows:

8.2.1. Table 8.1, Unit of Assignment/Attachment - ACC.

8.2.2. Table 8.2, Reporting Instructions - ACC.

8.2.3. Table 8.3, TDY Fund Citations, ACC Funded Schools.

8.2.4. Table 8.4, ACC Records Requirements.

8.2.5. Table 8.5, Special Uniform Requirements - ACC.

8.2.6. Table 8.6, Flying Clothing and Equipment - ACC.

8.2.7. Table 8.7, Advance Distribution of Orders - ACC.

8.2.8. Table 8.8, Optional Aircrew Numbering Guide

8.3. Funding Procedures:

8.3.1. ACC travel fund citations listed in table 8.3 are authorized for use under the following conditions:

8.3.1.1. The course is conducted by ACC and the course number is listed in table 8.3.

8.3.1.2. Student is assigned or projected for assignment to ACC or is assigned to another command and attendance will result in direct benefit to the ACC mission. This includes travel costs to and during school for PCS to ACC or TDPFO with TDY en route to an authorized ACC school.

8.3.1.3. Quota has been suballocated by HQ ACC/DPTTC/DPTTF (TRQI A1CC) or other responsible agency as designated under course description. Use of an ACC fund citation when a school quota has not been suballocated or when it has been cancelled may result in the order-publishing agency violating AFR 177-16, *Administrative Control of Appropriations*.

8.3.2. ACC TDY travel funds will not be used for the following:

8.3.2.1. ANG students are funded by the state publishing the travel order.

8.3.2.2. AFRES students are chargeable to the Reserve Personnel Air Force appropriation.

8.3.2.3. Foreign national students are funded by SATP funds.

8.3.2.4. Army, Navy, and other students who are not members of the Air Force are funded by the service to which they are assigned.

8.3.2.5. Non-ACC Air Force students are funded by the command to which they are assigned.

8.3.3. Funding for students attending courses not listed in table 8.3 will be according to paragraph 1.55.3 if travel status is TDY-en route-PCS or TDPFO. Losing MPFs contact their local accounting and finance office (AFO), which will obtain the fund cite from the gaining AFO.

8.3.4. Except as listed above, funding for students is the responsibility of the using commander or unit if travel status is TDY not incident to PCS.

8.4. Transportation to Training:

8.4.1. AFH 24-502, *Excess Cost Procedures* provides guidance on handling transportation problems.

8.4.2. It is ACC policy that military air transportation, when available, will be used for military personnel and encouraged for use by civilian personnel. Adherence to this policy ensures the most economical use of the limited ACC school funds. When military air transportation is not available, the use of commercial air is encouraged to permit the maximum use of commercial air excursion rates. Authorization to use a rental car while attending a course of instruction included in this chapter is not authorized without complete justification. The request must be documented by letter as being the most cost effective means of travel. Approval agency is DPTTC.

8.5. Preparation of Orders. Student orders are prepared using AFI 37-128, *Administrative Orders*, and instructions contained in this section.

8.5.1. For courses requiring an SBI or BI according to course description; SBI must be initiated or completed prior to departure for training. For students not having a completed SBI, include the following statement in the remarks section of student's orders: "SBI or BI requested on student by (activity that initiated request) on (date)." If notified of any student's clearance investigations being placed in adjudication, please contact the training activity immediately to preclude further access to classified material.

8.5.2. For courses conducted by 436 TS, Dyess AFB TX, include security clearance information prerequisites as follows: Courses Y120002, Y120008, and Y120015 require a final Secret clearance. In addition, for courses Y120002 and Y120008, verification that access to Critical Nuclear Weapons Design Information (CNWDI) has been granted must reach the 436 TS before class start date. Courses Y120020 and Y120021 require a Top Secret clearance.

8.5.3. For courses requiring Personnel Reliability Program (PRP) screening, travel orders must show individual's PRP status (that is, A, B, D, or T, as shown in AFI 36-2104, *Nuclear Weapons Personnel Reliability Program*, Attachment 2) and date of certification.

8.5.4. Variations in itinerary authorized for all flying training courses.

8.6. Special Authorizations. Individuals attending ACC courses that are greater than 8 weeks in length may be authorized an additional weight allowance according to JTR. A letter of request must be approved by the order-issuing authority prior to travel to receive this authorization. The letter must contain justification to support the special authorization for the additional weight. In accordance with the JTR, this special authorization is for the member's personal use, comfort, and well-being, and not for the use of dependents. Procedures for shipment and storage of household goods are handled by your local traffic management office (TMO).

8.7. Pay and Allowances for TDY Students. If advance travel per diem is desired, contact AFO at home station before departure. Students may normally receive accrued pay and allowances at TDY station at 30-day intervals, providing they hand-carry endorsed travel orders and DD Form 1588, Record of Travel Payments.

8.8. Flying Clothing and Equipment:

8.8.1. Clothing and equipment for individuals to be trained are shown in table 8.6. AFM 67-1, volume IV, part one, chapter 21, gives instructions on clothing and equipment items to be kept for those who are to leave their unit. MPFs that have quotas in courses shown in section B must contact students as soon as possible after being told of the selection and tell them to go to the equipment management office (EMO). Persons who need flight clothes and equipment, whether on flight status or returning to flight status, must read and sign the statement shown in table 8.6 in two copies. The original is filed in the TDY/PCS relocation folder and the duplicate is given to the member. Other rated personnel will be told to go to the EMO for additional processing.

8.8.2. Crew members' orders should include authorization for additional weight that allows member to hand-carry mandatory flight equipment stated in table 8.6, ref JTR restrictions.

8.9. Records Requirements. Students attending any course listed in section B in TDY-en route-PCS/TDPFO status will hand-carry all records required for PCS movement.

8.9.1. **Flying Training Courses**. Certain flying training courses have unique records requirements which are in table 8.4. All students, regardless of attendance status, will hand-carry the following records:

8.9.1.1. AF Form 1274, Physiological Training.

8.9.1.2. Current SF 88. Must be valid for at least 90 days after class start date for TDY students or 30 days after arrival next PCS station if attending en route-TDPFO.

8.9.2. **Nonflying Courses**. No requirements except as listed in table 8.5.

NOTES: 1. Theses instructions apply only to personnel attending training in TDY status. Personnel attending in TDY-en route-PCS status are authorized early reporting except for initial TDY. Personnel attending training in PCS status will report NLT 2400, 3 duty days before class start date.
2. Pilots and EWOs current in the F-111D/F will report 5 duty days before class.
3. Pilots and WSOs current in the F-111A/E or EF-111 will report to Cannon AFB 2 weeks prior to class start date to complete an F-111D local checkout.
4. EC-130 students will report 30 days prior to class start date.
5. On class start date, students will be transported from billeting to class at 0730.
6. Students arriving for training at Hurlburt Field should know that, while Hurlburt Field is part of the overall Eglin AFB complex, it is a separate and distinct location apaproximately 15 miles from Eglin AFB.
7. Students who have not completed survival schools should arrive 60 days prior to class start date.
8. Notify ACC NCOA, DSN 685-2793, if transportation schedule compels early arrival. Students who arrive more than 1 day before class start may have to stay off base at their own expense or in transient quarters until academy quarters become available.
9. Students who must arrive earlier than reporting date should report to billeting office, Bldg 1332.
10. Personnel programmed for ACC crew duty will proceed directly to ACC unit of assignment, upon course completion. However, ordinary leave en route may be approved with the concurrence of the gaining squadron commander. This leave will not normally eXceed a maximum of 15 days or the RNLTD established by AFPC. For bomber crewmembers, the 329 CCTS will be responsible for administratively documenting this concurrence.
11. Member will report to Castle AFB, billeting office, Bldg 1108, NLT 2200 1 day before class start date.
12. USAFWS students may arrive 2 days prior to class start date.
13. Work utility uniform with field jacket is required for all instruction. Safety-toed shoes are strongly recommended. Cold weather and rain gear are desired for attendees' comfort during September through May. Participants are required to bring leather work gloves. Battle dress uniform with desert pattern camouflage is not authorized for wear by attendees. Participants should bring back supports if provided by home unit.
14. A military driver's license (AF Form 2293) is highly desirable. Qualifications on AF Form 2293 should include forklift through 6K RT, bobtail tow vehicle, 10-ton tractor, 7.5-ton crane, and 10K AT forklift.
15. Transportation and reporting instructions: Attendees using air transportation should arrive at Sacramento Metro Airport to meet one of the arrival windows listed in the allocation message. Ground transportation from airport to Beale AFB will be provided by bus, GOV. Attendees not able to meet arrival windows must coordinate with 9 MUNS, by message, flight arrival information not later than 2 days prior to departing home station. Rental cars are not authorized. Members arriving by POV must report to 6200 B St, rm 115, NLT 2200 on the day before class start date.
16. Billeting and messing facilities are available to all attendees. Billeting cost is $45 for each attendee. All personnel must pay the surcharge at the messing facilities.
17. 9 MUNS/LGWC must be furnished the following, by message, for each attendee not later than 45 days before class start: name, grade, SSN, AFSC, gender, MAJCOM, last explosive safety training date, AGE equipment qualified to operate, and whether a smoker or nonsmoker. Officers must indicate their date of rank.

18. Student personnel reporting TDY should make advance billeting reservations with the Little Rock Billeting Office, DSN 731-6652, during normal duty hours. Due to billeting restrictions, personnel accompanying students TDY to Little Rock AFB will not be lodged at base billeting, and must be housed off-base at the member's expense. Students report at 0730 on CSD to Bldg 1230A room 130.
19. Due to limited space in quarters and no government storage facilities, transient students should restrict HHG shipments to essential items only. If property is stored in a commercial facility, it will be at the student's expense.
20. Students will notity the Fuels Control Center, X5204 or X5206, after checking into lodging.

NOTES:

1. Each ACC host base will cite locally available funds for all ACC personnel serviced by that MPF. Other MPFs issuing NCOA orders for ACC personnel quotas will obtain a fund cite from the 1 TFW/FMPFT, Langley AFB VA 23665-5000, DSN 574-2292.
2. Fund cite will be issued to MPF where the allocation is issued.

NOTES:

1. Includes all records required by ADCOMR 501-1.
2. Medical record must include current AF Form 1042.
3. TDY/PCS orders must be provided to school.
4. Personnel for whom an SBI/BI has not been completed will hand-carry a copy7 of SBI/BI initiated data; that is, AF Form 2583, Request for Personnel Security Action; DD Form 398, Personnel Security Questionnaire; DD Form 1879, Request for Personnel Security Investigation; or other substantiating documents.
5. Personnel desiring per diem/travel pay while at TDY station.
6. Hand-carry AF Form 522, Ground Weapons Training Data and USAF Firearms Qualification, if available, to show small arms qualification date.
7. AFORMS/Flight records requirements: a. TDY-OCS en route - hand-carry both a current AFORMS Individual Data Sheet (IDS) and flight records to the training base.
   b. TDY - returing to home station:
      (1) Students attending courses 90 days duration or less must bring AFORMS IDS in lieu of flight record.
      (2) Students attending courses 91 days duration or more must have their AFORMS record electronically transfered and hand-carry their flight record.
8. Finance records must accompany the student unless the individual is under the “Sure Pay” Program.

Table 8.5. Special Uniform Requirements - ACC.

LINE	A Location	B Requirements
1	Dyess	Winter and summer uniforms are optional year round. Exception: Two sets of BDU uniforms and appropriate outer and under garments and footwear are mandatory for the field training portion of course Y120006.
2	Ellsworth	Summer uniform is authorized from 1 April through 31 October. Winter uniforms are authorized year round. Between 1 October and 1 April, a parka or overcoat may be required.
3	Little Rock	Summer uniform is authorized year round.
4	Pope	

8.10. Application Procedures for In-Flight Refueling Operator. Refer to AFI 36-2204, *Airman Retraining Program* (formerly AFR 39-4), Attachment 5.

8.11. Uniform Requirements. Summer and winter uniform combinations are optional year-round at all ACC training locations, except as listed in table 8.5.

8.12. Centrifuge Training. Current centrifuge training according to ACCR 51-17 is a prerequisite for all fighter formal training courses.

*Numbers refer to notes below.
NOTES: 1. Pilots only.
2. Pilots and copilot.
3. Pilots and navigators.
4. Navigators.
5. Radar navigator and navigator.
6. Radar navigator/offensive system officer.
7. Seasonal uniform optional (uniform combination 1 through 6) for academic phase, utility, or flight for performance, as applicable. Flight suits may be worn to class.
8. Two pair required for loadmasters.
9. Boom mike and clear visor required for loadmasters.
10. RF-4/F-111 crewmembers require a dual-visor assembly, optional for all others.
11. Required for cold weather flying only (Oct-Mar).
12. Loadmasters only.
13. Oxygen must have M-100 microphone installed; phone jacks must be suitable for use with an AIG-10 interphone system. Also, masks should be equipped with offset bayonet.
14. Required for all RF-4 and F-111 training courses.
15. Offensive systems officer/defensive systems officer.

Reference AFM 67-1, vol IV, part 1, chapter 21, paragraph 3f(4). I understand that I am required to hand-carry the clothing and equipment in my possession as required for the survival/flying training course listed in my orders. I further understand that I must report to the equipment management office (EMO) as soon as possible to ensure that clothing and equipment required to be in my possession prior to departure is obtained and issued to me, if applicable.

★Table 8.7. Advance Distribution of Orders - ACC.

LINE	A Location	B Distribution
1	Barksdale	a. Send one copy to ACC NCOA, Barksdale AFB LA, for academy attendees. b. Send one copy of orders to appropriate NCO Academy, 8th AF/FMB and 2 BMW/FMF, Barksdale AFB LA 71110, for individuals assigned to ACC and attending an out-of-command academy. c. Send one copy of orders to 32 AFRES/DOT, Barksdale AFB LA 71110, 30 days before class date for all KC10 flying courses.
2	Bergstrom	a. Send five copies or orders to commandant ACC NCOA, Bergstrom AFB TX 78743, at least 45 days before class start date for academy attendees. b. Send one copy to 1 FM/FMFPT, Langley AFB VA 23665.
3	Beale	a. Send one copy of orders to 1 RS/DOT and 9 OSS/OST, Beale AFB CA 95903, for all personnel attending U2 flying courses.
4	Dyess	a. Send one copy of orders to 436 TS, ATTN: Resource Advisor, 197 Ave D, Dyess AFB TX 79607-1297, to arrive 30 days before class start date as listed in table 8.1, line 11 and line 15. For courses Y120002 and Y120008, include in TDY orders that the individual has beeen granted CNDWI access by his/her commander. b. Send one copy of ordres to the 338 CCTS/DA, Dyess AFB TX 79607, to arrive 30 days before class start date for personnel attending B-1 flying courses.
5	Castle	a. Send one copy of orders to the 329 CCTS/DOF, Castle AFB CA 95342, to arrive 30 days before class start date for all courses listed in table 8.3, line 3. b. Send one copy of orders to the 329 CCTS/DOI, Castle AFB CA 95342, to arrive 30 days before class start date for course SIFC. c. Send one copy of orders to the 329 CCTS/DA, Castle AFB CA 95342, to arrive 30 days before class start date for courses listed in table 8.3, line 2. d. Send one copy of orders to the 329 CCTS/DOD, Castle AFB CA 95342, to arrive 30 days before class start date for courses listed in table 8.3, line 5.
6	Ellsworth	a. Send one copy of orders to the Det 1 USAFWS, Ellsworth AFB SD 57706, for B52BWIC, B1BWIC. b. Send one copy to 99 OG/JETS, 1958 Scott Drive, Suite 5, Ellsworth AFB SD 57706-4710.
7	Hill	Send one copy of orders to 436 TS, ATTN: Resource Advisor, 197 Ave D, Dyess AFB TX 79607-1297, to arrive 30 days before class start date as listed in table 8.1, line 15.
8	Little Rock	Send two copies of orders to 314th OG/ACDT, Little Rock AFB AZ 72076, to arrive 8 days before CSD.
9	Seymour Johnson	a. Send one copy of orders to the 344 AFRES/DOT, Seymour Johnson AFB NC 27531, to arrive 30 days before class start date for all KC10 flying courses. b. For students attending the ACC2FOX1 002 course: Send one copy of orders to HQ ACC/LGSF, 130 Douglas St., Ste 210, Langley AFB VA 23665-2791, at least 10 days before class start date.

Section B—Course Announcements

Flying Training and Related Courses

A10OOBOAPD—USAF Basic Operational Training Course, A/OA-10—PDS Code X19—Davis-Monthan/82 days/AFSC 11F3B—Oct 96

A one-track course to train inexperienced fighter pilots to mission-ready status in the A/OA-10. Flying hours: 86.4.

Prerequisites: a. Graduate of course AT38BRXOAA and has landed a jet fighter/trainer within 45 days of class start date.

b. Small arms qualification is mandatory before course entry for pilots whose follow-on assignment is overseas. Training will be conducted by the losing unit.

Special Requirements: Secret clearance required before class start date.

Personnel Control: HQ AFMPC/DPMROF.

Quota Control and Waiver Authority: HQ ACC/DOT.

A1000IDIPN—USAF Weapons School Instructor Upgrade Course, A-10—PDS Code 86U—Nellis/19 wk 3 days—Oct 96

Upgrades A-10 WIC graduates to instructor status allowing them to provide academic and flying instruction to students of course A10001D0PN and sustain the Weapons School instructor cadre. The course will be conducted only in conjunction with a PCS/PCA assignment to the Weapons School as an instructor.

Prerequisites: Weapons School trainee must be current in the aircraft IAW applicable directives and preferably be a graduate of the A-10 WIC.

Special Requirements: TS/SCI clearance before course entry.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

Waiver Authority: HQ ACC/DOTW.

OPR: HQ ACC/DOTW.

A1000IDOPN—USAF Weapons Instructor Course, A-10—PDS Code 0H9—Nellis/19 wk 3 days/AFSC W-Prefix—Oct 96

Trains qualified A-10 instructor pilots as instructors in all phases of A-10 weapons employment and tactics. Graduates are qualified tactical fighter weapons instructors capable of implementing, conducting, and supervising weapons training programs within their units up to and including headquarters level. Commanders are responsible for ensuring graduates are used as instructors or supervisors in weapons training programs for minimum of 3 years after graduation.

Flying Hours: 63.7.

Prerequisites: Captain with a maximum of 8 years of rated experience. Minimum of 2 years of tactical fighter experience. Minimum of 300 hours A-10 flying time. Minimum of 50 hours as an IP in the A-10. Currently maintaining MS/MR status in the A-10 and by class start date have a minimum of 30 hours in the last 90 days, 10 sorties in the last 30 days, and one sortie within the last 14 days. Basic and water survival training completed.

Special Requirements: Top Secret/SCI clearance or be submitted for Top Secret/SCI before class start date. Physical exams, physiological training, and flight checks must not expire during class training period.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nomination package should include name, SSN, and qualifcations including original aeronautical rating date, total flight time, total PAA time, total IP time, current PAA IP time, ,date PAA IP qualified, projected IP time as of selection board date, and last 30/60/90. Nomination packages should also contain security clerance, civilian/military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement. Individuals should report no earlier than 2 days before class start date. State on the orders, “Dual quarters, variations, and 600 lbs max hold baggage are authorized” and “Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School.” Individuals projected for assignment to active-duty ACC units upon graduation should contact HQ ACC/DOTW at DSN 574-5896 for “after-the-fact” fund cite information.

Quota Control: HQ ACC/DOTW through HQ ACC/DPTTC. Waiver Authority: HQ ACC/DOTW.

OPR: HQ ACC/DOTW.

A10OOIOAPD—USAF Instructor Pilot Upgrade Course, A/OA-10—PDS Code VB5—Davis-Monthan/duration */AFSC K1115N—Jun 93

A three-track course which upgrades a current A/OA-10 pilot to formal course instructor pilot (IP). Sorties/flying hours: IPA - 18/39.1; IPB - 13/28.3; IPC - 13/28.6.

Prerequisites: a. All tracks:

(1) Current, qualified, A-10 or OA-10 pilot with landing currency upon course entry date.

(2) Current physiological training certificate according to AFR 50-27, *Air Force Aerospace Physiological Training Program*.

(3) Current centrifuge training according to ACCR 51-17.

(4) Previous fighter Instructor pilot experience (FTU or operational unit).

(5) FAC experience in any FAC aircraft, or graduate of course A10OOTXAPD/TX-4 (OA-10 Top-Off).

(6) Secret clearance completed and approved prior to course entry date.

b. IPA Track. No previous A-10 or OA-10 formal instructor course experience.

c. IPB Track. Previous graduate of an A-10 formal instructor upgrade course.

d. IPC Track. Previous graduate of an OA-10 formal instructor upgrade course.

Instructor pilot course candidates not current in the A/OA-10 must complete the appropriate A10OOTXAPD training prior to IP course entry date.

Personnel Control: HQ AFPC/DPMROC.

Quota Control and Waiver Authority: HQ ACC/DOT.

*IPA - 6 wk 2 days; IPB - 5 wk 1 day; IPC - 4 wk 4 days.

A10OONVGPD—USAF Night Vision Goggle Training Course—PDS Code XXN—Davis-Monthan/1 wk 2 days—Apr 95

Trains mission ready A/OA-10 pilots in the use (CAT-1) and tactical applications (CAT-2) of night vision goggles (NVG).

Prerequisites: a. Current and qualified A-10, OA-10, or dual-qualified pilot.

b. Has flown the following sorties within 30 days of entering the training program:

1. Night Surface Attack.

2. Night Surface Attack Tactical or Night Air Strike Control.

Personnel Control: HQ AFPC/DPMROF.

Quota Control: HQ ACC/DOT through HQ ACC/DPATC. Waiver Authority: HQ ACC/DOT.

A10OOTXAPD—USAF Transition/Requalification Course, A/OA-10—PDS Code XFW—Davis-Monthan/duration */AFSC 1111N—Dec 93

A five-track course which trains:

a. To mission ready status, experienced fighter pilots without A/OA-10 experience OR previously experienced A/OA-10 pilots who are no longer qualified; previously experienced A-10 pilots with FAC experience; and previously experienced OA-10 pilots without A-10 experience.

b. Basic initial qualification and conversion for senior officers; current A-10 pilots in the OA-10 mission.

Prerequisites: a. A graduate from course AT38BRXOAA, or has landed a jet fighter/trainer within 45 days of class start date.

b. Current physiological and centrifuge training is required prior to course entry.

c. Small arms qualification is mandatory prior to course entry for pilots with follow-on overseas assignments. Training will be conducted by the losing unit.

d. TX-1 Track, one of the following:

(1) 300 MP/IP front/left seat hours in fighter/attack aircraft and current within 42 months of course entry.

(2) 500 MP/IP front/left seat hours in fighter/attack aircraft and current within 5 years of course entry.

(3) 1000 MP/IP front/left seat hours in fighter/attack aircraft and current within 8 years of course entry.

(4) An experienced A-10 or OA-10 pilot, noncurrent in the aircraft between 5 and 8 years of course entry.

e. TX-2A Track: Experienced A-10 pilot, noncurrent in the A/OA-10 more than 6 months but less than 5 years, whose most recent A/OA-10 experience is as an A-10 or dual-qualified A/OA-10 pilot.

f. TX-2B Track: Either an experienced OA-10 or A-10 pilot with Air FAC experience, noncurrent in the A/OA-10 for more than 6 months but less than 5 years, whose most recent A-10/FAC experience was as an Air FAC.

g. TX-3 Track: Colonel selectees or above and approved by HQ ACC/DPO or HQ USAF/DPOA.

h. TX-4 Track: Current A-10 pilot.

Special Requirements: Secret clearance before class start date.

Personnel Control: HQ AFPC/DPMROC.

Quota Control: HQ ACC/DOT.

Waiver Authority: HQ ACC/DO.

TX-1 - 16 wk 1 day; TX-2A or TX-2B - 11 wk 4 days; TX-3 - 4 wk 1 day; TX-4 - 3 wk, 3 days.

A10OTRAAD/TX3—USAF Senior Officer Upgrade Course, A-10—PDS Code GXL—Davis-Monthan/3 wk 3 days/AFSC 1115N—Jun 93

Trains senior officers to operate the A-10 as a weapon system. Flying hours: 20.7.

Prerequisites: a. Colonel selectee or above.

b. Colonels approved by either HQ ACC/DPO or HQ AFPC/DPMOB.

c. Landed a jet fighter/trainer or graduated from course AT38BRXOAA within 45 days of the class start date.

d. Physiological training and flight physical must be current.

e. Meet criteria in ACCR 51-50, volume I, chapter 6.

Special Requirements: Secret clearance before course entry.

Quota and Waiver Control: HQ ACC/DOT.

B1CC—B-1B Capabilities Course—PDS Code X0T—Dyess/2 days—Dec 93

Provides a brief overview of B-1B capabilities. Designed for the staff officer who requires a limited knowledge of B-1B operations and systems.

Prerequisites: Staff officer (Lt Col and below) working B-1B issues.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1CIQC—B-1 Copilot Initial Qualification Course—PDS Code 76H—Dyess/19 wk 4 days/AFSC 1233N—Mar 93

Trains pilots in the procedures and techniques required to operate the B-1 weapon system as a qualified copilot. Training consists of: Academics - 10 weeks 4 days; flying - 9 weeks.

Prerequisites: 1. Rated pilot on flying status.

2. Regular Air Force officer, or a career reserve officer who has less than 15 TAFMS.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability—critical. Administrative certification is possible if critical or controlled certification cannot be obtained.

3. Medical—Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

4. Current physiological training. If expiration falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B1DCFIC—B-1 Defensive Systems Officer Central Flight Instructor Course—PDS Code 76J—Dyess/4 wk 2 days—Sep 93

Trains defensive systems officers in the fundamentals and concepts for qualification as ground training and flight instructors in the B-1 aircraft. Consists of preattendance study, academics, and trainers. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Current and qualified in B-1 as a defensive systems officer.

2. Must be nominated as instructor candidate by unit commander.

3. Possess one of the following experience levels:

a. 1300 hours total with 250 B-1 hours.

b. 1000 hours total with 300 B-1 hours.

c. 650 hours total with 500 B-1 hours.

4. One year as a B-1 defensive systems officer.

Special Requirements: 1. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

2. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1DFTC—B-1 Defensive Systems Officer Faculty Training Course—PDS Code 76K—Dyess/3 wk—Jun 93

Provides training for an instructor to transition from instruction or evaluation duties in the units to duties in the FTU environment. The course is presented in three phases. Phase one includes inprocessing, orientation, and general academics. Phase two consists of academics specifically related to defensive systems officers to checkout as an instructor and operator of training devices. Phase three includes flying training designed to enhance performance as an FTU instructor. The level of instruction and time devoted to each phase will be tailored to meet the needs of the individual.

Prerequisites: Qualified as a B-1 instructor defensive systems officer and assigned PCS to 96 WG/FTU.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1DIQC—B-1 Defensive Systems Officer Initial Qualification Course—PDS Code 76L—Dyess/19 wk 4 days/AFSC 1575N—Mar 93

Provides training in procedures and techniques required to operate defensive systems and communications equipment in the B-1 aircraft. Particular emphasis is placed on the application of electronic warfare countermeasures, both radio frequency and expendable, in defense of the aircraft. Training consists of: academics - 10 weeks, 4 days; flying - 9 weeks.

Prerequisites: 1. Rated navigator on flying status.

2. Regular Air Force officer or a career reserve officer who has less than 15 years of TAFMS.

3. Completed electronic warfare officer training - AETC course N-V6A-C or equivalent.

Special Requirements: 1. Top Secret/SBI completed or initiated departure training.

2. Personnel reliability—critical. Administrative certification is permissible if critical or controlled certification cannot be obtained.

3. Medical Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

4. Current physiological training. If expiration falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B1DRQA—B-1 Defensive Systems Officer Requalification Course (In-Unit)—PDS Code QBM—Dyess/4 wk*—Jun 93

Nonflying portion of requalification training conducted at FTU consisting of a program of academic and simulator instruction concentrating on aircraft systems and operating procedures. Prepares former B-1B defensive systems officers, who require weapon system requalification, for in-unit requalification flight training. Time to complete this training may vary due to student's previous flying experience, proficiency, or schedule changes. FTU program content and length is tailored for each crew member based on previous experience and time elapsed since last assignment in the B-1B. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit flying training.

Prerequisites: 1. Rated navigator currently on flying status who has less than 17 years of TAFMS.

2. Previously qualified as a defensive systems officer in the B-1B.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Administrative certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

* Reflects only CCTS portion of individual's requalilication training program.

B1DSC—B-1B Defensive Systems Course—PDS Code X0U—Dyess/6 wk 3 days/AFSC 1575N—Dec 93

Provides defensive systems initial qualification training to offensive systems officers (OSO). Consists of academics, simulators, and flying. Particular emphasis is placed on the application of electronic warfare countermeasures (both radio frequency and expendable) in defense of the aircraft. Graduates are initially qualified according to ACCR 60-2 DSO criteria, and may (at the gaining unit's discretion) maintain WSO qualification according to ACCR 60-2 and ACCR 51-50, volume 24.

Prerequisites: B-1B OSO who has completed an approved electronic warfare training school. The OSO must meet the minimum flying hour experience requirements and post-training retainability specified in ACCR 51-50, volume 24.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1DSCA—B1 Defensive Systems Course (In Unit)—PDS Code 0BO—Dyess/2 wk 4 days/AFSC 12B3C—Jan 96

Nonflying portion of defensive systems course training conducted at the FTU. Provides defensive systems initial qualification training to offensive systems officers (OSO). Consists of academics and simulators with particular emphasis placed on the application of electronic warfare countermeasures (both radio frequency and expendable) in defense of the aircraft. Graduates are initially qualified according to ACCR 60-2 DSO criteria and may, at the gaining unit's discretion, maintain WSO qualification according to ACCR 60-2 and ACCR 51-50, volume 24. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit upgrade flying training.

Prerequisites: B-1B OSO who has completed an approved electronic warfare training school. The OSO must meet the minimum flying hour requirements and post-training retainability specified in the B1DSC syllabus.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

B1DWSC—B-1 Defensive Systems Officer Wing Staff Course—PDS Code 76M—Dyess/11 wk—Jun 93

Provides training for wing staff officers in the B-1 weapons systems. Consists of academic and simulator training only.

Prerequisites: Rated defensive systems officer on flying status programmed for assignment to or performing duty in the wing staff.

Special Requirement: Secret clearance by class start date.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1OCFIC—B-1 Offensive Systems Officer Central Flight Instructor Course—PDS Code 76N—Dyess/4 wk 2 days—Sep 93

Trains offensive systems officers in the fundamentals and concepts for qualification as ground and flight instructors in the B-1 aircraft. Consists of preattendance study, academics, and trainers. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Current and qualified in B-1 as an offensive systems officer.

2. Must be nominated as instructor candidate by unit commander.

3. Possess one of the following experience levels:

a. 1300 hours total with 250 B-1 hours.

b. 1000 hours total with 300 B-1 hours (prior RN/EW).

c. 650 hours total with 500 B-1 hours.

4. One year of experience as a B-1 offensive systems officer.

Special Requirements: 1. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical mst be renewed before class entry.

2. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1OFTC—B-1 Offensive Systems Officer Faculty Training Course—PDS Code 76P—Dyess/3 wk—Jun 93

Provides training for an instructor to transition from instruction or evaluation duties in the units to duties in the FTU environment. The course is presented in three phases. Phase one includes inprocessing, orientation, and general academics. Phase two consists of academics specifically related to defensive systems officers to checkout as an instructor and operator of training devices. Phase three includes flying training designed to enhance performance as an FTU instructor. The level of instruction and time devoted to each phase will be tailored to meet the needs of the individual.

Prerequisites: Qualified as a B-1 instructor offensive systems officer and assigned PCS to 96 WG/FTU.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1OIQC—B-1 Offensive Systems Officer Initial Qualification Course—PDS Code 76Q—Dyess/19 wk 4 days/AFSC 1525N—Mar 93

Provides training in procedures and techniques required to operate the offensive systems in the B-1 aircraft. Particular emphasis is placed on navigation and weapon delivery procedures. Training consists of: Academics - 10 weeks 4 days; flying - 9 weeks.

Prerequisites: 1. Rated navigator on flying status.

2. Regular Air Force officer, or a career reserve officer who has less than 15 years of TAFMS.

3. A graduate of AETC course N-V6A-A or equivalent.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Administrative certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B1ORQA—B-1B Offensive Systems Officer Requalification Course—PDS Code WPP—Dyess/4 wk*—Dec 93

Nonflying program of academic and simulator instruction concentrating on aircraft systems and operating procedures. Prepares former B-1B offensive systems officers for in-unit requalification flight training. Time to complete this course may vary due to an individual's previous flying experience, proficiency, or schedule changes. Actual program content and length is tailored for each crewmember based on previous experience and time elapsed since last B-1B assignment. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit flying training.

Prerequisites: Former B-1B OSO currently on flying status or returning to flying status who has less than 17 years of TAFMS.

Special Requirements: a. Top Secret/SBI completed or initiated before departure for training.

b. Personnel Reliability - critical. Administrative certification is permissible if critical or controlled certification cannot be obtained.

c. Medical - Flying Class II.

d. Current physiological training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC or HQ AFPC/DPMROT.

* Only reflects the FTU portion of the individual's requalification training program.

B1OSC—B-1B Offensive Systems Course—PDS Code MQF—Dyess/12 wk—Sep 93

Provides offensive systems training to selected instructor defensive systems officers (IDSO). Consists of procedures and techniques required to operate the offensive systems station with emphasis on navigation. Graduates are trained for the purpose of operating the offensive station avionics while performing IDO or WSO duties. WSO graduates must be qualified according to ACCR 60-2 OSO criteria, and may, at the gaining unit's discretion, maintain WSO qualification according to ACCR 60-2 and ACCR 51-50, vol 24.

Prerequisites: Must meet the minimum flying hour, experience requirements, and post-training retainability specified in ACCR 51-50, vol 24.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1OSCA—B1 Offensive Systems Course (In Unit)—PDS Code 0BW—Dyess/7 wk 1 day/AFSC 12B3C—Jan 96

Nonflying portion of offensive systems course training conducted at the FTU. Training consists of procedures and techniques required to operate the offensive systems station with emphasis on navigation. Graduates are trained for the purpose of operating the offensive station avionics while performing IDO or WSO duties. WSO graduates must be qualified according to ACCR 60-2 OSO criteria, and may, at the gaining unit's discretion, maintain WSO qualification according to ACCR 60-2 and ACCR 51-50, volume 24. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit upgrade flying training.

Prerequisites: Must meet the minimum flying hour, experience requirements, and post-training retainability specified in the OSC syllabus.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

B1OWSC—B-1 Offensive Systems Officer Wing Staff Course—PDS Code 76R—Dyess/11 wk 4 days—Jun 93

Provides training for wing staff officers in the B-1 weapons systems. Consists of academic and simulator training only.

Prerequisites: Rated offensive systems officer on flying status programmed for assignment to or performing duty in the wing staff.

Special Requirement: Secret clearance by class start date.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1PCFIC—B-1 Pilot Central Flight Instructor Course—PDS Code 76S—Dyess/4 wk 4 days—Sep 93

Trains pilots in the fundamentals and concepts for qualification as ground training and flight instructors in the B-1 aircraft. Consists of preattendance study, academics, trainer, and flight training. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Current and qualified as a B-1 pilot.

2. Must be nominated as instructor candidate by unit commander.

3. Possess one of the following experience levels:

a. 1200 total hours with 800 B-1 hours.

b. 1400 total hours with 500 B-1 hours.

c. 1500 total hours with 450 B-1 hours.

d. 2000 total hours with 250 B-1 hours and prior IP.

4. One year of experience as a B-1 aircraft commander.

Special Requirements: 1. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

2. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1PFTC—B-1 Pilot Faculty Training Course—PDS Code 76T—Dyess/3 wk—Jun 93

Provides training for an instructor to transition from instruction or evaluation duties in the units to duties in the FTU environment. The course is presented in three phases. Phase one includes inprocessing, orientation, and general academics. Phase two consists of academics specifically related to pilots to checkout as an instructor and operator of training devices. Phase three includes flying training designed to enhance performance as an FTU instructor. The level of instruction and time devoted to each phase will be tailored to meet the needs of the individual.

Prerequisites: Qualified as a B-1 instructor pilot and assigned PCS to 96 WG/FTU.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1PIQC—B-1 Pilot Initial Qualification Course—PDS Code 76U—Dyess/19 wk 4 days/AFSC 1235N—Mar 93

Provides training to initially qualify pilots as crew commanders of B-1 aircraft. Student is trained in aircraft procedures, techniques, and crew commander responsibilities to effectively and safely operate the weapon system in all phases of flight. Training consists of: Academics - 10 weeks 4 days; flying - 9 weeks.

Prerequisites: 1. Rated pilot on flying status.

2. Regular Air Force officer, or a career reserve officer who has less than 15 years of TAFMS.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Possess the following experience:

a. 1250 total flying hours with 500 fixed wing jet hours.

b. 12 months as an aircraft commander/instructor pilot.

3. Personnel Reliability - critical. Administrative certification is permissible if critical or controlled certification cannot be obtained.

4. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

5. Current physiological training. If expiration falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B1PRQA—B-1 Pilot Requalification Course (In-Unit)—PDS Code N21—Dyess/4 wk—Mar 93

Nonflying portion of requalification training conducted at CCTS consisting of a program of academic and simulator instruction concentrating on aircraft systems and operating procedures. Prepares former B-1B aircraft commanders, who require weapon system requalification, for in-unit requalification flying training. Time to complete this training may vary due to student's previous flying experience, proficiency, or schedule changes. CCTS program content and length are tailored for each crew member based on previous experience and time elapsed since last assignment in the B-1B. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit requalification flying training.

Prerequisites: 1. Rated pilot currently on flying status who has less than 17 years of TAFMS.

2. Previously qualified as an aircraft commander in the B-1B.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Administrative certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1PUP—B-1 Pilot Upgrade Course—PDS Code 97N—Dyess/4 wk 3 days/AFSC 1235N—Sep 93

Flying training course for B-1B copilots in the Pilot Upgrade Program. Individuals are graduated as aircraft commanders.

Prerequisites: 1. B-1B copilot who is current and qualified in the aircraft.

2. Must be nominated by the unit commander.

3. Possess one of the following experience levels:

a. 900 total hours, 500 jet hours, 500 B-1 hours.

b. 1250 total hours, 500 jet hours, 300 B-1 hours.

c. 1250 total hours, 500 jet hours, 200 B-1 hours, former IP.

4. Must have completed all Category I training before class start date.

Special Requirements: 1. Top Secret/SBI completed.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration date falls within 60 days after class graduation, flight physical must be renewed before class entry.

4. Current physiological training. If expiration date falls within 60 days after class graduation, flight physical must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1PUPA—B-1B Pilot Upgrade Course (In-Unit)—PDS Code 8SE—Dyess/1 wk 1 day*—Jun 93

Nonflying portion of training conducted at FTU for B-1 copilots upgrading to aircraft commander prior to in-unit upgrade flight training. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit upgrade flying training.

Prerequisites: 1. B-1B copilot who is current and qualified in the aircraft.

2. Must be nominated by the unit commander.

3. Must complete all Category I training before class start date.

4. Possess one of the following experience levels:

a. 900 hours total with 500 B-1 hours.

b. 1250 hours total 500 jet with 300 B-1 hours.

c. 1250 hours total 500 jet with 200 hours B-1 and a former IP.

Special Requirements: 1. Top Secret/SBI completed.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

* 6 training days - reflects only CCTS portion of individual's pilot upgrade program.

B1PWSC—B-1 Pilot Wing Staff Course—PDS Code 76V—Dyess/13 wk 1 day—Jun 93

Provides training for wing staff officers in the B-1 weapons systems. Consists of academic and simulator training only.

Prerequisites: Rated pilot on flying status programmed for assignment to or performing duty in the wing staff.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1SOBQC—B-1B Senior Officer Basic Qualification Course—PDS Code XG3—Dyess/4 wk 3 days—Dec 93

Provides training for senior officers to obtain basic qualification in the B-1B. Consists of academics, simulator, flight training, and a basic qualification in-flight check.

Prerequisites: 1. Rated pilot.

2. Senior officer (0-6 and above) who is programmed for assignment to or is performing in a senior officer position that requires a B-1B qualification rating.

3. Not previously mission ready in a B-1B.

Special Requirements: 1. Top Secret/SBI clearance.

2. Medically qualified.

3. Current physiological training.

4. Personnel reliability - critical. Administrtive certification is permissible if critical or controlled certification cannot be obtained.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1SOBRQA—B-1B Senior Officer Basic Requalification Course—PDS Code XFY—Dyess/2 wk 2 days—Dec 93

Provides academic and simulator training which enables senior officers to reacquire a basic qualification in the B-1B. Course completion occurs after in-unit flying training and flight evaluations.

Prerequisites: 1. Rated pilot.

2. Senior officer (0-6 selectee and above) who is programmed for assignment to or is performing in a senior officer position that requires a B-1B qualification rating.

3. Current physiological training.

4. Personnel reliabiity - critical. Administrative certification is permissible if critical or controlled certification cannot be obtained.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1SSOC—B-1 Senior Staff Orientation Course—PDS Code 76W—Dyess/1 wk—Jun 93

Provides orientation for senior officers in the B-1 weapon systems. Consists of academic and simulator training only. May not be used as qualification or requalification training.

Prerequisites: Rated officer (O-5 and above) programmed for assignment to or performing in senior staff at wing level or above that involves duties that directly relate to B-1 operations or staffing B-1 issues.

Special Requirement: Secret clearance by class start date.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B1WCFIC—B-1 Instructor Weapon Systems Officer—PDS Code 0AO—Dyess/4 wk 2 days/AFSC K12B3C—Jan 96

Trains WSOs in the fundamentals and concepts for qualification as ground training and flight instructor in the B-1 aircraft. Consists of preattendance study, academics, trainers, and flights. Course is mandatory prior to upgrade to instructor weapons system officer status.

Prerequisites: 1. Current and qualified in B-1 as a weapon systems officer.

2. Must be nominated as instructor candidate by unit commander.

3. Possess one of the following experience levels:

a. 650 hours total with 300 hours in the DSO seat and 300 hours in the OSO seat.

b. 1000 hours total with 250 hours in the DSO seat and 250 hours in the OSO seat.

c. 1300 hours total with 200 hours in the DSO seat and 200 hours in the OSO seat.

4. One year qualified as a weapon systems officer.

Special Requirements: 1. Medical-Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

2. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

B1WIQC—B-1 Weapon Systems Officer Initial Qualification Course—PDS Code 0AI—Dyess/20 wk 2 days/AFSC 12B3C—Jan 96

Provides training in procedures and techniques required to operate defensive systems, offensive systems, and communications equipment in the B-1 aircraft. Particular emphasis is placed on the application of electronic warfare countermeasures, both radio frequency and expendable, in defense of the aircraft, navigation, and weapon delivery procedures.

Prerequisites: 1. Rated navigator on flying status.

2. A graduate of navigator and electronic warfare officer training.

3. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

4. Current physiological training. If expiration falls within 60 days after scheduled class graduation, physiological training must be renewed before course entry.

Special Requirements: Top Secret/SBI completed or initiated before departure for training (NA Air National Guard).

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

B1000IDOAE/WE—USAF Bomber Weapons Instructor Course - B1—PDS Code X1C—Ellsworth/19 wk 3 days/AFSC "W" Prefix—Oct 96

Trains qualified instructor pilots and instructor WSO (ISO or DSO) in all phases of B-1 weapons employment and tactics. Graduates are qualified bomber weapons and tactics instructors capable of implementing, conducting, and managing the weapons and tactics training programs at their units up to and including headquarters level. They will also coordinate bomber strike planning for the deployed to ensure effective use of his or her resources. Commanders are responsible for ensuring graduates are used as instructors or supervisors in tactics and weapons training programs for a minimum of 3 years after graduation. Flying hours: 68.0.

Prerequisites: Captain with a maximum of 8 years of rated experience. Minimum of 2 years of bomber experience. Minimum of

50 hours as an instructor in the B-1. By class start date: 45 hours in the last 90 days, 15 hours one night sortie and one night air refueling in the last 30 days, and at least one IMC/night terrain following flgiht in the last 14 days. Must be NVG qualified. Pilots must be visual formation qualified and complete a proficiency exercise to include no flap touch and go, and SCAS off landing within the last 60 days. Basic water and survival training completed.

Special Requirements: Top Secret/SCI clearance or be submitted for Top Secret/SCI before course attendance. NATO Secret and CNWDI access required. Physical exams, physiological training, and instrument and flight checks must not expire during the training period.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nomination package should name, SSN, and qualifications to include original aeronautical rating date, total flight time, total PAA time, total instructor time, current PAA instructor time, date PAA instructor qualified, projected instruction time as of selection board date, and last 30/60/90. Nomination packages should also contain security clearance, civilian and military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement. Individuals should report no earlier than 2 days before the class start date. State on orders, "Dual quarters, variations, and 600 lbs maximum hold baggage are authorized." and "Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School." Individuals projected for assignment to active-duty ACC units upon graduation should contact HQ ACC/DOTW at DSN 574-5896 for "after-the-fact" fund cite information.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC. OPR and Waiver Authority: HQ ACC/DO.

B2FIC—B2A Flight Instructor Course—PDS Code 4BJ—Whiteman—7 wk/AFSC 11B4B—Oct 95

Program consists of academics, simulator, and flight instruction concentrating on advanced aircraft systems, operating procedures, and instructor techniques. Prepares B-2A mission commanders to perform duties as B-2A flight instructor pilots. Upon completion of the course, incumbents are qualified as academic, simulator, and flight instructors in the B-2A. Formal course graduation occurs with satisfactory completion of B-2A flight instructor 60-2 check.

Prerequisites: B-2A mission commanders with a maximum of 16 years of total active Federal military service.

Special Requirements: 1. Top Secret/SSBI clearance.

2. Minimum of 100 post-FTU B-2A flight hours.

3. One year in the weapon system.

4. 509 OG/CC recommendation.

5. B-2A flight lead qualification.

6. Current assignment to an active flying billet.

Quota Control: HQ ACC/DOTZ through HQ ACC/DPPTC.

B2IQT—B-2 Initial Qualification Training—PDS Code 094—Whiteman/19 wk 1 day—Oct 96

Qualifies pilots in procedures and techniques of operating the B-2A Weapon System as configured for ACC-1. Awards AFSC 11B2B for pilot and 11B3B for mission commander. Consists of group-paced academics (including cockpit procedures trainer), simulator (including weapon system trainer and mission trainer), and flying training.

Prerequisites: Rated pilot on flying status (FSC 1A). Regular Air Force officer or career Reserve officer who has less than 16 years of total Air Force military service. Completion of basic survival course before entry into class. Physiological training (altitude chamber) current for at least 60 days after scheduled class completion date. Minimum flying experience requirements:

a. Pilot: 1,000 hours of flying time as a pilot. Three years as a pilot in a major weapon system.

b. Mission Commander: 1,500 bomber hours or 1,000 fighter hours flying time. Three years as a pilot. One year as a instructor pilot.

Special Requirements: Possess a current Top Secret/SSBI (less than 5 years old) clearance.

Quota Control: HQ ACC/DOTZ through HQ ACC/DPPTC.

B52CIQC—B-52 Copilot Initial Qualification Course—PDS Code VC5—Castle/19 wk 4 days/AFSC 1233C—Mar 93

Trains pilots in the procedures and techniques required to operate B52 weapon system as a qualified copilot. Training consists of: academics - 8 weeks 2 days; flying - 11 weeks 2 days.

Prerequisites: 1. Rated pilot on flying status.

2. Regular Air Force officer, or a career Reserve officer who has less than 15 TAFMS.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B52CPTI/WSTI—B-52 Cockpit Procedures/Weapon System Trainer Instructor Course—PDS Code 83L—Castle/2 wk—Mar 93

Trains B52 pilots in fundamentals and concepts to qualify them as synthetic trainer instructors in B52 weapon system trainer (WST) or cockpit procedures trainer (CPT). Consists of ACC CFIC pre-attendance study, academics, and introduction to CPT/WST. Formal training is followed by in-unit CPT/WST hands-on training and checkout. Course completion mandatory prior to upgrade to CPT/WST instructor status. (Graduate of ACC CFIC can also perform CPTI/WSTI duties.)

Prerequisites: 1. Qualified and current crewmembers in appropriate model B52.

2. Be nominated CPTI/WSTI candidate by unit commander.

Special Requirements: Units request quotas through NAF/DOF. Nominees to fill quotas must be announced to CFIC a minimum of 60 days prior to class.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52ECFIC—B-52 Electronic Warfare Officer Combat Flight Instructor Course—PDS Code VDE—Castle/3 wk 3 days—Mar 93

Trains electornic warfare officers in the fundamentals and concepts to qualify them as ground training instructor, synthetic trainer instructor, and flight instructor in B52 aircraft. Consists of pre-attendance study, academics, trainer, and flight training. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Current and qualified in B52 as an electronic warfare officer.

2. Must be nominated as instructor candidate by unit commander.

3. 750 hours total with 650 B-52 hours.

Special Requirements: 1. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

2. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52EFTC—B-52 Electronic Warfare Officer Faculty Training Course—PDS Code 1QU—Castle/4 wk—Jun 93

Provides training for an instructor to transition from instruction or evaluation duties in the units, to duties in the FTU environment. The course is presented in three phases. Phase one includes inprocessing, orientation, and general academics. Phase two consists of academics specifically relative to EWs and checkout as an instructor or operator of training devices. Phase three includes flying training designed to enhance performance as an FTU instructor. B52 difference training will be given in conjunction with the FTC. The level of instruction and time devoted to each phase will be tailored to meet the needs of the individual.

Prerequisites: Qualified as a B52 instructor EW and assigned PCS to 93 BMW FTU.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52EIQC—B-52 Electronic Warfare Officer Initial Qualification Course—PDS Code VDA—Castle/15 wk 2 days*/AFSC 1575C—Mar 93

Course for initial qualification to train electronic warfare officers (EW) in the fundamentals, procedures, and techniques of operating electronic warfare receiver, transmitter, and expendable systems associated with the B-52. Training consists of: academics - 4 wk; flying - 11 wk 2 days.

Prerequisites: 1. Rated navigator on flying status.

2. Regular Air Force officer, or a career Reserve officer who has less than 15 years of TAFMS.

3. Completed electronic warfare officer training - AETC course N-V6A-C or equivalent.

Special Requirements: (NOTE: 93 BMW will return students who do not meet these requirements.)

1. Top Secret/SBI clearance completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B52ERQ—B-52 Electronic Warfare Officer Requalification Course—PDS Code ZKS—Castle/10 wk 2 days*—Jun 93

A training course which requalifies former B52 electronic warfare officers. Length of course will vary depending on previous experience and time elapsed since last B-52 flying assignment. Training consists of: (short course) academics - 3 weeks, flying - 7 weeks 2 days; (long course) academics - 4 weeks, flying - 11 weeks 2 days.

Prerequisites: 1. Regular Air Force Reserve officer who has less than 17 years of TAFMS.

2. Previously qualified as an electronic warfare officer in the B52 and currently on flying status.

Special Requirements: (NOTE: 93 BMW will return students who do not meet these requirements.)

1. Top Secret/SBI clearance completed or initiated before departure for training.

2. Personnel reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and AFPC/DPMROT.

B52ERQA—B-52 Electronic Warfare Officer Requalification Course (In-Unit)—PDS Code ZKR—Castle/3 wk*—Jun 93

Nonflying portion of requalification training conducted at FTU consisting of a program of academic and simulator instruction concentrating on aircraft systems and operating procedures. Prepares former B52 electronic warfare officers, who require weapon system requalification for in-unit flying training. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit requal flying training.

Prerequisites: 1. Regular Air Force or Reserve officer who has less than 17 years of TAFMS.

2. Previously qualified as an electronic warfare officer in the B52 and currently on flying status.

Special Requirements: 1. Top Secret/SBI clearance completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

*Reflects only CCTS portion of individual's requalification program.

B52ESSC—B-52 Central EW Simulator Supervisor Course—PDS Code XLB—Castle/1 wk 2 days—Mar 93

Trains B-52 electronic warfare officers in the fundamentals and concepts to qualify as simulator supervisor in the AN/ALQ-T4 Electronic Warfare Simulator. This training consists of academics only.

Prerequisites: Successfully complete instructor standardization check. Students must have a copy of current orders designating instructor status in the T4 simulator upon arrival at training facility.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52NIQC—B-52 Navigator Initial Qualification Course—PDS Code 5M1—Castle/25 wk 2 days/AFSC 1525A—Mar 93

Provides training in procedures and techniques required to operate the navigation and offensive systems of the B-52 aircraft. Particular emphasis is placed on navigation and weapon delivery procedures. Training consists of: academics - 14 weeks; flying - 11 weeks 2 days.

Prerequisites: 1. Rated navigator on flying status.

2. Regular Air Force officer or a career Reserve officer who has less than 15 years of TAFMS.

3. Must be a graduate of AETC course N-V6A-B or equivalent.

Special Requirements: (NOTE: 93 BMW will return students who do not meet these requirements.)

1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B52PCFIC—B-52 Pilot Combat Flight Instructor Course—PDS Code VDC—Castle/5 wk—Mar 93

Trains pilots in the fundamentals and concepts to qualify them as ground training instructor, synthetic trainer instructor, and flight instructor in B52 aircraft. Consists of pre-attendance study, academics, trainer, and flight training.

Prerequisites: 1. Current and qualified in B52 as pilot.

2. Must be nominated as instructor candidate by unit commander.

3. Possess one of the following levels:

a. 1800 hours total/500 hours B52.

b. 1500 hours total/1000 hours B52.

c. 1500 hours total/300 hours B52, 1000 hours jet and 1 year or more IP experience and 1 year or more as a B52 mission ready aircraft commander.

Special Requirements: 1. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

2. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52PCFIFC—B-52 Pilot Combat Flight Instructor Flight Course—PDS Code 4FQ—Castle/3 wk—Mar 93

Flying only course designed for instructor candidates who have completed B52CPTI, Cockpit Procedures Trainer Course. Consists of the flying training phase of B52PCFIC, and qualifies ground training and synthetic trainer instructors as flight instructors in the B-52 aircraft.

Prerequisites: 1. Qualified and current in B-52G/H as aircraft commander.

2. Be nominated as instructor candidate by unit commander.

3. Must have previously completed B52CPTI.

4. Possess one of the following experience levels:

a. 1800 hours total with 500 B-52 hours.

b. 1500 hours total with 1000 B-52 hours.

c. 1500 hours total with 300 B-52 hours, 1000 hours jet and 1 year or more IP experience and 1 year or more as a B-52 mission ready aircraft commander.

Special Requirements: 1. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

2. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52PFTC—B52 Pilot Faculty Training Course—PDS Code 1QS—Castle/4 wk—Jun 93

Provides training for an instructor to transition from instruction or evaluation duties in the units to duties in the FTU environment. The course is presented in three phases. Phase one includes in-processins, orientation, and general academics. Phase two consists of academics specifically related to pilots and checkout as an instructor or operator of training devices. Phase three includes flying training designed to enhance performance as a FTU instructor. B52 difference training will be given with the FTC. The level of instruction and time devoted to each phase will be tailored to meet the needs of the individual.

Prerequisites: Qualified as a B52 instructor pilot and assigned PCS to 93 BMW/FTU.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52PIQC—B-52 Pilot Initial Qualification Course—PDS Code VC3—Castle/19 wk 4 days*/AFSC 1235C—Mar 93

Course for initial qualification to train pilots in the fundamentals, procedures, and techniques required to operate the B-52 model weapon system as a qualified aircraft commander. Training consists of: academics - 8 weeks 2 days; flying - 11 weeks 2 days.

Prerequisites: 1. Rated pilot on flying status.

2. Regular Air Force officer, or a career Reserve officer who has less than 15 years TAFMS.

3. Possess the following experience:

a. 1250 total flying hours with 500 fixed wing jet hours.

b. 12 months as an aircraft commander/instructor pilot.

Special Requirements: (NOTE: 93 8MW will return students who do not meet these requirements.)

1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before course entry.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B52PRQ—B52 Pilot Requalification Training—PDS Code ZKW—Castle/16 wk 1 day—Mar 93

A training course which requalifies former B52 aircraft commanders. Length of course will vary depending on previous experience and time elapsed since last B-52 flying assignment. Training consists of: (short course) academics - 4 weeks 4 days, flying - 11 weeks 2 days; (long course) academics - 8 weeks 2 days, flying - 11 weeks 2 days.

Prerequisites: 1. Regular AF officer or career Reserve officer who has less than 17 years of TAFMS.

2. Previously qualified as an aircraft commander in the B52 and currently on flying status.

Special Requirements: (NOTE: 93 BMW will return students who do not meet these requirements.)

1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B52PRQA—B-52 Pilot Requalification Course (In-Unit)—PDS Code ZKV—Castle/5 wk*—Jun 93

Nonflying portion of requalification training conducted at FTU consisting of a program of academic and simulator instruction concentrating on aircraft systems and operating procedures. Prepares former B52 aircraft commanders, who require weapon system requalification, for in-unit flying training. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit requalification flying training.

Prerequisites: Regular Air Force officer or career Reserve officer who has less than 17 years of TAFMS.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

* Reflects only CCTS portion of individual's requalification program.

B52PUP—B-52 Pilot Upgrade Course—PDS Code ZKX—Castle/14 wk 4 days—AFSC 1235C—Mar 93

Flying training course for B52 copilots in the pilot upgrade program. Individuals are graduated as aircraft commanders.

Prerequisites: 1. B52 copilot who is current and qualified in the aircraft, recommended by the wing commander, and has 1000 hours total time (500 hours in the B52).

2. Completed all category 1 training before class start date.

Special Requirements: (NOTE: 93 BMW will return students who do not meet these requirements.)

1. Top Secret/SBI clearance completed.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration data falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

5. Candidates must arrive with a full set of flight manuals. B52H pilots will receive G model flight manuals on a temporary basis.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52PUPA—B-52 Pilot Upgrade Course (In-Unit)—PDS Code 9PX—Castle/3 wk 3 days*—Jun 93

Nonflying portion of training conducted at FTU for B-52 copilots upgrading to aircraft commander prior to in-unit upgrade flight training. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit upgrade flying training.

Prerequisites: 1. B52 copilot who is current and qualified in the aircraft, recommended by the wing commander, and has 1000 hours total time (500 hours in the B52).

2. Completed all category 1 training before class start date.

Special Requirements: (NOTE: 93 BMW will return students who do not meet these requirements.)

1. Top Secret/SBI completed.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training.

5. Candidates must arrive at Castle with a current set of flight manuals.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

* Reflects only CCTS portion of individual's pilot upgrade program.

B52RCFIC—B-52 Radar Navigator Combat Flight Instructor Course—PDS Code VDD—Castle/3 wk 3 days—Mar 93

Trains radar navigators in the fundamentals and concepts to qualify them as ground training instructor, synthetic trainer instructor, flight instructor in B52 aircraft. Consists of preattendance study, academics, trainer, and flight training. Course is mandatory prior to upgrade to instructor status.

Prerequisites: 1. Current and qualified in B52 as radar navigator.

2. Must be nominated as instructor candidate by unit commander.

3. 1000 hours total/400 hours as a radar navigator.

Special Requirements: 1. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

2. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52RFTC—B52 Radar Navigator Faculty Training Course—PDS Code 1QT—Castle/4 wk—Jun 93

Provides training for an instructor to transition from instruction or evaluation duties in the units, to duties in the FTU environment. The course is presented in three phases. Phase one includes inprocessing, orientation, and general academics. Phase two consists of academics specifically relative to radar navigators and checkout as an instructor or operator of training devices. Phase three includes flying training designed to enhance performance as an FTU instructor. The level of instruction and time devoted to each phase will be tailored to meet the needs of the individual.

Prerequisites: Qualified as a B52 instructor radar navigator and assigned PCS to 93 BMW FTU.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52RNUP—B52 Radar Navigator Upgrade Course—PDS Code 6JR—Castle/12 wk 4 days/AFSC 1525C—Mar 93

A flying training course for B-52 navigators in the navigator upgrade program. NUPs will graduate as radar navigators after an inflight evaluation. Training consists of academics - 1 wk, 2 days; flying - 11 wks, 2 days.

Prerequisites: 1. B52 navigator who is current and qualified in the aircraft, recommended by the wing commander, has AFSC 1521/1525; 400 hours in the aircraft and 1000 hours total time.

2. Completed all category 1 training before class start date.

Special Requirements: (NOTE: 93 BMW will return students who do not meet these requirements.)

1. Top Secret/SBI completed.

2. Personnel reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration date falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

4. Current physiological training. If expiration date falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52RNUPA—B-52 Radar Navigator Upgrade Course (In-Unit)—PDS Code WP8—Castle/1 wk 2 days*/AFSC 1525C—Jun 93

Nonflying portion of training conducted at FTU for B52 navigators upgrading to radar navigator prior to in-unit upgrade flight training. Formal course graduation occurs with satisfactory completion of an inflight evaluation following the in-unit upgrade flying training.

Prerequisites: 1. B-52 navigator who is current and qualified in the aircraft.

2. Must be recommended by the wing commander.

3. 1000 hours total with 400 hours B52.

4. Completed all category I training before class start date.

Special Requirements: 1. Top Secret/SBI clearance completed.

2. Personnel reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

* Reflects only CCTS portion of individual's navigator upgrade program.

B52RRQ—B-52 Radar Navigator/Navigator Requalification Training—PDS Code 7BU—Castle/15 wk—Mar 93

Requalifies former B-52 radar navigators/navigators. Graduates are qualified as radar navigators or navigators in the B-52 OAS. Training consists of: academics - 3 weeks, 3 days; flying - 11 weeks, 2 days.

Prerequisites: 1. Regular Air Force officer or career Reserve officer who has less than 17 years of TAFMS.

2. Previously qualified as a radar navigator or navigator in the B-52, and currently on flying status.

Special Requirements: (NOTE: 93 BMW will return students who do not meet these requirements.)

1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

4. Current physiological training. If expiration falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

B52RRQA—B-52 Radar Navigator/Navigator Requalification Course (In-Unit)—PDS Code 8UX—Castle/3 wk 4 days*—Jun 93

Nonflying portion of requalification training conducted at FTU consisting of a program of academic and simulator instruction concentrating on aircraft systems and operating procedures. Prepares former B-52 radar navigators/navigators, who require weapon system requalification, for in-unit flying training. Formal course graduation occurs with satisfactory completion of an inflight evaluation following in-unit requalification flying training.

Prerequisites: 1. Regular Air Force officer or career Reserve officer who has less than 17 years of TAFMS.

2. Previously qualified as a B-52 radar navigator/navigator and currently on flying status.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Admin certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II.

4. Current physiological training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC and HQ AFPC/DPMROT.

*Additional 37 days in-unit training required for mission qualification at ACC installations. Twenty-eight additional days required following intro/inprocessing at non-ACC installations. Flight training will be required at the units. and checkride IAW ACCR 60-2 will be required.

B52SSOC—B52 Senior Staff Orientation Course—PDS Code 3BC—Castle/1 wk—Mar 93

Provides orientation for senior officers in the B52 weapon system. Course consists of academics only.

Prerequisites: Rated officer (O-5 and above) programmed for assignment to or performing in senior staff at wing level or above that involves duties that directly relate to B-52 operations or staffing B-52 issues.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52SSRC—B52 Senior Staff Requalification Course—PDS Code QBF—Castle/2 wk—Jun 93

Course designed for senior officers requiring basic qualification while assigned to B52 senior staff duty. Training consists of specialized academic, simulator, and basic flying instruction in the B52. Trains senior officers in only basic flying events training.

Prerequisities: 1. Rated officer currently on flying status.

2. Assignment to B52 senior staff position.

Special Requirements: 1. Top Secret/SBI completed or initiated before departure for training.

2. Personnel Reliability - critical. Administrative certification is permissible if critical or controlled certification cannot be obtained.

3. Medical - Flying Class II. If expiration falls within 60 days after scheduled class graduation, flight physical must be renewed before class entry.

4. Current physiological training. If expiration falls within 60 days after scheduled class graduation, physiological training must be renewed before class entry.

Quota Control: HQ ACC/DOTF through HQ ACC/DPTTC.

B52WSTMG—B52G/H Weapon System Trainer Mission Generation Course—PDS Code 4F2—Castle/3 wk—Mar 93

Trains B-52 crewmembers in fundamentals, concepts, and procedures necessary to generate missions for the B52WST. Consists of academics and hands-on operation. Includes mission planning, scripting, data entry, debugging, and computer operations.

Prerequisites: 1. Nominees should be qualified B52 flight instructors in their respective specialties.

2. Nominees should be able to operate their respective flight, offense, or defense station consoles.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOST through HQ ACC/DPTTC.

B5200IDOAB/JB/EB—Bomber Weapons Instructor Course - B-52—PDS Code X1D—Barksdale/19 wk 3 days/AFSC: "W" Prefix—Oct 96

Trains qualified instructor pilots, radar navigators, and electronic warfare officers in all phases of B-52 weapons employment and tactics. Graduates are qualified bomber weapons and tactics instructors capable of implementing, conducting, and managing the weapons and tactics program at their units according to ACCR 55-120. They also will coordinate bomber strike planning for the deployed commander to ensure effective use of resources. Commanders are responsible for ensuring graduates are used as instructors or supervisors in tactics or weapons employment training positions. Flying hours: 75.0.

Prerequisites: Captain with a maximum of 8 years of rated experience. Minimum of 2 years of bomber experience. Current instructor in the B-52 with a minimum of 50 B-52 instructor hours. Forty-five flight hours in the past 90 days, 15 hours in the past 30 days, and at least one flight in the last 14 days before course entry. Basic water and survival training completed.

Special Requirements: Annual physical, physiological training, and instrument and qualification flight checks must be complete and not expire during the training period. Top Secret and SCI clearances required. NATO Secret and CNWDI access required.

Admin Instructions: Send nominations to HQ ACC/DPROR 90 days before class or as instructed by selection board notification message. Information should include most current flying hours (total time, total bomber time, PAA time, PAA IP time). Wing, operations group,

and squadron commander supportive comments should also be attached with emphasis on instructor and flying capabilities. Report at 0730 on class start date for administrative inprocessing and orientation procedures. State on orders, “Variations and 600 lbs maximum hold baggage, and dual lodging are authorized.” And “Use of available government mess will adversely affect performance of duty for the period of the TDY.”

Quota and Waiver Control: HQ ACC/DOTW through HQ ACC/DPPTC.

OPR: HQ ACC/DOTW.

C130 ACQ—Aircraft Commander Initial Qualification I—PDS Code VEA—Little Rock/5 wk 2 days—Oct 96

Requalifies pilots in the C-130E as aircraft commander candidates. Upgrades ACC C-130 copilots to aircraft commander candidates. Includes academic, simulator, and flying training.

Prerequisites: Must be rated pilots qualified for flying duty. Must be qualified in Self-Contained Navigation System (SCNS). If not qualified, students must attend C130SCN course first. Requalification pilot must have been current and qualified as a C-130B/E/H aircraft commander within 60 months of class starting date. AC upgrade pilots must have a minimum of 1000 hours total time and 800 hours C-130 time. MCR 51-1 Vol III contains specific details and waiver authority. ACC active duty, Air National Guard, Air Force Reserve, and AFSOC copilots must complete the C-130 ATS aircraft commander preparatory (ACP) course prior to attending. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must remain current for at least 30 days past published graduation date. Students will bring the AMC/AFSOC Form 670, aircrew training record, initiated during ACP to Little Rock.

Special Requirements: US personnel must be US citizens with a Secret clearance.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 ACQ-IU—Aircraft Commander Initial Qualification I-In Unit—PDS Code P5B—in unit/5 wk 2 days—Mar 94

This is an in-unit C-130 aircraft commander upgrade and pilot requalification course. Course contents and prerequisites are the same as the 314 OG Cl30ACQ course.

C130 AMOST-C-130 Aircraft Maintenance Officer System Training (AMOST)—PDS Code 1S0-Little Rock/3 wk—Oct 96

Trains and familiarizes aircraft maintenance officers on C-130 aircraft systems using the academic part of the C-130 pilot initial qualification course, which covers aircraft systems interface, aircrew normal and emergency procedures, and ground school.

Prerequisites: Trainee must be a qualified aircraft maintenance officer.

Special Requirements: Secret clearence.

Quota Control: HQ ACC/LGQT through ACC/DPPTC.

C130CADWIC—Combat Aerial Delivery Weapons Instructor Course, C/HC-130—PDS Code O1I-Little Rock/19 wk 3 days/AFSC: "W" Prefix—Oct 96

Trains qualified C/HC-130 instructor pilots and navigators as instructors in all phases of C/HC-130 combat aerial delivery employment. Graduates are qualified combat aerial delivery weapons and tactics instructors capable of implementing, conducting and supervising weapons training programs within their units up to and including headquarters level. Graduates will also coordinate combat aerial delivery planning for the deployed commander to ensure effective use of resources. Commanders are responsible for ensuring graduates are used as instructors or supervisors in weapons and tactics training programs for a minimum of 3 years after graduation. Flying Hours: 86.0

Prerequisites: Captain with a maximum of 8 years of rated experience. Minimum of 2 years of tactical airland/airdrop, or rescue mission, or both experience. Minimum of 1,000 hours C-130 flying time or 1,500 hours total with 750 hours C-130 flying time. Fully qualified and current mission ready (MR) C-130 IP or IN. Minimum of 100 hours as an IP or IN in the C-130. Minimum of 45 hours in the last 90 days, 15 hours in the last 30 days, and at least one tactical airdrop or rescue mission sortie in the last 14 days before course entry. NVG mission qualified (may be waived). Basic and water survival training completed.

Special Requirements: Annual physical, physiological training, and instrument, qualification, and mission flight checks must be completed and not expire during the training period. Minimum security clearance of Top Secret (TS) or be submitted for TS before course attendance. NATO Secret required.

Admin Instructions: Send nomination packages to HQ ACC/DOT as directed by selection board notification message. Nomination package information be IAW MCR 55-120 requirements or as stipulated by the selection board notification message. Wing, operations group, and squadron commander supportive comments should also be attached with emphasis on instructor and flying capabilities. Report at 0800 on class start date for administrative, in-processing, and orientation procedures. Ensure that the following three statements are included on orders: (1) "Dual quarters are authorized. Each officer is required to attend the Weapons System Mission Employment (ME) Phase of their training off-station for an extended period of time, as such variations in itinerary are authorized." (2) "600 lbs. maximum hold baggage are authorized." (3) "Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF CADS Weapons Instructor Course (WIC)."

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

Waiver Authority: HC ACC/DO.

C130 CIQ—Copilot Initial Qualification—PDS Code QQM—Little Rock/8 wk/MASL D117001—Oct 96

Qualifies pilots in the C-130E as a copilot or aircraft commander candidate IAW MCR 51-1 Vol III prerequisites. Non-ACC training and evaluation requirements may vary. The “A” course shredout identifies C-130 initial trainees. The “B” course shredout identifies C-130 requalification trainees who do not qualify for course Cl30ACQ. Includes academic, simulator, and flying training.

Prerequisites: Must be rated pilots currently qualified for flying duty. ECL 80 SO. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must remain current for at least 30 days past published graduation date. Combat Survival Training Course, S-V80-A; and Water Survival, Nonparachuting, S-V90-A; or Water Survival Training, S-V86-A, as required.

Special Requirements: US personnel must be US citizens with a Secret clearance.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 CIQ-IU—Copilot Initial Qualification-In Unit—PDS Code P5C—in unit/8 wk—Mar 94

This is an in-unit C-130 initial qualification course for aircraft commanders and copilots. Course contents and prerequisites are the same as the 314 OG Cl30CIQ course.

C130 CRM FAC—C130 Crew Resource Management Facilitator Course—PDS Code 0B0—Little Rock/1 wk—Jan 96

Qualifies students to teach principles of CRM to their unit and provide them the skills and materials necessary to facilitate in-unit CRM training. Includes CRM seminar, instructor enhancement, and practice instruction and seminar presentation.

Special Requirements: Careful selection of CRM facilitator candidates will ensure a successful in-unit CRM program. While specific identifiable qualities are still subjective within the CRM research community, some observable traits have surfaced. To help commanders select individuals with the best potential to provide effective CRM service to their unit, the following guidelines are offered: Attitude - a positive and enduring attitude toward the overall goal of CRM programs. Skills - ability to establish rapport with people of varied rank and experiences. Knowledge - extensive flight experience is not necessary. The student should have some valid knowledge of the atmosphere of the unit's mission and inflight challenges. Pilot or nonpilot? The candidate does not have to be pilot-skilled. The facilitator must understand the legal authority and responsibilities of the aircraft commander and be able to keep that role in perspective during CRM presentations.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 FIN—Flight Engineer Instructor—PDS Code R1T—Little Rock/3 wk 4 days—MASL D121043—Oct 96

Qualifies flight engineers to perform instructor duties in the C-130. Provides training in the philosophy of instruction, student/instructor relationships, student performance analysis, lesson planning, and practical instruction. Includes academics, simulator, and flying training. ACC policies, procedures, and directives are studied in depth.

Prerequisites: Qualified and current in the C-130 aircraft with no outstanding corrective action. Must be mission ready (not required for instructors who maintain proficiency only qualification). Possess an AFSC A11350C or higher, AFSC A11370C is preferred, and must meet other MCR 51-1 Vol III upgrade prerequisites. Unit commanders will personally review instructor candidate's qualification to ensure that each possesses potential instructional ability, sound judgment, a desire to instruct, and required flying experience. Each instructor candidate must be thoroughly familiar with C-130 aircraft systems and equipment, normal and emergency operating procedures, prohibited maneuvers, and aircraft performance under all conditions of flight. ECL 80 SR. Flight physical, US Air Force physiological training (only AFR 50-27 physiological training accepted), and all AMCR 51-130 and AFI 11-401, *Flight Management* (formerly AFR 60-1), requirements must be current and remain current for at least 30 days past published graduation date. ACC active duty, Air National Guard, Air Force Reserve, and AFSOC flight engineers must have completed the C-130 ATS Flight Engineer Instructor Preparatory (FIP) course prior to attending. International military students attending must arrive 5 duty days before course start date to complete the C-130 ATS Flight Engineer Instructor Preparatory course, computer based training, and workbook portions via MASL D155051, Computer Assisted Training.

Special Requirements: Students must bring individual records and equipment as listed in reporting procedures. They also need to bring: T.O. 1C-130B-1*, T.O. 1C-130B-1-1*, T.O. 1C-130B-1CL-5*, AFI 11-401**, AMCR 60-1**, and MCR 51-1 Vol III***.

*Students from units with H-model aircraft 74-1658 and up may obtain these publications from the school registrar's office on a temporary basis, upon request.
**Issued on a temporary basis from the school registrar's office. We encourage students to bring their personal copies so they may annotate areas which have specific applications to their training situation.
***Will be issued on a permanent basis from the school registrar's office when students are unable to get it from their unit publications office.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 FIQ—Flight Engineer Initial Qualification—PDS Code R1E—DOD2B—Little Rock/10 wk 2 days/MASL D121028—Oct 96

Qualifies flight engineers in the C-130E aircraft. Includes academic, simulator, and flying training.

Prerequisites: Currently qualified for flying duty and possess CAFSC 113X0C. Must have completed AETC course BFE, ANG BFE, or 11330C, Fixed Wing Aircraft Performance, and be in grade E-4 thru CMSgt. ECL 80 SR. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must remain current for at least 30 days past published graduation date.

Special Requirements: US personnel must be US citizen with Secret security clearance or Secret security clearance applied for by class start date.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 LIN—C-130 Loadmaster Instructor—PDS Code R1R—Little Rock/3 wk 3 days—MASL D153020—Oct 96

Qualifies loadmasters to perform instructor duties in the C-130. Provides training in the philosophy of instruction, student/instructor relationships, student performance analysis, lesson planning, and practical instruction. Includes academic, fuselage trainer, and flying training. ACC policies, procedures, and directives are studied in depth.

Prerequisites: Qualified and current in the C-130 aircraft with no outstanding corrective action. Must be mission ready (not required for instructors who maintain proficiency only qualification). Possess an AFSC of A11450 or higher and must meet other MCR 51-1 Vol III upgrade prerequisites. ECL 80 SR. Flight physical, US Air Force physiological training (only AFR 50-27 physiological training accepted), and all MCR 51-1 Vol III and AFI 11-401 (formerly AFR 60-1) requirements must be current and remain current for 30 days after published graduation date. ACC active duty, Air National Guard, Air Force Reserve, and AFSOC loadmasters must have completed the C130 ATS Loadmaster Instructor Preparatory (LIP) Course prior to attending. International military students attending must arrive 5 duty days before course start date to complete the C-130 ATS Loadmaster Instructor Preparatory course, computer based training, and workbook portions via MASL D155051, Computer Assisted Training.

Special Requirements: Students must bring individual records and equipment listed in reporting procedures. They also need to bring: T.O. 1C-130B-1*, T.O. 1C-130A-9, T.O. 1C-130B-1CL-3/4*, T.O. 1C-130A-9CL-1*, AFI 11-401 (formerly AFR 60-1)**, and MCR 51-1 Vol III***.

*Students from units with H-model aircraft 74-1658 and up may obtain these publications from the school registrar's office on a temporary basis, upon request.
**Issued on a temporary basis from the school registrar's office. We encourage students to bring their personal copies so they may annotate areas which have specific applications to their training situation.
***Will be issued on a permanent basis from the school registrar's office when students are unable to get it from their unit publications office.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 LIQ—Loadmaster Initial Qualification—PDS Code TDK—Little Rock/6 wk 2 days/MASL D153015—Oct 96

Initially qualifies aircraft loadmasters in the C-130 E/H aircraft. Includes academic, static loading, and flying training.

Prerequisites: Currently qualified for flying duty. Graduate of Basic Loadmaster Course J3ABR11430 000. ECL 80 SR. Flight physical, US Air Force physiological training (only AFR 50-27 physiological training accepted), and all MCR 51-1 Vol III and AFI 11-401 (formerly AFR 60-1) requirements must remain current for 30 days after published graduation date.

Special Requirements: US personnel must be US citizens with a Secret clearance or Secret clearance applied for before class start date. Students must bring individual records and equipment listed in reporting instructions. If possible, bring TOs 1C-130B-1, 1C-130A-9, 1C-130B-1CL-3/4, 1C-130A-9CL-1, and MCR 51-1 Vol III.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 LMQ—Loadmaster Mission Qualification—PDS Code TDM—Little Rock/5 wk 1 day/MASL D153012—Oct 96

Mission qualifies aircraft loadmasters in C-130E/H aircraft. Includes academic, static loading, and flying in airdrop operations.

Prerequisites: Qualified and current in C-130E aircraft. ECL 80 SR. Flight physical, US Air Force physiological training (only AFR 50-27 physiological training accepted), and all MCR 51-1 Vol III and AFI 11-401 (formerly AFR 60-1) requirements must be current and remain current for 30 days after published graduation date.

Special Requirements: US personnel must be US citizens with a Secret clearance or Secret clearance applied for before class start date. Students must bring individual records and equipment listed in reporting instructions. If possible, bring TOs 1C-130B-1, 1C-130A-9, 1C-130B-1CL-3/4, 1C-130A-9CL-1, and MCR 51-1 Vol III.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 NIN—Navigator Instructor—PDS Code R1U—Little Rock/6 wk 1 day/MASL D114013—Oct 96

Qualifies navigators to perform instructor duties in the C-130. Provides training in the philosophy of instruction, student/instructor relationships, student performance analysis, lesson planning, and practical instruction. Includes academic, simulator, and flying training. ACC policies, procedures, and directives are studied in depth.

Prerequisites: Qualified and current in the C-130 aircraft with no outstanding corrective action. Must be qualified in Self-contained Navigation System (SCNS). If not qualified, students must attend C130SCN course first. Must be lead qualified, mission ready, and SKE qualified (not required for instructors who maintain proficiency only qualification). Lead and SKE qualification not required for single ship qualified only navigators. Must meet MCR 51-1 Vol IIIflying hours upgrade prerequisites. ECL 80 SO. Flight physical, US Air Force physiological training (only AFR 50-27 physiological training accepted), and all MCR 51-1 Vol III and AFI 11-401 (formerly AFR 60-1) requirements must be current and remain current for 30 days after published graduation date. ACC active duty, Air National Guard, Air Force Reserve, and AFSOC navigators must have completed the C-130 ATS Navigator Instructor Preparatory (NIP) Course prior to attending. International military students attending must arrive 5 duty days before course start date to complete the C-130 ATS Navigator Instructor Preparatory course, computer based training, and workbook portions via MASL D155051, Computer Assisted Training.

Special Requirements: Students must hand-carry individual records. They also need to bring: T.O. 1C-130B-1*, T.O. 1C130B-1-1*, T.O. 1C-130B-1CL-2*, AFI 11-401 (formerly AFR 60-1)**, AFI 11-206, *General Flight Rules* (formerly AFR 60-16)***, AFMAN 11-212, *Instrument Flying* (formerly AFM 51-37)***, and MCR 51-1 Vol III***.

*Students from units with H-model aircraft 74-1658 and up may obtain these publications from the school registrar's office on a temporary basis, upon request.

**Issued on a temporary basis from the school registrar's office. We encourage students to bring their personal copies so they may annotate areas which have specific applications to their training situation.

***Will be issued on a permanent basis from the school registrar's office when students are unable to get it from their unit publications office.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 NIN-IU—Navigator Instructor-In Unit—PDS Code P5D—in unit/6 wk 1 day—Mar 94

This is an in-unit C-130 instructor navigator upgrade course. Course contents and prerequisites are the same as the 314 OG C130NIN course.

C130 NIQ—Navigator Initial Qualification—PDS Code TDL—Little Rock/7 wk/MASL D114002—Oct 96

Qualifies navigator in C-130E/H aircraft. The "A" course shredout identifies C-130 initial trainees. The "B" course shredout identifies C-130 requalification trainees. Includes academic, simulator, and flying training.

Prerequisites: Must be rated navigators currently qualified for flying duty. All students who graduated from Mather AFB UNT course between 25 Apr 79 (class 79-01) and 2 Apr 87 (class 87-01) must be graduates of AETC course B-V7C-N, Advanced Navigation. All students who graduated from Mather AFB SUNT course after 2 Apr 87 (class 87-01) must be graduates of AETC course N-V6A-B, Undergraduate Navigator Training (TTB/NT). ECL 80 SO. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must remain current for at least 30 days past published graduation date. Combat Survival Training Course, S-V80-A; and Water Survival, Nonparachuting, S-V90-A; or Water Survival Training, S-V86-A, as required. Students retraining from other weapon systems will complete a programmed text obtained from the Little Rock AFB Registrar Office. Students will complete the workbook and bring it with them on the first day of class.

Special Requirements: US personnel must be US citizens with a Secret clearance.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 NIQ-IU—Navigator Initial Qualification-In Unit—PDS Code P5E—in unit/7 wk—Mar 94

This is an in-unit initial qualification and requalification course for navigators. Course contents and prerequisites are the same as the 314 OG C130NIQ course.

C130 NMQ—Navigator Mission Qualification—PDS Code TDN—Little Rock/7 wk 2 days/MASL D114012— Oct 96

Mission qualifies navigators in C-l3OE/H aircraft. Includes academic simulator, and flying training on airland, visual/Station Keeping Equipment (SKE) formation, and airdrop operations.

Prerequisites: Qualified and current in C-130E/H aircraft. Must be qualified in Self-contained Navigation System (SCNS). If student is not qualified, he must attend C130SCN course first. Not required for students attending C130NIQ prior to C130NMQ. ECL 80 SO. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must be current and remain current for at least 30 days after published graduation date.

Special Requirements: US personnel must be US citizens with a Secret clearance.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 NMQ-IU—Navigator Mission Qualification-In Unit—PDS Code P5J—in unit/7 wk 2 days—Mar 94

An in-unit, C-130 tactical mission qualification course for navigators. Qualifies navigators in visual and SKE formation procedures. Course contents and prerequisites are the same as the 314 OG C130NMQ course.

C130 PIN—Pilot Instructor—PDS Code R1N—Little Rock/6 wk 1 day/MASL D115018—Oct 96

Qualifies pilots to perform instructor duties in the C-130. Provides training in the philosophy of instruction, student/instructor relationships, student performance analysis, lesson planning, and practical instruction. Includes academics, simulator, and flying training. ACC policies, procedures, and directives are studied in depth.

Prerequisites: Qualified and current in the C-130 aircraft with no outstanding corrective action. Must meet MCR 51-1 Vol III flying hour prerequisites that include 1500 total hours with a minimum of 500 C-130 hours. MCR 51-1 Vol III contains specific details and waiver authority. Must be mission ready, lead qualified, and SKE qualified (not required for instructors who maintain proficiency only qualification). Lead and SKE qualification not required for single ship only qualified pilots. Must be qualified in Self-contained Navigation System (SCNS). If not qualified, students must attend C130SCN course first. ECL 80 SO. Flight physical, US Air Force physiological training (only AFR 50-27 physiological training accepted), and all MCR 51-1 Vol III and AFI 11-401 requirements must be current and remain current 30 days after published graduation date. ACC active duty, Air National Guard, Air Force Reserve, and AFSOC pilots must have completed the C-130 ATS Pilot Instructor Preparatory (PIP) Course prior to attending. Students will bring the ACC/AFSOC Form 670, Aircrew Training Record, initiated during PIP to Little Rock. International military students attending must arrive 5 duty days before course start date to complete the C-130 ATS Pilot Instructor Preparatory course, computer based training, and workbook portions via MASL D155051, Computer Assisted Training.

Special Requirements: Students must hand-carry individual records. They also need to bring: T.O. 1C-130B-1*, T.O. 1C-130B-1-1*, T.O. 1C-130B-1CL-1*, AFI 11-401 (formerly AFR 60-1)**, AFI 11-206 (formerly AFR 60-16)***, AFMAN 11-212 (formerly AFM 51-37)***, and MCR 51-1 Vol III***.

*Students from units with H-model aircraft 74-1658 and up may obtain these publications from the school registrar's office on a temporary basis, upon request.

**Issued on a temporary basis from the school registrar's office. We encourage students to bring their personal copies so they may annotate areas which have specific applications to their training situation.

***Will be issued on a permanent basis from the school registrar's office when students are unable to get it from their unit publications office.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 PIN-IU—Pilot Instructor-In Unit—PDS Code P5M—in unit/6 wk 1 day—Mar 94

This is an in-unit C-130 instructor aircraft commander upgrade course. Course contents and prerequisites are the same as the 314 OG C130PIN course.

C130 PMK—Aircraft Commander/Copilot Mission Qualification Visual/SKE Formation—PDS Code Z55—Little Rock/6 wk 2 days/MASL D117043—Oct 96

Mission qualifies pilots in the C-130E as a copilot or aircraft commander candidate according to MCR 51-1 Vol III flying hour prerequisites. Includes academic, simulator, and flying training on airland, visual/Station Keeping Equipment (SKE) formation, and airdrop operations.

Prerequisites: Qualified and current in C-130E aircraft. Must be qualified in Self-contained Navigation System (SCNS). If not qualified, student must attend C130SCN course first. Not required for students attending C130CIQ prior to C130PMK. ECL 80 SO. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must be current and remain current for at least 30 days past published graduation date.

Special Requirements: US personnel must be US citizens with a Secret clearance.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 PMK-IU—Aircraft Commander/Copilot Mission Qualification Visual/SKE-In Unit—PDS Code P5Q—in unit/6 wk 2 days— Oct 96

This is an in-unit C-130 tactical mission qualification course for aircraft commanders and copilots. This course qualifies pilots in visual and SKE formation procedures. Course contents and prerequisites are the same as the 314 OG C130PMK course.

C130 PMS—Aircraft Commander/Copilot Mission Qualification Single Ship—PDS Code Z53—Little Rock—3 wk 2 days/MASL D117041— Oct 96

Mission qualifies pilots in the C-130E as a copilot or aircraft commander candidate according to MCR 51-1 Vol III flying hour prerequisites. Must be qualified in Self-contained Navigation System (SCNS). If not qualified, students must attend C130SCN course first. Not required for students attending C130CIQ prior to C130PMS. Includes academic and flying training on airland and airdrop operations while flying single ship.

Prerequisites: Qualified and current in C-130E aircraft. Flight physical and US Air Force physiological training (only AFR 50-27

physiological training accepted) must be current and remain current for at least 30 days after published graduation date. ECL 80 SO.

Special Requirements: US personnel must be US citizens with a Secret clearance.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 PMS-IU—Aircraft Commander/Copilot Mission Qualification Single Ship-In Unit—PDS Code P5T—in unit/3 wk 2 days—Mar 94

This is an in-unit C-130 tactical mission qualification course for aircraft commanders and copilots. This course qualifies pilots in single ship procedures. Course contents and prerequisites are the same as the 314 OG C130PMS course.

C130 PMV—Aircraft Commander/Copilot Mission Qualification Visual Formation—PDS Code Z54—Little Rock/5 wk 4 days/MASL D117042— Oct 96

Mission qualifies pilots in the C-130E as a copilot or aircraft commander candidate according to MCR 51-1 Vol III flying hour prerequisites. Includes academic and flying training on airland, visual formation, and airdrop operations.

Prerequisites: Qualified and current in C-130E aircraft. Must be qualified in Self-contained Navigation System (SCNS). If not qualified, student must attend C130SCN course first. Not required for students attending C130CIQ prior to C130PMV. ECL 80 SO. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must be current and remain current for at least 30 days past published graduation date.

Special Requirements: US personnel must be US citizens with a Secret clearance.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 PMV-IU—Aircraft Commander/Copilot Mission Qualification Visual Formation-In Unit—PDS Code P5R—in unit/5 wk 4 days—Mar 94

This is an in-unit C-130 tactical mission qualification course for aircraft commanders and copilots. This course qualifies pilots in visual formation procedures. Course contents and prerequisites are the same as the 314 OG C130PMV course.

C130 PRK—Aircraft Commander/Copilot Mission Requalification—PDS Code 5CL—Little Rock/5 wk 3 days—Oct 96

Requalifies previous mission ready aircraft commanders and upgrades mission ready copilots to mission ready aircraft commander candidates in the C-130E. Includes academic, simulator, and flying training on airland, visual/station keeping equipment formation and airdrop operations.

Prerequisites: A graduate of C130PR/U or C130ACQ, or be a current and qualified basic proficiency aircraft commander. Must be qualified in Self-contained Navigation System (SCNS). If not qualified, student must attend C130SCN course first. AC upgrades must meet upgrade criteria specified in MCR 51-1 Vol III. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must be current and remain current for at least 30 days past published graduation date.

Special Requirements: Personnel must be US citizens with a Secret clearance.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C130 PRK-IU—Pilot Mission Requalification-In Unit—PDS Code P5S—in unit/5 wk 3 days—Mar 94

An in-unit C-130 tactical mission aircraft commander upgrade and pilot tactical mission requalification course. Qualifies pilots in visual and SKE formation procedures. Course contents and prerequisites are the same as the C130PRK course.

C130 SCN—Self-contained Navigation System (SCNS) Lead-In—PDS Code RBP—Little Rock/1 day/MASL D129017—Oct 96

Qualifies pilots and navigators in the basic operation of the SCNS equipment. Includes special aircrew ground training in mission peculiar equipment.

Prerequisites: Currently qualified C-130 pilot or navigator. ECL 80 SR.

Special Requirements: Students must hand-carry individual records. They also need to bring: T.O. 1C-130B-1* and 1C-130B-1CL-1 (or -2).

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

*Students from units with H-model aircraft 74-1658 and up may obtain these publications from the school registrar's office on a temporary basis, upon request.

C130 SOC—Aircraft Commander Initial Qualification II Senior Officer—PDS Code 0JN—Little Rock/1 wk—Oct 96

Qualifies pilots in the C-130E. Graduates who initially qualify in the C-130 via this course must fly under the supervision of a C-130 instructor pilot. Includes academic and simulator training only at the school. The flying portion will be accomplished in-unit.

Prerequisites: Must be vice wing commander, wing commander, or approved by ACC/DOL. Currently rated pilot and qualified for flying duty. Flight physical and US Air Force physiological training (only AFR 50-27 physiological training accepted) must be current for duration of training.

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

C-130 PHIL—C-130 Phase II Load Planning/Supervisor—PDS Code 7C3—Location: Various/2 wk—Mar 94

Qualifies ACC personnel to perform Phase II load planning and loading supervisor duties on the C-130 aircraft.

Prerequisites: A1C or above, DAFSC 60551 or equivalent. Department of Defense civilians must be in UDL positions in above AFSC. Must have 6 months of retainability, recommended by supervisor, and approved by squadron operations officer, port operations officer, or squadron commander.

Special Instructions: Subdued work utility uniform is required for aircraft load simulator on-hands training.

Quota Control: Individual's unit commander.

E3000BQOBX—E-3 Mission Crew Commander—PDS Code 5FJ—Tinker/11 wk/AFSC 1716—Jun 93

Trains mission crew commanders in the operational procedures for command, control, surveillance, communications/electronic management and functional responsibilities of the mission crew on the E-3 aircraft. Training consists of academic, simulator and flying training.

Prerequisites: a. Major or major selectee. Graduate of an accredited weapons control school and have AFSC 1711/1716 with 1 year of

experience in automated radar systems (SAGE, BUIC, 407L, 412L preferred); or formerly qualified in E-3 as an air surveillance officer, weapons director, senior director, or equivalent NATO aircrew position.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to handcarry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Survival training: Complete basic survival course S-V80-A and water survival course S-V90-A before arriving at Tinker AFB.

Special Requirements: a. Top Secret security clearance and SBI paperwork submitted within 30 days of assignment notification.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQODX—E-3 Weapons Director—PDS Code 5FK—Tinker/15 wk 2 days/AFSC 1745G—Jun 93

Trains weapons directors in the operation of console functions and with operational procedures for the control and regulation of airborne assets on assigned missions. Provides management necessary for the employment of all aircraft under E-3 control within area of responsibility. Training consists of academic, simulator, and flying training.

Prerequisites: a. Graduate from AETC course E3OBP1741X, Air Weapons Controller Fundamentals, and an automated system qualification training course (either TAC 1741BOO or TAC 1741FOL) or have 1 year of experience in an automated system.

b. Medical: Physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V90-A before arriving Tinker AFB.

Special Requirements: a. Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQOFX—E-3 Flight Engineer—PDS Code 5FD—Tinker/13 wk 4 days/AFSC 11350—Jun 93

Trains flight engineers in operating systems of the E-3 aircraft. Training consists of academic, simulator, cockpit familiarization training, and flying in E-3 aircraft.

Prerequisites: a. Individual must be currently qualified for flying duty and must possess AFSC A11330C/50C/70C/90C. Must be performance qualified or graduate of course 11330C, Fixed Wing Aircraft Performance. Individuals with AFSC 11330C must be staff sergeant or higher and have held a 7-level in a previous AFSC.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to handcarry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Survival training: Complete basic survival course S-V80-A and water survival course S-V90-A before arriving Tinker AFB.

Special Requirements: a. Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Quota and Waiver Control: HQ ACC/DOY.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

E3000BQOGX—E-3 Air Surveillance Officer—PDS Code 5FC—Tinker/18 wk 3 days/AFSC 1745G—Jun 93

Trains air surveillance officers (ASO) to operate and manage E-3 system status and quality of surveillance sensors, tracking, TADIL-A operations, ECCM, and identification functions. The ASO works directly for the mission crew commander and supervises all surveillance activities. Training consists of academic, simulator, and flying training.

Prerequisites: a. Graduate of an accredited weapons control school.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to handcarry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Survival training: Complete basic survival course S-V80-A and survival course S-V90-A before arriving Tinker AFB.

Special Requirements: a. Top Secret security clearance and SBI paperwork submitted within 30 days of assignment notification.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQOHX—Air Surveillance Technician—PDS Code 5FF—Tinker/10 wk 4 days/AFSC 11730—Jun 93

Trains air surveillance operators (ASOP) in detection, tracking, and identification. The ASOP is responsible to the air surveillance officer. Training consists of academic, simulator, and flying in E-3 aircraft.

Prerequisites: a. Possess AFSC A117X0. One year of experience in automated radar system is desirable, but not required. Must be a graduate of AETC course E3ABR27630C, Aerospace Control and Warning Systems Operator, or AETC course E3AQR11730-000.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date.

d. Survival training: Complete basic survival course S-V80-A and water survival course S-V90-A before arriving Tinker AFB.

e. Enlisted Aircrew Undergraduate Course (EAUC): EAUC, J3AQR11010 000 is required for pipeline students and non-aviation service retraining students before arriving at Tinker AFB. Physiological training is included in the 18-day course and requirement referenced in paragraph c will be fulfilled when this prerequisite is met.

Special Requirements: a. Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQOKX—E-3 Battle Director Technician Upgrade Course—PDS Code WKL—Tinker/7 wk—Sep 93

Trains air surveillance technicians in the functions of NORAD battle management, threat, tactical air operations and employment concepts, weapon systems, sortie generation potential, logistics and communications support considerations, and command, control, communications and intelligence systems and procedures. Training consists of academic, simulator, and flying in E-3 aircraft.

Prerequisites: a. AFSC A11770. Must have been a basic qualified E-3 air surveillance technician (AST) in the past 18 months or previously qualified as battle director technician in the past 18 months. Grade E-5 to E-9.

b. Must be physically qualified for flight duty per Class III medical standards.

c. Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date.

d. Minimum flight experience must be 120 hours in E-3 as an AST.

e. Nominated according to 552 ACWR 51-1.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQOMX—E-3 Airborne Computer Display Maintenance Operator—PDS Code 5FG—Tinker/13 wk 1 day/AFSC 11830—Jun 93

Trains airborne computer display maintenance operators (CDMO) to perform operational and limited in-flight maintenance tasks of the E-3 AWACS. The CDMO is responsible for the operation, monitoring, and limited in-flight maintenance of the data processing functional group, data display functional group, onboard test monitor maintenance group, interface adapter unit, and related subsystems. This course consists of academics, mission simulators, and flying training in E-3 aircraft.

Prerequisites: a. Must be a graduate of AETC course 3AQR11830 000.

b. CMDO possess AFSC 11810 or higher; airman or higher. Progression to CDMT is commensurate with experience and ability.

c. Medical: Must be physically qualified for flight duty per Class III medical standards.

d. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date.

e. Survival Training: Complete basic survival course S-V80-A and water survival course S-V90-A before arriving Tinker AFB.

f. Enlisted Aircrew Undergraduate Course (EAUC): EAUC, J3AQR11010 000 is required for pipeline students and non-aviation service retraining students before arriving at Tinker AFB. Physiological training is included in the 18-day course and requirements referenced in paragraph c will be fulfilled when this prerequisite is met.

Special Requirements: a. Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water

survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQONX—E-3 Navigator—PDS Code 5E9—Tinker/6 wk 4 days/AFSC 1525—Jun 93

Trains navigators in procedures and techniques of operating navigational systems of the E-3 aircraft for assignment to airborne warning and control units. Training consists of academics, procedures trainer, and flying in E-3 aircraft.

Prerequisites: a. Rated officers returning to active flying from rated support or staff positions are considered to be on flight status and current. Rated navigator must be on flight status and qualified for flight duty.

b. Medical: Must be physically qualified for flight duty per Class II medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to handcarry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Survival Training: Complete basic survival course, S-V80-A, and water survival course, S-V90-A, before arriving Tinker AFB.

Special Requirements: a. Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQOPX—E-3 Pilot—PDS Code 5FA—Tinker/14 wk 1 day/AFSC 1325—Jun 93

Trains pilots and copilots in the procedures and techniques of operating E-3A aircraft in preparation for assignment to airborne warning and control units. Training consists of academics, simulators, and flying in Boeing 707 and E-3 aircraft.

Prerequisites: a. Rated officers returning to active flying from rated support or staff positions are considered to be on flight status and current. (1) Pilots: On flight status and qualified for flight duty. Flight experience must include one of the following: 2000 hours total with 2 years of experience as aircraft commander, or 1500 hours total with 500 hours in jet aircraft; 1500 hours total with 300 hours in E-3, or 1200 hours total with 600 hours in E-3. (2) Copilots: Rated pilot on flight status and qualified for flight duty; must possess current instrument rating.

b. Medical: Must be physically qualified for flight duty per Class II medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to handcarry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V90-A before arriving Tinker AFB.

Special Requirements: a. Top Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQOQX—E-3 Airborne Radar Systems Operator—PDS Code 5FB—Tinker/8 wk/AFSC 11832—Jun 93

Trains airborne radar systems operators (ARO) to operate, monitor, and maintain the E-3 surveillance radar system, IFF system, and associated cooling systems in an airborne environment. This course consists of academic and flying training in E-3 aircraft.

Prerequisites: a. Possess AFSC A11812 or higher; airman or higher; completion of course E3ABR11832 000 at Keesler AFB MS is mandatory. Progression to airborne radar systems technician is commensurate with experience and ability.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to handcarry completed AF Form 1042 (mandatory) and 702 (if applicable).

d. Survival Training: Pipeline students will complete basic survival course S-V80-A and water survival course S-V90-A before arriving at Tinker AFB.

e. Enlisted Aircrew Undergraduate Course (EAUC): EAUC, J3AQR11010 000 is required for pipeline students and non-aviation service retraining students before arriving at Tinker AFB. Physiological training is included in the 18-day course and requirements referenced in paragraph c will be fulfilled when this prerequisite is met.

Special Requirements: a. Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQORX—E-3 Communications Systems Operator—PDS Code 5FE—Tinker/13 wk 2 days/AFSC 11650—Jun 93

Trains communications systems operators to program radio links and intercom nets for E-3 flight and mission crew members. Operates electronic typewriter keyboard, auxiliary display unit, and secure voice and crypto equipment. Establishes E-3 radio configurations and TADIL interfaces with airborne, naval and ground C2 units. Tunes transmitters and receivers as required. This course consists of academics, simulator, and flying training in E-3 aircraft.

Prerequisites: a. Must complete airborne communications systems operator course E3ABR 11630 001 or presently hold AFSC 11650.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to handcarry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Survival training: Complete basic survival course S-V80-A and water survival course S-V90-A before arriving Tinker AFB.

e. Enlisted Aircrew Undergraduate Course (EAUC): EAUC, J3AQR11010 000 is required for pipeline students and non-aviation service retraining students before arriving at Tinker AFB. Physiological training is included in the 18-day course and requirements referenced in paragraph c will be fulfilled when this prerequisite is met.

Special Requirements: a. Top Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000BQOTX—E-3 Communications Technician—PDS Code 5FH—Tinker/14 wk 2 days/AFSC 11831—Jun 93

Trains airborne communications technicians to perform maintenance of E-3 flight and mission crew communications and crypto equipment in an airborne environment. Monitors overall E-3 systems communications performance and operates crypto equipment. Performs onboard maintenance of all radio and crypto equipment, as required. Training consists of academic, simulator, and flying training.

Prerequisites: a. Must be a graduate of AETC course E3AQR11831 000 or possess one of the following primary AFSCs: 30454, 32658, or 455XX.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher which will not expire until after training completion date. Members are required to handcarry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Survival training: Complete basic survival course S-V80-A and water survival course S-V90-A before arriving Tinker AFB.

e. Enlisted Aircrew Undergraduate Course (EAUC): EAUC, J3AQR11010 000 is required for pipeline students and non-aviation service retraining students before arriving at Tinker AFB. Physiological training is included in the 18-day course and requirements referenced in paragraph c will be fulfilled when this prerequisite is met.

Special Requirements: a. Top Secret security clearance completed by class start date.

b. Military drivers license, if obtainable at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days prior to CSD.

Quota and Waiver Control: HQ ACC/DOY.

E3000IOOFX—E-3 Instructor Flight Engineer—PDS Code 57Y—Tinker/4 wk—Jun 93

Trains mission ready (MR) qualified flight engineers in the procedures, techniques, and requirements necessary to safely instruct and monitor students in the E-3. Training consists of academics, flight simulators, and flying in the E-3. Graduates will be designated flight instructors in their primary E-3 crew position in accordance with ACCR 51-60, volume II.

Prerequisites: a. Complete E-3 Flight Engineer Course E3000BQOFX.

b. Flight experience must include one of the following:

(1) 2000 hours with 200 hours in E-3.

(2) 1000 hours with 300 hours in E-3.

(3) No previous experience: 600 hours in E-3.

c. Nominated in accordance with 28ADR 51-1.

Quota and Waiver Control: HQ ACC/DOY.

E3000IOONX—E-3 Instructor Navigator—PDS Code 57Z—Tinker/4 wk 3 days—Jun 93

Trains mission ready (MR) qualified E-3 navigators in the procedures, techniques, and requirements necessary to safely instruct and monitor students in the E-3. Training consists of academics and flying in the E-3 aircraft. Graduates will be designated flight instructors in their primary E-3 crew position in accordance with ACCR 51-60, volume II.

Prerequisites: a. Complete E-3 Navigator Course E3000BQONX.

b. Flight experience must include one of the following:

(1) 2000 hours with 200 hours in E-3.

(2) 1000 hours with 300 hours in E-3.

(3) No previous experience: 600 hours in E-3.

c. Nominated in accordance with 28ADR 51-1.

Quota and Waiver Control: HQ ACC/DOY.

E3000IOOPX—E-3 Instructor Pilot—PDS Code 58A—Tinker/4 wk 2 days—Jun 93

Trains mission ready (MR) qualified E-3 pilots in the procedures, techniques, and requirements necessary to safely instruct and monitor students in the E-3. Training consists of academics, flight simulators, and flying in the Boeing 707 and E-3 aircraft. Graduates will be designated flight instructors in their primary E-3 crew position in accordance with ACCR 51-60, volume II.

Prerequisites: a. Completion of E-3 Pilot Course E3000BQOPX.

b. Fully qualified E-3 aircraft commander with AFSC 1325T.

c. Flight experience must include one of the following:

(1) 3000 hours with 200 hours in E-3.

(2) 2000 hours with 300 hours in E-3.

(3) 1500 hours with 500 hours in E-3.

d. Nominated IAW 28ADR 51-1.

Quota and Waiver Control: HQ ACC/DOY.

E3000IOOXX—E-3 Mission Crew Instructor—PDS Code JNM—Tinker/4 wk 3 days—Jun 93

Trains mission ready (MR) qualified E-3 mission crewmembers in the procedures, techniques, and requirements necessary to safely instruct and monitor students in the E-3. Graduates will be designated flight instructors in their primary E-3 crew position in accordance with ACCR 51-60, vol II.

Prerequisites: a. These requirements will be completed before the formal start date: a. Be mission ready (MR) qualified in the appropriate E-3 mission crew position.

b. Attain the requirements as required by TACM 51-60, volume II, for upgrade to instructor in the appropriate crew position.

c. Complete the Academic Instructor Course (AIC), ACCAIC100X, or an equivalent course.

d. Nominated IAW 552 ACWR 51-1, chapter 9.

Quota and Waiver Control: HQ ACC/DOY.

E3000UOOPX—E-3 Pilot Upgrade—PDS Code 32G—Tinker/5 wk 1 day—Jun 93

Trains E-3 copilots in the procedures and techniques of operating E-3 aircraft as an aircraft commander. Training consists of academics, flight simulators and flying in the Boeing 707 and E-3 aircraft.

Prerequisites: a. Completion of E-3 Pilot Course E3000BQOPX.

b. Fully qualified E-3 copilot with AFSC 1323T.

c. Flight experience must include one of the following: (1) 2000 hours, (2) 1500 hours with 500 hours jet, (3) 1500 hours with 300 hours in E-3, or (4) 1200 hours with 600 hours in E-3.

d. Nominated IAW ACWR 51-1.

Quota and Waiver Control: HQ ACC/DOT.

E3000UOOSX—E-3 Senior Director—PDS Code 58B—Tinker/5 wk 1 day/AFSC G1745G—Jun 93

Trains mission ready weapons directors (WD) in the operational procedures to conduct the air battle and manage and coordinate all weapons director activities. Training consists of academics, simulators, and flying in the E-3 aircraft.

Prerequisites: a. Completion of E-3 Weapons Director Course, E3000BQODX.

b. Currently qualified weapons director with AFSC G1745G.

c. Minimum flight experience must be 600 hours in E-3 as a weapons director.

d. Nominated IAW ACWR 51-1.

Quota and Waiver Control: HQ ACC/DOY.

E8ACST—E-8 Airborne Communications Systems Technician—PDS Code 307—Robins/14 wk 2 days—Oct 96

Trains communications systems technicians to operate and maintain communication and intercom systems on the E-8 aircraft. Training consists of academics, simulator, and E-8 flight training.

Prerequisites: a: AFSC 1A3X1. Pipeline students must complete airborne communication systems operator course E3ABR1A331 001.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand carry completed AF 1042 (mandatory) and AF 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

e. J3AQR1A311 000, EAUC Airborne Communications Systems Helper, is required for pipeline students and non-aviation service retraining students before arriving at Robins AFB. Physiological training is included in the 18-day course, and the requirement in paragraph c will be fulfilled when this requirement prerequisite is met.

Special Requirements: a. Top Secret security clearance completed by class start date.

b. Military drivers license: If possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8AIO—E-8 Airborne Intelligence Officers—PDS Code 306—Robins/15 wk 2 days—Oct 96

Trains airborne intelligence officers in the E-8 aircraft. Consists of academics, simulator, and E-8 flight training aircraft.

Prerequisites: a: Must complete course G3OBR8091 000.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand carry completed AF 1042 (mandatory) and AF 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

Special Requirements: a. Top Secret security clearance and SBI paperwork submitted within 30 days of assignment notification.

b. Military drivers license; if possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8AIT—E-8 Airborne Intelligence Technician—PDS Code-30I—Robins/15 wk 2 days—Oct 96

Trains airborne intelligence technicians in the E-8 aircraft. This course consists of academics, simulator, and E-8 flight training.

Prerequisites: a: Must complete course G3ABR1N031 000.

b. Possess AFSC 1N051 and be a staff sergeant or above.

c. Medical: Must be physically qualified for flight duty per Class III medical standards.

d. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand-carry completed AF FM 1042 (mandatory) and AF FM 702 (if applicable).

e. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

f. Physiological training is included in the 18-day course and the requirement in paragraph c will be fulfilled when this requirement prerequisite is met.

Special Requirements: a. Top Secret security clearance and SBI paperwork submitted within 30 days of assignment notification.

b. Military drivers license; if possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8AOT—E-8 Airborne Operations Technician—PDS Code 304—Robins/13 wk 3 days—Oct 96

Trains airborne operations technicians (AOT) in detection, tracking, and identification of radar imagery. Training consists of academic, simulator, and flying in E-8 aircraft.

Prerequisites: a: Must be a graduate of AETC course E3AQR1A430 000 Airborne Surveillance Operator.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber or a current TTB refresher that will not expire until after training completion date. Members are required to hand carry completed AF FM 1042 (mandatory) and AF FM 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

e. J3AQR1A411 000, EAUC Airborne Warning Command and Control Systems Helper, is required for pipeline students and non-aviation service retraining students before arriving at Robins AFB. Physiological training is included in the 18-day course and the requirement in paragraph c will be fulfilled when this requirement prerequisite is met.

Special Requirements: a. Secret security clearance is required before entering training.

b. Military drivers license; if possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8ART—E-8 Airborne Radar Technician—PDS Code 30A—Robins/14 wk 3 days—Oct 96

Trains airborne radar technicians to operate, monitor, and maintain the E-8 surveillance radar system, IFF system, and associated cooling systems in an airborne environment. This course consists of academic, simulator, and E-8 flight training.

Prerequisites: a: Possess AFSC 1A5X1; completion of course E3ABR1A511 000 is mandatory for pipeline students.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand carry completed AF Fm 1042 (mandatory) and AF Fm 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

e. J3AQR1A511 000, EAUC Airborne Missions Systems Helper, is required for pipeline students and non-aviation service retraining students before arriving at Robins AFB. Physiological training is included in the 18-day course and the requirement in paragraph c will be fulfilled when this requirement prerequisite is met.

Special Requirements: a. Top Secret security clearance completed by class start date.

b. Military drivers license, if possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8ATSS—Airborne Target Surveillance Supervisor—PDS Code 309—Robins/14 wk 2 days—Oct 96

This is a U.S. Army position on the E-8. Trains airborne target surveillance supervisors in detection, tracking, and identification duties on board the E-8 aircraft. Training consists of academic, simulator, and E-8 flight training.

Prerequisites: a: One year of experience in automated radar systems is desirable but not required. Must be a graduate of an accredited airborne surveillance operator school.

b. Possess 96H MOS.

c. Medical: Must be physically qualified for flight duty per Class III medical standards.

d. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand carry documentation of training to Robins AFB.

e. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

Special Requirements: a. Top Secret security clearance and SBI paperwork submitted within 30 days of assignment notification.

b. Military drivers license; if possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members attending course in TDY status must arrive 14 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8FE—E-8 Flight Engineer—PDS Code 304—Robins/15 wk 1 day—Oct 96

Trains flight engineers in operating systems of the E-8 aircraft. Training consists of academic, simulator, cockpit familiarization training, and flying in E-8 aircraft.

Prerequisites: a: Individual must be currently qualified for flying duty . Must be performance qualified or a graduate of course 1A131C, Fixed Wing Aircraft Performance. Individuals with AFSC 1A131C must be a staff sergeant or higher and have held a 7-level in a previous AFSC.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand-carry completed AF 1042 (mandatory) and AF 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

Special Requirements: a. Secret security clearance completed by class start date.

b. Military drivers license; if possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days before CSD. Members attending course in TDY status must arrive 14 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8MCC/DMCC—E-8 Mission Crew Commander/Deputy Mission Crew Commander—PDS Code 305—Robins/14 wk 2 days—Oct 96

Trains Air Force mission crew commanders and Army deputy mission crew commanders in the operational procedures for command, control, surveillance, communications and electronic management and functional responsibilities of the mission crew on

the E-8 aircraft. Training consists of academic, simulator, and E-8 flight training.

Prerequisites: a: Major or major select. Air Force: graduate of an accredited weapons control school. Knowledge or experience in automated radar systems; or qualified in the E-8 as an sensor management officer, weapons director, or senior director. Army: graduate of accredited weapons control school. Knowledge or experience in automated radar systems.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Air Force members are required to hand carry completed AF 1042 (mandatory) and AF 702 (if applicable). Army members will hand carry equivalent documentation of physiological training.

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

Special Requirements: a. Top Secret security clearance and SBI paperwork submitted within 30 days of assignment notification

b. Military drivers license; if possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members attending course in TDY status must arrive 14 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8NAV—E-8 Navigator—PDS Code 303—Robins/16 wk 1 day—Oct 96

Trains navigators in procedures and techniques of operating navigational systems of the E-8 aircraft for assignment to Joint Surveillance Target Attack Radar System units. Training consists of academics, procedures trainer, and flying in E-8 aircraft.

Prerequisites: a: Rated officers returning to active flying from rated support or staff positions are considered to be on flight status and current. Rated navigators must be on flight status and qualified for flight duty.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand carry completed AF 1042 (mandatory) and AF 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

Special Requirements: a. Top Secret security clearance completed by class start date.

b. Military drivers license; if possible obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8P—E-8 Pilot—PDS Code 302—Robins/15 wk 2 days/AFSC 11R3Z—Oct 96

Trains pilots and copilots in the procedures and techniques of operating E-8 aircraft. Training consists of academics, simulators, and flying Boeing 707 and E-8 aircraft.

Prerequisites: a: Rated officers returning to active flying from rated support or staff positions are considered to be on flight status and current. (1) Pilots: On flight status and qualified for flight duty. Flight experience must include one of the following: 2000 hours total with 2 years' experience as aircraft commander, or 1500 hours total with 500 hours in jet aircraft; 1500 hours total with 300 hours in E-3 or E-8, or 1200 hours total with 600 hours in E-3 or E-8. (2) Copilots: Rated pilot on flight status and qualified for flight duty; must possess current instrument rating.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand carry completed AF Fm 1042 (mandatory) and AF Fm 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

Special Requirements: a. Top Secret security clearance required prior to class start date.

b. Military drivers license; if possible obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days before CSD. Members attending course in TDY status must arrive 14 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8SD—E-8 Senior Director—PDS Code 30L—Robins/5wk—Oct 96

Trains mission-ready senior directors to conduct the mission; manage and coordinate all senior director activities. Training consists of academics, simulators, and E-8 flight training.

Prerequisites: a. Minimum grade of captain. Completion of E8WD, Weapons Director.

b. Currently qualified weapons director with AFSC 13B3B.

c. Minimum of 600 hours flight experience as a E-8 weapons director.

d. Nominated IAW ACWR 51-1.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8SMO—E-8 Sensor Management Officer—PDS Code 308—Robins/14 wk 4 days—Oct 96

Trains sensor management officers to operate and manage E-8 system status and quality of surveillance sensors, tracking, operations, ECCM, and identification functions. Training consists of academic, simulator, and E-8 flight training.

Prerequisites: a: Graduate of an accredited weapons control school.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (3 days) or a current TTB refresher that will not expire until after training completion date. Members are required to hand carry completed AF Fm 1042 (mandatory) and AF Fm 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

Special Requirements: a. Top Secret security clearance and SBI paperwork submitted within 30 days of assignment notification.

b. Military drivers license; if possible, obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days before class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days before CSD. Members attending course in TDY status must arrive 14 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

E8WD—E-8 Weapons Director—PDS Code 30J—Robins/14 wk 4 days—Oct 96

Trains weapons directors in the operation of console functions and operational procedures for the control of assets on assigned missions. Training consists of academic, simulator, and E-8 flight training.

Prerequisites: a: Graduate from AETC course E30BP13B3X, Air Weapons Controller Functions, and an automated system qualification training course ACC 1741HA00DT or ACC 1744HT00DT, or have 1 year experience in an automated system.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber, or a current TTB refresher which will not expire until after training completion date. Members are required to hand carry completed AF 1042 (mandatory) and AF 702 (if applicable).

d. Survival Training: Complete S-V80-A, Combat Survival Training Course, and S-V90-A, Water Survival, Non-Parachuting, before arriving at Robins AFB.

Special Requirements: a. Top Secret security clearance completed by class start date.

b. Military drivers license; if possible obtain at present duty location.

c. Qualified in small arms training.

d. Passport in hand or action initiated to obtain passport before departure from present duty location.

e. Completed life support training.

Admin Instructions: Members reporting PCS who have completed basic and water survival training must arrive 30 days prior to class start date (CSD). Members who have not completed basic and water survival training must arrive 60 days prior to CSD. Members attending course in TDY status must arrive 14 days before CSD.

Quota and Waiver Control: HQ ACC/DOY through HQ ACC/DPPTC.

EC130DQOPD—USAF Operations Training Course, EC-130H Pilot/Copilot Difference Qualification—PDS Code 0AE—Davis-Monthan/9 wk/AFSC 11R1C—Jan 96

Provides basic qualification training for new pilot/copilots in the EC-130H (compass call) weapon system.

Prerequisites: 1. Have completed course C130ACQ, C-130 Aircraft Commander Initial Qualification Training, or course C130CIQ, C-130 Copilot Initial Qualification Training.

2. Possess a Secret clearance and have initiated procedures for obtaining a Top Secret Sensitive Compartmented Information (TS-SCI) clearance. Member should have documentation ready to initiate a single scope background investigation (SSBI) immediately upon assignment notification. Member will contact security police and complete the "Catch Them in Training" requirements to expedite processing before submitting paperwork to the Defense Investigative Service. All SSBI requirements must be met as early as possible to receive a TS-SCI clearance necessary for mission qualification training.

3. Have a current flight physical (Class II).

4. Be current in physiological training.

5. Complete local unit orientation.

6. Possess all required personal and professional equipment.

7. Complete life support/egress training.

8. Possess current aeronautical orders.

9. Complete S-V80-A, Basic Survival Training Course, and S-V90-A, Water Survival Training Course. S-V86-A is a suitable substitute for S-V90-A.

Quota Control: HQ ACC/DOTE through HQ ACC/DPPTC.

EC130IDOBN—USAF Weapons Instructor Course, Command and Control, EC-130H—PDS Code 09O—Nellis/19 wk 3 days/AFSC "W" Prefix—Oct 96

Trains qualified EC-130H instructors in all phases of EC-130H employment and tactics. Graduates are qualified weapons and tactics instructors capable of implementing, conducting, and managing the weapons and tactics training programs at their units up to and including headquarters level. Commanders are responsible for ensuring graduates are used as instructors or instructors in weapons and tactics training programs for a minimum of 3 years after graduation.

Flying hours: 33.0 (on station)

Prerequisites: Captain with a maximum of 8 years of rated experience. Minimum of 2 years EC-130H experience. Minimum of 500 hours of EC-130H flying time. Minimum of 50 hours as an instructor mission crew commander in the EC-130H. Currently maintaining MS/MR status in the EC-130H. By class start date: 36 flying hours within the last 90 days and one flight and Compass Call mission simulator within the last 14 days. Basic and water survival training is required.

Special Requirements: Top Secret/SCI clearance or be submitted for Top Secret/SCI before course attendance. Physical exams, physiological training, and flight checks must not expire during training period.

Admin Instructions: Ninety days before class start date or as directed by MAJCOM DPROR message, send nominations to appropriate MAJCOM DPROR. Information should include most current flying hours (total time, total PAA time, PAA instructor time). Wing commander, operations group commander, and squadron commander supportive comments should also be included with emphasis on instructor and mission capabilities. All individuals will report 2 days before class start date for administrative inprocessing and orientation procedures. State on the orders: "Dual quarters, variations, and 600 lbs maximum hold baggage are authorized" and "Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School."

OPR and Waiver Authority: HQ ACC/DOTW through HQ ACC/DPPTC.

Quota Control: HQ ACC/DOT through HQ ACC/DPPTC.

EC130MQOBD—EC-130H Compass Call Mission Crew Commander—PDS Code 3ZE—Davis-Monthan/8 wk 4 days—Dec 90

Trains electronic warfare officers to become qualified as mission crew commanders in the operation of EC-130H compass call aircraft. Training consists of academics, mission simulators, and flying in the EC-130H aircraft.

Prerequisites: a. Must have a primary AFSC of 1571/2271.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class II physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A. Overseas returnees will be assigned to 41 ECS in advance of class start date to accomplish training. Individuals are required to hand-carry medical records and a documented SF 600 to these courses. Secret security clearance is required for S-V80-A and must be shown on orders.

d. Top Secret - SENSITIVE COMPARTMENTED INFORMATION (TS-SCI) must be approved before qualification training start date. Personnel who do not possess TS-SCI clearance must submit application within 30 days of assignment notification.

e. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military drivers license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain passport before departure from present duty location.

d. Worldwide immunizations.

Quota and Waiver Control: HQ ACC/DOY.

EC130MQOBK—Director of Airborne Battle Staff—PDS Code 21E—Keesler/11 wk 2 days—Jun 93

Trains fighter-experienced rated officers as directors of the airborne battle staff in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Be an experienced field grade fighter pilot or weapons system officer.

b. Complete course ACC228550 Battle Staff Course.

c. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

d. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

e. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry medical records and documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Top Secret - Sensitive Compartmental Information (TS-SCI) clearance background investigation paperwork must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQODK—Airborne Weapons Director—PDS Code 5AC—Keesler/8 wk—Jun 93

Trains airborne weapons directors in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Complete AETC course E3OBP1741X, Air Weapons Director Fundamentals.

b. Complete course ACC228550, Battle Staff Course.

c. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

d. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

e. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry medical records and documented SF 600 to these orders. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQOFD—EC-130H Flight Engineer—PDS Code 16Z—Davis-Monthan/6 wk—Dec 90

Trains flight engineers in operating systems of the EC-130H aircraft. Training consists of academics and flying in EC-130H aircraft.

Prerequisites: a. Complete MAC course C130E-PO1FR, C130 Initial Qualification Training Course.

b. Possess AFSC 113X0C and be in the grade of E-4 or higher.

c. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A. Overseas returnees will be assigned to 41 ECS in advance of class start date to accomplish training. Individuals are required to hand-carry medical records and a documented SF 600 to these courses. Secret security clearance is required for S-V80-A and must be shown on orders.

e. Top Secret - Sensitive Compartmental Information (TS-SCI) must be approved before qualification training start date. Personnel who do not possess TS-SCI clearance must submit application within 30 days of assignment notification.

f. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military drivers license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain passport before departure from present duty location.

d. Worldwide immunizations.

Quota and Waiver Control: HQ ACC/DOY.

EC130MQOFK—Flight Engineer—PDS Code 17A—Keesler/4 wk 1 day—Mar 93

Trains flight engineers in the ABCCC, EG-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Complete MAC course C-130 C130FIQ, C-130 Initial Qualification Training.

b. Hold AFSC 1135X and be in the grade of E-4 or above.

c. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

d. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

e. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand carry medical records and documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQOHK—Airborne Aircraft Controller—PDS Code 17B—Keesler/12 wk—Mar 93

Trains airborne aircraft controllers in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Complete AETC course E3ABR27630C, Aerospace Control and Warning Systems Operator, and TAC Course TAC 228550, Battle Staff Course (BSC).

b. Hold AFSC 11750 and be in the grade of E-4 or above.

c. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

d. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

e. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry records and documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQOJD—EC-130H Compass Call Acquisition Operator—PDS Code 17D—Davis-Monthan/10 wk 4 days—Dec 90

Trains airborne electronic intelligence operations specialists in electronic countermeasures operations aboard the EC-130H aircraft.

Prerequisites: a. Must have a primary AFSC of 205X0 or A205X0.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A. Overseas returnees will be assigned to 41 ECS in advance of class start date to accomplish training. Individuals are required to hand-carry medical records and a documented SF 600 to these courses. Secret security clearance is required for S-V80-A and must be shown on orders.

d. Top Secret - Sensitive Compartmental Information (TS-SCI) must be approved before qualification training start date. Personnel who do not possess TS-SCI clearance must submit application within 30 days of assignment notification.

e. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military drivers license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain passport before departure from present duty location.

d. Worldwide immunizations.

Quota and Waiver Control: HQ ACC/DOY.

EC130MQOKD—EC-130H Compass Call Airborne Maintenance Technician—PDS Code 17E—Davis-Monthan/7 wk 4 days—Dec 90

Trains 328X3 personnel in airborne electronic countermeasures maintenance aboard the EC-130H aircraft. Training consists of academic, mission simulators, and flying in EC-130H aircraft.

Prerequisites: a. Must have a primary AFSC of 328X3 or A328X3.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A. Overseas returnees will be assigned to 41 ECS in advance of class start date to accomplish training. Individuals are required to hand-carry medical records and a documented SF 600 to these courses. Secret security clearance is required for S-V80-A and must be shown on orders.

d. Top Secret - Sensitive Compartmental Information (TS-SCI) must be approved before qualification training start date. Personnel who do not possess TS-SCI clearance must submit application within 30 days of assignment notification.

e. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military drivers license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain passport before departure from present duty location.

d. FTD course J4AMF/ASF/AST 32873-169 must be completed before PFT class start date at Davis-Monthan AFB.

e. Worldwide immunizations.

Quota and Waiver Control: HQ ACC/DOY.

EC130MQOND—EC-130H Navigator—PDS Code 21H—Davis-Monthan/6 wk 4 days—Dec 90

Trains navigators in operation systems of the EC-130H. Training consists of academics and flying in EC-130H aircraft.

Prerequisites: a. Complete MAC course Cl30EPO1NR, C-130 Initial Qualification Training Course.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A. Overseas returnees will be assigned to 41 ECS in advance of class start date to accomplish training. Individuals are required to hand-carry medical records and a

documented SF 600 to these courses. Secret security clearance is required for S-V80-A and must be shown on orders.

d. Top Secret - Sensitive Compartmental Information (TS-SCI) must be approved before qualification training start date. Personnel who do not possess TS-SCI clearance must submit application within 30 days of assignment notification.

e. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military drivers license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain passport before departure from present duty location.

d. Worldwide immunizations.

Quota and Waiver Control: HQ ACC/DOY.

EC130MQONK—Navigator ABCCC—PDS Code 21B—Keesler/3 wk 2 days—Mar 93

Trains navigators in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Complete MAC course C130 EPO1NR, C-130 Initial Qualification Training.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

c. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry records and documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQOOD—EC-130H Compass Call Analysis Operator—PDS Code 1UD—Davis-Monthan/18 wk 1 day—Dec 90

Trains 208XX personnel in electronic countermeasures operations aboard the EC-130H aircraft. Training consists of academics, mission simulators, and flying on EC-130H aircraft.

Prerequisites: a. Must have a primary AFSC of 208XX or A208XX.

b. Complete the appropriate airborne cryptologic linguist course.

c. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A. Overseas returnees will be assigned to 41 ECS in advance of class start date to accomplish training. Individuals are required to hand-carry medical records and a documented SF 600 to these courses. Secret security clearance is required for S-V80-A and must be shown on orders.

e. Top Secret - Sensitive Compartmental Information (TS-SCI) must be approved before qualification training start date. Personnel who do not possess TS-SCI clearance must submit application within 30 days of assignment notification.

f. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military drivers license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain passport before departure from present duty location.

d. Worldwide immunizations.

Quota and Waiver Control: HQ ACC/DOY.

EC130MQOPD—USAF Ops Trng Crse, EC-130H Pilot/Copilot Msn Qualification—PDS Code 6ME—Davis-Monthan/3 wk 3 days—Oct 96

Provides mission qualification training for pilots and copilots in the EC-130H (Compass Call) weapon system.

Prerequisites: Approved Top Secret/SCI security clearance and completed local special security officer indoctrination. Completed EC130DQOPD, Pilot/Copilot Difference Qualification Course, or EC130RQOPD, Pilot Requalification Course.

Quota Control: HQ ACC/DOTE through HQ ACC/DPPTC.

EC130MQOPK—Pilot ABCCC—PDS Code 4WB—Keesler/3 wk 3 days—Mar 93

Trains pilots and copilots in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Complete MAC course 130-A/B C-130 Pilot Qualification Training.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

c. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry records and documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQORK—Airborne Communications Systems Operator—PDS Code 4JW—Keesler/17 wk—Mar 93

Trains airborne communications systems technicians in the voice and teletype system of the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Complete course 3ABR11630 or presently hold AFSC 11650.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

c. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry records and documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQOSK—Battle Staff Operations Officer (BSOO)—PDS Code 6W0—Keesler/12 wk—Mar 93

Trains air weapons directors and fighter experienced rated officers as battle staff operations officers in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Be an experienced air weapons director, fighter pilot, or weapons systems officer.

b. Complete course TAC 228550 Battle Staff Course.

c. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

d. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

e. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry records and documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQOTK—Airborne Maintenance Technician—PDS Code 7BD—Keesler/14 wk—Mar 93

Trains airborne maintenance technicians in the support of the USC-48 communications capsule in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Possess AFSC 118X1, maintaining either a 5- or 7-skill level and be in the grade of E-4 or above.

b. Medical: Must have a current flight physical Class III. Physical must be current for a minimum of 6 months after reporting to 7 ACCS.

c. Physiological Training: Must be current in physiological training to include rapid decompression. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler. Secret clearance is required for S-V80-A.

e. Must possess current aeronautical orders.

f. Apply for a Top Secret clearance within 30 days of assignment notification.

g. Complete enlisted aircrew undergraduate course (J3AQR11010 000).

h. Complete unit orientation training at 7 ACCS, Keesler AFB MS.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQOXK—Airborne Intelligence Officer (AIO)—PDS Code 32E—Keesler/13 wk 1 day—Mar 93

Trains airborne intelligence officers in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Complete course G3OBR8071 000.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

c. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry records and a documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Top Secret - Sensitive Compartmental Information (TS-SCI) clearance background investigation paperwork must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130MQOYK—Airborne Intelligence Technician—PDS Code 34J—Keesler/12 wk—Mar 93

Trains airborne intelligence technicians in the ABCCC, EC-130E aircraft. Consists of academic, device, and flying training. Upon satisfactory completion of this course, graduates will be mission ready.

Prerequisites: a. Complete course G3ABR20130 000 and hold AFSC 20150. Must be E-5 or above.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Class III physical required before departure from present duty location. Physical must be current for a minimum of 6 months after reporting to Keesler AFB. No waiver to this provision is authorized.

c. Physiological Training: Must be current in physiological training to include rapid decompression before arrival at Keesler AFB. Training must be current for a minimum of 1 year after reporting to Keesler AFB.

d. Survival Training: Complete basic survival course S-V80-A and water survival course S-V86-A or S-V90-A before arrival at Keesler. Overseas returnees may attend after arrival at Keesler; these members must arrive at Keesler 60 days before class entry. Individuals are required to hand-carry records and documented SF 600 to these courses. Secret clearance is required for S-V80-A and must be shown on orders directing them to the course.

Special Requirements: Paperwork requesting a Top Secret clearance must be submitted within 30 days of assignment notification.

Admin Instructions: Except as noted in Prerequisites, paragraph e, members must arrive at Keesler 20 days before class entry.

Quota Control and Waiver Authority: HQ ACC/DOY.

EC130ROOBD—EC-130H Compass Call Mission Crew Commander Requalification—PDS Code 7YG—Davis-Monthan/7 wk/AFSC 1575G—Dec 90

Trains previously qualified Compass Call mission crew commanders to mission-ready status in the EC-130H Compass Call aircraft. Training consists of academics, mission simulators, and flying in the EC-130H aircraft.

Prerequisites: a. Must have previously held a primary AFSC of 1575G.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Top Secret - Sensitive Compartmental Information (TS-SCI) clearance must be approved and current prior to class start date. TS-SCI paper work must be submitted within 30 days of assignment notification.

d. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military driver's license, if obtainable at present duty station.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain current passport before departure from present duty location.

Quota and Waiver Control: HQ ACC/DOY.

EC130ROOFD—EC-130H Flight Engineer Requalification—PDS Code 7YH—Davis-Monthan/3 wk 4 days/AFSC A113XOC—Dec 90

Trains previously qualified Compass Call flight engineers in operating systems of the EC-130H aircraft. Training consists of academics and flying in the EC-130H aircraft.

Prerequisites: a. Must have been a previously qualified EC-130 flight engineer.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Top Secret - Sensitive Compartmental Information (TS-SCI) clearance must be approved and current prior to class start date. TS-SCI paper work must be submitted within 30 days of assignment notification.

d. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military driver's license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain current passport before departure from present duty location.

Quota and Waiver Control: HQ ACC/DOY.

EC130ROOJD—EC-130H Compass Call Acquisition Operator Requalification—PDS Code 7YJ—Davis-Monthan/9 wk/AFSC A205XX—Dec 90

Trains previously qualified Compass Call acquisition operators and experienced electronic operations specialists in electronic countermeasures aboard the EC-130H aircraft. Training consists of academics, mission simulators, and flying in the EC-130H aircraft.

Prerequisites: a. Must have held a primary AFSC of A205X0.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Top Secret - Sensitive Compartmental Information (TS-SCI) clearance must be approved and current prior to class start date. TS-SCI paper work must be submitted within 30 days of assignment notification.

d. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military driver's license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain current passport before departure from present duty location.

Quota and Waiver Control: HQ ACC/DOY.

EC130ROOKD—EC-130H Airborne Maintenance Technician Requalification—PDS Code 7YL—Davis-Monthan/6 wk 4 days/AFSC A328X0—Dec 90

Trains previously qualified Compass Call airborne maintenance technicians in airborne electronic countermeasures maintenance aboard the EC-130H aircraft. Training consists of academics and flying in the EC-130H aircraft.

Prerequisites: a. Must have been a previously qualified EC-130H airborne maintenance technician.

b. Medical: Must be physically qualified for flight duty per Class III medical standards. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Top Secret - Sensitive Compartmental Information (TS-SCI) clearance must be approved and current prior to class start date. TS-SCI paper work must be submitted within 30 days of assignment notification.

d. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military driver's license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain current passport before departure from present duty location.

Quota and Waiver Control: HQ ACC/DOY.

EC130ROOND—EC-130H Navigator Requalification—PDS Code 7YK—Davis-Monthan/5 wk 2 days/AFSC 1565W—Dec 90

Trains previously qualified EC-130 navigators in operational systems of the EC-130H. Training consists of academics and flying in the EC-103H aircraft.

Prerequisites: a. Must have been a previously qualified EC-130 navigator.

b. Medical: Must be physically qualified for flight duty per Class II medical standards. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Top Secret - Sensitive Compartmental Information (TS-SCI) clearance must be approved and current prior to class start date. TS-SCI paper work must be submitted within 30 days of assignment notification.

d. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military driver's license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain current passport before departure from present duty location.

Quota and Waiver Control: HQ ACC/DOY.

EC130ROOPD—EC-130 Compass Call Pilot Requalification—PDS Code 7YM—Davis-Monthan/5 wk 1 day/AFSC 1325W—Dec 90

Trains previously qualified EC-130 pilots in operation of the EC-130H aircraft. Training consists of academics and flying in the EC-130H aircraft.

Prerequisites: a. Must have been a previously qualified EC-130 pilot.

b. Medical: Must be physically qualified for flight duty per Class II medical standards. Physical must be current for a minimum of 6 months after reporting to 41 ECS. No waiver to this provision is authorized.

c. Top Secret - Sensitive Compartmental Information (TS-SCI) clearance must be approved and current prior to class start date. TS-SCI paper work must be submitted within 30 days of assignment notification.

d. Physiological Training: Current physiological training, including rapid decompression, before entering flying training. Overseas returnees, when local facilities do not exist, will be assigned to 41 ECS in advance of class start date to accomplish training. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if available) to the physiological training unit.

Special Requirements: a. Military driver's license, if obtainable at present duty location.

b. Qualified in small arms training (.38 caliber).

c. Passport in hand or action initiated to obtain current passport before departure from present duty location.

Quota and Waiver Control: HQ ACC/DOY.

EC130RQOPD—USAF Operations Training Course, EC-130H Pilot Requalification—PDS Code 09I—Davis-Monthan/7 wk 4 days—Jan 96

Provides requalification training for experienced pilots in the EC-130H (Compass Call) weapon system.

Prerequisites: 1. Must have a prior mission ready EC-130 pilot.

2. Must be at an experience level which, in the judgment of the squadron commander, qualifies for course entry.

3. Possess a Secret clearance and have initiated procedures for obtaining a Top Secret Sensitive Compartmented Information (TS-SCI) clearance. Member should have documentation ready to initiate a single scope background investigation (SSBI) immediately upon assignment notification. Member will contact security police and complete the "Catch Them in Training" requirements to expedite processing before submitting paperwork to the Defense Investigative Service. All SSBI requirements must be met as early as possible to receive a TS-SCI clearance necessary for mission qualification training.

4. Have a current flight physical (Class II).

5. Be current in physiological training.

6. Possess all required personal/professional equipment.

7. Complete life support and egress training.

8. Possess current aeronautical orders.

9. Complete S-V80-A, Basic Survival Training Course, and S-V90-A, Water Survival Training Course. S-V86-A is a suitable substitute for S-V90-A.

Quota Control: HQ ACC/DOTE through HQ ACC/DPPTC.

EC130XQOPD—EC-130H Pilot Aerial Refueling Qualification—PDS Code J6D—Davis-Monthan/2 wk 4 days—Dec 90

Qualifies EC-130H aircraft commanders and instructor pilots in air refueling procedures IAW unit transition qualification standards as established by HQ ACC. Consists of academic and flying training in an integrated crew environment.

Prerequisites: a. Hold AFSC 1325W.

b. Medical: Must be medically qualified for flight duties per class II medical standards.

c. Physiological Training: Must be current in physiological training to include rapid decompression. Training must be current a minimum of 30 days after scheduled class completion date.

Quota Control: HQ ACC/DOY. Trainee's unit commander will request instructor pilot training in writing from HQ ACC/DOY. HQ ACC/DOY will coordinate with 41 ECS/DOT and approval will be contingent on 41 ECS capability.

EF111BOOAC/EC—USAF Basic Operational Training Course, EF-111A—PDS Code 3IS—Cannon/28 wk/AFSC 11F3L—Oct 96

Designed to train non-fighter-experienced crewmembers in basic EF-111A skills. Graduates will be able to employ the EF-111A as a wingman or single-ship under day/night all-weather conditions. They will be qualified to deliver tactical jamming support.

Prerequisites: a. Pilots must meet one of the following experience criteria:

(1) Receive a fighter assignment from UPT;

(2) T-37/T-38 pilot selected for a fighter assignment by the Major Weapon System Selection Board;

(3) First assignment FAC pilot selected for fighters by the Fighter Selection Board.

b. Electronic warfare officers (EWOs) must meet one of the following experience criteria:

(1) Receive a fighter assignment from EWOT.

(2) EWO without previous fighter experience.

c. Requirements for both EWOs and pilots:

(1) One year remaining on physiological training certificate;

(2) Pilots: Graduates of F-V5A-K, Introduction to Fighter Fundamentals, within 45 days of class start date. EWOs: Graduates of B-V5A-K, WSO Introduction to Fighter Fundamentals, or N-V6A-F, USAF Systems Officer Strike Fighter Course, within 45 days of class start date;

(3) Survival training (required before course entry):

(a) S-V80-A, Combat Survival Training Course, or equivalent;

(b) S-V86-A, Water Survival Training - Parachuting, or equivalent.

(4) Completed centrifuge training according to AFI11-404.

Special Requirements: Secret clearance before class start date. Top Secret clearance on graduation to the operational squadron.

Quota Control: HQ ACC/DOTF through ACC/DPPTC

Approval and Waiver Authority: HQ ACC/DOT

EF111IOOAC/EC—USAF Instructor Training Course, EF-111A—PDS Code 5ND—Cannon/6 wk/AFSC K11F3L/K12F3K—Apr 95

Upgrades aircraft commanders and electronic warfare officers (EWO) to instructor status in the EF-111A.

Prerequisites: Meet selection criteria of ACCI 11-EF-111, volume 1 (formerly ACCR 51-50). Current in the EF-111A. Physiological and centrifuge training must be complete and current through course completion.

Special Requirements: Secret clearance before class start date.

Quota Control: HQ AFPC/DPMROT. Waiver Authority: HQ ACC/DOT.

EF111TXOAC/EC—USAF Transition Training Course, EF-111A—PDS Code 38V—Cannon/11 wk 2 days/AFSC 11F3L/12F3K—Apr 95

Transitions currently qualified F-111 pilots and electronic warfare officers (EWO) from the F111A into the EF-111A Tactical Jamming System.

Prerequisites: a. Currently qualified in the F-111.

b. Six months remaining on the physiological training certificate.

c. Basic survival (S-V80-A) and water survival (S-V86-A) or equivalent desirable.

d. Completed centrifuge training according to MCR 51-17.

Special Requirements: Secret clearance before class start date.

Quota Control: HQ AFPC/DPMROT and HQ ACC/DPR. Waiver Authority: HQ ACC/DOT.

E4PCFIAC—Central Flight Instructor Academic Course, E4 (Plt)—PDS Code 4F5—Carswell/Castle/1 wk—Jun 93

Academic only course adapted from KC135PCFIC for E-4 pilots. Trains pilots and flight engineers in the fundamentals and concepts outlined in AMCR 51-135, to qualify them as ground instructors, synthetic trainer instructors, and flight instructors in the E-4 aircraft. Consists of pre-attendance study, academic and synthetic trainer training. Flying training is conducted in-unit. Course is mandatory to upgrade to instructor status.

Prerequisites: 1. Current and qualified in E-4 as a pilot or flight engineer.

2. Must be nominated as instructor candidate by unit commander.

3. See AMCR 51-4 for experience requirements.

Quotas allocated to NAF by AMC/DPAET; quotas controlled and allocated to units by NAF. Nominees to fill quotas must be announced to CFIC a minimum of 60 days prior to class.

Quota Control: HQ ACC/DPROR through HQ ACC/DPTTC.

F4000FDIAA/WA—GAF/USAF Weapons Instructor Course, F-4—PDS Code MQ8—Hollomon/18 wk 1 day/AFSC W-Prefix/MASL D115013/D115042—Oct 96

Annually trains one qualified instructor pilot and one weapon system officer on PCS/PCA assignment to the GAF WIC as instructors in all phases of F-4 weapons employment. Graduates are qualified tactical fighter weapons instructors capable of implementing, conducting and supervising weapons training programs within their units up to and including division level. Commanders are responsible for ensuring graduates are used as instructors or supervisors in weapons training programs for a minimum of 3 years after graduation. Flying hours: 41.8./42.6.

Prerequisites: Officer with a maximum of 15 years' rated experience. Minimum 2 years' tactical fighter experience. Qualified instructor with at least 50 F-4 instructor hours. Minimum of 300 F-4 flight hours or 100 F-4 hours with 800 hours of F-15/F-16 experience. By class start date: 30 hours within the last 90 days, 10 sorties within the last 30 days, and 1 sortie within the last 14 days.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nominations should include name, SSN, and qualifications to include original aeronautical rating date, total flight time, total PAA time, total instructor time, current PAA instructor time, date PAA instructor qualified, projected instructor time as of selection board date, and last 30/60/90. Nomination packages should also contain security clearance, civilian and military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement.

Quota Control: HQ ACC/DOTW through HQ ACC/DPTTC.

OPR and Waiver Authority: HQ ACC/DOTW.

F15EBQ—USAF Basic Qualification Training Course, F-15E—PDS Code 75G—Seymour Johnson/27 wk 2 days/AFSC 11F1G/12F1F—Apr 95

Initial qualification training for aircrews to operate the F-15E as a weapon system. Graduates must complete appropriate mission qualification training (MQT) requirements prior to mission ready (MR) certification.

Prerequisites: a. Pilot must be a graduate of Introduction to Fighter Fundamentals (IFF) within 45 days of class start date and meet one of the following:

(1) Receive a fighter assignment from UPT/SUPT.

(2) T-37/T-38 pilot selected for a fighter assignment by the Major Weapon System Selection Board.

b. Weapon systems officer (WSO) must be a graduate of Introduction to Fighter Fundamentals (IFF) after receiving a fighter assignment from SUNT.

c. Requirements for both pilots and WSOs:

(1) Successfully completed centrifuge according to ACCR 51-17.

(2) One year remaining on physiological training certificate.

(3) Survival training:

(a) Basic survival training (S-V80-A or equivalent) desired.

(b) Basic water survival training (S-V86-A or equivalent) mandatory.

Special Requirements: Secret clearance before course entry.

Personnel Control: HQ ACC/DPATC.

Quota Control: HQ ACC/DOTF. Waiver Authority: HQ ACC/DOT.

F15EIN—USAF Instructor Qualification Training Course, F-15E—PDS Code 75J—Seymour Johnson/11 wk/AFSC K11F3G/K12F3F—Apr 95

Qualifies F-15E pilots and WSOs as instructors in the F-15E.

Prerequisites: a. IP: Current in the F-15E,; fully qualified F-15E four ship flight lead; LASDT qualified to 300'; and meets MCR 51-50 IP criteria.

b. WSO: Current in the F-15E; LASDT qualified to 300'; and meets MCR 51-50 WSO criteria.

NOTE: F-15E pilots and WSOs not currently MR/MS in the M-15E may attend this course after successful completion of the F15ETX course. LASDT qualification to 300' will be accomplished on dedicated sorties, flown in addition to the sorties outlined in the syllabus.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOTF. Waiver Authority: HQ ACC/DOTF.

Personnel Control: HQ ACC/DPATC.

F15EOIDIAN/WN—USAF Weapons School Instructor Upgrade, F-15E—PDS Code X1G—Nellis/19 wk 3 days—Oct 96

Upgrades F-15 WIC graduates to instructor status, allowing them to provide academic and flying instruction to students of course F15EOIDOAN/WN and sustain the Weapons School instructor cadre. This course is only conducted in conjunction with a PCS/PCA assignment to the Weapons School as an instructor.

Prerequisites: Weapons School trainee must be current in the aircraft according to applicable directives and preferably a graduate of the F-15E WIC.

Special Requirements: Top Secret/SCI clearance before course entry.

Quota Control: HQ ACC/DOTW through HQ ACC/DPTTC.

OPR and Waiver Authority: HQ ACC/DOTW.

F15EOIDOAN/WN—USAF Weapons Instructor Course, F-15E—PDS Code UCG—Nellis/19 wk 3 days/AFSC W-Prefix—Oct 96

Trains qualified F-15E instructor pilots and WSOs as instructors in all phases of F-15E weapons employment and tactics. Graduates are qualified tactical fighter weapons instructors capable of implementing, conducting, and supervising weapons training programs within their units up to and including headquarters level. Commanders are responsible for ensuring graduates are used as instructors or supervisors in weapons training programs for a minimum of 3 years after graduation. Flying hours: 52.3.

Prerequisites: Captain with a minimum of 8 years of rated experience. Minimum of 2 years of tactical fighter experience. Minimum of 300 hours F-15E flying time. Minimum of 50 hours as an instructor in the F-15E. Currently maintaining MR/MS status in the F-15E and, by class start date, have a minimum of 30 hours in the last 90 days, 10 sorties in the last 30 days, 1 sortie within the preceding 14 days, and qualified/current in low altitude step down training (LASDT) air-to-air and LASDT air-to-ground down to 500 feet AGL minimum. Basic and water survival training completed.

Special Requirements: Top Secret/SCI clearance or be submitted for Top Secret/SCI by class start date. Physical exams, physiological training, and flight checks must not expire during class training period.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nominations should include name, SSN, and qualifications to include original aeronautical rating date, total flight time, total PAA time, total instructor time, current PAA instructor time, date PAA instructor qualified, projected instructor time as of selection board date, and last 30/60/90. Nomination packages should also contain security clearance, civilian and military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement.

Individuals should report no earlier than 2 days before class start date. State on the orders, "Dual quarters, variations, and 600 lbs max hold baggage are authorized" and "Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School." Individuals projected for assignment to active-duty ACC units upon graduation should contact HQ ACC/DOTW at DSN 574-5896 for "after-the-fact" fund cite information.

Quota Control: HQ ACC/DOTW through HQ ACC/DPTTC.

OPR and Waiver Authority: HQ ACC/DO.

F15ETX—USAF Transition/Requalification Training Course, F-15E—PDS Code 75F—Seymour Johnson/duration */AFSC 11F1G/12F1F—Apr 95

Trains fighter aircrews for qualification in the F-15E.

Prerequisites: a. Pilot and WSO:

(1) Track 1A. Previous F-15 pilot with at least 300 FP/IP hours and current in the F-15A/B/C/D (WSO - N/A).

(2) Track 1B. Previously qualified in F-111, F-117, RF-4, or A-10 pilots; 300 (FP/MP/IP or WSO equivalent) hours and current within 42 months before course entry; 500 hours and current within 5 years; or 1000 hours and current within 8 years.

(3) Track 1C. Previously qualified in F-4 or AT-38, or F-16 pilots; 300 (FP/MP/IP or WSO equivalent) hours and current within 42 months before course entry, 500 hours and current within 5 years, or 1000 hours and current within 8 years; or for previously experienced F-15 pilots, but not current in the F-15 A/B/C/D.

(4) Track 2. 200 hours or 1 year of operational experience in the F-15E, noncurrent 6 months but less than 5 years.

(5) Track 3. Senior officers (Colonel and above) and test pilots with 500 hours or 2 years of experience in tactical fighter/attack aircraft.

(6) Successfully completed centrifuge according to ACCR 51-17.

(7) One year remaining on physiological training certificate.

(8) Survival training mandatory:

(a) Basic survival, S-V80-A,or equivalent.

(b) Basic water survival, S-V86-A, or equivalent.

Special Requirements: Secret clearance before course entry.

Personnel Control: HQ ACC/DPATC.

Quota Control: HQ ACC/DOTF. Waiver Authority: HQ ACC/DOT.

NOTE: Personnel and quota control for Track 3 is HQ ACC/DOTF. * Track 1A, 14 wk; Track 1B/C, 18 wk; Track 2, 10 wk, 2 days; Track 3, 5 wk 1 day.

F1500IDIPN—USAF Weapons School Instructor Upgrade Course, F-15—PDS Code 86W—Nellis/Duration: NA—Oct 96

Upgrades F-15 WIC graduates to instructor status allowing them to provide academic and flying instruction to students of course

F1500IDOPN and sustain the Weapons School instructor cadre. This course will be conducted only in conjunction with a PCS/PCA assignment to the Weapons School as an instructor.

Prerequisites: Weapons School trainee must be current in the aircraft IAW applicable directives and preferably a graduate of the F-15 WIC.

Special Requirements: Top Secret/SCI clearance before course entry. National Agency Check investigation current within the last 5 years before course entry.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

OPR and Waiver Authority: HQ ACC/DOTW.

F1500IDOPN—USAF Weapons Instructor Course, F-15—PDS Code YLQ—Nellis/19 wk 3 days/AFSC W-Prefix—Oct 96

Trains qualified F-15 instructor pilots as instructors in all phases of F-15 weapons employment and tactics. Graduates are qualified tactical fighter weapons instructors capable of implementing, conducting, and supervising weapons training programs within their units up to and including headquarters level. Commanders are responsible for ensuring graduates are used as instructors or supervisors in weapon training programs for minimum of 3 years after graduation. Flying Hours: 36.0.

Prerequisites: Captain with a maximum of 8 years of rated experience. Minimum of 2 years of tactical fighter experience. Minimum of 300 hours of F-15 flying time. Minimum of 50 hours as an IP in the F-15. Currently maintaining MS/MR status in the F-15 and by class start date have a minimum of 30 hours in the last 90 days, 10 sorties in the last 30 days, and 1 sortie within the last 14 days. Basic and water survival training completed.

Special Requirements: Top Secret/SCI clearance or be submitted for Top Secret/SCI prior to course attendance. National Agency Check investigation current within the last 5 years before course entry. Physical exams, physiological training, and flight checks must not expire during class training periods.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nominations should include name, SSN, and qualifications to include original aeronautical rating date, total flight time, total PAA time, total instructor time, current PAA instructor time, date PAA instructor qualified, projected instructor time as of selection board date, and last 30/60/90. Nomination packages should also contain security clearance, civilian and military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement.

Individuals should report no earlier than 2 days before class start date. State on the orders, “Dual quarters, variations, and 600 lbs max hold baggage authorized” and “Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School.” Individuals projected for assignment to active-duty ACC units upon graduation should contact HQ ACC/DOTW at DSN 574-5896 for “after-the-fact” fund cite information.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

OPR and Waiver Authority: HQ ACC/DO.

F1600IDIPN—USAF Weapons School Instructor Upgrade Course, F-16—PDS Code 86T—Nellis/Duration: NA—Oct 96

Upgrades F-16 WIC graduates to instructor status allowing them to provide academic and flying instruction to students of course F1600IDOPN and sustain the Weapons School instructor cadre. The course will be conducted only in conjunction with a PCS/PCA assignment to the Weapons School as an instructor.

Prerequisites: Weapons School trainee must be current in the aircraft IAW applicable directives and preferably a graduate of the F-16 WIC.

Special Requirements: Top Secret/SCI clearance with CNDWI access before course entry.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

OPR and Waiver Authority: HQ ACC/DOTW.

F1600IDOPN—USAF Weapons Instructor Course—PDS Code 18M—Nellis/19 wk 3 days/AFSC W-Prefix—Oct 96

Trains qualified F-16 instructor pilots as instructors in all phases of F-16 weapons employment and tactics. Graduates are qualified tactical fighter weapons instructors capable of implementing, conducting, and supervising weapons training programs within their units up to and including headquarters level. Commanders are responsible for ensuring graduates are used as instructors or supervisors in weapons training programs for minimum of 3 years after graduation.

Flying Hours: 46.9.

Prerequisites: Captain with a maximum of 8 years of rated experience. Minimum of 2 years of tactical fighter experience. Minimum of 300 hours of F-16 flying time with a minimum of 100 hours in the F-16C (students must be current in F-16C). Minimum of 50 hours as an IP in the F-16. Currently maintaining MS/MR status in the F-16 and class start date have a minimum of 30 hours in the last 90 days, 10 sorties in the last 30 days, and 1 sortie within the last 14 days, and qualified/current in low altitude step down training (LASDT) air-to-air and LASDT air-to-ground down to 500 feet AGL minimum. Basic and water survival training completed.

Special Requirements: Top Secret/SCI clearance or be submitted for Top Secret/SCI before course attendance. CNWDI access required by class start date. Physical exams, physiological training, and flight checks must not expire during class training period.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nominations should include name, SSN, and qualifications to include original aeronautical rating date, total flight time, total PAA time, total instructor time, current PAA instructor time, date PAA instructor qualified, projected instructor time as of selection board date, and last 30/60/90. Nomination packages should also contain security clearance, civilian and military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement.

Individuals will report no earlier than 2 days before class start date. State on the orders, “Dual quarters, variations, and 600 lbs max hold baggage are authorized” and “Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School.”

Quota Control: HQ ACC/DOTW through HQ ACC/DPTTC.

OPR and Waiver Authority: HQ ACC/DOTW.

F117AIOOAA—USAF Instructor Pilot Upgrade Training Course, F-117A—PDS Code WP9—Holloman/4 wk*/AFSC K1115S—Jun 93

Trains qualified F-117 pilots to perform instructor duties in all F-117 formal training courses.

Prerequisites: Current in F-117A, qualified for selection according to ACCR 51-50, vol XX, AT-38 qualified, and centrifuge training according to ACCR 51-17.

Special Requirements: Top Secret/SBI clearance by class start date.

Waiver Authority: HQ ACC/DO.

* 17 training days.

F117ATXOPA—USAF Transition/Requalification Training Course, F-117A—PDS Code WPA—Holloman/duration: */AFSC 11F1M--Apr 95

Trains prior qualified fighter/attack/reconnaissance (F/A/R) pilots in the F-117A.

Prerequisites: a. (1) Track 1A: 750 hours in F/A/RF/TR or SR prefix aircraft. Landed one of these aircraft within 180 days of course start date.

(2) Track 1B: Meets the flying hour requirements above, but has not landed one of these aircraft within 180 days.

(3) Track 2A: Prior F-117 qualified pilot who last flew F-117 within 3 years, but not within 180 days.

(4) Track 2B: Prior F-117 pilot who has not flown the F-117 within 3 years.

b. Previously qualified as a 4-ship flight lead.

c. Basic survival (S-V80-A, or equivalent) and water survival training (S-V86-A, or equivalent) completed.

d. Centrifuge training completed according to MCR 51-17.

Survival Training: basic survival, S-V80-A or equivalent; water survival, S-V86-A or equivalent.

Special Requirements: Top Secret/SBI clearance by class start date.

Quota Control: HQ AFPC/DPMROT.

Waiver Authority: HQ ACC/DO.

* Track 1A: 41 training days; Track 1B: 43 training days; Track 2A: 38 training days; and Track 2B: 40 training days.

HH600SIOCN—USAF Combat Weapons Instructor Course (HH-60) — PDS Code YQK—Nellis/19 wk 3 days/AFSC W-Prefix—Oct 96

Trains qualified HH-60G instructor pilots in all phases of HH-60 weapons systems employment and tactics. Graduates are qualified rescue tactics instructors capable of implementing, conducting, and supervising the tactics training programs within their units up to and including headquarters level. They will also coordinate combat rescue planning for the deployed commander to ensure effective use of rescue resources. Commanders are responsible for ensuring graduates are used as instructors or supervisors in tactics and employment training positions for a minimum of 3 years after graduation.

Flying Hours: 71.0

Prerequisites: Captain with a maximum of 8 years' rated experience, minimum of 1 year rescue-mission qualified. Fully qualified and current MR IP. Minimum of 50 hours as an NVG/NGT TAC HH-60G IP. Minimum of 1000 hours total helicopter time or 1500 hours total time with 500 hours helicopter time. Minimum 100 hours NVG time. Basic and water survival training completed. Physical exams, physiological training, and flight checks must not expire during the course.

Special Requirements: Top Secret clearance or submitted for Top Secret prior to course attendance. NATO Secret access required.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nominations should include name, SSN, and qualifications to include original aeronautical rating date, total flight time, total PAA time, total instructor time, current PAA instructor time, date PAA instructor qualified, projected instructor time as of selection board date, and last 30/60/90. Nomination packages should also contain security clearance, civilian and military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement.

Individuals will report no earlier than 2 days before class start date. State on the orders, "Dual quarters, variations, and 600 lbs max hold baggage are authorized" and "Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School." Individuals projected for assignment to active-duty ACC units upon graduation should contact HQ ACC/DOTW at DSN 574-5896 for "after-the-fact" fund cite information.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

OPR and Waiver Authority: HQ ACC/DOTW.

RC135IDOAN—USAF Weapons Instructor Course, Command and Control, RC-135—PDS Code 08O—Nellis/19 wk 3 days/AFSC "W" Prefix—Oct 96

Trains qualified RC-135V/W instructors in all phases of RC-135V/W employment and tactics. Graduates are qualified weapons and tactics instructors capable of implementing, conducting, and managing the weapons and tactics training programs at their units up to and including headquarters level. Commanders are responsible for ensuring graduates are used as instructors or instructors in weapons and tactics training programs for a minimum of 3 years after graduation.

Flying Hours: 41.0.

Prerequisites: Captain with a maximum of 8 years of rated experience. Minimum of 2 years RC-135V/W experience. Minimum of 500 hours of RC-135V/W flight time. Minimum of 75 hours as an instructor in the RC-135V/W. Currently maintaining MC/MR status in the RC-135V/W. By class start date: 100 flying hours within the last 120 days, current and qualifed mission director, and one flight within the last 14 days. Basic and water survival training completed.

Special Requirements: Top Secret/SCI clearance or be submitted for Top Secret/SCI before course attendance. Physical exams, physiological training, and flight checks must not expire during training period.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nominations should include name, SSN, and qualifications to include original aeronautical rating date, total flight time, total PAA time, total instructor time, current PAA instructor time, date PAA instructor

qualified, projected instructor time as of selection board date, and last 30/60/90. Nomination packages should also contain security clearance, civilian and military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement.

Individuals should report no earlier than 2 days before class start date. State on the orders: "Dual quarters, variations, and 600 lbs maximum hold baggage are authorized" and "Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School." Individuals projected for assignment to active-duty ACC units upon graduation should contact HQ ACC/DOTW at DSN 574-5896 for "after-the-fact" fund cite information.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

OPR and Waiver Authority: HQ ACC/DOTW.

SFAGCSAD1—SILVER FLAG ALPHA, Ground Combat Skills—PDS Code XXM—Indian Springs/3 wk 1 day—Apr 95

Provides security police with refresher training in basic ground combat skills, combat firing of air base defense weapons, multitracked, job-specific training based upon assigned duties on an air base defense element, and exercise/assessment of unit performance under realistic combat situations.

Prerequisites: Students must be prepared to perform rigorous physical tasks in order to achieve field training situations.

Special Requirements: Bring the following items: kevlar helmet, BDUs (may be woodland or desert) with soft cap, mini "C" bag (training chemical warfare ensemble, gas mask with carrier and training filters, hood, gloves, and either jacket with liner (or Gortex ensemble), six D cell batteries, towels, pocket knives, writing supplies, foot powder, lip balm, ranger rags, washcloths, toiletries, and one set of civilian clothing. Total required equipment items should be able to be carried in one A3 bag plus one carry-on bag. For personnel who wear eyeglasses, bring the necessary inserts or strap glasses for the M17A/MCU-2P series gas masks and at least one spare pair of eyeglasses. Recommend that personnel who wear contact lenses not bring them due to the abrasive environment. Also recommend the use of an eyeglass retainer strap.

Quota and Waiver Control: HQ ACC/SP. All other information will be provided in the HQ ACC/SP Warning/Execution Order.

U2CCT—U-2 Combat Crew Training Course—PDS Code 7SK—Beale/5 mo—Oct 96

Academic and flying training course designed to retrain qualified pilots into the U-2 aircraft. Trains candidates in the fundamentals, procedures, and techniques used in flying the U-2. See course U2CCT syllabus for course outline.

Prerequisites: See AFMAN 36-2110, *Assignments* (formerly AFR 36-20).

Special Requirements: Secret clearance. Individual must have completed or initiated a request for personnel security action (TS/SCI) prior to arrival at Beale.

Quota Control: 9 OG/CC through HQ ACC/DPTTC.

U2CFIAC—U-2 Central Flight Instructor Academic Course—PDS Code H6J—Beale/2 wk—Jun 93

Nonflying course which trains candidates in the fundamentals and concepts outlined in 1 RSP 51-13, chapter 5, for qualification as ground and synthetic trainer instructors for the U-2 aircraft. The academics phase is for all candidates who have not previously attended an AFCAT 36-2223 instructor training course.

Prerequisites: 1. Current and qualified as a U-2 pilot.

2. Must be nominated as an instructor candidate by unit commander.

3. Meets requirements specified in 1 RSP 51-13.

Quota Control: 90 PG/CC through HQ ACC/DPTTC.

U2CFIC—U-2RT Central Flight Instructor Course—PDS Code HMJ—Beale/2 wk—Jun 93

Academic and flying course specifically for U-2RT instructor pilot candidates. Trains candidates in the fundamentals and concepts outlined in 1 RSP 51-13, chapter 5, for qualification as inflight instructors in the U-2 series aircraft. The course is mandatory for all U-2RT instructors.

Prerequisites: 1. Current and qualified as a U-2 pilot.

2. Must be nominated as an instructor candidate by unit commander.

3. Meets requirements specified in 1 RSP 51-13.

4. Prior completion of course U2CFIAC.

Quota Control: 90 PG/CC through HQ ACC/DPTTC.

U2RPRQ—U-2 Pilot Requalification Course—PDS Code T2D—Beale/6 wk/AFSC 1335A—Jun 93

Academic and flying training course designed to requalify pilots in the U-2 aircraft. See 1 RS(T)P 51-13, chapter 4.

Prerequisites: Previously qualified as a U-2 aircraft commander or instructor pilot. See AFMAN 36-2110 (formerly AFR 36-20).

Special Requirements: Secret clearance. Individual must have completed or initiated a request for personnel security action (TS/SCI) prior to arrival at Beale.

Quota Control: 90 PG/CC through HQ ACC/DPTTC.

Y120006—ACC Life Support Instructor Course—PDS Code XLK—Dyess/2 wk—Oct 96

Trains selected life support personnel to perform instructor duties in support of ACC life support training activities and requirements. Includes methods and techniques of instructing and evaluating aircrew members and procedures for managing life support aircrew training. Course also requires students to present classroom and field lectures and demonstrations. One week spent in classroom and 1 week spent in the field.

Prerequisites: Attend course S-V80-A, Combat Survival Training.

Quota Control: HQ ACC/DOSTL through HQ ACC/DPTTC.

Y120008—Air Weapons Seminar—PDS Code EHV—Dyess/3 days—Apr 95

Updates ACC air weapons officers on the latest changes in weapons information within ACC. Included are ACC weapons training requirements, review of current weapons information, projected new weapons, and other pertinent topics. Includes personnel from MAJCOM and appropriate industry representatives.

Prerequisites: Assigned as an ACC air weapons officer, alternate air weapons officer, or weapons related duties.

Special Requirements: 1. Secret clearance by class start date.

2. Student must be granted access to Critical Nuclear Weapons Design Information (CNWDI) and verification received by 436 TS by class start date.

Quota Control: HQ ACC/DOTW through HQ ACC/DPTTC.

Y120010—Curriculum Designer Course—PDS Code VCY—Dyess/1 wk—Oct 95

Provides training in instructional system development (ISD) principles and processes. Includes instructional planning, analyzing system requirements, designing objectives and tests, developing lesson plans and instructional materials, implementing instructions, and conducting evaluation. Students complete a course project which leads them through the ISD process.

Prerequisites: Newly assigned curriculum development managers.

Special Instructions: Students should possess basic computer literacy because students will use computers with Microsoft Word word processing applications to develop and document their program.

Quota Control: 436 TS/TAT through HQ ACC/DPTTC.

Y120013—Air Force Operations Resource Management System (AFORMS)—PDS Code EJP—Dyess/2 wk—Apr 95

Provides lecture and some hands-on training of the AFORMS for operations resource personnel. Training covers Air Force publications, AFORMS products, incentive pay, system control, file relationship, aircrew training, and resource management.

Prerequisites: Attendees at a minimum must be in the grade of SrA or higher, at least 1 year as a 3-skill level, and have some working knowledge of AFORMS.

Quota Control: HQ ACC/DOSBA through HQ ACC/DPATC.

Other: HQ ACC/DOSBA may waiver prerequisites on an individual basis.

Y120022—Classroom Instructor Course—PDS Code L18—Dyess/1 wk—Oct 95

Trains personnel to perform classroom instructor duty in ACC courses. Provides training on effective communication, learning process, instructional systems design, developing objectives, developing lesson plans, instructional methodology, questioning techniques, training aids, instructor fundamentals counseling, and evaluation. Students plan, develop, and present two lessons. Lessons consist of one lecture and one lession using a method of choice. An impromptu speech is also presented.

Prerequisites: Candidates identified by unit to instruct in a classroom environment. Career interest and an ambition to instruct are desirable.

Quota Control: 436 TS/TAT through HQ ACC/DPTTC.

Note: Does not qualify personnel for award of “T” prefix.

Y120023—ACC Unit Command Control Trainer's Course—PDS Code 7LA—Dyess/1 wk—Oct 95

Provides knowledge in appropriate procedures and information on creation and management of training programs. Includes controller duties, responsibilities, procedures, scenario preparation and presentation, instructional systems development, platform instructor techniques, and turbo test familiarization.

Prerequisites: Newly assigned unit command post training managers and staff.

Special Requirements: Secret clearance.

Quota Control: ACCOPS/DOCPT through HQ ACC/DPTTC.

Y120024—ACC Unit Command Control Leadership/ Management Symposium—PDS Code X11—Dyess/3 days—Oct 95

Addresses the needs of the unit OICs, superintendents, or NCOICs. This focuses on unit organization, MOC operations, ORI/QAFA reviews, quality improvement, OPREP-3 reporting, SORTS, training, and delegation.

Prerequisites: Currently assigned or designated to be assigned as an OIC, superintendent, or NCOIC of a command post.

Special Requirements: Secret clearance before class start date. Command post experience is desired.

Quota Control: ACCOPS/DOCPT through HQ ACC/DPTTC.

Y120025—ACC Unit Command Control Reports Course—PDS Code X12—Dyess/1 wk 2 days—Oct 95

Addresses the unit’s two dedicated reports personnel. Focuses on Status of Resources and Training System (SORTS), Force Management Information System (FMIS), US message text format (USMTF), and ACC Unit Status of Reporting Training System Editor and Retrieval System (ACCUSERS).

Prerequisites: Currently assigned or designated to be assigned as a dedicated reports controller.

Special Requirements: Secret clearance before class start date.

Quota Control: ACC OPS/DOCPT through HQ ACC/DPTTC.

Y120026—Mission Data Preparation System (MDPS) Initial Operators Course—PDS Code X13—Dyess/1 wk 3 days—Oct 95

Trains selected B-1 and B-52 aircrew members and enlisted computer operators in the operation of and mission generation capabilities of the MDPS. Includes concept of operations; interface procedures with command level planners; turn on and shut down procedures; generation and modification of nuclear gravity weapon, nuclear missile, and conventional weapons mission; training mission generation for both nuclear and conventional scenarios; creation of aircraft and aircrew mission products; data base manipulation, save, and backup procedures; and system security and maintenance procedures.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

Y120027—Conventional Mission Planning and Preparation System (CMPPS) Initial Operators Course—PDS Code X14—Dyess/2 wk 3 days—Oct 95

Trains selected B-52 aircrew members and enlisted computer operators in the operation of and mission generation capabilities of the CMPPS. Includes concept of operations; turn on and shut down procedures; generation and modification of conventional weapons missions and training mission generation for conventional scenarios; creation of aircraft and aircrew mission products; data base manipulation, save, and backup procedures; and system security and maintenance procedures.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

Y120028—Mission Support System (MSS) II System Administrator Course—PDS Code X15—Hill/1 wk—Oct 95

Trains selected fighter aircrew members as unit level system administrators for the MSS II. Course includes identification of hardware components, software configuration, hardware/software integration and documentation; system setup; system security, base level documentation procedures, and location of POCs for questions concerning software installation; the boot-up process, common errors during boot, and error reset procedures; how to correctly configure an MSS II for a given operating location to include maps, premission screen, canned way point file, default load, and threat array; mobility considerations; maintenance support at the local and the depot level; and correcting common operator induced software errors.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOXEC through HQ ACC/DPATC.

Y120030—Air Force Mission Support System (AFMSS) Administrator Course—PDS Code X17—Dyess/1 wk 4 days—Oct 95

Trains selected aircrew members and enlisted computer operators in the operation of and mission generation capabilities of the AFMSS. Includes identification of hardware components, software configuration, hardware/software integration and documentation; system setup; system security base level documentation procedures, and location of POCs for questions concerning software installation; the boot-up process, common errors during boot, and error reset procedures; how to correctly configure an AFMSS for a given operating location to include maps, premission screen, canned way point file, default load, and threat array; mobility considerations; maintenance support at the local and the depot level; and correcing common operator induced software errors.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOXEC through HQ ACC/DPATC.

Y120031—USAF STARS Operations Course—PDS Code X18—Dyess/3 days—Oct 95

Addresses the needs of the system administrator (SA) or alternate (ASA), base level START office personnel (CCT), job control personnel, or wing commander designated personnel. Focuses on basics of the START Treaty, with emphasis on notification protocol, controller duties and responsibilities involving the START Tracking and Reporting System (STARS), and introduction to the STARS user's manual. Provides the necessary knowledge to manage a STARS training program.

Prerequisites: Currently assigned or designated to be assigned as an SA or ASA, CCT, job control personnel, or wing commander designated personnel.

Special Requirements: Secret clearance by class start date.

Quota Control: ACC OPS/DOCPT through HQ ACC/DPTTC.

Y120032—Conventional Air Weapons and Operations Course—PDS Code 097—Dyess/1 wk 3 days—Jan 96

Trains officers in the duties of air weapons officers and operations planning officers assigned to units with bombardment missions. This course is the prerequisite for Y120033, Nuclear Air Weapons Officer Course. Blocks of instruction include responsibilities, conventional munitions, suspension and release, interface with Intel and WSA, computer programs - mission planning and target analysis, bomb run planning and analysis, selection and use of charts and photos, radar and visual photo analysis and scoring, and game plan development. Personnel must be a graduate of this course or the USAF Bomber Weapons Instructor Course in order to be assigned as a conventional unit air weapons officer.

Prerequisites: Secret clearance by class start date.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

Y120033—Nuclear Air Weapons Officer Course—PDS Code 098—Dyess/2 days—Jan 96

A continuation of the Conventional Air Weapons and Operations Course. Topics covered include weapons officer responsibilities, nuclear theory and effects, nuclear weapons, monitor and control, and suspension and release. Personnel must be a graduate of the nuclear air weapons officer course or the USAF bomber weapons instructor course before performing duties as a nuclear weapons unit air weapons officer.

Prerequisites: Secret clearance by class start date. Granted access to critical nuclear weapons design information (CNWDI) and verification received by class start date. Normally, CNWDI will be on the student's orders. Completion of Y120032, Conventional Air Weapons and Operations Course.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

Y130001—ACC Chief of Safety Program Management Course—PDS Code RW4—Dyess/1 wk—Apr 95

Provides interchange of information and ideas between new wing chiefs of safety, HQ safety personnel, and 436 TS safety instructors in all aspects of the USAF Mishap Prevention Program. Heavy emphasis is placed on ACC specific requirements.

Prerequisites: Attendees limited to chiefs of safety who have been in present position at least 3 months.

Quota Control: HQ ACC/SE through HQ ACC/DPTTC.

Y130002—ACC Weapons Safety Program Management Course—PDS Code EHF—Dyess/1 wk—Apr 95

Provides an interchange of information and ideas between wing weapons Safety superintendents/NCOs, HQ Safety personnel, and 436 TS Safety instructors concerning all aspects of the USAF Weapons Safety Program. Heavy emphasis is placed on ACC specific requirements.

Prerequisites: Assigned as a full-time weapon safety superintendent or NCO.

Quota Control: HQ ACC/SE through HQ ACC/DPTTC.

Y130003—ACC Flight Safety Program Management Course—PDS Code 92A—Dyess/1 wk—Apr 95

Provides an interchange of information and ideas between wing flight Safety officers, squadron assigned flight safety officers, HQ Safety personnel, and 436 TS Safety instructors. Concerning all aspects of the USAF Flight Safety Program. Heavy emphasis is placed on ACC specific requirements.

Prerequisites: Assigned as a full-time flight safety officer or squadron assigned flight safety officers. Prior attendance to flight safety officers course (WCIP05C) preferred.

Quota Control: HQ ACC/SE through HQ ACC/DPTTC.

Y130004—ACC Safety Investigation Board Presidents and Accident Investigation Course—PDS Code 92B—Langley/2 days—Apr 96

Designed to prepare potential AFI 91-204, *Investigating and Reporting US Air Force Mishaps*, safety board presidents and AFI 51-503, *Aircraft, Missile, Nuclear, and Space Accident Investigations*, accident investigating officers to effectively manage and direct mishap/safety and accident/colateral investigations.

Prerequisites: Attendance is limited to colonels and colonel selectees.

Quota Control: HQ ACC/SEF through HQ ACC/DPPTC.

Y130005—ACC Ground Safety Program Management Course—PDS Code Y65—Dyess/1 wk—Dec 93

Provides an interchange of information and ideas between Wing Ground Safety civilians and technicians, HQ safety personnel and 436 TS safety instructors, concerning all ground safety aspects of the USAF Mishap Prevention Program.

Prerequisites: Assigned as a full-time ground safety civilian/technician. Prior attendance at G3ALR24130-000 (Safety Specialist) preferred.

Quota Control: HQ ACC/SE through HQ ACC/DPTTC.

Y140009—ACC Production Superintendent Course—PDS Code 92C—Hill/1 wk—Jun 93

Provides ACC senior NCOs performing production supervision duties information to manager daily flight line operations under a decentralized maintenance concept. Curriculum includes aircraft maintenance organization and structure under ACCR 66-5, aircraft scheduling fundamentals under ACCR 60-5, EWO and ORI generation management planning and execution to include an ORI generation line-up exercise, and flight line disaster preparedness procedures.

Prerequisites: Experienced aircraft maintenance personnel in the grade of MSgt through CMSgt (any AFSC), working in or selected for a position as a production supervisor.

Special Requirements: Secret clearance.

Quota Control: 388 MTF, HQ ACC/LGQT through HQ ACC/DPTTC.

Y140015—ACC Instructor Course—PDS Code X0V—Hill/2 wk—Dec 93

Qualifies ACC people to function as instructors. Instruction is geared to specific tasks and knowledge required to teach principles and applications in Air Force teaching and learning situations. The course covers various teaching methods and techniques, how people learn and communicate, ways to evaluate learning, and reasons for evaluation. Problem solving, interpersonal relationships, and communication skills are integrated throughout. Instructional systems development and training management principles are also taught. Students are given opportunities to apply techniques learned.

Quota Control: 388 MTT/ACA through HQ ACC/DPTTC.

Y140018—FSM Plans, Scheduling, and Documentation (PS&D)—PDS Code X0Y—Hill/2 wk—Dec 93

Prepares maintenance management technicians assigned to flying squadron maintenance (FSM) PS&D sections to effectively and accurately schedule unit aircraft. Knowledge and skills to schedule all aircraft maintenance and operational requirements is taught and reinforced. Applicable directives and publications are correlated to course content. Problem-solving exercises are integrated throughout. Students are provided opportunities to use their new skills.

Quota Control: 388 MTT/ACA through HQ ACC/DPTTC.

Y140019—Engine Management Branch (EMB) Scheduler/Documenter—PDS Code X0Z—Hill/2 wk—Dec 93

Prepares EMB people to effectively and accurately schedule engines and associated components for maintenance and correctly document and maintain engine maintenance report jackets. Applicable directives and publications are correlated to course content. Problem-solving exercises are integrated throughout. Students are provided opportunities to use their new skills.

Quota Control: 388 MTT/ACA through HQ ACC/DPTTC.

Y140020—ACC Maintenance Training Management—PDS Code X10—Hill/1 wk—Oct 96

Trains ACC education and training systems journeymen and craftsmen to effectively perform their training management and scheduling duties and responsibilities in a maintenance training management environment. Students are given the opportunity in the classroom to apply skills and knowledges to enable them to accomplish their required tasks.

Prerequisites: Education and training personnel, AFSC 3S2X1, in any grade and within 12 months of assignment to a maintenance training flight in ACC.

Quota Control: 388 MTT/ACA through HQ ACC/DPTTC.

OPR: HQ ACC/LGQT.

Y140021—ACC Instructional Systems Designer—PDS Code XXL—Hill/1 wk—Apr 95

Provides the information necessary for education and training personnel to effectively perform their duties in an ACC maintenance training management environment. Course content includes the duties and responsibilities of personnel assigned to the development element of the maintenance training flight to include courseware development and management, as well as the training flight's overall purpose. Provides training management techniques to assist the technician in making effective decisions on the job. Applicable ACC directives and publications are correlated with the course content. Problem-solving exercises, interpersonnel relationships, and communicative skills are integrated throughout the course. Students will have the opportunity to apply their new skills and knowledge in the classroom environment.

Prerequisites: Education and training personnel, AFSC 3S2X1, in any grade and newly assigned to a maintenance training flight in ACC.

Quota Control: 388 MTF/ACA through HQ ACC/DPATC.

OPR: HQ ACC/LGQT.

Y190001—High Altitude Life Support Systems and Survival Course—PDS Code 3D9—Beale/1 wk—Mar 93

Course is user funded and trains military and civilian crewmembers, flight surgeons, and observers in the use of full and partial pressure suits, current oxygen supply systems, and egress systems. Course participation entails classroom instruction on high altitude physiology pressure suit issue and fit, and two flights in hypobaric chamber. Survival portion includes classroom instruction on arctic, desert, and sea. Sea survival lab is accomplished in fresh water lake

and includes two "drop-and-drag" exercises, and one life raft exercise. Water survival is not taught during the winter season. Course length may vary (normally abbreviated) depending on needs of individual.

Prerequisites: Must be crewmember, flight surgeon, or observer who would normally wear a pressure suit during flight or support pressure suit operations. Must have completed basic physiological training course and, for pilots, basic sea survival course taught at Homestead AFB FL. Must be accepted for training by ACC command coordinator for physiological training.

Special Requirements: Hand-carry copy of certified Class III flying physical plus any record of previous physiological training (AF Form 702, **Individual Physiological Training Record**). Clothing requirements: Normal duty uniform and swimwear are mandatory. Flight suit is optional.

Quota Control: HQ ACC/SGAMM through HQ ACC/DPTTC.

183500 000—Missile Ort, Airborne Launch Control System—PDS Code XLH—Offutt/8 wk—Mar 93

Integrated training of missile combat crewmembers and communications officers in technical and coordinated duties required in the Airborne Launch Control System.

Prerequisites: Be selected for assignment as an airborne launch control system combat crewmember aboard STRATCOM's airborne command post.

Special Requirements: 1. Top Secret clearance with SBI initiated by class start date.

2. Personnel Reliability - critical.

3. Medical - Flying Class III physical prior to PCS of class start date.

4. Physiological Training - Current AF Form 1274 based on crewmember altitude chamber training. Training will be gaining unit funded when not previously completed. Training to be completed prior to PCS or class start date.

Quota Control: HQ ACC/DOM through HQ ACC/DPTTC.

Technical Training

ACC COTC—CTAPS Operator/Technician Course (COTC)—PDS Code 77K—Hurlburt Fld/duration*/MASL D121081—Oct 96

Trains selected individuals in the fundamentals of CTAPS operations. Focus is on CTAPS training for individuals required to use and are assigned to an air operations center (AOC), any joint organization, or other closely related facility. Course teaches the fundamental concepts of CTAPS operations. Covers the AOC and other related or supporting facilities. Course can be modified to a specific facility which will shorten the program. Individuals attending the course will normally be assigned duties at an AOC, BCE, CRC, ASOC, WOC, or any other composite facility. COTC has three tracks. The operations track will cover the CTAPS/CAFMS module which would normally be used to monitor missions in the AOC, ASOC, CRC, or WOC. This track is aimed at mission monitoring. The plans track will cover the CTAPS/APS module to train the individuals involved with the entering of data to APS for the purpose of developing an ATO. The intelligence track will cover CTAPS/ICM and RAAP with the concept of adding and monitoring data from these programs. ECL 80SR.

Prerequisites: Must meet all requirements as described in MCR 50-76. Students should be assigned to organizations which require an indepth understanding of the current CTAPS computer programs.

Special Requirements: Secret clearance by class start date. Service uniform (any combination) is required for all classes. Flight suits, fatigues, utilities (for Navy and Marine Corps personnel), or BDUs may be worn during course. All Air Force students must meet AFI 36-2903 and AFI 40-502 standards.

Administration and Registrar Activity: Obtain class schedule and class assignment and possible read-ahead package through USAFAGOS/GSRQ (DSN 579-7371).

Quota Control: HQ ACC/DOY through HQ ACC/DPPTC.

*Depending on which track, the program is 3 or 4 days long.

ACC TBMSAC—Theater Battle Management System Administrator Course—PDS Code 4RQ—Hurlburt Fld/3 wk/MASL D121080—Oct 96

Trains selected individuals in the fundamentals of UNIX systems administration, networking and communications protocols, Sybase and Oracle relational data bases, the structured query language, and selected theater battle management systems administration. Focuses on those individuals assigned system administration duties within the joint air operations center (JAOC) or related joint organizations or facilities. Upon completion, students will be able to administer the contingency theater automated planning system (CTAPS). Students will be exposed to basic combat intelligence system (CIS) administration as it relates to CTAPS. The course is divided into two tracks: the CTAPS administration track (36 students, TBMSAC-1) and the WCCS administration track (14 students, TBMSAC-2). All students will receive instruction in UNIX systems administration, networking, communications protocols, relational data bases, SQL, and C-Shell scripting before beginning CTAPS. The course ends with a 3-day CTAPS/WCCS/CIS combined class exercise.

Prerequisites: Students should have an introduction to UNIX completed before attendance and should be assigned to organizations that require in-depth understanding of the UNIX systems administration, which may include knowledge of current CTAPS, WCCS, or CIS computer programs. Self-paced computer-based training courses can be obtained from the Air Ground Operations School before attendance. ECL 80 SR.

Special Requirements: Secret clearance by class start date. Service uniform (any combination) is required for all classes. Utilities for Navy and Marine Corps or BDUs may be worn during course. All Air Force students must meet AFI 36-2903 and AFI 40-502 standards. Members of other Services must meet their equivalent dress and appearance standards.

Administration and Registrar Activity: Obtain class schedule and class assignment and possible read-ahead package through USAFAGOS/GSRQ (DSN 579-6229/6237, FAX 579-6237, (904) 884-xxxx).

Customers need to obtain quotas through their respective Service component:

Air Force	HQACC/DOY	DSN 574-8375/8376
Army	USA/PERSCOM	DSN 221-3159
Navy	CNO/COMSPAWARSYSCOM	(703) 602-2801

Marine USMC/MCCDC DSN 278-3708

Quota Control: USAFAGOS/GSRQ through HQ ACC/DPPTC.

ACC JAOSC—Joint Air Operations Staff Course (JAOSC)—PDS Code 77L—Hurlburt Fld/3 wk 2 days/MASL D121069—Oct 96

Trains selected officers, senior NCOs, and DoD civilians to plan, coordinate, control, and integrate air and surface forces in joint operations. Focuses on those battle management functions performed to integrate air and surface resources into joint combat operations. Provides an understanding of fundamental coordination considerations performed primarily at an air operations center or an associated joint or component facility. Covers threat; basic doctrine, mission, and organization of the services; command, control, and communications systems; intelligence support capabilities; tactical missions and major weapons systems used in joint operations; capabilities and limitations of command and control warfare (C2W) concepts and strategy; and current CTAPS computer tools used in joint operations. Focus is placed on choosing options which will provide the most effective use of military forces in joint operations. Individuals attending the course will be assigned to either an operations/plans track or an intelligence track. Students will complete together the first seven blocks of instructions. In block 8, the students will receive separate track instructions in the CTAPS tools used separately in the operations/plans or intelligence areas to produce an ATO/ACO. Students will be assigned to exercise duties in either operations/plans or in the intelligence areas. The overall course will take 17 class days with an exercise at the end requiring the students to plan, produce, and execute an ATO/ACO.

Prerequisites: Students must meet all requirements as described in MCR 50-76. Students should be field grade or senior company grade officers, civilians assigned to agencies of DoD or employed by defense industries, or senior NCOs (MSgt and above) who require an indepth understanding of the TAGS or current CTAPS computer tools to perform their duties to plan, publish, and execute an ATO/ACO. International students can occasionally (by exception) be admitted. ECL 80 SR.

Special Requirements: Secret clearance by class start date. Service uniform (any combination) is required for all classes. Flight suits, fatigues, utilities (for Navy and Marine personnel), or BDUs may be worn during course. Air Force students must meet AFI 36-2903 and AFI 40-502 standards.

Administration and Registrar Activity: Obtain class schedule and class assignment and possible read-ahead package through USAFAGOS/GSRQ (DSN 579-7371).

Quota Control: HQ ACC/DOY through HQ ACC/DPPTC.

ACC JETS—Joint Employment Tactics Course - Striker—PDS Code 77G—Nellis/3 wk—Oct 96

Trains selected unit tacticians, aircrew instructors, and intelligence specialists in planning and application of updated ACC aircraft tactics. Provides training in advanced topics in aircraft systems, defensive maneuvering, crew coordination, threat capabilities and recognition, adversary radar and electronic warfare, and conventional operations. Students evaluate threats, plan route layouts, analyze tactics, and crew procedures during comprehensive employment exercises.

Prerequisites: Attendees must be currently assigned to HQ ACC, an ACC Numbered Air Force, Air Division, or aircraft (bomber) unit and in the rank of Sgt and above for enlisted and 1st Lt and above for officers. Because of the advanced nature of course material, aircraft technical and systems expertise is required. Personnel selected for attendance should be retainable in their current unit position for a minimum of 12 months after course completion. Complete the Pre-Attendance Threat Review found in unit's Combat Intelligence (INZ) Tactics Branch (DOJ).

Special Requirement: Secret clearance. Clearance must be included on TDY orders.

Quota Control: 414 CTS through HQ ACC/DPTTC.

ACC JFCC—Joint Firepower Control Course (JFCC)—PDS Code 4WS—Hurlburt Fld/3 wk/MASL D121070—Oct 96

Trains jointly approved concepts, doctrine, procedures, and techniques for integrating combat efforts to services in joint operations. Gives a general overview of the TAGS. Emphasis is on planning and coordination at operational levels below Army divisions and integrating Air Force air support into Army operations through the division level. Air Force students receive training in procedures and techniques of forward air control. Practical field work includes a field problem which lasts 4 days, bivouac procedures, control of close air support, control of theater airlift, and adjustment of artillery. Instruction is also provided in land navigation. Air Force students receive training in the operation of Tactical Air Control Party (TACP) communications equipment.

Prerequisites: Air Force personnel assigned or selected for assignment for duty as an air liaison officer (ALO), forward air controller, or theater airlift liaison officer. Army personnel assigned or selected for duty as an S-3 air, fire support coordinator (company, battalion, or brigade) or operations NCO (battalion or brigade). Air Force students must meet AFI 36-2903 and AFI 40-502 standards. International students admitted only by exception. ECL 80 SR.

(1) ASOS Personnel. All ALOs assigned to ASOCs or division level TACPs and below and all FACs are required to attend. Corps ALOs may attend; however, these personnel are required to attend the AGOS joint air operations staff course (JAOSC) (ACC).

(2) AMC Personnel. Theater airlift liaison officers assigned to work at Army command echelons may attend the course as required by AMC.

(3) Army Personnel. Attendance is mandatory for personnel assigned to duties requiring the 5U ASI. See Department of the Army Pamphlet 351-4, *US Army Formal Schools Catalogue*, for description and requirements.

Special Requirements: Secret clearance by class start date. Service uniform (any combination) is recommended for all academic classes. Students staying for the third week FTX require two sets of BDUs, one pair of flight or combat boots, and one field jacket. Air Force students must have a current valid state driver's license.

Administration and Registrar Activity: Obtain class schedule and class assignment and possible read-ahead package through USAFAGOS/GSRQ (DSN 579-7371).

ACC SOJETS—Joint Employment Tactics Course - Senior Officer—PDS Code 9FC—Nellis/3 days—Oct 96

Familiarization course introducing selected unit senior staff officers to the tactical curriculum and concepts presented at the Tactics School. Reviews ACC tactics concepts including the ACC tactics process, new and evolving ACC aircraft commitments, current training deficiencies, adversary radar and electronic warfare, and methods of evaluating unit-level tactics programs.

Prerequisites: Attendees must be currently assigned to HQ ACC or AMC, an ACC or AMC numbered Air Force, or aircraft unit in the rank of Lt Col or above.

Special Requirements: Secret clearance. Clearance must be included on TDY orders.

Quota and Class Control: 414 CTS through HQ ACC/DPTTC.

ACC SQCC—ACC Squadron Commander Course—PDS Code OTP—Langley/1 wk 4 days—Oct 96

Three part course provides a 5-day basic knowledge training course to new or future squadron commanders on key day-to-day issues encountered during an officer's tenure as a squadron commander, a 1-day functional directorate visit, and a 3-day senior leader quality course.

Class Space/Eligibility Criteria: Mandatory attendees (newly selected first-time squadron commanders) are automatically included in class size, but must be submitted by the respective gaining wing commander. In-place squadron commanders may be selected for this course when nominated by wing commander and MAJCOM determines space-available basis will allow attendance. All class attendees will incur a 6-month active duty service commitment from class graduation date.

Scheduling Process: Future first-time squadron commanders will be scheduled for course by gaining wing through ACC/DPPEM as soon possible so attendance will occur BEFORE assumption of command (mandated by CORONA South 95.) In-place squadron commanders may be selected for this course when nominated by wing commander and MAJCOM determines space-available basis will allow attendance. See General Remarks block.

Waiver Process for Mandatory Attendees: Every effort must be made to schedule projected first-time commanders to attend this course before their assumption of command. Commander candidates should be selected with sufficient lead time to ensure course attendance before assuming command. Exceptions should be rare. Should a waiver request be needed, the waiver must be initiated by gaining wing through ACC/DPPEM to ACC/CV, who is the approval authority. Those individuals who receive approved waivers are expected to attend the next available course. First-time commander candidates should not be allowed to assume command without either attending this course or receiving an approved waiver.

Special Requirements: Secret clearance.

Admin Instructions: Lodging for entire 2 weeks will be prearranged by HQ ACC/DPPEM. For future commanders, TDY is unit funded by gaining unit. For current commanders, TDY is unit funded through local O & M funds. Bus transportation will be provided during classroom hours.

Reporting Instructions: Report to 66 Nealy Ave, Langley Inns Reservation Desk, for check-in and welcome package. See General Remarks block.

General Remarks: ACC/DPPEM will release a course announcement message to the field 60 days prior to each course date to advertise exact class dates and current attendance policy, establish suspense dates for mandatory submissions and space available nominations, and give current administrative and reporting instructions. This same message will announce particulars of ACC Squadron Commander's Spouse Course. For more detailed information, contact ACC/DPPEM, DSN 574-7589.

Advance Distribution of Orders: 1 copy gaining unit.

Quota and Waiver Control: HQ ACC/DPPEM through HQ ACC/DPPTC.

ACC2F0X1 000—Air Transportable Hydrant Refueling System (ATHRS)—PDS Code VP3—MacDill/1 wk—Mar 94

Operation, inspection, and operator maintenance of fuels mobility support equipment. Students receive academic and hands-on training in the operation of R-14, R-22, filter-separator, fuel bladder, liquid oxygen and liquid nitrogen storage tank and related mobility fuels/cryogenics equipment used for support at MOB, COB, LOB, SB and BB locations. Graduates are awarded SEI 387.

Prerequisites: AFSC 63150 or higher.

Special Requirements: Secret clearance by class start date. Report with fatigues (work uniforms).

Quota and Waiver Control: HQ ACC/LGSF.

ACC2F0X1 001—Aerial Bulk Fuel Delivery System (ABFDS)—PDS Code QXB—MacDill/1 wk—Mar 94

Provides training for operation, inspection, and operator maintenance of Aerial Bulk Fuel Delivery System (ABFDS) and ABFDS with Alternate Capability Equipment (ACE). Students receive academics and hands-on training to become proficient with fuels equipment used to airlift fuel for ground delivery or for aircraft-to-aircraft servicing. Graduates are awarded SEI 369.

Prerequisites: AFSC 63150 or higher, qualified flight physical IAW AFI 48-123, *Medical Examination and Medical Standards* (formerly AFR 160-43) and physiological training IAW AFR 50-27.

Special Requirements: Report with fatigue (work) uniform, equipment, and flight clothing to include aircrew helmet, boots, NOMEX coverall, gloves, MC-1 knife, and oxygen mask CRU-60 adapter. A Secret clearance is required by the class start date.

Quota and Waiver Control: HQ ACC/LGSF.

ACC2F0X1 002—Portable Low Pressure Cryogenic Production Plant—PDS Code XJF—Seymour Johnson/3 wk 4 days—Mar 94

Operation, setup, inspection, and complete level maintenance of portable low pressure cryogenic production plants. Students receive academic and hands-on training in the operation, setup, and maintenance of the portable low pressure cryogenic production plant to be able to produce cryogenic products for support at MOB, COB, LOB, SB, and BB locations.

Prerequisites: AFSC 2F031 or higher.

Special Requirements: Report with the battle dress uniform.

Quota and Waiver Control: HQ ACC/LGSF.

ACC2F0X1 003—Portable Low Pressure Cryogenic Production Plant Refresher—PDS Code 095—Seymour Johnson/1 wk 4 days—Jan 96

Operation, setup, inspection, and complete level maintenance of portable low pressure cryogenic production plants. Students receive academic and hands-on refresher training in the operation, setup, and maintenance of the portable low pressure cryogenic production plant to be able to produce cryogenic products for support at MOB, COB, LOB, SB, and BB locations.

Prerequisites: AFSC 2F050 or higher and attendance of ACC2F0X1 002 course or SEI 037.

Special Requirements: Report withh BDU (work uniform).

Quota and Waiver Control: HQ ACC/LGSF through HQ ACC/DPPTC.

IAAFA-X-75000—Technical Training Instructor—PDS Code S30—Lackland/7 wk 1 day—Oct 96

Trains selected personnel to perform instructor duty in Air Force technical training courses. Provides training on communicative skills, learning process, questioning techniques, human relations, developmental approach, instructional system development process, and preparation and use of training documents. Includes instructional aids and materials and student measurements administration and counseling. Students plan, develop, and present lessons, using the lecture and demonstration and performance methods of instruction or technical specialty.

Prerequisites: Instructor candidate must be Spanish-language qualified (minimum Spanish language). Officers and enlisted personnel must be technically qualified in the subject or career field in which they will instruct airmen with CAFSC at the 5-skill level or above. High school or GED equivalent, and a clear speaking voice, free of speech impediments. Civilian applicants must meet civil service standard for employment as instructors.

Special Requirements: TDY students should bring reference materials on their specialty for use in preparing and presenting a job- or course-related lesson.

Quota Control: IAAFA/XRI.

ACC AIC 100—ACC Academic Instructor Course—PDS Code XJE—Dyess/Tinker/1 wk—Mar 94

Provides instruction and learning activities to teach fundamental skills required to perform classroom instructor duties. Course provides the opportunity to demonstrate and implement selected teaching methods and techniques commonly used in ACC classroom instruction. Forty hours of classroom academics emphasize communication skills, learning theory, instructor/student relations, developing objectives, and preparing a presentation. Students give an informal lecture, guided discussion, and final presentation (final is student's choice of method). Presentations are videotaped and critiqued by the student and instructors.

Prerequisites: ACC personnel selected for duty as academic instructors within a formal training unit (FTU) responsible for conducting formal operations training in accordance with ACCR 50-1.

ACC OPR: 4444 OS, Langley AFB VA 23665-2596.

Quota Control: 436 TS/TAT, Dyess AFB TX or Det 6, 4444 OS, Tinker AFB OK.

FECOC—Fighter Electronic Combat Officer Course—PDS Code XSX—Eglin/2 wk—Apr 96

Trains highly qualified pilots, weapon systems officers (WSO), and electronic warfare officers (EWO) to instruct aircrews in operation and employment of electronic combat. The FECOC prepares the student to manage the duties and responsibilities of the squadron or wing electronic combat officer (ECO). Reprogramming of the Block I ALQ-131 ECM pod is taught in the Blue Tape Generator (BTG) course. The BTG course is optional and taught at the completion of FECOC. FECOC is 10 training days. BTG is 1/2 training day.

Prerequisites: Rated officer who is presently, or will be, assigned ECO duties under ACCR 55-28. Officer should have 1 year of retainability on station and be a qualified instructor or possess instructor potential. Prestudy of AFP 51-3 or the 68 TSS/EST text "Radar and ECCM Fundamentals" is required.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send names and security clearance to HQ ACC/DOTE info 68 TSS/EST, NLT 30 working days before class start date.

Quota Control: HQ ACC/DOTE through HQ ACC/DPPTC.

ACC1741HAOODT—Air Weapons Controller Automated Systems Qualification Training Basic Course—PDS Code VG5—Tyndall/10 wk 4 days—Jun 93

Prepares the entry-level AFSC 1741, 276XOD, and 117XOD controller for transition to an automated system. The graduate will be capable of providing control for two fighter aircraft against one target. Upon satisfactory completion of this course, graduates will be eligible to enter the unit upgrade program for mission ready (MR) status on the Region Operations Control Center (ROCC), Sector Operations Control Center (SOCC), or enter AWACS Initial Qualification Training.

Prerequisites: a. Graduate of AETC course E3OBP1741X001, AWC Fundamentals, within 120 days of class start date.

b. If a 1745, previously MQ or MR in the manual or AWACS environment and have not controlled aircraft within the past 4 years, will attend and complete AETC course E3OZP1745A001 within 90 days of class start date.

c. Possess a current AF Form 1042, Medical Recommendation for Flying.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ ACC/DOY.

ACC174101AA—Adversary Tactics Controller Course—PDS Code VZN—Nellis/10 wk—Jun 93

Provides training to upgrade selected air weapons controllers as element combat tactics (ECT) controllers capable of emulating enemy tactical philosophy and tactics. Successful completion of this course upgrades graduate as an ECT qualified controller pending command certification.

Prerequisites: Weapons controllers must have completed basic weapons course, be awarded AFSC 1744 with minimum 3 years of tactical control experience. Current assignment must be an active controlling tour. They must be scheduled to attend USAF Soviet Military Power Week (Course AFIS001). Controllers must have completed physiological training IAW AFR 50-27.

Special Requirements: Secret clearance by class start date (Top Secret desirable). Officers TDY en route must have "variations authorized" annotated on PCS orders. Mess dress.

NOTE: All weapons controllers assigned to aggressor squadrons worldwide will have completed this course before assignment. Controllers will be authorized orientation flights on a noninterference, voluntary basis.

Quota and Waiver Control: HQ ACC/DOY.

ACC1745IDIN—USAF Weapons School Instructor Upgrade Air Weapons Controller—PDS Code 86E—Nellis/Duration: NA—Oct 96

Upgrades AWD/CCO WIC graduates to instructor status allowing them to provide academic and weapons control instruction to students of course ACC13B3B/C/D/DIDOZN and sustain the Weapons School instructor cadre. This course will be conducted only in conjunction with a PCS/PCA assignment to the Weapons School as an instructor.

Prerequisites: Weapons School instructor trainee must be currently MR/MS IAW applicable directives and a graduate of the AWD/CCO WIC.

Special Requirements: Secret clearance before course entry.

Quota Control: HQ ACC/DOY through HQ ACC/DPPTC. OPR and Waiver Authority: HQ ACC/DOY.

ACC13B3B/C/DIDOZN—USAF Weapons Instructor Course, CCO—PDS Code 32N—Nellis/19 wk 3 days—Oct 96

Trains qualified air weapons directors as instructors in all phases of air weapons control and airborne weapon systems employment. Graduates are qualified tactical fighter weapons instructor air weapons controllers capable of implementing, conducting, and supervising weapons and tactics training programs within their units up to and including headquarters level. Commanders are responsible for ensuring that graduates are used as instructors and supervisors in weapons and tactics training programs for a minimum of 3 years after graduation.

Prerequisites: 1st Lt or captain with maximum of 8 years of commissioned service. Minimum 3 years CCO experience. Minimum 1 year of experience in a mission ready (MR) 13B3 position. Minimum 1 year experience as an instructor in command and control operations. Must be currently proficient in (at a minimum) 2v2 ACT/DACT air-to-air tactical control. Experience in 4v4, 4vx, and composite force scenarios is recommended. Controlled the following number of recent ACT/DACT missions before reporting to the Weapons School: 20 total missions within the last 90 days, with at least 10 missions within the preceding 45 days. NOTE: When local circumstances preclude meeting the above requirements, waivers must be requested through HQ ACC/DOY. Must have performed saisfactorily in all previous 17XX13B formal training.

Special Requirements: Secret clearance required by class start date. Controllers attending the course will be authorized to fly on F-15/F-16 syllabus missions when suitable aircraft are available. A current physiological training certificate is mandatory for participation in flying missions.

Admin Instructions: Send nominations to appropriate MAJCOM as directed in selection board announcement message. Nominations should include name, SSN, qualifications, security clearance, civilian and military education, official awards and decorations, current duties, date arrived on station, job experience, summaries of OPRs, AF Form 90, and letters of endorsement.

Individuals should report no earlier than 2 days before class start date. State on the orders: "Dual quarters, variations, and 600 lbs maximum hold baggage are authorized" and "Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School." Individuals projected for assignment to active-duty ACC units upon graduation should contact HQ ACC/DOTW at DSN 574-5896 for “after-the-fact” fund cite information.

Quota Control: HQ ACC/DOY through HQ ACC/DPPTC.

OPR and Waiver Authority: HQ ACC/DOY.

ACC 8045 005—Advanced Systems Training—PDS Code 8K1—Langley/1 wk—Jun 93

Includes an overview of infrared imaging systems, a focus on infrared theory and principles, and a concentration on order-of-battle analysis.

Prerequisites: Provides training for DOD and other intelligence community personnel who possess Air Force AFSCs 8016, 8045, 20650/70/90, or their equivalents. Army, Navy, Marine Corps, and civilian attendees must be graduates of a basic imagery interpretation course. Completion of course X3OZR8045 001, Defense Sensor Interpretation and Application Training (DSIATP), is desirable.

Special Requirements: Course is conducted at the SI/SAO level. Top Secret clearance and access to SI/SAO is required prior to training. Waiver of security clearance requirements CANNOT be granted, and students WILL NOT be enrolled unless security clearance requirements are met. Military members may wear any service uniform combination IAW AFI 36-2903, *Dress and Personal Appearance of Personnel* (formerly AFR 35-10) or other service equivalent.

Quota Control: 480 AIG/INAB.

ACC INTELIDOZN—USAF Intelligence Weapons Instructor Course—PDS Code NU4—Nellis/19 wk 3 days/AFSC W-Prefix—Oct 96

Trains qualified intelligence officers (AFSC 14N3B) in all phases of combat aircraft weapons employment and tactics. Graduates are qualified combat aircraft intelligence instructors capable of implementing, conducting, and supervising internal and external intelligence training programs within their units up to and including NAF level. Commanders are responsible for ensuring graduates are used in “W” billets as instructors or supervisors in weapons and/or intelligence training programs for a minimum of 3 consecutive years and 5 years total after graduation.

Prerequisites: 1st Lt or captain with a minimum of 3 years and a maximum of 8 years of commissioned service. Minimum of 1 year of operational tactical flying unit experience.

Special Requirements: A current physiological training certificate is required for flying missions. Course attendees will be authorized to fly USAF Intelligence Weapons Instructor Course (IWIC) syllabus missions if suitable aircraft are available. Top Secret/SCI clearance or submission for Top Secret/SCI before course attendance.

Admin Instructions: Send nominations to appropriate MAJCOM/IN as directed in selection board announcement. If a waiver is required, nomination must be submitted to HQ ACC/IN IAW instructions in selection board announcement. A sample nomination package can be obtained from HQ ACC/INOU, DSN 574-9926. Information should include current duty and job history. Wing CC/OG/IN DO/IN and Squadron CC and weapons officers letters of endorsement supportive comments should also be attached with emphasis on instructor and communication skills and experience supporting operational flying aircrews. Individuals should report no earlier than 2 days before class start date. State on the orders “Variations, dual quarters, and 600 lbs max hold baggage authorized” and “Use of available government mess will adversely affect performance of duty for the period of the TDY at the USAF Weapons School.” Individuals projected for assignment to active-duty ACC units upon graduation should contact HQ ACC/DOTW at DSN 574-5896 for “after-the-fact” fund cite information.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC.

OPR and Waiver Authority: HQ ACC/DOTW.

ACC INTELIDIZN—USAF Intelligence Weapons Instructor Upgrade—PDS Code WFM—Nellis/Duration: NA—Oct 96

Upgrade intelligence IWIC graduates to instructor status allowing them to provide academic and intelligence mission instruction to students of course ACC INTELIDOZN and sustain Weapons School instructor cadre. This course will be conducted only in conjunction with a PCS/PCA assignment to the Weapons School as an instructor.

Prerequisites: Weapons School instructor trainee must be an IWIC graduate and have at least one assignment in a unit-level "W" billet.

Special Requirements: Top Secret/SCI clearance before course entry.

Quota Control: HQ ACC/DOTW through HQ ACC/DPPTC. OPR and Waiver Authority: HQ ACC/DOTW.

ACC303030—USAF Centrifuge Training Course—PDS Code 7N9—Holloman/1 day or 3 days */MASL D128025—Mar 93

A two-track course which provides initial (Track 1) and refresher (Track 2) centrifuge training to Air Force and other non-DOD and FMS aircrews. ACCR 51-17 provides a detailed description of the centrifuge training requirements.

Instructs aircrews in procedures and techniques for increasing High G tolerance. Classroom instruction provides information on High G physiology, proper anti-G straining techniques, and prevention of G-Loss of Consciousness. Centrifuge runs provide aircrews an opportunity to practice an effective anti-G straining maneuver and also provide an assessment of the aircrew's ability to transition to high-G aircraft. Completion of the appropriate track of centrifuge training is a prerequisite for entry into all fighter formal training courses.

Prerequisites: ECL 70.

a. Both Tracks: Aircrews must be on flying status and not currently experiencing the effects of any illness. Aircrews will hand-carry the following to training:

(1) AF Form 702 reflecting any and all previous centrifuge training.

(2) Aircrew anti-G suit.

(3) Blank VHS videotape (optional—for aircrew's personal record).

b. Track 1: This is a one-time requirement for rated aircrews below the rank of O-7 who are selected for or flying high performance fighter or fighter-type aircraft capable of generating four or more Gs under normal operations. General officers who are authorized to fly solo and other experienced rated officers over 40 years of age or who have 1000 hours in high G aircraft, attend Track 2 in place of Track 1.

c. Track 2: Required for experienced rated officers (see above definition) who never attended training. Required for fighter aircrews who have previously completed initial training and are either:

(1) Returning to active flying following 3 + years on inactive status or nonflying, or

(2) Converting from a low-G to high-G capable aircraft.

All aircrews are restricted from performing flight duties within 12 hours after centrifuge training (regardless of track).

Quota Control: HQ AFPC/DPMROT and 49 MG/MGT. Waiver Authority: MAJCOM DO or ANGRC/DO for ANG aircrews.

OPR: HQ ACC/DOTF.

* The retraining program is 3 days. This program is for aircrews who fail initial training. Refer to ACCR 51-17 for additional information.

TAC228590—Electronic Combat Familiarization—PDS Code 83W—Hurlburt Fld/1 wk—Sep 86

Trains members of the Tactical Air Forces (TAF), at all levels of command, who require an operational knowledge of the electronic combat (EC) arena. The intent of the course is to provide EC training to individuals not eligible or available to attend other USAFTAWC EC training courses. The course is recommended for selected ground TACS battle managers, AETACS personnel (AWACS/ABCCC), special mission aircraft (Compass Call/Rivet Joint, etc.), forward air controllers, intelligence personnel, staff officers, and EC officers at all levels of command who require a familiarization with EC and integration issues.

Prerequisites: The course is open to members of the TAF (E-4 through colonel) as stated above, with particular emphasis on those who presently are or will soon be assigned to EC-related duties. Prestudy of AFP 51-3, Electronic Combat Principles, or the USAFTAWC/EWAT text, Radar, ECM and ECCM Fundamentals, is highly recommended.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send names and security clearances to USAFTAWC/EWAT, info TAC/DOFT, NLT 20 working days before class start date.

Quota Control: HQ ACC/DOFT. Waiver Authority: HQ ACC/DOFT.

TAC303031—G-Tolerance Training—PDS Code GD4—Brooks/1 day—Jun 88

Instructs attendees in procedures and techniques for increasing high G tolerance. Classroom instruction provides information on high G physiology, proper G straining techniques, and prevention of G-loss of consciousness. Centrifuge runs up to nine Gs provide attendees an opportunity to practice an effective anti-G straining maneuver.

Prerequisites: Attendees must be on flight status and not currently experiencing the effects of any illness. Attendees will handcarry the following to training:

a. AF Form 1042.

b. A 30-minute videotape (3/4 inch) for recording centrifuge runs.

c. AF Form 702, Record of Physiological Training.

Attendees are restricted from performing flight duties within 12 hours after centrifuge training.

Quota Control: HQ AFPC/DPMROT3. Waiver Authority: HQ ACC/DOTF.

TAC303RE 000—Ground Radar Evaluation Course—PDS Code 8YJ—Hill/3 wk 3 days/MASL D137061—Jun 88

Familiarizes radar system evaluators with the authority, purpose, objectives, and the life-cycle of an evaluation. Included is analysis of a final radar evaluation report. Unclassified information on the radar technology being evaluated by the 84 RADES is discussed and includes surveillance radars, heightfinders, beacon radars, 3-D radars, and other related systems.

Prerequisites: Students should have a Secret clearance, experience in the communications-electronics field, and some mathematical knowledge in algebra, trigonometry, and decibels. ECL 80.

Schedule: Classes will be scheduled by the 84 RADES and released through HQ ACC/DPAT. Class size will be restricted to 20 students, with 84 RADES personnel having first priority.

Cost: Materials furnished by Radar Evaluation Squadron - $25 per student. Per diem $60 for Ogden/Hill AFB area - Total 24 days = $1440.

Note: Per diem and travel are the responsibility of the unit sending personnel TDY to the radar evaluation course.

OPR, Quota Control, and Waiver Authority: 84 RADES/TEX. International students will coordinate requests through appropriate embassy.

TAC303RE 001—Ground Radar Evaluation Course—PDS Code 8YW—Hill/2 wk 2 days/MASL D137090—Jun 88

Familiarizes the evaluation officer (AFSCs 4934 and 4944) and the evaluation technician (AFSCs 231XX, 251X0, 276X0, 303X2, 305X4, and 553X0) with a complete overview of radar evaluation techniques that include evaluation planning, system testing, data collection and analysis procedures, and report documentation.

Prerequisites: Students must complete Ground Radar Evaluation Course, TAC 303RE 000. ECL 80.

Schedule: Classes will be scheduled by the 84 RADES and released through HQ ACC/DPAT. Classes will be contiguous with course TAC 303RE-000, Ground Radar Evaluation Course. Class size will be restricted to 20 students with 84 RADES personnel having first priority.

Cost: Materials furnished by Radar Evaluation Squadron - $25 per student. Per diem $60 for Ogden/Hill AFB area - Total 24 days = $960.

Note: Per diem and travel are the responsibility of the unit sending personnel TDY to the radar evaluation course.

OPR, Quota Control, and Waiver Authority: 84 RADES/TEX. International students will coordinate requests through appropriate embassy.

U2MDC—U-2 Mission Development and Coordinator Course—PDS Code 30M—Beale/4 wk/AFSC 12R3Y—Oct 96

Provides training in U-2 mission development to support worldwide taskings, deployments, and operations of the U-2 aircraft. Training includes refresher exercises in navigation, U-2 systems and performance, route and mission development, computer-aided mission planning, reconnaissance reporting, COMSEC procedures, detachment and operation location orientation, and deployment and mobility.

Prerequisites: Must be a previously qualified instructor navigator. Due to amount of responsibility and supervisory functions, rank for this position should be a senior captain or higher rank.

Phase 2 training will take place within 6 months of completion of Phase 1 training and will last approximately 4 weeks at a forward operating location or on a U-2 deployment.

Special Requirements: Person being considered must be eligible to obtain SCI clearance.

Quota Control: ACC/DOYR through HQ ACC/DPPTC.

49XXB16/491X2B16—JSS Operations Course—PDS Code WHW—Tyndall/4 wk—Mar 93

Familiarizes the student with the mission of NORAD and the Joint Surveillance System (JSS). Provides instruction and hands-on experience with different JSS positional modes of operation and JSS hardware and software components. Students will also learn the procedures necessary to implement a new release.

Prerequisites: AFSC 49XX or 491X2 and be assigned to the JSS.

Special Requirements: Secret clearance before class start date.

Quota Control: 4702 CPUSS/ADMT.

49XXH17/491X2H17—JSS Programmer Course—PDS Code WHX—Tyndall/6 wk—Mar 93

Provides instruction and hands-on experience in logic design, programming, and troubleshooting in the Joint Surveillance System (JSS) environment.

Prerequisites: Possess AFSC 49XX or 491X2, be assigned to the JSS, and have successfully completed the JSS Operations Course, 49XXB16/491X2B16.

Special Requirements: Secret clearance before class start date.

Quota Control: 4702 CPUSS/ADMT.

ACC AFCOMAC—ACC Combat Ammunition Planning and Production—PDS Code 8RM—Beale/3 wk—Oct 96

Conducted by the 9th Munitions Squadron (Air Force Combat Ammunitions Center). Major areas of instruction include, but are not limited to: combat planning, munitions distribution systems, development of munitions employment plans, combat production concepts, production tasking, practical assembly of tasked munitions, and a mass production exercise.

Prerequisites: AFSC 2W000, 2W051, 2W071, and 2W091, SEI 837, and 021A3 (2d Lt thru Capt). Officers will be selected at the discretion of the MAJCOM. Enlisted personnel must be career airmen SrA/Sgt on a second or subsequent enlistment. Six-year enlistees must be at least SrA/Sgt and may attend at MAJCOM option.

Quota Control: HQ ACC/LGWM through HQ ACC/DPPTC.

CATS/Airlift—Airlift CATS—PDS Code CUC—Little Rock/2 wk 4 days—Oct 95

Trains airlift instructor pilots, instructor navigators, and unit assigned intelligence personnel to implement, conduct, and supervise combat aircrew training programs within their respective units. Classroom presentations and mission planning activities provide information on threat analysis, combat force employment, mission planning, and mission execution. Commanders are responsible for ensuring that graduates are used to instruct in combat aircrew training programs for a minimum of 1 year after graduation. Individuals on a short tour are exempt from this 1-year requirement. Course does not include aircraft flying training.

Prerequisites: Aircrew members must be mission ready instructor qualified. Intelligence officers must possess an AFSC of 14N3X and intelligence enlisted personnel must possess an AFSC of 1N071 or 1N072 and all have 1 year of experience at unit level. Waiver authority: USAF CADS/CC.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Sixty days before class entry date, any unit having a quota sends the name, grade, SSN, security clearance, and duty title to USAF CADS/ATD, 232 Ave A West, Little Rock AFB AR 72099-5153, info copy to HQ ACC/DOTF. TDY orders will include the following statements, “Team integrity will be maintained,” and "Variations authorized."

Quota Control: HQ ACC/DOTF through HQ ACC/DPPTC.

Chapter 9

AIR FORCE SPACE COMMAND

(OPR: HQ AFSPC/DPPET)

COMMAND OPR. HQ AFSPC/DPPET is command OPR for this chapter. All changes to this chapter must be prepared in accordance with paragraph 1.10 and sent to HQ AFSPC/DPPET for required processing.

Section A—Procedures and Instructions

9.1. Selectee's Qualification. Before sending students to any course listed in section B, the gaining unit reviews their qualifications to ensure they meet course prerequisites. Students reporting for training who do not meet course prerequisites may be refused entry into training.

9.2. Preparation of Student Orders. Student orders are prepared using AFI 37-128, *Administrative Orders*, and instructions contained in this section.

9.2.1. Use of a rental car must be determined to be more cost effective to the government.

9.2.2. For courses conducted at F.E. Warren, send one copy of orders to 20 AF/LGMAH before class start date.

9.3. Funding Procedures. Funding for travel and per diem will be issued by member's unit.

9.4. Clothing Requirements. Blue uniform will be required unless otherwise indicated by instructor.

9.5. Pay and Allowances. Before departure, students who want pay and allowances while on TDY should inform their parent unit according to AFM 177-373, *Joint Uniform Pay System - JUMPS AFO Procedures*.

9.6. Reporting Instructions: For specific class reporting, refer to table 9.1.

Section B—Course Announcements

AFSPCCGOPD—AFSPC Company Grade Officers Professional Development—PDS Code ORQ—All AFSPC bases/1 wk—Oct 96

Translates leadership and management theory into practical application to better prepare officers to assume their responsibilities, to strengthen professional values, and to provide a foundation for further professional development.

Prerequisites: All lieutenants and junior captains who have not attended Squadron Officer School in residence.

AFSPCHRST1—Helicopter Rope Suspension Training (HRST) (Initial) —PDS Code 163—Vandenberg/1 wk—Oct 96

Provides training in helicopter rope suspension operations, a requirement for all AFSPC personnel who require alternate insertion/extraction from AFSPC helicopters. Instructs on knot tying, helicopter rope suspension operations/alternate insertion/extraction responsibilities and safety; rigging helicopters for rappel, fast rope, rope ladder and static tower operations; practical deployment exercises from static tower and helicopter using rappel, fast rope, rope ladder procedures.

Prerequisites: AFSC 1A1X1B, 1T1X1, 3E7X1, 3E8X1, 3PO51A, 3PO52. SrA through captain with at least 1 year of service remaining.

AFSPCSQCMDCRS—AFSPC Squadron Commander Training Course—PDS Code 0E8—Peterson/1 wk 3 days—Jan 96

A joint AFSPC and USAFA course designed to expand and enhance the knowledge of squadron commanders in all aspects of their day-to-day activities, with strong emphasis on leadership, accountability, personnel programs, and functional areas.

Prerequisites: Selected to fill or currently filling a squadron commander billet, and nominated by wing commander or equivalent.

AFSPC15W3A 001—Space Environmental Forecaster—PDS Code 1RP—Falcon/2 wk—Oct 95

Training in solar physics, solar-terrestrial relationships, and magnetospheric/ionospheric processes. Provides an understanding of astrogeophysical analysis and forecast techniques and an overview of the Space Environmental Support System.

Prerequisites: AFSCs 25XX, 25150A, or 25170/90 will be considered.

Quota Control: Air Force Space Forecast Center/DO.

AFSPC15W3A 002—Ionospheric Effects Forecaster—PDS Code 1RQ—Falcon/1 wk—Oct 95

A review of electricity and magnetism, aeronomy, plasma physics, radioactive transfer, radio astronomy, radiowave propagation, and antenna theory. Provides advanced instruction on magnetospheric physics, ionospheric physics, and space environmental effects on DOD systems.

Prerequisites: AFSC 2546 who has completed space environmental forecaster course. AFSC 25XX, 25150A, or 25170/90 will be considered.

Quota Control: Air Force Space Forecast Center/DO.

AFSPC2500 000—SOON Operator—PDS Code YH5—Holloman/5 wk—Jan 96

Training in the knowledge and skill required to operate the Solar Observing Optical Network (SOON)—AN/FMQ-7 telescope system.

Includes general solar theory, computer principles and basic operations, theory of equipment operations including semiautomatic and automatic modes, SOON computer programs, daily operating and operational alignment procedures and SOON data analysis.

Prerequisites: Fully qualified AFSC 1W0 or civilian equivalent.

Table 9.1. AFSPC Reporting Instructions.

LINE	A Scheduled Course	B Reporting Instructions
1	ICBM-CEIC, ICBM-CMEIC, ICBM-IC, ICBM-MEIC, ICBM-MIC, ICBM-MMSC, ICBM-MQAC	TDY students report to Billeting (bldg 216), FE Warren AFB WY, NET 1 day before class start date to pick up student welcome package and, if billeting is required, to check in. Non-TDY students report to bldg 485, rm 120A, NET 0730 and NLT 0745 on class start date.
2	AFSPC2500 000, AFSPC2600 000, AFSPC15W3A 001, AFSPC15W3A 002	Students should report to Holloman Billeting Office 1 day before class start date. Report at 0800 on class start date.

Special Requirements: To prepare operator personnel newly assigned to a SOON facility to operate the SOON system. This training is only available at the SOON facility at Holloman AFB NM.

Quota Control: 50 WS.

AFSPC2600 000—RSTN Operator—PDS Code K7M—Holloman/1 wk—Jan 96

Training in the knowledge and skill required to operate the Radio Solar Telescope Network (RSTN)—AN/FRR-95 Radio Interference Monitoring Set (RIMS). Includes general solar theory, theory of equipment operations, daily operations including manual and automated modes, operational calibration procedures, RSTN computer programs, RSTN data analysis and dissemination procedures, customer support requirements.

Prerequisites: Fully qualified AFSC 1W0 or civilian equivalent.

Special Requirements: To prepare operator personnel newly assigned to a RSTN facility to operate the RSTN system. This training is only available at the RSTN facility at the SOON facility at Holloman AFB NM.

Quota Control: 50 WS.

AMQ100-000—Quality Assurance Evaluator (QAE) Training—PDS Code 2R2—Peterson/1 wk—Jun 93

Provides training for military and(or) civilian personnel on the function and responsibilities of an AFSPC QAE. Training includes: mission overview, statements of work, performance evaluation checklists, technical proposals, government contracts, contracting clauses, AFSPC organizational structure for contracting, contractor evaluation procedures, fraud, legal constraints, QAE regulations, scenario application, and visits with Administrative contracting officers.

Prerequisites: E-4 (sergeant) through colonel or equivalent civilian rank.

Quota and Waiver Control: 21 CTS/DOW.

ICBM-CEIC—Communications Evaluator Course—PDS Code X25—F.E. Warren/1 wk 3 days—Dec 93

Trains selected intercontinental ballistic missile (ICBM) communications personnel to perform unit maintenance support (MS) evaluator duties. Philosophy, techniques, and procedures for conducting personnel evaluations in accordance with ACCR 66-6 volume III,and command evaluation standards are presented. Maintenance personnel proficiency evaluations and techniques are taught in depth; includes error and rating criteria, as well as documentation requirements and procedures. Provides additional training in such areas as managerial, technical, and special evaluation requirements; and responsibilities, regulation requirements, human relations, communications techniques, and effective writing of the maintenance standardization and evaluation program (MSEP) through actual performance.

Prerequisites: Must be selected for, or assigned to, the MS section in support of ICBM communications maintenance unit as a full-time unit MS evaluator or as a MS representative (MSR). ICBM communications maintenance workcenter supervisors and trainers may also attend. Students will be familiar with ACCR 66-6 volume III.

Quota Control: HQ AFSPC/LGMA through HQ 20 AF/LGMAH.

ICBM-CMEIC—Communications Management Evaluation Course—PDS Code X27—F.E. Warren/3 days—Dec 93

Reviews philosophy and policies of maintenance support (MS) quality assurance programs currently emphasized by command and 3901 MES. A comprehensive review of current problem areas and proposed improvements pertaining to the evaluation program is included. A review is conducted of the curriculum presented to unit evaluators during the communications evaluator course. This review includes MS responsibilities, terms and definitions, and personnel, managerial, technical, and special evaluation programs and reports. Information is also provided on the “Core” inspection program format and rating criteria.

Prerequisites: Upper-level maintenance managers assigned to intercontinental ballistic missile communications maintenance units. Includes such functions as chief of maintenance, maintenance superintendent, MS chief and supervisors, branch and workcenter supervisors, and maintenance staff personnel. Students must have a working knowledge of ACCR 66-6 volume III.

Quota Control: HQ AFSPC/LGMA through HQ 20 AF/LGMAH.

ICBM-IC—ICBM Maintenance Instructional Techniques—PDS Code X22—F.E. Warren/1 wk 3 days—Dec 93

Trains selected intercontinental ballistic missile (ICBM) personnel to perform instructor duty in technical training courses. Provides training on communicative skills, human relations, counseling, job requirements and directives, enlisted specialty training (EST), techniques and documentation, instructional systems development (ISD), learning process, questioning techniques, training aids, lesson plan development and usage, and instructional techniques and methods. Students plan and develop criterion objectives, lesson plans, target population, as well as perform a course review analysis. Includes instructing a designated task using the demonstration-performance method of instruction.

Prerequisites: Attendees must currently be assigned to an ICBM maintenance Air Force specialty code (AFSC) position. Enlisted attendees must have been awarded a 5-skill level prior to attending this course and be assigned as ICBM maintenance training instructors.

Quota Control: HQ AFSPC/LGMA through HQ 20 AF/LGMAH.

ICBM-MEIC—Munitions Evaluator/Inspector Course—PDS Code X24—F.E. Warren/2 wk—Dec 93

Trains selected intercontinental ballistic missile (ICBM) munitions personnel to perform unit evaluator and inspector duties. Philosophy, techniques, and procedures of conducting maintenance personnel evaluations according to ACCR 66-6 volume I and other applicable Air Force publications are presented. Maintenance personnel proficiency evaluations and techniques are taught in depth; includes error and grading criteria, as well as documentation requirements and procedures. Provides additional training in such areas as evaluator-inspector responsibilities, regulation requirements, evaluations and inspection requirements, philosophies, human relations, communication techniques, and effective writing of the munitions standardization and evaluation program (MUSEP) through actual performance.

Prerequisites: Student must be selected for or assigned to the munitions quality assurance section or be designated s an alternate weapon system evaluator in support of an ICBM missile maintenance unit. Students will be familiar with ACCR 66-9, volumes I and II; ACCR 66-6, volume I; and ACCR 66-1, volume V.

Quota Control: HQ AFSPC/LGMA through HQ 20 AF/LGMAH.

ICBM-MIC—ICBM Maintenance Inspector Course—PDS Code X23—F.E. Warren/1 wk 3 days—Dec 93

Trains selected intercontinental ballistic missile (ICBM) personnel to perform unit inspector duties. Provides training in general quality assurance areas, such as purpose, function, and responsibilities. Provides additional training in such areas as inspector responsibilities, regulation requirements, inspection requirements, philosophies, human relations, communications techniques, effective writing, the personnel selection process, and the application and documentation of the Maintenance Inspection Program (MIP) through actual performance.

Prerequisites: Attendees must be currently assigned to an ICBM maintenance Air Force specialty code (AFSC) position, and be familiar with the regulation pertaining to the ICBM MIP. This course is designed for personnel assigned to quality control divisions as ICBM inspectors. Attendees must have 3 months of quality control experience and have completed the local inspector training program.

Quota Control: HQ AFSPC/LGMA through HQ 20 AF/LGMAH.

ICBM-MQAC—Missile Maintenance Management Quality Assurance Course—PDS Code X26—F.E. Warren/4 days—Dec 93

Reviews unit philosophy and policies of quality assurance inspection programs. A comprehensive crossfeed of current problem areas pertaining to the inspection program is included. A review is conducted of the curriculum presented to unit inspectors during the missile maintenance inspector course. Teaches quality assurance (QA) requirements, QA management responsibilities, personnel selection process, and the application and documentation of the Maintenance Inspection Program (MIP), terms, and definitions; evaluator/inspector selection, training and certification; and technical, special, and activity inspection programs and reports.

Prerequisites: Attendees should be selected for or assigned management duties in ICBM Missile Maintenance Quality Assurance Program. Must have a working knowledge of QA directives.

Quota Control: HQ AFSPC/LGMA through HQ 20 AF/LGMAH.

Chapter 10

AIR NATIONAL GUARD AND AIR FORCE RESERVE

(OPR: ANGRC/TE; HQ USAF/REPP)

Air Force Reserve (USAFR) OPR. HQ USAF/REPP is the Air Force Reserve OPR for this chapter. Requests for new course announcements, changes, or revisions must be prepared in accordance with paragraph 1.10 and sent to HQ USAF/REPP for required processing.

Air National Guard (ANG) OPR. ANGRC/TE is the Air National Guard OPR for this chapter. Requests for new course announcements, changes, or revisions must be prepared in accordance with paragraph 1.10 and sent to ANGRC/TE for required processing.

Section A—Procedures and Instructions

10.1. Explanation of Terms:

10.1.1. **Courses of Other Services**. Courses conducted by the Army, Navy, or Joint Service which Air Force reservists are authorized to attend.

10.1.2. **Regular Courses**. AFSC-related courses established to meet the active force requirement which may be attended by reservists.

10.1.3. **School Term**. A tour of active duty for training to attend an authorized course of instruction or upgrade flying transition training.

10.1.4. **Specialized Courses of Other Major Commands**. Courses conducted by a major command to meet specific skill requirements.

10.2. Training Procedures:

10.2.1. Only courses conducted or administered by the USAFR or ANGUS, and courses conducted by DOD agencies specifically for the Reserves will be listed in section B of this chapter. Courses conducted by the Air Force MAJCOMs specifically for the Reserves will be listed in the respective MAJCOM course announcements. Reservists may also attend the active force courses conducted by the MAJCOMs if they meet course prerequisites.

10.2.2. AFI 36-8001, *Air Force Reserve Education and Training*, chapter 6, gives policies and procedures pertaining to school tours of active duty for training USAFR members. Procedures are included for establishing and submitting requirements, submitting applications, granting or requesting waivers, and obtaining and allocating training spaces. ANGR 53-02 pertains to ANG personnel.

10.2.3. Unless otherwise indicated, Reservists attending courses are subject to the procedures shown in chapter 1.

10.2.4. Normally, skill training is within the career ladder of the mobilization position of the individual airman or the operating or staff level of the mobilization AFSC of individual officer.

10.2.5. Reservists are not authorized training because they need it in their civilian employment. If reservists are Air Force employees who need the training for their position, advise them to apply for training space according to AFI 36-401, *Civilian Training and Development*.

10.2.6. Normally, graduates of a regular technical course may not take the same or a similar course at a later date.

10.2.7. Only officers assigned to training Category A are eligible for flying training and only those reservists who will be required to use their acquired skills are assigned positions immediately upon return to the Reserve unit.

10.2.8. The duration shown in section B includes processing time when required.

10.3. Eligibility Requirements. Eligibility to attend either regular or reserve courses is contingent upon the following:

10.3.1. Reservists meet the prerequisites for the course and eligibility requirements contained in AFI 36-8001, chapter 6, or ANGR 53-02.

10.3.2. The commander or supervisor determines the need for and establishes the school training requirement of assigned reservists.

10.3.3. For courses of 15 days or less duration, reservists must have at least 1 year remaining on their ready reserve agreement or obligation upon graduation, and at least 2 years upon graduation for courses in excess of 15 days. (See AFI 36-8001, and AFI 36-2301, *Professional Military Education*, chapter 8, for retainability requirement for professional military education resident courses.)

10.3.4. Reservists selected for training or retraining into Category A skills are authorized to attend basic technical course subject to AFRES/DPT or ANGRC/TE approval. Retraining of USAFRS personnel will be in accordance with AFRESR 39-4. Reservists who successfully complete a bypass specialty test for their training or retraining in AFSC will not be entered into the basic technical training course.

Section B—Course Announcements

Department of Air Force

MAFJAG620—Reserve Forces Judge Advocate Course—PDS Code R6E—Maxwell/1 wk—Sep 90

Provides experienced Reserve and ANG judge advocates with sufficient update information on recent developments in military law to ensure their ability to function effectively, both in their normal reserve duties and in the event of their emergency call to active duty.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from Reserve/ANG officers in grades of Capt through Col Selectees who normally have had at least a 3-year lapse since serving on extended active duty.

Quota Control: HQ USAF/JA.

MAFJAG 621—Reserve Annual Survey of the Law—PDS Code C3M—Denver/2 days—Mar 93

Provides experienced Reserve judge advocates and paralegals with most up-to-date information on recent developments in military law issues. Designed to maintain educational currency during periods between attendance at periodically required Reserve Forces Judge Advocate Course or Paralegal Reserve Refresher Course. Ensures continuity of Reserve judge advocate's and paralegal's ability to perform effectively in both normal duty and mobilization scenarios.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from Reserve judge advocates in grades of Captain through Colonel and Reserve paralegals in grades of SSgt through CMSgt. Selectees normally have had at least a 2-year lapse since serving on extended active duty.

Quota Control: HQ USAF/JA.

MAFJAG622—Air National Guard Annual Survey of the Law—PDS Code B42—Denver/3 days—Mar 93

Provides experienced ANG judge advocates and paralegals with most up-to-date information on recent developments in military law and state law issues. Designed to maintain educational currency during periods between attendance at periodically required Reserve Forces Judge Advocate Course or Paralegal Reserve Refresher Course. Ensures continuity of ANG judge advocate's and paralegal's ability to perform effectively in both normal duty and mobilization scenarios.

Prerequisites and Selection: Selection is made by the Judge Advocate General, USAF, from ANG judge advocates in grades of 1st Lt through Colonel and ANG paralegals in grades of SrA through MSgt.

Quota Control: HQ USAF/JA.

MAURF001—Air Reserve and Guard Officer Seminar (ARGOS)—PDS Code UJE—Maxwell/1 wk—Jun 93

Air National Guard and Air Force Reserve officers on the resident class of the Air War College for a 1-week period will increase their knowledge and understanding of total Air Force capabilities from resource management to current and future force employment.

Prerequisites: Lt Col through Maj General.

Special Requirements: Top Secret clearance by class start date. Must have at least 1 year of retainability.

ANG Personnel:

Announcement and Application Procedures: Class dates and quota allocations are announced once a year. To apply, submit PTI 704 through the AFTMS.

Selection Procedures: ANGRC/TE will select personnel based on equity, need, potential value, and PME attendance in the recent past. Quotas will be allocated to respective MPFs via the AFTMS. Member must not have attended within the past 3 years.

USAFR—Members are informed of PME availability through various media and publication methods. USAFR completes the required portion of AF Form 1941 and sends it to member's supervisor in the unit of assignment, MAJCOM, FOA, DRU, or ARPC single manager. The supervisor completes required portion of AF Form 1941 and forwards to HQ ARPC/DPRMT.

Quota Control: ANGRC/TE and HQ USAF/RE.

MAURF003—Total Force—PDS Code UJC—Maxwell/2 wk—Oct 95

Provides selected officers of Air Reserve and Air National Guard, Army, Navy, and Marine Reserve/Guard components an opportunity to enhance their professional knowledge by emphasizing combat and combat support operations. These officers will improve their skills through: oral communications instruments; assessment of present threat to free world security; understanding current roles, capabilities, and employment concepts of combat and combat support operations in the Armed Forces; and understanding the Air Force total force policy.

Flying time is not provided; however, this does not preclude flying in Air Reserve or ANG aircraft.

Prerequisites: Senior captain or major. No officer may take this course more than once in 2 years.

Special Requirements: Secret clearance by class start date.

Selection Procedures: According to AFI 36-8001 chapter 6.

Frequency of Classes: One per year.

ANG Personnel:

Announcement and Application Procedures: Class dates and quota allocations are announced once a year. To apply, submit PTI 704 through the AFTMS.

Selection Procedures: ANGRC/TE will allocate quotas to respective MPFs, via the AFTMS.

Quota Control: HQ USAF/REP, ANGRC/TE, HQ/DA (DAAR-TRS), ARNG/OPS ACT CTR, MC Combat Development Command (TE-33FT), USNR COMNAVRESFOR.

MLMDC001—AFRES Squadron Commanders' Course—PDS Code 1C0—Robins/1 wk—Oct 96

Prepares squadron commanders for the challenges of command, provides tools they need to meet these challenges, and enhances their abilities as squadron commanders before assuming command. Provides newly selected squadron commanders with a better understanding of how to deal with the responsibilities and resources as commanders and to enhance their effectiveness in meeting the wing's mission. Training includes areas of leadership and command, readiness and command, staff and support activities, and squadron issues.

Prerequisites: US Air Force Reserve officers who have been selected to command a squadron. Attendance is mandatory for all who assumed command of a squadron after 1 Sep 95. Training should be completed before assumption of command but not later than 6 months after assuming command.

MAFHRMS002—Reserve Forces Human Resource Management Course—PDS Code U9W—Maxwell/2 wk—Oct 96

Provides senior Reserve Forces personnel managers with a better understanding of modern management theory, human behavior and current Air Force personnel plans and programs so as to increase their effectiveness as professional personnel managers.

Prerequisites: Air Force Reserve and Air National Guard officers, major through colonel occupying key Reserve Forces personnel positions at base, major command, or Headquarters USAF level, or be programmed for such positions. Selection is made by HQ Air Force Reserve and HQ National Guard Bureau.

Special Requirements: Secret clearance by class start date.

Admin and Reporting Instructions: Reserve and Air National Guard funds are utilized to support this course, thus, disregard AU funding instructions as specified. Each student should have three copies of orders and current DD Form 2AF (Res, ID Card) in his or her possession upon reporting.

Quota Control: Air Force Reserve and ANGRC/TE.

ANG Academy

F16AOOWT—ANG Tactical Leadership Course—PDS Code V6P—Tucson IAP/2 wk—Apr 95

An advanced course designed to upgrade experienced F-16A pilots on the latest tactical information and current aircraft equipment.

Prerequisites: Mission ready in F-16A and unit flight lead qualified (4 ship).

Special Requirements: Secret clearance by class start date.

Records and Equipment Requirements: Current physiological training certificate (AF Form 702) valid for course duration, individual flight records, medical records, line badge, and personal flying equipment to include helmet, mask, and anti-G suit.

Admin Instructions: Send copy of orders to Weapons School Registrar, 162 0G/DOTR, E El Tigre Way, Tucson AZ 85706-6086, 30 days before class start date.

Reporting Instructions: Report to Weapons School Registrar, 162 0G, Bldg 44, Tucson IAP AZ, NLT 0800 on class start date.

Quota Control: ANGRC/DOT. Waiver Control: ANGRC/DO.

YAMS—Air National Guard Academy of Military Science—PDS Code 31E—McGhee Tyson ANGB/6 wk—Mar 93

Prepares the officer candidate for initial assignment as a commissioned officer in the Air National Guard. The curriculum is divided into six major subject areas: military training, professional development, communicative skills, leadership, AF/ANG, and commander's time.

Prerequisites: Applicants must be selected at unit and state level to fill a valid unit vacancy. Appointment approval is done at the National Guard Bureau and the AFPC. Applicants must be within weight requirements in AFI 48-123, *Medical Examination and Medical Standards*. Students must be physically fit to participate in all military activities such as drill.

Admin Instructions: Students should have sufficient funds to cover expenses until normal pay starts. Medical records should be hand-carried by students. Personnel records are not required. Report NET 1500 1 day before reporting date and NLT 0800 on reporting date. Orders should include the statement "Variations in itinerary authorized" to permit reimbursements for the education field trip. Students arriving by commercial air should have return TR or ticket in their possession.

Quota Control: ANGRC/TE.

ANG Non-Flying Courses

ANG Goldwing (ANG RQ-27)—Goldwing Operators Course—PDS Code 1IW—Camp Blanding/1 wk—Jan 96

Provides 27 hours of classroom instruction, 13 hours of hands-on operation, and field operations. Consists of radio theory, antenna principles, system capabilities, component identification/operation, antenna systems, power devices, cabling procedures, power-up/down, radio and modem programming, system configurations, weather communications software, Goldwing communications software (secure and nonsecure modes), HFRB reception, creating and processing bulletins, network configurations, network key disks, systems troubleshooting, data transmission to 9315TRT, and additional capabilities of the SOCA hard drive.

This instruction is accomplished using six Goldwing systems. Each system has a separate antenna which is utilized throughout the course to transmit data to other systems. The course culminates with a field training exercise (FTX) with data transmissions to other weather units outside the state of Florida.

Prerequisites: Completion of 3ABR25130 000, Weather Specialist Course.

Special Requirements: Class uniform is the BDU.

Quota and Waiver Control: ANG/XOOSW.

ANGAWDS—AWDS Operators Course—PDS Code 1PO—Camp Blanding/1 wk 1 day—Oct 96

The Automated Weather Distribution System (AWDS) course provides 50 hours of training for weather personnel in the skills and knowledge required to operate the AWDS. The scope of training consists of an overview of the AWDS system, system operation, and product printing. Hands-on computer operation instructs and exercises each student on entering weather data, displaying products, generating products, editing products, creating product loops, creating command sequences, printing products, and creating models.

Prerequisites: AFSC 15WX, 1W0X1 or equivalent.

Special Requirements: Class uniform is BDUs.

Waiver Control: ANGRC/XOOSW.

ANGRIG—Air National Guard Parachute Rigger (Cargo)—PDS Code W9R—Little Rock/3 wk—Jun 93

ANG is the prime user. Non-ANG users may apply for quotas through their respective headquarters to ANGRC/DOTE. Instruction includes heavy cargo parachute packing, containers, preparing and rigging heavy cargo for airdrop, loading, and recovery of equipment used in airdrop.

Prerequisites: AFSC 11450 or 60555 personnel assigned or projected for assignment to a mobile aerial port (MAPS), combat support branch (CMB), an aerial delivery section (AD), or any position requiring knowledge of Army procedure for preparing and rigging heavy cargo.

Special Requirements: Student will bring BDUs, steel-toed boots, rigger knife, and gloves. Class uniform is the BDU.

Reporting Instructions: Report to Bldg 133, rm 112, NLT 0730 on class start date. After hours, report to billeting, Bldg 1024.

Quota and Waiver Control: ANGRC/DOTE.

ANG JAI—Air National Guard Joint Airdrop Inspection—PDS Code W9S—Little Rock/1 wk—Jun 93

ANG is prime user. Non-ANG users may apply for quotas through their respective headquarters to ANGRC/DOTE. This course qualifies and provides certification for personnel whose duties as airdrop supervisor or aircraft loadmaster require they perform final joint inspections on equipment and supply loads to be airdropped from aircraft.

Prerequisites: AFSC A11450, 60555, or higher with a minimum of 1 year of experience in that AFSC. Must be assigned to or under orders to a unit authorized the above AFSC.

Special Requirements: Class uniform is the BDU.

Reporting Instructions: Report to Bldg 133, rm 112, NLT 0730 on class start date. After hours, report to billeting, Bldg 1024.

Quota and Waiver Control: ANGRC/DOTE.

ANGSAS—State Air Surgeon Symposium—PDS Code XRA—various locations/4 days—Apr 95

Designed for newly assigned, or projected to be assigned, Air National Guard state air surgeons (SAS). Provides initial training as to the duties and responsibilities of SASs. Completion of this course also gives the SAS delegated authority for certain physical exam functions. Includes an overview of the respective headquarters and unit operations. Emphasis is on the technical foundations and

knowledge essential to management decisions.

Prerequisites: Must be assigned to, or projected for assignment to, the position of SAS.

ANGWRC 001—ANG Weather Readiness Course—PDS Code X0A—Camp Blanding/6 wk 3 days—Sep 93

Provides ANG weather personnel the basic knowledge and skills to perform duties in the wartime environment. Focuses on the Army support mission with emphasis on realistic hands-on training culminating in a 4-day field training exercise. The students are taught practical observing skills, weather operations in the tactical environment, and weather communications utilizing current Air Force and Army technology. Also taught are Army field survival skills such as land navigation, radio procedures, camouflage and concealment, site defense, and vehicle operations. The field exercise includes mobility concepts, predeployment procedures, load planning, and movement to the field site. Using lessons learned throughout the course of instruction, students are prepared to operate effectively in a field environment. After the FTX, students are instructed in redeployment procedures. Upon completion of this course, the trainee will have the skills required to perform duties in the tactical Army environment.

Prerequisites: Completion of 3ABR25130 000, Weather Specialist Course. AFSC 25150 career development course materials to be sent to course location by home unit prior to student arrival.

Quota Control: ANGRC/TEES. Waiver Authority: ANGRC/DOSW.

YANG ACTC—ANG Air Combat Tactics Director Course—PDS Code 1NF—McConnell/2 wk—Jun 93

Provides ANG air weapons controllers with techniques and procedures employed by aircrews in air combat tactics (ACT) training. Students will control in a tactical environment using forward air control post (FACP) equipment. This course will be taught with the ANG F16 Recruit Training Unit. Graduates will be aware of FACP controlling capabilities in an air combat environment and capable of controlling two fighters involved in ACT engagement with two adversary fighters.

Prerequisites: An ANG Phase III MR weapons director.

Special Requirements: Secret clearance by start date, a current weapons controller physical IAW AFI 48-123 (formerly AFR 160-43).

Admin Instructions: Organizations mail copy of orders to: 134 ACS/CC, 52850 Jayhawk Drive, McConnell AFB KS 67221-9007. Orders must reach McConnell AFB 30 days before class start date.

Reporting Instructions: Students will report to 134 ACS, Bldg 52, McConnell AFB KS, NLT 0800 on class start date.

Quota Control: ANGRC/TE. Waiver Control: NGB/DC.

YANG AWDF—ANG Air Weapons Director Fundamentals—PDS Code 1SE—McConnell/3.5 wk—Jun 93

Trains ANG officers who will perform duties as entry level air weapons controllers at manual forward air control posts (FACP). Training will be in manual operations emphasizing a tactical FACP environment, includes academics, and positional training designed to qualify graduates in tactical intercepts, refueling, and air-to-surface missions. Training includes live events and simulated F16 aircrew missions.

Prerequisites: Graduate of AETC course E3OBP1741X 001. Student must have an end assignment at an ANG FACP, CRP, or CRC.

Special Requirements: Secret clearance by class start date. Students must hand-carry current weapons controller physical.

Admin Instructions: Organizations mail copy of orders to 134 ACS, 52850 Jayhawk Drive, McConnell AFB KS 67221-9007. Orders must reach McConnell AFB 30 days before class date.

Reporting Instructions: Students will report to 134 ACS, McConnell AFB KS, NLT 0800 on class start date.

Quota Control: ANGRC/TE. Waiver Control: NGB/DC.

YANG FSUT—ANG Flight Surgeon Upgrade Training Course (Top Knife)—PDS Code XN5—Kingsley Field/2 wk—Mar 94

Provides post-graduate training in the unique aeromedical aspects of fighter aviation to qualified flight surgeons. It is the only course in the world which will combine fighter aviation specific medical academics and flight surgeon flight training in the air defense F-16 fighter. At the end of the course, the successful graduate will have a thorough comprehension of the medical, physiologic, and unit aspects of flying high performance fighter aircraft in the aerial combat environment. Continuing medical education (CME) Category I credit will be awarded by the Oregon Health Sciences University.

Prerequisites: For funded quotas, the applicant must be a qualified physician (MD or DO) in the Air National Guard. Unfunded quotas may be used by other Department of Defense (DOD) qualified physicians. Applicants must be qualified flight surgeons since they must function as the unit Flight Surgeon (patient care).

Admin Instructions: The applicant must have completed the formal application including: (1) last 12 months of flying hours, (2) AF Form 702, **Physiological Training Record**, (3) AF Form 1042, (4) SF 88 and SF 93, **Current Flying Physical Examination**, (5) centrifuge training, (6) medical commander and air commander endorsement, (7) MAJCOM SGPA or equivalent approval and prioritization for non-ANG applicants, and (8) TDY credentials package.

Reporting Instructions: Prior coordination with course coordinator for complete reporting instructions or waiver of requirements is mandatory.

Course Coordinator: ANGRC/SGXT.

YANG ODTP—ANG Operational Dental Training Program (Top Drill)—PDS Code 326—Kingsley Field/2 wk—Apr 95

Provides post-graduate training in the unique aeromedical aspects of fighter aviation to qualified dentists. It combines fighter aviation specific medical academics and aerospace dental training in the F-16 fighter. The successful graduate will have a thorough comprehension of dental and physiologic aspects of flying high performance fighter aircraft in the aerial combat environment. Continuing Medical Education (CME) Category I credit will be awarded by the United States Air Force Academy.

Quota Control: ANGRC/SGXT.

YPMEC ABFSA—Advanced Banyan File Server Administrator—PDS Code 30N—McGhee Tyson ANGB/1 wk—Oct 96

For personnel assigned as file server administrators or file server maintenance personnel. Course includes lectures, demonstrations, and practical applications in the setup, maintenance, management of the use of the system, and user assistance. Also covers techniques for

better using the LAN system and provide advanced capabilities to the LAN user. Advanced Banyan file server training is required for the file server administrator.

Prerequisites: BFSA course or a minimum of 2 years performing file server administrator duties.

Quota Control: ANGRC/MPT

YPMEC ANGOAI—ANG Office Automation—PDS Code 30P—McGhee Tyson ANGB/1 wk—Oct 96

Designed for individuals with little or no experience with the Air National Guard's automation platform. Includes lectures, demonstrations, and hands-on application in the use of Windows and Microsoft application software (Word, Excel, Access, and Powerpoint for Windows). This phase includes creating documents in approved ANG formats and managing files using Windows file manager.

Quota Control: ANGRC/MPT

YPMEC APC—Advanced PC/LAN Maintenance—PDS Code 300—McGhee Tyson ANGB/1 wk—Oct 96

Provides members of the Air National Guard with the advanced skills required to troubleshoot, maintain, and repair personal computers, peripherals, and LANs located throughout the Air National Guard.

Prerequisites: YPMEC BPC, Basic PC Maintenance, or 3 years personal computer maintenance experience. Experience with LANs desirable.

Quota Control: ANGRC/MPT

YPMEC ASAP—Aerospace Safety Automated Program—PDS Code 30Q—McGhee Tyson ANGB/3 days—Oct 96

Designed for members of the safety function tasked with the management of mishap reporting. Includes instruction in the use of ASAP software and reporting, tracking, and monitoring Air Force safety issues.

Quota Control: ANGRC/MPT

YPMEC BPC—Basic PC Maintenance—PDS Code 30R—McGhee Tyson ANGB/3 days—Oct 96

Serves as the entry-level training in personal computer and peripheral maintenance. Provides assigned Air National Guard members with the skills required to maintain and repair personal computers and peripherals.

Prerequisites: Minimum 1-year experience in ANG communications/computer systems and a good working knowledge of disk operating systems (DOS).

YPMEC DLFIC—Distance Learning Field Instructor Course—PDS Code XAN—McGhee Tyson ANGB/2 wk—Jun 94

Offers NCOA seminar program instructors an understanding of the educational and learning process. It provides NCOA curriculum familiarization and develops the teaching skills specific to delivering the curriculum.

Prerequisites: This is a required course for those NCOA seminar instructors desiring instructor certification. Potential instructors must be an NCO, a graduate of any in-resident NCOA, must have an associate's degree from any accredited institution, and be recommended by their commander through ANGRC channels.

Quota Control: ANGRC/TE.

YPMEC EMT—Emergency Medical Technician—PDS Code WBJ—McGhee Tyson ANGB/3 wk—Jun 93

Covers all emergency medical techniques currently considered to be within the scope and responsibility of the basic EMT providing emergency care within DOD and Air Force emergency medical services. Consists of 33 lessons involving 110 hours of classroom and field training. Upon successful completion of this course, students are qualified to sit for the National Registry of Emergency Medical Technicians (NREMT) certifying examination. This course satisfies the Air Force basic EMT requirements defined by DODD66000.10 and HQ USAF implementation of DODD6000.10.

Prerequisites: Qualification as a medical service specialist or technician (902X0) is mandatory. Previous experience in emergency medical services (ANG or civilian) is desirable. It is requested that all ANG medical units provide this initial training to their personnel assigned to emergency medical services. Additional 902X0 personnel should be trained as an adjunct once the primary personnel receive this basic EMT training. A copy of the member's UMD along with a letter from the chief nurse stating recommendation and statement of qualifications must be submitted to ANGRC/SGN for final approval.

Quota Control: ANGRC/TE.

YPMEC EMTR—Emergency Medical Technician Refresher Course—PDS Code XDF—McGhee-Tyson ANGB/1 wk—Dec 93

Course is a consolidated revisit of the basic EMT course program of instruction (POI). Covers medical techniques that are common to all practicing basic EMTs. Instructors will use the Department of Transportation (DOT) and the National Highway Traffic Safety Administration (NHTSA) national standard refresher curriculum. This instruction refreshes knowledge and reinforces skills essential for the basic EMT. Satisfactory completion of this course meets criteria of section I of the registration requirements set forth by the National Registry.

Prerequisites: Certification as a nationally registered emergency medical technician (active status) is mandatory. A copy of the certification card must be submitted to ANGRC/SGN for approval to attend this course.

YPMEC ESA—Explosive Safety Advanced Course—PDS Code WBK—McGhee Tyson ANGB/1 wk—Jun 93

Provides ANG personnel assigned duties with responsibilities for explosive safety guidance in developing a site plan, mishap investigation, determining quantity distance, inspection criteria, explosives compatibility and application according to air directives.

Prerequisites: Assigned as the full-time occupational safety and health manager, explosive safety officer/NCO, engineer or draftsman, or additional duty explosives safety personnel. Must have completed the USAF explosives safety course or the ANG explosives safety orientation course.

Quota Control: ANGRC/TE.

YPMEC ESO—Explosive Safety Orientation—PDS Code WBL—McGhee Tyson ANGB/1 wk—Jun 93

Provides ANG personnel assigned duties with responsibilities for explosive safety, guidance in developing a site plan, mishap investigation, determining quantity distance, inspection criteria, explosive compatibility and application according to air directives.

Prerequisites: Assigned as the full-time occupational safety and health manager, explosive safety officer/NCO, engineer or draftsman,

or additional duty explosives safety personnel.

Quota Control: ANGRC/TE.

YPMEC FM—Food Services Course—PDS Code WAX—McGhee Tyson ANGB/1 wk—Jun 93

Provides ANG food services managers and supervisors a working knowledge of management and auditing procedures necessary to operate an ANG dining facility.

Prerequisites: Must possess the 623X0 or 62XX AFSC in a management or supervisory dining facility.

Quota Control: ANGRC/TE.

YPMEC FMACCTG—ANG Accounting (Reports) Course—PDS Code WLM—McGhee Tyson ANGB/1 wk—Oct 95

Provides ANG financial management personnel with the knowledge and procedures required to perform base-level accounting transactions along with financial reporting in an accurate and timely manner. Building and correcting data base records, posting to data base records, civilian pay and materiel interfacing, MAFR processing, MAFR reconciliations, 7113 report, DBT report, flash report of obligations, Prompt Payment Act, and general ledger trial balance are some of the areas covered.

Prerequisites: Individuals assigned duties related to ANG accounting. Recommend 6 months of experience.

Special Requirements: Bring the following to class for exercises: address directory, open document listing (option 1), operating budget ledger, allotment ledger, five AFFMs 1730, five AFFMs 1530, *M03 (option 6), hand-held calculator, all ESPs (batch process or alternate to remote reject/pass list), daily appropriation summary listings (16Ps). All listings and 16Ps should reflect same dates and interfaces. Students reporting to class without the above-mentioned documentation will be returned to home unit.

Quota Control: ANGRC/TE.

YPMEC FMAIOS—ANG Financial Management Advanced Instructor Seminar—PDS Code 6FE—McGhee Tyson ANGB/1 wk—Oct 95

Provides ANG financial management personnel who have expertise in FM functional areas the tools, techniques, knowledge, and training methods necessary to improve, develop, and add new forms of instruction to the teaching of ANG-unique financial management functional area courses.

Prerequisites: Student participation will be approved by ANGRC/FMP.

Quota Control: ANGRC/TE.

YPMEC FMBUDGET—ANG Budget—PDS Code X35—McGhee Tyson ANGB/1 wk—Oct 95

Provides knowledge to apply base-level ANG budget procedures necessary in the ANG budget process. Topics covered are RMS, ANGR 172-01, ANG budget cycle, initial financial management meeting, ANG financial guidance, data element codes, midyear review, financial plan and midyear review, fiscal year closeout, funds control, managing specific FM programs and exercises (AVFuel, DLR, civilian pay, military construction, investment equipment), FM tools (Microbas, ARMS, D26/RSD, AFOLDS/QLP, FM bulletin board, management of products, and LAN)..

Prerequisites: Individual assigned duties related to ANG budget processing. Recommend 1 year of financial management experience.

YPMEC FMCIVPAY—ANG Civilian Pay—PDS Code WLP—McGhee Tyson ANGB/1 wk—Oct 95

Provides DoD Civilian Pay System (DCPS) and DoD 7000.14-R, volume 8, *Financial Management Regulation, Civilian Pay Policy and Procedures*, overview. Additionally, will provide policy and procedural instruction regarding AFSCAPS-to-DCPS conversion requirements and a hands-on session pertaining to reconciliations of 2812/MAFR and the TSP. The 1092/manpower and funding report responsibilities pertaining to DCPS will be reviewed. Students are required to bring their unit's out-of-balance 2812/MAFR and TSP reconciliation listings and the DoD 70001.14-R, volume 8, for the reconciliation working session.

Prerequisites: Individuals assigned ANG civilian pay related duties. Recommend 6 months of experience. Those students reporting to class without the above-mentioned student requirement or documentation will be returned to home unit.

Quota Control: ANGRC/TE.

YPMEC FMFMO—ANG Financial Management Orientation Course—PDS Code 6GM—McGhee Tyson ANGB/1 wk—Oct 95

Provides an overview of financial management policies, procedures, and systems within the Air National Guard and Army National Guard, and the parallelism of both systems for newly assigned financial managers, comptrollers, commanders and United States property and fiscal officers (USPFO). Topics will primarily focus on organization and function of the base financial management office, resource management system, regulatory responsibilities, key base financial management indicators, audit procedures, internal management control program, financial reporting within the ANG, ANG civilian pay operations, nonappropriated funds, workday program control, mobilization requirements, training, and quality Air Force.

Prerequisites: Recommend 6 months of financial management experience. Must be assigned as financial manager, comptroller, commander, or United States property and fiscal officer (USPFO) or assistant USPFO.

Quota Control: ANGRC/TE.

YPMEC FMMILPAY—ANG Military Pay Course—PDS Code WLN—McGhee Tyson ANGB/1 wk—Oct 95

Provides ANG financial management military pay personnel knowledge and procedural instruction required to process military payroll. Allowances, active duty processing, inactive duty processing, DJMS-AC, hands-on IMPS computer lab, and DFAS-DE processing are areas included in training.

Prerequisites: Individuals tasked with military pay responsibilities and assigned to financial management office. Recommend 6 months of experience.

Quota Control: ANGRC/TE.

YPMEC FMTVL—ANG Travel (Entitlements and Accounting) Course—PDS Code WLQ—McGhee Tyson ANGB/1 wk—Oct 95

Provides an overview for ANG financial management personnel on travel and per diem travel entitlements which accrue when performing duty in different status, such as annual training, school or special training, AGR, inactive duty, air technician, and PCS. Introduces students to follow-up procedures required for outstanding

advance payments and obligations and accounting and MAFR procedures unique to the Air National Guard. This course provides students with the Integrated Automated Travel System (IATS) procedures.

Prerequisites: Individuals assigned ANG travel-related duties. Recommend 6 months of experience.

Special Requirements: Bring a hand-held calculator for class exercises.

Quota Control: ANGRC/TE.

YPMEC GSO—Ground Safety Orientation—PDS Code WBM—McGhee Tyson ANGB/1 wk—Jun 93

Provides ANG personnel assigned duties with responsibilities for ground safety, instruction in developing a safety program, doing mishap investigations, and developing a mishap prevention program according to air directives.

Prerequisites: Must be assigned safety as an additional duty or have not attended the Air Force 3-skill level course if assigned as the full-time occupational safety and health manager. Course is designed for supervisors and collateral duty safety personnel. Other personnel must be approved by ANGRC/SEEG.

Quota Control: ANGRC/TE.

YPMEC IOS—Instructor Orientation Course—PDS Code WB0—McGhee Tyson ANGB/1 wk—Jun 93

Provides an intense course of study on educational theory and proper instructional techniques. Targeted to subject matter experts who will be called on to teach courses short in duration.

Prerequisites: None, but it is desirable that personnel attending this course be in some instructional capacity.

Quota Control: ANGRC/TE.

YPMEC LDC—Leadership Development Course—PDS Code WB2—McGhee Tyson ANGB/1 wk—Jun 93

Provides an environment to increase participant self knowledge and confidence, recognizing the primary "tool" of leadership as the leader, and identifies how a leader can only be effective to the extent he or she understands this tool and its impact on followers, peers, and supervisors. Provides students a better understanding of themselves and how their behavior impacts on others.

Prerequisites: Military grades E-5 to O-5, assigned to civil engineering, fire protection, or services function, civilians supporting a CE function, and recommendation of commander.

Quota Control: ANGRC/TE.

YPMEC PFMC—Personnel Force Management Course—PDS Code WB3—McGhee Tyson ANGB/1 wk—Jun 93

Provides unit commanders with human resources planning procedures to meet personnel management challenges. Provides practical guidance in managing and maintaining personnel required to meet mission tasking. Each participant will be provided organization specific personnel (human resource) analysis resulting in a unit force management plan for current and future needs.

Prerequisites: Must be a unit commander or personnel director at any level. Recommended for key managers responsible for personnel planning.

Quota Control: ANGRC/TE.

YPMEC PERSCO—MANPER-B Deployed Training—PDS Code 30S—McGhee Tyson ANGB/1 wk—Oct 96

Designed for personnel designated as primary or alternate PERSCO team members to provide them the knowledge and skills necessary to perform personnel functions in a deployed situation. Includes lectures, demonstrations, and scenario exercises for manual and automated files on the COMPES MANPER-B system.

Prerequisites: Students are required to bring three blank 3.5-inch high-density floppy disks formatted on the CPCS machine, AFI 10-215, training records, and AFI 36-3002. Uniform is BDUs.

Quota Control: ANGRC/MPT

YPMEC PM—Pest Management Course—PDS Code WB4—McGhee Tyson ANGB/4 days—Jun 93

Provides pest management personnel with the latest changes in regulations, legislation, equipment, products, and safety procedures. This course is a formal training opportunity midway between mandatory every 3 year recertification school.

Prerequisites: Must be a pest management specialist assigned to a civil engineering and services unit, state employee dealing with pesticides as part of job description, or a mobility contingency operator. States must fund attendance by state employees through the O&M cooperative agreement. State employees register by letter directly to NGB/DEUS with required information and must include funding statement. Personnel not in the above categories can be approved on a space-available basis only, funded by the state.

Quota Control: ANGRC/TE.

YPMEC PR—Prime RIBS Course—PDS Code WB5—McGhee Tyson ANGB/1 wk—Jun 93

Provides the full-time personnel assigned to the services and food services career fields with a complete understanding of the duties and responsibilities of their position. Conducted concurrently with the civil engineering readiness management technician course, and some instructions blocks will be together. Ideally, the civil engineering and Prime RIBS technicians from the same base should attend their respective courses at the same time to promote mutual understanding and cooperation in their related positions.

Prerequisites: Must be assigned militarily as a service technician or Prime RIBS OIC/NCO.

Quota Control: ANGRC/TE.

YPMEC REAW—Recruiting Enhancement and Advertising—PDS Code WB6—McGhee Tyson ANGB/4 days—Jun 93

Provides ANG recruiters with additional information needed to enhance recruiting skills and provides instruction in planning advertising strategies and the development of effective program execution. Course curriculum will require student presentations on their advertising programs.

Prerequisites: Must have been working as an ANG recruiter for at least 1 year.

Quota Control: ANGRC/TE.

YPMEC RT—Retention Course—PDS Code 3QG—McGhee Tyson ANGB/1 wk—Jun 93

Provides hands-on instruction in the automation of the career and education manager's office. Provides training to include planning, organizing, and directing the base retention program.

Prerequisites: Must be a career and education manager, CEM selectee, or CEM assistant.

Quota Control: ANGRC/TE.

YPMEC SFCOC—Squadron/Flight Commander's Course—PDS Code WBA—McGhee Tyson ANGB/1 wk—Jun 93

Provides newly assigned ANG commanders a knowledge of the major influences bearing on the Air National Guard the ANG position on major issues. Provides a forum to discuss base level leadership and management issues of critical command interest.

Prerequisites: Designed for commanders who have been appointed to their first command position within the past 2 years or are projected to assume command within 6 months.

Quota Control: ANGRC/TE.

YPMEC SM—Security Manager's Course—PDS Code WBB—McGhee Tyson ANGB/1 wk—Jun 93

Instructs ANG personnel assigned duties and responsibilities to implement DOD 5200.IR/AFI 31-401, *Information Security Program Management*, and AFI 31-501, *Personnel Security Program Management*. Provides advice and assistance to the commander and personnel assigned to activity regarding matters pertaining to information security. Advises commander and serviced personnel on matters pertaining to security clearance eligibility, access to classified information, establishing special security files, continuing security evaluation, and security evaluation. Develops internal security operating instructions. Conducts annual program review of unit and subordinate units. Establishes a training program for newly assigned unit security managers. Establishes and maintains current personnel security program for unit or subordinate units. Formulates and manages a unit security education program.

Prerequisites: Must be assigned as primary or alternate unit security manager or additional duty to manage the unit information or personnel security program.

Quota Control: ANGRC/TE.

YPMEC TMC—Training Manager's Course—PDS Code WBE—McGhee Tyson ANGB/1 wk—Oct 95

Trains training managers in the theory and use of instructional systems development as it applies to the OJT program.

Prerequisites: Must be assigned to the base training office or a consolidated training office for priority. Those assigned as unit training managers or additional duty training managers may attend on a space-available basis. Personnel who attended the current J3ALR3S231 000, Education and Training Apprentice Course, are not eligible to attend.

Quota Control: ANGRC/TE.

YPMEC UCA—Unit Career Advisor—PDS Code WBF—McGhee Tyson ANGB/3 days—Jun 93

Provides instruction on responsibilities of the unit career advisor. Curriculum provides guidance in conducting career information briefings, identification of benefits and entitlements and assisting commanders and supervisors in the use of interviews to promote career motivation.

Prerequisites: Must be a unit career advisor (UCA), primary or alternate, UCA selectee, or director of personnel, RRPM.

Quota Control: ANGRC/TE.

YPMEC VIM—Visual Information Managers—PDS Code WBG—McGhee Tyson ANGB/4 days—Jun 93

Provides the necessary background and training in the management of a visual information support center, in support of bases, wing or group supported units, geographically separated units, and other DOD activities.

Prerequisites: Mandatory for full-time VI personnel and is recommended for 231XXX personnel in 7-skill level training. Personnel in 5-skill level training should be provided the opportunity to attend on the recommendation or approval of the installation manager. It is strongly recommended for the mission support flight commander and the mission support commander. It provides an in-depth understanding of the VI support center, its problems, and some possible solutions.

Quota Control: ANGRC/TE.

USAFR First Sergeant Academy

RES 10090—USAFR First Sergeant Academy—PDS Code RQS—Robins/2 wk/AFSC 8F000—Jan 96

The instructional design for this course is group-paced. The course trains selected NCOs to perform duties prescribed in AFMAN 36-2108, *Airman Classification*, as first sergeants, AFSC 8F000. Training includes responsibilities, interpersonal relations, counseling, base referral agencies, orientation and guidance of newly assigned personnel, unit administration management, facilities management, resources management, dependent care, morale, welfare, and recreation, quality force management, military justice, mobilization, participation, and employer support for USAFR personnel. Also provides other military training and safety briefings.

Prerequisites: Must be a MSgt or above, have an approved retraining request for entry into AFSC 8F000 according to AFI 36-2113, *First Sergeants*, and AFMAN 36-2108, or possess SDI 99607 and be assigned as a medical first sergeant.

Special Requirements: Bring the following uniforms and other clothing with you for academy activities: service dress, service uniforms with authorized ribbons, and flight cap (for men and women). All uniforms must conform to AFI 36-2903, *Dress and Personal Appearance of Personnel*, standards.

Admin Instructions: Students will be attached to 951 RSPTS, Robins AFB GA, and must inprocess through the orderly room, HQ AFRES, Bldg 210, not later than the first duty day after arrival. TDY members must be in compliance with AFI 36-2903 and AFI 40-502, *Air Force Weight Management Program*, as supplemented, and the guidelines set forth by the commander. Overweight or overfat students will be immediately returned to their home units at the unit's expense. Class sign-in will be conducted the first day of class at the AFRES Professional Development Center, Bldg 10241, at 0700. The orders issuing agency will send a copy of TDY orders to 951 RSPTS/CC.

Quota Control: HQ AFRES/DPTF.

USAFR Non-Flying Courses

RES 605X5—AFRES Transportation Proficiency Training—PDS Code 71A—Dobbins/2 wk 2 days—Sep 93

Provides hands-on training, reinforced with classroom instruction for personnel. Includes training in the following subjects: documentation, MILSTAMP, TCMD, Air Terminal Operation Center (ATOC), cargo acceptance/storage procedures, pallet buildup, load pulling, tiedown and restraint, load shoring, passenger service,

hazardous material handling, aircraft loading, and vehicle safety. Initial operators training (operations/inspections) is given on the following material handling equipment (MHE): 4-10K Forklift (STD), 10K Forklift adverse terrain (AT), 25/40K aircraft loader.

Prerequisites: Personnel retraining into AFSC 605X5 or personnel with AFSC 60535 with less than 15 months in the career field.

Special Requirements: BDUs, work gloves, safety-toed shoes, inclement weather clothing, and ear protectors. Current valid state driver's license or AF Form 2293 required.

Quotas: Twenty-two students per class. (Fourth and Fourteenth Air Force/LGT will each furnish 10 students per class. The Air National Guard will furnish two per class.)

Quota Control: AFRES Transportation Proficiency Center, OLEX 2400 RRMS/TPC, Dobbins ARB GA 30096-5000.

Air Force Officer Orientation Course
(see chapter 4)
Armed Forces Staff College

AURF005—Joint Planning Course for Reserve Officers—PDS Code ZG6—Norfolk VA/2 wk 3 days—Sep 89

In addition to treating the military factors affecting the formulation, adoption, and implementation of the national strategy of the United States, this course is designed to provide an appreciation of the factors involved in joint military education at the graduate level.

Prerequisites: Major or lieutenant colonel. They must be of superior caliber with wide experience, active in their reserve organization, and influential in their communities. An officer who previously attended AFSC in residence is not eligible for ROO.

Special Requirements: Secret clearance. Send security information to the Armed Forces Staff College, Norfolk VA 23511, by class start date.

Quota Control: HQ USAF/DPP.

Special Investigations School

Reserve Special Investigations and Counterintelligence Training Course (RES-82XX/821X0)—PDS Code TAG—-Washington*/2 wk 2 days—Mar 76

Investigative training for officer and airmen mobilization augmentees of the Office of Special Investigations (OSI). Courses include instruction in Air Force and OSI organization, jurisdiction and policy, civil and military law, theory and application of investigative techniques, report writing, technical equipment and scientific aids used in investigations, processing and preservation of physical evidence.

Prerequisites: OSI mobilization augmentee (82XX/821X0). Badge and credentials. Other as determined by HQ AFOSI/DPR and USAFSIS.

Special Requirements: Favorable background investigation and Secret clearance by class start date.

Unit of assignment: HQ AFOSI.

Quota Control: USAFSIS.

*USAF Special Investigations School.

Department of Army

Post Graduation Short Medical and Dental Course—various locations and durations—Jul 70

Announced from time to time by the Department of Army.

Prerequisites: Included in announcements.

Quota Control: HQ AFRES.

Department of Defense
Defense Intelligence School

5ORD8054—Reserve Symposium on Strategic Intelligence—PDS Code MYR—US Naval Station, Anacostia Annex, Washington DC/2 wk—Jun 73

Provides commissioned officers of the reserve components with refresher training in, or an appreciation of, current concepts, methods, and the content of the strategic intelligence process.

Prerequisites: Commissioned officers in grade of O3 or higher who serve in a DOD reserve component whose actual or anticipated assignments are to intelligence functions requiring a knowledge of strategic intelligence.

Special Requirements: Top Secret clearance by class start date.

Admin Instructions: Normal application procedures via reserve component apply. For Air Force officers, the orders issuing agency forwards one copy of assignment orders to Lowry Technical Training Center (Attn: MPF-SE).

Reporting Instructions: Students should report to Register, Defense Intelligence School, US Naval Station, Anacostia Annex (Bldg T-5), Washington DC, at 0800 on class start date.

Quota Control: HQ AETC.

National Defense University

RCNSC ANG—Reserve Components National Security Course—PDS Code ZG5—selected locations/2 wk—Apr 96

The primary objective of the Reserve Components National Security course is the education of Reserve officers. The seminar seeks to enable conferees to contribute more effectively to national security in military assignments or civilian positions and activities. The seminars are to increase understanding of all aspects of national security affairs, including national and international problems and the management of resources; to familiarize participants with scientific and technological developments affecting national security; and to motivate participants to build on this foundation by individual study.

Prerequisites: ANG officers in grades Lt Col and above, USAFR officers in grades Lt Col (Sel) and above who have not attended a national security or defense strategy seminar within the last 3 fiscal years and who are otherwise eligible to participate in point gaining activities. Reservists are authorized to attend in AT status subject to their commander's approval. Attendees at each seminar may attend in school tour status, annual tour or points only status. Regular and Reserve officers on extended active duty in the local area of a seminar are authorized to attend these seminars subject to approval of their commander and the seminar administrator. ANG officers will attend in school tour (military) status only.

Active Duty Military Personnel: Regular and reserve officers on extended active duty in the local area of a seminar are authorized to attend these seminars subject to approval of their commander and the seminar administrator.

ANG Personnel:

Announcement and Application Procedures: Class dates, locations, and quota allocations are announced once a year. To apply, submit

PTI 704 through the AFTMS.

Selection Procedures: ANGRC/MPT will allocate quotas to respective MPFs, via the AFTMS.

USAFR Personnel:

Announcement and Application Procedures: Class dates, locations, and quota allocations are announced by HQ AFRES (for unit personnel) and ARPC (for IMAs). Unit personnel apply through the unit DPMAT, who in turn, submits a PTI 704 to HQ AFRES/DPTS. IMAs apply through their MAJCOMs to ARPC/DRMPS.

Quota Control: HQ AFRES/DPTS; ANGRC/MPT.

Flying Training

AATTC—Advanced Airlift Tactics Training Course—PDS Code 6S4—Rosecrans/1 wk 4 days/MASL D116128—Oct 96

Provides advanced tactics training for MR C-130 crews in combat/hostile environment mission planning and flying. Training includes low-level navigation training, threat analyses, heavy equipment and CDS airdrops, assault landings, aircraft maneuvering, and low altitude awareness training. Flying hours: 22.

Prerequisites: Qualified and current mission ready in unit assigned aircraft. Students are trained as a crew in their unit assigned aircraft. ECL 80 SA.

Special Requirements: Secret clearance by class start date.

Records and Equipment Requirements: Crews to arrive in unit assigned aircraft. Personal flying equipment to include helmet and mask. Comply with AMCR 55-130, *C-120 Operations*, for required airdrop equipment to support heavy equipment and CDS airdrops. Provide 10 yards of extra 550 cord per aircraft.

Admin Instructions: Send copy of orders to School Secretary, AATTC, Pony Express Station, Box 3247, St Joseph MO 64503-3247,15 days prior to class start date.

Reporting Instructions: Students report to Rosecrans MAP NLT 1200 local on class start date. Forward message to AATTC Rosecrans MAP MO giving arrival time.

Frequency of Classes: Approximately three per month.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

AATTC PIC—Practical Intelligence Course—PDS Code 95D—Rosecrans MAP/2 wk 1 day—Apr 95

Provides instruction on the practical application of intelligence. This course is developed for the intelligence community and is intended as a training program for the practical application of intelligence in military airlift operations. This course will be directed toward, but not restricted to, intelligence personnel who have been in the field for approximately 1 year. Course's intent is to expand upon the present abilities of the intelligence personnel and bridge the gaps between operations, tactics, and intelligence. The intelligence class will be assigned to an aircrew class and will be the aircrew's intelligence support. This will include, but not be limited to, briefing, debriefing, and report writing. Intelligence personnel will have the opportunity to fly with the aircrew and participate in the operations, tactics, and intelligence interface.

Special Requirements: Secret clearance.

Admin Instructions: Send copy of orders to AATTC PIC Secretary, 705 Memorial Drive, St Joseph MO 64503-9307, 15 days before class start date.

Reporting Instructions: Send message to AATTC Rosecrans Memorial Airport MO//PIC//IN// or call PIC secretary at DSN 956-3512 with arrival information. Students report to Rosecrans MAP MO NLT 1800, 1 day before class date. Further proceed to Sierra Vista AS by military aircraft.

Quota Control: ANGRC/TET; Waiver Authority: ANGRC/DOT.

ANG11000 003—ANG Military Freefall HGRP—PDS Code PFH—Sunnyvale CA/2 wk—Mar 93

Trains and qualifies officers and airmen whose duty assignment requires military freefall HALO parachuting using the High Glide Ratio Parachute (HGRP). The course uses the accelerated freefall (AFF) technique that provides in-the-air instruction focusing on student freefall stability, aerial maneuvers, air sense, and practice parachute opening procedures. Each student receives a minimum of 12 HGRP freefall jumps, including 2 day and 2 night jumps with oxygen equipment and field gear. Command/service-qualified jumpmasters receive jumpmaster training.

Prerequisites: Must be a graduate of an approved military parachutist course; have a current Class III flight physical; and have completed physiological training in the last 3 years. Applicant must be assigned to a unit detail listing (UDL) position that requires active jump status or be attached to another US military unit requiring active HGRP parachute duty.

Admin Instructions: Students report 1 day before class start date. Electronic messages will be sent to candidates concerning specific reporting instructions and appropriate required equipment.

Quota Control: ANGRC/DOT.

ANGBFE—ANG Basic Flight Engineer Course—PDS Code 31K—DOD 050—Little Rock/7 wk 1 day/AFSC A11330C—Oct 96

This is a 3-level AFSC awarding course for AFSC A113X0C, Flight Engineer. Course is oriented to C-130 users. Course is taught by the 189 TAG. ANG is prime user. Non-ANG users may apply for quotas through their respective headquarters to ANGRC/DOT, DSN 858-8333. Course of instruction includes aerodynamics factors of C-130 performance take off and landing data, cruise control fuel consumption factors, performance limitations, flight log maintenance, TOs, regs and forms, weight and balance, flight condition analysis, flight operations, and airmanship. Initial physiological training will be scheduled with this course.

Prerequisites: A complete health record including a current flying class III physical and AF Form 1042, Medical Recommendation for Flying Duty. Specialty qualifications listed in AFMAN 36-2108 (formerly AFR 39-1) specialty description. Secret clearance applied for by class start date. ECL 70.

Special Requirements: SF 88 must be accomplished per AFI 48-123 and certified by ANGRC/SG, HQ AFRES/SG, and HQ MAC/SGPA, for ANG, AFRES, or MAC students, respectively. The SF 88 and AF Form 1042 must be valid through the course training period. ANG students will bring all clothing items and professional equipment to support all follow-on training according to AFCAT 36-2223 course descriptions. Bring hand-held calculator. Class uniform is short/long sleeve light blue shirt combination and flight suit, or BDUs. Aviation badge will be awarded upon completion of the course.

Reporting Instructions: Report to Bldg 137, rm 124, NLT 0730 on class start date. Students who report after duty hours will check in at billeting, Bldg 1024. Duty phone at 189 TAG is DSN 731-3578 or (501) 988-3578.

Quota and Waiver Control: ANGRC/DOT.

ANGBLM—ANG Basic Loadmaster Course—PDS Code JNS—Little Rock/5 wk 1 day/AFSC A11430—Mar 93

This is a 3-level AFSC awarding course for AFSC A114X0, Aircraft Loadmaster. Course is oriented to C-130 users. Course is taught by the 189 TAG. ANG is prime user. Non-ANG users may apply for quotas through their respective headquarters to ANGRC/DOT, DSN 858-8333. Course of instruction includes C-130 weight and balance computation, TOs, regulations and forms, load planning and cargo loading, safety and emergency procedures, hazardous materials handling, dual rail systems, winching, initial scanner duties, flight and aerial port operations, and airmanship. Initial physiological training is also included in this course.

Prerequisites: A complete health record including a current flying class III physical and AF Form 1042, Medical Recommendation for Flying Duty. Specialty qualifications listed in AFMAN 36-2108 specialty description. Secret clearance applied for by class start date. ECL 70.

Special Requirements: SF 88 must be accomplished per AFI 48-123 and certified by ANGRC/SG, and AF Form 1042 must be valid through the course training period. ANG students will bring all clothing items and professional equipment to support all follow-on training according to AFCAT 36-2223 course descriptions. Bring hand-held calculator. Class uniform is short/long sleeve light blue shirt combination. Aviation badge will be awarded upon course completion.

Reporting Instructions: Report to Bldg 137, rm 124, NLT 0730 on class start date. Students who report after duty hours will check in at Billeting, Bldg 1024. Duty phone at 189 TAG is DSN 731-7961 or commercial 501-988-7961. Duty phone at 189 AG/BAS is DSN 731-3578 or commercial 501-988-3578.

Quota and Waiver Control: ANGRC/DOT.

ANGBLM/USCG—Basic Loadmaster (Non-Air Force Users)—PDS Code V99—Little Rock/3 wk 3 days—Mar 93

A 3-level course for non-Air Force users (USCG, USN, USMC, etc). Oriented to C-130 users. Course is taught by the 189 AG, loated at Little Rock AFB. Users may apply for quotas through their respective headquarters to ANGRC/DOT, DSN 858-8333. Course includes weight and balance computations, load adjuster, load planning, TOs, regulations and forms, cargo loading aids, safety and emergency procedures, hazardous material handlings, dual rail system, winching procedures, and cargo loading.

Prerequisites: Selected by command or service for duty as aircrew member.

Special Requirements: Bring hand-held calculator. Air Force physiological training may be accomplished if requested in advance. Class uniform will be the equivalent to the Air Force short/long sleeve light blue shirt combination. Bring all required clothing for classroom and flight line instruction.

Reporting Instructions: Report to Bldg 137, rm 124, no later than 0730 on class start date. After hours, report to Billeting, Bldg 1024. Duty phone for 189 AG/DOT is DSN 731-7961 or commercial (501) 988-7961. Duty phone for 189 AG/BAS is DSN 731-3578 or commercial (501) 988-3578.

Quota and Waiver Control for U.S. Coast Guard: ANGRC/DOT.

Quota and Waiver Control for USNR and USMC: 189 AG/BAS.

C130ABOOFG—(Flight Engineer) Advanced Flying Course, C-130A—PDS Code XVZ—Eglin/5 wk—Mar 86

Qualifies flight engineers in C-130A. Includes C-130A ground training and flight simulator.

Prerequisites: On flight status and qualified for flying duty. ECL 80 AV. Grade E-5 or above (E-4W/MAJCOM Waiver). AFSC resources (PAFSC, CAFSC, or AAFSC): 43151/71A/C/E/F, 43250/70,43251/71,43550/70, or 43590 (airmen with prefix F or J are not eligible). Volunteer statement. Jet or turboprop experience: 6 months desirable. No prior elimination from aircrew training in any service for airsickness, fear of flying, or disciplinary reasons.

Oversea Quota Control: HQ AFPC/DPMRA. CONUS Quota Control: 919 SOG/DOTS.

C130ABOOPQ—(Pilot) Advanced Flying Course, C-130A—PDS Code XVT—Eglin/4 wk—Mar 86

Qualifies pilots in C-130A ground training and flight simulator.

Prerequisites: On flight status and qualified for flight duty. ECL 80 AV.

Oversea Quota Control: HQ AFPC/DPMRO. CONUS Quota Control: 919 SOG/DOTS.

EC130EAECIQ—EC-130E(RR) Airborne Electronic Communications Systems Technician—PDS Code V98—Harrisburg IAP/26 wk/AFSC A11851—Mar 93

Trains airborne electronic communications systems technicians to the 5-skill level on inflight operations and maintenance of the EC-130E(RR) VOLANT SOLO Airborne Communications/Electronic Warfare System. Consists of academic and flying training. Upon satisfactory completion of this course, graduates will be mission ready aircrew members.

Prerequisites: a. Must complete or obtain a waiver for the following courses: E3AZR11831, blocks VX and XVIII or 3ABR30434, and block II of 3ABR30435.

b. Medical: Must be physically qualified for flight duty per Class III medical standards.

c. Physiological Training: Current physiological training, original chamber (2 days) or a current TTB refresher which will not expire until after training completion date. Members are required to hand-carry completed AF Form 1042 (mandatory) and AF Form 702 (if applicable).

d. Enlisted Aircrew Undergraduate Course (EACU): EACU J3AQR110100 000 is required for nonaviation service retraining students. Physiological training is included in the course and requirements in paragraph c will be fulfilled when this prerequisite is met.

e. Survival Training: Complete basic survival course, S-V80-A, water survival course, S-V86-A, and special survival course, S-V83-A (when applicable), before operational assignment.

Special Requirements: Minimum Secret clearance required, provided Top Secret paperwork is initiated by class start date.

EWTPS-75—TPS-75 Operator Course—PDS Code 3JY—Buckley ANG Base/3 wk—Apr 95

A combination of academic and hands-on training designed to provide students the working knowledge of the TPS-75 Radar and how to apply the systems ECCM capabilities in an electronic combat

environment. Students completing the course will be positionally certified mission ready (MR) during live jamming events in a tactical environment.

Prerequisites: Possess a 1C551 AFSC and be Phase III MR qualified with 2 years of mission experience in mobile TACS.

Special Requirements: Course uniform is BDU.

Reporting Instructions: Students will report to the 154 ACG, Bldg 730, Buckley ANG Base, Aurora CO, NLT 0800 on class start date.

Frequency: Two classes per year to be conducted in conjunction with Green Flag exercises.

Course/Waiver Coordinator: 154 ACG/DOXW, DSN 877-9143.

Quota: 10 students per class.

F4GOOOB—Wild Weasel Initial Qualification Course—PDS Code WZS—Gowen Fld/40 wk/AFSC 1115J/1575A—Sep 93

Initial and mission qualification training for pilots and EWOs to operate the F-4G Wild Weasel weapons system. Flying hours: pilot, 76.2; EWO, 62.6.

Prerequisites: Aircraft commander must be a graduate of AT38BAXOAA. Electronic warfare officer must be a graduate of AT38BAXOAA and EWO graduate.

Survival training: Basic survival (S-V80-A) and water survival (S-V86-A) are desirable. Maximum 90 days from LIFT graduation to start of this course. (Prior service aircrew with FAR experience do not require LIFT.) All aircrew require current physiological training certificate (AF Form 702) valid for course duration to include centrifuge training.

Records and Equipment Requirement: Current physiological training certificate valid for course duration, individual flight records, medical records, personal flying equipment to include helmet, mask, and anti-G suit. Students attending during winter months are required to bring winter PE gear.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send copy of orders to School Secretary, 189 FTU/GTU, IDANG, PO Box 45, Boise, Idaho 83707-0045, 30 days before class entry date.

Reporting Instructions: Students report to School Secretary, 189 FTU/GTU, Bldg 400, Gowen Field, Idaho, NLT 0800 on class start date.

Unit of Assignment: 189 FTU/GTU, Gowen Field, Boise, Idaho 83707-0045.

Frequency of Classes: Start dates - mid-January, July yearly.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

F4GOOOX—Wild Weasel Requalification/Conversion Course—PDS Code WZT—Gowen Field/duration */AFSC 1115J/1575A—Sep 93

Trains tactical aircrews for qualification in the F-4G Wild Weasel. Flying hours: Track I: pilot, 30.0; EWO, 28.0. Track II: pilot, 23.0, EWO, 21.0. Track III: pilot, 16.0; EWO, 14.0.

Prerequisites: a. Track I - fighter/attack/recce crewmember with minimum 500 hours (FAR) and current within 5 years.

b. Track II - previous F-4 experienced crewmember (except RF-4) and current within 5 years.

c. Track III - previous F-4G experienced crewmember and current within 3 1/2 years.

d. All aircrews require current physiological training certificate (AF Form 702) valid for course duration. Centrifuge training is mandatory prior to course enrollment.

Records and Equipment: Current physiological training valid for course duration, individual flight records, medical records, personal flying equipment to include helmet, mask, and anti-G suit. Students attending during winter months are required to bring winter PE gear.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send copy of orders to School Secretary, 189 FTU/GTU, IDANG, PO Box 45, Boise, Idaho 83707-0045, 30 days before class entry date.

Reporting Instructions: Students report to School Secretary, 189 FTU/GTU, Bldg 400, Gowen Field, Idaho, NLT 0800 on class start date.

Unit of Assignment: 189 FTU/GTU, Gowen Field, Boise, Idaho 83707-0045.

Frequency of Classes: Start dates - every 2 to 3 months.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

Track I, 16 weeks; Track II, 13 weeks; Track III, 8 weeks.

RF4000BG—ANG Operations Tng RF-4C—PDS Code 4AN—Reno Cannon International/27 wk/AFSC 1115R/1555R—Sep 93

Train aircrews to operate the RF-4C weapons system. Flying hours: Pilot, 66; WSO, 48.7.

Prerequisites: Maximum 90 days from SUPT/LIFT graduation to start of this course. (Prior service aircrew with FAR experience do not require LIFT.) All aircrew require current physiological training certificate (AF 702) valid for course duration. Centrifuge training is mandatory prior to course enrollment.

Records and Equipment Requirement: Current physiological training certificate (AF 702) valid for course duration, individual flight records, medical records, personal flying equipment to include helmet, mask, and anti-G suit. Students attending during winter months are required to bring their own winter PE gear.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send copy of orders to 192 RS/DOT, Nevada Air Guard, 1776 National Guard Way, Reno NV 89502-4494, 30 days before class entry date.

Reporting Instructions: Students report to School Secretary, 189 TRTF, Bldg 400, Gowen Field Idaho, NLT 0800 on class start date.

Unit of Assignment: 189 TRTF, Gowen Field, Boise, Idaho 83707.

Frequency of Classes: Start dates - Mid-March, May, and September yearly.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

RF4000IG—Instructor Upgrade Training Course—PDS Code 9AY—Reno Cannon International/8 wk/6 wk/AFSC K1115R/K1555R—Sep 93

Qualifies selected aircrews for instructor duty in the RF-4C. Flying hours: Pilot, 23.5; WSO, 8.7.

Prerequisites: Selected aircrews will be qualified as outlined in

TACM 51-50, *F4G MAJCOM Guidance*/ANGM 51-50, *Tactical Aircrew Training, RF-4*. Aircrews must be MR/MS in unit aircraft. Pilots must be qualified to lead a four ship and have completed LOWOP checkout. WSOs must have completed LOWOP checkout.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send copy of orders to 192 RS/DOT, Nevada Air Guard, 1776 National Guard Way, Reno, NV 89502-4494, 30 days before class start date.

Records and Equipment Requirement: Current physiological training certificate (AF 702) valid for course duration, individual flight records, medical records, personal flying equipment to include helmet, mask, and anti-G suit. Students attending during winter months are required to bring their own winter PE gear.

Reporting Instructions: Students report to School Secretary, 189 TRTF, Bldg 400, Gowen Field, Boise ID, NLT 0800 on class start date.

Unit of Assignment: 189 TRTF, Gowen Field, Boise ID 83707.

Frequency of Classes: Approximately three classes annually.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

RF400RWS—RF-4 Fighter Weapons Instructor Course (RF400FWIC)—PDS Code 08G—Boise IAP/13 wk/AFSC S1345A/S1515A—Mar 93

The RWS trains the instructor to be an operational expert in the full array of ANG possessed reconnaissance systems and missions and to be knowledgeable of Air Force tactical reconnaissance equipment and roles. The curriculum will emphasize thorough knowledge and "ability to perform" procedures for initiating equipment and tactics changes, the roles of the weapons and tactics officer, the structure and policies of Tactical Air Command and the National Guard Bureau and be able to interface with all elements to enhance the combat readiness of tactical reconnaissance.

Prerequisites: Student must be: Instructor (IP or IWSO) in the RF-4, current MR crew member or RTU IP/IWSO, minimum of 300 hours RF-4 flying time, qualified in very low altitude training to 300 feet AGL (including Formation), crew DM qualified, ACBT qualified (pilots only) - active duty pilots may be Defend IP only. Recent experience: 16 sorties in the preceding 60 days, 10 sorties within the preceding 30 days at least 3 of which are devoted to ACBT training, all physical and flight checks accomplished prior to arrival, i.e., none will be due during the course. Top Secret clearance.

Records and Equipment Requirements: Current physiological training (AF 702) valid for course duration, individual flight records, medical records, personnel records, and personal flying equipment to include helmet, mask, and anti-G suit.

Reporting Instructions: Student reports to School Secretary, 124 TRG/RWS, Boise ID, at 0800 on class start date.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

RF400TXG—ANG Operational RF-4C Conversion Training—PDS Code XDE—Reno Cannon International/8-12 wk/AFSC 1115R/1555R—Sep 93

Trains experienced fighter/attack/reconnaissance aircrews to operate the RF-4C weapon systems. Track 1 pilot flying hours 28.8, WSO 22.0, track 2 pilot 21.6, WSO 15.2.

Prerequisites: All aircrews require current AF Form 702 to validate physiological training for course duration, centrifuge training prior to the course start and valid aeronautical orders.

a. Track 1, 300 hrs in FAR within 42 months, or 500 FAR hours within 60 months, or 1000 FAR hours within 8 years.

b. Track 2, previously RF-4C qualified, current between 18-60 months.

Records and Equipment: Bring current AF Form 702 valid for course duration, individual flight records, medical records, and personal flying equipment to include helmet, mask, and anti-G suit. Students attending during winter months are required to bring their own winter P.E. gear.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send copy of order to 192 RS/DOT 30 days prior to class start date, Nevada Air National Guard, 1776 National Guard Way, Reno NV 89502-4494.

Reporting Instructions: Report to 192 RS Operations, Bldg #84, Nevada Air National Guard, Reno NV.

Unit of Assignment: 192 RS, Nevada Air National Guard, 1776 National Guard Way, Reno NV 89502-4494.

Frequency of Classes: Approximately three classes per year, start dates vary.

Quota Control: NGB/XOOT. Waiver Authority: NGB/XOOT.

RF401RWS—Air Combat Training (ACBT) Pilot Upgrade Course—PDS Code 84G—Gowen Fld/6 wk—Mar 93

Gives the RF-4C instructor a sound knowledge of maximum aircraft performance and basic fighter maneuvering principles. It will qualify the instructor to teach BFM and ACM to RF-4C aircrews and to function as an adversary aircraft in air-to-air training scenarios authorized in AFR 55-79/ACC Sup 1, *Aircrew and Weapons Director - Procedures for Air Operations*. Course is designed specifically for experienced RF-4C pilots who have completed RF-4C instructor training.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

RF402RWS—Penetration Aids and Enemy Defenses—PDS Code 9AX—Gowen Fld/2 wk—Mar 93

Trains qualified instructors to be capable of instructing aircrews in the capabilities and limitations of enemy air defense systems, operation and capabilities of self-protection equipment installed on the RF4, and tactics which will enhance survivability.

Prerequisites: Officer of any US service engaged in training employment development, or testing directly related to pen aids systems or tactics for the RF4. Subject material is designed for rated officers but intelligence officers would benefit from the course. FOR ANG MEMBERS: Must perform duties including weapons and tactics instruction (pilot, WSO, EWO, or intelligence) in home unit. ANG members can only attend this course once every 3 years unless considered appropriate by ANGRC/DOT.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send copy of orders to School Secretary, 124 TRG/RWS, Boise ID. Students report to School Secretary, 124 TRG/RWS, Boise ID.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

ADF16AOOBA—Air Defense F-16 Basic Operational Course—PDS Code N51—Kingsley Fld/24 wk 4 days—AFSC K011F1H—

Oct 96

Provides initial qualification training and mission qualification training in air defense F-16.

Prerequisites: Graduate of course AT38BATOAA/WA within 45 days of class start date, or current in a tactical fighter with less than 300 hours of tactical fighter experience.

Records and Equipment: Personal records to include current physiological training certificate (AF 702) valid for duration of training, medical records with current flight physical (AF 1042) valid for duration of training, dental records, individual flight records, flight evaluation folder, line badge (AF 1199), and a copy of emergency data card (DD 93), and a copy of SGLI form. Personal flying equipment to include helmet, mask, two anti-G suits, one anti-exposure suit, and a black bow tie.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send a copy of orders with dental records to arrive before course start date to 173FW/SAGG, Kingsley Field, 207 Gentile Street, Suite 15, Klamath Falls OR 97603-1917, ATTN: Ssgt Kiser. Please use at least certified mail. DO NOT HANDCARRY DENTAL RECORDS. School secretary can be reached at DSN 830-6684. On-base billeting is available.

Reporting Instructions: Report to 114 FS/Squadron Operations, building 243, Kingsley Field OR, not later than 0730 on class start date. Bring four copies of school orders and all amendments and all required records and equipment.

Quota and Waiver Control: ANGRC/DO.

ADF16AOOCA—Air Defense F-16 Conversion Course—PDS Code N53—Kingsley Fld/9 wk/AFSC 011F1H—Oct 96

Provides initial qualification training and some mission qualification training in air defense F-16.

Prerequisites: Current in a tactical fighter with 300 hours of tactical fighter experience or previously qualified in the F-16.

Records and Equipment: Personal records to include current physiological training certificate (AF Form 702) valid for duration of training, medical records with current flight physical (AF Form 1042) valid for duration of training, dental records, individual flight records, flight evaluation folder, line badge (AF Form 1199), and a copy of emergency data card (DD Form 93), and a copy of SGLI form. Personal flying equipment to include helmet, mask, two anti-G suits, one anti-exposure suit, and a black bow tie.

Special Requirements: Current in egress training, centrifuge, altitude chamber for duration of the class. Secret clearance by class start date.

Admin Instructions: Send a copy of orders with dental records to arrive before course start date to 173 FW/SGAA, Kingsley Field, Suite 15, Klamath Falls OR 97603-1917, ATTN: Ssgt Kiser. DO NOT HANDCARRY DENTAL RECORDS. School secretary can be reached at DSN 830-6684. On base billeting is available.

Reporting Instructions: Report to 114 FS/Squadron Operations, building 243, Kingsley Field OR, not later than 0730 on class start date. Bring four copies of school orders and all amendments and all required records and equipment.

Quota and Waiver Control: ANGRC/DO.

ADF16AOOIA—Air Defense F-16 Instructor Course—PDS Code N58—Kingsley Fld/6 wk 4 days/AFSC K011F1H—Oct 96

Provides Air Defense F-16 pilots with training to upgrade to instructor status in all phases of the air defense.

Prerequisites: Qualified and current in air defense F-16.

Special Requirements: Secret clearance by class start date. Current in egress training, centrifuge, altitude chamber, flight evaluation for duration of class.

Records and Equipment: Personal records to include current physiological training certificate (AF Form 702) valid for duration of training, medical records with current flight physical (AF Form 1042) valid for duration of training, dental records, individual flight records, flight evaluation folder, line badge (AF Form 1199), and a copy of emergency data card (DD Form 93), and a copy of SGLI form. Personal flying equipment to include helmet, mask, two anti-G suits, one anti-exposure suit, and a black bow tie. Bring life support equipment forms and documentation. DO NOT BRING HARNESS.

Admin Instructions: Send a copy of orders with dental records to arrive before course start date to 173 FW/SGAA, 207 Gentile Street, Kingsley Field, Suite 15, Klamath Falls OR 97603-1917, ATTN: SSgt Kiser. Please use at least certified mail. DO NOT HANDCARRY DENTAL RECORDS. School secretary can be reached at DSN 830-6684. On base billeting is available.

Reporting Instructions: Report to 114 FS/Squadron Operations, building 243, 114 FS, Kingsley Field OR, not later than 0730 on class start date. Bring four copies of school orders and all amendments and all required records and equipment.

Quota and Waiver Control: ANGRC/DO.

ADF16AOOTA—Air Defense F-16 Transition Course—PDS Code N5A—Kingsley Fld/4 wk 2 days—Oct 96

Initial qualification training in air defense F-16 (no mission qualification training).

Prerequisites: Current in a tactical fighter with 300 hours of tactical fighter experience or previously qualified in the F-16. Centrifuge training completed prior to class start date.

Records and Equipment: Personal records to include current physiological training certificate (AF Form 702) valid for duration of training, medical records with current flight physical (AF Form 1042) valid for duration of training, dental records, individual flight records, flight evaluation folder, line badge (AF Form 1199), and a copy of emergency data card (DD Form 93), and a copy of SGLI form. Personal flying equipment to include helmet, mask, two anti-G suits, one anti-exposure suit, and a black bow tie.

Special Requirements: Secret clearance by class start date. Current in egress training, centrifuge, altitude chamber for the duration of the class.

Admin Instructions: Send a copy of orders with dental records to arrive before course start date to 173 FW/SGAA, Kingsley Field, 207 Gentile Street, Suite 15, Klamath Falls OR 97603-1917, ATTN: SSgt Kiser . Please use at least certified mail. DO NOT HANDCARRY DENTAL RECORDS. School secretary can be reached at DSN 830-6684. On base billeting is available.

Reporting Instructions: Report to 114 FS/Squadron Operations, building 243, Kingsley Field OR, not later than 0730 on class start date. Bring four copies of school orders and all amendments and all required records and equipment.

Quota and Waiver Control: ANGRC/DO.

F16AOOBG—ANG Basic Tactical Training Course—PDS Code RH0—Tucson IAP/24 wk/AFSC 011F3H—Apr 95

Initial qualification training for pilots to operate F-16 as a weapon system.

Prerequisites: a. Graduate of AT38BAXOAA.

b. Basic survival, S-V80-A, or equivalent is desirable.

c. Water survival, S-V86-A, required.

d. Must have completed centrifuge training prior to class start date.

Special Requirements: Secret clearance by class start date.

Records and Equipment Requirements: Current physiological training certificate (AF Form 702) valid for course duration, individual flight records, medical records, line badge, and personal flying equipment to include helmet, mask, and anti-G suit.

Admin Instructions: Send copy of orders to School Registrar, 162 0G/DOTR, E El Tigre Way, Tucson AZ 85706-6086, 30 days before class start date.

Reporting Instructions: Students report to School Registrar, 162 0G, Bldg 44, Tucson IAP AZ, NLT 0800 on class start date.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DO.

F16AOOFW—Air National Guard Weapons Instructor Course—PDS Code X36—Tucson IAP/16 wk 2 days—Apr 95

Trains the graduate to be an expert in the full array of weapons and weapons-related equipment capable of being employed by the F-16A, the avionics and systems that support weapons delivery, the potential threats that tactical air may have to face, and the array of tactics available for effective weapons system employment. The graduate is highly versed in communication skills and effective instructional techniques in the academic and flying environment. The graduate is familiar with the structure and policies of the Combat Air Forces (CAF) and can interface with all elements to help bring about effective combat ready forces.

Prerequisites: a. Minimum of 2 years of fighter experience.

b. Minimum of 500 hours of figher time with 200 hours in the F-16A.

c. Minimum of 50 hours as an instructor pilot (IP) in the F-16.

d. Attend Enemy Defenses and Penetration Aids COurse (T1115OOS) within the 12 months preceding the course.

e. Currently maintaining MS or MR status and be unit flight lead qualified (4 ship) in the F-16 with the following recent experience prior to reporting to the ANG Weapons School (WS) at Tucson IAP AZ: 30 hours within the preceding 90 days; 10 sorties within the preceding 30 days; 1 sortie within the preceding 14 days; and qualified and current in low altitude training to 300 feet AGL.

Special Requirements: Top Secret clearance by class start date.

Records and Equipment: Current physiological training certificate (AF Form 702) valid for course duration, individual flight records, medical records, line badge, and personal flying equipment to include helmet, mask, and anti-G suit.

Admin Instructions: Send a copy of orders to 162 OG/FWS, 1660 E El Tigre Way, Tucson AZ 85706-6086, 30 days before class start date.

Reporting Instructions: Students report to FWS, 162 OG, Bldg 44, Tucson IAP AZ, no later than 0800 on class start date.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DO.

F16A001CT/TT—ANG Tactical Conversion Training Course—PDS Code RG5—Tucson IAP/duration */AFSC 011F3H—Apr 95

Provides F-16A unit conversion training for pilots current in tactical fighter aircraft.

Prerequisites: Centrifuge training prior to class start date. The UP will have a minimum of 300 hours tactical fighter time. The student's home unit DO and the 162 FG DO will coordinate special training requirements.

Special Requirements: Secret clearance by class start date.

Records and Equipment Requirements: Current physiological training certificate (AF Form 702) valid for course duration, individual flight records, medical records, line badge, and personal flying equipment to include helmet, mask and anti-G suit.

Admin Instructions: Send copy of orders to school registrar, 162 0G/DOTR, 1660 E El Tigre Way, Tucson AZ 85706-6086, 30 days before class start date.

Reporting Instructions: Students report to School Registrar, 162 0G, Bldg 44, Tucson IAP AZ, NLT 0800 on class start date.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DO.

*1CT (Track 1) - 68 days; /TT (Track T) - 25 days.

F16A001IT—ANG Instructor Pilot Upgrade Training Course—PDS Code RG4—Tucson IAP/5 wk 4 days/AFSC K011F3H—Apr 95

Upgrade fully qualified F-16A pilots to instructor status in all phases of F-16 flying.

Prerequisites: Pilots selected must be qualified and current in the F-16A and qualified IAW ANGR 51-50, volume VIII, *Tactical Aircrew Training, RF4, ANG Procedures.* Centrifuge training prior to class start date.

Special Requirements: Secret clearance by class start date.

Records and Equipment Requirements: Current physiological training certificate (AF Form 702) valid for course duration, individual flight records, medical records, line badge, and personal flying equipment to include helmet, mask, and anti-G suit.

Admin Instructions: Send copy of orders to School Registrar, 162 0G/DOTR, 1660 E El Tigre Way, Tucson AZ 85706-6086, 30 days before class start date.

Reporting Instructions: Students report to School Registrar, 162 0G, Bldg 44, Tucson IAP AZ, NLT 0800 on class start date.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DO.

F16A002CT/TT—ANG Conversion Training Course—PDS Code WA4—Tucson IAP/duration *—Apr 95

Provides academic and flying training required to transition pilots from the F-16C/D to the F-16A/B.

Prerequisites: Must be qualified in the F-16C, had centrifuge training before class start date, and have physiological training valid for course duration.

Special Requirements: Secret clearance by class start date.

Records and Equipment: Current physiological training certificate (AF Form 702) valid for course duration, individual flight records, medical records, line badge, and personal flying equipment to include helmet, mask, and anti-G suit.

Admin Instructions: Send copy of orders to School Registrar, 162 0G, 1660 E El Tigre Way, Tucson AZ 85706-6086, 30 days before class start date.

Reporting Instructions: Report to School Registrar, 162 0G, Bldg 44, Tucson IAP AZ, no later than 0800 on class start date.

Quota Control: ANGRC/DOT. Waiver Control: ANGRC/DO.

* /TT (Track T) - 5 day academics and simulator training required to transition pilots from the F-16C/D to the F-16A/B; CT - 10 days.

F16C001IT—ANG Instructor Pilot Upgrade Training—PDS Code 1OY—Tucson IAP/duration */AFSC K011F3H—Oct 96

Track I provides academic and flying training required to become an F-16C/D instructor pilot. Track II trains instructor pilots as academic instructors.

Prerequisites: a. Track I -- qualified and current in the F-16C/D, qualified for selection according to MCI (ANG) 11-208, qualified and current in LASDT air-to-air and air-to-ground, and neither the student's qualifications or instrument check under AFI 11-401 shall come due during the course. b. Track II - complete course F16C001IT, Track 1, and be recommended for training by the operations group commander.

Special Requirements: Secret clearance by start date. Current AF Form 702 physiological training certificate valid for the course duration, individual flight records, medical records, line badge, and personal flying equipment including helmet, mask, and anti-G suit.

Admin Instructions: Send copy of orders to school registrar, 1620G/DOTR, 1660 E. El Tigre Way, Tucson AZ 85706-6086, 30 days before the class start date.

Reporting Instructions: Students report to school registrar, 1620G, Bldg 44, Tucson IAP, AZ, NLT 0800 on class start date.

Quota Control and Waiver Authority: ANGRC/XOO.

*Track I - 7 wk, Track II - 1 wk

F16C002CT/TT—ANG Conversion Training Course—PDS Code 1OX—Tucson IAP/duration *—Oct 96

Provides training to convert pilots from the F-16A/B to the F-16C/D (blocks 25/32). Pilots will be capable of performing similar mission tasks to approximately the same level as they possessed in the F-16A/B and will have basic knowledge and proficiency in tasks unique to the F-16C/D (blocks 25/32). Also provides training to convert pilots from the F-16C (blocks 40/42/50/52) to the F-16C (blocks 25/32).

Prerequisites: Student will have been MR, MS, or an IP according to MCI (ANG) 11-208 in the F-16A/B or F-16C/D (blocks 40/42/50/52). Neither qualifications nor instrument checks under AFI 11-401 shall come due during this course. Students not meeting entry requirements require a waiver from ANGRC/XOO.

Special Requirements: Secret clearance by class start date. Current AF Form 702 physiological training certificate valid for course duration, individual flight records, medical records, line badge, and personal flying equipment including helmet, mask, and anti-G suit.

Admin Instructions: Send copy of orders to school registrar, 1620G/DOTR, 1660 E. El Tigre Way, Tucson AZ 85706-6086, 30 days before the class start date.

Reporting Instructions: Students report to school registrar, 1620G, Bldg 44, Tucson IAP, AZ, NLT 0800 on class start date.

Quota Control and Waiver Authority: ANGRC/XOO.

*Track I (CT) - 3 wk; Track II (TT) - 1 wk.

F16C422CT/TT—ANG Conversion Training Course—PDS Code 1OZ—Tucson IAP/duration *—Oct 96

Provides training to convert pilots from the F-16A/B to the F-16C/D (block 42). Pilots will be capable of performing similar mission tasks to approximately the same level as they possessed in the F-16A/B and will have basic knowledge and proficiency in tasks unique to the F-16C/D (block 42). Also provides training to convert pilots from the F-16C (blocks 25/30/32/50/52) to the F-16C (block 42).

Prerequisites: Student will have been MR, MS, or an IP according to MCI (ANG) 11-208 in the F-16A/B or F-16C/D (blocks 25/30/32/50/52). Neither qualifications nor instrument checks under AFI 11-401 shall come due during this course.

Special Requirements: Secret clearance by class start date. Current AF Form 702 physiological training certificate valid for course duration, individual flight records, medical records, line badge, and personal flying equipment including helmet, mask, and anti-G suit.

Admin Instructions: Send copy of orders to school registrar, 1620G/DOTR, 1660 E. El Tigre Way, Tucson AZ 85706-6086, 30 days before the class start date.

Reporting Instructions: Students report to school registrar, 1620G, Bldg 44, Tucson IAP, AZ, NLT 0800 on class start date.

M111500D—ANG Enemy Defenses Penetration Aids Instructor Course—PDS Code 4T0—McConnell/1 wk—Mar 93

Trains qualified instructors to be capable of instructing aircrews in employment of penetration aids installed in F-4, RF-4, and other tactical aircraft.

Prerequisites: Rated officer or intelligence personnel of any US service engaged in training, employment, development, or testing directly related to pen aids system and tactics in the F-4, RF-4, or other tactical aircraft. For ANG members: Must be assigned duties as weapons and tactics instructor (pilot/WSO or EWO) or Intel Officer/NCO in home unit. ANG members can only attend this course once every 3 years unless considered appropriate by ANGRC/DOT.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Students report to School Secretary, 184 TFG, Bldg 48, McConnell AFB KS.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DOT.

T1115OOA—ANG AD Electronic Warfare Course (ADEW)—PDS Code XRB—Kingsley Field/1 wk—Oct 96

Trains qualified aircrews, intelligence personnel, and weapons controllers in employment of friendly countermeasures against penetration aids on foreign strategic bomber aircraft and weapon systems.

Prerequisites: Currently qualified fighter pilot, intelligence officer or

noncommissioned officer, or weapons controller of any US Service engaged in training, employment, , or testing directly related to the air defense mission. For ANG members: Can only attend this course once every 3 years unless considered appropriate by ANGRC/DO.

Special Requirements: Secret clearance by class start date and United States citizenship.

Admin Instructions: Home unit will verify security clearance by message 7 days before course start date. Present copy of orders to intel personnel during in-processing on first class date. Billeting reservations: DSN 830-6696. Direct all messages to 114 FS/DOI.

Reporting Instructions: Report to Bldg 243 no later than 0800 on class start date.

Frequency of Class: Four times per year.

Quota Control: ANGRC/DOT.

Waiver Authority: ANGRC/DO.

T111500S—ANG Enemy Defenses Penetration Aids Instructor Course—PDS Code 4T1—Tucson IAP/2 wk—Apr 95

Trains qualified instructors to instruct aircrews in employment of Enemy Defenses Pen Aids installed in A-7, A-10, and F-16 tactical aircraft.

Prerequisites: Rated officer of any US service engaged in training, employment, development, or testing directly related to pen aids system and tactics in the A-7, A-10, and F-16 tactical aircraft. FOR ANG MEMBERS: Must be assigned duties as weapons and tactics instructor (pilot or EWO) in home unit. ANG members can only attend this course once every 3 years unless considered appropriate by ANGRC/DO.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Send copy of orders to Weapons School Registrar, 162 0G/DOTR, E El Tigre Way, Tucson AZ 85706-6086, 30 days before class start date.

Reporting Instructions: Report to Weapons School Registrar, 162 0G, Bldg 44, Tucson IAP AZ, at 0800 on class start date.

Quota Control: ANGRC/DOT. Waiver Authority: ANGRC/DO.

Recruiting

YPMEC ROS—Recruiting Office Supervisory Course—PDS Code WB7—McGhee Tyson ANGB/1 wk—Jun 93

Provides recruiting office supervisors with the necessary skills to effectively supervise ANG recruiters in all aspects of recruiting.

Quota Control: ANGRC/TE.

Chapter 11

OTHER AIR FORCE MAJCOMs AND FOAs

Designated OPR. Requests for new course announcements, changes, or revisions must be prepared according to paragraph 1.10 and sent to the designated OPR for required processing.

Section A—Procedures and Instructions

11.1. FBI National Academy (OPR: HQ USAF/SPX).

11.1.1. **Location.** The FBI National Academy is on the US Marine Corps Base, Quantico, Virginia, 40 miles south of Washington DC. The academy can be reached by taking Interstate 95 south to the Marine Corps Base (exit 49) and then going west for 6.5 miles to the Academy complex.

11.1.2. **Transportation and Reporting Instructions**. Students report to the administration building at the academy not earlier than 1300 and not later than 1700 on the Sunday the course begins. Students who need a ride from Washington DC to the academy should go to the FBI building at 10th Street NW and Pennsylvania Ave. A bus leaves at 1300 and 1500 on the Sunday the course begins.

11.1.3. **Funding.** Student's unit is responsible for funding according to current JTR directives. Unit of assignment pays travel from home base to the academy and return. There is no charge for tuition, books, or equipment used. Meals, room, and laundry services are also free. Students are required and authorized payment of $95 student assessment fee. In addition, students must have three FBINA uniforms and one gym uniform (purchased at the FBINA), running shoes, black athletic shoes (suitable for wear in classroom and on the firing range), and one suit (for wear at dinners and special occasions). A warm-up suit is also suggested. Enlisted personnel are paid 1 month civilian clothing allowance. (See AFI 36-3014, Uniform Clothing Allowance for Air Force Enlisted Members, for details.)

11.1.4. **Academic Credit.** Individuals who complete the National Academy course can earn college credit through the School of Continuing Education, University of Virginia. Graduate credit may be earned by those in graduate courses. Air Force officers receive an AF Form 77, Supplemental Evaluation Sheet, from FBINA when they complete the course.

11.1.5. **Selection Criteria.** Security police officers and NCOs are eligible to attend the FBI National Academy. Applicants assigned to oversea bases must be available to satisfy the background investigation; and, have at least 1 year remaining on their overseas assignment prior to attendance at the academy. They must be high school graduates or the equivalent. Applicants send the FD Forms 164 and 164a, with nomination package completed according to figure 11.1, and photographs to their MAJCOM/SP (HQ AFRES/SP for reserve personnel and ANG/SP for ANG personnel). FD Forms 164 and 164a are available at the local offices of the FBI. Only the original of the form can be accepted. If approved, the application will be sent to HQ USAF/SPX. Applications not approved by the MAJCOM/SP, AFRES/SP, or ANG/SP will be returned to the sender. For specific information, refer to the course announcement in section B. NOTE: Active duty personnel incur a 2-year active duty service commitment from date of graduation (AFI 36-2107, Active Duty Service Commitments (ADSC)). Air Force Reservists and ANG personnel selected for this training must have 2 years remaining on their Ready Reserve Agreement from the course graduation date, according to AFI 36-8001, Reserve Personnel Policy Reserve Training.

★**11.2. The USAF IG School (OPR: AFIA/CVS).** The mission of the USAF IG School is to prepare personnel for various inspector general activities. The school conducts a 2-day inspection course and a 1-day complaints course. The curriculum is responsive to direction from the Secretary of the Air Force, OSAF, the Chief of Staff, the Inspector General, and suggestions from MAJCOM inspectors general. Attendance is normally limited to 40 students per class.

★11.2.1. **Location.** The USAF IG School is under the operational administration of the Commander, Air Force Inspection Agency, 9700 G Ave SE, Suite 340, Kirtland AFB NM 87117-5670. Courses are conducted at HQ AFIA, MAJCOM headquarters, and other locations throughout the U.S. Air Force.

★11.2.2. **Funding.** Student's unit of assignment is responsible for funding IAW current JFTR directives.

★11.2.3. **Uniform Requirements.** Summer uniform combinations are appropriate year round at HQ AFIA. Comply with local guidance at other locations.

★11.2.4. **Additional Information.** Student nominations are made through MAJCOM, NAF, FOA, Air Staff IG activities, international military exchange officers filling an Inspector General staff position, or directly with the USAF IG School (DSN 246-1558).

11.3. Air Force Office of Special Investigations (AFOSI) (OPR: HQ AFOSI/DPMUC, Bolling AFB, Washington DC 20332-6001):

11.3.1. **Location.** Training is at the USAF Special Investigations Academy (USAFSIA). Bolling AFB DC 20332 or as shown in course reporting instructions.

11.3.2. **Reporting Instructions:**

11.3.2.1. Courses 5OBO8200 000, Special Investigators Course (Basic), and 5OBO8200 002, Reserve Special Investigators Course: Students report in accordance with the instructions contained in their individual orders. Additional reporting instructions are contained in the AFOSI Special Investigations Academy's Basic Student Information Guide.

11.3.2.2. All other courses: All students report to building 626, room 2049 (classroom 2), or locations specified in the training allocation brief no later than 0730 on the class start date. Enlisted students wear civilian clothing. Officers wear military uniforms unless otherwise specified in the training allocation brief.

11.3.3. **Billeting.** All airmen, NCOs, and officers report to registration desk, VOQ Office, Bldg 602, Bolling AFB DC 20332, unless otherwise instructed by message or orders.

11.3.4. **Funding.** HQ AFOSI/DPMUC provides fund citations as established by HQ AFOSI/AC with each training allocation brief. Obtain advanced per diem from the host base finance office.

11.3.5. **Preparation of Orders.** Instructions in paragraph 3.5.1 for AETC courses also apply to AFOSI courses. Distribute copies of orders as follows: HQ AFOSI/DPMUM/DPMUC/ACF and USAFSIA/RM, Bolling AFB DC 20332 - one copy each.

11.3.6. **Special Instructions:**

11.3.6.1. Each individual scheduled to attend course 5OBO8200 000 will receive a student information guide. If this packet is not received by 15 days before the student leaves for training, the individual or servicing MPF/DPMPC should call HQ AFOSI/DPMPS, DSN 297-4757/8.

11.3.6.2. Other instructions unique to a certain course will be sent with the training allocation brief.

11.4. Air Force Combat Ammunition Center (OPR: AFCOMAC/CC). Application and selection procedures are as defined in course announcements.

11.5. DCS, Plans and Operations, HQ USAF (OPR: HQ USAF/XOCT). Application and selection procedures are as defined in course announcements.

11.6. Air Force Civil Engineer Support Agency (OPR: HQ AFCESA/DPP, Tyndall AFB FL 32403-6001). Application and selection procedures are as defined in course announcements.

11.7. Air Force Intelligence Support Agency (OPR: AFISA/IN). Application and selection procedures are as defined in course announcements.

11.8. Air Force Materiel Command (OPR: HQ AFMC/DPUO, Wright-Patterson AFB OH 45433-5001). Application and selection procedures are as defined in course announcements.

11.9. Air Force Special Operations Command (OPR: HQ AFSOC/DOOT, Hurlburt Field FL 32544). Requests for new course announcements, changes, or revisions must be prepared according to paragraph 1.10 and sent to HQ AFSOC/DOOT for required processing.

11.9.1. **Air Force Special Operations School (USAFSOS).** Located at Hurlburt Field FL, the school conducts 15 different courses to educate selected US and allied personnel in subjects relating to special operations. These subjects include African, Asian, Latin American, and Middle East regional orientation, special operations planning, revolutionary warfare, joint aviation foreign internal defense, introduction to special operations, staff officer orientation, antiterrorism awareness, cross cultural communications, crisis response management, and psychological operations. Contact USAFSOS/EDS, DSN 579-6453, for further information or to request course catalogs.

11.9.1.1. Procedures for Requesting Quotas:

11.9.1.1.1. Send requests for quotas to attend USAFSOS through your unit training office to your applicable command or service functional manager. (Exceptions: Direct requests for quotas for AFSOC 148002, AFSOC 149002, AFSOC 150002, AFSOC 154002, AFSOC 157002, and AFSOC 158002 to USAFSOS/EDSR, Alison Bldg, 357 Tully Street, Hurlburt Field FL 32544-5800. International students receiving funding from Security Assistance forward quota and programming requests to AFSAT/TO and info OSAF/IAX and USAFSOS/EDSR/EDOI. All other international students should forward their requests through their applicable embassy to the SAF/IA Country Manager, Pentagon, Wash DC 20330.)

11.9.1.1.2. Because use of all quotas received must be confirmed in the Training Management System (TMS) at least 30 days prior to the class start date, using units must provide confirmation to their MPF NLT 45 days prior to the class start date.

11.9.1.1.3. Return all quotas not suballocated within 30 days prior to class start date to their respective quota manager.

11.9.1.2. **Administrative and Reporting Procedures:**

11.9.1.2.1. Location. USAFSOS is located at Hurlburt Field FL, on US Highway 98, 5 miles west of Fort Walton Beach, 40 miles east of Pensacola. The USAFSOS Bldg number is 90503, and it is located one block east of Billeting.

11.9.1.2.2. Transportation. The Fort Walton Beach area is serviced by the Okaloosa County Air Terminal (airport code VPS), which adjoins Eglin AFB and Pensacola Regional Airport. Base taxi service is not available for trips to or from the airport. Rental cars are recommended, but are not funded by USAFSOS.

11.9.1.2.3. Billeting. Students are normally provided quarters in on-base facilities at Hurlburt Field. Transportation is provided to and from the billeting location if billeted off base. Upon notification of selection to attend a USAFSOS course, contact Hurlburt Field Billeting Office (DSN 579-7115/6408, (904) 884-7115/6408) to make room reservations. USAFSOS staff will coordinate billeting arrangements for students attending AFSOC 157002.

11.9.1.2.4. Reporting Instructions: All students should report to the Hurlburt Field 24-hour arrival reception center, Bldg 90509, upon arrival. Additional reporting instructions are found in table 11.1 and in each course announcement.

11.9.1.2.5. Dining Facilities. A government dining facility is available for enlisted personnel, but is not available for officers. Nonavailability statements will be issued as required.

11.9.1.2.6. Departure Information. When making departure arrangements, ensure they do not conflict with the times published in table 11.1. Early departures from class to make flights are not authorized.

11.9.1.3. Security Clearance and Access:

11.9.1.3.1. Clearance and access requirements are annotated in the course announcement. Provide name (last, first, MI), grade/service, SSN, security clearance and date obtained, date and place of birth, accurate mailing address, and DSN or commercial phone number of each student no later than 10 days prior to the class start date.

11.9.1.3.2. Students attending AFSOC 148002 must verify the SCI clearance through SSO channels to the SSO AFSOC//INS// NLT 5 days before class start date. Personnel will not be allowed to in-process or attend courses if the above information is not received.

11.9.1.4. Preparation of Student Orders. Instructions shown in paragraph 3.6.1 for AETC courses also apply to USAFSOS courses. All student PCS and TDY orders must show current security clearance in the security clearance block and place of birth in the remarks section of the orders. Forward two copies of orders to USAFSOS/EDSR, 357 Tully Street, Hurlburt Field FL 32544-5800.

11.9.1.5. Funding Procedures. Funding is the responsibility of the using/benefiting unit. (Limited funding is available for some seminar style courses. Contact the registrar for information.) Defense contractors working active Foreign Military Sales (FMS) cases should request approval for attendance on a full reimbursement basis from SAF/IAPP and be scheduled through USAFSOS/EDSR.

11.9.1.6. Clothing Requirement. Air Force light blue short sleeve shirt/dark blue trousers or skirt combination (or equivalent for other services) must be worn at all times. Utility uniforms such as fatigues, BDUs, and flight uniforms are not authorized. The summer uniform is authorized year-round for all services; but attendees may require appropriate jackets, sweaters, or raincoats, during winter months. Civilian personnel should wear clean, conservative casual attire

(slacks, open collar shirts, dresses, etc.). Shorts, jeans, and T-shirts are not authorized.

11.9.2. **Flying Training Courses.** Flying training courses are conducted by 16 Special Operations Wing (SOW) at Hurlburt Field FL. Courses include mission qualification courses in the AC-130 crew positions. HQ AFPC/DPMROP2 controls training quotas for all courses. Obtain administrative procedures and instructions for these courses from HQ AFPC/DPMROP2 or HQ AFSOC/DOOT.

11.9.3. **Reporting Instructions**. TDY students for AC-130H or MC-130E aircrew training should report to Hurlburt Field 24-hour arrival reception center (Billeting Office), Bldg 90509, 1 day before class start date. Report at 0800 on class start date to Bldg 91029, room 216. Contact 16 OSS/OGST, DSN 579-6117, for further reporting instructions.

11.9.3.1. MC-130E (Combat Talon I) aircrew members assigned to 8 SOS report to Bldg 90140, 0730 to 1630, Monday through Friday, for inprocessing 7 days before class start date. Students then report at 0800 on class start date to Bldg 91029, room 216.

11.9.3.2. AC-130H and AC-130U aircrew members assigned to 16 SOS report to Bldg 90740, 0730 to 1630, Monday through Friday, for inprocessing 7 days before class start date. Students then report at 0800 on class start date to Bldg 91029, room 216.

11.10. Air Intelligence Agency (AIA) (OPR: HQ AIA/DPTF, Kelly AFB TX 78243). Application and selection procedures are as defined in course announcements.

11.11. Joint Services SERE Agency (JSSA) (OPR: JSSA/DD). Application and selection procedures are as defined in course announcements.

11.12. Air Force Operational Test and Evaluation Center (AFOTEC) (OPR: HQ AFOTEC/TR, Kirtland AFB NM). Application and selection procedures are as defined in course announcement.

11.13. Air Force Flight Standards Agency (AFFSA) (OPR: HQ AFFSA/XVO, Andrew AFB MD). Application and selection procedures are as defined in course announcement.

Section B—Course Announcements

Headquarters Air Force Flight Standards Agency (HQ AFFSA)

AFFSA13M3 000—Air Traffic Control Officer Upgrade Training Program—PDS Code 0PH—Altus/Tyndall/40 wk/AFSC 13M3—Oct 96

Provides entry level air traffic control officers with managerial and operational trainining in preparation for upgrade to fully qualified AFSC 13M3. Includes classroom instruction, training in radar and control tower facilities, and comprehensive training on all aspects of Air Force air traffic control.

Prerequisites: Second lieutenant or above with AFSC 13M1 and current Class II medical certificate. US Air Force physical standards do not apply to international students. International students will not perform ATC duties unmonitored during US Air Force training.

Special Requirements: Secret clearance before class start date; NOFORN.

Quota Control: HQ AFPC/DPMROS5C. Officers will be assigned to training locations on a rotational basis in classes not exceeding seven students. Maximum number of officers in training per location will not exceed 18.

AFFSA13M3 001—Air Traffic Control Officer Upgrade Training Program—PDS Code 0PJ—Altus/Tyndall/18 wk/AFSC 13M3—Oct 96

For prior Air Force enlisted air traffic controllers who meet operational experience requirements for upgrade as defined in AFMAN 36-2105. Provides comprehensive training on all aspects of air traffic control management.

Prerequisites: Second lietuenant or above with AFSC 13M1 and current Class II medical certificate. US Air Force physical standards do not apply to international students. International students will not perform ATC duties unmonitored during US Air Force training. Officer must have at least 3 years' experience as a qualified Air Force air traffic controller and have facility ratings in complex radar approach control (RAPCON) and control tower facilities.

Special Requirements: Secret clearance before class start date; NOFORN.

Quota Control: HQ AFFSA/XVO.

AFFSA1C191 000—Air Traffic Control Facility Management—PDS Code TNU—Andrews/1 wk/MASL D122080—Apr 95

Provides insight to middle management and accelerates the transition of air traffic control (ATC) personnel from shift supervision to facility management. Also provides specialized training on Air Force and FAA management philosophies, concepts, procedures, and requirements to officers and NCOs assigned to unit ATC operations. Course includes management skills training and creative problem solving associated with ATC operations.

Prerequisites: Officer with at least 1 year in AFSC 13B3A. NCOs in grade TSgt or above with AFSC 1C171/91 or 1C100. NCOs must have at least 4 years of experience in ATC.

Special Requirements: Secret clearance by course start date.

Funding: TDY for class attendance will be unit funded.

PRIVACY ACT STATEMENT

Information requested below is affected by the Privacy Act of 1974. Authority for requesting this information from you is Title 10 U.S. Code, Section 8012 (Secretary of the Air Force, Powers and Duties Delegated by) and Executive Order 9397 (Numbering System for Federal Accounts Relating to Individual Persons). This information is required to select applicants for the FBI National Academy. The information will be used to evaluate an applicant's eligibility. Social Security number is used to make positive identification of the individual applicant. Disclosure is voluntary; however, application processing may be hindered without all requested information.

APPLICATION RESUME TO ATTEND THE

FEDERAL BUREAU OF INVESTIGATION NATIONAL ACADEMY

PART I DATE

NAME: SSN: DSN DUTY PHONE:

RANK: DOR: TAFMSD:

TOPCAP DATE: (NCOs) ETS: (OFFICERS)

UNIT: BASE: COMMAND:

PART II:

1. PREVIOUS ACCOMPLISHMENTS OF THE INDIVIDUAL NOMINATED:

A. Specific accomplishments of the individual, for example, during a tour at Osan AB Korea (1986-87) then SSgt Doe was responsible for successfully solving a series of major thefts. The estimated value of the recovered property was $150,000. A short narrative or bullet statement is sufficient.

B. Do not go back farther than 5 years prior to the date of this application.

2. EDUCATION: PROFESSIONAL MILITARY EDUCATION (PME) AND CIVILIAN:

A. PME completed and any being done at this time.

B. Civilian education completed or currently attending and the degree the applicant is pursuing.

C. Civilian police academies completed.

3. PRESENT ASSIGNMENT, RESPONSIBILITIES, AND ACCOMPLISHMENTS:

This should be comprehensive and take into account any additional duty positions or jobs held by the individual and the impact these positions or duties have on the overall mission accomplishment of the unit.

NOTE: Parts I and II must not exceed two pages in length.

PART III. INDIVIDUAL'S CONFIRMATION

I certify that I have read the above information and that it is true and correct. If I attend the FBI National Academy, I agree to do so with the full knowledge that I will incur a 2-year active duty service commitment from the date of graduation.

PART IV. COMMANDER'S RECOMMENDATION AND ESTIMATE OF FUTURE POTENTIAL

OF THE APPLICANT

PART V. ENDORSEMENTS

WING OR GROUP COMMANDER (Mandatory unless assigned to MAJCOM staff.)

DIVISION/NUMBERED AF CC/CSP (if applicable)

MAJCOM CSP (Mandatory)

Figure 11.1. Application Resume to Attend FBI National Academy.

14	AFSOC 157002		Bldg 90357			1200
15	AFSOC 158002		Bldg 90340			1530

NOTE: Students arriving or departing from training at Hurlburt Field should know that although Hurlburt Field is part of the overall Eglin AFB complex, it is a separate and distinct location approximately 15 miles from Eglin AFB. Travel plans should be made accordingly. Early departures from class to make flights are not authorized.

Special Instructions: Quotas are allocated through command channels by HQ AFFSA/XVOF. Do not send individual applications. Forward one advance copy of orders to: HQ AFFSA/XVOF, 1535 Command Drive, Ste D-306, Andrews AFB MD 20331-7002, or Fax copy to DSN 858-3195.

Waiver Authority: HQ AFFSA/XVOF.

OPR: HQ AFFSA/XVO.

DCS/Plans and Operations, HQ USAF

TDC0001—Tactical Deception Planners Course—PDS Code 2EY—various locations/3 days—Jun 94

Trains tactical deception officers (TDO) and other personnel involved in operations planning or support to plan, coordinate, and conduct tactical deception. Subjects covered include planning considerations, intelligence support, security and administrative requirements, and practical exercises. If necessary, and at the request of a MAJCOM TDO, a fourth day is added to provide preliminary training to new primary and alternate TDOs on the Tactical Deception Planning Aid (TDPA) computer software program.

Prerequisites: Student must be familiar with AFPD 10-7, Command and Control Warfare, and AFI 10-704, Military Deception Program, MAJCOM tactical deception program supplements and implementing directives, and the sections of AFMAN 10-401, Operation Plan and Concept Plan Development and Implementation (formerly AFR 28-3), and JCS Pub 5-03.1 and 5-03.2, Joint Operation and Planning Execution System (JOPES), Vol I, Planning Policies and Procedures, and Vol II, Supplemental Planning Formats and Guidance, dealing with Appendix 7 to Annex C.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Request student quotas from parent MAJCOM TDO. Detailed information can be obtained by contacting HQ USAF/XOXT, 1480 Air Force Pentagon, Washington DC 20330-1480, DSN 223-2180/1046. Effective 1 Apr 95, AFIWC/OSW, 102 Hall Blvd, Ste 305, San Antonio TX 78243-7013, DSN 969-3166/3124, will replace HQ USAF/XOXT as course OPR.

Funding: Funding is the responsibility of the parent MAJCOM of each student unless otherwise directed by HQ USAF.

Quota Control: HQ USAF/XOXT.

Air Force Civil Engineer Support Agency (AFCESA)

3EXXX—Silver Flag Exercise Site Certification—PDS Code 0X8—Tyndall/1 wk—Oct 96

Provides crew task certification free from home station constraints. Prime base engineer emergency force (BEEF) and Prime Readiness in Base Services (RIBS) core crews train, practice, and are certified on contingency operations in a realistic environment for rapid deployment anytime, anywhere. The explosive clear zones, airfield pavement, facilities, equipment, and qualified cadre are located at the site so teams can train in actual contingency tasks under realistic conditions using the same hardware they would have in real world operations. Focuses on preparing crews and individuals to perform both beddown and base recovery tasks. Students are grouped by functional area (technical speciality) into crews for specialized training and task evaluation. Students will see the big picture when they participate in the beddown and base recovery exercises. Selected tasks are included in the exercises to show how the functional areas work together. Certain tasks require a specific performance standard be achieved under given conditions and resources. At the conclusion of the deployment, successful students are considered certified. Units will receive a letter naming all of the individuals in the unit who were certified that week. Certification is valid for 30 months from the date of successful completion of the curriculum.

Quota Control: Det 1, 823 RED HORSE SQ/CEO.

AFCESA 3E2X1—Heavy Equipment Warskills Proficiency Training—PDS Code 9H7—Ft Indiantown Gap/1 wk—Oct 96

Provides "hands-on" rapid runway repair (RRR) proficiency training on four key pieces of heavy equipment at Regional Equipment Operator Training Sites (REOTS). The course is designed for the equipment operator who has recently upgraded to the five-level skill and is filling a mobility position. Hands-on training is given on the following equipment: excavator, crawler tractor, 4yd3 loader, and the motor grader. The 8yd3 dump truck is also used as support equipment for the 4yd3 loader block of instruction. Equipment tasks covered in the course are only those that are directly related to the wartime RRR scenario.

Prerequisites: Individuals must be assigned to an active duty, Air Force Reserve, or Air National Guard civil engineering unit with a mobility mission. Possession of a three-level AFSC (3E231) is mandatory with a five-level (3E251) is desirable.

Special Requirements: Student must bring three sets of battle dress uniforms, safety-toed boots, leather work gloves, rain gear, hearing protection, field jacket, cold weather gear (winter months), a current US government ID, a current US military driver's license, and a current civilian driver's license. The course is strenuous with 51 hours of training during the 5 days; therefore, all students must be in excellent physical condition.

Reporting Instructions: Attendees must arrive at Area 1, Building 1-32, Feather Hall, 1 day before class start date NET 1000 hours and NLT 1800 hours.

Funding: Each MAJCOM is responsible for the travel and TDY expenses of their students. ANG/AFRES Personnel: Attendance will be on a 3-year rotational basis to maintain operator proficiency.

Quota Control: HQ AFCESA/CEX, Tyndall AFB FL 32403-5319. Individual units should request quotas through their MAJCOM.

Air Force Intelligence Support Agency (AFISA)

AIA 002—USAF SCI Security Management Course—PDS Code 0P2—Kelly/4 days—Oct 96

Conducted by the HQ Air Intelligence Agency Security Office (HQ AIA/SO). Deals with the management of special security office (SSO) operations; the security, use, and dissemination of sensitive compartmented information (SCI); physical, personnel and industrial security; and intelligence communications systems.

Prerequisites: For individuals who are or will be assigned to an SSO or in support of SSO operations. Open to contractor SSOs under the security cognizance of the Assistant Chief of Staff (Intelligence) and to non-Air Force SSOs on a space-available basis.

Selection Procedures: Selection is based on a prioritized ranking as follows:

a. SSO with no experience.

b. Alternate SSO with no experience.

c. SSO NCOIC with no experience.

d. SSO administrative personnel with no experience.

e. SSO government civilian employees with no experience.

f. Others.

Special Requirements: Top Secret/SCI clearance. Dress is duty uniform (excluding BDUs) or appropriate civilian attire as described in AFI 36-2903 (formerly AFR 35-10)/AFI 36-703, Civilian Conduct and Responsibility (formerly AFR 40-735).

Admin Instructions: Administrative details may be obtained by calling HQ AIA/SOC, DSN 969-4555 or DSN 969-5009. HQ AIA/SOC arranges for billeting. Course attendees are responsible for their own transportation.

Funding: TDY and per diem is the responsibility of the parent command under Program Element 31339.

AFIS 003—Intelligence Continuing Education Program (ICEP) (Graduate)—PDS Code 5PH—Wash DC/1 wk—Mar 84

This Defense Intelligence College (DIC) program allows intelligence professionals in the Washington DC area to enroll as part-time students and receive credit for courses taught at DIC. Courses cover a broad spectrum of subjects in the intelligence community, including collection, production, and dissemination. Courses normally consist of ten 3-hour sessions meeting weekly during an academic quarter. Classes are held both during duty and nonduty hours. (Attendance during duty hours requires prior coordination with student's supervisor.)

Prerequisites: Intelligence professionals, both DOD and non-DOD, in the Washington area, who meet the following criteria: designated intelligence specialist/subspecialist (military and civilian), or have a minimum of 2 years of intelligence experience; possess a bachelor's degree; meet the course prerequisites or secure instructor waiver. Students must meet security requirements of individual courses.

Application Procedures: Contact organizational training officer who will arrange for placement with the DIC Registrar. Names of nominees should be submitted to the Registrar at least 14 days before the start of each quarter. Registrar sends welcome package with instructions for inprocessing. The welcome package will include a student registration data form (DIA Form 306) to be completed and returned to the Registrar.

Classes start in September, January, and March.

AFIS 004—Field Interrogation Operations Course (Reserve)—PDS Code EJW—Camp Bullis TX/2 wk/AFSC 8021—Oct 95

Provides the knowledge necessary to function in a Joint Interrogation Facility under pre-war, limited war, and post-war conditions, as well as operations other than war. Emphasis is placed on HUMINT exploitation concepts and advanced interrogation techniques. Students participate in a practical exercise involving the operation of a joint interrogation facility. This field training exercise incorporates enemy prisoner of war (EPW) screening, interrogation, briefing, and debriefing operations. Students are introduced to field living conditions, exposed to EPW searching and handling practices, prepare intelligence reports and messages, and utilize communication procedures and equipment.

Prerequisites: Completion of combat interrogation course. 14N3A officers and 8D000 enlisted personnel with HUMINT or interrogation or debriefing assignments.

Special Requirements: Secret clearance by class start date. Duty uniform is BDU. Sanitized BDUs are required for interrogation practical exercises.

Quota Control: AFRIS/RE.

Air Force Inspection Agency (HQ AFIA)

IGC—USAF Complaints Course—PDS Code 137—Kirtland and various locations/1 day—Oct 96

Provides basic instruction in the Air Force complaint system. Includes lectures, videos, and seminars in complaints program history, governing directives and guidance, interview guidelines, reprisals, release of information, and the life cycle of a complaint. Personnel assigned to wing-level IG activities and managers of IG inquiry and investigation processes at headquarters should attend. Open to other Air Force personnel, as well as Army, Navy, and DoD civilian personnel on a space-available basis. Courses are offered an average three times a month and are conducted at HQ AFIA, MAJCOM headquarters, and other locations throughout the US Air Force.

Prerequisites: Assigned to wing-level IG or headquarters activity involved in complaints processing. Other personnel with inspection-related duties may be accepted on a space-available basis.

Quota Control: HQ AFIA/CVS (DSN 246-1558)

IGI—USAF Inspection Course—PDS Code PLS—Kirtland and various locations/2 days/MASL D169000—Oct 96

Provides an intensive 2-day orientation of Air Force inspection philosophy. Instruction includes lectures, videos, and seminars in inspection history; preinspection planning; findings development; validation; nonverbal communications; inspection techniques, quality Air Force assessments, and an overview of the Air Force complaints system. All new Air Force, MAJCOM, NAF, or FOA inspectors should attend the school as soon as possible. The school is open to other Air Force personnel, as well as Army, Navy, and DoD civilian personnel on a space-available basis. Classes are offered an average three times a month at HQ AFIA, MAJCOM headquarters, and other locations throughout the US Air Force.

Prerequisites: Assigned to any full-time IG activity, regularly assigned to augment IG teams, international military exchange officers filling an Inspector General staff position. Other personnel with inspection-related duties may be accepted on a space-available basis.

Special Requirements: Should have participated in at least one, but preferably not more than three, inspection trips. Complete course within 90 days of assignment to inspection duties. (Does not apply to oversea commands.)

Quota Control: HQ AFIA/CVS (DSN 246-1558).

Air Force Materiel Command (AFMC)

AFMC SCO—AFMC Squadron Commanders' Orientation—PDS Code 4YV—Wright-Patterson/1 wk—Oct 95

Prepares officers to assume command of AFMC squadrons. Introduces students to their legal and ethical obligations as a commander within the context of Air Force and command policy.

Prerequisites: Active duty officers selected for or serving as commanders of AFMC squadrons. (This course is not intended for squadron section commanders.)

Admin Instructions: Students must provide the following to AFMC/DPPQ no later than 30 days before class start date: name, grade, SSN, current duty title, address, duty telephone, projected duty assignment, projected address, and projected telephone number.

MHPQUA000100SU—Quality Leadership for Managers—PDS Code W2G/various locations/duration *—Jun 93

Links continuous improvement under DOD's total quality management approach to the mission of Air Force Materiel Command (AFMC). Emphasis on when and where methods can be applied in day-to-day operations. The DOD Guide to Total Quality as well as AFMC initiatives are explained so students can use them to guide their personal day-to-day efforts. The supporting concepts of total quality such as statistical process control, customer and supplier relationships, continuous improvement philosophy, basic communications skills, and participative management and teamwork techniques are covered to illustrate their importance. Students will practice the basic tools of process improvement in order to provide first-hand experience in process analysis, data collection, and statistical process control. Graduates should leave with enough information to enable them to draft their own quality improvement plan.

Prerequisites: Must serve as a military or civilian supervisor or manager.

Admin Instructions: Contact the Human Resources Development Office at each of the following locations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH; OC-ALC/DPU, Tinker AFB OK; OO-ALC/DPU, Hill AFB UT; SA-ALC/DPU, Kelly AFB TX; WR-ALC/DPU, Robins AFB GA; AMARC/TIR, Davis-Monthan AFB AZ; and 6500 SW/MSU, Edwards AFB CA. Contact the Total Quality Office at AFDTC/TQ, Eglin AFB FL. Also known as Quality Leadership Workshop at Wright-Patterson AFB OH; Managers TQM Awareness and Implementation at Edwards AFB CA; Quality Leadership Workshop at Eglin AFB FL; and Centers of Excellence (Equivalency) at Hill AFB UT.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MHPQUA0000400SU—Quality Participation for Employees—PDS Code W2K—various locations/duration *—Jun 93

Discusses the fundamentals of quality group dynamics and the quality management philosophies of Deming, Juran, Crosby, and

other quality advocates. Includes in-depth discussions on the DOD total quality initiative, local quality programs, the various steps in process improvement including tools and techniques, styles of management, the role of empowerment, communication skills, and ways the employees can become personally involved in continuous process improvement. Also discusses the importance of an organization having a positive relationship with both the suppliers and the customers.

Prerequisites: Designed for nonsupervisory personnel at all locations except McClellan AFB CA, Hill AFB UT, Los Angeles AFB CA, and Norton AFB CA where all personnel may attend.

Admin Instructions: Contact the Human Resources Development office at each of the following locations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH; OC-ALC/DPU, Tinker AFB OK; OO-ALC/DPU, Hill AFB UT; SA-ALC/DPU, Kelly AFB TX; SM-ALC/DPU, McClellan AFB CA; WR-ALC/DPU, Robins AFB GA; and AMARC/TIR, Davis-Monthan AFB AZ. Contact the Total Quality Office at AFDTC/TQ, Eglin AFB FL; SMC/TQ, Los Angeles AFB CA; ESC/CCT, Hanscom AFB MA; and BMO/TQ, Norton AFB CA. Also known as TQM for Everyone at McClellan AFB CA; Centers of Excellence (Equivalency) at Hill AFB UT; Qualilty Leadership Workshop at Eglin AFB FL; and Total Quality Management Concepts Awareness at Hanscom AFB MA; TQ Principles at Los Angeles AFB CA; and Coaching at Norton AFB CA.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MKHQUA0003400SU—Process Action Team—PDS Code W2H—various locations/duration *—Jun 93

Provides process action team (PAT) members with team building skills and process improvement training. Covers PAT responsibilities, group dynamics, team building, idea-generating techniques, process improvement techniques, flowcharting, customer and supplier relationships, cause and effect diagrams, data collection sampling, graphics, and charts. The characteristics of a successful PAT are identified and explained. Students will learn to identify standardized processes and opportunities for improvement. Graduates must be able to lead or participate in an effective PAT. This training may be led by a certified team facilitator or advisor who may also remain assigned to the PAT as it performs its assigned responsibilities.

Prerequisites: Attendees must be scheduled to lead or participate in a PAT. At some locations, requires prior attendance and completion of the quality participation for employees or quality leadership for managers course as appropriate for the employee.

Admin Instructions: Contact the Human Resources Development office at each of the following locations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH; OC-ALC/DPU, Tinker AFB OK; OO-ALC/DPU, Hill AFB UT; SA-ALC/DPU, Kelly AFB TX; SM-ALC/DPU, McClellan AFB CA; WR-ALC/DPU, Robins AFB GA; AMARC/TIR, Davis-Monthan AFB AZ; 4960 ABS/DPU, Arnold AFB TN; 6500 SW/MSU, Edwards AFB CA; and HQ HSC/DPU, Brooks AFB TX. Contact Total Quality Office at AFDTC/TQ, Eglin AFB FL; SMC/TQ, Los Angeles AFB CA; BMO/TQ, Norton AFB CA; and ESC/CCT, Hanscom AFB MA. Also known as PIT Leader/Leading Quality Planning Teams and TQM Process Improvement Team Training at Arnold AFB TN; Facilitator/PAT Leader and PAT Member at Edwards AFB CA; Team Facilitator and CPI Bootcamp at Los Angeles AFB CA; CPI Bootcamp, Process Action Team Training, and Program Management Handbook at Norton AFB CA; Delta Team Start-Up at Hanscom AFB MA; PIT Workshop and Teambuilding at Eglin AFB FL; PAT Member at Brooks AFB TX; and Team Tools I at Hill AFB UT.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MLKQUA0003200SU—Basic Tools—PDS Code W2M—various locations/duration *—Jun 93

Provides concepts and techniques of tools as they relate to quality planning efforts. Participants will develop an understanding of each tool and useful ways to apply, interpret, and explain each tool. Depending upon location, representative tools include affinity diagrams, brainstorming, flowcharting, basic quantitative methods of runcharts, scatter diagrams, histograms, an introduction to statistical process control, approach to metrics, communication and interpersonal skills, group dynamics (brain mapping, role development), effective meetings, and methods for developing specific action plans for taking charge of changes affecting work groups. In-class exercises are used to reinforce lesson points.

Prerequisites: Designed for all personnel. Depending upon location, may require completion of introduction, team training, or leader and facilitator courses.

Admin Instructions: Contact the Human Resources Development office at each of the following locations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH, and 4960 ABS/DPU, Arnold AFB TN. Contact the Total Quality Office at AFDTC/TQ, Eglin AFB FL; ESC/CCT, Hanscom AFB MA; and SMC/TQ, Los Angeles AFB CA; and BMO/TQ, Norton AFB CA. Also known as Quality Improvement Tools and Quality Planning Tools at Arnold AFB TN; Total Quality Tools at Hanscom AFB MA; TQ Principles at Los Angeles AFB CA; Managing Change, Management Principles, Communications and Interpersonal Skills, Group Dynamics, Coaching, and Meetings by Design at Norton AFB CA; and Metrics Workshop Modules I, II, and III at Eglin AFB FL.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MLKQUA0003300SU—Advanced Tools—PDS Code W2F—various locations/duration *—Jun 93

Depending upon location, provides instruction in advanced quality tools such as design of experiments and quality function deployment. Covers the basic statistics, concepts of probability, hypothesis testing, regression analysis, control charts, and process capability. Students will learn to apply these skills in experimental charts. The course teaches a systematic approach for translating customer needs and wants into the technical requirements used in design, development, and production. Students will learn how to minimize communications problems, requirements interpretations, disagreements, long development cycles, and frequent design changes. At Hanscom AFB MA, the workshop helps the students detect, measure, and reduce variation; set up, conduct, and analyze an experiment on a real process; apply Taguchi's Loss Function; and select engineering-related responses correlating to the ideal engineering function of their products. It presents numerous case studies and class exercises.

Prerequisites: Some locations may require basic statistics, algebra, or math, or may allow credit for experience.

Admin Instructions: Contact the Human Resources Development office at 645 MSSQ/MSUMQ, Wright-Patterson AFB OH. Contact the Total Quality Office at ESC/CCT, Hanscom AFB MA. Also known as Design of Experiments at Wright-Patterson AFB OH and Design of Experiments (Blending the Best of the Best Experimental Design Techniques), Quality Function Deployment and Total Quality Tools at Hanscom AFB MA.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MMUQUA0003100SU—Facilitator—PDS Code W2E—various locations/duration *—Jun 93

Provides the knowledge and tools required to assist groups involved in process improvement. Includes instruction on briefing techniques, observation feedback, understanding personality differences, team project preparation, understanding value programming, personal awareness, listening skills, body language, whole brain communication, group consensus training, effective meetings through facilitation, developing intervention skills, team building, stages of group development, seven steps to process improvement, collecting data, cause and effect and sequence diagrams, and other quantitative tools and techniques.

Prerequisites: Should have been selected to serve as a facilitator/advisor for process improvement teams. Some locations require prior completion of an employee's or manager's and process action team course. Certain locations operate courses to prepare individuals as instructors in facilitation skills.

Admin Instructions: Contact the Human Resources Development office at each of the following locations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH; OC-ALC/DPU, Tinker AFB OK; OO-ALC/DPU, Hill AFB UT; SA-ALC/DPU, Kelly AFB TX; SM-ALC/DPU, McClellan AFB CA; WR-ALC/DPU, Robins AFB GA; AMARC/TIR, Davis-Monthan AFB AZ; 4960 ABS/DPU, Arnold AFB TN; 6500 SW/MSU, Edwards AFB CA; and HQ HSC/DPU, Brooks AFB TX. Contact Total Quality Office at AFDTC/TQ, Eglin AFB FL; SMC/TQ, Los Angeles AFB CA; ESC/CCT, Hanscom AFB MA; and BMO/TQ, Norton AFB CA. Also known as Facilitating Juran on Quality Improvement and Facilitating Juran on Quality Planning at Arnold AFB TN; PAT Leader/Facilitator at Edwards AFB CA; TQ Advisor at Hanscom AFB MA; Team Facilitator and Lead Facilitator at Los Angeles AFB CA; Facilitator Training (Basic) and Leadership in Facilitation Training at Norton AFB CA; Facilitator/Advisor Course and Coaches Course at Eglin AFB FL; and Facilitator I at Brooks AFB TX.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MRXQUA0003500SU—Statistical Process Control (SPC)—PDS Code W2N—various locations/duration *—Jun 93

Provides a review and in-depth study of the techniques needed for applying SPC within the work environment. Items covered include basic tools, control charts, pareto charts, cause and effect diagrams, scatter diagrams, flowcharts etc. An SPC software tool, a hybrid machine-learning and expert system, is included as part of the course at certain locations. The tool automates the process of constructing and interpreting control charts and scatter diagrams. It also automates the process of constructing bar graphs, pie charts, pareto diagrams, histograms, frequency polygons, and ogives (CDFs). Based on input from your own situation, the software determines which type of control chart (X-Bar, R, p, pn, u, and c) is appropriate for the situation, displays the chart, and identifies chart patterns (trends, cycles, runs, points, etc.).

Prerequisites: Some locations require completion of a tools, problem solving, employee's, or manager's quality course. Preferred audiences at Hill AFB UT are teams who have collected data and are ready to begin analysis of the data.

Admin Instructions: Contact the Human Resources Development office at each of the following locations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH; OC-ALC/DPU, Tinker AFB OK; OO-ALC/DPU, Hill AFB UT; SA-ALC/DPU, Kelly AFB TX; SM-ALC/DPU, McClellan AFB CA; and WR-ALC/DPU, Robins AFB GA. Contact the Total Quality Office at ESC/CCT, Hanscom AFB MA. Also known as SPC-PC II and Team Tools II at Hill AFB UT; Statistics at Brooks AFB TX; and Penny Antics (Statistics) at Wright-Patterson AFB OH.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MTECCS0025700SU—Engineering Installation Project Engineering Course—PDS Code 8YF—Tinker/2 wk—Apr 95

Provides formal training on proper preparation of communications-computer systems projects in support of worldwide Air Force, MAJCOM, and other communications agencies. Includes origin, development and management of engineering-installation workload, publications familiarization, support engineering, communications-computer systems planning and pre-project engineering, project package composition and preparation, special actions, project review, changes to project packages, engineering assistance, and quality assurance and control.

Prerequisites: Officers and civilians with electrical engineering degrees performing duties in as communications-computer systems engineers. Selected NCOs and civilians performing duties as engineering technicians or as quick implementation capability technicians or team chiefs.

Quota Control and OPR: CSC/TE.

MTECCS0026100SU—Electronics Installation Team Chief Course—PDS Code 8XZ—Tinker/2 wk—Apr 95

Provides formal academic instruction to prepare electronics installation (EI) technicians in team management as EI team chiefs. Includes origin and management of EI workload, communications-computer systems project package composition, project package review and documentation, supply procedures, predeployment and post-deployment procedures, preimplementation surveys, project actions, project completion documentation, EI deficiency reporting, and management. Provides familiarization training for selected officers and NCOs in supervisory or managerial positions within the EI environment.

Prerequisites: Officers, NCOs, or civilians (GS-7/WG-6 or above), in AFSCs 33CX, 2EXXX, and other personnel serving in related duties. Personnel attending as team chief nominees must have completed an approved EI Standard Installation Practices Training Course and have completed 60 days training during project actions or mobile depot maintenance under the guidance of a certified EI team chief. Waivers may be granted on an individual basis.

Quota Control and OPR: CSC/TE, Tinker AFB OK.

MTECCS0026300SU—Engineering Installation Program Managers Course—PDS Code PDR—Tinker/2 wk—Apr 95

Provides formal training in the policies and procedures for managing communications-computer systems programs and projects in support of the worldwide Air Force, MAJCOM, and other communications agencies and branches of services. Introduces the student to the functions of program management and the roles and responsibilities of the program manager. Includes program management structure, communications-computer systems requirements processing, planning and programming and budgeting system, contracting, acquisition logistics, the Workload Management System, and the functions of the engineering and installation workforce.

Prerequisites: Officers, NCOs, and civilians in AFSCs 33CX, 2EXXX, 3CXXX, and other personnel serving as EI communications-computer systems program managers and other related duties. Selected officers, NCOs, and civilians performing similar duties in communications units will be accepted on a space-available basis. Students must possess a working knowledge of Air Force microcomputers.

Quota Control, Waiver Authority, and OPR: CSC/TE, Tinker AFB OK.

MTEQUA0000300SU—Introduction for New Employees—PDS Code W2J—various locations/duration *—Jun 93

Introduces total quality (TQ) to the newcomer and points to TQ as both a philosophy and a set of guiding principles that represent the foundation of a continuously improving organization. One of the principles discussed is the importance of a positive supplier and customer relationship with the organization. The orientation consists of a discussion of the leaders in quality philosophy, the commander's goals, DOD outlook on TQ, and the Air Force and Air Force Materiel Command strategies.

Prerequisites: None; designed for any newcomer to an organization or location.

Admin Instructions: Contact the Human Resources Development office at each of the following lcoations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH; OC-ALC/DPU, Tinker AFB OK; OO-ALC/DPU, Hill AFB UT; SA-ALC/DPU, Kelly AFB TX; SM-ALC/DPU, McClellan AFB CA; WR-ALC/DPU, Robins AFB GA; AMARC/TIR, Davis-Monthan AFB AZ; 4960 ABS/DPU, Arnold AFB TN; HQ HSC/DPU, Brooks AFB TX; 6500 SW/MSU, Edwards AFB CA; and SMC/DPU, Los Angeles AFB CA. Contact Total Quality Office at AFDTC/TQ, Eglin AFB FL; ESC/CCT, Hanscom AFB MA; and BMO/TQ, Norton AFB CA. Also known as TQM Awareness at Arnold AFB TN; TQM Orientation at Edwards AFB CA; Total Quality Management Concepts Awareness at Hanscom AFB MA; Newcomers Orientation at Los Angeles AFB CA; TQ Awareness at Eglin AFB FL; and TQ Orientation at Norton AFB CA. Course is part of the Total Quality Office function at Hill AFB UT.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MWEOPS0002300SU—Introduction to Acquisition Security—PDS Code XJB—location: all AFMC centers/40 hours—Mar 94

Provides sufficient guidance to enable students to achieve a basic understanding of the Systems Acquisition Management processes. Covers the concepts of System Security Engineering (SSE) Management and the relationship to the systems acquisition process. Students will develop basic skills in planning, analyzing, executing, and controlling acquisition security projects in the system program office environment.

Target Audience: Security specialists, GS080/086, AFSC 81XX/811XX.

Prerequisites: Designed for security specialists whose duties require at least 50% of time devoted to acquisition-related responsibilities in providing security support to program management for the development of weapon systems or components. Nonsecurity personnel may attend this course on a space-available basis.

Admin Instructions: Contact the Human Resources Development office at each of the Air Force Material Command bases.

Quota Control: Contact each applicable AFMC base Human Resources Development office.

MXXQUA0002200SU—Teambuilding—PDS Code W2P—various locations/duration *—Jun 93

A process in which a team, with assistance from consultants, builds its awareness of the key factors that influence team performance, examines its own functioning with respect to those factors, and takes action to improve its effectiveness. Provides a workshop for quality improvement, natural work, and an autonomous team to increase productivity and efficiency. Utilizes the six Cs model of common ground, committed action, communicating openly, collaboration vs competition, customer focus, and clear goals and roles. The teams will leave the workshop with action plans in each of the six Cs. The Myers-Briggs type indicator personality styles survey is used to reinforce the understanding of team members. In-class exercises are used to reinforce lesson points.

Prerequisites: Designed for all teams. Actual teams will attend the session together. Must have either an existing working relationship or a customer and supplier relationship with one another (common ground). Depending upon location, may require completion of employee awareness, quality participation for employees, or quality leadership for managers.

Admin Instructions: Contact the Human Resources Development office at each of the following locations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH; OO-ALC/DPU, Hill AFB UT; SA-ALC/DPU, Kelly AFB TX; and SM-ALC/DPU, McClellan AFB CA. Course is facilitated by AFDTC/TQ, Eglin AFB FL. Contact the Total Quality Office at AGMC/TQ, Newark AFB OH.

Quota Control: Contact each of the above locations.

*Course duration varies by team and location.

MXXQUA0003600SU—Executive—PDS Code W2L—various locations/duration *—Jun 93

Provides upper levels of leadership with an understanding of the continuous improvement cycle and their crucial role in the continuous improvement process. Provides upper level management with underlying knowledge and skills to help lead change in their own environment. Includes review of vision, goals, and objectives, role clarification, action planning, change management, underlying foundation of quality leadership, process improvement, duties of team leadership, and various coaching and communication tools and skills.

Prerequisites: Designed for executive and managerial level personnel. Depending upon location, may require completion of introduction or manager's course.

Admin Instructions: Contact the Human Resources Development office at each of the following locations: 645 MSSQ/MSUMQ, Wright-Patterson AFB OH; 6500 SW/MSU, Edwards AFB CA. Contact Total Quality Office at AFDTC/TQ, Eglin AFB FL, and

SMC/TQ, Los Angeles AFB CA. Also known as Executive Action Renewal Workshop (Strategic Planning) at Wright-Patterson AFB OH; TQM Executive Overview at Edwards AFB CA; The Leader and Continuous Improvement at Los Angeles AFB CA; and Management Implementation Workshop, TQ Coaches, and Executive Quality Leadership at Eglin AFB FL.

Quota Control: Contact each of the above locations.

*Course duration varies by location.

MWECCS0008300SU—CA/DATAQUERY—PDS Code MRA—various locations/2.5 days—Oct 96

Provides Air Force personnel with the knowledge of how to retrieve data from a database using DATAQUERY. The audience should consist of end users and application programmers. Course topics include: the use of DATAQUERY's on-line functions, the specialized methods for accessing information, building and maintaining a query library, and completing on-line workshops which demonstrate the various features of Guided Query and Query Editor. Users will retrieve data using Guided Query, save a query for later recall, qualify and manipulate data for display and print, keep or extract record collections for later use, retrieve data using Query Editor, submit queries through the batch facility, and create terms and dialogs.

Requirements for Course Credit: Completion of required lessons.

Entry and completion controlled by Chief, Computer Training Element (88MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

MWECCS0008500SU—CA/IDEAL—PDS Code MRB—various locations/1 wk—Oct 96

Provides Air Force personnel with the knowledge of the basic concepts, facilities, and terminology of IDEAL. The audience should consist of system programmers and database administrators. Course topics include: creating, compiling, documenting, testing, and running applications using the appropriate IDEAL statements and constructs. Users will conduct an IDEAL terminal session, demonstrate an understanding of IDEAL terminology, utilize the functions of the IDEAL editors, and demonstrate an understanding of how IDEAL integrates with the DATACOM environment.

Requirements for Course Credit: Completion of required lessons.

Entry and completion are controlled by Chief, Computer Training Element (88 MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

MWECCS0008600SU—CA/LIBRARIAN—PDS Code MRC—various locations/3 days—Oct 96

Provides Air Force personnel with a basic understanding of the usage of LIBRARIAN. The audience should consist of system programmers, application programmers, and database administrators. Course topics include adding and maintaining LIBRARIAN modules, using utility functions, archiving, source load audit trails, and using COMPARATOR II. Users will create modules of code for the LIBRARIAN system, add or modify the LIBRARIAN modules, combine modules from multiple libraries, retrieve modules from the libraries, and produce LIBRARIAN reports.

Prerequisites: Completion of CA/ROSCOE is mandatory.

Requirements for Course Credit: Completion of required lessons and achieving a minimum 70% score on examinations.

Entry and completion are controlled by Chief, Computer Training Element (88 MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

MWECCS0008700SU—CA/ROSCOE—PDS Code MRP—various locations/2.5 days—Oct 96

Provides Air Force personnel with a thorough understanding of this on-line program development and maintenance system. The audience should consist of system programmers, application programmers, and data base administrators. Course topics include: utilization of ROSCOE commands, editing facilities, and commands required to access and update LIBRARIAN modules. ROSCOE commands will be used to process jobs, and to enter, edit, and store data. Users will also recognize the function of the various PF/PA keys necessary for the use of ROSCOE.

Requirements for Course Credit: Completion of required lessons and achieving a minimum 70% score on examinations.

Entry and completion are controlled by Chief, Computer Training Element (88 MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

MWECCS0009400SU—MVS/JCL—PDS Code MRD—various locations/3 wk—Oct 96

Provides Air Force personnel with an understanding of MVS/XA Job Control Language (JCL), which is used in conjunction with the IBM Operating System to allocate resources and facilities for all job requirements. The audience should include application programmers, system programmers, data base administrators, operators and recovery personnel. Course topics include JCL syntax structure, datasets, VSAM, IBM utilities, JES2 commands, naming conventions, job submission, and generation data groups.

Prerequisites: Completion of CA/ROSCOE.

Requirements for Course Credit: Completion of required lessons and achieving a minimum 70% score on examinations.

Entry and completion are controlled by Chief, Computer Training Element (88 MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

MWECCS0009000SU—CA/DATACOM/DB Application Programming—PDS Code MRK—various locations/1 wk—Oct 96

Provides Air Force personnel with the knowledge of how to code DATACOM/DB native call programs. The audience should consist of application programmers. Course topics include: the CA environment, the introduction to the DATACOM/IDEAL environment for the application programmer, programming with DATACOM/DB, and debugging application programs with the CICS Service Facility. Users will define the basic terms associated with the DATACOM/IDEAL environment, list the basic concepts of the record-at-a-time and set-at-a-time methods of accessing data, develop DATACOM/DB application programs using correct DATACOM/DB commands to perform basic application tasks and table maintenance, link edit and execute programs using DATACOM/DB, consider the application design and testing issues related to programming with DATACOM/DB, and use the CICS Service Facility transaction to debug an on-line application program.

Prerequisites: Completion of CA/ROSCOE and CA/DATADICTIONARY. Familiarity with COBOL programming.

Requirements for Course Credit: Completion of required lessons and

achieving a minimum 70% score on examinations.

Entry and completion are controlled by Chief, Computer Training Element (88 MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

MWECCS0008800SU—CA/ROSCOE RPF—PDS Code MRM—various locations/2.5 days—Oct 96

Provides Air Force personnel with an understanding of the commands provided in the Roscoe Programming Facility (RPF). The audience should consist of system programmers, application programmers, and data base administrators. This course combines the functions of RPF and ROSCOE commands. Users will code RPF procedures, build RPF panels, and code specific RPFs that will prompt other uses for information and test their responses.

Prerequisites: Completion of CA/ROSCOE is mandatory.

Requirements for Course Credit: Completion of required lessons and achieving a minimum 70% score on examinations.

Entry and completion are controlled by Chief, Computer Training Element (88 MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

MWECCS0010700SU—'C' Language Programming—PDS Code MRN—various locations/3 wk—Oct 96

Provides Air Force personnel with a thorough working knowledge of all aspects of this high/low level language, with content suitable for both UNIX and non-UNIX 'C' applications. The audience should consist of system programmers, field engineers, and customer support personnel. Course topics include: the background of 'C' language, defining identifiers and data types, programming constructs, arrays, the preprocessor and standard library functions.

Prerequisites: Previous programming experience.

Requirements for Course Credit: Completion of required lessons and achieving a minimum 70% score on examinations.

Entry and completion are controlled by Chief, Computer Training Element (88 MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

MWECCS0026800SU—CA/Reporting Facility—PDS Code MX6—various locations/2.5 days—Oct 96

Provides Air Force personnel with the techniques for producing formatted reports quickly and easily with DATAREPORTER. The audience should consist of application programmers. Course topics include: writing DATAREPORTER programs, using proper program structure, learning correct command format, and using various file access routines. Users will code file access routines, recognize predefined labels and reserved words, describe the function of various commands, and demonstrate an understanding of the interrelationship of processes to manipulate files.

Prerequisites: Completion of CA/DATAQUERY and CA/ROSCOE is mandatory.

Requirements for Course Credit: Completion of required lessons and achieving a minimum 70% score on examinations.

Entry and completion are controlled by Chief, Computer Training Element (88 MSS/DPETC). Send comments and suggestions to 88 MSS/DPETC, WPAFB OH 45433.

United States Air Force Security Police (USAF/SP)

SP8124—FBI National Academy—PDS Code SDB—Quantico*/11 wk—Jan 96

Preparation in law, forensic science, management principles, police science, communications arts, and the vocational aspects of law enforcement.

Prerequisites: Security police officers (Capt to Lt Col) and NCOs (TSgt to CMSgt); between 25 and 50 years of age; and have 5 years of continuous experience in the security police career field. Applicants must be stationed in the CONUS, US territory or possession, or overseas at locations conveniently serviced by a legal attache' office of the US Embassy. All personnel must meet current Air Force physical and weight standards and participate in strenuous physical training, including physical defense tactics and firearms training. Must have high school diploma or equivalent and be of exemplary character.

Special Requirements: Must have approval of applicant's unit commander/CSP, installation commander, and MAJCOM CSP (HQ AFRES/SP or ANG/SP).

Application Procedures: Local FBI offices (legal attache' at US Embassy) have applications, FD Form 164 and 164a. Applicant's package must contain a completed FD Form 164 and 164a; nomination resume, using the format shown in figure 11.1, one passport type photograph not exceeding 2.75 by 2.25 inches in size and bearing the applicant's printed name and date taken on the back; and endorsements from the unit and installation commander. The completed package is forwarded to the MAJCOM CSP (AFRES/CSP or ANG/CSP) for concurrence and endorsements before sending to HQ USAF/SPX, 1340 Air Force Pentagon, Washington DC 20330-1340. Applications will be on file for four boards. Individuals may not reapply for 1 year from the original application's last board. For example, an individual's original package was reviewed by the fourth board Jul 93; he or she is not eligible to reapply before Jul 94. Updates of information in the package are the responsibility of the individual. Minor updates may be made by phone calls; major changes will require a new narrative letter change to the original package. All changes must be verified by the appropriate commander prior to being forwarded to HQ USAF/SPX.

Funding: Funding is the responsibility of the unit of assignment of the individual selected to attend IAW current JTR directives. Present financial commitment is travel from home base to the FBI Academy and return, the student assessment fee, and civilian clothing allowance (for enlisted personnel).

NOTE: Selection board normally meets in Jan, Apr, Jul, and Oct. Selections are made 1 year in advance, e.g., the Jul 93 board selects for the class beginning in Jul 94. Judging criteria and associated values used by the board are 20% for previous accomplishments, 10% for education, and 70% for present assignment, responsibilities, and accomplishments.

Quota Control: Chief of Security Police, HQ USAF/SP.

OPR: HQ USAF/SPX (DSN 224-8642/8646).

*FBI National Academy, Quantico Marine Corps Base, Quantico VA 22134.

Air Force Office of Special Investigations (AFOSI)

5OBO71S1 001—Special Investigators Course (SIC)—PDS Code 0D8—DOD224—Andrews/12 wk/AFSC 71S1/ 7S071/MASL D173016—Oct 96

An entry-level course which provides training in basic investigative skills and techniques. Students receive classroom

instruction in such topics as the AFOSI mission, jurisdiction, policy, civil and military law, theory and application of investigative techniques, report writing, interview techniques, evidence collection and preservation, technical equipment and scientific aids used in investigations, use of firearms, apprehension techniques and self-defense tactics. In addition to USAFSIA staff instructors, some training blocks feature guest speakers from other Federal investigative agencies. Students also receive instruction in total quality management/leadership principles. In addition to classroom instruction, students participate in extensive practical exercises that further enhance their knowledge and skills. Provides basic investigative training to agent trainees selected to fill existing AFOSI special agent vacancies created due to separation and retirement. Also, fills the requirement to award the 3-skill level for enlisted personnel. USAFSIA funds student travel and per diem.

Prerequisites: SSgt or higher or an equivalent civilian position. Completion of high school or equivalent. Have applied for AFOSI duty through the local MPF. Candidates will undergo extensive inquiry into their background and personal history to determine suitability for AFOSI duties. Intelligence and high moral standards are essential, but equally important are impeccable character and an awareness of the importance of ethical conduct in all social and professional relationships. Enlisted members must have completed all retainability documents (reenlisted or extended their enlistment) to have 4 years of retainability beyond class graduation date.

Frequency of classes: Four per year.

Reporting Instructions: Report to the billeting office at Andrews AFB NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. Overseas students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Washington DC, if possible. Students with overseas assignments must begin passport processing for an official passport before arrival at the Academy. Students should attempt to complete the 9mm (handgun) qualification course before arrival.

Selection Process: Candidates accepted for assignment to AFOSI will attend SIC.

Clothing Requirements: Military uniform is required for approximately 60% of class schedule; casual attire worn occasionally. Students should bring at least one pair of long tan/khaki pants (a second pair is optional) and one leather belt (at least 1 1/2" wide). Shirts with USAFSIA logos are available at the academy. Be sure to bring sufficient outer wear (i.e., coat or jacket) for outdoor activities. Students will be required to wear agent attire approximately 25% of the time, so students should bring sufficient attire for this. Conservative business attire suits, sports coat and slacks for men and business suits, skirts, or dresses for women. Students will be required to participate in physical activities and aerobic conditioning and should bring at least one gray sweatsuit or gray gym shorts and athletic shoes.

ADSC: Seventeen months.

Quota Control: USAFSIA/CC.

OPR: HQ AFOSI/DPPT.

5OBO71S1 002—Reserve Special Investigators Course (RSIC)—PDS Code 0X2—DOD 224/Andrews/2 wk/AFSC 71S1—Apr 96

Entry level course designed for personnel with prior law enforcement experience who have been selected for reserve (AFRES) duty as AFOSI special agents. Reservists receive training in AFOSI mission, jurisdiction, policy, and investigative techniques. As most AFOSI reservists are active law enforcement officers, this course is designed to acclimate the Reserve agents with AFOSI methodologies and is tailored to their needs with consideration for prior experience. Provides basic investigative training to individuals selected to fill existing reserve special agent vacancies within AFOSI. Course is funded by AFRES.

Prerequisites: Prior training evaluated by Reserve Training Assessment Board (RTAB). Upon evaluation, RTAB determines amount of field training required as prerequisite. Student must complete all required field training before attendance.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Reserve Training Assessment Board.

Quota Control: HQ AFOSI/TU.

OPR: USAFSIA/CBC.

5OSO71S0 000—Counterespionage (CE) Case Officers Course—PDS Code ZQU—Andrews/4 wk—Apr 96

Specialized course designed for AFOSI special agents selected for case officer duty (9Q) at various AFOSI field units. Students are provided training in the conduct of counterespionage operations which fall under the DoD special access program TIGHT DOOR. Curriculum areas include operations development and management, operational planning and analysis, source/asset handling and validation, surveillance and countersurveillance, and operational reporting and dissemination. Students will also gain an understanding of the foreign intelligence service threat and modus operandi. Orientation on AFOSI's role within the counterintelligence community and other national level programs is also provided. Hands-on practicums are accomplished throughout the course. Instructions are provided by AFOSI personnel and other US Government agencies. Provides selected AFOSI special agents with preparatory training and skills needed to accomplish their duties as AFOSI CE case officers.

Prerequisites: Students should have completed their probationary agent program and have at least 2 years of investigative experience and be selected for assignment to a 9Q position at an AFOSI field unit. This will likely result in a PCS move. Must have received Level I indoctrination for the TIGHT DOOR program. USAFSIA funds student travel and per diem.

Special Requirements: Top Secret clearance and meet SCI access eligibility and successfully complete a security screening polygraph examination.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. Students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Process: Selection authority is AFOSI/XOC. IOC/CEO and HQ AFOSI/DPR will identify training needs during an annual screening. The HQ AFOSI/XOC program manager, in concert with

IOC/CEO and DPPT, will staff these requirements to USAFSIA for development of course schedule and frequency. Attendance is voluntary and interested individuals should forward an application through their region commanders or headquarters directors. A board chaired by HQ AFOSI/XOC with membership from IOC/CEO, USAFSIA, and DP will select attendees for classes. Criteria includes: time as an AFOSI special agent, time in service, time on station, experience level, source handling experience, counterintelligence experience, grade level, and supervisor/region commander/HQ director recommendation.

ADSC: Six months.

5OSO71S0 001—Counterintelligence/Force Protection Operations Workshop—PDS Code XZ7—various locations/2 wk—Oct 96

Provides AFOSI military special agents with the critical skills necessary to accomplish counterintelligence and force protection support to deployed US military forces worldwide. Provides preparatory training for deployment into tactical or hostile environments in support of US forces. Classroom instructions and hands-on field training are employed throughout the course. Students receive training in deployment requirements; air base defense methodology; terrorism; advanced firearms tactics to include night firing; combined weapons tactics and vehicle deployment/firing techniques; advanced defensive driving techniques to include accident avoidance, evasive tactics and attack recognition; environmental survival and land navigation; counterintelligence collections and force protection support; developing source networks; and protective service operations. A 2-day field training exercise is also included in the course. Training is conducted under field conditions and some blocks of instruction are taught at the secret level. Training is good for 5 years from graduation date before students must attend another class. USAFSIA funds student travel, per diem, and course costs.

Prerequisites: AFOSI military special agent with at least 18 months of experience who has completed the probationary agent program.

Reporting Instructions: Specific instructions will be provided upon selection to attend course.

Selection Process: Selection authority: Region commander. HQ AFOSI/XOX will identify units needing training based on the following priorities: training required to upgrade specific unit readiness status under SORTS, training for specific individuals programmed for PCS to short tour areas (by-name), training required to meet ORI inspector qualifications, or fill annual quota requested by each region.

ADSC: Six months.

Quota Control: HQ AFOSI/DPPT.

5OSO71S0 002—Advanced Security Vulnerabilities Course—PDS Code OMV—Andrews/2 wk—Apr 96

Provides selected AFOSI technical agents with the preparatory and advanced skills necessary to perform technical surveillance countermeasures surveys and technical support operations in support of Air Force and DoD commanders. Provides AFOSI technical agents with an indepth knowledge and understanding of locks and locking devices. Students are taught the skills needed to neutralize or enhance such devices. Considerable emphasis is placed on craftsmanship of locking devices with numerous practical exercises for the students. Training will enable students to evaluate students to evaluate overall security posture and perform entries under AFI 71-101 and AFOSI 71-103. USAFSIA funds student travel and per diem.

Prerequisites: Must have completed the AFOSI basic technical agent course (BTAC) and have 1 year of experience as a technically trained special agent.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 003—Protective Service Operations (PSO) Antiterrorism Workshop—PDS Code 329—Richmond/3 wk—Oct 96

Provides AFOSI special agents with preparatory and advanced skills necessary to perform protective service operations supporting Air Force resources or support operations with other Federal agencies. It provides background information for the initiation of an eclectic antiterrorism program to provide force protection worldwide. Provides AFOSI special agents planning, management, and initiation training for protective service operations. It also includes the preparation and implementation of antiterrorism services and investigations supporting Air Force force protection. Students receive both classroom and hands-on training in all aspects of the course. The training includes live firearms training and antiterrorism driver training. The course curriculum is modeled on a pyramid, culminating with a 2-day practical exercise which encompasses all classroom and previous hands-on training. USAFSIA funds student (AFOSI) travel, per diem, and contractor fees.

Prerequisites: Students should have completed probationary agent program and have at least 2 years of investigative experience and assigned (or projected for assignment) to a unit or region whose mission entails antiterrorism services along with PSO requirements.

Reporting Instructions: Specific instructions will be provided upon selection to attend course.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 004—Basic Technical Agents Course (BTAC)—PDS Code ZQY—Andrews/10 wk—Apr 96

Prepares and provides entry-level AFOSI technical special agents with the preparatory skills needed to perform technical service-related duties and perform technical surveillance countermeasure surveys in support of Air Force and DoD commanders. This course is required for formal certification as a technically trained special agent. The bulk of the course curriculum is classified. The course is hosted by the Department of Defense Security Institute (DODSI), thus students from other DoD and federal agencies attend, limiting the number of seats available to AFOSI. USAFSIA funds AFOSI student travel and per diem.

Prerequisites: Must have successfully completed the AFOSI special investigators course (SIC) before attendance at this course. Students must have been selected for duty with AFOSI technical services. The minimum qualifications, according to DODI 5140.5, are as follows:

a. Education. College level courses in physics, mathematics, engineering, or electronics, and radio frequency (RF) theory are highly desirable. A minimum AQE score in electronics of 80.

b. Experience. Qualification in an approved electronics Air Force specialty code (AFSC) at the 5-skill level, with 4 years of experience in the AFSC.

c. Security Clearance. Top Secret/SSBI and access to sensitive compartmented information (SCI) and special access program (SAP) materials are required.

d. Grade: SSgt minimum.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Command Applicant Review Board (CARB), HQ AFOSI/XOV, and HQ AFOSI/DPA.

ADSC: Six months.

5OSO71S0 005—Central Systems Fraud Investigations Workshop—PDS Code WLR—Andrews/2 wk—Oct 96

Provides special agents working or projected to work central systems investigations with the skills and knowledge needed to perform in a highly technical area in support of major Air Force acquisitions. Designed to provide AFOSI special agents with specific and generalized training in investigating major weapons systems acquisition fraud. Students are presented with the laws and investigative techniques to investigate allegations of major white collar crime, with specific emphasis on major weapon systems acquisition processes. Students receive classroom instruction in the statutes involving allegations of bribery, cost mischarging, product substitution, defective parts, mail/wire fraud, false official statements, and false claims. Students also receive instruction in the acquisition process, contracting, and contract administration. In addition to USAFSIA instructors, students will hear presentations from guest lecturers representing many of the agencies involved in the investigation and prosecution of such matters. These include: Department of Justice Defense Procurement Fraud Unit, Department of Justice Civil Litigation Branch, Department of Defense Inspector General Office, AFOSI Investigative Operations Center Fraud Investigations Division, and the Department of the Air Force Office of the General Counsel for Procurement. USAFSIA funds student travel and per diem.

Prerequisites: Students should have at least 2 years of investigative experience and be assigned (or projected for assignment) to a unit or position where the bulk of their work will be in support of AFOSI's central systems fraud mission.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

Quota Control: USAFSIA.

5OSO71S0 006—Environmental Crime Investigations Workshop—PDS Code 32I—Andrews and various CONUS locations/2 wk—Apr 96

Provides special agents working, or projected to work, environmental issues, with the necessary skills and knowledge needed to safely perform in potentially dangerous environments, and an understanding of the laws and regulations governing such matters. The students are presented with 40 hours of occupational safety and health administration (OSHA) training in addition to the laws and investigative techniques to investigate allegations specific to violations of environmental law. Students receive classroom instruction in statutes concerning allegations involving the Toxic Substance Control Act, Clean Air Act, Federal Water Pollution Control Act, Comprehensive Environmental Compensation, Response and Liability Act (Superfund), Resource Conservation Act, and allegations of improper storage, disposal, and transportation of hazardous wastes and materials. Instruction in contracting, contract administration, working in a hazardous environment, evidence collection and storage procedures is also provided. The course is further enhanced by lawyers providing perspectives from both the defense and prosecution views. Guest speakers from the Air Force Legal Service provide the Air Force point of view.

Prerequisites: Students should have at least 2 years of investigative experience.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 007—Counterintelligence Investigations and Collections Workshop—PDS Code ZQV—Andrews/2 wk—Apr 96

Provides selected AFOSI special agents with preparatory and advanced skills necessary to perform counterintelligence investigative and collections services in support of Air Force commanders and the national intelligence community objectives. Students receive classroom instruction in counterintelligence authorities, policy, and national structure; legal guidelines; surveillance; selected case briefs; polygraph and technical services support; multidiscipline counterintelligence; technology transfer and protection; treaties and arms controls; vulnerability assessments; foreign intelligence services; terrorism; and tactical force protection. In addition to AFOSI instructors, guest lecturers from other Federal agencies augment instruction.

Prerequisites: Students should have at least 2 years of investigative experience and be assigned (or projected for assignment) to a unit or position where the bulk of their work will be in support of AFOSI's counterintelligence mission.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel

should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 008—Advanced Surveillance Workshop—PDS Code 327—various locations/2 wk—Apr 96

Provides AFOSI special agents with advanced surveillance training to support criminal, fraud, and counterintelligence investigations. Provides AFOSI special agents with classroom and hands-on training in the most current methodologies of surveillance. Students receive classroom instruction on proper planning for surveillances, to include team composition, proper communication methods, detection methods, technical assistance, and initiation and termination procedures. USAFSIA funds student travel and per diem.

Prerequisites: Students should have at least 2 years of investigative experience. Students may be tasked to subsequently support surveillance operations outside their area of responsibility.

Reporting Instructions: Specific instructions will be provided upon selection to attend course.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 009—Economic Crime Workshop - Base Level—PDS Code WLL—Andrews/2 wk—Oct 96

Provides special agents working base-level fraud programs with the skills and knowledge needed to investigate base-level fraud matters in support of Air Force commanders and other base agencies. USAFSIA funds student's travel and per diem.

Prerequisites: Students should have at least 2 years of investigative experience and assigned (or projected for assignment) to a unit with a base-level fraud mission.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

Quota Control: USAFSIA.

5OSO71S0 010—Computer Crimes Investigations Workshop—PDS Code 32O—Andrews/1 wk—Apr 96

Provides basic computer course for all AFOSI computer crime investigators and develops computer crime investigation skills of selected AFOSI agents for the purpose of augmenting computer crime investigations. Enhances computer investigations knowledge of the command. Designed for AFOSI special agents experienced in working at the DOS prompt (C:\>) using standard DOS commands (such as, copy, del, format, dir, etc.). Designed to provide the basic skills needed in seizing a stand-alone DOD (MS/PC) computer system. The student will be provided the basic skills in seizing the system ensuring that the integrity of the data remains intact for later evidence purposes. Students will also be instructed on the techniques by which those involved in criminal activity will use to hide, encrypt, and destroy data on floppy- and hard drive-based systems, basic care of magnetic media evidence and tools used to obtain data from magnetic media. USAFSIA funds student travel and per diem.

Prerequisites: Students should be computer crime investigators (CCI), or projected for assignment as a CCI, or computer literate special agents willing to augment or assist in computer crime investigations within or without their area of responsibility.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 011—Detachment Commanders Workshop—PDS Code 330—Andrews/2 wk—Apr 96

Familiarizes potential or newly appointed detachment commanders and special agents-in-charge (SAC) with their responsibilities and the resources available to help them successfully fulfill the obligations of the command. Students receive training in the areas of management of resources, personnel, and investigative decision making. Emphasis is placed on leadership and management and the detachment commander's or SAC's role. Guest lecturers include members of AFOSI's senior leadership (the commander and region and squadron commanders) and either a wing or group commander who provide students with their expectations of AFOSI's role in accomplishing their particular mission. USAFSIA funds student travel and per diem.

Prerequisites: Be selected or currently assigned as a detachment commander or SAC for the first time.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: AFOSI/DP. Individuals newly assigned less than 6 months or projected to fill a detachment commander or a SAC billet will be identified by HQ AFOSI/DPA to attend this course.

5OSO71S0 012—Source Targeting Workshop—PDS Code 33I—various locations/1 wk—Apr 96

Enhances source management skills of AFOSI special agents, introduces new methods of target management and identification, and improves investigative productivity. Workshop designed to build detachment-level special agent's self-confidence and investigative skills through increased source development and utilization. Classroom instruction involves teaching student about their behavioral style, needs, fears, values, and goals, and provides insight in determining these characteristics in others. Students are taught how to identify specific base target areas through a systematic method of information collection and analysis. Students put practical application of the training to use by visiting identified target areas and screening potential sources of information. USAFSIA funds student travel and per diem.

Prerequisites: Determined by the hosting region or detachment

commanders.

Reporting Instructions: Specific instructions will be provided upon selection to attend course.

Selection Process: Regions or detachments wishing to host the workshop should identify their desire to HQ AFOSI/DPPT during the annual screening of training requirements. Hosting region determines student selection process.

5OSO71S0 013—Spectrum Analysis Systems Course—PDS Code 340—USAFSIA OL-A/1 wk—Apr 96

Provides selected AFOSI technical agents with advanced skills necessary to perform technical surveillance countermeasures (TSCM) surveys in support of Air Force and DoD commanders. Course sponsored by the Department of Defense Security Institute (DODSI) for experienced technical security officers. Course will provide the student with an advanced overview of spectrum applications technology and theory. The bulk of the curriculum is classified and AFOSI shares available seats with other Federal agencies. USAFSIA funds student travel and per diem.

Prerequisites: Since course is sponsored by DODSI, AFOSI has limited seating. AFOSI students should have completed the basic technical agent course and have a least 1 year of experience as a technically trained special agent.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 014—Advanced Telephone Course—PDS Code 341—USAFSIA OL-A/1 wk—Apr 96

Provides AFOSI technical agents with advanced skills necessary to perform technical surveillance countermeasures (TSCM) surveys in support of Air Force and DoD commanders. Course sponsored by the Department of Defense Security Institute (DODSI) for experienced technical security officers. Provides student with an advanced overview of advanced telephone technology and theory. The bulk of the curriculum is classified and AFOSI shares available seats with other Federal agencies. USAFSIA funds student travel and per diem.

Prerequisites: Since course is sponsored by DODSI, AFOSI has limited seating. AFOSI students should have completed the basic technical agent course and have at least 1 year of experience as a technically trained special agent.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 015—Advanced Radio Frequency (RF)—PDS Code 34I—USAFSIA, OL-A/2 wk—Apr 96

Provides AFOSI technical agents with advanced skills necessary to perform technical surveillance countermeasures (TSCM) surveys in support of Air Force and DoD commanders. Course sponsored by the Department of Defense Security Institute (DODSI) for experienced technical security officers. Course will provide the student with an overview of advanced radio frequency technology and theory. The bulk of the curriculum is classified and AFOSI shares available seats with other Federal agencies. USAFSIA funds student travel and per diem.

Prerequisites: Since course is sponsored by DODSI, AFOSI has limited seating. AFOSI students should have completed the basic technical agent course and have at least 1 year of experience as a technically trained special agent.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 018—Advanced Antenna Course—PDS Code 34O—USAFSIA, OL-A/1 wk—Apr 96

Provides AFOSI technical agents with advanced skills necessary to perform technical surveillance countermeasures (TSCM) surveys in support of Air Force and DoD commanders. Course sponsored by the Department of Defense Security Institute (DODSI) for experienced technical security officers. Provides the student with an overview of advanced microwave antenna technology and theory. The bulk of the curriculum is classified and AFOSI shares available seats with other Federal agencies.

Prerequisites: Since course is sponsored by DODSI, AFOSI has limited seating. AFOSI students should have completed the basic technical agent course and have at least 1 year of experience as a technically trained special agent.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Authority: Region commander.

ADSC: Six months.

5OSO71S0 021—Undercover Agent Workshop—PDS Code 351—Andrews and various locations/2 wk —Oct 96

Provides agents with skills and techniques necessary to survive and succeed as an undercover agent. Trains operational supervisors and case agents who oversee and manage the employment of the undercover agent (UCA) in the investigation or operation. Workshop designed for agents volunteering for undercover roles and agents expected to case-manage or supervise UCA operations. Classroom and hands-on training is employed throughout the workshop. Students are provided instruction on interpersonal skills, policies and

procedures, legal considerations and constraints, agent survival, role playing, and confrontation and stress management, and operations development.

Prerequisites: Students should have at least 2 years of investigative experience and not be within 1 year of reassignment, separation, or retirement. Specific reporting requirements will be provided each student before course start date.

Reporting Instructions: Specific instructions will be provided upon selection to attend course.

Selection Process: Regions should identify their requirements during the annual screening forecast initiated by HQ AFOSI/DPPT. Units wishing to host the workshop can also identify that desire during the annual screening.

5OAO7S071 001—Advanced Special Investigators Course (ASIC) (7-Skill Level)—PDS Code 328—Andrews/2 wk/AFSC 7S071—Apr 96

Fulfills the requirement for upgrade training to the 7-skill level. Air Force-mandated course designed to provide AFOSI enlisted special agents upgrade training, making them fully proficient investigators. Students receive advanced training in such topics as liaison, current law enforcement issues, computer crime, communications, career paths, force protection, antiterrorism, counterintelligence investigations, criminal investigations, fraud investigations, and major case management. Course is mandatory for enlisted special agents. Officer and civilian special agents may attend on a space-available basis. AETC funds student travel and per diem for enlisted personnel; USAFSIA funds travel and per diem for officer and civilian students. If no AETC funds are available, USAFSIA will fund all student travel and per diem.

Prerequisites: Must have 18 to 24 months in 7-skill level upgrade training and successful completion of the Probationary Agent Program. Date for attendance will be based on the graduation date from the SIC course.

Reporting Instructions: Report to billeting office at Andrews AFB MD NET 0800 and NLT 1800, 1 day before class start date. Individuals arriving from overseas locations may report up to 2 days before class start date. All students must notify USAFSIA of their travel arrangements as soon as they are confirmed. All personnel should arrive through Washington National Airport, Wash DC, if possible.

Selection Process: Students will be automatically selected for attendance 18 to 24 months following completion of the SIC.

ADSC: Six months.

Air Force Special Operations Command (AFSOC)

AC130HAC—Acft Comdr Gunship Mission Qualification—PDS Code 8D5—Hurlburt Fld/7 wk 1 day—Mar 94

Mission qualifies pilots in the AC-130H as aircraft commander IAW AFSOCR 51-130 flying hour prerequisites. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification and aerial refueling flight training.

Prerequisites: Currently qualified for flying duty. C-130 qualified. Must have 250 hours gunship experience or approval of 16 SOS/CC. Current flight physical. Physiological training must remain current for at least 90 days after scheduled completion date. Survival Training: Basic survival, S-V80-A or equivalent, water survival, S-V86-A or equivalent. Must meet visual standards for NVG's IAW AFI 48-123, Medical Examination and Medical Standards (formerly AFR 160-43).

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC130HAG—Aerial Gunner Gunship Mission Qualification—PDS Code 8DZ—Hurlburt Fld/10 wk 2 days—Mar 94

Mission qualifies aerial gunners in the AC-130H. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Currently qualified for flying duties with minimum AFSC 2W151. Physiological training current for 90 days after scheduled completion date. Survival Training: Basic survival, S-V80-A or equivalent, water survival, S-V86-A, or equivalent. Must meet visual standards for NVGs according to AFI 48-123 (formerly AFR 160-43).

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC130HCP—Copilot Gunship Mission Qualification—PDS Code 8EH—Hurlburt Fld/7 wk 1 day—Mar 94

Mission qualifies pilots in the AC-130H as copilot IAW AFSOCR 51-130 flying hour prerequisites. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification and aerial refueling flight training.

Prerequisites: Currently qualified for flying duty. C-130 qualified. Current flight physical. Physiological training must remain current for at least 90 days after scheduled completion date. Survival Training: Basic survival, S-V80-A or equivalent, water survival, S-V86-A, or equivalent. Must meet visual standards for NVG's IAW AFI 48-123 (formerly AFR 160-43).

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC130HEWO—Electronic Warfare Officer Gunship Mission Qualification—PDS Code 8EJ—Hurlburt Fld/10 wk—Mar 94

Mission qualifies electronic warfare officers (EWO) in the AC-130H as EWO IAW AFSOCR 51-130. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Rated EWO qualified for flying duty. Current flight physical and physiological training current for at least 90 days after scheduled completion date. Survival Training: Basic survival, S-V80-A or equivalent, water survival, S-V86-A, or equivalent.

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC130HFCO—Fire Control Officer Gunship Mission Qualification—PDS Code 8EK—Hurlburt Fld/9 wk 2 days—Mar 94

Mission qualifies navigator in the AC-130H as fire control officer (FCO) IAW AFSOCR 51-130. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Currently qualified for flying duties with a minimum of 500 hours total time. Current flight physical and physiological training current for at least 90 days after scheduled completion date. Survival Training: Basic survival, S-V80-A or equivalent, water survival, S-V86-A, or equivalent.

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC130HFE—Flight Engineer Gunship Mission Qualification—PDS Code 8EL—Hurlburt Fld/10 wk—Jun 94

Mission qualifies flight engineers in the AC-130H. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification and inflight refueling training.

Prerequisites: Must have completed course C-l30FIQ, hold minimum AFSC Al1350, and be physically qualified for flying duty. Physiological training current for at least 90 days after scheduled completion date. Survival Training: Basic survival, S-V80-A or equivalent, water survival, S-V86-A, or equivalent. Minimum grade Sgt; minimum 500 hours C-130 flight engineer time. Must meet visual standards for NVGs according to AFI 48-123 (formerly AFR 160-43).

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC130HLM—Load Master Gunship Mission Qualification—PDS Code 8EM—Hurlburt Fld/10 wk—Mar 94

Mission qualifies load masters in the AC-130H. Includes specialized aircrew ground training in mission-peculiar equipment and gunship mission qualification flight training.

Prerequisites: Must be grade A1C or above with at least load master initial qualification, have at least 3 years of retainability, and be currently qualified for aviation duties. Physiological training current for at least 90 days after scheduled completion date. Survival Training: basic survival, S-V80-A or equivalent, water survival, S-V86-A, or equivalent. Must meet visual standards for NVG's IAW AFI 48-123 (formerly AFR 160-43).

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC130HN—Navigator Gunship Mission Qualification—PDS Code 8EN—Hurlburt Fld/13 wk—Mar 94

Mission qualifies navigators in the AC-130H as navigator IAW AFSOCR 51-130. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification and aerial refueling flight training.

Prerequisites: Currently qualified for flying duty. Current flight physical. Physiological training muse remain current for at least 90 days after scheduled completion date. Survival Training: Basic survival, S-V80-A or equivalent, water survival, S-V86-A, or equivalent.

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC130HSO—Sensor Operator (IR/TV) Gunship Mission Qualification—PDS Code 8EP—Hurlburt Fld/14 wk—Apr 95

Mission qualifies sensor operators (IR/TV) in the AC-130H IAW AFSOCR 51-130. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Current flight physical qualifying for flying duties. Physiological training current for at least 90 days after scheduled completion date. Survival Training: Basic survival, S-V80-A or equivalent and water survival, S-V86-A, or equivalent. Must be SrA/Sgt or above.

Special Requirements: Secret clearance by class start date and have initiated a request for Top Secret clearance by class start date.

Quota Control: HQ AFPC/DPMROP2.

AC-130UAC—Aircraft Commander Gunship Mission Qualification—PDS Code W3A—Hurlburt Fld/7 wk 1 day/AFSC 11S3D—Apr 95

Mission qualifies pilots in the AC-130U as aircraft commanders according to AFSOCR 51-130 flying hour prerequisites. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification and aerial refueling flight training.

Prerequisites: Currently qualified for flying duty and completed course C-130P or equivalent. C-130 qualified. Must have 250 hours of gunship experience by completion of formal training and approval of 16 SOS/CC. Current flight physical. Physiological training must remain current for at least 90 days afters scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent. Must meet visual standards for night vision goggles according to AFI 48-123 (formerly AFR 160-43).

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFSOC/DPATP.

AC-130UAG—Aerial Gunner Mission Qualification—PDS Code W3B—Hurlburt Fld/20 wk/AFSC 2W1X1-Apr 95

Mission qualifies aerial gunners in the AC-130U. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Currently qualified for flying duties with minimum AFSC 2W151. Physiological training current for 90 days after scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent.

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AFSOC/DPATP.

AC-130UCP—Copilot Gunship Mission Qualification—PDS Code W3C—Hurlburt Fld/7 wk 1 day/AFSC 11S2D—Apr 95

Mission qualifies pilots in the AC-130U as copilots according to AFSOCR 51-130 flying hour prerequisites. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification and aerial flight training.

Prerequisites: Currently qualified for flying duty and completed course C-130P or equivalent. C-130 qualified. Current flight physical. Physiological training must remain current for at least 90 days after scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent. Must meet visual standards for night vision

goggles according to AFI 48-123 (formerly AFR 160-43).

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFSOC/DPATP.

AC-130UEWO—Electronic Warfare Officer Gunship Mission Qualification—PDS Code W3D—Hurlburt Fld/10 wk/AFSC 12S3D—Apr 95

Mission qualifies electronic warfare officers (EWO) in the AC-130U as EWO according to AFSOCR 51-130. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Rated EWO qualified for flying duty. Current flight physical. Physiological training must remain current for at least 90 days after scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent.

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFSOC/DPATP.

AC-130UFCO—Fire Control Officer Gunship Mission Qualification—PDS Code W3E—Hurlburt Fld/16 wk/AFSC 12S3E—Apr 95

Mission qualifies navigators in the AC-130U as fire control officer (FCO) according to AFSOCR 51-130. Includes specialized aircrew training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Rated navigator qualified for flying duty. Must have 500 hours of previous flying experience as a rated navigator. Current flight physical. Physiological training must remain current for a least 90 days after scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent.

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFSOC/DPATP.

AC-130UFE—Flight Engineer Mission Qualification—PDS Code W3S—Hurlburt Fld/10 wk/AFSC 1A1X1C—Apr 95

Mission qualifies flight engineers in the AC-130U. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Must have completed AMC course C-130FE, hold minimum AFSC A11350, and be physically qualified for flying duty. Physiological training current for 90 days after scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent. Minimum grade E-4 and minimum 500 hours C-130 flight engineer time.

Special Requirements: Request for Top Secret clearance by class start date.

Quota Control: HQ AFSOC/DPATP.

AC-130ULM—Loadmaster Gunship Mission Qualification—PDS Code W3F—Hurlburt Fld/12 wk 3 days/AFSC 1A2X1—Apr 95

Mission qualifies loadmasters in the AC-130U according to AFSOCR 51-130. Includes specialized aircrew ground training in mission peculiar equipment and gunship mission qualification flight training.

Prerequisites: Must be grade E-3 or above with at least loadmaster initial qualification in C-130s, have at least 3 years of retainability, and be currently qualified for aviation duties. Physiological training current for 90 days after scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent. Must meet visual standards for night vision goggles according to AFI 48-123 (formerly AFR 160-43).

Special Requirements: Secret clearance by class start date.

Quota Control: HQ AFSOC/DPATP.

AC-130UNAV—Navigator Gunship Mission Qualification—PDS Code W3G—Hurlburt Fld/16 wk/AFSC 12S3F—Apr 95

Mission qualifies navigators in the AC-130U as navigator according to AFSOCR 51-130. Includes specialized aircrew ground training in the mission peculiar equipment, gunship mission qualification flight training and aerial refueling training.

Prerequisites: Rated navigator qualified for flying duty. Completion of course C-130N and qualified in the C-130. Current flight physical. Physiological training must remain current for at least 90 days after scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent.

Special Requirements: Request for Top Secret clearance initiated by class start date.

Quota Control: HQ AFSOC/DPATP.

AC-130USO—Sensor Operator (IR/TV) Gunship Mission Qualification—PDS Code W3H—Hurlburt Fld/14 wk/AFSC 8S100—Apr 95

Mission qualifies sensor operators (IR/TV) in the AC-130U according to AFSOCR 51-130. Includes specialized aircrew ground training in mission peculiar equipment and gunship mssion qualification flight training.

Prerequisites: Must be grade E-4 or above with at least 6 years of time in service. Current flight physical qualifying for flying duties. Physiological training current for 90 days after scheduled completion date. Survival Training: Completion of basic survival, S-V80-A, or equivalent and water survival, S-V86-A, or equivalent.

Special Requirements: Secret clearance by class start date and have initiated a request for Top Secret clearance by class start date.

Quota Control: HQ AFSOC/DPATP.

MC-13OECSO—Combat Talon Initial/Mission Qualification—PDS Code XVN—Hurlburt Fld/20 wk—-Apr 95

Qualifies communication system operator in the MC-130E. Includes specialized aircrew ground training in mission-peculiar equipment and COMBAT TALON initial/mission qualification flight training.

Prerequisites: Currently qualified for flying duty and possess a control AFSC of 11650 or higher and be in grade E-4 through E-9. Qualification, flight physical and physiological training (altitude chamber) must remain current for 90 days following graduation date. Must successfully complete the formal Morse Code qualification course, E3AZR49251 003, Ground/Airborne International Morse Code Ops, or be capable of receiving and transmitting 12

words/groups per minute.

Special Requirements: By class start date, Top Secret clearance or paperwork submitted for Top Secret clearance.

Quota Control: HQ AFSOC/DPATP.

MC-130EEWO—EWO COMBAT TALON I Initial/Mission Qualification—PDS Code N76—Hurlburt Fld/20 wk/AFSC 12S3H—Apr 95

Mission qualifies electronic warfare officers (EWOs) in the MC-130E SOFI/MOD 90. Includes specialized ground training in mission planning, employment, tactics, and mission peculiar equipment and MC-130E SOFI initial and mission qualification flight training.

Prerequisites: Currently qualified for flying duty. Qualification, flight physical and physiological training (altitude chamber) must remain current for 30 days following graduation date. Must be a graduate of N-V6A-C.

Special Requirements: By class start date, Top Secret clearance or paperwork submitted for Top Secret clearance.

Quota Control: HQ AFSOC/DPATP.

MC-130EFE—Flight Engineer COMBAT TALON I Initial/Mission Qualification—PDS Code XVL—Hurlburt Fld/6 wk 2 days—Apr 95

Mission qualifies flight engineers in the MC-130E. Includes specialized aircrew ground training in mission-peculiar equipment and COMBAT TALON mission qualification flight training.

Prerequisites: Currently qualified for flying duty, C-130 qualified, and possess AFSC A11350C or higher. Qualification, flight physical and physiological training (altitude chamber) must remain current for 30 days following graduation date. Must be currently or previously C-130 tactical airlift airdrop qualified IAW MCR 51-1, Volume III. Be in grade E-4. Minimum 500 hours C-130 flight engineer time.

Special Requirements: By class start date, Top Secret clearance or paperwork submitted for Top Secret clearance.

Quota Control: HQ AFSOC/DPATP.

MC-130ELM—Loadmaster COMBAT TALON Initial/Mission Qualification—PDS Code XVM—Hurlburt Fld/20 wk—Apr 95

Mission qualifies loadmasters in the MC-130E. Includes specialized aircrew ground training in mission-peculiar equipment and COMBAT TALON mission qualification flight training.

Prerequisites: Current and qualified in C-130 E/H with 500 hours tactical airlift airdrop experience. Control AFSC 11450 or higher and be in grade E-4 thru E-9. Basic qualification, flight physical and physiological training (altitude chamber) must remain current for 90 days following graduation date. Must meet visual standards for NVGs IAW AFI 48-123 (formerly AFR 160-43) prior to class entry.

Special Requirements: By class start date, Top Secret clearance or paperwork submitted for Top Secret clearance.

Quota Control: HQ AFSOC/DPATP.

MC-130EN—Navigator COMBAT TALON I Initial/Mission Qualification—PDS Code XU4—Hurlburt Fld/20 wk/AFSC 12S3J—Apr 95

Mission qualifies navigators in the MC-130E. Includes specialized aircrew ground training in mission-peculiar equipment and COMBAT TALON mission qualification flight training.

Prerequisites: Currently qualified for flying duty and C-130 qualified. Basic qualification, tactical qualification, flight physical and physiological training (altitude chamber) must remain current for 30 days following graduation date. Must be currently or previously C-130 tactical airlift airdrop or HC-130 NVG mission qualified IAW AMCR 51-130. Must have at least 1 year of tactical airlift airdrop or HC-130 NVG mission experience. Must meet visual standards for NVGs IAW AFI 48-123 (formerly AFR 160-43) prior to class entry.

Special Requirements: By class start date, Top Secret clearance or paperwork submitted for Top Secret clearance.

Quota Control: HQ AFSOC/DPATP.

MC-130EP—Pilot COMBAT TALON I Initial/Mission Qualification—PDS Code XU3—Hurlburt Fld/20 wk/AFSC 11S3F—Apr 95

Mission qualifies pilots in the MC-130E as a copilot or aircraft commander candidate IAW AFSOCR 51-130 flying hour prerequisites. Includes specialized aircrew ground training in mission-peculiar equipment and COMBAT TALON mission qualification flight training.

Prerequisites: Currently qualified for flying duty and C-130 qualified. Basic qualification, instrument qualification, tactical qualification, flight physical, and physiological training (altitude chamber) must remain current for 30 days following graduation date. Must meet visual standards for NVGs IAW AFI 48-123 (formerly AFR 160-43) prior to class entry. Must meet one of the following three criteria:

(a) Currently or previously C-130 tactical airlift airdrop qualified and have 1 year of tactical airlift airdrop experience.

(b) Currently or previously HC-130 NVG mission qualified IAW AFSOCR 51-130 and have 1 year HC-130 NVG mission experience.

Special Requirements: By class start date, Top Secret clearance or paperwork submitted for Top Secret clearance.

Quota Control: HQ AFSOC/DPATP.

AFSOC 142002—Latin American Orientation Course (LAOC)—PDS Code 4ST—Hurlburt Fld/1 wk—Jan 96

Conducted by USAFSOS/EDRL at Hurlburt Fld FL. Provide nontechnical information, including cultural and political background, terrorist threat assessment and personal protection techniques to personnel being assigned to, or having a professional interest in, Latin America. Course emphasis is on the countries to which the students are being assigned, or in which there is professional interest.

Prerequisites: Military or civilian personnel currently assigned or programmed for assignment to Latin America, or personnel with a professional interest in Latin America. Adult dependents of personnel traveling overseas to fill positions designated as key billets may be eligible for funding to attend LAOC. The determination for all personnel must be made by the appropriate military personnel center, MAJCOM, or agency headquarters. Other adult dependents of individuals on accompanied overseas status may attend the course at their sponsor's expense, subject to class space availability and USAFSOS approval.

Special Requirements: Secret clearance. Adult dependents will be released during the classified blocks.

Admin Instructions: Course is FMS case or administrative surcharge funded for individuals assigned to FMS billets or working an active FMS case. Other students are user funded. Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 143502—Joint Psychological Operations Course (JPOC)—PDS Code RVG—Hurlburt Fld/1 wk/MASL D126004—Jan 96

Conducted by USAFSOS/EDOP at Hurlburt Fld FL. Provides DoD and US Government personnel with an awareness of psychological operations, doctrine, organization, techniques, equipment, and capabilities.

Prerequisites: Officers, selected enlisted (SSgt and above), and US government civilian employees filling staff positions requiring a familiarization with psychological operations. (International students may be authorized on a case-by-case basis.)

Special Requirements: US Secret or equivalent clearance by class start date. (International students receive alternate instruction during NOFORN periods.)

Admin Instructions: Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 145002—Middle East Orientation Course (MEOC)—PDS Code TN3—Hurlburt Fld/1 wk/MASL D126008—Oct 96

Conducted by USAFSOS/EDRM, at Hurlburt Fld FL. This UNCLASSIFIED course provides historical, cultural, religious, social, political and military information on the region, assesses the terrorist threat, and provides personal protection and antiterrorism information required by personnel being assigned to the Middle East, including technical assistance field teams (TAFTs) and mobile training teams (MTTs). Course emphasis is on the countries to which the students are being assigned.

Prerequisites: Military and civilian personnel currently assigned or programmed for assignment to the Middle East. Adult dependents of personnel traveling overseas to fill positions designated as key billets may be eligible to attend MEOC. The determination for all personnel must be made by the appropriate military personnel center, MAJCOM, or agency headquarters. Other adult dependents of individuals on accompanied overseas status may attend the course at their sponsor's expense, and personnel with a professional interest in the area may attend, subject to class space availability and USAFSOS approval. ECL 80.

Admin Instructions: Course is FMS case or administrative surcharge funded for individuals assigned to FMS billets or working an active FMS case. Other students are user funded. Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 146002—Cross-Cultural Communication (CCC)—PDS Code X9C—Hurlburt Fld/1 wk—Jan 96

Conducted by USAFSOS/EDRC at Hurlburt Fld FL. This UNCLASSIFIED course is designed to improve the communication and problem-solving skills of DOD personnel engaged in training, administration, or negotiation with foreign military personnel. Instruction is keyed to strategies, for effective interaction with Mid-Eastern, Latin American, Far Eastern, and African societies.

Prerequisites: Officers, enlisted, and civilian personnel programmed for an assignment requiring contact with foreign nationals.

Admin Instructions: Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 147002—Dynamics of International Terrorism (DIT)—PDS Code X9D—Hurlburt Fld/1 wk—Jan 96

Conducted by USAFSOS/EDRT at Hurlburt Fld FL. This is an awareness-level course, providing selected military personnel and US government civilian employees with a basic understanding of the theory, psychology, organization, techniques, and operational capabilities of terrorist groups on an international and regional basis. Also included are several hours dedicated to preventive security measures.

Prerequisites: All officers, enlisted, and US Government civilian employees being assigned to or filling (or programmed to fill) positions requiring detailed knowledge of terrorist activities.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 148002—Crisis Response Management (CRM) Workshop—PDS Code X9E—Hurlburt Fld/3 days—Jan 96

Conducted by USAFSOS/EDOO at Hurlburt Fld FL. The workshop provides crisis managers with an overview of the national structure and DOD elements of crisis response management, aspects of crisis recognition, coordinating/support agencies, and the JOPS Vol IV Crisis Action Procedure.

Prerequisites: Officers or civilians filling or programmed for command or senior staff positions.

Special Requirements: Top Secret clearance with SI/TK access required by class start date.

Admin Instructions: Address requests for quotas to USAFSOS/EDSR, Alison Bldg, 357 Tully St., Hurlburt Fld FL 32544-5800 (Fax: DSN 579-4732, Commercial (904) 884-4732). Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 149002—Joint Special Operations Planning Workshop (JSOPW)—PDS Code 30R—Hurlburt Fld/2 wk—Jan 96

Conducted by USAFSOS/EDOO at Hurlburt Fld FL. Provides planners with an overview of the DOD procedures, structure, and elements of crisis response in a special operations environment. Provides selected military officers and US government civilian employees with the principles and techniques required to plan for the deployment, employment, and redeployment of special operations forces.

Prerequisites: Officers and US government civilian employees currently assigned or programmed for assignment to a special operations-related position.

Special Requirements: Final Top Secret clearance by class start date.

Admin Instructions: Address requests for quotas to USAFSOS/EDSR, Alison Bldg, 357 Tully Street, Hurlburt Fld FL

32544-5800 (Fax: DSN 579-4732, commercial (904) 884-4732). Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 150002—Joint Senior Psychological Operations Course (JSPOC)—PDS Code 86X—Hurlburt Fld/2.5 days/MASL D126006—Oct 96

Conducted by USAFSOS/EDOP at Hurlburt Fld FL. The course provides selected senior officers and civilians with an awareness of how psychological operations can support US national objectives.

Prerequisites: Military personnel, colonel selectee or above, and US government civilian equivalents, whose duties require an awareness of psychological operations. ECL 80.

Special Requirements: Top Secret clearance.

Admin Instructions: Address requests for quotas to USAFSOS/EDSR, Alison Bldg, 357 Tully Street, Hurburt Fld FL 32544-5800 (Fax: DSN 579-4732, commercial (904) 884-4732). Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 151002—Africa Orientation Course (AOC)—PDS Code 86Y—Hurlburt Fld/1 wk—Jan 96

Conducted by USAFSOS/EDRM at Hurlburt Fld FL. The course is designed for personnel who will be assigned to Africa PCS or TDY or who will work African issues at locations outside of Africa. It provides a complete package of regional information on Africa, which will contribute to the individual's effectiveness in support of US interests while preparing him or her for a rewarding and safe tour in the region. The course provides a political, military, and cultural background, with special emphasis on threat assessment, antiterrorism training, and personal protection.

Prerequisites: Military and civilian personnel currently assigned or programmed for assignment to Africa or personnel with a professional interest in the area. Adult dependents of personnel traveling overseas to fill positions designated as key billets may be eligible for funding to attend AOC. The determination for all personnel must be made by the appropriate military personnel center, MAJCOM, or agency headquarters. Other adult dependents of individuals on accompanied overseas status may attend the course at their sponsor's expense, subject to USAFSOS approval.

Admin Instructions: Course is FMS case or administrative surcharge funded for individuals assigned to FMS billets or working an active FMS case. Other students are user funded. Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 152002—Asia Pacific Orientation Course (APOC)—PDS Code 98V—Hurlburt Fld/1 wk—Jan 96

Conducted by USAFSOS/EDRC at Hurlburt Fld FL. This UNCLASSIFIED course provides nontechnical, historical, cultural, religious, social, political, military, and personal security/antiterrorism training to personnel being assigned to, or having a professional interest in, Southeast Asia, Korea, or Japan. Target audiences may include mobile training teams (MTT) or technical assistance field teams (TAFT). Course emphasis is on the Asian countries, with class content to be weighted, when possible, to allow for specific interests. Extra tutorial time over and above the standard course must be coordinated with the course director in advance. MTTs may want to schedule extra time for reading, planning, or coordination even if tutorial time is not desired.

Prerequisites: Military or civilian US government personnel currently assigned or programmed for duties that pertain to the training of Southeast Asian, Korean, or Japanese personnel, or are otherwise related to Southeast Asia, Korea, or Japan. Adult dependents of personnel traveling overseas to fill positions designated as key billets may be eligible for funding to attend APOC. The determination for all personnel must be made by the appropriate military personnel center, MAJCOM, or agency headquarters. Other adult dependents of other individuals on accompanied oversea status may attend the course at their sponsor's expense, subject to class space availability and USAFSOS approval.

Admin Instructions: Course is FMS case or administrative surcharge funded for individuals assigned to FMS billets or working an active FMS case. Other students are user funded. Students may incur an active duty service commitment (DSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 154002—Joint Special Operations Staff Officer Course (JSOSOC)—PDS Code JAU—Hurlburt Fld/2 wk—-Jan 96

Conducted by USAFSOS/EDOO at Hurlburt Fld FL. Provides selected US officers an introduction to joint staff activities with special emphasis on unique functions and interrelationships peculiar to a special operations staff. Provides an indepth explanation of USSOCOM mission activities which include unconventional warfare, direct action, foreign internal defense, search and rescue, special reconnaissance, security assistance, humanitarian assistance, psychological operations, and civil affairs. Detailed study is made of the role of USSOCOM and its working relationships with the services, service components of USSOCOM, sub-unified special operations commands (SOC), and US government agencies.

Prerequisites: Military officers or civilian equivalents in the grades of captain through lt colonel who are currently assigned or en route to a staff officer position within USSOCOM or another special operations unit.

Admin Instructions: Address requests for quotas to USAFSOS/EDSR, Alison Bldg, 357 Tully Street, Hurlburt Fld FL 32544-5800 (Fax: DSN 579-4732, commercial (904) 884-4732). Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional information.

AFSOC 155002—Introduction to Special Operations (ISOC) Course—PDS Code LZL—Hurlburt Fld/3 days—Jan 96

Conducted by USAFSOS/EDOD at Hurlburt Fld FL. Provides US military and government employees with an introduction to US special operations mission activities, organization, and forces.

Prerequisites: Open to all grades. Attendees should be en route or assigned to a special operations unit or a unit that interacts with special operations forces.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.3 for additional instructions.

AFSOC 156002—Revolutionary Warfare Course (RWC)—PDS Code LZP—Hurlburt Fld/1 wk—Jan 96

Conducted by USAFSOS/EDOI at Hurlburt Fld FL. Provides US military and government members information on the geopolitical, sociological, and cultural implications of US involvement in revolutionary warfare. Prepares personnel for duties associated with the special operations mission and associated mission activities.

Prerequisites: US military or government employees either filling or programmed to fill positions requiring knowledge of revolutionary warfare and aspects of military operations other than war (MOOTW). This includes personnel involved in oversea deployments for training, security assistance positions, and special operations activities.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Students may incur an active duty service commitment (ADSC) as prescribed in appropriate service regulations. Refer to section A and table 11.1 for additional instructions.

AFSOC 157002—Civil-Military Strategy for Internal Development Course (CMSID)—PDS Code W2V—Hurlburt Fld/2 wk/MASL D173063, D173066, D173070—Jan 96

Conducted by USAFSOS/EDOI at Hurlburt Fld FL. Provides key US and foreign military and civilian government officials an apprehension of how to integrate national military capabilities into a unified host-government strategy for internal development. Designed for personnel engaged in action programs supporting a government's internal development objectives. Three regionally focused iterations annually: D173063, Latin America and the Caribbean; D173066, Africa; and D173070, Eastern Europe and the former Soviet Union.

Prerequisites: U.S. students should be assigned to or en route to a foreign embassy. ECL 70.

Special Requirements: Course is intended primarily for teams of individuals from foreign countries. Desired student mix is for each country to be represented by one US embassy member, one foreign military officer, and one foreign civilian official.

Admin Instructions: Funding for U.S. students will be provided by USAFSOS. Security assistance offices should forward requests for quotas/programming information to AFSAT/TO (DSN 487-4574, commercial (210) 652-4574), info OSAF/IAY (DSN 227-8399, commercial (703) 697-0072), and USAFSOS/EDSR, Alison Bldg, 357 Tully Street, Hurlburt Fld FL 32544-5800 (Fax: DSN 579-4732, commercial (904) 884-4732). U.S. students may incur an active duty service commitment as prescribed in appropriate service regulations. Refer to section A and table 11.1 for additional instructions.

AFSOC 158002—Aviation in Foreign Internal Defense (JAFID)—PDS Code WA7—Hurlburt Fld/1 wk—Jan 96

Conducted by USAFSOS/EDOI at Hurlburt Fld FL. Provides U.S. military personnel the principles required to comprehend the Foreign Internal Defense (FID) mission. Concentrates on the role of air forces and focuses on the practical applications of FID and operational doctrine governing FID activities. Designed for personnel tasked with the FID mission or in positions requiring knowledge of FID operations.

Prerequisites: Due to the seminar nature of this course, students should have some previous experience or formal education in the following subjects: FID/Internal Defense and Development, the nature of insurgency, the psychology of insurgents, civil-military operations, security assistance, the embassy country team, and cultural considerations for working with foreign nationals. Attendance at the USAFSOS Revolutionary Warfare Course and Cross Cultural Communications Course will satisfy these educational requirements.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Class size limited to 20 students. A majority of students will be funded by USAFSOS. Address requests for quotas to: USAFSOS/EDSR, 357 Tully Street, Hurlburt Fld FL 32544-5800 (Fax: DSN 579-4732, commercial (904) 884-4732). Students may incur an active duty service commitment as prescribed in appropriate service regulations. Refer to section A and table 11.1 for additional instructions.

AFSOC159001—C-130 Dynamic Propeller Balancing/Engine Vibration Troubleshooting—PDS Code 1IA—Kirtland/1 wk—Apr 96

Provides an introduction to the 8500C balancer/analyzer, 8520C-36 signal selector, velocimeter, synchrophaser junction box assembly, balance charts, and propeller balance theory. Students will be required to install this equipment properly on the aircraft to perform balancing procedures, and to conduct random spectrum colletion for analysis and interpretation. Students will assist in set-up and operation for the turbine seal break-in test.

Prerequisites: Primary target group is AFSC 2A6X1B, aerospace propulsion turboprop and turboshaft craftsman. Students should have 1 year of experience on T56 engine and propeller systems before requesting attendance.

Quota Control: 58 LG/LGQV.

AFSOC 160001—Helicopter Track and Balance/Vibration Troubleshooting Training (MH/TH-53, HH/MH-60, HH/UH-1)—PDS Code 1IB—Kirtland/1 wk—Apr 96

Provides an introduction to the 8500C balancer/analyzer, 8520C signal selector, velocimeter, magnetic pickup, photocell, strobex, optical tracker, track and balance charts, and rotor balance theory. Students will be required to install this equipment properly on the aircraft to perform tracking and balancing procedures of the tail and main rotor head, and to conduct random spectrum collection for analysis and interpretation. Students will assist in input drive shaft balancing and vibration absorber tuning adjustments.

Prerequisites: Primary target group is AFSC 2A5X2, helicopter maintenance craftsman. Students should have 1 year of experience on rotary wing aircraft before requesting attendance.

Quota Control: 58 LG/LGQV.

AFSOC 161001—Advanced Aircraft/Engine Vibration and Analysis Training—PDS Code 1IC—Kirtland/1 wk 3 days—Apr 96

Provides the fundamentals of vibration basics, transducers, units of measurements, instrumentation, and natural frequencies. Student will troubleshoot and control imbalance/balancing, misalignment, mechanical looseness, shafts, bearings, and gearmesh. Student will be qualified in diagnostics and trending using computer skills, trending software, and in establishing and maintaining data bases.

Prerequisites: Primary target group is AFSC 2A5X2, helicopter maintenance craftsman, and AFSC 2A6X1B, aerospace propulsion turboprop and turboshaft craftsman. Students should have 3 years of experience on the aircraft/engine. Attendance in one of the above courses is mandatory before attending this course.

Quota Control: 58 LG/LGQV.

S2A1X1 000—AN/AAQ 15/17 Infrared Systems Intermediate Maintenance—PDS Code NXX—Hurlburt Fld/3 wk 2 days—Apr 95

Provides theory and practical experience, on an intermediate maintenance level, for the AN/AAQ 15 and/or AN/AAQ 17 Infrared systems. Covers operating characteristics, operational checkouts, removal and replacement, and alignment of components peculiar to these Photo-Sensor systems.

Quota Control: HQ AFSOC/LGMMT.

S2A1X1 014—MC-130H Photo-sensors Organizational Maintenance—PDS Code GSE—Hurlburt Fld/4 days—Apr 95

Provides organizational level maintenance training on MC-130H specific Photo-Sensor systems. This course uses various methods to insure understanding of operational check procedures, troubleshooting, and boresight procedures for the AN/AAQ-15 system.

Quota Control: HQ AFSOC/LGMMT.

S2A1X1 017—AC-130H LLLTV and Searchlight Mount Intermediate Maintenance—PDS Code PDM—Hurlburt Fld/2 wk 1 day—Apr 95

Provides theory and practical experience, on an intermediate maintenance level, for AC-130H specific Photo-Sensor systems. This course covers operational checkout procedures, troubleshooting, removal and replacement of components, and alignment procedures for the AN/ASQ-145(V) 2, AN/AVQ-19, AN/AJQ-24C, and AN/AVQ-17 systems.

Quota Control: HQ AFSOC/LGMMT.

S2A1X1 019—AN/AAQ-18 FLIR System Intermediate Maintenance—PDS Code WLF—Hurlburt Fld/4 wk 3 days—Apr 95

Provides theory and practical experience, on an intermediate maintenance level, for the AN/AAQ-18 Forward Looking Infrared (FLIR) System. Covers theory of operation, operational checkout, and alignment procedures for the following FLIR subassemblies: Power Supply, Infrared Receiver, Electronic Control Amplifier, and Infrared Set Control.

Prerequisites: Two years experience on C-130 aircraft.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A1X3 017—KY-879 Digital Message Device Group Intermediate Maintenance—PDS Code N3J—Hurlburt Fld/3 days—Apr 95

Provides intermediate level maintenance training on the KY-879 Digital Message Device Group (DMDG). This course covers performance test, disassembly/reassembly, and malfunction analysis of the KY-879/P Keyer Message Device.

Quota Control: HQ AFSOC/LGMMT.

S2A1X3 025—MH-53J AN/APQ-158 TF/TA Radar Intermediate Maintenance—PDS Code PZL—Hurlburt Fld/2 wk 1 day—Apr 95

Provides intermediate level maintenance training on the MH-53J AN/APQ-158 TF/TA Radar system. This course covers theory of operation and functional checkouts on various subsystems of the AN/APQ-158 including the Power Supply Programmer, Antenna Receiver, Terrain Clearance Computer, and Signal Data Converter.

Quota Control: HQ AFSOC/LGMMT.

S2A1X3 027—MC-130E AN/APQ-122(V)8 TF Radar Intermediate Maintenance—PDS Code PFT—Hurlburt Fld/2 wk 4 days—Apr 95

Provides intermediate level maintenance on the MC-130E AN/APQ-122(V)8 Terrain Following Radar system. This course contains alignment procedures for the X- and KA-band receiver/transmitters, TF antenna, power supply programmer, TF receiver, and TF computer.

Quota Control: HQ AFSOC/LGMMT.

S2A1X3 028—AC-130H AN/APQ-150A Beacon Tracking Radar Intermediate Maintenance—PDS Code WL6—Hurlburt Fld/1 wk 2 days—Apr 95

Provides intermediate level maintenance on the AC-130H AN/APQ-150A Beacon Tracking Radar system. This course covers the adjustment and operational test of the antenna, the magnetron frequency adjustment, the Receiver and Transmitter performance test and adjustment, and the alignment and operational checkout of the Control-Indicator.

Quota Control: HQ AFSOC/LGMMT.

S2A1X3 033—AN/ARC-164 SATCOM Intermediate Maintenance—PDS Code W8H—Hurlburt Fld/1 wk 2 days—Apr 95

Provides theory and practical experience, on an intermediate maintenance level, for the AN/ARC-164 Satellite Communication (SATCOM) system. Covers the alignment, disassembly and reassembly, and operational checkout procedures for the subassemblies peculiar to the AN/ARC-164 system.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 000—QRC 84-02A Infrared Countermeasures Intermediate Maintenance—PDS Code 99M—Hurlburt Fld/2 wk 1 day—Apr 95

Provides theory and practical experience, on an intermediate maintenance level, for the QRC84-02A Infrared Countermeasures system. Covers calibration procedures, operational checkout procedures, removal and replacement, and alignment procedures for subassemblies of the QRC84-02A including the Radiometer, Infrared Transmitter, Control Indicator, and Current Monitor.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 020—AN/AAR-44 Infrared Warning Receiver Intermediate Maintenance—PDS Code N3P—Hurlburt Fld/4 days—Apr 95

Provides theory and practical experience, on an intermediate maintenance level, for the AN/AAR-44 Infrared Warning Receiver system. Covers operational checkout procedures for the Unit Test Set, Control Display Unit, Signal Processor Unit, and Sensor Unit. Also covers the purge/charge procedures for the Sensor Unit.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 021—MH-60G AN/ALQ-144A Infrared Jammer Intermediate Maintenance—PDS Code N92—Hurlburt Fld/4

days—Apr 95

Provides intermediate level maintenance training on the MH-60G AN/ALQ-144A Infrared Jammer system. Covers removal and replacement and functional checkout procedures for the Infrared transmitter and the Operator Control Unit.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 022—MH-60G M-130 Dispenser Organizational/Intermediate Maintenance—PDS Code N98—Hurlburt Fld/4 days—Apr 95

Provides intermediate and organizational level maintenance training on the MH-60G M-130 Dispenser system. Covers the bench check of the electrical system and the Dispenser Assembly. Also covers the electrical test of the Electronics Module, Sequencer Assembly, and Dispenser Control Panel.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 023—MC-130H Electronic Warfare Organizational Maintenance—PDS Code 6GY—Hurlburt Fld/2 wk 3 days—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for MC-130H specific Electronic Warfare systems. This course covers operational checkout procedures, removal and replacement, synchronization checks, and troubleshooting procedures for the AN/ALE-40, AN/AAR-44, QRC84-02A, AN/ALR-69, AN/APR-46A, and AN/ALQ-172 systems.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 025—AN/APR-46A Panoramic Receiver Intermediate Maintenance—PDS Code NWQ—Hurlburt Fld/2 wk 1 day—Apr 95

Provides theory and practical experience, on an intermediate maintenance level, for the AN/APR-46A Panoramic Receiver system. Covers system power on procedures, functional checkout procedures, adjustment and alignment methods, and troubleshooting analysis peculiar to this Electronic Warfare system.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 026—AN/APR-39A(V)1 Radar Signal Detecting Set O/I Maintenance—PDS Code PXS—Hurlburt Fld/4 days—Apr 95

Provides theory and practical experience, on an intermediate and organizational maintenance level, for the AN/APR-39A(V)1 Radar Signal Detecting Set. Covers operational checkout procedures, software download and reprogramming methods, and malfunction analysis for this test equipment used primarily on the MH-60G aircraft.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 029—MC-130E Electronic Warfare System Organizational Maintenance—PDS Code WPX—Hurlburt Fld/3 wk—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for MC-130E specific Electronic Warfare systems. This course covers operational checkout procedures, removal and replacement, synchronization checks, and troubleshooting procedures for the AN/ALE-40, AN/AAR-44, QRC84-02A, AN/ALR-69, AN/APR-46A, AN/ALQ-196, and AN/ALQ-172 systems.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC LGMMT.

S2A2X2 031—AN/USM-639 Electronic Equipment Test Set O/I Maintenance—PDS Code W4W—Hurlburt Fld/2 wk—Apr 95

Provides theory and practical experience, on an intermediate and organizational maintenance level, for the AN/USM-639 Electronic Equipment Test Set. Covers diagnostic checkout procedures, software verification and reprogramming methods, and removal and reinstallation of subassemblies for this piece of Electronic Warfare test equipment.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A2X2 032—AC-130U Electronic Warfare System Organizational Maintenance—PDS Code WK2—Hurlburt Fld/2 wk 4 days—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for AC-130U specific Electronic Warfare systems. This course covers functional checkout procedures, removal and replacement, synchronization checks, and troubleshooting procedures for the AN/ALE-40, AN/AAR-44, QRC84-02A, AN/ALR-56M, AN/APR-46A, and AN/ALQ-172(V)1 systems.

Special Requirements: Secret clearance.

Quota Control: HQ AFSOC/LGMMT.

S2A4X1 028—MC-130H Guidance and Control Organizational Maintenance—PDS Code GVN—Hurlburt Fld/2 wk 2 days—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for MC-130H specific Avionics Guidance and Control systems. This course covers operational checkout procedures and troubleshooting analysis for the Mission Data Processing system, Inertial Navigation systems, FCS-105 Flight Control system, and numerous other instrument systems.

Quota Control: HQ AFSOC/LGMMT.

S2A4X1 029—MC-130E Guidance and Control Organizational Maintenance—PDS Code LHD—Hurlburt Fld/1 wk 1 day—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for MC-130E specific Avionics Guidance and Control systems. This course covers operating characteristics of the Computer Aided Navigation system (CANS), loading of the Operational Flight Program (OFP), and operational checkout procedures for the CANS.

Quota Control: HQ AFSOC/LGMMT.

S2A4X1 035—MH-53J Instruments Organizational Maintenance—PDS Code 8B1—Hurlburt Fld/1 wk 2 days—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for MH-53J specific Avionic Instrument systems. Covers inspection, operation, and malfunction analysis for the

helicopter engine, hydraulic, fuel quantity, pitot-static, and cruise guide systems.

Quota Control: HQ AFSOC/LGMMT.

S2A4X1 036—MH-53J Automatic Flight Controls Organizational Maintenance—PDS Code 6HL—Hurlburt Fld/1 wk 2 days—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for MH-53J specific Avionic Automatic Flight Control systems (AFCS). Covers inspection, operation, and malfunction analysis of the entire AFCS.

Quota Control: HQ AFSOC/LGMMT.

S2A4X1 067—AC-130H Guidance and Control Organizational Maintenance—PDS Code XAM—Hurlburt Fld/3 wk—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for AC-130H specific Avionic Guidance and Control systems. Covers operational characteristics and operational checkout procedures for the mission computer-fire control/navigation, autopilot signal switching, slave switching, fire control display, and trainable weapons/fire control interface systems.

Quota Control: HQ AFSOC/LGMMT.

S2A4X2 005—MH-53J AN/APQ-158 TF/TA Radar Organizational Maintenance—PDS Code PZE—Hurlburt Fld/4 days—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for the MH-53J AN/APQ-158 TF/TA Radar system. Covers the operational checkout of the APQ-158 Radar system, the antenna boresight check, and a simulated flight check.

Quota Control: HQ AFSOC/LGMMT.

S2A4X2 009—MC-130H Comm/Nav Systems Organizational Maintenance—PDS Code NWR—Hurlburt Fld/1 wk 3 days—Apr 95

Provides organizational level maintenance training on MC-130H specific communication and navigation systems. This covers identification steps, operational checkout procedures, and troubleshooting methods required for the AN/ARN-127 VOR/ILS/MB, DF 206 ADF, AN/ARN-118 TACAN, AN/APX-100 IFF, and numerous other Comm/Nav systems found on this aircraft

Quota Control: HQ AFSOC/LGMMT.

S2A4X2 029—AC-130H Comm/Nav Systems Organizational Maintenance—PDS Code X2V—Hurlburt Fld/2 wk 3 days—Apr 95

Provides organizational level maintenance training on AC-130H specific communication and navigation systems. This course covers system interface, operational checkout procedures, and troubleshooting methods required for the APN-232 CARA system, ARN-151 GPS system, APN-59F Radar system, and the APQ-150A Beacon Tracking Radar system.

Prerequisites: Students must have a minimum of 30 days aircraft experience to attend this course.

Quota Control: HQ AFSOC/LGMMT.

S2A4X2 035—MC-130E Comm/Nav Systems Organizational Maintenance—PDS Code X4Z—Hurlburt Fld/2 wk 3 days—Apr 95

Provides organizational level maintenance training on MC-130E specific communication and navigation systems. This course covers AN/ARN-151 GPS system, AN/ARC164(V)12/16 SATCOM, KY-879 DMDG, and numerous other Comm/Nav systems peculiar to this aircraft.

Prerequisites: Completed 2A4X2 technical training.

Quota Control: HQ AFSOC/LGMMT.

S2A5X1 030—AC-130U Familiarization for Non-Avionics Technicians—PDS Code X4X—Hurlburt Fld/2 days—Apr 95

Provides organizational level maintenance familiarization on AC-130U specific aircraft. Covers application of external power as well as the discussion of numerous aircraft systems including power distribution, environmental, engines, hydraulics, and the intercom and radios. This course is only for familiarization and not for in-depth operation of the systems.

Prerequisites: Technician should be qualified in operation of external power and air units.

Quota Control: HQ AFSOC/LGMMT.

S2A5X2 001—H-53 Helicopter Technician—PDS Code 9M7—Hurlburt Fld/6 wk 4 days—Apr 95

Provides organizational level maintenance training on H-53 helicopters. This course covers inspection, analysis, servicing, and actual hands-on experience on various engine, hydraulic, electrical, flight control, and structural components of the aircraft.

Quota Control: HQ AFSOC/LGMMT.

S2A6X1B 000—H-53 Turboprop Propulsion Organizational Maintenance—PDS Code 6HU—Hurlburt Fld/2 wk 1 day—Apr 95

Provides organizational level maintenance training on H-53 helicopters. This course covers inspection, analysis, servicing, and actual hands-on experience on various components of this particular aircraft engine.

Quota Control: HQ AFSOC/LGMMT.

S2A6X2 035—AGE Technician (MEP-360A Aviation Ground Power Unit)—PDS Code SB4—Hurlburt Fld/3 wk—Apr 95

Provides theory and practical experience on the identification, operation, and malfunction isolation for the MEP-360A Aviation Ground Power Unit (AGPU).

Quota Control: HQ AFSOC/LGMMT.

S2A6X5 012—H-53 Helicopter Pneudraulics Organizational Maintenance—PDS Code 3XG—Hurlburt Fld/2 wk 4 days—Apr 95

Provides organizational level maintenance training on H-53 helicopter specific pneudraulic systems. This course covers operating principles, system bleed procedures, and malfunction analysis.

Quota Control: HQ AFSOC/LGMMT.

S2A6X5 030—HC/MC-130 E/P/N Inflight Refueling Organizational Maintenance—PDS Code 8JB—Hurlburt Fld/1 wk—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for HC/MC-130E/P/N in-flight refueling (IFR) systems. Covers the causes of selected IFR electrical, hydraulic, and fuel system malfunctions; the timing of the IFR systems; and the

operational check of the IFR system.

Prerequisites: Students must have at least three years experience on IFR panel.

Quota Control: HQ AFSOC/LGMMT.

S2A6X6 036—MH-53J Electrical Systems Organizational Maintenance—PDS Code 6HP—Hurlburt Fld/2 wk 4 days—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for the MH-53J electrical systems. Covers operating principles, operational checkout, and malfunction analysis of various electrical systems including the blade and pylon fold system.

Quota Control: HQ AFSOC/LGMMT.

S2A6X6 045—SOFI C-130 Electro/Environmental Organizational Maintenance—PDS Code W92—Hurlburt Fld/1 wk 1 day—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for SOFI C-130 electro/environmental systems. This course covers troubleshooting procedures for the primary AC power supply, the air conditioning, the night vision lighting, and the avionics cooling systems.

Quota Control: HQ AFSOC/LGMMT.

S2W1X1 006—GAU-12/U 25 MM Gun System Intermediate Maintenance—PDS Code NRX—Hurlburt Fld/4 days—Apr 95

Provides theory and practical experience, on an intermediate maintenance level, for the GAU-12/U 25 MM gun system. Covers the entire disassembly and assembly of the GAU-12/U.

Quota Control: HQ AFSOC/LGMMT.

S2W1X1 007—MH-60G Weapons (SOF) O/I Maintenance—PDS Code NSG—Hurlburt Fld/2wk 3 days—Apr 95

Provides theory and practical experience, on an intermediate and organizational maintenance level, for MH-60G weapons systems. Covers the entire disassembly and assembly of the pintle mount, GAU-18, GAU2B/A, and MAU-56/A. Also covers functional checkout and removal and installation of the M-134 Armament subsystem.

Quota Control: HQ AFSOC/LGMMT.

S2W1X1 015—AC-130U Weapons Organizational Maintenance—PDS Code X4W—Hurlburt Fld/9 wk 2 days—Apr 95

Provides theory and practical experience, on an organizational maintenance level, for AC-130U weapons systems. Covers the entire removal and installation of 25MM component, 40MM components, and 105MM components. Also covers boresight procedures for the entire gun system.

Quota Control: HQ AFSOC/LGMMT.

S2W1X1 174—AC-130H Weapons O/I Maintenance—PDS Code FXD—Hurlburt Fld/6 wk 4 days—Apr 95

Provides theory and practical experience, on an organizational and intermediate maintenance level, for AC-130H weapon systems. Covers the entire disassembly and assembly of 20MM components, 40MM components, and 105MM components. Also covers boresight and operational checkout procedures for the entire gun system.

Quota Control: HQ AFSOC LGMMT.

S2W1X1 196—AC-130H AN/AWG-22/23 Trainable Gun Mount—PDS Code WKU—Hurlburt Fld/1 wk—Apr 95

Provides theory and practical experience on the AC-130H AN/AWG-22 and AN/AWG-23 Trainable Gun Mount system. Covers operating characteristics, operational checkout, and malfunction analysis of the AN/AWG-22 and AN/AWG-23 Trainable Gun Mounts.

Quota Control: HQ AFSOC/LGMMT.

S2W1X1 198—H-53 Helicopter Weapons O/I Maintenance—PDS Code WU8—Hurlburt Fld/2 wk 1 day—Apr 95

Provides theory and practical experience, on an organizational and intermediate maintenance level, for MH-53J helicopter weapon systems. Covers disassembly and assembly of the pintle mount, 7.62 mini-gun, MAU-56/A, GAU-18A, and GAU-2B/A. Also covers the functional checkout of the GAU-2B/A modified armament subsystem.

Quota Control: HQ AFSOC/LGMMT.

CRI-1—Criterion Referenced Instruction Course—PDS Code ZSQ—Hurlburt Fld/2 wk—Dec 93

Preparation of criterion referenced instruction to support instructional system development (ISD) concepts. Training includes analyzing the principles of criterion referenced instruction, writing performance objectives, performing task and goal analyses, preparing criterion tests, identifying relevant course materials, designing course control documents, and applying performance management principles for supervisors, instructors, course developers, and course managers.

Prerequisites: Primarily designed for personnel involved in the design, development validation, and evaluation of courses of instruction, selection or design of appropriate training aids and devices, and preparation of performance analysis instruments. Students who have completed Mager-Type "Criterion Referenced Instruction Workshop," should not attend this course.

Quota Control: 16 SOW/DOT, Hurlburt Fld FL.

Air Intelligence Agency (AIA)

ACW90-000—Intro to CONSTANT WEB—PDS Code 8ZS—Goodfellow/1 wk—Sep 90

Provides training to personnel whose duties require specific knowledge about the Air Force Command, Control, and Communications Support Data Base (AFC3CMSDB). Includes the history, purpose, and composition of the AFC3CMSDB as maintained by HQ Air Force Electronic Warfare Center. Students will be introduced to the data base users, producers, and support organizations. Provides detailed explanation of each data element contained in the data base. Gives hands-on training of the use of the data base.

Prerequisites: Attendance at the Electronic Combat Support Course.

Special Requirements: Top Secret clearance IAW AFI 31-501, Personnel Security Program Management (formerly AFR 205-32) and USAFINTEL 201-1, with access to SCI by class start date.

Quota Control: HQ AFEWC/CWAT.

AFIC 002—HUMINT Collection Tradecraft Course (HCTC)—

PDS Code APG—Ft Belvoir/2 wk—Mar 93

Provides military and civilian personnel with basic principles, techniques, and skills associated with human resources intelligence (HUMINT) collection activities. Includes operational planning, briefing/debriefing, security concerns, communication, collection management and oversight, and reporting.

Prerequisites: Course is limited to civilian and military personnel with current or follow-on HUMINT assignments.

Special Requirements: Secret clearance.

Admin Instructions: Administrative details may be obtained by contacting 696 IG/INOD, Ft Belvoir VA 22060-5798, DSN 354-2807. Appropriate civilian attire will be worn for the entire course.

Quota Control: HQ AIA/DPTF.

AFIS 001—Combat Interrogation Course (CIC)—PDS Code AQK—Camp Bullis TX/2 wk—Oct 95

Provides students with a comprehensive understanding of the fundamentals of tactical interrogation and document exploitation. Includes screening and selection of enemy prisoners of war (EPW), approach and questioning techniques, prisoner psychology, law of land warfare, EPW searching and handling techniques, reporting procedures, use of interpreters, termination, and special topics. Lectures are supplemented with an array of practical exercises which progressively challenges in the craft of interrogation.

Special Requirements: Secret clearance by class start date. Duty uniform is BDU. Sanitized BDUs are required for interrogation practical exercises.

Quota Control: HQ AIA/DPTF.

OPSEC 001—OPSEC Program Manager's Course—PDS Code X3G—Kelly/2.5 days—Apr 95

Provides OPSEC program managers job-specific training in support of the Air Force OPSEC Program. Emphasizes the understanding of the effects of foreign intelligence collection on mission effectiveness. Course of instruction includes mission analysis techniques, critical information (CI) identification procedures, adversarial intelligence collection capabilities, OPSEC countermeasures, OPSEC planning methods, and OPSEC survey techniques. The curriculum also includes instruction on tactical deception and on OPSEC-related security disciplines such as COMSEC and COMPUSEC.

Prerequisites: Primarily for OPSEC program managers at MAJCOMs, FOAs, DRUs, laboratories, centers, test ranges, and for personnel who perform OPSEC surveys. Others may attend on a space-available basis if nominated by their MAJCOM, agency, or other appropriate authority. A mobile version of this course is also available upon request and justification.

Special Requirements: Secret clearance.

Quota Control: HQ AIA/DPTF; AFIWC/OSW.

AIA1N651 000—Electronic Combat Crew Training Course (ECCTC)—PDS Code HMA—Nellis (Beatty, NV)/3 wk*/AFSC 1N6X1—Apr 95

Provides “hands on” Red Force operations equipment training during “live-fly” exercises on the Nellis AFB Tolicha Peak Electronic Combat Ranges. Students learn standardized jamming/ICD techniques and procedures, site-survey procedures, and equipment setup and tear-down. ECCTC also familiarizes students with Red Force asset employment, Blue Force Tactical Air Control System, Blue Force weapons employment, and radio theory. (Note: These reporting instructions apply only to active duty students graduating the AETC X3ABR1N631-003. Does not apply to Air Force Reserve personnel.)

(1) Unit of Assignment: 39 IS.

(2) Orders: Personnel selected for retraining and basic first-term students graduating the X3ABR1N631-003 AETC Tech School. MPF outbound assignment sections must obtain TDY enroute fund cites from the servicing host base AFO of the member's AIA gaining PCS unit. Send two copies of PCS orders with TDY enroute fund cite to the appropriate AIA member's gaining unit and servicing AFO. TDY orders must indicate variations authorized, or, if variations are not authorized — TDY travel must read “39 IS/67 IG Nellis AFB NV — to — Beatty, NV 89003, return to 39 IS/67 IG Nellis AFB NV.”

(3) Reporting location and time: Report NLT the day before course start date. Report to Nellis AFB billeting. Contact Det 3, 39 IS at Nellis, ext. 9050.

(4) Student quarters: Students should be billeted in government TDY quarters while at Nellis. If billeting is not available, students will need to pay hotel costs of approximately $60 a night. During the 13 uprange class days students will be in contract quarters with NO government facilities available.

(5) Per diem: Payable according to most recent JTR.

(6) Security Travel Clearance: During uprange class dates school facilities are within a controlled access training range and range entry badges must be issued. Students must possess a minimum of Secret clearance. The following information must be provided to Det 3, 39 IS/DOT: student's name, SSN, rank, date and place of birth, citizenship, AFSC, duty title, and clearance status. The training center servicing SPS must forward this information NLT 30 days of class start date.

(7) Clothing: During uprange class days from Apr thru Sep fatigues or BDU required, with field jacket optional. From Oct thru Mar, fatigues or BDU with field jacket and liner required, with boots and overboots necessary.

(8) Transportation: Government transportation is available.

(9) Dining facilities: While billeted on Nellis, government dining facilities are available. During class days uprange NO government dining facilities are available, and personnel will need to handcarry lunch daily to class.

(10) Flying: If tech school grad is to be assigned to flying duties, individual must attend ECCTC prior to attending requisite survival schools.

Quota Control: Course quotas will be the number of active duty students graduating from the AETC X3ABR1N631-003 basic course. Changes to course quotas must be coordinated through HQ AIA/DOZI.

OPR: HQ AIA/DOZI/DPTF.

*2 days on Nellis - 13 days of training on Tolicha Tactical Training Range (Beatty, Nevada).

AIA1N651 001—Electronic Security Survey Team Course (ESST)—PDS Code VXX—Brooks/9 wk—Apr 95

Provides hands-on and classroom training in the skills and knowledge required to perform electronic security surveys. Includes:

(1) Computer Science: presents basic information on computers and their components, functions, and uses. Also covers the application of specific utility programs, disk operating systems, basic language, an introduction to higher order languages, and special system penetration tools and techniques; (2) Computer Security: provides instruction to the student in both the theoretical aspect (Rainbow series) and the policy and procedural aspects (AFSSI/Ms) of computer security. It will address the roles and responsibilities of various computer security personnel and the technical and procedural means by which computer security can be enhanced; (3) Communications Security: provides basic information on COMSEC equipment recognition, COMSEC applications, and STU-III policy, procedures, and utilization; (4) TEMPEST: provides instruction on emissions security, its origin, characteristics, and propagation. It provides instruction on completion of countermeasure assessments, facility and environmental considerations, and RED/BLACK separations requirements; (5) Electronic Security Survey Fundamentals: draws all the material together and provides the students with the understanding of performing a security survey from the planning stages through report writing. Several practicums are included in this part to include planning, briefing, conducting, and reporting a survey; (6) Administrative and Testing: covers the necessary administrative matters and the measurement of student progress through testing.

Prerequisites: Personnel assigned to electronic security survey teams. Experience or training in disk operating systems, utility software, and some applications software is desirable.

Quota Control: HQ AIA/DOZI.

AIA2A1X7 001—Ground Data Processing System Management Course—PDS Course PSR—Offutt/5 wk—Oct 95

Provides indepth theory of operation, troubleshooting techniques, and repair capabilities of the ground data processing system (GDPS). Training includes: System nomenclatures; component descriptions; component purposes; system block diagrams; system signal flow; maintenance capabilities; operations; troubleshooting; and commands.

Prerequisites: Enlisted personnel in AFSC 2A1X7 or 2EXXX.

Special Requirements: Top Secret/SCI clearance by clas start date. Dress is duty uniform; however, appropriate attire for cold weather is recommended from October through March.

Admin Instructions: Send student names and SSNs to 97 IS/LGF and security clearances to 97 IS/SP NLT 5 days prior to class start date. Students report to 97 IS Rivet Joint Maintenance Training Center at 0800 on class start date.

Quota Control: HQ AIA/DPT, DSN 969-2807.

AIA2A1X7 002—Airborne Maintenance Technician Course—PDS Code PSZ—Offutt/10 wk—Oct 95

Provides indepth theory of operation, troubleshooting techniques, and repair of the ES142A collection system on RC-135 aircraft for Air Intelligence Agency personnel worldwide. Training includes: system overview, system nomenclatures, system signal flow, system commands, component locations, subsystem signal flow; signal characteristics, direction finding theory, airborne troubleshooting techniques, ground troubleshooting techniques, system testing, system technical data usage, and system interaction.

Prerequisites: Enlisted personnel in AFSC 2A1X7.

Special Requirements: Top Secret/SCI clearance by class start date. Dress is duty uniform; however, appropriate attire for cold weather is recommended from October through March.

Admin Instructions: Send student names and SSNs to 97 IS/LGF and security clearances to 97 IS/SP NLT 5 days prior to class start date. Students report to 97 IS Rivet Joint Maintenance Training Center, Offutt AFB at 0800 on class start date.

Quota Control: HQ AIA/DPT, DSN 969-2807.

AIA2A1X7 013—Tactical Information Broadcast Service Maintenance Course—PDS Code 2T3—Offutt/3 days—Oct 95

This course provides theory of operation and maintenance capabilities on all current configuration of the tactical information broadcast service worldwide. Training includes: system configurations; system theory; equipment descriptions; system block diagrams; system signal flow; system operations; and troubleshooting techniques.

Prerequisites: Enlisted personnel in AFSC 2A1X7 or 2EXXX.

Special Requirements: Secret clearance by class start date. Dress is duty uniform; however, appropriate attire for cold weather is recommended from October through March.

Admin Instructions: Send student names and SSNs to 97 IS/LGF and security clearances to 97 IS/SP NLT 5 days prior to class start date. Students report to 97 IS Rivet Joint Maintenance Training Center at 0800 on class start date.

Quota Control: HQ AIA/DPT.

AIA2A2X2 006—Tactical Ground Intercept Facility (TGIF) and Deployable Ground Intercept Facility (DGIF) Maintenance Technician—PDS Code 2DY—Langley/4 wk—Apr 95

Provides maintenance training for the Contingency Airborne Reconnaissance System (CARS) Deployable Ground Station (DGS) TGIF/DGIF. Course of instruction includes hands-on, computer based, and classroom training in theory of operation, circuit diagram analysis, execution and interpretation of maintenance diagnostic software programs, and fault detection/isolation to the Field Replaceable Unit level.

Prerequisites: Personnel in AFSC 2E2X1 or 2A2X2.

Special Requirements: Top Secret/SCI clearance by class start date. Dress is BDU or equivalent.

Admin Instructions: Send student names and SSNs to 10 IS/LGF and security clearance to ACC/SSO 5 days before class start date. Administrative details may be obtained by contacting 10 IS/LGF, 50 West Flightline Rd, Langley AFB VA 23665-2108. Students may contact the Maintenance Training Center at DSN 574-9104 or commercial (804) 591-4112.

Quota Control: HQ AIA/DPT, DSN 969-2807.

AIA2A2X2 007—Ground Control Processor (GCP) Maintenance Technician (MV based systems)—PDS Code 2DV—Langley/4 wk—Apr 95

Provides maintenance training for the Contingency Airborne Reconnaissance System (CARS) Deployable Ground Station (DGS) MV based GCP systems. Course instruction includes hands-on, computer based, and classroom training in theory of operation, circuit diagram analysis, execution and interception of maintenance diagnostic software programs, and fault detection/isolation to the Field Replaceable Unit Level.

Prerequisites: Personnel in AFSC 2E2X1 or 2A2X2.

Special Requirements: Top Secret/SCI clearance by class start date. Dress is BDU or equivalent.

Admin Instructions: Send student names and SSNs to 10 IS/LGF and security clearance to ACC/SSO 5 days before class start date. Administrative details may be obtained by contacting 10 IS/LGF, 50 West Flightline Rd, Langley AFB VA 23665-2108. Students may contact the Maintenance Training Center at DSN 574-9116 or commercial (804) 591-4112.

Quota Control: HQ AIA/DPT, DSN 969-2807.

AIA2A2X2 009—Mission Intelligence Segment (MIS) Maintenance Technician—PDS Code 2PS—Langley/6 wk—Apr 95

Provides maintenance training for the Contingency Airborne Reconnaissance System (CARS) Deployable Ground Station (DGS) MIS. Course of instruction includes hands-on, computer based, and classroom training in theory of operation, circuit diagram analysis, execution and interpretation of maintenance diagnostic software programs, and fault detection/isolation to the Field Replaceable Unit Level.

Prerequisites: Personnel in AFSC 2E2X1 or 2A2X2.

Special Requirements: Top Secret/SCI clearance by class start date. Dress is BDU or equivalent.

Admin Instructions: Send student names and SSNs to 10 IS/LGF and security clearance to ACC/SSO 5 days before class start date. Administrative details may be obtained by contacting 10 IS/LGF, 50 West Flightline Rd, Langley AFB VA 23665-2108. Students may contact the Maintenance Training Center at DSN 574-9107 or commercial (804) 591-4112.

Quota Control: HQ AIA/LGMM, DSN 969-2736.

AIA2A2X2 012—Ground Control Processor (GCP) Maintenance Technician (VME based systems)—PDS Code 2W1—Langley/4 wk—Apr 95

Provides training for the Contingency Airborne Reconnaissance System (CARS) Deployable Ground Station (DGS) VME based GCP systems. Course of instruction includes hands-on, computer based, and classroom training in theory of operation, circuit diagram analysis, execution and interpretation of maintenance diagnostic software programs, and fault detection/isolation to the Field Replaceable Unit Level.

Prerequisites: Personnel in AFSC 2E2X1 or 2A2X2.

Special Requirements: Top Secret/SCI clearance by class start date. Dress is BDU or equivalent.

Admin Instructions: Send student names and SSNs to 10 IS/LGF and security clearance to ACC/SSO 5 days before class start date. Administrative details may be obtained by contacting 10 IS/LGF, 50 West Flightline Rd, Langley AFB VA 23665-2108. Students may contact the Maintenance Training Center at DSN 574-9116 or commercial (804) 591-4112.

Quota Control: HQ AIA/DPT, DSN 969-2807.

AIA2E2X1 001—Communications Segment (COS) Maintenance Technician—PDS Code 2R7—Langley/4 wk—Apr 95

Provides maintenance training for the Contingency Airborne Reconnaissance System (CARS) Deployable Ground Station (DGS) COS: telephone switching, radio communications, digital processor, cryptological and networking equipment. Course of instruction includes hands-on, computer based, and classroom training in theory of operation, circuit diagram analysis, execution and interpretation of maintenance diagnostic software programs, and fault detection/isolation to the Field Replaceable Unit Level.

Prerequisites: Personnel in AFSC 2E2X1, 2E1X3, or 2E3X1.

Special Requirements: Top Secret/SCI clearance by class start date. Dress is BDU or equivalent.

Special Requirements: Send student names and SSNs to 10 IS/LGF and security clearances to ACC/SSO NLT 5 days before class start date. Administrative details may be obtained by contacting 10 IS/LGF, 50 West Flightline Rd, Langley AFB VA 23665-2108. Students may contact the Maintenance Training Center DSN 574-9109 or commercial (804) 591-4112.

Quota Control: HQ AIA/DPT, DSN 969-2807.

CP-202—Operational Computer Security—PDS Code K2W—various locations/1 wk—Mar 93

Primarily designed for anyone whose job duties include formal responsibility for the security of an NSA computer system, including the service cryptologic elements (Army INSCOM, Navy COMNAVSECGRU, and Air Force AFIC). These jobs include the Comm-Computer Security Officer, the Comm-Computer System Security Officer, and the System Design Security Officer. It outlines their roles tn the NSA/CSS computer security program. The concepts of computer security are discussed along with the documents that define the policies and guidelines governing computer security practices within NSA/CSS. Specific topics include control of media, network security, access control, risk management, audit trails, preparation of an accreditation package, and PC security.

Prerequisites: The student should currently have or be gaining specific computer security responsibilities.

Special Requirements: Top Secret clearance and indoctrinated for Special Intelligence.

X4AZZ1N350 000—Command Language Program Managers Course - MTT—PDS Code 220—various locations/1 wk—Oct 96

Covers command support, command level considerations, language council, CLPM management, recordkeeping and tracking, retention and incentives of linguists, standard operating procedures, funding acquisition, access to regulations, using and sustaining unit linguist assets, dedicated language instruction time, training resources and options, use of Defense Language Institute's services, setting general proficiency and job-related goals, instruction on training adult students, marketing the CLPM, and evaluating training materials and courses. Training is conducted by Defense Language Institute/Foreign Language Center (DLIFLC staff at various locations.

Prerequisites: No grade requirements. Course is open to Guard and Reserve personnel. Applicant should either supervise training division, work or anticipate working in the training division, work directly or indirectly with language training or supervise large numbers of linguist personnel.

Reporting Instructions: Member must report 1 day before class start date. Instructions as to class location will be forwarded from HQ AIA/DPTF. Students should not plan leaving local area on Friday afternoons; class runs full days.

Quota Control and Selection Procedures: 2AF/DOPN acquires quotas from DLIFLC provides quotas to MAJCOMs and FOAs based on identified requirements. MAJCOM and FOA representatives select individuals to fill quotas.

X5AZZ1N350 000—Command Language Program Managers Course - MTT—PDS Code 221—Presidio /1 wk—Oct 96

Covers command support, command level considerations, language council, CLPM management, recordkeeping and tracking, retention and incentives of linguists, standard operating procedures, funding acquisition, access to regulations, using and sustaining unit linguist assets, dedicated language instruction time, training resources and options, use of Defense Language Institute's services, setting general proficiency and job-related goals, instruction on training adult students, marketing the CLPM, and evaluating training materials and courses. Training is conducted by Defense Language Institute/Foreign Language Center (DLIFLC) staff at various locations.

Prerequisites: No grade requirements. Course is open to Guard and Reserve personnel. Applicant should either supervise training division, work or anticipate working in the training division, work directly or indirectly with language training or supervise large numbers of linguist personnel.

Reporting Instructions: Member must report 1 day before class start date. Instructions as to class location will be forwarded from HQ AIA/DPTF. Students should not plan leaving local area on Friday afternoons.

Quota Control and Selection Procedures: 2AF/DOPN acquires quotas from DLIFLC and provides quotas to MAJCOMs and FOAs based on identified requirements. MAJCOM and FOA representatives select individuals to fill quotas.

Joint Services SERE Agency (HQ JSSA)

S-V91-A—DOD High Risk Training—PDS Code LXH—onsite (MTT)/duration *—Oct 95

Course content is classified.

Prerequisites: A definite need for such training should be clearly indicated by the trainee's present or projected duty assignment.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Units requesting training should contact OL-FA, JSSA, 800 W. Survival Loop, Fairchild AFB WA 99011-8600, DSN 657-2195/2393.

OPR: HQ JSSA/DD.

* 4-5 days depending on class size.

S-V93-A—DOD Hostage Survival Training—PDS Code N4Z—onsite (MTT)/duration *—Oct 95

Course content is classified.

Prerequisites: A definite need for such training should be clearly indicated by the trainee's present or projected duty assignment.

Special Requirements: Secret clearance by class start date.

Admin Instructions: Unit requesting training should contact OL-FA, JSSA, 800 W. Survival Loop, Fairchild AFB WA 99011-8600, DSN 657-2195/2393.

OPR: HQ JSSA/DD.

* 4-5 days depending on class size.

USAF Test Pilot School

TPS011E3—Experimental Test Pilot Course—PDS Code ABM—Edwards*/48 wk/AFSC 011E1Z, 011E3Z/MASL D118002—Apr 96

This flying program for pilots develops the knowledge, flying precision, and powers of observation necessary for successful flight testing and evaluating experimental and production aircraft.

Academics: Course is divided into four phases with integrated flying and academic instruction:

(1) Performance.

(2) Flying qualities, stability, and control.

(3) Systems testing.

(4) Test management.

Academic instruction includes math, aerodynamics, flight dynamics, aircraft systems, and flight test theory and techniques. Aircraft flying qualities are studied mathematically on computers and simulators and in variable stability aircraft. Flying training includes standard Air Force experimental flight test techniques. A series of oral and written reports on the progress and results of student data flights is part of the curriculum. Field trips are taken to organizations engaged in developing, testing, and production of aerospace vehicles and equipment.

Prerequisites: See AFI 99-107, Test Pilot School, for minimum eligibility requirements. ECL 85 SR.

Special Requirements: Secret clearance by course start date.

Application Procedures: Applicants and recommending officers see AFI 99-107 for instructions on format and submission procedures for applications.

Admin Instructions: Students report to USAF Test Pilot School NLT Monday of the first week in the class start month with personal flying equipment. Invitational travel orders for international students must include TDY for field trips that are part of the curriculum. All students, including civilians, are required to live on base.

Selection is made in January for classes starting the following July and January (two classes per year). Applications should arrive at HQ AFPC/DPAOY3 NLT 45 days prior to selection board.

NOTE: Helicopter pilots will be trained at the Naval Test Pilot School, Patuxent River, Maryland.

*USAF Test Pilot School, USAFTPS/CC, 220 S. Wolfe Ave, Edwards AFB CA 93524-6485.

TPS012E3—Experimental Test Navigator Course—PDS Code W93—Edwards*/48 wk/AFSC 012E1Z, 012E3Z/MASL D121074—Apr 96

Trains navigators in latest methods of testing and evaluating aircraft and installed equipment.

Academics: See experimental test pilot course for description of academic curriculum.

Prerequisites: See AFI 99-107, *Test Pilot School*, for minimum eligibility requirements. ECL 85 SR.

Special Requirements: Secret clearance by class start date.

Application Procedures: Applicant and recommending officers see

AFI 99-107 for instructions on format and submission procedures for applications.

Admin Instructions: Students report to USAF Test Pilot School NLT Monday of the first week of class start month with personal flying equipment. Invitational travel orders for international students are to include TDY for field trips that are part of the curriculum. All students, including civilians, are required to live on base.

Selection is made in January for classes starting the following July and January. Applications should arrive at HQ AFPC/DPAOY3 NLT 45 days prior to selection board.

*USAF Test Pilot School, USAFTPS/CC, 220 S. Wolfe Ave, Edwards AFB CA 93524-6485.

TPS062E3—Flight Test Engineer Course—PDS Code R4W—Edwards*/48 wk/AFSC X062E1Z, 062E3Z/MASL D121034—Apr 96

Trains engineers in the latest methods of testing and evaluating aircraft and installed equipment.

Academics: See experimental test pilot course for description of academic curriculum.

Prerequisites: See AFI 99-107, Test Pilot School, for minimum eligibility requirements. ECL 85 SR.

Special Requirements: Secret clearance by class start date.

Application Procedures: Applicant and recommending officers see AFI 99-107 for instructions on format and submission procedures for applications.

Admin Instructions: Students report to USAF Test Pilot School NLT Monday of the first week of class start month. Invitational travel orders for international students are to include TDY for field trips that are part of the curriculum. All students, including civilians, are required to live on base.

Selection is made in January for classes starting the following July and January. Applications should arrive at HQ AFPC/DPAOY3 NLT 45 days prior to selection board.

*USAF Test Pilot School, USAFTPS/CC, 220 S. Wolfe Ave, Edwards AFB CA 93524-6485.

Other

AAP-001—Aerial Application of Pesticides—PDS Code 2EV—DOD 720/Youngstown ARB OH/1 wk—Jun 93

Addresses the principles and procedures for the aerial application of pesticides in the military. The major areas of course coverage include publications pertinent to aerial application; history of military aerial spray; advantages and limitations of aerial spray; legal implications; target and nontarget population surveillance; initiation and justification of aerial spray requests; pesticide formulations, safety, first-aid, and occupational health; aircraft and spray system types and uses; calibration procedures and dosage rate calculations; meteorological influences; pesticide sampling techniques; mission planning, checklists, and decision criteria, and other operational considerations. This course satisfies Department of Defense requirements for certification in aerial application pest control.

Prerequisites: Department of Defense pest management professionals and other specialized personnel who have satisfactorily completed core and public health category training, as specified in DOD procedures for training and certification of pest management personnel, are eligible for course attendance.

Quota Control: 910 AG/DOS, Youngstown ARB OH 44473-0910.

G-119—Foreign Affairs Interdepartmental Seminar—PDS Code V28—FSI Institute, Wash DC/2 wk—Jan 82

Intensive interdepartmental seminar designed for personnel whose primary duties include military representation, foreign internal defense planning, security assistance matters, foreign policy considerations, and other politicomilitary activities. Exposes personnel to the formulation, coordination, and execution of US foreign policy. Emphasis is on current major foreign and national security problems, domestic factors affecting policy, and critical international issues to include food, population, and energy. Special attention is given to the problems of modernization and development in the Third World, multilateral diplomacy, and the North-South dialogue.

Prerequisites: Lt Col and GS-13 and above whose primary duties are international in scope. Secret clearance.

Admin Instructions: Quotas allocated by AF/XOXXI, Washington DC 20330. Name, rank, SSN, office of assignment, clearance certification and mailing address of nominees must be forwarded to AFI/XOXXI 45 days before class starting date. Course costs defrayed by Air Force. Travel and per diem costs responsibility of requesting command or agency.

Location: Foreign Service Institute, Dept of State, Washington DC. Government quarters and mess not available. Seminar offered four times a year.

OPR: HQ USAF/XOXX.

RAFABDR-1—Aircraft Battle Damage Repair—PDS Code 27G—RAF Abingdon UK/2 wk—Jun 94

Instructs highly qualified aircraft maintenance personnel in aircraft battle damage assessment and repair techniques. Graduates of this course will form an initial cadre of unit trainers, assessors, and technicians.

Prerequisites (recommended): Extensive experience, minimum 7-level skill, and currently working in one of the following AFSCs: 2A373A, 2A373B, 2A373J, 2A571, 2A572, 2A674, 2A675, 2A676, and 2A773.

Funding: Funding is the responsibility of the MAJCOM requesting the training.

Quota Control: MAJCOM/LGM.

OPR: HQ USAFE/LGM.

RAFABDR-2—Aircraft Battle Damage Repair—PDS Code 27H—RAF Bruggen GE/1 wk—Jun 94

Instructs highly qualified aircraft maintenance personnel in aircraft battle damage assessment and repair techniques. This shorter course has been used effectively by USAFE (instead of RAFABDR-1) for training supplementary personnel to an initial cadre of unit trainers, assessors, and technicians.

Prerequisites (recommended): Extensive experience, minimum 7-level skill, and currently working in one of the following AFSCs: 2A373A, 2A373B, 2A373J, 2A571, 2A572, 2A674, 2A675, 2A676, and 2A773.

Funding: Funding is the responsibility of the MAJCOM requesting the training.

Quota Control: MAJCOM/LGM.

OPR: HQ USAFE/LGM.

955PAC16200 010—PACAF Vehicle Maintenance Supervisor's Course—PDS Code ERB—Clark AB RP/90 hrs—Mar 93

Provides training in the knowledge and skills necessary to perform the duties of a vehicle maintenance repair shop supervisor. The training is for personnel in AFSC 472XX, is at the 5-skill level, and is tailored to supervisors in the grade of sergeant, staff sergeant, and technical sergeant. Training includes responsibilities of vehicle maintenance, policy and procedures, maintenance and material control, Vehicle Integrated Management System (VIMS) data collection, budgeting for resources, equipment and personnel, training requirement identification, and procurement and productivity analysis. A printout calculator is required to support the budgeting for resources lesson. Maximum number of students: 10.

MAJCOM Training Monitor: HQ PACAF/LGTRX.

955PAC16200-011—Advanced Systems Training—PDS Code 8K1—Hickam/1 wk—Mar 93

Includes an overview of infrared imaging systems; a focus on infrared theory and principles; and a concentration on order-of-battle analysis.

Prerequisites: The course is designed to provide training for DOD and other intelligence community personnel who possess Air Force AFSCs 8016, 8045, 20650/70/90, or their equivalents. Army, Navy, Marine Corps, and civilian attendees must be graduates of a basic imagery interpretation course. Completion of course X3OZP8045 001, Defense Sensor Interpretation and Application Training (DSIATP), is desirable.

Special Requirements: Course is conducted at the SI/SAO level. Top Secret clearance and access to SI/SAO is required prior to reporting for training. Students designated to attend course at the 548 RTG/IST (Hickam AFB HI) send clearances to SSO HQ PACAF/INS (info 548 RTG/ISS) at least 14 days before class start date. Waiver of security clearance requirements CANNOT be granted, and students WILL NOT be enrolled unless security requirements are met.

Quota Control: JICPAC/RSIT.

OT&E 001—Operational Test and Evaluation Overview Course—PDS Code V9A—Kirtland/4.5 days—Mar 93

Presents an overview of the OT&E process. The course is divided into two formats, one for AFOTEC personnel and one for MAJCOM personnel. Emphasis is on aspects unique to each test organization. Open to personnel of all grades, military and civilian, who are participating in OT&E. Each day covers a different functional area, with topics such as OT&E and the acquisition process, effectiveness, suitability, test execution, and a test planning exercise. The course contains information classified Secret. An unclassified version is available.

Special Requirements: Secret clearance.

Admin and Reporting Procedures: Course is taught in Bldg #20130 (at the corner of Wyoming and Gibson Blvds). Albuquerque NM is serviced by the Albuquerque International Airport. Interstate 40 and Interstate 25 intersect in Albuquerque. A limited base taxi service is available. Rental cars are recommended, but not funded by HQ AFOTEC. Students may be billeted on or off base. Arrangements should be made through the base billeting office (DSN 246-1497). Funding is the responsibility of the student's home unit.

Additional Information: Air Force light blue short or long sleeve shirt, dark blue trousers or slacks, or skirt combination (or equivalent for other services) must be worn at all times. Utility uniforms are not authorized. Civilian personnel should wear clean, conservative casual attire (slacks, open collar shirts, dresses, etc.). Shorts, jeans, and T-shirts are not authorized.

Quota Control: AFOTEC personnel, HQ AFOTEC/TR; MAJCOM personnel, consult training representative.

OT&E 101—Operational Test and Evaluation Test Management Course—PDS Code XZ0—Kirtland/3 wk—Jun 94

An AFOTEC-owned and -conducted course that presents specialized training for OT&E test managers, operational effectiveness managers and logistics effectiveness managers. Open to personnel of all grades, military and civilian, who are responsible for OT&E test management, operational effectiveness management, and logistics effectiveness management. Includes instruction on the acquisition process, program management, advanced test planning, pretest planning, test execution, and test reporting. The course is unclassified.

Quota Control: Quotas for AFOTEC personnel can be obtained from AFOTEC/TR; MAJCOM personnel can obtain quotas from their training representatives.

OT&E 301—Operational Test and Evaluation Test Team Operations Course—PDS Code 0BI—Kirtland/4 days—Jan 96

An AFOTEC-owned and -conducted course that provides specialized training to test directors and test team members. Provides background into the OT&E process and basics for pretest execution planning, with detailed instructions on the test execution and reporting phases. This training is accomplished with several basic goals in mind: define AFOTEC's role in the process, give test team members and test directors an overview of the OT&E planning process and introduce them to the concepts of operational effectiveness and suitability. It details the process with common actions required during OT&E execution and reporting. The course is organized into 19 lessons in 7 instructional blocks over a 4-day period. The course is normally taught at the test team's location. To arrange for a course, contact HQ AFOTEC/TR at DSN 246-8111.

OT&E 410—Introduction to Joint Reliability and Maintainability Evaluation Team Course—PDS Code XFX—Kirtland/2 days—Dec 93

An AFOTEC-owned and -conducted course which presents an overview and detailed examples of the JRMET and Test Data Scoring Board (TDSB) process. Open to personnel of all grades (military and civilian) who participate in the collection, scoring, and analysis of developmental or operational reliability and maintainability (R&M) data. Highlights DoD requirements, establishes guidelines for the JRMET charter and meetings, defines common R&M terms and definitions, and provides "how to" training for the collection, review, scoring, and evaluation and analysis of R&M data. The course is unclassified and taught at Kirtland. It is also taught, on request, at AFOTEC detachments and HQ AFMC locations. POC is AFOTEC/SAL, DSN 246-8001.

Quota Control: Quotas for AFOTEC personnel can be obtained from AFOTEC/TR. MAJCOM personnel should consult their training representative for quotas.

OT&E 420—Introduction to Software Operational Test and Evaluation Course—PDS Code 1T1—Kirtland/4.5 days—Jan 96

An AFOTEC-owned and -conducted course that presents specialized training in software OT&E for AFOTEC software test managers,

AFOTEC test team deputies for software evaluation, and MAJCOM and multiservice software test and evaluation personnel. Open to personnel of all grades (military and civilian) who are responsible for software test and evaluation. Instruction covers software OT&E methods outlined in the AFOTEC 99-102 series pamphlets, 1-6, and other software-related OT&E material. Topics include test concept development, software support life cycle, software support resources, software maturity, metrics, maintainability, and usability, and software OT&E reporting. The course is unclassified and taught at Kirtland AFB.

Quota Control: Quotas for AFOTEC personnel can be obtained from AFOTEC/TR. MAJCOM personnel should consult their training representatives for quotas.

COURSES NOT FUNDED BY THE AIR FORCE

Chapter 12

DOD AND OTHER GOVERNMENT AGENCY TRAINING

Designated OPR. Request for new course announcements, changes, or revisions must be prepared in accordance with paragraph 1.10 and sent to the designated OPR for required processing.

Section A—Procedures and Instructions

12.1. Defense Institute of Security Assistance Management (DISAM)(OPR: DISAM/DAS). The Institute conducts a series of instructional programs to enhance middle and senior level management capabilities of DoD personnel assigned to CONUS and oversea security assistance activities, purchaser country clientele, and US industry personnel. The DISAM operates under the overall guidance and direction of the Director, Defense Security Assistance Agency (DSAA).

12.1.1. **Program Description**. DISAM programs are an integral part of foreign military education and training. A primary objective of this Institute is to improve the management of security assistance through the education of personnel from both the United States and friendly or allied nations. The program consists of 10 courses which vary in length from 1 to 3 class weeks. Most courses are offered a number of times each year. Training is tailored to meet the specific needs of the students at all security assistance management levels.

12.1.2. **Class and Study Hours**. DISAM students are normally scheduled for formal classes from 0800 through 1530 each day. Study hours are available before and after all formally scheduled classes.

12.1.3. **Course Schedules and Allocations**. DISAM publishes its annual resident course schedule and issues allocations to the military department education or training officer during May and June for the following fiscal year. Allocations are given to Army, Navy, and Air Force.

12.1.3.1. Allocations to US Government agencies and other DoD activities are handled individually by DISAM. Such agencies should send requests for course information, requirements, and allocations to DISAM/DAS, 2335 Seventh St, Wright-Patterson AFB OH 45433-7803, DSN 785-4144, Commercial (513) 255-4144.

12.1.3.2. Enrollment quotas for SAM-F, SAM-TM, and SAM-TO, are managed by AFSAT/SDS, Randolph AFB TX 78150-4302.

12.1.4. **Quarters and Messing Facilities**. All VOQ reservations will be made by the DISAM Registrar. Reservations for all students will be made at the VOQ office, Bldg 825, Area A, Wright-Patterson Air Force Base (WPAFB). Current VOQ rate is $8. A limited number of VOQ suites are available for colonels and above at a rate of $14. Not all VOQ accommodations at WPAFB have private baths. Personnel in grades of Lt Col or GM-14 and below may be assigned to a private room with a connecting bath to another room. We realize this may be inconvenient, but the availability of quarters and high level of demand for TDY bed space make this situation a necessity.

12.1.4.1. Students of SAM-O are encouraged to bring their spouses because some blocks of instruction have information of value to spouses accompanying sponsors to overseas locations. The decision to bring your spouse, however, must be a personal one because DISAM cannot authorize funding for spouse TDY. WPAFB transient billeting facilities for accompanied students are limited. Students interested in this option should contact the WPAFB Billeting Office at DSN 787-3810 or commercial (513) 257-3810. Students must make their own arrangements, including transportation, if they elect to live off-base. They will not be provided a statement of nonavailability for quarters when quarters are available.

12.1.4.2. There are no government messing facilities at WPAFB for officer personnel. Use of Officers Open Mess facilities is available to all military officers, civilian students, industry students, and retired officers serving in DoD positions, if they belong to an open mess or officers club at their own installation. Students may use the officers club dining facilities if residing in the VOQ. A field ration mess is available for all enlisted personnel in the Kittyhawk area. Membership in the NCO Open Mess is available to all enlisted and civilian personnel at a cost of $7 per month. Club cards from home stations are honored. A cafeteria located in Bldg 127 (directly adjacent to DISAM) serves breakfast and lunch on weekdays.

12.1.5. **Local Transportation**. DISAM foreign students will be met at the airport when arrival times are provided to DISAM.

12.1.6. **Fund Responsibilities**:

12.1.6.1. DISAM funds are authorized for the sole purpose of TDY at WPAFB to attend this school. Training officers, orders publishing officials, and accounting and finance personnel should ensure other items are not charged to the DISAM fund citation, such as PCS moves and other TDYs en route. Car rentals are not authorized unless specifically approved in advance by DISAM (paragraph 12.1.6.6.2). Take special precautions to avoid charging the total advance authorized to the DISAM fund citation when other TDY is involved. Failure to follow these guidelines will only delay reimbursement actions and detract from effective financial management.

12.1.6.2. Except as indicated below, all domestic (CONUS) travel and per diem costs for DoD military and civilian personnel, including foreign nationals employed by the US Government, are funded by DISAM through direct citation. In the case of an overseas student, the DISAM fund citation may be used for TDY travel and per diem expenses from CONUS port of entry to DISAM and return to CONUS port of exit. All other associated travel and per diem expenses are the responsibility of the individual's unit of assignment.

12.1.6.3. Funding for members of dedicated specialty teams (e.g., Technical Assistance Field Teams (TAFTs), Technical Assistance Teams (TATs), and Extended Training Services (ETSs)), selected for DISAM courses because they will perform security assistance

PRIVACY ACT STATEMENT

Information requested below is affected by the Privacy Act of 1974. Authority for requesting this information from you is Title 10 U.S. Code,

Section 8012 (Secretary of the Air Force, Powers and Duties Delegated by) and Executive Order 9397 (Numbering System for Federal Accounts Relating to Individual Persons). This information is required to select applicants for DISAM courses. The information will be used to evaluate the applicant's eligibility. Social Security number is used to make your VOQ/VAQ reservations. Disclosure is voluntary; however, billeting reservations and application processing may be hindered without all requested information. (Failure to provide the Social Security number may delay or hinder action on an individual's request.)

MEMORANDUM FOR DISAM/DAS
WPAFB OH 45433-5000

SUBJECT: Student Eligibility Questionnaire

Please type or print appropriate responses to the following:

1. Name (Last, First, MI): Grade SSN

_____

2. Organization of Assignment and Location: _____

3. Position Title: _____

4. Function(s) you perform in Security Assistance Management: _____

_____

_____

_____

5. Number of months in present position:_____; months remaining _____

6. Percentage of time currently or expected to spend on security assistance: _____

7. Number of months, to date, in security assistance: _____

8. Previous DISAM course(s) and date(s) (month/year) of attendance: _____

9. Course applied for: _____

10. State why you feel attendance at the course being applied for will enhance your job skills:

_____

_____

_____

11. Signature: _____ Date_____

12. Applicant needs course and meets the eligibility criteria as set forth in the DISAM Catalog.

Date: _____

_____
(Signature of Supervisor)

Title: _____

DSN Number: _____

Figure 12.1. Student Eligibility Questionnaire.

management functions, should be provided by the FMS case written to support the customers' needs. In addition, the funding of US officers who are involved in the Personnel Exchange Program (PEP) or Foreign Area Officer (FAO) Program In-Country Studies and are selected for DISAM courses should be provided by the parent military department because these officers are assigned in-country under legal authorities other than the Foreign Assistance Act or Arms Export Control Act. The DISAM fund cite should not be used in these instances.

12.1.6.4. Funding of CONUS Travel. The DISAM fund citation is used for:

12.1.6.4.1. Travel to DISAM from a CONUS activity and return to the CONUS home station.

12.1.6.4.2. Travel to DISAM while en route to a PCS assignment. Funds may be used to travel from the last duty station (CONUS only). PCS or other TDY fund citations must be used for travel from DISAM and for other expenses to the next station.

12.1.6.4.3. Travel to DISAM prior to a PCS move. Funds may be used to travel to DISAM and return to the assigned CONUS unit prior to PCS.

12.1.6.5. Funding of Overseas Travel (for students already assigned to an overseas theater):

12.1.6.5.1. If training is performed as an adjunct to travel in support of DOD programs, overseas travel will be funded by the applicable DOD appropriation.

12.1.6.5.2. If training is performed as an adjunct to travel in support of an FMS case, overseas travel will be funded by applicable FMS case funds.

12.1.6.5.3. If the sole purpose of travel is to attend a DISAM course, DISAM will only fund travel from CONUS port of entry (POE) and return to CONUS POE, plus per diem for that portion of travel. The sending organization must pay the expenses for travel outside the CONUS.

12.1.6.6. Special Authorizations:

12.1.6.6.1. Due to budget constraints, DISAM does not fund special authorizations for student travel in and around the TDY area; such as, vicinity travel, rental car, taxis, etc. These special authorizations may be funded by the unit of assignment.

12.1.6.6.2. However, in some cases, it may be more advantageous to the government to fund travel by rental car from home station to DISAM, particularly for classes of 1 week duration. If travel by rental car is desired and is cheaper than the applicable government rate airfare, the traveler must request advance approval for rental. FAX requests to DISAM/DA (DSN 785-4319, comm (513)255-4319), to include a cost comparison of commercial airfare versus cost for car rental, fuel, tolls, etc. DISAM/DA will send approvals by return FAX.

12.1.6.6.3. Should a student decide to use POV, mileage reimbursement and per diem will be limited to the constructive cost of common carrier transportation and related per diem as determined in the JTR. Travel time is limited as indicated in JTR.

12.1.7. **Student Prerequisites**. Applicants should have experience or an academic background that is compatible with the subject matter offered in a specific course. Applicants should be assigned or scheduled for assignment to duties for which they would benefit from the training. Commanders and managers are responsible for selecting personnel who can most effectively use the education gained from DISAM courses. Also, there should be reasonable assurance that there will be a continuing need for the student's services after course completion. For foreign students, an English Comprehensive Level (ECL) of 80% or above is required.

12.1.8. **Application Procedures**:

12.1.8.1. Individuals interested in attending courses should contact their local education or training office for the latest information on the DISAM programs. Defense Management Education and Training Catalog, DOD 5010.16-C, procedures apply. Requests for attendance must go through:

12.1.8.1.1. For OASD: Chief, Training and Career Development Office, Room 3 B347, Pentagon, Washington DC 20301-1115.

12.1.8.1.2. For Army: HQ USAMC, ATTN: AMCPE-CC-E, 5001 Eisenhower Ave, Alexandria VA 22333-0001.

12.1.8.1.3. For Navy: NETSAFA, N212, 125 Romana St, Ste 600, Pensacola, FL 32501-5849.

12.1.8.1.4. For Marines: NETSAFA, N212, 125 Romana St, Ste 600, Pensacola FL 32501-5849.

12.1.8.1.5. For Coast Guard: COMDT COGARD/G-CI, Wash DC 20590-0001.

12.1.8.1.6. For Air Force: (SAM-C, CF, CM, ER and O) MAJCOM training office. Quota control is HQ AFMC/DPEO, Wright-Patterson AFB OH 45433-5000.

12.1.8.1.7. For Air Force: (SAM-TM and TO) AFSAT/SDS, 2021 First Drive West, Randolph AFB TX 78150-4302.

12.1.8.1.8. For Defense Logistics Agency: Chief, DCIDO, 3990 Broad Street, Columbus OH 43216-5000.

12.1.8.1.9. For foreign students wishing to attend the F (Foreign Purchaser) course, requests for country quotas and attendance must be made to AFSAT/SDS, 2021 First Drive West, Randolph AFB TX 78150-4302.

12.1.8.2. For admission of foreign national employees of the United States Government, send DD Form 1556 to Registrar, DISAM/DAS, 2335 Seventh St, Wright-Patterson AFB OH 45433-7803. Industry personnel should submit requests to DISAM/DAS, 2335 Seventh St, Wright-Patterson AFB OH 45433-7803.

12.1.9. **DD Form 1556 and Student Questionnaire Requirement**:

12.1.9.1. Air Force MPF/CCPO and other military department education and training offices must send to DISAM/DAS (Student Operations), 2335 Seventh St, Wright-Patterson AFB OH 45433-7803, four legible copies of DD Form 1556 for individuals scheduled to attend a resident DISAM course. In addition, student eligibility questionnaires (a copy is contained in the DISAM course catalog) are required to be submitted in the format shown in figure 12.1 for all students scheduled to attend SAM-C, SAM-CO, SAM-CF, SAM-CM, and SAM-R.

12.1.9.2. Requests must arrive at DISAM not earlier than 90 days and not later than 30 days before the course start date. DISAM accepts or rejects a student based on information contained on the DD Form 1556. DISAM notifies the applicant's training organization of acceptance or rejection. If there is doubt as to whether a prospective student meets the course prerequisites, the nominating

office is asked to send a request for waiver. Each waiver is judged on its own merits.

12.1.10. **Clothing and Equipment Requirements**:

12.1.10.1. For US Air Force personnel, all service uniform combinations authorized in AFI 36-2903, *Dress and Personal Appearance of Personnel*, are appropriate for wear at DISAM. Army personnel should consult AR 670-1. For all Navy personnel, all service uniform combinations authorized according to US Navy uniform regulation are appropriate for wear at DISAM. Military personnel are not authorized to wear flight suits or field uniforms to class. Civilians are expected to dress appropriately for business. Sandals, jeans, sweatshirts, and shorts are not appropriate. The minimum standards for men is an open neck sportshirt with collar and dress slacks. The minimum standard for women is equivalent apparel.

12.1.10.2. Expendable supplies, i.e., note paper, pens, highlighters, etc., are not issued at DISAM. They must be provided by the student.

12.1.11. **Administrative Requirements**. Students must ensure that all administrative procedures (that is, leave orders, passports and visas, shipment of automobile and household goods, port call, physical and altitude chamber requirements, family identification cards, etc.) are completed and in order before arrival at DISAM.

12.1.12. **Reporting Instructions**. Students are given a formal orientation on the opening day of class. DISAM students report directly to the second floor of building 125, area B, DISAM wing, at 0800 on the first day of class. Students normally graduate during the afternoon of the final day of their course; plans for departure should be made accordingly.

12.2. Armed Forces Staff College (AFSC) (OPR: AFSC/JCEWS). AFSC conducts the Joint Command and Control Warfare Staff and Operations Course (JC2WSOC). This course trains military members and equivalent US DoD civilians operating in a joint environment the principles of C2W. The course utilizes lectures, seminars, discussions, guest lecturers, out-of-class study, and problem-solving exercises to fulfill its objectives. AFSC/JCEWS also conducts the Joint C4I Staff and Operations Course (JC4ISOC) listed in chapter 3, section I.

12.3. NATO Training Courses (OPR: USAFE/DPA). The courses listed have PDS codes to track active duty service commitments for students attending courses. Many of the listed courses parallel CONUS Air Force courses being conducted at Air Force Training Centers.

12.4. DIA, Armed Forces Medical Intelligence Center (AFMIC) (OPR: AFMIC-MIC-2, Fort Detrick, Frederick, MD 21702-5004). Applications for attendance to course AFMIC-IN-1 should include name and rank of individual applying, telephone number, mailing address, and a brief justification (role in medical intelligence). These applications should be via message (message address: DIRAFMIC FT DETRICK MD//MIC-2//) or in writing. Funding will be the responsibility of the individual's local command. For further information contact DSN 343-7574, or (301) 619-7574.

12.5. Air Force Medical Operations Agency (AFMOA) (OPR: HQ AFMOA/SGPS, Brooks AFB TX 78235-5000). HQ AFMOA/SGPS acts as the OPR and quota control for FAPMC9100, Family Advocacy Management Course. Funded quotas are provided by SGPS and use of quotas are intended for the family advocacy officer at each medical treatment facility and the family advocacy program manager at each MAJCOM. Course attendees should provide SGPS their name, grade, and SSN 60 days before class start date.

12.6. United States Transportation Command (USTRANS-COM) (OPR: USTRANSCOM/TCJ1-JT, Scott AFB IL 62225-5357). USTRANSCOM is a member of the Joint Planning and Execution Community (JPEC) which consists of the Joint Chiefs of Staff (JCS), the unified commands, the specified commands, the military services, defense logistics agencies, and other members of the DOD. The JOPES Training Organization (JTO) is chartered under the JOPES Training Program (JTP) to provide all JOPES functional ADP and procedures training to enhance the capabilities of their forces to plan and execute joint warfare. Beginning in FY 94, the JTO will also provide Global Transportation Network (GTN) training.

Section B—Course Announcements

Armed Forces Staff College (AFSC)

JC2WSOC—Joint Command and Control Warfare Staff and Operations Course—PDS Code JMR—AFSC, Norfolk/2 wk—Apr 96

Trains MSgt to Col and equivalent US DoD civilians in the concepts, procedures, and applications of C2W to prepare them for duty as joint C2W officers, and to prepare Service C2W staff officers to operate in a joint environment.

Special Requirements: The course is conducted at the Top Secret level. Military member or civilian assigned or en route to designated position. Current (within 5 years) SBI/SSBI, Top Secret clearance with eligibility for SCI indoctrination before arrival.

Admin Instructions: Students are TDY to AFSC, C2W Division, Norfolk, VA (DSN 565-6680). Reservations for BOQ will be made at AFSC for all students. Rental car is recommended. Student information packets will be sent to each student prior to the course. Air Force graduates must hand-carry their course completion certificates to the classification and training section of their local MPF to be awarded credit for the course. Send certification of SCI via DSSCS to SSO AFSCOL (DSN 564-5169) not later than 2 weeks before class start date.

Quota Control: Point of contact is Joint Staff/J-3/J-33 and C2W Division, DSN 225-3330. Quotas, on a class-by-class basis, are allocated to the unified command, services, and DoD agencies by the Joint Staff. Point of contact at HQ USAF is Directorate of Operations (HQ USAF/XOFE), DSN 227-9390.

DIA, Armed Forces Medical Intelligence Center (AFMIC)

AFMIC-IN-1—Introduction to Medical Intelligence—PDS Code 9XB—Ft Detrick/4 1/2 days—Sep 93

Gives the military medical planner an understanding of the intelligence community and process, the role of AFMIC within the intelligence community and AFMIC's interface with the intelligence community and the medical community. Subject areas include the basic difference between intelligence and information, who the members of the intelligence community are, and how they are funded and managed, an understanding of the different sources of intelligence information, the analytical process, and the intelligence dissemination process at both AFMIC and on the national level, familiarization with AFMIC products and how these products are used in operational planning and threat development. An indepth look at how to request medical intelligence and use of the AFMIC Bulletin Board System (BBS). Other topics include intelligence collection, and AFMIC's response to operational forces needs. Course is usually offered first full week each May and November.

Prerequisites: Final Secret clearance.

Defense Institute of Security

Assistance Management (DISAM)

SAM-C—Defense Security Assistance Management - CONUS—PDS Code 1GF—Wright-Patterson/2 wk—Oct 95

Provides a thorough coverage of the interactions and interrelationships of security assistance management from the highest levels of US government policy making, review and approval, through the various channels of program planning, financing, pricing, billing, acquisition, transportation, follow-on support, training, and management documentation. Specific instructional areas encompass such topics as foreign policy considerations supporting the US security assistance program; Presidential policies and Congressional review requirements; Department of Defense and State program review and implementation channels; legal requirements, contractual instruments, and organizational responsibilities; and the variety of complex financial and logistical procedures required to program, budget, implement, execute, and close FMS security assistance program activities.

Prerequisites: For US personnel only: MSgt through O-6 and civilian grades of GS-5 or above and programmed for, or assigned to, security assistance positions or related functional positions in international logistics, financial management, or training in CONUS activities.

Admin Instructions: Ensure compliance with paragraph 12.1.9.

SAM-CF—Defense Security Assistance Management-Financial Management—PDS Code 2V8—Wright-Patterson/1 wk—Oct 95

Encompasses the Arms Export Control Act and other statutory requirements; implementing DoD directives and instructions, such as DOD 2140.2 and DOD 7000.14R, volume 15; FMS pricing of materiel, services, and training; flow and accounting of funds, Trust Fund, obligational and expenditure authority, customer order control systems and payment schedules; performance reporting and reimbursement including the FMS delivery transaction, foreign military sales billing statement (DD Form 645), command pay list and related feedback reports. The course is interspersed with studies of the organizations and functions concerned, including the military departments and the Deputate for Security Assistance (DFAS-DE/I), and their relationship and involvement with one another. The course is conducted on a lecture, conference, and workshop basis, with an emphasis on direct student participation and involvement through group and individual exercises. The exercises and illustrative case examples are based upon practical, everyday experiences, thus demonstrating actual circumstances which have confronted practitioners of FMS financial management. Workshops and student presentations are liberally interspersed throughout the course, thereby permitting the student maximum opportunity to apply the techniques and principles examined in the lectures and conferences.

Prerequisites: The course is for US DoD personnel assigned to positions in security assistance management, such as case managers, comptrollers, budget, accounting, and financial specialists, and price and cost analysts from such organizations as comptroller offices, FMS case implementing agencies, the Defense Security Assistance Agency, the Defense Finance and Accounting Service, military department financial centers, and the Defense Logistics Agency. Prior completion of the Security Assistance Management CONUS Course (SAM-C) or extensive security assistance management experience is required.

Admin Instructions: Ensure compliance with paragraph 12.1.9.

SAM-CM—Defense Security Assistance Management-Program/Case Management—PDS Code Z5P—Wright-Patterson/1 wk—Sep 91

Covers a broad variety of topics, including pertinent applications of the Arms Export Control Act and other statutory requirements; implementing DOD and service directives such as DOD 5105.38M (SAMM), AR 12-1 and 12-8, OPNAVINST 4900.149, and AFI 16-101, *International Affairs and Security Assistance Management*; FMS policy, program requirements, and management actions; and available automated information systems. The course emphasizes the organizational relationships between the primary program manager in each military department and the supporting service commands and those between the primary program manager and other DOD, State Department, and customer offices.

Prerequisites: The Program/Case Management course is intended for US DOD personnel assigned to positions in security assistance management, such as Country Program Managers at the Military Department level, DSAA, and OASD/ISA regional offices, and Materiel and Systems Command; Army, Navy and Air Force Project, Product, System and Program Managers; ILCO personnel; and supporting command FMS coordinating staff officers. Military and civilian students should be assigned to positions as outlined above. Completion of the Security Assistance Management CONUS Course (SAM-C), or extensive security assistance management experience is required. It is recommended that attendance at SAM-CM not occur before 6 months after completion of SAM-C.

Admin Instructions: Ensure compliance with paragraph 12.1.9.

SAM-CO—CONUS Orientation—PDS Code 9AZ—Wright-Patterson/1 wk—Sep 91

Provides a structural blend of critical material from the CONUS and overseas courses. The students are furnished a comprehensive survey of major security assistance management considerations. The topical areas covered include the following: foreign policy considerations and executive branch policy determinations associated with security assistance, legal considerations and the complex security assistance review and approval process, program planning and budgeting requirements, financial support, and transportation management. The course structure affords the opportunity for the students to examine the most current changes in the policies and procedures governing security assistance administration. The course examines recent amendments to security assistance legislation, regulations, and procedural documents, and it provides a thorough examination of current inter-departmental organizational relationships and their impact on security assistance management.

Prerequisites: The course is intended for US personnel with ranks of lieutenant colonel and below and civilian grades of GS-14 and below who now occupy (or have been selected to occupy) mid-level management positions in program offices, or functional offices support program offices, or high echelon offices supervising security assistance management within the DOD. Persons in similar positions in other federal agencies, such as the Department of State, may also attend.

Admin Instructions: Ensure compliance with paragraph 12.1.9.

SAM-E—Defense Security Assistance Management-Executive—PDS Code R92—Wright-Patterson/1 wk—Oct 95

Provides senior level security assistance executives (USG and US industry representatives) with an overview of the entire security

assistance management process, to include policy, planning and programming, and financial, logistics and training management. The topical areas covered include foreign policy considerations and executive branch policy determinations associated with security assistance; legal considerations and the complex security assistance review and approval process; program planning and budgeting requirements; financial support and logistics management. The course examines the most current changes in the policies and procedures governing security assistance administration; recent amendments to security assistance legislation, regulations, and procedural documents. It provides a thorough examination of current interdepartmental organizational relationships and their impact on security assistance management.

Prerequisites: US military personnel (O-6) and USG civilians (GS/GM-15 and above) who are programmed for, or assigned to, security assistance activities or functional positions in international logistics, financial management, and training activities.

Admin Instructions: Ensure compliance with paragraph 12.1.9.

SAM-F—Security Assistance Management Course—Foreign Student/Purchaser—PDS Code VTE—Wright-Patterson/2 wk/MASL D178088—Oct 95

Provides personnel representing purchaser and recipient countries and foreign national employees of SAOs an opportunity to study current US policies, procedures, and rules, as they apply to the security assistance program. The course is tailored to present the significant aspects of the Foreign Military Sales program, highlighting the management concerns of purchaser and recipient countries. Overall objectives of the course are to increase understanding of the total security assistance program and the individual manager's responsibilities. In the long run, effectiveness in communicating with the US supporting agencies will be improved, thus enhancing the efficiency of overall security assistance management.

Prerequisites: Personnel assigned to, or selected for, security assistance management positions should be nominated by their governments for attendance. Foreign national employees of SAOs should be nominated by the SAO chief. ECL 80 or above is required.

Admin Instructions: Applications for foreign national employees of the United States Government should be addressed to Registrar, DISAM/DAS, 2335 Seventh Street, Wright-Patterson AFB OH 45433-7803.

Quota Control: AFSAT/TO.

SAM-O—Defense Security Assistance Management - Overseas—PDS Code 1GG—Wright-Patterson/3 wk—Oct 95

Introduces security assistance management as an extension of US foreign policy and develops the rationale supporting various aspects of the program, including the roles and responsibilities of intra-governmental activities. Includes a review of the influence of National policy on security assistance, roles and the missions of the Departments of State and Defense, Unified Commands and the military departments. Additional topics include studies of the military departmental implementing organizations; financial management planning, pricing and billing; price and availability and programming and budgeting; letters of offer and acceptance processing; international cooperative programs; offsets; interaction with industry; procurement and contracting procedures; follow-on support; transportation, and reports analysis and utilization in management. Other studies include an examination of cross-cultural communications; personal protection overseas; SAO operations; overseas legal status; additional SAO responsibilities; training management responsibilities; and regional studies for student's area of assignment. All students are introduced to the capabilities of the security assistance network (SAN).

Prerequisites: The course is intended for DOD personnel who now occupy (or have been selected to occupy) security assistance management positions as overseas DOD representatives in security assistance organizations, defense attache offices, or unified and component commands, and for Department of State foreign service personnel performing security assistance management functions. The following exception has been agreed to by the Director, DSAA, and the DISAM Policy and Advisory Council: Selected SAO chiefs (at the O-6 grade level), based on their country of assignment and prior experience, may, with the recommendation of the unified command and the approval of DSAA attend the 1-week Executive (SAM-E) course in lieu of the SAM-O course. A Secret security clearance is required. (NOTE: This course is designed for personnel programmed for overseas positions, and is not recommended for personnel assigned to CONUS activities. However, attendance at this course may be permitted for selected CONUS personnel whose functions principally interface with overseas SAO activities rather than CONUS activities.) ***NOTE***: Personnel coming to training from an overseas location must certify they have a minimum of 1 year left on assignment.

Admin Instructions: Ensure compliance with paragraph 12.1.9.

SAM-R—Defense Security Assistance Management - Refresher—PDS Code SEP—Wright-Patterson—1 wk—Mar 93

Designed to give emphasis to the most recent policy changes affecting DOD procedures governing how the community conducts security assistance. Updates in legislation affecting the overall international sales process, international cooperative programs, financial management procedures, program support of international sales, and relevant regional issues, will be covered to the extent necessary to convey and emphasize recent changes as well as future concerns. Each offering of this course will be unique—concerned with creating a comprehensive approach to the impacts of recent and pending changes on the total spectrum of security assistance programs and demonstrating how each change to policy affects the separate functional areas.

Prerequisites: There are two major criteria for selection to attend this course: a selectee must be a graduate of a basic DISAM security assistance course (SAM-C, SAM-O, SAM-CO, SAM-OS, SAM-E) not less than 2 years prior to the scheduled SAM-R class; and, any students for whom it is appropriate to attend either the SAM-CF or SAM-CM course must do so at least 2 years prior to attending the SAM-R course. Priority in attendance will be given to DOD personnel, both military and civilian, and will not be restricted to a specific rank spread. Personnel from other government agencies, and international employees of the United States government will be considered on a first-come-first-served basis. Under no circumstances will applicants be considered who have not previously graduated from DISAM.

Admin Instructions: Ensure compliance with paragraph 12.1.9.

SAM-TM—Defense Security Assistance Management - Training Management—PDS Code 5R7—Wright-Patterson/1 wk—Oct 95

Provides a comprehensive coverage of policy, procedures, functional relationships and their application for the CONUS management of security assistance training. The curriculum provides an overview of security assistance programs, then explores, in detail, the policy and

procedures required to manage security assistance training programs (IMET and FMS) at the Military Department (MILDEP). The focus is on the day-to-day functions of programming; availability determination; scheduling; procedures to implement training; and financial management, to include pricing, billing, and flow of funds. Use of latest automated security assistance training systems is emphasized.

Prerequisites: DOD personnel assigned to positions in SA training management, such as training Country/Case Program Managers at DSAA, military department/service headquarters level, and separate training-dedicated agencies. Among these agencies are the Army Security Assistance Training Field Activity (SATFA), Naval Education and Training Security Assistance Field Activity (NETSAFA), and Foreign Military Training Affairs Group (FMTAG).

Admin Instructions: Ensure compliance with paragraph 12.1.9.

SAM-TO1—Defense Security Assistance Management - Training Officer Course (JT)—PDS Code 1GK—Wright Patterson/1 wk—Oct 95

Provides an overview of security assistance management and develops the policies and procedures required by the international military student manager to administer international military students and conduct the DOD Informational Program (DODIP). Includes the overview of security assistance, cross-cultural communications, legal status of international military students, invitational travel orders and amendments, the policies, purpose and conduct of the DoD Informational Program, human rights instruction, and instruction on service-unique administration.

Prerequisites: Military and civilian personnel assigned to or selected for positions as international military student managers at an installation.

Admin Instructions: Ensure compliance with paragraph 12.1.9.

North Atlantic Treaty Organization (NATO)

CIMIC—Civil Military Cooperation (CIMIC)—PDS Code WMX—Hammelburg GM/1 wk—Mar 93

Introduces regular and reserve officers, NCOs, and equivalent grade civilians performing CIMIC-related duties with German CIMIC principles. Covers the overall aim, basic principles, and the required procedures as prescribed in General Publication 211 and German Army Regulation 100/500. The course promotes NATO's concept and conduct of overall defense in the Federal Republic of Germany.

Prerequisites: **Officer Course**: MSgt and above through Lt Col or equivalent civilian with a need-to-know. Must be assigned or selected for assignment to a position with CIMIC-related duties. **NCO Course**: Sgt through CMSgt with a need-to-know. Must be assigned or selected for assignment to a position with CIMIC-related duties.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

C-21—ACE NBC Defense Basic Course—PDS Code 8F1—NATO School, Oberammergau GM/1 wk—Apr 96

Introduces regular and reserve officers to concepts and problems pertaining to all aspects of NBC defense within ACE. Emphasis is placed upon the procedures for rapid handling and processing of NBC defense information, the impact of enemy NBC weapons employment on the ACE mission, and the ability of ACE forces to deal with the NBC threat at all levels, including NATO standards for training and evaluation.

Prerequisites: Nominee should be a unit commander or staff officer (or equivalent civilian) with little or no prior NBC expertise whose duties require a basic NBC orientation or a professional NBC officer requiring an orientation to NATO NBC defense.

Special Requirements: NATO Secret.

OPR: HQ USAFE/DPPET.

C-24—Environmental Orientation Course for Base and Installation Commanders and Staff—PDS Code 1SB—Oberammergau, GM/1 wk—Apr 96

The aim of the course is to familiarize officers and selected senior NCO's with responsibilities as commanders and staff of fixed installations and bases with NATO environmental programs including restoration, conservation and international laws, regulations and agreements.

Prerequisites: Officer, senior NCO, or civilian assigned, or selected for assignment to installation commands in Allied Command Europe (ACE), to perform duties related to environmental programs at a base or fixed installation. NATO unclassified.

Quota Control: HQ USAFE/DPPET.

C-25—ACE Exercise and Evaluation Staff Course for NBC Incidents—PDS Code 8F3—NATO School, Oberammergau GM/2 wk—Apr 96

Provides basic knowledge and background information to regular and reserve officers and NCOs for planning NBC incidents for exercises and procedures for evaluating those exercises. Emphasis is placed upon realistic enemy nuclear and chemical events and their impact on all areas of a military organization.

Prerequisites: Nominee should be associated with TACEVAL or ORT evaluation program, or associated with exercise planning or DISTAFFS involved with NBC contents of exercises.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

C-28—Responsibilities of Military Forces in Environmental Protection—PDS Code WQJ—Oberammergau GM/2 wk—Apr 96

Familiarizes officers, senior NCOs, and civilian personnel with aims and objectives of environmental policy, hazardous material, sources of noise, ground, air, and water pollution, and instructs them on how to reduce or avoid damage to the environment in accordance with environmental legislation and regulations.

Prerequisites: Nominees should be performing duties related to environmental protection. NATO security clearance is not required.

Quota Control: HQ USAFE/DPPET.

C-30—Resource Management Education Program Course—PDS Code 1SE—Oberammergau GM/1 wk—Apr 96

The aim of the course is to address philosophy, policies and procedures in today's resource management. The course concentrates and encompasses all aspects of the Renewed Infrastructure Program with Infrastructure Capability Package (ICP), but also military budget and manpower.

Prerequisites: Captain to Colonel of civilian equivalent. NATO

confidential clearance.

Special Requirements: Be in grade of OF2 or OF5 or civilian equivalent. Must be currently assigned to a NATO or national position involved in managing NATO resources, to include infrastructure, military budget, manpower, or involved in the definition of operational plans and requirements, or in a Ministry of Defense or foreign affairs position with responsibilities in support of the alliance.

Quota Control: HQ USAFE/DPPET.

C-50—ACE Peacekeeping Course—PDS Code 1RT—Oberammergau, GM/1 wk—Apr 96

The aim of the course is to provide an orientation to NATO and national officers on the planning, preparation and conduct of peacekeeping operations and related activities. This course is aimed at officers and civilians assigned or selected for assignment to (1) a NATO international headquarters or agency, (2) forces assigned or earmarked forces to NATO, or (3) a Ministry of Defense or subordinate national military headquarters, unit, or agency of any NATO country which fulfills conceptual or operational responsibilities in support of possible UN/CSCE operations.

Prerequisites: Major to Colonel. NATO unclassified.

Quota Control: HQ USAFE/DPPET.

C-51—Multinational Forces—PDS Code 093—Oberammergau/1 wk—Apr 96

Provides NATO staff officers the orientation and an understanding to enable them to meet the unique challenges and complexities of the increased multinational environment within NATO.

Prerequisites: Lt to Col or civilian equivalent assigned or selected for assignment to (1) a NATO multinational force, (2) a NATO international headquarters or agency, (3) forces assigned or earmarked forces to NATO, or (4) a Ministry of Defense or foreign affairs with responsibilities for support of the alliance or in a national role supporting multinational forces operations.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPPET.

C/I-18—Conventional Armed Forces Europe (CFE) Verification Inspector/Escort Procedures—PDS Code WMV—Oberammergau GM/2 wk—Apr 96

Prepares designated individuals to perform duties as inspectors and escorts to ensure proper compliance with the CFE treaty. The course teaches in detail aspects of the treaty and its protocols necessary for correct implementation of the treaty, including entry and exit procedures, identification of treaty limited equipment (TLE), inspection of reporting requirements and procedures, and public affairs guidance. A mock inspection practical exercise is included to practice procedures taught in the classroom.

Prerequisites: Be assigned to, or selected for, inspector or escort duties with a national CFE inspection organization.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPPET.

CI-22—NATO Basic NBC Defense Automated Data—PDS Code 1RY—Oberammergau, GM/1 wk—Apr 96

The aim of the course is to introduce regular and reserve officers and NCO's to Automated Data Processing (ADP) Systems for NBC Defence within ACE. Emphasis is placed upon the procedures for rapid handling and processing of NBC Defence information.

Prerequisites: Officer or NCO whose duties require a knowledge of ADP based NBC reporting and warning procedures. NATO Secret clearance.

Quota Control: HQ USAFE/DPPET.

C/I-36—Abbreviated ACE Staff Officers' Orientation—PDS Code 8GA—NATO School, Oberammergau GM/1 wk—Apr 96

Gives regular and reserve NATO and national officers an outline of the threat to ACE, and of alliance plans, policies, operations, and procedures.

Prerequisites: Nominee must be a staff officer (captain to lieutenant colonel) or equivalent civilian.

Special Requirements: Cosmic Top Secret clearance.

OPR: HQ USAFE/DPPET.

C/I-37—NATO Civil Emergency Planning/Civil-Military Cooperation (CEP/CIMIC)—PDS Code 9FB—NATO School, Oberammergau GM/1 wk—Apr 96

Introduces regular and reserve NATO field grade officers and equivalent grade civilians to the organization, role, and functions of Civil Emergency Planning (CEP) in NATO and to the aim, basic principles, and procedures to Civil-Military Cooperation (CIMIC) in order to promote NATO's concept of and conduct of overall defense.

Prerequisites: Major through colonel or equivalent civilian with a need-to-know. Must be assigned or selected for assignment to an appointment having contact or dealing with CEP or CIMIC.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

CI-39—Reserve Forces and Mobilization Course—PDS Code WQK—Oberammergau GM/1 wk—Apr 96

Broadens understanding within the managerial and planning staffs of NATO/MNC/MSP/PSC headquarters of the characteristics, capabilities, and challenges of mobilisable forces. Emphasizes the importance of meeting ACE force standards in all force categories where mobilisable forces are to be integrated into existing standing forces. Stimulate among the national attendees binational or multinational cooperation to ensure that national contributions to NATO meet ACE force standards, and to provide a forum for the regular study of mobilisable force challenges between NATO, national staff officers, and possible, after implementation of the initial course, officers from non-NATO European armed forces.

Prerequisites: Students must be active and mobilisable officers from managerial and planning levels with responsibility for ACE standards for mobilisable forces. Officers of grade captain through lieutenant colonel.

Quota Control: HQ USAFE/DPPET.

CRI—Criterion Referenced Instruction Course—PDS Code 6YZ—location: (APO AE 09104)/3 wk—Dec 84

Preparation of criterion-referenced instruction to support instruction systems development (ISD) concepts. Training includes analyzing the principles of criterion-referenced instruction, writing performance objectives, performing task and goal analyses, preparing criterion tests, identifying relevant course materials, designing course control documents, and applying performance management principles for

supervisors, instructors, and course managers.

Prerequisites: Primarily designed for personnel involved in the design, development, validation and evaluation of courses of instruction, selection or design of appropriate training aids and devices, and preparation of performance analysis instruments. Students who have completed Mager-Pipe "Criterion Referenced Instruction Workshop" should not attend this course. Current enrollment limited to E-3A component personnel.

OPR: HQ USAFE/DPAT.

FA—Flight Allocator—PDS Code 6YR—location: (APO AE 09104)/19 wk—Apr 96

Prepares the experienced weapons controller to be responsible for the conduct of the air battle and for the control of weapons in the E-3A area of responsibility.

Prerequisites: Must be selected for upgrade training to flight allocator by the appropriate squadron commander, have completed the NATO E-3A weapons controller course, and maintain currency as an operationally ready weapons controller.

Quota Control: HQ USAFE/DPPET.

I-10—NATO Staff Officer's & Augmentees' Nuclear Operations Course—PDS Code JCF—NATO School, Oberammergau GM/1 wk—Apr 96

Prepares staff officers and designated augmentees to conduct their nuclear-related duties with an emphasis on policy, operational planning, command and control procedures, and weapon effects.

Prerequisites: Officer or NCO. Cosmic Top Secret with ATOMAL access required.

OPR: HQ USAFE/DPPET.

I-11—ACE Air-to-Surface Conventional Weaponeering Procedures Course—PDS Code 8AP—NATO School, Oberammergau GM/2 wk—Apr 96

Trains personnel for the fundamental understanding of conventional weaponeering using the basic joint munitions effectiveness manual/air-to-surface (JMEM/AS) and the ACE conventional weapons guide (CWG) in the air-to-surface employment of conventional weapons.

Prerequisites: Completion of course I-14, ACE Targeting Procedures, is highly encouraged before attending this course to acquire the requisite background information. Completion of this course and I-12, ACE DCA Nuclear Weaponeering Procedures, is recommended for comprehensive air-to-surface weaponeering/ target analysis skill. Be in a position associated with target analysis or weapons employment.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPPET.

I-12—ACE DCA/Nuclear Weaponeering Procedures Course—PDS Code 8FZ—NATO School, Oberammergau GM/2 wk—Apr 96

Teaches procedures for the proper use of the US Physical Vulnerability Handbook, Nuclear Weapons in the Air Force and Navy, procedures for employment of nuclear weapons as agreed upon and directed in STANAG2111.

Prerequisites: Must be assigned or selected for assignment to a position involving nuclear target analysis or staff planning for nuclear weapons employment.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

I-14—ACE Targeting Procedures—PDS Code 8F0—NATO School, Oberammergau GM/2 wk—Apr 96

Acquaints regular and reserve NATO and national personnel with targeting theory and introduces them to ACE targeting process, procedures, and documents.

Prerequisites: Assigned or selected for assignment to a NATO or national organization responsible for duties directly related to targeting in support of ACE, including Reservists or other personnel who must perform these duties in exercises, crises, or war. ***NOTE***: Completion of this course, I-11, and I-12 is recommended for comprehensive weaponeering and target analysis skills.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

I-17—NATO Nuclear Surety Management—PDS Code MTD—NATO School, Oberammergau GM/1 wk—Apr 96

Gives NATO officers background knowledge of how to plan and implement nuclear physical security measures to protect nuclear weapons, nuclear storage facilities, and other assets from any threat which could affect their safety and security.

Prerequisites: Must be (1) a host/user nation site security commander or deputy, (2) custodian or deputy custodian of a special weapons storage site.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

I-19—NATO Counter-Command, Control, and Communications (Counter-C3) Course—PDS Code WQH—Oberammergau GM/1 wk—Apr 96

Provides a thorough understanding of NATO concepts and programs for counter-C3 in support of military operations and an insight into the technology of related weapons, electronic warfare, and deceptions systems. The course is intended to prepare NATO officers for duty in joint or combined staffs having counter-C3 responsibilities.

Prerequisites: Officers with a NATO Secret clearance.

Quota Control: HQ USAFE/DPPET.

I-27—Survive to Operate (STO) Evaluator's Course—PDS Code CND—NATO School, Oberammergau GM/1 wk—Apr 96

Familiarizes selected officers and NCOs with the criteria and guidance for the conduct of tactical evaluation of the ability of all types of units to survive the effects of conventional, nuclear, biological, and chemical attacks to the extent necessary to continue operations. Successful completion of the course qualifies students to act as survival-to-operate evaluators during ACE Tactical Evaluations subject to MSC certification in accordance with SHAPE Tactical Evaluation Manual (STEM).

Prerequisites: Officer or NCO. Must be assigned or selected for assignment to: (1) an international NATO headquarters or agency; (2) forces assigned to or earmarked for assignment to NATO; or (3) a Ministry of Defense or subordinate national military headquarters, unit, or agency of any NATO country which fulfills responsibilities

in support of ACE assigned or earmarked forces.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

I-31—ACE Senior Officers' Orientation—PDS Code 8F5—NATO School, Oberammergau GM/1 wk—Apr 95

Provides senior regular and reserve and national officers with an evaluation of the current threat to ACE and Alliance plans, policies, operations, and procedures designed to counter the threat.

Prerequisites: Be a general or flag officer, or colonel, or civilian of equivalent status.

Special Requirements: NATO Secret clearance.

OPR: USAFE/DPPET.

I-32—ACE Staff Officers Orientation—PDS Code 8F6—NATO School, Oberammergau GM/2 wk—Apr 95

Provides regular and reserve NATO officers with an evaluation of the current threat to ACE and the Alliance plans, policies, operations, and procedures designed to counter that threat.

Prerequisites: Nominee must be a staff officer (captain to lieutenant colonel) or civilian of equivalent status.

Special Requirements: Cosmic Top Secret clearance.

OPR: USAFE/DPPET.

I-33—NATO ACE Officers' Nuclear Policy—PDS Code 8F7—NATO School, Oberammergau GM/1 wk—Apr 96

Provides regular and reserve senior command level personnel a better understanding of the many facets of nuclear weapons policy, provides the basic background necessary to respond to questions posed by civilian and military leaders, and assists them in giving guidance to members of their staff.

Prerequisites: Nominee must be a commissioned officer, major or above, or civilian equivalent with a need-to-know and assigned to or scheduled for assignment to a position related to nuclear policy, planning, or operations is required: (1) A NATO international headquarters or agency, (2) a MNC, MSC, or PSC headquarters, or (3) a Ministry of Defense or national higher headquarters/agency or nuclear capable unit.

Special Requirements: NATO Cosmic Top Secret clearance.

OPR: HQ USAFE/DPPET.

I-34—NATO Special Course for Conference for Security and Confidence in Europe (CSCE)—PDS Code 8F8—NATO School, Oberammergau GM/1 wk—Apr 95

Aims to build confidence and develop mutual trust between military and civilian officers of Central Forces Europe signatory countries by explaining the development of NATO to provide security for its members, the mission, policy, strategic concept, and decision-making principles of the alliance, and how NATO is adapting to change and enhancing mutual security and cooperation in Europe.

Prerequisites: Officers in the grades of major through colonel. A NATO security clearance is not required.

OPR: HQ USAFE/DPPET.

I-35—ACE Command and Control—PDS Code 8F9—NATO School, Oberammergau GM/1 wk—Apr 96

Briefs the concepts, principles, and practices of command and control (C2) within ACE, including the planned improvements to C2 facilities and systems. The course is aimed at the following personnel: regular and Reserve officers assigned or selected for assignment to (1) a NATO international headquarters or agency, (2) forces assigned to or earmarked for assignment for NATO, or (3) a Ministry of Defense or foreign affairs or subordinate military headquarters unit or agency of any NATO country which fulfills responsibilities in support of ACE or earmarked forces.

Prerequisites: Captain to colonel or civilian equivalent.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

I-38—Crisis Management Course—PDS Code WN1—Oberammergau GM/1 wk—Apr 96

Introduces key personnel involved in crisis decision and staffing process to the aspects, procedures, and mechanisms of alliance crisis management. This is a two-tier course in which lectures, discussions, and syndicate problems will generate a practical interaction between decision makers and staff level officers. Students must be military officers or civilian equivalents who are either (1) Maj to Lt Col or civilian equivalents, or (2) General/Flag officer or Col or civilian equivalent.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPPET.

I-41—NATO Joint Service Advanced Electronics Warfare Staff Officer's Course—PDS Code 8GB—NATO School, Oberammergau GM/2 wk—Apr 96

Provides regular and reserve NATO and national officers, up to the grade OF-5 (Lt Col), of the air, land, and maritime forces, and civilians of equivalent grades, with a thorough understanding of NATO concepts, policies, and programs for EW in support of joint military operations.

Prerequisites: Attendees must be graduates of a NATO single-service EW course, or must have equivalent national qualifications obtained by academic training or staff or operational experience.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

I-42—NATO Joint Service Introductory Electronic Warfare Course—PDS Code 8GC—NATO School, Oberammergau GM/1 wk—Apr 96

Provides NATO and national officers of middle ranks in the air, land, and maritime forces, and civilians of equivalent grades, who may be required to consider the impact of electronic warfare in their job, with a working knowledge of EW in NATO.

Prerequisites: 1. The course is intended for those personnel who have little experience in EW.

2. Attendees must be in the grade OF-1 (2d Lt) through OF-5 (Lt Col) or civilians of equivalent grade.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

I-43—NATO Joint Service Course for Electronic Warfare Planning and Analysis in Exercises—PDS Code 8GD—NATO School, Oberammergau GM/2 wk—Apr 96

Provides regular and reserve NATO and national officers, up to the grade OF-5 (Lt Col), of the air, land, and maritime forces, and civilians in appropriate appointments, with the background and knowledge to plan and analyze electronic warfare play in peacetime exercises.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

I-44—Electronic Warfare in Joint ACE Operations—PDS Code 8GE—NATO School, Oberammergau GM/4 days—Apr 96

Provides ACE general/flag officers with an understanding of electronic warfare and its offensive, defensive, and intelligence potentials as an integral part of combat operations. Included are the perceptions of EW by the three services, SHAPE's view of joint electronic warfare to include the difficulties associated with joint operations in a multi-national force with emphasis on EW as a commander's issue. The overall goal is to incorporate EW as an integral part of force and contingency planning.

Prerequisites: Attendees must be of brigadier general equivalent or higher rank and should be in command or in key positions to influence EW in combat operations, planning, or equipment acquisition.

Special Requirements: NATO Secret clearance.

OPR: HQ USAFE/DPPET.

L-01—NATO Communications and Information System (CIS) Course—PDS Code WMC—Latina IT/2 wk—Mar 93

To familiarize officers, civilian equivalents, and selected SNCOs with NATO communications and information systems for effective planning, implementation, and management.

Prerequisites: Assigned or about to be assigned to a NATO or national appointment associated with allied CIS and not having spent more than 1 year in that position.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-40—Status, Control, Alerting, and Reporting System II (SCARS II) - A Site Supervisory Operator—PDS Code WMD—Latina, IT—3 wk—Mar 93

Provides the knowledge and skills necessary for personnel to support SCARS II sites in all areas except the maintenance of hardware.

Prerequisites: NCOs with ADP and communications experience.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-41—Status, Control, Alerting, and Report System II (SCARS II) - A Site Chief User—PDS Code WME—Latina IT—2 wk—Mar 93

Provides selected officers with the knowledge and skills necessary for them to direct the organization of a SCARS II sub-network.

Prerequisites: Executive officers of emergency action units (EAU) or Nuclear Operations Planning System (NOPS) with general knowledge of computer networks and ADP techniques.

Special Requirements: NATO Secret clearance. Officers must have attended the course NATO Nuclear Weapons Release Procedures at the NATO School, Oberammergau GM, or must have on-the-job experience with such procedures.

Quota Control: HQ USAFE/DPATT.

L-42—Status, Control, Alerting, and Reporting System II (SCARS II) - A Site User—PDS Code WMF—Latina IT—1 wk—Mar 93

Provides emergency action unit (EAU) or Nuclear Operations Planning System (NOPS) staff with the knowledge and skills necessary for them to prepare, transmit, and receive data on the SCARS II equipment.

Prerequisites: EAU or NOPS staff with a working knowledge of computer peripherals.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-43—Status, Control, Alerting, and Reporting System II (SCARS II) - Site Security Officer—PDS Code WMG—Latina IT/1 wk—Mar 93

Provides selected officers with the knowledge and skills required for them to apply necessary security measures for SCARS II data handling.

Prerequisites: Officers of the emergency Action unit (EAU) or Nuclear Operations Planning System (NOPS) with good knowledge of ADP techniques.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-44—Status, Control, Alerting, and Reporting System II (SCARS II) - B Site User—PDS Code WMH—Latina IT/1 wk—Mar 93

Provides emergency action unit (EAU) or Nuclear Operations Planning System (NOPS) staff with the knowledge and skills necessary for them to prepare, transmit, and receive data on the SCARS II equipment.

Prerequisites: EAU or NOPS staff with a working knowledge of computer peripherals.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-45—Status, Control, Alerting, and Reporting System II (SCARS II) - B Site User/Operator—PDS Code WMJ—Latina IT/2 wk—Mar 93

Provides the knowledge and skills necessary to operate a SCARS II B site, prepare, transmit and receive messages, and understand all available SCARS II B site functions necessary to suppport base operations center operations. Hardware will not be taught.

Prerequisites: Personnel of all ranks with message handling experience and a good working knowledge of computer peripherals.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-46—Status, Control, Alerting, and Reporting System II (SCARS II) - A Site Technician Course—PDS Code WMK—Latina IT/8 wk—Mar 93

Trains military and civilian personnel assigned to SCARS II posts to perform the necessary preventive and corrective maintenance actions

on SCARS II equipment to field level standards as defined in ACE Directive 93-4, Annex A, paragraph 3. Repair actions are limited to the exchange of subassemblies (normally printed circuit boards).

Prerequisites: The candidate must have: (1) completed a national course on basic electronics; (2) a good knowledge and experience on the specific topics indicated at ACE Manual 75-1-1, annex B, appendix 2, column (1); (3) studied the precourse material; and (4) knowledge of the general safety procedures for working with hazardous voltages.

Precourse Study Materials: Fundamentals of digital logic, introduction to microprocessors, glossary of technical terms, and fundamentals of data communications (if locally available).

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-47—Status, Control, Alerting, and Reporting System II (SCARS II)—PDS Code WML—Latina IT/7 wk—Mar 93

Trains military and civilian personnel assigned to SCARS II posts to perform the necessary preventive and corrective maintenance actions on SCARS II equipment to field level standards as defined in ACE Directive 93-4, annex A, paragraph 3. Repair actions are limited to the exchange of subassemblies (normally printed circuit boards).

Prerequisites: The candidate must have: (1) completed a national course on basic electronics; (2) a good knowledge and experience on the specific topics indicated at ACE Manual 75-1-1, annex B, appendix 2, column (1); (3) studied the precourse material; and (4) knowledge of the general safety procedures for working with hazardous voltages.

Precourse Study Materials: Fundamentals of digital logic, introduction to microprocessors, glossary of technical terms, and fundamentals of data communications (if locally available).

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-50—NATO Secure Voice (NSV) Technician Course, Category I—PDS Code WMM—Latina IT/7 wk—Mar 93

Trains military and civilian crypto technicians to perform the necessary preventive and corrective maintenance actions on NSV equipment—Elcrovox and crypto control units (CCU) 1, 2, and 3. Training is given to field level standard as defined in ACE Directive 93-4, annex A, paragraph 3. Repair actions are limited to the changes of reparable subassemblies (normally printed circuit boards).

Prerequisites: (1) Completed a national military course on basic electronics; (2) a good knowledge and experience on the specific topics indicated at ACE Manual 75-1-1, annex B, appendix 2, column (e); (3) studies the precourse material (fundamentals of digital logic, an introduction of the NICS, fundamentals of telephony, and glossary of technical terms); and (4) knowledge of the general safety procedures for working with hazardous voltages.

Special Requirements: NATO Confidential clearance.

Quota Control: HQ USAFE/DPATT.

L-51—NATO Secure Voice (NSV) Technician Course, Category II—PDS Code WMN—Latina IT/5 wk 2 days—Mar 93

Trains military and civilian crypto technicians to perform the necessary preventive and corrective maintenance actions on NSV equipment—Elcrovox and crypto control units (CCU) 1 and 2. Training is given to field level standard as defined in ACE Directive 93-4, annex A, paragraph 3. Repair actions are limited to the changes of reparable subassemblies (normally printed circuit boards).

Prerequisites: (1) Completed a national military course on basic electronics; (2) a good knowledge and experience on the specific topics indicated at ACE Manual 75-1-1, annex B, appendix 2, column (2); (3) studies the precourse material (fundamentals of digital logic, an introduction of the NICS, fundamentals of telephony, and glossary of technical terms); and (4) knowledge of the general safety procedures for working with hazardous voltages.

Special Requirements: NATO Confidential clearance.

Quota Control: HQ USAFE/DPATT.

L-52—NATO Secure Voice (NSV) Technician Course, Category III—PDS Code WMP—Latina IT/4 wk—Mar 93

Trains military and civilian crypto technicians to perform the necessary preventive and corrective maintenance actions on NSV equipment—elcrovix and crypto control unit (CCU) 3. Training is given to field level standard as defined in ACE Directive 93-4, annex A, paragraph 3. Repair actions are limited to the changes of reparable subassemblies (normally printed circuit boards).

Prerequisites: (1) Completed a national military course on basic electronics; (2) a good knowledge and experience on the specific topics indicated at ACE Manual 75-1-1, annex B, appendix 2, column (2); (3) studies the precourse material (fundamentals of digital logic, an introduction of the NICS, fundamentals of telephony, and glossary of technical terms); and (4) knowledge of the general safety procedures for working with hazardous voltages.

Special Requirements: NATO Confidential clearance.

Quota Control: HQ USAFE/DPATT.

L-64—BIS-610/700 Technician Course—PDS Code WMQ—Latina IT/4 wk—Mar 93

Trains military and civilian crypto technicians to perform preventive and corrective maintenance actions on the BID 610/700 cryptographic equipment to field level standard as defined in ACE Directive 93-4, annex A, paragraph 3. Repair actions are down to component level.

Prerequisites: (1) Completed a national military course on basic electronics; (2) a good knowledge and experience on the specific topics indicated at ACE Manual 75-1-1, annex B, appendix 2, column (j); (3) studied the precourse material (student handbook "Basic Review" and glossary of technical terms); and (4) knowledge of the general safety procedures for working with hazardous voltages.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-65—BID-1000 Technician Course—PDS Code WMR—Latina IT/2 wk—Mar 93

Trains crypto technicians to perform the necessary preventive and corrective maintenance actions on BID-1000 cryptographic equipment to unit level standard as defined in ACE Directive 93-4, annex A, paragraph 3. Repair actions are limited to the exchange of reparable subassemblies (modules).

Prerequisites: (1) Completed a national military course on basic electronics; (2) a good knowledge and experience on the specific topics indicated at ACE Manual 75-1-1, annex B, appendix 2, column (k); (3) studied the precourse material (CCITT Protocol

V.24, V.28, V.35, introduction to NICS, and glossary of technical terms); and (4) knowledge of the general safety procedures for working with hazardous voltages.

Special Requirements: NATO Secret clearance.

Quota Control: HQ USAFE/DPATT.

L-71—IVSN Standard Interface Equipment/Circuit Conditioning Equipment (SIE/CCE) Installation and Maintenance—PDS Code WMS—Latina IT/1 wk—Mar 93

Trains military and civilian personnel of NATO countries assigned to areas served by SIE/CCEs in the requirements necessary to install, activate, test, and maintain the standard interface equipment/circuit conditioning equipment used to provide IVSN service to remote locations.

Prerequisites: (1) A good knowledge and experience on the specific topics indicated in ACE Manual 75-1-1, annex B, appendix 3, column (n); (2) Studied the pre-course material-prior to arrival for training, each student should have been provided with a copy of the latest issue of the Technical Procedures for Integration, Testing, and Activation of Static Seconday IVSN Sites number SDSB/NMP/TAS982/80 in either the English language or translated by their MOD into their national language. The student should bring this manual with him to the training course.

Special Requirements: NATO Restricted clearance.

Quota Control: HQ USAFE/DPATT.

L-90—Telegraph Automatic Relay Equipment (TARE) Technician—PDS Code WMT—Latina IT/14 wk—Mar 93

Trains selected NATO personnel assigned to NICS TARE posts to maintain the NICS TARE, including the UPS, to field level standard as defined in ACE Directive 93-4, annex A, paragraph 3. Repair actions are limited to the exchange of reparable subassembly.

Prerequisites: (1) Completed a national military course on basic electricity and electronics; (2) a good knowledge and experience on the specific topics indicated in ACE Manual 75-1-1, annex B, appendix 2, column (q); (3) studied the precourse material (an introduction to the NICS, fundamentals of digital logic, and glossary of technical terms); and (4) knowledge of the general safety procedures for working with hazardous voltages.

Special Requirements: NATO Restricted clearance.

Quota Control: HQ USAFE/DPATT.

L-91—Telegraph Automatic Relay Equipment (TARE) Operator Course—PDS Code WMU—Latina IT/5 wk—Mar 93

Provides selected NATO personnel with the skills and knowledge required to handle message traffic at high capacity (LITTON) TARE sites, and perform the duties of a supervisor, reject service operator, route/refile operator, and special handling operator.

Prerequisites: Study the precourse material (an introduction to the NICS and glossary of technical terms).

Special Requirements: NATO Restricted clearance.

Quota Control: HQ USAFE/DPATT.

NOWSA—Winter Survival for Aircrew—PDS Code 8GT—HQ DEFCOMNOR/AIR, Oslo NO/1 wk 2 days—Apr 95

Trains aircrew in the proper use of personal, protective, and survival equipment, and to try out techniques and procedures which may enable aircrews to survive under winter conditions.

Prerequisites: Aircrew on flying status.

OPR: HQ USAFE/DPSET.

NSOOC—NATO Staff Officer Orientation Course, NDU—PDS Code JDG—Washington Navy Yard, Washington DC/2 wk—Mar 89

The NATO Staff Officer Orientation Course (NSOOC) is a 2-week orientation program designed for US field grade officers who are being assigned to initial NATO staff duties. The purpose of this orientation course is to facilitate the assimilation of US officers into the alliance's organizational structure to function effectively in concert with their European NATO counterparts. The projected annual enrollment is 350 officers. The majority of the courses will be held during the summer months which constitute the peak turnover period for US assignments to NATO. The course is offered nine times a year via National Defense University at the Washington Navy Yard.

RAFEOD—NATO Officers and Senior NCOs Post Qualifying EOD Course—PDS Code 8GL—Defense EOD School, Kent UK/4 wk—Apr 95

Trains selected officers and senior NCOs from NATO Armed forces in advanced EOD.

Prerequisites: Minimum rank of sergeant.

OPR: HQ USAFE/DPSET.

RAFIED—Preoperational Improved Explosive Devices (IED) Course—PDS Code 8GK—Army School of Ammunition, Warwickshire, England/3 wk—Apr 95

Trains officers and NCOs of NATO countries in the advanced techniques of IED clearance.

Prerequisites: Comprehensive EOD experience is required.

OPR: HQ USAFE/DPSET.

USAFECASC—Close Air Support Course—PDS Code 8GR—Sembach AB GE/1 wk—Mar 87

Trains Air Force personnel for tactical air control party duties and Army personnel for duties which involve the integration of close air support with maneuver operations. Includes instruction on concepts and doctrine of tactical air operations, the Tactical Air Control System/Army Air Ground System, and the planning and procedures necessary to control close air support attacks in NATO. Stresses the responsibility of tactical air control party members as air advisors to the Army units they support.

Special Requirements: NATO Secret clearance.

Quota Control: USAFE Air/Ground Operations School, Sembach AB, GE.

USAFEJCOC—Joint Combat Operations Course—PDS Code 8GQ—Sembach AB GE/1 wk—Mar 87

Instructs selected personnel of US and Allied forces on the organizations, missions, systems, and procedures for integrating tactical air and surface combat firepower. The course focuses on the integration of United States armed forces into the NATO CENTAG/4ATAF area of responsibility.

Special Requirements: NATO Secret clearance.

Quota Control: USAFE Air/Ground Operations School, Sembach

AB, GE.

USAFESQCC—USAFE Squadron Commanders' Course—PDS Code 20L—Ramstein/1 wk—Oct 96

Mandatory for pre-command training for all first-time commanders of traditional Air Force squadrons. The curriculum is modeled after the AU wing/group commanders' course and is divided into three major parts: leadership and command, mission, people. Each area is covered by formal briefings, question-and-answer periods, panel discussions, video presentations, practical exercises, AU tests, and open discussion. Specific areas addressed include legal, personnel, manpower, services, finance, inspector general, chaplain, medical, and operational topics. Conducted in nonattribution fashion. Provides basic skills, references, and points of contact to help commanders avoid common pitfalls during the first 6 months in command. After course completion, students should have basic understanding of the demands placed on and responsibilities of the squadron commander. Priority attendees are designated commanders, potential commanders, new commanders (less than 30 days).

OPR: HQ USAFE/DPPI.

USAFE2F031 006—1.5 Ton Low Pressure Cryogenic Plant Training—PDS Code X3L—Ramstein/Aviano/2 wk—Jun 94

Provides training for USAFE personnel with AFSC 2F0X1 or equivalent in the knowledge and skill necessary for operation, inspection troubleshooting, and maintenance of the USAFE 1.5 ton low pressure mobile cryogenic plant. Training is provided on the principles of air separation and distillation that is unique to the 1.5 ton low pressure plant, and on operating principles of the diesel engine, electric motor, air storage cylinders, and cryogenic pumps. Training also includes product quality control equipment, safety forms, technical orders, and environmental concerns unique to cryogenic production.

Prerequisites: AFSC 2F0X1 or equivalent and assigned to a cryogenic production facility. ECL 70.

Special Requirements: Physical profile of H-1 and normal color vision required. Protective footwear (safety-toed shoes).

8/B/3—Overseas Officers' and Senior NCO's EOD Course—PDS Code 8GF—Defense EOD School, Kent UK/4 wk—Apr 95

Trains Army and Air Force officers and senior NCOs in EOD (except disposal of IEDs).

Prerequisites: Minimum rank of sergeant.

OPR: HQ USAFE/DPSET.

8/B/16—NATO Officer's and Senior NCO's IED Disposal—PDS Code 8GG—Defense EOD School, Kent UK/3 wk—Apr 95

Trains NATO officers and senior NCOs in IED disposal.

Prerequisites: Minimum rank of sergeant.

OPR: HQ USAFE/DPSET.

8/B/17—Overseas Officer's and Senior NCO's IED Disposal Course—PDS Code 8GH—Defense EOD School, Kent UK/3 wk—Apr 95

Trains overseas officers and senior NCOs in IED disposal.

Prerequisites: Minimum rank of sergeant. Preferable ex-students of 8/B/3 course.

OPR: HQ USAFE/DPSET.

8/B/20—NATO Staff Officers IED Familiarization—PDS Code 8GJ—Defense EOD School, Kent UK/1 wk—Apr 95

Familiarizes NATO staff officers with improvised explosive devices and the control of EOD teams during a terrorist campaign prior to limited or general war.

Prerequisites: Any commissioned officer.

OPR: HQ USAFE/DPSET.

USAFE8045 005—Advanced Systems Training—PDS Code 8K1—Schierstein GE/1 wk—Dec 90

Includes an overview of infrared imaging systems; a focus on infrared theory and principles; and a concentration on order-of-battle analysis.

Prerequisites: Provides training for EUCOM personnel who possess Air Force AFSCs 8016, 8045, 20650/70/90, or their service equivalents. Army, Marine Corp and civilian attendees must be graduates of a basic imagery interpretation course.

Special Requirements: Course is conducted at the SI/SAO level. Top Secret clearance and access to SI/SAO is required before reporting for training. Students designated to attend the course at the 497 RTG (Schierstein GE) send clearances to SSO IRC AMHS at least 90 days before class start date. Waiver of security clearance requirements cannot be granted, and students will not be enrolled unless the security requirement is met.

Admin Instructions: Students not familiar with the Wiesbaden-Schierstein area are requested to call the 497 RTG (DSN 339-3657/3282) for information on billeting and transportation. All students are advised that military fatigues and civilian attire are inappropriate wear. Military members may wear any other service uniform combination according to AFI 36-2903, AR 670-1, or other service equivalent.

Quota Control: 497 RTG/INIOUT.

F-111F100IA/WI—F-111F Instructor Training Course—PDS Code 5RE—48 TFW RAF Lakenheath UK/duration */AFSC K1115G/K1555E—Dec 87

Upgrades aircraft commanders and weapon system officers (WSO) to instructor status in the F-111F.

Prerequisites: Upgrading instructor must meet command established minimums set forth in MCM 51-50, vol l, USAFE, chapter 6. Must be selected by the wing aircrew training board. Must be a qualified simulator instructor.

Quota Control: 48 TFW/DOT; Waiver Authority: 48 TFW/DO.

*29 days for aircraft commanders; 23 days for weapons system officers (WSOs).

E3ACOC001—Communication Operator—PDS Code 6YV—location: (APO AE 09104)/15 wk—Apr 96

Provides the communications operator with sufficient training to operate the E-3A communications equipment in order to achieve air-to-ground, air-to-air, and internal communication; to maintain the necessary communications links to support E-3A tasking; and to provide inputs to the computer data base and data base tables.

Prerequisites: Must have completed formal communications operator training. Three years of experience as a radio operator is desirable.

Quota Control: HQ USAFE/DPPET.

E3ACTC001—Communications Technician—PDS Code 6YW—location: (APO AE 09104)/15 wk—Apr 96

Provides adequate training for the communications technician to perform proper maintenance of mission crew communication/crypto equipment (to tune, adjust, align, and manually switch components of the communications equipment); to monitor and operate the electronic countermeasure resistant communications system (ERCS); and to assist maintenance personnel and other inflight technicians as required.

Prerequisites: a. Completion of basic avionic communications maintenance course.

b. Knowledge and theory of electronics and radio, including theory of transistors and solid-state components; and digital techniques, and interpretations of technician orders, wiring, diagrams, and schematic drawings.

c. Three years of experience in functions such as testing, tuning, adjusting, maintaining, or repairing avionic communication equipment, applying electronics theory and radio theory to maintenance and repair of avionic communication equipment, and use of specialized test equipment is desirable.

d. Completion of secondary school or equivalent, with courses in physics and mathematics and knowledge of radar and computer electronics principles is desirable.

Quota Control: HQ USAFE/DPPET.

E3ADTC001—Computer Display Technician—PDS Code 6YY—location: (APO AE 09104)/19 wk—Apr 96

Provides proper training for the display technician to perform preflight inspection and operational readiness checks of the data processing equipment; to perform diagnostic programs for inflight troubleshooting, fault isolation, replacement of modules, and inflight maintenance as required; and to service the data processing peripheral equipment, and to monitor the status of mission avionics equipment tested by the computer.

Prerequisites: a. Completion of TD course 30554 037 (TIN), Data Processing US Standard E-3A.

b. Knowledge of electronic principles including transistors, solid-state components, integrated circuits and pulse techniques as applied to high speed computerized systems; capabilities, limitation, operation, and functional use of electronic analytic equipment; and electronic switching logic as provided trigger units (FLIP-FLOPS), microelectronic switching circuits and dynamic circuitry; programming routines, interpretations of technical orders, wiring diagrams, and schematic drawings; and theory of electronics.

c. Three years of experience in functions such as the installation, repair, testing, or modification of electronic computer systems equipment; use of electronic test equipment application of broad band highly sensitive oscilloscopes for circuit analysis; and proper methods of triggering or synchronizing oscilloscopes in order to examine elusive single or transient pulses is desirable.

Quota Control: HQ USAFE/DPPET.

E3AEC001—Flight Engineer—PDS Code 6YP—location: (APO AE 09104)/19 wk—Apr 96

Provides adequate training for the flight engineer to manage the airframe and engine systems and subsystems.

Prerequisites: Must have graduated from a recognized fixed multi-engine flight school and be able to demonstrate a knowledge of weight and balance, aircraft performance, interpretation on diagrams and loading and performance charts. A minimum of 1 year of flying experience in this function.

Quota Control: HQ USAFE/DPPET.

E3ANC001—Navigator—PDS Code 6YN—location: (APO AE 09104)/13 wk—Apr 96

Provides sufficient training for the navigator to perform the safe navigation of the aircraft during transit flying and while on station.

Prerequisites: Rated as a navigator on flying status or a rated navigator not on current flying status but have successfully completed a national-sponsored flying refresher course. A minimum of 2 years of experience in this function is recommended.

Quota Control: HQ USAFE/DPPET.

E3APC001—Pilot/CoPilot—PDS Code 6YM—location: (APO AE 09104)/19 wk—Apr 96

Provides sufficient experience on the E-3A for the pilot to assume the aircraft commander responsibilities. Also provides adequate training for the copilot to assist the aircraft commander in the performance of his or her duties and to perform normal flight duties where authorized by aircraft commander.

Prerequisites: a. Must have a minimum of 1000 hours fixed wing pilot flying time, 500 flying hours multi-engine flying time, or 500 hours first pilot flying time before entering training.

b. Must be on flying status and possess a current instrument rating.

Quota Control: HQ USAFE/DPPET.

E3ARTC001—Radar Technician—PDS Code 6YX—location: (APO AE 09104)/19 wk—Apr 96

Provides adequate training for the radar technician to be able to activate, maintain, and terminate the radar system and its subsystems; monitor surveillance equipment operating performance levels; perform radar equipment test routines and other checkouts; and to troubleshoot and replace modules as required.

Prerequisites: a. Completion of course 32832 002 (KEE), AC&W Radar Maintenance Specialist E-3A.

b. Knowledge of electronic principles including theory of transistors and solid-state components as applied to early warning radar and digital and analog data processing systems, and interpretation of technical orders, blueprints, wiring diagrams, and schematic drawings.

c. Three years of experience in functions such as installation, modification, repair, or maintenance of early warning radar systems and use of electronic test equipment is desirable.

d. Completion of secondary school or equivalent with courses in physics and mathematics is desirable.

Quota Control: HQ USAFE/DPPET.

E3ASOC001—Surveillance Operator—PDS Code 6YU—location: (APO AE 09104)/19 wk—Apr 96

Provides the surveillance operator with proper training to detect, track, and identify sensor returns; maintain an accurate and up-to-date air and maritime picture; transfer that picture information to the

ground environment; and to initiate ECCM actions as directed.

Prerequisites: a. Have completed formal surveillance training as provided for operators by their national systems.

b. Minimum of 3 years of experience in command and control operations is desirable.

c. Minimum of 11 years of experience in an automated command and control system is desirable, such as NADGE, US E-3A, 407L, or 412L.

d. Working knowledge of procedures for transmission of surveillance data is desirable.

e. Working knowledge of radio transmission procedures is desirable.

Quota Control: HQ USAFE/DPPET.

E3ATDC001—Tactical Director—PDS Code 6YQ—location: (APO AE 09104)/19 wk—Apr 96

Provides adequate training for the tactical director to direct, monitor, and control air and maritime operations; ensure effective performance of weapons and surveillance functions; determine priorities and give direction for the use of communications, computer, and associated radar equipment; and to manage mission crew activities in response to emergency conditions.

Prerequisites: a. Have completed formal weapons controller training.

b. Have experience in airspace management of aircraft in command and control operations which includes radar control of fighter aircraft. Ten years of experience is desirable, 2 years of which must have occurred within the last 5 years.

c. At least 1 year of command and control experience must have been with automated systems such as NADGE, US E-3A, 407L, or 412L.

Quota Control: HQ USAFE/DPPET.

E3AWCC001—Weapons Controller—PDS Code 6YS—location: (APO AE 09104)/19 wk—Apr 96

Prepares the weapons controller for providing guidance information on weapons assigned and direct engagement of such as may be authorized, and to maintain status of assigned weapons and coordinate with the fighter allocator and other controllers regarding flight safety and the recovery of assigned aircraft.

Prerequisites: a. Have completed formal intercept controller training.

b. Three years of experience controlling fighter aircraft as an intercept controller.

c. At least 1 year of experience with automated radar systems is desirable such as NADGE, US E-3A, 407L, and 412L.

Quota Control: HQ USAFE/DPPET.

E3SCC001—Surveillance Control Officer—PDS Code 6YT—location: (APO AE 09104)/19 wk—Apr 96

Provides adequate training for the surveillance controller to exercise control of the E-3A sensor devices in coordination with the radar technicians, supervise assigned surveillance operators in the accomplishment of their tasks, and to establish data links with other E-3A aircraft and ground sites.

Prerequisites: a. Have completed formal surveillance training as provided for officers by their national systems.

b. Completion of formal electronic counter-countermeasures (ECCM) training is desirable.

c. Three years of experience in command and control operations, including radar control of fighter aircraft is desirable.

d. At least 1 year of command and control experience as a radar surveillance operations supervisor whose duties included manipulation of radar receiver and transmitter systems to ensure radar quality is maintained is desirable.

e. Knowledge of the technical features of ground radar systems is desirable.

Quota Control: HQ USAFE/DPPET.

Air Force Medical Operations Agency (AFMOA)

FAPMC9100—Family Advocacy Management—PDS Code PLL—San Antonio/3 days—Mar 93

Presents the latest developments in family advocacy administration at all levels, innovations, resources, and related services for conducting base-level programs. Resolution of specific problems concerning administration, professional conduct of family advocacy, prevention, maltreatment and therapy of a child or spouse abuse program are addressed in detail through workshops, guest speakers, and analysis of cases. Program is designed to provide refresher and advanced training for family advocacy officers and major air command family advocacy program managers.

Prerequisites: Officers and civilians serving as installation family advocacy officers or MAJCOM FAP program managers.

Quota Control: HQ AFMOA/SGPS.

United States Transportation Command (USTRANSCOM)

4925 C—JOPES Functional Manager Course—PDS Code 273—Scott/4 days—Apr 96

Provides the functional manager with the knowledge of Joint Operation and Planning Execution System (JOPES) procedures and the supporting ADP to effectively manage JOPES in the Global Command and Control System (GCCS) and Top Secret Support System (TS3) environments. The design of the course will look at the roles and responsibilities for the management of the JOPES environment. It will also focus on the required mechanics of administering functional database management activities at a local site and within the planning and execution community. Curriculum will provide insight into key areas of configuration management, monitoring/managing databases, system security, and other related functional management requirements that are associated with the JOPES environment.

Prerequisites: Military or civilian with a Top Secret clearance who are, or will be, performing JOPES functional management duties and have satisfactorily completed the 5-day JOPES basic operations course.

Quota Control: USTRANSCOM TCJ3-JTO.

4925 E—GTN Users' Course—PDS Code 275—Scott/3 days—Apr 96

Designed to provide a basic working knowledge of how to retrieve data using the Global Transportation Network (GTN) prototype system software. The GTN prototype system is on-line and used by USTRANSCOM, its components, and other commands for detailed common user air and surface movement visibility, and intransit visibility by shipment, stock number, unit, or passenger name. The

course covers the hardware and software components and key data elements of the system. With instructor guided, hands-on training the class learns how to navigate within the system and use its various functions. Given a variety of requirements, the class uses the system and applies its experience to build knowledgeable and useful queries on cargo, passenger, and scheduling information for both air and sea transportation modes.

Prerequisites: Military or civilian personnel who are current or potential GTN users. (Although GTN is an unclassified system, access to facilities where it is located may require a Top Secret clearance.)

Quota Control: USTRANSCOM TCJ3-JTO.

4925 F—GTN Functional Database Manager Course—PDS 276—Scott/1 day—Apr 96

Designed to provide local site Global Transportation Network (GTN) functional database managers with sufficient knowledge of GTN procedures, hardware, and software system components to help effectively manage the GTN system. The class consists primarily of hands-on instruction using the on-line GTN prototype system. Topics covered in the course include a review of functional database manager responsibilities oriented on GTN, user access and permissions, reference table updates, error conditions and processing, and remote user assistance. Learning is reinforced through extensive use of hands-on exercises

Prerequisites: Military or civilian personnel who are, or will be, performing GTN functional database management duties and have completed the 3 1/2 day GTN Users' Course. Although GTN is an unclassified system, access to facilities where it is located may require a Top Secret clearance.

Quota Control: USTRANSCOM TCJ3-JTO.

JOPES/ADV—JOPES Specialty Course—PDS Code 206—Scott/1 wk 1 day—Apr 96

A modularized course (up to 6 days in length) designed to provide functional knowledge of how to use the requirements development and analysis (RDA), Joint Flow and Analysis System for Transportation (JFAST), logistics sustainment analysis and feasibility estimator (LOGSAFE), Force Augmentation Planning and Execution System (FAPES), scheduling and movement (S&M), and ad hoc query (AHQ) applications in the Global Command and Control System (GCCS) environment. Students can attend the entire 6-day course or select specific modules for which training is required. RDA is used to review, build, and modify requirements for the time-phased force deployment data (TPFDD). JFAST is used to provide rapid analysis of transportation feasibility before scheduling. LOGSAFE is used to develop nonunit cargo support requirements for planning. FAPES is used to perform manpower mobilization analysis. S&M is used by the planner to review, create, analyze, schedule, allocate, and manifest carrier information. AHQ is used to retrieve selected information from TPFDDs for reports and analysis. The scope includes lecture, discussion, demonstration, and hands-on use of those applications selected by the student.

Prerequisites: Military or civilian personnel with a Secret clearance and satisfactory completion of the former JOPES users' course and JOPES migration transition course, or satisfactory completion of the JOPES basic operations course. (Although a Secret clearance is required, access to facilities where the course is taught may require a Top Secret clearance.)

Quota Control: USTRANSCOM TCJ3-JTO.

JOPES/BOC—JOPES Basic Operations Course—PDS Code 204—Scott/1 wk—Apr 96

Designed for persons new to the joint planning and execution process. Provides general functional training and procedural information on how to conduct joint operation planning and execution using the Joint Operation Planning and Execution System (JOPES) in the Global Command and Control System (GCCS) environment. The course uses discussion, hands-on practice, and practical exercises to underscore JOPES procedures, navigation within system software, hardware configuration, and security procedures. It emphasizes the functions which build and analyze OPlans, force modules, requirements, schedule and manifest carriers, retrieve deployment information, and produce reports, displays, charts, and graphics.

Prerequisites: Military or civilian personnel with a Secret clearance and recommended successful completion of the joint planning orientation course (JPOC) or equivalent. (Although a Secret clearance is required, access to facilities where the course is taught may require a Top Secret clearance.)

Quota Control: USTRANSCOM TCJ3-JTO.

JOPES/TS3—Top Secret Support System (TS3) Course—PDS Code 205—Scott/1 wk—Apr 96

Designed for persons new to the Top Secret planning process. Provides general functional training and procedural information on how to conduct joint operation planning and execution using the Joint Operation Planning and Execution System (JOPES) on the Worldwide Military Command and Control System (WWMCCS) mainframe. Provides a limited review of the US national security structure and joint planning. The course uses discussion, hands-on practice, and practical exercises to underscore JOPES procedures, navigation within system software, hardware configuration, and security procedures. It emphasizes the functions which build and analyze OPlans, force modules, requirements, retrieve deployment information, and produce reports, displays, charts, and graphics.

Prerequisites: Military or civilian personnel with a Top Secret clearance and recommended successful completion of the Joint Planning Orientation Course (JPOC) or equivalent.

Quota Control: USTRANSCOM TCJ3-JTO.

Chapter 13

ANCILLARY TRAINING

(OPR: HQ AFPC/DPPAT)

Command OPR. HQ AFPC/DPPAT is command OPR for this chapter. Requests for new courses, changes, or deletions must be prepared and processed according to paragraph 13.3.

Section A—Procedures and Instructions

13.1. General Responsibilities. Personnel responsible for creating or administering an ancillary training program (ATP) must make sure ATPs meet Air Force needs within minimum training time and cost while maintaining quality training and maximum time for primary mission accomplishment; provide standard direction and guidance for administration of the ATP; and standardize training procedures and techniques. Refer to AFI 36-2201, chapter 8, for specific program responsibilities.

13.2. Ancillary Training Programs. These are programs or courses that contribute to mission accomplishment, but which are separate from requirements in an individual's primary Air Force specialty or occupational series. ATPs exist to ensure Air Force personnel possess an adequate blend of both general and technical knowledge and capabilities. ATPs fall into three categories: functional/additional duty, general, and awareness.

13.2.1. **Functional/Additional Duty Ancillary Training Programs.** These programs are formal training for a specific group of persons in subjects with a direct mission contribution or to prepare an individual to perform an additional duty.

13.2.2. **General Ancillary Training Programs.** These programs are formal training in subjects that apply to all military and civilian personnel and have an indirect mission impact. Training may be required periodically.

13.2.3. **Awareness Ancillary Training Programs.** These are programs not requiring attendance at formal training sessions. Requirements are satisfied informally through newspaper articles, read-and-sign items, pamphlets, bulletins, or commanders call. Documentation of awareness training is not required.

13.3. ATP Development and Activation Instructions:

13.3.1. ATP course managers will prepare an Ancillary Training Program Action Change Notice (ATPACN) to activate, delete, or change an ATP. Command or base-level course managers or training agencies will prepare and send an ATPACN to the Air Force ATP course manager when proposing a new ATP or recommending changes to, or elimination of, an existing ATP. Use the ATPACN format outlined in paragraph 13.4.

13.3.2. ATP course managers will forward ATPACNs activating or changing an ATP to AFPC/DPPAT for validation of instructional system design before coordinating the ATPACN for approval.

13.3.3. AFPC/DPPAT will evaluate ATPACNs to validate course objectives and training methodology, compliance with Air Force ATP objectives and development responsibilities, and the impact the ATP will have on mission accomplishment and personnel. AFPC/DPPAT will provide recommendations to ATP course managers and HQ USAF/DPPE, as appropriate.

13.3.4. ATP course managers will coordinate ATPACNs for new or existing courses across all Secretary of the Air Force agencies and Air Force Deputy Chiefs of Staff (DSC) for concurrence. If approved, AFPC/DPPAT will add requirements to AFCAT 36-2223. Air Force ATP course managers will send ATPACNs deleting ATPs directly to HQ AFPC/DPPAT.

13.4. ATPACN Preparation Instructions. Complete items 13.4.1 through 13.4.14 to establish a new ATP; all items to revise an existing ATP; items 13.4.1, 13.4.2, 13.4.3, 13.4.6, and 13.4.8 to establish an awareness ATP; and items 13.4.1, 13.4.2, 13.4.14, and 13.4.15 to delete an ATP.

13.4.1. **ATP Course Manager**. List the ATP course manager's name, grade, title, office symbol, and duty phone number (DSN).

13.4.2. **Course Title**. Provide the exact course title.

13.4.3. **Course Type.** Identify the ATP as a functional/additional duty, general, or awareness program. See paragraphs 13.2.1, 13.2.2, and 13.2.3 for definitions of these course types.

13.4.4. Target Group. List who is to receive training.

13.4.5. Course Duration. Specify how long the course will be in duty hours.

13.4.6. Frequency of Training. Specify how often training is required, such as: Upon PCS, annually, or semiannually. Also state whether refresher training is required.

13.4.7. **Prescribing Directive or Tasking**. Identify the directive mandating training. If the prescribing directive is in revision, attach a copy of the draft changes to the directive.

13.4.8. **Course Location**. Identify where the training will be done and who is responsible for providing the training. If training will be provided in the unit by unit personnel, identify the local agency responsible for ATP course management.

13.4.9. **Course Description**. Provide a summary of the subject matter and objectives. Attach a copy of the plan of instruction (POI) and all lesson materials to be given to training agencies.

13.4.10. **Need**. Explain why training is essential to mission accomplishment. List all other training courses (e.g., Basic Military Training, PME, or FTD) where this training will be given.

13.4.11. **Methods of Instruction**. Identify the instructional media used to provide training.

13.4.12. **Methods of Evaluation**. Specify how training will be evaluated (e.g., written or performance).

13.4.13. **Training Exemptions or Waivers**. Identify who is excused from training, if any.

13.4.14. **Mission (Manpower) Impact Assessment**. Estimate the man-hour impact of this requirement by multiplying the estimated number of personnel to be trained annually and the length of the proposed training.

13.4.15. **Course Change or Deletion Action**. Use only to notify of a course change or course deletion. For a course change, indicate the course, the information changed, and reason for the action. For a course deletion, include the effective date for termination of the

course and rationale for deleting the course.

Section B—Course Announcements

Functional/Additional Duty ATPs

Base Supply Customer Training, Block I—Apr 95

Provides organizational supply representatives the minimum essential knowledge of standard supply system processes and management products to provide these individuals the ability to effectively manage supply requirements and perform related duties.

Frequency: Upon assignment to duty. Personnel who have attended this training within the last 2 years are not required to attend.

Duration: Not to exceed duration specified in AFM 67-1.

Target Group: Organizational supply representatives.

Reference: AFM 67-1.

Course Manager: HQ USAF/LGSS.

Base Supply Customer Training, Block IIA—Apr 95

Provides organizational bench stock monitors the minimum essential knowledge of standard supply system processes and management products to provide these individuals the ability to effectively manage supply requirements and perform related duties.

Frequency: Upon assignment to duty. Personnel who have attended this training within the last 2 years are not required to attend.

Duration: Not to exceed duration specified in AFM 67-1.

Target Group: Organizational bench stock monitors.

Reference: AFM 67-1.

Course Manager: HQ USAF/LGSS.

Base Supply Customer Training, Block IIB—Apr 95

Provides Due-In From Maintenance (DIFM) monitors the minimum essential knowledge of standard supply system processes and management products to provide these individuals the ability to effectively manage supply requirements and perform related duties.

Frequency: Upon assignment to duty. Personnel who have attended this training within the last 2 years are not required to attend.

Duration: Not to exceed duration specified in AFM 67-1.

Target Group: Due-In From Maintenance (DIFM) monitors.

Reference: AFM 67-1.

Course Manager: HQ USAF/LGSS.

Base Supply Customer Training, Block III—Apr 95

Provides on-base equipment custodians and alternates the minimum essential knowledge of standard supply system processes and management products to provide these individuals the ability to effectively manage supply requirements and perform related duties.

Frequency: Upon assignment to duty. Personnel who have attended this training within the last 2 years are not required to attend.

Duration: Not to exceed duration specified in AFM 67-1.

Target Group: On-base equipment custodians and alternates.

Reference: AFM 67-1.

Course Manager: HQ USAF/LGSS.

Emergency Power Generator Operator—Apr 95

Provides instruction and training on initial start-up and operation of manual start emergency power generators.

Frequency: Initial with refresher training as necessary.

Duration: Not to exceed 1 hour.

Target Group: Personnel assigned to operate emergency power generators.

Reference: AFI 32-1063.

Course Manager: HQ AFCESA/ENM.

Explosive Ordnance Reconnaissance Training—Apr 95

Provides instruction in recognition, marking, and reporting of unexploded ordnance that will be encountered after enemy attack on US and collocated installations overseas.

Frequency: Initial with refresher training at the discretion of the MAJCOM; limit refresher training to persons overseas and conduct in conjunction with chemical biological warfare defense training. Persons assigned to AF PRIME BEEF, CE RED HORSE programs, both CONUS and overseas, require annual training.

Duration: 30 minutes.

Target Group: All military personnel assigned overseas and those assigned to mobility positions within the continental United States (CONUS).

Reference: AFI 32-4001.

Course Manager: HQ USAF/CEOR.

Public Affairs Accident Procedures Briefing—Apr 95

Explains public affairs procedures for working with the news media and the release of information to the public.

Frequency: Annually.

Duration: Not to exceed 30 minutes.

Target Group: Selected security police, operations, maintenance, safety, medical, and other personnel assigned general or specific duties during accident operations.

Reference: AFR 190-1.

Course Manager: SAF/PAR.

Self Aid and Buddy Care—Apr 95

Provides very basic first aid training to include: control of bleeding, dressing and bandaging, burn care, fractures and splints, recognition and treatment of shock, victim transportation, nerve agent exposure symptoms and antidote usage. Attendees receive the didactic portion of the course via lecture and multimedia presentation. The practical portion is demonstrated by the instructor, who oversees student performance of learned skills.

Frequency: Initial with refresher training every 2 years.

Duration: 4 hours initial training; 2 hours refresher training.

Target Group: All nonmedical military personnel assigned overseas, those selected for overseas assignment, and those assigned to mobility positions in the continental United States (CONUS).

Reference: AFI 36-2238, DODD 6020.1.

Course Manager: HQ USAF/SGN.

General ATPs

Base Emergency Preparedness Orientation—Apr 95

Provides information and appropriate action to take on those types of attacks, major accidents, and natural disasters likely to occur at their installation. Emphasis is placed on applicable hazards, protective actions, and notification procedures.

Frequency: Upon PCS for military and initial hire for civilians; conduct in conjunction with Local Conditions Course II.

Duration: Not to exceed 1 hour for both courses.

Target Group: All Air Force military and civilian personnel.

Reference: AFI 32-4001.

Course Manager: HQ USAF/CEOR.

Command, Control, Communication, Computer (C4) Systems Security Awareness, Training, and Education Program (SATE)—Apr 95

Outlines various threats and level of vulnerability to C4 systems. Describes C4 systems security material (COMSEC, COMPUSEC, and TEMPEST), reason for special protection, and where information on protection is available. Explains command need, use of secure C4 systems, and points of contact for SATE assistance. Provides overview of threat to classified and sensitive data generated, stored, processed, transferred, or communicated by Air Force C4 systems. Cites countermeasures against the threat and how TEMPEST protects C4 systems.

Frequency: Upon PCS for Air Force military personnel and initial hire for civilians with annual refresher training via awareness ancillary training methods, such as: newspaper articles, read-and-sign items, pamphlets, bulletins, or commanders call.

Duration: Not to exceed 60 minutes.

Target Group: All Air Force military and civilian personnel.

Reference: AFI 33-204.

Course Manager: HQ AFC4A/SYI.

Counterintelligence Awareness and Briefing Program—Apr 95

Provides the threat posed by foreign intelligence, foreign government-sponsored commercial enterprises, terrorist, and international narcotics trafficking organizations; identifies the reporting requirements if a member receives a request for official information outside of official channels, has unofficial contact with a non-US citizen who is employed by a foreign diplomatic establishment, is contacted by a foreign intelligence service or terrorist group, has information regarding a planned or actual compromise of classified material, has information regarding the intentions of terrorist organizations, or is offered classified information.

Frequency: Military personnel will receive initial training during basic military training or precommissioning programs and recurring briefings upon PCS or at least every 3 years. Civilian personnel will receive initial training upon employment and recurring briefings every 3 years.

Duration: Not to exceed 30 minutes.

Target Group: All Air Force military and civilian personnel.

Reference: AFI 71-101.

Course Manager: AFOSI/XOP.

Driver Improvement, Course V—Apr 95

Provides instruction designed to improve the driving attitudes and mishap avoidance knowledge of motor vehicle operators. This course is not intended to rehabilitate DUI or DWI offenders.

Frequency: At the commander's discretion.

Duration: 8 hours.

Target Group: Air Force military and civilian personnel designated by their commanders as problem drivers.

Reference: AFI 91-207.

Course Manager: HQ AFSA/SEGO.

Experienced Rider Course, Course IVB—Apr 95

This course is conducted in two parts. First part contains four hours of audiovisual and lecture in the classroom. The second part is riding skill training with an evaluation for those riders who have some riding experience but otherwise have no formal training.

Frequency: One time.

Duration: 8 hours.

Target Group: Air Force military and Air Force civilian personnel who register or operate a motorcycle on an Air Force base and who have some riding experience.

Reference: AFI 91-207, DODI 6055.4.

Course Manager: HQ AFSA/SEGO.

First Duty Station Orientation—Apr 95

Provides DOD, Air Force, and commander policies on equal opportunity and substance abuse; emphasizes quality force aspects of the programs; provides basic guidance, procedures, and practices to support positive human relations and avoidance of substance abuse.

Frequency: One time; upon PCS to first duty station.

Duration: 5 hours for human relations education and 2 hours for drug and alcohol education.

Target Group: All Air Force military and DOD civilian personnel at first permanent duty station.

Reference: AFI 36-2701, DODD 1010.4, DODD 1350.2.

Course Manager: HQ USAF/DPCH.

Law of Armed Conflict—Apr 95

Provides specialized training in the international law rules applicable to armed conflict. Course includes training required by the 1949 Geneva Conventions for the Protection of War Victims and the Hague Convention IV of 1907.

Frequency: Annually.

Duration: Not to exceed 1 hour.

Target Group: Air Force military personnel, with special attention to those most likely to be engaged in armed conflict (e.g. aircrews, security police, medical personnel).

Reference: AFPD 51-4.

Course Manager: HQ USAF/JAI.

Local Conditions Course II—Apr 95

Provides traffic safety education for local base and community traffic environments with proven mishap potential.

Frequency: Upon PCS for Air Force military personnel and initial hire for civilians; conduct in conjunction with Base Emergency Preparedness Orientation.

Duration: Not to exceed 1 hour for both courses.

Target Group: All Air Force military and civilian personnel.

Reference: AFI 91-207.

Course Manager: HQ AFSA/SEGO.

Motorcycle Riders' Course: Street Riding Skills, Course IVA—Apr 95

This course is conducted in two parts. First part contains four hours of audiovisual and lecture in the classroom. The second part is riding skill training with an evaluation for those riders who are novices or who have very little to no hands-on experience.

Frequency: One time.

Duration: 15 hours.

Target Group: Air Force military and Air Force civilian personnel who register or operate a motorcycle on an Air Force base and who have little or no riding experience.

Reference: AFI 91-207, DODI 6055.4.

Course Manager: HQ AFSA/SEGO.

Overseas Orientation—Apr 95

Provides information about conditions in the local overseas area.

Frequency: Within 30 days of arrival overseas.

Duration: Not to exceed 90 minutes.

Target Group: All Air Force military and civilian personnel.

Reference: AFI 36-2701.

Course Manager: HQ USAF/DPCH.

Protection from Terrorism—Apr 95

Provides information necessary to understand the nature of the terrorist threat worldwide, manifestations and indicators of the threat, and personal protective measures that can be taken to reduce vulnerability to the threat.

Frequency: Upon PCS for Air Force military personnel and initial hire for civilians with refresher training at discretion of MAJCOM.

Duration: Not to exceed 30 minutes.

Target Group: All Air Force military and civilian personnel TDY or assigned overseas.

Reference: AFI 31-210.

Course Manager: HQ AFSPA/SPLE.

Supervisor Safety Training—Apr 95

Provides the knowledge required to fulfill supervisor responsibilities in the Air Force Occupational Safety Health Program. Student will have a better understanding of Air Force safety philosophy, safety program, and the tools used by the supervisor to implement the program.

Frequency: One time.

Duration: 3 hours.

Target Group: All Air Force military and civilian personnel who initially occupy a supervisory position.

Reference: AFI 91-301.

Course Manager: HQ AFSA/SEGO.

Uniform Code of Military Justice—Apr 95

Explains the UCMJ, UCMJ Articles 2, 3, 7-15, 25, 27, 31, 38, 55, 77-134, and 137-139, and discharge certificates, basis for their issuance, and possible future effects.

Frequency: Within 30 days of a member's sixth month on active duty, and within 30 days of a member's first reenlistment.

Duration: Not to exceed 1 hour.

Target Group: All first and second term Air Force enlisted personnel.

Reference: AFI 51-201, DODD 1332.14.

Course Manager: HQ AFLSA/JAJM.

Awareness ATPs

Command, Control, Communications, and Computer (C4) Systems Security Awareness, Training, and Education Program (SATE) Annual Refresher Training—Apr 95

Reference: AFI 33-204.

Course Manager: HQ AFC4A/SYI.

Firearm Safety and Use of Force—Apr 95

Reference: AFMAN 31-222.

Course Manager: HQ AFSPA/SPLE.

Operations Security—Apr 95

Reference: AFI 10-1101.

Course Manager: HQ USAF/XOXT.

Personal Financial Responsibility—Apr 95

Reference: AFI 36-2906.

Course Manager: HQ AFPC/DPMASC.

Protection of the President—Apr 95

Reference: AFI 71-101, volume 2.

Course Manager: HQ AFOSI IOC/DFO.

Standards of Conduct—Apr 95

Reference: DOD 5500.7R, Joint Ethics Regulation (JER).

Course Manager: HQ USAF/JAG.

Resource Protection—Apr 95

Reference: AFI 31-209.

Course Manager: HQ AFSPA/SPLE.

L3AQR9S100 400	Electronic Principles	W4M	3-272
L3AQR9S200 400	Electronic Principles	W4M	3-273
LMABM9T000	Basic Military Training, USAF Male/Female	998	3-273
LMABM9T000 001	Basic Military Training, USAF Academy Preparatory		3-273
AFCESA 3E2X1	Heavy Equipment Warskills Proficiency Training	9H7	11-6
L5AZN60252 000	Transportation/Storage of Hazardous Materials Recertification	3W9	3-305

(Alphanumeric Course Numbers)

AAP-001	Aerial Application of Pesticides	2EV	11-34
ACC AFCOMAC	ACC Combat Ammunition Planning and Production Course	8RM	8-58
ACC AIC 100	ACC Academic Instructor Course	XJE	8-54
ACC COTC	CTAPS Operator/Technician Course (COTC)	77K	8-51
ACC INTELIDOZN	USAF Intelligence Weapons Instructor Course	NU4	8-56
ACC INTELIDIZN	USAF Intelligence Weapons Instructor Upgrade	WFM	8-56
ACC JAOSC	Joint Air Operations Staff Course (JAOSC)	77L	8-52
ACC JFCC	Joint Firepower Control Course (JFCC)	4WS	8-52
ACC SQ CC	ACC Squadron Commander Course	OTP	8-53
ACC TBMSAC	Theater Battle Management System Administrator Course	4RQ	8-51
ACC1741HAOODT	Air Weapons Controller Automated Systems Qualification Training Basic Course	VG5	8-54
ACC174101AA	Adversary Tactics Controller Course	VZN	8-55
ACC1745IDIN	USAF Weapons School Instructor Upgrade Air Weapons Controller	86E	8-55
ACC13B3B/C/DIDOZN	USAF Weapons Instructor Course, CCO	32N	8-55
ACC303030	G-Tolerance Training	7N9	8-56
ACC 8045 005	Advanced Systems Training	8K1	8-55
49XXB16/491X2B16	JSS Operations Course	WHW	8-57
49XXH17/491X2H17	JSS Programmer Course	WHX	8-57
ACW90-000	Intro to CONSTANT WEB	8ZS	11-30
AFIC 002	HUMINT Collection Tradecraft Course (HCTC)	APG	11-30
AFIS 001	Combat Interrogation Course (CIC)	AQK	11-30
AFIS 003	Intelligence Continuing Education Program (ICEP) (Graduate)	5PH	11-6
AFIS 004	Field Interrogation Operations Course (Reserve)	EJW	11-7
SAS002	Computer Resources Acquisition Course	8B3	4-100
SAS010	Laboratory Acquisition Management Course	VWV	4-100
SAS011	Integrated Product Support Course (IPSC)	XW4	4-100
SAS013	Risk Management Course	X47	4-101
SAS014	AFMC/DCMC Teaming for Product Management	1QI	4-101
SAS015/SAS015(DL)	Acquisition Excellence Course	20Y	4-102
SASW01	Conflict Resolution for Acquisition Managers	7BC	4-101
AFMC SCO	AFMC Squadron Commanders' Orientation	4YV	11-7
AFMIC-IN-1	Introduction to Medical Intelligence	9XB	12-4
AFSCPCGOPD	AFSPC Company Grade Officers Professional Development	ORQ	9-1
AFSPCHRST1	Helicopter Rope Suspension Training (HRST) Initial	163	9-1
AFSPCSQCMDCRS	AFSPC Squadron Commander Training Course	0E8	9-1
AFSPC15W3A 001	Space Environmental Forecaster	1RP	9-1
AFSPC15W3A 002	Ionospheric Effects Forecaster	1RQ	9-1
AFSPC2500 000	SOON Operators	YH5	9-1
AFSPC2600	RSTN Operator	K7M	9-2
AFSOC142002	Latin American Orientation Course (LAOC)	4ST	11-22

AFSOC143502	Joint Psychological Operations Course (JPOC)	RVG	11-22
AFSOC145002	Middle East Orientation Course (MEOC)	TN3	11-23
AFSOC146002	Cross-Cultural Communications (CCC)	X9C	11-23
AFSOC147002	Dynamics of International Terrorism (DIT)	X9D	11-23
AFSOC148002	Crisis Response Management (CRM) Workshop	X9E	11-23
AFSOC149002	Joint Special Operations Planning Workshop (JSOPW)	30R	11-23
AFSOC150002	Joint Senior Psychological Operations Course (JSPOC)	86X	11-23
AFSOC151002	Africa Orientation Course (AOC)	86Y	11-24
AFSOC152002	Southeast Asia Orientation Course (SEAOC)	98V	11-24
AFSOC154002	Joint Special Operations Staff Officer Course (JSOSOC)	JAU	11-24
AFSOC155002	Introduction to Special Operations (ISOC) Course	LZL	11-24
AFSOC156002	Revolutionary Warfare Course (RWC)	LZP	11-24
AFSOC157002	Civil-Military Strategy for Internal Development Course (CMSID)	W2V	11-25
AFSOC158002	Joint Aviation Foreign Internal Defense (JAFID)	WA7	11-25
AFSOC159001	C-130 Dynamic Propeller Balancing/Engine Vibration Troubleshooting	1IA	11-25
AFSOC160001	Helicopter Track & Balance/Vibration Troubleshooting Training (MH/TH-53 - HH/MN-60 - HH/UH-1)	1IB	11-25
AFSOC161001	Advanced Aircraft/Engine Vibration and Analysis Training	1IC	11-25
AIA 002	USAF SCI Security Management Course	0P2	11-6
AMQ100 000	Quality Assurance Evaluator (QAE) Training	2R2	9-2
AN/TSC-114MX	AN/TSC-114 MARC Maintenance	W9W	7-19
CATS/Airlift	Airlift CATS	CUC	8-58
CIMIC	Civil Military Cooperation (CIMIC)	WMX	12-7
C-21	ACE NBC Defense Course	8F1	12-7
C-24	Environmental Orientation Course for Base and Installation Commanders and Staff	1SB	12-7
C-25	ACE Exercise and Evaluafion Staff Course for NBC Incidents	8F3	12-7
C-28	Responsibilities of Military Forces in Environmental Protection	WQJ	12-8
C-30	Resource Management Education Program Course	1SE	12-8
C-50	ACE Peacekeeping Course	1RT	12-8
C-51	Multinational Forces	093	12-8
CI-22	NATO Basic NBC Defence Automated Data	1RY	12-8
CI-39	Reserve Forces and Mobilization Course	WQK	12-9
C/I-18	Conventional Armed Forces Europe (CFE) Verification Inspector/Escort Procedures	WMV	12-8
C/I-36	Abbreviated ACE Staff Officers' Orientation	8GA	12-8
C/I-37	NATO Civil Emergency Planning/Civil-Military Cooperation (CEP/CIMIC)	9FB	12-9
CP-202	Operational Computer Security	K2W	11-33
CRI	Criterion Referenced Instruction Course	6YZ	12-9
CRI-1	Criterion Referenced Instruction Course	ZSQ	11-29
DIRMOBFOR	Director of Mobility Forces (DIRMOBFOR)	X0Q	7-19
E3ACOC001	Communication Operator	6YV	12-15
E3ACTC001	Communications Technician	6YW	12-15
E3ADTC001	Computer Display Technician	6YY	12-15
E3AEC001	Flight Engineer	6YP	12-16
E3ANC001	Navigator	6YN	12-16
E3APC001	Pilot/Copilot	6YM	12-16
E3ARTC001	Radar Technician	6YX	12-16
E3ASOC001	Surveillance Operator	6YU	12-16
E3ATDC001	Tactical Director	6YQ	12-16
E3AWCC001	Weapons Controller	6YS	12-17
E3SCC001	Surveillance Control Officer	6YT	12-17
FA	Flight Allocator	6YR	12-9
FECOC	Tactical Fighter Electronic Combat Officer Course (FECOC)	XSX	8-54
G-119	Foreign Affairs Interdepartmental Seminar	V28	11-34
IAAFA-X-75000	Technical Training Instructor	S30	8-54
ICBM-CEIC	Communications Evaluator Course	X25	9-2
ICBM-CMEIC	Communiations Management Evaluation Course	X27	9-2
ICBM-IC	ICBM Maintenance Instructional Technique	X22	9-2
ICBM-MEIC	Munitions Evaluator/Inspector Course	X24	9-2
ICBM-MIC	ICBM Maintenance Inspector Course	X23	9-3
ICBM-MQAC	Missile Maintenance Management Quality Assurance Course	X26	9-3
IGC	USAF Complaints Course	137	11-7
IGI	The USAF Inspection School	PLS	11-7
I-10	NATO Staff Officer's & Augmentees' Nuclear Operations Course	JCF	12-9
I-11	ACE Air to Surface Conventional Weaponeering Procedures Course	8AP	12-9

I-12	ACE DCA/Nuclear Weaponeering Procedures Course	8FZ	12-9
I-14	ACE Targeting Procedures	8F0	12-9
I-17	NATO Site Security Supervisors	MTD	12-10
I-19	NATO Counter-Command, Control, and Communications (Counter-C3) Course	WQH	12-10
I-27	Survive to Operate (STO) Evaluator's Course	CND	12-10
I-31	ACE Senior Officers' Orientation	8F5	12-10
I-32	ACE Staff Officers' Orientation	8F6	12-10
I-33	NATO ACE Officers' Nuclear Policy	8F7	12-10
I-34	NATO Special Course for Conference for Security and Confidence in Europe (CSCE)	8F8	12-10
I-35	ACE Command and Control	8F9	12-10
I-38	Crisis Management Course	WN1	12-11
I-41	NATO Joint Service Advanced Electronics Warfare Staff Officers' Course	8GB	12-11
I-42	NATO Joint Service Introductory Electronic Warfare Course	8GC	12-11
I-43	NATO Joint Service Course for Electronic Warfare Planning and Analysis in Exercise	8GD	12-11
I-44	Electronic Warfare in Joint ACE Operations	8GE	12-11
JC2WSOC	Joint Command and Control Warfare Staff and Operations Course	JMR	12-4
JOPES/ADV	JOPES Specialty Course	206	12-18
JOPES/BOC	JOPES Basic Operations Course	204	12-18
JOPES/TS3	Top Secret Support System (TS3) Course	205	12-18
L-01	NATO Communications and Information System (CIS) Course	WMC	12-11
L-40	Status, Control, Alerting and Reporting System II (SCARS II) A Site Supervisory Operator	WMD	12-11
L-41	Status, Control, Alerting and Reporting System II (SCARS II) A Site Chief User	WME	12-11
L-42	Status, Control, Alerting and Reporting System II (SCARS II) A Site User	WMF	12-12
L-43	Status, Control, Alerting and Reporting System II (SCARS II) Site Security Officer	WMG	12-12
L-44	Status, Control, Alerting and Reporting System II (SCARS II) B Site User	WMH	12-12
L-45	Status, Control, Alerting and Reporting System II (SCARS II) B Site User/Operator	WMJ	12-12
L-46	Status, Control, Alerting and Reporting System II (SCARS II) A Site Technician Course	WMK	12-12
L-47	Status, Control, Alerting and Reporting System II (SCARS II) B Site Technician Course	WML	12-12
L-50	NATO Secure Voice (NSV) Technician Course, Category I	WMM	12-12
L-51	NATO Secure Voice (NSV) Technician Course, Category II	WMN	12-13
L-52	NATO Secure Voice (NSV) Technician Course, Category III	WMP	12-13
L-64	BIS-610/700 Technician Course	WMQ	12-13
L-65	BID-1000 Technician Course	WMR	12-13
L-71	IVSN Standard Interface Equipment/Circuit Conditioning Equipment (SIE/CCE) Installation and Maintenance	WMS	12-13
L-90	Telegraph Automatic Relay Equipment (TARE) Technician	WMT	12-13
L-91	Telegraph Automatic Relay Equipment (TARE) Operator Course	WMU	12-13
MHPQUA000100SU	Quality Leadership for Managers	W2G	11-7
MHPQUA000400SU	Quality Participation for Employees	W2K	11-8
MKHQUA0003400SU	Process Action Team	W2H	11-8
MLKQUA0003200SU	Basic Tools	W2M	11-8
MLKQUA0003300SU	Advanced Tools	W2F	11-9
MMUQUA0003100SU	Facilitator	W2E	11-9
MRXQUA0003500SU	Statistical Process Control (SPC)	W2N	11-9
MTECCS0025700SU	Engineering Installation Project Engineering Course	8YF	11-9
MTECCS0026100SU	Electronics Installation Team Chief Course	8XZ	11-10
MTECCS0026300SU	Engineering Installation Program Managers Course	PDR	11-10
MTEQUA0000300SU	Introduction for New Employees	W2J	11-10

SAM-TM	Defense Security Assistance Management–Training Management	5R7	12-7
SAM-TOI	Defense Security Assistance Management–Training Officer Course	1GK	12-7
SFAGCSAD1	SILVER FLAG ALPHA, Ground Combat Skills	XXM	8-47
S-V91-A	DOD High Risk Training	LXH	11-33
S-V93-A	DOD Hostage Survival Training	N4Z	11-33
TAC228590	Electronic Combat Familiarization	83W	8-56
TAC303031	G-Tolerance Training	GD4	8-57
TAC303RE 000	Ground Radar Evaluation Course	8YJ	8-57
TAC303RE 001	Ground Radar Evaluation Course	8YW	8-57
TDC0001	Tactical Deception Planners Course	2EY	11-5
USAFECASC	Close Air Support Course	8GR	12-14
USAFEJCOC	Joint Combat Operations Course	8GQ	12-14
USAFE8045 005	Advanced Systems Training	8K1	12-15
USAFESQCC	USAFE Squadron Commanders Course	20L	12-14
Y120006	ACC Life Support Instructor Course	XLK	8-48
Y120008	Air Weapons Seminar	EHV	8-48
Y120010	Curriculum Designer Course	VCY	8-48
Y120013	Air Force Operations Resource Management System (AFORMS)	EJP	8-48
ACC JETS	Joint Employment Tactics Course - Striker	77G	8-52
ACC SOJETS	Joint Employment Tactics Course - Senior Officer	9FC	8-53
Y120022	Classroom Instructor Course	L18	8-48
Y120023	ACC Unit Command Control Trainer's Course	7LA	8-48
Y120024	ACC Unit Command Control Leadership/Management Symposium	X11	8-48
Y120025	ACC Unit Command Control Reports Course	X12	8-48
Y120026	Mission Data Preparation System (MDPS) Initial Operators Course	X13	8-49
Y120027	Conventional Mission Planning and Preparation System (CMPPS) Initial Operators Course	X14	8-49
Y120028	Mission Support System (MSS) II System Administrator Course	X15	8-49
Y120030	Air Force Mission Support System (AFMSS) Administrator Course	X17	8-49
Y120031	USAF STARS Opertions Course	X18	8-49
Y120032	Conventional Air Weapons and Operations Course	097	8-49
Y120033	Nuclear Air Weapons Officer Course	098	8-49
Y130001	ACC Chief of Safety Program Management Course	RW4	8-50
Y130002	ACC Weapons Safety Program Management Course	EHF	8-50
Y130003	ACC Flight Safety Program Management Course	92A	8-50
Y130004	ACC Safety Investigation Board Presidents and Accident Investigation Course	92B	8-50
Y130005	ACC Ground Safety Program Management Course	Y65	8-50
Y140009	ACC Production Superintendent Course	92C	8-50
Y140015	ACC Instructor Course	X0V	8-50
Y140018	FSM Plans, Scheduling, and Documentation (PS&D)	X0Y	8-50
Y140019	Engine Management Branch (EMB) Scheduler/Documenter	X0Z	8-50
Y140020	ACC Maintenance Training Management	X10	8-50
Y140021	ACC Instructional Systems Designer	XXL	8-51
Y190001	High Altitude Life Support Systems and Survival Course	3D9	8-51
183500 000	Missile Ort, Airborne Launch Control System	XLH	8-51
3EXXX	SILVER FLAG Exercise Site Certification	0X8	11-6
4925 C	JOPES Functional Manager Course	273	12-17
4925 E	GTN User's Course	275	12-17
4925 F	GTN Functional Data Base Manager Course	276	12-17

8/B/3	Overseas Officers' and Senior NCOs' EOD Course	8GF	12-14
8/B/16	NATO Officers and Senior NCOs' IED Disposal	8GG	12-15
8/B/17	Overseas Officers and Senior NCOs' IED Disposal Course	8GH	12-15
8/B/20	NATO Staff Officers' IED Familiarization	8GJ	12-15
955PAC16200 010	PACAF Vehicle Maintenance Supervisor's Course	ERB	11-35
955PAC16200 011	Advanced Systems Training	8K1	11-35

Section C–Medical And Dental Training

	Masters of Physical Therapy Program		5-6
AFMCSAS012	Basic Systems Acquisition Management (Medical)	XF7	2-26
L3OQR4000 000	Medical Readiness Indoctrination	68G	3-290
J3ORR4000 011	Medical Red Flag (Reserve)	WDA	3-290

TERMS EXPLAINED

Administrative Instructions—Information of a general nature not governed by an Air Force directive. Command procedures for establishing or submitting training requirements. School information needed in addition to the student's reporting instructions.

Command Course—A course operated by a major command primarily for the benefit of that command.

Course Duration—Courses normally operate 8 hours a day, 5 days a week. Lengths are shown in academic days when less than a week, academic weeks, or a combination of academic weeks and days (para 1.1.2).

Course Title—For formal basic, lateral, and advanced technical courses for airmen and officers, course title is same as current AFMAN 36-2105 (formerly AFR 36-1) or AFMAN 36-2108 (formerly AFR 39-1) title of AFS toward which course trains. For all other courses title depicts course content and may include such elements as type of aircraft or specific equipment.

Defense Switching Network (DSN)—Formerly Automatic Voice Network (AUTOVON).

DoD Officer and Enlisted Occupational Conversion Groupings— These groupings are compilations of all occupational specialties used in the Armed Forces, arranged under common DoD occupational areas and groups. They are primarily designed as instruments for use in manpower management and policy planning studies on DoD-wide basis, and as basis for related statistical report to Office of the Secretary of Defense.

English Comprehension Level (ECL)—English comprehension test score and appropriate English specialized terminology test. Prerequisite for course entry for foreign students.

Extension Courses—The USAF Extension Course Program is a program of correspondence courses which extends the educational and training capabilities of AF schools and colleges to all eligible personnel in the field on a self-study basis. The program is administered by the Extension Course Institute (ECI) located at Maxwell AFB-Gunter Annex AL, and is operated under the command supervision of the commander, College of Aerospace Doctrine, Research, and Education (CADRE), through AU and AETC, in accordance with policies approved by HQ USAF.

Flying Training—Training in the art or skill of manning or operating aircraft or aircraft equipment in any capacity. Flying training also includes courses associated with flying such as survival training and space operations training. Flying training courses are announced in the appropriate command chapter. Additional information of a programming nature, such as class entry rates, may be found in the DAF Program Flying Training (PFT), volumes I and II. Volume I lists courses conducted or monitored by AETC and is the responsibility of HQ USAF/MPFF. Volume II lists courses conducted or monitored by other MAJCOMs and is the responsibility of HQ USAF/XOO.

Military Articles and Services List (MASL) DXXXXXX— Number assigned in the DOD MASL for use by security assistance agencies in programming and costing a training course.

Military Manpower Training Report (MMTR) Category—The MMTR is required by Paragraph 10 US Code 138(d)(2) and is submitted to Congress each year on 1 March. This report provides justification for the requested training loads for the various types of formal training for which manpower and money are budgeted. The codes listed are used to facilitate accumulation of the required data and conform to OASD requirements. The correct use of codes is essential to accurate reporting. The applicable MMTR Category codes are:

Code		DOD Training Category
1	*	Recruit Training
2		Officer Acquisition Training
2A		Service Academies
2A1	*	Academy
2A2	*	Academy Preparatory Schools
2B	*	Platoon Leaders Course (PLC) and other programs in which participants are not included in active force duty and strengths.
2C	*	Officer Candidate/Training Schools

5C5	*	Other Full-Time Education Programs, Not Fully Funded
5D	*	Health Professions Education
6	*	Multiple Category Training: Includes only Army One-Station Unit Training (OSUT)

Military Training—Training in military skills, knowledge, and attitudes essential to effective performance as a member of the Armed Forces.

Personnel Data System (PDS) Code—The PDS code is used in the Personnel Data System to record attendance at training courses. It is an integral part of course identification information and must be included in special orders, certificates of completion, and other places in which course identification information is required. Two types of codes are used in this manual.

a. The Course Number, CO-820-11, AFR 700-20, volume I, is for specialty, technical, and flying training courses. A code is assigned by HQ AETC upon request from the command having jurisdiction over the course (see para 1.9).

b. The PR-560-XII, AFR 700-20, volume I, is for professional military courses. HQ USAF assigns the code upon request from DoD or AU.

Pipeline Student—Newly inducted enlisted member undergoing processing, orientation, basic training, or formal training immediately following BMTS. This includes airman basic, airman, and airman first class airmen arriving at a technical training center for formal training as an eliminee from another training center, regardless of length of course from which eliminated or length of course protected to attend. These are airmen (airman basic through airman first class) not yet assigned PCS to an operational unit as a permanent party member.

Professional Military Training—Training in resident courses in one of the Department of Defense colleges or in one of the resident or nonresident courses of the Air University that improves an officer's general qualifications and ability in military science and tactics.

Professional Specialty Training—Training in formal resident course of general educational values which improves an officer's general qualifications and ability to perform commissioned duties, but is not necessarily designed specifically to enable him or her to perform one or more of the tasks contained in an AFS description. This training includes courses conducted in the program of the Air Force Institute of Technology (AFIT) and those which advance the qualifications of officers whose specialties lie in the field of medicine, law, or theology. These courses are announced in appropriate command chapters.

Reporting Instructions—These instructions include the unit of assignment, time and building number or individual to which the student reports. Reporting instructions may also include the required records and number of copies of orders to be hand-carried and special protocol instructions, if necessary.

Specialized English Training (SET)—This training deals with special terminology required in a specific career field or job. Individuals destined for career fields with "a language of their own," follow on to SET from General English before proceeding to their follow-on technical or professional military training. SET Required (SR) and SET Advised (SA) are terms used to designate whether the SET is required or advised as a prerequisite to follow-on training. The SR requirement is limited to courses and career fields where it would be unsafe for a person to attend without SET. For courses designated SA, the using agency or allied country determines if a student will attend SET. SR and SA are used in conjunction with English Comprehension Level (ECL) scores.

Standby Course—A course in standby status is one in which a capability for training exists, but entries have been discontinued temporarily. Training will resume when new requirements are established.

Technical Training—Training in one or more of the tasks in an Air Force specialty description conducted in formal schools, field training detachments, and through organized on-the-job training programs. Distinguished from flying, basic military, and professional training. Formal or resident technical training is conducted in an officially designated course in accordance with appropriate course charts, training standards, and training objectives. Field training courses are also conducted in a formal manner (see j below). Additional information, such as total programmed entries and graduates, may be found in the Department of the Air Force Program Technical Training (PTT).

a. Airman Basic Technical Training—Formal training designed to train toward the skilled level of an AFS in a career field ladder. It results in award of AFSC at the semi-skilled level. In some instances, retraining from one AFS to another AFS is accomplished in the airman basic resident course (AFI 36-2204 [formerly AFR 39-4]). Airman basic courses are conducted for the sole purpose of meeting USAF TPRs.

b. Airman Lateral Training—Formal training leading to award of 3-level AFSC by qualified 3-level or higher airman for lateral movement within a career field; or as an interim measure preceding a change in existing career structure; or to provide temporary personnel support of a lateral nature. Source of entry is semi-skilled level or higher qualification in another ladder. Airman lateral courses are conducted for the sole purpose of meeting USAF TPRs.

c. Airman Supplemental Training—Training toward a portion of an AFS without change by AFSC¾formal training on new equipment, methods and technology that are not suited for on-the-job training.

d. Airman Advanced Training—A formal course training toward a technical or supervisor level AFS. Training is for selected career airmen in the advanced technology of the AFS. Training is normally restricted to senior NCOs. Graduates are not awarded a new AFSC.

e. Officer Basic Technical Training—Formal training leading to award of single operating or technical AFSC at entry level. These courses are in support of the USAF officer TPRs.

f. Officer Lateral Training—Formal training leading to award of an entry level AFSC by qualified officers for lateral movement within a career field; or as an interim measure preceding a change in existing career structure; or to provide temporary personnel support of lateral nature. These courses are in support of the USAF officer TPRs.

g. Officer Supplemental Training—Formal training toward portion of an AFS without change in AFSC.

h. Officer Advanced Training—Formal training course designed to facilitate qualification of individuals in staff level AFS. Graduates are awarded the appropriate AFSC at entry level. Each such course provides technical instruction relative to all operating or technical AFS included in occupational field, or an appropriate homogeneous group of AFSs in a field. These courses are in support of the USAF Officer TPRs.

i. Reserve Refresher Training—Formal training for inactive duty Reservists to freshen and update their skills and knowledge in a given field associated with their AFS. Student must have AFSC pertinent to the course or be in training toward that AFSC.

j. Field Training—Technical training conducted at the operational location on assigned aircraft, space, and missile system, and their associated direct support equipment, for maintenance and aircrew or operator personnel. It is conducted by field training activities of the Air Training Command. Field training covers such subjects as transition, familiarization, special training (AFI 36-2202 [formerly AFR 50-9]), proficiency, refresher, upgrade, and cross-training. It also includes types A, B, C, D, E, and F on-the-job advisory service as defined in AFI 36-2201 (formerly AFR 50-23). It may include the integrated weapon system training (IWST) (formerly known as crew training) when approved in accordance with AFI 36-2201 (formerly AFR 50-23). Field training does not relieve the commander of his or her responsibility for providing any training necessary to his command for the success of his or her mission and the aims of the Air Force (see chapter 6 and AFI 36-2202 [formerly AFR 50-54]).

k. Special Training (formerly AFR 50-9)—Formal training to qualify skilled level or supervisory/technician level personnel in maintaining and operating new or special equipment, or in new operational techniques and procedures. These are two categories of special training: Category R courses essentially involve retraining in a new AFS and result in a change of AFSC. Special training is authorized, established, and controlled in accordance with AFI 36-2202 (formerly AFR 50-9). Normally all special training courses are short in duration and are designed to meet requirements for training on equipment and process of an emergency nature. Announcements for special training courses ordinarily are not included in this manual because of the transitory nature and restricted application of the information. Course data, such as location, duration, and security clearance requirement are announced with quotas are allocated.

l. International Language Training—Mandatory foreign language training which is dictated by the mission to be performed by the trainee upon completion of training. This mission-required training consists of:

(1) Full-time training, during which time trainees perform no duties other than learning the language. Courses are conducted at civilian universities, colleges, and commercial language schools by contract or by government agencies at their own facilities.

(2) Collateral training, during which time trainees perform other duties, usually training in the AF specialty in which they will use the foreign language. 2 AF/DOP is responsible for programming all USAF foreign language training requirements.

Trained Personnel Requirements (TPR):

a. Airmen. The number of airmen, by AFS, to be trained or retrained to meet production requirements during the current and 2 subsequent years, as stated in the Airman Trained Personnel Requirements Document by the Director of Personnel Programs, HQ USAF.

b. Officer. The number of officers, by AFS, to be trained to meet entry requirements during the current year, as stated in the Officer Trained Personnel Requirements Document by the Director of Personnel Procurement, HQ AFMPC.

Travel Status, Types:

a. PCS—The transfer of place of duty and assignment from one permanent duty station to another. The new permanent duty station is the school location where assigned.

b. PCS without PC—The transfer of place of duty without change of assignment from one permanent duty station to another. The new place of duty is the school location. The place of assignment remains the old permanent duty station.

c. PCS with TDY en route—The transfer of place of duty and assignment from one permanent duty station to another, with temporary duty at one or several school locations before reporting for duty at a new permanent duty station. The new permanent duty station must be designated in the travel orders.

d. TDY—Temporary duty at a school location other than the permanent duty station to which assigned. Upon completion of temporary duty the student returns to the same permanent duty station from which he or she departed.

e. Air Reservists on active duty for not more than 6 months to attend school are in a status similar to PCS.
